A Grammar of the Greek New Testament in the Light of Historical Research

BY

A. T. Robertson, M.A., D.D., LL.D., LITT.D.

Ἐξομεν δὲ τὸν θησαυρὸν τοῦτον ἐν ὀστρακίνοις σεόμεσιν, ἵνα ἡ ὑπερβολὴ
tῆς δυνάμεως ἡ τοῦ θεοῦ καὶ μὴ ἐξ ἡμῶν.

—2 Cor. 4:7

[PAGE VII] PREFACE

It is with mingled feelings of gratitude and regret that I let this book go to the public. I am grateful for God’s sustaining grace through so many years of intense work and am fully conscious of the inevitable imperfections that still remain. For a dozen years this Grammar has been the chief task of my life. I have given to it sedulously what time was mine outside of my teaching. But it was twenty-six years ago that my great predecessor in the chair of New Testament Interpretation proposed to his young assistant that they together get out a revised edition of Winer. The manifest demand for a new grammar of the New Testament is voiced by Thayer, the translator of the American edition of Winer’s Grammar, in his article on “Language of the New Testament” in Hastings’ Dictionary of the Bible.

THAYER, J. H., Greek-English Lexicon of the N. T. (1887).

———, Language of the N. T. (Hastings’ D. B., 1900).
I actually began the work and prepared the sheets for the first hundred pages, but I soon became convinced that it was not possible to revise Winer’s Grammar as it ought to be done without making a new grammar on a new plan. So much progress had been made in comparative philology and historical grammar since Winer wrote his great book that it seemed useless to go on with it. Then Dr. Broadus said to me that he was out of it by reason of his age, and that it was my task. He reluctantly gave it up and pressed me to go on. From that day it was in my thoughts and plans and I was gathering material for the great undertaking. If Schmiedel had pushed through his work, I might have stopped. By the time that Dr. James Hope Moulton announced his new grammar, I was too deep into the enterprise to draw back. And so I have held to the titanic task somehow till the end has come. There were many discouragements and I was often tempted to give it up at all costs. No one who has not done similar work can understand the amount of research, the mass of detail and the reflection required in a book of this nature. The mere physical effort of writing was a joy of expression in comparison with the rest. The title of Cauer’s brilliant book, *Grammatica Militans* (now in the third edition), aptly describes the spirit of the grammarian who to-day attacks the problems of the language of the New Testament in the light of historical research.

From one point of view a grammar of the Greek New Testament is an impossible task, if one has to be a specialist in the whole Greek language, in Latin, in Sanskrit, in Hebrew and the other Semitic tongues, in Church History, in the Talmud, in English, in psychology, in exegesis.1 I certainly lay no claim to omniscience. I am a linguist by profession and by love also, but I am not a specialist in the Semitic tongues, though I

Cauer CAUER, Grammatica Militans. 3d ed. (1912).

1 Cf. Dr. James Moffatt’s remarks in The Expositor, Oct., 1910, p. 383 f.
have a working knowledge of Hebrew and Aramaic, but not of Syriac and Arabic. The Coptic and the Sanskrit I can use. The Latin and the Greek, the French and German and Anglo-Saxon complete my modest linguistic equipment. I have, besides, a smattering of Assyrian, Dutch, Gothic and Italian.

I have explained how I inherited the task of this Grammar from Broadus. He was a disciple of Gessner Harrison, of the University of Virginia, who was the first scholar in America to make use of Bopp’s Vergleichende Grammatik. Broadus’ views of grammar were thus for long considered queer by the students who came to him trained in the traditional grammars and unused to the historical method; but he held to his position to the end.

This Grammar aims to keep in touch at salient points with the results of comparative philology and historical grammar as the true linguistic science. In theory one should be allowed to assume all this in a grammar of the Greek N. T., but in fact that cannot be done unless the book is confined in use to a few technical scholars. I have tried not to inject too much of general grammar into the work, but one hardly knows what is best when the demands are so varied. So many men now get no Greek except in the theological seminary that one has to interpret for them the language of modern philology. I have simply sought in a modest way to keep the Greek of the N. T. out in the middle of the linguistic stream as far as it is proper to do so. In actual class use some teachers will skip certain chapters.

Alfred Gudemann,² of Munich, says of American classical scholars: “Not a single contribution marking genuine progress, no work on an extensive scale, opening up a new perspective or breaking entirely new ground, nothing, in fact, of the slightest scientific value can be placed to their credit.” That is a serious charge, to be sure, but then originality is a relative matter. The [Page ix] true scholar is only too glad to stand upon the shoulders of his predecessors and give full credit at every turn. Who could make any progress in human knowledge but for the ceaseless toil of those¹ who have gone before? Prof. Paul Shorey,² of the University of Chicago, has a sharp answer to Prof. Gudemann. He speaks of “the need of rescuing scholarship itself from the German yoke.” He does not mean “German pedantry and superfluous accuracy in insignificant research—but … in all seriousness from German inaccuracy.” He continues about “the disease of German scholarship” that “insists on ‘sweat-boxing’ the evidence and straining after ‘vigorous and rigorous’ demonstration of things that

Harrison HARRISON, GESSNER, A Treatise on the Philology of Greek Prepositions (1858).
Bopp BOPP, Vergleichende Grammatik (1857).
1 F. H. Colson, in an article entitled “The Grammatical Chapters in Quintilian,” I, 4–8 (The Cl. Quarterly, Jan., 1914, p. 33), says: “The five chapters which Quintilian devotes to ‘Grammatica’ are in many ways the most valuable discussion of the subject which we possess,” though he divides “grammatica” into “grammar” and “literature,” and (p. 37) “the whole of this chapter is largely directed to meet the objection that grammar is ‘tenues et jejuna.’”
2 The Cl. Weekly, May 27, 1911, p. 229.
do not admit of proof.” There probably are German scholars guilty of this grammatical vice (are American and British scholars wholly free?). But I wish to record my conviction that my own work, such as it is, would have been impossible but for the painstaking and scientific investigation of the Germans at every turn. The republic of letters is cosmopolitan. In common with all modern linguists I have leaned upon Brugmann and Delbrück as masters in linguistic learning.

I cannot here recite my indebtedness to all the scholars whose books and writings have helped me. But, besides Broadus, I must mention Gildersleeve as the American Hellenist whose wit and wisdom have helped me over many a hard place. Gildersleeve has spent much of his life in puncturing grammatical bubbles blown by other grammarians. He exercises a sort of grammatical censorship. “At least whole grammars have been constructed about one emptiness.” It is possible to be “grammar

“Grammar to the Wolves.” Browning sings in *A Grammarian’s Funeral*:

“He settled Hoti’s business—let it be!—

Properly based Oun—

Gave us the doctrine of the enclitic De,

Dead from the waist down.”

perhaps those who pity the grammarian do not know that he finds joy in his task and is sustained by the conviction that his work is necessary. Prof. C. F. Smith (*The Classical Weekly*, 1912, p. 150) tells of the joy of the professor of Greek at Bonn when he received a copy of the first volume of Gildersleeve’s *Syntax of Classical Greek*. The professor brought it to the *Seminar* and “clasped and hugged it as though it were a most precious darling (*Liebling*).” Dr. A. M. Fairbairn¹ once said: “No man can be a theologian who is not a philologist. He who is no grammarian is no divine.” Let Alexander McLaren serve as a good illustration of that dictum. His matchless discourses are the fruit of the most exact scholarship and spiritual enthusiasm. I venture to quote another defence of the study of Greek which will, I trust, yet come back to its true place in modern education. Prof. G. A. Williams, of Kalamazoo College, says²: “Greek yet remains the very best means we have for plowing up and wrinkling the human brain and developing its gray matter, and wrinkles and gray matter are still the most valuable assets a student can set down on the credit side of his ledger.”

Dr. J. H. Moulton has shown that it is possible to make grammar interesting, as Gildersleeve had done before him. Moulton protests³ against the notion that grammar

is dull: “And yet there is no subject which can be made more interesting than grammar, a science which deals not with dead rocks or mindless vegetables, but with the ever changing expression of human thought.” I wish to acknowledge here my very great indebtedness to Dr. Moulton for his brilliant use of the Egyptian papyri in proof of the fact that the New Testament was written in the vernacular κοινή. Deissmann is

3 London Quarterly Review, 1908, p. 214. Moulton and Deissmann also disprove the pessimism of Hatch (Essays in Biblical Greek, p. 1): “The language of the New Testament, on the other hand, has not yet attracted the special attention of any considerable scholar. There is no good lexicon. There is no good philological commentary. There is no adequate grammar.” Deissmann

the pioneer in this field and is still the leader in it. It is hard to overestimate the debt of modern New Testament scholarship to his work. Dr. D. S. Margoliouth, it is true, is rather pessimistic as to the value of the papyri: “Not one per cent. of those which are deciphered and edited with so much care tell us anything worth knowing.” Certainly that is too [Page xi] gloomy a statement. Apart from the linguistic value of the papyri and the ostraca which has been demonstrated, these letters and receipts have interest as human documents. They give us real glimpses of the actual life of the common people in the first Christian centuries, their joys and their sorrows, the little things that go so far to make life what it is for us all. But the student of the Greek New Testament finds a joy all his own in seeing so many words in common use that were hitherto found almost or quite alone in the New Testament or LXX. But the grammar of the N. T. has also had a flood of light thrown on it from the papyri, ostraca and inscriptions as a result of the work of Deissmann, Mayser, Milligan, Moulton, Radermacher, Thumb, Völker, Wilcken and others. I have gratefully availed myself of the work of

Völker
these scholars and have worked in this rich field for other pertinent illustrations of the New Testament idiom. The material is almost exhaustless and the temptation was constant to use too much of it. I have not thought it best to use so much of it in proportion as Radermacher has done, for the case is now proven and what Moulton and Radermacher did does not have to be repeated. As large as my book is, the space is precious for the New Testament itself. But I have used the new material freely. The book has grown so that in terror I often hold back. It is a long step from Winer, three generations ago, to the present time. We shall never go back again to that standpoint. Winer was himself a great emancipator in the grammatical field. But the battles that he fought are now ancient history.

It is proper to state that the purpose of this Grammar is not that of the author’s *Short Grammar* which is now in use in various modern languages of America and Europe. That book has its own place. The present volume is designed for advanced students in theological schools, for the use of teachers, for scholarly pastors who wish a comprehensive grammar of the Greek New Testament on the desk for constant use, for all who make a thorough study of the New Testament or who are interested in the study of language, and for libraries. If new editions come, as I hope, I shall endeavour to make improvements and corrections. *Errata* are sure to exist in a book of this nature. Occasionally (cf. Accusative with Infinitive) the same subject is treated more than once for the purpose of fulness at special points. Some repetition is necessary in teaching. Some needless repetition can be eliminated later. I may explain also that the works used by me in the Bodleian Library and the British Museum had the citations copied twice with double opportunity for errors of reference, but I have guarded that point to the best of my ability. I have been careful to give credit in detail to the many works consulted.

But, after all is said, I am reluctant to let my book slip away from my hands. There is so much yet to learn. I had hoped that Mayser’s *Syntax der griechischen Papyri* could have appeared so that I could have used it, but he sorrowfully writes me that illness has held him back. Neither Helbing nor Thackeray has finished his *Syntax of*

Thackeray
the LXX. The N. T. Vocabulary of Moulton and Milligan, though announced, has not yet appeared. Deissmann’s Lexicon is still in the future. Thumb’s revision of Brugmann’s Griechische Grammatik appeared after my book had gone to the press. 1 I could use it only here and there. The same thing is true of Debrunner’s revision of Blass’ Grammatik des neutest. Griechisch. New light will continue to be turned on the Greek of the N. T. Prof. J. Rendel Harris (The Expository Times, Nov., 1913, p. 54 f.) points out, what had not been recently noticed, that Prof. Masson, in his first edition of Winer in 1859, p. vii, had said: “The diction of the New Testament is the plain and unaffected Hellenic of the Apostolic Age, as employed by Greek-speaking Christians when discoursing on religious subjects ... Apart from the Hebraisms—the number of which has, for the most part, been grossly exaggerated—the New Testament may be considered as exhibiting the only genuine fac-simile of the colloquial diction employed by unsophisticated Grecian gentlemen of the first century, who spoke without pedantry—as ἰδιῶται and not as σοφισταί.” The papyri have simply confirmed the insight of Masson in 1859 and of Lightfoot in 1863 (Moulton, Prol., p. 242). One’s mind lingers with fascination over the words of the New Testament as they meet him in unexpected contexts in the papyri, as when ἡρετή (cf. 1 Pet. 2:9) occurs in the sense of ‘Thy Excellency,’ ἔξω παρασχέειν τῇ σῇ ἡρετῇ, O. P. 1131, 11 f. (v/A.D.), or when ὑπερήφανον (Ac. 1:13) is used of a pigeon-house, τὸν ὑπερήφανον τόπον τῆς ὑπερηφάνους αὐτῷ ἐν Μουχινῷ οἰκίας, O. P. 1127, 5–7 (A.D. 183). But the

1 Prof. E. H. Sturtevant (Cl. Weekly, Jan. 24, 1914, p. 103) criticises Thumb because he retains in his revision of Brugmann’s book the distinction between accidence and syntax, and so is “not abreast of the best scholarship of the day.” But for the N. T. the distinction is certainly useful.

HARRIS HARRIS, J. RENDEL, Side-Lights on N. T. Research (1908).
book must now go forth to do its part in the elucidation of the New Testament, the treasure of the ages.¹ I indulge the hope that the toil has not been all in vain. Marcus Dods (Later Letters, p. 248) says: “I admire the grammarians who are content to add one solid stone to the permanent temple of knowledge instead of twittering round it like so many swallows and only attracting attention to themselves.” I make no complaint of the labour of the long years, for I have had my reward in a more intimate knowledge of the words of Jesus and of his reporters and interpreters. Τὰ ρήματα ἀ ἐγὼ λελάληκα ὑμῖν πνεῦμα ἔστιν καὶ ζωὴ ἔστιν (Jo. 6:63).

I must record my grateful appreciation of the sympathy and help received from many friends all over the world as I have plodded on through the years. My colleagues in the Seminary Faculty have placed me under many obligations in making it possible for me to devote myself to my task and in rendering substantial help. In particular Pres. E. Y. Mullins and Prof. J. R. Sampey have been active in the endowment of the plates. Prof. Sampey also kindly read the proof of the Aramaic and Hebrew words. Prof. W. O. Carver graciously read the proof of the entire book and made many valuable suggestions. Dr. S. Angus, of Edinburgh, read the manuscript in the first rough draft and was exceedingly helpful in his comments and sympathy. Prof. W. H. P. Hatch, of the General Episcopal Theological Seminary, New York, read the manuscript for the publishers and part of the proof and exhibited sympathetic insight that is greatly appreciated. Prof. J. S. Riggs, of the Auburn Theological Seminary, read the proof till his health gave way, and was gracious in his enthusiasm for the enterprise. Prof. Walter Petersen, Ph.D., of Bethany College, Lindsborg, Kansas, read all the proof and freely gave his linguistic attainments to the improvement of the book. Last, but not least in this list, Mr. H. Scott, of Birkenhead, England, read the book in galley proof, and in the Accidence verified all the references with minute care and loving interest, and all through the book contributed freely from his wealth of knowledge of detail concerning the Greek N. T. The references in Syntax were verified by a dozen of my students whose labour of love is greatly appreciated. Pres. J. W. Shepherd, of Rio Janeiro, Brazil, and Prof. G. W. Taylor, of Pineville, La., had verified the Scripture references in the MS., which were again verified in proof. The Index of Quotations has been prepared by Rev. W. H. Davis, of Richmond College, Va.; the Index of Greek Words by Rev. S. L. Watson, Tutor of N. T. Greek for this session in the Seminary. All this work has been done for me freely and gladly. The mere recital of it humbles me very much. Without this expert aid in so many directions the book could not have been produced at all. I must add, however, that all errors should be attributed to me. I have done the best that I could with my almost

¹ Brilliant use of the new knowledge is made by Dr. James Moffatt’s New Testament (A New Translation, 1913).

impossible task. I have had to put on an old man’s glasses during the reading of the proof.

I must add also my sincere appreciation of the kind words of Prof. Edwin Mayser of Stuttgart, Oberlehrer H. Stocks of Cottbus, Pres. D. G. Whittinghill of Rome, Prof. Caspar René Gregory of Leipzig, the late Prof. E. Nestle of Maulbronn, Prof. James Stalker of Aberdeen, Prof. Giovanni Luzzi of Florence, Prof. J. G. Machen of Princeton, Profs. G. A. Johnston Ross and Jas. E. Frame of Union Seminary, and many others who have cheered me in my years of toil. For sheer joy in the thing Prof. C. M. Cobern of Allegheny College, Penn., and Mr. Dan Crawford, the author of *Thinking Black*, have read a large part of the proof.

I gladly record my gratitude to Mr. G. W. Norton, Misses Lucie and Mattie Norton, Mr. R. A. Peter (who gave in memory of his father and mother, Dr. and Mrs. Arthur Peter), Rev. R. N. Lynch, Rev. R. J. Burdette, Mr. F. H. Goodridge, and others who have generously contributed to the endowment of the plates so that the book can be sold at a reasonable price. I am indebted to Mr. K. B. Grahn for kindly co-operation. I am deeply grateful also to the Board of Trustees of the Seminary for making provision for completing the payment for the plates.

It is a pleasure to add that Mr. Doran has shown genuine enthusiasm in the enterprise, and that Mr. Linsenbarth of the University Press, Cambridge, has taken the utmost pains in the final proofreading.

Gregory

Nestle

———, Novum Testamentum Graece. 8th ed. (1910).

———, Septuagint (Hastings’ D. B., 1902).

I should say that the text of Westcott and Hort is followed in all essentials. Use is made also of the Greek Testaments of Nestle, Souter, and Von Soden whose untimely death is so recent an event. In the chapter on Orthography and Phonetics more constant use is made, for obvious reasons, of variations in the manuscripts than in the rest of the book. It is now four hundred years since Cardinal Francisco Ximenes de Cisneros had printed the Greek New Testament under the auspices of the University of Alcalá or Complutum, near Madrid, though it [Page xv] was not circulated till 1522. Erasmus got his edition into circulation in 1516. “The Complutensian edition of 1514 was the first of more than a thousand editions of the New Testament in Greek” (E. J. Goodspeed, The Biblical World, March, 1914, p. 166). It thus comes to pass that the appearance of my Grammar marks the four hundredth anniversary of the first printed Greek New Testament, and the book takes its place in the long line of aids to the study of the “Book of Humanity.” The Freer Gospels and the Koridethi Gospels show how much we have to expect in the way of discovery of manuscripts of the New Testament.

I think with pleasure of the preacher or teacher who under the inspiration of this Grammar may turn afresh to his Greek New Testament and there find things new and old, the vital message all electric with power for the new age. That will be my joy so long as the book shall find use and service at the hands of the ministers of Jesus Christ.

A. T. ROBERTSON.

LOUISVILLE, KY., 1914.

PREFACE TO SECOND EDITION

The second edition has been called for so soon that I did not have the opportunity for rest that I desired before preparing for it. But I have gone steadily through the book with eager eyes. The result is that some five hundred changes have been made in the text here and there, all for the improvement of the book in one way or another, besides the Addenda at the end of the book. Most of the changes are small details, but they are all worth making. The Addenda are as few as possible because of the great size of the volume. I have been more than gratified at the kindly reception accorded the book all over the world in spite of the distraction of the dreadful war. Many

____________________
Soden

———, Griechisches N. T. Text mit kurzem Apparat (1913).

scholars have offered helpful criticisms for which I am deeply grateful. In particular I wish to mention Prof. C. M. Cobern, Allegheny College, Meadville, Penn.; Prof. D. F. Estes, Colgate University, Hamilton, N. Y.; Prof. Basil L. Gildersleeve, The Johns Hopkins University, Baltimore; Prof. E. J. Goodspeed, the University of Chicago; Prof. D. A. Hayes, Garrett Biblical Institute, Evanston, Ill.; Prof. James Moffatt, Mansfield College, Oxford, England; Prof. [Page xvi] C. W. Peppler, Trinity College, Durham, N. C.; Prof. W. Petersen, Bethany College, Lindsborg, Kansas; Mr. William Pitfield, Manchester, England; Rev. Dr. Alfred Plummer, Bideford, England; Mr. H. Scott, Birkenhead, England; Prof. James Stalker, United Free Church College, Aberdeen, Scotland; Dr. Gross Alexander, Nashville, Tenn. I hope that future editions may make it possible to improve the book still further. Various minor repetitions have been removed, though more still remain than is necessary. But the book is at least made more intelligible thereby. The numerous cross-references help also.

In the Neutestamentliche Studien (1914) in honour of the seventieth birthday of Dr. Georg Heinrici of the University of Leipzig there is a paper by Heinrich Schlosser “Zur Geschichte der biblischen Philologie.” He tells the story of “the first grammar of the New Testament Greek” (1655). It is by Georg Pasor and is entitled Grammatica Graeca Sacra Novi Testamenti Domini nostri Jesu Christi. His son, Matthias Pasor, Professor of Theology at Gröningen, found his father’s manuscript and let it lie for eighteen years because many held grammatical study to be puerile or pedantic and the book would have few readers. Finally he published it in 1655, since he held grammar to be “clavis scientiarum omnisque solidae eruditionis basis ac fundamentum.” He was cheered by Melanchthon’s “fine word”: “Theologia vera est grammatica quaedam divinae vocis.” It is only 260 years since 1655.

New books continue to come out that throw light on the language of the New Testament. Part I (through α) of Moulton and Milligan’s Vocabulary of the Greek

Testament Illustrated from the Papyri and Other Non-literary Sources (1914) is now a rich treasure in the hands of students. Sharp’s Epictetus and the New Testament (1914) is a very helpful monograph full of suggestions. A note from Dr. Albert Thumb announces that he is at work on a revision of his Hellenismus. So the good work goes on.

A. T. ROBERTSON.

AUGUST, 1915.

[PAGE XVII] PREFACE TO THIRD EDITION

My grammar has had to live and do its work in spite of the Great War, but the time for the Third Edition has come. In a letter Dr. Alfred Plummer says: “That so technical and expensive a volume should be already in a third edition in the fifth year of the war is indeed triumphant evidence of the value of the book. Scientific grammar is appreciated more widely than one would antecedently have ventured to expect.” These few years have allowed time for a thorough verification of the multitudinous references. This enormous task has been done as a labor of love by Mr. H. Scott, of Birkenhead, England, whose patient skill has placed all users of the book under a debt of gratitude that can never be paid. He had already put his invaluable services at my disposal, but now his leisure permitted him to employ his really wonderful statistical knowledge of the Greek New Testament for the benefit of students. These extremely useful tables are found in the Addenda to this Edition. I am sure that all New Testament students will appreciate and profit greatly from these tables.

A brilliant student of mine, Rev. W. H. Davis, has found some striking illustrations in the papyri that appear in the Addenda, besides a number from my own readings. Dr. Davis is at work on the lexical aspects of the papyri and the inscriptions.

Thumb

——, Die griech. Sprache im Zeitalter des Hellenismus (1901).

If his studies lead him on to prepare a New Testament lexicon, the world will be the better for such an outcome.

Mr. J. F. Springer, of New York City, has also made some valuable contributions which appear in the Addenda. I am indebted also to Prof. Robert Law, of Knox College, Toronto, for errata.

I have watched with eagerness for criticisms of the book and have done my best to turn them to the improvement of the grammar. It is gratifying to know that ministers are using it in their studies as one of the regular tools in the shop. In the classroom only selected portions can be covered, but the preacher can use it every day (as many do) in his reading and study of the Greek New Testament. There are many ministers who read the Greek New Testament through once a year, some of it every day, besides the solid, critical study of a Gospel or Epistle with commentary, lexicon and grammar. This is the work that pays one a hundredfold in his preaching. My own reward for the long years of devotion to this grammar is found in the satisfaction that [Page xviii] scholarly ministers are using the book for their own enrichment. I have been gratified to learn of laymen who use the book regularly.

Besides the correction of infelicities and errata that could be found here and there and the Addenda at the end of the volume I have inserted a detailed Table of Contents which will greatly aid one in finding topics in the various chapters. The minute subdivisions with page references will supplement the various Indices to great advantage. The Index of Greek words, large as it is, was still incomplete. It has been doubled in this edition by Mr. Scott’s assistance. The Additional Bibliography records the most important recent contributions.

Death has been busy with New Testament linguists. Dr. Gross Alexander, of Nashville, has been claimed by death. Dr. George Heinrici, of Leipzig, is dead. Dr. Albert Thumb, of Marburg, has likewise passed on. Dr. H. B. Swete, of Cambridge, and Principal James Denney, of Glasgow, have also joined the great majority. These are irreparable losses, but there are others and even greater ones. Dr. Caspar René Gregory, of Leipzig, though seventy years old, volunteered for the army and was

Gregory

killed in battle in France. With his death perished the hope of a new and revised edition of Tischendorf's *Novum Testamentum Graece* for many years to come. A younger man must now take hold of this problem and make available for students the new textual knowledge.

Dr. James Hope Moulton fell a victim in April, 1917, in the Mediterranean Sea, to the German submarine. He was placed in a boat, but after several days succumbed to the exposure and cold. It was he who first applied in detail Deissmann's discovery

that the New Testament was written in the current κοινή as seen in the Egyptian papyri. He had planned three volumes on the New Testament grammar. Volume I (the Prolegomena) appeared in 1906 (Third Ed., 1908). He had nearly finished Volume II (Accidence), but had done nothing on Syntax, the most important of all. His death is an unspeakable calamity, but his work will live, for his Prolegomena preserves his interpretation of the New Testament language. The Accidence will appear in due time (is already in press). Prof. George Milligan, of Glasgow, has completed the publication of the Vocabulary of the New Testament.

The workers die, but the work goes on. It is pleasant to think that Greek is renewing its grip upon the world. Professors Stuart and Tewksbury are preparing a grammar and lexicon for Chinese students of the New Testament. Japan will do likewise. Prof. H. P. Houghton, of Waynesburg College, Pennsylvania, is confident that Greek can be saved for the college and the university, for “it is the basis of true culture” (The Classical Weekly, Dec. 11, 1916, p. 67). There is nothing like the Greek New Testament to rejuvenate the world, which came out of the Dark Ages with the Greek Testament in its hand. Erasmus wrote in the Preface to his Greek Testament about his own thrill of delight: “These holy pages will summon up the living image of His mind. They will give you Christ Himself, talking, healing, dying, rising, the whole Christ in a word; they will give Him to you in an intimacy so close that He would be less visible to you if He stood before your eyes.” The Greek New Testament is the New Testament. All else is translation. Jesus speaks to us out of every page of the Greek. Many of his ipsissima verba are here preserved for us, for our Lord often spoke in Greek. To get these words of Jesus it is worth while to plow through any grammar and to keep on to the end.

At the age of sixteen John Brown, of Haddington, startled a bookseller by asking for a copy of the Greek Testament. He was barefooted and clad in ragged homespun clothes. He was a shepherd boy from the hills of Scotland. “What would you do with that book?” a professor scornfully asked. “I’ll try to read it,” the lad replied, and

proceeded to read off a passage in the Gospel of John. He went off in triumph with the coveted prize, but the story spread that he was a wizard and had learned Greek by the black art. He was actually arraigned for witchcraft, but in 1746 the elders and deacons at Abernethy gave him a vote of acquittal, though the minister would not sign it. His letter of defence, Sir W. Robertson Nicoll says (The British Weekly, Oct. 3, 1918), “deserves to be reckoned among the memorable letters of the world.” John Brown became a divinity student and finally professor of divinity. In the chapel at Mansfield College, Oxford, Brown’s figure ranks with those of Doddridge, Fry, Chalmers, Vinet, Schleiermacher. He had taught himself Greek while herding his sheep, and he did it without a grammar. Surely young John Brown of Haddington should forever put to shame those theological students and busy pastors who neglect the Greek Testament, though teacher, grammar, lexicon are at their disposal.

In Current Opinion for January, 1919, page 18, in an article called “Europe’s Ideas of Wilson the Man,” one notes a pertinent sentence: “President Wilson once told a member of the diplomatic [Page xx] corps in Washington, who repeated it later in Paris, that if he were going to college all over again he would pay more attention to the Greek language and literature, which American universities, on the whole, neglect.” So the scholar-statesman feels. So the preacher ought to feel.

A. T. ROBERTSON.

PREFACE TO SECOND EDITION

PREFACE TO THIRD EDITION

LIST OF WORKS MOST OFTEN REFERRED TO

ADDITIONAL BIBLIOGRAPHY TO THIRD EDITION

I. INTRODUCTION

CHAPTER I. New Material Material

The Ideal Grammar?

I. The Pre-Winer Period

II. The Service of Winer

(a) Winer’s Inconsistencies

(b) Winer Epoch-Making

Wilson Wilson, A. J., Emphasis in the N. T. (Jour. of Th. Stud., VIII, pp. 75 ff.).
III. The Modern Period

(a) Deissmann
(b) Thumb
(c) Moulton
(d) Other Contributions
(e) Richness of Material

IV. The New Grammatical Equipment

(a) Comparative Philology
   1. The Linguistic Revolution
   2. A Sketch of Greek Grammatical History
   3. The Discovery of Sanskrit
   4. From Bopp to Brugmann

(b) Advance in General Greek Grammar

(c) Critical Editions of Greek Authors

(d) Works on Individual Writers

(e) The Greek Inscriptions

(f) Fuller Knowledge of the Dialects

(g) The Papyri and Ostraca

(h) The Byzantine and the Modern Greek

(i) [Page xxii] The Hebrew and Aramaic
   1. The Old View
   2. A Change with Kennedy
3. Deissmann’s Revolt
4. The Language of Jesus
   (j) Grammatical Commentaries
V. The New Point of View

CHAPTER II. The Historical Method

I. Language as History
   (a) Combining the Various Elements
   (b) Practical Grammar a Compromise

II. Language as a Living Organism
   (a) The Origin of Language
   (b) Evolution in Language
   (c) Change Chiefly in the Vernacular

III. Greek Not an Isolated Language
   (a) The Importance of Comparative Grammar
   (b) The Common Bond in Language
   (c) The Original Indo-Germanic Speech
   (d) Greek as a “Dialect” of the Indo-Germanic Speech

IV. Looking at the Greek Language as a Whole
   (a) Descriptive Historical Grammar
   (b) Unity of the Greek Language
   (c) Periods of the Greek Language
   (d) Modern Greek in Particular

V. The Greek Point of View

CHAPTER III. The Κοινή

I. The Term Κοινή
II. The Origin of the Κοινή
   (a) Triumph of the Attic
   (b) Fate of the Other Dialects
   (c) Partial Koines
   (d) Effects of Alexander’s Campaigns
   (e) The March toward Universalism

III. The Spread of the Κοινή
   (a) A World-Speech
   (b) Vernacular and Literary
      1. Vernacular
      2. Literary
   (c) The Atticistic Reaction

   (a) Vernacular Attic the Base
   (b) The Other Dialects in the Κοινή
   (c) Non-Dialectical Changes
   (d) New Words, New Forms, or New Meanings to Old Words
   (e) Provincial Influences
   (f) The Personal Equation
   (g) Résumé
      Phonetics and Orthography
      Vocabulary
      Word-Formation
      Accidence
      Syntax
V. The Adaptability of the Κοινή to the Roman World

CHAPTER IV. The Place of the New Testament in the Κοινή

   (a) Not a Biblical Greek
   (b) Proof that N. T. Greek is in the Vernacular Κοινή
       - Lexical
       - Grammatical

II. Literary Elements in the New Testament Greek

III. The Semitic Influence
   (a) The Tradition
   (b) The View of Deissmann and Moulton
   (c) Little Direct Hebrew Influence
   (d) A Deeper Impress by the Septuagint
   (e) Aramaism
   (f) Varying Results

IV. Latinisms and Other Foreign Words

V. The Christian Addition

VI. Individual Peculiarities
   (a) Mark
   (b) Matthew
   (c) Luke
   (d) James
   (e) Jude
   (f) Peter
   (g) Paul
II. [PAGE XXIV] ACCIDENTE

CHAPTER V. Word-Formation

I. Etymology

II. Roots

III. Words with Formative Suffixes

(a) Verbs
   1. Primary or Primitive Verbs
   2. Secondary or Derivative Verbs

(b) Substantives
   1. Primary or Primitive Substantives
   2. Secondary or Derivative Substantives
      (α) Those from verbs
      (β) Those from substantives
      (γ) Those from adjectives

(c) Adjectives
   1. Primary or Primitive Adjectives
   2. Secondary or Derivative Adjectives
      (α) Those from verbs
      (β) Those from substantives
      (γ) Those from adjectives
      (δ) Those from adverbs

(d) The Adverb
IV. Words Formed by Composition (Composita)

(a) Kinds of Compound Words in Greek

(b) Inseparable Prefixes

(c) Agglutinative Compounds (Juxtaposition or Parathesis)
   1. Verbs
   2. Substantives
   3. Adjectives
   4. Adverbs

V. Personal Names Abbreviated or Hypocoristic

VI. The History of Words

VII. The Kinship of Greek Words

VIII. Contrasts in Greek Words or Synonyms

CHAPTER VI. Orthography and Phonetics

I. The Uncertainty of the Evidence

(a) The Ancient Literary Spelling

(b) The Dialect-Coloured Vernacular

(c) The Uncials

(d) The Papyri

II. [Page xxv] Vowel-Changes

(a) The Changes (Interchanges) with α

   α and ε
   ε and α
   α and η
   α and ο
   α and ω
α and αι
α and αυ
αι and ε

(b) The Changes with ε
ε and ει
ε and η
ε and ι
ε and ο
ἐάν and ἄν

(c) The Changes with η
η and ι
η and ει
ηι and ει
η and ηι
η and οι
η and υ

(d) The Changes with ι
ι and ει
ει and ι
ι and ο
ι and οι
ι and υ

(e) The Changes with ο
ο and ου
ο and υ
ο and ω
(f) The Changes with υ

υ and ευ
υ and ου

(g) The Changes with ω

ω and ου
ω and ωυ

(h) Contraction and Syncope

(i) Diphthongs and Diæresis

(j) Aphæresis and Prothetic Vowels

(k) Elision

(l) Crasis

III. Consonant-Changes

(a) Origin and Character of the Consonants

(b) The Insertion of Consonants

(c) [Page xxvi] The Omission of Consonants

(d) Single or Double Consonants

(e) Assimilation of Consonants

(f) Interchange and Changing Value of Consonants

(g) Aspiration of Consonants

(h) Variable Final Consonants

(i) Metathesis

IV. Breathings

(a) Origin of the Aspirate

(b) Increasing De-aspiration (Psilosis)
(c) Variations in the MSS. (Aspiration and Psilosis)
(d) Transliterated Semitic Words
(e) The Use of Breathings with ρ and ρρ
(f) The Question of Αὐτοῦ

V. Accent
(a) The Age of Greek Accent
(b) Significance of Accent in the Κοινή
(c) Signs of Accent
(d) Later Developments in Accent
(e) N. T. Peculiarities
   1. Shortening Stem-Vowels
   2. Separate Words
   3. Difference in Sense
   4. Enclitics (and Proclitics)
   5. Proper Names
   6. Foreign Words

VI. Pronunciation in the Κοινή

VII. Punctuation
(a) The Paragraph
(b) Sentences
(c) Words
(d) The Editor’s Prerogative

CHAPTER VII. The Declensions
I. The Substantive
   1. History of the Declensions
2. The Number of the Cases
   (a) The History of the Forms of the Cases
   (b) The Blending of Case-Endings
   (c) Origin of Case-Suffixes

3. Number in Substantives

4. Gender in Substantives
   (a) Variations in Gender
   (b) Interpretation of the LXX
   (c) Variations Due to Heteroclisis and Metaplasm

5. The First or α Declension
   (a) The Doric Genitive-Ablative Singular ό
   (b) The Attic Genitive-Ablative Singular
   (c) Vocative in –α of masc. nouns in –της
   (d) Words in –ρα and Participles in –υία
   (e) The Opposite Tendency to (d)
   (f) Double Declension
   (g) Heteroclisis and Metaplasm
   (h) Indeclinable Substantives

6. The Second or ο Declension
   (a) The So-Called Attic Second Declension
   (b) Contraction
   (c) The Vocative
   (d) Heteroclisis and Metaplasm
   (e) The Mixed Declension
   (f) Proper Names
7. The Third Declension (consonants and close vowels ι and υ)
   (a) The Nominative as Vocative
   (b) The Accusative Singular
   (c) The Accusative Plural
   (d) Peculiarities in the Nominative
   (e) The Genitive-Ablative Forms
   (f) Contraction
   (g) Proper Names
   (h) Heteroclisis and Metaplasm

8. Indeclinable Words

II. The Adjective
   1. The Origin of the Adjective
   2. Inflection of Adjectives
      (a) Adjectives with One Termination
      (b) Adjectives with Two Terminations
      (c) Adjectives with Three Terminations
      (d) The Accusative Singular
      (e) Contraction in Adjectives
      (f) Indeclinable Adjectives

3. Comparison of Adjectives
   (a) The Positive
   (b) The Comparative
   (c) The Superlative

III. Numerals
   1. The Origin of Numerals
2. Variety among Numerals
   (a) Different Functions
   (b) The Cardinals
   (c) [Page xxviii] The Ordinals
   (d) Distributives in the N. T.
   (e) Numeral Adverbs

IV. Pronouns
   1. Idea of Pronouns
   2. Antiquity of Pronouns
   3. Pronominal Roots
   4. Classification
      (a) The Personal Pronouns
      (b) The Intensive Pronoun
      (c) Reflexive Pronouns
      (d) Possessive Pronouns
      (e) Demonstrative Pronouns
      (f) Relative Pronouns
      (g) Interrogative Pronouns
      (h) Indefinite Pronouns
      (i) Distributive and Reciprocal Pronouns

V. Adverbs
   1. Neglect of Adverbs
   2. Formation of the Adverb
      (a) Fixed Cases
         (1) The Accusative
(2) The Ablative
(3) The Genitive
(4) The Locative
(5) The Instrumental
(6) The Dative
(b) Suffixes
(c) Compound Adverbs
(d) Analogy
(e) The Comparison of Adverbs

3. Adverbial Stems
(a) Substantives
(b) Adjectives
(c) Numerals
(d) Pronouns
(e) Verbs

4. Use of Adverbs
(a) Adverbs of Manner
(b) Adverbs of Place
(c) Adverbs of Time

5. Scope of Adverbs
(a) Relation between Adverbs and Prepositions
(b) Adverbs and Conjunctions
(c) Adverbs and Intensive Particles
(d) Adverbs and Interjections

[PAGE XXIX] Chapter VIII. Conjugation of the Verb
I. Difficulty of the Subject

II. Nature of the Verb
   (a) Verb and Noun
   (b) Meaning of the Verb
   (c) Pure and Hybrid Verbs

III. The Building of the Verb

IV. The Survival of –μ Verbs
   (a) A Cross Division
   (b) The Oldest Verbs
   (c) Gradual Disappearance
   (d) N. T. Usage as to –μ Verbs
      1. The Second Aorists (active and middle)
      2. Some –μ Presents
      3. Some –μ Perfects

V. The Modes
   (a) The Number of the Moods or Modes (Modi)
   (b) The Distinctions between the Moods
   (c) The Indicative
   (d) The Subjunctive
   (e) The Optative
   (f) The Imperative
      1. The Non-Thematic Stem
      2. The Thematic Stem
      3. The Suffix –θι
      4. The Suffix –τω
5. The Old Injunctive Mood
6. Forms in –σαι
7. The Form in –σον
8. First Person
9. Prohibitions
10. Perfect Imperative
11. Periphrastic Presents
12. Circumlocutions

VI. The Voices
   (a) Transitive and Intransitive
   (b) The Names of the Voices
   (c) The Relative Age of the Voices
   (d) The So-Called “Deponent” Verbs
   (e) The Passive Supplanting the Middle
   (f) The Personal Endings
   (g) Cross-Divisions
   (h) The Active Endings
   (i) [Page xxx] The Middle Endings
   (j) Passive Endings
   (k) Contract Verbs

VII. The Tenses
   (a) The Term Tense
   (b) Confusion in Names
   (c) The Verb-Root
   (d) The Aorist Tense
(e) The Present Tense

1. The Root Class
2. The Non-Thematic Reduplicated Present
3. The Non-Thematic Present with –να– and –νυ–
4. The Simple Thematic Present
5. The Reduplicated Thematic Present
6. The Thematic Present with a Suffix
   (α) The ι class
   (β) The ν class
   (γ) The σκ class
   (δ) The τ class
   (ε) The θ class

(f) The Future Tense

(g) The Perfect Tenses

   1. The Name
   2. The Original Perfect
   3. The κ Perfect
   4. The Aspirated Perfects
   5. Middle and Passive Forms
   6. The Decay of the Perfect Forms
   7. The Perfect in the Subjunctive, Optative, Imperative
   8. The Perfect Indicative
   9. Σ in Perfect Middle and Passive and Aorist Passive

(h) Reduplication

   1. Primitive
2. Both Nouns and Verbs
3. In Three Tenses in Verbs
4. Three Methods in Reduplication
5. Reduplication in the Perfect

(i) Augment
1. The Origin of Augment
2. Where Found
3. The Purpose of Augment
4. The Syllabic Augment
5. The Temporal Augment
6. Compound Verbs
7. Double Augment

VIII. The Infinitive
1. No Terminology at First
2. [Page xxxi] Fixed Case-Forms
3. With Voice and Tense
4. No Personal Endings
5. Dative and Locative in Form
6. The Presence of the Article
7. The Disappearance of the Infinitive
8. Some N. T. Forms

IX. The Participle
1. The Name
2. Verbal Adjectives
3. True Participles
III. SYNTAX

CHAPTER IX. The Meaning of Syntax

CHAPTER XI. The Cases

I. History of the Interpretation of the Greek Cases
   (a) Confusion
   (b) Bopp’s Contribution
   (c) Modern Usage
(d) Green’s Classification
(e) Syncretism of the Cases
(f) Freedom in Use of Case

II. The Purpose of the Cases
(a) Aristotle’s Usage
(b) Word-Relations

III. The Encroachment of Prepositions on the Cases
(a) The Reason
(b) No “Governing” of Cases
(c) Not Used Indifferently
(d) Original Use with Local Cases
(e) Increasing Use of Prepositions
(f) Distinction Preserved in the N. T.

IV. The Distinctive Idea of Each of the Cases
(a) Fundamental Idea
(b) Cases not Used for One Another
(c) Vitality of Case-Idea
(d) The Historical Development of the Cases
(e) The Method of this Grammar

V. The Nominative Case
(a) Not the Oldest Case
(b) Reason for the Case
(c) Predicate Nominative
(d) Sometimes Unaltered
(e) The Nominative Absolute
VI. The Vocative Case

(a) Nature of the Vocative

(b) Use of ὦ with the Vocative

(c) Adjectives Used with the Vocative

(e) Apposition to the Vocative

(f) Vocative in Predicate

(g) The Article with the Vocative

VII. The Accusative Case

(a) The Name

(b) Age and History

(c) The Meaning of the Accusative

(d) With Verbs of Motion

(e) Extent of Space

(f) Extent of Time

(g) With Transitive Verbs

(h) The Cognate Accusative

(i) Double Accusative

(j) With Passive Verbs

(k) The Adverbial Accusative

(l) The Accusative by Antiptosis

(m) The Accusative by Inverse Attraction
(n) The Accusative with the Infinitive
(o) The Accusative Absolute
(p) The Accusative with Prepositions

VIII. The Genitive (True) Case

(a) Two Cases with One Form
(b) Name Incorrect
(c) The Specifying Case
(d) The Local Use
(e) The Temporal Use
(f) With Substantives
   1. The Possessive Genitive
   2. Attributive Genitive
   3. The Predicate Genitive
   4. Apposition or Definition
   5. The Subjective Genitive
   6. The Objective Genitive
   7. Genitive of Relationship
   8. Partitive Genitive
   9. The Position of the Genitive
  10. Concatenation of Genitives

(g) The Genitive with Adjectives
(h) The Genitive with Adverbs and Prepositions
(i) The Genitive with Verbs
   1. *[Page xxxvi]* Very Common
   2. Fading Distinction from Accusative
3. Verbs of Sensation
4. Verbs of Emotion
5. Verbs of Sharing, Partaking and Filling
6. Verbs of Ruling
7. Verbs of Buying, Selling, Being Worthy of
8. Verbs of Accusing and Condemning
9. Genitive Due to Prepositions in Composition
10. Attraction of the Relative

(j) The Genitive of the Infinitive
(k) The Genitive Absolute

IX. The Ablative Case

(a) The Name
(b) The Meaning
(c) Rare with Substantives
(d) The Ablative with Adjectives
(e) The Ablative with Prepositions
(f) The Ablative with Verbs

1. Verbs of Departure and Removal
2. Verbs of Ceasing, Abstaining
3. Verbs of Missing, Lacking, Despairing
4. Verbs of Differing, Excelling
5. Verbs of Asking and Hearing
6. Verbs with the Partitive Idea
7. Attraction of the Relative

X. The Locative Case
(a) The Name Locative
(b) The Significance of the Locative
(c) Place
(d) Time
(e) Locative with Adjectives
(f) Locative with Verbs
(g) The Locative with Substantives
(h) The Locative with Prepositions
(i) The Pregnant Construction of the Locative

XI. The Instrumental Case
(a) The Term Instrumental
(b) Syncretistic?
(c) Place
(d) Time
(e) The Associative Idea
(f) With Words of Likeness and Identity
(g) Manner
(h) [Page xxxvii] Degree of Difference
(i) Cause
(j) Means
(k) With Prepositions

XII. The Dative (True) Case
(a) Syncretism
(b) The Decay of the Dative
(c) The Idea of the Dative
(d) The Dative with Substantives
(e) With Adjectives
(f) With Adverbs and Prepositions
(g) With Verbs
   1. Indirect Object
   2. Dativus Commodi vel Incommodi (Ethical)
   3. Direct Object
   4. The Dative with Intransitive Verbs
   5. Possession
   6. Infinitive as Final Dative
   7. The Dative of the Agent
   8. The Dative because of the Preposition
(h) Ambiguous Examples

CHAPTER XII. Adverbs

I. Special Difficulties
   (a) Nature of the Adverb
   (b) The Narrower Sense of Adverb

II. Adverbs with Verbs
   (a) Commonest Use
   (b) N. T. Usage
   (c) Predicative Uses with γίνομαι and εἰμί
   (d) With ἔχειν
   (e) With Participles
   (f) Loose Relation to the Verb

III. Adverbs Used with Other Adverbs
IV. Adverbs with Adjectives

V. Adverbs with Substantives

VI. Adverbs Treated as Substantives

VII. The Pregnant Use of Adverbs

VIII. Adverbs as Marks of Style

IX. The Adverb Distinguished from the Adjective
   (a) Different Meaning
   (b) Difference in Greek and English Idiom

X. [Page xxxviii] Adverbial Phrases
   (a) Incipient Adverbs
   (b) Prepositional Phrases
   (c) Participles
   (d) The Verb Used Adverbially

CHAPTER XIII. Prepositions

I. The Name
   (a) Some Postpositive
   (b) Not Originally Used with Verbs
   (c) Explanation

II. The Origin of Prepositions
   (a) Originally Adverbs
   (b) Reason for Use of Prepositions
   (c) Varying History

III. Growth in the Use of Prepositions
   (a) Once No Prepositions
   (b) The Prepositions Still Used as Adverbs in Homer
(c) Decreasing Use as Adverbs after Homer
(d) Semitic Influence in N. T.
(e) In Modern Greek

IV. Prepositions in Composition with Verbs
   (a) Not the Main Function
   (b) Preposition Alone
   (c) Increasing Use
   (d) Repetition after Verb
   (e) Different Preposition after Verb
   (f) Second Preposition Not Necessary
   (g) Effect of Preposition on Meaning of the Verb
   (h) Dropping the Preposition with Second Verb
   (i) Intensive or Perfective
   (j) Double Compounds

V. Repetition and Variation of Prepositions
   (a) Same Preposition with Different Cases
   (b) Repetition with Several Nouns
   (c) Repetition with the Relative
   (d) Condensation by Variation

VI. The Functions of Prepositions with Cases
   (a) The Case before Prepositions
   (b) Notion of Dimension
   (c) Original Force of the Case
   (d) \[Page xxxix]\ The Ground-Meaning of the Preposition
   (e) The Oblique Cases Alone with Prepositions
(f) Original Freedom

(g) No Adequate Division by Cases

(h) Situation in the N. T.
   1. Those with One Case
   2. Those with Two Cases
   3. Those with Three Cases
   4. Possibly Four with ἐπί

(i) Each Preposition in a Case

VII. Proper Prepositions in the N. T.

  (a) Ἀνά
  (b) Ἀντί
  (c) Ἀπό
      1. Original Significance
      2. Meaning ‘Back’
      3. “Translation-Hebraism” in φοβεῖσθαι Ἀπό
      4. Comparison with ἐκ
      5. Comparison with παρά
      6. Compared with ὑπό

  (d) Διά
      1. The Root-Idea
      2. ‘By Twos’ or ‘Between’
      3. ‘Passing Between’ or ‘Through’
      4. ‘Because of’

  (e) Ἐν
      1. Old Use of Ἐν with Accusative or Locative
2. Ἐν Older than εἰς
3. Place
4. Expressions of Time
5. ‘Among’
6. ‘In the Case of,’ ‘in the Person of’ or simply ‘in’
7. As a Dative?
8. Accompanying Circumstance
9. ‘Amounting to,’ ‘Occasion,’ ‘Sphere’
10. Instrumental Use of ἐν

(f) Ἐίς
1. Original Static Use
2. With Verbs of Motion
3. With Expressions of Time
4. Like a Dative
5. Aim or Purpose
6. Predicative Use
7. Compared with ἐπί, παρά and πρός

(g) Ἐκ (ἐξ)
1. Meaning
2. In Composition
3. [Page xl] Place
4. Time
5. Separation
6. Origin or Source
7. Cause or Occasion
8. The Partitive Use of ἐκ
9. ἐκ and ἐν

(h) ἐπί
1. Ground-Meaning
2. In Composition in the N. T.
3. Frequency in N. T.
4. With the Accusative
5. With the Genitive
6. With the Locative
7. The True Dative

(i) Κατά
1. Root-Meaning
2. Distributive Sense
3. Κατά in Composition
4. With the Ablative
5. With the Genitive
6. With the Accusative

(j) Μετά
1. The Root-Meaning
2. In Composition
3. Compared with σῶν
4. Loss of the Locative Use
5. With the Genitive
6. With the Accusative

(k) Παρά
1. Significance
2. Compared with πρός
3. In Composition
4. With the Locative
5. With the Ablative
6. With the Accusative

(l) Περί
1. The Root-Meaning
2. In Composition
3. Originally Four Cases Used
4. With the Ablative
5. With the Genitive
6. With the Accusative

(m) Πρό
1. The Original Meaning
2. In Composition
3. The Cases Used with πρό
4. Place
5. [Page xli] Time
6. Superiority

(n) Πρός
1. The Meaning
2. In Composition
3. Originally with Five Cases
4. The Ablative
5. With the Locative
6. With the Accusative

(o) Σόν
1. The Meaning
2. History
3. In Composition
4. N. T. Usage

(p) ὑπέρ
1. The Meaning
2. In Composition
3. With Genitive?
4. With Ablative
5. The Accusative with ὑπέρ

(q) ὑπό
1. The Original Meaning
2. In Composition
3. The Cases Once Used with ὑπό
4. With the Accusative
5. With the Ablative

VIII. The “Adverbial” Prepositions
1. Ἀμα
2. Ἀνευ
3. Ἀντικρυ(ς)
4. Ἀντίπερα
5. Ἀπέναντι
6. Ἄτερ
7. Ἄχρι(ς)
8. Ἐγγύς
9. Ἐктός
10. Ἐμπροσθεν
11. Ἐναντι
12. Ἐναντίον
13. Ἐνεκά
14. Ἐντός
15. Ἐνώπιον
16. Ἐξώ
17. Ἐξωθεν
18. Ἐπ-άνω
19. Ἐπέκεινα
20. Ἐσω
21. Ἐως
22. Κατέναντι
23. [Page xlii] Κατενώπιον
24. Κυκλόθεν
25. Κύκλῳ
26. Μέσον
27. Μεταξύ
28. Μέχρι
29. Ὅπισθεν
30. Ὅπισω
31. Ὀψέ
32. Παρα-πλήσιον
33. Παρ-εκτός
34. Πέραν
35. Πλήν
36. Πλησίον
37. Ὑπερ-άνω
38. Ὑπερ-έκεινα
39. Ὑπερ-εκ-περισσοῦ
40. Ὑπο-κάτω
41. Χάριν
42. Χωρίς

IX. Compound Prepositions

X. Prepositional Circumlocutions

(a) Μέσον
(b) Ὄνομα
(c) Πρόσωπον
(d) Στόμα
(e) Χείρ

CHAPTER XIV. Adjectives

I. Origin of Adjectives

II. The Adjectival or Appositional Use of the Substantive

III. The Adjective as Substantive

(a) Any Gender

(b) With Masculine Adjectives
(c) With Feminine Adjectives
(d) With the Neuter

IV. Agreement of Adjectives with Substantives
   (a) In Number
   (b) In Gender
   (c) In Case
   (d) Two or More Adjectives

V. The Attributive Adjective

VI. The Predicate Adjective

VII. Adjective Rather than Adverb

VIII. [Page xliii] The Personal Construction

IX. Adjectives Used with Cases

X. Adjectives with the Infinitive and Clauses

XI. The Adjective as Adverb

XII. The Positive Adjective
   (a) Relative Contrast
   (b) Used as Comparative or Superlative
   (c) With Prepositions
   (d) Comparison Implied by ἦ
   (e) In Absolute Sense

XIII. The Comparative Adjective
   (a) Contrast or Duality
   (b) Degree
   (c) Without Suffixes
   (d) Double Comparison
(e) Without Object of Comparison
(f) Followed by Ἁ
(g) Followed by the Ablative
(h) Followed by Prepositions
(i) The Comparative Displacing the Superlative

XIV. The Superlative Adjective
(a) The Superlative Vanishing
(b) A Few True Superlatives in the N. T.
(c) The Elative Superlative
(d) No Double Superlatives
(e) Followed by Ablative
(f) No “Hebraistic” Superlative

XV. Numerals
(a) Εἷς and Πρῶτος
(b) The Simplification of the “Teens”
(c) The Inclusive Ordinal
(d) The Distributives
(e) The Cardinal Ἑπτά
(f) Substantive Not Expressed
(g) Adverbs with Numerals
(h) Εἷς as Indefinite Article
(i) Εἷς=Τίς
(j) The Distributive Use of Εἷς

CHAPTER XV. Pronouns
I. Personal Pronouns
(a) The Nominative
   1. The First Person
   2. The Second Person
   3. The Third Person

(b) The Oblique Cases of the Personal Pronouns
   1. Originally Reflexive
   2. Αὐτοῦ
   3. Genitive for Possession
   4. Enclitic Forms

(c) The Frequency of the Personal Pronouns

(d) Redundant

(e) According to Sense

(f) Repetition of the Substantive

II. The Possessive Pronouns

(a) Just the Article

(b) Only for First and Second Persons

(c) Emphasis, When Used

(d) With the Article

(e) Possessive and Genitive Together

(f) Objective Use

(g) Instead of Reflexive

III. The Intensive and Identical Pronoun

(a) The Nominative Use of Αὐτός

(b) Varying Degrees of Emphasis

(c) Αὐτός with οὖτος
IV. The Reflexive Pronoun

(a) Distinctive Use
(b) The Absence of the Reflexive from the Nominative
(c) The Indirect Reflexive
(d) In the Singular
(e) In the Plural
(f) Article with
(g) Reflexive in the Reciprocal Sense
(h) Reflexive with Middle Voice
(i) The Use of Ἰδος

V. The Reciprocal Pronoun

VI. Demonstrative Pronouns

(a) Nature
(b) Different Shades of Meaning
(c) Ὅ, ἡ, τό
(d) Ὅς
(e) Ὅδε
(f) [Page xlv] Οὕτος

1. The Purely Deictic
2. The Contemptuous Use of οὕτος
3. The Anaphoric Use
4. In Apposition
5. Use of the Article
6. Article Absent
7. Οὗτος in Contrast with ἐκεῖνος
8. As Antecedent of the Relative Pronoun
9. Gender and Number of Οὗτος
10. The Adverbial Uses of τοῦτο and ταῦτα
11. The Phrase τοῦτο ἐστιν
12. In Combination with Other Pronouns
13. Ellipsis of Οὗτος
14. Shift in Reference

(g) Ἐκεῖνος
1. The Purely Deictic
2. The Contemptuous Use
3. The Anaphoric
4. The Remote Object (Contrast)
5. Emphasis
6. With Apposition
7. Article with Nouns except when Predicate
8. As Antecedent to Relative
9. Gender and Number
10. Independent Use

(h) Αὐτός

(i) The Correlative Demonstratives

VII. Relative Pronouns
(a) List in the N. T.
(b) The Name “Relative”
(c) A Bond between Clauses
(d) Ὄς
   1. In Homer
   2. Comparison with Other Relatives
   3. With Any Person
   4. Gender
   5. Number
   6. Case
      (α) Absence of attraction normal
      (β) Cognate accusative
      (γ) Attraction to the case of the antecedent
      (δ) Inverse attraction
      (ε) Incorporation
   7. Absence of Antecedent
   8. Prepositions with the Antecedent and the Relative
   9. Relative Phrases
  10. Pleonastic Antecedent
  11. [Page xlvi] The Repetition of Ὄς
  12. A Consecutive Idea
  13. Causal
  14. In Direct Questions
  15. In Indirect Questions
  16. The Idiom οὐδεὶς ἔστιν Ὄς
(e) Ὅστις
1. Varied Uses
2. The Distinction between ὃς and Ὅστις
3. The Indefinite Use
4. The Definite Examples
5. Value of ὃς?
6. Case
7. Number
8. Gender
9. Direct Questions
10. Indirect Questions

(f) Ὅιος
1. Relation to ὃς
2. Incorporation
3. Indirect Question
4. Number
5. Ὅιος τὸ ἐστὶν

(g) Ὅποιος
1. Qualitative
2. Double Office
3. Correlative

(h) Ὅσος
1. Quantitative
2. Antecedent
3. Attraction
4. Incorporation
5. Repetition
6. With ἄν
7. Indirect Questions
8. In Comparison
9. Adverbial

(i) Ἡλίκος

(j) Ὁ as Relative

VIII. Interrogative Pronouns

(a) Τίς
1. Substantival or Adjectival
2. The Absence of Gender
3. Τίς=ποῖος
4. Indeclinable τί
5. Predicate Use of τί with τοῦτο
6. In Alternative Questions
7. The Double Interrogative
8. [Page xlvii] As Relative
9. Adverbial Use
10. With Prepositions
11. With Particles
12. As Exclamation
13. Indirect Questions
14. Τίς or τίς

(b) Ποῖος
1. Qualitative
2. Non-qualitative
3. In Indirect Questions

(c) Πόσος
1. Less Frequent than ποῖος
2. Meaning
3. In Indirect Questions
4. The Exclamatory Use

(d) Πηλίκος
1. Rare
2. Indirect Questions

(e) Ποταμός

(f) Πότερος

IX. Indefinite Pronouns

(a) Τίς
1. The Accent
2. Relation to Τίς
3. Τίς as Substantive
4. With Numerals='About'
5. With Substantives
6. With Adjectives
7. As Predicate
8. The Position of τίς
9. As Antecedent
10. Alternative
11. The Negative Forms

12. Indeclinable τι

(b) Εἰς=Τις

(c) Πᾶς=’any one’

(d) Ὅ Δεῖνα

X. Alternative or Distributive Pronouns

(a) Ἀμφότεροι

(b) Ἐκαστος

1. Without Substantive

2. With Substantive

3. With εἰς

4. With Genitive

5. Partitive Apposition

6. Rare in Plural

7. Repetition

(c) [Page xlviii] Ἁλλος

1. Used absolutely=’An-other,’ ‘One Other’

2. For Two

3. As Adjective

4. With the Article

5. The Use of Ἁλλος Ἁλλο

6. In Contrast for ‘Some—Others’

7. Ellipsis of Ἁλλος

8. The Use of Ἁλλος and Ἑτερος Together

9. =‘Different’
10. Ἀλλότριος

(d) Ἐτερος

1. Absolutely
2. With Article
3. Second of Pair
4. =‘Different’
5. =‘Another’ of Three or More
6. In Contrast

(e) Other Antithetic Pronouns

XI. Negative Pronouns

(a) Οὐδείς

1. History
2. Οὐθείς
3. Gender
4. Οὐδὲ εἶς
5. Εἶς—οὐ

(b) Μηδείς

(c) Οὐτίς and Μήτις

(d) With Πᾶς

1. Οὐ πᾶς
2. Οὐ—πᾶς
3. Μὴ—πᾶς
4. Οὐ μὴ—πᾶν
5. Πᾶς—οὐ
6. Πᾶς—μὴ
7. Ἰᾶς—οὔ μή
8. Ὄ—πάντες
9. Πάντες οὔ

CHAPTER XVI. The Article

I. Other Uses of ὁ, ἡ, τό

II. Origin and Development of the Article
   (a) A Greek Contribution
   (b) Derived from the Demonstrative

III. Significance of the Article

IV. The Method Employed by the Article
   (a) [Page xlix] Individuals from Individuals
   (b) Classes from Other Classes
   (c) Qualities from Other Qualities

V. Varied Usages of the Article
   (a) With Substantives
      1. Context
      2. Gender of the Article
      3. With Proper Names
      4. Second Mention (Anaphoric)
   (b) With Adjectives
      1. The Resumptive Article
      2. With the Adjective Alone
      3. The Article not Necessary with the Adjective
      4. With Numerals
   (c) With Participles
With the Infinitive

With Adverbs

With Prepositional Phrases

With Single Words or Whole Sentences

With Genitive Alone

Nouns in the Predicate

Distributive

Nominative with the Article=Vocative

As the Equivalent of a Possessive Pronoun

With Possessive Pronouns

With Αὐτός

With Demonstratives

With Ὄλος, Πᾶς (Ἄπας)

With Πολύς

Ἄκρος, Ἡμεσς, Ἐσχατος, Μέσος

With Ἀλλος and Ἐτερος

Mόνος

VI. Position with Attributives

With Adjectives

1. Normal Position of the Adjective

2. The Other Construction (Repetition of the Article)

3. Article Repeated Several Times

4. One Article with Several Adjectives

5. With Anarthrous Substantives

6. With Participles
(b) With Genitives

1. The Position between the Article and the Substantive
2. Genitive after the Substantive without Repetition of the Article
3. Repetition of Article with Genitive
4. [Page I] The Article Only with Genitive
5. Article Absent with Both
6. The Correlation of the Article

(c) With Adjuncts or Adverbs

1. Between the Article and the Noun
2. Article Repeated
3. Only with Adjunct
4. Only with the Noun
5. When Several Adjuncts Occur
6. Phrases of Verbal Origin
7. Exegetical Questions
8. Anarthrous Attributives

(d) Several Attributives with Καί

1. Several Epithets Applied to the Same Person or Thing
2. When to be Distinguished
3. Groups Treated as One
4. Point of View
5. Difference in Number
6. Difference in Gender
7. With Disjunctive Particle

VII. Position with Predicates
VIII. The Absence of the Article

(a) With Proper Names

(b) With Genitives

(c) Prepositional Phrases

(d) With Both Preposition and Genitive

(e) Titles of Books or Sections

(f) Words in Pairs

(g) Ordinal Numerals

(h) In the Predicate

(i) Abstract Words

(j) Qualitative Force

(k) Only Object of Kind

IX. The Indefinite Article

CHAPTER XVII. Voice

I. Point of View

(a) Distinction between Voice and Transitiveness

(b) Meaning of Voice

(c) Names of the Voices

(d) History of the Voices

(e) Help from the Sanskrit

(f) Defective Verbs

II. The Active Voice

(a) Meaning of the Active Voice

(b) Either Transitive or Intransitive

(c) Effect of Prepositions in Composition
(d) Different Tenses Vary  
(e) The Active as Causative  
(f) Active with Reflexives  
(g) Impersonal Active  
(h) Infinitives  
(i) Active Verbs as Passives of Other Verbs  

III. The Middle Voice  
  (a) Origin of the Middle  
  (b) Meaning of the Middle  
  (c) Often Difference from Active Acute  
  (d) The Use of the Middle not Obligatory  
  (e) Either Transitive or Intransitive  
  (f) Direct Middle  
  (g) Causative or Permissive Middle  
  (h) Indirect Middle  
  (i) Reciprocal Middle  
  (j) Redundant Middle  
  (k) Dynamic (Deponent) Middle  
  (l) Middle Future, though Active Present  
  (m) The Middle Retreating in the N. T.  

IV. The Passive Voice  
  (a) Origin of the Passive  
  (b) Significance of the Passive  
  (c) With Intransitive or Transitive Verbs  
  (d) The Passive Usually Intransitive
(e) Aorist Passive
(f) Future Passive
(g) The Agent with the Passive Voice
(h) Impersonal Construction

CHAPTER XVIII. Tense

I. Complexity of the Subject

1. The Difficulty of Comparing Greek Tenses with Germanic Tenses
2. Bad Influence of the Latin on Greek Grammarians
3. Absence of Hebrew Influence
4. Gradual Growth of the Greek Tenses
5. “Aktionsart” of the Verb-Stem
6. The Three Kinds of Action Expressed in Terms of Tense
7. Time Element in Tense
8. Faulty Nomenclature of the Tenses
10. The Effect of Prepositions on the Verb
11. “Aktionsart” with Each Tense
12. Interchange of Tenses

II. Punctiliar Action

1. The Aorist
   (a) Aktionsart in the Aorist
      (α) Constative Aorist
      (β) Ingressive Aorist
      (γ) Effective Aorist
   (b) Aorist Indicative
(α) The Narrative or Historical Tense
(β) The Gnomic Aorist
(γ) Relation to the Imperfect
(δ) Relation to the Past Perfect
(ε) Relation to the Present
(ζ) Relation to Present Perfect
(η) Epistolary Aorist
(θ) Relation to the Future
(ι) Aorist in Wishes
(κ) Variations in the Use of Tenses
(λ) Translation of the Aorist into English

(c) The Aorist Subjunctive and Optative

(α) No Time Element in Subjunctive and Optative
(β) Frequency of Aorist Subjunctive
(γ) Aktionsart
(δ) Aorist Subjunctive in Prohibitions
(ε) Aorist Subjunctive with οὗ μη
(ζ) Aorist Optative

(d) The Aorist Imperative

(e) The Aorist Infinitive

(f) The Aorist Participle

(α) Aktionsart
(β) Ὁ and the Aorist Participle
(γ) Antecedent Action
(δ) But Simultaneous Action is Common also
(ε) Subsequent Action not Expressed by the Aorist Participle

(ζ) Aorist Participle in Indirect Discourse (Complementary Participle)

2. Punctiliar (Aoristic) Present
   (a) The Specific Present
   (b) The Gnomic Present
   (c) The Historical Present
   (d) The Futuristic Present

3. The Punctiliar (Aoristic) Future
   (a) Punctiliar or Durative
   (b) The Modal Aspect of the Future
      (α) Merely Futuristic
      (β) The Volitive Future
      (γ) Deliberative Future
   (c) The Future in the Moods
      (α) The Indicative
      (β) The Subjunctive and Optative
      (γ) The Infinitive
      (δ) The Participle
   (d) The Periphrastic Substitutes for the Future

III. Durative (Linear) Action

1. Indicative
   (a) The Present (ὁ ἔνεστος) for Present Time
      (α) The Descriptive Present
      (β) The Progressive Present
      (γ) The Iterative or Customary Present
(δ) The Inchoative or Conative Present
(ε) The Historical Present
(ζ) The Deliberative Present
(η) The Periphrastic Present
(θ) Presents as Perfects
(ι) Perfects as Presents
(κ) Futuristic Presents

(b) The Imperfect for Past Time
   (α) Doubtful Imperfects
   (β) The Descriptive Tense in Narrative
   (γ) The Iterative (Customary) Imperfect
   (δ) The Progressive Imperfect
   (ε) The Inchoative or Conative Imperfect
   (ζ) The “Negative” Imperfect
   (η) The “Potential” Imperfect
   (θ) In Indirect Discourse
   (ι) The Periphrastic Imperfect
   (κ) Past Perfects as Imperfects

(c) The Future for Future Time
   (α) The Three Kinds of Action in the Future (futuristic, volitive, deliberative)
   (β) The Periphrastic Future

2. Subjunctive and Optative
3. Imperative
4. Infinitive
5. Participle
(a) The Time of the Present Participle Relative
(b) Futuristic
(c) Descriptive
(d) Conative
(e) Antecedent Time
(f) Indirect Discourse

(g) [Page liv] With the Article
(h) Past Action Still in Progress
(i) “Subsequent” Action
(j) No Durative Future Participles

IV. Perfected State of the Action

1. The Idea of the Perfect
   (a) The Present Perfect
   (b) The Intensive Perfect
   (c) The Extensive Perfect
   (d) Idea of Time in the Tense

2. The Indicative
   (a) The Present Perfect
      (α) The Intensive Present Perfect
      (β) The Extensive Present Perfect=a completed state
      (γ) The Present Perfect of Broken Continuity
      (δ) The Dramatic Historical Present Perfect
      (ε) The Gnomic Present Perfect
      (ζ) The Perfect in Indirect Discourse
      (η) Futuristic Present Perfect
(θ) The “Aoristic” Present Perfect

(ι) The Periphrastic Perfect

(κ) Present as Perfect

(b) The Past Perfect

(α) The Double Idea

(β) A Luxury in Greek

(γ) The Intensive Past Perfect

(δ) The Extensive Past Perfect

(ε) The Past Perfect of Broken Continuity

(ζ) Past Perfect in Conditional Sentences

(η) The Periphrastic Past Perfect

(θ) Special Use of ἔχειμην

(c) The Future Perfect

3. The Subjunctive and Optative

4. The Imperative

5. The Infinitive

(a) Indirect Discourse

(b) Perfect Infinitive not in Indirect Discourse

(α) Subject or Object Infinitive

(β) With Prepositions

6. The Participle

(a) The Meaning

(b) The Time of the Tense

(c) The Perfect Tense Occurs with Various Uses of the Participle

(d) The Periphrastic Participle
CHAPTER XIX. Mode

Introductory

A. Independent or Paratactic Sentences

I. [Page iv] The Indicative Mode

1. Meaning of the Indicative Mode

2. Kinds of Sentences Using the Indicative
   (a) Either Declarative or Interrogative
   (b) Positive and Negative

3. Special Uses of the Indicative
   (a) Past Tenses
   (α) For Courtesy
   (β) Present Necessity, Obligation, Possibility, Propriety in Tenses of the Past
   (γ) The Apodosis of Conditions of the Second Class
   (δ) Impossible Wishes
   (b) The Present
   (c) The Future

II. The Subjunctive Mode

1. Relations to Other Modes
   (a) The Aorist Subjunctive and the Future Indicative
   (b) The Subjunctive and the Imperative
   (c) The Subjunctive and the Optative

2. Original Significance of the Subjunctive

3. Threefold Usage
   (a) Futuristic
   (b) Volitive
III. The Optative Mode

1. History of the Optative
2. Significance
3. The Three Uses
   (a) Futuristic or Potential
   (b) Volitive
   (c) Deliberative

IV. The Imperative

1. Origin of the Imperative
2. Meaning of the Imperative
3. Disappearance of the Imperative Forms
4. Alternatives for the Imperative
   (a) The Future Indicative
   (b) The Subjunctive
   (c) The Optative
   (d) The Infinitive
   (e) The Participle
5. Uses of the Imperative
   (a) Command or Exhortation
   (b) Prohibiton
   (c) Entreaty
   (d) Permission
   (e) [Page lvi] Concession or Condition
   (f) In Asyndeton
B. Dependent or Hypotactic Sentences

Introductory

(a) Use of Modes in Subordinate Sentences
(b) The Use of Conjunctions in Subordinate Clauses
(c) Logical Varieties of Subordinate Clauses

1. Relative Sentences

(a) Relative Sentences Originally Paratactic
(b) Most Subordinate Clauses Relative in Origin
(c) Relative Clauses Usually Adjectival
(d) Modes in Relative Sentences
(e) Definite and Indefinite Relative Sentences
(f) The Use of ὅν in Relative Clauses
(g) Special Uses of Relative Clauses
(h) Negatives in Relative Clauses

2. Causal Sentences

(a) Paratactic Causal Sentences
(b) With Subordinating Conjunctions
(c) Relative Clauses
(d) Διὰ τὸ and the Infinitive
(e) The Participle

3. Comparative Clauses

(a) The Relative ὅσος
4. Relative ὅς with κατά
5. Kaθότι in a Comparative Sense
6. Ως and its Compounds

4. Local Clauses
5. Temporal Clauses
(a) Kin to Relative Clauses in Origin and Idiom
(b) Conjunctions Meaning ‘When’
(c) The Group Meaning ‘Until’ (‘While’)
(d) Some Nominal and Prepositional Phrases
(e) The Temporal Use of the Infinitive
(f) Temporal Use of the Participle

6. Final and Consecutive Clauses
(a) Kinship
(b) Origin in Parataxis
(c) Pure Final Clauses
   (α) Ἴνα
   (β) Ὄπως
   (γ) Ως
   (δ) μή, μή ποτε, μή πως
   (ε) Relative Clauses
   (ζ) The Infinitive
   (η) The Participle
   (η) [Page lvii] Sub-Final Clauses
      (α) Ἴνα
      (β) Ὄπως
(γ) Μή, μή πως, μή ποτε

(δ) The Relative Clause

(ε) The Infinitive

(ζ) * and ὅτι

(e) Consecutive Clauses

(α) ἵνα

(β) ὅστε

(γ) ὅς

(δ) ὅτι

(ε) The Relative

(ζ) The Infinitive

7. Wishes

8. Conditional Sentences

(a) Two Types

(b) Four Classes

(α) Determined as Fulfilled

(β) Determined as Unfulfilled

(γ) Undetermined, but with Prospect of Determination

(δ) Remote Prospect of Determination

(c) Special Points

(α) Mixed Conditions

(β) Implied Conditions

(γ) Elliptical Conditions

(δ) Concessive Clauses

(ε) Other Particles with εἰ and ἐὰν
9. Indirect Discourse

(a) Recitative Ὄρτ in Oratio Recta

(b) Change of Person in Indirect Discourse

(c) Change of Tense in Indirect Discourse

(d) Change of Mode in Indirect Discourse

(e) The Limits of Indirect Discourse

(f) Declarative Clauses

(α) Ὄρτ and the Indicative

(β) The Infinitive

(γ) The Participle

(δ) Καὶ ἐγένετο

(g) Indirect Questions

(α) Tense

(β) Mode

(γ) Interrogative Pronouns and Conjunctions Used

(h) Indirect Command

(α) Deliberative Question

(β) The Conjunctions ἢνα and ὅπως

(γ) The Infinitive

(i) [Page Iviii] Mixture

(j) The Subordinate Clause

10. Series of Subordinate Clauses

CHAPTER XX. Verbal Nouns

I. Kinship

II. The Infinitive
1. Origin

2. Development
   (a) The Prehistoric Period
   (b) The Earliest Historic Period
   (c) The Classic Period from Pindar on
   (d) The Κοινή Period
   (e) The Later Period

3. Significance

4. Substantival Aspects of the Infinitive
   (a) Case (Subject or Object Infinitive)
   (b) The Articular Infinitive
   (c) Prepositions
   (d) The Infinitive with Substantives
   (e) The Infinitive with Adjectives
   (f) The Infinitive with Verbs
   (g) The Appositional Infinitive

5. Verbal Aspects of the Infinitive
   (a) Voice
   (b) Tense
   (c) Cases with the Infinitive
   (d) The Infinitive in Indirect Discourse
   (e) Personal Construction with the Infinitive
   (f) Epexegetical Infinitive
   (g) Purpose
   (h) Result
(i) Cause

(j) Time

(k) The Absolute Infinitive

(l) Negatives

(m) Ἀν with the Infinitive

III. The Participle

1. The Verbals in -τος and -τέος

2. History of the Participle
   (a) The Sanskrit Participle
   (b) Homer’s Time
   (c) The Attic Period
   (d) The Κοινή
   (e) Modern Greek

3. Significance of the Participle
   (a) Originally an Adjective
   (b) The Addition of the Verbal Functions
   (c) [Page lix] The Double Aspect of the Participle
   (d) Relation between Participle and Infinitive
   (e) Method of Treating the Participle

4. Adjectival Aspects of the Participle
   (a) Declension
   (b) Attributive Participle
      (α) Anarthrous
      (β) Articular
   (c) Predicate Participle
(d) The Participle as a Substantive
(e) The Participle as an Adverb

5. Verbal Aspects of the Participle

(a) Voice
(b) Tense
   (α) Timelessness of the Participle
   (β) The Aorist
   (γ) The Present
   (δ) The Perfect
   (ε) The Future
(c) Cases
(d) The Supplementary Participle
   (α) The Periphrastic Construction
   (β) A Diminution of the Complementary Participle
   (γ) Verbs of Emotion
   (δ) Indirect Discourse
(e) The Circumstantial Participle
   (α) The General Theory
   (β) Varieties of the Circumstantial Participle
   (γ) The Absolute Participle in Subordinate Clauses
(f) The Independent Participle in a Sentence
(g) Co-ordination between Participles
(h) ΟÚ and µή with the Participle
(i) Other Particles with the Participle

CHAPTER XXI. Particles
I. Scope

II. Intensive or Emphatic Particles

1. Limitations

2. The N. T. Illustrations
   (a) Γέ
   (b) Δῆ
   (c) Εἴ μην, νή and ναί
   (d) Μέν
   (e) Πέρ
   (f) Τοί

III. Negative Particles

1. The Objective Ο Ó and its Compounds
   (a) Origin
   (b) [Page lx] History
   (c) Meaning
   (d) Uses
      (i) The Indicative
         (α) Independent Sentences
         (β) Subordinate Clauses
      (ii) The Subjunctive
      (iii) The Optative
      (iv) The Imperative
      (v) The Infinitive
      (vi) The Participle
      (vii) With Nouns
(e) Kαί Oὖ
(f) Redundant or Pleonastic Oὖ
(g) Repetition of Oὖ
(h) The Intensifying Compound Negative
(i) The Disjunctive Negative

2. The Subjective Negative Mή and Its Compounds
   (a) The History of Mή
   (b) Significance of Mή
   (c) Uses of Mή
       (i) The Indicative
       (ii) The Subjunctive
       (iii) The Optative
       (iv) The Imperative
       (v) The Infinitive
       (vi) The Participle
       (vii) Nouns
   (d) The Intensifying Compounds with Mή
   (e) Kαί μή
   (f) Disjunctive Use of Mή

3. Combination of the Two Negatives
   (a) Mή oǔ
   (b) Oǔ μή

IV. Interrogative Particles
   1. Single Questions
      (a) Direct Questions
(i) No Particle at All
(ii) The Use of Negative Particles
(iii) Other Particles
(iv) Interrogative Pronouns
(v) Interrogative Conjunctions

(b) Indirect Questions
   (i) Pronouns
   (ii) Conjunctions

2. Double Questions
   (i) Direct
   (ii) Indirect

V. [Page lxii] Conjunctions

1. Paratactic Conjunctions
   (a) Copulative
      (i) Τέ
      (ii) Καί
      (iii) Δέ
      (iv) Ἀλλά
   (b) Adversative
      (i) Δέ
      (ii) Ἀλλά
      (iii) Πλήν
      (iv) Μέντοι
      (v) Ὑμως
      (vi) Εἰ μὴ
(c) Disjunctives

(i) Ἔ

(ii) Εἶτε—εἶτε (ἔαντε—ἔαντε)

(iii) Οὐτε—οὐτε (μήτε—μήτε)

(d) Inferential Conjunctions

(i) Ἄρα

(ii) Γάρ

(iii) Οὖν

2. Hypotactic Conjunctions

VI. Interjections

CHAPTER XXII. Figures of Speech

I. Rhetorical, not Grammatical

II. Style in the N. T.

III. Figures of Idea or Thought

IV. Figures of Expression

(a) Parallels and Contrasts

(b) Contrasts in Words

(c) Contraction and Expansion

(d) Metaphors and Similar Tropes

ADDITIONAL NOTES

1. Καθαρίζω or καθερίζω

2. Prothetic Vowels in the N. T.

3. Elision

4. Παρρησία

5. Assimilation of ἐν μέσῳ
6. Rules for Assimilation of Consonants
7. Metathesis
8. Enclitics and Proclitics
9. Βουστροφηδόν
10. Perfect of ὀράω
11. Augment in the Past Perfect
12. List of Important Verbs
13. Ablaut

**INDEX OF SUBJECTS**

**INDEX OF GREEK WORDS**

**INDEX OF QUOTATIONS**

(a) New Testament
(b) Old Testament
(c) Inscriptions
(d) Papyri and Ostraca
(e) Greek Literature
   (i) Classical
   (ii) Κοινή
(f) Latin

**ADDENDA TO THE SECOND EDITION**

**ADDENDA TO THE THIRD EDITION**

**INDEX TO ADDENDA TO SECOND AND THIRD EDITIONS**

**LIST OF WORKS MOST OFTEN REFERRED TO**

I had prepared an exhaustive analytic bibliography of the pertinent literature, but it was so long that, on the advice of several friends, I have substituted an alphabetical
list of the main works mentioned in the book. The editions of Greek authors, the
papyri and the inscriptions will be found in the Index of Quotations. Look there for
them. For full histories of grammatical discussion one may turn to Sandys, *A History
Geschichte der klassischen Philologie* (2. Aufl., 1909); and Hübner, *Grundriß zu
Vorlesungen über die griechische Syntax* (1883). By no means all the works consulted
and referred to in the Grammar are given below. Only the most important can be
mentioned. Hundreds that were consulted are not alluded to in the Grammar. But the
following list represents fairly well the works that have contributed most to the
making of my book. The chief journals quoted are also mentioned here.

———, Johannine Grammar (1906).

———, Johannine Vocabulary (1905).

ALEXANDER, W. J., Participial Periphrases in Attic Orators (Am. J. Ph., IV, pp. 291–
309).

ALLEN, H. F., The Infinitive in Polybius compared with the Infinitive in Biblical
Greek (1907).

*Am. J. of Sem. L. and Lit.*, The American Journal of Semitic Languages and Literature
(Chicago).

1909).

———, The Κοινή, the Language of the New Testament (Princ. Theol. Rev., Jan.,
1910).

ANZ, H., Subsidia ad cognoscendum Graecorum sermonem vulgarem e Pentateuchi
versione Alexandrina repetita (Diss. phil. Hal., XII, 1894, pp. 259–387).

APOSTOLIDES, Essai sur l’Hellenisme Égyptien et ses rapports avec l’Hellenisme
classique et l’Hellenisme moderne (1898).

———, Du grec alexandrin et des rapports avec le grec ancien et le grec moderne
(1892).

*Archiv für Papyrusforschung und verwandte Gebiete* (Leipzig).

ARNAUD, Essai sur le caractère de la langue grec du N. T. (1899).
ARNOLD and CONWAY, The Restored Pronunciation of Greek and Latin (1885).

AUDOIN, E., De la déclinaison dans les langues indo-européennes (1898).

BACON, ROGER, Oxford Greek Grammar. Edited by Nolan and Hirsch (1902).

BAMBERG, Hauptregeln der griechischen Syntax (1890).

BARON, Le Pronom Relatif et la Conjonctive en Grec (1892).

BARRY, W., The Holy Latin Tongue (Dublin Rev., April, 1906); Our Latin Bible (ib., July).

BÄUMLEIN, Untersuchungen über die griech. Modi und die Partikeln κέν und ἄν (1846).

———, Untersuch. über greech. Partikeln (1861).

BEKKER, Anecdota Graeca. 3 Bde. (1814–1821).

BÉNARD, Formes verbales en grec d’après le texte d’Hérodote (1890).

BERDOLT, Der Konsekutivsatz in der ältern griech. Lit. (1896).

BERNHARDY, G., Wissenschaftliche Syntax der griechischen Sprache (1829).

Bibl. Gr. V., Bibliothèque grecque vulgaire (Paris).

BIRKE, De Particularum μή et oṽ Usu Polybiano Dionysiaeoe Diodoreo Straboniano (1897).

BIRKLEIN, F., Entwicklungsgeschichte des substantivierten Infinitivs (1882).

———, Die griech. Beredsamkeit von Alex. bis auf August. (1865).

———, Die Rhythmen der asianischen und römischen Kunstprosa (1905).

———, Evangelium sec. Lukam (1897).

———, Hermeneutik und Kritik (1892).

———, Philology of the Gospels (1898).

———, Pronunciation of Ancient Greek (translation by Purton in 1890 of 3. Aufl. of Über die Aussprache des Griech. 1888).

BLASS-DEBRUNNER, Grammatik d. neut. Griech. 4. Aufl. (1913).

BLOOMFIELD, Study of Greek Accent (A. J. Ph., 1883).

BÖHMER, J., Das biblische “im Namen” (1898).

BOISACQ, Les dialectes doriens (1891).

———, Dictionnaire étymol. de la langue grecque (1907 ff.).

PART I

INTRODUCTION

[PAGE 3] CHAPTER I

NEW MATERIAL

The Ideal Grammar? Perhaps the ideal grammar of the New Testament Greek may never be written. It is a supremely difficult task to interpret accurately the forms of human speech, for they have life and change with the years. But few themes have possessed greater charm for the best furnished scholars of the world than the study of language.

1 See J. Classen, De Gr. Graecae Primordiis, 1829, p. 1, who says: “Inter humani ingenii inventa, quae diuturna consuetudine quasi naturae iura adepta sunt, nullum fere magis invaluit et pervulgatum est, quam grammaticae ratio et usus.”
The language of the N. T. has a special interest by reason of the message that it bears. Every word and phrase calls for minute investigation where so much is at stake. It is the task and the duty of the N. T. student to apply the results of linguistic research to the Greek of the N. T. But, strange to say, this has not been adequately done.\(^2\)

New Testament study has made remarkable progress in the sphere of criticism, history and interpretation, but has lagged behind in this department. A brief survey of the literary history of the subject shows it.

I. The Pre-Winer Period. It was Winer who in 1822 made a new epoch in N. T. grammatical study by his *Neutestamentliches Sprachidiom*. It is hardly possible for the student of the present day to enter into sympathy with the inanities and sinuosities that characterized the previous treatises on the N. T. idiom. Not alone in the controversy between the Purists and Hebraists was this true, but writers like Storr, by a secret system of *quid pro quo*, cut the Gordian knot of grammatical difficulty by explaining one term as used for another, one preposition for another, one case for another, etc. As a university tutor Winer [Page 4] combated “this absurd system of interpretation,” and not without success in spite of receiving some sneers. He had the temerity to insist on this order of interpretation: grammatical, historical, theological. He adhered to his task and lived to see “an enlightened philology, as deduced and taught by Herrmann and his school,” triumph over the previous “unbridled license.”\(^1\)

II. The Service of Winer.

(a) Winer’s Inconsistencies. It must be said, however, that great as was the service of Winer to this science, he did not at all points carry out consistently his own principles, for he often explained one tense as used for another. He was not able to rise entirely above the point of view of his time nor to make persistent application of the philosophical grammar. It is to be borne in mind also that the great science of comparative philology had not revolutionized linguistic study when Winer first wrote. In a true sense he was a pathfinder.

(b) Winer Epoch-Making.—Winer in English. But none the less his work has been the epoch-making one for N. T. study. After his death Dr. Gottlieb Lünemann revised and improved the *Neutestamentliches Sprachidiom*. Translations of Winer’s *Grammatik* into English were first made by Prof. Masson of Edinburgh, then by Prof.

2 “And despite the enormous advance since the days of Winer toward a rational and unitary conception of the N. T. language, we still labour to-day under the remains of the old conceptions.” Samuel Dickey, Prince. Theol. Rev., Oct., 1903, “New Points of View.”

Winer, G. B., *De verborum cum praep. compos. in N. T. Usu* (1834–1843).

1 See Pref. to the sixth and last ed. by Winer himself as translated by Dr. J. H. Thayer in the seventh and enlarged ed. of 1869.
Thayer of Harvard (revision of Masson), and finally by Prof. W. F. Moulton of Cambridge, who added excellent footnotes, especially concerning points in modern Greek. The various editions of Winer-Thayer and Winer-Moulton have served nearly two generations of English and American scholars.

(c) SCHMIEDEL. But now at last Prof. Schmiedel of Zürich is thoroughly revising Winer’s *Grammatik*, but it is proceeding slowly and does not radically change Winer’s method, though use is made of much of the modern knowledge.² Deissmann,³

Thayer

THAYER, J. H., Greek-English Lexicon of the N. T. (1887).
———, Language of the N. T. (Hastings’ D. B., 1900).

Moulton MOULTON, W. F., and GEDEN, A. S., A Concordance to the Greek Testament (1897).
2 Winer’s Gr. des neutest. Sprachid. 8. Aufl. neu bearbeitet von Dr. Paul Wilhelm Schmiedel, 1894—.
Deissmann

DEISSMANN, A., Bible Studies (1901). Tr. by A. Grieve; cf. Bibelstudien (1895) and Neue Bibelstudien (1897).

———, Licht vom Osten (1908).
———, Light from the Ancient East (1910). Tr. by Strachan.
indeed, expresses disappointment in this regard concerning Schmiedel’s work as being far “too much Winer and too little Schmiedel.” But Deissmann concedes that Schmiedel’s work “marks a characteristic and decisive turning-point in N. T. philology.”

[Page 5] (d) BUTTMANN. Buttmann’s *Grammatik des neuestamentlichen Sprachgebrauchs* had appeared in 1859 and was translated by Thayer as Buttmann’s *Grammar of N. T. Greek* (1873), an able work.

(e) BLASS. It is not till the *Grammatik des neuestamentlichen Griechisch* by Prof. Blass in 1896 that any other adequate grammar appears in this field. And Blass departs a little from traditional methods and points of view. He represents a transition towards a new era. The translation by H. St. John Thackeray has been of good service in the English-speaking world.¹

III. The Modern Period. It is just in the last decade that it has become possible to make a real advance in New Testament grammatical study. The discovery and investigation that have characterized every department of knowledge have borne rich fruit here also.

———, St. Paul in the Light of Social and Religious History (1912).

Blass

———, Hermeneutik und Kritik (1892).

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).

¹ First ed. 1898, second ed. 1905, as Blass’ Gr. of N. T. Gk. A revision of the work of Blass (the 4th German edition) by Dr. A. Debrunner has appeared as these pages are going through the press.
(a) Deissmann. Deissmann\(^2\) sees rightly the immensity of the task imposed upon the N. T. grammarian by the very richness of the new discoveries. He likewise properly condemns the too frequent isolation of the N. T. Greek from the so-called “profane Greek.”\(^3\) Deissmann has justly pointed out that the terms “profane” and “biblical” do not stand in linguistic contrast, but rather “classical” and “biblical.” Even here he insists on the practical identity of biblical with the contemporary later Greek of the popular style.\(^4\)

It was in 1895 that Deissmann published his *Bibelstudien*, and his *Neue Bibelstudien* followed in 1897. The new era has now fairly begun. In 1901 the English translation of both volumes by Grieve appeared as *Bible Studies*. In 1907 came the *Philology [Page 6] of the Bible*. His *Licht vom Osten* (1908) was his next most important work (*Light from the Ancient East*, 1910, translated by Strachan). See Bibliography for full list of his books. The contribution of Deissmann is largely in the field of lexicography.

(b) Thumb. It was in 1901 that A. Thumb published his great book on the κοινή, *Die griechische Sprache im Zeitalter des Hellenismus*, which has done so much to give the true picture of the κοινή. He had already in 1895 produced his *Handbuch der

\(^3\) Ib., p. 7. Like, for instance, Zezschwitz, Profangräc. und bibl. Sprachg., 1859.

Thumb

---

———, *Die griech. Sprache im Zeitalter des Hellenismus* (1901).

neugriechischen Volkssprache. In 1912 the second enlarged edition was issued in English by S. Angus, as *Handbook of Modern Greek Vernacular*. This book at once took front place for the study of the modern Greek by English students. It is the only book in English that confines itself to the vernacular.

(c) MOULTON. In 1895, J. H. Moulton, son of W. F. Moulton, the translator of Winer, produced his *Introduction to N. T. Greek*, in a noble linguistic succession. In 1901 he began to publish in *The Classical Review* and in *The Expositor*, “Grammatical Notes from the Papyri,” which attracted instant attention by their freshness and pertinency. In 1906 appeared his now famous *Prolegomena*, vol. I, of *A Grammar of N. T. Greek*, which reached the third edition by 1908. With great ability Moulton took the cue from Deissmann and used the papyri for grammatical purposes.

Angus

Moulton

———, Einleitung in die Sprache des N. T. (1911).

———, The Science of Language (1903).

Moulton

———, Characteristics of N. T. Greek (The Expositor, 1904).
He demonstrated that the Greek of the N. T. is in the main just the vernacular κοινή of the papyri. In 1911 the *Prolegomena* appeared in German as *Einleitung in die Sprache des Neuen Testaments*.

(d) OTHER CONTRIBUTIONS. It is not possible to mention here all the names of the workers in the field of N. T. grammar (see Bibliography). The old standpoint is still found in the books of Hatch, *Essays in Biblical Greek* (1889); Hoole, *The Classical Element in the N. T.* (1888); Simcox, *The Language of the N. T.* (1890); Schaff, *A Companion to the Greek Testament and English Version* (1889); Viteau, *Étude sur le grec du N. T.—Le Verbe* (1893); *Le Sujet* (1896). The same thing is true of Abbott’s

Viteau

Abbott
Johannine Vocabulary (1905) and Johannine Grammar (1906); Burton’s Syntax of the Moods and Tenses of the N. T. Greek (1888, third ed. 1909) is yet a genuine contribution. In Kennedy’s Sources of N. T. Greek (1895) we see a distinct transition toward the new era of N. T. grammar. In 1911 Radermacher’s Neutestamentliche Grammatik is in fact more a grammar of the κοινή than of the N. T., as it is designed to be an Einleitung. The author’s Short Grammar of the Greek N. T. (1908) gives the new knowledge in a succinct form. The Italian translation (1910) by Bonaccorsi has additional notes by the translator. Stocks (1911) made numerous additions to the Laut- und Formenlehre of the German edition. Grosheide in the Dutch translation (1912) has made a revision of the whole book. The French edition (1911) by Montet is mainly just a translation. The fourth enlarged edition in English appeared in 1916. Many special treatises of great value have appeared (see Bibliography), by men like Angus, Buttmann, Heinrici, Thieme, Vogel, Votaw, J. Weiss, Wellhausen.

(c) Richness of Material. Now indeed it is the extent of the material demanding examination that causes embarrassment. And only thirty years ago K. Krumbacher

Krumbacher
lamented that it was not possible to give “a comprehensive presentation of the Greek language” because of the many points on which work must be done beforehand. But we have come far in the meantime. The task is now possible, though gigantic and well-nigh insurmountable. But it is not for us moderns to boast because of the material that has come to our hand. We need first to use it. Dieterich\(^2\) has well said that the general truth that progress is from error to truth “finds its confirmation also in the history of the development that the Greek language has received in the last two thousand years.” By the induction of a wider range of facts we can eliminate errors arising from false generalizations. But this is a slow process that calls for patience. Dionysius Thrax,\(^3\) one of the Alexandrian fathers of the old Greek grammar (circa 100 B.C.), said: \(\text{Γραμματικὴ ἔστιν ἐπειρία τῶν παρὰ ποιητὰς τε καὶ συγγραφέων ὡς ἔπὶ τὸ πολὺ λεγομένων.}\) Andrew Lang\(^4\) indeed is a disciple of Dionysius Thrax in one respect, for he contends that students are taught too much grammar and too little language. They know the grammars and not the tongue. A bare outline can be given of the sources of the new material for such grammatical study.

\[\text{[Page 8]}\] IV. The New Grammatical Equipment for N. T. Study.

\(\text{(a) COMPARATIVE PHILOLOGY.}\) We must consider the great advance in comparative philology. The next chapter will deal somewhat at length with various phases of the historical method of linguistic study.

1. \textit{The Linguistic Revolution.} A revolution has been wrought in the study of language. It must be confessed that grammatical investigation has not always been

\[\text{KRUMBACHER, K., Beiträge zu einer Geschichte der griech. Sprache (Kuhn’s Zeitschr., 1885, pp. 481–545).}\]

Lang LANG, A., Homer and His Age (1906).

4 Morning Post, Lond., May 5, 1905.
conducted on the inductive principle nor according to the historical method. Too often the rule has been drawn from a limited range of facts. What is afterwards found to conflict with a rule is called an “exception.” Soon the exceptions equal or surpass the rule. Unfortunately the ancients did not have the benefit of our distinctions of “regular” and “irregular.” Metaphysical speculation with lofty superiority to the facts is sometimes charged upon grammarians.\(^1\) “Grammar and logic do not coincide.”\(^2\) Comparative grammar is merely the historical method applied to several languages together instead of only one.\(^3\)

2. *A Sketch of Greek Grammatical History*. The Greek has had its own history, but it is related to the history of kindred tongues. “From the days of Plato’s *Kratylos* downward … the Greek disputed as to whether language originated by convention (νόμῳ) or by nature (φύσι).”\(^4\) Indeed formal Greek grammar was the comparison with the Latin and began “with Dionysius Thrax, who utilized the philological lucubrations of Aristotle and the Alexandrian critics for the sake of teaching Greek to the sons of the aristocratic contemporaries of Pompey at Rome.”\(^5\) His Greek grammar is still in existence in Bekker’s *Anecdota*,\(^6\) and is the cause of much grotesque etymology since.\(^7\)

This period of grammatical activity came after the great creative period of Greek literature was over, and in Alexandria, not [Page 9] in Athens.\(^1\) Rhetoric was scientifically developed by Aristotle long before there was a scientific syntax. Aristotle perfected logical analysis of style before there was historical grammar.\(^2\) With Aristotle ὁ γραμματικός was one that busied himself with the letters (γράμματα). He was not ἀγράμματος; ἡ γραμματική then had to do with the letters and was exegetical.\(^3\) Plato does not treat grammar, though the substantive and the adjective are distinguished, but only dialectics, metaphysics, logic.\(^4\) The Stoic grammarians, who succeeded Plato and Aristotle, treated language from the logical

1 So Dr. John H. Kerr, sometime Prof. of N. T. in the Pac. Theol. Sem., in conversation with me.

3 Ib., pp. 1 ff. So Oertel, Lect. on the Study of Lang., 1901, p. 42, “Comparative grammar in Schleicher’s sense is in its essence nothing but historical grammar by the comparative method.”

4 Sayce, Prin. of Comp. Philol., 1875, p. 259 f.

5 Ib., p. 261.

7 See Sayce, Intr. to the Sci. of Lang., 1880, vol. I, p. 19 f.; Dionysius Thrax’s τέχνη γραμματική was developed into a system by Apollonius Dyscolus (ii/A.D.) and his son Herodian. Dionysius Thrax was born B.C. 166. Dyscolus wrote a systematic Gk. Syntax of accentuation in 20 books (known to us only in epitome) about 200 A.D.

1 See Jebb in Whibley’s Comp. to Gk. Stud., 1905, p. 147 f.

3 F. Hoffmann, Über die Entwicklung des Begriffs der Gr. bei den Alten, 1891, p. 1.

4 Ib., p. 144. The early Gk. grammarians were “ohne richtiges historisches Bewußtsein” (Steinthal, Gesch. der Sprachw. etc., 1. Tl., 1863, p. 39). Even in Plato’s *Kratylos* we do not see “das Ganze in seiner Ganzheit” (p. 40).
standpoint and accented its psychological side. So the Alexandrian grammarians made γραμματική more like κριτική. They got hold of the right idea, though they did not attain the true historical method.

Comparative grammar was not wholly unknown indeed to the ancients, for the Roman grammarians since Varro made a comparison between Greek and Latin words. The Roman writers on grammar defined it as the “scientia recte loquendi et scribendi,” and hence came nearer to the truth than did the Alexandrian writers with their Stoic philosophy and exegesis. It has indeed been a hard struggle to reach the light in grammar. But Roger Bacon in this “blooming time” saw that it was necessary for the knowledge of both Greek and Latin to compare them. And Bernhardy in 1829 saw that there was needed a grammatico-historical discussion of syntax because of the “distrust of the union of philosophy with grammar.” We needed “the viewpoint [Page 10] of the historical Syntax.” Humboldt is quoted by Oertel as saying: “Linguistic science, as I understand it, must be based upon facts alone, and this collection must be neither one-sided nor incomplete.” So Bopp conceived also: “A grammar in the higher scientific sense of the word must be both history and natural science.” This is not an unreasonable demand, for it is made of every other department of science.

3. The Discovery of Sanskrit. It is a transcendent fact which has revolutionized grammatical research. The discovery of Sanskrit by Sir William Jones is what did it. In 1786 he wrote thus: “The Sanskrit language, whatever may be its antiquity, is of wonderful structure; more perfect than the Greek, more copious than the Latin, and more exquisitely refined than either; yet bearing to both of them a stronger affinity, both in the roots of verbs and the forms of grammar, than could have been produced by accident; so strong that no philologer could examine all the three without believing them to have sprung from some common source which no longer exists. There is a

5 Ib., p. 277 f. For a good discussion of Dion. Thr. see Jannaris, Hist. Gk. Gr., p. 34 f.
7 See Kretschmer, op. cit., p. 4.
8 F. Blass, Hermen. und Krit., 1892, p. 157 f.
9 Steinthal, Gesch. etc., 2. Tl., 1891, p. 1, calls this time of struggle “ihre Blütezeit.”
10 Roger Bacon, Oxford Gk. Gr., edited by Nolan and Hirsch, 1902, p. 27: “Et in hac comparatione Grammaticae Graecae ad Latinam non solum est necessitas propter intelligendam Grammaticam Graecam, sed omnino necessarium est ad intelligentiam Latinae Grammaticae.”
Bernhardy BERNHARDY, G., Wissenschaftliche Syntax der griechischen Sprache (1829).

Bopp BOPP, Vergleichende Grammatik (1857).
2 See C. Herrmann, Philos. Gr., 1858, p. 422: “Die Natur der philosophischen Grammatik war von Anfang an bestimmt worden als die eine Grenzwissenschaft zwischen Philosophie und Philologie.” But it is a more objective task now.
similar reason, though not so forcible, for supposing that both the Gothic and the Celtic, though blended with a different idiom, had the same origin with the Sanskrit.”

He saw then the significance of his own discovery, though not all of it, for the Teutonic tongues, the Lithuanian and Slav group of languages, the Iranian, Italic, Armenian and Albanian belong to the same Aryan, Indo-Germanic or Indo-European family as it is variously called.

4. From Bopp to Brugmann. But Bopp⁴ is the real founder of comparative philology. Before Bopp’s day “in all grammars the mass of ‘irregular’ words was at least as great as that of the ‘regular’ ones, and a rule without exception actually excited suspicion.”⁵ Pott’s great work laid the foundation of scientific phonetics.⁶ Other great names in this new science are W. von Humboldt,¹ Jacob Grimm,² Schlegel,³ Schleicher,⁴ Max Müller,⁵ Curtius,⁶ Verner,⁷ Whitney,⁸ L. Meyer.⁹

4 See his Vergl. Gr., 1857. He began publication on the subject in 1816.

But in recent years two men, K. Brugmann and B. Delbrück, have organized the previous knowledge into a great monumental work, Grundriß der vergleichenden Grammatik der indogermanischen Sprachen.10 This achievement is as yet the high-watermark in comparative grammar. Brugmann has issued a briefer and cheaper edition giving the main results.11 Delbrück has also a brief treatise on Greek syntax in the light of comparative grammar,12 while Brugmann has applied comparative philology to the Laut- und Formenlehre of Greek grammar.13 In the Grundriß Brugmann has Bde. I, II, while Delbrück treats syntax in Bde. III–V. In the new edition Brugmann has also that part of the syntax which is treated in Vol. III and IV of the first edition. The best discussion of comparative grammar for beginners is the second edition of P. Giles’s Manual.14 Hatzidakis successfully undertakes to apply

comparative grammar to the modern Greek. Riemann and Goelzer have made an exhaustive comparison of the Greek and Latin languages. There are, indeed, many interesting discussions of the history and principles growing out of all this linguistic development, such as the works [Page 12] of Jolly, Delbrück, Sweet, Paul, Oertel, Moulton, Whitney, Max Müller, Sayce. It is impossible to write a grammar of the

Greek N. T. without taking into consideration this new conception of language. No language lives to itself, and least of all the Greek of the N. T. in the heart of the world-empire. It is not necessary to say that until recently use of this science had not been made by N. T. grammars.

(b) ADVANCE IN GENERAL GREEK GRAMMAR. There has been great advance in the study of general Greek grammar. The foundations laid by Crosby and Kühner, Krüger, Curtius, Buttmann, Madvig, Jelf and others have been well built upon by Hadley, Goodwin, Gildersleeve, Gerth, Blass, Brugmann, G. Meyer, Schanz, Hirt, Moulton, W. F., and Gedén, A. S., A Concordance to the Greek Testament (1897).

Goodwin, W. W., Greek Grammar. Various editions.

Gildersleeve
Jannaris, etc. To the classical student this catalogue of names\textsuperscript{12} is full of significance. The work of Kühner has been thoroughly revised and improved in four massive volumes by Blass\textsuperscript{13} and Gerth,\textsuperscript{14} furnishing a magnificent apparatus for the advanced student. Hirt’s handbook\textsuperscript{15} gives the modern knowledge in briefer form, a compendium of comparative grammar, while G. Meyer\textsuperscript{16} and Brugmann\textsuperscript{17} are professedly on the basis of comparative philology. Jannaris\textsuperscript{1} is the first fairly successful attempt to present in one volume the survey of the progress of the language as a whole. Schanz\textsuperscript{2} makes a much more ambitious undertaking and endeavours in a large number of monographs to furnish material for a future historical grammar. Gildersleeve\textsuperscript{3} has issued only two volumes of his work, while the grammars of Hadley-Allen and Goodwin are too well known to call for remark. New grammars, GILDERSLEEVE, B. L., Editions of Pindar and Justin Martyr.

Allen ALLEN, H. F., The Infinitive in Polybius compared with the Infinitive in Biblical Greek (1907).
like F. E. Thompson’s (1907, new ed.) and Simonson’s (2 vols., 1903, 1908),
continue to appear.

(c) CRITICAL EDITIONS OF GREEK AUTHORS. The Greek authors in general have
received minute and exhaustive investigation. The modern editions of Greek writers
are well-nigh ideal. Careful and critical historical notes give the student all needed,
sometimes too much, aid for the illumination of the text. The thing most lacking is the
reading of the authors and, one may add, the study of the modern Greek. Butcher4
well says “Greek literature is the one entirely original literature of Europe.” Homer,
Aristotle, Plato, not to say Æschylus, Sophocles and Euripides are still the modern
masters of the intellect. Translations are better than nothing, but can never equal the
original. The Greek language remains the most perfect organ of human speech and
largely because “they were talkers, whereas we are readers.”5 They studied diligently
how to talk.6

(d) WORKS ON INDIVIDUAL WRITERS. In nothing has the tendency to specialize
been carried further than in Greek grammatical research. The language of Homer,
Thucydides, Herodotus, the tragic poets, the comic writers, have all called for minute
investigation,1 and those of interest to N. T. students are the monographs on
Polybius, Josephus, Plutarch, etc. The concordances of Plato, Aristotle, etc., are
valuable. The Apostolic Fathers, Greek Christian Apologists and the Apocryphal
Apost. (1898). The universities of America and Europe which give the Ph.D. degree
have produced a great number of monographs on minute points like the use of the

Reinhold REINHOLD, H., De graecitate Patrum (1898).
preposition in Herodotus, etc. These all supply data of value and many of them have been used in this grammar. Dr. Mahaffy, indeed, is impatient of too much specialization, and sometimes in linguistic study the specialist has missed the larger and true conception of the whole.

(e) THE GREEK INSCRIPTIONS. The Greek inscriptions speak with the voice of authority concerning various epochs of the language. Once we had to depend entirely on books for our knowledge of the Greek tongue. There is still much obscurity, but it is no longer possible to think of Homer as the father of Greek nor to consider 1000 B.C. as the beginning of Greek culture. The two chief names in epigraphical studies are those of August Boeckh (Corpus Inscriptionum Graecarum) and Theodor Mommsen (Corpus Inscriptionum Latinarum). For a careful review of “the Nature of the New Texts” now at our service in the inscriptions see Deissmann, Light, etc., pp.

10–20. See W. H. P. Hatch’s article (Jour. of Bibl. Lit., 1908, pp. 134–146, Part 2) on “Some Illustrations of N. T. Usage from Greek Inscriptions of Asia Minor.” Cf. also Thieme, Die Inschriften von Magnesia am Mäander und das Neue Test. (1906), and Rouffiac, Recherches sur les Caractères du Grec dans le N. T. d’après les Inscriptions de Priène (1911). Deissmann, op. cit., p. 18, thinks that ὧγην is rightly restored in a pagan inscription in Pisidia of the imperial period. For the Christian inscriptions see Deissmann, op. cit., p. 19. Schliemann has not only restored the story of Troy to the reader of the historic past, but he has revealed a great civilization [Page 15] at Mycenæ. Homer stands at the close of a long antecedent history of linguistic progress, and once again scholars are admitting the date 850 or even 1000 B.C. for his poems as well as their essential unity, thus abandoning Wolff’s hypothesis. They have been driven to this by the abundant linguistic testimony from the inscriptions from many parts of Greece. So vast is this material that numerous grammatical discussions have been made concerning the inscriptions, as those by Roehl, Kretschmer, Lautensach, Rang, Meisterhans, Schweizer, Viteau, Wagner, Nachmanson, etc.

Indeed Apostolides\textsuperscript{13} seems to show that the Greeks were in Egypt long before Alexander the Great founded Alexandria. The discoveries of Dr. A. J. Evans in Crete have pushed back the known examples of Greek a thousand years or more. The linear script of Knossos, Crete, may be some primitive form of Greek 500 years before the first dated example of Phœnician writing. The civilization of the Hellenic race was very old when Homer wrote,—how old no one dares say.\textsuperscript{1} For specimens of the use of the inscriptions see Buck’s \textit{Introduction to the Study of the Greek Dialects} (Grammar, Selected Inscriptions, Glossary), 1910.

\textbf{(f) Fuller Knowledge of the Dialects.} The new knowledge of the other dialects makes it possible to form a juster judgment of the relative position of the Attic. There has been much confusion on this subject and concerning the relation of the various Greek races. It now seems clear that the Pelasgians, Achaæans, Dorians were successively dominant in Greece.\textsuperscript{2} Pelasgian appears to be the name for the various pre-Achaean tribes, and it was the Pelasgian tribe that made Mycenæ glorious.\textsuperscript{3} Homer sings the glories of the Achaæans who displaced the Pelasgians, while “the people who play a great part in later times—Dorians, Æolians, Ionians—are to Homer little more than names.”\textsuperscript{4} The Pelasgian belonged to the bronze age, the Achaæan to the iron age.\textsuperscript{5} The Pelasgians may have been Slavs and kin to the

Etruscans of Italy. The Achæans were possibly Celts from northern Europe. The old Ionic was the base of the old Attic. This old Ionic-Attic was the archaic Greek tongue, and the choruses in the Attic poets partly represent artificial literary Doric. There was not a sharp division between the early dialects owing to the successive waves of population sweeping over the country. There were numerous minor subdivisions in the dialects (as the Arcadian, Boeotian, Northwest, Thessalian, etc.) due to the mountain ranges, the peninsulas, the islands, etc., and other causes into which we cannot enter. For a skilful attempt at grouping and relating the dialects to each other see Thumb’s *Handbuch*, p. 54 f. The matter cannot be elaborated here (see ch. III). But the point needs to be emphasized that [Page 17] the literary dialects by no means represent the linguistic history of Greece itself and still less that of the islands and other colonies (cf. Buck’s *Greek Dialects*, p. 1). The blending of these dialects into the koine was not complete as we shall see.1 “Of dialects the purest Hellenic is Dorian, preserved in religious odes,—pure because they kept aloof from their subjects. The next is the Æolic, preserved in lyric odes of the Lesbian school. The earliest to be embodied in literature was Ionic, preserved in epic poems. The most perfect is Attic, the language of drama, philosophy and oratory. This arose out of the Ionic by introducing some of the strength of Doric-Æolic forms without sacrificing the sweet smoothness of Ionic.”2 In general concerning the Greek dialects one may consult the works of Meister,3 Ridgeway,4 Hoffmann,5 Thumb,6 Buck,7 Boisacq,8 Pezzi,9 etc.

7 Ib., pp. 666–670.
8 Hoffmann, *Die griech. Dial.*, Bd. I, p. 7. A more recent treatment of the dialects is Thumb’s *Handb. der griech. Dial.* (1909), which makes use of all the recent discoveries from the inscriptions. On the mixing of the dialects see Thumb, p. 61 f.

2 MS. Notes on Gk. Gr. by H. H. Harris, late Prof. of Gk. at Richmond College.
(g) **The Papyri and Ostraca.** Thiersch in 1841 had pointed out the value of the papyri for the study of the LXX in his *De Pentateuchi versione Alexandrina*, but nobody thought it worth while to study the masses of papyri in London, Paris and Berlin for the N. T. language. Farrar (*Messages of the Books*, 1884, p. 151) noted the similarity of phrase between Paul’s correspondence and the papyri in the Brit. Mus. “N. T. philology is at present undergoing thorough reconstruction; and probably all the workers concerned, both on the continent and in English-speaking countries, are by this time agreed that the starting-point for the philological investigations must be the language of the non-literary papyri, ostraca, and inscriptions” (*Deissmann, Light*, etc., p. 55). The κοινή is now rich in material for the study of the vernacular or popular speech as opposed to the book language. This distinction belongs to all languages which have a literature and to all periods of the language. It is particularly true of the modern [Page 18] Greek to-day as it was true in the early period.

Athenian newspapers as a rule affect the καθαρεύουσα. Occasionally a writer like Aristophanes would on purpose write in the language of the street. It is not therefore a peculiarity of the κοινή that the vernacular Greek prevailed then. It always prevails. But the καθαρεύουσα has secured a more disastrous supremacy over the δημοτική than in any other language. And we are now able to estimate the vernacular κοινή, since the great papyri discoveries of Flinders-Petrie, Grenfell and Hunt and others. We had already the excellent discussions of Mullach,¹ Niebuhr,² Blass,³ Foy⁴ and Lottich.⁵ But in the last fifteen years or so a decided impetus has been given to this phase of Greek grammatical research. It is in truth a new study, the attention now paid to the vernacular, as Moulton points out in his Prolegomena (p. 22). “I will go further and say that if we could only recover letters that ordinary people wrote to each other without being literary, we should have the greatest possible help for the understanding of the language of the N. T. generally” (Bishop Lightfoot, 1863, as quoted in Moulton’s Prol., 2d and 3d ed., p. 242). If Lightfoot only lived now! Cf. Masson’s Preface to Winer (1859).

The most abundant source of new light for the vernacular κοινή is found in the papyri collections, many volumes of which have already been published (see Index of Quots. for fuller list), while more are yet to be issued. Indeed, Prof. W. N. Stearns⁶ complains: “There would seem to be a plethora of such material already as evidenced by such collections as the Berlinische Urkunde and the Rainier Papyri.” But the earnest student of the Greek tongue can only rejoice at the “extraordinary and in part unexpected wealth of material from the contemporary and the later languages.”⁷ See

Kenyon,22 Voelker,23 Thumb.24 [Page 20] These are all helpful, but Crönert1 is right in urging that we need a comprehensive discussion of the syntax of the Ptolemaic papyri in order to set forth properly the relation of the papyri both to the N. T. Greek and to the older Attic. This will require time, for the mass of material is very great and is constantly growing.2 But enough already is clear for us to see the general bearing of the whole on the problem of the N. T. It is just here that the papyri have special interest and value. They give the language of business and life. The N. T. writers were partly ἀγράµµατος, but what they wrote has become the chief Book of Mankind.3 Hear Deissmann4 again, for he is who has done most to blaze the way here: “The papyrus-leaf is alive; one sees autographs, individual peculiarities of penmanship—in a word, men; manifold glimpses are given into inmost nooks and crannies of personal life in which history has no eyes and historians no glasses … It may seem a paradox, but it can safely be affirmed that the unliterary papyri are more important in these respects than the literary.” Some of the papyri contain literary works, fragments of Greek classics, portions of the LXX or of the N. T., though the great mass of them are non-literary documents, letters and business papers. Cf. also Deissmann, Light, etc., p. 29. Unusual interest attaches to the fragments containing the Logia of Jesus, some of which are new, dating from the second or third centuries A.D. and showing a Gnostic tinge.5 It is no longer possible to say, what even Friedrich Blass6 did in 1894, that the N. T. Greek “is to be regarded something by itself and following laws of its own.” That view is doomed in the presence of the papyri. Hatch7 in particular laboured

Hatch HATCH, E., Essays in Bibl. Greek (1892).
under this error. The N. T. Greek [Page 21] will no longer be despised as inferior or unclassical. It will be seen to be a vital part of the great current of the Greek language. For the formal discussion of the bearing of the papyri on the N. T. Greek see chapter IV. A word should be said concerning the reason why the papyri are nearly all found in Egypt.¹ It is due to the dryness of the climate there. Elsewhere the brittle material soon perished, though it has on the whole a natural toughness. The earliest known use of the papyri in Egypt is about 3400 B.C. More exactly, the reign of Assa in the fifth dynasty is put at 3360 B.C. This piece of writing is an account-sheet belonging to this reign (Deissmann, *Light from A. E.*), p. 22). The oldest specimen of the Greek papyri goes back to “the regnal year of Alexander Ægus, the son of Alexander the Great. That would make it the oldest Greek papyrus document yet discovered” (Deissmann, *Light*, etc., p. 29). The discoveries go on as far as the seventh century A.D., well into the Byzantine period. The plant still grows in Egypt and it was once the well-nigh universal writing material. As waste paper it was used to wrap the mummies. Thus it has come to be preserved. The rubbish-heaps at Fayûm and Oxyrhynchus are full of these papyri scraps.

Mention should be made also of the ostraca, or pieces of pottery, which contain numerous examples of the vernacular κοινὴ. For a very interesting sketch of the ostraca see Deissmann, *Light*, etc. (pp. 41–53). Crum and Wilcken have done the chief work on the ostraca. They are all non-literary and occur in old Egyptian, Arabic, Aramaic, Coptic, Greek and Latin. “Prof. Wilcken, in his *Griechische Ostraka*,² has printed the texts of over sixteen hundred of the inscribed potsherds on which the commonest receipts and orders of Ptolemaic and Roman Egypt were written.”³ It was the material used by the poorer classes.

**(b) The Byzantine and the Modern Greek.** The Byzantine and modern Greek has at last received adequate recognition. [Page 22] The student of the N. T. idiom has much to learn from the new books on this subject. The scorn bestowed on the κοινὴ by the intense classicists was intensified by the modern Greek, which was long regarded as a nondescript jumble of Greek, Albanian, Turkish, Italian, etc. Indeed the modern Greeks themselves have not always shown proper appreciation of the dignity of the modern vernacular, as is shown, for instance, in the recent up-heaval at Athens by the University students over the translation of the Gospels into the Greek vernacular (δηµοτική) of to-day, though the N. T. was manifestly written in the

7 Essays in Bibl. Gk., 1892, p. 11 f. The earliest dated papyrus is now P. Eleph. 1 (311 B.C.), not P. Hibe, as Thackeray has it in his Gr. of the O. T. in Gk., p. 56. This was true in 1907; cf. Moulton, Cl. Rev., March, 1910, p. 53.
Crum CRUM, W. E., Coptic Ostraca from the Collections of the Egypt Exploration Fund, the Cairo Museum and others (1902).
vernacular of its day. “While the later Greeks, however, could no longer write classically, they retained a keen sense for the beauties of the classical language.” Just as the “popular Latin finally suppressed the Latin of elegant literature,” so the vernacular κοινή lived on through the Roman and Byzantine periods and survives today as the modern Greek. There is unity in the present-day Greek and historical continuity with the past. Dr. Rose is possibly extreme in saying: “There is more difference between the Greek of Herodotus and the Greek of Xenophon than there is between the Greek of the latter and the Greek of to-day.” And certainly Prof. Dickey is right in affirming “that the Greek of N. T. stands in the centre of the development of which classical and modern Greek may be called extremes, and that of the two it is nearer to the second in character than the first. The interpretation of the N. T. has almost entirely been in the sole light of the ancient, i. e. the Attic Greek, and, therefore, to that extent has been unscientific and often inaccurate.” Hatzidakis indeed complained that the whole subject had been treated with [Page 23] unworthy “dilettanteism” and not without ground for the complaint. He himself did much by his great work to put the study of modern Greek on a scientific basis, but he has not worked alone in this important field. Another native Greek, Prof. Sophocles, has produced a Greek Lexicon of the Roman and Byzantine Periods in which there is an excellent discussion for that time of the κοινή, the Byzantine and the modern Greek. Other scholars have developed special phases of the problem, as Krumbacher, who

1 “Und wenn es mir gelingt, die wissenschaftliche Welt von ihrer wohlberechtigten Zurückhaltung abzubringen und ihr nachzuweisen, daß das Mittel- und Neugriechische ein vielversprechendes unkultivirtes Gebiet der Wissenschaft ist, woraus man viel, sehr viel bezüglich der Sprachwissenschaft überhaupt wie des Altgriechischen speciell lernen kann, so ist mein Zweck vollkommen erreicht.” Ib., p. x.
2 1870. One of the pressing needs is a lexicon of the papyri also. See Contopoulos, Lex. of Mod. Gk., 1868, and others.
Krumbacher
has enriched our knowledge of the Byzantine\textsuperscript{4} or Middle Ages Greek. Dieterich\textsuperscript{5} also has done fine work in this period of Greek, as has Thumb.\textsuperscript{6} Worthy of mention also is the work of G. Meyer,\textsuperscript{7} Geldart\textsuperscript{8} and Prestel,\textsuperscript{9} though the latter have not produced books of great value. See also Meyer-Lübke’s grammar,\textsuperscript{10} Janaris’ \textit{Historical Greek Grammar} and the writings of Psichari.\textsuperscript{11} In general great progress has been made and it is now possible to view the development of the N. T. idiom in the light of the modern Greek. The apparent drift in the vernacular [Page 24] \textit{koinē} of the N. T., like ἴνα in the non-final clause, is too common for remark in the modern Greek. Indeed the N. T. had a predominant influence on the later Greek as the chief literature of the period, and especially as Christianity won the victory over heathenism. The Byzantine

Greek is in subject-matter largely ecclesiastical. The sermons and treatises of the Greek Christian Fathers constitute a large and valuable literature and amply illustrate the language of the time. ¹ The modern Greek is in all essential points the same as the Byzantine Greek of 1000 A.D. In forty years² we have seen a revolution in the study of the modern Greek. But as late as 1887 Vincent and Dickson³ could say: “By many it is believed that a corrupt *patois* of Turkish and Italian is now spoken in Greece; and few even among professed scholars are aware how small the difference is between the Greek of the N. T. and the Greek of a contemporary Athenian newspaper.” The new Greek speech was developed not out of the Byzantine literary language, but out of the Hellenistic popular speech.⁴

(i) The Hebrew and Aramaic. Less that is new has come from the Hebrew and Aramaic field of research. Still real advance has been made here also. The most startling result is the decrease of emphasis upon Hebraisms in the N. T. style. In chapter IV, III the Semitic influence on the N. T. language is discussed. Here the literary history is sketched.

1. The Old View. It was only in 1879 that Guillemard⁵ issued his *Hebraisms in the Greek Testament*, in which he said in the Preface: “I earnestly disavow any claim to an exhaustive exhibition of all the Hebraisms, or all the deviations from classical phraseology contained in the Greek Testament; of which I have gathered together and put forward only a few specimens, in the hope of stimulating others to fuller and more exact research.” Even in 1889, Dr. Edwin Hatch⁶ says: “Biblical Greek is thus a [Page 25] language by itself. What we have to find out in studying it is what meaning certain Greek words conveyed to a Semitic mind.” Again he says¹: “The great majority of N. T. words are words which, though for the most part common to biblical and to contemporary secular Greek, express in their biblical use the conceptions of a Semitic race, and which must consequently be examined by the light of the cognate documents which form the LXX.” And W. H. Simcox² says: “Thus it is that there

⁸ Essays in Bibl. Gk., p. 11.
¹ See also p. 9: “Biblical Gk. belongs not only to a later period of the history of the language than classical Gk., but also to a different country.” On page 14 we read: “It is a true paradox that while, historically as well as philologically, the Gk. (LXX) is a translation of the Hebrew, philologically, though not historically, the Hebrew may be regarded as a translation of the Gk.”
Simcox
came to exist a Hellenistic dialect, having real though variable differences from the
Common or Hellenic.”

while the writer began with a complete, though provisional, acceptance of Hatch’s
conclusions, the farther the inquiry was pushed, the more decidedly was he compelled
to doubt those conclusions, and finally to seek to establish the connection between the
language of the LXX and that of the N. T. on a totally different basis.” He finds that
common bond in “the colloquial Greek of the time.”4

3. Deissmann’s Revolt. The full revolt against the theory of a Semitic or biblical
Greek is seen in the writings of Deissmann,5 who says6: “The theory indicated is a
great power in exegesis, and that it possesses a certain plausibility is not to be denied.
It is edifying, and what is more, is convenient. But it is absurd. It mechanizes the
marvellous variety of the linguistic elements of the Greek Bible and cannot be
established either by the psychology of language or by history.” There is here some of
the zeal of new discovery, but it is true. The old view of Hatch is dead and gone. The
“clamant need of a lexicon to the LXX” is emphasized by Deissmann7 himself. Prof.
H. B. Swete of Cambridge has laid all biblical students under lasting obligation[Page
26] to him by his contribution to the study of the Septuagint, consisting of an edition
of the LXX1 with brief critical apparatus and a general discussion2 of the Septuagint.
Brooke and McLean are publishing an edition of the Septuagint with exhaustive
critical apparatus.3 Students of the LXX now rejoice in Helbing’s Gr. der

4. The Language of Jesus. Another point of special interest in this connection, which may be discussed as well now as later, is the new light concerning the Aramaic as the language habitually spoken by Jesus. This matter has been in much confusion and the scholars are not at one even now. Roberts maintains that Greek, not Hebrew, was "the language of the common public intercourse in Palestine in the days of Christ and His apostles." By Hebrew he means Aramaic. In The Expositor (1st series, vols. VI, VII) Roberts argued also that Christ usually spoke Greek. He was replied to (vol. VII) by Sanday. Lightfoot (on Gal. 4:6) holds that Jesus said Ἄββα ὁ πατήρ thus, Mark not having translated it. Thomson, "The Language of Palestine" (Temple Bible Dict.), argues strongly that Christ spoke Greek, not Aramaic. Neubauer contends that there was spoken besides at Jerusalem and in Judea a modernized Hebrew, and comments on "how [Page 27] little the Jews knew Greek." A. Meyer urges that the vernacular of Jesus was Aramaic and shows what bearing this fact has on the interpretation of the Gospels. A. Jülicher indeed says: "To suppose, however (as, e.g. G. B. Winer supposes, because of Mk. 7:34; Jo. 7:25; 12:20) that Jesus used the Greek language is quite out of the question." But Young, vol. II, Dictionary of Christ and the Gospels (Hastings), article "Language of Christ," admits that Christ used both, though usually he spoke Aramaic. So Moulton, Prolegomena, p. 8. But Dalman has

Dalman
done more than any one in showing the great importance of the Aramaic for the interpretation of the words of Jesus. He denies the use of a modernized Hebrew in Jerusalem and urges that proper names like Βηθεσδά, חֶזְדָּא בֵּית, are Aramaic (but see J. Rendel Harris, Side Lights on the N. T., p. 71 f.). Dalman further urges that “Aramaic was the mother tongue of the Galileans.” J. T. Marshall makes out a plausible case for the idea of a primitive Aramaic Gospel before our Mark, and this would make it more probable that Jesus spoke Aramaic. E. A. Abbott also attempts to reproduce the original Aramaic of the words of Jesus from the Greek. But Prof. Mahaffy can still say: “And so from the very beginning, though we may believe that in Galilee and among His intimates our Lord spoke Aramaic, and though we know that some of His last words upon the cross were in that language, yet His public teaching, His discussions with the Pharisees, His talk [Page 28] with Pontius Pilate, were certainly carried on mainly in the Greek.” Zahn (Intr. to the N. T.) labours needlessly to show that Hebrew was no longer the language of Palestine, but he does

not prove that Aramaic was everywhere spoken, nor that Jesus always spoke Aramaic. Wellhausen (Einl. in die drei erst. Evang.) is prejudiced in favour of the Aramaic theory. It may be admitted at once that Aramaic was known to the majority of the Jews in Palestine, particularly in Judea. Cf. Ac. 1:19: τῇ διαλέκτῳ αὐτῶν Ἀκελαδομάχ, 22:2, ἀκούσαντες δὲ τῇ Ἑβραϊκῇ διαλέκτῳ προσεφώνει αὐτοῖς μᾶλλον παρέσχον ἣσυχίαν. There is no doubt which language is the vernacular in Jerusalem. Cf. also 26:14. Josephus confirms Luke on this point (War, V, 6. 3), for the people of Jerusalem cried out τῇ πατρίῳ γλώσσῃ, and Josephus also acted intermediary for Titus, τῇ πατρίῳ γλώσσῃ (War, VI, 2. 1). See also 2 Macc. 7:8, 21. Josephus wrote his War first in Aramaic and then in Greek. The testimony of Papias that Matthew wrote his λόγια in Aramaic bears on the question because of the tradition that Mark was the interpreter of Peter. The brogue that Peter revealed (Mt. 26:73) was probably due to his Galilean accent of Aramaic. Aramaic was one of the languages for the inscription on the cross (Jo. 19:20). It is clear therefore that the Hellenizing work of Jason and Menelaus and Antiochus Epiphanes received a setback in Palestine. The reaction kept Greek from becoming the one language of the country. Even in Lycaonia the people kept their vernacular though they understood Greek (Ac. 14:11). On the other hand Peter clearly spoke in Greek on the Day of Pentecost, and no mention is made of Greek as one of the peculiar “tongues,” on that occasion. It is clear that Paul was understood in Jerusalem when he spoke Greek (Ac. 22:2). Jesus Himself laboured chiefly in Galilee where were many gentiles and much commerce and travel. He taught in Decapolis, a Greek region. He preached also in the regions of Tyre and Sidon (Phœnicia), where Greek was necessary, and he held converse with a Greek (Syro-Phœnician) woman. Near Cæsarea-Philippi (a Greek region), after the Transfiguration, Jesus spoke to the people at the foot of the mountain. At the time of the Sermon on the Mount Jesus addressed people from Decapolis and Perea (largely Hellenized), besides the mixed multitudes from Galilee, Jerusalem and Judea (Mt. 4:25). Luke (6:17) adds that crowds came also from Tyre and Sidon, and Mark (3:8) gives “from Idumæa.” It is hardly possible that these crowds understood Aramaic. The fact that Mark [Page 29] twice (5:41; 7:34) uses Aramaic quotations from the words of Jesus does not prove that He always spoke in that tongue nor that He did so only on these occasions. In Mk. 14:36, Ἄββά ὁ πατήρ, it is possible that Jesus may have used both words as Paul did (Ro. 8:15). In the quotation from Ps. 22:1, spoken on the cross, Mt. 27:46 gives the Hebrew, while Mk. 15:34 has an Aramaic adaptation. There is no reason to doubt that Jesus knew Hebrew also. But Thomson (Temple Bible, Lang. of Palestine) proves that Matthew gives the quotations made by Christ in the words of the LXX, while his own quotations are usually from the Hebrew. It is clear, therefore, that Jesus spoke both Aramaic and Greek according to the demands of the occasion and read the Hebrew as well as the Septuagint, if we may argue from the O. T. quotations in the Gospels which are partly like the Hebrew text and partly like the LXX.¹ In Lu. 4:17 it is not clear whether it was the Hebrew text or the LXX that was read in the synagogue at Nazareth.² One surely needs no argument

¹ See C. Taylor, The Gospel in the Law, 1869; Boehl, Alttestamentl. Cit. im N. T., 1878; Toy, Quota. in the N. T., 1884; Huhn, Die alttestamentl. Cit. etc., 1900; Gregory, Canon and Text of the N. T., 1907, p. 394.

to see the possibility that a people may be bilingual when he remembers the Welsh, Scotch, Irish, Bretons of the present day. The people in Jerusalem understood either Greek or Aramaic (Ac. 22:2).

(j) Grammatical Commentaries. A word must be said concerning the new type of commentaries which accent the grammatical side of exegesis. This is, to be sure, the result of the emphasis upon scientific grammar. The commentary must have other elements besides the grammatical. Even the historical element when added does not exhaust what is required. There still remains the apprehension of the soul of the author to which historical grammar is only an introduction. But distinct credit is to be given to those commentators who have lifted this kind of exegesis out of the merely homiletic vein. Among the older writers are to be mentioned Meyer, Ellicott, Godet, Broadus, Hackett, Lightfoot and Westcott, while among the more recent commentators stand out most of the writers in the International Critical Commentary, Holtzmann’s Hand Comm., The Expositor’s Greek Test., Swete, Mayor, G. Milligan, Lietzmann’s Handbuch, Zahn’s Kommentar, The Camb. Gk. Test., etc. In works like these, grammatical remarks of great value are found. There has been great advance in the N. T. commentaries since Winer’s day, when these comments “were rendered useless by that uncritical empiricism which controlled Greek philology.”

V. The New Point of View. It will hardly be denied, in view of the preceding necessarily condensed presentation of the new material now at hand that new light has been turned upon the problems of the N. T. Greek. The first effect upon many minds is to dazzle and to cause confusion. Some will not know how to assimilate the new facts and to co-ordinate them with old theories nor be willing to form or adopt new theories as a result of the fresh phenomena. But it is the inevitable duty of the student in this department to welcome the new discoveries and to attack the problems arising therefrom. The new horizon and wider outlook make possible real progress. It will not be possible to avoid some mistakes at first. A truer conception of the language is now offered to us and one that will be found to be richer and more inspiring. Every line of biblical study must respond to the new discovery in language. “A new Cremer, a new

Cremer

Thayer-Grimm, a new Winer will give the twentieth century plenty of editing to keep its scholars busy. New Meyers and Alfrords will have fresh matter from which to interpret the text, and new Spurgeons and Moodys will, we may hope, be ready to pass the new teaching on to the people.” The N. T. Greek is now seen to be not an abnormal excrescence, but a natural development in the Greek language; to be, in fact, a not unworthy part of the great stream of the mighty tongue. It was not outside of the world-language, but in the very heart of it and influenced considerably the future of the Greek tongue.

[PAGE 31] CHAPTER II

THE HISTORICAL METHOD

I. Language as History. The scientific grammar is at bottom a grammatical history, and not a linguistic law-book. The seat of authority in language is therefore not the books about language, but the people who use the language. The majority of well-educated people determine correct usage (the mos loquendi as Horace says). Even modern dictionaries merely record from time to time the changing phenomena of language. Wolff was right when he conceived of philology as the “biography of a nation.” The life of a people is expressed in the speech which they use. We can well agree with Benfey that “speech is the truest picture of the soul of a people, the content of all that which has brought a people to self-consciousness.” However, we must not think that we can necessarily argue race from language. The historical conception of grammar has had to win its way against the purely theoretical and speculative notion. Etymology was the work of the philosophers. The study of the forms, the syntax, the dialects came later. The work of the Alexandrians was originally philology, not scientific grammar.

(a) COMBINING THE VARIOUS ELEMENTS. It is not indeed easy to combine properly the various elements in the study of language. Sayce considers Steinthal too

Steinthal

psychological and Schleicher too physical. The historical element must be added to both. Paul objects to the phrase “philosophy of language” as suggesting “metaphysical speculations of which the historical investigation of language needs to take no count.” He prefers the term “science of principles.” The study of language is a true science, a real philosophy, with a psychical as well as a physical basis. It is properly related to the historical natural sciences which have been subject “to the misdirected attempt at excluding them from the circle of the sciences of culture.” Language is capable of almost perfect scientific treatment. Kretschmer outlines as modern advances over ancient grammar the psychological treatment of language, the physiology of sound, the use of the comparative method, the historical development of the language, the recognition of speech as a product of human culture, and not to be separated from the history of culture, world-history and life of the peoples. He thinks that no language has yet received such treatment as this, for present-day handbooks are only “speech-pictures,” not “speech-histories.”

(b) Practical Grammar a Compromise. Historical practical grammars have to make a compromise. They can give the whole view only in outline and show development and interrelation in part. It is not possible then to write the final grammar of Greek either ancient or modern. The modern is constantly changing and we are ever learning more of the old. What was true of Mistriotes and Jannaris will be true of the attempts of all. But none the less the way to study Greek is to look at it as a history of the speech-development of one of the greatest of peoples. But it is at least possible now to have the right attitude, thanks to the books already mentioned and others by Bernhardy, Christ, Wundt, Johannsen, Krumbacher,

2 Einl. in die Gesch. der griech. Spr., pp. 3–5. He himself here merely outlines the historical background of the Gk. language.
3 "Κατὰ ταῦτα λοιπῶν ἡ γραμματολογία δὲν ἐναι οὐτε ἁμαρτήματα ἱστορικῆ, οὔτε ἁμαρτήματα ἀπόθυτικὴ ἐπιστήμη ἀλλὰ μετέχει ἁμφοτέρων." Ἐλληνικῆ Γραμματολογία, 1894, p. 6.
4 “As a matter of course, I do not presume to have said the last word on all or most of these points, seeing that, even in the case of modern Gk., I cannot be expected to master, in all its details, the entire vocabulary and grammar of every single Neohellenic dialect.” Hist. Gk. Gr., 1897, p. x.
II. Language as a Living Organism.

(a) THE ORIGIN OF LANGUAGE. Speech is indeed a characteristic of man and may be considered a divine gift, however slowly the gift was won and developed by him. Sayce is undoubtedly correct in saying that language is a social creation and the effort to communicate is the only true solution of the riddle of speech, whether there was ever a speechless man or not. “Grammar has grown out of gesture and gesticulation.” But speech has not created the capacities which mark the civilized man as higher than the savage. Max Müller remarks that “language forms an impassable barrier between man and beast.” Growls and signs do not constitute “intellectual symbolism.” Paul indeed, in opposition to Lazarus and Steinthal, urges that “every linguistic creation is always the work of a single individual only.” The psychological organisms are in fact the true media of linguistic development. Self-observation and analogy help one to strike a general average and so make grammar practical as well as scientific.

(b) EVOLUTION IN LANGUAGE. Growth, then, is to be expected in a living tongue. Change is inseparable from life. No language is dead so long as it is undergoing change, and this must be true in spoken and written usage. It is not the function of the

17 Prin. of the Hist. of Lang., p. xliii.
grammarian to stop change in language, a thing impossible in itself. Such change is
not usually cataclysmic, but gradual and varied. “A written language, to serve any
practical purpose, must change with the times, just like a living dialect.”1 In general,
change in usage may be compared to change in organic structure in “greater or lesser
fitness.”2 The changes by analogy in the speech of children are very suggestive on this
point. The vocabulary of the Greek tongue must therefore continually develop, for
new ideas demand new words and new meanings come to old words. Likewise
inflections vary in response to new movements. This change brings great wealth and
variety. The idea of progress has seized the modern mind and has been applied to the
study of language as to everything else.

(c) Change Chiefly in the Vernacular. Linguistic change occurs chiefly in the
vernacular. From the spoken language new words and new inflections work their way
gradually into the written style, which is essentially conservative, sometimes even
anachronistic and purposely archaic. Much slang is finally accepted in the literary
style. The study of grammar was originally confined to the artificial book-style.
Dionysius Thrax expressly defined grammar as ἐμπειρία τῶν παρὰ ποιητῶν τε καὶ
συγγραφέων ως ἐπὶ τὸ πολὺ λεγομένων. It was with him a concern for the poets and
writers, not “die Sprache des Lebens.”3 Grammar (γραμματική, γράφω), then, was
first to write and to understand what was written; then the scientific interpretation of
this literature; later the study of literary linguistic usage. It is only the moderns who
have learned to investigate the living speech for its own historical value. Before the
discovery of the Greek inscriptions the distinction between the vernacular and the
literary style could not be so sharply drawn for the Greek of the classical [Page 35]
period, though Aristophanes should have taught us much. We have moved away from
the position of Mure1 who said: “The distinction between the language of letters and
the vulgar tongue, so characteristic of modern civilization, is imperceptible or but
little defined in the flourishing age of Greece. Numerous peculiarities in her social
condition tended to constitute classical expression in speaking or writing, not, as with
us, the privilege of a few, but a public property in which every Hellene had an equal
interest.” The people as a whole were wonderfully well educated, but the educated
classes themselves then, as now with us, used a spoken as well as a literary style.
Jannaris2 is clear on this point: “But, speaking of Attic Greek, we must not infer that
all Athenians and Atticized Greeks wrote and spoke the classical Attic portrayed in
the aforesaid literature, for this Attic is essentially what it still remains in modern
Greek composition: a merely historical abstraction; that is, an artistic language which
nobody spoke but still everybody understood.” We must note therefore both the
vernacular and the literary style and expect constant change in each, though not in the
same degree. Zarncke indeed still sounds a note of warning against too much attention

1 Paul, Prin. of the Hist. of Lang., p. 481.
2 Ib., p. 13. Kühner speaks of “das organische Leben der Sprache” and of “ein klares,
anschauliches und lebensvolles Bild des großen und kräftig blühenden Sprachbaums.”
3 Kretschmer, Einl. in die Gesch. der griech. Spr., 1896, pp. 3–5.
Zarncke ZARNCKE, E., Die Entstehung der griech. LiteraturSprachen (1890).
to the vernacular, though a needless one. In the first century A.D. the vernacular Greek was in common use all over the world, the character of which we can now accurately set forth. But this non-literary language was not necessarily the speech of the illiterate. Mahaffy is very positive on this point. “I said just now that the Hellenistic world was more cultivated in argument than we are nowadays. And if you think this is a strange assertion, examine, I pray you, the intellectual aspects of the Epistles of St. Paul, the first Christian writer whom we know to have been thoroughly educated in this training. Remember that he was a practical teacher, not likely to commit the fault of speaking over the heads of his audience, as the phrase is.” Hatzidakis laments that the monuments of the Greek since the Alexandrian period are no longer in the pure actual living speech of the time, but in the artificial Attic of a bygone age. The modern Greek vernacular is a living tongue, but the modern literary language so proudly called καθαρεύουσα is artificial and unreal. This new conception of language as life makes it no longer possible to set up the Greek of any one period as the standard for all time. The English writer to-day who would use Hooker’s style would be affected and anachronistic. Good English to-day is not what it was two hundred years ago, even with the help of printing and (part of the time) dictionaries. What we wish to know is not what was good Greek at Athens in the days of Pericles, but what was good Greek in Syria and Palestine in the first century A.D. The direct evidence for this must be sought among contemporaries, not from ancestors in a distant land. It is the living Greek that we desire, not the dead.

III. Greek not an Isolated Language.

(a) The Importance of Comparative Grammar. Julius Cæsar, who wrote a work on grammar, had in mind Latin and Greek, for both were in constant use in the Roman world. Formal Sanskrit grammar itself may have resulted from the comparison of Sanskrit with the native dialects of India. Hence comparative grammar seems to lie at the very heart of the science. It cannot be said, however, that Pāṇini, the great Sanskrit scholar and grammarian of the fourth century B.C., received any impulse from the Greek civilization of Alexander the Great. The work of Pāṇini is one of the most remarkable in history for subtle originality, “une histoire naturelle de la langue sanscrit.” The Roman and Greek grammarians attended to the use of words in sentences, while the Sanskrit writers analyzed words into syllables and studied the relation of sounds to each other. It is not possible to state the period when linguistic comparison was first made. Max Müller in The Science of Language even says:

4 Prog. of Hellen. in Alex. Emp., 1905, p. 137.
5 Einleitung, p. 3.
2 King, Intr. to Comp. Gr., p. 2.
3 Sayce, Prin. of Comp. Philol., p. 261.
4 Goblet d’Alviella, Ce que l’Inde doit à la Grèce, 1897, p. 129.
“From an historical point of view it is not too much to say that the first Day of Pentecost marks the real beginning of the Science of language.” One must not think that the comparative method is “more characteristic of the study of language than of other branches of modern inquiry.”¹ The root idea of the new grammar is the kinship of languages. Chinese grammar is said to be one of the curiosities of the world, and some other grammatical works can be regarded in that light. But our fundamental obligation is to the Hindu and Greek grammarians.²

(b) The Common Bond in Language. Prof. Alfredo Trombetti, of Rome, has sought the connecting link in all human speech.³ It is a gigantic task, but it is doubtless true that all speech is of ultimate common origin. The remote relationships are very difficult to trace. As a working hypothesis the comparative grammarians speak of isolating, agglutinative and inflectional languages. In the isolating tongues like the Chinese, Burmese, etc., the words have no inflection and the position in the sentence and the tone in pronunciation are relied on for clearness of meaning. Giles⁴ points out that modern English and Persian have nearly returned to the position of Chinese as isolating languages. Hence it is inferred that the Chinese has already gone through a history similar to the English and is starting again on an inflectional career. Agglutinative tongues like the Turkish express the various grammatical relations by numerous separable prefixes, infixes and suffixes. Inflectional languages have made still further development, for while a distinction is made between the stem and the inflectional endings, the stems and the endings do not exist apart from each other. There are two great families in the inflexional group, the Semitic (the Assyrian, the Hebrew, the Syriac, the Arabic, etc.) and the Indo-Germanic or Indo-European (the Indo-Iranian or Aryan, the Armenian, the Greek, the Albanian, the Italic, the Celtic, the Germanic and the Balto-Slavic).⁵ Indo-European also are Illyrian, Macedonian, Phrygian, Thracian and the newly-discovered Tocharian. Some of these groups, like the Italic, the Germanic, the Balto-Slavic, the Indo-Iranian, embrace a number of separate tongues which show an inner affinity, but all the groups have a general family likeness.⁶

(c) The Original Indo-Germanic Speech. It is not claimed that the original Indo-Germanic speech has been discovered, though Kretschmer does speak of “die indogermanische Ursprache,” but he considers it only a necessary hypothesis and a useful definition for the early speech-unity before the Indo-Germanic stock

¹ Whitney, Life and Growth of Lang., 1875—, p. 315.
⁴ Man. of Comp. Philol., 1901, p. 36.
Brugmann speaks also of the original and ground-speech (Urim und Grundsprache) in the prehistoric background of every member of the Indo-Germanic family. The science of language has as a historic discipline the task of investigating the collective speech-development of the Indo-Germanic peoples. Since Bopp’s day this task is no longer impossible. The existence of an original Indo-Germanic speech is the working hypothesis of all modern linguistic study. This demands indeed a study of the Indo-Germanic people. Horatio Hale insists that language is the only proper basis for the classification of mankind. But this test breaks down when Jews and Egyptians speak Greek after Alexander’s conquests or when the Irish and the American Negro use English. The probable home and wanderings of the original Indo-Germanic peoples are well discussed by Kretschmer. It is undeniable that many of the same roots exist in slightly different forms in all or most of the Indo-Germanic tongues. They are usually words that refer to the common domestic relations, elementary agriculture, the ordinary articles of food, the elemental forces, the pronouns and the numerals. Inflectional languages have two kinds of roots, predicative (nouns and verbs) and pronominal. Pāṇini found 1706 such roots in Sanskrit, but Edgren has reduced the number of necessary Sanskrit roots to 587. But one must not suppose that these hypothetical roots ever constituted a real language, though there was an original Indo-Germanic tongue.

[Page 39] (d) GREEK AS A “DIALECT” OF THE INDO-GERMANIC SPEECH. Greek then can be regarded as one of the branches of this original Indo-Germanic speech, just as French is one of the descendants of the Latin, like Spanish, Portuguese, Italian. Compare also the relation of English to the other Teutonic tongues. To go further, the separation of this original Indo-Germanic speech into various tongues was much like the breaking-up of the original Greek into dialects and was due to natural causes. Dialectic variety itself implies previous speech-unity. Greek has vital relations with all the branches of the Indo-Germanic tongues, though in varying degrees. The Greek shows decided affinity with the Sanskrit, the Latin and the Celtic languages. Part of the early Greek stock was probably Celtic. The Greek and the Latin flourished side by side for centuries and had much common history. All the comparative grammars and the Greek grammars from this point of view constantly compare the Greek with the Latin. See especially the great work of Riemann and Goelzer, Grammaire comparée.

On the whole subject of the relation of the Greek with the various Indo-Germanic languages see the excellent brief discussion of Kretschmer. But the hypothesis of an original Graeco-Italic tongue cannot be considered as proved, though there are many points of contact between Greek and Latin. But Greek, as the next oldest branch known to us, shows more kinship with the Sanskrit. Constant use of the Sanskrit must be made by one who wishes to understand the historical development of the Greek tongue. Such a work as Whitney’s *Sanskrit Grammar* is very useful for this purpose. See also J. Wackernagel, *Altindische Grammatik*. I, Lautlehre (1896). II, 1, Einleitung zur Wortlehre (1905). So Thumb’s *Handbuch des Sanskrit*. I, *Grammatik* (1905). Max Müller playfully remarks: “It has often been said that no one can know anything of the science of language who does not know Sanskrit, and that is enough to frighten anybody away from its study.” It is not quite so bad, however. Sanskrit is not the parent stock of the Greek, but the oldest member of the group. The age of the Sanskrit makes it invaluable for the study of the later speech-developments.

The Greek therefore is not an isolated tongue, but sustains vital relations with a great family of languages. So important does Kretschmer consider this aspect of the subject that he devotes his notable Einleitung in die Geschichte der griechischen Sprache to the setting forth of “the prehistoric beginnings of the Greek speech-development.” This effort is, of necessity, fragmentary and partly inferential, but most valuable for a scientific treatment of the Greek language. He has a luminous discussion of the effect of the Thracian and Phrygian stocks upon the Greek when the language spread over Asia Minor.

**IV. Looking at the Greek Language as a Whole.** We cannot indeed make an exhaustive study of the entire Greek language in a book that is professedly concerned

7 Prof. B. L. Gildersleeve, Johns Hopkins Univ., has always taught Greek, but his Latin Grammar shows his fondness for Latin. See also Henry, A Short Comp. Gr. of Gk. and Lat., 1890, and A Short Comp. Gr. of Eng. and Ger., 1893.

Wackernagel

———, Die Sprache des Plut. etc. Teile I, II (1895–1896).

1 Three Lect. on the Sci. of Lang., 1891, p. 72.
2 P. 5. Prof. Burrows (Disc. in Crete, 1907, pp. 145 ff.) raises the question whether the Greek race (a blend of northern and southern elements) made the Gk. language out of a pre-existing Indo-European tongue. Or did the northerners bring the Gk. with them? Or did they find it already in the Ægean? It is easier to ask than to answer these questions.
only with one epoch of that history. As a matter of fact no such work exists. Jannaris indeed said that “an ‘historical’ grammar, tracing in a connected manner the life of the Greek language from classical antiquity to the present time, has not been written nor even seriously attempted as yet.” Jannaris himself felt his limitations when he faced so gigantic a task and found it necessary to rest his work upon the classical Attic as the only practical basis. But so far he departed from the pure Attic method. But such a grammar will come some day.

(a) DESCRIPTIVE HISTORICAL GRAMMAR. Meanwhile descriptive historical grammar is possible and necessary. “Descriptive grammar has to register the grammatical forms and grammatical conditions in use at a given date within a certain community speaking a common language.” There is this justification for taking Attic as the standard for classical study; only the true historical perspective should be given and Attic should not be taught as the only real Greek. It is possible and essential then to correlate the N. T. Greek with all other Greek and to use all Greek to throw light on the stage of the language under review. If the Greek itself is not an isolated tongue, no one stage of the language can be so regarded. “Wolff deprecates the restriction of grammar to a set of rules abstracted from the writings of a ‘golden’ period, while in reality it should comprise the whole history of a language and trace its development.” H. C. Müller indeed thought that the time had not arrived for a grammar of Greek on the historical plan, because it must rest on a greater amount of material than is now at hand. But since then a vast amount of new material has come to light in the form of papyri, inscriptions and research in the modern Greek. Müller’s own book has added no little to our knowledge of the subject. Meanwhile we can use the historical material for the study of N. T. Greek.

(b) UNITY OF THE GREEK LANGUAGE. At the risk of slight repetition it is worth while to emphasize this point. Müller is apologetic and eager to show that “the Greek language and literature is one organic, coherent whole.” The dialectical variations, while confusing to a certain extent, do not show that the Greek did not possess

---

4 Ib., p. 16. On “die griechische Sprache als Einheit” see Thumb’s able discussion in Handb. d. griech. Dial. (pp. 1–12). With all the diversity of dialects there was essential unity in comparison with other tongues.
original and continuous unity. As early as 1000 B.C. these dialectical distinctions probably existed and the speech of Homer is a literary dialect, not the folk-speech. The original sources of [Page 42] the Greek speech go back to a far distant time when as one single language an Asiatic idiom had taken Europe in its circle of influence. The translator of Buttmann’s Greek Grammar speaks of Homer “almost as the work of another language.” This was once a common opinion for all Greek that was not classic Attic. But Thiersch entitled his great work Griechische Grammatik vorzüglich des homerischen Dialekts, not simply because of the worth of Homer, “but because, on the contrary, a thorough knowledge of the Homeric dialect is indispensably necessary for those who desire to comprehend, in their whole depth and compass, the Grecian tongue and literature.” But Homer is not the gauge by which to test Greek; his poems are invaluable testimony to the early history of one stage of the language. It is a pity that we know so little of the pre-Homeric history of Greek. “Homer presents not a starting-point, but a culmination, a complete achievement, an almost mechanical accomplishment, with scarcely a hint of origins.” But whenever Greek began it has persisted as a linguistic unit till now. It is one language whether we read the Epic Homer, the Doric Pindar, the Ionic Herodotus, the Attic Xenophon, the Æolic Sappho, the Atticistic Plutarch, Paul the exponent of Christ, an inscription in Pergamus, a papyrus letter in Egypt, Tricoupis or Vlachos in the modern time. None of these representatives can be regarded as excrescences or impertinences. There have always been uneducated persons, but the Greek tongue has had a continuous, though checkered, history all the way. The modern educated Greek has a keen appreciation of “die Schönheiten der klassischen Sprache.” Müller complained that “almost no grammarians have treated the Greek language as a whole,” but the works of Krumbacher, Thumb, Dieterich, Hatzidakis, Psichari, Jannaris, etc., have made it possible to obtain a general survey of the Greek language up to the present time. Like English, Greek has emerged into a new sphere of unity and consistent growth.

[Page 43] (c) PERIODS OF THE GREEK LANGUAGE. It will be of service to present a brief outline of the history of the Greek tongue. And yet it is not easy to give. See the discussion by Sophocles in his Greek Lexicon (p. 11 f.), inadequate in view of recent discoveries by Schliemann and Evans. The following is a tentative outline: The Mycenaean Age, 1500 B.C. to 1000 B.C.; the Age of the Dialects, 1000 B.C. to 300 B.C.; the Age of the Koinê, 300 B.C. to 330 A.D.; the Byzantine Greek, 330 A.D. to 1453 A.D.; the modern Greek, 1453 A.D. to the present time. The early stage of the Byzantine Greek (up to 600 A.D.) is really Koinê and the rest is modern Greek. See a

4 Hatzidakis, Einl. in die neugr. Gr., 1892, p. 4.
different outline by Jannaris\(^1\) and Hadley and Allen.\(^2\) As a matter of fact any division is arbitrary, for the language has had an unbroken history, though there are these general epochs in that history. We can no longer call the pre-Homeric time mythical as Sophocles does.\(^3\) In naming this the Mycenæan age we do not wish to state positively that the Mycenæans were Greeks and spoke Greek. “Of their speech we have yet to read the first syllable.”\(^4\) Tsountas\(^5\) and Manatt, however, venture to believe that they were either Greeks or of the same stock. They use the term “to designate all Greek peoples who shared in the Mycenæan civilization, irrespective of their habitat.”\(^6\) Ohnefalsch-Richter (\textit{Cont. Rev.}, Dec., 1912, p. 862) claims Cyprus as the purveyor of culture to the Creto-Mycenæan age. He claims that Hellenes lived in Cyprus 1200 to 1000 B.C. The Mycenæan influence was wide-spread and comes “down to the very dawn of historical Greece.”\(^7\) That Greek was known and used widely during the Mycenæan age the researches of Evans at Knossos, in Crete, make clear.\(^8\) The early linear \textbf{Page 44} writing of the Cretans came from a still earlier pictograph. The Greek dialects emerge into light from about 1000 B.C. onward and culminate in the Attic which flourished till the work of Alexander is done. The Homeric poems prove that Greek was an old language by 1000 to 800 B.C. The dialects certainly have their roots deep in the Mycenæan age. Roughly, 300 B.C. is the time when the Greek has become the universal language of the world, a \textit{Weltsprache}. 330 A.D. is the date when the seat of government was removed from Rome to Constantinople, while A.D. 1453 is the date when Constantinople was captured by the Turks. With all the changes in this long history the standards of classicity have not varied greatly from Homer till now in the written style, while the Greek vernacular today is remarkably like the earliest known inscriptions of the folk-speech in Greece.\(^1\) We know something of this history for about 3000 years, and it is at least a thousand years longer. Mahaffy has too poor an idea of modern Greek, but even he can say:

\begin{thebibliography}{9}
\bibitem{1} Hist. Gk. Gr., p. xxii. Cf. also Schuckburgh, Greece, 1906, p. 24 f. Moulton (Prol., p. 184) counts 32 centuries of the Gk. language from 1275 B.C., the date of the mention of the Achæans on an Egyptian monument.
\bibitem{2} Gk. Gr., 1885, p. 1 f. Deissmann indeed would have only three divisions, the Dialects up to 300 B.C., Middle Period up to 600 A.D., and Mod. Gk. up to the present time. Hauck’s Realencyc., 1889, p. 630. Cf. Müller, Hist. Gr. der hell. Spr., 1891, pp. 42–62, for another outline.

“Even in our miserable modern pigeon-Greek, which represents no real pronunciation, either ancient or modern, the lyrics of Sophocles or Aristophanes are unmistakably lovely.”

(d) MODERN GREEK IN PARTICULAR. It is important to single out the modern Greek vernacular from the rest of the language for the obvious reason that it is the abiding witness to the perpetuity of the vernacular Greek as a living organism. It is a witness also that is at our service always. The modern Greek popular speech does not differ materially from the vernacular Byzantine, and thus connects directly with the vernacular κοινή. Alexandria was “the great culture-reservoir of the Greek-Oriental world … the repository of the ancient literary treasures.” With this [Page 45] general position Thumb heartily agrees. Hatzidakis even says: “The language generally spoken to-day in the towns differs less from the common language of Polybius than this last differs from the language of Homer.” Since this is true it at first seems odd that the students at the University of Athens should object so much to the translation of the N. T. into the modern vernacular. They forget that the N. T. is itself written in the vernacular κοινή. But that was so long ago that it is now classic to them. Certainly in the Gospels, as Wellhausen insists, the spoken Greek became literature.

Knowledge of the modern Greek helps the student to escape from “the Procrustean bed of the old Greek” which he learned as a fixed and dead thing. It is probable that Roger Bacon had some Byzantine manual besides the old Greek grammars. “In England, no less than in the rest of Western Europe, the knowledge of Greek had died away, and here also, it was only after the conquest of Constantinople that a change was possible.” Western Christians had been afraid of the corruptions of paganism if they knew Greek, and of Mohammedanism if they knew Hebrew (being kin to Arabic!). But at last a change has come in favour of the modern Greek. Boltz indeed has advocated modern Greek as the common language for the scholars of the world since Latin is so little spoken. There is indeed need of a new world-speech, as Greek

3 The modern literary language (καθαρεύουσα) is really more identical with the ancient classical Gk. But it is identity secured by mummifying the dead. It is identity of imitation, not identity of life. Cf. Thumb-Angus, Handb. of Mod. Gk. Vern., Foreword (p. xi f.).
4 Dieterich, Gesch. der byz. und neugr. Lit., 1902, p. 2.
3 Einl. in die drei ersten Evang., 1905, p. 9.
5 Thumb, Handb. der neugr. Volkspr., 1895, p. x.
7 lb., p. xlii.
was in the N. T. times, but there is no language that can now justly make such a claim. English comes nearer to it than any other. This need has given rise to the artificial tongues like Volapük and Esperanto,[Page 46] 1 the latter having some promise in it. But the modern Greek vernacular has more merit than was once conceded to it. The idioms and pronunciation of the present-day vernacular are often seen in the manuscripts of the N. T. and other Greek documents and much earlier in inscriptions representing one or another of the early dialects. The persistence of early English forms is easily observed in the vernacular in parts of America or England. In the same way the late Latin vernacular is to be compared with the early Latin vernacular, not with the Latin of elegant literature. “Speaking generally, we may say that the Greek of a well-written newspaper [the literary language] is now, as a rule, far more classical than the Hellenistic of the N. T., but decidedly less classical than the Greek of Plutarch.”2 What the relation between the N. T. Greek and the modern Greek is will be shown in the next chapter. It should be noted here that the N. T. Greek had a strong moulding influence on the Byzantine, and so on the modern Greek because of the use of the Greek New Testament all over the world, due to the spread of Christianity throughout the Roman Empire.3 The great Christian preachers did not indeed use a peculiar ecclesiastical Greek, but the N. T. did tend to emphasize the type of ἱνα in which it was written. “The diction of the N. T. had a direct influence in moulding the Greek ordinarily used by Christians in the succeeding centuries.”4 Compare the effect of the King James Version on the English language and of Luther’s translation of the Bible on German.

V. The Greek Point of View. It sounds like a truism to insist that the Greek idiom must be explained from the Greek point of view. But none the less the caution is not superfluous. Trained linguists may forget it and so commit a grammatical vice. Even Winer5 will be found saying, for instance: “Appellatives which, as expressing definite objects, should naturally have the article, are in certain cases used without it.” That “should” has the wrong attitude toward Greek. The appellative in Greek does not need to have the article in order to be definite. So when Winer often admits that one tense is used “for” another, he is really thinking of German and how it would be expressed in German. Each tongue has its own history and genius. Parallel idioms may or may not exist in a group of languages. Sanskrit and Latin, for instance, have no article. It is not possible to parallel the Hebrew tenses, for example, with the Greek, nor, indeed, can it be done as between Greek and English. The English translation of a Greek aorist may have to be in the past perfect or the present perfect

2 Jebb, On the Rela. of Mod. to Class. Gk., in Vincent and Dickson’s Handb. to Mod. Gk., 1887, p. 294. Blass actually says: “Der Sprachgebrauch des Neuen Testaments, der vielfältig vom Neugriechischen her eine viel bessere Beleuchtung empfängt als aus der alten klassischen Literatur.” Kühner’s Ausf. Gr. etc., 1890, p. 25. Blass also says (ib., p. 26) that “eine wissenschaftliche neugriechische Grammatik fehlt.” But Hatzidakis and others have written since.
3 See Reinhold, De Graecitate Patrum, 1898.
4 Jebb, ib., p. 290.
5 Gr. of the N. T. Gk., Moulton’s transl., 1877, p. 147.
to suit the English usage, but that proves nothing as to how a Greek regarded the
aorist tense. We must assume in a language that a good writer knew how to use his
own tongue and said what he meant to say. Good Greek may be very poor English, as
when Luke uses ἐν τῷ εἰσαγαγέν τοῦ γονεῖ τῷ παιδίον Ἰησοῦν (Lu. 2:27). A literal
translation of this neat Greek idiom makes barbarous English. The Greeks simply did
not look at this clause as we do. “One of the commonest and gravest errors in
studying the grammar of foreign languages is to make a half-conjectural translation,
and then reason back from our own language to the meaning of the original; or to
explain some idiom of the original by the formally different idiom which is our
substantial equivalent.” Broadus was the greatest teacher of language that I have
known and he has said nothing truer than this. After all, an educated Greek knew what
he meant better than we do. It is indeed a great and difficult task that is demanded of
the Greek grammarian who to-day undertakes to present a living picture of the orderly
development of the Greek tongue “zu einem schönen und großen Ganzen” and also
show “in the most beautiful light the flower of the Greek spirit and life.” Deissmann
feels strongly on the subject of the neglect of the literary development of Primitive
Christianity, “a [Page 48] subject which has not yet been recognized by many persons
in its full importance. Huge as is the library of books that have been written on the
origin of the N. T. and of its separate parts, the N. T. has not often been studied by
historians of literature; that is to say, as a branch of the history of ancient literature.”

[PAGE 49] CHAPTER III

THE KOINH

The Greek of the N. T. has many streams that flow into it. But this fact is not a
peculiarity of this phase of the language. The κοινὴ itself has this characteristic in a
marked degree. If one needs further examples, he can recall how composite English
is, not only combining various branches of the Teutonic group, but also incorporating
much of the old Celtic of Britain and receiving a tremendous impress from the
Norman-French (and so Latin), not to mention the indirect literary influence of Latin
and Greek. The early Greek itself was subject to non-Greek influence as other Indo-
Germanic tongues were, and in particular from the side of the Thracians and
Phrygians in the East, and in the West and North the Italic, Celtic and Germanic
pressure was strong.

1 Broadus, Comm. on Mt., 1886, p. 316. See also Gerber, Die Spr. als Kunst, 1. Bd.,
1871, p. 321: “Der ganze Charakter dieser oder jener Sprache ist der Abdruck der
Natur des Landes, wo sie gesprochen wird. Die griechische Sprache ist der
griechische Himmel selbst mit seiner tiefdunklen Bläue, die sich in dem sanft
wogenden ägäischen Meere spiegelt.”
2 Kühner, Ausf. Gr. der griech. Spr., 1834, p. iv. How much more so now!
3 Expos. Times, Dec., 1906, p. 103. Cf. also F. Overbeck, Hist. Zeitschr., neue Folge,
1882, p. 429 ff.
1 Kretschmer, Einl. in die Gesch. der griech. Spr., 1896, pp. 171–243. But the true
Phrygians were kin to the Greeks. See Percy Gardner, New Ch. of Gk. Hist., p. 84.
I. The Term Κοινή. The word κοινή, sc. διάλεκτος, means simply common language or dialect common to all, a world-speech (Weltsprache). Unfortunately there is not yet uniformity in the use of a term to describe the Greek that prevailed over Alexander’s empire and became the world-tongue. Kühner-Blass speak of “ἡ κοινή oder ἑλληνικὴ διάλεκτος.” So also Schmiedel follows Winer exactly. But Hellenic language is properly only Greek language, as Hellenic culture is Greek culture. Jannaris suggests Panhellenic or new Attic for the universal Greek, [Page 50] the Greek par excellence as to common usage. Hellenistic Greek would answer in so far as it is Greek spoken also by Hellenists differing from Hellenes or pure Greeks. Krumbacher applies Hellenistic to the vernacular and κοινή to the “conventional literary language” of the time, but this is wholly arbitrary. Krumbacher terms the Hellenistic “ein verschwommenenes Idiom.” Hatzidakis and Schwyzer include in the κοινὴ both the literary and the spoken language of the Hellenistic time. This is the view adopted in this grammar. Deissmann dislikes the term Hellenistic Greek because it was so long used for the supposedly peculiar biblical Greek, though the term itself has a wide significance. He also strongly disapproves the terms “vulgar Greek,” “bad Greek,” “graecitas fatiscens,” in contrast with the “classic Greek.” Deissmann moreover objects to the word κοινὴ because it is used either for the vernacular, the literary style or for all the Greek of the time including the Atticistic revival. So he proposes “Hellenistic world-speech.” But this is too cumbersome. It is indeed the world-speech of the Alexandrian and Roman period that is meant by the term κοινὴ. There is on the other hand the literary speech of the orators, historians, philosophers, poets, the public documents preserved in the inscriptions (some even Atticistic); on the other hand we have the popular writings in the LXX, the N. T., the Apostolic Fathers, the papyri (as a rule) and the ostraca. The term is thus sufficient by itself to express the Greek in common use over the world, both oral and literary, as Schweizer uses it following Hatzidakis. Thumb identifies κοινὴ and Hellenistic Greek and applies it to both vernacular and written style, though he would not regard the Atticists as proper producers of the κοινὴ. Moulton uses the term κοινὴ for both

---

4 W.-Sch., N. T. Gr., p. 17.
5 Mahaffy, Prog. of Hellen. in Alex. Emp., p. 3. Mahaffy does use Hellenism like Droysen in his Hist. of Hellenism, as corresponding to Hellenistic, but he does so under protest (p. 3 f.). He wishes indeed that he had coined the word “Hellenicism.” But Hogarth (Philip and Alexander, p. 277) had already used “Hellenisticism,” saying: “Hellenisticism grew out of Hellenism.”
1 Münchener Sitzungsber., 1886, p. 435.
Schwyzer SCHWYZER (SCHWEIZER), E., Die Weltsprachen des Altertums (1902).
3 Ib., p. 630.
4 Gr. der perg. Inschr., p. 19 f.
5 Die griech. Spr. etc., p. 9.
6 Prol., p. 23. It is not necessary to discuss here the use of “Hellenistic” Gk. as “Jewish-Gk.” (see “Semitic Influence” in ch. IV), for it is absurd. The notion that the κοινὴ is Macedonian Gk. is quite beside the mark, for Mac. Gk. is too barbarous. The theory of an Alexandrian dialect is obsolete. Du Canges, in his Glossarium called
spoken and literary κοινή. The doctors thus disagree very widely. On the whole it seems best to use the term κοινή (or Hellenistic Greek) both for the vernacular and literary κοινή, excluding the Atticistic revival, which was a conscious effort to write not κοινή [Page 51] but old Attic. At last then the Greek world has speech-unity, whatever was true of the beginning of the Greek language. 

II. The Origin of the Κοινή.

(a) Triumph of the Attic. This is what happened. Even in Asiatic Ionia the Attic influence was felt. The Attic vernacular, sister to the Ionic vernacular, was greatly influenced by the speech of soldiers and merchants from all the Greek world. Attic became the standard language of the Greek world in the fifth and the fourth centuries B.C. “The dialect of Athens, the so-called Attic—one of the Ionic group—prevailed over all other sister dialects, and eventually absorbed them. It was the Attic, because Athens, particularly after the Persian wars, rose to absolute dominion over all the other Greek communities, and finally became the metropolis of all Greek races.”

This is rather an overstatement, but there is much truth in it. This classic literary Attic did more and more lose touch with the vernacular. “It is one of our misfortunes, whatever be its practical convenience, that we are taught Attic as the standard Greek, and all other forms and dialects as deviations from it … when many grammarians come to characterize the later Greek of the Middle Ages or of to-day, or even that of the Alexandrian or N. T. periods, no adjective is strong enough to condemn this ‘verdorbenes, veruneinigtes Attisch’” (S. Dickey, Princeton Rev., Oct., 1903). The literary Attic was allied to the literary Ionic; but even in this crowning development of Greek speech no hard and fast lines are drawn, for the artificial Doric choruses are used in tragedy and the vernacular in comedy.

There was loss as well as gain as the Attic was more extensively used, just as is true [Page 52] of modern English. “The orators Demosthenes and Æschines may be counted in the new Attic, where other leading representatives in literature are Menander, Philemon and the other writers of the New Comedy.” As the literary Attic lived on in the literary κοινή, so the vernacular Attic survived with many changes in the vernacular κοινή. We are at last in possession of enough of the old Attic inscriptions and the κοινή inscriptions and the

1 Blass indeed contrasts the literature of the Alex. and Rom. periods on this principle, but wrongly, for it is type, not time, that marks the difference. “If then the literature of the Alexandrian period must be called Hellenistic, that of the Roman period must be termed Atticistic. But the popular language had gone its own way.” Gr. of the N. T. Gk., 1898 and 1905, p. 2. On the Gk. of Alexandria and its spread over the world see Wackernagel, Die Kult. der Gegenw., Tl. I, Abt. 8, p. 304 f.

1 Simonson, Gk. Gr., Accidence, 1903, p. 6. He has a good discussion of the dialects, pp. 221–265.
The march of the Greek language has been steadily forward on this Attic vernacular base even to this present day. In a sense, therefore, the κοινή became another dialect (Æolic, Doric, Ionic, Attic, κοινή). Cf. Kretschmer, *Die Entstehung der Kοινή*, pp. 1–37. But the κοινή was far more than a dialect. Kretschmer holds, it is fair to say, that the κοινή is “eine merkwürdige Mischung verschiedenster Dialekte” (*op. cit.*, p. 6). He puts all the dialects into the melting-pot in almost equal proportions. Wilamowitz-Möllendorff considers the Ionic as the chief influence in the κοινή, while W. Schmidt denies all Doric and Ionic elements. Schwyzzer rightly sees that the dialectical influences varied in different places, though the vernacular Attic was the common base.

(b) Fate of the Other Dialects. The triumph of the Attic was not complete, though in Ionia, at the end of the third century B.C., inscriptions in Attic are found, showing that in Asia Minor pure Ionic had about vanished. In the first century B.C. the Attic appears in inscriptions in Boeotia, but as late as the second century A.D. Ionic inscriptions are found in Asia Minor. Ionic first went down, followed by the Æolic. The Doric made a very stubborn resistance. It was only natural that the agricultural communities should hold out longest. See Thumb, *Hellen.*, p. 28 f. Even to-day the Zacoonian patois of modern Greek vernacular [Page 53] has preserved the old Laconic Doric “whose broad a holds its ground still in the speech of a race impervious to literature and proudly conservative of a language that was always abnormal to an extreme.” It is not surprising that the Northwest Greek, because of the city leagues, became a kind of Achaean-Dorian κοινή 2 and held on till almost the beginning of the Christian era before it was merged into the κοινή of the whole Græco-Roman world.

Wilamowitz-Möllendorff

———, Über die Entstehung der griech. Schriftsprachen (Verf. deutscher Phil. und Schulm., 1879, pp. 36–41).

Schmidt **Schmidt, W., De Flavii Josephi elocutione (1894).**

2 Ib., p. 37.

There are undoubtedly instances of the remains of the Northwest Greek and of the other dialects in the κοινή and so in the N. T. The Ionic, so near to the Attic and having flourished over the coast of Asia Minor, would naturally have considerable influence on the Greek world-speech. The proof of this will appear in the discussion of the κοινή where remains of all the main dialects are naturally found, especially in the vernacular.  

(c) PARTIAL KOINES. The standardizing of the Attic is the real basis. The κοινή was not a sudden creation. There were quasi-koinê before Alexander’s day. These were Strabo’s alliance of Ionic-Attic, Doric-Æolic (Thumb, Handb., p. 49). It is therefore to be remembered that there were “various forms of κοινή” before the κοινή which commenced with the conquests of Alexander (Buck, Gk. Dialects, pp. 154–161), as Doric κοινή, Ionic κοινή, Attic κοινή, Northwest κοινή. Hybrid forms are not uncommon, such as the Doric future with Attic ού as in ποιησοῦντι (cf. Buck, p. 160). There was besides a revival here and there of local dialects during the Roman times.

(d) EFFECTS OF ALEXANDER’S CAMPAIGNS. But for the conquests of Alexander there might have been no κοινή in the sense of a world-speech. The other Greek koinês were partial, this alone was a world-speech because Alexander united Greek and Persian, east and west, into one common world-empire. He respected the [Page 54] customs and language of all the conquered nations, but it was inevitable that the Greek should become the lingua franca of the world of Alexander and his successors. In a true sense Alexander made possible this new epoch in the history of the Greek tongue. The time of Alexander divides the Greek language into two periods. “The first period is that of the separate life of the dialects and the second that of the speech-unity, the common speech or κοινή” (Kretschmer, Die Entst. d. Κοινή, p. 1).

(e) THE MARCH TOWARD UNIVERSALISM. The successors of Alexander could not stop the march toward universalism that had begun. The success of the Roman Empire was but another proof of this trend of history. The days of ancient nationalism were over and the κοινή was but one expression of the glacial movement. The time for the world-speech had come and it was ready for use.

III. The Spread of the Κοινή.

(a) A WORLD-SPEECH. What is called ἡ κοινή was a world-speech, not merely a general Greek tongue among the Greek tribes as was true of the Achean-Dorian and the Attic. It is not speculation to speak of the κοινή as a world-speech, for the inscriptions in the κοινή testify to its spread over Asia, Egypt, Greece, Italy, Sicily and the isles of the sea, not to mention the papyri. Marseilles was a great centre of Greek civilization, and even Cyrene, though not Carthage, was Grecized. 1 The κοινή

---

4 “Il est à peine besoin de répéter que ces caractères s’effacent, à mesure que l’on descend vers l’ère chrétienne. Sous l’influence sans cesse grandissante de l’atticisme, il s’établit une sorte d’uniformité.” Boisacq, Les Dial. Dor., 1891, p. 204. “The Gk. of the N. T. is not, however, mere κοινή. In vocabulary it is fundamentally Ionic” (John Burnet, Rev. of Theol. and Phil., Aug., 1906, p. 95). “Fundamentally” is rather strong, but ἀπόστολος, as ambassador, not mere expedition, ἐὐλογία, νηστεία, give some colour to the statement. But what does Prof. Burnet mean by “mere κοινή”?

was in such general use that the Roman Senate and imperial governors had the decrees translated into the world-language and scattered over the empire. It is significant that the Greek speech becomes one instead of many dialects at the very time that the Roman rule sweeps over the world. The language spread by Alexander’s army over the Eastern world persisted after the division of the kingdom and penetrated all parts of the Roman world, even Rome itself. Paul wrote to the church at Rome in Greek, and Marcus Aurelius, the Roman Emperor, wrote his Meditations (τῶν εἰς Ἑρωτόν) in Greek. It was the language not only of letters, but of commerce and every-day life. A common language for all men may indeed be only an ideal norm, but “the whole character of a common language may be strengthened by the fact of its transference to an unquestionably foreign linguistic area, as we may observe in the case of the Greek κοινή.” The late Latin became a κοινή for the West as the old Babylonian had been for the East, this latter the first world-tongue known to us. Xenophon with the retreat of the Ten Thousand was a forerunner of the κοινή. Both Xenophon and Aristotle show the wider outlook of the literary Attic which uses Ionic words very extensively. There is now the “Groß-Attisch.” It already has γίνομαι, ἔνεκεν, ὀτοσαν, εἴπα and ἤγειγα, ἐδόκαμεν and ἐδοκάω, βασίλεισσα, δεικνύω, σσά, ναὸς. Already Thucydidides and others had borrowed σσ from the Ionic. It is an easy transition from the vernacular Attic to the vernacular κοινή after Alexander’s time. (Cf. Thumb’s Handbuch, pp. 373–380, “Entstehung der Koinή.”) On the development of the κοινή see further Wackernagel, Die Kultur der Gegenwart, Tl. I, Abt. 8, p. 301 ff.; Moulton, Prol., ch. I, II; Mayser, Gr. d. griech. Pap., Kap. I. But it was Alexander who made the later Attic the common language of the world, though certainly he had no such purpose in view. Fortunately he had been taught by Aristotle, who himself studied in Athens and knew the Attic of the time. “He rapidly established Greek as the lingua franca of the empire, and this it was which gave the chief bond of union to the many countries of old civilizations, which had hitherto been isolated. This unity of culture is the remarkable thing in the history of the world.” It was really an epoch in the world’s history when the babel of tongues was hushed in the wonderful language of Greece. The vernaculars of the eastern

2 Schwyzer, Die Weltspr. etc., p. 7.
3 See Mahaffy, Prog. of Hellen. in Alex. Emp., p. 7; cf. also Rutherford New Phrynichus, 1881, p. 160 f.; Schweizer, Gr. der perg. Inschr., p. 16. Moulton (Prol., p. 31) points out that the vase-inscriptions prove the statement of the Const. of Athens, 11.3, that the Athenians spoke a language compounded of all Greek and barbarian tongues besides.
4 Mahaffy, Prog. of Hellen., etc., p. 40.
Roman provinces remained, though the Greek was universal; so, when Paul came to Lystra, the people still spoke the Lycaonian speech of their fathers. The papyri and the inscriptions prove beyond controversy that the Greek tongue was practically the same whether in Egypt, Herculaneum, Pergamum or Magnesia. The Greeks were the school-teachers of the empire. Greek was taught in the grammar schools in the West, but Latin was not taught in the East.

(b) Vernacular and Literary.

1. Vernacular. The spoken language is never identical with the literary style, though in the social intercourse of the best educated people there is less difference than with the uncultured. We now know that the old Attic of Athens had a vernacular and a literary style that differed considerably from each other. This distinction exists from the very start with the κοινή, as is apparent in Pergamum and elsewhere. This vernacular κοινή grows right out of the vernacular Attic normally and naturally. The colonists, merchants and soldiers who mingled all over Alexander’s world did not carry literary Attic, but the language of social and business intercourse. This vernacular κοινή at first differed little from the vernacular Attic of 300 b.c. and always retained the bulk of the oral Attic idioms. “Vulgar dialects both of the ancient and modern times should be expected to contain far more archaisms than innovations.” The vernacular is not a variation from the literary style, but the literary language is a development from the vernacular κοινή. Hence if the vernacular is the normal speech of the people, we must look to the inscriptions and the papyri for the living idiom of the common Greek or κοινή. The pure Attic as it was spoken in Athens is preserved only in the inscriptions. In the Roman Empire the vernacular κοινή would be understood almost everywhere from Spain to Pontus. See IV for further remarks on the vernacular κοινή.

1 Schwyzer, Weltspr., p. 29.
2 Schweizer, Gr. der perg. etc., p. 22.
4 Schweizer, Gr., p. 27.
5 Thumb, Griech. Spr. im Zeitalter etc., p. 208 f. Lottich in his De Serm. vulg. Attic. shows from the writings of Aristophanes how the Attic vernacular varied in a number of points from the literary style, as in the frequent use of diminutives, desiderative verbs, metaphors, etc.
6 Schweizer, Gr., p. 23.
7 Geldart, Mod. Gk. Lang. in its Rela. to Anc. Gk., 1870, p. 73. See also Thumb, Griech. Spr. etc., p. 10, who calls “die κοινή weniger ein Abschluß als d er Anfang einer neuen Entwicklung.” On the older Gk. κοινή see Wackernagel, Die Kult. der Gegenw., Tl. I, Abt. 8, p. 300 f.
9 Atticismus, Bd. IV, pp. 577–734. A very important treatment of the whole question is here given.
2. Literary. If the vernacular κοινή was the natural development of the vernacular Attic, the literary κοινή was the normal evolution of the literary Attic. Thumb well says, “Where there is no development, there is no life.” This is natural and in harmony with the previous removal of the literary Attic from the language of the people. The growth of the literary κοινή was parallel with that of the popular κοινή and was, of course, influenced by it. The first prose monument of literary Attic known to us, according to Schwyzer, is the Constitution of Athens (before 413), falsely ascribed to Xenophon. The forms of the literary κοινή are much like the Attic, as in Polybius, for instance, but the chief difference is in the vocabulary and meaning of the same words. Polybius followed the general literary spirit of his time, and hence was rich in new words, abstract nouns, denominative verbs, new adverbs. He and Josephus therefore used Ionic words found in Herodotus and Hippocrates, like ἔνδεισις, παραφυλακή, not because they consciously imitated these writers, but because the κοινή, as shown by papyri and inscriptions, employed them. For the same reason Luke and Josephus have similar words, not because of use of one by the other, but because of common knowledge of literary terms, Luke also using many common medical terms natural to a physician of culture. Writers like Polybius aimed to write without pedantry and without vulgarism. In a true sense then the literary κοινή was a “compromise between the vernacular κοινή and the literary Attic,” between “life and school.” There is indeed no Chinese wall between the literary and the vernacular κοινή, but a constant inflow from the vernacular to the written style as between prose and poetry, though Zarncke insists on a thorough-going distinction between them. The literary κοινή would not, of course, use such dialectical forms as τοὺς πάντες, τοῦς πραγμάτων, etc., common in the vernacular κοινή. But, as Krumbacher well shows, no literary speech worthy of the name can have an independent development apart from the vernacular. Besides Polybius and Josephus, other writers in the literary κοινή were Diodorus, Philo, Plutarch, though Plutarch indeed is almost an “Anhänger des Atticismus” and Josephus was rather

3 Das Prob. der neugr. Schriftspr., 1903, p. 6. A valuable treatment of this point.
self-conscious in his use of the literary style. The literary κοινή was still affected by the fact that many of the writers were of “un-Greek or half Greek descent,” Greek being an acquired tongue. But the point must not be overdone, for the literary κοινή “was written by cosmopolitan scholars for readers of the same sort,” and it did not make much difference “whether a book was written at Alexandria or Pergamum.” Radermacher notes that, while in the oldest Greek there was no artificiality even in the written prose, yet in the period of the κοινή all the literary prose shows “eine Kunstsprache.” He applies this rule to Polybius, to Philo, to the N. T., to Epictetus. But certainly it does not hold in the same manner for each of these.

(c) THE ATTICISTIC REACTION. Athens was no longer the centre of Greek civilization. That glory passed to Alexandria, to Pergamum, to Antioch, to Ephesus, to Tarsus. But the great creative epoch of Greek culture was past. Alexandria, the chief seat of Greek learning, was the home, not of poets, but of critics of style who found fault with Xenophon and Aristotle, but could not produce an Anabasis or a Rhetoric. The Atticists wrote, to be sure, in the κοινή period, but their gaze was always backward to the pre-κοινή period. The grammarians (Dionysius, Phrynichus, [Page 59] Moeris) set up Thucydides and Plato as the standards for pure Greek style, while Aratus and Callimachus sought to revive the style of Homer, and Lucian and Arrian even imitated Herodotus. When they wished to imitate the past, the problem still remained which master to follow. The Ionic revival had no great vogue, but the Attic revival had. Lucian himself took to Attic. Others of the Atticists were Dionysius of Halicarnassus, Dio Chrysostom, Aristides, Herodes Atticus, Ælian, etc. “They assumed that the limits of the Greek language had been forever fixed during the Attic period.” Some of the pedantic declaimers of the time, like Polemon, were thought to put Demosthenes to the blush. These purists were opposed to change in language and sought to check the departure from the Attic idiom. “The purists of to-day are like the old Atticists to a hair.” The Atticists were then archaic and anachronistic. The movement was rhetorical therefore and not confined either to Alexandria or Pergamum. The conflict between the κοινή (vernacular and literary) and this Atticistic reaction affected both to some extent. This struggle between “archaism and life” is old and survives to-day. The Atticists were in fact out of harmony with their time.

5 Jos., Ant., XIV, i, 1.
8 N. T. Gr., p. 2.
1 A sharp distinction as a rule must be made between the language of Arrian and Epict. The Gk. of Epict. as reported by Arrian, his pupil, is a good representative of the vern. κοινή of an educated man. Arrian’s introduction is quite Atticistic, but he aims to reproduce Epictetus’ own words as far as possible.
2 Sophocles, Lex., p. 6. Athenæus 15. 2 said: Εἴ μὴ ἵτατο Ἔσαν, οὐδὲν ἄν ἦν τῶν γραμματέων μωρότερον.
5 Thumb, ib., p. 8.
6 Ib., p. 252 f.
and not like Dante, who chose the language of his people for his immortal poems. They made the mistake of thinking that by imitation they could restore the old Attic style. “The effort and example of these purists, too, though criticized at first, gradually became a sort of moral dictatorship, and so has been tacitly if not zealously obeyed by all subsequent scribes down to the present time.”

As a result when one compares N. T. Greek, one must be careful to note whether it is with the book Greek (καθαρεύουσα) or the vernacular (ὁµιλουµένη). This artificial reactionary movement, however, had little effect upon the vernacular κοινή as is witnessed by the spoken Greek of to-day. Consequently it is a negligible quantity in direct influence upon the writers of the N. T. But the Atticists did have a real influence upon the literary κοινή both as to word-formation and syntax. With Dionysius of Halicarnassus beauty was the chief element of style, and he hoped that the Attic revival would drive out the Asiatic influence. The whole movement was a strong reaction against what was termed “Asianism” in the language. It is not surprising therefore that the later ecclesiastical literary Greek was largely under the influence of the Atticists. “Now there was but one grammar: Attic. It was Attic grammar that every freeman, whether highly or poorly educated, had learned.”

Jannaris calls it. The main thing with the Atticists was to have something as old as Athens. Strabo said the style of Diodorus was properly “antique.”

IV. The Characteristics of the Vernacular Κοινή.

(a) VERNACULAR ATTIC THE BASE. One must not feel that the vernacular Greek is unworthy of study. “The fact is that, during the best days of Greece, the great teacher of Greek was the common people.” There was no violent break between the vernacular Attic and the vernacular κοινή, but the one flowed into the other as a living stream. If the reign of the separated dialects was over, the power of the one general

7 Strabo, 13. 4. 9.
8 Sophocles, Lex. of Rom. and Byz. Period, p. 11.
9 Deissmann, Die sprachl. Erforsch. etc., p. 11. Rutherford (New Phryn., p. 2) says that “the debased forms and mixed vocabulary of the common dialect would have struck the contemporaries of Aristophanes and Plato as little better than jargon of the Scythian policemen.” On the form of the κοινή see Wackernagel, Kult. etc., Tl. I, Abt. 8, p. 305.
Greek speech had just begun on the heels of Alexander’s victories. The battle of Chæronea broke the spirit of the old Attic culture indeed, but the Athenians gathered up the treasures of the past, while Alexander opened the flood-gates for the change in the language and for its spread over the world.1 “What, however, was loss to standard Attic was gain to the ecumenical tongue. The language in which Hellenism expressed itself was eminently practical, better fitted for life than for the schools. Only a cosmopolitan speech could comport with Hellenistic cosmopolitanism. Grammar was simplified, exceptions decreased or generalized, flexions dropped or harmonized, construction of sentences made easier” (Angus, Prince. Rev., Jan., 1910, p. 53). The beginning of the development of the vernacular is not perfectly clear, for we see rather the completed product.2 But it is in the later Attic that lies behind the vernacular. The optative was never common in the vernacular Attic and is a vanishing quantity in the vernacular. The disappearance of the dual was already coming on and so was the limited use of the superlative, –τωσαν instead of –ντον, and –θωσαν instead of –σθων, γίνομαι, σσ, επα, τίς instead of ποτερος, ἐκστος and not ἐκάτερος.3 But while the Attic forms the ground-form4 of the vernacular it must not be forgotten that the vernacular was resultant of the various forces and must be judged by its own standards.5 There is not complete unanimity of opinion concerning the character of the vernacular. Steinthal6 indeed called it merely a levelled and debased Attic, while Wilamowitz7 described it as more properly an Ionic popular idiom. Kretschmer8 now (wrongly, I think) contends that the Northwest Greek, Ionic and Beotian had more influence on the vernacular than the Attic. The truth seems to be the position of Thumb,9 that the vernacular is the result of the mingling with all dialects upon the late Attic vernacular as the base. As between the Doric ἄ and the Ionic η the vernacular follows the Attic usage, and this fact alone is decisive.1 Dieterich2 indeed sums up several points as belonging to

2 Kaibel, Stil und Text der Ἀθηναίων Πολιτεία, p. 37.
3 Blass, Gr. of N. T. Gk., p. 3. Even in the literary the dual is nearly gone, as in Polybius and Diodorus Siculus; cf. Schmidt, De Duali Graec. et Emor. et Reviv., 1893, pp. 22, 25.
7 Verhandl. der 32. phil. Versamml., p. 40.

1 Moulton, Prol., p. 33 f.

Besides the orthography is Attic (cf. Ἰλεως, not Ἰλαος) and the bulk of the inflections and conjugations likewise, as can be seen by comparison with the Attic inscriptions. Schlageter sums the matter up: “The Attic foundation of the κοινή is to-day generally admitted.”

(b) THE OTHER DIALECTS IN THE Κοινή. But Kretschmer is clearly wrong in saying that the κοινή is neither Attic nor decayed Attic, but a mixture of the dialects. He compares the mixture of dialects in the κοινή to that of the high, middle and low German. The Attic itself is a κοινή out of Ionic, Æolic and Doric. The mixed character of the vernacular κοινή is made plain by Schweizer and Dieterich. The Ionic shows its influence in the presence of forms like ἱδήν, σπείρης, εἰδύτα, –υής, καθ Ετός (cf. vetus), ὅστεα, χειλέων, βλαβέων, χρυσόν, –ς ζ, –δός; absence of the rough breathing (psilosis or de-aspiration, Æolic also); dropping of µ in verbs like διδών; καθόν (χιτών), τέσσερα, πράσσω for πράττω (Attic also), etc. Ionic words like µονόφθαλμος (Herod.) instead of ἑτερόφθαλμος occur. Conybeare and Stock (Sel. from LXX, p. 48) suggest that Homer was used as a text-book in Alexandria and so caused Ionisms like σπείρης in the κοινή. The spread of the Ionic over the East was to be expected. In Alexander’s army many of the Greek dialects were represented. In the Egyptian army of the Ptolemies nearly all the dialects were spoken. The Ionians were, besides, part of the Greeks who settled in Alexandria. [Page 63] Besides, even after the triumph of the Attic in Greece the Ionic had continued to be spoken in large parts of Asia Minor. The Ionic influence appears in Pergamum also. The mixing of

1 H. Anz, Subsidia ad cognoscendum Graec. Serm. vulg. etc., 1894, p. 386. Maysler, Gr., pp. 9–24, finds numerous Ionic peculiarities in the Ptolemaic pap. far more than Æolic and Doric. He cites –ωςαν, μαχαίρης, ἕσω, ἐνεκέν, ὄρεων, γογγύζω, παραθήκη, τέσσερες, ἐκπτωμα, etc. On the Ionic and other non-Attic elements in the κοινή see Wackernagel, Kult., p. 306 f.
the Attic with foreign, before all with Ionic, elements, has laid the foundation for the κοινή. The Æolic makes a poor showing, but can be traced especially in Pergamum, where Schweizer considers it one of the elements of the language with a large injection of the Ionic. Æolic has the α for η in proper names and forms in ας. Bœotian-Æolic uses the ending –οσαν, as εἴχοσαν, so common in the LXX. Moulton points out that this ending is very rare in the papyri and is found chiefly in the LXX. He calls Bœotian-Æolic also “the monophthongizing of the diphthongs.” In the Attic and the Ionic the open sound of η prevailed, while in the Bœotian the closed. In the κοινή the two pronunciations existed together till the closed triumphed. Psilosis is also Ionic. The Doric appears in forms like λαός (λεός), ναός (νεός), πιάζω (πιέζω), έπούδαζα, ἴ λιμός, τό πλούτος, ἄλεκτορ, κλίβανος (κρίβανος); and in the pronunciation perhaps β, γ, δ had the Doric softer sound as in the modern Greek vernacular. But, as Moulton argues, the vernacular κοινή comes to us now only in the written form, and that was undoubtedly chiefly Attic. The Arcadian dialect possibly contributes φέωνται, since it has ὑφεόσθη, but this form occurs in Doric and Ionic also. Cf. also the change of gender ἴ λιμός (Luke) and τό πλούτος (Paul). The Northwest Greek contributed forms like ἄρχόντοις, τοὺς λέγοντες, ἦται (ἡμν μν cf. Messenian and Lesbian also), ἠρωτου (like Ionic), εἴχοσαν (cf. Bœotian), ἠλίκαν. The accusative plural in –ες is very common in the papyri, and some N. T. MSS. give τέσσαρες for τέσσαρας. The Achæan-Dorian κοινή had resisted in Northwest Greece the inroads of the common Greek for a century or so. The Macedonian Greek, spoken by many of Alexander’s soldiers, naturally had very slight influence on the κοινή. We know nothing of the old Macedonian Greek. Polybius says that the Illyrians needed an interpreter for Macedonian. Sturz indeed gives a list of Macedonian words found in the κοινή, as ἄσπιλος, κοράσιον, παρεµβολή, ῥημι. But he also includes ἄγγέλλω! The Macedonians apparently used β instead of φ as βίλππος, δ = β as δάνατος, σ β as σέρεθρον. Plutarch speaks of Alexander and his soldiers speaking to each other Μακεδονιστί. For full discussion of the Macedonian dialect see O. Hoffmann, Die Makedonen, ihre Sprache und Volkstum, 1906, pp. 232–255.
(c) NON-DIALECTICAL CHANGES. It is not always possible to separate the various peculiarities of the koine into dialectical influences. “Where Macedonian, Spartan, Boeotian, Athenian and Thessalian were messmates a koine was inevitable. Pronounced dialecticisms which would render unintelligible or ludicrous to others were dropped” (see Angus, Prince. Theol. Rev., Jan., 1910, p. 67). The common blood itself went on changing. It was a living whole and not a mere artificial mingling of various elements. There is less difference in the syntax of the koine and that of the earlier Greek than in the forms, though the gradual disappearance of the optative, use of ἕνα and finite verb in the non-final sense rather than the infinitive or even ὅτι, the gradual disuse of the future part. may be mentioned. It was in the finer shades of thought that a common vernacular would fail to hold its own. “Any language which aspires to be a Weltsprache (world-language), as the Germans say, must sacrifice much of its delicacy, its shades of meaning, expressed by many synonyms and particles and tenses, which the foreigner in his hurry and without contact with natives cannot be expected to master.”

4 Mahaffy, Survey of Gk. Civilization, p. 220. Cf. Geldart, Mod. Gk. Lang. in its Rela. to Anc. Gk., p. 73, for discussion of “the levelling tendency common to all languages.”

1 Hicks, St. Paul and Hellen., in Stud. Bibl. et Eccl., 1896, p. 5. Mayser (Gr. d. griech. Pap., pp. 24–35) gives an interesting list of words that were chiefly “poetical” in the classic literature, but are common in the papyri. The poets often use the vernacular. Some of these words are ἀλέκτωρ, βιβρίσκω, δέσμιος, δῆμα, ἐκτίναισος, ἐντρέπομαι, ἐπαιτέω, ἐπισείο, θάλπω, καταστέλλω, κοιμώμαι, κόμπος, λαοί=people, μέριμνα, νήπιος, οἰκητήριον, περίκεμα, προσφωνέω, σκύλω, στέγη, συναντάω, ὑπότος. New forms are given to old words as λαμπάνομαι from λέπιο, etc. Ramsay (see The Independent, 1913, p. 376) finds ἐμβατέω (cf. Col. 2:18) used in the technical sense of entering in on the part of initiates in the sanctuary of Apollo at Claros in an inscription there.

RUTHERFORD, W. G., A Chapter in the History of Annotation (1905).
pressing needs is a lexicon of the papyri and then of the koiv as a whole. Many of
these words were already in the literary koiv, though they probably came from the
vernacular.2 Some old words received slightly new forms, like ἀνάθεμα ‘curse’
(ἀνάθημα ‘offering’), ἀπάντησις (ἀπάντημα), ἀποστασία (ἀπόστασις), ἀρωτιώ
(ἄρωτιω), βασιλέσσα (βασίλεια), γενέσια (γενέθλια), δεκατώ (δεκατεύω), λυχνία
(λυχνία), μισθαποδοσία (μισθοδοσία), μονοφθάλμος (μονοφθαλμός), νουθεσία
(νοοθέτησις), οἴκοδομή (οικόδομης), οἰνοδίσμος (οινοδίς), ὀπτασία
(ὕπνις), πανδοχεύς (πανδοκεύς), παραφρονία (παραφροσύνη), ῥατίζω (Ῥαῖνος, cf.
βαπτίζω, βαπτώ), στήκω (ἔστηκα), ταῖον (ταῖειον), τεκνίον (and many diminutives
in –ίον which lose their force), παιδάριον (and many diminutives in –άριον),
φυσιάσαι (φυσάσαι), etc.

Words (old and new) receive new meanings, as ἀνακλίνω (‘recline at table’). Cf.
also ἀναπίπτω, ἀνάκειμαι, ἀντιλέγω (‘speak against’), ἀποκριθῆναι (passive not
middle, ‘to answer’), δαιμόνιον (‘evil spirit,’ ‘demon’), δῶμα (‘house-top’), ἔρωτάω
(‘beg’), εὐχαριστέω (‘thank’), ἐπιστέλλω (‘write a letter’), ὄψαριον (‘fish’), ὄψων
(‘fishes’), παρακολύω (‘entreat’), παρησία (‘confidence’), περισπάο (‘distract’),
παιδεύω (‘chastise’), πτῶμα (‘corpse’), συγκρίνω (‘compare’), σχολή (‘school’),
φθάνω (‘come’), χορτάζω (‘nourish’), χρηματίζω (‘be called’).1 This is all perfectly
natural. Only we are to remember that the difference between the koiv vocabulary
and the Attic literature is not the true standard. The vernacular koiv must be
compared with the Attic vernacular as seen in the inscriptions and to a large extent in
a writer like Aristophanes and the comic poets. Many words common in
Aristophanes, taboo to the great Attic writers, reappear in the koiv. They were in the
vernacular all the time.2 Moulton3 remarks that the vernacular changed very little

from the first century A.D. to the third. “The papyri show throughout the marks of a
real language of daily life, unspoilt by the blundering bookishness which makes the
later documents so irritating.” It is just in the first century A.D. that the κοινή comes to
its full glory as a world-language. “The fact remains that in the period which gave
birth to Christianity there was an international language” (Deissmann, *Light from the
Ancient East*, p. 59). It is not claimed that all the points as to the origin of the κοινή
are now clear. See Hesseling, *De koine en de oude dialekten van Griekenland*
(1906). But enough is known to give an intelligible idea of this language that has
played so great a part in the history of man.

(e) PROVINCIAL INFLUENCES. For all practical purposes the Greek dialects were
fused into one common tongue largely as a result of Alexander’s conquests. The
Germanic dialects have gone farther and farther apart (German, Dutch, Swedish,
Norwegian, Danish, English), for no great conqueror has arisen to bind them into one. The language follows the history of the people. But the unification of
the Greek was finally so radical that “the old dialects to-day are merged into the
general mass, the modern folk-language is only a continuation of the united,
Hellenistic, common speech.”¹ So completely did Alexander do his work that the
balance of culture definitely shifted from Athens to the East, to Pergamum, to Tarsus,
to Antioch, to Alexandria.² This “union of oriental and occidental was attempted in
every city of Western Asia. That is the most remarkable and interesting feature of
Hellenistic history in the Graeco-Asiatic kingdoms and cities.”³ Prof. Ramsay adds:
“In Tarsus the Greek qualities and powers were used and guided by a society which
was, on the whole, more Asiatic in character.” There were thus non-Greek influences
which also entered into the common Greek life and language in various parts of the

empire. Cf. K. Holl, “Das Fortleben der Volkssprachen in nachchristlicher Zeit” (Hermes, 1908, 43, p. 240). These non-Greek influences were especially noticeable in Pergamum, Tarsus and Alexandria, though perceptible at other points also. But in the case of Phrygia long before Alexander’s conquest there had been direct contact with the Arcadian and the Æolic dialects through immigration. The Greek inscriptions in the Hellenistic time were first in the old dialect of Phrygia, then gliding into the κοινή, then finally the pure κοινή. Hence the κοινή won an easy victory in Pergamum, but the door for Phrygian influence was also wide open. Thus, though the κοινή rests on the foundation of the Greek dialects, some non-Greek elements were intermingled. Dieterich indeed gives a special list of peculiarities that belong to the κοινή of Asia Minor, as, for instance, –αν instead of –α in the accus. sing. of 3d decl., proper names in ὁς, τις for δΣτις, ἐμα for ἐμι, use of θέλω rather than future tense. In the case of Tarsus “a few traces of the Doric dialect may perhaps have lingered” in the κοινή, as Ramsay suggests (Expositor, 1906, p. 31), who also thinks that ναοκόρος for νεωκόρος in Ac. 19:35 in D may thus be explained.

But no hard and fast distinction can be drawn, as –αν for –ν as accusative appears in Egypt also, e.g. in θυγατέραν. Is it proper to speak of an Alexandrian dialect? Blass says so, agreeing with Winer-Schmiedel (ἡ Ἀλεξανδρεών διάλεκτος). This is the old view, but we can hardly give the name dialect to the Egyptian Greek. Kennedy says: “In all probability the language of the Egyptian capital had no more

3 Sour. of N. T. Gk., 1895, p. 23. Irenæus (Minucius Pacatus) and Demetrius Ixion wrote treatises on “the dialect of Alexandria” (Swete, Intr. to the O. T. in Gk., p. 289). But they probably did not understand that the vernacular κοινή, which differed from
right to be called a dialect than the vernacular of any other great centre of population.” Schweizer\(^4\) likewise refuses to consider the Alexandrian \(\kappaοινή\) as a dialect. Dieterich\(^5\) again gives a list of Egyptian peculiarities such as \(\alpha\) instead of \(\alphaί\), \(\alpha\) instead of \(\alphaς\) in nominatives of third declension, adjectives in \(\eta\) instead of \(\alpha\), \(\varepsilon\varepsilonο\u03b1\u03f4\) for \(\varepsilon\varepsilonο\u03b1\u03f4\), \(\kappaαθεπί\) for \(\varepsilonκκοστος\), imperfect and aorist in \(\alpha\), \(\varepsilonμην\) for \(\varepsilonμην\), disuse of augment in simple verbs, indicative instead of the subjunctive. Mayser (\textit{Gr. d. griech. Pap.}, pp. 35–40) gives a list of “Egyptian words” found in the Ptolemaic papyri. They are words of the soil, like \(\piάμπιρος\) itself. But Thumb\(^6\) shows that the majority of the so-called

the literary \(\kappaοινή\), was international (Thackeray, \textit{Gr. of the O. T. in Gk.}, vol. I, p. 19). “It is certain that many forms of this later language were specially \textit{characteristic} of Alexandria” (ib.).

\textit{Thumb}

\textit{———}, \textit{Die griech. Sprache im Zeitalter des Hellenismus} (1901).

Alexandrian peculiarities were general in the κοινή like ἕλθοσαν, εἶχαν, γέγοναν, ἐῳράκες, etc. “There was indeed a certain unwieldiness and capriciousness about their language, which displays itself especially in harsh and fantastic word-composition.” As examples of their words may be mentioned κατανωτιζόµενος, παρασυγγράφειν, φιλανθρωπεῖν, etc. It is to be observed also that the κοινή was not the vernacular of all the peoples when it was spoken as a secondary language. In Palestine, for instance, Aramaic was [Page 69] the usual language of the people who could also, most of them, speak Greek. Moulton’s parallel of the variations in modern English is not therefore true, unless you include also peoples like the Welsh, Scotch, Irish, etc.

But as a whole the vernacular κοινή was a single language with only natural variations like that in the English of various parts of the United States or England.¹ Thumb perhaps makes too much of a point out of the use of ἐµός rather than µου in Asia Minor in its bearing on the authorship of the Gospel of John where it occurs 41 times, once only in 3 Jo. and Rev. (34 times elsewhere in the N. T.), though it is interesting to note, as he does, that the infinitive is still used in Pontus. But there were non-Greek influences here and there over the empire as Thumb² well shows. Thumb³ indeed holds that “the Alexandrian popular speech is only one member of a great speech-development.”

(f) THE PERSONAL EQUATION. In the vernacular κοινή, as in the literary language, many variations are due to differences in education and personal idiosyncrasies. “The colloquial language in its turn went off into various shades of distinction according to the refinement of the speaker” (Deissmann, Light from the Ancient East, p. 59). The inscriptions on the whole give us a more formal speech, sometimes official decrees, while the papyri furnish a much wider variety. “The papyri show us the dialect of Greek Egypt in many forms,—the language of the Government official, of the educated private person, of the dwellers in the temples, of the peasantry in the villages.”⁴ We have numerous examples of the papyri through both the Ptolemaic and the Roman rule in Egypt. All sorts of men from the farm to the palace are here found writing all sorts of documents, a will or a receipt, a love-letter [Page 70] or a dun, a memorandum or a census report, a private letter or a public epistle. “Private letters are

quae vulgo appellatur dialectum Alexandrinam solis vindicandam esse Alexandrinis.”

Cf. Susemihl, Lit. der Alexandrinerzeit.

¹ Sir Jonathan Williams, an Eng. savant, is quoted in the Louisville Courier-Journal (May 9, 1906) as saying: “I have found in the city of Louisville a pronunciation and a use of terms which is nearer, to my mind, to Addison and the English classicists than anything which the counties of England, the provinces of Australia, or the moors of Scotland can offer.” He added that the purest English known to him is spoken in Edinburgh and Louisville. These two cities, for geographical reasons, are not provincial.

² Griech. Spr. etc., pp. 102–161; Theol. Literaturzeit., 1903, p. 421; cf. also Moulton, Prol. p. 40. Moulton sets over against ἐµός the fact that John’s Gospel uses ἶνα rather than the infinitive so often. Much of the force of such an argument vanishes also under the personal equation.

³ Griech. Spr. etc., p. 171. Cf. also Zahn, Einleitung in das N. T., I, 38.

our most valuable sources; and they are all the better for the immense differences that betray themselves in the education of the writers. The well-worn epistolary formulæ show variety mostly in their spelling; and their value for the student lies primarily in their remarkable resemblances to the conventional phraseology which even the N. T. letter-writers were content to use. 1 Deissmann 2 has insisted on a sharp distinction between letters and epistles, the letter being private and instinct with life, the epistles being written for the public eye, an open letter, a literary letter. This is a just distinction. A real letter that has become literature is different from an epistle written as literature. In the papyri therefore we find all grades of culture and of illiteracy, as one would to-day if one rummaged in the rubbish-heaps of our great cities. One need not be surprised at seeing τὸν μήτρως, τὸν θέσων, and even worse blunders. As a sample Jannaris 3 gives ἁξιωθεὶς ὑπαρατῶς γράμμα μὲ εἰδότων, for ἁξιωθεὶς ὑπ αὐτῶν γράμμα μή εἰδότων. Part of these are crass errors, part are due to identity of sounds in pronunciation, as ο and ω, ει and η, ει and ι. Witkowski 4 properly insists that we take note of the man and the character of work in each case.

It is obvious that by the papyri and the inscriptions we gain a truer picture of the situation. As a specimen of the vernacular κοινή of Egypt this letter of the school-boy Theon to his father has keen interest (see O. P. 119). It belongs to the second century A.D. and has a boy’s mistakes as well as a boy’s spirit. The writing is uncial. [Page 71]

Θέων Θέωνι τῷ πατρί χαίρειν.

1 Moulton, Prol., p. 27 f.
4 The papyri contain “exempla ex vita deprompta, cum sermo scriptorum ut solutae ita poeticae orationis nullo modo veram nobis imaginem sermonis illius aetatis praebet. Etenim sermo, quem apud auctores hellinisticos comprehendimus, arti, non vitae, debetur.” Witkowski Prodr. gr. pap. Graec., etc., 1898, p. 197. He urges that in case of variations in forms or syntax one must inquire “utrum ab alia qua dialecto petita sit an in Aegypto nata, utrum ab homine Graeco an barbaro formata.” Ib., p. 198. He thinks it is necessary that we have “librum de sermone papyrorum, librum de sermone titulorum, librum de sermone auctorum poeticae et pedestris orationis illius aetatis, librum de dialecto Macedonica tractantem.” Ib.

Milligan (Greek Papyri, p. xxxii) admits that there may be now a temptation “to 
exaggerate the significance of the papyri.” But surely his book has a wonderful human, not to say linguistic, interest. Take this extract from a letter of Hilarion to his 
wife Alis (P. Oxy. 744 B.C. 1): Ἐὰν πολλαπλασσεὶς τέκνης, Ἐὰν ἴν ἄρσενον, ἄφες, Ἐὰν ἴν θήλεα, ἔκβιλε.

Milligan

MILLIGAN, G., The Greek Papyri with Special Reference to their Value for N. T. 
Study (1912).

———, The N. T. Documents (1913).
Résumé. To all intents and purposes the vernacular κοινή is the later vernacular Attic with normal development under historical environment created by Alexander’s conquests. On this base then were deposited varied influences from the other dialects, but not enough to change the essential Attic character of the language. There is one κοινή everywhere (cf. Thumb, Griech. Spr., p. 200). The literary κοινή was homogeneous, while the vernacular κοινή was practically so in spite of local variations (cf. Angus, The Κοινῆ “The Language of the N. T.,” Prince. Theol. Rev., Jan., 1910, p. 78 f.). In remote districts the language would be Doric-coloured or Ionic-coloured.

Phonetics and Orthography. It is in pronunciation that the most serious differences appear in the κοινή (Moulton, Prol., p. 5). We do not know certainly how the ancient Attic was pronounced, though we can approximate it. The modern Greek vernacular pronunciation is known. The κοινή stands along the path of progress, precisely where it is hard to tell. But we know enough [Page 72] not to insist too strongly on “hair-splitting differences hinging on forms which for the scribe of our uncials had identical value phonetically, e.g. ϑ, η, ι, υ, τ=Di in feet, or αι=ε” (Angus, op. cit., p. 79). Besides itacisms the ι-monophthongizing is to be noticed and the equalizing of ο and ω. The Attic ττ is σσ except in a few instances (like ἐλάττων, κρείττων). The tendency is toward deaspiration except in a few cases where the reverse is true as a result of analogy (or a lost digamma). Cf. ἔστιν ἔλπις. Elision is not so common as in the Attic, but assimilation is carried still further (cf. ἔμμεσθο). There is less care for rhythm in general, and the variable final consonants ν and ς appear constantly before consonants. The use of –ει– for –ιει– in forms like πεῖν and ταµεῖον probably comes by analogy. Οὐθείς and μηθείς are the common forms till 100 B.C. when οὐδείς and μηδείς begin to regain their ascendancy.

Vocabulary. The words from the town-life (the stage, the market-place) come to the front. The vocabulary of Aristophanes is in point. There was an increase in the number of diminutive forms. The κοινή was not averse to foreign elements if they were useful. Xenophon is a good illustration of the preparation for the κοινή. Cf. Radermacher, N. T. Gr., p. 8.

Word-Formation. There is the natural dropping of some old suffixes and the coining of new suffixes, some of which appear in the modern Greek vernacular. The number of compound words by juxtaposition is greatly increased, like πληροφορέω.

Angus

χειρό-γραφον. In particular two prepositions in compounds are frequent, like συν-
αντι-λαμβάνομαι. New meanings are given to old words.

**Accidence.** In substantives the Ionic –ρης, not –ρας, is common, bringing nouns in
–ρα into harmony with other nouns of the first declension (Thackeray, *Gr. of the O. T.
become masculine. The third declension is occasionally assimilated to the first in
forms like νόκταν, θυγατέραν. Contraction is absent sometimes in forms like ὃρῶν.
Both χάριν and χάριτα occur. Adjectives have forms like ἀσφαλῆ, πλήρης
indeclinable, πᾶν for πάντα (cf. μέγαν), δόσι for δοῦν. The dual, in fact, has
appeared in all inflections and conjugations. Pronouns show the disappearance of
the dual forms like ἐκάτερος and πότερος. Τίς is used sometimes like δεστις, and ὃς
ἐὰν is more frequent than ὃς ἔν about A.D. 1. Analogy plays a big part in the
language, and this is proof of life. In the verb there is a general tendency toward
simplification, the two conjugations blending into one (μι verbs going). [Page 73]

New presents like ἀποκτέννω, ὀπτάνω, are formed. There is confusion in the use of
–άω and –έω verbs. We find γίνομαι, γινώσκω. The increase of the use of first aorist
forms like ἔσχα (cf. εἶπον and εἶπα in the older Greek). This first aorist termination
appears even in the imperfect as in ἔχα. The use of –οσαν (ἐχοσαν, ἔχοσαν) for –ον
in the third plural is occasionally noticeable. The form –αν (δέδωκαν) for –ασι may be
due to analogy of this same first aorist. There is frequent absence of the syllabic
augment in the past perfect, while in compound verbs it is sometimes doubled like
ἀπεκατέστησαν. The temporal augment is often absent, especially with diphthongs.

We have –τοσαν rather than –ντων, –σθωσαν rather than –σθων.

**Syntax.** There is in general an absence of many Attic refinements. Simplicity is
much more in evidence. This is seen in the shorter sentences and the paratactic
constructions rather than the more complex hypotactic idioms. The sparing use of
particles is noticeable. There is no effort at rhetorical embellishment. What is called
“Asianism” is the bombastic rhetoric of the artificial orators. Atticism aims to
reproduce the classic idiom. The vernacular κοινή is utterly free from this vice of
Asianism and Atticism. Thackeray (op. cit., p. 23) notes that “in the breach of the
rules of concord is seen the widest deviation from classical orthodoxy.” This varies a
great deal in different writers as the papyri amply testify. The nominativus pendens
is much in evidence. The variations in case, gender and number of substantives,
adjectives and verbs are frequent κατά σύνεσιν. The neuter plural is used with either a
singular or plural verb. The comparative does duty often for the superlative adjective.
The superlative form usually has the elative sense. Πρῶτος is common (as sometimes
in older Greek) when only two are compared. Ἐαυτῶν occurs for all three persons.
The accusative is regaining its old ascendency. There is an increase in the use of the
accusatives with verbs and much freedom in the use of transitive and intransitive

Thackeray

Orthography and Accidence (1909).

———, Relation of St. Paul to Contemporary Thought (1900).
verbs. The growth in the use of prepositions is very marked both with nouns and in composition, though some of the old prepositions are disappearing. Few prepositions occur with more than two cases. Phrases like βλέπω ἀπό show a departure from the old idiom. New adverbial and prepositional phrases are coming into use. The cases with prepositions are changing. The instrumental use of ἐν is common. The optative is disappearing. The future participle is less frequent. The infinitive (outside of τοῦ, ἐν τῷ, εἰς τὸ and the inf.) is receding before [Page 74] ἔνα, which is extending its use very greatly. There is a wider use of ὅτι. Everywhere it is the language of life and not of the books. The N. T. use of expressions like εἰς τὸ ὅνομα, δόο δῶο, once cited as Hebraisms, is finding illustration in the papyri (cf. Deissmann, _Light_, etc., p. 123 f.). Μὴ begins to encroach on οὐ, especially with infinitives and participles. The periphrastic conjugation is frequently employed. The non-final use of ἵνα is quite marked. Direct discourse is more frequent than indirect. Clearness is more desired than elegance. It is the language of nature, not of the schools.

V. The Adaptability of the Κοινὴ to the Roman World. It is worth while to make this point for the benefit of those who may wonder why the literary Attic could not have retained its supremacy in the Græco-Roman world. That was impossible. The very victory of the Greek spirit made necessary a modern common dialect. Colonial and foreign influences were inevitable and the old classical culture could not be assimilated by the Jews and Persians, Syrians, Romans, Ethiopians. “In this way a Panhellenic Greek sprang up, which, while always preserving all its main features of Attic grammar and vocabulary, adopted many colonial and foreign elements and moreover began to proceed in a more analytical spirit and on a simplified grammar.”1 The old literary Attic could not have held its own against the Latin, for the Romans lamented that they were Hellenized by the Greeks after conquering them.2 Spenserian English would be an affectation to-day. The tremendous vitality of the Greek is seen precisely in its power to adjust itself to new conditions even to the present time. The failure of the Latin to do this not only made it give way before the Greek, but, after Latin became the speech of the Western world during the Byzantine period, the vernacular Latin broke up into various separate tongues, the modern Romance languages. The conclusion is irresistible therefore that the κοινὴ possessed wonderful adaptability to the manifold needs of the Roman world.3 It was the international language. Nor must one think that it was an ignorant age. What we call the “Dark Ages” came long afterwards. “Let me further insist that this civilization was so perfect that, as far as it reached, men were [Page 75] more cultivated in the strict sense than they ever have been since. We have discovered new forces in nature; we have made new inventions; but we have changed in no way the methods of thinking laid down by the Greeks…The Hellenistic world was more cultivated in argument than we are nowadays.”1 Moulton2 cannot refrain from calling attention to the remarkable fact that

2 Cf. Sharp, Epictetus and the N. T. (1914), for useful comparison of language and thought of Epictetus and the N. T.
1 Mahaffy, Prog. of Hellen. in Alex. Emp., 1905, p. 137. He adds (p. 111): “The work of Alexandria was a permanent education to the whole Greek-speaking world; and we know that in due time Pergamum began to do similar work.”
the new religion that was to master the world began its career at the very time when the Mediterranean world had one ruler and one language. On the whole it was the best language possible for the Graeco-Roman world of the first century A.D.

CHAPTER IV

THE PLACE OF THE NEW TESTAMENT IN THE KOINH

I. The New Testament Chiefly in the Vernacular Koine. Observe "chiefly," for not quite all the N. T. is wholly in the vernacular koine as will be shown. But the new point, now obvious to every one, is just this, that the N. T. is in the normal koine of the period. That is what one would have looked for, when you come to think of it. And yet that is a recent discovery, for the Purists held that the N. T. was in pure Attic, while the Hebraists explained every peculiarity as a Hebraism. The Purists felt that revelation could only come in the "best" Greek, and hence it had to be in the Attic. This, as we now know, could only have been true if the N. T. writers had been Atticistic and artificial stylists. So the Hebraists got the better of the argument and then overdid it. The most popular language in the N. T. is found in the Synoptic Gospels. Even Luke preserves the words of Jesus in colloquial form. The Epistle of James and the Johannine writings reflect the vernacular style very distinctly. We see this also in the Epistles of Peter (Second Peter is very colloquial) and Jude. The colloquial tone is less manifest in Acts, some of Paul's Epistles and Hebrews. Cf. Deissmann, Light from the Ancient East, p. 63 f. Wellhausen (Einl., p. 9) stresses the fact that in the Gospels the Greek spoken by the people makes its entry into literature.2

(a) Not a Biblical Greek. As late as 1893 Viteau3 says: "Le grec du N. T. est une variété du grec hébraïant." Again: "C’est par le grec des LXX qu’il faudrait expliquer, le plus souvent, le grec du N. T.« Viteau is aware of the inscriptions and the papyri and even says: "The Greek of the N. T. must be compared continually with the post-classical Greek in its various branches: with the Greek of the profane writers,

---

2 Prol., p. 6. See also Breed, Prep. of the World for Chr., 1904, ch. IX, The Hellenizing of the Nations, and ch. XI, The Unification of the World. Jannaris (op. cit., p. 8) indeed puts the LXX, N. T. and many pap. into "the Levantine group" of the literary language, but this is a wrong assignment for both the LXX and the N. T.

1 Cf. Deissmann, Light, pp. 55, 69.

the Greek of the inscriptions [Page 77] of the Alexandrian and Græco-Roman periods, the Hebraizing Greek, finally the Christian Greek.”¹ But he labours under Hatch’s false idea of a distinct biblical Greek of which the N. T. is a variety; both of these ideas are erroneous. There is no distinct biblical Greek, and the N. T. is not a variety of the LXX Greek. Jowett² over forty years ago said: “There seem to be reasons for doubting whether any considerable light can be thrown on the N. T. from inquiry into language.” That prophecy is now almost amusing in the light of modern research. Simcox³ admitted that “the half-Hebraized Greek of the N. T. is neither a very elegant nor a very expressive language,” but he found consolation in the idea that “it is a many-sided language, an eminently translatable language.” Dr. Hatch⁴ felt a reaction against the modern Atticistic attitude toward the N. T. language: “In almost every lexicon, grammar and commentary the words and idioms of the N. T. are explained, not indeed exclusively, but chiefly, by a reference to the words and idioms of Attic historians and philosophers.” In this protest he was partly right, but he went too far when he insisted that⁵ “biblical Greek is thus a language which stands by itself. What we have to find in studying it is what meaning certain Greek words conveyed to a Semitic mind.”

Dr. Hatch’s error arose from his failure to apply the Greek influence in Palestine to the language of Christianity as he had done to Christian study. Judea was not an oasis in the desert, but was merged into the Græco-Roman world. Rothe⁶ had spoken “of a language of the Holy Ghost. For in the Bible it is evident that the Holy Spirit has been at work, moulding for itself a distinctively religious mode of expression out of the language of the country.” Cremer,⁷ in quoting the above, says: “We have a very clear and striking proof of this in N. T. Greek.” Winer⁸ had indeed seen that “the

Winer
grammatical character of the N. T. language has a very slight Hebrew colouring,” but exactly how slight he could not tell. Winer felt that N. T. Greek was “a species of a species,” “a variety of later Greek,” in a word, a sort of dialect. In this he was wrong, but his notion (op. cit., p. 3) that a grammar of the N. T. should thus presuppose a grammar of the later Greek or κοινή is quite right, only we have no such grammar even yet. Winer made little use of the papyri and inscriptions (p. 21 ft. n.). We still sigh for a grammar of the κοινή, though Thumb has related the κοινή to the Greek language as a whole. Kennedy contended that there was “some general characteristic” about the LXX and N. T. books, which distinctly marked them off from the other Greek books; but “they are both children of the same parent, namely, the colloquial Greek of the time. This is the secret of their striking resemblance.” Even in the Hastings’ Dictionary Thayer contends for the name “Hellenistic Greek” as the proper term for N. T. Greek. That is better than “biblical” or “Jewish” Greek, etc. But in simple truth we had better just call it N. T. Greek, or the Greek of the N. T., and let it go at that. It is the Greek of a group of books on a common theme, as we would speak of the Greek of the Attic orators, the Platonic Greek, etc. It is not a peculiar type of Greek except so far as that is due to the historical conditions, the message of Christianity, and the peculiarities of the writers. Deissmann, however, is the man who has proven from the papyri and inscriptions that the N. T. Greek is not a separate variety of the Greek language. He denies that the N. T. is like the LXX Greek, which was “a written Semitic-Greek which no one ever spoke, far less used for literary purposes, either before or after.” Blass at first stood out against this view and held that “the N. T. books form a special group—one to be primarily explained by study,” but in his Grammar of N. T. Greek he changed his mind and admitted that “a grammar of the popular language of that period written on the basis of all these various authorities and remains” was better than limiting oneself “to the language of the N. T.” So Moulton concludes: “The disappearance of that word ‘Hebraic’ from its prominent place in our delineation of N. T. language marks a change in our conceptions of the subject nothing less than revolutionary.” The new knowledge of the κοινή has buried forever the old controversy between Purists and Hebraists. The men who wrote the N. T. were not aloof from the life of their time. “It embodied the lofty conceptions of the Hebrew and Christian faith in a language which

brought them home to men’s business and bosoms.”¹ Wackernagel understates the matter: “As little as the LXX does the N. T. need to be isolated linguistically.”²

(b) Proof that N. T. Greek is in the vernacular Κοινή. The proof is now at hand. We have it in the numerous contemporary Greek inscriptions already published and in the ever-increasing volumes of papyri, many of which are also contemporary. As early as 1887 a start had already been made in using the inscriptions to explain the N. T. by E. L. Hicks.³ He was followed by W. M. Ramsay,⁴ but it is Deissmann who has given us most of the proof that we now possess, and he has been ably seconded by J. Hope Moulton. Deissmann⁵ indeed insists: “If we are ever in this matter to reach

certainty at all, then it is the inscriptions and the papyri which will give us the nearest approximation to the truth.” Hear Deissmann more at length: “Until the papyri were discovered there were practically no other contemporary documents to illustrate that phase of the Greek language which comes before us in the LXX and N. T. In those writings, broadly, what we have, both as regards vocabulary and morphology, and not seldom as regards syntax as well, is the Greek of ordinary intercourse as spoken in the countries bordering on the Mediterranean, not the artificial Greek of the rhetoricians and litterateurs, strictly bound as it was by technical rules. This language of ordinary life, this cosmopolitan Greek, shows unmistakable traces of a process of development that was still going on, and in many respects differs from the older dialects as from the classical [Page 80] Attic.” As Moulton puts it, “the Holy Ghost spoke absolutely in the language of the people.”

The evidence that the N. T. Greek is in the vernacular κοινή is partly lexical and partly grammatical, though in the nature of the case chiefly lexical. The evidence is constantly growing. See Deissmann, Bible Studies, Light from the Ancient East; Moulton and Milligan’s “Lexical Notes on the Papyri” (The Expositor, 1908—). We give first some examples of words, previously supposed to be purely “biblical,” now shown to be merely popular Greek because of their presence in the papyri or inscriptions: ἀγάπη, ἀκατέργαστος, ὄνυξ, ἀναστάτω, ἀντιλημπτω, ἄλλογενής, ἀφιλάγνυρος, αὐθεντεύ, βροχή, ἕναντι, ἑνδιδύσκω, ἑνώπιον, ἑπικατάρατος, ἑπισυναγωγή, εὐάρεστος, εὔπροσωπέω, ἱερατεύω, ἱματίζω, κατακράται, καταγγελεύς, κατήγωρ, καθαρίζω, κόκκινος, κυριακός, λειτουργικός, λογεία, νέωσος, οἰκεῖα, παραβολεύο, παρασκαρέρησις, προσκαρτέρησις, προσωπική, προσωπική, πρωτότοκος, πρωτότοκος, σπευδάτος, συναντιλαβάνομαι, φιλοπρωτεύω, φρεναπάτης, etc. For a lively discussion of these words see Deissmann (Bible Studies, pp. 198–247; Light, etc., pp. 69–107). The recovery of the inscription on the marble slab that warned the gentiles from the ἱερόν is very impressive. Μηθένα ἄλλογον ἐσπερεισεθαί ἐντός τοῦ περὶ τὸ ἱερὸν τρυφάκτου καὶ περιβόλου. δὲ δὲ ὁ ληφθέ, ἐπειδὴ αἵτις ἦσσα διὰ τὸ ἐξακολουθηθέν θάνατον. The words above are no longer biblical ἄπαξ λεγόμενα. But this is not all. Many words which were thought to

5 B. S., p. 81. Deissmann calls attention also to a booklet by Walch, Observ. in Matthæum ex graecis inscr., 1779. So in 1850, Robinson in the Pref. to his N. T. Lex. says: “It was, therefore, the spoken language of common life, and not that of books, with which they became acquainted”; cf. also the works of Schweizer, Nachmanson, Dittenberger, etc.
6 Encyc. Bibli., art. Papyri. “At the time when the ancient Greek culture was in conflict with Christianity, the assailants pointed sarcastically at the boatman’s idiom of the N. T., while the defenders, glorying in the taunt, made this very homeliness their boast. Latin apologists were the first to make the hopeless attempt to prove that the literary form of the Bible as a whole, and of the N. T. in particular, was artistically perfect.” Deissmann, Exp. Times, Nov., 1906, p. 59; cf. also Norden, Kunstpr., II, pp. 512 f., 526 f.
I Prol., p. 5.
have a peculiar meaning in the LXX or the N. T. have been found in that very sense in the inscriptions or papyri, such as ἀδελφός in the sense of ‘common brotherhood,’ ἀθέτης, ἠμετανόης, ἡμιώνεται, ἀναστρέφομαι, ἀναφέρομαι, ἀντίλυμης, ἀπέχω, ἀπόκριμα, ἀποτάσσομαι, ὄρετή, ὄρκετός, Ἀσιάρχης, ἄσημος, ἄσπαζομαι, ἄτοπος, βαστάζω, βεβαιώσεις, βιάζομαι, βούλομαι, γένεια, γογγαματεύς, γράφω, δεινόν, δεόν ἐστι, διαβάλλω, διασειώ, δικαίος, διότι = ὅτι, διηομέω, δόκιμος, δόκιμος, ὁδόμαι, ἐκ = ἐν, εἰ μὴν, εἴδος, εἰς, ἔκτενεια, ἔκτος, ἐκτινάσσω, ἐν, ἐνεδρεῖον, ἐνοχος, ἐντυγχάνω, ἐπιβαλόν, ἐπίσκοπος, ἐρωτάω, εὐσήμηνον, ἔπιοσίς, εὐχαριστεῖ, ἔξος, ἠγούμαι, ἠλίκια, ἠσθία, θεμέλιον, θεωρέω, ἱδίος, ἱλαστήριον, ἴλεος, ἱστορέω, καθαρίζω, καθαρός, καινός, κακοπάθεια, κατά, κατάκριμα, καταντάω, κλίνη, κολάζωμαι, κολλάω, κολαφίζω, κόπος, κοράσιον, κτάμαι, κύριος, λικμάω, λίγον, λυόμαι, λευκόν, λάρυγμα, μειωτέρος, μικρός, μοιάλλος, μονή, ναῦς, νεκροί, νή, νομός, οἰκία, ὄμολογέα, ὄνομα, ὄψινων, παρά, παράδεισος, παραθήκη, παρακάπτω, παρεισφέρω, πάρεισις, πάροικος, παροξύνωμαι, πατροπαράδοτος, περιστάμω, περιτέμω, πέριχος, πλεονεκτέω, πλήθος, πλησοφόρω, πράγμα, [Page 81] πράκτωρ, πρεσβύτερος, πρόθεσις, προσέχω, προσκαρτερέω, προφήτης, σαρπός, σκύλλο, σκόλον, σωμαραγδόνος, σωματίαν, σπευδάτωρ, στάσις, στρατευμά, σφαργίζω, σφυρίς, συγγενής, συμβούλιον, συνείδησις, συνέχεια, συνειδοδοκεί, συνεφαρέγμα, συνιστήμα, σῶμα, σωτήρ, τήρησις, τόπος, ύδως, ύδως θεοῦ, ύλοθεία, ύποζυγίον, ύποποίον, ύπόπτασις, φάσις, φέρω, φθάνω, φίλος, φιλοστοργία, φιλοτιμεώμαι, χάραγμα, χάρις τῷ Θεῷ, χρεία, χρόνος, ψωμίων, ωψήν σώσαι. This seems like a very long list, but it will do more than pages of argument to convince the reader that the vocabulary of the N. T. is practically the same as that of the vernacular κοινή in the Roman Empire in the first century A.D. This is not a complete list, for new words will be added from time to time, and all that are known are not here included. Besides neither Deissmann nor Moulton has put together such a single list of words, and Kenyon’s in Hastings’ D. B. (Papyri) is very incomplete. After compiling this list of words I turned to the list in the Hastings’ Dictionary of the

1 It is not meant, of course, that the bulk of the N. T. words are new as compared with the old Gk. Far from it. Of the 4829 words in the N. T. (not including proper names) 3933 belong to older classic language (literary and vernac.) while 996 are late or foreign words. See Jacquier, Hist. des Livres du N. T., tome 1st, 1906, p. 25. Thayer’s Lex. claimed 767 N. T. words, but Thayer considered 89 as doubtful and 76 as late. Kennedy (Sour. of N. T. Gk., p. 62) found about 550 ‘biblical’ words. But now Deissmann admits only about 50, or one per cent. of the 5000 words in the N. T. (Light, etc., p. 72 f.). Findlay (Exp. Gk. T., 1 Cor., p. 748) gives 5594 Greek words in the N. T. (whole number), while Viteau (Syntaxe des Prop., p. xxx) gives 5420. Kenyon

Bible by Thayer (art. “Language of the N. T.”) where are found some thirty new words common to the N. T. and the vernacular κοινή, words not common in the classic Greek. Thayer’s list is entirely different save a half-dozen. In his list are comprised such interesting words as ἀλληγορέω, ἀντοφθαλμέω, ἄποκαραδοκία, δεισδιαμονία, ἐγχρίω, ἐγγίζω, ἐπιχορηγέω, εὐδοκέω, εὐκαίρεω, θριαμβεύω, etc. This list can be largely increased also by the comparison between words that are common to the N. T. and the comic poets (Aristophanes, Menander, etc.) who used the language of the people. See Kennedy’s lists in Sources of N. T. Greek (ch. VI). Many of these, as Kennedy shows, are theological terms, like αἰσθητήριον, ἄρραβὼν, βαττίζω, εὐχαριστία, κυρία, μυστήριον, φιλαδελφία. The Christians found in common use in the Roman Empire terms like ἄδελφος, ἐπιφάνεια, ἐπιφανής, κύριος, λειτουργία, παρουσία, πρεσβύτερος, προγράφω, σωτηρία, υἱός Θεοῦ. They took these words with the new popular connotation and gave them “the deeper and more spiritual [Page 82] sense with which the N. T. writings have made us familiar” (Milligan, Greek Papyri, p. xxx). They could even find τοῦ μεγάλου Θεοῦ εὐφρεγέτου καὶ σωτήρος (GH 15, ii/B.C.). Cf. Tit. 2:13; 2 Pet. 1:1.1 The papyri often show us how we have misunderstood a word. So ἄπογραφή (Lu. 2:2) is not “taxing,” but “enrolling” for the census (very common in the papyri). But this is not all, for the modern Greek vernacular will also augment the list of N. T. words known to belong to the oral speech. When this much is done, we are ready to admit the vernacular character of all the words not known to be otherwise. The N. T. Greek is like the κοινή also in using many compounded (“sesquipedalian”) words like ἄνεξεραύνητος, ἄλλοτριεπίσκοπος, ὑπερεντυχάνω, etc. There is also the same frequency of diminutives, some of which have lost that significance, as πλοιάριον, ὄταριον, ὄτιον, etc. The new meanings to old words are well illustrated in the list from the papyri, to which may be added ἄναλώσω, ἐντροπη, ζωοποιέω, σχολή, χορτάζω, etc.

As to the forms we need say less, but the evidence is to the same effect. The papyri show examples of ἀκόλοξο (and –ο) for genitive, διῳν and δοι, ἐγενάμην, ἔλαβα, ἔλεγας, ἔλεψα, ἠβάλα, ἠνιόγην, ἠπάγαν, ἠξα, ἠδοκέως, οἶς, ἠγαφέως, τιθέ, σπείρης; the imperative has only the long forms –τοσαν, –σθοσαν, etc. The various dialects are represented in the forms retained in the N. T., as the Attic in βούλει, διδώσαι, ἴμελλε, etc.; the Ionic in ἡμα, ἴμοι, ἴνωσι, etc.; the Doric in ἐφαντασία, ἠτω, etc.; the Αἰolic in ἄποκτένω, 3d plural in –ον, etc.; the Northwest Greek in accusative plural in –ες, perfect in –αν (3d plural), confusion of –ων and –εω verbs, etc.; the Arcadian-Cyprian group in accusative singular in –αν, ἄφεωνται (also). It is curious that Thayer in Hastings’ D. B., follows Winer’s error in giving ἐδίδοσαν as an example of a form like εἴχοσαν, for the present stem is διδ–, and σαν is merely the usual μ ending. See Mayser, Gr. d. griech. Pap., pp. 4–20.

Among the syntactical peculiarities of N. T. Greek which are less numerous, as in the κοινή, the following are worthy of note and are found in the κοινή: the non-final use of ἰδα; the frequent use of the personal pronoun; the decreased use of the possessive pronouns; disuse of the optative; increased use of δότ; disuse of the future participle; use of participle with ἐμί; article with the infinitive (especially with ἐν and εἰς); ὑφες and βλέπε with subjunctive without conjunction; the absence of the dual;
use of ὁφελον as conjunction; frequency of ἐὰν; ὅταν, etc., with indicative; interchange of ἐὰν and ἄν; μή increasing upon οὔ; decreased use of indirect discourse; ἐς τίς; disuse of some interrogative particles; use of ἰδίος as possessive pronoun; παρά and ὑπέρ with comparatives; disappearance of the superlative; frequency of prepositions; vivid use of present tense (and perfect); laxer use of particles; growth of the passive over the middle, etc.

Various phrases are common both to the N. T. and to the papyri, like δεξιὰν δίδω μι, ἐν τοῦ ἱπποῦ, εἰς τὸ διηνεκές, καθὼς γέγραπται, ἐκ συμφώνων, ἐπὶ τὸ αὐτό, κατὰ ἄναρ, κατὰ τὸ ἔθος, οὐχ ὁ τυχών, παρέχομαι ἐμαυτόν, τὸ αὐτὸ φρονεῖν. “There is placed before us in the N. T. neither a specific speech-form nor a barbaric Jewish-Greek, but a natural phase of the Hellenistic speech-development.” Deissmann (Exp. Times, 1906, p. 63) properly holds the N. T. to be the Book of Humanity because it “came from the unexhausted forces below, and not from the feeble, resigned culture of a worn-out upper class.” Swete (O. T. in Gk., pp. 295 ff.) shows how the LXX is influenced by the vernacular κοινή. As early as 1843 B. Hase (Wellhausen, Einl., p. 14) explained the LXX as “Volkssprache.” Thackeray (Grammar, pp. 22 ff.) gives a good summary of “the κοινή basis of LXX Greek.”

II. Literary Elements in the New Testament Greek. It is true then, as Blass sums it up, that “the language employed in the N. T. is, on the whole, such as was spoken in the lower circles of society, not such as was written in works of literature.” The N. T. writers were not Atticists with the artificial straining after the antique Attic idiom. But one must not imagine that they were mere purveyors of slang and

vulgarisms. Freudenthal\textsuperscript{3} speaks of the Hellenistic Jews as “one of those societies without a mother-tongue which have never attained to any true excellence in literature.” And even Mahaffy\textsuperscript{4} speaks of the Greek learned by the Jews as “the new and artificial idiom of the trading classes” which had neither “traditions nor literature nor those precious associations which give depth and poetry to words.” That is a curious mistake, for it was the Atticistic revival that was artificial. The κόινη had all the memories of a people’s life. Instance Robert Burns in Scotland. It is to be said for Mahaffy, however, that he changed his mind, for he later\textsuperscript{1} wrote: “They write a dialect simple and rude in comparison with Attic Greek; they use forms which shock the purists who examine for Cambridge scholarships. But did any men ever tell a great story with more simplicity, with more directness, with more power?…Believe me against all the pedants of the world, the dialect that tells such a story is no poor language, but the outcome of a great and a fruitful education.” The N. T. uses the language of the people, but with a dignity, restraint and pathos far beyond the trivial nonentities in much of the papyri remains. All the N. T. Greek is not so vernacular as parts of the LXX.\textsuperscript{2} The papyri often show the literary κόινη and all grades of variation, while the lengthy and official inscriptions\textsuperscript{3} “often approximate in style to the literary language.” Long before many words are used in literature they belong to the diction of polite speech.\textsuperscript{4} In a word, the N. T. Greek “occupies apparently an intermediate position between the vulgarisms of the populace and the studied style of the litterateurs of the period. It affords a striking illustration of the divine policy of

putting honour on what man calls ‘common.’”5 It would indeed have been strange if men like Paul, Luke and the author of Hebrews had shown no literary affinities at all. Prof. J. C. Robertson (The Classical Weekly, March 9, 1912, p. 139) in an article entitled “Reasons for Teaching the Greek N. T. in Colleges” says: “Take the parable of the Prodigal Son, for instance. In literary excellence this piece of narrative is unsurpassed. Nothing more simple, more direct, more forceful can be adduced from among the famous passages of classical Greek literature. It is a moving tragedy of [Page 85] reconciliation. Yet its literary excellence is not accidental. The elements of that excellence can be analyzed.” In an age of unusual culture one would look for some touch with that culture. “I contend, therefore, that the peculiar modernness, the high intellectual standard of Christianity as we find it in the N. T., is caused by its contact with Greek culture.”1 In his helpful article on N. T. Times Buhl2 underrates, as Schürer3 does, the amount of Greek known in Palestine. It is to be remembered also that great diversity of culture existed among the writers of the N. T. Besides, the educated men used much the same vernacular all over the Roman world and a grade of speech that approached the literary standard as in English to-day.4 One is not to stress Paul’s language in 1 Cor. 2:1–4 into a denial that he could use the literary style. It is rather a rejection of the bombastic rhetoric that the Corinthians liked and the rhetorical art that was so common from Thucydides to Chrysostom.5 It is with this comparison in mind that Origen (c. Celsus, vii, 59 f.) speaks of Paul’s literary inferiority. It is largely a matter of standpoint. Deissmann6 has done a good service in accenting the difference between letters and epistles. Personal letters not for the public eye are, of course, in the vernacular. Cicero’s Letters are epistles written with an eye on posterity. “In letters one does not look for treatises, still less for treatises in rigid uniformity and proportion of parts.”7 There may be several kinds of letters (private, family, pastoral or congregational, etc.). But when a letter is published

Robertson

2 Ext. vol. of Hast. D. B.
5 Simcox, Lang. of the N. T., p. 15.
6 B. S., pp. 16 ff. However, one must not think that the N. T. Epistles always fall wholly in one or the other category. Ramsay calls attention to the “new category” in the new conditions, viz., a general letter to a congregation (Let. to the Seven Chur., p. 24).
7 Ib., p. 11. See also Walter Lock, The Epistles, pp. 114 ff., in The Bible and Chr. Life, 1905.
consciously as literature, like Horace’s *Ars Poetica*, for instance, it becomes a literary letter or epistle. Epistles may be either genuine or unauthentic. The unauthentic may be either merely pseudonymous or real forgeries. If we examine the N. T. Letters or Epistles in the light of this distinction, we shall see that Philemon is a personal letter. The same is true of the Pastoral Epistles; but Ephesians is more like an epistle from its general nature. The Thessalonian, Corinthian, Galatian, Colossian, Philippian writings are all congregational and doctrinal letters. Romans partakes of the nature of a letter and an epistle. Jacquier, however (*Histoire des Livres du N. T.*, 1906, tome 1, p. 66), remarks that “The Pauline Epistles are often more discourse than letter.” It will thus be seen that I do not agree with Deissmann (*Bible Studies*, p. 3 f.) in calling all the Pauline writings “letters” as opposed to “epistles.” Milligan (*Greek Papyri*, p. xxxi) likewise protests against the sweeping statement of Deissmann. Deissmann gives a great variety of interesting letters from the papyri in his *Light from the Ancient East*, and argues here (pp. 224–234) with passion that even Romans is just “a long letter.” “I have no hesitation in maintaining the thesis that all the letters of Paul are real, non-literary letters.” Hebrews is more like an epistle, as are James, 1 John, 1 Peter, 2 Peter, Jude, while 2 and 3 John are again letters. The Letters to the Seven Churches again are epistles. This is a useful distinction and shows that the N. T. writers knew how to use one of the favourite literary methods of the Alexandrian period. Dr. Lock concludes: “Letters have more of historic and literary interest, epistles more of central teaching and practical guidance.” That Paul could use the more literary style is apparent from the address on Mars Hill, the speech before Agrippa, and Ephesians and Romans. Paul quotes Aratus, Menander and Epimenides and may have been acquainted with other Greek authors. He seems also to have understood Stoic philosophy. We cannot tell how extensive his literary training was. But he had a real Hellenic feeling and outlook. The introduction to Luke’s Gospel and the Acts show real literary skill. The Epistle to the Hebrews has oratorical flow and power with traces of Alexandrian culture. Viteau reminds us that about 3000 of the 5420 words in the Greek N. T. are found in ancient Attic writers, while the syntax in general “obeys the ordinary laws of Greek grammar.” These and other N. T. writers, as James, occasionally use classic forms like Ἰςμέν, Ἰστε, Ἰσάσι, Ἐξῆθαι, etc. König in his discussion of the Style of Scripture finds ample illustration in the N. T. of the various literary linguistic devices, though in varying degree. See “Figures of Speech” (ch. XXII). But the literary element in the N. T. is subordinate to the practical and is never artificial nor strained. We have the

1 Bible and Chr. Life, p. 117. For the history and literature of ancient letters and epistles see Deissmann, B. S.; Susemihl, Gesch. der griech. Lit.; Overbeck, Über die Anf. der patrist. Lit. The oldest known Gk. letter was written on a lead tablet and belongs to the iv/B.C. and comes from near Athens. It was discovered by Prof. Wünsch of Giessen. See art. by Dr. Wilhelm of Athens in Jahresh. des österreich. archäol. Inst. (1904, vii, pp. 94 ff.).

3 Le Verbe: Synt. des Prop., p. xxx.
1 W.-M., p. 37. Kennedy indeed (Sour. of N. T. Gk., p. 134) says that 80 per cent. of the N. T. words date from before 322 B.C.
language of spirit and life. The difference between the old point of view and the new is well illustrated by Hort’s remark (Notes on Orthography, p. 152 f.) when he speaks of “the popular Greek in which the N. T. is to a certain extent written.” He conceives of it as literary κοινή with some popular elements. The new and the true view is that the N. T. is written in the popular κοινή with some literary elements, especially in Luke, Paul, Hebrews and James.

Josephus is interesting as a background to the N. T. He wrote his War in Aramaic and secured the help of Greek writers to translate it, but the Antiquities was composed in Greek, probably with the aid of similar collaborateurs, for parts of Books XVII–XIX copy the style of Thucydides and are really Atticistic. It is interesting to take a portion of 1 Maccabees as we have it translated from the Hebrew original and compare it with the corresponding portion of Josephus. The Greek of 1 Macc. is, like the LXX, translation Greek and intensely Hebraistic, while Josephus smooths out all the Hebraistic wrinkles and shifts it into the rolling periods of Thucydides. The N. T. has slight affinities in vocabulary, besides Josephus, with Philo, Plutarch, Polybius, Strabo, Diodorus and a few other writers in the literary κοινή.

Deissmann (Light from the Ancient East, p. 64) holds that Paul’s “Greek never becomes literary.” “It is never disciplined, say, by the canon of the Atticists, never tuned to the Asian rhythm: [Page 88] it remains non-literary.” But has not Deissmann given a too special sense to “literary”? If 1 Cor. 13 and 15, Ro. 8 and Eph. 3 do not rise to literary flavour and nobility of thought and expression, I confess my ignorance of what literature is. Harnack (Das hohe Lied des Apostels Paulus von der Liebe und seine religionsgeschichtliche Bedeutung, 1911) speaks of the rhythm, the poetic form, the real oratory, the literary grace of 1 Cor. 13. The best literature is not artificial nor pedantic like the work of the Atticists and Asian stylists. That is a caricature of literature. We must not forget that Paul was a man of culture as well as a man of the people. Deissmann (Light, p. 64 f.) does admit the literary quality of Hebrews. This epistle is more ornate as Origen saw (Eus., Eccl. Hist., VI, XXV, 11).

III. The Semitic Influence. This is still the subject of keen controversy, though not in the same way that the Purists and the Hebraists debated it. Now the point is whether the N. T. Greek is wholly in the κοινή or whether there is an appreciable

4 Kennedy, Sour. of N. T. Gk., pp. 50 ff. Hoole, The Class. Elem. in the N. T., 1888, gives an interesting list of Gk. and Rom. proper names that occur in the N. T.

Harnack

Semitic colouring in addition. There is something to be said on both sides of the question.

(a) The Tradition. See I, (a), for proof of the error of this position. It is certain that the idea of a special Hebraic Greek for the N. T. is gone. Schaff1 said that the Greek spoken by the Grecian Jews “assumed a strongly Hebraizing character,” and the N. T. Greek shared in this “sacred and Hebraizing character.” According to Hatch2 “the great majority of N. T. words…express in their biblical use the conceptions of a Semitic race.” Viteau3 calls it “Hebraizing Greek,” while Simcox4 speaks of “the half-Hebraized Greek of the N. T.” Reuss5 calls it “the Jewish-Greek idiom.” Hadley6 considered the “Hellenistic dialect, largely intermixed with Semitic idioms.” Westcott7 spoke of “the Hebraic style more or less pervading the whole N. T.” But Westcott8 admitted that “a philosophical view of the N. T. language as a whole is yet to be desired,” as Hatch9 lamented that the N. T. Greek “has not yet attracted the attention of any considerable scholar.” That cannot now be said after the work of Blass, Deissmann, Moulton, Radermacher and others, and was an overstatement then. And yet the old view of “biblical Greek”[Page 89] for both N. T. and LXX is still championed by Conybeare and Stock in their grammar of the Septuagint (Selections from the Sept., 1905, p. 22 f.). They insist, against Deissmann, on the “linguistic unity” of the LXX and of the N. T. as opposed to the vernacular κοινή. They admit, of course, that the LXX is far more Hebraic than the N. T. This sturdy contention for the old view is interesting, to say the least. Wellhausen (Einl. in die drei ersten Evangelien) is rather disposed to accent the “Semiticisms” (Aramaisms) in the Synoptic Gospels in contrast with the Attic Greek. Nobody now claims the N. T. Greek to be Attic in purity. “No one denies the existence of Semiticisms; opinions are only divided with reference to the relative proportion of these Semiticisms” (Deissmann, Light from the Ancient East, p. 65). The old view is dead beyond recall.

(b) The View of Deissmann and Moulton. Over against the old conception stands out in sharp outline the view of Deissmann1 who says: “The linguistic unity of the Greek Bible appears only against the background of classical, not of contemporary ‘profane’ Greek.” Note the word “only.” Once more2: “The few Hebraizing expressions in those parts of the N. T. which were in Greek from the first are but an accident which does not essentially alter the fundamental character of its language.”

The portions of the Synoptic Gospels which were either in Aramaic or made use of Aramaic originals he considers on a par with the LXX. They use *translation* Greek. No one “ever really spoke as he may have translated the Logia-collection, blessed—and cramped—as he was by the timid consciousness of being permitted to convey the sacred words of the Son of God to the Greeks.”\(^3\) Thumb\(^4\) accepts the view of Deissmann and admits “Hebraisms in a few cases” only and then principally the meaning of words. In 1879 Guillemard\(^5\) disclaimed any idea of being able to give “an exhaustive exhibition of all the Hebraisms,” but he “put forward only a few specimens”! Moulton\(^6\) admits practically no Hebraisms nor Aramaisms outside of “translation Greek.” “Between these two extremes the N. T. writers lie; and of them all [Page 90] we may assert with some confidence that, where translation is not involved, we shall find hardly any Greek expression used which would sound strangely to speakers of the κοινή in Gentile lands.” Once more\(^7\): “What we can assert with assurance is that the papyri have finally destroyed the figment of a N. T. Greek which in any material respect differed from that spoken by ordinary people in daily life.” Moulton\(^8\) realizes “the danger of going too far” in summing up thus the issue of the long strife over N. T. Hebraisms. According to Moulton (p. 18) the matter is complicated only in Luke, who, though a gentile, used Aramaic sources in the opening chapters of the Gospel and Acts. This new and revolutionary view as to Semitisms is still challenged by Dalman\(^9\) who finds many more Aramaisms in the Synoptic Gospels than Moulton is willing to admit. Deissmann indeed is not disposed in his later writings to be dogmatic on the subject. “The last word has not yet been said about the proportion of Semiticisms” (*Expositor*, Jan., 1908, p. 67). He is

---

\(^3\) Ib., p. 76. “What would we give if we could recover but one papyrus book with a few leaves containing genuine Aramaic sayings of Jesus! For those few leaves we would, I think, part willingly with the theological output of a whole century” (Deissmann, Light, p. 57).

Guillemard

\(^5\) Hebraisms in the Gk. Test., Pref.

\(^6\) Prol., p. 10.

\(^7\) Prol., p. 18.

\(^8\) Ib., p. 18. He quotes approvingly Deissmann’s remark that “Semitisms which are in common use belong mostly to the technical language of religion” and they do not alter the scientific description of the language. Moulton (Interp., July, 1906, p. 380) says: “Suffice it to say that, except so far as the N. T. writers are quoting baldly literal translations from the LXX, or making equally literal translations from the Aramaic in which the Lord and His disciples usually spoke, we have no reason whatever to say that the N. T. was composed in a Greek distinguishable from that spoken all over the Roman Empire.”

Dalman

\(^9\) Wds. of Jes., 1902.
undoubtedly right in the idea that many so-called Semiticisms are really “international vulgarisms.” Schürer, _Theol. Literaturzeitung_, 1908, p. 555, criticizes Deissmann (_Licht vom Osten_, 1908, p. 35) for running the parallel too close between the N. T. and the unliterary papyri. It is truer of the LXX than of the N. T.

The old view cannot stand in the light of the papyri and inscriptions. Both the Purists and the Hebraists were wrong. Many words and idioms heretofore claimed as Hebraisms are shown to be current in the vernacular κοινή. As specimens one can mention ἐνώπιον (לִפְנֵי according to Winer-Lünemann, p. 201, and “biblical” according to Kennedy, _Sources of N. T. Greek_, p. 90) as found in the papyri; πρεσβύτερος in the official sense occurs in the papyri of Egypt in combinations like πρεσβύτεροι ἱερεῖς; ἔρωτάω=‘to beg’ is in the papyri; εἷς in sense of πρῶτος also; προσευχή can no longer be regarded as a word of Jewish formation for a Jewish place of prayer, since it appears in that sense in a Ptolemaic inscription in Lower Egypt in the III cent. b.c.; ὀνομα occurs also in the sense of “person”; expressions like ὦ καὶ θανάτου are found in the papyri; βλέπειν ἅπα occurs in a papyrus letter; εἷς ὄνομα is in inscriptions, ostraca, papyri; δύο δύο is matched in the papyri by τρία τρία (this idiom has been traced in Greek for 2500 years); the instrumental use of ἐν as ἐν μαχαίρῃ is common; the use of ἐν τῷ and the infinitive so common in Luke appears in the papyri; and even εἷς ἰσαντησίων meets us in the papyri (Tebt. Pap. 43, II cent. b.c.). Certainly a full list of the words and phrases that can no longer be called Hebraisms would be very formidable. Besides, the list grows continually under the researches of Deissmann, Moulton, Mayser, Thumb, Kälker, Witkowski, Milligan and other scholars. The presumption is now clearly against a Hebraism. The balance of evidence has gone over to the other side. But after all one has the conviction that the joy of new discovery has to some extent blurred the vision of Deissmann and Moulton to the remaining Hebraisms which do not indeed make Hebraic Greek or a peculiar dialect. But enough remain to be noticeable and appreciable. Some of these may vanish, like the rest, before the new knowledge. The LXX, though “translation Greek,” was translated into the vernacular of Alexandria, and one can but wonder if the LXX did not have some slight resultant influence upon the Alexandrian κοινή itself. The Jews were very numerous in Alexandria.

“Moreover, it remains to be considered how far the quasi-Semitic colloquialisms of the papyri are themselves due to the influence of the large Greek-speaking Jewish population of the Delta” (Swete, _The Apocalypse of St. John_, 1906, p. cxx). Thackeray (_Gr. of the O. T. in Gk.,_ vol. I, p. 20) uses the small number of Coptic words in the Greek papyri against the notion of Hebrew influence on the κοινή in Egypt. However, Thackeray (p. 27) notes that the papyri so far discovered tell us little of the private life of the Jews of Egypt and of the Greek used by them specifically. The marshes of the Delta were not favourable for the preservation of the papyri. The κοινή received other foreign influences we know. The Jews of the Dispersion spoke the vernacular κοινή everywhere, but they read the LXX, “a written Semitic Greek which no one ever spoke, far less used for literary purposes, either before or after.” And yet

4 See Deissmann (B. S. and Light) and Moulton (Prol.).

Kälker KÄLKER, F., _Questiones de elocutione Polybiana_ (1880).

1 Deissmann, B. S., p. 67. See also Angus, N. T. Philol., Harv. Theol. Rev., July, 1909, p. 453. The LXX, though translation Greek (see above), is in the vern. κοινή,
the Hellenistic Jews all over the world could not read continually the LXX and not to some extent feel the influence of its peculiar style. No one to-day speaks the English of the King James Version, or ever did for that matter, for, though like Shakespeare, it is the pure Anglo-Saxon, yet, unlike Shakespeare, it reproduces to a remarkable extent the spirit and language of the Bible. As Luther’s German Bible largely made the German language, so the King James Version has greatly affected modern English (both vernacular and literary). The situation is not the same, but there is enough of truth to justify the comparison. There are fewer details that preserve the Semitic character, but what does not disappear is the Hebrew cast of thought in a writer like John, for instance. No papyrus is as much a parallel to John’s Gospel as the Book of Job, for instance. Westcott¹ has true insight when he says of N. T. Greek: “It combines the simple directness of Hebrew thought with the precision of Greek expression. In this way the subtle delicacy of Greek expression in some sense interprets Hebrew thought.” What is true of John’s Gospel is true also of James. The numerous quotations both from the LXX and the Hebrew in the N. T. put beyond controversy the constant use of the O. T. in Greek on the part of the N. T. writers. Besides, with the possible exception of Luke and the author of Hebrews, they all knew and used Aramaic as well as Greek. The point is that the N. T. writers were open to Semitic influence. How great that was must be settled by the facts in the case, not by presumptions for or against. Dr. George Milligan (Greek Papyri, p. xxix f.) says: “In the matter of language, we have now abundant proof that the so-called ‘peculiarities’ of biblical Greek are due simply to the fact that the writers of the N. T. for the most part made use of the ordinary colloquial Greek, the κοινή of their day. This is not to say that we are to disregard altogether the influence of ‘translation Greek,’ and the consequent presence of undoubted Hebraisms, both in language and grammar. An overtendency to minimize these last is probably the most pertinent criticism that can be directed against Dr. J. H. Moulton’s Prolegomena to his Grammar of N. T. Greek.” So Dr. Swete “deprecates the induction which, as it seems to him, is being somewhat hastily based upon them (the papyri), that the Greek of the N. T. has been but slightly influenced by the familiarity of the writers with Hebrew and Aramaic” (Apocalypse of St. John, p. cxx).

Von Soden¹ sums up the whole matter as follows: “It was unavoidable but that the primitive Christian writers often used compulsion with the Greek tongue and offended against its genius. They wished to bring to expression things which, up to that time,

Soden

———, Griechisches N. T. Text mit kurzem Apparat (1913).

¹ Early Chr. Lit., 1906, p. 11 f.
were foreign to the Greek spirit and only found expression in Semitic languages. And besides, it is only natural that the phraseology of the Greek translation of the O. T., to which they were habituated from their youth, should unconsciously flow from their pens, and still more, that when their subject-matter brought them into close contact with the O. T. or when they translated from the Aramaic dialect of Palestine, their Greek should receive a foreign tinge.” This by no means makes a special N. T. dialect or even Jewish-Greek, but it admits a real, though slight, Semitic influence even where it is not “translation Greek.” This position is more nearly in accord with all the facts as we now know them. It is pleasing to find Deissmann (Expositor, Oct., 1907, “Philology of the Greek Bible,” p. 292) rather reacting a bit from the first extreme position. He accents here strongly the influence of the LXX on the N. T. “It is one of the most painful deficiencies of biblical study at the present day that the reading of the LXX has been pushed into the background, while its exegesis has been scarcely even begun.” (Ib., p. 293): “A single hour lovingly devoted to the text of the Septuagint will further our exegetical knowledge of the Pauline Epistles more than a whole day spent over a commentary.” (Ib., p. 294): “This restoration of the Greek Bible to its own epoch is really the distinctive feature of the work of modern scholarship.” That hits the point. We cordially agree with his remark (Expositor, Nov., 1907, p. 435) that the Semiticisms of the Greek Bible do not place the N. T. outside of the scope of Greek philology, but are merely its birth-marks. In the Dec. (1907) Expositor (p. 520) Deissmann comments feelingly on the fact that the LXX “has served the Christian Church of Anatolia in unbroken continuity down to the present day.”

LITTLE DIRECT HEBREW INFLUENCE. The Hebrew was not a living language any longer. Less than half of the O. T. quotations\(^1\) in the N. T. are from the Hebrew text. It was still read in most of the synagogues of Palestine and it is possible that a modernized Hebrew was in use to some extent for literary purposes.\(^2\) Perhaps the Hebrew text was consulted by the N. T. writers who used it much as a modern minister refers to his Greek Testament. The reading of the Hebrew O. T. would give one dignity of style and simplicity of expression. The co-ordination of clauses so common in the Hebrew is not confined to the Hebrew, but is certainly in marked contrast with the highly developed system of subordinate sentences of the Greek. But this paratactic construction is partly Hebraic and partly colloquial. The total absence of extended indirect discourse is a case in point also. Compare the historical books of the N. T. with Xenophon and Thucydides. Likewise the frequent use of καί and the sparing use of particles may be mentioned. The pleonastic use of pronouns like γην οὐδείς δόναται κλάσαι αὐτήν (Rev. 3:8) finds an occasional parallel (Moulton) in the papyri, but none the less its frequency in the N. T. is due to the Hebrew. The same remark applies to the effort to express in Greek the Hebrew infinitive absolute by the participle, as βλέποντες βλέψετε (Mt. 13:14), or the instrumental, as χαρᾷ χαίρει (Jo. 3:29). Both of these constructions are found in the Greek, but with far less frequency. The use of προστίθηµι with an infinitive for repetition, as προσέθηκε τρίτον πέµψαι (Lu. 20:12) is in evident imitation of the Hebrew הֶלֶט. Εἰ-ὅν does not mean οὐ as in εἰ δοθήσεται σηµεῖον (Mk. 8:12), but is aposiopesis, the apodosis not being expressed.

---
1 Swete, Intr. to the O. T. in Gk., 1900, pp. 381–405.
2 Schürer, Jew. Peo. in Times of Ch., div. II, vol. I, p. 10. “Hebrew also continued to be the language of the learned, in which even the legal discussions of the scribes were carried on.”
This use is in the papyri. Οὐ-πᾶς in the sense of οὐδὲς is due to the LXX translation of פַּסָּה, though Moulton (p. 246) has found in the papyri ἄνευ and χωρὶς so used with πᾶς.

The use of ῥῆμα, in the sense of ἄρτος ‘thing’ is a Hebraism after the LXX. The classic Greek already has λόγος in this sense. Πρόσωπον λαμβάνειν ἃντίν is a clear Hebraism. Προσωπολημπτέω first appears in the N. T. So also is ὄρθρευσιν ἐνόμιζον τινος rather than ὑπόκεισθαι τινι a Hebraism. Cf. the circumlocutions πρὸ προσώπου τῆς εἰσόδου αὐτοῦ (Acts 13:24) rather than the simple πρὸ αὐτοῦ. The frequent use of the article in address, though occasional in Greek, [Page 95] is like the Hebrew and Aramaic vocative. The common use of ἦν or ἔστι and the participle suits both the Hebrew and the analytic tendency of the κονή. Cf. the more frequent use of the instrumental ἐν. So the frequent construction ἐναὶ εἰς is due to ἐν in Hebrew, though in itself not out of harmony with the Greek genius. It occurs in the papyri. Απὸ προσώπου=πᾶς and πρὸ προσώπου=πᾶς are both Hebraisms. The use of διδόναι in the sense of τίθεναι is due to τίνᾳ having both senses (Thackeray, Gr. of the O. T. in Gk., p. 39); cf. Deut. 28:1, δόσει σε ὑπεράνω. So ἠμέραι takes the flavour of the Hebrew ἵμα, and εἰρήνη is used in salutation like ἵλινος. The superfluous pronoun calls for notice also. The frequency of ἐν τῷ with the infinitive is due to ἐν. So also υἱὸς occurs in some Hebraistic senses like הד, but the papyri have some examples of υἱὸς for ‘quality,’ ‘characteristic.’ Thackeray (p. 42) notes the Hebrew fondness for "physiognomical expressions" like δρθαλμός, πρόσωπον, στόμα, χείρ, πούς, etc. The increased use of ἄνθρωπος and ἄνθρωπος like υἱὸς rather than τίς, πᾶς, ἡκαστος must be observed. The very extensive use of prepositions is accentuated by the Hebrew. Kαὶ ἐγένετο translates שָׁלôm. The use of a question to express wish is like the Hebrew idiom (cf. 2 Kgs. 18:33). But these constructions are doubtless due to the LXX rather than to Hebrew itself. It is not possible to give in clear outline the influence of the Hebrew Bible on the N. T. apart from the LXX and the Aramaic, though there was a little of just that kind. Kennedy¹ gives thirteen words common to the LXX and the N. T. (Thackeray, Gr., pp. 31 ff., gives a list of “Hebraisms in Vocabulary”) and counts “twenty Hebrew and Aramaic words which do not occur in the LXX, e.g. ζύζανον, μαμωνᾶς, ῥακά, ὦσσανά.” The words in the N. T. known to be Hebrew and not Aramaic are as follows: ἀβαδὸς=מַעְבָּד; ἀλληλουία=אַלְלֵל; ἀμὴν=חָגֵר; ἀρμαγεδдон=תַּמָּאַג✿; ἀρραβών=חָנָן; ἀπελευθέρω=דַּבְדָּר; βάτος=בֶּן; βεζεβοῦ=בְּנֵי; βοανηργᾶς=בַּעַל; βιβλίον=בְּרֵי✿ (cf. Dalman, Words of Jesus, p. 49); βόσκω=בַּת (cf. also βόσκον); εἴρησις from הֶלֶקֶת; Ἡλεὶ=חֶלֶק (MSS. Mt. 27:46); κάμυλος=בַּלְבֶּל; λειβάνος=לֹא־בָּטַח✿; λύμα=תַּמָּאַג✿; λύπη=לָא✿; μάννα=מַעַן✿; πάσχα=פָּסָּה✿ (LXX, but same for Aramaic מִסֵּף✿); ραββί=רַב✿; σαβαῶ=תָּוָו✿; σάββατον=בֵּן✿; σατανᾶς=לֹא־כֹּל✿;

¹ Sour. of the N. T. Gk., p. 110 f. Cf. Gregory, Prol., etc., p. 102 f., for foreign words in the N. T.
σάπθειρος = סַפִּיר; Σιλωάµ = שִׁלֹח; συκάµνος = שִׁקְמָה; χερουβί = כְּרוּבִים; ὅσσωπος = אֵזוֹב; χερουβί = כְּרוּבִים; ὅσσωπος = אֵזוֹב; χερουβί = כְּרוּבִים; ὅσσωπος = אֵזוֹב; χερουβί = כְּרוּבִים; ὅσσωπος = אֵזוֹב; χερουβί = כְּרוּבִים; ὅσσωπος = אֵזוֹב; χερουブί µ = שִׁלֹח; συκά µινος = שִׁקְמָה; ὄσσωπος = אֵזוֹב; χερουブί µ = שִׁלֹח; συκά µινος = שִׁקְמָה; ὄσσωπος = אֵזוֹב; χερου브ί µ = שִׁלֹח; συκά µινος = שִׁקְמָה; ὄσσωπος = אֵזוֹב; χερου브ί µ = שִׁלֹח; συκά µινος = שִׁקְמָה; ὄσσωπος = אֵزوا. Some of these were already in classical Greek (βυσσος, [Page 96] λίβανος, σάφειρος). Of doubtful origin are νάρδος, νίτρον (Jer. 2:22), συκά µινος. This is a fairly complete list of the Hebrew words in the N. T. The Aramaic words will be given later. There are to be added, however, the very numerous Hebrew proper names, only a few samples of which can be given, as Μαριάµ = מִרְיָם; Μελχισεդék = מִלְכִּי־צֶדֶק, Σαούλ = שָׁאוּל; Σαµουήל = שְׁמוּאֵל; κτλ. Deissmann is correct in saying (“Papyri,” Encyc. Bibl.) that lexical Hebraisms “must be subjected to careful revision,” but these remain.

Certain it is that the bulk of the examples of Hebraisms given by Guillemard vanish in the light of the papyri and inscriptions. He feared indeed that his book was “a return to old exploded methods.” It is indeed “exploded” now, for the N. T. is not “unlike any other Greek, with one single exception, and absolutely unique in its peculiarities.”¹ There are three ways of giving these Semitic words: mere transliteration and indeclinable, transliteration and declinable, Greek endings to Aramaic words.

(d) A DEEPER IMPRESS BY THE LXX. It is true that the N. T. at many points has affinities with the LXX, the “single exception” of Guillemard, but the LXX is not “the basis of the Christian Greek.”² In his second volume Viteau began to see that he had been too extreme in his notion that the N. T. was Hebraized Greek: “The language of the N. T. is not derived from that of the LXX; it is its sister. It is the same familiar Greek language which one finds employed in the one or the other. But the Greek of the LXX has exercised a considerable influence upon that of the N. T.”³ But even in this volume Viteau overestimates the influence of the LXX on the N. T. Westcott⁴ had the old idea that the N. T. language, “both as to its lexicography and as to its grammar, is based on the language of the LXX.” It is undoubtedly true⁵ that a very large proportion of the N. T. [Page 97] words are found in the LXX, but there are very few words that are found in the N. T. and the LXX and nowhere else.¹ Both the

---

¹ The 150 words out of over (?) 4800 (not counting proper names) in the N. T. which Kennedy (Sour. of N. T. Gk., p. 88) gives as “strictly peculiar to the LXX and N. T.” cut a much smaller figure now. New pap. may remove many from the list that are still left.
LXX and the N. T. use the current vocabulary. There are indeed numerous theological terms that have a new meaning in the LXX, and so in the N. T., like ὅψις, ἰδέα, γένεσις, ἐκπλησία, κύριος, λόγος, λιττρόδο, μονογενής, πνεῦμα, σωτηρία, χριστός, κτλ. (See longer list in Swete, Introduction to O. T. in Greek, p. 454.) So also many N. T. phrases are found in the LXX, like εἰκόνων θεοῦ, ὀσμὴ εὐωδίας, πρόσωπον πρός πρόσωπον, λαμβάνειν πρόσωπον, ἥ διασπορά, κτλ. (ib.). The O. T. apocryphal books also are of interest on this point. We have a splendid treatment of the LXX Greek by Thackeray. He shows "the κοινή basis of LXX Greek," as to vocabulary, orthography, accidence and syntax (pp. 16–25). He notes σσ, τεσσεράκοντα, finds ν movable before consonants, νοὸς, νόκταν, πλήρης indeclinable, θείην, disappearance of μ-verbs, ἥλθοσαν, ἥλθα, ἀνέβαιναν, ἐφάρακαν, ὃς ἔστι, oūθείς, nominatīvus pendens, even in apposition with genitive (cf. Apocalypse), constructio ad sensum, λέγον and λέγοντες with construction like ἀποκρεγόλη λέγοντες, recitative ὅτι, neuter plurals with plural verb, partial disappearance of the superlative and usually in elative sense, πρῶτος instead of πρότερος, ἐπαυτοῦς, –ων, –οίς for all three persons, disappearance of the optative, great increase of τοῦ and the infinitive, co-ordination of sentences with καί, genitive absolute when noun in another case is present, blending of cases, increase of adverbal phrases and prepositions, εἰμὶ εἰς, interchange between ἐν and εἰς (increase of εἰς), etc. See also Psichari (Revue des études juives, 1908, pp. 173–208) for a discussion of the Semitic influence on the N. T. Greek. The use of εἰμὶ εἰς occurs occasionally in the papyri, the inscriptions and κοινὴ writers, but it is extremely common in the LXX because of the Hebrew. In the realm of syntax the LXX is far more Hebraistic than the N. T., for it is a translation by Jews who at many points slavishly follow the Hebrew either from ignorance of the Hebrew or the Greek, perhaps sometimes a little of both. B in Judges, Ruth, 2–4 Kings, has ἔγω ἐμι with indicative, as ἔγω ἐμι καθίσομαι (Judges 6:18). BA in Tobit 5:15 have ἔσοντας διδόναι. B in Eccl. 2:17 has ἐμίσησα σὺν τῷ ζωῆν ὃν=ΠΝ ΠΝ ΠΝ. [Page 98] Swete finds this misunderstanding of ἡμέρα common in A in Ecclesiastes and six times in 3 Kings. It is the characteristic of Aquila.2 No such barbarisms as these occur in the N. T., though the "wearisome iteration of the oblique cases of personal pronouns answering to the Hebrew suffixes" finds illustration to some extent in the N. T. books, and the pleonastic use of the pronoun after the Greek relative is due to the fact that the Hebrew relative is indeclinable.3 The N. T. does not have such a construction as ἔτυγχα τοῦ οἰκοδομέων (2 Chron. 3:1), though τοῦ ἐκείνου, ἔντοιχος ἔντοιχος (Ac. 10:25) is as awkward an imitation of the Hebrew infinitive construct. The LXX translators had great difficulty in rendering the Hebrew tenses into Greek and were often

whimsical about it. It was indeed a difficult matter to put the two simple Hebrew
timeless tenses into the complicated and highly developed Greek system, and “Vav
conversive” added to the complexity of the problem. Conybeare and Stock, Selections
from the LXX, p. 23, doubt if the LXX Greek always had a meaning to the translators,
as in Num. 9:10; Deut. 33:10. The LXX Greek is indeed “abnormal Greek,” but it
can be understood. Schürer is wrong when he calls it “quite a new language,
swarming with such strong Hebraisms that a Greek could not understand it.” It is
indeed in places “barbarous Greek,” but the people who spoke the vernacular κοινή
could and did make it out. Many of the Hellenistic Jews knew no Hebrew or Aramaic
but only the κοινή. The Greek proselyte, like the Ethiopian eunuch, could read it, if he
did need a spiritual interpreter. Schürer, who credits the Palestinian Jews with very
little knowledge of the current Greek, considers “the ancient anonymous Greek
translation of the Scriptures” to be “the foundation of all Judeo-Hellenistic culture.”
He is indeed right in contrasting the hardness of Palestinian Pharisaism with the
pliable Hellenistic Judaism on the soil of Hellenism.

But the Jews felt the Greek spirit (even if they could not handle easily oratio obliqua)
not only in the Diaspora, but to a large extent in the cities of Palestine, especially along the coast, in Galilee and in the Decapolis. [Page 99] On the spread of Greek in Palestine see Milligan, N. T.
Documents, pp. 39 ff. The prohibition, about the time of the siege of Jerusalem,
against a Jew teaching his son Greek, shows that it had previously been done. The
quotations in the N. T. from the O. T. show the use of the LXX more frequently than
the Hebrew, sometimes the text quoted in the Synoptics is more like that of A than B,
sometimes more like Theodotion than the LXX. In the Synoptic Gospels the
quotations, with the exception of five in Matthew which are more like the Hebrew,
closely follow the LXX. In John the LXX is either quoted or a free rendering of the
Hebrew is made. The Acts quotes from the LXX exclusively. The Catholic Epistles
use the LXX. The Epistle to the Hebrews “is in great part a catena of quotations from
the LXX.” In Paul’s Epistles more than half of the direct quotations follow the LXX.
Here also the text of A is followed more often than the text of B. Swete even thinks
that the literary form of the N. T. would have been very different but for the LXX.
The Apocalypse indeed does not formally quote the O. T., but it is a mass of allusions
to the LXX text. It is not certain that the LXX was used in the synagogues of Galilee
and Judea, but it is clear that Peter, James, Matthew and Mark, Jewish writers, quote
it, and that they represent Jesus as using it. In the Hellenistic synagogues of Jerusalem
it would certainly be read. It would greatly facilitate a just conclusion on the general

einer Gr. der Sept., (Wiener Stud., xxix, 27).
such passages as are cited in the N. T., or are capable of a Christian meaning, as far as
possible, to their form in the N. T. text, or to the sphere of Christian thought.”
Heinrici shows the same thing to be true of Die Leip. Pap. frag. der Psalmen, 1903.
3 Swete, Intr., etc., p. 402. All these facts about LXX quotations come from Swete.
5 Ib., pp. 29 ff.
The translation was not done all at once, and not by men of Jerusalem, but by Jews of Alexandria who knew “the patois of the Alexandrian streets and markets.”

One doubts, however, if these translators spoke this mixture of Egyptian κοινή and Hebrew. On this point Swete differs from most scholars and insists that “the translators write Greek largely as they doubtless spoke it.” They could not shake off the Hebrew spell in translation. In free Greek like most of the N. T. the Semitic influence is far less. Mahaffy was quick to see the likeness between the papyri and the LXX. But one must not assume that a N. T. word necessarily has the same sense that it has either in the LXX or the κοινή. The N. T. has ideas of its own, a point to be considered later. We agree with Swete that the LXX is “indispensable to the study of the N. T.” Nestle justly remarks that the Greek of the LXX enjoys now a much more

favourable judgment from philologists than some twenty years ago. Conybeare and Stock (Sel. from the LXX, p. 22) observe that, while the vocabulary of the LXX is that of the market-place of Alexandria, the syntax is much more under the influence of the Hebrew original. The LXX does, of course, contain a few books like 4 Maccabees, written in Greek originally and in the Greek spirit, like Philo’s works. Philo represents the Atticist revival in Alexandria that was a real factor with a few. But the “genitivus hebraicus,” like ὁ κριτής τῆς δικίας, is paralleled in the papyri and the inscriptions, though not so often as in the LXX. Cf. Radermacher, N. T. Greek, p. 19. So also (p. 21) τοῖς ἔρθειας (Ro. 2:8) is like ἐκ πλήρους in the papyri and already in the tragic poets. Thumb7 properly takes the side of Deissmann against Viteau’s exaggerated [Page 101] idea of LXX influence (following Hatch). It is not always easy to decide what is due to the use of the LXX and what to the development of the κοινή vernacular. One must have an open mind to light from either direction. Deissmann1 is clearly right in calling for a scientific investigation of the Hebraisms of the LXX. Even the LXX and N. T. use of ἀρετή (Is. 42:8, 12; 1 Pet. 2:9; 2 Pet. 1:3) is paralleled by an inscription in Caria.2 We are not then to think of the Jews or the Christians as ever using in speech or literature the peculiar Greek used in the translation of the Hebrew O. T., which in itself varied much in this respect in different parts. The same intense Hebraistic cast appears in the O. T. apocryphal books which were originally in Hebrew and then translated, as Tobit, Ecclesiasticus, 1 Maccabees, etc. Contrast with these the Greek of the Wisdom of Solomon, 2 Maccabees and the Prologue to the Greek translation of Ecclesiasticus, and the difference is at once manifest.3 The Wisdom of Solomon is of special interest, for the author, who wrote in Greek and revealed knowledge of Greek culture, art, science and philosophy, was yet familiar with the LXX and imitated some of its Hebraisms, being a Jew himself. Cf. Siegfried, “Book of Wisdom,” Hastings’ D. B. It must never be forgotten that “by far the greatest contribution of Alexandrian prose to the great literature of the world is this very translation of the O. T.”4 The name Christ (Χριστός) is found in the LXX “and so the very terms Christian and Christianity arose out of the language employed by the Alexandrian interpreters.”5 The only Bible known to most of the Jews in the first Christian century was the LXX. The first complete Bible was the Greek Bible. The LXX was the “first Apostle to the Gentiles” and was freely used for

3 Deissmann, B. S., p. 76 f. He rightly calls attention to the fact that many of the Ptolemaic pap. are contemporary with the LXX and bristle with proof that the LXX on the whole is in the vernac. κοινή of Egypt The Hebraisms came from the Hebrew itself in the act of translating.
4 Mahaffy, Prog. of Hellen. in Alex. Emp., p. 80.
many centuries by the Christians. Conybeare and Stock (Sel. from the LXX, p. 24) go so far as to say that the N. T. itself would not have been but for the LXX. Certainly it would not have been what it is. “The Bible whose God is Yahweh is the Bible of one people, the Bible whose God is Κύριος is the Bible of the world” (Deissmann, Die Hellen. des Semit. Mon., p. 174).

Thackeray (Grammar of the O. T. in Greek, pp. 25–55) gives a careful survey of the “Semitic Element in the LXX Greek.” He admits that the papyri have greatly reduced the number of the Hebraisms heretofore noted in the LXX. He denies, however (p. 27), that the Greek of the LXX gives “a true picture of the language of ordinary intercourse between Jewish residents in the country.” He denies also any influence of the Hebrew on the vernacular Greek of the Jews in Alexandria outside of the vocabulary of special Jewish words like ἀκροβυστία. He thinks (p. 28) the Book of Tobit the best representative of the vernacular Greek of the Jews. There are more transliterations like γειώρας for Aramaic נֵגְוָרָא (Heb. גֶּר) in the later books where the early books had πάροικος or προσήλυτος. The fact of a translation argues for a fading of the Hebrew from the thought of the people. In the early books the translation is better done and “the Hebraic character of these books consists in the accumulation of a number of just tolerable Greek phrases, which nearly correspond to what is normal and idiomatic in Hebrew” (p. 29). But in the later books the Hebraisms are more numerous and more marked, due to “a growing reverence for the letter of the Hebrew” (p. 30). We cannot follow in detail Thackeray’s helpful sketch of the transliterations from the Hebrew, the Hellenized Semitic words, the use of words of like sound, Hebrew senses in Greek words like δίδωµι=τίθηµι after נָתַן, υἱος ἀδικίας, ὀφθαλµός, πρόσωπον, στόµα, χεῖρ, the pleonastic pronoun, extensive use of prepositions, καὶ ἕγενε, ἐν for accompaniment or instrument, etc.

(e) ARAMAISMS. N. T. grammars have usually blended the Aramaic with the Hebrew influence. Schmiedel1 complains that the Aramaisms have received too little attention. But Dalman2 retorts that Schmiedel himself did not do the matter justice, and still less did Blass. Moulton3 recognizes the distinction as just and shows that Aramaisms are found chiefly in Mark and Matthew, but does not point out the exact character of the Aramaisms in question. We take it as proved that Jesus and the Apostles, like most of their Jewish contemporaries in Palestine who moved in public life, spoke both Aramaic and Greek and read Hebrew [Page 103] (cf. Lu. 4:17). Even Schürer4 admits that the educated classes used Greek without difficulty. There is no doubt about the Aramaic. Jerome says that all the Jews of his time knew the Hebrew O. T. The LXX disproves that, but Hebrew was used in the schools and synagogues of Palestine and was clearly read by many. The discourses of Jesus do not give the impression that he grew up in absolute seclusion, though he undoubtedly used the Aramaic in conversation and public address on many occasions if not as a rule.2 The

1 W.-Sch., Gr., § 2, 1 c. And Dalman (Words of Jesus, p. 18 f.) criticizes Schmiedel for not distinguishing Aramaisms from Hebraisms.
2 Words of Jesus, p. 18.

Aramaic tongue is very old and its use as a diplomatic tongue (Is. 36:11) implies perhaps a previous Aramaic leadership. There was a literary as well as a vernacular Aramaic. The Aramaic portions of Daniel, Ezra, the Targum of Onkelos are in the literary Aramaic. Dalman suggests that Matthew wrote his Gospel originally in the Judean literary Aramaic rather than the Galilean vernacular, but the reason is not very apparent. Zahn doubts the validity of Dalman’s distinction between a Judean and a Galilean Aramaic, but Peter was recognized in Jerusalem by the Galilean pronunciation (Mt. 26:73). The Galileans had difficulty with the gutturals and ψ.

This Aramaic is not to be confounded with the later Christian Aramaic or Syriac into which the N. T. was translated. The Aramaic spoken in Palestine was the West Aramaic, not the East Aramaic (Babylonia). So keenly does Dalman feel the difference between Hebraisms and Aramaisms that he avers that “the Jewish Aramaic current among the people was considerably freer from Hebrew influence than the Greek which the Synoptists write.” Not many can go with him in that statement. But he is right in insisting on a real difference, though, as a matter of fact, no great point was made about it at the time. With Josephus ἡ πάτριος γλῶσσα was the Aramaic (B. J. pr. § 1; v. 6, § 3; [Page 104] v. 9, § 2). He wrote his War originally in the native tongue for τοῖς ἴδιοις βαρβάροις. John (5:2; 19:13, 17, 20; Rev. 9:11; 16:16) uses Ἑβραῖο in the sense of the Aramaic. So Luke has Ἑβραῖς διάλεκτος (Ac. 21:40; 22:2; 26:14). The people understood Paul’s Greek, but they gave the more heed when he dropped into Aramaic. 4 Macc. (12:7; 16:15) likewise employs Ἑβραῖς φωνή. The two kinds of Jewish Christians are even called (Ac. 6:1) Ἑλληνισταί and Ἑβραῖοι, though Ἑλληνισταί and Συρισταί would have been a more exact distinction. It is beyond controversy that the gospel message was told largely in Aramaic, which to some extent withstood the influx of Greek as the vernacular did in Lycaonia (Ac. 14:11). One cannot at this point discuss the Synoptic problem. It is not certain that Luke, probably a gentile, knew either Aramaic or Hebrew, though there is a real

Semitic influence on part of the Gospel and Acts, due, Dalman\(^3\) holds, to the LXX example and a possible Aramaic or Hebrew original for the opening chapters of the Gospel, already put into Greek. Mark was probably written in Rome, not Palestine. Hence the Aramaic original of Mark, Bousset argues, cannot be considered as proved.\(^4\) He rightly insists, as against Wellhausen,\(^5\) that the question is not between the classic Greek and Aramaic, but between the vernacular κοινή and Aramaic. But whatever is or is not true as to the original language of Mark and of Matthew, the gospel story was first told largely in Aramaic. The translation of the Aramaic expressions in Mark proves this beyond all doubt, as ταλειθά, κοῦµ by τὸ κοράσιον, ἐγέρε (Mk. 5:41). Dalman\(^6\) indeed claims that every Semitism in the N. T. should first be looked upon as an Aramaism unless it is clear that the Aramaic cannot explain it. The Mishna (Neo-Hebraic) was not itself unaffected by the Greek, for the Mishna has numerous Greek words and phrases that were current in the Aramaic.\(^1\) The Aramaisms of vocabulary that one can certainly admit in the N. T. are the following words: ἀββά = אַבָּא; ἀκελδαμάχ = נְקָדָמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָา; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμάχ = דְּמָא; ἀκελδαμά...</noscript>
ποιεῖν (διδόναι), ἐφήνη, ἐφήνην διδόναι, ὁδὸς θεοῦ, πλήρωμα, etc. As already explained, apart from the question of a possible original Aramaic Mark and an original Aramaic Matthew and Aramaic sources for the early chapters of Luke and the first twelve chapters of Acts, many of the discourses of Christ were undoubtedly in Aramaic. There was translation then from this Aramaic spoken (or written) gospel story into the vernacular κοινή as we now have it in large portions of the Synoptic Gospels and possibly part of Acts. The conjectural efforts to restore this Aramaic original of the words of Jesus are suggestive, but not always convincing. On the whole subject of Semitic words in the Ptolemaic papyri see Mayser, Grammatik, pp. 40–42. The list includes ἄρ(ρ)αβῶν, βύσσος, κύμινος, λίβανος, συκάμινος, χτών. It is not a very long list indeed, but shows that the Orient did have some little influence on the Greek vocabulary. These words occur in older Greek writers.

[Page 106] (f) VARYING RESULTS. It is natural that different writers in the N. T. should diverge in the amount of Semitic influence manifest in their writings. They all used the vernacular κοινή which in itself may have had a very faint trace of Semitic influence. But of the nine authors of the N. T. six were probably Palestinian Jews. Now these six writers (Mark, Matthew, James, Peter, Jude, John) are just the very ones who reveal the Semitic mould of thought. It is often merely the Hebrew and Aramaic spirit and background. In Mark the Aramaic influence appears; in Matthew the LXX is quoted along with the Hebrew, and Aramaisms occur also; in James there is the stately dignity of an O. T. prophet with Aramaic touches (cf. his address and letter in Ac. 15) but with many neat turns of Greek phrase and idiom; Peter’s two letters present quite a problem and suggest at least an amanuensis in one case or a different one for each letter (cf. Biggs, Int. and Crit. Comm.); Jude is very brief, but is not distinctly Hebraic or Grecian; John in his Gospel is free from minor Semitisms beyond the frequent use of καί like ἦν, but the tone of the book is distinctly that of a noble Jew and the sum total of the impression from the book is Semitic, while the Apocalypse has minor Hebraisms and many grammatical idiosyncrasies to be discussed later, many of which remind one of the LXX. If the absence of the optative be taken as a test, even when compared with the vernacular κοινή, Matthew, James and John do not use it at all, while Mark has it only once and Jude twice. Peter indeed has it four times and Hebrews only once, but Luke uses the optative 28 times and Paul 31. The remaining three writers (Paul, Luke, author of Hebrews) were not Palestinian Jews. Paul was a Hellenistic Jew who knew his vernacular κοινή well and spoke Aramaic and read Hebrew. His Epistles are addressed chiefly to gentle Christians and naturally show little Semitic flavour, for he did not have to translate his ideas from Aramaic into Greek. In some of his speeches, especially the one delivered in Aramaic, as reported by Luke in Ac. 22, a trace of the Semitic point of view is retained. In contrast with Ac. 22 note Paul’s address on the Areopagus in 17. The author of Hebrews makes abundant use of the LXX but exhibits possible Alexandrian origin or training, and it is not clear that he knew either Hebrew or Aramaic. Luke presents something of a problem, for he seems to have had Aramaic sources in Lu. 1

1 Swete, Intr. to the O. T. in Gk., p. 381.
2 Dalman (Wds. of Jes., p. 42) thinks that the Heb. of Mt. are due to the LXX.
1 Biesenthal (Das Trostschreiben des Ap. Paulus an d. Heb., 1878) even thinks that the Ep. was written in Aram. or Heb.
and 2 (possibly also Ac. 1–12), while it is uncertain whether he was familiar with the Aramaic. There seems little evidence that he knew Hebrew. Blass\(^2\) thinks that he may have read his Aramaic sources or had them translated for him. Curiously enough, though a gentile and capable of writing almost classic Attic (Lu. 1:1–4), yet Luke uses Semitisms not common elsewhere in the N. T. Dalman\(^3\) shows that the genuine Hebraisms in Luke like λόγους in sense of things (9:28 but classical authority for this exists), διὰ στόματος (1:70) are due to the LXX, not the Hebrew. The use of ἐν τῷ with the infinitive occurs 34 times in Luke, 8 in Acts, twice in Mark, thrice in Matthew, 4 in Paul, 4 in Heb.\(^4\) See ἐν τῷ ὑποστρέφειν τῶν Ἰσραήλ (Lu. 8:40). Blass calls this an Aramaism.\(^5\) But it is not a peculiarity of the discourses of Jesus, as it is found there only in ἐν τῷ σπείρειν (common to all the Synoptics, Mk. 4:4; Mt. 13:4; Lu. 8:5), and in Lu. 10:35; 19:15. Hence the idiom is common\(^6\) in Luke from some other cause. The construction occurs in “classical historians, in Polybius and in papyri,”\(^7\) but is most common in the LXX, and the parallel is wanting in the spoken Aramaic. Luke also freely uses καὶ ἐγένετο (almost peculiar to him in the N. T.), which at once suggests יָיֶהוָו. He doubtless got this from the LXX.\(^8\) He has three constructions, viz. καὶ ἐγένετο καὶ ἦλθε, καὶ ἐγένετο ἦλθε and καὶ ἐγένετο ἔλθεκ. The first two\(^9\) are common in the LXX, while ἐγένετο ἔλθεκ is due to the Greek vernacular\(^10\) as the papyri testify. The superfluous ἄρεῖς, ἦρξατο, etc., are Aramaisms, while ἐλμὺ and the participle is Aramaic, like the Hebrew, and also in harmony with

9 Cf. Thackeray, Gr., pp. 50 ff. We have the type ἐγένετο ἦλθε 145 times, and ἐγένετο καὶ ἦλθε 269 times in the LXX, but ἐγένετο ἔλθεκ only once (1 Kgs. 11:43 B).
10 Moulton, Prol., p. 17.
the analytic vernacular κοινή. Nestle\textsuperscript{11} agrees with Blass (p. 131) in taking ὁμολογεῖν ἐν in Mt. 10:32=Lu. 12:8 as a Syrism. ב with ἀνάθεσις is not in the Hebrew, nor ὁμολ. ἐν in the LXX, but יִנֶּה is used with ב in the Jewish-Aramaic and Christian-Syriac. Nestle refers to ὁμολογοῦντος τῷ ὀνόματι (Heb. 13:15) as a Hebraism, for in such a case the Hebrew used ב. The LXX and the Aramaic explain all the Semitisms in Luke. Dalman\textsuperscript{1} ventures to call the LXX Hebraisms in Luke “Septuagint-Græcisms” and thinks that the same thing is true of the other Synoptists. Certainly it is proper to investigate\textsuperscript{2} the words of Jesus from the point of view of the peculiarities of style in each reporter of them. But, after all is said, the Semitisms in the N. T. Greek, while real and fairly numerous in bulk, cut a very small figure in comparison with the entire text. One can read whole pages in places with little suggestion of Semitic influence beyond the general impress of the Jewish genius and point of view.

IV. Latinisms and Other Foreign Words. Moulton\(^3\) considers it “hardly worth while” to discuss Latin influence on the κοινή of the N. T. Blass\(^4\) describes the Latin element as “clearly traceable.” Swete\(^5\) indeed alleges that the vulgar Greek of the Empire “freely adopted Latin words and some Latin phraseology.” Thumb\(^6\) thinks that

they are “not noteworthy.” In spite of the conservative character of the Greek language, it yet incorporated Latin civil and military terms with freedom. Inasmuch as Judea was a Roman province, some allusion to Roman customs and some use of Latin military and official terms was to be expected, though certainly not to the extent of Romanizing or Latinizing the language. Cicero himself described Latin as provincial in comparison with the Greek. Latin words are fairly common in the Mishna. Latin names were early naturalized into the Greek vernacular and in the N. T. we find such Roman names as Aquila, Cornelius, Claudia, Clemens, Crescens, Crispus, Fortunatus, Julia, Junia, Justus, Linus, Lucius, Luke, Mark, Niger, Paul, Priscilla, Publius, Pudens, Rufus, Sergius, Silvanus (Silas), Tertius, Titus among the Christians themselves (Jewish and gentile), while Agrippa, Augustus (translated Σεβαστός), Cæsar, Claudius, Gallio, Felix, Festus, Julius, Nero (Text. Rec.), Pilate, Tertullus are typical Roman names. Note the Roman cities mentioned in Ac. 28, Cæsarea and Tiberias in Palestine. More than forty Latin names of persons and places occur in the N. T. The other Latin words, thirty (or thirty-one), are military, judicial, monetary or domestic terms. They come into the N. T. through the vernacular κοινή, none of them appearing in the LXX and but two in Polybius. “Plutarch uses Latin words more frequently than Polybius, none of them appearing in the LXX and but two in Polybius. ‘Plutarch uses Latin words more frequently than Polybius, but for the most part not those employed in the N. T.’”[1] Jannaris observes that “the Roman administration, notwithstanding its surrendering to Greek culture and education, did not fail to influence the Greek language.” But in the N. T. only these Latin words are found: άσσαριον (as), δηνάριον (denarius),

Thayer

THAYER, J. H., Greek-English Lexicon of the N. T. (1887).
like *videris*. So also ὀψεσθε αὐτοῖ (Ac. 18:15). Grimm\(^1\) considers λαμβάνειν in Jo. 5:34, 41 equal to *capto* ("to catch at"). The majority of these instances occur in Mark and Matthew, Mark using more Latinisms than any other N. T. writer. Too much, however, cannot be argued from this point.\(^2\) There are besides such adjectives as Ἡρωδιανοί, Χριστιανοί, Φιλιππήσιοι, which are made after the Latin model.

Blass\(^3\) thinks that the syntax shows a greater Latin influence, but admits that it is difficult to tell the difference between native development in the Greek and a possible Latin bent. It is indeed difficult to speak with decision on this point. Ultimately Greek and Latin had great influence on each other, but at this stage the matter is at least too doubtful to appeal to with confidence.\(^3\) Paul indeed may have spoken in Latin at Lystra, according to Prof. Ramsay.\(^5\) Thayer\(^6\) indeed gives a longer list of Latin syntactical influences on N. T. Greek, but not all of them are certain. The anticipatory position of ἀπό and πρό in expressions of time and place, as πρὸ ἑξ ἡμερῶν (Jo. 12:1), is a possible Latinism, though only of the secondary sort, since the Doric and the Ionic use this construction occasionally and the κοινῆ frequently (cf. Moulton, *Prolegomena*, p. 101). Cf. also μετὰ πολλὰς ταύτας ἡμέρας (Ac. 1:5).\(^7\) The increased use of the subjunctive rather than the optative after a past tense of the indicative is a necessary result of the disappearance of the optative rather than a Latinism. The alleged blending of present perfect and aorist might [Page 111] be a Latinism, but it is

———, *Language of the N. T.* (Hastings’ D. B., 1900).

5 Exp., Sept., 1905, and March, 1906. “As his father, and possibly also his grandfather, had possessed the Roman citizenship, the use of Latin speech and names was an inheritance in the family” (Ramsay, Exp., Aug., 1906, p. 160). Cf. also Ramsay, *Pauline and Other Studies* (1906, p. 65), where he says it is “certain” that he spoke the Latin language. So holds Alex. Souter (Did Paul Speak Latin?, Exp., April, 1911). At Iconium “a certain affectation of speaking Latin was fashionable.” Moulton also thinks that Paul preached in Lat. at Lystra, since the earliest inscriptions there are Lat. (ProL., p. 233). 6 Lang. of the N. T., Hast. D. B. 7 On this matter of time see Schulze, Graeca Lat., pp. 13 ff.
at least doubtful if that is found in the N. T. The use of ὅτι and ἵνα rather than the infinitive follows naturally as the infinitive vanishes, but it is parallel to the growing use of ut with rogo, etc. ἄπο and the ablative after φυλάσσειν may be due to cavere ab or to the general analytic tendency to express the preposition with the case (cf. the Hebrew also). Other smaller details are the absence of ὦ with the vocative, σύν as equal to καί, δὲ=καὶ οὕτως (qui=et hic), γαμέω with datīvus=nubere aliquid, infinitive alone with κελεύω. There is no evidence that the absence of the article in Latin had any influence on the vernacular koivē, though Schmid1 thinks he sees it in the irregular use of the article in Αἰlian. It is interesting in this connection to note the development in the vernacular Latin as represented in the Old Latin and the Vulgate versions. Unusual cases are used with many verbs; prepositions are much more frequent; the indicative with final ut and in indirect questions; common use of quia and quoniam like quod with verb rather than the accusative and infinitive; ille, ipse, hic, is, more like the article, as the later Italian il, Spanish el, French le.2

Other foreign words had, of course, entered the koivē or the earlier Greek, like βουνός (Cyrenaic and Sicilian); ῥέδη (Gallic or Celtic); ἀγγαρεύω (even Αἰschylus), γάζα, παράδεισος, σανδάλιον (Persian); χιτών (Oriental); κράβαττος (cf. Latin grabatus), παρεμβολή, βύθη (Macedonian); ἀρραβών, κιννάµων, κύινον, μνᾶ (Phœnician); βαΐον, βίβλος, βόσκεις, σινάπι, σινδών (Egyptian or Semitic?); ζζάνων (Arabic?). On the Egyptian words in the Ptolemaic papyri see Mayser, Grammatik, pp. 35–40; on the Persian words, ib., p. 42 f., including γάζα and παράδεισος. Σιναπί is of uncertain origin. But Greek was known in all parts of the Roman Empire except parts of North Africa and the extreme west of Europe. There were great libraries in Alexandria, Pergamum and elsewhere. Schools were numerous and excellent. But none the less the mass of the people were βάρβαροι to the real Greeks and inevitably brought laxities into the vernacular. Cf. Radermacher, N. T. Gr., pp. 9 ff., who gives a good discussion of the Latinisms in koivē writers.

[V. The Christian Addition. But was there a Christian addition if there was no separate biblical Greek, not to say a special Christian Greek? Winer1

Schmid SCHMID, W., Der Atticismus in seinen Hauptvertretern. 4 Bde. (1887–1897). 1 Atticismus etc., p. 64. Cf. Georgi, De Latinismis N. T., iii, Vita, 1733.
Winer

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).
admitted “religious technical terms” in the Christian sense, but thought that “the subject scarcely lies within the limits of philological inquiry.” Blass has nothing to say on the subject. But even Deissmann insisted that “the language of the early Christians contained a series of religious terms peculiar to itself, some of which it formed for the first time,” but he added that this enrichment did not extend to the “syntax.” Once more hear Deissmann: “Christianity, like any other new movement affecting civilization, must have produced an effect upon language by the formation of new ideas and the modification of old ones.” Moulton sounds a note of warning when he says that “it does not follow that we must promptly obliterate every grammatical distinction that proves to have been unfamiliar to the daily conversation of the first century Egyptian farmer…The N. T. must still be studied largely by light drawn from itself.” Westcott indeed thinks the subject calls for “the most careful handling” in order to avoid Jewish usage on the one hand and the later ecclesiastical ideas on the other. This is obviously true. Connect the discussion of the Semitic influence on the N. T. with this point and recall the revolutionary effect that Christianity had upon the Greek language in the ecclesiastical Greek of the Byzantine period, and the difficulty will be appreciated. Mahaffy does not hesitate to say that the main cause of the persistence of Greek studies to-day is due to the fact that the Gospels are written in Greek. “Greek conquered Jew and Jew conquered Greek and the world inherited the legacy of their struggle through Roman hands.” Under the influence of Christianity some of the old heathen vocabulary vanished and the remaining stock “was now considerably reduced and modified in a Christian and modern spirit.” The N. T. Greek became the standard for ecclesiastical Greek as the Attic had been for the ancient world.

———, Greek Life and Thought (1896).
———, Progress of Hellenism in Alexander’s Empire (1905).
———, The Greek World under Roman Sway (1890).
———, What Have the Greeks Done for Civilization? (1909).

6 The Gk. World under Rom. Sway, 1890, p. 389 f. Butcher, Harv. Lect. on Gk. Subj., 1894, p. 2 f., calls the power of Jew and Gk. on modern life one of “the mysterious forces of the spirit.” “Each entered on a career of world-wide empire, till at length the principles of Hellenism became those of civilization itself, and the religion of Judea that of civilized humanity.”
7 Jann., Hist. Gk. Gr., p. 10 f.
Winer\textsuperscript{1} indeed curtly says: “To attempt to explain such expressions of the apostolical terminology by quotations from Greek authors is highly absurd.” Rutherford\textsuperscript{2} almost despairs of understanding N. T. Greek as well as “classical Greek,” since it contains so many alien elements, “but it has at least begun to be studied from the proper point of view,” though he overestimates the difficulty and the difference when he speaks of “the singular speech in which the oracles of God are enshrined.” On the other hand\textsuperscript{3} we must not let the papyri make us swing so far away from the old “biblical” Greek idea as to imagine that we can find in the vernacular κοινή all that Christianity has to offer. The Christian spirit put a new flavour into this vernacular κοινή and lifted it to a new elevation of thought and dignity of style that unify and glorify the language. This new and victorious spirit, which seized the best in Jew and Greek, knew how to use the Greek language with freedom and power.\textsuperscript{4} If the beauty of the N. T. writings is different from the ancient standard, there is none the less undoubted charm. Matthew Arnold put the Gospels at the acme of simplicity and winsomeness, and Renan spoke of Luke’s Gospel as the most beautiful book in the world. Norden\textsuperscript{5} admits that the N. T. style is less exclusive and more universal. There was indeed a compromise between the old and the new. The victory of the new brought rhythm (not the technical sort) and unity as the chief characteristics.\textsuperscript{6} In Christianity Hellenism becomes really cosmopolitan.\textsuperscript{7} If Christianity had merely used the Greek language and had been entirely alien to Hellenism, the N. T. would not have belonged to Greek literature, but this sympathy with the best in the world must not be overworked.\textsuperscript{1} The N. T. language is real Greek, though with the Christian spirit supreme in it because Christianity seized the Hellenic spirit and

\textsuperscript{2} Epis. to the Rom., p. x f.

\textsuperscript{3} Cf. Zezschwitz, Profangräc. und bibl. Sprachg., 1859, p. 4, where he speaks of “dieses neue geistige Princip an der Sprache.” Deissmann (Die sprachl. Erforsch. der griech. Bibel, p. 8) accents the difference between the Christian ideas and the Graeco-Rom. heathen words that express them.

\textsuperscript{4} Ib., p. 12. Norden (Die griech. Kunstspr., Bd. II, pp. 453 ff.) indeed thinks that the N. T. wants the “freedom” (Freiheit) and “serenity” (Heiterkeit) of the ancient literature. This is true in part of Paul’s writing, where passion rages fiercely, and in Rev. and other apocalyptic passages. But what can excel Lu. and Jo. in lucidity and beauty? “Heiterkeit—blitheness or repose, and Allgemeinheit—generality or breadth, are the supreme characteristics of the Hellenic ideal.” Walter Pater, The Renaissance, 1904, p. 225.

\textsuperscript{6} Ib., Bd. I, p. 290.

\textsuperscript{7} Ib., Bd. II, p. 463.

\textsuperscript{1} Cf. Hatch, Infl. of Hellen. on Christ.
transformed it. W. Christ$^2$ rightly calls attention to the fact that Christianity brought “a renewal of the human race,” “the moral worth of man and a purer view of God.” So “this ethical new birth of mankind” found expression in the N. T. The touch of life is what distinguishes the N. T. writings from the philosophical, historical, religious and ethical writings of the time.$^3$ In the Synoptic Gospels this quality reaches its height. “Far above these details is the spirit, the literary conception of a life to be written without ornament, without reflection, without the writer’s personality.”$^4$ This fact constitutes a literary phenomenon amounting almost to a miracle. This vital spirit discloses itself on every page and baffles analysis. It is the essence of the N. T. language, but “is as pervasive as the atmosphere,” “as intangible as a perfume.”$^5$ If some concentration and strength are lost, there is great adaptability.$^6$ Thayer$^7$ does not hesitate to speak of the fitness of N. T. Greek for its providential office. It is the language of men’s business and bosoms. It is the language of life, not of the study nor the cloister. It is not the language of a bygone age, but the speech of the men of the time. “The Book of the people has become, in the course of centuries, the Book of all mankind” (Deissmann, *Light*, p. 142). Christianity “began without any written book at all” except the Old Testament. “There was only the living word—the gospel, but no Gospels. Instead of the letter was the spirit. The beginning, in fact, was Jesus Himself” ($ib.$, p. 245). The N. T. is in close sympathy with both Jew and Greek, in a sense has both languages to draw on, can reach both the Semitic and the gentile mind, becomes a bond of union, in a word (as Broadus used to say) it is better suited to be the vehicle of truth conveyed by Jewish minds than classical Greek would have been. And a grammarian must admit that, however necessary and fundamental grammatical [Page 115] exegesis is, it forms only the basis for the spiritual exposition which should follow.

When one comes to details, he notes that the influence of Christianity is chiefly lexical, not grammatical.$^1$ But a few points in syntax are to be observed, as in expressions like ἐν Χριστῷ$^2$; ἐν Κυρίῳ; πιστεύω$^3$ ἐν with locative, ἐξ with accusative, ἔρχεται with the locative or the accusative, πιστεύω with the dative, with the accusative or absolutely. As to the lexical element the lists of ἐνθύμενα require severe sifting.$^4$ It is too soon to pass a final verdict, but in the nature of the case the number would be small. Such words as ἀντίχριστος, ἀποδίδασκαλός, ἐμφανείτης,
Kennedy, H. A. A., Recent Research in the Language of the N. T. (The Expos. T., xii, 1901).

———, Sources of N. T. Greek (1895).

———, St Paul and the Mystery Religions (1913).

mean what it did in the LXX, as ἀρχιερεύς, διαθήκη, θεός, προφήτης, σωτηρία. Much more is this true of the N. T. The new message glorified the current κοινή, took the words from the street and made them bear a new content, linked heaven with earth in a new sense. In particular the N. T. writers took and greatly enriched the religious vocabulary of the LXX.

VI. Individual Peculiarities. The language of Christianity was not stereotyped at first and there was more play for individualism. If the style is not all of the man, certainly each writer has his own style. But style varies with the same man also at different stages of his own development, with varying moods and when discussing different themes. Style is thus a function of the subject. All these points of view must be kept in mind with several of the N. T. writers, as Paul, Luke, Peter and John, whose writings show marked variations. Simcox notes that in the Thessalonian and Corinthian letters Paul uses ἐν πᾶσι twelve [Page 117] times, in the Pastoral Epistles ἐν πᾶσι five (or six) times, while in Ph. 4:12 he has both. In thus accenting the individuality of the N. T. writers one must not forget that each writer had access to the common religious terminology of early Christianity. There was a common substratum of ideas and expressions that reappear in them all, though in certain cases there may have been actual use of documents. But one can never be sure whether Peter had James, or the author of Hebrews Luke’s writings. Peter probably had some of Paul’s letters when he wrote 1 Peter, and 2 Peter 3:15 f. expressly refers to them. The grammarian cannot be expected to settle questions of authorship and genuineness, but he has a right to call attention to the common facts of linguistic usage. Immer indeed complains that the linguistic peculiarities of the N. T. writers have been worked more in the interest of criticism than of exegesis. The modern method of biblical theology is designed to correct this fault, but there is a work here for the grammarian also. Winer declines to discuss this question and is horrified at the idea of grammars of each writer of the N. T. Language is rightly viewed from the point of view of the speaker or writer. The rapid and continued changes in the individual mind during the mental process of expressing thought find a parallel in the syntactical relations in the sentence. One cannot protest too strongly against the levelling process of an

Simcox

———, The Writers of the N. T.

unsympathetic and unimaginative linguistic method that puts all the books of the N. T. through the same syntactical mill and tags this tense as “regular” and that one as “irregular.” It is not too much to say that the characteristic of the Greek literature of this time was precisely that of individuality (cf. Plutarch’s Lives). Viteau has a brief discussion of “The Psychological Character of the Syntax of the N. T.,” for, added to all other things, there is “the influence of the moment.” Differences in culture, in environment, in gifts, in temperament inevitably affect style, but this fact is not to be stressed so as to make a new dialect for each writer. In the following discussions some lexical comments are given besides the grammatical to give a better idea of the writer’s style as a whole.

(a) Mark. Certainly Blass’ theory of an original Aramaic Mark is not proven, but Peter often spoke in Aramaic, and Mark was bilingual like Peter. For the Aramaisms and Hebraisms of Mark see previous discussion (Semitic Influence). The idea that Mark first wrote in Latin need not be seriously discussed. Matthew and Luke have also nearly as many Latinisms as Mark. It is not in his vocabulary that Mark is most distinctive, for of the 1270 words in Mark (besides 60 proper names) only 80 are peculiar to him among the N. T. writers. He has 150 in common with Matthew and Luke alone, while only 15 belong to Mark and John and nowhere else in the N. T.

———, Philology of the Gospels (1898).

———, Pronunciation of Ancient Greek (translation by Purton in 1890 of 3. Aufl. of Über die Aussprache des Griech. 1888).

3 Swete, Comm. on Mk., 1898, p. xl. Thayer (Lex. of N. T. Gk., App., p. 699) gives 102, but the text of some 32 is in dispute. Hawkins, Hor. Syn., p. 200, gives 71. Swete gives interesting lists of Mark’s vocabulary from various points of view. Cf. also Salmond, Mark (Gosp. of), in Hast. D. B.

4 Swete, Comm. on Mk., p. xliii. Thieme (Die Inschr. von Magn. am Mäander und das N. T., 1906, p. 4) says: “Die Gruppe der sogenannten Hapaxlegomena ist
About 40 words belong only to Mark and the LXX in the Greek Bible, while Mark has 38 (besides proper names) occurring nowhere else in the N. T. or the LXX; but these are not all real ἀπαξ λεγόμενα, for there are the papyri! Mark seems fond of diminutives like the vernacular κοινή in general (θυγάτριον, κοράσιον, κυνάριον, etc.); εἴμι and ἔρχομαι with the participle are common, as in Luke (cf. 1:6, ἢν … ἐκδεδυμένος; 1:39, ἦλθεν κηρύσσων); in fact he multiplies pictorial participles (cf. 14:67, ἰδοὺ … ἔμβλεψα καὶ λέγει); ἦν occurs with past tenses of the indicative (3:11, ὅταν αὐτὸν ἀνθρώπουν); he loves the double negative (1:44, μηδὲν μηδὲν εἶπεν); the article is common (as in N. T. generally) with the infinitive and sentences (9:23, τὸ εἰ δύνῃ); broken and parenthetic clauses are frequent (cf. 7:19, καθαρίζων); at times he is pleonastic (2:20, τότε ἐν ἐκείνῃ τῇ ἡμέρᾳ; he uses ἐὑρός (W. H. text) 41 times; he is emotional and vivid, as shown by descriptive adjectives, questions and exclamations (cf. 1:24; 2:7); the intermingling of tenses (9:33 ff., ἐπηρέατα … λέγει … εἶπεν) is not due to ignorance of Greek or to artificiality, as Swete well says, but to “a keen sense [Page 119] of the reality and living interest of the facts; there are 151 historic presents in the W. H. text against 78 in Matthew and 4 in Luke; there is frequent and discriminating use of prepositions (2:1, 2, 10, 13); the connective is usually καί rather than δέ, seldom οὖν; there is little artistic effect, but much simplicity and great vividness of detail; the vernacular κοινή is dominant with little literary influence, though ἦτεν, παιδιόθεν and ὄψια are held so by Norden.1

Πεπλήρωται (Mk. 1:15) is paralleled by ἐπληρώθη in a Fayûm papyrus and συμπόσια, πρασιαί πρασιαί by τάγματα τάγματα in the “Shepherd of Hermas” (Goodspeed, Bibl. World, 1906, p. 311 f.). In general Mark is not to be considered illiterate, though more Semitic in his culture than Greek. Wellhausen has noted that D has more Aramaicisms in Mark’s text than B. But Mark’s Semitisms are not really barbarous Greek, “though Mark’s extremely vernacular language often makes us think so, until we read the less educated papyri” (Moulton, Camb. Bibl. Essays, p. 492). Even his fondness for compound (even double compound) verbs is like the vernacular κοινή. If the influence of Peter is seen in the Gospel of Mark, it was thoroughly congenial as to language and temperament.3 He gives an objective picture of Jesus and a realistic one.

(b) MATTHEW. The writer quotes both the Hebrew and the LXX and represents Jesus as doing the same. He has 65 allusions to the O. T., 43 of them being verbal quotations. And yet the book is not intensely Hebraistic. He has the instinct for Hebrew parallelism and the Hebrew elaboration, and his thought and general outlook

bedenklich zusammengeschrumpft; es handelt sich im Neuen Testament meistens um ἀπαξ εὑρημένα, nicht ἀπαξ εἰρημένα.”

2 Mk. 6:39 f.
are Hebraistic, though his language is “colourless Hellenistic of the average type” (Moulton, *Camb. Bibli. Essays*, p. 484). We need not enter into the linguistic peculiarities of Q as distinct from our Greek Matthew if that hypothesis be correct. In Mt. 9:6 we see κλίνη rather than the vulgar κράβαττος of Mark. In 12:14 Matthew has συμβούλιον ἐλαβον for σ. ἐδίδουν of Mark (Moulton, *op. cit.*, p. 485). He can use paronomasia as in κακῶς κακῶς ἀπολέσει αὐτοῦς (21:41). He uses τότε 91 times against 6 in Mark and 14 in Luke; he has ἥ βασιλεία τῶν οὐρανῶν 32 times, while he

[Page 120] has ἥ βασιλεία τοῦ θεοῦ 4 times (Mk. 14; Lu. 32); he uses ὁ πατήρ ὁ οὐράνιος 7 times and ὁ πατήρ ὁ ἐν τοῖς οὐρανοῖς 13 times; he 12 times quotes the O. T. with the formula ἦν (ὀπως) πληρωθῇ τὸ ῥήθην or τότε ἐπληρώθη τὸ ῥήθην, whereas Luke does not have it at all, Mark only once and John 7 times; κατ’ ἄναρ occurs 6 times and nowhere else in N. T.; like Luke he uses καὶ ἰδοὺ often (27 times) and ἰδοὺ after the genitive absolute 11 times; he alone speaks of ἡ ἀγία πόλις and πόλες τοῦ μεγάλου βασιλέως; like Mark he uses Ἱεροσόλυμα always save once (23:37), whereas Luke usually has Ἱερουσαλήμ; ὁμονὸς ἐν or εἰς, common in Matthew, does not occur in the other Gospels; τάφος, not in the other Gospels, is found 6 times; συντέλεια τοῦ αἰῶνος occurs 5 times, and only once more in the N. T. (Heb.); note the pleonastic use of ἄνθρωπος as ἄνθρωπος βασιλέως; he twice uses εἰς τὸ οὖνομα, but the other Gospels ἐν τῷ οὖνοματι or ἐπί; the oriental particularity is seen in using προσέρχομαι 51 times while Mark has it only 5 and Luke 10 times; συνάγειν is used by Matthew 24 times; the vernacular κονῆ is manifest in many ways as in the use of μονόρθαλμος (like Mark), κολλύσται. Thayer in his list (Lexicon, p. 698 f.) gives 137 words occurring in Matthew alone in the N. T., but 21 are doubtful readings. Matthew has fewer compound verbs than Mark. Matthew does not use adverbiai πολλά, while Mark has it 9 times. He has δὲ where Mark has καὶ about 60 times. Matthew has ὅτι after verbs of saying 38 times, while Mark has it 50 times. Of the 151 historic presents in Mark only 21 appear in Matthew, though Matthew has 93 historic presents in all. See Hawkins, *Horae Synopt.*., p. 144 f. Matthew frequently has aorist when Mark has imperfect (see Allen, *Matthew*, p. xx f.). The periphrastic tenses are less common in Matthew than in Mark and Luke (*op. cit.*, p. xxii). Matthew is less fond than Mark of redundant phrases (*op. cit.*, p. xxvi). The Gospel is largely in the form of discourses with less narrative element than Mark. The style is more uniform and less graphic than either Mark or Luke and so less individual. 1

(c) LUKE. Whether Luke knew Hebrew or Aramaic or both, cannot be stated with certainty. He did make use of Aramaic documents or sayings in Lu. 1 and 2, and in the early part of the Acts. He was also quite familiar with the LXX, as his quotations *[Page 121]* from it show. The Semitic influence in his writings has already been discussed. “He consciously imitates the Greek Bible, and in the parts of his narrative which have their scene in Palestine he feels it congruous to retain the rough diction of his sources” (Moulton, *Camb. Bibli. Essays*, p. 479). One thing is certain about him.

Allen ALLEN, H. F., *The Infinitive in Polybius compared with the Infinitive in Biblical Greek* (1907).

He had a good command of the vernacular κοινή and even attains the literary κοινή in Lu. 1:1–4 and Ac. 1:1–5; 17:16–34. The preface to his Gospel has often been compared to those of Thucydides and Herodotus, and it does not suffer by the comparison, for his modesty is an offset to their vainglory. Selwyn thinks that Luke was a Roman citizen, and he was a fit companion for Paul. He exhibits the spirit of Paul in his comprehensive sympathy and in his general doctrinal position. Renan calls Luke’s Gospel the most literary of the Gospels. He writes more like an historian and makes skilful use of his materials and with minute accuracy. His pictures in the Gospel have given him the title of “the painter.” Norden indeed thinks that Luke alone among the N. T. writers received Atticistic influence (Kunstprosa, II, pp. 485 ff. Cf. Blass, Die Rhythmen der asianischen und römischen Kunstprosa, p. 42). But we need not go so far. His versatility is apparent in many ways, but withal he makes a faithful use of his materials. His vocabulary illustrates his breadth of culture, for he uses 750 (851 counting doubtful readings) words not occurring elsewhere in the N. T. Some of them are still ἄπαξ λεγόμενα. One special item in his vocabulary is the large number of medical terms in his writings, as is natural, since he was a physician. His command of nautical phraseology is abundantly shown in Ac. 27 and 28.

9 Hobart, Medical Lang. of St. Luke, 1882. Many of these occur in the LXX also, but plenty remain to show his knowledge of the medical phraseology of the time.  
1 Smith, Voy. and Shipw. of St. Paul, 1882.  
language is that of a man of culture with a cosmopolite tone, who yet knows how to be popular also (Deissmann, Light, p. 241 f.). He not only has a rich vocabulary, but also fine command of the κοινή diction. In particular his style is more like that of Paul and the writer to the Hebrews. Among matters of detail in Luke one will note his use of the infinitives with ἐν τῷ (34 times) and of τοῦ with the infinitive (24 instances); σῶν (23 times) is frequent, though seldom in the other Gospels; καὶ ἀυτῶς (αὐτῷ) he has 28 times, and often constructions like αὐτῶς ὁ χρόνος; καὶ ἐγένετο or ἐγένετο δὲ he uses 43 times; he has δὲ καὶ 29 times; he loves πορεύσομαι (88 examples); he uses εἰ like an interrogative 19 times; τὸ occurs often before a clause, especially an indirect question; he makes frequent use of καὶ ἵνα; ἡκανός is common with him; ἥν with present participle occurs 55 times; the descriptive genitive is common; πρὸς with the accusative occurs 296 times with him and very often in the rest of the N. T.; he is fond of ἐνόπτων; τε (and τε καὶ) is almost confined to him in the N. T.; the optative is alone used by Luke in indirect questions and more often otherwise than by any other N. T. writer save Paul. This is a literary touch but not Atticistic. He alone makes any special use of the future participle; he is fond of πᾶς and ἄκρας; ὡς in temporal sense is common in Luke, once in Mark, not in Matthew; a good many anacolutha occur in Acts, and the change from direct to indirect discourse is frequent; the relative is often attracted to the case of the antecedent and often begins a sentence (Ac. 2:24); ἐπιστάτα is used 7 times (peculiar to Luke) rather than κύριε or ῥαββί; the syntax is throughout in general that of the κοινή of the time.3 [Page 123] Luke is also fond of ὁ μὲν οὖν (Acts). The historic present is rare in Luke (4 or 6 times). Luke uses the conjunctions and subordinate clauses with more literary skill than the other N. T. writers. He makes choice use of words and idioms. Cf. his report of Paul’s speech on Mars Hill. He accumulates participles, especially in the Acts, but not without stylistic refinement. In the Acts he is fond of ἐς when ἐν would ordinarily be used.

(d) JAMES. It is at first surprising that one recognized as such a thorough Jew as James, the brother of our Lord, and who used Aramaic, should have written in such idiomatic Greek. “In the skilful use of the Greek language its [Epistle of James] author is inferior to no N. T. writer.”1 There are very few Hebraisms in the Epistle, though the tone is distinctly Jewish, perhaps the earliest Christian document in the N.

I Thayer, Lang. of N. T., Hast. D. B.
T. But one cannot think that James wrote the book in Aramaic, for the indications of translation are not present, as Bishop John Wordsworth once argued. There is not, however, in James studied rhetoric or keen dialectics. The author of Hebrews, Luke and Paul far surpass him in formal rhetoric. “The Epistle of James is from the beginning a little work of literature,” “a product of popular literature” (Deissmann, Light, p. 235). The writer uses asyndeton very often and many crisp aphorisms. Just as the Synoptic Gospels preserve the local colour of the countryside, so the Epistle of James is best understood in the open air of the harvest-field (ib., p. 241). The incongruity of such a smooth piece of Greek as this Epistle being written by a Palestinian Jew like James vanishes when we consider the bilingual character of the people of Palestine (cf. Moulton, Camb. Biblical Essays, p. 487). Nevertheless, the author has a Hebrew mould of thought reminiscent of O. T. phrases. The atmosphere is Jewish and “international vulgarisms” do not explain it all. The pleonasms are just those seen in the LXX, and the book has the fondness for assonance so common in the O. T. Cf. Oesterley, Exp. Gk. Test., p. 394. He uses many examples that remind [Page 124] one vividly of the parables of Jesus and many of the ideas and phrases of the Sermon on the Mount are here. There is also a marked similarity between this Epistle and the speech of James in Ac. 15 and the letter there given, which was probably written by him. He is fond of repeating the same word or root, as θρησκός, θρησκεία (1:26 f.), his sentences, though short, are rhythmical; there is little in the forms or the syntax to mark it off from the current κοινή or the N. T. representatives of it, though his idiomatic use of the pronouns is worth mentioning, as is also that of ἄγε as an interjection, the gnomic aorist, the possible nominative μεστή in apposition with γλῶσσαν (3:8). But it is in the vocabulary that James shows his individuality, for in this short epistle there are 73 (9 doubtful) words not appearing elsewhere in the N. T., some of which are found in the LXX, like παραλλαγή. The use of συναγωγή (2:2) of a Christian assembly is noteworthy (cf. ἐκκλησία in 5:14 and ἐπισυναγωγή in Heb. 10:25). He has many compound words like ἀδιάκριτος, bookish words like ἐφυτεύς, philosophical terms like ὑλή, picturesque words like ὄλολύζω, some of a technical nature like πηδάλιον, some strictly classical like ἔοικε, χρή.

(c) JUDE. It is here assumed against Spitta and Bigg that Jude is prior to 2 Peter, the second chapter of which is so much like Jude. There is not in Jude the epigram of James, but he has a rugged rotundity of style that is impressive and vigorous, if a bit harsh. His style is marked by metaphor and the use of triplets. He cannot be said to be “steeped in the language of the LXX” with Chase, but there is a more Hebraistic

1 See this point well worked out by Mayor, James (Epis. of), Hast. D. B. Cf. Blass, Gr. of N. T. Gk., p. 279.
3 Ib., p. cci f. Mayor, ch. viii, has also a luminous discussion of the “Grammar of St. James,” which shows conclusively that he has little that is distinctive in his grammar. Cf. Thayer (Lex., p. 708) for list of words peculiar to James.
5 Der Zweite Brief des Petrus und der Brief des Judas, 1885.
6 Comm. on St. Peter and St. Jude, 1901.
7 Jude (Epis. of), Hast. D. B.
flavour than is observed in James, his brother. He has literary affinities with some of the apocryphal books and with some of Paul’s writings. If he shows a better command of Greek than 2 Peter, yet his [Page 125] “Greek is a strong and weighty weapon over which, however, he has not a ready command.”

Per contra, there is little that is peculiar in his grammar, for he shows a normal use of the Greek idiom. The optative occurs twice (πληθυνθείη, verse 2, and ἐπιτμήσαι in 9) and the article is used skilfully with the participle. Cases, pronouns, tenses, free use of participles, indicate a real mastery of current Greek. The true superlative occurs in τῇ ἁγιωτάτῃ πίστει. The idiomatic use of ἔβδομος without article is seen in Jude 14. The adverbial accusative is seen in τὸ δεύτερον 5 and τὸν ὅµοιον τρόπον 7. For further details see Mayor on “Grammar of Jude and of Peter” (Comm., pp. xxvi–Iv). He has 20 words (one doubtful) not found elsewhere in the N. T. A few of them like πλανήτης occur in the LXX. Some of them have a stately ring like κύματα ἡγησία, and a number occur which are found in writers of the literary κοινή. He uses ἡ κοινὴ σωτηρία (“the safety of the state”) in a Christian sense, and so of προγεγραμμένοι (“the proscribed”). But he has also command of technical Christian terms like ἄγιος, κλητοὶ, πίστες, πνεῦμα, ψυχικός as Paul used them. The vividness of his style hardly justifies the term “poetic.”

Deissmann (Light, p. 235) considers Jude a literary epistle in popular style and “cosmopolite” in tone (p. 242), with a certain degree of artistic expression. The correctness of the Greek is quite consonant with the authorship of the brother of Jesus, since Palestine was a bilingual country (Moulton, Camb. Bibl. Essays, p. 488). Besides, the Epistle has only 25 verses.

(f) PETER. As Peter was full of impulses and emotions and apparent inconsistencies, the same heritage falls to his Epistles. The most outstanding difference between 1 Peter and 2 Peter is in the vocabulary. 1 Peter has 361 words not found in 2 Peter, while 2 Peter has 231 not in 1 Peter. Many in each case are common words like ἁγιάζω, ἐλπίζω, εὐαγγελίζω, etc., in 1 Peter, and βασιλεία, ἐπιγινώσκω, ἐπιγινώσκω, etc., in 2 Peter. 1 Peter has 63 words not in the rest of the N. T., while 2 Peter has 57 (5 doubtful); but of these 120 words only one (ἀπόθεσις) occurs in both. This is surely a remarkable situation. But both of them have a [Page 126] number of words in common that occur elsewhere also in the N. T., like ἀναστροφή, ψυχή, etc. Both use the plural of abstract nouns; both have the habit, like James, of repeating words, while Jude avoids repetitions; both make idiomatic use of the article; both make scant use of particles, and there are very few Hebraisms; both use words only known from the vernacular κοινή; both use a number of classical words like

1 Chase, Jude (Epis. of), Hast. D. B.
2 See Thayer’s list (Lex., p. 709). For fresh discussion of the gram. aspects of Jude and 2 Pet. see Mayor’s Comm. (1908). He accepts the genuineness of Jude, but rejects 2 Peter.
3 Maier, Der Judasbrief, 1906, p. 169.
4 Bigg, Comm. on St. Peter and St. Jude, p. 225.
ἀναγκαστῶς (1 Peter, Plato), πλαστός (Her., Eur., Xen., 2 Peter)3; both use picture-words4; both seem to know the Apocrypha; both refer to events in the life of Christ; both show acquaintance with Paul’s Epistles, and use many technical Christian terms. But, on the other hand, 1 Peter is deeply influenced by the LXX, while 2 Peter shows little use of it; 1 Peter is more stately and elevated without affectation, while 2 Peter has grandeur, though it is, perhaps, somewhat “grandiose” (Bigg) and uses a number of rare words like ταρταρόω; 1 Peter makes clear distinctions between the tenses, prepositions, and uses smooth Greek generally, while 2 Peter has a certain roughness of style and even apparent solecisms like βλέμμα (2:8), though it is not “baboo Greek” (Abbott)5 nor like modern “pigeon English”; 1 Peter shows little originality and rhetorical power, while 2 Peter, though not so original as Jude, yet has more individuality than 1 Peter. Deissmann (Light, p. 235) says: “The Epistles of Peter and Jude have also quite unreal addresses; the letter-like touches are purely decorative. Here we have the beginnings of a Christian literature; the Epistles of Jude and Peter, though still possessing as a whole many popular features, already endeavour here and there after a certain degree of artistic expression.” It is not for a grammarian to settle, if anybody can, the controversy about those two Epistles, but Simcox6 is not far wrong when he says of 2 Peter that “a superficial student is likelier than a thorough student to be certain that it is spurious.” Spitta,7 Bigg8 and [Page 127] Zahn1 among recent writers suggest that in 2 Peter we have Peter’s own composition, while in 1 Peter we have the Greek of an amanuensis who either wrote out Peter’s ideas, revised them or translated Peter’s Aramaic into Greek. We know that Peter had interpreters (Mark, for instance), and Josephus used such literary help and Paul had amanuenses.

3 Cf. excellent lists by Chase, Hast. D. B., 1 Peter and 2 Peter. Many of these words are cleared up by the pap., like δοκίμων and ἀρετή.

8 Comm. on St. Peter and Jude.
Zahn

ZAHN, TH., Einl. in das N. T. Bd. I (1906), II (1907).

1 Einl. in d. N. T. Mayor in his Comm. on Jude and 2 Peter (1907) rejects 2 Peter partly on linguistic grounds.
On the other hand Chase (Hastings’ *D. B.*) and others reject 2 Peter entirely. It is worth mentioning that 2 Peter and the Apocalypse, which are the two books that furnish most of the linguistic anomalies in the N. T., both have abundant parallels among the less well-educated papyri writers, and it is of Peter and John that the terms ἄγραμματοι and ἴσως are used (Ac. 4:13). As we have a problem concerning 1 Peter and 2 Peter on the linguistic side, so we have one concerning John’s Gospel and Epistles on the one hand and Revelation on the other. The use of the article in 1 Peter is quite Thucydidean in 3:3 (Bigg), and eight times he uses the idiom like τὸν τῆς παρουσίας ὑμῶν χρόνον (1:17) and once that seen in τὸ βούλημα τῶν ἔννοι (4:3), the rule in the N. T. The article is generally absent with the attributive genitive and with prepositions as ἐξ ὑπνήσαμον ἀματος (1:2). There is a refined accuracy in 1 Peter’s use of ὦς (Bigg), cf. 1:19; 2:16, etc. A distinction is drawn between μή and οὗ with the participle in 1:8. Once ἵνα occurs with the future indicative (3:1). The absence of ὅν and the particles ἃρα, γε, ἢπεί, ἢπειδή, τε, δή, ποι, πῶς is noticeable. 1 Peter makes idiomatic use of μὲν, while 2 Peter does not have it. 2 Peter uses the “compact” structure of article, attributive and noun, like 1 Peter (cf. 2 Pet. 2:1, 10, 16, 21), but the “uncompact” occurs also (cf. 2 Pet. 1:3, 9, 11, 14). In Jude and 2 Peter the commonest order is the uncompact (Mayor, *Jude and Second Peter*, p. xxii). The single article in 2 Pet. 1:1, 11 is used of two names for the same object. Cf. also Jude 4. The article with the infinitive does not occur in 2 Peter (nor Jude). 2 Peter has some unusual uses of the infinitive after ἔχω (2 Pet. 1:15) and as result (2 Pet. 3:1 f.). 1 Peter has the article and future participle once (3:13) ὁ κακώσας. Both 1 Pet. (1:2) and 2 Pet. (1:2) have the optative πληθυνθεὶς (like Jude). 1 Peter twice (3:14, 17) has εἰ and the optative. See further Mayor on “Grammar of Jude and 2 Peter” (*Comm.*, pp. xxvi–lv).

*(g)* PAUL. There was a Christian terminology apart from Paul, but many of the terms most familiar to us received their interpretation from him. He was a pathfinder, but had inexhaustible resources for such a task. Resch¹ has done good service in putting together the words of Paul and the words of Jesus. Paul’s rabbinical training and Jewish cast of mind led Farrar² to call him a Haggadist. Simcox³ says that “there is hardly a line in his writings that a non-Jewish author of his day would have written.” Harnack⁴ points out that Paul was wholly unintelligible to such a Hellenist as Porphyry, but Ramsay⁵ replies that Porphyry resented Paul’s use of Hellenism in

---

⁵ Exp., 1906, p. 263.
favour of Christianity. But Hicks⁶ is certainly right in seeing a Hellenistic side to Paul, though Pfleiderer⁷ goes too far in finding in Paul merely “a Christianized Pharisaism” and a “Christianized Hellenism.” Paul and Seneca have often been compared as to style and ideas, but a more pertinent linguistic parallel is Arrian’s report of the lectures of Epictetus. Here we have the vernacular κοινή of an educated man in the second century A.D. The style of Paul, like his theology, has challenged the attention of the greatest minds.⁸ Farrar⁹ calls his language “the style of genius, if not the genius of style.” There is no doubt about its individuality. While in the four groups of his letters each group has a style and to some extent a vocabulary of its own, yet, as in Shakespeare’s plays, there is the stamp of the same tremendous mind. These differences of language lead some to doubt the genuineness of certain of the Pauline Epistles, especially the Pastoral Group, but criticism is coming more to the acceptance of all of them as genuine. Longinus ranks Paul as master of the dogmatic style (Παῦλος ὁ Ταρσεῖος δεῦτα καὶ πρῶτον θημι προστάμενον [Page 129] δόγματος ἄνοποδέκτου). Baur¹ says that he has “the true ring of Thucydides.” Erasmus (ad Col. 4:16) says: “Tonat, fulgurat, meras flammas loquitur Paulus.” Hausrath² correctly says that “it is hard to characterize this individuality in whom Christian fulness of love, rabbinic keenness of perception and ancient willpower so wonderfully mingle.” It is indeed the most personal³ and the most powerful writing of antiquity. He disclaims classic elegance and calls himself ἰδιώτης τῷ λόγῳ (2 Cor. 11:6), yet this was in contrast with the false taste of the Corinthians. But Deissmann (St. Paul, p. 6) goes too far in making Paul a mere tentmaker, devoid of culture. He is abrupt, paradoxical, bold, antithetical, now like a torrent, now like a summer brook. But it is

7 Urchristentum, pp. 174–178.
8 See Excursus I to vol. I of Farrar’s Life of Paul.
9 Ib., p. 623. On Paul’s style cf. Blass, Gr. of N. T. Gk., pp. 1, 5, 251, 276, 279, 281 f., 284 f., 289, 300–305. As to the Pastoral Epistles it has been pointed out that there is nothing in Paul’s vocabulary inconsistent with the time (James, Genuin. and Author. of the Past. Epis., 1906). It is natural for one’s style to be enriched with age. The Church Quart. Rev. (Jan., 1907) shows that all the new words in the Past. Epis. come from the LXX, Aristotle, κοινή writers before or during Paul’s time. Cf. Exp. Times, 1907, p. 245 f.
passion, not ignorance nor carelessness. He was indeed no Atticist. He used the vernacular \(\kappaοινή\) of the time with some touch of the literary flavour, though his quotation of three heathen poets does not show an extended acquaintance with Greek literature. The difference between the vernacular and the literary \(\kappaοινή\) is often a vanishing point. Paul’s style is unhellenic in arrangement, but in Ro. 8 and 1 Cor. 13 he reaches the elevation and dignity of Plato. Certainly his ethical teaching has quite a Hellenic ring, being both philosophical and logical. Hatch considers Paul to be the foremost representative of the Hellenic influence on early Christianity. He shows some knowledge of Roman legal terms and uses arguments calling for educated minds of a high order. The grammar shows little Semitic influence. He uses many rhetorical figures such as paronomasia, paradox, etc., which will be discussed in the chapter on that subject, [Page 130] some thirty kinds occurring in his writings. Farrar suggests that Paul had a teacher of rhetoric in Tarsus. He is noted for his varied use of the particles and writes with freedom and accuracy, though his anacolutha are numerous, as in Gal. 2:6–9. He uses prepositions with great frequency and discrimination. The genitive is employed by Paul with every variety of application. The participle appears with great luxuriance and in all sorts of ways, as imperative or indicative or genitive absolute, articular, anarthrous, etc. He is \(\Εβραίος\ \ἐξ\ \Εβραίων\,\) but he handles his Greek with all the freedom of a Hellenist. He thinks in Greek and it is the vernacular \(\kοινή\) of a brilliant and well-educated man in touch with the Greek culture of his time, though remaining thoroughly Jewish in his mental fibre. The peculiar turns in Paul’s language are not due to Hebraisms, but to the passion of his nature which occasionally (cf. 2 Cor.) bursts all bounds and piles parenthesis and anacoluthon on each other in a heap. But even in a riot of language his thought is clear, and Paul often draws a fine point on the turn of a word or a tense or a case. To go into detail with Paul’s writings would be largely to give the grammar of the N. T. In Phil. 2:1 we have a solecism in if τις σπλάγχνα. His vocabulary is very rich and expressive. Thayer (Lexicon, pp. 704 ff.) gives 895 (44 doubtful) words that are found nowhere else in the N. T., 168 of them being in the Pastoral Epistles. Nägeli has published the first part of a Pauline lexicon (from α to ε) which is very helpful and makes use of the papyri and inscriptions. The most striking thing in this study is the cosmopolitan character of Paul’s vocabulary. There are very few words which are found only in the Attic writers, like αἰσχρότης, and no cases of Atticism, though even in the letters α to ε he finds some 85 that belong to the literary \(\kοινή\) as shown by books, papyri and inscriptions. The most striking thing in this study is the cosmopolitan character of Paul’s vocabulary. There are very few words which are found only in the Attic writers, like αἰσχρότης, and no cases of Atticism, though even in the letters α to ε he finds some 85 that belong to the literary \(\kοινή\) as shown by books, papyri and inscriptions. Paul’s time, words like ἁρπαγός, ἄναξίν, etc. Then there are words that, so far as known, occur first in the N. T. in the Christian sense, like ἐκκλησία. But the vernacular κοινή as set forth in the papyri and inscriptions furnishes the ground-work of his vocabulary, when to this is added the use of the LXX (including the Apocrypha) as in ἄντιλαμβάνομαι, ἄγιάζω. Especially noteworthy are some nice Greek points that are wanting in Paul (as well as in the rest of the N. T.) and in the papyri and inscriptions, as οἶχος τέ εἶμι, αἰσθάνομαι, πάνυ, μᾶλα, ἔκτομαι (seldom in the inscriptions), etc. Nägeli sums up by saying that no one would think that Paul made direct use of Plato or Demosthenes and that his diligent use of the LXX explains all his Hebraisms besides a few Hebrew words like ἦμιν or when he translated Hebrew. His Aramaisms (like ἀββά) are few, as are his Latinisms (like πραιτώριον). “The Apostle writes in the style natural to a Greek of Asia Minor adopting the current Greek of the time, borrowing more or less consciously from the ethical writers of the time, framing new words or giving a new meaning to old words…His choice of vocabulary is therefore much like that of Epictetus save that his intimate knowledge of the LXX has modified it.”1 Paul’s Greek, in a word, “has to do with no school, with no model, but streams unhindered with overflowing bubbling right out of the heart, but it is real Greek” (Wilamowitz-Möllendorff, Die griechische Literatur des Altertums, 2. Aufl., p. 159. Cf. Die Kultur der Gegenwart, Tl. I, Abt. 8, 1905). Deissmann (Light, p. 234) sees Paul wholly as “a non-literary man of the non-literary class in the Imperial Age, but prophet-like rising above his class and surveying the contemporary educated world with the consciousness of superior strength.”

**Page 132** (h) **Writer of Hebrews.** Bruce1 is certain that the author was not a disciple of Paul, while Simcox2 is willing to admit that he may have belonged once to

1 Walter Lock, Jour. of Theol. Stud., 1906, p. 298. Athletic figures are almost confined to Paul (and Heb.), and Ramsay (Exp., 1906, pp. 283 ff.) thinks Tarsus left this impress on him. A further discussion of Paul’s rhetoric will be found in the chapter on Figures of Speech. Cf. J. Weiss, Beitr. zur paulin. Rhetorik, 1897; Blass, Die Rhyth. der asian. und röm. Kunstpr., 1905. Deiss. (Theol. Literaturzeit., 1906, pp. 231 ff.) strongly controverts Blass’ idea that Paul used conscious rhythm. Cf. Howson, Metaph. of St. Paul. On Paul’s Hellen. see Hicks, St. Paul and Hellen. (Stud. Bibl. et Eccl., 1896); Curtius, Paulus in Athens (Gesamm. Abhandl., 1894, pp. 527 ff.); Ramsay, Cities of St. Paul (pp. 9, 30–41); Heinrici, Zum Hellen. des Paulus (2 Cor. in Meyer); Wilamowitz-Möll., Die griech. Lit. des Altert. (p. 157); G. Milligan, Epis. to the Th. (1908, p. lv). Paul had a full and free Gk. vocab., thought in Gk., wrote in Gk. as easily as in Aramaic. But his chief indebtedness seems to be to the LXX, the vernac. κοινή and the ethical Stoical writers. Milligan (see above, pp. iii–lv) has a very discriminating discussion of Paul’s vocab. and style. Garvie (Stud. of Paul and His Gospel, p. 6 f.) opposes the notion that Paul had a decided Gk. influence. Wilamowitz-Möllendorff

---

1 Hast. D. B., Hebrews.
the school of Philo, as Paul did to that of Gamaliel. Harnack suggests Priscilla as the author. If Paul had “imperial disregard for niceties of construction,” Hebrews shows “a studied rhetorical periodicity.” Von Soden\(^4\) considers that in the N. T. Hebrews is “the best Greek, scarcely different in any point from that of contemporary writers.” This is the more surprising when one observes the constant quotation of the LXX. The grammatical peculiarities are few, like the frequent use of παρά in comparison, ἐπιείκος with apodosis (protasis suppressed), the perfect tense to emphasize the permanence of the Scripture record which sometimes verges close to the aorist (4:3), the frequent participles, the varied use of particles, periphrases, the absence of the harsher kinds of hiatus, the presence of rhythm more than in any of the N. T. books, and in general the quality of literary style more than in any other N. T. writing. Westcott notes “the parenthetical involutions.” “The calculated force of the periods is sharply distinguished from the impetuous eloquence of St. Paul.” The writer does not use Paul’s rhetorical expressions τί οὖν; τί γὰρ; Moulton (*Camb. Bibl. Essays*, p. 483) notes the paradox that the Epistle to the Hebrews was written by one who apparently knew no Hebrew and read only the LXX. The use of subordinate sentences is common and the position of words is carefully chosen. There is frequent use of μέν and τε as well as ὅθεν and διό. The optative occurs only once and illustrates the true κοινή. The studied style appears particularly in ch. 11 in the use of πίστει. The style is hortatory, noble and eloquent, and has points of contact with Paul, Luke and Peter. The vocabulary, like the style, is less like the vernacular κοινή than any book in the N. T. Of 87 words which are found in the LXX and in this book alone in the N. T., 74 belong to the ancient literary works and only 13 to the vernacular. 18 other words peculiar to this Epistle are found in the literary κοινή. There are 168 (10 doubtful) words in Hebrews that appear nowhere else in the N. T. (cf. Thayer, *Lexicon*, p. 708). These 168 words are quite characteristic also, like ἀντικαθίστημι, ἐγκαθίστημι, πανηγυρίς, πρωτοτόκια. Westcott*[Page 133]*\(^1\) considers the absence of words like εὐαγγέλιον, μοσχάριον, πληρώω remarkable. The chief bond of contact in the vocabulary of Hebrews with the κοινή is in the use of “sonorous” words like ἄντικαθίστημι, ἐπιείκος, ἀναπρόσωπος, but the author is by no means an Atticist, though he does approach the literary κοινή. Deissmann\(^2\) indeed considers Hebrews as alone belonging “to another sphere: as in subject-matter it is more of a learned theological work, so in form it is more artistic than the other books of the N. T.” He even feels that it “seems to hang in the background like an intruder among the N. T. company of popular books” (*Light*, p. 243).

1 Comm. on Heb., p. xlvi.
JOHN. The Johannine question at once confronts the modern grammarian who approaches the books in the N. T. that are accredited to John. It is indeed a difficult problem. There is a triple difficulty; the Gospel presents a problem of its own (with the Epistles), the Apocalypse also has its burden, and there is the serious matter of the relation of the Gospel and Apocalypse on the linguistic side. Assuming that John the Apostle wrote the Gospel, Epistles and Apocalypse, we have the following situation. The Gospel of John has a well-defined character. There are few Hebraisms in detail beyond the use of υἱὸς φωτός (12:36), καὶ in the sense of “and yet” or “but” (cf. Hebrew י and καὶ in LXX) as in 20:14, the absence of the particles save ὄν, and the constant co-ordination of the sentences with rhythmical parallelism. In the formal grammar the Greek is much like the vernacular (and literary) κοινή, but the cast of thought is wholly Hebrew. Ewald rightly calls its spirit “genuinely Hebrew,” while Renan even says that the Gospel “has nothing Hebrew” in its style. Godet calls the Gospel a Hebrew body with a Greek dress and quotes Luthardt as saying that it “has a Hebrew soul in the Greek language.” Schaff compares Paul to an Alpine torrent and John to an Alpine lake. There is indeed in this Gospel great simplicity and profundity. John’s vocabulary is somewhat limited, some 114 words (12 doubtful, Thayer, Lexicon, p. 704) belonging to the Gospel alone in the N. T. But the characteristic words are repeated many times, such as ἀλήθεια, ὑµαρτία, γινώσκω, γινώσκω, δόξα, καταργεῖν, κρίσις, λόγος, σκότος, φῶς, etc. “He rings the changes on a small number of elementary words and their synonyms.” But words like οἰκία, ἐσαργελέων, μετάνοια, παραβολή, σοφία do not occur at all. However, too much must not be inferred from this fact, for πιστεύω and ἐσαργελέω do appear very often. Other characteristics of the Gospel are the common use of ην in the non-final sense, the distinctive force of the pronouns (especially ἐκεῖνος, ἔµος, Ιδίος), the vivid use of the tenses (like Mark), the unusual use of ὄν, ἰδίος is frequent (21 times, and more than all the rest of the N. T.), frequent repetition, favourite synonyms. The Johannine use of καὶ, δὲ, ἀλλά, γάρ, εἰ, ὅτι, μὴ, οὐ, etc., is all interesting (see Abbott). The prepositions, the cases, the voices, the modes all yield good results in Abbott’s hands. The Epistles of John possess the same general traits as
the Gospel save that ὅνυν does not occur at all save in 3 Jo. 8 while ὅνι is very common. Καὶ is the usual connective. Only eight words are common alone to the Gospel and the Epistles in the N. T., while eleven are found in the Epistles and not in the Gospel. Westcott, however, gives parallel sentences which show how common phrases and idioms recur in the Gospel and the First Epistle. The Apocalypse has much in common with the Gospel, as, for instance, no optative is found in either; ὅπως is not in either save in Jo. 11:57; ἵνα is very common in Gospel, 1 John and Apocalypse, more so than in any other book of the N. T. save Mark, and ἵνα µή is very common in Gospel and Apocalypse; ὅνυν is almost absent from the Apocalypse [Page 135] as in Epistles and the discourses of Jesus, being common as transitional particle in narrative portion of Gospel¹; ἄρα, common in other Evangelists and Paul, is not found in Gospel, Epistles or Apocalypse; µέν, so common in Matthew, Luke (Gospel and Acts), Paul and Hebrews, is not found at all in Apocalypse and John’s Epistles and only eight times in his Gospel; ὅπερε, which appears 95 times elsewhere in the N. T., is not found in Gospel, Epistles or Apocalypse save once in Jo. 3:16; µή ποτε, fairly common in Matthew, Luke and Hebrews, does not occur in John’s writings save in Jo. 7:26 (Paul uses it also only once, 2 Tim. 2:25, preferring µή πῶς, which he alone uses, 13 exx.); µαρτυρεῖον is more frequent in Gospel than in 1 John and Apocalypse, but µαρτυρία is as common in Apocalypse as Gospel; ὠνομα is frequent in Gospel and Apocalypse as applied to God; ὁδὸν is found less often in Apocalypse than in Gospel; ἀληθινός is common in Gospel, Epistle and Apocalypse, though ἀληθῆς and ἀλήθεια do not appear in the Apocalypse; νικάω occurs only once in Gospel (16:33), but is common in 1 John and Apocalypse; δίκυοι is more frequent in Gospel and Apocalypse than in any other N. T. book (even Matt.); δίκυον appears about the same number of times in Gospel and Apocalypse; λόγος is applied to Christ in Jo. 1:1 and Rev. 19:13; the peculiar expression καὶ νῦν ἔστιν which occurs in John 5:25 is similar to the καὶ ἔστην of 1 Jo. 3:1, and the καὶ οὐκ ἔσθη of Rev. 2:2, 3:9; all are fond of antithesis and parenthesis and repeat the article often. Over against these is to be placed the fact that the Apocalypse has 156 (33 doubtful) words not in the Gospel or Epistles, and only nine common alone to them. Certainly the subject-matter and spirit are different, for the Son of Thunder speaks in the Apocalypse. Dionysius² of Alexandria called the language of the Apocalypse barbaric and ungrammatical because of the numerous departures from usual Greek assonance. The solecisms in the Apocalypse are not in the realm of accidence, for forms like ὀφθήκες, πέπτωκας, διὸδος, etc., are common in the vernacular κοινή. The syntactical peculiarities are due partly to constructio ad sensum and variatio structurae. Some ("idiotisms" according to Dionysius) are designed, as the expression of the unchangeableness of God by ὅπως ὤν (1:4). As to ὃ ἢν the relative use of ὃ in Homer may be recalled. See also ἢ οὐαί in 11:14, διούσιν ὅνον in 14:14, οὐκ αὐτός κ. in 8:13. Benson [Page 136] (Apocalypse) speaks of "a grammar of Ungrammar," which is a bold way of putting it. But the "solecisms" in the Apocalypse are chiefly cases of anacolutha. Concord is treated

---

² Apud Eus. H. E., VII, xxv.
lightly in the free use of the nominative (1:5; 2:20; 3:12), in particular the participles λέγων and ἔχων (4:1; 14:14); in the addition of a pronoun as in 3:8; in gender and number as in 7:9; in the use of parenthesis as in 1:5 f. Cf. Swete, Apocalypse, p. cxviii f.

The accusative, as in the vernacular κοινή (cf. modern Greek) has encroached upon other cases as with κατηγορεῖν (12:10). The participle is used freely and often absolutely in the nominative as ὁ νικῶν (2:26). Most of the variations in case are with the participle or in apposition, as ὁ μάρτυς after Χριστοῦ (1:5). Moulton\(^1\) has called attention to the numerous examples of nominative apposition in the papyri, especially of the less educated kind. The old explanation of these grammatical variations was that they were Hebraisms, but Winer\(^2\) long ago showed the absurdity of that idea. It is the frequency of these phenomena that calls for remark, not any isolated solecism in the Apocalypse. Moulton\(^3\) denies that the Apocalypse has any Hebraisms. That is possibly going too far the other way, for the book is saturated with the apocalyptic images and phrases of Ezekiel and Daniel and is very much like the other Jewish apocalypses. It is not so much particular Hebraisms that meet us in the Apocalypse as the flavour of the LXX whose words are interwoven in the text at every turn. It is possible that in the Apocalypse we have the early style of John before he had lived in Ephesus, if the Apocalypse was written early. On the other hand the Apocalypse, as Bigg holds true [Page 137] of 2 Peter, may represent John’s real style, while the Gospel and Epistles may have been revised as to Greek idioms by a friend or friends of John in Ephesus (cf. Jo. 21:24). With this theory compare Josephus’ War and Antiquities. One is slow (despite Moffatt’s positiveness in the Exp. Gk. Test.), in the light of Dante, Shakespeare, Milton, to say that John could not have written the Apocalypse, though it be the last of his books. Besides what has been said one must recall that the Apocalypse was composed on the Isle of Patmos, in some excitement, and possibly without careful revision, while the Gospel and First Epistle probably had care and the assistance of cultured friends. At any rate the vernacular κοινή is far more in evidence in the Apocalypse than in the Gospel and Epistles. “As Dante had the choice between the accepted language of education, Latin, and the vulgar tongue, so St. John had to choose between a more artificial kind of Greek, as perpetuated from

3 Prol., p. 9. Cf. also Jülicher, Intr. to N. T.; Bousset, Die Offenb. Joh., 1896; Lee, Speaker’s Comm. on Rev. Swete (Apoc. of St. John, 1906, p. cxx) thinks that John’s “eccentricities of syntax belong to more than one cause: some to the habit which he may have retained from early years of thinking in a Semitic language; some to the desire of giving movement and vivid reality to his visions, which leads him to report them after the manner of shorthand notes, jotted down at the time; some to the circumstances in which the book was written.” The Apoc. “stands alone among Gk. literary writings in its disregard of the ordinary rules of syntax, and the success with which syntax is set aside without loss of perspicuity or even of literary power.” Swete welcomes gladly the researches of Deissmann, Thumb and Moulton, but considers it precarious to compare a literary document like the Apoc. with slips in business letters, etc.

past teaching, and the common vulgar speech, often emancipated from strict grammatical rules, but nervous and vigorous, a true living speech.”

VII. N. T. Greek Illustrated by the Modern Greek Vernacular. Constant use will be made of the modern Greek in the course of the Grammar. Here a brief survey is given merely to show how the colloquial κοινή survives in present-day Greek vernacular. Caution is necessary in such a comparison. The literary modern Greek has its affinities with the literary κοινή or even with the Atticists, while the vernacular of to-day often shows affinities with the less educated writers of papyri of the N. T. time. The N. T. did indeed have a great effect upon the later κοινή when theological questions were uppermost at Alexandria and Constantinople. The cleavage between the literary and the vernacular became wider also. But apart from ecclesiastical terms there is a striking likeness at many points between the vernacular κοινή and modern Greek vernacular, though modern Greek has, of course, Germanic and other elements not in the κοινή. The diminutive is more common in the modern Greek than in [Page 138] the κοινή and usually in τ, as τό ὅρι. The optative is rare in the N. T.; in the modern Greek it has disappeared. The infinitive is vanishing before ἵνα in the N. T.; in the modern Greek νά has displaced it completely save with auxiliary verbs. The accusative in modern Greek has made still further headway and is used even with ὁπό and all prepositions. The μι verb has entirely vanished in modern Greek vernacular except ἓνα. The forms in –οσαν, –οσαν are very common, as are the α forms in aorist and imperfect. The forms in –ες (–ας) for perfect and first aorist are also frequent. The middle voice has almost vanished as a separate voice (cf. Latin). Prepositions in the vernacular (chiefly εἰς) have displaced the dative. The superlative is usually expressed by the article and the comparative. Kennedy gives an interesting list of words that appear either for the first time or with a new sense in the LXX or the N. T. (or the papyri) that preserve that meaning in the modern Greek, as δῶμα (‘roof’), θυσιαστήριον (‘altar’), καθηγητής (‘professor,’ in N. T. ‘master’), etc.

3 Thumb, Indoger. Forsch., 1903, p. 359 f. Boltz (Die hell. Spr., 1881, p. 10) quotes Rangabé as saying that the mod. Gk. is as far removed from that of the LXX as from that of Xenophon.
1 It still persists in Pontic-Cappadocian Gk. according to Thumb, Theol. Literaturzeit., 1903, p. 421.
2 There is a riot of indifference as to case in the vernacular Byz. Gk., as σύν τῆς γυναικός. Cf. Mullach, Gr. der griech. Vulgare, p. 27. Jean Psichari, Ρόδι και Μῆλω (1906), has written a defence of the mod. Gk. vernac. and has shown its connection with the ancient vernac. The mod. Gk. has like freedom in the use of the genitive case (cf. Thumb, Handb., pp. 32 ff.). Prepositions have displaced the partitive gen., the genitive of material and of comparison (abl.), in mod. Gk. The mod. Gk. shows the acc. displacing the gen. and dat. of the older Gk. (op. cit., p. 35 f.) after ἄκολουθος, ἄκοι, ἄπαντω, etc. The double acc. goes beyond anc. Gk. usages (op. cit., p. 36) as δῶλο ρόδινα τὸ βλέπω, ‘I see everything rosy.’
3 Sour. of N. T. Gk., pp. 153 ff.
ξενοδοχεῖον (‘hotel,’ in N. T. ξενοδοχέω=‘entertain strangers’), παιδεύω (‘chastise,’ from παῖς), φθάνω (‘arrive’), χορτάζω (‘feed’), etc. The list could be greatly extended, but let these suffice. A specimen of modern Greek vernacular is given from Pallis’ translation of Jo, 1:6–8: Βγῆκε ἡμᾶς δυνάμως σταλμένος ὑπὸ τὸ Θεό· τὸ ὄνομά του Ἰωάνης. Αὐτὸς ήρθε γιὰ κήρυγμα, γιὰ νὰ κηρύξει τὸ φῶς, ποῦ νὰ κάνει κι ὅλοι νὰ πιστέψουν. Λένε εἶναι ἐκεῖνος τὸ φῶς, παρὰ γιὰ νὰ κηρύξει τὸ φῶς. The literary modern Greek in these verses differs very little from the original N. T. text, only in the use of ὑπῆρξεν, ὄνομαζόμενος, διὰ νά, δέν, ἦτο. Moulton in an interesting note gives some early illustrations of modern Greek vernacular. In the second century A.D. Ἐσοῦ is [Page 139] found in OP 528. He quotes Thumb (BZ ix, 234) who cites from an inscription of the first century A.D. Ἐχοῦσας as nominative and accusative plural. And Ramsay (Cities and Bish., II, p. 537) gives Ἐπιτηδεύσουν as third plural form on a Phrygian inscription of the third century A.D. As one illustration note Paul’s use of κατέχω (Ro. 1:18). In modern Greek dialects κατέχω=HELL. ΟΡΩ, ‘I know.’

[PAGE 141] PART II
ACCIDENCE

[PAGE 143] CHAPTER V
WORD-FORMATION

I. Etymology. Grammar was at first a branch of philosophy among the Greeks, and with the foundation of the Alexandrian library a new era began with the study of the text of Homer. After Photius etymology “rules the whole later grammatical literature.” The Stoic grammarians were far better in etymology than in anything else and we owe them a real debt in this respect, though their extended struggle as to whether analogy or anomaly ruled in language has left its legacy in the long lists of “exceptions” in the grammars. In some grammars the term etymology is still applied to the whole discussion of Forms or Accidence, Formenlehre. But to-day it is

4 Cf. Thumb’s Handb. der neugr. Volksspr. (1895); V. and D., Handb. to Mod. Gk. (1887); Thumb-Angus, Handb. of Mod. Gk. Vernac. (1912).
Pallis

PALLIS, A., A Few Notes on the Gospel (1903).

3 Steinhall, Gesch. der Sprachw. etc., 2. Tl., pp. 347 ff.
generally applied to the study of the original form and meaning of words. The word ἐτυμολογία is, of course, from ἐτυμος and λόγος, and ἔτυ-μος, meaning ‘real’ or ‘true,’ is itself from the same root ἐτ– from which ἔτ–μος, ‘true,’ comes. So also ἔτ–άζω, ‘to test.’ Compare also Sanskrit सत–यास, ‘true,’ and सत–याम, ‘truth,’ as well as the Anglo-Saxon sóð, ‘sooth.’ Τοῦ ἐτυμού is the true literal sense of a word, the root. No more helpful remark can be made at this point than to insist on the importance of the student’s seeing the original form and import of each word and suffix or prefix. This is not all that is needed by any means, but it is a beginning, and the right beginning. “It was the comparative study of languages that first gave etymology a surer hold.” Curtius means etymology in the modern sense, to be sure.

II. Roots. It is not to be supposed that what are called roots necessarily existed in this form. They represent the original stock from which other words as a rule come. What the original words actually were we have no means of telling. They were not necessarily interjections, as some have supposed. Mere articulate sounds, unintelligible roots, did not constitute speech. Some interjections are not roots, but express ideas and can often be analyzed, as “jemine”=Jesu Domine. Others, like most nursery words, are onomatopoetic. There is, besides, no evidence that primitive man

———, Studien zur griech. und lat. Grammatik (1868–1878).

2 The whole subject of N. T. lexicography calls for reworking. Deissmann is known to be at work on a N. T. Lex. in the light of the pap. and the inscr. Meanwhile reference can be made to his Bible Studies, Light, and his New Light on the N. T.; to J. H. Moulton’s articles in the Exp. (1901, 1903, 1904, 1908); to Kennedy’s Sour. of N. T. Gk. (for LXX and N. T.); to Thayer’s N. T. Gk. Lex. and his art. on Lang., of N. T. in Hast. D. B.; to Cremer’s Theol. Lex. of N. T.; to Mayser’s Gr. d. griech. Pap. For the LXX phenomena see careful discussion of Helbing, Gr. d. Sept., pp. 112–136. Nothing like an exhaustive discussion of N. T. word-formation can yet be attempted. But what is here given aims to follow the lines of historical and comparative grammar. We must wait in patience for Deissmann’s Lex. George Milligan is at work with Moulton on his Vocabulary of the New Testament. Cf. also Nägeli, Der Wortsch. des Apost. Paulus, a portion of which has appeared. Especially valuable is Abb. Joh. Vocab. (1905). For the LXX cf. also Swete, Intr. to O. T. in Gk., pp. 302–304. The indices to the lists of inscr. and pap. can also be consulted with profit.

could produce speech at will. But a few root-words appear like the Latin *f* (though *fē* is found in Epic Greek). The number of Greek roots is comparatively few, not more than 400, probably less. Harris observes that of the 90,000 words in a Greek lexicon only 40,000 are what are termed classic words. The new words, which are constantly made from slang or necessity, are usually made from one of the old roots by various combinations, or at any rate after the analogy of the old words. Words are “the small coin of language,” though some of them are sesquipedalian enough. There seem to be two ultimate kinds of words or roots, verbs and pronouns, and they were at last united into a single word as η-μι, ‘say I.’

It does not seem possible to distinguish between verbal and nominal roots, as in English to-day the same word is indifferently verb or noun, “walk,” for instance. The modern view is that verbs are nominal in origin (Hirt, *Handb.*, p. 201). The pronominal roots may furnish most of the suffixes for both verbs (Ῥήματα) and nouns (实事求). Verbs, substantives and pronouns (ἀντωνυμία), therefore, constitute the earliest parts of speech, and all the others are developed from these three. Adjectives (Ῥῄματα Ἐπιθετα) are merely variations from substantives or pronouns. Adverbs (Ἐπαρῥήματα) are fixed case-forms of substantives or adjectives or pronouns. Prepositions (προθέσεως) are adverbs used with nouns or with verbs (in composition). Conjunctions (ὑπόθεσιμοι) are adverbs used to connect words and sentences in various ways. Intensive (Επιταθεος) particles are adverbs from nominal or pronominal stems of a special kind. Speech has made a very small beginning with isolated words; in fact the sentence is probably as old as human speech, though we first discuss words. The number of root-words with the mere ending is not very great, but some few survive even in the N. T., where the case-ending is added directly to the root, as ἄλς (ἄλα, Mk. 9:50), with which compare Latin *sal*, English *salt*. So ναυς (Ac. 27:41), Latin *nāvīs*. Instead of ἄλς the N. T. elsewhere follows the κοινή in using τὸ ἄλας, and τὸ πλοῖον instead of ναυς. In ποὺς (πόδ-ς) the root is only slightly changed after the loss of δ (analogy of οὖς or ὀδοῦς). The pronoun εἶς (Εὐ-ς) is similarly explained. Pronouns and numerals use the root directly. In verbs we have many more such roots used directly with the personal endings without the thematic vowel ο/ε and sometimes without any tense-suffix for the present, like η-μι (φα-μι). The whole subject of verbs is much more complicated, but in general the non-thematic forms are rapidly disappearing in the N. T., while in the vernacular modern Greek the non-thematic or μι verbs are no longer used (save in the case of εἶμαι), as δίδω for δίδω-μι, for instance. A number of these roots go back to the common Indo-Germanic stock. Take δικ, the root of δικνύ-μι. The Sanskrit has ὁ-δ-μ; the Latin *dic-o*, *in-dic-o*, *ju-dex*; the Gothic *teih*; the German *zeigen*. Take the thematic verb σκέπ-το-μι. The

7 Giles, Comp. Philol., p. 235.
1 “Über das relative Alter der einen oder der anderen Wortklasse läßt sich nichts Sicheres ausmachen” (Vogrinz, Gr. des hom. Dial., 1889, p. 164).
Sanskrit root is श्रत् (‘look’), श्रात्स्य=spy. The Zend has श्रत्, the Latin spec-ius, spec-ulum, spec-ito, etc. In the Greek root metathesis has taken place and σκεπ has become [Page 146] σκεπ in σκέπ-το-μαι (‘to spy out’), σκοπ-ή (‘a watching’), σκοπ-ώ (‘a watch-tower’), σκοπ-ός (‘a spy,’ ‘a goal’), σκόπε (‘owl’). Cf. Ph. 3:14 κατά σκοπόν. The old Greek writers made μυστήριον=μᾶς τηράν!

III. Words with Formative Suffixes. The Indo-Germanic languages have a highly developed system of affixes, prefixes, infixes, suffixes. The suffixes are used for various purposes, as case-endings of nouns, as personal endings of verbs, as aids in the creation of words (formative suffixes). The Greek is rich in these formative suffixes, which are more or less popular at various periods of the language. The suffixes in the Greek are quite similar to those in the older Sanskrit. When the formative suffixes are used directly with the root, the words are called primitives; when the stem of the word is not a root, it is called a derivative. Hence there are primitive and derivative verbs, primitive and derivative substantives, primitive and derivative adjectives. There are, of course, in the N. T. Greek no “special” formative suffixes, though the κοινή does vary naturally in the relative use of these terminations from the earlier language. In the modern Greek a number of new suffixes appear like the diminutives –πουλος (πῶλος, ‘foal’), κτλ. “In all essentials the old patterns are adhered to” in the N. T. word-formation. See also Hadley-Allen (pp. 188 ff.) for the meaning of the Greek formative suffixes.

(a) VERBS. On the stem-building of the verb one can consult Hirt or Brugmann for the new point of view. Without attempting a complete list of the new words in the κοινή, I give what is, I trust, a just interpretation of the facts concerning the new words appearing from the time of Aristotle on that we find in the N. T. Hence some classes of words are not treated.

Brugmann

BRUGMANN, K., Elements of Comparative Grammar of the Indo-Germanic Languages (translation by Wright, 1895).

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).
1. **Primary or Primitive Verbs.** No new roots are used to make verbs with old or new terminations in the *κοινή*. The tendency [Page 147] is all towards the dropping of the non-thematic or μι forms both with the simple root and with the suffix. The remnants of the μι forms, which are not quite obsolete in the N. T., will be given in the chapter on the Conjugation of the Verb. Here may be mentioned ὑπόλλαμι, which uses the suffix –νο. Thematic verbs made from the root by the addition of ὡε are very common, like λέγω, λείπω (λιπ). The N. T., as the κοινή, has new presents like κρύβω, νίτπω, χύνω, etc. These kept increasing and are vouched for by modern Greek. Cf. Thumb, Handbook, pp. 129 ff.

2. **Secondary or Derivative Verbs.** Not all of these verbs are formed from nouns; many come also from verbs. Denominatives are made from nouns, like τιμάω from τιμή, while verbs (post-verbals, Jannaris) are made from verbs. The simple denominatives, ending in –άω, –έω, –εύω, –άζω, –ίζω, are not always distinguished from the intensive verbs or the causative denominatives, though –όω, –άνω, –ώω more commonly represent the latter. ὀπτάνω (from ὀπτω) besides Ac. 1:3 appears in the LXX, Hermes, Tebt. Papyri. Cf. also the rare λιμπάνω. The κοινή is rich in new verbs in –νω. Verbs in –άω are common in the N. T., as in the κοινή, like διψάω, ζάω, etc. Ἀνα-ζάω occurs in Artem., Photius, inscriptions, etc. In the modern Greek verbs in –άω have gained at the expense of verbs in –εω. They belong to the oldest Greek speech and come from feminine stems in –α. Verbs in –άζω show great increase in the N. T. as in the κοινή and modern Greek, like ἁγιάζω (ἁγιος, ἁγίζω, LXX), ἔνταφιάζω (ἔνταφια, Anthol., Plut.), νηπιάζω (νηπίος) in Hippocrates, στυγνάζω (from στυγνός) in Schol. on Ἀesch. and in LXX σινιάζω (σινίον, eccl., Byz.). Πυρράζω (Mt. 16:2 f.) occurs in LXX and Philo, but W. H. reject this passage.

The majority of the new verbs in –εω are compound, as ἀσχημονέω, πληροφορέω (πληρο-φόρος, LXX, pap.), but δυνατεώ (only in N. T.) is to be noticed on the other side. Ἀκαφεώ (from ἀκαφος) is found [Page 148] in Diodorus; εὐπροσώπω (εὐπρόσωπος) is found in Gal. 6:12 (in papyri, 114 B.C.; εὑποσ εὐπροσώπωμεν, Tebt. P. No. 19,12 f.). Cf. Moulton, Expositor, 1903, p. 114. These verbs have always been very numerous, though –εω gradually retreats before –ω. Γημορέω (Arist., LXX, Jos.) is formed from the perfect ἔγρηγορα, which is not in the N. T., but Winer long

---

3 Harris, MS. Notes on Gk. Gr.
6 Thumb, Handb. of Mod. Gk., V., p. 135 f. There is frequent interchange between forms in –άζω, –ίζω and –ῶ.
7 Blass, Gr. of N. T. Gk., p. 61.
 ago found a similar form in ἔπικεχαρέω (Papyri Taurin. 7). 1 Ελαττονέω (Arist., LXX, pap.) is from Ἐλαττον. Ἐλλογέω (and –ῶο) is in inscriptions and papyri. Ἐξάκολουθεώ (Polyb., Plut., inscriptions) is not “biblical” as Thayer called it. Ἀύθεντεω (ἀύθεντης, αὐτός and ἕντεω) is in the koine, according to Moeris, for the Attic αὔτοδικέω. (In the late papyri see Deissmann, Light, p. 85.) No great distinction in sense exists between –ῶο and –έω.

Verbs in –έω are also very common and are formed from a great variety of stems. Αἰχμαλωτεώ (from αἰχμάλωτος) is read in 2 Tim. 3:6 only by Dε EKL al. pl. Or., in the form in –ςεω being genuine. It is, however, common in the LXX, as is Ἐγκρατεόμαι (1 Cor. 9:25), from Ἐγκρατής (in Aristotle). Γυμνετεώ (not γυμνητεώ, Dio Chrys., Plut., Dio Cass., etc.) is found in 1 Cor. 4:11 and is from γυμνήτης. Ζήλευε (Simplic., Democrat.,) not ζήλωσον, is the correct text in Rev. 3:19 (so W. H. with ABC against 8P). Both are from ζήλος. Θρίαμβεώ (from θριάμβος) is in the literary koine. 2 Ἐρατεώ (Lu. 1:8) is from ἐρατής and is found in the LXX, the koine writers and the inscriptions. Μεστεώ (Heb. 6:17) is from μεσίτης and is found in Arist., Polyb. and papyri. Μαθητεώ is from μαθητής (Plut., Jambl.); ὅλοθρεώ (Heb. 11:28, LXX) is from Όλοθρος (ADE read Ὄλοθρεόν in Heb. 11:28). In Ac. 3:23 Ἐξολοθρεώ is the form accepted by W. H. after the best MSS. of the LXX. 3 Παραβολεύο (Mt. 22:15) is from παρά and occurs in the LXX. Παρα-βολεύομαι is the correct word in Ph. 2:30 against CKLP which read παρα-βουλεύομαι. The word is from παρά-βολος, which has not been found in other writers, but an inscription (ii/A.D.) at Olbia on the Black Sea has the very form παραβολεοσάμενος used by Paul (cf. Deissmann, Light, p. 84). Περπερεύομαι (1 Cor. 13:4) is made from πέρπερος and is found in [Page 149] Antoninus. Χρηστεύομαι is from χρηστός. Three verbs in –θω appear which are made from verbs in –ῶο and –έω, viz. ΄Αλήθο (ᾀλέω), κνήθω (κνώ), νήθω (νέω), one (νήθω) being found also in Plato Polit. (p. 289 c). Cf. modern Greek θέτω (τίθημι).

The causative ending –ῶο is usually formed on noun-stems and is very common, sometimes supplanting verbs in –έω or –ίω, as ἀνα-καινό (Isocrates, ἀνακαίνιζω), 1 Ἀναστατοῦ (from Ἀνάστατος, LXX, papyri. Cf. Ἀνάστατοῦ με, ‘he upsets me,’ Deissmann, Light, p. 81); ἄρτοφυνό (Ἀνθιλ., classical ἄρτοφυνίζω); δεκατεώ (classical δεκατεύω); δολιόω (LXX, from δόλος); δύναμοω (LXX, eccl. and Byz., from δύναμις); ἔξοδον (often in LXX, but W. H. read ἔξοδον in Mk. 9:12, Plutarch even ἔξοδον in Mk. 9:12, Plutarch even ἔξοδον) (LXX) is from θεμελίων; κασσώ (from κασσός, Disc., Galen); κεφαλιόω (Lob., ad Phryn., p. 95, κεφαλιζω, though not in any known Greek author) W. H. read in Mk. 12:4 with ΝΒΛ as against κεφαλιώω and it means ‘beat on the head’ (cf. κολαφιζω). So κολοβῶ (from κόλοβος, Arist., Polyb.,

1 W.-M., p. 115.
1 Cf. Sütterlin, Zur Gesch. der Verba Denom., p. 95.
Diod.); νεκρός (from νεκρός, Plut., Epict., M. Aur., inscriptions); κραταιόω (LXX, eccl.), from κρατύνα; σαρώ (Artém., Apoll., Dysc.), from σαρώ (sárōs); σημειώ (from σημεῖον, Theoph., Polyb., LXX, Philo, Dion. Hal., etc.); σθενό (Rhet. Gr.), from σθενέω (sthéneō); χαριτό (LXX, Jos., eccl.), from χάρις. Verbs in –ίζω do not always have the full causative idea,2 ἀδίζω=`deem worthy’ and δικαίω=`deem righteous.’

Verbs in –ίζω do not necessarily represent repetition or intensity. They sometimes have a causative idea and then again lose even that distinctive note and supplant the older form of the word. Forms in –ίζω are very common in modern Greek. ἡπτίζω (LXX, Athen.), for instance, in the N. T. has displaced ῥαίνω, and βαπτίζω (since Plato) has nearly supplanted βάπτω. These verbs come from many sorts of roots and are very frequent in the N. T., as the κοινή is lavish with them. The new formations in the κοινή appearing in the N. T. are as follows: αἰρετίζω (from αἰρετός, LXX, inscriptions); αἰγμαλωτίζω (literary κοινή and LXX), from αἰγμαλωτός; ἀναθεματίζω (LXX and inscriptions), from ἀνάθημα; ἀνεμίζω (Jas. 1:6) is found in schol. on Hom. Od. 12, 336, the old form being ἄνεμω; ἄτενίζω (from ἄτενής, Arist., Polyb., Jos.); δειγματίζω (from δείγμα) appears in apocryphal Acts of Peter and Paul; δογματίζω (from δόγμα) is in Diodorus and the LXX; ἡγγίζω (from ἡγγύς, from Polyb. and Diod. on); ἐξ-επινίζω (from ἐπίνως, LXX, Plut.); θεατρίζω (from θεάτηρ) in ecclesiastical and Byzantine writers, ἐκθεατρίζω being in Polybius; ἦλιτίζω (from ἦλιον) is [Page 150] found in Serapeum papyrus 163 B.C.; οὐδαίζω (from ὀυδαίος) is found in the LXX and Josephus and is formed like ἐλληνίζω and similar ethnic terms; καθαρίζω (classic καθαρός, from καθαρός, LXX, Jos., inscriptions); κρυσταλλίζω (from κρύσταλλος, Rev. 21:11) is still “not found elsewhere” (Thayer); μυκτηρίζω (from μυκτήρ, ‘the nose’) is in the LXX; ὄθρηζω (from ὄθρος) is in the LXX; πελεκίζω (from πέλεκος) is common in literary κοινή; σκορπίζω (akin to σκορπίς, root skerp) is in LXX and in literary κοινή, Attic form being σκεδάννυ, old Ionic according to Phrynichus; σπλαγχνίζω (from σπλαγχνα, Heb. דִּיוּן) occurs in LXX, Attic had an active σπλαγχνέω; συμμορφίζω (from σύμμορφος) is the correct text in Ph. 3:10 against συμμορφοῦ (EKL), though neither word is known elsewhere, perhaps coined by Paul; φυλακίζω (from φυλάκις) is in LXX and Byzantine writers. Of verbs in –όω, γογγύζω (onomatopoetic, like τονθύρζω of the cooing of doves) is in the LXX and the papyri.

Verbs in –όω are fairly common, like παροξύνω. Only one word calls for mention, σκληρύνω (from σκληρός), which takes the place of the rare σκληρύνω and is found in LXX and Hippocrates. No new verbs in –άνω (like εὐφράνω) appear in the N. T. Verbs in –σκω are, like the Latin verbs in -scire, generally either inchoative or causative. It is not a very common termination in the N. T., though εὐθρίσκω, γινώσκω and διδάσκω occur very often, but these are not derivative verbs. In the N. T. the inchoative sense is greatly weakened. The suffix belongs to the present and the imperfect only. In modern Greek it has nearly disappeared save in the dialects.1 Γαμίσκω (accepted by W. H. in Lu. 20:34) rather than γαμίζω is causative (Arist. pol.); γηράσκω and μεθύσκω both come from the earlier Greek.2 Ἔν-διδό-σκω occurs

---

2 lb.
1 Jann., Hist. Gk. Gr., p. 302; Thumb, Handb., p. 133.
in the LXX, Jos., inscriptions. The new present στήκω (Mk. 11:25) is made from the
perfect stem έστημα (στέκω in modern Greek). As in N. T., so in modern Greek
desideratives in –σίω, –σίω drop out. The verbs in –τάω still retained (δύναλλάω,
δροτρ-τάω, θυμ-τάω, κοπ-τάω) have no desiderative meaning. Of these δύναλλάω, for
the old δύναλλομαι, is late κνή; δροτρώω is from Theophr. on, κοπάω is late in the
sense of ‘toil.’ No new reduplicated verbs appear in the N. T.

(b) Substantives.

1. Primary or Primitive Substantives. Here the formative (stem-suffix) suffix is
added to the root. It is important to seek the [Page 151] meaning not only of the root,
but of this formative suffix also when possible. The root has in most cases the strong
form, as in λόγ(λεγ)-ο-ς. These substantives are thus from the same root as the verb.
With –μό-ς, –μή, expressing action, are formed in the old Greek words like θο-μός, τι-
μή. With –μα, denoting result, we find ἄντ-από-δο-μα (LXX, old Greek ἄντ-από-δο-
σις, from ἄντ-από-δίδωμι; διά-στη-μα (from δι-ιστήμη, Arist., Polyb., Philo; ἕν-δυ-
μα (from ἕν-δῶ, LXX, Strabo, Jos., Plut.); θέλη-μα (from θέλω, Arist. and LXX);
κατά-κρι-μα (from κατα-κρίνω, Dion. Hal., pap.); κατά-λο-μα (from κατα-λο-ω, literary
κοινή for old κατ-αγωγέον, and with idea of place); κατά-στη-μα (καθ-ιστή-
μι, Plut. and the LXX); κτίς-μα (from κτίζω, Strabo, Dion. Hal.); πρόσ-κο-μα (from
προς-κόπ-το, in LXX and Plut.). The suffix –σι-, meaning action (abstract), appears
in ἄνα-βλεψ-ις (Arist., LXX); ἄνα-δειξ-ις (from ἄνα-δείκ-νυ-μι, Plut., Diod., Strabo,
Sirach); θέλη-σις in Heb. 2:4 (from θέλω, a “vulgarism,” according to Pollux); κατά-
νυ-τις (from κατα-νύσσ-ω, LXX); κατά-κρις (from κατα-κρίνω, Vettius Valens,
ecl.); πε-ποιθ-η-σις (from πε-ποιθ-α, πειθό, Josephus and Philo, condemned by the
Atticists); πρόσ-κλι-σις (from προσ-κλίν-ω, Polyb. and Diod.); πρόσ-χυ-σις (from
προσ-χέ-ω, Justin Martyr and later). The suffix –μοι is used with πεισ-μοι (from
πειθό, Ignatius and later) and ἐπι-λης-μοι (ἐπι-λανθ-άνω, ἐπι-λής-μοι, Sirach).
Σαγ-ήνη (LXX, Plut., Lucian) has suffix –ην (cf. –ονο, –ονη, etc.). Δια-σπαρ-ά (δια-
σπαέρω, LXX, Plut.) and προσ-ευχ-ή (προς-εὐχ-ομαι, LXX, inscriptions) use the
suffix –η (–η). Cf. ὅπο-γραφ-ή (N. T., papyri), ὅπο-δοχ-ή (inscriptions), ἤροι (papyri), ἐμπλοκή (ἐμπλέκοντα, inscriptions), δια-τατή (δια-τάσσω, papyri, inscriptions,
later writings). The agent is usually –της (Blass, Gr., p. 62), not –τωρ or –τηρ as in
dιώκτης (from δίωκω, earliest example) and δό-της (from δι-δω-μι, classic δότηρ. But
cf. σο-τηρ). See γνώστης (γνώσ-σκω, LXX, Plut.), κτισ-της (κτίζω, Arist., Plut.,
LXX), ἐπι-στα-της (only in Luke, ἐφιστήμι). See further under compound words for
more examples. In modern Greek –της is preserved, but –τωρ and τηρ become –
tορης, –τιρας. Jannaris, op. cit., p. 288; Thumb, Handbook, p. 49. I pass by words in
–ευς, –μην, –τρον, etc.

2. Secondary or Derivative Substantives. Only important words not in common
use in the older Greek can be mentioned.

(a) Those from verbs. Words in –μός expressing action. From verbs in –άζω come
ἄγαι-μός (ancient Greek ἄγιζω, but later form common in LXX and N. T.); ἄγνισ-
μός (from ἀγνίζω, Dion. Hal., LXX, Plut.); ἄπαρσι-μός (Dion. Hal., Apoll. Dyse.,
papyri); ἄρπαγ-μός (ἄρπαξω is from root ἄρπ, like Latin rapio. ἄρπαγ-μός once
Abstract nouns in –σις are βιω-σις (in Sirach, from βιω); ἄνα-καινω-σις (Ἀνακαινώ, Etym. M. Herm.); ἄπαντη-σις (ἡ-αντά-ω, LXX, Polyb., Diod., papyri); ἄποκάλυψις (LXX, Plut.); ἄπο-κατά-στα-σις (Polyb., Diod., papyri, etc.); ἄπο-στα-σια (LXX); ἐκζῆτη-σις (ἐκ-ζητέω, true text in 1 Tim. 1:4, Basil Caes., Didym.). ἔν-δόμη-σις (from ἔνδομιο, Jos., also ἐνδούμισις); ἑπιποθή-σις (LXX, from ἑπιποθέω); ὑπ-ἀντή-σις (LXX, Jos., App.). Words in –σις, common in Hebrews, make few new formations in the later Greek. Ἀγάπη begins to displace ἡγάπησις (LXX, inscription in Pisidia, and papyrus in Herculaneum). Abstract nouns in –εία (W. H. –ία) are chiefly from verbs in –είω, ἀθροιστά-εία (from ἀθροιστάω, Polyb., Diod., papyri, and usually in bad sense); ἐπι-πόθεια (so W. H., not ἐπι-ποθία, in Ro. 15:23, from ἐπιποθέω, probably by analogy like ἐπιθυμία. Not found elsewhere). Ἐρυθεία (from ἐρυθέω, Arist. pol. The verb from ἐρυθός, ‘working for hire’); ἱερατεία (from ἱερατεύω, Arist. pol., Dion. Hal., LXX, inscriptions); λογεύω (ἵα) is from λογεύω (‘collect’) and is found in inscriptions, ostraca, papyri (see Deissmann, Light, p. 105); μεθοδεία (from μεθόδεω, which occurs in the κοινή, from μέθοδος, but not the abstract noun). [Page 153]

From ὄρειλο we have ὄφειλή (common in the papyri), ὄφειλμα (Plato, Arist., LXX). Words in –μα (result) are more common in the later Greek and gradually take an abstract idea of –σις in modern Greek. The new formations appearing in the N. T. are ἄ-γνό-μα (O. T. Apoc., from ἀγνόω); αἰτίω-μα (correct text in Ac. 25:7, and not αἰτίαμα, from αἰτιάμα). Cf. αἰτίωσις in Eustathius, p. 1422, 21. This form as yet not found elsewhere); ἄντλημα (from ἄντλεω, Plut., what is drawn, and then strangely a thing to draw with, like ἄντλητρ or ἄντλητριον); ἀπ-ἀγγα-μα (from ἀπαγαγό, and this from ἀπό and αὐγή, in Wisdom and Philo); ἄπο-σκιά-μα (from ἄποςκιάζο, and this from ἀπό and σκία. Only in Jas. 1:17); ἄρθενη-μα (from ἄρθενέω, in physical

sense in Arist. hist., papyri); βάπτισ-μα (from βαπτίζω, “peculiar to N. T. and ecclesiastical writers,” Thayer). In βάπτισ-μα, as distinct from βαπτισ-μός, the result of the act is included (cf. Blass, *Gr. of N. T. Gk.*, p. 62); ἐξέρα-μα (from ἐξεράνο, in Dioscor., example of the verb, cf. Lob., *ad Phryn.*, p. 64); ἠττη-μα (from ἠττάω-μαι, LXX, in ecclesiastical writers); ἱεράτευ-μα (from ἱεράτευσ, LXX); κατ-όρθω-μα (from κατ-όρθων, literary κοινή, as Polyb., Diod., Strabo, Jos., Plut., Lucian and 3 Macc.); ῥάπσι-μα (from ῥάπσις, Antiph., Anthol., Lucian); στερεό-μα (from στερεόδω, Arist., LXX). Blass calls attention to the fact that in the later Greek words in –μα, like those in –σίς, –τής, –τος, often prefer stems with a short vowel, as δόμα (δόσις), θέμα (θέσις), though this form is already in the older Doric, κλ-μα, κρ-μα, πόμα (Attic πώμα). Hence ἄναθ-μα in N. T., though ἄναθημα in Lu. 21:5 (W. H. acc. to BLQG, etc.), and in the papyri “nouns in –μα are constantly showing short penult.” But ἄναθεμα, like θέμα and δόμα, belongs to the list of primary substantives.

Words in –τής (agent) are fairly numerous, like βαπτισ-τής (from βαπτίζω, Jos.); βια-τής (from βίαζω. Pind., Pyth. and others use βιατάς); γογγυσ-τής (from γογγύζω, Theodotion and Symm. translation of the LXX); ἐλληνισ-τής (from ἐλληνίζω, not in Greek authors, though ἐλληνίζο is, as in Xen., Anab., and Strabo, etc.); ἐξ-ορκισ-τής (from ἐξ-ορκίζω, Jos., Lucian, eccl. writers); εὐαγγελίσ-τής [Page 154] (from εὐαγγελίζω, eccl. writers); κερματισ-τής (from κερματίζω, Niceet., Max. Tyr.); κολλυβισ-τής (found in Men. and Lys.) has no verb κολλυβιζω, but only κολλύβος, a small coin; λυτρό-τής (from λυτρόν, LXX and Philo); μερίσ-τής (from μερίζω, Pollux); προς-κυνή-τής (from προσκυνέω, inscriptions, eccl. and Byz.); στασιασ-τής (from στασιάζω, Diod., Dion. Hal., Jos., Ptol.); τελειώ-τής (from τελειώδες, only in Heb. 12:2).

A few late words in –τήρ-ιον (from –τήρ and –ιον) occur as ἄκρυστήριον (from ἄκροαόμαι, Plut. and other κοινή writers) where –τήριον means ‘place’; ἒλαστήριον (from ἐλάσκομαι, LXX, inscriptions, papyri, Dio Chrys.) is a substantive in the N. T., made probably from the adjective ἐλαστήριος (cf. σωτήριος) and means ‘propitiatory gift’ or ‘means of propitiation’ and does not allude to the mercy seat or covering. However, in Heb. 9:5 ἑλάστηριον does have the meaning of ‘place of propitiation’ or ‘mercy seat’ (cf. θυμία-τήριον). Deissmann passed this passage by, though he is correct in Ro. 3:25. Cf. φιλακτήριον.

(b) Those from substantives. Several words expressing place are formed after the fashion of the older Greek as ἄκροαόμαι, Plut. and other κοινή writers) where –τήριον means ‘place’; ἒλαστήριον (from ἐλάσκομαι, LXX, inscriptions, papyri, Dio Chrys.) is a substantive in the N. T., made probably from the adjective ἐλαστήριος (cf. σωτήριος) and means ‘propitiatory gift’ or ‘means of propitiation’ and does not allude to the mercy seat or covering. However, in Heb. 9:5 ἑλάστηριον does have the meaning of ‘place of propitiation’ or ‘mercy seat’ (cf. θυμία-τήριον). Deissmann passed this passage by, though he is correct in Ro. 3:25. Cf. φιλακτήριον.

2 Gr. of N. T. Gk., p. 62 f. For same thing in LXX (ἀνάθεμα, πρόθεμα, δόμα, etc.) see C. and S., Sel. from LXX, p. 28.

3 Moulton, Cl. Rev., 1904, p. 108. He instances besides ἄναθεμα in the sense of ‘curse,’ θέμα, ἐπίθεμα, πρόθεμα, πρόδομα. On ἄναθεμα, for exx. in iii/B.C. inscr., see Glaser, De Rat., quae interc. inter semr. Polyb. etc., 1894, p. 82.

1 See Deiss. B. S., p. 131 f., where a lucid and conclusive discussion of the controversy over this word is given. See also Zeitschr. für neutest. Wiss., 4 (1903), p. 193.
ἀμπελ-ών from ἀμπελός, in the LXX, Jos., inscriptions and papyri),2 with which compare μυλών (–όνος) in Mt. 24:41 according to DHM and most cursives instead of μύλος. Moulton (The Expositor, 1903, p. 111) has found φοινίκων (–όνος), ‘palm-grove,’ in A. P. 31 (112 B.C.). Εἰδολεύον (–ων W. H.), found first in 1 Macc. and 1 Esd., is formed after the analogy of μονο-το-ν. Τελώνιον (from τελώνης) is found in Strabo. Τετράδιον (Philo) is from τετράς, the usual guard in the prisons. Several new words in –της (quality) appear, as ἀδελφότης (from ἀδελφός, 1 Macc., 4 Macc., Dio Chrys., eccl. writers); θεότης (from θεός, Lucian, Plut.); κυριότης ([Page 155] (from κύριος, originally adj., eccl. and Byz. writers). Συροφοινίκισσα is the text of אAKL, etc., in Mk. 7:26 as against Σύρα Φοινίκισσα in BEFG, etc. In either case φοινίκισσα, not φοίνισσα (Text. Rec.) which is the usual feminine of φοίνιξ, as Κίλισσα is of Κίλιξ. Lucian has a masculine Συροφοίνιξ and Justin Martyr a feminine Συροφοινίκη. From this last φοινίκισσα probably comes. Cf. the use of βασίλισσα, the Atticists preferring βασιλίς or βασίλεια.

Ἡρωδιανός (from Ἡρώδης) and Χριστ-ιανός (from Χριστός) first appear in the N. T., and are modelled after Latin patronymics like Caesarianus (Καισαρ-ιανός, Arrian-Epictetus). Blass’ goes unnecessarily far in saying that the N. T. form was Χριστιανός (from Χριστός), though, of course, π and η at this time had little, if any, distinction in pronunciation. Μεγιστάν is from μεγίστος (as νεάν from νέος). Cf. Latin megistanes. Μεγιστάν is found in LXX, Jos., Maneth. Πληµµύρα (LXX, Dion. Hal., Jos., Philo) is from πλήµµυρα. There was, of course, no “Christian” or “biblical” way of forming words.

Diminutives are not so common in the N. T. as in the Byzantine and modern Greek2 where diminutives are very numerous, losing often their original force. Βιβλαρίδιον (a new form, but compare λιθαρίδιον) is read in Rev. 10:2 by ΝACP against βιβλιδάριον (fragment of Aristoph.) according to C* and most of the cursives and βιβλίον (by B). Variations occur also in the text of verses 8, 9, 10. Γυναικάριον (from γυνή) is used contemptuously in 2 Tim. 3:6 (also in Antonin. and Epict.). Ιχθύδιον (from Ιχθύς), κλινίδιον and κλινάριον (from κλίνη) occur from Aristoph. on. Κοράσιον (from κόρη, called Maced. by Blass) is used disparagingly in Diog. Laert. and Lucian, but in LXX and Epict. as in the N. T. that is not true, though it hardly has the endearing sense (sometimes found in the diminutive) in κυνάριον (κύνες=’street-

---

2 Blass is unduly sceptical (Gr., p. 64). Deiss. (B. S., p. 208 f.) finds nine examples of ἐλαιών=’place of olives’ or ‘olive orchard’ in vol. I of the Ber. Pap., and Moulton (Exp., 1903, p. 111; Prol., p. 49) has discovered over thirty in the first three centuries A.D. In Ac. 1:12 it is read by all MSS. and is correct in Lu. 19:29 (ag. W. H.) and 21:37 (ag. W. H.). Ελαιών is right in Lu. 19:37, etc. In Lu. 19:29; 21:37, question of accent. Cf. also ἀμπελών (from ἀμπελός, LXX, Diod., Plut.) which is now found in the pap.

1 Gr. of N. T. Gk., p. 63. Cf. Lipsius, Urspr. des Christennamens, 1873. W.-Sch. (p. 135) suggests that these two words are not after the Lat. model, but after the type of Ἀσιανός, which was foreign to the European Greeks. But Ἀσιανός (from Ἀσία) is in Thucyd. and besides is not parallel to Χριστός, Χριστι-ιανός. Cf. Eckinger, Die Orthog. lat. Wörter in griech. Inschr., 1893, p. 27. 2 Jann., Hist. Gk. Gr., p. 292; Thumb, Handb., p. 62.
(γ) Those from adjectives. The new substantives derived from adjectives in the later Greek found in the N. T. all have suffixes expressing quality. With –ια we find ἄπο-τομ-ια (from ἄπο-τομος, Diod., Dion., pap.); ἐλαφρία (from ἐλαφρός, cf. Lob., ad Phryn., p. 343. Cf. αἰσχρ-ια from αἰσχρος, Eust.); παράφρον-ια (from παράφρον). Greek writers use παράφρο-σύνη, but cf. εὐθαμο-ια from εὐθαμον. So περισσεία (from περισσός, LXX, inscriptions, Byz.). W. H. use the ending –ια with κακοστάθε-ια (from κακοπαθής). With –σύνη several new words occur from adjectives in –ος with the lengthening of the preceding vowel, as ἄγαθο-σύνη (from ἄγαθος, eccl.); ἄγιο-σύνη (from ἄγιος, not in earlier Greek writers); μεγαλο-σύνη (from stem μεγάλο of μέγας, LXX and eccl.). These forms are like ἵερο-σύνη from ἵερος (also in N. T.) which is as old as Herod. and Plato. Still μεγαλο-σύνη and ἵερο-σύνη are both found in inscriptions or in Glycas.2 Most of the words in –σύνη belong to the later language.3 Έλευθερο-σύνη (from ἔλευθερον, Callim. in Del., Diog. Laert., LXX), like other words in –σύνη, loses the v. So ταπεινο-φρο-σύνη (Jos., Epiict.).

Rather more numerous are the new words in –της,4 as ἄγιο-της (from ἄγιος, 2 Macc.); άγνώ-της (from ἀγνός, inscriptions); ἀδηλό-της (from ἀδηλός, Polyb., Dion. Hal., Philo); ἄφελλο-της (from ἄφελλης, eccl. writers, ancient Greek ἄφελλης); γυμνότης (from γυμνός, Deut., Antonin.); μάταιο-της (from μάταιος, LXX and eccl. writers); μεγαλειώτης (from μεγαλεῖος, Athen., Jer.); πίω-της (from πίων, Arist., Theophr., LXX). Ἀκαθάρ-της (Rev. 17:4) is not supported by any Greek MSS.

The neuter (and often the masculine and feminine) of any adjective can be used as a substantive with or without the article, as τό δοκίμων (from δοκίμως, Deissmann, Bible Studies, p. 259 f., Dion. Hal., Long., LXX, papyri). Like μεθόριον (the Syrian reading for ὅρια in Mk. 7:24) is προσφάγιον (προσ-φάγιος, –ον from προσ-φαγεῖν, inscriptions), σφάγιον (σφάγιος, –ον, from σφαγῆ, Am., Ezek.), ὑπολήνιον (ὑπολήνιος, –ον, from ὑπὸ λήνον, Demiopr. in Poll., Geop., LXX. Cf. ὑπο-ζύγιον). As already seen, ἱλασ-τήριον is probably the neuter of the adjective ἱλασ-τήριος, –α, –ον (from ἱλάσκομαι). So φυλακτήριον is the neuter of the adjective

---

1 Gr. of N. T. Gk., p. 63.
φυλακ-τήριος, –α, –ον (from φυλακτήρ, φυλάσσω, Dem., Diosc., Plut., LXX).1
Σωτήριον and σωτηρία (from σωτήρ, –ος, –ώος). Zeuk-τηρία (from ζευκ-τήριος, only in Ac. 27:40) reverts to the abstract form in –ία.

(c) ADJECTIVES.

1. Primary or Primitive Adjectives. These, of course, come from verbal roots. Άμαρτ-ολός (from root άμαρτ-άνω, Arist., Plut., LXX, inscriptions) is like φείδ-ολός (4 Macc. 2:9), from φείδ-ομαι. Πεθ-ός (W. H. πέθ-ός from πεθώ, as φειδ-ός from φειδομαι) is not yet found elsewhere than in 1 Cor. 2:4, but Blass regards it as “a patent corruption,” πεθοίς for πεθοί. The evidence is in favour of πεθοίς (all the uncials, most cursive versions). Φάγος (from root φαγ–) is a substantive in the N. T. with paroxytone accent as in the grammarians, the adjective being φαγ-ός. The other new adjectives from roots in the N. T. are verbals in –τος. There is only one verbal (gerundive) in –τός (Lu. 5:38, elsewhere only in Basil), and that is neuter (βλητέος), “a survival of the literary language in Luke.”3 The sense of capability or possibility is only presented by the verbal παθη-τός (from root παθ–, πάσχω, eccl. writers). But the weakened sense of the verbal in –τος, more like an ordinary adjective, is very common in the later Greek.4 But they are rare in the modern Greek (Thumb, Handb., p. 151). These verbals correspond to the Latin participle in -tus,5 like γνωστός, or to adjectives in -bilis, like δρατός. They are common in the N. T., though not many new formations appear. They are usually passive like γραπ-τός (from γράφω, Georg. apol., LXX), though προσ-ήλυ-τος (προς-έρχ-ομαι, root –ήλυθ–, LXX, Philo) is active in sense. The ancient form was [Page 158] ἔπηλυς. A number of new verbals were formed on compound words which will be discussed later. For the syntactical aspects of the verbal adjectives see discussion of the participle (cf. Moulton, Prolegomena, p. 221).

2. Secondary or Derivative Adjectives.

(a) Those from verbs. Σιτισ-τός (from σιτίζω, Jos., Athen.) is to be mentioned. It is equivalent to the Latin saginatus and is passive in meaning.

(b) Those from substantives. Some new words in –νος occur as άμαρτάντινος (from άμαρτάντος, Philost., inscriptions); καθημερ-ινός (from καθ ήμέραν, Athen., Plut., Jos.) is for ancient καθημερής; κόκκ-νος is from κόκκος (LXX, Plut., Epict., papyri); ὑθρ-ινός (from ὑθρος, LXX, older form ὑθριος), with which compare ἐσπερ-νός (from ἐσπέρα, from Xen. on) in the minusc. 1, 118, 209 (Lu. 12:38);

1 This termination became rather common in the later Gk., as, for instance, in ἄνακαλυπτήριον, δειπνήριον, τριαντάρνιον, ἰματήριον. See also Stratton, Chapters in the Hist. of Gk. Noun-Formation, 1889.
2 Gr. of N. T. Gk., p. 64. So W.-Sch., p. 135.
3 Viteau, Ess. sur la Synt. des Voix, Rev. de Philol., p. 38.
5 W.-M., p. 120. Cf. Viteau, Ess. sur le Synt. de Voix, Rev. de Philol., p. 41. For deriv. adj. in the Ptol. pap. see Mayser, Gr., pp. 447–455.
πρωινός (so W. H., from πρωί, for the older πρῶις, LXX, Plut., Athen., etc.); πύρινος (from πῦρ, Arist., LXX, Polyb., Plut.); ταχινός (from τάχα) from Theocritus on (LXX also).

There are several words in –ικός, like ἐθνικός (from ἔθνος, Polyb., Diod.); κερακικός (from κέρακος, Hipp., Plat. pol., LXX) which supplanted the earlier κεράκιος, κερακεῦς; κυριακός (from κύριος) found in papyri of Fayûm and in inscriptions of Phrygia and Lydia.1 So λειτουργικός (from λειτουργία, LXX, papyri) and ὀνικός (from ὀνος, in a contract in the Fayûm Papyri dated Feb. 8, A.D. 33).

Of special interest are several words in –ινος and –ικός. Ὀστράκινος (from ὀστρακόν, Hipp., Anthol., LXX), ‘made of clay,’ ‘earthen’; σάρκινος (from σάρξ, Aristoph., Plato, Arist.) is thus not a new word, but is used in Heb. 7:16 and by Paul in 1 Cor. 3:1; Ro. 7:14 (correct text in each instance), where many MSS. have σαρκικός. Indeed σάρκινος in these two passages must mean more than made of flesh or consisting in flesh, perhaps “rooted in the flesh” (Thayer).2 Cf. relation of ἄληθεν-ινός to ἄληθες. Still a real distinction seems to be observed between σάρκ-ινος and σαρκικός in 1 Cor. 3:1 and 3:3. Σαρκικός (from σάρξ, Arist., Plut., LXX) is a man who lives according to the flesh and is here opposed to those who are σαρκικοί (from σαρῆς, Arist. down, but not in LXX, pertaining to the wind). But ὁ ψυχικός (from ψυχή, Arist., Polyb., down) is the man possessed [Page 159] of mere natural life (1 Cor. 2:14) as opposed to regenerate (πνευματικός) life (1 Cor. 2:15). Σαρκικός can be applied to either of these two distinct classes.3 But in 1 Cor. 3:3 Ἐτὶ γὰρ σαρκικοὶ ἔστε Paul reproaches the Corinthians. Proper names also have -ικός, as Ἐβραϊκός. Note accent in Τυχικός. Ρωμαϊκός (from Ρώμη) is read in Lu. 23:38 by the Western and Syrian MSS., common in the literary κοινή (Polyb., Diod., etc.).

Αἰώνιος, though found in Plato and Diod., is not a common adjective. But cf. LXX, O. T. Apoc., Philo, inscriptions, papyri. Cf. Moulton and Milligan, Expositor, 1908, p. 174. Δοκίμος is from δοκιμή (Dion. Hal., Long., LXX, papyri). Μίσθιος is from μίσθος (LXX, Plut.), while Ρωμαϊκός is common in the literary κοινή. Μελίσσιος (from μέλισσα, like θαλάσσιος from θάλασσα) is read by the Syrian class of documents in Lu. 24:42. The word occurs nowhere else, though Nic. has μελισσιαῖος and Eustath. μελίσσειος.

2 See comm. in loco. W.-M. (p. 123) held that σάρκινος was “hardly to be tolerated” in Heb. 7:16, but Schmiedel (p. 139) has modified that statement. Cf. on –ινος, Donaldson, New Crat., p. 458.
3 See Trench, N. T. Synon., 1890, pp. 268 ff. Moulton and Milligan

MOULTON and MILLIGAN, Lexical Notes from the Papyri (The Expos., 1908—).

———, The Vocabulary of the N. T. Illustrated from the Papyri and other Non-Literary Sources. Part I (1914), II, III.
Those from adjectives. There are only a few new adjectives of this character, but they present special difficulties. About ἐπιουσίος (found only in Mt. 6:11 and Lu. 11:3 and used with ἄρτος) there has raged a long controversy. It has been derived successively from ἔπι and σύσια, ‘bread for sustenance,’ though οὐσία only has the sense of ὑπάρξεις in philosophical language (another theory, ‘bread of substance’ in the spiritual sense); from ἔπι and οὖν (ἐπόντιος, ἐπιουσίος, like ἕκων, ἐκουσίος, etc.), ‘bread for the present,’ though the ι in ἔπι is not allowed to remain with a vowel save when a digamma existed as in ἔπεικης; from ἔπι-ιών (ἔπ-ειμι, ‘approach’), like ἦ ἐπίουσα (ἡμέρα), ‘the next day’ (Ac. 16:11), this last a common idiom. Lightfoot has settled the matter in favour of the last position. See also ἠρέμος (from ἠρέμης, adv. ἠρέμω, Lucian, Eustath., Hesych); νεωτερικός (from νεώτερος, 3 Macc., Polyb., Jos.). In περιουσίος (from περι-ἀν, περεῖμι, LXX) no serious problem in etymology arises, for περί retains the ι in composition with vowels. It is used with λαός, to express the idea that Israel belongs to God as his very own.5 Πιστ-ικός (from πιστός, [Page 160] Plato, Diog., Dion. Hal., in sense of persuading, but Artem., Cedrenus and other late writers in sense of ‘genuine’) is hardly to be derived from πιπίσκω or πίω and hence=‘drinkable.’ ‘Genuine nard’ is a much more probable meaning. For curious details see Winer-Schmiedel, p. 138, n. 24. Ποταπός is from the older ποδαπός and occurs in Dion. Hal., Philo, Jos., papyri.

Those from adverbs. From ἄνω come ἄνωτερος (Polyb., LXX, Arist.) and ἄνω-τερικός (Hippoc., Galen); ἕξω-τερος (LXX, Strabo, etc.). See also ἐκ-τερος (only N. T.); κατώ-τερος (Theoc., Hippoc., Athen.). Cf. Hagen, Bildung d. griech. Adverbien.

(d) The Adverb. The adverb φειδομένως (from the participle φειδόμενος, Plut., Mosch., Alex.) is a new word of this nature. Cf. ὄμολογομένως in the older Greek. So τυχόν, ὄντος and ὑπερβαλλόντως. The neuter accusative singular and plural of adjectives continue to be used adverbially. Βαθέως occurs also in Theoc. and Ἁλειαν. Ἀκμήν (Theoc., Polyb., Strabo) is in the inscriptions also as well as ἐν ἄκμητι (cf. Ditt., Syll. 326, 12). Ἐβραῖτεί (Sirach) is properly formed (cf. Ἑλληνιστή) from Ἐβραῖς. Τοινάκως is in Jos. See also ἐνικικός (Apoll. Dysc., Diog. Laert.). Ἐτεν (correct text Mk. 4:28) is a rare Ionic form for ἐτε (papyri also). Κενῶς is used from Arist. on. Ὀλγος occurs out of the N. T. only in Anthol. and Aquila. Πρῶτος (correct text Ac. 11:26) occurs here for the first time. Ρητως is found in Polyb., Strabo, Plut. Ῥωμαίατι is common in the literary κοινή (Plut., App., etc.) and in Epictetus. Σωματικώς comes from Aristotle and Plutarch. Τυπικώς is in the ecclesiastical writers. Φυσικός is in Aristotle, Philo, etc. Mayser (Gr., pp. 455–459) has a good list of derivative adverbs. See ch. VII for full discussion of the formation of the adverb.

3 Cf. Lightfoot, Rev. of the N. T., pp. 234–242, for full discussion of περιουσίος.

Winer-Schmiedel WAINER-SCHMIEDEL, Winer’s Grammatik des neutest. Sprachidioms. 8. Aufl. (1894—).
IV. Words Formed by Composition (Composita). The Greek in the Ptolemaic papyri is not equal to modern German in the facility with which agglutinative compound words (\(\text{διυστά}\) Aristotle termed them) are formed, but it is a good second. The N. T. writers make use of many of the new compounds (some new kinds also), but not more than the literary κοινή, though more than the Atticists or Purists. The following lists will show how fond the N. T. is of double prepositional compounds like ἀνα-κατ-\(\text{λειτρόω}, \) ἀπο-κατ-\(\text{αλλάσσω},\) ἐπι-συν-\(\text{άγω},\) συν-\(\text{αντι}-\text{λαμβάνομαι},\) ἐπι-\(\text{ντι}-\text{λαμβάνομαι},\) etc. So also compound prepositional adverbs like ἐνόπιον, κατενώπιον, κατέναντι, etc. On the whole subject of compound words in the Ptolemaic papyri see Mayser, Gr., pp. 466–506. Compound words played an increasing rôle in the κοινή. Cf. Jannaris, op. cit., p. 310. See in particular F. Schubert, Zur mehrfachen präfixalen Zusammensetzung im Griechischen, Xenia Austriaca, 1893, pp. 191 ff.

(a) KINDS OF COMPOUND WORDS IN GREEK: proper composition (σύνθεσις), copulative composition (παράθεσις), derivative composition (παρασύνθεσις). In the first class the principal idea is expressed by the second part of the word, while the first and qualifying part is not inflected, but coalesces with the second, using merely the stem with connective vowel. As an example take οἰκο-νόμος, ‘manager of the house.’ The second kind of composition, paratactic or copulative, is the mere union of two independent words like παρά-κλήτος. It is not common in the old Greek save in the case of prepositions with verbs, and even this usage is far more frequent in the later Greek. It is seen in many late compound adverbs as in ὑπερ-άνω. The third or derivative composition is a new word made on a compound, whether proper or copulative, as ἐλθόλο-λατρεία (or –εία) from ἐλθόλο-λατρευό. The above classification is a true grammatical distinction, but it will be more serviceable to follow a more practical division of the compound words into two classes. Modern linguists do not like the term “proper composition.” In principle it is the same as copulative.

(b) INSEPARABLE PREFIXES. These make a cross-line in the study of compound words. They enter into the formation of verbs, substantives, adjectives and adverbs. By prefixes here is not meant the adverbs and prepositions so commonly used in composition, but the inseparable particles ἀ– (ἀν–) privative, ἀ– collective or intensive, ἀρχι–, δυσ– ήμι–, νη–. As examples of such new formations in the N. T. may be taken the following substantives and adjectives (chiefly verbals) with ἀ– privative: ἀ-βαρῆς (from Arist. down, papyri, in metaphysical sense); ἀ-γενεα-λόγητος (LXX); ἀ-γνωρος (Thom. Mag.); ἀ-γνώσια (O. T. Apoc., papyri); ἀγρι-έλαιος (Arist., papyri); ἀ-γνοείς (Apost., papyri); ἀ-δηλότης (Polyb., Dion. Hal., Philo); ἀ-δια-κριτος (from Hippocrates down); ἀ-διά-λειπτος (Tim. Locr., Attic inscriptions, 1/2 B.C.); ἀ-δια-φθορία (not in ancient Greek); ἀ-δυνατέο (LXX, ancient Greek means ‘to be weak’); ἀ-θέμιτος (for earlier ἀ-θέμιτος); ἀ-θεσμος (LXX, Diod., Philo, Jos., Plut.); ἀ-θετεω (LXX, Polyb.); ἀ-καταρέω (Diod.); ἀ-κατεστήσεις (Diog. Laert., eccl. writers, papyri); ἀ-κατά-γνώστος (2 Macc., eccl. writers, inscriptions, papyri); ἀ-κατά-κάλλιστος (Polyb., LXX, Philo); ἀ-κατά-κριτος (earliest example); ἀ-κατά-λυτος (4 Macc., Dion. Hal.); ἀ-κατά-παστος (found only here. [Page 162] This is the reading of AB in 2 Pet. 2:14 rather than ἀ-κατά-παστος, verbal of καταπάω, found in Polyb., Diod., Jos., Plut., cf. W. H. App., p. 170; Moulton, Prol., p. 47); ἀ-κατα-στασία (Polyb., Dion. Hal., papyri); ἀ-κατά-στατος (Hippoc., Polyb., LXX); ἀ-κατά-

1 Schmid, Der Atticismus, Bd. IV, p. 730.

With ἀ– connective or intensive are formed ἀ-νεπιστός (for ἄ-νεπτος, LXX, cf. Lat. con-nepot-ius), ἀ-τενίζω (Polyb., Diod., Jos., Lucian).2

With δυς– we have δυς-βάστακτος (LXX, Philo, Plut.); δυς-εντέριον (late form, correct text in Ac. 28:8, older form δυς-εντερία); [Page 163] δυς-ερμήνευτός (Diod., Philo, Artem.); δυς-νόητος (Arist. Diog. Laert.); δυς-φημία (LXX, Dion. Hal., Plut.).

With ἡμι– (cf. Lat. semi) are found only ἡμι-θανής (Dion. Hal., Diod., LXX, Strabo), ἡμι-οροφ (so W. H., Strabo, Geop., ΝP have –όριον). Cf. ἡμισυς.

For νη– note νηπίαξω (Hippoc., escl.).

(c) AGGLUTINATIVE COMPOUNDS (Juxtaposition or Parathesis). This sort of composition includes the prepositions and the copulative composition (dvandva). This last is much more common in the koine than in the older Greek. Cf. Jannaris, op. cit., p. 310, and Mayser, Gr., p. 469.

2 Cf. on ἀ– connective or intensive, Don., New Crat., p. 397. Also Döderlein, De ἄλφα intenso, 1830.
1. Verbs. The new compound verbs are made either from compound substantives or adjectives or by combining adverbs with a verb-stem or noun-stem or by adding a preposition to the older verb. This last method is very frequent in the later Greek due to “a love for what is vivid and expressive.” This embellishment of the speech by compounds is not absent from the simplest speech, as Blass shows in the case of Titus, where over thirty striking compound words are found, omitting verbal and other common ones. Moulton (Cl. Quarterly, April, 1908, p. 140) shows from the papyri that the compound verb is no mark of the literary style, but is common in the vernacular also. The preposition fills out the picture as in ἀντι-μετρέω (Lucian), and so ἀντι-λαμβάνω (Diod., Dio Cass., LXX). So also observe the realistic form of the preposition in ἐξ-αστράπτω (LXXX, Tryphiod.) in Lu. 9:29; κατα-λθάζω (eccl. writings) in Lu. 20:6. The modern Greek even combines two verbs to make a compound, as παιζο-γελάω. As examples of new compound verbs may be given ἄγαθουργέω, ἀγαθοεργέω, in 1 Tim. 6:18 (eccl.); ἀγαθο-ποιέω (LXX, later writers); ἀλλ-ηγορέω (Philo., Jos., Plut., grammatical writers); ἄνα-ζω (inscriptions, later writers); ἄνα-θεωρ-έω (Diod., Plut., Lucian); ἄνα-στατ-ό-ω (LXX, papyri); ἄν-εταξίζω (LXX, papyri); ἀντὶ-δια-τίθημι [Page 164] (Philo, eccl. writers); ἄντι-παρ-έρχο-μαι (Anthol., Sap., eccl. writers, Byz.); ἄντι-οφθαλμέω (Sap., Polyb., eccl. writers); ἄντι-ελθίζω (LXX, Polyb., Diod., inscriptions); ἄπο-γράφομαι (papyri); ἄπο-θεσσαρίζω (Sir., Diod., Jos., Eplct.); ἄπο-κεφαλιζέω (LXX, Eplct., etc.); αὐθ-ἐντέσω (Polyb., papyri); γονο-πνευμάκεω (Polyb., Heliod., eccl. writers); δια-γνωρίζω (Philo, schol. in Bekk.); δια-γωγίζο (LXX, Heliod., Byz.); δια-γρηγορέω (Herod., Niceph.); δια-ανυγάζω (Polyb., Plat.); δια-σπειρίζω (Aratus, Dion. Hal.); δια-ερμήνευσις (2 Macc., Polyb., Philo); δια-κεφαλάζω (LXX, Polyb., Plut.); δια-καθογέω (Diod. Sic. and on); εἰρήνο-παρέσω (LXX, Hermes); ἕκ-δαπανάω (Polyb.); ἕκ-δικεω (LXX, Apoll., Diod.); ἕκ-βετερίζω (inscr.); ἕκ-κατινίζω (LXX); ἕκ-κακέω (Polyb., Symm. translation of LXX, Philo, Clem. Rom.); ἕκ-χρισίω (Tob., Strabo, Anthol., Eplct.); ἕκ-αρτίζω (Jos., Hipp.); ἕκ-ιαχέω (Sir., Strabo, Plat.); ἕκ-σκηνοσ (Polyb.); ἕκ-φασκέω (LXX, Acta Thom.); ἕκ-χορηγέω (Dion. Hal., Phal., Diog. Laert., Alex. Aphr.); ἕκ-τρεπαμάζω (eccl. writers); ἕκ-τρεπα-ζηγέω (LXX, Philo, Diod.); ἕκ-δοκέω (probably simply from εὖ and δοκέω, as there is no such form as δόκος or εὐδόκος, and cf. καρα-δοκέω in Polyb., Diod., Dion. Hal.); ἐὔθυ-δρομέω (Philo); ἐὖ-καρέω (from Polybius on, papyri); ἐὖ-προσ-οπέω (P. Tb., Chrys.); θηριο-μαχέω (Diod., Artem., Ign.); ζωο-γονέω (Theophr., Diod., Lucian, Plut.); ζωο-ποιέω (Arist., Theophr., LXX); κακ-ουκέω (from obsolete κακ-ούχος, i.e. κακόν, ξέρω, LXX, Dio Cass., Plut.); καλό-ποιέω (Etym. Magn., LXX, Philo); κατα-βαρέω (Polyb., Diod., App.,Lucian papyri); κατ-αγωνίζομαι (Polyb., Jos., Lucian, Plut., Ελίαν); κατ-αντάω (Polyb., Diod., eccl. writers, papyri); κατα-κληρο-δοτέω (LXX); κατα-πονέω (2 and 3 Macc., Hipp., Polyb., Diod., Jos., Ελ., etc.); κατ-εξοικείωσι (only N. T.); κατ-

2 Gr. of N. T. Gk., p. 70. Mostly adj., but πεκτ-αρχεῖν occurs in the list. Blass, ib., p. 65, even thinks that it is not the province of grammar to discuss the numerous compounds with prepositions. It belongs to the lexicon. The lists that I give are not complete for prepositional compounds because of lack of space. See Helbing (Gr. d. Sept., pp. 128–136) for good list of compound verbs in the LXX. Mayser (Gr., pp. 486–506) gives list of compound verbs in the Ptol. pap. The κοινή is fond of compound verbs made of noun and verb. Cf. εἰ ἐτεκνοτρόφησεν, εἰ ἐξενοδόχησεν (1 Tim. 5:10). So ὑψηλοφρονεῖν (text of W. H. in 6:17).
ὀπτρίζω (Athen., Diog. Laert., Philo); if the conjectural κεν-εμ-βατεύω in Col. 2:18 be correct (as is now no longer probable), κεν-εμ-βάτης has to be presupposed; λα-τομέω (LXX, Diod., Dion. Hal., Strabo); λιθο-βολέω (LXX, Diod., Plat.); λογο-μαχέω (only instance in 2 Tim. 2:14); μακρο-θυμέω, (LXX, Plat.); μεθ-ερμηνεύω (Polyb., Dion., Sir., Plat.); μετα-μορφήω (Diod., Philo); μετριο-παθέω (Philo, Jos.); μοσχο-ποιέω (LXX and eccl. writers); μυ-οπάζω (Arist.); αίκο-δεσποτήω (Lucian, Plat.); ὁμαλόρομα is a puzzle (Fritzsche derives it from ὄμου and ἔρο, but other compounds with ὄμοι have instrumental-associative, not genitive case, as ὄμι-λέω, from ὄμιλος (ὄμοι, ὄμη); Photius and Theophr. get it from ὄμοι ἡμιόσθα; but, as Nicander uses μείρομαι ημιέρομαι, modern editors print ὄμειρόμενοι in 1 Th. 2:8 (ὁ—, W. H., elsewhere only in Job and Symm., Ps. 62); ὄρθο-τομέω (only instance); ὄρθο-τομέω (LXX, eccl. [Page 165] writers); ὄλχο-ποιέω (only in Ac. 17:5); παρα-βολεύομαι (inscr. ii/L.d.); παρ-εισ-έρχομαι (Polyb., Philo, Plut.); περι-λάμπω (Diod., Jos., Plut.); πληρο-φορέω (LXX, eccl. writers); προ-ελπίζω (Posid., Dexipp., Greg. N.); προσ-εγγίζω (LXX, Polyb., Diod., Lucian); προσ-κληρώ (Philo, Plut., Lucian); προσωπ-λημπτέω (N. T. word); συν-ανεξάνω (LXX, inscriptions); συν-αποστέλλω (LXX, papyri, inscriptions); στρατο-λογέω (Diod., Dion. Hal., Jos., Plut., etc.); συν-υπο-κρίνομαι (Polyb., Plut.); and many other verbs with συν; τεκτο-γανέω (Anthol.); τεκνο-τροφέω (Arist.); τετρα-αρχέω (Jos.); τροπο-φορέω (LXX and eccl. writers, so W. H. with ΝBDHLP, etc., in Ac. 13:18); τροφο-φορέω (LXX and eccl. writers, so ACE and some cursive in Ac. 13:18); ὑπερ-πλεονάζω (Ps. Sal, Herond., Herm.); ὑπο-λιμπάνω (Themist., Dion. Hal., eccl. and Byz.); φιλο-προτεύω (Artem., Plut.); φρεν-απατάω (eccl. and Byz. writers); χρονο-τρίβω (Arist., Plut., Heliod., Byz. writers). Thus, it will be noticed, verbs compounded with nouns are very common in the κοινή.

Often two prepositions are used in composition with the same verb, where the proper meaning must be given to each. The use of double prepositional compounds grew rapidly in the κοινή; cf. Schmid, Att. IV, pp. 708 ff. Mayser gives a long list in the Ptol. papyri (Gr., pp. 497–504), some of which are old and some new. Of 162 examples 96 are new. The N. T. is in perfect accord with the κοινή here. So it is with ἄντι-παρ-έρχομαι (Anthol., Wisdom, eccl. and Byz. writers) in Lu. 10:31; ἄντι-αναπληρώ in Col. 1:24 (Dem., Dio Cass., Apoll. Dysc.); ἄντι-δια-τίθημι (Philo, Diod.); ἁπο-κατ-αλλάσσω (not in old Greek), ἐπι-δια-τάσσομαι (only in N. T.); ἐπι-συν-έγρω (LXX, Ἑσοπ, Polyb.); κατ-εξ-οισόμαι (only in N. T.); παρ-εισ-έρχομαι (Polyb., Philo, Plut.) προ-εν-άρχομαι (only in N. T.); συν-ανα-μίγνυμ (LXX, Plut.); συν-αναπάυομαι (LXX, Dion. Hal., Plut.). συν-αντι-λαμβάνομαι (LXX, Dion., Jos., inscriptions, papyri); ὑπερ-εκ-χύνω (LXX); ὑπερ-εν-τυχάνω (eccl.). There is in the papyri (P. Tb. I, 66) a triple prepositional compound, προ-αντ-αν-αιρέω.

2. Substantives. Here again the new compound substantive draws on verbs, substantives, adjectives, adverbs and prepositions for part or all of the word. There are also double compound substantives from compound substantives, adjectives, adverbs and prepositions like προσωπολημψια, ἄλλοτριπεσίκοπος, διαπαρατριβή. The great majority have substantive or adjective for the second half of the word. These nouns are more often abstract than concrete. ἀγαθο-ποία (from adjective and verb-stem, eccl. writers); ἄγαθοποίος [Page 166] (adjective and verb-stem, Sirach, Plut. and later papyri); ἄγρι-έλαος (from ἄγριος and ἐλαίος, Arist.); ἀματ-εκ-χυσία (from substantive, preposition and verb χύνω, eccl. writers); ἄκρο-βυστία (LXX); ἄλεκτροφωνία (Ἀσοπ, Strabo, eccl. writers); ἄλλοτρι-επί-σκοπος (from ἄλλοτριος and ἐπί-
σκοπος, Dion. Areop., eccl. writers. Deissmann finds a synonym for the word in ἄλλοτρων ἐπιθυμητῆς, Fayûm Papyri. See Bible Studies, p. 224); ὄμφ-οδον (LXX, Aristoph., Hyper., papyri); ἄνα-δεξίς (Sir., Polyb., Plut.); ἄνα-στροφή in the ethical sense (LXX, Polybius on, inscriptions in Pergamum and Magnesia); ἄνα-χοις (Strabo, Philo, Plut.); ὄνθ-ὑπατος (Polyb., Dion. Hal., Lucian, Plut., inscriptions); ἄντι-λυτρόν (one translation of Ps. 48:9, Orph.); ἄντι-χριστός (probably formed by John, eccl.); ὄγρυφος-κόπος (Plut., LXX, papyri); ἄρσενο-κοίτης (Anthol., eccl.); ἄστρον-καρα-δοκία (verb –ἐω in LXX, Jos., Plut.); ἄστι-ἀρχης (inscriptions, Polyce.); γαζο-φυλάκιον (LXX, Jos., Strabo); γλωσσό-κομον (earlier γλωσσοκομεῖον, LXX, Jos., Plut., Longin., inscriptions, papyri); δασι-δαιμονία (Polyb., Dion., Jos., Plut.); δεσμοφύλαξ (Jos., Lucian, Artem., ἄργο-δεσμο-φύλαξ, LXX); δι-ερμη-νία (only in AD 1 Cor. 12:10); δι-ερμηνευτής probably correct 1 Cor. 14:28; ΝΑΚΛ against ἔρμηνευτής by BDFG; δια-παρα-τριβή (not found elsewhere) is the correct text for 1 Tim. 6:5, not παρα-δια-τριβή, which may be compared with παρα-κατα-θή-κη in 2 Tim. 1:12, but παρα-θή-κη (Herod., LXX, inscriptions, papyri) is the true reading; δωδεκά-φυλον (Clem. of Rome, N. T. Apoc.); δικαίο-κρισία (Test. xii Pat., eccl., papyri); δωροφορία is read by MSS. BDFG against διακονία in Ro. 15:31; ἐθελο-θησια (from verb ἐθελω and θησια, eccl., cf. ἐθελο-δουλεία); εἰδωλο-λατρεία (W. H. –ία, two substantives, eccl.) and εἰδώλω-λάτης (eccl.); εἰλ-κρίνεια (LXX, Theophr. Sext., Stob.); ἐκ-πάλης (2 Macc., Dion. Hal., Philo, Strabo); ἐκ-τένεια (2 Macc., Judith, inscriptions); ἐν-ἐδρον (late form of ἐνέδρα, LXX); ἐξ-ανά-στα-σίς (double compound, Polyb.); ἐπι-συν-ἀγωγή (double compound, 2 Macc., inscriptions, Artem., Ptol.); ἐπί-σύ-στασις (double compound, LXX, Philo, Sext.); ἐπι-χορ-ηγία (eccl.); εὐδοκία (LXX, inscriptions); εὐδοκία (a hybrid from εὐδοκία, LXX, Jos., Plut.); ἐκ-πότης (Arist.); ἐκ-πότης (Orph., eccl.); ἐκ-ποίτης (Arist., Gal., Sext.); ἐκ-ποίτης (only instance is in N. T.); ἐκ-ποίτης (Orph., eccl., papyri); ἐκ-ποίτης (cf. Deissmann, Light, p. 90; Radermacher, Gr., p. 15); κατά-λυμα (LXX, Polyb., Dion., κατά-λυμα (LXX, Jos., Aristeas, Philo, inscriptions); κενο-δοξία (4 Macc., Polyb., Philo, Plut., Lucian); κοσμο-κράτωρ (Orph., eccl. writers, inscriptions); κοσμο-πόλεις (Strabo, Ag. and Theod., eccl.); λογο-μοχία (only in 1 Tim. 6:4); μισταιω-λογία (Plut., Porph.); μετο-νόκ-τον (Arist., LXX, κοινή writers); μετο-τοιχον (Erat.); μετο-ουράνια (Manetho, Plut.); μετ-ουκεσία (LXX, Anthol.); μισθ-απο-δοσία and -δότης (eccl.); μισθο-λογία (Arist., Plut.); νομο-διδάσκαλος (eccl.); νυχθ-ήμερον (Alex., App., Geop.); οἶκο-δεσπότης (Alexis, Jos., Plut., Ign., etc.); οἶκο-δομή (possibly Arist., Theophr., certainly LXX, Diad., Philo, Jos., Plut., condemned by Phrynichus); οἶνο-πότης (Polyb., LXX, Anthol., Anacre.); ὠλιγο-πιστία (eccl. and Byz.); ὠλο-κληρία (LXX, Diog. Laert., Plut.); ὄρκο-ομοσία (LXX, Jos., τά ὄρκο-ομόσια in Attic); ὄρκο-θεσία (eccl.); οἰκεσία (LXX, Diog. Laert., Plut.); παντο-κράτωρ (LXX, eccl., Anthol.); παρά-κλήτος (Ag. Theod., Diog. Laert., Dio Cass., papyri, inscriptions); παρά-χειμασία (Polyb., Dion.); πατρί-άρχης (LXX); περί-θεσις (Arr., Gal., Sext.); περί-καθ-αρμα (LXX, Epict., Curt.); περί-ορή (Theophr., Diad., Plut., etc.); περί-τομή (LXX, Jos., papyri); περί-ημα (Tob., Ign.); πραυ-παθία (Philo, Ign.); προ-ἀβόλων (Pollux); προ-πάββατον (LXX, eccl.); προσ-αίτης (lit. κοινή); πρόσ-κομμα (LXX, Plut.); προσ-καρτέρης (inscriptions, 81 A.D.); προσ-κυνητής (inscriptions, eccl., Byz.); προσ-
3. Adjectives. It will not be necessary to repeat the adjectives formed with inseparable prefixes ἀ-, etc. The method of many grammars in dividing the compounds according to the element in the first or second part has not been followed here. It is believed that the plan adopted is a simpler and more rational exposition of the facts. These adjectives are compounded of two adjectives like ὀλιγό-ψυχος, an adjective and substantive like ἄκρο-γυναῖος or vice versa ἄνθρωπ-ἀρέσκος, a substantive and a verbal like χειρο-ποίητος; a preposition and a verb like συμ-παθής, with two prepositions and verbal like παρ-εἰσ-ακτός; an adverb and a preposition and a verbal like εὐ-πρόσ-δεκτος, etc. The adjective compounds used in the N. T. characteristic of the koine are somewhat numerous. ἄγαθο-ποῖος (Sirach, Plat.); ἀγρι-έλαιος (Anthol.); ἄκρο-γυναῖος (eccl.); ἄλλο-γενής (LXX and Temple inscriptions meant for gentiles to read); ὄν-εξί-κακος (from ὄν, ἔξω, ἐκκόσι κακός, Lucian, Justin M., Poll., papyri); ἄνθρωπ-ἀρέσκος (LXX, eccl.); ἄπο-δεκτός (Sext. Emp., Plut., inscriptions); ὑπο-συν-ἀγνοος (2 Esdr.); ἄπτι-γέννητος (Lucian, Long.); αὐτο-κατα-κρίτος (eccl. writers); βαρό-τιμος (Strabo); γρα-όδης (from γραφοῦ, βίοσ, Strabo, Galen); δεξιο-λάβος (true reading in Ac. 23:23, late eccl. writers); δευτερο-πρῶτος (cf. δευτερ-ἐσχατος, only MSS. in Lu. 6:1); δι-θάλασσος (Strabo, Dio Chrys., eccl.); δι-ψυχος (eccl.); ἐκ-θαμβος (Polyb., eccl.); ἐκ-τενής (Polyb., Philo); ἐκ-τρόμος (only in ND Heb. 12:21, other MSS., ἐν-τρόμος, LXX, Plut.); ἐκ-φοβος (Arist., Plut.); ἐπι-θανάτιος (Dion. Hal.); ἐπι-πόθητος (eccl.); ἐπι-γλούσσος (LXX, Strabo, Philo); εὐ-ἀρεστος (Wisid., eccl., inscr., but Xen. has εὐφράστεος); εὐ-κοπος (Polyb., LXX); εὐ-λογητος (LXX, Philo); εὐ-μετα-δοτος (Anton.); εὐ-πάρ-εδρος (for Text. Rec. εὐ-πρόσ-δεκτος, Hesych.); εὐ-περι-στατος (only in Heb. 12:1); εὐ-πρόσ-δεκτος (Plut.,
The illustrates it very clearly. Paul, especially, doubles his adverbs as in is made from compound adjectives, substantives, verbs with all sorts of combinations.

4. Adverbs. The late Greek uses many new adverbs and new kinds of adverbs (especially compounds and prepositional adverbs). For list of the new prepositional adverbs see chapter on prepositions. [Page 170] These are usually formed either from adjectives like ἑν-όπιον (neuter of ἑν-όπιος) or by composition of preposition and adverb as in ὑπερ-ἀνο, or preposition and adjective as in ἐκ-περισ-σοῦ, or two or more prepositions (prepositional adverbs as in ἄπ-ἐν-αντι, or a preposition and a noun-root as in ἄπο-τόμως, or a substantive and a verb as in νουν-εχθρῶς, or an adjective and a substantive as in παν-πληθῆ, or an adjective and an adverb as in πάντοτε, or a preposition and a pronoun as in ἐκ-αντίθές. In a word, the compound adverb is made from compound adjectives, substantives, verbs with all sorts of combinations. The κοινή illustrates a distinct turn for new adverbial combinations and the N. T. This is seen in the narrow vocabulary of his contemporaries. Many of these late words are found in the papyri and inscriptions also, as is pointed out. But we must remember that we have not learned all that the papyri and inscriptions have to teach us. Cf. also the numeral adjective δεκα-τέσσαρες (LXX, Polyb., papyri).1 See further chapter VII, Declensions.

1 Cf. Blass, Gr. of N. T. Gk., p. 70.
prepositions in the later Greek, incorrectly so according to Blass. But it must be remembered that the κοινή developed according to its own genius and that even the Atticists could not check it. In Luke παντ-πληθοίς (Lu. 23:18) and παν-οικεῖ (Ac. 16:34) are not derived from adjectives or previous adverbs, but from substantives (perhaps assoc. instr.). As to the use of adverbs as prepositions, all prepositions were originally adverbs (cf. ἔν-αντιον). In the later language we simply can see the process of development in a better state of preservation. No magical change has come over an adverb used with a case. It is merely a helper of the case-idea and is part of the analytic linguistic development.

The chief compound adverbs used in the N.T. characteristic of the κοινή are here given. As the list of adverbs is much smaller than those of verbs, substantives and adjectives, compounds with ἀ- privative are included here. ά-δια-λειπτος (Polyb., Diod., Strabo, 1 Macc., papyri); ἀνά-μεσον and ἀνά-μερος is the Text. Rec. in Rev. 7:17 and 1 Cor. 14:27, but this is not the modern editing, rather ἀνά-αντι-ρήτος (Polyb., etc.); ἀντι-νέρα (Xen. ἀντι-πέραν, Polyb., etc.); ἀπ-έναντι (Polyb., LXX, papyri and inscriptions); ἀ-περι-σπάστως (Polyb., Plut.); ἀπο-τόμος (Polyb., Diod., Wisd., Longin.); δηλ-αυγῶς (so ΧCLΔ in Mk. 8:25 for ηλ-αυγῶς); δια-παντός is the way Griesbach and Tisch. print διὰ παντός; ἐκ-παλαι (Philo and on, inscriptions); ἕκ-τευς (Polyb., LXX, inscriptions); ἐν-αντί (LXX, inscriptions); ἐν-όπιν (Theoc., LXX, papyri); ἐξ-άπα (LXX, Jamb., Byz.); ἐξ-αυτής (Theogn., Arat., Polyb., Jos., etc.); ἐρ-άπας (Lucian, Dio Cass., [Page 171] etc.); καθ-εξής (Ælian, Plut.); κατ-έναντι (LXX, Hermas); κατ-εν-όπιν (LXX); vouν-εχοῦς (Arist., Polyb.); παν-παληθεῖ (Diocass.); παν-οικεῖ (rejected by the Atticists for πανοικία [LXX], Plato Eryx., Philo, Jos.); πάν-τοτε (Sap., Menand., Dion. Hal., condemned by the Atticists for ἐκάστοτε); παρ-εκτός (LXX); προς-φάτως (LXX, Polyb., Alciph.); ὑπερ-όνω (Arist., LXX, Polyb., Jos., Plut., etc.); ὑπερ-έκεινα (Byz. and eccl.); ὑπερ-εκ-περισσοῦ (Dan. 2:22, Ald., Compl.); ὑπερ-εκ-περισσοῦς (T. W. H. marg. 1 Th. 5:13, Clem. Rom.); ὑπερ-λίαν (Eust.); ὑπερ-περισσοῦς (only Mk. 7:37). There are two ways of writing some of these compound adverbs, either as single words or as two or more words. The editors differ as to διὰ παντός, ἑρ- ἀπας, ἐκ-πάλαι, καθ ἡμέραν, καθ ὅλου, ὑπερ ἔκεινα, etc. The editors do as they wish about it. These compound adverbs were still more numerous in the Byzantine writers. For further list of verbs compounded with prepositions see “Language of the N.T.” by Thayer, in Hastings’ D. B. The κοινή was fond of compound words, some of which deserve the term sesquipedalian, like κατάδυστεῖο, συναντλαμβάνομαι, etc. We must not forget that after all these modern words from Aristotle onwards are only a small portion of

1 W.-M., p. 127. Thayer

THAYER, J. H., Greek-English Lexicon of the N. T. (1887).

———, Language of the N. T. (Hastings’ D. B., 1900).

the whole. Kennedy (Sources of N. T. Greek, p. 62) claims that only about 20 per cent. of the words in the N. T. are post-Aristotelian. Many of this 20 per cent. reach back into the past, though we have no record as yet to observe. The bulk of the words in the N. T. are the old words of the ancients, some of which have a distinct classic flavour, literary and even poetic, like αὐσθητήριον, πολυποίκιλος. See list in Thayer’s article in Hastings’ D. B., III, p. 37.

These lists seem long, but will repay study. They are reasonably complete save in the case of verbs compounded with prepositions and substantives so compounded. As a rule only words used by Aristotle and later writers are given, while Demosthenes is not usually considered, since he was more purely Attic.

V. Personal Names Abbreviated or Hypocoristic. The chapter on Orthography will discuss the peculiarities of N. T. proper names in general. Here we are concerned only with the short names formed either from longer names that are preserved or from names not preserved. This custom of giving short pet-names is not a peculiarity of Greek alone. It belonged, moreover, to the early stages of the language and survives still. It was used not merely with Greek names, but also with foreign names brought into the Greek. It is proof of the vernacular κοινή in the N. T. [Page 172] Cf. English “Tom” and “Will.” These abbreviated names are regularly from compounds, as Ζηνό-δορος (Tit. 3:13). Of the various forms used in these abbreviated names only three occur in the N. T., –ας, –ῆς, –ῶς. The great majority belong to –ας or –ᾶς. Ἀμπλίας (or –ᾶς) is the reading of the Western and Syrian classes in Ro. 16:8 for Ἀμπλιάτος (Latin Ampliatus); Ἄνδρας is, according to Blass, “a genuine old Greek form,” while Sehmiedel thinks it can come from Ἀνδρόμεδης Ἄντιπας is an abbreviation of Ἄντιπατρος (Rev. 2:13) (found in inscription iii/A.D. at Pergamum); Ἀπολλώς, possibly an abbreviation for Ἀπολλώνιος, is the reading of D in Ac. 18:24, though Ν 15, 180 read Ἀπελλῆς here, while Ἀπελλῆς is read by all MSS. in Ro. 16:10

Ἀπελλάς in inscriptions, PAS, ii, 397): Ἀρτεμίδωρος (Tit. 3:12) is an abbreviation of Ἀρτεμίδωρος; Ὀμήρας (Col. 4:14; Phil. 24; 2 Tim. 4:10) is probably an abbreviation of Ὀμήρας, though Ὀμήρας (Col. 1:7; 4:12; Phil. 23) is (Ramsay so takes it, Expositor, Aug., 1906, p. 153. Cf. genitive Ὀμήρας, PAS, iii, 375; Fick-Bechtel, p. 16) an abbreviation of Ὀμηρόδωρος (Ph. 2:25; 4:18), but it does not follow that, if true, the same man is indicated in Ph. and Col.; Ἕρμος (Ro. 16:14) is from the old Doric form abbreviated from Ἕρμωδωρος; Ἕρμής (Ro. 16:14) may be merely the name of the god given to a man, though Blass doubts it.6 Likewise we may note that Ἐπαφράς (Col. 1:7; 4:12; Phil. 23) is (Ramsay so takes it, Expositor, Aug., 1906, p. 153. Cf. genitive Ἐπαφράς, PAS, iii, 375; Fick-Bechtel, p. 16) an abbreviation of Ἐπαφράδωρος (Ph. 2:25; 4:18), but it does not follow that, if true, the same man is indicated in Ph. and Col.; Ἁρχέλαος, Νικόλαος appear in the N. T. in the unabbreviated forms, though in the Doric the abbreviated forms in –ας were used. On the subject of the N. T. proper names one can consult also Thieme, Die Inschriften von Magnesia am Mäander und das N. T., 1906, p. 39 f. He finds twenty of the N. T. names in the Magnesia inscriptions, such as Ἀπφία, Ἀρτεμίδωρος, etc. Κυρία is a common proper name (cf. Hatch, Journal of Bibl. Lit., 1908, p. 145). For the papyri illustrations see Mayser, Gr. der griech. Papyri (Laut- und Wortlehre, RAMSAY, W. M., Cities and Bishoprics of Phrygia. 2 vols. (1895, 1897).

VI. The History of Words. This subject concerns not merely the new words appearing in the N. T. but all words there used. This is the best place for a few remarks on it. It is not enough to know the etymology, the proper formation and the usage in a given writer. Before one has really learned a word, he must know its history up to the present time, certainly up to the period which he is studying. The resultant meaning of a word in any given instance will be determined by the etymology, the history and the immediate context. The etymology and the history belong to the lexicon, but the insistence on these principles is within the purview of grammar. The N. T. Greek on this point only calls for the same treatment granted all literature in all languages and ages.

Take σκάνδαλον, for instance. It is a shorter form of the old Greek word σκανδάληθρον, ‘trap-stick.’ The root σκανδ is seen in the Sanskrit skándāmi, ‘to dart,’ ‘to leap,’ The Latin has it in scando, de-scendo. The termination –άληθρον is possibly the suffix –τρον (–θρον) for instrument and σκανδ-άλα (η). The form σκανδάλη occurs in Alciphro, of which σκάνδ-αλον is simply the neuter variation. Σκάνδαλον occurs first in the LXX as a translation for מֹקֵשׁ or מִכְּשׁוֹל, ‘a noose,’ ‘a snare,’ as in Ps. 69(68):23. It was the trap-stick, the trap, the impediment; then a stumbling-block or any person who was an occasion of stumbling, as in Josh. 23:13. So Peter became a stumbling-block to Jesus, σκάνδαλον εἶ ìφο (Mt. 16:23). Christ crucified became a σκάνδαλον to the Jews (1 Cor. 1:23). Take again ἐκκλησία (from ἐκκλητος, ἐκκολέω). The root καλ appears in the Latin cal-endae, con-cil-ium, nomen-clā-tor; in the Old High German hal-ôn, ‘to call.’ Originally ἐκκλησία was a calling-out of the people from their homes, but that usage soon passed away. It became the constitutional assembly of Athens and “we must banish from our minds all remembrance of its etymology.” In the LXX the word is used as the equivalent of הַנָּה, the assembly of the Israelites as a whole. In the N. T. the word takes a further advance. It still appears in the sense of ‘assembly’ at times, as in 1 Cor. 11:18, but usually, as Thayer shows (*Lexicon*), the idea of the word is that of body or company of believers whether assembled or not, the body of Christ. This is true at times where the idea of assembly is impossible, as in Ac. 8:3. The word in this sense of body of Christians is used either in the local (Ac. 8:3) or the general sense (Mt. 16:18). In the general sense the word does not differ greatly from one aspect of the word βασιλεία. These examples must suffice.

VII. The Kinship of Greek Words. The study of the family tree of a word is very suggestive. Δείκνυ-μι is a good illustration in point. It has the root δικ which appears in the Sanskrit diç-ārni, ‘to show,’ Latin dic-o, Gothic tēhō, German zeigen, etc. On the root δικ a number of Greek words are built, as δικ-η, ‘the way pointed out,’ ‘right’
or ‘justice’; δίκην, ‘after the way’ or ‘like’; δείξ-ις, ‘a showing’; δείγ-μα, ‘something shown’; δικ-ϊας, ‘a man who seeks to go the right way,’ ‘righteous’; δικ-αίω, ‘to [Page 175] make or declare one to be righteous’; δικ-αίω-σις, ‘the act of declaring one righteous’; δικ-αίω-μα, ‘the thing declared to be right’; δικ-αίω-σφήν, ‘the quality of being right,’ ‘righteousness’; δικ-αίως, ‘rightously’ or ‘justly’; δικ-αίω-τής or δικ-αίω-τής, ‘one who decides rightly’; δικ-αίω-τή-μα, ‘the place for judging rightously.’ Each of these words occurs in the N. T. save three, δικην, δικ-αίωτής, δικασ-τήμα. With twelve words the difference in meaning is not so much due to historical development (like ἐξάλημψις) as to the idea of the various suffixes. It is, of course, true that the N. T. has a special doctrine of righteousness as the gift of God which colours most of these words. The point is that all these various points of view must be observed with each word. Another illustration that will not be followed up is λό-τρον (Mt. 20:28), ἄσµ-λό-τρω-σις (Ro. 3:24). The ideas of action, agent, result, instrument, quality, plan, person, etc., as shown by the suffixes, differentiate words from each other.

The development of this line of study will amply repay the N. T. student.

VIII. Contrasts in Greek Words or Synonyms. The Greek is rich in synonyms. In English one often has a choice between the Anglo-Saxon word or its Norman-French equivalent, as “to ask” or “to inquire.” The Greeks made careful distinctions in words. Socrates tripped the Sophists on the exact meaning of words as often as anywhere. We are fortunate in N. T. study in the possession of two excellent treatises on this subject. Trench, Synonyms of the N. T., 1890, is valuable, though not exhaustive. But he gives enough to teach one how to use this method of investigation. Heine, Synon. des neuest. Griech., 1898, is more comprehensive and equally able. The matter can only be mentioned [Page 176] here and illustrated. With δίκαιος, for instance, one should compare ἀγαθός, ἀγως, καθαρός, καλός, ἅσιος, before he can obtain a complete idea of N. T. goodness or righteousness. We see Jesus himself insisting on the use of ἀγαθός for the idea of absolute goodness in Mk. 10:18, οὐδές ἀγαθός εἰ μὴ ἐς ὁ θεός. Both ἀγαθός and δίκαιος occur in Lu. 23:50. In Lu. 8:15 the phrase καιρία ἀγαθή καὶ καλή approaches Socrates’ common use of καλός κ

Heine HEINE, G., Synonymik des neuest. Griechisch (1898).
The term orthography is used to include all that pertains to the spelling of Greek words. Phonetics deals with the sounds of the letters. The orthography was constantly changing, but not so rapidly as did the sounds. Each had an independent development as is seen very strikingly in the modern Greek vernacular (Thumb, *Handbook of the Mod. Gk. Vernac.*, p. 6). There has never been a fixed orthography for the Greek tongue at any stage of its history. There has always been an effort to have new phonetic spelling to correspond to the sound-change. Cf. Blass, *Gr. of N. T. Gk.*, p. 6. The confusion in spelling grew with the centuries as in English. Many delicate questions confront us at once. It has not seemed possible to give the explanation of all the varied phonetic (true or merely analogical) and orthographic changes in the use of the vowels and consonants. An orderly collection of the facts with historical side-lights is all that is attempted.

I. The Uncertainty of the Evidence. It is difficult to tell what is the vernacular usage in N. T. times on many points, though somewhat less so since the discovery of the papyri.

(a) The Ancient Literary Spelling. The difficulty is much increased by the comparison of the phonetic spelling of the modern vernacular with the historical orthography of the ancient literary Greek.\(^1\) This method applied to any language may lead one into error. Modern conversational English differs widely in orthography from

Spenser’s *Faerie Queene*. For most of the history of the Greek language no lexicons or grammars were in use. There were the schools and the books on the one hand and popular usage on the other. The movement of the Atticists was just the opposite of the modern phonetic spelling movement in English. The Atticists sought to check change rather than hasten it. It is to be remembered also that the Atticists were the cloister copyists of the ancient Greek writings and of the N. T. Later copyists reflect local types, some more conservative, some less so. The law of life is best here, as always, without artificial impulse or restraint. In seeking to restore the orthography of the *κοινή* vernacular of the first century A.D. one must not be handicapped by the literary Attic nor the modern Greek vernacular, though each will be of service. In simple truth one has to be less dogmatic these days concerning what could or could not have been in the past. Breasted calmly assures us that before 3000 B.C. “the alphabetic signs, each of which stood for one consonant,” were in use in Egypt. He adds: “Had the Egyptian been less a creature of habit, he might have discarded his syllabic signs 3500 years before Christ, and have written with an alphabet of 24 letters.” The Greek language was a growth and did not at first have 24 letters. E, even in early Attic, not to mention Cretan, had the force of ε, η and sometimes ιε. Indeed Jannaris asserts that “the symbols η and ω, in numerous cases also ι, originated at school as mere compensatory marks, to represent positional or ‘thetic’ ε or ο.” It is not surprising with this origin of vowels (and consonants do not differ) that variations always exist in the sound and use of the Greek letters. Blass is clearly right when he points out that in changes in the sounds of words “it is usual for the spelling not to imitate the new sound off-hand,” and in the case of the N. T. writers there was “no one fixed orthography in existence, but writers fluctuated between the old historical spelling and a new phonetic manner of writing.” Moulton adds that the N. T. writers had to choose “between the literary and illiterate Greek of their time,” and “an artificial orthography left the door open for not a few uncertainties.” Here is a “letter of a prodigal son” (B.G.U. 846 ii/A.D. See Milligan, *Gk. Papyri*, p. 93 f.) in which we have “phonetic” spelling in abundance: Καὶ διὰ πάντων εὐχομαί σαυ ὑγειάνειν. Tò

προσκύνημα σου [ποι]ῶ κατ’ αἰκάστην ἡμαίραν παρὰ τῶ κυρίῳ [Σερ]άπειδει. Γεινώσκειν σαι θέλω κτλ. There is here interchange of ε and ά, of ι and ει.

(b) The Dialect-Coloured Vernacular. The dialects explain some variations in orthography. One copyist would be a better representative of the pure vernacular κοινή, while another might [Page 179] live where Attic, Ionic, Doric or Northwest Greek had still positive influence. Often what looks like a breaking-down of the language is but the survival or revival of old dialectical forms or pronunciation. But these variations are mainly due to the personal equation. It was not till the time of Marcus Aurelius that the learned grammarians succeeded in formulating the artificial rules which afterwards prevailed for writing the old classical Greek. The first century A.D. was still an age of freedom in orthography. Even in the fourth century A.D. the scribe of Ν prefers ι rather than ει, while in the case of B ει often occurs where ι is the rule elsewhere. This is not mere itacism, but is also individual preference.1 “The oldest scribes whose work we possess (centuries 4 to 6) always kept themselves much freer from the schools than the later.”2 But, even if Luke and Paul did not know the old historical spelling in the case of ι mute (subscript) and ει, it is merely cutting the Gordian knot to “follow the Byzantine school, and consistently employ the historical spelling in the N. T.” and that “without any regard to the MS. evidence.” It is not the spelling of the Byzantine school nor of the Attic dialect that we are after, but the vernacular Greek of the first century A.D., and this is not quite “the most unprofitable of tasks,” as Blass would have us believe.3

(c) The Uncials. They do complicate the situation. On some points, as noted above, the great uncial Ν and B differ, but usually that is not true. There is a general agreement between the older uncialists in orthography as against the later uncialists and the cursive which fell under the spell of the Byzantine reformers, who sought to restore the classical literary spelling. The Syrian class of documents therefore fails to represent the orthography of [Page 180] the vernacular κοινή of the first century A.D. The Syrian class, for instance, reads Καπερναού, not Καφαρναού. But do the MSS. which give us the pre-Syrian types of text preserve the autographic orthography? The fourth century is a long time from the first and the presumption might seem to some extent against the Neutral, Alexandrian and Western classes also. The temptation is constant to spell as people of one’s time do. This difficulty is felt by every editor of classical Greek texts and often purely arbitrary rules are used, rules

---

1 Hort, The N. T. in Orig. Gk., App., Notes on Sel. Read., p. 152. But in the Intr. (p. 304) Hort is not willing to admit “peculiarities of a local or strictly dialectic nature” in the N. T. Still Hort (Notes on Orth., p. 151) allows the Doric ὁδηγέω (ὁδηγῆ) in “single MS.” like B and D, προσαχεῖν in B, ἐράσεω in D, etc. Hirt (Handb. d. Griech., p. 53) attributes much of the vocal change to dialect-mixing and analogy. On Ν and B see Hort, op. cit., p. 306 f.
2 Blass, Gr. of N. T. Gk., p. 6 f.
3 Ib., p. 7. Hort (p. 302 f. of the Intr. to the N. T. in Orig. Gk.) makes a strong defence of his effort to give as nearly as possible “the spelling of the autographs by means of documentary evidence.” There must not be “slovenly neglect of philological truth.” But Moulton (Prol., p. 47) does not “set much store by some of the minutiae which W. H. so conscientiously gather from the great uncialists.” Certainly “finality is impossible, notwithstanding the assistance now afforded by the papyri” (Thack., Gr., p. 71).
made by modern critics. Hort\textsuperscript{1} is willing to admit that in some instances the spellings found in the great uncial MSS. which are at variance with the Textus Receptus are due to the “literary spellings of the time” when the MSS. were written, “but for the most part they belong to the ‘vulgar’ or popular form of the language.” Hort could see that before we had the new knowledge from the papyri and inscriptions. He adds\textsuperscript{2}: “A large proportion of the peculiar spellings of the N. T. are simply spellings of common life. In most cases either identical or analogous spellings occur frequently in inscriptions written in different countries, by no means always of the more illiterate sort.” This fact showed that the unclassical spellings in the uncial MSS. were current in the Apostolic age and were the most trustworthy even if sometimes doubtful. “Absolute uniformity belongs only to artificial times,” Hort\textsuperscript{3} argues, and hence it is not strange to find this confusion in the MSS. The confusion existed in fact in the first century a.D. and probably the autographs did not follow uniform rules in spelling. Certain it is that the N. T. writings as preserved in the MSS. vary. But itacism applies to all the MSS. to a certain extent and makes it difficult to know what vowel or diphthong was really before the scribe. In general the N. T., like the LXX, is grounded in matters of orthography on the rules of the grammarians of the time of the Caesars (Apollonius and Herodian) rather than upon those of the time of Hadrian, when they had an archaistic or Atticistic tendency (Helbing, Grammatik d. LXX, p. 1). Moulton (Prol., p. 42) thinks that “there are some suggestive signs that the great uncial MSS. are not far away from the autographs.” But Thackeray (op. cit., p. 56) denies that this conclusion can be drawn ipso facto of the LXX, since it was translated (the Pentateuch certainly) some three centuries earlier than the N. T. was written.

1 Op. cit., p. 303 f. Jann. (Hist. Gk. Gr., p. 35) calls attention to the fact that the professional copyists not only had to copy accurately, but “in the received uniform spelling.” Cf. also Helbing, Gr. d. LXX, p. 2. For further remarks on the phenomena in the LXX MSS. see Swete, O. T. in Gk. p. 300 f.

(d) The Papyri. They strengthen the case for the uncials. Deissmann¹ and Moulton² show that the great uncials correspond in orthography not only with the contemporaneous inscriptions as Hort had seen, but also with the papyri of the better-educated writers. Among the strictly illiterate papyri writers one can find almost anything. The case of ἐάν=ἂν in relative clauses is worked out well by Moulton to prove this point. In the papyri dated B.C. the proportion of ἐάν to ἄν in such cases is 13 to 29, while in the first century A.D. it is 76 to 9. But in the fourth century A.D. it is 4 to 8 and the usage disappears in the sixth century A.D. Thackeray (Grammar, vol. I, pp. 65 ff.) shows (after Deissmann³) how the LXX confirms this conclusion for ἐάν=ἂν. The usage appears in B.C. 133; copyists are divided in different parts of the same book as in Exodus or Leviticus; it is predominant in the first and second centuries A.D., and then disappears. Thackeray (p. 58) traces οὐθείς (μήθείς) “from its cradle to its grave” (from 378 B.C. to end of ii/A.D.) and shows how in ii/A.D. οὐθείς is

supreme again. This point very strikingly confirms the faithfulness of the uncials in orthography in a matter out of harmony with the time when the MSS. were written. We may conclude then that Hort is right and the uncials, inscriptions and papyri give us the vernacular orthography of the κοινή with reasonable correctness.

II. Vowel-Changes (στοιχεῖα φωνήεντα). In the old times the vowels underwent many changes, for orthography was not fixed. Indeed is it ever fixed? If the Atticists had let the κοινή have a normal development, Dr. Rutherford would not have complained that Greek was ruined by their persistence “in an obsolete orthography instead of spelling as they speak.”¹ But as early as 403 B.C. the orator Archinos² had a law passed in Attica prescribing the use of the Ionic alphabet in the schools. The early Greek used only α, ε, ι, ο, υ, and no distinction was made in writing between long and short vowels, as indeed was never done in the case of ι and υ. The Ionic invented Ω for long ο. Before the introduction of the Ionic alphabet, I.E. ά and Ί were represented by ē. H was at first the aspirate like Hebrew 𐤀 and then now aspirate and now long ε or α as the inscriptions amply show. It is very common in the early inscriptions to see ē thus used as long and d’likewise, as in Ενρι and τως. Cf. ε, ο for spurious diphthongs αι, ου. The kinship of these vowels with the Phœnician alphabet is plain, as α is from נ, ε from מ, ι from ל, ο from ב, υ from the doubling of י (and so a Greek invention). It is interesting to note that the Sanskrit has three pure vowels, a, i, u, while ē and ο are diphthongs in origin. In Sanskrit a far surpasses all other vowel-sounds, more than twice as many as all other vowel-sounds put together.² Schleicher³ speaks of the weakening of α into i and u, and thus he goes back to an original a sound for all the vowels. In Latin also a breaks into e, i and u.⁴ Even in Attica in the first century B.C., in spite of Archinos’ law, the inscriptions use sometimes αι and αε,

Rutherford

RUTHERFORD, W. G., A Chapter in the History of Annotation (1905).

4 Giles, Comp. Philol., p. 149 f.
ει and ι, η and τ, υ and ι, υ and υι, ι and ει interchangeably. Uniformity did not exist in one dialect, not to mention the persistent differences between the various Greek dialects. These changes were going on constantly all over the Greek world in the first century A.D. For the alphabetical changes in the dialects see Buck’s *Greek Dialects*, pp. 15 ff. These interchanges between vowels are interesting.

(a) The Changes (Interchanges) with α. The first sound made by a baby is Ᾱ. These changes became dialectical peculiarities in many words like the Lesbian κρέτος (κράτος, “ablaut” variations), the Bœotian ἄτερος (ἐτερος), Doric ἱαρός (ἱερός). So in the vernacular Attic we find ἔρετη (ἀρετή) where α breaks to ε before ε (vowel assimilation), as in the Ionic-Attic α sometimes changes to ε after ι and υ. See Kühner-Blass for many examples.

---

1 Deiss., B. S., p. 182, gives ἐγγαρίας in a pap. (iv/Α.Δ.).

3 According to Phrynichus (Rutherford, *New Phryn.*, p. 204) both of these words are ἔσχατος βάρβαρα.

Gregory

4 Gr. of N. T. Gk., p. 20.
assimilation) which is not so common in the papyri as in the N. T. MSS.\(^5\) In modern Greek both σαράντα and σεράντα survive. Likewise W. H. always give the preference to τέσσερα, though the papyri do not use it till the fourth century A.D.\(^6\) But in the inscriptions τέσσερα is found several times,\(^7\) one case in the first century A.D.\(^8\) Τέσσερας, however, does not occur in the N. T. MSS., though the papyri have it in the Byzantine age.\(^9\) The Ionic and the modern Greek have τέσσερες and τέσσερα. The N. T. thus differs from the κοινή papyri, but is in harmony with the Ionic literature and inscriptions. In some MSS. in both LXX and N. T. τέσσερα is accusative as well as nominative, like the Achæan dialect, but this is another story. The common (Ionic and Northwest Greek) use of –ώω instead of –άω with verbs as in ἔρωτέω will be discussed in the chapter on Verbs.

Conversely ε is sometimes changed to α. Ἁμαρίζει is accepted by W. H. in Lu. 12:28 rather than either the late Ἀμφρίζει or the early Ἀμφρίνυσι. The form ἔροινάω instead of ἔρευνάω W. H. have everywhere received into the text, and so with ἔξεραυνάω and ἔνεξεραύνητος. NB always read it so, sometimes AC. It is supported by the papyri. Cf. Maysen, Gr., p. 113; Helbing, Gr. d. LXX, p. 7, for similar phenomena in the LXX.

Initial ε often becomes α in modern Greek vernacular, as Ἀλαφρός (Δλαφρός), Ἀνέρα (Δνέρα), etc. Cf. Thumb, Handbook, p. 14. So the Doric πιάζω is used in the N. T. everywhere save in Lu. 6:38, where, however, πεπιεσάνες has the original idea (‘pressed down,’ not ‘seized’). Both occur in the LXX. The Attic forms φίλη, ὕλος are retained in the N. T. (as in LXX) rather than the Ionic and vernacular κοινή forms in ε, a mark of the influence of the literary κοινή.

---

5 Moulton, Prol., p. 46.
6 Ib. For assimilation between α and ε in modern Gk. dialects see Dieterich, Unters. etc., pp. 272, 274. In mod. Gk. vernacular α frequently displaces initial ε or o. Cf. Thumb, Handb., p. 14.
7 Dieterich, Unters. zur Gesch. der griech. Spr., p. 4; also Schweizer, Gr. d. perg. Inschr., p. 163.
8 Nachm., Laute und Formen d. magn. Inschr., p. 146.
9 Moulton, Prol., p. 46. For further evidence see Crönert, Mem. Graeca Hercul., 1903, p. 199. In the Apostolic Fathers and the N. T. Αποκ. τέσσερα and τεσσεράκοντα are common as well as ἐκαθερίσθη (Reinhold, De Græcitate Patr. Apostol. etc., p. 38 f. On the whole subject of α and ε in the papyri see careful discussion of Maysen, Gr., pp. 54–60, where he mentions ἑκοῦν, ἐγαρεύω, ἐπελεύσασθαι (for similar confusion of aorist and fut. inf. see ἐκφεύξασθαι, 2 Macc. 9:22 V). Τέσσερα and τεσσεράκοντα are very common also in the LXX MSS. Cf. Helbing, Gr. d. LXX, p. 5; Thack., Gr., p. 62 f. This spelling occurs as early as iv/b.c. in Pergamum (Schweizer, Gr. d. perg. Inschr., p. 163 f.). In Egypt it hardly appears before i/a.d. and is not common till ii/a.d. (Thack., Gr., p. 62). The uncials give the later spelling. See “Additional Notes.”
1 Dieterich Unters. etc., p. 70. Cf. Thack., Gr., vol. I, p. 75 f. So Ἀλαματία in 2 Tim. 4:10, though C has Δαλμ. as Lat. has both. Blass, Gr. of N. T. Gk., p. 21. Both forms are in the pap., Deiss., B. S., p. 182.
Some verbs in –έω also use –άω forms, like ἐλεάω, ἐλλογάω, ξυράω. See the chapter on Verbs.

Changes in α take place in a few Hebrew proper names. Καπερναούμ is the Syrian reading for Καφαρναούμ (W. H.). So W. H. read Μαλελεήλ in Lu. 3:37, not Μελ. (Tisch.), and Ναθαναήλ, Σελαθιήλ (instead of Συλ.) appears in B. Thumb¹ remarks that these changes between α and ε occur to-day in the Kappadocian dialect.

α and η. The Doric forms ὁδήγις, ὁδήγῳ are found in the koine, though Schweizer² calls it hardly a Dorism. So in N. T. MSS. we have προσαχέω in B (Ac. 27:27) and ράσσω in D (Mk. 9:18). The Ptolemaic papyri regularly have ὄνηλίσκειν till ii/A.D. (Mayser, Gr., p. 345). For α and η see η and η under (c).

α and ο. The changes⁴ between these two vowels are seen in the Lesbian ὑπά (ὑπό), Arcadian τριακάσιοι, Doric εἴκοσι (εἴκοσι), etc. W. H. give βαττόλογ év in Mt. 6:7 (cf. βατταρίζω) instead of βαττολογέω. ABK and twice Ἑ and many cursive have πρὸς Κολασσαί [Page 185] as the title, while in Col. 1:2 nearly all MSS. read ἐν Κολοσσαῖς. Blass finds the title in o also in accordance with the coins and the profane writers; Xen., Anab. I. 2. 6, has a variant reading in Κολοσσαί. In Mk. 13:35 B has μετανόησαν and D in Lu. 11:5 instead of μετανόηκτον.¹ In 1 Tim. 1:9 W. H. give μητρολόφις and πατρολόφις (instead of –αλοίας) on the authority of ΝΑΔΦΓΛ. Blass² compares πατρο-κτόνος.

2 Hellen. (Griech. Spr.), p. 76. See also Radermacher, N. T. Gr., pp. 34 ff.
Schweizer

———, Grammatik der pergamen. Inschriften (1898).

4 K.-Bl., Tl. I, Bd. I, p. 117 f. Cf. Meisterh., Gr. etc., p. 117, where Attic inser. are shown to have Νεοπολίτης.
1 Hort (Notes on Orth., p. 152) compares μέσαβον, and Blass (Gr., p. 21) μεσαστύλον. Μετοξῦ (μεταξύ) is in 1 Clem. and Barn. (Reinhold, De Graec., p. 40. Cf. Mayser, Gr., p. 60 f., ὄλλου for ὄλλου. Illiterate scribes confused α and ο, α and ε in the LXX (as μετοξῦ) and in the pap. (Thack., Gr., p. 77).
2 Gr. of N. T. Gk., p. 21.
α and ω. Ἀνάγαυον is read by the most and the best MSS. in Mk. 14:15; Lu. 22:12. Ἀνόγεον, ἄνόγαιον, ἄνόγεων, ἄνάγεον have only “trifling authority.” Γάιος is Doric and Ionic.

α and αλ. The papyri sometimes have the Epic and Ionic αἴει, though the N. T. only reads άει. The ι early dropped out between the vowels. Cf. Mayser, Gr., p. 103. B has αἴει in 1 Esd. 1:30. The N. T., like the LXX, has καίῳ and κλάϊο, though the Ptolemaic papyri rarely have κάω and κλάω.

α and αυ. In Lu. 2:1 ΚΣΔ have Ἀγούστον instead of Αύγούστον. This spelling of ጦ for ὁ is found in Pergamum by Schweizer in the reflexive pronoun ἐστόν, while Meisterhans gives examples of it as early as 74 B.C. in the Attic inscriptions. Moulton is probably correct in saying that we need not assume the existence of this spelling in the N. T. autographs, though it is not impossible. He indorses Mayor’s suggestion (“that ἀκαταπάστους in 2 Pet. 2:14 AB may be thus explained: he compares ἁμηρῷ 1:19 A.” This dropping of υ between vowels extended to the dropping of υ before consonants. In the modern Greek we have αὐτός (αύτος) and ὁτός (in Pontus), whence comes τό (not the article). The examples of Ἀγούστος and Ἡτός (ὄτογεννητόν once) in the papyri are very common. Thackeray (Gr., p. 79) finds no instances in the LXX.

[Page 186] α and ε. αι was written αε in early Boeotian and Attic inscriptions (cf. Latin transliteration) and so gradually was pronounced as ε (Jannaris, Hist. Gk. Gr., p. 28). By 100 A.D. in the κοινή αι was the mere equivalent of ε. The Egyptian papyri show abundant illustrations of it. Especially do the LXX MSS. exhibit it (Thackeray, Gr., p. 78). The modern Greek pronounces both these vowel-sounds alike, as indeed did the Boeotian dialect long before the κοινή. Numerous examples of this interchange of spelling exist in the Pompeian wall-inscriptions and in the vernacular κοινή from 100 A.D. on. Indeed in the N. T. MSS. it is very common to find –σθαι and –σθε used indiscriminately, probably representing the common later pronunciation which was already developing in the first century A.D. Hort compares this “shortening of an identical sound” to the late στύλος for στῦλος and κρίµα for κρῆμα. So common did this blending become that Blass places little confidence in the N. T. MSS. on this point. Such readings occur as ἔτεισθε for αἰτεῖσθε and γυνήκες for γυναῖκες.

5 Gr. etc., p. 91 f.
6 Gr. etc., p. 61. Cf. also Dieterich, Unters. etc., p. 78.
7 Prol., p. 47.
8 Exp. Exp., The Expositor (London).
10 W.-Sch., p. 47.
2 Notes on Orth., p. 150. Cf. on αι and ε, Mayser, Gr., p. 107.
3 Gr. of N. T. Gk., p. 9.
Sometimes only the context\(^4\) can decide between ε and αι where different forms result, as in ἄναψε or αι—α (Lu. 14:10), ἔγερε or —αι (Mt. 9:5), ἐπάναγκες (Ac. 15:28), ἔρχεσθε or —αθαι in ΝΑDL (Lu. 14:17), ἑτέροις or ἑταίροις (Mt. 11:16 Syrian reading), παρένεγκε or —α (Mk. 14:36), etc. In Gal. 4:18 both Ν and B read ζηλοῦσθε for ζηλοῦσθαι. B reads Αἴλαιθαι in Ac. 2:9, from עַילָם, the rest Ελ. The authority according to Hort\(^6\) is “usually preponderant” for ἐξέφνης and ἐφνίδιος instead of αφ. So κερέα for κεραία is accepted\(^7\) in Mt. 5:18; Lu. 16:17, and κραιπάλη for κραιπάλη in Lu. 21:34. Likewise W. H. receive Λασεδαλαίθαι in Ac. 27:8. The uncials all have ἶδθ, not ὴδθ, in Rev. 18:13. So all the early uncials but Α have Σκομορέα (not —αι) in Lu. 19:4. Hort\(^8\) accepts also φελόνης for φαιλόνης (2 Tim. 4:13), though Moulton\(^9\) doubts, because of the Latin paenula.

[Page 187] (b) THE CHANGES WITH ε. The interchanges of ε and α have already been discussed under (a), but others took place with η, ι, ο.

ε and αι. In the Beoetian these were freely interchanged\(^1\) and the same interchange occurs in the Doric, New Ionic and Attic as πλέων or πλείων. The Attic inscriptions\(^2\) show this common phenomenon. The α before a vowel easily and early loses its force and drops out. Before the adoption of the scholastic orthography at Athens (B.C. 403) ε stood for η, ι, ει. Sooner or later ει became everywhere a monophthong (Buck, Greek Dialects, p. 28). But the κοινή usually wrote ει before vowels rather than ε (Thackeray, Gr., p. 81). The LXX MSS. reveal the same traits as the N. T. Ἀρεοπαγίτης is in Acts 17:34, but Ἀρειος occurs (Ac. 17:19, 22). Ἀχρέους is uniform in the N. T., but in Ro. 3:12 we have ἥχρεωθεσαν (ΝΑBDG). In Lu. 3:13; Jo. 21:15; Ac. 15:28, W. H. print πλέον (Attic has even πλέονος),\(^3\) but elsewhere the N. T. has forms in ει. The derivatives all have ε like πλεονεκτέω. But the N. T. has only τέλειος, τελειόω, though Herodotus always and the Attic usually used τελεόω. D\(^6\) has τελεῖσθαι in Heb. 10:1.\(^4\) Of words with ε and ει before consonants one may note that

6 Ib.
7 Ib. Cf. the Western καινοφωνίας for κενοφωνίας in 1 Tim. 6:20. In 1 Th. 3:3 instead of σαίνεσθαι FG read σιένεσθαι. Nestle (Neut.-Zeit., 1906, p. 361) finds parallels in the forms σιαινούναι and καινοφωνίας.
8 Notes on Orth., p. 151.
1 Brug., Griech. Gr., p. 28, as θεός=θεός; Thumb, Handb., p. 220.
2 Meisterh., Gr., p. 20 f. Cf. Schweizer, Gr. etc., p. 44 f. The change in ε and ει was very common in vi/iii B.C. Jann., Hist. Gk. Gr., p. 37.
3 But even the Arcadian dial. has πλέονα, πλεόνα (Solmsen, Inscr. Graec., p. 4). Πλέον is common in the N. T. Apoc. (Reinhold, De Graec. Patr. Apost. etc., p. 40). Cf. Meisterh., Gr. d. att. Inschr., p. 40 f. On the whole subject of ε and ει in the pap. see Maysor, Gr., pp. 67–73. They are very numerous indeed, these changes in the pap., both ways.
4 Blass, Gr. of N. T. Gk., p. 22.
the Lesbian Greek used of the best N. T. MSS. (mention a genitive Doric characteristic. This variation appears in the inscriptions and in the papyri, especially in the case of the fact that occur in the N. T. (both Ionic and Attic). The N. T. never has ἐξ, but always ἐλ. However, ἔσω is the uniform reading in the N. T. Homer used either ἐσω or ἔσω.

ε and η. Numerous examples of long ε occur in the inscriptions like μέτε (μήτε). These changes are probably all analogical and not phonetic. But in the N. T. we have only the shortening of η, back to short ε in some words like ἄναθεμα, though this particular word (‘curse’) came to be distinct from ἄναθημα (‘votive offering’). ἄναθημα occurs only once in the N. T. (Lu. 21:5), and even here ΝADX, etc., have ἄναθεμα. Tisch. quotes Moeris as saying ἄναθημα, ἀττικῶς, ἄναθεμα ἐλληνικῶς. But the use of ἄναθεμα as ‘curse’ [Page 188] “is not an innovation of biblical Greek” (Moulton, Prolegomena, p. 46). In Ac. 11:11 ΝABDGr read ἑμεν, not ἑμην. Perhaps this exchange between ε and η bears on the use of στήκετε with ίνα in Mk. 11:25; 1 Th. 3:8, and of MS. evidence for θαυμάζετε in Jo. 5:20 and έξομολογήσεται in Ph. 2:11. Cf. also ὄψηθε and ὄψεθε in Lu. 13:28. So in 13:25. Mayser (Gr., p. 64) thinks that sometimes ε represents an original open η as in παρεστέκοτες. The κοινή shows quite a preference for words in –εμα rather than –ημα (Mayser, Gr., p. 65 f.), and the LXX has new words in –εμα, though some words have both forms (Thackeray, Gr., p. 80).

In the papyri this shortening (as in the LXX) appears in words like ἐπίθεμα, πρόσθεμα, etc. The interchanges between η and ε, η and ει will be discussed under η (c). Mayser (Gr., p. 63 f.) thus (η for ε) explains πλήρης as an indeclinable neuter form.

ε and τ. Dieterich[2] mentions as one of the marks of the Attic and Egyptian κοινή the fact that τ and ε interchange when used with λ and ν. Cf. the modern Greek, and the Lesbian Greek used τέρτος for τρίτος, and the Thessalian θῶς for θεός. It is a Doric characteristic. This variation appears in the inscriptions[3] and in the papyri,[4] especially in the case of λεγόνων, which is also λεγενών and even λεγονών, not to mention a genitive λεγόνων (ο and οι having the same sound). Λεγόνων is the reading of the best N. T. MSS. (ΝBDL; cf. Latin legio), as in the papyri. Especially in the case of the Latin short j does the κοινή have ε. Ἀλεξίς, not ἀλεξίς, is the reading in the

5 Solmsen, Inscr. Graecae etc., p. 1. Arcadian dial. Cf. also Meisterh., Gr., p. 3. In the Pontic dial. to-day there is a wide-spread use of ε instead of η, as in σέρμαι (Thumb, Hellen. [Griech. Spr., referred to hereafter usually as Hellen.], p. 149).
1 Moulton, Cl. Rev., 1904, p. 108. Cf. also Moulton, Prol., p. 46, and Schweizer, Gr. d. perg. Inschr., pp. 47 ff., has good discussion of this shortening of η to ε and also ο to ο. “Ε and η interchange times without number from V/b.c. down to iχ/Α.Д.” (Jannn., Hist. Gk. Gr., p. 36). Reinhold (De Graec. Patr. etc., p. 101 f.) shows how the confusion between η and ε led to forms like ἔδων ἄγατε. Cf. the mod. Gk. στέκω (στάκω) and θέτω (θήτω).
2 Unters. etc., p. 136.
3 Schweizer, Perg. Inschr., p. 43 f.
N. T. according to the best MSS. (Mk. 1:16, etc.). This is a natural assimilation after a liquid. The frequency of \( \varepsilon \) for \( \iota \) in the Egyptian papyri may be due in part to the Coptic, which has no short \( \iota \) (Steindorff, *Kopt. Gr.*, p. 13). Note a soldier’s use of \( \chi\varepsilon\rho\alpha\nu \) for \( \chi\varepsilon\iota\rho\alpha\nu \), B.G.U. 423 (ii/A.D.). Λέντιον (Jo. 13:4, Latin *linteum*) is a change in the other direction, Latin \( \iota \) to Greek \( \varepsilon \). Blass\(^6\) says that \( \lambda\varepsilon\nu\tau\varepsilon\omicron\nu \) would have looked unnatural to a Greek. 

Neophytos also is alone well-attested,\(^1\) not \( \nu\eta\phi\alpha\varepsilon\omicron\omicron\) (1 Tim. 3:2, etc.). Πιτίολοι in Ac. 28:13 represents the Latin *Puteoli*, using \( \iota \) for \( \epsilon \) (cf. Dittenberger, p. 145). 

Σιμικίνθιον (not –εον) is the N. T. reading (Ac. 19:12) for Latin *semincinctium*. So Τιβέριος (not Τεβέριος) is the N. T. rendition of Tiberius in Lu. 3:1, though the later Greek writers used Τεβέριος, \( \Delta\omicron\mu\varepsilon\tau\omicron\omicron\), etc.\(^2\) It is really surprising that more examples of this exchange of \( \varepsilon \) and \( \iota \) do not appear. The interchanges between \( \varepsilon\iota \) are discussed under (d), those between \( \varepsilon \) and \( \omicron \) under (f).

\( \epsilon \) and \( \omicron \). The Lesbian Æolic had στρόφω for the Doric στράφω. The Ionic-Attic made it στρέφω. Meisterhans\(^3\) gives numerous examples of this change in \( \epsilon \) and \( \omicron \): \( \omicron \beta\omicron\omicron\omicron\) for \( \omicron \beta\varepsilon\omicron\omicron\) as early as the middle of the fourth century B.C. Dieterich\(^4\) mentions the assimilation of \( \epsilon \) and \( \omicron \) as one of the marks of the Egyptian κοινή. In Ac. 18:24 \( \text{NK} \) 15. 180. Cop. arm. and in 19:1 \( \text{NK} \) 180. read Απελλής for Απολλός, though D has Απολλόνιος in 18:24. The Doric and the Attic inscriptions\(^5\) had Απέλλων, Απελλόνιος, Απέλλιος, etc. In 1 Cor. and Titus we have only Απολλός. Indeed Blass\(^6\) suggests that Απελλής is the reading of the a text in Acts and that Απολλός is an interpolation from 1 Cor. It is more likely to think that the two old forms of the name were still in use, though Απολλός is the correct text in Acts also. The MSS. of the N. T., even good uncials, have Ολοθρεύω, Ξολοθρεύω, Ολοθρευτής as well as the usual Ολεθρεύω, etc. (cf. Ολολός for Οβελός by assimilation), and Hort\(^7\) accepts the \( \epsilon \) form only in Ac. 3:23. The Syrian class has the \( \omicron \) form. Blass,\(^8\) who usually cares little for such points, properly insists on the documentary evidence. In Heb. 11:28 only ADE have the \( \epsilon \) form, while in 1 Cor. 10:10 DFG read \( \epsilon \). [Page 190] The LXX according to \( \text{NAB} \) reads \( \epsilon \), though the modern Greek has Ξολοθρεύω. But Ολεθρος is the uniform spelling in the N. T. and is the rule in the LXX (Thackray, *Gr.*, p. 88).

---

5 Αλεξ occurs in pap. also. Blass, Gr. of N. T. Gk., p. 307; Thackray, p. 84.
6 Gr. of N. T. Gk., p. 22.
1 Notes on Orth., p. 151.
7 Notes on Orth., p. 152.
8 Gr. of N. T. Gk., p. 21. He quotes Buresch, Rhein. Mus., p. 216 f., as in favour of \( \epsilon \) in the N. T. as well as the LXX. Ολεθο appears in the Apost. Fathers (Goodspeed, Index) and Ολωθο in N. T. Apoc. (Reinhold, p. 40). For assimilation between \( \epsilon \) and \( \omicron \) in mod. Gk. see Dieterich, Unters. etc., p. 274.
In Mk. 8:14 B has ἐπελάθεντο as is common in the LXX (Thackeray, Gr., p. 89). Cf. also ἵππος (Heb. 12:16, LXX), ἔξεκρές (Ak. 4:35), παλαιόν (1 Cor. 11:23), and ἔξεκρές (Lu. 19:48 ΝΒ). Hort (Appendix, p. 167 f.) explains these changes as “euphonic,” but it is a change of the root-vowel of ὁδ, a confusion of thematic and athematic conjugations.

Éαν and ἄν. See also I (d) under Papyri. This is as good a place as any to say a word further on the interchange of these two forms, not strictly vowel-changes, however. We have also ἐλαχ (really ἐλ+ ἄν) as in P Eleph. 1 (B.C. 311). See also ἐλαχ for ἐαν, B.G.U. 530 (i/A.D.). The use of ἐλαχ=modal ἄν in relative sentences, so common in the LXX, N. T. and papyri of i/ii A.D., is not an exchange of vowels, but possibly a slurring over of the e before a. ἄν=ἐαν survives from the ancient Greek in a few instances, as Jo. 5:19 (ΝΒ); 12:32 (B and accepted by W. H.); 13:20 DEFG, etc., have ἐαν, but ΝΒ ἄν and accepted by W. H.; 16:23 (ΒΑCD, accepted by W. H.); 20:23 (twice and accepted by W. H., though ΑΔ have first ἐαν and ΝΑD second). In Ac. 9:2 only ΝΕ have ἄν and W. H. read ἐαν. Blass1 thinks that as ἐαν made encroachment into the province of άν “a kind of interchange of meaning between the two words” grew up. The modern Greek vernacular uses ἄν for ‘if.’ Hort2 considers the whole subject of the interchange between ἐαν and ἄν after relatives “peculiarly irregular and perplexing. Predominantly ἄν is found after consonants, and ἐαν after vowels, but there are many exceptions.” Cf. ἐαιν in Mt. 20:4 and ἄν in Mt. 20:26 f. Moulton3 has shown that ἐαιν=ἄν is scarce in the papyri save from 100 B.C. to 200 A.D. In the Magnesian inscriptions4 only ἐαιν appears, not ἄν nor ἄν, as ἄν=ἐαν is not in the N. T. But in the Herculaneum papyri these particles interchange freely.5 The Attic inscriptions uniformly have ἄν with relatives.6 [Page 191] Indeed Attic often contracts this particle ἐαιν=ἄν.1 But ἐαιν=modal ἄν is found in Xen. Mem., ὅ ἐαιν ἀριστη, in Lysias, οὗ ἐαιν βουλῆσαι, etc. (see Jannaris, Hist. Gk. Gr., p. 421). This use of ἐαιν occurs sixty-one times in the N. T. Examples occur in late Greek of ἐὶ—ἐαιν as well as ἐὶ—ἄν, instead of ἐαιν. Cf. Reinhold, De Graecitate Patrum Apost. etc., p. 35; Moulton, Classical Review, 1901, p. 32. Thackeray (Gr., pp. 65 ff.) finds that in the i/B.C. the papyri nearly always have ὅς ἄν, while in the i/A.D. they nearly always have ὅς ἐαιν. In the books of Exodus and Leviticus he notes that in the first

1 Gr. of N. T. Gk., p. 60. Omitted by Debrunner in ed. 4.
2 Notes on Orth., p. 173. Hort has a curious error here, for the references under ἄν and ἐαιν should be exactly reversed. ἄν=ἐαιν (‘if’) is rarely found in the pap. also. Moulton (Cl. Rev., 1901, p. 434) gives ἄν μὴ ἀριστη (AP 43, ii/B.C.). Cf. also Cl. Rev., 1901, p. 32; Mayser, Gr., p. 152 f. Mayser gives exx. of ἐαιν=ἄν and of ἄν=ἐαιν.

Reinhold REINHOLD, H., De graecitate Patrum (1898).
Each book may have been written on two rolls. (c) The changes with η. The changes between η and α, η and ε have already been discussed.

η and ι. As already stated, originally H was merely the rough breathing, but the Ionic psilosis left a symbol useless, and ΗΔα was called Δα. Thus the new letter took the old long ε value in Ionic and Attic and also largely supplanted the long a where a became ἄ The Sanskrit used long ə, the Greek η and the Latin either Η or Η This new (in spelling) η (v/b.c.) gradually turned more to the i sound in harmony with the growing itacism of the language, though there was some etacism on the other hand. As early as 150 b.c. the Egyptian papyri show evidence of the use of i for η. By the middle of the second century A.D. the confusion between η and i, η and ει, η and ει is very general. By the Byzantine times it is complete and the itacism is triumphant in the modern Greek. Reinhold thinks that the exchange between η and i was natural in view of the relation between η and ε and the interchange between ε and i. As early as the fifth century b.c. the change between η and i is seen on vases and inscriptions. But the Ptolemaic papyri show little of it and it is rare in the LXX MSS. NAB (Thackeray, Gr., p. 85). In the N. T. times the interchanges between η and i, η and ει, η and ει are not many. In 1 Cor. 4:11 W. H. read γυμνητεύω, though L and most of the cursives have η. [Page 192] The N. T. always has δινάριον, though δινάριον appears very early. For κάµηλος in Mt. 19:24 and Lu. 18:25 a few late cursive MSS. substitute κάµυλος (‘rope’), a word found only in Suidas and a scholium on Arist. But “it is certainly wrong,” a mere effort to explain away the difficulty in the text, an effort as old as Cyril of Alexandria on Luke. For Κυρήνιος Β it. vg. sah. have Κυρίνος, while B* has Κυραινος and A has Κηρύνος, a striking example of itacism. The heathen misunderstood the word Χριστός and confounded it with the familiar χρηστός, pronounced much alike. 

Suetonius (Claudius 25) probably confused *Christus* with *Chrestus*. In Ac. 11:26 Κ 61 have Χρηστιανοὺς, while B has Χρηστ. So in Ac. 26:28 Κ has Χρηστιανόν for Χρηστ., while B has again εἰ. The same thing occurs in 1 Pet. 4:16.

**η and ει.** The Boeotian and the Thessalian dialects early changed⁴ η for ει, τίθει—τίθημι. Schweizer⁵ gives παράδησος for παράδεισος (Byzantine inscription). In Lu. 14:13 (21) we have ἄναπειρος (ABDEL), ἄνάπηρος (GHK, etc.), and –πειρ– (κτ. NR). This itacism is condemned by Phrynichus the Atticist as vulgar.⁶ In the LXX Κ has ἄναπειρος in Tob. 14:2 and AV show it in 2 Macc. 8:24 (Thackeray, Gr., p. 83). In Heb. 6:14 W. H. follow ΚΑΒΔ in reading εἰ μήν rather than η μήν. This form occurs in the LXX and in the papyri. Moulton⁷ has shown that several times in the papyri it is obviously for η μήν by mere itacism, and so is not due to a confusion between the Hebraistic use of εἰ μήν=研学 μήν, thus correcting Hort. The uncials and the [Page 193] papyri here agree. Deissmann⁸ calls attention to the use of εἰ μᾶν in a Doric inscription of the first century B.C. Blass (Gr. of N. T. Gk., p. 306) observes that a papyrus reads κηρία for κειρία (cf. Jo. 11:44, κειρ–, κηρ–, κιρ–ιας).

**η and ει.** In the old Attic there was no η in writing, only ει, since η was not used as a vowel. As early as 400 B.C. the Attic used η and ει interchangeably, κλείω becoming κλέιω, κλεῖς=κλεῖς, λήτουργός=λειτουργός, etc.² This usage was not very common in Pergamum³ nor in Magnesia.⁴ Crönert finds this interchange in the Herculaneum papyri only in the papyri copies of Epicurus and Polystratus.⁵ In the N. T. λειτουργός, –ία, –έιν, –κός are taken over from the Attic, but they occur also in Pergamum⁶ and Magnesia.⁷ The Attic indeed carried the fondness for ει so far that it was used always in writing in the second singular indicative middle everywhere, the

7 Nachm., op. cit., p. 51.
other dialects using η save the Ionic. The κοινή has η save in βούλει, οἴει, δψει. In the N. T. η is universal according to W. H. save in Lu. 22:42 where βούλει is genuine, though some MSS. have ει in other passages. Blass⁸ observes that this is a literary touch in Luke for the colloquial θέλεις. Hatzidakis⁹ notes how difficult this process made it to tell the difference between ποιησις and ποιησας, for instance, because of this Attic intermixture of the diphthongs. Blass¹⁰ will not hear of this as a possible explanation in any cases, but one must remark how well this vowel-blending harmonized with the kinship in meaning between the aorist subjunctive and the future indicative (cf. δώσῃ in some MSS. for δώσει in Jo. 17:2) and made it easy for the later so-called future subjunctive (cf. Latin) to develop. Winer-Schmiedel indeed accept as possible this vowel confusion in several instances.¹¹ In Mk. 8:35 (Lu. 17:33) δς ἀπολέσει, Lu. 12:8 δς ὄν ὁμολογήσει, 2 Cor. 12:21 μη ταπεινώσει, Ro. 3:4 (Ps. 51:6) [Page 194] νικήσῃς (cf. δικαιωθῇς), Ac. 5:15 ἰνα ἐπισκιάσει, 8:31 ἐδν ὀψει. Winer-Schmiedel would find the aorist subjunctive and not the future indicative. This is possible but by no means certain, since the future indicative was undoubtedly used both with ἐαν and ἰνα (δπως). W. H. read Ἰωάνει instead of η in Mt. 11:4=Lu. 7:18. ἒς διοικητε ὁκκ. occurs in papyri Brit. Mus. I, Nr. 2. 135. In 2 Cor. 2:9 AB 109 have ἐς where ει is probably correct.

η and η. Irrational Iota. The iota subscript was iota adscript till the twelfth century A.D., but as early as the third century B.C. it was not pronounced.¹ When ει was practically equal to η in sound, it was natural that η (ηι) should be. The ι was then dropped in sound long before it was subscript.² Gradually it was felt to be a matter of indifference in some words whether this iota was written or not. Examples of η instead of ηι occur in the inscriptions of Pergamum³ as ἐν ηι as well as in the Attic.⁴ Moulton finds irrational ι adscript (ἔχωι, for instance) abundant in the Ptolemaic Tebt. Papyri (Classical Review, 1904, p. 106). Cf. Mayser (Gr., pp. 122–126) who gives many examples. In the N. T. ι has dropped from θνήσκω. Indeed since the second

Forms with and without the mute iota appear in the Herculaneum papyri, as infinitive under Verb. The papyri show it in queer forms like examples go beyond the range of as well to finish the discussion of the iota subscript here, though some of these
37 (A.D. 49).

iota subscript (adscript), mute or irrational form, as well as in prophes, προφήτες, κρυφή, Λόγος, παντάχρη, πάντη, πρώτα, σώζω, ὑπερψων, τίτων, though he hesitated to put σωζω in the text. It is just as well to finish the discussion of the iota subscript here, though some of these examples go beyond the range of η. The best editors print also δημοσία, ἱδία, μητρολόγια, πατρολόγια, πατρύσ, πεζη, Σαμοθράκης, Τράβας, though μιμήσικο and πράκος. W. H. have forms in –οίν also, as κατασκηνον (Mt. 13:32). Moulton gives a curious example of the loss of the irrational τ in the case of the subjunctive ἢ which sometimes in the papyri appears as ἢν, having lost the τ, and taken on irrational υ. As a matter of fact iota adscript (iota subscript not yet, of course) does not appear in the great uncial save ἢδοσαν in D (Mk. 1:34) and ξύλων in K (Lu. 23:31). Forms with and without the mute iota appear in the Herculaneum papyri, as εἰκῆ or εἰκή. Blass would also restore τ to διπερα (Q). He doubts if τ was written in such new optative forms as δόην (δοίην Attic) though it should be put in the text.

η and υ. Since these two vowels came to be pronounced alike as in modern Greek, it was to be expected that some interchange would come, though any early examples are wanting. However, by the second century A.D. the inscriptions give many instances such as θήρα (θύρα), μηστήριον (μυστε), σκύπτρον (σκιπτρον), etc. It is already in the Egyptian κοινή according to Thumb. Hence we are not surprised to see the N. T. MSS. get mixed over ἢμεξι and ἤμεξι. Especially in 1 Peter does this itacism lead to a mixing of the historical standpoint as in 1:12, where ἤμιν is read by ΝABCL, etc., ἤμιν by K and most cursive Syr sch Cop. In 1 Pet. 5:10 the MSS. similarly support ἤμιν and ἤμιν. In 2 Cor. the personal relations of Paul and his converts are involved in this piece of orthography as in 8:7 ἐξ ἤμαω ἐν ἤμιν (NCDE, etc.) or ἐξ ἤμαω ἐν ἤμιν (B 30, 31, 37, etc.). See especially καθ ἤμεξι in Ac. 17:28 (B 33 Cop., etc.) which reading would make Paul identify himself with the Greeks on this occasion.

(d) The Changes with τ. For τ and ι see under (b); for τ and η see under (c); for iota subscript (adscript), mute or irrational ι, see under (ε). For irrational iota see also Infinitive under Verb. The papyri show it in queer forms like ἄληθη, λέγων, P. Oxy. 37 (A.D. 49).

5 Introd. to N. T. Gk., p. 314.
6 Mayser, Gr., p. 121, finds no τ with θιν in the pap.
4 Hatz., Einl. in neugr. Gr., p. 304.
6 Hellen., p. 171.
7 Hort, Intr. to Gk. N. T., p. 310. On the subject of η and υ see Mayser, Gr., p. 85 f. He denies (p. 86) that the itacising pronunciation of η prevailed in the Ptolemaic period.
and ει. The interchange between these vowel-symbols began very early (certainly by the sixth century B.C.\textsuperscript{8}) and has been very persistent to the present day. The inscriptions give numerous examples\textsuperscript{9} in the fifth century B.C., such as ἄποκτηνη, Ἐπαφρόδιτος. This was apparently the beginning\textsuperscript{10} of itacism which was extended to υ, η, and then to η, οι, υι. Jannaris\textsuperscript{11} thinks that the introduction has rapid spread of η contributed to this confusion as by that time ει was pronounced like ϊ, and η was taken by many, not as long ε, but equal to ι. The confusion apparently began in the Bœotian dialect\textsuperscript{1} and in postclassical times, but swept the field in all the dialects till every ει (closed and open) was pronounced as Ί. By 100 B.C. the Attic inscriptions show a general interchange between ει and Ί, and in the second century A.D.\textsuperscript{2} the confusion exists between αι and Ί. Dieterich\textsuperscript{3} thinks that this itacism had its widest development in Egypt. The Ptolemaic papyri of ii/B.C. show itacism very frequently. It is only the more illiterate scribes that use ει for ι, though B has ὄρειον (Thackeray, \textit{Gr.}, p. 86 f.). Thumb\textsuperscript{4} considers the interchange between ϊ and ει in the κοινή on a par with that between ο and ιο. In Pergamum\textsuperscript{5} the change from ϊ to ει is much more common than that from ει to ϊ, though forms in –ία for –εία occur, as ἄμελια. The same thing is true in Magnesia, where ἰμεῖν (ἴμειν) is common.\textsuperscript{6} The Herculaneum papyri tell the same story,\textsuperscript{7} while it is so common in the Egyptian papyri that Moulton\textsuperscript{8} is unable to set much store by the minutiæ gathered by W. H. from the great uncial witnesses, for even W. H. admit that their paramount witness, B, ‘has little authority on behalf of ει as against ϊ.’” Clearly the partiality of Ν for ϊ and of B for ει throw them both out of court as decisive witnesses on this point.\textsuperscript{9} So it is not merely itacism that we have to deal with in the numerous N. T. examples of exchange between ϊ and ει, but “genuine peculiaries of original orthography” also.\textsuperscript{10} Whatever Dr. Hort meant, all that is true is that different scribes merely preferred one or the other method of representing Ί. The whole matter therefore remains in doubt and one is prepared for all sorts of variations in the N. T. MSS., because the κοινή no longer insisted in the vernacular on the distinction between long or short ϊ and ει. The examples here

\end{enumerate}
presented will give a fair idea of the situation. For the textual evidence see careful discussion by Gregory.\(^1\) Where \(\epsilon\) is written for \(i\) it is to be pronounced like \(i\). \(\epsilon\) is shortened to \(i\) in some abstract substantives, –\(ia\) instead of –\(eia\), as\(^2\) Ἀτταλία, ἄγνια (possibly), perhaps ἄκριβια, ἁλαζονία, ἁναδία, ἄρεσκία, perhaps ἄπειθια, ἐθελοθησία (but ἥρησεία), εἴδωλολατρία (but λατρεία), εἴλκρινία, perhaps ἕκτενία, Ἐπικεία, Ἐριδία, Ἑρμηνία, Ἑσαρία, Καισαρία, κακοθησία, κακοπαθία, κολακία, κυβία, Λαοδίκια, μαγία, μεθοδία, δραθμοδουλία (δουλία doubtful), possibly παιδία (cf. Ps. 53:5), πολιτία, πορία, πραγματία, πραπαθία, probably Σαμαρία, Σελευκία, perhaps σπαρτά, φαρσαλία, Φιλαδελφία, ὠφελία. Deissmann\(^3\) shows that it is λογεία, not λογία in the papyri and so in 1 Cor. 16:1 f. Some MSS. have ἑπάρχεια (for –\(ia\)), εὐτραπέλεια (for –\(ia\)), late MSS. κολονεία.

The endings –\(eio\) and –\(eio\) appear sometimes as –\(ion\), –\(io\). So αἰγός, Ἄριος (Πάγος), ὅςτις, δαίνον (cf. δανίχ, δανιστής), εἰδώλων, Ἐπικούριος, ἐπιθήνιος, μεγάλη (cf. μεγαλότης), πανδοκίον, στοιχέον. Strong testimony exists for all these. So also –\(io\) for –\(eio\) appears in ὄριος, σκοτιάς, φωτινός.

Further examples of \(i\) for \(e\) are found as in the MSS. in ὅδιαλιπτος, ἄνεκλιπτος, ἄλιφος, ἄπιθεσ, ἀπίθης, ἀποδεδιγμένως, ἄρεοπαγίτης, δίγμα, ἔξαλλω, καταλελιμένος (Ac. 25:14), even κρίσον, λίμα, λιτουργός, μαργαρίτης (cf. πολίτης, τεχνίτης), μεσίτης, οἰκτίρω, παραδοχατικός, πιθός, ὑπόλιμμα, φιλόνικος, φιλονικία, χρεοφιλέτης. This is not to mention the verb-forms ἰδον, ἰδαν, ἰδεν which W. H. count alternate forms in Revelation, but which are pure examples of itacism. In the case of Ἰκόνιον (Ac. 13:51; 14:1) the inscriptions give both Ἰκ. and Εικ.\(^4\)

The use of \(e\) for \(i\) is seen in several ways also in N. T. MSS. In Mt. 28:3 W. H. give εἰδέα, not ἔδεα. Γεινομαι and γεινόσκοι are very common in the best MSS. Ἡμᾶν and ύμᾶν are rarely seen, however. Ἀξείνη, Ἑλεικαία, Ἐλαιείτης, Λευείτης, Λευείτικος, λείαν, Νεφθαλείτης, Παλάτσος, Σαμαρείτης all are found, as well as ταπεζείτης, Φαρεισαίος. Τάγειον appears in John and Hebrews. In the Pastoral Epistles, Hort\(^5\) finds –\(λειπ\)– for –\(λιπ\)– forms. Κειρίας is correct in Jo. 11:44. Hort\(^6\) also prefers πανοικεί, but παμπληθεῖ is undisputed. Such verb-forms occur as μείγνομαι, τείμα, τείσω.[Page 198]

Semitic proper names in \(\epsilon\) have \(\epsilon\) as Ἀδδεί, Ἀρνει, Ἀσσελεῖ, Ἡλεῖ, Μελχεῖ, Νηρεϊ. Cf. also\(^1\) Ἀδμαῖ, Ἀχείμ, Βεναιμεῖ, Δανεῖ, Ἐλαικεῖμ, Ἡλεῖμ, Κεῖ, Λευεῖμ, Νεφθαλεῖμ, Σαλεῖμ, Σεμεῖμ, χερουβεῖμ, Χοραζεῖμ. So also Ἐλεισαβεῖτ, Ἡλεῖας, Θωάείμ, Ἰάείρος, Ἰερευμ, Ἰωσεῖς, Ὀξις, Σάφερα, Ταβειθά. Cf. also Ἡλεῖ, Ῥαββη, Ῥαββουνεῖ, σαβαγρεῖα. But \(\epsilon\) appears as \(i\) in Ἀμιναδάβ, Μελχισεδέκ, Σινά, Ειών. Likewise the

MSS. usually read Ἀνανίας, Βαραχίας, Ἐξεκίας, Ζαχαρίας, Ιερεμίας, Ιεχονίας, Μαθθίας, Ματταθίας, Ὀφριᾶς.

In many of these examples of changes in ι and ει the testimony is greatly divided and one must not stickle too much for either spelling. The papyri and the inscriptions have nearly all of them. See 1 (e) for remarks on the difficulty of relying on the uncials in the matter of orthography. It is impossible to be dogmatic on the subject.

ι and ο. It is a peculiar change, as Blass\(^2\) observes, that we have in ὀμερόμενοι for ἰμερόμενοι (1 Th. 2:8). It appears in the LXX (some MSS. for Job 3:21 and Symm. at Ps. 62:2). The only example so far brought to light is ὑπερομείρεσθαι in Iren. 60. Winer-Schmiedel\(^3\) sees no comparison in καταντροκύ for καταντικύ. Meisterhans\(^4\) gives ἀπαντροκύ for ἀπαντικύ.

ι and οι. Janannis\(^5\) defends the exchange of ι and οι possibly as early as the fifth century B.C. Certainly in the first century B.C. Αὐγουστῖνος occurs in the inscriptions.\(^6\) Οι was exchanged with ει and η as well as with ι. In the N. T. the only example is in Mk. 11:8 where ACSVXL Or. have στοιβάς for the usual στιβάς (from στείβω). N and a few other MSS. read στυβάς. Zonar. illustrates this also by using στοιβάς. Cf. also στοιβή, στοιβάζω, etc. This word thus illustrates well the common itacistic tendency, showing forms in –ι, –οι, –υ and –ει (in the verb). The LXX has only στίχον and στιχίζω, not στοιχ. (Thackeray, Gr., p. 92).

ι and υ. These two vowels sometimes have the force of the consonants\(^7\) j (y) and v (cf. Latin). Cf. αυ – (af) and ευ – (ef) in modern Greek, and ε in πόλεως. In modern Greek “every i- or e-sound which collides in the middle of a word with a succeeding vowel, loses its syllabic value and becomes consonanted” (Thumb, Handb., p. 10). So διγος = ἄγος. The i is the last of the five original vowel-sounds in this order: α, ο, υ, ε, ι. This relative value has persisted in modern Greek (Thumb’s Handbook, p. 12 f.). Janannis\(^1\) gives διποθούμενοι as an illustration of this gradation in sound. But as a matter of fact the interchange between ι and υ is not frequent. Meisterhans\(^2\) finds only five examples in the Attic inscriptions, two of which, βυβλίον and Μίτυληναῖος, are found in N. T. MSS. (assimilation). Examples occur in the κοινή of Asia Minor, though Thumb\(^3\) agrees with Kretschmer in calling it a

\(^1\) Gr. of N. T. Gk., p. 22. But it is quite possible (see j) that this is a case of prothetic o.

Kretschmer
“barbarism.” Still the old distinction in sound between ι and υ slowly broke down till in modern Greek the two vowels have the same sound. Βήρυλλος in Rev. 21:20 is spelled also in MSS. βήρυλλος, βυρύλλος, βιρύλλιος, a fine illustration of itacism. D reads βύβλος for βίβλος in Mk. 12:26 and Lu. 20:42. In Ac. 20:14 Μυτυλήνη is the correct text for the old Mut., but AE have Μυτυλήνη and ΙΜυτυλήνη. For the Τρωγύλιον of Strabo and the Byzantine writers the Textus Receptus addition to Ac. 20:15 has Τρωγυλία, other MSS. Τρωγύλλιον, Τρωγύλιον. The LXX shows also ἡμὺς in ᘀ Dan. 7:25 (B). The Ptolemaic papyri vary in this word (Thackeray, Gr., p. 95). In Lu. 19:8 D has ἠμὺς.

(e) THE CHANGES WITH ο. For changes with α see under (a), for ο and ε under (b), for ο and ι under (d).

ο and ου. The old Attic used Διόςκορος, which Phrynichus prefers, though Thucyd. and Plato have the form in –ορος also (Epic or Ionic). In Ac. 28:11 only some of the cursives have the form in –ορος. Both forms appear in the inscriptions. This exchange is rather common in the Ptolemaic papyri (Maysers, Gr., pp. 10 f., 116 f.). In the LXX Ω shows sometimes Ωκ for ούκ (Thackeray, Gr., p. 91). The modern Greek dialects have much diversity of usage on this point. Cf. Thumb, Handb., p. 8.

[Page 200] ο and υ. The MSS. vary between ιρος (Syrian) and ιρας in Mt. 11:29; 1 Pet. 3:4, as well as between πραότης and πραΰτης in Pauline Epistles. W. H. adopt the form in –υ. Von Soden varies between these forms, giving no reasons. It is the old distinction surviving in the κοινή. The LXX has the υ form. The papyri have other illustrations (Maysers, Gr., p. 97). Cf. Ποτίολοι in Ac. 28:13 for the Latin Puteoli.

ο and ω. Originally o represented both the short and long sounds, so that it was easy with careless pronunciation for more or less confusion to exist after ω came into use. The Boeotian Pindar, for instance, has Διώνυσος instead of Διόνυσος. The New Ionic ζή (parox.) appears in lieu of ζωή. However, the introduction of the Ionic alphabet in 403 B.C. kept the two vowels pretty distinct in Attic till the Roman time, though the change began in the third century B.C. After the second century B.C. the exchange of these two vowels was indiscriminate in the more illiterate vernacular. The confusion was earliest in Egypt, but the Attic inscriptions kept the distinction well till 100 A.D. The early uncials for the LXX and the N.T. show little evidence of the interchange (Thackeray, Gr., p. 89). Jannaris finds it common. The modern Greek makes no difference in sound between ο and ω except medial ο as in not. “In the early papyri the instances of confusion between ο and ω are innumerable.” The inscriptions tell the same story about the κοινή in Magnesia and Pergamum. In some instances, like δόμα for δώμα and πρόδομα, an ω is shortened to ο after the analogy of ε from η in θέμα. In the N. T. MSS. “probably the commonest permutation is that of ο and ω, chiefly exemplified in the endings –ομεν and –ωμεν.” It is useless to follow the MSS. through their variations on this point. In Ro. 5:1 έχωμεν is supported by all the best documents and gives a difficult sense at first, though a better one on reflection than έχομεν. In 1 Cor. 15:49 the evidence is so nearly balanced that W. H. cannot decide between φορέσομεν and φορέσω (the latter in the margin). Von Soden gives –σω–. This difficulty of distinguishing between ο and ω in the indicative and subjunctive increased in later κοινή times. Several further N. T. examples of interest are άγοράσωμεν (Lu. 9:13), ίνα άναπαύσονται (Rev. 14:13), ίνα άναπαύσονται (Rev. 6:11), έδω καθηστώμεν as read by Lachmann (Ro. 14:8), ίνα γινώσκομεν (1 Jo. 5:20), ίνα διώκονται according to Tisch. (Gal. 6:12), ίνα διέρχομαι according to Treg. (Jo. 4:15), δόσωμεν according to Treg. and Tisch., and preceded by άγοράσωμεν (Mk. 6:37), ίάσομαι (Mt. 13:15; cf. Is. 6:10), ίνα καυχήσομαι or καυχήσομαι (1 Cor. 13:3), ίνα ζωήσονται (Ac. 21:24). In all these instances syntactical questions enter also besides the mere question of vowel interchange.

The o appears instead of ω in πόμα (1 Cor. 10:4; Heb. 9:10), πρόμος (Jas. 5:7), Στοικός (Ac. 17:18), συκοφαντά, not –μορέα (Lu. 19:4), χρεοφιλέτης according to W. H. and not χρεοφειλέτης (Soden) nor χρεοφαλέτης according to LU, etc. (Lu.

2 K.-Bl., I, p. 141.
3 Meisterh., Gr. d. att. Inschr., p. 24 f., gives numerous exx. of the exchange in inscr. of various dates.
4 Jann., Hist. Gk. Gr., p. 37. Jann. quotes a Louvre pap. (165 B.C.) which has το ἀμετάδεικνυμένος γράφεται. Maysper, Gr., pp. 97 ff) finds only two exx. of this confusion of o and ω in the Ptol. pap. of iii/B.C., but seventy in the next two.
6 Nachm., Magn. Inschr., p. 64.
9 Hort, Intr. to Gr. N. T., p. 309.
2 W.-Sch., p. 48.
3 Hort thinks so “perhaps.” The Doric had στοιά. Blass (Gr. N. T. Gk., p. 22) prefers the correct Στωϊκός, Von Soden Στοικός.
But ω is correct apparently in ἀγαθωσύνη, ἀγαθωσύνη, ἑνδόμησις (Rev. 21:18, Soden –δόμ–), ἰερωσύνη, μεγαλωσύνη, προϊνός. So also the LXX, but πρόιμος (Thack., Gr., p. 90). Codex B shows others in the LXX (ib.). In Lu. 18:5 and 1 Cor. 9:27 the MSS. vary between ὑπωπιάζω (from ὑπο-ώπιον) and ὑποπιάζω (–πιέζω old form), though the best MSS. read ὑποπιάζω. In 2 Pet. 3:6 δόµ may be for δι οὖν. In Rev. 4:7 βοηθεύω, not ἐκχον (Soden), is read by the best MSS., though the substantive is ἐκθ. Now second century B.C. papyri have ὑπόμνημα ἐκχον where ω and ο are exchanged.6

(f) The Changes with υ. For the changes with υ and ι see under (d), υ and ο under (e).

υ and ευ. Only one example of this exchange appears in the N. T., that of πρεσβύτης in Phil. 9. Here the sense seems to demand πρεσβευτής. Bentley suggested it long ago and Lightfoot (comm. in loco) collected a number of instances of the omission [Page 202] of ε from ευ in single MSS. Hort1 thinks it due to a scribe and not to Paul, since the earlier Greek shows no examples of this interchange. However, Wood2 has found πρεσβεύτερος for πρεσβύτερος in an Ephesian inscription (analogy: in modern Greek ευ = ef). Thackeray (Gr., p. 97) finds this “natural error” in the LXX MSS.

υ and ου. This has always been a rare exchange in the Greek, the Boeotian dialect having retained the original υ sound of υ after the Attic gave it up.3 The Zacynthian preserves it in the modern Greek.4 The κοινή has sometimes χρυσός for χρυσός.5 But ου was rather frequent in the κοινή to represent the Latin u as θρούς.6 In Rev. 3:18 the MSS. have κολλούριον, κολλούριον, κολλούριον, etc. (Latin collyrium). W. H. prefer κολλούριον, though ΝΒC read –ύριον (so Soden). Blass7 observes that we have long υ in –ύριον. B in the LXX shows the same variations (Thack., Gr., p. 92). The Ptolemaic papyri have few instances. Cf. change of υ and ου (Mayser, Gr., p. 118). Thumb (Hellen., p. 193 f.) thinks that υ in the κοινή was pronounced like German ü, i and also u. In Rev. 1:5 the distinction between λύσαντι (ΝΑC) and λούσαντι (ΒΡ) is more than mere orthography, though the confusion was rendered easy. ΥΙ is always so

---

4 Acc. to W.-Sch. (p. 48 f.) this is not orthographical at all, but etymological. Why not both?
5 Ib., p. 48.
6 Jann., Hist. Gk. Gr., p. 37. Doubtless other vowel-exchanges in Rev. may have a similar explanation and so do not violate concord of gender.

written in the N. T. uncial MSS., \(^8\) though the iota was sometimes dropped in the inscriptions.

\((g)\) **The Changes with ω.** For changes with ω and α see under \((a)\), for ω and ο under \((e)\).

**ω and ο.** The Thessalian dialect\(^9\) changed ω to ου as in τοῦ κοινοῦ for τῶ κοινῆ. This change reappears in Rhodes and the Æolic-Doric.\(^10\) Buresch\(^11\) finds the change between ω and ου common in the Egyptian vernacular, as in the Sahidic dialect ω is often used for ο.\(^12\) It is, of course, possible, according to the view of Winer-Schmiedel,\(^13\) that some indicatives in ου may really be subjunctive as a result of this vowel-interchange. The contract form for the present participle τῷ νικοῦντι is read by AC in Rev. 2:17 and A in 2:7, a change more likely due to confusion of –άω and –έω verbs. So with Ἰνα ζηλοῦτε (Gal. 4:17) and Ἰνα φοσιοῦσθε (1 Cor. 4:6), but the present indicative can be used with Ἰνα, and one is slow to credit this form to a mere vowel-exchange. The same remark applies to Ἰνα τρέφουσιν (W. H. marg. Rev. 12:6) as well as Ἰνα γινόσκουσιν (Tisch. and Treg., Jo. 17:3) and Ἰνα σωφρονίζουσιν (Tisch. and Treg., Tit. 2:4). The future indicative with Ἰνα as καταδουλώσουσιν (Gal. 2:4), προσκυνήσουσιν (Rev. 9:20), σταυρώσουσιν (Tisch., Treg., Lach., Mk. 15:20), σφάξουσι (Rev. 6:4) has rival readings with ω, aorist subjunctive. It is hardly mere vocal similarity. Similar instances are μήποτε καταπατήσουσιν (Mt. 7:6), ἐάν μετανοήσουσιν (Rev. 2:22), ὥ ἐάν δουλεύσουσιν (Ac. 7:7). In these and similar examples where the MSS. vary between ω and ου it is probable that, as with η and ε, ο and ω, the difference in mode may have been blurred by the tendency to exchange these vowels. But the syntactical question is not essentially altered by this incidental orthographical problem.

**ω and ωυ.** Lachmann, Tregelles, W. H. all write ωυ in Μωϋσῆς, but Thayer urges that the word is a trisyllable Μωϋσής (Fritzsche, Gesenius, Tisch., Soden). The Ionic έωτοῦ is a trisyllable. Cf. Mayser, Gr., p. 138. Blass\(^1\) indeed says that the diphthong ωυ is non-existent in the N. T. as in the Attic. The Text. Rec. reads Μωυσῆς, following Strabo and Josephus in the *Antiquities*, though in the LXX and Josephus elsewhere we have Μωϋσής.

\((h)\) **Contraction and Syncope.** In general the κοινή uses contraction of vowels from the standpoint of the Attic,\(^2\) though a strong Ionic infusion\(^3\) is present also as in

---

\(^{8}\) Cf. Nachm., Magn. Inschr., p. 46 f.; Blass, Gr. of N. T. Gk., p. 9 f., observes that B occasionally divides ύ/ὐς at end of a line and so practically A and D.

\(^{10}\) Schweizer, Perg. Inschr., p. 70 f.

\(^{12}\) Tattam’s Egyp. Gr., p. 5.

forms like χειλέων, ὀρέων, etc. The N. T. examples of unusual contraction find illustration in the κοινή. In the N. T. contraction is rarely neglected, as Winer saw, though ἔδεετο (NC for Lu. 8:38, though BL 33 read ἐδέητο), νοὶ (1 Cor. 1:10. etc.), ὀστέα (Lu. 24:39), ὀστεύων (Mt. 23:27, etc.), ὀρέων (Rev. 6:15, Attic as well as Ionic), χειλέων (Heb. 13:15), χρυσέων (Rev. 2:1, Lach., Treg.) show that the N. T. in this respect was like the κοινή and not the literary Attic. Blass observes that the N. T. Greek did not go quite as far in contracting vowels as the Attic did. In illustration can be mentioned ἀγαθοεργεῖν (1 Tim. 6:18), though ἀγαθουργῶν is the correct text in Ac. 14:17. But we have ἀμπελουργός, ἱερουργεῖν, κακοῦργος, ὀστέα, πανοῦργος, not to mention the conjectural reading ἀγαθοεργός for Ro. 13:3 on the other hand. In Col. 2:16 νοομνία for the Attic νοομνία is read by W. H., though supported only by BFG 121 f g vg. So the LXX (Thack., Gr., p. 98). In the case of ἐλεινός W. H. have the regular form in Rev. 3:17, but ἐλεεινός in 1 Cor. 15:19. Blass reminds us, however, that even ἐλεινός may represent ἐλεινός. The N. T. likewise has νοσσός in Lu. 2:24 (like the LXX) and νοσσία (or νοσσιά) in Lu. 13:34; Mt. 23:37. Phrynichus condemned this dropping of ε in νοσσός. Κατά (Mt. 13:15; Ac. 28:27, both from Is. 6:10) comes from the Epic and the old vernacular. Κατ was an old form parallel with κατά.

There are several noteworthy points about τ. The τ is retained in ἀλλοτριεπίσκοπος (1 Pet. 4:15). The same thing is true with ἡμίωρον (Rev. 8:1), like ἡμιώβολον in the Attic inscriptions. The form ἔσθον in Mk. 1:6 (already in Homer) is a twin rather than a syncopated form of ἔσθιον (Mt. 11:19). In the N. T. the τ is not dropped in such forms as βιώσετε, ἐνυπνίον, σιωπᾶν, υἱός. Blass calls the contraction of ἐσθιόν (Mt. 11:19), ταµεῖον, ὑγεία, etc. When ε came to be equal to τ, the two sounds naturally blended into one. Cf. the Ionic dative πόλι for πόλι. So in the N. T. we find παῦν (BCD), even πάν

5 Gr. of N. T. Gk., p. 23. Omitted by Debrunner.
(N阿尔) for πιέν in Jo. 4:9, and elsewhere in the N. T. In Mt. 6:6, etc., ταμμᾶν is read for ταμμᾶν. On the other hand in Rev. 21:20 A reads σαρδόνις for σαρδόνιξ, W. H. read τετραρχεύω, τετραάρχης rather than τετραρχεύω, etc. The use of γλωσσόκομον instead of the earlier γλωσσόκομον (–ον) should be noticed also. For the use of ἕν=modal ἀν see under (b), p. 190.

(i) Diphthongs and Diēresis. The Bœotians monophthongized the diphthongs αι, ει, οι, ου in the fourth and fifth centuries B.C. The Bœotians pronounced χαίρει=chéri as the vernacular κοινή did. Thumb (Hellenismus, p. 228) objects to “this emphasizing of Bœotian” by Kretschmer (Die griech. Vaseninschriften; Einleit. in d. Gesch.). Moulton (Prolegomena, p. 33 f.) allows this Bœotian influence on the κοινή with a “perhaps.” The itacising process still further developed this use of the diphthongs as monophthongs. Indeed Jannaris insists that the term δίφθογγος as applied to συλλαβή concerned the eye rather than the ear and meant more biliteral than bivocal. The spurious diphthongs show the process in a state of completion. The papyri, unlike the inscriptions, do not dissect a diphthong at the close of a line. Where two vowels do not blend into one syllable, it is necessary to indicate it. Hence from very early times marks of diëresis were used to show that each vowel has its own sound. The mark is put over the ι or υ which might otherwise be considered to unite with the preceding vowel. These marks are found in the oldest N. T. MSS, with such words as ἀλληλούϊα (Rev. 19:1; but in the case of proper names transliterated from the Hebrew or Aramaic W. H. follow the Hebrew or Aramaic spelling. Cf. Hort, Intr., p. 313. So in other examples below), Ἀχαία, Ἀχαῖκός (1 Cor. 16:17), Βηθσαϊδά, Γάϊος (also Γαῖος in Ac. 20:4, etc., but cf. Allen, Harvard Studies in Class. Philol., ii, 1891, pp. 71 ff.), διϋλίζειν (Mt. 23:24), Ἐβραίστι, Ἐλωί (Mk. 15:34), Ἐφραίμ, however, or Ἐφρέμ (NL in Jo. 11:54), Ἡσαΐας, though B usually without, Ἰουδαϊκῶς, ἰσχυ (2 Pet. 2:11), Καϊφᾶς, Καΐν (W. H. Καίν), so W. H. Καϊνάν (not Καϊνάν nor –άν), Λευείτης and not Λευΐτης in W. H., Λωίς (W. H. –ίς), Μωσῆς in W. H., not Μωυσῆς, Νινευείτης and not Νινευίτης, πρόμος according to W. H., but προί, προινός. W. H. have Πολεμαίδα in Ac. 21:7 and Ρομαίστι in Jo. 19:20. D reads Χοραζαίν. The Semitic etymology complicates the matter with some of these words. Many of the MSS. use diëresis at the beginning of words as in ἵνα. N:A regularly write ἰ, while ωι is correct also. See Giles on the subject of diphthongs. For iota subscript see under (c).

APHÆRESIS AND PROTHETIC VOWELS. Θέλω, not ἔθελω, is the only form in the N. T., as it is the common form in the κοινή and is that used in modern Greek. It is as old as Homer, and since [Page 206] 250 B.C. is the only form in the Attic¹ and Ionic² inscriptions. The augment, however, is always η. Crönert³ finds ἔθελω after consonants. The κοινή does not follow the Ionic in the use of κεῖνος for ἐκεῖνος.

Aphæresis is frequent⁴ in the modern Greek vernacular, κεῖνος and ἐκεῖνος, δέν for οὐδέν, etc. But the N. T. has only ἔχθες (so LXX) in the best MSS. (cf. Jo. 4:52 ΛABCD; Ac. 7:28 ΛBCD; Heb. 13:8 ΛACD), the usual Attic form, though the papyri sometimes have χθές instead of the common ἔχθες. The N. T. does not have δύροι, κέλλω, µείροι, where ο is dropped. Cf. Kühner-Blass, Tl. I, Bd. 1, p. 186. The form μείροι (cf. ὁμαρόμενοι in 1 Th. 2:8) occurs in Nicander for ἴμείρομαι. It is possible that in ὁµείροµαι we have prothetic o instead of aphæresis. Cf. Hort, Notes on Orth., p. 152; Winer-Sehmiedel, p. 141. See Additional Notes for full list.

(κ) ELISION. Besides the use of the movable final ν and ζ the Greeks had two other methods of obviating hiatus (elision, crasis). The hiatus was distasteful to the finished writers, though more freedom was exercised in poetry. The avoidance of hiatus was always a more or less artificial matter and hiatus was unavoidable in the most careful Attic writers, as in the case of ὅτι, περί, πρό, τί, τι, the article, relative, the small “form-words” (καί, εἰ, µή), etc. But the harsher hiatus like ἐδίδοτο αὐτῷ would be avoided by the literary κοινή writers as well as by the Atticists. The inscriptions and the papyri show far less concern about hiatus than do the literary writers of the κοινή. As might be expected the N. T. books agree in this matter with the vernacular κοινή and the MSS. vary greatly among themselves. Blass⁵ considers this situation in harmony with the tendency to greater isolation of the words in the later language. Indeed he thinks that only one book in the N. T. (Hebrews) shows the care of an artistic writer in the avoidance of hiatus. By omitting the O. T. quotations and chapter 13 he finds that hiatus where there is a pause is a matter of indifference, as also with καί. He finds fifty-two other instances of hiatus, whereas Romans goes beyond that number [Page 207] as far as ch. 4:18. But even then Blass has to admit cases of harsher hiatus in Hebrews, like ὁδερλαφοὶ ἤγιοι, ἔνοχοι ἢσαν, etc.

Giles

GILES, P., A Short Manual of Comparative Philology. 2d ed. (1901).

8 Comp. Philol., pp. 158 ff.
1 Meisterh., Gr., p. 178.
6 Ib., p. 296 f. On indifference of later Gk. to hiatus see Bischoff, Neut. Wiss., 1906, p. 268; Thieme, ib., p. 265. Moulton (Prol., p. 92) quotes Kaelker (Quæst., p. 245 f.) as saying that Polyb. uses δστς for δζ merely to avoid hiatus. Cf. Mayser, Gr., p. 160.
The Attic inscriptions show that the vernacular tongue did not care much about hiatus. The lighter elisions like δ were used or not at will, while the heavier ones like δίκαι ὅπως were rare. The same indifference to elision appears in the κοινή inscriptions and in the papyri. In general in the N. T. elision takes place regularly before pronouns and particles and before nouns in combinations of frequent occurrence like κατ ὅπως. Blass has carefully worked out the following facts in the N. T. MSS. 

Τε, οὔτε, μήτε, ἄμα, ἄρα, γε, ἔμε, ἔτι, ἔνα, ὅστε, etc., do not undergo elision nor do noun- or verb-forms. The verse of Menander quoted in 1 Cor. 15:33 is properly printed χρηστ ὠιλίαι by W. H. Even the compound words τεσσερακονταετής (Ac. 7:23) and ἑκατονταετής (Ro. 4:19) do not suffer elision, while τετρα-ἀρχής has no elision in the N. T. MSS.

Ἀλλά, according to Gregory, has elision in 215 cases and fails to have it in 130, though the MSS. vary much. Hort observes that in ἀλλά elision is usual before articles, pronouns and particles, but rare before nouns and verbs. Ro. 6:14–8:32 has many non-elisions of ἀλλά, and the elision varies before the different vowels except that it is constant before τ. Δέ rarely suffers elision outside of ὅς ἄν, but here frequently, while W. H. read δὲ αὐτό in Ph. 2:18 after ΝΒΠ. 2 Cor. 3:16 W. H. put ἰνικα δ ἄν in the margin, text ἰν. δὲ ἄν (so Tisch., Nestle). In οὖδε elision takes place several times, as in οὐδ άν (Heb. 8:4), οὖδ εξ (Ac. 19:2, ΝΑΒ), οὖδ ἵνα (Heb. 9:25), οὖδ άπα (Ro. 9:7), οὖδ οὐ (Mt. 24:21; Heb. 13:5), οὖδ οὕτως (1 Cor. 14:21). Blass further notes that prepositions seldom use elision with proper names, since it was thought better, as on the inscriptions, to keep the name distinct and readily discernible, though W. H. read δι Αβραάμ in Heb. 7:9. Elision is most common with διά as δι ἐσόπτρου (1 Cor. 13:12), “because there were already two vowels adjacent to each other” Blass thinks. Ἀντί has elision only in ἀνθ ᾱ̂ν (Lu. 1:20, etc.). Elsewhere the prepositions show elision with pronouns and in current phrases, as in ἐν ἄρχης, ἐν ἀρτι, ἐν αὐτοῦ, ἐν ἕμοι, ἐπ αὐτῶ, κατ ἕμε.
κατ ἰδίαν (καθ ἰδίαν), κατ οἶκον, μετ ἐμοῦ, παρ ὄν, ὑφ ἡμῶν (ὑμῶν), ὑπ οὐδενὸς (1 Cor. 2:15). So the LXX (Thackeray, Gr., p. 137).

(1) CRASIS. The Attic official inscriptions make little use of crasis, though it is fairly common in the vase-inscriptions of the fifth century B.C. In Magnesia Nachmanson finds only a few examples of καὶ and the article. The same thing is true of Pergamum. In the N. T. it is confined also to καὶ and the article. And in the case of καὶ crasis only occurs if the following word is a pronoun or a particle. Καὶ thus often, though not always, coalesces with ἐγώ and the oblique cases, as καγώ, καμοί, καμέ. If there is a “distinct co-ordination of ἐγώ with another pronoun or a substantive,” crasis does not take place. Even the MSS. vary greatly.

The article suffers crasis very often in the older Greek, but in the N. T. it is seldom so. Hort declines to accent ταὐτά for ταὐτά in 1 Cor. 9:8 or ταὐτά for τὰ aὐτά in Lu. 6:23, 26; 17:30, though supported in Luke by some good MSS. He does, however, accept τοῦνα ῥα in Mt. 27:57 and τοῦνα τίνος in 2 Cor. 2:7; Gal. 2:7; 1 Pet. 3:9 (“stereotyped as a single word,” Blass). Crasis is quite rare in the LXX (Thackeray, Gr., p. 137).

[Page 209] III. Consonant-Changes (στοιχεῖα αὐμφῶν). The Greek, like other Indo-Germanic tongues, wrote out both vowels and consonants save in the case of iota adscript, which was not always used. But, as with the Phœnician and Hebrew, which wrote only consonants, the consonants form the backbone of the language. Both consonants and vowels are originally pictographic. “Beth” (βῆτα) is ‘house,’ “gimul” (γὰμμα) is ‘camel,’ “daleth” (δέλτα) is ‘door,’ etc. The Greek indeed developed the vowels α, ε, ι, ο out of the Phœnician consonants αḷeph, he, yod, ayin.

(a) ORIGIN AND CHARACTER OF THE CONSONANTS. Though the Greek consonants undoubtedly came chiefly from the Phœnician symbols, they were not all used at once nor in the same places. At first the digraphs were used for the later Χ, Θ, Φ, and even after these letters won a foothold ΚΣ, ΧΣ, ΠΣ, ΦΣ were used in Attic for ξ, ψ. It is only since 403 B.C. that the Greek alphabet (ᾆλφα βῆτα) has had regularly twenty-four
letters. Jannaris\(^3\) gives an interesting study of the way the Greek letters looked in eighth, sixth, fifth and fourth centuries B.C. as shown by the inscriptions. In the inscriptions, however, κόππα continued to be used (like Latin Q) and βαῦ or δέγαµµα. This last, though called double γάµµα, perhaps represents the Phœnician waw. On the use of digamma in Homer see Kühner-Blass.\(^4\) It is a half-vowel in fact, as ι and υ are partly consonant in force, like Latin u (v) and i (j).\(^5\) The dropping of digamma affected many words, some of which have the rough breathing, though Thumb\(^6\) and Moulton\(^7\) think that this is an accident simply, and the rough breathing is due to analogy and not to the digamma in cases like καθ ἐτος, etc. But changes in the use of the consonants did not cease when the Euclidean spelling reform was instituted 403 B.C. As the vowels underwent steady development, so it was and is with the consonants. B early began occasionally to have the force of υ, and γ sometimes the j value of ι as in modern Greek, and it was even inserted (irrational γ).\(^8\) In general in the κοινή the [Page 210] consonant-changes are much fewer than those of the vowel. Such peculiarities as σσ, γίνοµαι, λήψοµαι are common (Thackeray, Gr., p. 100).

(b) The Insertion of Consonants. In the older Greek δ is inserted in ἀν-δ-ρός, and so with β in µεσµη-β-ρία.\(^1\) The Attic used either form in ἔµπιθι(µ)ληµµι, ἔµπιµ(µ)πρηµι. So in Ac. 14:17 DEP read ἐµπιµλῶν (D ἦν-), and in Ac. 28:6 ἅβεΒΗΛΠ most cursive have πιµµασθαι. The LXX MSS. show the same variation. D in Lu. 2:32, etc., has Ἰσ-τ-ραήλ. The retention of µ in all the forms (derivatives also) of λαµβάνω (root λαβ) is in accord with the usage of the papyri ("almost invariably")\(^2\) and the inscriptions of the κοινή, and is due to the Ionic λάµψοµαι.\(^3\) Hence λήµψοµαι, ἐλήµψθην, etc. In the Ptolemaic age (iii/i b.c.) the papyri give both forms. From iv/v a.d. the papyri and uncials (LXX and N. T.) give almost wholly µ forms. In the Byzantine period (vi/viii a.d.) the classic λήµψοµαι reappears. Cf. Thackeray, Gr., p. 108 f.; Mayser, Gr., p. 194 f.; Crönert, Mem., p. 66. In the LXX the uncials give the spelling of their own date, not that of the translation. In Mk. 7:32 the extra γ in µογ(γ)αλάλων is inserted by the Syrian class only and is not to be accepted. In Heb.

3 Ib., p. 24 f. On the whole subj. of changes in the pap. see Mayser, Gr., pp. 163–248. For general remarks about consonant-changes in LXX MSS. see Swete, O. T. in Gk., p. 301.
6 Hellen., pp. 245 ff.
7 Prol., p. 44. But Sommer, Gr. Lautstudien, shows that the rough breathing is sometimes due to digamma.
1 Blass compares the insertion of consonants in Semitic names like Ἠσ-δ-ρας, Μαµ-β-ρή.
2 Moulton, Cl. Rev., 1901, p. 34.
3 Schweizer, Perg. Inschr., p. 179 f. Cf. W.-Sch., p. 64, for full references concerning the use of µ with λαµβάνω. Cf. Gregory (Prol., p. 72) for list and references of the various compounds of λαµβάνω and λήµψης in the N. T., ἄνα-, ἄνεπ-, ἄντε-, ἄπο-, κατα-, μετα-, παρα-, προ– προσ–. The LXX MSS. have λήµψοµαι (Q λήψονται) and ἐλήµψθην. Cf. Helbing, Gr. d. Sept., p. 22.
11:32 π is added to Σαμψών (Σαμψψών). So also in Ac. 3:7 (KABC) δ is added to σφυμ (σφυμ). So also in Ac. 3:7 (אABC) δ is added to σφυμ. In the case of Αδραμπτηψ (Ac. 27:2), read by W. H. on authority of AB 16 Copt. instead of Αδραμπτηψ, a slightly different situation exists. Two ways of pronouncing and spelling the name of the city existed.

(c) **The Omission of Consonants.** There are not many cases where a consonant drops out of a N. T. word. In Rev. 13:2 the correct reading (all the uncials) is undoubtedly ἄρκου, not ἄρκτου. This form is found also in the LXX and in inscriptions of the first or second century A.D. W. H., following B and א, also (save in Mk. 3:22) read βεελζεβούλ instead of βεελζεβούλ. Γίνομαι and γινώσκω are the exclusive forms in the N. T., though some MSS., as in the papyri and inscriptions, have γειν-. Nachmanson[Page 211] states clearly the facts. The Ionic as early as the fifth century B.C. used the γνι forms, and the Doric shows the same situation in the fourth century. Even in Athens the γνι forms appear, and in the κοινή the γνι forms vanish. Γολγοθά follows the Hebrew גֻלְגּלֶת rather than the Chaldaic גֻּלִגָּלְחָא in having only one λ. According to Winer-Schmiedel the two forms καῦδα and κλαῦδα (Ac. 27:16) represent two different islands near each other, which were confused in the MSS. It is hardly worth while to remark that σάρδιον (correct text in Rev. 4:3) is a substantive, while σάρδινος (Text. Rec.) is an adjective.

(d) **Single or Double Consonants.** Blass and Winer-Schmiedel comment on the obscurity concerning the use of single or double consonants in the κοινή. The phenomena in the N. T. in general correspond to the situation in the κοινή. In the

4 P. 55; cf. also Riem. and Goelzer, Phonét., pp. 225 ff.
modern Greek vernacular (cf. Thumb, *Handbook*, p. 27) the double consonants, except in Southeastern Greek dialects, have the value of only one. In the oldest Attic inscriptions in most cases where the doubling of consonants was possible the single consonant was used. The rule with initial ῥ was that when it passed to the middle of a word as a result of reduplication or the prefixing of a preposition, etc., it was doubled. But ῥ αραντιμένος is read by NACDP in Heb. 10:22 as in Ionic and late Greek, ἄρεμμένοι in D (Mt. 9:36), and περιραμμένος in Ν (Rev. 19:13). Blass observes [Page 212] that the Syriac versions use ῥαμάρα for ῥόμη, though some Attic inscriptions use initial ῥρ. In Mt. 9:20 ὄμορφοος is correct (BL one ρ). In Ac. 10:29 BD 61 read ἄναντιρήτως, and in Ac. 19:36 BL have ἄναντιρήτων. In Ac. 27:43 W. H. follow NC in ἄπορπαντας, and in Lu. 19:35 all but the Syrian class read ἐπιρίζοντες and ΝΑΒ have the same form in 1 Pet. 5:7. In Mt. 9:36 the Neutral (and Alexandrian) class has ἐρμμένοι, the Syriac ἔρρητος, while D has ἄρεμμι-. In Mt. 15:30 ΝΔΛ read ἐρναν, while B and the rest have ἐρναν, but see Ac. 27:19. But in Lu. 17:2 ἐρρυτία is supported by all MSS, save Π and π μετρ. In Jo. 19:23 ἄραφος is read by W. H., though B has ἄραφος. In 2 Cor. 12:4 ἄρρητος is right as ἄρρητος in Mk. 6:5, 13, etc. In 2 Cor. 1:22 W. H. follow BCD vs. ΝΑΛ in reading ἄρρηβον, a Semitic word which in its Semitic form has the doubling of the consonant and the metrical prosody -ι according to Blass, who compares also the Latin *arrha*. W. H. have διαρηξέας in Mk. 14:63 after BN, while in Lu. 8:29 διαρηξός is supported by ABCRUΔ. In Mt. 26:65 W. H. give διαιρηςεν on the authority of only Θ according to Tisch., though BL read διαιρήσεωτο in Lu. 5:6. But προσαρξέαν is in Lu. 6:48 is supported by ΝΒΔΛ and in 6:49 by BDL. In Ac. 16:22 περιρήζοντες is the reading of all uncials save P, but most cursive follow P. But in Ac. 14:14 all MSS. have διαρηξότας and in Lu. 9:42 the same thing is true of ἐρρηζέαν. In Mk. 2:21 επιράπτει is read by all the best MSS. and the Syrian class is divided, and the same is true of Mt. 26:67 ἐρπάσαν. In 2 Cor. 11:25 ἐρραβδίσθην is correct, while likewise ἐράντισας (Heb. 9:19, 21) has all save late Syrian support. So –ρτας in ἐρήθη (BD ἐρήθη, not W. H., Mt. 5:21, etc.) is the constant reading in the N. T. In Eph. 3:17 (18) and Col. 2:7, all MSS. have ἐρραβδίσθην. W. H. follow B alone in 2 Cor. 1:10; 2 Pet. 2:7 with ἐρόσσω, while in Col. 1:13 B is joined by FGP. In 2 Tim. 3:11 AD read ἐρόσσω, and ΝΑΣ 37 give ἐρόσσων in 2 Tim. 4:17. All MSS. have ἐρρωσθήν (Ac. 15:29). Μύρρα (B) is changed in Ex. 7:10 B has ἔφυκεν, Ἀρρ. Both ἄραβδων and ἄραβδων occur, and it is in the pap. that we can often find the true Ptolemaic spelling. A curiously has usually γένημα and B γέννημα.

6 Meisterh., Gr. d. att. Inschr., p. 93.
7 Gr. of N. T. Gk., pp. 10, 328. Similar variations in usage as to ρ or ρρ appear in the inscr. of the κοινή (Schweizer, Perg. Inschr., p. 124, ἄναντιρήτως, etc.; Nachm., Magn. etc., p. 91) and even in the Attic inscr. (Meisterh., p. 95, ἄναρηθέντες, etc.). Cf. Reinhold, De Graec. etc., p. 42, for exx. of ἐρόσσω, etc.
8 Gr. of N. T. Gk., p. 10. ἄραβδων “only Western,” Hort, Notes on Orth., p. 148. But the pap. (Moulton, Cl. Rev., 1901, p. 33; Deiss., B. S., p. 183 f.) frequently have ἄραβδον, and, as Deissmann remarks, people are not always particular to preserve mere etymology.
to Μύρα in the Syrian text (Ac. 27:5; cf. Hort, Notes on Orth., p. 160), but Winer-Schmiedel (p. 58) found only Μύρα in the inscriptions. Παραρύµένεν (Heb. 2:1) is read by all the pre-Syrian classes. Παρρήσια, παρρησιάζοµαι (from πανρήσια), not παρη–, is the usual reading in the N. T. (see Additional Notes), as occasionally in the inscriptions.2 W. H. read πυρός in Rev. 6:4 and 12:3, though the evidence is pretty evenly balanced.1 The Alexandrian class has πυράζει in Mt. 16:2, but W. H. reject the passage. The MSS. all have Χειµάρρου in Jo. 18:1.

The other instances outside of ρ are not so numerous. The MSS. (all but late Syrian) support βαλλάντιον, not βαλάντιον, as do the papyri.2 Blass3 argues for it also on metrical grounds. Γέννηµα, because given by no grammarian, was “attributed by Fritzsche (on Mark, pp. 619 ff.) to the carelessness of transcribers” (Thayer), but as sometimes in the LXX (Ezek. 36:30) so in the N. T. the best MSS. distinguish between γέννηµα (from γεννάω), ‘living creatures,’ as γεννήµατα έχιδνών (Mt. 3:7) and γέννηµα (from γίνοµαι), ‘the fruits of the earth,’ as έκ τού γενήµατος τῆς θηµέλου (Mk. 14:25). Phrynichus4 condemns the use of γέννηµα=καρπός (Diodorus, Polybius, etc.). Root of both verbs is γεν. This distinction between γέννηµα and γέννηµα appears in the papyri also, though γενηθέντα occurs in the Fayûm Papyri (B.U. 110. 14) “undoubtedly from γεννάω.”5 So N. T. MSS. vary6 about γέννηµα. The grammarians (Lobeck, ad Phrynichum, p. 726) reject ἑκχύνω for ἑκχέω, but the best MSS. give ἑκχύννω everywhere in the N. T. W. H. accept this Αεόlic form in Mt. 23:35; 26:28; Mk. 14:24; Lu. 11:50 marg.); Lu. 22:20 (bracket the passage); and Ac. 22:20. So also συνχύνω (W. H.) in Ac. 9:22; 21:31. Cf. ὑπερεκχυννόµενον in Lu. 6:38. Likewise MSS. support ἀναβαίννω, ὀπτάνναι, while the Αεόlic ὁποκτέννω is received by W. H. in Rev. 6:11 and ὁποκτεννύω in Mk. 12:5, though rejected elsewhere in N. T. on divided testimony. Ένατος has been restored throughout the N. T. by W. H. instead of έναντος of the Text. Rec. The inscriptions support the N. T. MSS. in this change (Thayer). So W. H. give ἄνενήκοντα (Mt. 18:12 ff.; Lu. 15:4, 7) but ἐννέα always. Ένεός, not ἐννέος, W. H. give (Ac. 9:7) as the LXX (Is. 56:10), a word possibly identical with ἄνεος (ἄναος). W. H. present7 κράβαττος instead of the κράββατος of the Text. Rec., though κράββατος would more nearly represent the Latin grabatus as it appears in Etym. M. (154. 34; 376. 36). Κραβάτριος is found also for the Latin grabaturius (CIGII 2114 d 1). Ν, however, has 10/11 times the strange form κραβάτος (–τ– only in Ac. 5:15). Λασέα (Ac. 27:8) is Λασσαία in some MSS. Μασάοις, from Aramaic Ναζαίν, is correct. Μασάοις is the right reading in Rev.

---

2 CIGII, 2722. 5. Cf. W.-Sch., p. 56.
1 The inscr. show πυρός also (Dittenb., 177. 15; 748. 20).
3 Gr. of N. T. Gk., p. 11.
6 Gregory, Prol., p. 79.
16:10 (ὥν). Only the Western class has πλημύρης for πλημύρης in Lu. 6:48. W. H. properly have ὡντος, not ὡντος, from ὡντος (Mt. 9:16; Mk. 2:21). In the Western interpolation in Ac. 20:15, W. H. read ὡντος, not –όλον nor –όλον. Some Latin MSS. read hysopus for ὡσσωπος in Jo. 19:29 and Heb. 9:19. Φύγελος, not –ελλος, is read in 2 Tim. 1:15 by all save A and most cursives. Cf. Φυγέλιος in CIGP 3027.

The Hebrew and Aramaic proper names call for special remark. Ἄνας may be due to the dropping of a or to the analogy of Ἄννα=חָנָון. W. H. (Ac. 1:23; 15:22) prefer Ὁσσωπός (from ὡσσωπος, ‘son of the Sabbath’) to Ὁσσωπός (from ὡσσωπος, ‘son of Saba’). The Text. Rec. has Γενησαρέτ in Mk. 6:53, elsewhere –νν. Γομόρρα is read in LXX and N. T. (Mt. 10:15, etc.), Ελισα. W. H. accept Ελισά, not Ελισσ. (Syrian) in Lu. 4:27=αλισσίν, Ἱσσαῖ (Lu. 3:32, etc.) comes from Ἱσσω. The N. T. and 1 Macc. have Ἰόππη, but the ancient grammarians and lexicographers prefer Ἰόπη. In Lu. 3:27 Ἰωανάν (indeclinable) is the right text. W. H. prefer Ἰωάνα (Ἰωάν) to Ἰωάννα in Lu. 8:3; 24:10. But more doubt exists concerning Ἰωάννης, which W. H. read everywhere save in Ac. 4:6; 13:5; Rev. 22:8, following B and sometimes D. The single ν prevails in D in Luke and Acts, while Ἰωάννης is more common in D in Matthew, Mark, John. has the single ν in the part written by the scribe of B. The inscriptions have it both ways. Blass finds the explanation in the Hebrew termination -an, which was treated as a variable inflection in the Greek, the LXX MSS. having now Ἰωάναν and now Ἰωάνναν. This fact opposes the derivation of the name Ἰωάννης from Ἰωάννα-. The LXX has Χαρράν and the Greek writers (Strabo, etc.) have Κάρραι, Latin Carrhae.

Doubling of the Aspirate. As a rule the aspirated mutes (θ, χ, φ) are not doubled in more correct writing either in early or late Greek, but N. T. MSS. give examples of

1 Cf. W.-Sch., p. 57.
2 Cf. Pliny (Nat. Hist., V, 15. 71 for Ἔνη.) also. In W.-Sch., p. 57, the point is made that the unpointed Targums do not distinguish between and

8 Blass, Gr. of N. T. Gk., p. 11.
00, χρ. φη. In Philemon 2 D has ἄφια, while 3 has ἄπτια (so vulg.) and FG, etc., even ἄμφια. In Mk. 7:34 all MSS. have ἐφφαθά (or ἐφεθάθα) save Δ and two Coptic MSS. which have ἐπφαθά. W. H. give Μαθθαϊος = Hebrew מַתִּיָה in the N. T. (Mt. 9:9 ff., etc.), and Μαθθάν in Mt. 1:15. W. H. read Ματθατ in Lu. 3:24, but Μαθθάθιας in Lu. 3:29. In Ac. 1:23, 26 W. H. have Μαθθίας, but in Lu. 3:25 f. they prefer Ματταθίας to Μαθθαθίας. In Ac. 5:1, W. H. consider Σάφφεια Western and read Σάπφεια (either Aramaic נַפִּיר, ‘beautiful,’ or Hebrew יִפְרֶל, ‘precious stone’). The LXX MSS. show the same variations. Cf. Thackeray, Gr., p. 121.

(c) ASSIMILATION OF CONSONANTS. In the early period of the Greek language the inscriptions often show assimilation of consonants between separate words. The words all ran together in the writing (scriptura continua) and to some extent in pronunciation like the modern French vernacular. Usage varied very early, but the tendency was constantly towards the distinctness of the separate words (dissimilation). However, ξ came finally to be written ξκ before consonants, though ξκ, ξκκ, ξκ, ξγκ and even ξ (cf. Latin) are found in Attic inscriptions, as ξιασθων, etc. Only sporadic examples outside of ξκ and ξκκ appear in the N. T. as άνεγλιπτος in D (Lu. 12:33), άπεγδύσει in B (Col. 2:11), άπεγδύσει in B (1 Tim. 5:4), engona, not ἀπεγνώςα in [Page 216] common assimilation between separate words is in words ending in –ν, especially with the article and έν. Examples like τῆς πόλες, τὸλ λόγῳ, τὸρ ῶδιος, ἔλ. Λέσβῳ, ἕσ Σιδνί, etc., are very common. Similar phenomena occur in the κοινή inscriptions, though the failure to assimilate is far more noticeable. See list of examples in Nachmanson. As a rule the papyri do not assimilate such cases. In the N. T., as in the later κοινή generally, only a few remnants survive of this assimilation of ον between words. Blass, who has used the MSS. to good purpose, finds several, as, for instance, έγ γαστρί in A (Lu. 21:23), έγ Κανδ in AF (Jo. 2:11), έμ μέσῳ in AC (Rev. 1:13; 2:1, etc.), in AP (Heb. 2:12), in ΛΔ (Mt. 18:2; Lu. 8:7), έμ πρατίτη in Ν (Jas. 1:21), σύμ Μαριάμ in AE, etc. (Lu. 2:5), σύμ μὸσιν in EG, etc. (Lu. 24:21). The earlier papyri (up to 150 b.c.) show a good deal of this assimilation between words (Thackeray, Gr., p. 131). This assimilation between separate words is common in modern Greek (cf. Thumb, Handb., pp. 16 ff.). So τὸν πατέρα=tombatera. But a much

1 On the whole subject see Hort, Notes on Orth., p. 159, and Blass, Gr. of N. T. Gk., p. 11. Cf. also Schweizer, Perg. etc., pp. 110 f., 114 f. Cf. for the pap., Mayser, Gr., pp. 190–224; Soden, 1, pp. 1372 ff.
3 Cf. Blass, Gr. of N. T. Gk., p. 12; Ausspr. etc., p. 123. Alexandrian writers followed the Αττικ in this assimilation. Blass compares the guttural use of α in άηλί (Mt. 27:46) in L and in the LXX Αημόων, Αηνόρ.
4 Ib., pp. 11 f., 306.
more difficult matter is presented in the case of ἐν and σῶν in composition, though in
general “assimilation is the rule in compounds of ἐν, retention of ν in those of σῶν.” But in 1 and 2 Peter assimilation is the rule (only two clear exceptions) for both σῶν and ἐν, due possibly to the absence of uncials. The later papyri as a rule do not assimilate σῶν, though often ἐν. Hort gives a list of what he considers “the certain and constant forms” of ἐν and σῶν in composition. “All other compounds of σῶν and ἐν are included in the list of alternative readings.” Hort thus reads ἐµι– before the labials (π, β, φ) and the liquid μ except ἐντερπατῆσω (2 Cor. 6:16), possibly ἐπνέων (Ac. 9:1), and ἐνπροσθεν once (Rev. 4:6) and Western class elsewhere. So assimilation takes place before the liquid λ, as ἔλλογώµο. But before the palatals κ, γ the usage varies, though before χ we have ἔγγρασαι (Rev. 3:18) with Ν reading ἐν. [Page 217] We read ἔνγεγραµµὲν ἐν 2 Cor. 3:2 f. ( Noticed, p. 45. Cf. also Thumb, Theol. Literaturzeit., XXVIII, p. 422.

3 Cf. Giles, Man. of Comp. Philol., pp. 98, 124
4 Cf. W.-Sch., p. 66 note.
5 Cf. ib., p. 58 note, for further discussion.
6 Prol., p. 45. Cf. also Thumb, Theol. Literaturzeit., XXVIII, p. 422.

(f) INTERCHANGE AND CHANGING VALUE OF CONSONANTS. One cannot here go into the discussion of the labial, palatal, dental, velar stops, the spirants, liquids, nasals. One can give only the special variations in the N. T. The b sound was rare in the older Indo-Germanic languages and easily glided into u or ν. The Greek βαινω is like venio in Latin, βίος is like vivus though different in history. In modern Greek β has sound of v. In the N. T. as in the LXX all the uncials have ν in Δαυείδ (W. H.) where the minuscules read Δαβιδ. In the case of βελιαρ (2 Cor. 6:15) it is from βελίαρ

(‘lord of the forest’), while the Text. Rec. βελιαλ is from βελίαρ

(‘worthlessness’). The variation between ρσ and ρρ, Moulton observes, runs down

5 Hort, Notes on Orth., p. 149.
6 Ib. In general see Wecklein, Curae Epigr. ad Gr. Graecae etc., 1869, p. 47 f.
8 Hort, Notes on Orth., p. 149. See for LXX Thackeray, pp. 132 ff.
1 About ἐν in composition see Gregory, Prol. ete., p. 76 f.; Soden, I, p. 1383. ἐν in MSS. appears in composition as ἐν–, ἐγ– and even ἐκ–, as ἐκκόπης. On ἐνπροσθεν in the pap. see Maysger, Gr., p. 45.
3 Cf. Giles, Man. of Comp. Philol., pp. 98, 124
4 Cf. W.-Sch., p. 66 note.
5 Cf. ib., p. 58 note, for further discussion.
6 Prol., p. 45. Cf. also Thumb, Theol. Literaturzeit., XXVIII, p. 422.
to modern Greek. The Attic ρσ did not displace the Ionic and early Attic ρσ entirely in the Attic inscriptions. 7 In the N. T., like the rest of the κοινή, usage is divided. 8 Hort (p. 149) prefers ἄρσην except ἄρρην perhaps 4/4 times in Paul. In the Gospels and Acts θάρσος and the two imperatives θαρσεὶ, θαρσεῖ are uniform, but in 2 Cor. (5:6, 8; 7:16; 10:1, 2) and Heb. (13:6) θαρρεῖ is the correct text. ζι displaces σι in a few words. Voiced σ in union with voiced consonants had the sound of z, and ζ was pronounced σζ. 9 Αζωτος (Ac. 8:40) ἄνθρωπος, Ashdod. Lagarde’s LXX has Ασεβδοδ in Josh. 11:22 (A has Ἀσιβδοδ, B Ασεβδοδ). Νάζωρ is rendered also Ἐξρας or Ἐσδρας. But in the N. T. period ζ is changing from the ds sound to z. Ἀρμόζω, not the Attic ἄρμόττω, is the N. T. form. 2 Lachmann has µαζός for µαστός in Rev. 1:13. In 1 Th. 5:19 BDFG (Western class) read ζβέννυτε, 3 simply phonetic spelling. Hort 4 considers Ζµύρνα as Western only in Rev. 1:11; 2:8, but the papyri and inscriptions both give it. 5 The most noticeable feature of all is, however, that the Attic and Boeotian ττ did not hold against the Ionic σσ (though even Thucydides and the Tragic poets used σσ). Papyri, inscriptions and N. T. MSS. all unite in using σσ as the rule, though all occasionally have ττ. It does not seem possible to reduce the usage to an intelligent rule. Ἐκπληττόμενος is accepted by W. H. in Ac. 13:12, elsewhere σσ. Both ἐλάσσων (Jo. 2:10; Ro. 9:12) and ἐλάττων (1 Tim. 5:9; Heb. 7:7) are found, but only the “literary” (so Blass) words ἐλαττόω (Jo. 3:30; Heb. 2:7, 9) and ἐλαττονέω (2 Cor. 8:15). Similar diversity exists between Ἡσσον (1 Cor. 11:17; 2 Cor. 12:15) and Ἡσσώθητε (2 Cor. 12:13) on the one hand and Ἡττημα (1 Cor. 6:7; Ro. 11:12) and Ἡττοθα (2 Pet. 2:19 f.) on the other. In Heb. 6:9; 10:34 W. H. read ἱερόςον, elsewhere κρεῖττον (Heb. 1:4; 7:7, 19, 22; 8:6; 9:23; 11:16, 35, 40; 12:24), and Hebrews has some literary influence, an argument for Blass’ idea above. Paul has κρεῖττον only in 1 Cor. 7:9, while κρεῖττον is found in 1 Cor. 7:38; 11:17; Ph. 1:23. Hort accepts κρεῖττον in 1 Pet. 3:17 and 2 Pet. 2:21 (doubtful). Cf. σήμερον for the Attic τήμερον. Ὄρνιξ (Lu. 13:34) is called Western by Hort, though

4 Notes on Orth., p. 148.
6 Cf. Thumb, Hellen., pp. 53, 78 ff.; Schweizer, Perg. Inschr., p. 125; Nachm., Magn. etc., p. 95 f.; Moulton, Cl. Rev., 1901, p. 32; Prol., p. 45; Blass, Gr. of N. T. Gk., p. 23; Hort, Notes on Orth., p. 148; Reinhold, De Graec. etc., p. 43 f. Giles (Man. of Comp. Philol., p. 115) thinks that the σσ in Athens was a literary mannerism and pronounced just like ττ.
Moulton\(^1\) observes that it has some papyrus support and is like the modern Greek (Cappadocian) ὄντι.

\((g)\) **ASPIRATION OF CONSONANTS.** There is besides some fluctuation in the aspiration of consonants. See under \((d)\) for the double aspirates like Ἀφφία, etc. This uncertainty of aspiration is very old and very common in the inscriptions and papyri,\(^2\) though the N. T. has only a few specimens. W. H. read Ἀκελδάμαχι in Ac. 1:19, Ἀρχάτιος. So ὅρκα (Mt. 5:22), Ἀρχάτιος, but σαβαχθανεί (B has –κτ–) in Mt. 27:46. 

Γεννησαρέτ is correct; the Syrian class has –έθ in Mt. 14:34. W. H. have uniformly Καφαρναού, and read Ναζαρέθ in Mt. 21:11; Ac. 10:38, and Ναζαρά in Mt. 4:13; Lu. 4:16. In Lu. 11:27; 23:29 DFG have μάσθοι for μαστοί, likewise Ν in Rev. 1:13. Ἐθύθη is read by cursives, Clem., Or., etc., in 1 Cor. 5:7. In οὐθεὶς and μηθεὶς after elision of ε the δ has blended with the ες as if it were τ and become θ. It is first found in an inscr. 378 B.C. and is the usual form in the pap. in iii/β.C. and first half of ii/β.C. By i/α.D. the δ forms are supreme again (Thack., Gr., pp. 58 ff). Blass\(^3\) finds οὐθενός in Lu. 22:35 (ABQT); 2 Cor. 11:8 (ΝΒΜ); οὐθεν in Lu. 23:14 (ΝΒΤ); Ac. 15:9 (ΒΗΛΠ); 19:27 (ΝΑΒΗΠ); 26:26 (NB); 1 Cor. 13:2 (ΝΑΒCL); μηθεν in Ac. 27:33 (ΝΑΒ). But ἔξοθενε in the LXX and the N. T. prevails, though W. H. (after BD) read ἔξουθενηθη in Mk. 9:12. Ν and ΝΔ read the Attic πανδοκεῖον, –εύς in Lu. 10:34 f., but W. H. accept πανδοχείον, –εύς (from δέχοιμαι). Σάρεπτα in Lu. 4:26 is the LXX rendering of Ἰερουσαλήμ. Τροποφορέω and τροφοφορέω are two distinct words, though the MSS. differ widely in Ac. 13:18, the Neutral and Western supporting τροπ_. Hort considers σφυρίς for σπυρίς right (Mt. 15:37, etc.). It is well attested by the papyri.\(^4\) W. H. read φοβηθρον, not φοβητρον, in Lu. 21:11.

\((h)\) **VARIABLE FINAL CONSONANTS.** The use of ν ἐφελκυστικόν (paragogic ν) cannot be reduced to any clear rule. The desire to avoid hiatus extended this usage, though it probably originally had a meaning and was extended by analogy to cases where it had none. Cf. English articles a, an (Giles, Man. of Comp. Philol., p. 208). 

[Page 220] The same thing is true of movable final ζ. In the old Attic before 403 B.C. this movable ν was seldom used. It is more frequent in the new Attic up to 336 B.C., and most common in the κοινή, vanishing again in the modern Greek, as ν easily disappears in pronunciation. Meisterhans\(^5\) has an interesting table on the subject, showing the relative frequency in different centuries. This table proves that in the κοινή it came to be the rule to use the movable ν both before consonants and vowels.

---
2 Cf. W.-Sch., p. 59. 
4 Moulton, Prol., p. 45. The Ptol. pap. have both spellings, Deiss., B. S., p. 185. Cf. Mayser, Gr., p. 173. 
5 Att. Inschr., p. 114.
This is shown also by the inscriptions\(^2\) and the Ptolemaic papyri. *Per contra* note the disappearance of final \(v\) in modern Greek vernacular, when not pronounced (Thumb, *Handb.*, pp. 24 ff.). However, as a rule, this movable final \(v\) occurs only with the same classes of words as in the Attic as after –σι, ἐστι and ε in verbs (3d sing. past tenses). The irrational \(v\) mentioned as common later by Hatzidakis\(^3\) is rare. The older N. T. MSS. (\(\text{ΙABC}\)) are in harmony with the κοινὴ and have the movable \(v\) and \(ς\) both before consonants and vowels with a few exceptions. The later N. T. MSS. seem to feel the tendency to drop these variable consonants. Moulton\(^4\) mentions μείζων (Jo. 5:36) as a good example of the irrational \(v\) in N. T. MSS. (ABEGMA). Cf. also the irrational \(v\) with the subjunctive in the papyri. So εἶδον ἑπεξεργάσον P. Oxy. 744 (i/B.C.) for ἑ. See Moulton, *Prol.*, pp. 168, 187, for further examples. The failure to use this \(v\) was originally most common in pause, sometimes even before vowels.\(^5\) Blass\(^6\) observes that it was only the Byzantine grammarians who made the rule that this \(v\) should be used before vowels and not before consonants, a rule of which their predecessors did not have the benefit, a thing true of many other grammatical rules. We moderns can teach the ancients much Greek! Since the N. T. MSS.\(^7\) show no knowledge of this later grammatical “rule,” W. H. follow a mechanical one indeed, but the only practical guide under the circumstances. They go by the testimony of the oldest uncials. Hort gives a considerable list of examples where the \(v\) is wanting in one or more of the older uncials, but where W. H. have \(v\), as in ἄρσεν (Mt. 4:6), πᾶσιν (Mt. 5:15), etc. But in Lu. 1:3 ἔδωκε is read by \(\text{NB}CD\). In Ac. 24:27 κατέλιπε is supported by \(\text{NB}\.\) There are about a dozen more instances in Hort’s long list of alternative readings where W. H. prefer the form without \(v\), rather more frequently after σι, than after ε.\(^1\) W. H., however, have ἠκοίμη everywhere, as was usually the case in the Attic inscriptions and always in the Ptolemaic papyri and the LXX MSS. both before vowels and consonants.\(^2\) So ἔμπωσθεν, ἔξωθεν, ὅπωσθεν in the N. T. Likewise πέριστι is correct in 2 Cor. 8:10; 9:2.\(^3\)

---

\(^1\) See Blass, Gr. of N. T. Gk., p. 19; Gregory, *Prol.*, p. 97.

\(^2\) Blass, Gr. of N. T. Gk., p. 328, and references there given. Cf. Thack., Gr., p. 135.

\(^3\) Blass (Gr. of N. T. Gk., p. 19) quotes Attic usage for πέριστι before vowels.
The variable ς calls for a few words more. All good MSS. give ἄντικρυς Χίου in Ac. 20:15. But as in Attic, the N. T. MSS. usually have ἄχρι and µέχρι even before vowels. ἄχρι (always before consonants) thus precedes vowels some fifteen times, and once only do we certainly have ἄχρις (Gal. 3:19), though it is uncertain whether it is followed by ὄν or οῦ. Μέχρι is always used in the N. T. before a consonant and once before a vowel, µέχρι Ιωάνου (Lu. 16:16). The early N. T. editors used to print οὕτω before consonants and οὕτως before vowels, but W. H. print οὕτως 196 times before consonants and vowels and only ten times οὕτω (all before consonants). These ten instances are Mk. 2:7; Mt. 3:15; 7:17; Ac. 13:47; 23:11; Ro. 1:15; 6:19; Ph. 3:17; Heb. 12:21; Rev. 16:18.6

(i) Metathesis. Φαίλονης (2 Tim. 4:13), Latin paenula. See Additional Notes.

IV. Breathings.

(a) Origin of the Aspirate. As is well known, in the modern Greek no distinction is made in pronunciation between spiritus asper and spiritus lenis, or πνεῦμα δασύ and πνεῦμα ψιλόν. That is to say, the “rough” breathing is only a conventional sign used in writing. This sign is indeed a comparatively modern device, ‘and’, in use in the MSS. generally since the eleventh century A.D. This form was an evolution from H (Phœnician he), then and , then and . This breathing (rough or smooth) did not find a place in the Greek alphabet, and so is not found in the early uncial MSS. It becomes therefore a difficult question to tell whether the modern ignoring of the rough breathing was the rule in the first century A.D. The MSS., as Hort points out, are practically worthless on this point. The original use of H as equal to h or the rough breathing was general in the old Attic and the Doric, not the Æolic and Ionic. And even in the Attic inscriptions the usage is very irregular and uncertain. Numerous examples like HEKATON occur, but some like HEN also, so that even H was not always rough. The modern English cockneys have no monopoly of trouble

4 For the Hom. ἀντικρυν and further items see W.-Sch., p. 63 and note. Ἀντικρυν (καταντικρυν) in Attic is ‘downright,’ not ‘over against’ (Blass, Gr. of N. T. Gk., p. 20). Cf. for the pap. Maysor, Gr., pp. 242 ff.
5 Hort, Notes on Orth., p. 148. But W. H. read ἄχρις οὗ in Heb. 3:13, elsewhere ἄχρι οὗ. For further discussions of ἄχρι and υέχρι see W.-Sch., p. 63 note.
1 Jann., Hist. Gk. Gr., p. 63. The marking of the rough breathing was general in the earlier forms in vii/A.D., ib., p. 65.
3 Intr. to Gk. N. T., p. 310. Cf. also Sitterley, Praxis in MSS. of the Gk. Test., 1898, p. 32. See Helbing, Gr. d. Sept., p. 25 f., for remarks on breathings in the LXX MSS., where Æolic and Ionic psilosis occur in ἐπί ἄδον κατ  ἐνα as well as exx. of aspirated consonants like καθ ὀψαλμούς, καθ ἐνιαυτόν, ἔφριλδεν, not to mention οὐκ ἐσφάκασιν and οὐχ ἴδο. For further remarks on breathings in the LXX see Swete, O. T. in Gk., p. 302.
with h’s. In French h is silent as l’homme. The Greeks always found the matter a knotty problem. The use of H=η in the Ionic and Attic (after 403 B.C.) left the Greeks without a literary sign for h. The inscriptions show that in the vernacular H continued to be so used for some time.

(b) INCREASING DE-ASPIRATION (Psilosis). But there was a steady decrease in the use of the h sound. The Ionic, like the Æolic, was distinguished by psilosis, and the κοινή largely followed the Ionic in this respect. More certain is the use of the aspirated consonants χ, θ, φ, which succeeded the older KH, TH, HH. But certainly the rough breathing was in early use as the [Page 223] inscriptions show, though not with much consistency. Sometimes the rough breathing may be due to the disappearance of a digamma, though sometimes a smooth breathing displaces it, as ἔργον from ἡργον (cf. English ‘work’). Then again the disappearance of σ has the same result, as ἵσαρός=ἰσαρός. It is not strange therefore that usage in the κοινή is not uniform. Examples like ὧταν, ὧπα, ὧτος, ὧκα, ὧτον, ὧτος, ὧκος, ὧτος, ὧκεν, etc., appear in the Pergamum inscriptions, not to mention καθ ἡστος, καθ ἴδιαν, etc. The same story of uncertainty is told elsewhere in the κοινή as in Magnesia, Herculaneum. Some of this variation is probably due to analogy, so that though “de-aspiration was the prevailing tendency,” yet the N. T. shows several examples in the opposite direction.

(c) VARIATIONS IN THE MSS. (Aspiration and Psilosis). The aspiration of the consonants k, π, τ in case of elision is therefore a matter of documentary evidence and occurs in the case of ἄντι, ἔπι, κατά, μετά, οὔκ, ὑπό. The N. T. MSS. vary considerably among themselves as in the LXX, though some like D in the Gospels and Acts are wholly untrustworthy about aspiration. In general Attic literary usage

5 Cf. Thumb., p. 73 f. The Laconic Gk. used H in interaspiration as well as at the beginning (ib., p. 8). Dawes (Pronun. of the Gk. Aspirates, 1894, p. 103) is not able to reach a final decision as to whether the Gk. aspires are genuine aspires like the Sans. according to Brugmann, Curtius, etc.
1 Cecil Bendall, Jour. of Philol., 1904, pp. 199 ff.
2 R. Weiss, De Dig. etc., 1889, p. 47. Cf. also Paues, De Dig. Hesiodes Quest., 1887, p. 48.
3 Cf. Sommer, Griech. Lautstudien, 1905, p. 2. On metathesis in aspiration, as ἔχω (ἔχω), see Meisterh., p. 102, exx. of ἔχω in Attic inscr. v/b.c. See also article by Pernot in Rev. des Ét. Grq., 1906, pp. 10–23, on La Métathèse dans les Dial. de Chio. Schweizer, Perg. Inschr. etc., pp. 116 ff. The Attic had only ἴδιος, but ἔρτη (Meisterh., p. 87).
7 Thumb, Hellen. etc., p. 64.
8 Moulton, Prol., p. 44. Cf. also for the inscr., Dittenb., ἔφο (ἔφο) (458. 71), καθ ἴδιαν (233. 49), and for the pap., Moulton, Cl. Rev., 1901 (pp. 33, 434) and 1904 (p. 106). Cf. also Hort, Intr. to Gk. N. T., p. 312.
9 Ib., p. 311.
10 Blass, Gr. of N. T. Gk., p. 15.
cannot be assumed to be the κοινή vernacular. Hort prefers Ἁδραμυντηνός (Ac. 27:2) like Hadrumetum. άλωα (1 Cor. 9:9 f.; 1 Tim. 5:18) is connected with ἄλως or ἄλωθι and may be compared with ἀπηλίomegaς (ήλως). Hort (p. 144) prefers ἀλυσις (Mk. 5:3), but εἰλικρινής and εἰλικρινία, though εἰλ. has ancient authority.

Ἀφελπίζοντες is read by DP in Lu. 6:35 and the LXX has several similar instances,13 not to mention one [Page 224] in Hermas and in the Attic. In Ro. 8:20 W. H. accept ἐφ ἐλπίδα, while various MSS. support it in Ac. 2:26; 1 Cor. 9:10; Ro. 4:18; 5:2; Tit. 1:2, and FG have καθ ἐλπίδα in Tit. 3:7. Hort2 thinks this is due to digamma dropped as well as in the case of ἀφίδω (Ph. 2:23), but analogy to ἀφορᾶν may be the explanation.3 Ἐφιδε is read by a few MSS. in Ac. 4:29 as έφιδεν in Lu. 1:25. Gregory4 gives many examples of ἀφτ—, ἐφτ—, καθ— with ἐλπίζω and εἶδον in the LXX. W. H. offer οὐχ ἰδού as an alternative reading in Ac. 2:7, while B reads οὐχ ἰδόντες in 1 Pet. 1:8 and οὐχ εἶδον in Gal. 1:19. A has οὐχ ἤψεσθε in Lu. 17:22. W. H.5 put οὐχ Ιουδαίως in the margin in Gal. 2:14. Καθ ἵδιαν appears in Ν once, in B eight times, in D three times, in Δ once (Mt. 14:23; 17:1, 19; 20:17; 24:3; Mk. 4:34; 6:31; 9:28; 13:3). But W. H. nowhere accept it, not even when B combines with Ν or D.

εἴστηκαν in Mt. 24:3. The form καθ ἵδιαν is common in the κοινή inscriptions and the papyri. Καθείδωλον is read by M in Ac. 17:16. On the other hand καθ ἔτος, so common in the κοινή (cf. Latin vetus), is not found in the N. T., all MSS. in Lu. 2:41 reading καθ ἔτος. Hort6 considers οὐκ ἔστηκεν (Jo. 8:44) to be merely the imperfect indicative of στήκω. So also as to ἔστηκεν in Rev. 12:4. Ν has ἐφιορκήσεις in Mt. 5:33, a form common in the Doric inscriptions.7 DP have ἔφιορκος in 1 Tim. 1:10. In Rev. 12:11 A reads οὐχ ἡγάμησαν, while οὐχ ὁλίγος is read in the LXX and papyri as well as a number of times in Ac. (12:18 by A, 14:28 by Ν, 17:4 by B, 19:23 by ΝAD, 19:24 by Ν, 27:20 by A). In Ac. 5:28 D has ἐφαγαγεῖν. W. H. print on the other hand ἀποκαταστάνει in Mk. 9:12 rather than ἀποκαταστάνει though with hesitation.8

11 Intr. to Gk. N. T., p. 313; App., p. 160. 12 W.-Sch., p. 40. 13 Gregory, Prol., p. 91; Thack., p. 125. 1 Blass, Gr. of N. T. Gk., p. 16. Cf. Thumb, Unters. d. Spir. Asper, p. 65. 2 Notes on Orth., p. 143. 3 Moulton, Prol., p. 44; Thumb, Spir. Asper, p. 71. Moulton (Cl. Rev., Mar., 1910, p. 53) now says: “I am quite willing to be convinced that the long-lost digamma was an accessory here if no better explanation turns up.” Thumb (Spir. Asper, pp. 11, 71) admits the possibility of the digamma explanation in some cases. 4 Prol., p. 91. 5 Cf. Intr. to Gk. N. T., p. 313 f., where Hort really favours οὐχ Ἰουδ. and the rough breathing for all the forms of Ἰουδάς, Ἰουδάος, etc. For the variations in the LXX MSS. see Thack., p. 125. 6 Intr. to Gk. N. T., p. 312. 7 Rutherford, New Phryn., p. 363. For this transfer of aspiration cf. Curtius, Gk. Verb, II, 109. Nestle (Am. Jour. of Theol., July, 1909, p. 448) urges that, since the Gk. of the Bible is an “east-west language,” attention must be paid to oriental tongues. He notes that the Coptic has aspiration in helpis, hisos, for ἐλπίζει, Ἰος. 8 Notes on Orth., p. 168.
So likewise W. H. give ἐπίσταται instead of ἐφίσταται [Page 225] in 1 Th. 5:3 (like B in Sap. 6:8), a wholly unusual1 absence of aspiration in compounds of Ἰστῆμι. For the LXX phenomena see Thackeray, Gr., p. 127 f. It is wholly doubtful whether ὀμείρομαι or ὀμείρομαι is right (1 Th. 2:8). Οὐκ ἐφίρον in some MSS. in Lu. 24:3, and οὐκ ἔνεκεν in 2 Cor. 7:12, Blass2 considers as clerical errors, though they are common in the LXX and in the inscriptions.3 N. T. MSS. (late cursives) even have αἰτέο, ὀστεόν, ὀχλος, etc. For μηθεῖς, οὐθεῖς see this chapter III, p. 219, the interchange of Consonants and chapter on Pronouns, pp. 750 f.

(d) TRANSLITERATED SEMITIC WORDS. The aspirate in the case of transliterated Semitic words (chiefly proper names) causes some difficulty. Blass4 calls it “insoluble,” though he accepts Hort’s practice as rational,5 expressing Ν and Υ by the smooth breathing and Π and Π by the rough breathing. The MSS. disagree and are not consistent, but Blass calls the result of this procedure “strange.” Hence Hort argues for Ἄβελ (Π), Ἄβραάμ (Ν), Ἄγαβος (Υ), Ἄγαρ (Π), Ἀκελλάδαμάχ (Π), Ἀλληλούϊα (Π), Ἀλφαῖος (Π), Ἀνάνιας (Π), Ἁννα (Π), Ἀρέτας (Π), Ἀριμαθαία (Π), Ἀρ Ἀγαθέων (Π), Ἑβέρ (Υ), Ἑβραίος (Υ), Ἑβραίις (Υ), Ἑβραίστη (Υ), Ἑλλάδας (Ν), Ἑλλάδαμ (Ν), Ἑλλην (Ν), Ἑμείρ (Π), Ἑνόχ (Π, but Ἐνός, Ν), Ἑρρόμ (Π, but Ἐσλέι, Ν), Εὐα (Π), Ἐλεί (Ν), Ἐλλήν (Π), Ἐλλείας (Ν), Ἡρ (Υ), Ὡσσωπος (Ν), Ὡσσανά (Π), Ὀση (Π). Hort8 gives, moreover, the smooth breathing to all names beginning with θ as Ἡσαίας.

Besides he considers it a “false association”9 to connect Ἰερείας, Ἰερείχο, Ἰεροσόλυμα (–μείτης), Ἰερουσαλήμ with ἴερος, though Blass retains Ἰεροσολυμα rather inconsistently.10

(e) THE USE OF BREATHINGS WITH ρ AND ρρ. W. H. follow Tischendorf and Lachmann in dropping the breathings in ρρ as in ἄρρητα (2 Cor. 12:4), though retaining the rough breathing with initial ρ as in ῥῆματα (ib.). Winer11 argued that the

3 W.-Sch., p. 39.
4 Gr. of N. T. Gk., p. 16.
6 Hort, Intr. to N. T. Gk., p. 313. Cf. also Gregory, Prol., p. 106 f., for list of these words.
7 Strange as it may seem, “Hebrew” rather than “Ebrew” is modern (Hort, Intr. to Gk. N. T., p. 313).
8 Hort (Notes, etc., p. 144), however, merely follows custom and prints ὑσσ.  
9 Intr. to N. T. Gk., p. 313.
10 Ib.

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).
Romans heard an aspiration with ρρ, since they used Pyrrhus, Tyrrhenus, etc. W. H. seem justified in using the smooth breathing with the first ρ in the word ρ ἐπαντισε κένοι (Heb. 10:22) by old Greek [Page 226] custom. The MSS., of course, give no help in the matter. The breathing with ρ is not written in the modern Greek vernacular text as in Pallis or Thumb.

(f) THE QUESTION OF Αὐτοῦ. This is somewhat knotty. It seems clear that as a rule αὐτοῦ and not αὑτοῦ is to be printed in the N. T. A number of reasons converge on this point. The older Greek often used αὐτοῦ rather than έσαυτοῦ as shown by the aspiration of the prepositions like ἀφαυτοῦ, etc. In the N. T. there is not a single case of such aspiration after elision save in a few single MSS. Add to this the fact that the N. T. uses the reflexive pronoun much less than the earlier Greek, “with unusual parsimony” (Hort). Besides the personal pronouns of the first and second persons are frequently employed (Buttmann) where the reflexive might have been used. Buttmann urges also the point that in the N. T. we always have σαυτοῦ, not σάυτοῦ. The earliest uncial MSS. of the N. T. and the LXX that use the diacritical marks belong to the eighth century, but they all have αυτοῦ, not αὑτοῦ. Even in the early times it was largely a matter of individual taste as to whether the personal or the reflexive pronoun

2 On the whole matter see Hort, Notes on Orth., p. 144 f.; W.-M., p. 188 f.; Buttmann, Gr. of N. T. Gk., p. 111; Blass, Gr. of N. T. Gk., p. 35. Buttmann BUTTMANN, A., Grammatik d. neut. Sprachgebrauchs (1859).
was used. Blass (p. 35) indeed decides absolutely against αὐτοῦ. But the matter is not quite so easy, for the κοινή inscriptions give examples of ὕτο ἀυτοῦ in first century B.C. and A.D. Mayser also gives a number of papyri examples like καθ ἀυτοῦ, µέθ αὐτοῦ, ὑφ αὐτῶν, where the matter is beyond dispute. Hort agrees with Winer in thinking that sometimes ἀυτοῦ must be read unless one insists on undue harshness in the Greek idiom. He instances Jo. 2:24, αὐτός ἐς Ἰησοῦς ὤκ ἐπίστευσεν αὐτόν ἀυτοῖς, and Lu. 23:12, προσήχαρσιν γὰρ ἐν ἐξήραντες πρὸς ἀυτοῖς. There are other examples where a different meaning will result from the smooth and the rough breathing as in 1 Jo. 5:10 (αὐτῶν), 18 (αὐτόν, ἀυτοῦ), Eph. 1:5 (αὐτῶν), 10 (αὐτῶ), Col. 1:20 (αὐτῶν), 2:15 (αὐτῶ). W. H. print ἀυτοῦ about twenty times. Winer leaves the matter “to the cautious judgment of the editors.”

V. Accent.

(a) THE AGE OF GREEK ACCENT. The MSS. are worth as little for accent as for breathings. The systematic application of accent in the MSS., like the regular use of the spiritus lenis, dates from the seventh century A.D.1 Hort2 caustically remarks that most modern grammarians have merely worked out “a consistent system of accentuation on paper” and have not recovered the Greek intonations of voice, though he has little to offer on the subject. Chandler3 indeed laments that modern scholars scatter their Greek accents about rather recklessly, but he adds: “In England, at all events, every man will accent his Greek properly who wishes to stand well with the world.” It is a comfort to find one’s accents irreproachable, and Chandler rightly urges that the only way to use the accents properly is to pronounce according to the accent. The ancients were interested in Greek accent. Herodian in his Καθολικὴ προσῳδία investigated the accent of 60,000 words, but the bulk of his twenty books is lost. Chandler4 found most help from Göttling, though others have written at length on the subject.5 There are no accent-marks in the early inscriptions and papyri; in fact tradition ascribes the invention of these signs as a system to Aristophanes of Byzantium in the third century B.C., though the beginnings appear in the preceding

century. He and his disciple, Aristarchus, made the rules at any rate. The
Alexandrian grammarians developed these rules, which have shown a marvellous
tenacity even to the present day in the modern Greek, though, of course, some words
would naturally vary in accent with the centuries. There is the Harris papyrus of
Homer in the first century A.D. which has accents, and clearly the word had the accent
in pronunciation like English long before it was written out. After the fourth century
A.D. the use of accentual rhythm in Greek in place of quantitative rhythm had a
tendency to make the accent rather more stable. “Of all the phonetic peculiarities of a language accent is the most important.” The earlier use of accents
and breathings was probably “for the text of poetry written in dialect” (cf. our
reading-books for children). They were not written out “in ordinary prose till the
times of minuscule writing,” though Euthalius (A.D. 396) made use of them in his
dition of the N. T. The Christian hymns early show signs of changing from tone
(pitch) to stress as is the rule in modern Greek. Cf. Thumb, Handb., p. 6.

(b) Significance of Accent in the Κοινή. In Greek it is pitch, not stress, that is
expressed by the accent, though in modern Greek the accents indicate stress. “In the
ancient Sanskrit and the ancient Greek the rise and fall in musical tone was very
marked.” In English we are familiar with stress-accent. “Hadley has ably argued that
the compass of tone used by the Greeks was a musical fifth, i.e. from C=do to G=sol,
involving also the intermediate third or E=me.” It was not a stronger current of
breath, but a higher musical note that we have. It was in a word “das musikalische
111 f.) points out that προσωπιγία comes from a root meaning ‘to sing’ (like the Latin
accentus) and so ὄξυς and βαρύς answer to our high and low pitch. Giles thinks that
in the original Indo-Germanic language pitch and stress-accent were more evenly
balanced. The accent singles out one syllable sharply and raises it higher than the rest.

Giles, P., A Short Manual of Comparative Philology. 2d ed. (1901).

though as a matter of fact each syllable in a word has an accent or pitch lower down in the scale. Cf. the secondary accent in the English “incompatibility.” The Harris papyrus of Homer even accents every syllable in each word. Then again “the accent of a sentence is as much under the influence of a law of some kind as the accent of the word.” Language without accent or musical variety [Page 229] in tone would be hopelessly monotonous and ineffective. An instance of the importance of accent and breathings is seen in oŬ oŬ, Ac. 19:40.

(c) SIGNS OF ACCENT. In practical usage (in our school grammars) there is only one distinction, the accented syllable and the unaccented syllables. The Greeks themselves distinguished the pronunciation of the acute and the circumflex. The difference is well illustrated by ἐμι and ἐμί. The three signs (acute or ὄξια, grave or ἐμιά, circumflex or περισπωμένη) come to symbolize the higher pitch of the accented syllable. Originally the accented syllable was marked by the acute and all the unaccented syllables by the grave (merely the absence of the acute), but by and by this use of the grave accent was felt to be useless and was dropped. Then the grave accentual mark of falling inflection was used for the acute when an oxytone word comes before another word (not enclitic), though this “grave” accent has the pitch of the unaccented syllable. Similarly in contraction of two syllables with acute and grave ('') arose the circumflex, the grave and the acute making acute still. The actual use in pronunciation of both acute and grave in the contracted syllable disappeared, so that the circumflex in pitch differed little, if any, from the acute. The difference, for instance, between the acute in δῆλωσα and the circumflex in δῆλῳσα was not perceptible in sound. The Greek and the Latin agree in having the accent only on one of the three last syllables and thus differ from English and French for instance. It is not necessary here to go into the rules (not wholly arbitrary) which the Greeks developed for the accent of words. In the use of unaccented words (proclitics or enclitics) Greek does not differ radically from English. If the Greek has ἐν οἴκῳ, the English has “at-home.” If the Greek has ἐπές μοι, the English has “tell-me.”

(d) LATER DEVELOPMENTS IN ACCENT. There was not indeed uniformity among the dialects in the use of accent. They agreed only in the one point of not accenting further back than the third syllable from the end. “In other respects the Greek dialects show the widest divergencies in their accentuation. The two antipodes are Æolic and Doric, which are so closely allied phonetically: Æolic throws the accent as far back as possible in [Page 230] all words, e.g. βασίλευς=βασιλεύς, …; Doric, on the contrary, faithfully preserves the original oxytone accent. Between these two dialects lie Ionic and Attic, which, however, are much nearer to Doric than to Æolic. But all the

1 Jann., Hist. Gk. Gr., p. 66.
2 Ib., pp. 65, 68.
4 Giles, Man. of Comp. Philol., p. 96. Giles thinks that words like ἐφερόμεθα originally had the accent further back. Cf. Riem. and Goelzer, Phonét., p. 80, for Plato’s word of 17 syllables and Aristophanes’ word of 78.
dialects, including Doric, observe the rule that, in those forms of the verb which are capable of being conjugated, the accent goes back as far as possible.Æolic, for instance, has ἡ σή where the Attic has Ἡ σή. But all the dialects have ἐγώ, ἐγωγε. On this point in general see Kühner-Blass, I, pp. 323 ff. The Dorians even had ἄνθρωποι, ἐλέσαν, etc. Perfect uniformity was no more possible in Greek than in English. The modern Greek preserves the three-syllable accent rule. Examples like ἔπιασε, ἐβράδυασε are not exceptions, since the ἰ and ὑ count as consonants. Cf. Thumb, Handb., p. 28. French follows tone like the ancient Greek. Pêcheur is ‘fisher,’ while pêcheur is ‘sinner,’ for example, a difference only in quality, not in accent.

(c) N. T. Peculiarities. Where so much is in doubt, excessive refinement is certainly not desirable. But the following points call for remark, and Gregory can be consulted for the actual evidence (very slight) from the N. T. MSS. on the subject of accent. D alone among the older uncials has the accent (and that the occasional circumflex) save by the hand of a corrector.

1. Shortening Stem-Vowels. There is quite a tendency in the κοινὴ towards shortening some of the stem-vowels, especially in words in –μα. Hence W. H. do not follow the Attic accent here, but that of the κοινὴ, and give us κλίμα, κρίμα, μίγμα (cf. Ἐλίγμα), πόμα, χρίσμα, though as to χρίσμα Blass suggests that χρήσμα is correct because of χρήστος and because B (1 Jo. 2:20, 27) has χρήσμα. Analogy plays havoc with rules. Herodian says that ἰ and ὑ were usually shortened before ξ. So W. H. give us κηρύξ, κηρύξαι, στηρίξαι (Ro. 16:25), probably φοῖνιξ, χοῖνιξ. According to Winer-Schmiedel this rule applies to ψ also, but W. H. and Blass do not agree. So

Gregory

3 Prol., p. 99 f.
5 Blass, Gr. of N. T. Gk., p. 15.
Winer-Schmiedel, Winer’s Grammatik des neutest. Sprachidioms. 8. Aufl. (1894—).
6 P. 68.
7 Gr. of N. T. Gk., p. 15. Blass urges that B has θλήψις, but W. H. refuse to follow B in matters of orthography. But the Herculaneum rolls here reinforce B with at before
W. H. have ὁλίσις, ἰσχαὶ (Lu. 4:35). [Page 231] By parity of reasoning W. H. reject the circumflex accent in ἐλκύσας, λίνον, μῦρον, σπίλος, στολός, συντερίφθαι (Mk. 5:4), though συντρίβων (Lu. 9:39) and σκῦλα (Lu. 11:22). Cf. μῦθος, μαργαρίται, νίκος, σῖτος, σῶκον, etc. W. H. read ψύχος also. The length of ν in κύπτω is uncertain; ὀνακύψαι and παρακύψαι usually appear in the N. T. W. H. have, however, κράζον in Gal. 4:6 and λαίαν in Mk. 4:37. But ἐστιναι (Ac. 12:14) is right, though ἄραι (Mt. 24:17), θυμίζει (Lu. 1:9) because of long ā. Cf. also ἐπάρατι (Lu. 18:13), ἐπιφάνει (Lu. 1:79), πράξει (Ac. 26:9), but πιάσει (Jo. 7:30). So καταλῦσαι (Mt. 5:17), κατευθύνει (Lu. 1:79) and κολύσαι (Ac. 10:47).

2. Separate Words. These are not so easily classified. W. H. read ἄγοραίοι, not ἄγόραιοι; ἄντικρος, not ἄντικρο; ἄντιπερα, not ἄντιπέρα(ν); ἀπόδεκτος, not ἀποδέκτος but ἐκλέκτος, ἐλκύστας, μισθωτός; ἄρεσκια (from ἄρεσκεια), with which compare ἐρυθία (from ἐρυθεῖον); ἄρχεος (Attic ἄρχειος), as also ἐρῆμος (Attic ἐρῆμος), ἔτοιμος (Attic ἐτοίμος), μνημόνιος (Attic μνήμον), χλωρός (Attic χλῶρος); ἄρδος (3d decl.), but ἄρδετης (3d deg.), γαζοφυλάκων, not –ἰον and εἰδώλων, with which compare τελόνων, γλωσσοκόμων being for the earlier γλωσσοκόμιον; δέσμη, not δεσμῆ; διετής (Mt. 2:16), not διήτης (Attic), and so with other compounds of –της, like ἔκκατοντατης, etc., but ἔκκατονταχθῆν (Ac. 23:17) is from –Ἀρχης, not –Ἀρχος; εἰὸν is the imperative (Mt. 18:17), for εἰὸν is only Attic, and Charax calls εἰὸν Syracusan,1 with which one may compare ἰδε (ἰδέ only Attic according to the Alexandrian grammarians, though Bornemann urged ἰδε when verb and ἰδε when exclamation) and λάβε (λαβὲ only Attic); θηρικός (Jas. 1:26), not ὀρθέςκος; ἰδρῶς (Lu. 22:44), not ἱδρῶς; ἰμάντα (Mt. 1:7), not the Attic ἰμάντα; ἰσος, not the Epic ἵσος; ἰτθοῦς (Mt. 7:10), not ἰτθοὺς; ὀσφός (Mt. 3:4), not ὀσφῷς; ὕσχος, not ὕσχυς; κλεῖς in nominative singular (Rev. 9:1), though κλεῖς (1:18) and κλεῖσας (Mt. 16:19) in accusative plural, etc., with which compare πούς (Mt. 9:45), not ποῦς, and σής (Mt. 6:19), not σῆς; κτίστης (1 Pet. 4:19), not κτιστής, as γνώστης, etc.; κρύπτη, not κρυπτή (Lu. 11:33); μογγαλάκας (Mk. 7:32), not –λάκος; μυλῶν (Mt. 24:41) is read only by DMY and most of the cursives, μυλὸς being correct; μωρᾶδων (–δῶν) as in Lu. 12:1; Rev. 5:11, not the Attic μωραῖώδων, and so as to χυλίδων; ὄργυα (Ac. 27:28), not ὄργυια; οὔα (Mk. 15:29), not οὐᾶ; ποίμνιον (Lu. 12:32), not ποίμνιον, and τρόβλων in Mk. 14:20 [Page 232] (called no diminutive by some),1 but teckνiν always; πλήμμυρα (Lu. 6:48) is preferred by Winer-Schmiedel2 as nominative to πλημμύρως rather than –μύρα; πονηρός always, not πόνηρος in the physical sense (Rev. 16:2) and πονηρός in the moral (Gal. 1:4); πρῷρα (Ac. 27:41), not πρώρα; σπέρα (Mk. 15:16), not σπέρα; φλώρας (1 Tim. 5:13), not φλωρας. The compound adverbs ἐπέκεινα, ὑπερέκεινα have thrown back the accent.

3 As shown in W.-M. (p. 60), the N. T. MSS. have ἔσω, not εἶσω, though εἰς, not ἐξ.
4 Cf. W.-S., p. 73.
5 Ib., p. 72.
6 Ib., p. 69.
3. Difference in Sense. With some words the accent makes a difference in the sense and is quite important. We have, for instance, ἂν, not ὅγια, in Heb. 9:2. W. H. read ἄλλα, not ἄλλα, in Jo. 6:23. In Jas. 1:15 W. H. have ἀποκφύ (from –ἀω), not ἀποκύουει (from –κόω). So W. H. print ἅρα (interrog.) in Gal. 2:17, not ἅρα (illative). Αὐτή and αὐτή are easily confused, but W. H. prefer αὐτή to αὐτή in Mt. 22:39 (αὐτή in margin); Ro. 7:10; 1 Cor. 7:12; and αὐτή to αὐτή in Lu. 2:37; 7:12; 8:42; Ro. 16:2. In Rev. 2:24 the adactive βάθος is correct, not the substantive βάθος (uncontracted from βάθος). Δεξιόλαβος or δεξιόλαβος is possible in Ac. 23:23 (cf. Winer-Schmiedel, p. 69). So W. H. give us ἔγγρισαι (indefinitive) in Rev. 3:18, not ἔγγρισαι (imperative). Cf. also ἕπτμησαι (Jude 9), optative, not infinitive –ὁς. Note the difference between φοβήθητε (submissive) and φοβήθητε (imperative) in Lu. 12:5. In Jo. 7:34, 36, W. H. prefer εἰμί rather than ἐσμί (not elsewhere used in the N. T. save in composition with prepositions ὅπο, ἐς, ἐξ, ἐπί, σύν). In Mk. 13:28 and Mt. 24:32 W. H. have ἐκφρίῇ (present active subjunctive), not ἐκφύ (second aorist passive subjunctive). In Lu. 19:29; 21:37 W. H. prefer ἔλαιον, not ἔλαιον (the correct text in Ac. 1:12, and possibly in Luke also according to the papyri, though ἔλαιον would be the form expected). In Mk. 4:8, 20, W. H. put ἣν in the text and ἥν in the margin. ἢν, not ἓν, occurs with οὐκ several times, once (1 Cor. 6:5) οὐκ ἐν ἡν. In Lu. 9:38, W. H. read ἐπιβλέψαι (indefinitive), not ἐπιβλέψας (imperative). In 1 Cor. 5:11 W. H. read ἐγίς (subjunctive), not ἐγίς (conjunction as Rec.). In Ro. 1:30 W. H. follow most editors in giving θεοστύγεις (passive), not θεοστύγει (active sense of the adjective). In Mk. 5:29 all editors have the perfect ἔκται, not the present ἔκτα. In Lu. 22:30 W. H. read καθήσοτε (subjunctive), not καθήσοτε (indicative) nor καθήσοτε (future, margin). In 1 Cor. 9:21 W. H. prefer κερδάνω (future indicative) to κερδάνο (aorist subjunctive), and in [Page 233] 1 Cor. 6:2 κρίνουσαι (future) to κρίνουσαν (present indicative in margin). In Mk. 12:40 we have, μακρά not μακρ TArray. In 1 Cor. 3:14 W. H. prefer μενέναι (future) to μένεν (present), and in Jo. 14:17 they have μένε. In 1 Cor. 4:15 (14:19) and Mt. 18:24 no distinction can be made in the accent of ἕμματοι (‘innumerable’) and μύριοι (‘ten thousand’) because of the cases. Dr. E. J. Goodspeed, of Chicago University (Expository Times, July, 1909, p. 471 f.), suggests ἡφιλήθης in Mk. 7:11 instead of ἡφιλήθης. It is entirely possible. In 1 Cor. 14:7 ὅμως is correct, not ὅμως = ὃμως. In Jo. 18:37 W. H. give οὖκοι, not οὐκοίν, in Pilate’s question. In Ac. 28:6 W. H. print πιδρᾶσθαι (μυ verb), not πιδρᾶσθαι (ω verb). In Rev. 17:5 πόρνων (feminine) is probably right, not πόρνων (masculine). Πρωτότοκος (Col. 1:15), not πρωτότοκος, is manifestly right. The difference between the interrogative τίς and the indefinite τίς calls for frequent attention. In Heb. 5:12 W. H. have τίνα, not τίνα, but in Heb. 3:16 τίνες, not τίνες, and in 3:17 τίσιν, not τίσιν, while in Mt. 24:41, 1 Th. 4:6, 1 Cor. 15:8 and 16:16 the article τῷ is to be read, not the indefinite τῷ, which form does not occur in the N. T. In 1 Cor. 10:19 τί ἐστιν (twice) is not interrogative, but the enclitic indefinite with the accent of ἔστιν. In Jas. 3:6 τρόχος (‘wheel’) is properly read, not τρόχος (‘course’). In Mk. 4:12 W. H. read

4 Cf. Moulton, Prol., p. 69. On accent of the vernac. see Apostolides, Πλομπτοκος (1906).
συνίωσιν, not συνίωσιν, as συνίωσιν in Mt. 13:13. Winer\(^1\) considers the suggestion of φωτόν for φότων in Jas. 1:17 “altogether absurd.”

4. **Enclitics (and Proclitics).** Proclitics are regular in the N. T. The accent of enclitics calls for comment. As a rule W. H. do not accent them. So we have ὁὗτον τινας (Mk. 12:13), εἶναι τινα (Ac. 5:36), Ἰδοὺ τινες (Mt. 28:11), ὁδὸν ἐλεῖν (Lu. 8:12), ἁσύνετοι ἔστε (Mk. 7:18), γάρ ἔστε (Mk. 13:11), καὶ φησι (Ac. 10:31; 25:24). However, plenty of cases call for accent on the enclitic, as, for example, in εὕρην τινας (Ac. 19:1) for emphasis, γάρ, φησιν (Heb. 8:5 and cf. Mt. 14:8; Ac. 25:5, 22; 26:25; 1 Cor. 6:16; 2 Cor. 10:10) for clearness in punctuation, καὶ εἴστιν (Mt. 19:12 and cf. Ac. 5:25) for emphasis, θεοῦ ἐσμέν (1 Jo. 3:2), ὑπὸ τινῶν (Lu. 9:8) likewise, οὐκ εἴμι (Jo. 1:21). In ὅπως εἰμί (Jo. 7:34, 36) the accent is regular, though some critics wrongly prefer εἴμι.

The use of ἐστίν and ἔστιν demands special comment. When unemphatic, not at the beginning of a sentence, not preceded by ἀλλα, εἰ, καί, οὐκ, ὅτι, τοῦτο, or a paroxytone syllable, as, for example, in ἔστιν ἔστιν ἔστιν (Jo. 4:22), we have unaccented ἔστιν as in ἀγρός ἔστιν (Mt. 13:38, 39), καθώς ἔστιν (1 Jo. 3:2), etc. In some examples [Page 234] of mild emphasis W. H. have ἔστιν, as in νῦν ἔστιν (Jo. 4:23; 5:25), ποῦ ἔστιν (Mt. 2:2; Mk. 14:14). But the cases are numerous where ἔστιν is correct, as when it is emphatic, and expresses existence or possibility, as in εἴδες ἔστιν (Rev. 17:18), αὐτοῦ ἔστιν (Ac. 2:29), ὑμῖν ἔστιν (Ac. 19:2), ὁ εἰς ἔστιν (Rev. 17:10), οὐδεὶς ἔστιν (Lu. 1:61; 7:28; 18:29). ἔστιν is also the accent at the beginning of sentences, as in ἔστιν ἔστιν ἔστιν (Jo. 21:25; 1 Cor. 15:44; 1 Jo. 5:16 f.; Heb. 11:1. Cf. ἔστιν in Col. 1:15 and ἔστιν in 1:17. Then again we have, according to the usual rule, ἔστιν after ἀλλα. (Jo. 13:10), εἰ (1 Cor. 15:44), καὶ (Mk. 12:11; 2 Cor. 4:3), ὅτι (2 Th. 2:4; Mk. 6:55; Heb. 11:6), but ὅτι ἔστιν (Ac. 23:5) when the idea of existence is not stressed, οὐκ (1 Cor. 11:20; Ro. 8:9, etc.), τοῦτο (Mk. 7:2; Ro. 7:18). W. H. give only ἔστιν after ποῦ (Jo. 9:12; 11:57; Mk. 14:14).

Sometimes two enclitics come together. Here the critics differ and W. H.\(^1\) do not make clear the reasons for their practice. In Ac. 13:15 W. H. have ἐὰν τις ἔστιν, and in Gal. 6:15 περιτομή τι ἔστιν, because they take ἔστιν to be emphatic in both instances. In Jo. 6:51 W. H. have σάρξ μοι ἔστιν. But in many examples the first enclitic is accented and the second unaccented as in Lu. 8:46 ἦγατοι μοί τις, 10:29 τίς ἔστιν μοι, Jo. 5:14 χειρόν σοι τι, 8:31 μαθηταί μοι ἔστε, 12:47 ἐὰν τις μου, 14:28 μείζων μοι ἔστιν, Ac. 2:25 δεξιωμοὶ μοι ἔστιν, 25:5 εἰ τί ἔστιν, 25:14 ὁνήμ τίς ἔστιν, 1 Cor. 10:19 εἰδολοθυτόν τι ἔστιν and εἰδολόν τι ἔστιν, 11:24 τοῦτο μοι ἔστιν, 2 Cor. 11:16 μὴ τις με, Ro. 3:8 καθὼς φασίν τινες, Heb. 1:10 χειρόν σού ἐλεῖν, 2:6 δὲ ποῦ τις, Tit. 1:6 έξ τις ἔστιν. Modern Greek only has a second accent when the accent is in the third syllable as in τί άρματα μας (Thumb, Handbook, p. 29).

The personal pronouns now have the accent in W. H. and now are without it, as ὁθουλιμοῦ σοῦ and ὁθουλιμοῦ σου (both in Mt. 7:4). Cf. also ἔγώ σε (Jo. 17:4), σοῦ με (17:8), but τι ἐμοί καὶ σοι (Lu. 8:28). With prepositions generally the enclitics are

---

1 W.-M., p. 62.
1 Cf. W.-Sch., p. 77.
accented, as ἐν σοί (Jo. 17:21), though ἐμπροσθέν μου and ὑπίσω μου (Jo. 1:30 both, and so continually with these two prepositions). Ἐνόπιον ἐμοῦ (Lu. 4:7) and ἐνόπιον μου (Ac. 2:25) both appear. With the prepositions usually ἐμοῦ, not μου, occurs as ἐνέκα ἐμοῦ (Mt. 5:11). It is only with πρὸς that we have much trouble. The N. T. editors have generally printed πρὸς σε, but W. H. have that only in Mt. 25:39, elsewhere πρὸς εἰ as in Mt. 26:18. Usually we have, according to W. H., πρὸς με as in Mt. 25:36; Jo. 6:65; 7:37, etc., and where the “me” is emphatic in sense, [Page 235] as Mt. 3:14; 11:28, in the first of which Tisch. and Griesbach have πρὸς μέ, a usage not followed by W. H., though kept in the LXX text of B, as in Is. 48:16, etc.1 W. H. a few times prefer πρὸς ἐμε (not enclitic) as in Lu. 1:43; Jo. 6:35, 37 (both ways here), 44 (marg.), 45; Ac. 22:8, 13; 23:22; 24:19. Occasionally the enclitic τινεξ is found at the beginning of a sentence, as in Mt. 27:47; Lu. 6:2; Jo. 13:29; Ph. 1:15; 1 Tim. 5:24.

5. Proper Names cannot always be brought under rules, for in Greek, as in English, men claim the right to accent their own names as they will. On the accent of the abbreviated proper names see chapter V, V. It is difficult to make a clear line of distinction as to why Ἀντίπας (Rev. 2:13) is proper, but Ἀρτεμᾶς (Tit. 3:12), save that in Ἀρτεμίδωρος the accent was already after μ. But cf. Κλεόπας (Lu. 24:18) and Κλωπᾶς (Jo. 19:25).2 In general one may say that proper names (geographical and personal) throw the accent back, if the original adjectives or substantives were oxytone. This is for the sake of distinction. Ἀλεξανδρινός (Ac. 27:6; 28:11) is the adjective. Ἀνσος (Ac. 20:13 f.) is doubtless correct, though Pape gives Ἀσός also.3 In Ἁγαθάκος (1 Cor. 16:17) the accent is not thrown back nor is it in Ἀπολλώς (1 Cor. 16:12). Ἀσύνκριτος (Ro. 16:14) retains the accent of the adjective, like Τρόφιμος (Ac. 20:4) and Ὑμεναος (1 Tim. 1:20). But we have Βλάστος (Ac. 27:6), Διοτρέφης (3 Jo. 9), Ἐπαίνετος (Ro. 16:5), Ἐραστός (16:23), Ἐρμογένης (2 Tim. 1:15), Εὐστυχος (Ac. 20:9), Κύρπος (2 Tim. 4:13), probably Ονησίφορος (2 Tim. 1:16; 4:19), Πάταρα (Ac. 21:1), Πύρρος (Ac. 20:4), Συντύχη (Ph. 4:2), Σωσθένης (1 Cor. 1:2), Τίμων (Ac. 6:5), Τύχικος (Ac. 20:4) Φύλητος (2 Tim. 2:17). But Χριστός always retains the oxytone accent whether proper name (1 Tim. 1:1) or verbal adjective (Mt. 16:16). In 2 Tim. 4:21 Λίνος, not Λίνος, is read. So Τίτος (2 Cor. 2:13, etc.). In Ac. 27:17 Σύρτις is read by W. H. But Φήλιξ in Ac. 24:22, etc.

6. Foreign Words. These always give occasion for diversity of usage in transliterating them into another tongue. Blass4 lets the quantity of the vowel in Latin determine the accent in the Greek equivalent for Latin words. So Μᾶρκος, Μᾶρκος, etc., but W. H. do not accept this easy principle and give us Μάρκος in Ac. 12:25, etc., Κρίσπος (1 Cor. 1:14), etc. W. H. likewise [Page 236] throw the accent back on Latin names like Κοῦρατος (Ro. 16:23), Πρίσκιλλα (Ac. 18:2), Σέκουνδος (Ac. 20:4),

---

1 Cf. Lipsius, Gr. Unters., p. 61. Cf. also W.-Sch., p. 78.
2 In W.-Sch., p. 74 f., see remarks on the subject.
3 Cf. W.-Sch., p. 73. This word is, of course, not to be confounded with Ἀσσον (Ac. 27:13) as Text. Rec. did.
4 Gr. of N. T. Gk., p. 15.
Τέρτυλλος (24:2), but we have on the other hand Πολύς (Ro. 16:23), not Γάιος,
Οὔρβανός (Ro. 16:9), Σιλουανός (2 Cor. 1:19), Σκευάζεις (Ac. 19:14).

But not even Blass attempts to bring the Semitic words under regular rules. Still, it
is true, as Winer shows, that indeclinable Semitic words (especially proper names)
have the accent, as a rule, on the last syllable, though the usage of Josephus is the
contrary, because he generally inflects the words that in the LXX and the N. T. are
indeclinable. So Ἀφανός, Ἀββαδών, Ἀβία, Ἀβίου, Ἀβραάμ, to take only the first two
pages of Thayer’s *Lexicon*, though even here we find on the other side Ἄβγελ and
Ἀβιάθαρ. If you turn over you meet Ἄγαρ, Ἀδάμ, Ἀδδεί, Ἀδείν, Ἄζωρ, etc. It is not
necessary here to give a full list of these proper names, but reference can be made to
Lu. 3:23–38 for a good sample. In this list some indeclinable words have the accent
on the penult, as Ἐλιέζερ (29), Ζωροβάβελ (27), Λάμιχ (36), Φάλεκ (35). The
inflected Semitic words often throw the accent back, as Ἀζωτός, Ἰάκωβος, Λάζαρος.
Many of the Aramaic words accent the ultima, as Ἀββά, Γολγοθά, Κορβάν,
σαβαχθανεί, etc. For further remarks on the subject see Helbing, *Gr. d. Sept.*,
pp. 26–31. The difficulties of the LXX translators are well illustrated here by Helbing.

VI. Pronunciation in the Κοινή. This is indeed a knotty problem and has been
the occasion of fierce controversy. When the Byzantine scholars revived the study of
Greek in Italy, they introduced, of course, their own pronunciation as well as their
own spelling. But English-speaking people know that spelling is not a safe guide in
pronunciation, for the pronunciation may change very much when the spelling
remains the same. Writing is originally an effort to represent the sound and is more or
less successful, but the comparison of Homer with modern Greek is a fruitful subject.
Roger Bacon, as Reuchlin two centuries later, adopted the Byzantine pronunciation.
Reuchlin, who introduced Greek to the further West, studied in Italy and passed on
the Byzantine pronunciation. Erasmus is indirectly responsible for the current

1 Cf. W.-Sch., p. 75.
2 W.-M., p. 59.

159; Thackeray, pp. 150 ff.
pronunciation of ancient Greek, for the Byzantine scholars pronounced ancient and modern alike. Jannaris quotes the story of Voss, a Dutch scholar (1577–1649), as to how Erasmus heard some learned Greeks pronounce Greek in a very different way from the Byzantine custom. Erasmus published a discussion between a lion and a bear entitled De Recta Latini Graecique sermonis pronuntiatione, which made such an impression that those who accepted the ideas advanced in this book were called Erasmians and the rest Reuchlinians. As a matter of fact, however, Engel has shown that Erasmus merely wrote a literary squib to “take off” the new non-Byzantine pronunciation, though he was taken seriously by many. Dr. Caspar René Gregory writes me (May 6, 1912): “The philologians were of course down on Engel and sided gladly with Blass. It was much easier to go on with the totally impossible pronunciation that they used than to change it.” Cf. Engel, Die Aussprachen des Griechischen, 1887. In 1542 Stephen Gardiner, Chancellor of the University of Cambridge, “issued an edict for his university, in which, e.g. it was categorically forbidden to distinguish αι from ε, ει and οι from ι in pronunciation, under penalty of expulsion from the Senate, exclusion from the attainment of a degree, rustication for students, and domestic chastisement for boys.”

Hence though the continental pronunciation of Greek and Latin was “Erasmian,” at Cambridge and Oxford the Reuchlinian influence prevailed, though with local modifications. Geldart, however, complains that at Eton, Rugby and Harrow so little attention is paid to pronouncing according to accent that most Greek scholars handle the accents loosely. The Classical Review (April, 1906, p. 146 f.) has the scheme approved by the Philological Societies of Cambridge and Oxford for “The Restored Pronunciation of Latin,” which is the virtual adoption of the Continental principle. The modern Greeks themselves rather vehemently insist that ancient Greek should be pronounced as modern Greek is. Müller, for instance, calls the “Erasmian” pronunciation “false” because it treats Greek “as dead.” Geldart (Modern Gk. Language in Its Relation to Ancient Gr., p. vii) says: “Modern Greek is nothing but ancient Greek made easy.” It is not quite as simple as that. Foy properly distinguishes between the old Greek vocal sounds and the modern Greek and refers to the development of Latin into the several Romance languages. There is this difference in the Greek, however, that it has only

one modern representative (with dialectical variations) of the ancient tongue. One must not make the mistake of comparing the pronunciation of the modern Greek vernacular with the probable pronunciation of the literary Attic of the fifth century B.C. Then, as now, there was the literary and the vernacular pronunciation. The changes in pronunciation that have come in the modern Greek have come through the Byzantine Greek from the κοινή, and thus represent a common stream with many rills. The various dialects have made contributions to the pronunciation of the κοινή and so of the modern Greek. In cultivated Athens at its best there was a closer approximation between the people and the educated classes. “Demosstenes, in his oration περὶ στεφάνου, called Ἀeschines a μισθωτόν, but had accented the word erroneously, namely, μισθωτόν, whereupon the audience corrected him by crying μισθωτόν.”

Like the modern Italian, the ancient Greek had a musical cadence that set it above all other European tongues. We can indeed appeal to the old Greek inscriptions for the popular pronunciation on many points. According to this evidence in the first century B.C. in Attica αι=ει, η=ι, υ=ι, υι=υ, οι=ι, β=ν (English v). Clearly then in the κοινή the process of itacism was already at work before the N. T. was written. What was true of the κοινή vernacular then does not of course argue conclusively for the pronunciation of cultivated Athenians in the time of Socrates. In versatile Athens “a stranger, if introduced on the stage, is always represented as talking the language or dialect of the people to which he belongs.” Blass indeed thinks that in Tarsus the school-teacher taught Paul Atticistic Greek! “Ἴσεμεν, Ἰστε, Ἰσασιν, he must have said, are the true forms which you must employ if you care to be considered a cultivated speaker or writer.” Yet in Paul’s Epistles he constantly has ὀδαµεν, –ατε, –ασιν. The Atticistic pronunciation was no more successful than the Atticistic spelling, forms and syntax. We may be sure of one thing, the pronunciation of the vernacular κοινή was not exactly like the ancient literary Attic nor precisely like the modern Greek vernacular, but veering more towards the latter. In Greek as in English the

pronunciation has perhaps varied more than the spelling. Giles\(^1\) observes that English pronunciation “is really a stumbling-block in tracing the history of the English language.” Hadley\(^2\) has a very able and sane discussion of this matter of changes in Greek pronunciation. He insists on change all through the centuries (p. 139), which is the only rational position. If we turn to the earliest N. T. MSS. we shall find undoubtedly traces of this process of change from the old Attic toward the Byzantine or modern Greek pronunciation. Indeed in the fourth and fifth centuries A.D.,\(^3\) the date of the earliest uncials, the process is pretty well complete. The N. T. scribes make no hesitation in writing \(\alpha\) or \(\varepsilon\); \(\alpha\), \(\eta\), \(\varepsilon\); \(\alpha\) or \(\upsilon\) according to convenience or individual taste.\(^4\) Blass,\(^5\) contrary to his former view about Tarsus, says that it is impossible to suppose that there was anybody in the schools at Tarsus who would have taught Paul the correct historical spelling or pronunciation. To the student of the \(\kappa\omicron\nu\eta\) as to us, in a sense “the Greek \(\gamma\rho\alpha\mu\mu\alpha\) were dead symbols, from which must be recovered the living sounds.”\(^6\) Of one thing we may be sure, and it is that other dialects besides the Attic contributed to the \(\kappa\omicron\nu\eta\) pronunciation. The \(\kappa\omicron\nu\eta\) would be dialect-coloured here and there in its pronunciation. Alexander’s conquest, like the railroad and the steamship of the present day, levelled the dialectical variations in many points, whereas before every valley in Greece had its own pronunciation of certain words.\(^7\) One taught the \(\kappa\omicron\nu\eta\) in a Doric environment [Page 240] would show it somewhat. As a matter of fact the Bœotian dialect contributed largely to the \(\kappa\omicron\nu\eta\) vernacular pronunciation (and so the modern Greek) in points where the Bœotian differed radically from the old Attic.\(^1\) Bœotian Greek “modified its vowel-system more than any other Greek dialect.”\(^2\) Thus already in Bœotian we find both \(\alpha\alpha\) and \(\alpha\epsilon\) in the earliest inscriptions and finally \(\eta\). So in Bœotian \(\eta\) became\(^3\) \(\epsilon\) in sound, as \(\epsilon\nu\delta\epsilon\iota\nu\epsilon\tau\iota\alpha\nu\eta\iota\). The early Greek generally, as already shown, made no distinction in sign between \(\sigma\) and \(\omega\), and \(\eta\) was a slow development from \(\epsilon\). The Ionic dialect never took kindly to the rough breathing and greatly influenced the \(\kappa\omicron\nu\eta\) and so the modern Greek. By the Christian era \(\beta\) is beginning to be pronounced as \(\nu\), as the transliteration of Latin words like \(\beta\epsilon\gamma\phi\lambda\iota\alpha\varsigma\) shows. \(\zeta\) is no longer \(\delta\varsigma\), but \(\varsigma\), though \(\delta\) seems still usually \(d\), not \(th\). Who is right, therefore, the “Erasmians” or the Reuchlinians?

---

1 Man. of Comp. Philol., p. 103. Cf. also Ellis, Early Eng. Pronun.
3 Hatzidakis, Einl. etc.
4 Cf. Moulton, Prol., p. 34 f.
5 Blass, Gr. of N. T. Gk., p. 6 f.
6 Nicklin, Cl. Rev., Mar., 1906, p. 116. This is precisely the objection that Jannaris (Hist. Gk. Gr., p. 33) brings against the ancient grammarians as “post-Christian scribes” and unable to “speak with authority of the pronunciation of classical Greek.”
1 Cf. Riem. and Goelzer, Phonét., p. 41.
2 Giles, Man. of Comp. Philol., p. 540.
3 Riem. and Goelzer, Phonét., pp. 41, 46. Thumb (Hellen., p. 228) warns us against overemphasis of the Bœotian influence.
Jannaris\textsuperscript{4} sums up in favour of the Reuchlinians, while according to Riemann and Goelzer\textsuperscript{5} the “Erasmians” are wholly right. As a matter of fact neither side is wholly right. In speaking of ancient Greek one must recognise other dialects than the literary Attic of the fifth century B.C. If you ask for the pronunciation of the vernacular κοινὴ of the first century A.D., that will be found as a whole neither in the literary Attic alone nor in the N. T. MSS. of the fifth century A.D. The papyri and the inscriptions of the time throw light on a good many points, though not on all. But even here the illiterate papyri do not furnish a safe standard for the vernacular of a man like Paul or Luke. It is small wonder therefore that N. T. MSS. show much confusion between – σει (future indicative) and σῇ (aorist subjunctive), – ομεν (indicative) and – ομεν (subjunctive), – οθαι (infinitive) and – οθε (indicative middle), etc. It is possibly as well to go on pronouncing the N. T. Greek according to the literary Attic, since we cannot reproduce a clear picture of the actual vernacular κοινὴ pronunciation, only we must understand frankly that this \textbf{[Page 241]} is not the way it was done. On the other hand the modern Greek method misses it by excess, as the literary Attic does by default. There was, of course, no Jewish pronunciation of the κοινὴ. The Coptic shows the current pronunciation in many ways and probably influenced the pronunciation of the κοινὴ in Egypt. Cf. a German’s pronunciation of English.

\textbf{VII. Punctuation.} In the spoken language the division of words is made by the voice, pauses, emphasis, tone, gesture, but it is difficult to reproduce all this on the page for the eye. Many questions arise for the editor of the Greek N. T. that are not easy of solution. Caspar René Gregory insists that whenever N. T. MSS. have punctuation of any kind, it must be duly weighed, since it represents the reading given to the passage.

\textit{(a) The Paragraph.} As early as Aristotle’s time the paragraph (παράγραφος) was known. A dividing horizontal stroke was written between the lines marking the end of a paragraph. Some other marks like (διπλῆ) or (κορωνίς) were used, or a slight break in the line made by a blank space. Then again the first letter of the line was written larger than the others or even made to project out farther than the rest.\textsuperscript{1} The paragraph was to the ancients the most important item in punctuation, and we owe a debt to the N. T. revisers for restoring it to the English N. T. Cf. Lightfoot, Trench, Ellicott, \textit{The Revision of the N. T.}, 1873, p. xlvi. Euthalius (A.D. 458) prepared an edition of the Greek N. T. with chapters (κεφάλαια), but long before him Clement of Alexandria spoke of περικοπαί and Tertullian of \textit{capitula}. These “chapters” were later called also τίτλοι.\textsuperscript{2} The στίχος of Euthalius was a line of set length with no regard to

\textsuperscript{4} Hist. Gk. Gr., p. 31. “The pronunciation of ancient Gk. in the manner of the present Greeks had been traditionally accepted at all times, before and through the Middle Ages, as a matter of unquestioned fact.”

\textsuperscript{5} Phonét., p. 56. “En résumé, la prononciation grecque ancienne était, sur presque tous les points, différente de la prononciation moderne.”

\textsuperscript{1} On the paragraph see Thompson, Handb. of Gk. and Lat. Palæog., pp. 67 ff. Occasionally the double point (:) was used to close a paragraph.

\textsuperscript{2} Cf. Warfield, Text. Crit. of N. T., pp. 40 ff.
the sense, like our printer’s ems. W. H. have made careful use of the paragraph in their Greek N. T. The larger sections are marked off by spaces and the larger paragraphs are broken into smaller sub-paragraphs (after the French method) by smaller spaces. Another division is made by W. H. in the use of the capital letter at the beginning of an important sentence, while the other sentences, though after a period, begin with a small letter. This is a wholly arbitrary method, but it helps one better to understand W. H.’s interpretation of the text.

W. H. have also printed in metrical form passages metrical in rhythm like the Magnificat of Mary (Lu. 1:46–55), the fragment of a hymn in 1 Tim. 3:16, etc., while Lu. 2:14 and the non-metrical hymns in Revelation are merely printed in narrower columns. The Hebrew parallelism of O. T. quotations is indicated also.

(b) Sentences. The oldest inscriptions and papyri show few signs of punctuation between sentences or clauses in a sentence, though punctuation by points does appear on some of the ancient inscriptions. In the Artemisia papyrus the double point (:) occasionally ends the sentence. It was Aristophanes of Byzantium (260 B.C.) who is credited with inventing a more regular system of sentence punctuation which was further developed by the Alexandrian grammarians. As a rule all the sentences, like the words, ran into one another in an unbroken line (scriptura continua), but finally three stops were provided for the sentence by the use of the full point. The point at the top of the line (‘στιγµὴ τελεῖα, ‘high point’) was a full stop; that on the line (.) (ὑποστιγµή) was equal to our semicolon, while a middle point (στιγµὴ μέση) was equivalent to our comma. But gradually changes came over these stops till the top point was equal to our colon, the bottom point became the full stop, the middle point vanished, and about the ninth century A.D. the comma (,) took its place. About this time also the question-mark (;) or ἐρωτηµατικόν appeared. These marks differed from the στίχοι in that they concerned the sense of the sentence. Some of the oldest N. T. MSS. show these marks to some extent. B has the higher point as a period, the lower point for a shorter pause. But still we cannot tell how much, if any, use the N. T. writers themselves made of punctuation points. We may be sure that they did not use the exclamation point, the dash, quotation-marks, the parenthesis, etc. Parenthetical clauses were certainly used, which will be discussed elsewhere, though no signs were used for this structure by the ancient Greeks. W. H. represent the parenthesis either by the comma (Ro. 1:13) or the dash with comma (1 Tim. 2:7). Instead of quotation-marks W. H. begin the quotation with a capital letter with no punctuation before it, as in Jo. 12:19, 21. One way of expressing a quotation was by τό, as in Ro. 13:9. In the case of O. T. quotations the Scripture is put in uncial type (Jo. 12:13). The period (περίοδος) gives very little trouble to the modern editor, for it is obviously
necessary for modern needs. Here the editor has to make his interpretation sometimes when it is doubtful, as W. H. give ἐν. ὅ γέγονεν ἐν, not ἐν ὅ γέγονεν. ἐν (Jo. 1:4). So W. H. read θαυμάζετε. διὰ τοῦτο Μωϋσῆς in Jo. 7:22, not θαυμάζετε διὰ τοῦτο. Μωϋσῆς, etc. The colon (κώλον), 1 ‘limb of the sentence’ formed a complete clause. See Jo. 3:31 for example of use of colon made by W. H. The comma (κόμμα) is the most common division of the sentence and is often necessary, as with the vocative. So Διδάσκαλε, τί ποιήσω μεν; (Lu. 3:12) and many common examples. In general W. H. use the comma only where it is necessary to make clear an otherwise ambiguous clause, whether it be a participial (Col. 2:2) or conjunctional phrase (Col. 1:23), or appositive (Col. 1:18), or relative (Col. 2:3). The first chapter of Colossians has a rather unusual number of colons (2, 6, 14, 16, 18, 20, 27, 28) as Paul struggles with several long sentences, not to mention the dashes (21, 22, 26). The Germans use the comma too freely with the Greek for our English ideas, leaving out the Greek! Even Winer defended the comma after καρπόν in Jo. 15:2 and ὁ νικῶν in Rev. 3:12, not to mention Griesbach’s “excessive” use of the comma, Winer himself being judge. 2 My friend, Rev. S. M. Provence, D.D. (Victoria, Tex.), suggests a full stop before μαθόν in Ac. 23:27 f. That would help the character of Claudius Lysias on the point of veracity.

(c) WORDS. The continuous writing of words without any space between them was not quite universal, though nearly so. 3 The oldest Attic inscription (Dipylon vase, probably eighth century B.C.) is written from right to left. With the common method it was not always easy for the practised eye to distinguish between words. Hence there arose the διαστολή or ὑποδιαστολή, a comma used to distinguish between ambiguous words, as ὁ, τί, not ὅ τι. But W. H. make no use of this mark, not even in ὅ τι to distinguish it from the conjunction ὅτι. They print uniformly ὅτι (Lu. 10:35; Jo. 2:5; 14:13; 1 Cor. 16:2, etc.), not to mention [Page 244] doubtful cases like those in Mk. 9:11, 28; Jo. 8:25; 2 Cor. 3:14. 1 As to the marks of diaeresis reference may be had to the discussion of diphthongs and diæresis in this chapter under ii (i). W. H., like other modern editors, use the apostrophe (’) (or smooth breathing) to represent elision, as ἄπραγε (Mt. 24:21). 2 The coronis is the smooth breathing used also to show when crasis has taken place, as in κῆμοι (Lu. 1:3). 3 The hyphen, a long straight line, was used in the Harris-Homer MS. to connect compound words, but it is not in the N. T. 4 The editors vary much in the way such words as ἀλλά γε, ἵνα τί, τοῦτ έστιν, etc., are printed. The MSS. give no help at all, for τοῦτ ο δέ έστιν in Ro. 1:12 is not conclusive against τοῦτ έστιν elsewhere. 5 W. H. prefer ἄλλα γε (Lu. 24:21; 1 Cor. 9:2), ἄρα γε

1 Thompson, Handb., etc., p. 81. So Suidas. The colon is the main semi-division of the sentence, but mod. Eng. makes less use of all marks save the period and comma. 2 W.-M., pp. 63, 67. 3 Thompson, Handb., etc., p. 67. 1 W.-Sch., p. 35. 2 See this ch. ii (k) for discussion of elision. For origin and early use of the apostrophe see Thompson, Handb., etc., p. 73. 3 See this ch. ii (l) for discussion of crasis. Cf. Jannaris, Hist. Gk. Gr., p. 88. 4 Thompson, Handb., etc., p. 72. 5 Blass, Gr. of N. T. Gk., p. 14. For the usage of Tisch. in the union and the separation of particles see Gregory, Prol., pp. 109–111. In most cases Tisch. ran the particles together as one word.
(Ac. 8:30), διά γε (Lu. 11:8; 18:5), εἴ γε (2 Cor. 5:3, etc.), καί γε (Ac. 2:18; 17:27), δε γε (Ro. 8:32), διά παντός (Mk. 5:5, etc.), διά τι Mt. 9:11, etc.), Ἰνα τι (Mt. 9:4, etc.), εἴ πως (Ac. 27:12), μή ποτε (everywhere save in Mt. 25:9 where μήποτε), μή που (Ac. 27:29), μή πος (1 Cor. 9:27, etc.), μή τις (1 Cor. 16:11, etc.). So also δῆλον ὅτι in 1 Cor. 15:27, δστις οὖν (Mt. 18:4). But on the other hand W. H. print διότι as well as εἴτε, οὔτε, μήτε, ὡστε, καίπερ, μήποτε, μηδέποτε, οὐδέποτε, μηκέτι, οὐκέτι, μήπο, οὔπω, μήτυτε, επω, ἦποτε (once), ἦδέπω, ἦκέτι, ἤκετι, ἤκετι, ἤπω, ἤπω, ἦτις (Mt. 6:1), καθά, καθό, καθώς, καθάπερ, καθότι, καθόλου, ὥσπερ, ὡςεῖ, ὥσπερεί (1 Cor. 15:8), etc. But W. H. give us καθ ᾐς in Ro. 12:5, ἀνδὲ μέσον in Mt. 13:25, etc.; κατὰ μόνας in Mk. 4:10, καθ ὅσον in Heb. 3:3. Adverbs like ἐπέκεινα (Ac. 7:43), ὑπερέκεια (2 Cor. 10:16), παρεκτός (2 Cor. 11:28) are, of course, printed as one word. W. H. properly have ὑπερ ἔγω (2 Cor. 11:23), not ὑπερέγω. In Ac. 27:33 τεσσαρεσκαίδεκατος is one word, but W. H. have Ἱερὰ Πόλις in Col. 4:13 and Νέα πόλις in Ac. 16:11. It must be confessed that no very clear principles in this matter can be set forth, and the effort of Winer-Schmiedel6 at minute analysis does not throw much light on the subject.

(d) The Editor’s Prerogative. Where there is so much confusion, what is the editor’s prerogative? Blass7 boldly advances [Page 245] the German idea: “The most correct principle appears to be to punctuate wherever a pause is necessary for reading correctly.” But Winer1 shrinks from this profusion of punctuation-marks by the editors, which “often intruded on the text their own interpretation of it.” The editor indeed has to interpret the text with his punctuation, but certainly good taste demands that the minimum, not the maximum, of punctuation-marks be the rule. They must of necessity decide “a multitude of subtle and difficult points of interpretation.”2 Hort indeed aimed at “the greatest simplicity compatible with clearness,” and this obviously should be the goal in the Greek N. T. But the editor’s punctuation may be a hindrance to the student instead of a help. It is the privilege of each N. T. student to make his own punctuation.

[Page 246] Chapter VII

The Declensions (Κλίσεις)

Space will not be taken for the inflection of the nouns and pronouns, for the student of this grammar may be assumed to know the normal Attic inflections. Aristotle1 used the term “inflection” (πτώσις) of noun and verb and even adverb, but practically inflection is applied to nouns and conjugation (κλίσις ῥημάτων=συζυγία) to verbs. Noun (ὄνομα) does, of course, include both substantive and adjective without entering the psychological realm and affirming the connection between name and thing (cf. Plato’s Cratylus).

6 P. 35.
7 Gr. of N. T. Gk., p. 17. Left out by Debrunner.
1 W.-M., p. 63.
2 Hort, Intr. to Gk. N. T., p. 318.
1 Donaldson, New Crat., p. 421. It is in the accidence that the practical identity of N. T. Gk. with the popular κοινή is best seen, here and in the lexical point of view (Deissmann, Exp., Nov., 1907, p. 434).
I. THE SUBSTANTIVE (TO ὌΝΟΜΑ)

The Substantive (τὸ ὄνομα) is either concrete (σῶμα) or abstract (πρᾶγμα), ordinary appellative (ὄνομα προσηγορικόν) or proper (ὄνομα κύριον).

1. History of the Declensions. It is only since the seventeenth century A.D. that modern grammarians distinguish for convenience three declensions in Greek. The older grammars had ten or more.² In the modern Greek vernacular the first and third declensions have been largely fused into one, using the singular of the first and the plural of the third.³ Thumb (Handbook, pp. 43 ff.) divides the declension of substantives in modern Greek vernacular according to gender simply (masculine, feminine, neuter). This is the simplest way out of the confusion. In Sanskrit five declensions are usually given as in Latin, but Whitney⁴ says: “There is nothing absolute in this arrangement; it is merely believed to be open to as few objections as any other.” Evidently [Page 247] therefore the ancient Greeks did not have the benefit of our modern theories and rules, but inflected the substantives according to principles not now known to us. The various dialects exercised great freedom also and exhibited independent development at many points, not to mention the changes in time in each dialect. The threefold division is purely a convenience, but with this justification: the first has ἄ stems, the second ὦ stems, the third consonant and close vowel (ι, υ) stems. There are some differences in the suffixes also, the third declension having always the genitive ending in –ος. In the third declension especially it is not possible to give a type to which all the words in all the cases and numbers conform. Besides, the same word may experience variations. Much freedom is to be recognized in the whole matter of the declensions within certain wide limits. See metaplasm or the fluctuation between the several declensions.

2. The Number of the Cases (πτῶσεις). The meaning and use of the cases will have a special chapter in Syntax (ch. XI).

(a) The History of the Forms of the Cases. This is called for before the declensions are discussed. The term “case” (πτῶσις, casus) is considered a “falling,” because the nominative is regarded as the upright case (πτῶσις ὄρθη, εὐθεῖα), though as a matter of fact the accusative is probably older than the nominative (πτῶσις ὄνομαστική or ὄρθη). The other cases are called oblique (πλάγιαι) as deviations from the nominative. In simple truth the vocative (κλητική or προσηγορευτική) has no inflection and is not properly a case in its logical relations. It is usually the noun-stem

———, Language and the Study of Language (1867).
———, Life and Growth of Language (1875).
⁴ Sans. Gr., p. 111.
or like the nominative in form. There are only three other case-endings preserved in
the Greek, and the grammars usually term them accusative (πτῶσις ἀντικτική),
genitive (πτῶσις γενική) and dative (πτῶσις δοτική). There is no dispute as to the
integrity of the accusative case, the earliest, most common of all the oblique cases and
the most persistent. In the breakdown of the other cases the accusative and the
prepositions reap the benefit. In truth the other oblique cases are variations from the
normal accusative. But this subject is complicated with the genitive and the dative. It
is now a commonplace in comparative philology that the Greek genitive has taken
over the function of the ablative (ἀφαιρετική) also. In the singular the Sanskrit had
already the same [Page 248] ending (-as) for genitive and ablative, while in the plural
the Sanskrit ablative had the same form as the dative (bhyas; cf. Latin ibus). Thus in
the Sanskrit the ablative has no distinctive endings save in the singular of a stems like
kamāt (‘love’) where the ablative ending -t (d) is preserved. In Latin, as we know, the
ablative, dative, locative and instrumental have the same endings in the plural. The
Latin ablative singular is partly ablative, partly locative, partly instrumental. Some old
Latin inscriptions show the d, as bened, in altod marid, etc. In Greek the ablative
forms merged with the genitive as in the Sanskrit singular, but not because of any
inherent “internal connection between them, as from accidents affecting the outward
forms of inflection.”1 The Greek did not allow τ or δ to stand at the end of a word. So
the Greek has πρός (not πρότ for προτί). Καλῶς may be (but see Brugmann2) the

1 Mod. Gk. vernac. has only three cases (nom., gen. and acc.) and these are not
always formally differentiated from each other. The mod. Gk. has thus carried the

1 Hadley, Ess. Philol. and Crit., Gk. Gen. or Abl., p. 52. Cf. also Miles, Comp. Synt.
of Gk. and Lat., 1893, p. xvii. This blending of the cases in Gk. is the result of “partial
confusion” “between the genitive and the ablative between the dative and the locative,
between the locative and the instrumental” (Audoin, La Décl. dans les Lang. Indo-
Europ., 1898, p. 248). In general on the subject of the history of the eight cases in Gk.

Brugmann

BRUGMANN, K., Elements of Comparative Grammar of the Indo-Germanic Languages
(translation by Wright, 1895).

———, Griechische Grammatik. 3. Aufl. (1900), the ed. quoted. Vierte vermehrte
Aufl. of A. Thumb (1913).

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).
ablative καλῶς and so all adverbs in –ως. The meaning of the two cases remained distinct in the Greek as in the Sanskrit. It is not possible to derive the ablative (source or separation) idea from the genitive (or γένος) idea nor vice versa. The Greek dative (δότική) is even more complicated. “The Greek dative, it is well known, both in singular and plural, has the form of a locative case, denoting the place where or in which; but, as actually used, it combines, with the meaning of a locative, those of the dative and instrumental.”5 This is only true of some datives. There are true datives like ὕδως, χύρως. The Indo-Germanic stock, as shown by the Sanskrit, had originally three separate sets of endings for these cases. [Page 249] The Greek plural uses for all three cases either “the locative in –ως or the instrumental forms in –αις.”6 “The forms in –ας, Latin -is, from -ā stems, are a new formation on the analogy of ὁνεος from -ο stems.”2 Ἀθηναίοι is locative plural. In the singular of consonant, τ and ν stems, the locative ending –ι is used for all three cases in Greek, as νοκτι. In the α declension the dative ending –αι is the same as locative ιαί. The form –αι contracts with the stem-vowel α into ι or ια. A few examples of the locative –ι here survive, as in πάλια, Ὀλυμπία, Θηβαι-γενής.3 Χαμαῖ may be either dative or locative. In the o declension also the dative ending –αι is the usual form, contracting with the o into ο. But there are few distinct locative endings survive, like έξι, Ίσθμοι, οίκοι (cf. οίκωρ), πόι, etc. The Homeric infinitive δόμεν and the infinitive like φέρειν are probably locatives also without the i, while the infinitives in –αι (δόμεναι, δοῦναι, λευκέναι, λύσθαι, λύσαι, etc.) are datives.4 The instrumental has left little of its original form on the Greek singular. The usual Sanskrit form is ὁ. Cf. in Greek such words as ἄμα, ἕνεκο, ἤνα, μετά, παρά, πεδά, possibly the Doric κρυφα, Lesbian ἄλλα. Brugmann5 thinks the Laconic πι-ποκα = Attic πι-ποτε is instrumental like the Gothic ḡ(English wh). Cf. the in “the more the better,” etc. Another Greek suffix –φι (Indo-Germanic, bhi) is found in Homer, as βήφι, θεόφι (plural). But this –φι was used also for ablative or locative, and even genitive or dative. It is clear therefore that in Greek the usual seven (eight with the vocative) Indo-Germanic cases are present, though in a badly mutilated condition as to form. The ideas, of course, expressed by the cases continued to be expressed by the blended forms. In actual intelligent treatment it is simpler to preserve the seven case-names as will be seen later.

2 Brugmann (Griech. Gr., 1900, p. 225), who considers the ζ in οὐτος, κτλ., due to analogy merely, like the ζ in ἔγγος-ζ, κτλ. But he sees an abl. idea in ἕκ-τος. Cf. also οὐφανό-θε like coeli-tus.

4 Giles, Man. of Comp. Philol., p. 278 f.
(b) THE BLENDING OF CASE-ENDINGS. This is a marked peculiarity of the Indo-Germanic tongues. Neuter nouns illustrate [Page 250] the same tendency, not to mention the dual. The analytic process has largely triumphed over the synthetic case-endings. Originally no prepositions were used and all the word-relations were expressed by cases. In modern French, for instance, there are no case-endings at all, but prepositions and the order of the words have to do all that was originally done by the case-forms. In English, outside of the old dative form in pronouns like him, them, etc., the genitive form alone remains. Finnish indeed has fifteen cases and several other of the ruder tongues have many. On the other hand the Coptic had no case-endings, but used particles and prepositions like NTE for genitive, etc. It is indeed possible that all inflectional languages passed once through the isolating and agglutinative stages. English may some day like the Chinese depend entirely on position and tone for the relation of words to each other.

(c) ORIGIN OF CASE SUFFIXES. Giles frankly confesses that comparative philology has nothing to say as to the origin of the case-suffixes. They do not exist apart from the noun-stems. Some of them may be pronominal, others may be positional (postpositions), but it adds nothing to our knowledge to call some of the cases local and others grammatical. They are all grammatical. The ablative and the locative clearly had a local origin. Some cases were used less often than others. Some of the case-forms became identical. Analogy carried on the process. The desire to be more specific than the case-endings led to the use of prepositional adverbs. As these adverbs were used more and more there was “an ever-increasing tendency to find the important part of the meaning in the preposition and not in the case-ending.” In the modern Greek vernacular, as already stated, only three case-forms survive (nominative, genitive, accusative), the dative vanishing like the ablative.

[Page 251] 3. Number (ἀριθμός) in Substantives. The N. T. Greek has lost the dual (δυικός) and uses only the singular (ἐνικός) and the plural (πληθυντικός). The Sanskrit and the Hebrew had the dual, but the Latin had only duo and ambo (and possibly octo and viginti) which had a plural inflection in the oblique cases. Coptic had no plural nor dual save as the plural article distinguished words. English has only the dual twain, but we now say twins. The scholars do not agree as to the origin of the dual. Moulton inclines to the idea that it arose “in prehistoric days when men could

6 Moulton
not count beyond two.” It is more likely that it is due to the desire to emphasize pairs, as hands, eyes, etc., not to accept “Du Ponceau’s jest that it must have been invented for lovers and married people.”  

In the oldest Indo-Germanic languages the luxury of the dual is vanishing, but Moulton considers its use in the Attic as a revival. It never won a foothold in the Æolic and the New Ionic, and its use in the Attic was limited and not consistent. The dual is nearly gone in the late Attic inscriptions, while in the κοινή it is only sporadic and constantly vanishing in the inscriptions and papyri.  

In Pergamum and Pisidia no dual appears in the inscriptions. The only dual form that occurs in the LXX and the N. T. is δύο (not δύω) for all the cases (as genitive in 1 Tim. 5:19), save δυσί(ν) for the dative-locative-instrumental, a plural form found in

Aristotle, Polybius, etc., and called a barbarism by Phrynichus. Only in 4 Macc. 1:28 ἄδυος is found, but ἄδυιν in RV, as in Polybius and the Atticists (Thackeray, p. 187). For examples of δυσί(ν) see Mt. 6:24=Lu. 16:13; Ac. 21:33; Heb. 10:28, etc. In the papyri, however, ὁ, ὀ, ὀ, ὀ, ὂ, ὂ occasionally appear along with δυσί(ν). In the modern Greek the dual is no longer used. Ἀμφοτέροι has vanished in the N. T. while ἄμφοτέροι occurs fourteen times (Mt. 9:17, etc.), [Page 252] once (Ac. 19:16) apparently in the sense of more than two, like the occasional use of the English “both” and the Byzantine use of ἄμφοτέροι and “two clear examples of it in NP 67 and 69 (iv/A.D.).” Once for all then it may be remarked that in the N. T. both for nouns and verbs the dual is ignored. The dual was rare in the later Ionic and the κοινὴ follows suit (Radermacher, N. T. Gk., p. 184). The syntactical aspects of number are to be discussed later.

4. Gender (γένος) in Substantives. In the long history of the Greek language gender has been wonderfully persistent and has suffered little variation. It is probably due to the natural difference of sex that grammatical gender arose. The idea of sense gender continued, but was supplemented by the use of endings for the distinction of gender. This personification of inanimate objects was probably due to the poetic imagination of early peoples, but it persists in modern European tongues, though French has dropped the neuter (cf. the Hebrew) and modern English (like the Persian and Chinese) has no grammatical gender save in the third personal pronoun (he, she, it) and the relative.

γένος, Latin and Greek all gave close attention to gender and developed rules that are difficult to apply, with many inconsistencies and absurdities. In Greek ἡλιος is masculine and σελήνη feminine, while in German we have die Sonne and der Mond. Perhaps we had better be grateful that the Greek did not develop gender in the verb like the Hebrew

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).

1 Moulton, Prol., p. 80.
5 Giles, Man. of Comp. Philol., pp. 64, 259.
verb. Moulton⁶ thinks it “exceedingly strange” that English should be almost alone in shaking off “this outworn excrescence on language.” The N. T., like Homer and the modern Greek, preserves the masculine (ἀρσενικόν), feminine (θηλυκόν) and neuter (οὐδέτερον). Some words indeed have common (κοινόν) sex, like ὁ ἡ παῖς, δύος, θεός, while others, applied to each sex, are called epicene (ἐπίκοινον), like ἡ ἀλόπηξ, ἄρκτος. In German we actually have das Weib (‘wife’).

(a) Variations in Gender. They are not numerous. ἡ ἄβυσσος (χώρα) is a substantive in the LXX (Gen. 1:2, etc.) and the N. T. (Lu. 8:31, etc.), elsewhere so only in Diogenes Laertes. [Page 253] In Mk. 14:3 W. H. and Nestle properly read τὴν ὀλάβαστρον, though the Western and Syrian classes give τὸν ὄλ. after Herodotus, and a few of the late MSS. τὸ ὄλ. In Rev. 8:11 ὁ (not ἡ) ἄριστος is read, though Ν and some cursives omit the article, because the word is a proper name. In Mk. 12:26 all editors have ὁ βάτος (the Attic form according to Moeris), elsewhere ἡ βάτος (Lu. 20:37; Acts 7:35). θεός may be either masculine as in Ac. 19:11 or feminine as in Ac. 19:37, but in Ac. 19:27 we have θεᾶ (Text. Rec. also in 35, 37), an “apparently purposeless variation.”¹ Thieme (Die Inschr. von Magn., p. 10) says that ἡ θεᾶ is used in the inscriptions of Asia Minor in formal religious language. Burnet (Review of Theology and Philosophy, 1906, p. 96) says that in Athens ἡ θεᾶ was used in everyday language, but ἡ θεᾶ in the public prayers, thus taking the Ionic θεᾶ. Cf. Mayser, Gr. d. griech. Papyri (Laut- und Wortlehre, 1906), p. 254 f., for papyri illustrations. Blass² considers Ἡ Ἰερουσαλήμ (Ac. 5:28, etc., the common form in LXX, Luke and Paul) feminine because it is a place-name, and hence he explains πῶς Ἰερουσαλῆμ (Mt. 2:3) rather than by πόλις understood. Ληνός in Rev. 14:19 strangely enough has both masculine and feminine, τὴν ληνόν … τὸν μέγαν but Ν fem. (bis). The feminine is the common construction, but the masculine is found in LXX in Is. 63:2 only. Λίθος is always ὁ in the N. T., even when it means a precious stone (Rev. 5 times),

1 Moulton, Prol., p. 60, but he adds “is explained by inscriptions.” Cf. Nachmanson, Magn. Inschr., p. 126, for many exx.
Thieme THIEME, G., Die Inschr. von Magnesia am Mäander und das N. T. (1906).

2 Gr. of N. T. Gk., p. 32. Cf. Hort, Notes on Orth., p. 160. Mk. and Jo. have only τὸ Ἰερουσαλῆμ and Mt. usually.
where Attic after 385 B.C. had ἦ. Λιμός is masculine in Lu. 4:25 as in the Attic, but is chiefly feminine in Acts and Luke, like the Doric and late Attic, as in Lu. 15:14; Acts 11:28. In Lu. 13:4; Jo. 9:7, 11 we have ὁ Σιλωάς, while Josephus has both ἦ (War, V, 12. 2) and ὁ (War, II, 16. 2). Blass explains the use of ὁ in the Gospels by the participle ἐπέσταλημένος in Jo. 9:7. Στάμνος in Heb. 9:4 is feminine after the Attic instead of the Doric ὁ στ., as in Ex. 16:33. In Rev. 21:18 (21) we read also ὁ ὑαλος rather than ἡ ὑάλος as is customary with [Page 254] precious stones. "Ὑσσωπος (Heb. 9:19; Jo. 19:29) reveals its gender only in the LXX (Lev. 14:6, 51 f.) where it is masc. in BA, fem. in E and 1 (3) Ki. 4:19 BA. The neuter τὸ ὁλας occurs in papyri as early as third century B.C. (Moulton and Milligan, Expositor, 1908, p. 177).

(b) Interpretation of the LXX. In Ro. 11:4 Paul uses τῇ βάαλ rather than the frequent LXX τῷ βάαλ. The feminine is due, according to Burkitt, to the Q ʿהוֹב (אֵלֶךָ). Moulton speaks of ἦ βααλ as occurring “three times in LXX and in Ascensio Isaiae ii. 12.” But ἦ βααλ occurs “everywhere in the prophetic books, Jer., Zeph., Hos., etc.” (Thayer), though not so common in the historical books, far more than the “three times” of Moulton. In Mk. 12:11 and Mt. 21:42 the LXX αὕτη is due to ἠμη, though the translators may have “interpreted their own Greek by recalling κεφαλήν γονίας.” In Gal. 4:25 Paul has not mistakenly used τό with Ἄγαρ, for he is treating the name as a word merely. Any word can be so regarded.

(c) Variations in Gender Due to Heteroclisis and Metaplasm. These will be discussed a little later. Delbrück thinks that originally all the masculine

substantives of the first or α declension were feminine and that all the feminine substantives of the second or ο declension were masculine.

5. The First or α Declension. There was a general tendency towards uniformity in this declension that made it more popular than ever. Here only the N. T. modifications in this general development can be mentioned.

(a) The Doric Genitive-Ablative Singular. This form survives in βορρᾶ (Lu. 13:29; Rev. 21:13) and was common in the Attic after 400 B.C. Note also μαμωνᾶ (Lu. 16:9). It is frequent in the LXX, papyri, inscriptions, though mainly in proper names. These proper names in –ᾱς, chiefly oriental, make the genitive-ablative in –ᾱ or, if unaccented –ᾱς, in ἣ. So Ακύλα and Ἀκύλου in papyri (Deissmann, Bible ———, Introduction to the Study of Language (1882). Einleitung in das Sprachstudium. 4. Aufl. (1904). 5. Aufl. (1913).

———, Syntaktische Forschungen. 5 Bde. (1871–1888).

4 Jannaris, Hist. Gk. Gr., p. 106. Swete, O. T. in Gk., p. 304 f., has some good illustrations and remarks about the declensions in the LXX.

Studies, p. 187), though no gen. in N. T. (only -ας and -αν) ἀγρίππα (Ac. 25:23), Ἀνανία [Page 255] (from –ας, so Thayer), Ἀνα (Lu. 3:2), Ἀντίπας (indeclinable here or mere slip for –α, Rev. 2:13), Ἀφέτα (2 Cor. 11:32), Βαραββᾶ (gen. does not appear, only nom. –άς as Mk. 15:7, and accus. –δὴ as 15:11, etc.), Βαρνάβα (Gal. 2:1; Col. 4:10; see Deissmann, Bible Studies, p. 187), Ἐπαφρᾶ (Col. 1:7), Ἐρμᾶν (Ro. 16:14, Doric accusative), Ζηνᾶν likewise (Tit. 3:13); Ἡλεία (Lu. 1:17) according to ΝΒ (so W. H.); Ἰωύα (person, Lu. 3:33; Mk. 6:3; tribe, Mt. 2:6; Heb. 8:8; land, Lu. 1:39), Ἐλενᾶ (Mt. 12:39), Καιάφα (Lu. 3:2), Ἐλεοῦ (1 Cor. 1:12), Κλωπᾶς (Jo. 19:25), Λουκᾶς (only in nominative, as Col. 4:14, but genitive would be –ας), Ἡρέτα (2 Cor. 11:32), Βαραβάς (gen. does not appear, only nom. –ᾶς as Mk. 15:7, and accus. –ᾶν as 15:11, etc.), Βαρνάβα (Gal. 2:1; Col. 4:10), Χρίστος (1 Cor. 1:16). Nachmanson finds the Doric genitive fairly common with such short proper names and mentions Σηνᾶ in his list.1 Very common in modern Greek, cf. Hatzidakis, Einl., p. 76.

(b) THE ATTIC GENITIVE-ABLATIVE. The usual Attic form for the masculine gen. abl. (ou) is found also as in Αἰνεάς (so Lobeck, Prol. Pathol., p. 487), Ἀνδρέου (Mk. 1:29), Βαραχίου (Mt. 23:35), Εξεκίου (so LXX), Ἡλείου (Lu. 4:25), Ἡσαίου (Mt. 3:3, etc.), Ἱερέου (Mt. 2:17), Ἀρσανίου (Lu. 3:1), Οὐρίου (Mt. 1:6), Ζαχαρίου (Lu. 1:40). These Hebrew proper names ended in Ï, but receive the regular inflection for masculine nouns of the first declension. There are likewise some proper names in –ης with genitive-ablative in –ου. Ἰαννῆς and Ἰαμβρῆς (2 Tim. 3:8) only appear in the N. T. in the nominative. Κρῆσκης (2 Tim. 4:10) and Πούδης (2 Tim. 4:21) belong to the 3d declension. Εὐφράτης (Rev. 9:14; 16:12) has only accusative and dative (instrumental-locative) in the oblique cases in the N. T., though the genitive-ablative form is –ου. Ἡρώδου (Mt. 2:1) and Ἰορδάνου (Mt. 3:5) follow the usual rule like Ἄδον (Mt. 16:18), Ἐπελῆς (Ro. 16:10), Ἐρμῆς (Ro. 16:14), like κοινή (Mt. 5:26) and φελόνης (2 Tim. 4:13), have no oblique case in the N. T. save the accusative (–ην).2 Ἰούκων in W. H. always has genitive-ablative in –ου for the Apostle and in Jo. 1:42; 21:15, 16, 17, for the father of Simon Peter, though Βαριωνᾶ in Mt. 16:17.3 So

Nachmanson

———, Laute und Formen der magnetischen Inschriften (1903).

1 Hatzidakis Hatzidakis, G. N., Einleitung in die neugriechische Grammatik (1892).

2 Cf. W.-Sch., p. 94.

3 Cf. Hort, Notes on Orth., p. 159. See Nachmanson (Magn. Inschr., p. 119) and Schweizer (Perg. Inschr., p. 138 f.) for illustrations of these points from the κοινή
for John Mark (Acts 12:12). [Page 256] Σωσθένης has accusative in –ην (Ac. 18:17) for the first declension and is heteroclite.¹ We have only ξεστῶν in Mk. 7:4. Words like νεανίας have the genitive-ablative in –ου (Ac. 7:58).

(c) Voc. in –ο of masc. nouns in –της in δέσποτα, ἐπιστάτα, καρδιογνώστα, ὑποκριτά. Cf. ἔδη.

(d) Words in –ρα and participles in –υία. These come regularly² to have the genitive-ablative in –ης and the dative-locative-instrumental in –η like the Ionic. Moulton³ indeed thinks that “analogical assimilation,” on the model of forms like δόξα, δόξης, had more to do with this tendency in the κοινή than the Ionic influence. Possibly so, but it seems gratuitous to deny all Ionic influence where it was so easy for it to make itself felt. The “best MSS.”⁴ support the testimony of the papyri and the inscriptions here.⁵ So W. H. read μαχαίρης (Rev. 13:14), πλημμύρης (Lu. 6:48), πρόφης (Ac. 27:30), Ἀπαφείρῃς (Ac. 5:1), σπείρης (Ac. 21:31; 27:1). In Acts B is prone to have –ας, –α as with D in Ac. 5:1, but W. H. do not follow B here. In Ac. 5:2 ἡγείοντες may be compared with ἐπιβεβηκυίης (1 Sam. 25:20), and other examples in the LXX,⁶ but the forms –υίας, –υία still survive in the Ptolemaic period.⁷ The preference of the LXX MSS. and the early papyri for μαχαίρας (–ρα) shows that it is a matter of growth with time. In the early Empire of Rome –ρης forms are well-nigh universal. Cf. Thackeray, Gr., p. 142. On the other hand note the adjective στείρᾳ (Lu. 1:36). Words like ἡμέρα (–ρα) and ἀλήθεια, μῖα (ιδ, εια) preserve the Attic inflection in –ας, –α.⁸

(e) The opposite tendency to (d). We see it in such examples as Λύδδας (Ac. 9:38, but Soden reads –δης with EHLP) and Μάρθας (Jo. 11:1). Moulton⁹ finds the

1 W.-Sch., p. 94.
2 B. S., p. 186.
3 Prol., p. 48; Cl. Rev., 1901, p. 34. where a number of exx. are given like ἀρούρης, καθηκυίης, etc. Cf. Thumb, Hellen., p. 69. Cf. Helbing, Gr. d. Sept., pp. 31–33, and Thack., Gr., p. 140 f., for similar phenomena in the LXX.
4 Hort, Notes on Orth., p. 156.
5 Deissmann, B. S., p. 186.
7 Moulton, Prol., p. 48.
8 Cf. Blass, Gr. of N. T. Gk., p. 25.
Egyptian papyri giving Ταµµόσθας as genitive. Θάρµα is given by Lobeck, though not in N. T. (genitive –ης, Ac. 28:3), and note πρόµα in Ac. 27:41. [Page 257] Moulton¹ suggests that Νύµφαν (Col. 4:15 according to the correct text) is not due to a Doric Νύµφαν, but by a “reverse analogy process” the genitive Νύµφης produced the short nominative Νύµφα like δόξα, δόξης. Blass² calls χρυσάν (Rev. 1:13) “a gross blunder, wrongly formed on the model of χρυσάς 1:12,” but Moulton³ holds that we have “abundant parallels.”

(f) DOUBLE DECLENSION. This phenomenon appears in the case of Νέαν Πόλεων (Ac. 16:11) and Ἱερᾶς Πόλεως (Col. 4:13), the adjective as well as the substantive being treated separately in the first and third declensions.

(g) ΗETERΟΚΛΙΣΗ (ἙΤΕΡΟΚΛΙΣΙΣ) AND METAPLASM (ΜΕΤΑΠΛΑΣΜΟΣ). Blass⁴ makes no distinction in his treatment of heteroclisis and metaplasm, though the distinction is observed in Winer-Schmiedel.⁵ For practical use one may ignore the distinction and call all the examples metaplasm with Blass or heteroclisis with Moulton.⁶ The fluctuation is rare for the first declension in the N. T. In Ac. 28:8 editors properly read δυσεντέριον rather than δυσεντερία (supported only by a few cursives). The form θεά (Ac. 19:27) and the usual Attic ἡ θεός (Ac. 19:37) are both found. This variation between the first and the second declensions is well illustrated by Γοµόρρας (2 Pet. 2:6) and Γοµόρρων (Mt. 10:15; –οις, Mk. 6:11 Rec.), Λύστραν (Ac. 14:6) and Λύστροις (Ac. 14:8). Moulton⁷ finds abundant parallel in the Egyptian papyri use of place-names. In Rev. 1:11 ABC and some cursives read Θυάτειραν instead of the usual Θυάτειρα. So in Ac. 27:5 some of the MSS. read Μύρραν instead of Μύρρα as accus., a reading confirmed by Ramsay,⁸ who found the accus. in –αν and the gen. in –ων. Moulton⁹ cites Ἡ Ιεροσόλυμα from two MSS. of xi/A.D. (Usener, Pelagia, p. 50).

The chief variation between the first and second declensions appears in the compounds in –αρχης and (Attic) –αρχος. Moulton¹⁰ finds examples of it passim in the papyri and calls the minute work of Winer-Schmiedel “conscientious labour wasted thereon.” But Hort¹¹ does not think these variations in good MSS. “wholly

11 Notes on Orth., p. 156.
irregular." In the N. T. forms in –αρχης, like most of the dialects and the κοινή, are greatly in the majority.1 Thus in the N. T. we have ἀσιάρχης (Ac. 19:31; not in nom. in N. T.), ἑθνάρχης (2 Cor. 11:32), πατριάρχης (Heb. 7:4), πολιτάρχης (Ac. 17:6, 8), τετραάρχης (Lu. 3:19), but always χιλίαρχος. In the addition of the β text to Ac. 28:16 the MSS. divide between στρατοπέδαρχος (HLP) and –άρχης (cursives). Ἑκατόναρχος is the nominative in Mt. (8:5, 8; 27:54), and the accusative in –γον is found once in Acts (22:25). Elsewhere in all cases in Matthew, Luke and Acts the form in –χης is read by the best MSS. (as Ac. 10:1).

The first and the third declensions show variation in δίψος (old form δίψα) in 2 Cor. 11:27, where indeed B has δίψη instead of δίψει. Νίκη (the old form) survives in 1 Jo. 5:4, but elsewhere the late form νίκος prevails (as 1 Cor. 15:54 f.). The LXX likewise shows τό δίψος, τό νίκος interchangeably with the ἦ forms. Helbing, Gr. d. Sept., p. 49; Thackeray, Gr., p. 157. The dative Ἰωάνει (third declension) instead of Ἰωάνῃ (first declension) is accepted a few times by W. H. (Mt. 11:4; Lu. 7:18; Rev. 1:1). Σαλαµίνη (first declension) for Σαλαµίνι (third declension) in Ac. 13:5, Hort2 considers only Alexandrian.

The third declension nouns often in various N. T. MSS. have the accusative singular of consonant stems in –ν in addition to –α, as χάραν in Jo. 20:25 (NAB), 1 Pet. 5:6 (NA). This is after the analogy of the first declension. Other examples are ἄρσαναν in Rev. 12:13 (A), ἁσεβήν in Ro. 4:5 (NDFG), ἁστέραν in Mt. 2:10 (NC), ἁσφαλῆν in Heb. 6:19 (ACD), Δίαν in Ac. 14:12 (DEH), εἰκόναν in Rev. 13:14 (A), μῆναν in Rev. 22:2 (A), σοφῆναν in Rev. 1:13 (A), συγγενήν in Ro. 16:11 (ABD), Ὕγην in Jo. 5:11 (N). Blass3 rejects them all in the N. T., some as “incredible,” though properly recalling the Attic τριήρην, Δηµοσθένην. Moulton4 finds this conformation to the “analogy of first declension nouns” very common in “uneducated papyri, which adequately foreshadows its victory in modern Greek.” The inscriptions1 as well as the papyri have forms like γυναῖκαν, ἄνδραν, etc. It is these accusative forms on which the modern Greek nominative in ἄρχωντας is made (cf. Thumb, Handb., p. 47) and thus blended the first and the third declensions.2 Hort3 will accept none of these readings in the N. T. because of the “irregularity and apparent capriciousness” of the MS. evidence, though he confesses the strength of the

---

2 Notes on Orth., p. 156.
1 Nachm., Magn. Inschr., p. 133.
3 Notes on Orth., p. 158. Kretschmer (Entst. der κοινή, p. 28) finds this acc. in –αν in various dialect inscriptions. Cf. also Reinhold, De Graec. etc., p. 24, for χάρταν, etc.
testimony for ἀσφαλῆν in Heb. 6:19, συγγενῆ in Ro. 16:11, and χεῖραν in Jo. 20:25. These nouns are treated here rather than under the third declension because in this point they invade the precincts of the first. The LXX MSS. exhibit the same phenomena (Ἐξίδιδαν, μονογενῆ, etc.). See Helbing, Gr. d. Sept., p. 50; Thackeray, Gr., p. 147. The opposite tendency, the dropping of ν in the first declension accusative, so common in modern Greek, is appearing in the papyri, as δεξίαν χεῖρα (Völker, Papyrorum Graecorum Syntaxis etc., p. 30 ff.).

(h) INDECLINABLE SUBSTANTIVES. These are sometimes inflected in some of the cases in the first declension. Βηθανιά is accusative in Lu. 19:29, and so indeclinable, like Βηθφαγή, but elsewhere it is inflected regularly in the first declension (so –ίαν Mk. 11:1, etc.) save once or twice in B. Βηθσαιδά has accusative Βηθσαιδάν in Mk. 6:45; 8:22, but it may be only another alternate indeclinable form (Thayer) like Μαγαδάν. So likewise Γολγοθά has accusative in –άν in Mk. 15:22. Hort finds “the variations between Μαρία and the indeclinable Μαριάµ” “singularly intricate and perplexing, except as regards the genitive, which is always –ίας, virtually without variation, and without difference of the persons intended.” It is not necessary to go through all the details save to observe that as a rule the mother of Jesus and the sister of Martha are Μαριάµ, while Mary of Clopas is always Μαρία. Mary Magdalene is now Μαρία, now Μαρία. In the Aramaic as in the Hebrew probably all were called Μαρίαµ. Μαρία is merely the Hellenized form of Μαριάµ. It is probably splitting too fine a hair to see with Hort a special appropriateness in Μαριάµ in Jo. 20:16, 18.

6. The Second or ο Declension. There is no distinctively feminine inflection in the ο declension, though feminine words occur, [Page 260] like Ἡ ὅδος. But the neuter has a separate inflection. Modern Greek preserves very few feminines in –ος. Thumb (Handb., p. 53 f). gives none. The main peculiarities in the N. T. are here noted.

(a) The so-called Attic Second Declension. It is nearly gone. Indeed the Attic inscriptions began to show variations fairly early. The κοινὴ inscriptions show only remains here and there and the papyri tell the same story. Already λαός (as Lu. 1:21) has displaced λέως and ναός (as Lu. 1:21) νεώς, though νεωκόρος survives in Ac. 19:35. Ἀνώγεσθαι likewise is the true text in Mk. 14:15 and Lu. 22:12, not ἄνωγεσθαι nor any of the various modifications in the MSS. In Mt. 3:12 and Lu. 3:17 Ἡ άλων may be used in the sense of Ἡ ἄλως (see Thayer) by metonymy. The papyri show ἄλως (Attic second declension) still frequently (Moulton and Milligan,

Völker

VÖLKER, F., Papyrorum graecorum syntaxis specimen (1900).

———, Syntax d. griech. Papyri. I, Der Artikel (1903).

5 Ib.
1 Jann., Hist. Gk. Gr., p. 111 f.
2 Meisterh., Att. Inschr., p. 127 f.
4 Moulton, Cl. Rev., 1901, p. 34. See also Mayser, Gr. d. griech. Pap., 1906, p. 259 f. For the LXX see Helbing, Gr. d. Sept., p. 38 f., where a few exx. occur.
(b) CONTRACTION. There is little to say here. The adjectives will be treated later.

ophile (Jo. 19:36) has ὀστέα, accus. pl., in the best MSS. in Lu. 24:39 and ὀστέων in Mt. 23:27 and Heb. 11:22. So also ὀστέων in the Western and Syrian addition to Eph. 5:30. ὄρπευ (Rev. 18:2) and ὄρνεα (Rev. 19:21) are without variant. The papyri show this Ionic influence on uncontracted vowels in this very word as well as in various adjectives (Moulton, Cl. Rev., 1901, p. 435). For examples in the LXX (as ὀστέων 2 Ki. 13:21) see Winer-Schmiedel, p. 82, and Helbing, Gr. d. Sept., p. 36; Thackeray, p. 144; Con. and Stock, Sel. fr. LXX, p. 27. Moulton6 considers it remarkable that the N. T. shows no traces of the contraction of κύριος into κύρις and παιδίον into παιδίν, for instance, since the papyri have so many illustrations of this tendency. The inscriptions1 show the same frequency of the –ις, –ιν forms which finally won the day in modern Greek. Cf. Thumb, Handb., p. 61.

(c) THE VOCATIVE. In the o declension it does not always end in ε in the masculine singular. Θεός in ancient Greek is practically always retained in the vocative singular. The N. T. has the same form as in Mk. 15:34 (cf. also Jo. 20:28), but also once θεέ (Mt. 27:46). This usage is found occasionally in the LXX and in the late papyri.2 So also Paul uses Τιμόθεε twice (1 Tim. 1:18; 6:20). Aristophanes had Ἀμφίθεε, Lucian Τιμόθεε, and the inscriptions φιλόθεε.3 Note also the vocative υἱός Δαυείδ (Mt. 1:20) and even in apposition with κύριε (Mt. 15:22). The common use of the article with the nominative form as vocative, chiefly in the third declension, belongs more to syntax. Take as an instance of the second declension μιθος φοβοῦ, το μικρὸν ποίμνιον (Lu. 12:32).

(d) HETEROCLESIS AND METAPLASM. Variations between the first and second declensions have been treated on p. 257. The number of such variations between the second and third declensions is considerable. Νοῦς is no longer in the second declension, but is inflected like βοῶς, viz. νοός (2 Th. 2:2); νοῦ (1 Cor. 14:15, 19). So

---

5 Gr. of N. T. Gk., p. 25. Νεῶς appears in 2 Macc. 6:2, etc. Cl. Rev. Cl. Rev., Classical Review (London).
6 Prol., p. 48 f. He thinks it proof that the N. T. writers were not illiterate, since the pap. examples are in writers “with other indications of illiteracy.” Cf. also Moulton, Cl. Rev., 1901, p. 34.
1 Nachm., Magn. Inschr., p. 125; Schweizer, Perg. Inschr., p. 143. On the origin of these forms see Hatz., Einl., p. 318; Brug., Grundr., ii, § 62 n.; Moulton, Cl. Rev., 1901, p. 34.
2 Moulton, Cl. Rev., 1901, pp. 34, 434.
πλοῦς in Ac. 27:9, not πλοῦς.\(^4\) The most frequent interchange is between forms in –ος, masculine in second declension and neuter in the third. In these examples the N. T. MSS. show frequent fluctuations. Τὸ ἔλεος wholly supplants τὸν ἔλεον (Attic) in the N. T. (as in the LXX), as, for instance, Mt. 9:13; 12:7; 23:23; Tit. 3:5; Heb. 4:16, except in a few MSS. which read ἔλεον. Without variant we have ἔλεους and ἔλεει. On the other hand ζήλος is the usual N. T. form as in the ancient Greek (so ζήλω, Ro. 13:13; 2 Cor. 11:2), but τὸς ζήλος is the true text in 2 Cor. 9:2 and Ph. 3:6. In Ac. 5:17 only B has ζήλους, and all read ζήλου in Acts 13:45. Ἑχος is usually masculine and the second declension, as in Heb. 12:19 (cf. Lu. 4:37; Ac. 2:2), and for the [Page 262] earlier ἢξη according to Moeris and Blass.\(^1\) In Lu. 21:25 W. H. read ἢχος from ἢχω, but Hort\(^2\) admits ἢχους from τὸ ἢχος to be possible, and Nestle reads ἢχους in his sixth edition. In Ac. 3:10 C reads θόμπος instead of θόμπους. In eight instances in Paul (2 Cor. 8:2; Ph. 4:19; Col. 1:27; 2:2; Eph. 1:7, 2:7; 3:8, 16) in the nominative and accusative we have τὸ πλοῦτος, but ὁ πλοῦτος in Gospels, Jas., Heb., Rev. The genitive is always –τοῦ. Τὸ σκότος instead of ὁ σκότος is read everywhere in the N. T. save in the late addition to Heb. 12:18 where σκότω appears, though ζόρῳ is the true text. The form δάκρυσιν (Lu. 7:38, 44) is from δάκρυν, an old word that is found now and then in Attic, but τὸ δάκρυν appears also in Rev. 7:17; 21:4; δάκρυων may belong to either decl. Σάββατον (–τοῦ, –τω) is the form used in the N. T. always, as Mk. 6:2, but σάββατας as Mk. 1:21, etc. B has σαββάτας, like the LXX sometimes, in Mt. 12:1, 12. Κατήγωρ is accepted by W. H. and Nestle in Rev. 12:10 on the authority of A against NBCP, which have the usual κατήγορος. According to Winer-Schmiedel\(^3\) this is not Greek, but a transliteration of the Aramaic קֱטִיגוֹר.

Several words fluctuate between the masculine and the neuter in the second declension. In Lu. 14:16; Rev. 19:9, 17, several MSS. read δεῖνος instead of the usual δεῖνον. Like the old Greek, δεσμὸς has the plural δεσμά in Lu. 8:29; Ac. 16:26; 20:23, but of δεσμοῖ in Ph. 1:13. Before Polybius ζηγόν was more common (Thayer), but in the N. T. it is ζηγός (Mt. 11:30). Ο θεμέλιος is the only form of the nom. sing. in the N. T., as 2 Tim. 2:19 (supply λίθος); Rev. 21:19), but τὸ θεμέλιον (acc.) in Ac. 16:26 like the LXX and the Attic. The plural θεμέλιας we have in Heb. 11:10; Rev. 21:14, 19. Θεμέλιον (acc.) may be either masculine or neuter. In Ro. 11:10 ὁ νῦντος is used in the quotation from the O. T. instead of the older τὸ νῦν. In the early Greek ὁ σῖτος (never τὸ σῖτον) had a plural in σῖτα as well as σῖτον. The same thing is true of

---

\(^4\) Cf. Arrian, Peripl., p. 176. See W.-Sch., p. 84, for similar exx. in the inscr., as ὁ ὤν, ὁ ὄς in late Gk. For pap. exx. of βοῦν, πλοῦν and χοῦν see Mayser, Gr. d. griesch. Pap., pp. 257 f., 268 f.

\(^1\) Gr. of N. T. Gk., p. 28. Cf. LXX MSS., for like variations in τὸ ζῆλος and ὁ ζ., ὁ ἔλεον and τὸ ἔλ.. ὁ ἢξος and τὸ ἢ., ὁ πλοῦτος and τὸ πλειστανία. See Helbing, Gr. d. Sept., p. 47 f. See p. 49 for σάββατα and σαββάτας, δάκρυον and δάκρυσι. Cf. also Thack., Gr., pp. 153 f.

\(^2\) Notes on Orth., p. 158. See W.-Sch., p. 84, for exx. of ἢχους in the LXX. For similar variations in the inscr. see Nachm., Magn. Inschr., p. 135.

\(^3\) P. 85. So also Thayer, the Rabbins’ name for the devil.

\(^4\) Gr. of N. T. Gk., p. 29; Deiss., Light, p. 90; Raderm., Gr., p. 15.
the N. T. MSS. for Ac. 7:12 except that they divide between τὰ σῖτα and τὰ σῖτα, and σῖτα is the correct text. [Page 263] Blass indeed objects that σῖτα does not suit the sense. Στάδιον has σταδίους rather than the Attic στάδια in Lu. 24:13; Jo. 6:19 (W. H. and Nestle, but Tisch. στάδια ND), and is a marginal reading in Rev. 21:16 instead of σταδιων.

(e) THE MIXED DECLENSION. Some substantives with special inflection have this. It is particularly in foreign names in the a and o declensions that this inflection became popular. “The stem ends in a long vowel or diphthong, which receives –ς for nominative and –ν for accusative, remaining unchanged in vocative, genitive, and dative singular. ἰησοῦς is the most conspicuous of many N. T. examples. It plays a large part in modern Greek.” Hence we have ἰησοῦς nominative, ἰησοῦ genitive-ablative, as Mt. 26:6; dative, etc., as Mt. 27:57; vocative Mk. 1:24. Some MSS. of the LXX have dative Ἰησοῦ in Deut. 3:21, etc. The accusative is Ἰησοῦν, as Mt. 26:4. Ἰωσῆ is the genitive of Ἰωσῆς according to the reading of Mt. 27:56 in W. H. Mg. instead of Ἰωσῆφ, but in Mk. 6:3 Ἰωσῆτος is the reading. So runs Λευείς (nominative, Lu. 5:29), Λευεί (genitive, Lu. 3:24), Λευείν (accusative, Lu. 5:27). Dative appears only in the LXX as Gen. 34:30 Λευεί. Μανασσῆς has accusative Μανασσή in Mt. 1:10 and the genitive in –ῆ (Rev. 7:6), but Hort calls attention to the fact that ΝθΒ have Μανασσή instead of the nominative in Mt. 1:10, making the word indeclinable.

(f) PROPER NAMES. Ἰακώβ is indeclinable in Mt. 1:2, but we have Ἰάκωβον in Mt. 4:21. Several proper names have only the plural, as Θυάτειρα (Rev. 2:18, but B –ῃ and ABC –αν, 1:11), Ἰεροσόλυμα (Mt. 2:1, but πᾶσα, 2:3), Θῆλπτοι (Ac. 16:12), Καῦδα (Ac. 27:16), Μῦρα (Ac. 27:5), Πάταρα (Ac. 21:1), Σάρεπτα (Lu. 4:26), Σόδομα (Jude 7). The Latin words µόδιος (Mt. 5:15) and µάκελλον (1 Cor. 10:25) are inflected. So Latin proper names like Ἰουστος (Ac. 18:7) and Παῦλος (Ro. 1:1). For Γοµόρρας and Λύστραν see 5 (g).

7. The Third Declension (consonants and close vowels i and u). The third declension could easily be divided into several and thus we should have the five declensions of the Sanskrit and the Latin. But the usual seven divisions of the third declension have the genitive-ablative singular in –ος (–ως). The consonantal [Page 264] stems show more sweeping changes than the vocalic (sonantic) stems in this declension. Only those changes that are related to the N. T. Greek can be here discussed.

(a) THE NOMINATIVE AS VOCATIVE. There is an increasing use of nominative forms as vocatives. This usage had long existed for nouns that were oxytone or had labial or guttural stems. Elsewhere in general the stem had served as vocative. No

---

2 Moulton, Prol., p. 49.
3 In the LXX proper names have great liberty in inflection. This is quite natural in a transl. Cf. Thack., Gr., pp. 160–171.
1 Jann., Hist. Gk. Gr., p. 121.
notice is here taken of the common use of the article with the nominative form as vocative, like ἡ παῖς (Lu. 8:54), a construction coming under syntactical treatment. According to Winer-Schmiedel the use of the singular without the article belongs also to syntax and the solution of W. H. is called “certainly false.” Hort had suggested that in the case of θυγάτηρ as vocative (Mk. 5:34; Lu. 8:48; Jo. 12:15) and πατήρ (Jo. 17:21, 24, 25) the long vowel (η) was pronounced short. Why not rather suppose that the vocative is like the nominative as in the case of labial and guttural stems? The usage is thus extended sometimes to these liquids. Indeed, in Jo. 17:25 we have πατήρ ὁ διαθέ, the adjective having the vocative form. In Mk. 9:19 (Lu. 9:41) we have ὁ γενόστος καὶ ἀφρόν in Lu. 12:20; 1 Cor. 15:36). See also ὁ πληχής (Ac. 13:10) for –ες, which might be an indeclinable form like the accusative (II, 2 (f)). But these adjectives show that the usage is possible with substantives. There are indeed variant readings in the MSS. above, which have θύγατερ and πάτερ, but in Mt. 9:22 DGL have θυγάτηρ. Note also ἄνερ (1 Cor. 7:16) and γύναι (Lu. 13:12). For peculiarities in nom. see (d).

(b) The Accusative Singular. The theoretical distinction that consonant-stems had the accusative singular in –α and vocalic stems in –ν began to break down very early. From the third century B.C. Jannaris suspects that popular speech began to have all accusative singulars with ν, an overstatement, but still the tendency was that way. The use of ν with words like πόλιν, ναῦς (Ac. 27:41, only time in N. T., elsewhere vernacular πλοῖον), etc., together with the analogy of the first and second declensions, had a positive influence. See p. 258 for discussion of the double accusative ending –α plus ν, like ἄνδραν in the papyri. These forms belong in reality to the third declension, though formed after the analogy of the first, and so were presented when first reached in the discussion. [Page 265] However, there are other consonant-stems which form the accusative in –ν instead of –α. In Tit. 3:9 and Ph. 1:15 we have ἔριν instead of ἔριδα. So in Rev. 3:7 and 20:1 the Attic κλεῖν is read, for this is not a new tendency by any means, but in Lu. 11:52 the MSS. have κλεῖδα, though here also D has κλεῖν. Κλεῖδα is found in the LXX as in Judg. 3:25. Χάριτα appears in Ac. 24:27 and Ju. 4, and A has it in Ac. 25:9, but the Attic χάριν holds the field (forty times). In the LXX the Ionic and poetical χάριτα occurs only twice (Zech. 4:7; 6:14) and is absent from the papyri before the Roman period. Cf Thackeray, Gr., p. 150. For the irrational ν with μείζω in Jo. 5:36 see Adjectives. In Ac. 27:40 the correct text is ὄπτομα, not ὄπνα, from nom. ὄπτομα.

(c) The Accusative Plural. In Winer-Schmiedel (p. 88) ἔρεις is given as nominative and accusative except in 1 Cor. 1:11 (ἔριδες, nom.), but as a matter of fact

2 P. 90.
5 Moulton, Cl. Rev., 1901, p. 435.
1 Cf. Hort, Notes on Orth., p. 157. For the LXX see Thack., p. 140; Helbing, Gr. d. Sept., p. 40 f., where the N. T. situation is duplicated.
2 See Schweizer, Perg. Inschr., p. 151, for illustr. of these accs. in the inscr. For the pap. see Moulton, Cl. Rev., 1901, p. 35, both χάριτα and χάριν, etc. Cf. Mayser, Gr. d. griech. Pap., p. 271 f.
the accusative plural does not appear in the N. T. except as an alternative reading ἔρεις in Ν’ ACKLP, in Tit. 3:9 (correct text ἔριν). In Gal. 5:20 W. H. put ἔρεις in the margin rather than ἔρις, probably “an itacistic error.” W. H. read τὰς κλαῖς in Rev. 1:18, but κλαίδας in Mt. 16:19. In Ac. 24:27 χάριτας is supported by HP and most of the cursives against χάριν (correct text) and χάριν (Ν’ EL, etc.). The accusative in –ας has changed into –ας with –υ and –ου stems, as βόας from βοῦς (Jo. 2:14 f., cf. LXX), βότρυας from βότρυς (Rev. 14:18), ιχθὺας from ιχθύς (Mt. 14:17). This simplification of the accusative plural was carried still further. Just as πόλεας had long ago been dropped for πόλεις, so βασιλέας has become –ας like the nominative, “and this accusative plural is regular in N. T. for all words in –ας.” In the LXX –ας appears a few times, but since 307 B.C. the Attic inscriptions show –ας as accusative. It is found indeed sometimes in Xenophon and Thucydides, though the strict Atticists disown it. Cf. γραµµατεῖς in Mt. 23:34, etc. A few forms in –ας survive in the inscriptions. Νήστες (from νῆστις) is the correct accusative in Mk. 8:3 and Mt. 15:32. Ν’ here reads νῆστις, but is unreliable on this itacism (Hort, Notes on Orth., p. 157). The Achaean, Elean, Delphian and Phocian inscriptions (Northwest Greek) have the accusative plural in –ας just like the nominative (cf. Latin). It is very common in the modern Greek vernacular and in the papyri. Moulton finds many examples like γυνακείς, µῆνες, ὄντες, πάντες, τέκτονες, τέσσαρες, etc. In the LXX τέσσαρες as accusative is very common as a variant in the text of Swete. So in the N. T. some MSS. read τέσσαρες (though the most still have τέσσαρας) as Ν’.

———, The Apocalypse of St. John (1906).

———, The O. T. in Greek according to the Septuagint (1887). 3 vols.
Δ in Jo. 11:17, Ν in Ac. 27:29, AP in Rev. 4:4; 7:1, Ν in Rev. 9:14. In Rev. 4:4 the best authority (Ν, AP, etc.) is really on the side of τέσσαρες (second example). Indeed “in the N. T. τέσσαρες never occurs without some excellent authority for τέσσαρες.”

In the first 900 of Wilcken’s ostraca, Moulton (Prol., p. 243) finds forty-two examples of accusative τέσσαρες and twenty-nine of τέσσαρας. Moulton considers it probable that other nominative forms in Revelation, like ἄστερες in A (Rev. 1:16), may be illustrations of this same tendency.

[Page 267] (d) PECULIARITIES IN THE NOMINATIVE. In general one may say that the various ways of forming the nominative singular in Greek are blending gradually into unity, the masculine in ζ and the feminine in α or η. Many of the new substantives went over to the first declension. Luke has gen. Ἐλαϊων, in Ac. 1:12 from nom. Ἐλαιων, and the papyri give nearly thirty examples of this noun. Jos. also (Ant. vii, 9, 2) has Ἐλαιωνος. On the other hand the use of Ἐλαία is frequent (in Jos. also), as εἰς τὸ δρός τῶν Ἐλαιων (Mt. 21:1). But in Lu. 19:29 we have πρὸς τὸ ὁδός τὸ καλοῦμενον Ἐλαιων (W. H.), and in Lu. 21:37 εἰς τὸ δρός κτλ. In both these examples it would be possible to have Ἐλαιων, not as an indeclinable substantive, but as a lax use of the nominative with ὁ καλοῦμενος (cf. Revelation and papyri). So Deissmann. But even so it is still possible for Ἐλαιων to be proper (on the whole probably correct) in these two disputed passages.

Ἐρεῖς is a variant with ἔρις in Gal. 5:20 (marg. W. H.), 1 Cor. 3:3; 2 Cor. 12:20; 1 Tim. 6:4, but in 1 Cor. 1:11 all MSS. have ἔρις. W. H. once (Ac. 1:10) accept the rare form ἔσθης (2, 3 Macc.) rather than the usual ἔσθης, though the Alexandrian and Syrian classes have it also in Lu. 24:4. In Lu. 13:34 ἩΔ read ὀρτίζ, nominative not found in ancient Greek

---

8 Blass, Gr. of N. T. Gk., p. 26. Cf. Jann., p. 120.
11 Ib. This use of –ες as acc. may be compared with the common acc. pl. in –ες in the mod. Gk. vernac. Cf. Thumb, Handb., pp. 47 ff. Cf. nom. like ὁ πατέρας (Psichari, Ess. de Gr. Hist. νέο-grecque, 1886, 1er partie, p. xviii). Even ἡμέρες, πόλεις, etc. In the Eleatic dial. the loc.-dat. pl. is –ες as in χρημάτως. Cf. Meister, Bd. II, p. 61. The LXX MSS. show τέσσαρες as acc. See Helbing, Gr. d. Sept., p. 54. The acc. in –ες rare in LXX MSS. outside of τέσσαρες. Thack., Gr., p. 148 f. Moulton (Prol., p. 243, ed. 2) suggests that this tendency started with τέσσαρες because it is the only early cardinal that had a separate form for the acc. plural.
1 Jann., Hist. Gk. Gr., p. 121.
4 Hort, Notes on Orth., p. 158. Cf. W.-Sch., p. 93. Moulton (Prol., pp. 69, 235) has a full presentation of the facts.
5 Moulton, Prol., p. 235.
(Thayer), though the Doric used the oblique cases ὄρνιχος, etc. Elsewhere in all MSS. the usual ὄρνις occurs, as Mt. 23:37, and in the N. T. only the nominative singular is found. Another contrary tendency to the usual ς in the nominative singular is seen in ὤδις (1 Th. 5:3; cf. also Is. 37:3) for the usual ὤδίς. The papyri show forms like ὀξύρρις.

One or two points about neuter substantives call for remark. The inflection in –ας, –αος=–ως, has nearly vanished. A few examples still survive in the inscriptions. In Lu. 1:36 the Ionic form γῆρας from γῆρας is found, as often in the LXX and Test. XII Pat. Κέρας always in the N. T. (as in LXX) has the Attic plural κέρατα (Rev. 8 times) and τέρας regularly τέρατα (11 times). The plural κρέα (from κρέας) is the only form in the N. T. (1 Cor. 8:13; Rom. 14:21) as in the LXX, though a MSS. or so in each case has κρέας (singular).

The genitive-ablative forms. These call for little remark save in the adjective, for which see later. Σινάπεως (from σίναπι) is uniform in the N. T., as Mt. 17:20. Πήχως has no genitive singular in the N. T. though πήχεως is common in the LXX, but has πηχῶν (from Ionic πηχέων or through assimilation to neuters in –ως), not the Attic πήχεως. In Jo. 21:8 only A Cyr. have πήχεως and in Rev. 21:17 only N. For the genitive singular of ὸσώς and Μανασσής see 6 (e).

Contraction. It is not observed in ὄρεων (Rev. 6:15) and χειλέων (Heb. 13:15). In both instances the Ionic absence of contraction is always found in the LXX (Prov. 12:14). This open form is not in the Attic inscriptions, though found in MSS. of Attic writers and the poets especially. In the κοινή it is a “widespread tendency” to leave these forms in –ως uncontracted, though ἔτων is correct in Ac. 4:22, etc. So the LXX, Thackeray, Gr., p. 151.

Proper Names. Μωυσῆς has always the genitive-ablative Μωυσέως (Jo. 9:28), though no nominative Μωυσεύς is known. The genitive Μωσῆ appears usually in the LXX, as Num. 4:41, and the vocative Μωσή as in Ex. 3:4. Cf. Thackeray, Gr., p. 163 f. W. H. have Μωυσῆ (always with v. r. –σῆ) as in Mk. 9:4, except in Ac. 7:44.

---

6 The form ὄρνιξι appears several times in the pap. Moulton, Cl. Rev., 1901, p. 35. Cf. Hort, Notes on Orth., p. 149.
7 W.-Sch., p. 89. LXX ὄρνιθων.
9 Schweizer, Perg. Inschr., p. 156.
3 Hort, Notes on Orth. But Xen. and Plut. (often) have πηχῶν. See W.-M., p. 75. In LXX note πήχεως and πήχεως, πήχεων and πηχῶν. Helbing, Gr., p. 45; Thack., p. 151.
4 W.-Sch., p. 88.
5 Blass, Gr. of N. T. Gk., p. 27.
where the form in – fillColor is due to the LXX (usual form there). The accusative is Ὑωσέα once only (Lu. 16:29), elsewhere – fillColor, as in Ac. 7:35 (so LXX). Σολωμών (so in the nominative, not – fillColor) is indeclinable in Ν in Mt. 1:6 as usually in the LXX. But the best MSS. in Mt. 1:6 have the accusative Σολωμῶν, a few – fillColor. So the genitive Σολωμῶνς in Mt. 12:42, [Page 269] though a few MSS. have – fillColorς. The Gospels have uniformly the genitive in – fillColorς. But in Ac. 3:11 W. H. accept Σολωμῶντος (so also 5:12), though BD etc. have – fillColorς in 5:12. Cf. Ξενοφῶντος (from nominative – fillColor). 

(һ) HETEROCLISIS AND METAPLASM. Most of the examples have already been treated under the first declension 5 (ɡ) or the second declension 6 (d). The accusative ἅλα (Mk. 9:50) is like the old Greek ὅ ἅλα. Some MSS. (Western and Syrian classes) in Mk. 9:49 have ἅλι also. In Mk. 9:50 ΝΛΔ have τὸ ἅλα as nominative (cf. Lev. 2:13) like γάλα. But the best MSS. (ΝΒΔΛΔ) give τὸ ἅλας in the first two examples in 9:50 and ἅλα (accusative) in the third (so W. H.). So also Mt. 5:13 and Lu. 14:34. Cf. dative ἅλατι in Col. 4:6. In the LXX τὸ ἅλας is rare (Thackeray, Gr., p. 152). Papyri show τὸ ἅλας in third century B.C (Moulton and Milligan, Expositor, Feb., 1908, p. 177). Instead of ὄρνις in Rev. 18:2 we have the genitive ὄρνεος, from ὄρνεον (good old Greek word), ὄρνεος in Rev. 19:17, and ὄρνεα in 19:21. In Mk. 6:4 and Lu. 2:44 συγγενεῖς (cf. 1 Macc. 10:88) is probably1 from συγγενεύς, not συγγενὴς. Cf. 1 Macc. 10:89. This is a good place for me to record the admiration which has possessed me as I have tested the work of Hort through the maze of details in the MS. evidence concerning the forms.

8. Indeclinable Words. These do not, of course, belong to any declension. Josephus Grecized most of the Hebrew proper names like Ἀμίναβος (Mt. 1:4, Ἀμιναβᾶς).2 Some he put in the first declension, many in the second and third declensions.3 Blass4 sums the matter up by observing that “the Hebrew personal names of the O. T., when quoted as such,” are indeclinable. This is an overstatement. But certainly many that in the LXX and the N. T. are not inflected, might have been, such, for instance, as Ἀμων, Ἰακώβ, Κεδρῶν, Σαλμῶν, Συμων, to go no further.5 It is hardly worth while to give the entire list of these words. [Page 270] They include such other words as the majority of those in the genealogy in Mt. 1 and that in Lu. 3,
besides many other proper names,\(^1\) including such geographical names as Αἰνών, Βηθφαγή, Σιών, Σινᾶ, etc.

There are other indeclinable Hebrew and Aramaic words such as Κορβᾶ (Mk. 7:11), μάνα (Rev. 2:17), πάσχα (Lu. 2:41), σίκερα (Lu. 1:15 as in LXX). The gender (fem.) of the indeclinable οὐαί (Rev. 9:12; 11:14) is probably due, as Blass\(^2\) suggests, to θλίψις. In 1 Cor. 9:16 οὐαί is used as a substantive (so also LXX).

The use of ὁ ὅν καὶ ὁ ὅν καὶ ὁ ἐρχόμενος in the nominative after ἀπό in Rev. 1:4, etc., belongs more to syntax than toaccidence. It is evidently on purpose (to express the unchangeableness of God), just as ὁ διδάσκαλος καὶ ὁ κύριος is in apposition with με (Jo. 13:13) in lieu of quotation-marks.

**II. THE ADJECTIVE (ÓNOMA ἘΠΙΘΕΤΟΝ)**

Donaldson\(^3\) is probably right in saying that, in general, the explanation of the adjective belongs to syntax rather than to etymology. But there are some points concerning the adjective that demand treatment here.

1. The Origin of the Adjective. Adjectives are not indispensable in language, however convenient they may be.\(^4\) In the Sanskrit, for instance, the adjective plays an unimportant part. Whitney\(^5\) says: “The accordance in inflection of substantive and adjective stems is so complete that the two cannot be separated in treatment from one another.” He adds\(^6\) that this wavering line of distinction between substantive and adjective is even more uncertain in Sanskrit than in the other early Indo-Germanic tongues. Most of the Sanskrit adjectives have three endings, the masculine and neuter being usually ἄ stems while the feminine may have ἄ or ἅ this matter being “determined in great part only by actual usage, and not by grammatical rule.” So likewise Giles in his *Comparative Philology* has no distinct treatment of adjectives. The adjective is an added descriptive appellative (ὄνομα ἐπιθετὸν) while the substantive is an essential appellative (ὄνομα οὐσιαστικόν). But substantives were doubtless [Page 271] used in this descriptive sense before adjectives arose, as they are still so used. So, for instance, we say brother man, Doctor A., Professor B., etc. Cf. in the N. T. ἐν τῷ Ἰορώνῃ ποταμῷ (Mt. 3:6), etc. This is, indeed, apposition, but it is descriptive apposition, and it is just at this point that the adjective emerges in the early period of the language.\(^1\) Other Greek adjectives in form as in idea are variations from the genitive case, the *genus* case.\(^2\) In itself the adjective is as truly a noun as the

6 Ib. Cf. Monro, Hom. Gr., p. 117, for the adjectival use of the substantive.
2 Donaldson, New Crat., p. 474.
substantive. As to the form, while it is not necessary\(^3\) that in every case the adjective express its gender by a different inflection, yet the adjectives with three genders become far commoner than those with two or one.\(^4\) From the etymological point of view this inflection in different genders is the only distinction between substantive and adjective.\(^5\) The Greek has a much more highly developed system of adjectives than the Sanskrit, which has survived fairly well in modern Greek, though a strong tendency is present to simplify adjectives to the one declension (–ος, –η, –ον).

Participles, though adjectives in inflection, are also verbs in several respects and call for separate discussion. The process of treating the adjective as a substantive belongs to syntax.\(^6\) The substantivizing of the adjective is as natural, though not so common in Greek as in Latin, as the adjectivizing of the substantive which we have been discussing.\(^7\) The distinction between adjective and substantive is hard to draw in modern Greek (Thumb, *Handb.*, p. 66). In modern Greek every adjective has a special feminine form. The development is complete. Cf. Thumb, pp. 66 ff.

2. Inflection of Adjectives. In Greek as in Sanskrit, the adjective has to follow the inflection of the substantive in the various declensions, the three genders being obtained by combining the first with the second or the third declensions.

(a) Adjectives with One Termination. Of course at first this may have been the way the earliest adjectives arose. Then the genders would be formed. But analogy soon led to the formation of most adjectives with three endings. Some of these [Page 272] adjectives with one ending were used only with the masculine or the feminine, and few were ever used with the neuter.\(^1\) Jannaris\(^2\) considers them rather substantives than adjectives, but they illustrate well the transition from substantive to adjective, like ἄπαξ, μάκαρ, φυγάς. In fact they are used of animate beings. In the N. T. we have ἄρσης (Mt. 7:15; 1 Cor. 5:10), πένης (2 Cor. 9:9. Cf. πλάνητες, Jude 13 B), and συγγενίς (Lu. 1:36). Συγγενίς is a later feminine form like εὐγενίς for the usual συγγενής (both masculine and feminine) which Winer\(^3\) treats as a substantive (so Thayer). Strictly this feminine adjective belongs\(^4\) only to words in –ης and –εύς. Blass\(^5\) quotes εὐγενίδων γυναικῶν by way of comparison. Modern Greek still has a few of these adjectives in use. The ancient adjectives in –ης (εὐγενής) have disappeared from the modern Greek vernacular (Thumb, *Handb.*, p. 72).

(b) Adjectives with Two Terminations. Some adjectives never had more than two endings, the masculine and the feminine having the same form. In the so-called Attic second declension this is true of Ἀδαμ (Mt. 16:22). But a few simple adjectives of the second declension never developed a feminine ending, as, for instance,

---

4 Jann., Hist. Gk. Gr., p. 139.
6 Brug. (Griech. Gr., pp. 413–417) has no discussion of the adjective save from the syntactical point of view.

4 Blass, Gr. of N. T. Gk., p. 33.
5 Ib.
バロバロス (1 Cor. 14:11), ἐ(α)φνίδιος (Lu. 21:34), σωτήριος (Tit. 2:11). In the N. T. ἰσχύς has changed to ἰσχύς (1 Pet. 3:4). The adjectives in the third declension which end in –ος or –ων have no separate feminine form. So εὐγενής (Lu. 19:12), εὐσεβής (Ac. 10:7) μεῖζων (Jo. 15:13), etc. Then again some simple adjectives varied in usage in the earlier Greek, especially in the Attic, and some of these have only two endings in the N. T., like ὀδύς (Ro. 1:20), ἱψιμος (Ac. 1:20, etc., and often as substantive with γή or χώρα not expressed), κόσμιος (1 Tim. 2:9), οὐράνιος (Lu. 2:13; Ac. 26:19), φλύαρος (1 Tim. 5:13), φρόνιμος (Mt. 25:46, etc.) and αὐθεντίων (Ac. 10:7, etc., and often as a variant reading); ἕτοιμος (Mt. 25:10) and ἔτοιμη (1 Pet. 1:5); μάταιος (Jas. 2:26) and ματαία (1 Pet. 1:18); ὁμοίος (Rev. 4:3, second example correct text) and ὁμοία (Rev. 9:10, Page 273) though W. H. put ὁμοίας in the margin instead of ὀμοίας, 19) ὁσιός (1 Tim. 2:8; so probably, though ὁσιός may be construed with ἐπαύρωντας instead of χειρας). The early Attic inscriptions furnish examples of two endings with such adjectives as δόκιμος (no feminine example in the N. T.) and λοιπός with either two or three (N. T. only three).1 The papyri furnish ἱψιμος and οὐράνιος as feminine and others not so used in the N. T., as δίκαιος, μέτριος, σπάρτις.2 It was the rule with compound adjectives to have only two endings, for the most of them never developed a feminine form, as ὁ (ἡ) ὀλογος.3 This tendency survives in the inscriptions, especially with compounds of α– privative and prepositions, and in the papyri also we have abundant examples.4 The N. T. usage is well illustrated by 1 Pet. 1:4, εἰς κληρονομίαν ἅφθαρτον καὶ ἀμαρτοτος καὶ ἀμάραντον. Cf. Jas. 3:17.

(c) ADJECTIVES WITH THREE TERMINATIONS. The great majority of Greek adjectives, like ἄγαθος, –η, –όν, developed three endings and continue normal (cf. Thumb, Handbook, p. 68), as is universal in the modern Greek. Some of the compound adjectives also had three endings, especially compounds in –ικός and –ιος, as μονορχική, ἄναξία (Plato).5 The same thing is observed in the inscriptions6 and the

6 Cf. K.-Bl., I, p. 535 f., for fuller list. Some of the simple verbs in –τος also had no fem., as ὄντος.
7 In the LXX we see a very slight tendency towards giving a fem. form to all adjs. Thack., Gr., p. 172.
1 Cf. Meisterh., Att. Inschr., p. 148. Cf. also αὐθεντίος, κόσμιος, in Magnesia (Nachm., Magn. Inschr., p. 140). Aristophanes used βασιλικός, βέβαιος, μακάριος, οὐράνιος, πάτριος with two endings (G. Wirth, De Motione Adjectivorum, 1880, p. 51). This is true also of Euripides (ib., p. 49 f.). For further discussion of adjectives with two endings see Wilhelm, Zur Motion der Adjec. dreier End. in Griech. etc., p. 23; Wilhelm, Der Sprachgebr. der Lukianos etc., p. 23. Cf. Helbing, Gr. d. Sept., p. 57 f. On the whole the LXX shows the extension of the fem. so that adjs. which in Attic have two or three terminations have three in the LXX (Ἄγριος, βέβαιος, δίκαιος, ἔλεόθερος, μάταιος). Thack., Gr., p. 172.
2 Maysr, Gr. d. griech. Pap., p. 289 f.
3 K.-Bl., I, p. 538.
5 K.-Bl., I, p. 538 f.
6 Schweizer, Perg. Inschr., p. 158.
(d) The Accusative Singular. Some adjectives of the third declension have ν after the analogy of the first declension. See this chapter, I, 5, (g), for the discussion in detail. W. H. reject them all, though in a few cases the testimony is strong. They are ἰσόβην (Ro. 4:5), ἰσφαλήν (Heb. 6:19), μείζων (Jo. 5:36), συγγενήν (Ro. 16:11), ὑγήν (Jo. 5:11). The use of irrational ν with μείζων (Jo. 5:36 μείζων in ABEGMA) is likened by Moulton (Prol., p. 49) to irrational ν with subjunctive ἂν ( OnCollision). Cf. ch. VI, II (h), p. 220.

(e) Contraction in Adjectives. Two points are involved, the fact of contraction (or the absence of it) and the use of α or η after ε, τ, ρ. The uncontracted forms of adjectives are not so common as is the case with substantives. Cf. this chapter, I, 6, (b). The contracted forms are practically confined to forms in –ους, like ἀπλούς, διπλούς, ἀργυροῦς, πορφυροῦς, σιδηροῦς, χαλκοῦς, χρυσοῦς. Here again we have a still further limitation, for the uncontracted forms occur chiefly in the Apocalypse and in Ν and in the case of χρυσοῦς. 2 Cf. Rev. 4:4; 5:8, where Ν reads χρυσέως, –έας.

But in Rev. 2:1 ΝPB read χρυσῶν, while AC have χρυσέων. Χρυσῶν in Rev. 1:13, though accepted by W. H. and read by ΝAC, is rejected by Blass, but admitted by Debrunner (p. 28), as shown on p. 257. P. Lond. reads χρυσῶν ἂν ἄργυρων, and L. P. w (ii/iii A.D.) also has χρυσῆν ἂν ἄργυρην. 3 In each instance probably analogy has been at work. 4 Thackray (Gr., p. 172 f.) gives a very few uncontracted forms in –εος in the LXX. W. H. accept the genitive βαθέως in Lu. 24:1 and πραξάως in 1 Pet. 3:4 instead of the usual form in –εος. Hort 5 considers the variations in ἰμίσως as “curious,”

7 Mayser, Gr. d. griech. Pap., p. 291.
1 Hort, Notes on Orth., p. 157 f. For pap. exx. of ὑγῆν see Mayser, Gr. d. griech. Pap., p. 295. Thack. (Gr., p. 146) considers it a vulgarism, though it began as early as iv/B.C. (see Σωκράτην, τρήρην). It is common ii/A.D.
4 Moulton, Prol., p. 48. Cf. τήν ἵππην κεραλήν on Rom. tomb (Kaibel, Epigramm Graeca, 1878, p. 269).
5 Notes on Orth., p. 158.
but they find abundant parallel in the [Page 275] papyri as does χρυσέως above.¹ In Mk. 6:23 ἡμίσους, not –εος, is the genitive form, the usual (probably only) form in the papyri.² The neuter plural ἡμίσεα has practically no support in Lu. 19:8, though ἡμίση is the Text. Rec. on the authority of late uncials and cursives. Τὰ ἡμίσυ has slight support. W. H. read τὰ ἡμίσια (BBQ 382, L having itacistic –εια) and derive it from a possible ἡμίσιος.³ But it is possible, if not probable, that ἡμίσεα was the earlier form changed by itacism to ἡμίση.⁴ The plural of νῆστης is νῆσεα (Mk. 8:3=Mt. 15:32), and not νῆστης as already shown.⁵ For participles in –υία, –υίς see this chapter, p. 256. As a rule the forms in –υίς and –ρης predominate, but note στείρᾳ in Lu. 1:36.⁶ In the case of ὑγιῆς, whereas the Attic had accusative ὑγιᾶ (Ὑγιή in Plato, Phadr. 89 d), the N. T., like the inscriptions, papyri and the LXX, has only ὑγιῆ (Jo. 5:11, 15; 7:23).⁷ In Jo. 18:1 χειμάρρου is almost certainly from χειμάρρος instead of the classical χειμάρρος.⁸ In 2 Pet. 2:5 δηδοῦν is not contracted, though sometimes the papyri have δηδοῦς, δηδοῦν.⁹

(f) INDECLINABLE ADJECTIVES. The papyri have cleared up two points of much interest here. One is the use of πλήρης in N. T. MSS. in an oblique case. In Mk. 4:28 Hort (Appendix, p. 24) suggests πλήρης ὄτον (C* two lectionaries) as probably the original. In Ac. 6:5 W. H. put ἄνδρα πλήρης in the margin, though πλήρης is read only by B among the MSS. of importance. In Jo. 1:14 all the MSS. (save D 5 followed by Chrys. and Theoph.) have πλήρης. Moulton¹⁰ indeed suggests that πλήρης was the original text, which was changed to the vulgar πλήρης. But the argument can be turned round just as easily. In almost every N. T. instance of an oblique case of πλήρης good uncials have the indeclinable form (Moulton, Prol., p. 50). The LXX also has examples of indeclinable πλήρης (cf. Hort, Appendix, p. [Page 276] 24). So Job 21:24, ΝΑΒ. The examples of πλήρης so used are “fairly common” in the papyri¹ and come as early as the second century B.C.² There seems therefore no reason

---

1 Χρυσέῳ is exceedingly common in the pap. (Moulton, Cl. Rev., Dec., 1901, p. 435).
2 Mays, Gr. d. griech. Pap., p. 294 f. Cf. also Deiss., B. S., p. 186; Moulton, Cl. Rev., 1901, p. 34. So also the LXX, Thack., Gr., p. 179.
4 Cf. W.-Sch., p. 87. Ἡμίσουα occurs in Antoninus Liberalis (ab. 150 A.D.) and οἰκεῖος is analogous.
5 Hort, Notes on Orth., p. 157.
6 Blass, Gr. of N. T. Gk., p. 25.
7 Moulton, Cl. Rev., 1901, p. 35. For adjs. with acc. in –η (and sometimes ν added, –ην) see Dieterich, Unters., p. 175. Cf. this ch., II, 2, (d).
8 Blass, Gr. of N. T. Gk., p. 25.
1 Moulton, Cl. Rev., 1901, p. 35. For the indecl. πλήρης in Acta Thomae see Reinhold, De Graec. etc., p. 24. Cf. Sir. 19:26. See Helbing, Gr. d. Sept., p. 52. It is not till i/A.D. that it is common in the pap. Thack. (Gr., p. 176) thinks it not genuine in the LXX.
to refuse to consider πλήρης in Jo. 1:14 as accusative and to accept it as the text in Mk. 4:28 and Ac. 6:5. The other example of indeclinable adjectives is found in comparative forms in –ο, like πλείον. Moulton points out that in Mt. 26:53 ΝBD read πλείον δώδεκα λεγιōνας, while the later MSS. have mended the grammar with πλείους. He quotes also Crönert who has furnished abundant evidence from the papyri and literature of such a use of these forms just like πλήρης. Cf. Mayser, Gr. d. griech. Papyri, p. 63 f.

3. Comparison of Adjectives. The comparative is a natural development in the adjective, as the adjective itself is a growth on the substantive.

(a) The Positive (θετικὸν ὅνομα or ὅνομα ἀπλοῦν). This is the oldest form of the adjective, the most common and the most persistent. It is not always true that the comparative and superlative forms represent an actually higher grade than the positive. The good is sometimes more absolute than better or even best. See ἀγαθὸς in Mk. 10:18, for instance. Sometimes indeed the positive itself is used to suggest comparison as in Mt. 18:8, καλὸν σοὶ ἔστιν εἰσελθεῖν … ἡ δύο χάρας, κτλ. This construction is common in the LXX, suggested perhaps by the absence of comparison in Hebrew. The tendency of the later Greek is also constantly to make one of the degrees do duty for two. Cf. Thackeray, Gr., p. 181. But this matter belongs rather to the syntax of comparison. Participles are, of course, used only in the positive save in a few cases where the adjective-idea has triumphed wholly over the verb-conception. Verbals in –τος sometimes have comparison, though μᾶλλον may be freely used with participles.

(b) The Comparative (συγκριτικὸν ὅνομα). The stem may be (besides adjective) either a substantive (βασιλεύτερος) or an adverb (πρότερος). Cf. Monro, Homeric Grammar, p. 82. The primary comparative-ending –ιον (Sanskrit iyāns) is probably kin to the adjective-ending –ιος. This form along with the superlative –ιστος is probably originally qualitative in idea and does not necessarily imply excess. In the modern Greek these forms are not used at all. They have disappeared before the secondary comparative form –τερος, which even in the earlier Greek is far more common. The ending –τερος does imply excess and appears in various words that are not usually looked upon as comparatives, as ἕ-τερος (‘one of two’), ἕκα-τερος (‘each

of two’), ἡμέ-τερος (nos-ter), ύμε-τερος (vos-ter), ὢσ-τερος. So also δεύ-τερος like πρό-τερος (cf. Latin al-ter, English other) is a comparative form.1 “The comparison-suffixes τον, ἵστος, τερος belong to the Indo-Germanic ground speech.”2 In the N. T. the forms in –τον, as in the papyri,5 hold their own only in the most common words. Schwab (op. cit., p. 5) makes –στος older than –τατος. Ἁμείνων is not used in the N. T. and βέλτιον only as an adverb once (2 Tim. 1:18). Ἐλάσσων appears four times, once about age as opposed to μείζων (Ro. 9:12), once about rank as opposed to κρείσσων (Heb. 7:7), once about excellence (Jo. 2:10) as again opposed to κρείσσων, and once as an adverb (Ἐλάσσων, 1 Tim. 5:9) in the sense of less, not μικρότερος (‘smaller’). Ἡσσων (neuter only) is found in 1 Cor. 11:17 as opposed to κρείσσων, and as an adverb in 2 Cor. 12:15. Κάλλιον (Ac. 25:10) is an adverb. Κρείσσων is confined to Peter, Paul’s Epistles and Hebrews (some eighteen examples, ten of them in Heb.). Μείζων is common (some fifty times), though some of them displace the superlative as we shall see directly. The neuter plural (μείζων) appears once as μείζω (Jo. 1:50).6 Once also (3 Jo. 4) the double comparative form μειζότερος occurs, several similar examples appearing in the papyri, as μειζότερος, μελαντότεροι, πρεσβυτερωτέρα.7 A few other examples in poetry and late Greek are cited by Winer-Moulton, like κρειττότερος, μειζόντερος, μειζότερος. Some comparative adjectives are derived from positive adverbs like εξώτερος (Mt. 8:12), ἐσώτερος (Ac. 16:24), κατώτερος (Eph. 4:9). These latter adjectives are common in the LXX and the later Greek, not to say Attic sometimes.5 Διπλότερος (Mt. 23:15) is for the old Attic διπλοὐτέρος. So Appian also. Cf. ἡπλότερον, Anthol. Pal., III, 158 (Dieterich, Unters., p. 181). The Ionic already had ὀλιγώτερος and ταχύτερος

---

3 Cf. Ascoli in Curtius’ Stud. zur griech. und lat. Gr., 1876, p. 351.
6 The pap. have many exx. of the form without ν as in πλείω (ους), etc. See Mayser, Gr. d. griech. Pap., pp. 298 ff. But the usage varies greatly. The LXX MSS. show similar variations. See Helbing, Gr. d. Sept., p. 54 f. As LXX exx. of uniformity in form of comp. note ἐγχώτερος and ἀλαξχότερος, but only ἐγχών (–τος), not ἐγγύτερος (–τατος), C. and S., Sel. fr. LXX, p. 29. Thack. (Gr., pp. 184 ff.) gives a careful summary of the exx. of –νον, –ιστος in the LXX.
8 P. 81. Cf. also Dieterich, Unters. etc., p. 180, for ὀλιξότερος.
1 Moulton, Cl. Rev., 1901, p. 35. Cf. also ὰμειβότερος in the older language (Blass, Gr. of N. T. Gk., p. 34).
2 W.-M., p. 81; Thack., Gr., p. 183.
(Radermacher, Gr., p. 56). Cf. ἄγαθώτερος (Hermas, Mand. VIII, 9, 11) and ἄγαθώτατος (Diod., 16, 85). The rules for the use of –ότερος and –ότερος apply in the N. T. As μᾶλλον is often used with the positive in lieu of the comparative ending, so it is sometimes with the comparative, a double comparative (μᾶλλον κρᾶσσον, Ph. 1:23; μᾶλλον περισσότερον, Mk. 7:36), a construction not unknown to the classic orators of Athens where emphasis was desired.3 Paul did not perpetrate a barbarism when he used ἔλαχιστότερος (Eph. 3:8), a comparative on a superlative. It “is correctly formed according to the rule of the common language.”4 Cf. also such a late form as ἔσχατότερος.5

(c) THE SUPERLATIVE (ὑπερθετικὸν ὄνομα). As with the comparative, so with the superlative there are primary and secondary forms. The primary superlative ending –ιστος (old Indian iṣṭa, Zend. and Goth. ista)6 did not perhaps represent the true superlative so much as the elative (intensive like English “very”) superlative.7 It was never very widely used and has become extinct in modern Greek.8 The κοινὴ inscriptions show only a few examples like ἄγχιστα, ἔγγιστα, κάλλιστος, κράτιστος, μέγιστος, πλέιστος.9 In the papyri Mayser10 notes βελτίστον, Ἐλάχιστον (–ἴστη also), καλλίστη, κράτιστος, πλέιστοι, ταχίστην (–ιστα), χειρίστην. In the N. T., however, the superlative in –ιστας is more common than that in –τατος, though none too frequent in itself. They are besides usually elative (intensive) and not true superlatives.11 D reads ἔγ- [Page 279] γιστα in Mk. 6:36. Ὁ Ἐλάχιστος (1 Cor. 15:9) is a true superlative, a thing so rare in the N. T. that Blass attributes this example either to the literary language or to corruption in the text.1 But Moulton2 is able to find a parallel in the Tb.P. 24, ii/b.c. But more about true and elative superlatives in Syntax (ch. XIV, XIV). In 2 Cor. 12:9, 15 (D in Ac. 13:8), we have Ἴδιστα. Κράτιστα. (Lu. 1:3, etc.) is “only a title” (Moulton, p. 78). Μάλιστα appears a dozen times only, though μᾶλλον is exceedingly common. Blass3 indeed suggests that a popular substitute for μᾶλλον as for πλέιστα was found in the use of περισσός or περισσότερον ἔτι κατάδηλον we have more than μᾶλλον. Cf. μέγιστος (2 Pet. 1:4) and πλέιστος in Mt. 11:20; 21:8; 1 Cor. 14:27. Τάχιστα (Ac. 17:15) Blass4 credits again to the literary element in Luke. In Ἴδιστος

10 Gr. d. griech. Pap., p. 298.
11 Blass, Gr. of N. T. Gk., p. 33.
we have a superlative that occurs thirteen times and always about God or heaven (as Mk. 5:7; 11:10).

When we take up the form in –τατος in the N. T. the story is soon told. Brugmann finds the origin of this ending in forms like δέκατος (cf. Latin decimus), πρώτος (cf. Latin primus), ὑπατος, ὑπατος. It has no direct parallel in the other languages. Hirt suggests –ταμος and –ατος as two forms which finally resulted in –τατος. It is true that the forms in –ατος faded away as superlatives and ἔσχατον became ἔσχατωτατον in the κοινή inscriptions, but this is true also of the forms in –τατος. The papyri have “scores” of examples of superlatives in –τατος (chiefly elative). The rarity of the –τατος forms in the N. T. may be purely accidental (Moulton, Cl. Rev., 1904, p. 154). It is not quite true that "only one example of the –τατος superlative" survives in the N. T. There are three with –τατος, besides those with –ατος: ἁγιώτατος (Ju. 20), ἀκριβέστατος (Acts 26:5), τιµιώτατος (Rev. 18:12; 21:11). Thackeray (Gr., p. 182) finds –τατος much more common in the LXX, though chiefly in the elative sense and in the more literary books of the LXX (Wisd., 2–4 Macc., Prov., Esd.). ἀκριβέστατος (Ac. 26:5) Blass again credits to the literary language. ἔσχατος and πρώτος (ο from ωϝα, Doric ὅ) are both very frequent in the N. T. See Mt. 19:30 for the contrasted πρῶτοι ἔσχατοι κτλ. The very great number of times that πρῶτος (πρώτων included) is used in the N. T. (some 200) in contrast to only ten instances of πρότερου and one of προτέρα (Eph. 4:22) deserves comment. This seems in conflict with the observed disuse of the superlative in favour of the comparative. But a counter-tendency is at work here. The disappearance of duality before plurality has worked against πρότερον. Luke does not use πρότερον at all and it appears only once in Grenfell and Hunt’s four volumes of papyri. The LXX shows πρῶτος displacing πρότερος (Thackeray, Gr., p. 183). So in English we say first story of a house with only two, first edition of a book which had only two, etc. It is almost an affectation in Greek and English, however good Latin it may be, to insist on πρότερος. So in Jo. 1:15 (πρῶτος μου), 15:18 (πρῶτον ύμων), Ac. 1:1 (τὸν πρῶτον λόγον) we have merely first of two and in the two first instances the ablative construction as with the comparative. Winer properly saw this usage of πρῶτος to be true to the Greek genius. In Mt. 27:64 we have both ἔσχατος and πρῶτος used of two, ἔσται ἡ ἔσχάτη πλάνη χείρων τῆς πρώτης. Πρότερος, is indeed used in the sense of the former in Eph. 4:22, whereas πρότερον in the sense of the first of two does

6 Hirt, Handb., p. 294.
9 This double superl. does not appear in the N. T., but various instances are noted in the pap. and the later Gk. as ἐλαχιστότατος, μεγιστότατος, πρώτιστα. So Lat. minissimus, pessimissimus. Cf. W.-M., p. 81; Dieterich, Unters., p. 181.
10 Moulton, Prol., p. 78; Mayser, Gr. d. griech. Pap., p. 297 f. See Helbing, Gr. d. Sept., pp. 54–57, for corresponding infrequency of the superl. forms in the LXX. The compar. is driving it out. Cf. also ib., p. vii.
1 Moulton, Prol., p. 79
2 W.-M., p. 306.
appear in Heb. 7:27 (πρότερον—ἔπετα).\(^3\) It is probably a defect in both Latin and Greek that the same forms were used to express the elative and true superlative sense (so as to comparative also).\(^4\) As the dual vanished, so it was inevitable that with the same principle at work either the comparative or the superlative would. Outside of ἔσχατος and πρῶτος where the principle crossed with a different application because πρότερος was disappearing, it is the superlative that goes down, especially the true superlative as opposed to the elative (intensive). Hermas, though in the vernacular, still uses the superlative in the elative (intensive) [Page 281] sense very often.\(^1\) In the N. T. then the comparative is beginning to take the place of the superlative, a usage occasionally found in classical Greek,\(^2\) and found now and then in the papyri,\(^3\) See 1 Cor. 13:13 τὰ τρία ταῦτα·μείζων δὲ τούτων ἡ ἁγάπη. See also ὁ μείζων (Mt. 18:4). But this matter will call for more comment under Syntax (ch. XIV, XIII, (i)).

**III. NUMERALS (ἈΡΙΘΜΟΙ).**

No great space is demanded for the discussion of the non-syntactical aspects of the numerals.

1. **The Origin of Numerals.** Donaldson\(^4\) thinks that seven of the first ten numerals may be traced to primitive pronominal elements. Pronouns and numerals belong to the stable elements of language, and the numerals are rather more stable than the pronouns in the Indo-Germanic tongues.\(^5\) See the numerals in substantial integrity in modern Greek (Thumb, *Handb.*, pp. 80–84). The system of numeration is originally decimal (cf. fingers and toes) with occasional crossing of the duodecimal.\(^6\) There possibly were savages who could not count beyond two, but one doubts if the immediate ancestors of the Indo-Germanic peoples were so primitive as that.\(^7\) See previous discussion in this chapter, I, 3. Counting is one of the first and easiest things that the child learns. It is certain that the original Indo-Germanic stock had numerals up to 100 before it separated.\(^8\) The roots are widespread and fairly uniform.

2. **Variety among Numerals.**

(a) **Different Functions.** The numerals may be either substantive, adjective or adverb. So ἡ χιλιάς (Lu. 14:31), χίλιοι (2 Pet. 3:8), ἔπτακις (Mt. 18:21).\(^9\) Number thus embraces separate ideas.

7 However, see Moulton, Prol., p. 58. Cf. Taylor, Prim. Cult., I, p. 242 f.
8 Moulton, Prol., p. 58.
(b) The Cardinals (ὅνόματα ὑρίῳμητικά). They may be either declinable or indeclinable, and this according to no very well-defined principle. The first four are declinable, possibly from their frequent use.\(^{10}\) After 200 (διακόσιοι, –αι, –α) they have the regular \([Page 282]\) inflection of adjectives of the second and first declensions. The history of ἐξ, μία, ἔν is very interesting, for which see the comparative grammars.\(^1\) Ἐξ is exceedingly common in the N. T. as a cardinal (Mt. 25:15) and as an indefinite pronoun (Mt. 8:19), approaching the indefinite article. For the use of ἐξ in sense of ordinal see Syntax, ch. XIV, XV, (a), but it may be remarked here that the papyri have τῇ μιᾷ καὶ ἐκάδι (Moulton, \textit{Cl. Rev.}, 1901, p. 35). The indeclinable use of ἐξ (or adverbial use of κατά) is common in later Greek. Cf. καθ ἐξ in Mk. 14:19; (Jo. 8:9); Ro. 12:5.\(^2\) So modern Greek uses ἕνα as neuter with which Mayser\(^3\) compares ἕνα as feminine on an early ostrakon. But the modern Greek declines ἐνας, μία, ἕνα in all genders (Thumb, \textit{Handb.}, p. 81). Οὐδείς and μηδείς are both very common in the N. T. with the inflection of ἐξ. Μηδείς occurs only once (Ac. 27:33). W. H. admit οὐδείς only seven times (all in Luke and Paul, as Ac. 20:33), and once (Ac. 15:9) οὐδέν is in the margin. Jannaris (\textit{Hist. Gk. Gr.}, p. 170) calls this form in θ chiefly Alexandrian, rare in Attic, but Mayser (\textit{Gr.}, p. 180) notes οὐδεὶς as “Neubildung” while οὐδεὶς is good Attic. For history of it see Orthography and Phonetics, p. 219. The frequent use of δίо as indeclinable save in the plural form δύο in the later Greek has already been commented on in this chapter (I, 3), as well as the disappearance of ἰμφω before ἰμφότεροι. Indeclinable δίο is classical, and after Aristotle δοσὶ is the normal dative (Thackeray, \textit{Gr.}, p. 186). Τρία (possibly also τρίς) is occasionally indeclinable in the papyri.\(^4\) The common use of τέσσαρες in the κοινή and the occasional occurrence of τέσσαρες as accusative in N. T. MSS. (like Northwest Greek) have been noticed in chapters VI, 2, (a), and VII, 1, (c).\(^5\) Πέντε, ἕνα and ἕπτά need not detain us. The originally dual form ὥκτω is found only ten times, and five of them with other numerals. Ἐνέα appears only five times, while δέκα is nothing like so common as ἕπτά, not to mention the first five cardinals. Ἐνόσσα is found six times, but δώδεκα is quite common, due chiefly to the frequent mention of the Apostles. From thirteen to nineteen in the N. T., like the papyri\(^6\) and the modern Greek, δέκα comes first, usually without καί, \([Page 283]\) as δέκα ὥκτω (Lu. 13:4), though once with καί (Lu. 13:16). But unlike the papyri the N. T. never has δεκαδύο.\(^1\) But δεκαπέντε (as Jo. 11:18) and δεκατέσσαρες (as Gal. 2:1) occur several times each. Ἐκόσι is a dual form, while τριάκοντα and so on are plural.\(^2\)

---

10 Farrar, Gk. Synt., p. 35.
3 Gr. d. grieich. Pap., p. 312. Perhaps the earliest ex. of indeclinable ἔνα. For the LXX usage cf. W.-Sch., p. 90.
4 Mayser, Gr. d. grieich. Pap., p. 315.
5 Ib. Cf. also Dittenb., 674. 28.
6 Mayser, Gr. d. grieich. Pap., p. 316.
1 Δέκα δίο is normal in the pap. of the Ptol. age. Cf. Rec., Ac. 19:7. Cf. Thack., Gr., p. 188. So also δέκα τρέξ, and even δέκα μιᾶς once. Always δέκα τέσσαρες, δέκα πέντε, δέκα ὥκτω. Moulton, \textit{Cl. Rev.}, 1901, p. 35.
2 Giles, Man., p. 398.
Ἑκατόν is one hundred like ἅ-παξ. W. H. accent ἐκατονταετῆς, not –ἐτης. Usually no conjunction is used with these numerals, as ἐκοσι τέσσαρες (Rev. 19:4), ἐκατόν ἐκοσι (Ac. 1:15), but τεσσαράκοντα καί ἔξ (Jo. 2:20). Cf. Rev. 13:18. In the LXX there is no fixed order for numbers above the “teens.” Thackeray, Gr., p. 188. The N. T. uses χίλια often and δισχίλια once (Mk. 5:13) and τρισχίλια once (Ac. 2:41). The N. T. examples of μυρίος by reason of case do not distinguish between μυρίοι, ‘ten thousand’ (Mt. 18:24) and μυρίας, ‘many thousands’ (1 Cor. 4:15). The N. T. uses χίλια several times for the latter idea (‘myriads’), sometimes repeated, as μυρίας μυριάδων (Rev. 5:11). So also χιλιάς is more common in the N. T. than χίλια, both appearing chiefly in Revelation (cf. 5:11). In Rev. 13:18 B and many cursives have χξς = ἑξακόσιοι ἑξήκοντα ἕξ, while the cursive 5 has χξε = ἑξακόσιοι δέκα ἕξ. As a rule in the N. T. MSS. the numbers are spelled out instead of mere signs being used.

(c) The Ordinals (όνόματα τακτικά). They describe rank and raise the question of order, πόστος. They are all adjectives of three endings and all have the superlative form –τος save πρώτος and δεύτερος which are comparative. In most cases the ordinals are made from the same stem as the cardinals. But this is not true of πρώτος nor indeed of δεύτερος (not from δύο, but from δεύο). Cf. the English superlative ‘first’ (with suffix -isto). Πρώτος has driven πρότερος out of use in the N. T. except as an adverb (or το πρότερον) save in one instance, προτέραν θνατοφήν (Eph. 4:22). The disappearance of πρώτος before the ordinal use of αἰς belongs to Syntax. In the N. T. as in the papyri the ordinals up to twelve are regular. From 13 to 19 the N. T., like the vernacular papyri (so Ionic and koine generally), puts the smaller [Page 284] number first and as a compound with καί, only the second half of the word in the ordinal form. So τεσσαρακόσικαίδεκατος (Ac. 27:27), not τέταρτος καί δέκτατος (Attic). But the papyri show examples of the usual Attic method, as ἕνκαί ἐκποτός. The distinction between the decades (like τριακοστός) and the hundreds (like τριακοστός) should be noted. In modern Greek all the ordinals have disappeared out of the vernacular save πρώτος, δεύτερος, τρίτος, τέταρτος. The article with the cardinal is used instead.

(d) Distributives in the N. T. The multiplicative distributives (with ending –πλοῦς) occur in the N. T. also. Απλοῦς as an adjective is found only twice (Mt. 6:22=Lu. 11:34), both times about the eye. Διπλοῦς appears four times (as 1 Tim. 5:17). Cf. the Latin sim-plex, du-plex, English simple, diplomatic. The proportional distributives end in –πλασίων. As examples one may note ἐκατονταπλασίων (Lu. 8:8) and πολλαπλασίων (Lu. 18:30). Cf. English “two-fold,” “three-fold,” etc. One of the commonest ways of expressing distribution is by repetition of the numeral as in

---

4 These both have a superl., as πρώτος and δεύτερος (Hom.). Brug., Gk. Gr., p. 212.
6 Mayser, Gr. d. griech. Pap., p. 318.
7 Ib. Cf. Moulton, Cl. Rev., 1901, p. 35.
1 Blass, Gr. of N. T. Gk., p. 35. So the LXX also. Thack., Gr., p. 188.
2 Moulton, Cl. Rev., 1901, p. 35. And even the use of forms like ἓν καὶ εἰκοστόν, Mayser, Gr. d. griech. Pap., p. 318.
δύο δύο (Mk. 6:7). Cf. συμπόσια συμπόσια (Mk. 6:39 f.). In Lu. 10:1 we have ἄνδρον ἄνδρον in the text of W. H., a “mixed distributive” (Moulton, Prol., p. 97). The modern Greek has either ἄπο δύο or ἄπο δύο (Thumb, Handb., p. 83). It is a vernacular idiom which was given fresh impetus (Brugmann, Distributiva, p. 9) from the Hebrew idiom. Deissmann cites τρία τρία from O. P. 121 (iii/A.D.). Moulton (Prol., p. 21) follows Thumb (Hellen., p. 152) in denying that it is a Hebraism. See further ch. XIV, XV (d).

(c) NUMERAL ADVERBS. These are of two kinds, either like ἄμα (Ac. 24:26), δίχα, ‘in two’ (not in the N. T., though see δηξίως Mt. 10:35), or like ἄπαξ, ὀς, τρίς, etc. The one kind answers to multiplicatives and the other to proportionals.4 The numeral adverbs continue in use in the LXX (Thackeray, Gr., p. 189 f.). The modern Greek instead of the numeral adverb uses φορά (Thumb, Handb., p. 83).

IV. PRONOUNS (ἈΝΤΩΝΥΜΙΑΙ)

1. Idea of Pronouns. It is not the idea of a subject or object that is set forth by the pronoun, but the relation of a subject or object to the speaker.5 Sometimes, to be sure, as in conversation, [Page 285] the pronoun does not strictly stand in the place of a substantive. When one person addresses another, “I” and “thou” are plain enough from the nature of the circumstances. The pronoun indicates, but does not name the speaker, etc. In a sense then language is a sort of drama in which there are three characters, the speaker, the person addressed and the person spoken of.1 Hence the first and second personal pronouns have no gender, while the third person, who may or may not be present, has gender. Giles2 cites the case of Macaulay who repeated the substantive so often as almost to make the pronoun useless, though the reverse tendency is more common. The right use of pronouns is a good index of style.

2. Antiquity of Pronouns. The personal pronouns are probably the oldest part of the Indo-Germanic declension.3 Pronouns (and numerals) are the most persistent parts of speech. They are essential to the very life of a language.4 Strange enough, the Coptic and the Hebrew, for instance, are only alike in their pronouns and their numerals.5 In Greek as in Sanskrit and English the pronouns maintain themselves with great tenacity. The pronouns are also closely akin in all the Indo-Germanic tongues. Cf. Sanskrit āhām, Greek ἐγώ, Latin ego, Gothic ik, Anglo-Saxon ic, German ich, English I, French je. They retain the case-forms better than any other parts of speech.

3. Pronominal Roots. Indeed pronouns present an independent set of roots parallel to the verbal and nominal roots. As verb, noun, adjective, adverb, preposition, conjunctions, intensive particles grow up around the old verbal (and nominal) roots,

4 Farrar, Gk. Synt., p. 36.

2 Giles, Man., p. 238.
3 Ib., p. 297.
5 Renan, Hist. des Lang. Sémit., p. 84 f.
so pronouns represent a separate history. There are two great root-stocks then (verbal or nominal and pronominal).\(^6\) The pronouns can be resolved into monosyllabic roots.\(^7\) One may not follow Donaldson\(^8\) (now obsolete), when he calls all the pronouns originally demonstrative, and yet something can be said for that idea. In the Sanskrit Whitney\(^9\) calls this “very limited set of roots, the so-called pronominal or demonstrative roots.” Monro\(^10\) remarks that noun-stems name or describe while pronouns only \[Page 286\] point out; the one is predicative, the other demonstrative. The difference then is fundamental. “Pronouns are found to contain the same elements as those which furnish the person-endings of verbs.” (Monro, \textit{ib.})

\section*{4. Classification.} Pronouns are either substantive in signification and inflection as ἐγώ, adjective as ἡμέτερος, or adverb as οὗτος. The other classification is into nine or ten great classes: personal, intensive, reflexive, possessive, demonstrative, relative, interrogative, indefinite, distributive.\(^1\) The correlative pronouns can be regarded separately also. These classes will call for special comment in detail See also ch. XV, I.

\textit{(a) The Personal Pronouns.} In all the Indo-Germanic tongues the personal pronouns vary a good deal in inflection from the substantives and adjectives.\(^2\) The various Greek dialects show great variety in the inflection of the personal pronouns.\(^3\) The nominative singular has a different stem in the first personal pronoun from the other cases in all the Indo-Germanic languages. The N. T. follows current and ancient usage fairly well in the form of the first and second personal pronouns. The same thing is true as to the enclitic and the emphatic forms in the oblique cases. The MSS. vary between ἐμοῦ and ἐμοῦ, etc. Not only do MSS. give the regular πρὸς με, but the papyri\(^4\) furnish εἰς με, περί μου, ὑπὸ μου. The question whether σου or σοῦ should be read is a very delicate one and rests almost wholly with the editor. W. H. have, for instance, ἐκ τοῦ ὅρθολομου σου and ἐν τῷ ὅρθολομῳ σοῦ in the same sentence (Mt. 7:4. Cf. also the next verse). Nestle here has no such refinement, but σου all through.

these verses. The third personal pronoun gave trouble in Greek as in some other
languages. In Attic the old οὐ, οἱ, ἐ (without nominative) was chiefly reflexive,5
though not true of the Ionic. Possibly this pronoun was originally reflexive for all the
persons, but came to be used also as the simple pronoun of the third person, whereas
in Latin it remained reflexive and was restricted to the third person.6 The N. T. is like
the κοινή [Page 287] in the use of αὐτός (common also in Attic) instead of οὗ as the
third personal pronoun. It is used in all three genders and in all cases save that in the
nominative it usually has emphasis (cf. Mt. 1:21), a matter to be discussed under
Syntax. Indeed αὐτός, whatever its etymology, is originally an intensive pronoun (like
Latin ipse), not a personal pronoun.1 The “frequent and almost inordinate use”
(Thayer) of οὖτος in the LXX (cf. Jer. 18:3 f.) and the N. T. is noticeable. So modern
Greek (Thumb, Handb., p. 86)

(b) THE INTENSIVE PRONOUN. The N. T. has nothing new to say as to the form of
the intensive αὐτός. It is usually in the nominative that it is intensive like αὐτός μόνος

5 Cf. Farrar, Gk. Synt., p. 33. He illustrates by the Eng.: “I will lay me down and
sleep.” Cf. ὑπεριόν in Mt. 6:19 f.

(Jo. 6:15), though not always (cf. Jo. 14:11). The modern Greek uses also a shorter form τοῦ, etc. (also Pontic στοῦ), as personal pronoun. The use of ὁ αὐτός may be compared with ὁ ἰδιός. See ch. XV, III, (g).

(c) Reflexive Pronouns. The reflexive form is nothing but the personal pronoun plus the intensive αὐτός. The reflexive is one use of this intensive in combination with the personal pronoun. They were originally separate words. So αὐτός ἔγω (Ro. 7:25) which is, of course, not reflexive, but intensive. The Greek reflexives have no nominative and the English has almost lost “himself,” “myself” as nominative. In the N. T. the first and second persons have a distinct reflexive form only in the singular (ἐμαυτοῦ, σεαυτοῦ). In 2 Th. 1:4 αὐτοῦς ἠμᾶς is obviously intensive, not reflexive. In 1 Cor. 7:35 ἠμῶν αὐτῶν it is doubtful. See ch. XV, IV, for further discussion. The contracted form σαυτοῦ is not found in the N. T. It is common in the Kingdom books in the LXX and occurs in the papyri. See even σατόν in σὺ βλέπε σατόν ἀπὸ τῶν Ιουδαίων, B.G.U. 1079 (A.D. 41). So as to αὐτοῦ. Cf. Thackeray, Gr., p. 190. The modern Greek uses τοῦ ἐμαυτοῦ μοῦ for the reflexive (Thumb, Handb., p. 88). The reflexive for the third person (usually ἐμαυτῶς in the singular, about twenty times αὐτῶς, etc., in W. H., as αὐτῶν in Jo. 2:24), while the only reflexive form for all persons in the plural in the N. T. has no secure place in the N. T. for the first and second person singular. The possible reflexive (or demonstrative?) origin of μοῦ made this usage natural. It appears in the papyri (τοῦ αὐτοῦ, Pet. I. 15, 15) and the late inscriptions for the first and second person singular. In the modern Greek the same thing is true. But in the N. T. only late MSS. read Ἰφ. ἐμαυτοῦ against ἰπὸ σεαυτοῦ (NBL) in Jo. 18:34. In Gal. 5:14 and Ro. 13:9 only Syrian uncials have ἐμαυτὸν for σεαυτὸν. This use of ἐμαυτῶν for all three persons is fairly common in classical Attic. Indeed the personal pronoun itself was sometimes so used (δοκῶ μοι, for instance).

(d) **POSSESSIVE PRONOUNS** (κτητικαὶ ἄντωνυμίαι). It is somewhat difficult in the discussion of the pronouns to keep off syntactical ground, and this is especially true of the possessive adjectives. For the etymology of these adjectives from the corresponding personal pronouns one may consult the comparative grammars. But it is the rarity of these adjectives in the N. T. that one notices at once. The third person possessives (ὅς, σφέτερος) have entirely disappeared. Σός is found in only two of Paul’s letters: 1 Cor. and Phil., and these only three times. Σός is found about twenty-six times and ὑμέτερος eleven (two doubtful, Lu. 16:12; 1 Cor. 16:17). ὑμέτερος appears in Paul only in 1 and 2 Cor., Gal., Ro. Ἡμέτερος appears only nine times counting Lu. 16:12, where W. H. have ὑμέτερον in the margin, and Ac. 24:6 which W. H. reject. It is only ἐμός that makes any show at all in the N. T., occurring some seventy-five times, about half of them (41) in the Gospel of John. Thumb and Moulton have made a good deal of the fact that in Pontus and Cappadocia the use of ἐμός, σός, etc., is still common, while elsewhere the genitive personal pronoun prevails. The point is that the Gospel of John thus shows Asiatic origin, while

7 Prol., p. 40 f. He admits that the other possessives do not tell the same story.
8 Cf. Thumb, Handb., p. 89.
Revelation is by another writer. But one can easily go astray in such an argument. The Gospel of Luke has ἐμός three times, but Acts not at all. The large amount of dialogue in the Gospel of John perhaps explains the frequency of the pronoun there. The possessive ἐμός is naturally in the mouth of Jesus (or of John his reporter) more than σός, for Jesus is speaking so much about himself. The possessive is more formal and more emphatic in the solemn [Page 289] words of Jesus in this Gospel.1 This is probably the explanation coupled with the fact that John was doubtless in Asia also when he wrote the Gospel and was open to whatever influence in that direction was there. The discussion of details will come later, as will the common use of the genitive of the personal pronouns rather than the possessive adjective, not to mention the article. The reflexive pronoun itself is really possessive when in the genitive case. But this as well as the common idiom ὁ ἵδιος need only be mentioned here. The Boeotian inscriptions show ἱδιος in this sense as early as 150 B.C. (Claflin, Syntax of Boeotian Dialect Inscriptions, p. 42). The line of distinction between the pronouns is thus not always distinct, as when ἔστων (οὐτον) is used in the reciprocal sense (Lu. 23:12), a usage known to the ancients. The necessity in the N. T. of using the genitive of personal pronouns in the third person after the disappearance of ὦς is like the Latin, which used eus, suus being reflexive. Farrar (Greek Syntax, p. 34) recalls the fact that its is modern, his being originally neuter also.

(e) DEMONSTRATIVE PRONOUNS (δεικτικα ὁντονομια). But deictic must have a special limitation, for all pronouns were possibly originally deictic (marking an object by its position). The anaphoric (ἁναφορικαι) pronouns develop out of the deictic by usage. They refer to or repeat. The true relative is a further development of the anaphoric, which includes demonstrative in the narrower sense. In a strict historical method one should begin the discussion of pronouns with the demonstratives in the larger sense and show how the others developed.2 But here we must treat the demonstrative pronouns in the narrower sense as distinct from the original deictic or the later relative. The demonstrative thus applies both to position and relation. The declension of the demonstratives is more akin to that of substantives than any of the other pronouns.3 ὅδε4 occurs only ten times in the N. T., and eight of these in the form τάδε, seven of which come in the formula in Rev. τάδε λέγει (as Rev. 2:1, etc.). The others are τάδε (Ac. 21:11), τῇδε (Lu. 10:39), τήνδε (Jas. 4:13).5 [Page 290] The inscriptions and the papyri agree with the N. T. in the great rarity of ὅδε in the later koine.1 But in the LXX it is commoner, and chiefly here also τάδε λέγει (Thackeray, Gr., p. 191). There are also many examples of ὕς as a demonstrative, as Ro. 14:5 and

---

1 Simcox, Lang. of the N. T., p. 54. Dr. Abbott (Joh. Gr., p. 295) thinks that John’s love of contrast leads him to use ὢμης as often as all the Synoptists.

3 lb.
4 Gildersleeve (Am. Jour. of Phil., 1907, p. 235) considers ὅδε the pron. of the first person, ὢτος of the second, ἔκεινος of the third.
5 Cf. Blass, Gr. of N. T. Gk., p. 35 f. For the etymology of the dem. pron. see Brug., Gk. Gr., p. 242 f.
1 See Nachm., Magn. Inschr., p. 145; Dieterich, Unters., p. 197; Maysen, Gr. d. griech. Pap., p. 308.
also cf. ὦ, ἦ, τό with δέ, as ol δέ in Mt. 27:4. This latter demonstrative construction is very common. Ἀὐτὸς is beginning to have a semi-demonstrative sense (common in modern Greek) in the N. T., as in Lu. 13:1, ἐν αὐτῷ τῷ καυρῷ. There is little to say on the non-syntactical side about ἕκάνος and οὖτος save that both are very common in the N. T., οὖτος extremely so, perhaps four times as often as ἕκανος which is relatively more frequent in John. Blass points out the fact that οὖτος-ι does not appear in the N. T. (nor in the LXX), though the adverb νον-ι is fairly common in Paul and twice each in Acts and Hebrews. Ὁυχί is much more frequent especially in Luke and Paul. Smyth compares ἕ-κανος (κέανος in Homer) to Oscan e-tanto. Modern Greek uses both forms and also ἕ-τοῦτος and τοῦτος in the nominative.

Of the correlative demonstratives of quality τός is not found in the N. T. and τοῦτος only once (2 Pet. 1:17). Τοῦτος (neuter τοῦτο and –ον) occurs fifty-seven times, chiefly in the Gospels and Paul's earlier Epistles (Gal. 5:21). We find neither τός nor τόσος as well as τοῦτος (the only correlative demonstrative of quantity) is less frequent than τοῦτος (cf. Lu. 7:9). The neuter is also in –ον and –ο. Of the correlative demonstratives of age τήλικος alone is found four times (cf. Jas. 3:4). See also ch. XV, VI.

(f) RELATIVE PRONOUNS (ἄναφορικά ἄντωνυμία). Homer shows the transition of the demonstrative to the relative, using five forms (ὁ, ὦ τε, ὦς, ὦς τε, ὦς τίς). Attic dropped ὦ and ὦ τε as well as ὦς τε. This use of τε with ὦ and ὦς may be compared with the common use of the Latin qui = et is. So the Hebrew הַי (‘this’) is sometimes relative. Cf. German der and English that. Relatives in the narrower sense grew naturally out of the anaphoric use of the demonstrative. The weakening of ὦ to the article and the introduction of the longer demonstratives (ὅδε, οὖτος, ἕκανος) left ὦς more and more for the true relative use. ὦ and ὦς have a different etymology. Relative ὦς=Sanskrit yás. There are thus only two pure relatives that survive in the N. T., ὦς and ὦς τίς. ὦσπερ and ὦσπερτε are not found save that the Western and Syrian classes read ὦπερ in Mk. 15:6. ὦσπερτε in Jo. 5:4 disappears with the rejection of that verse. Already the papyri and the inscriptions show the rare occurrence of ὦς τίς, confined as a rule to the nominative and gradually disappearing in the modern Greek before ὦ ὦποιος and even ποῦ. Compare the vulgar “what” in “the man what said that.” ὦς τίς is, of course, merely ὦς plus the indefinite τις in the sense of ‘any one’ or again of ‘somebody in particular.’ Both of these senses occur in the N. T. usage. The N. T. follows the papyri and inscriptions in using only the nominative of ὀς τίς save the neuter accusative ὦς τι (Lu. 10:35), and the genitive in set phrases like ἔως ὦς τοῦ (Jo. 9:18). It is used in both the singular and the plural.

2 Blass, Gr. of N. T. Gk., p. 171.
3 Ib., p. 35; Thackeray, p. 191.
4 The Ionic Dial., p. 448.
1 Mayser, Gr. d. griech. Pap., p. 310.
however, but is otherwise nearly indeclinable. Ὑς γε (Ro. 8:32) is, of course, simply ὓς plus the intensive particle γε. ὅς itself is many times more common in the N. T. than ὅστις and raises no questions save many syntactical ones. ὅς, ὅπος, ὅς, ἕλικος are also relatives of quality, quantity and age. ὅς is found only fourteen times in the N. T., ten of them in Paul’s writings (cf. 2 Cor. 10:11). ὅπος can count up only five examples, four in Paul if we credit to him Ac. 26:29. This is a little strange when one recalls how common it is in the modern Greek. But the correlatives generally are weak in the vernacular κοινή.

Ὅς itself is many times more common in the N. T. than ὅστις and raises no questions save many syntactical ones. οἶος, ὁ ποῖος, ὅσος, ἡ λίκος are also relatives of quality, quantity and age. οἶος is found only fourteen times in the N. T., ten of them in Paul's writings (cf. 2 Cor. 10:11).

 INTERROGATIVE PRONOUNS. Τίς (τί) is fairly common in the N. T. both in direct (Mt. 21:31) and indirect questions (Mt. 20:22) like the papyri usage. Τίς, τί in the Thessalian Greek is κίς, κί. So Sanskrit kās, Latin quis, Gothic hwās, English who, German wer. In Latin and English the relative is formed from the same root, but not so in the Greek. In modern Greek, however, τίς has vanished before ποῖος (cf. ὅστις before ὅ ποῖος),6 accented ποιός, though τί (indeclinable) survives strangely enough in the sense of “what sort.”7 In the N. T. the qualitative correlative [Page 292] ποῖος is used fairly often as a direct interrogative (cf. Mk. 11:28) and sometimes as an indirect interrogative (Mt. 24:42). Ποταπός is used a few times in direct (Mt. 8:27) and indirect also (Lu. 7:39). Πόσος is still used as a direct interrogative (Mt. 12:12) in quantitative questions and a few times in indirect questions (Mk. 15:4). Πηλίκος occurs only twice (one of these doubtful, Gal. 6:11, W. H. ἥλικοις margin) and both times in indirect question (Heb. 7:4). The disappearance of duality has taken ποτέρος entirely away, though ποτέρον occurs once as an adverb in an indirect question (Jo. 7:17). In the LXX we find ποτέρον only once in Job (Thackeray, Gr., p. 192). Modern Greek does not use πηλίκος, though πόσος survives.

 INDEFINITE PRONOUNS. Like the Latin ali-quis (interrogative quis) the Greek τίς differs from the interrogative τίς only in accent. It is very common in the N. T. (as Lu. 1:5), but already it is giving way to ἐς (Mt. 8:19), a usage not unknown to the older Greek.1 In the N. T. we have ἐς τίς together (Mk. 14:47; Lu. 22:50). Modern Greek has supplanted τίς, τί by κανεὶς (καν, ἐς) and καθεὶς (cf. καθ ἐς in N. T.).2 The negative forms μή τίς and οὔτε τίς do not appear in the N. T. save that μήτι occurs in questions (Mt. 12:23) and μή τις with ἵνα. But μηδεὶς and οὐδεὶς are very common. The old δεῖμα meets us only once (Mt. 26:18), but hangs on in the modern Greek.3 Οὐ πᾶς and μή πᾶς belong wholly to Syntax.

 DISTRIBUTIVE AND RECIPROCAL PRONOUNS. These pronouns have an insecure place in the N. T. with the exception of ἀλλός, ἀλλήλων, ἐκαστος and ἐκεῖρος.

---

6 Thumb, Handb., p. 94.
7 Ib.
2 Thumb, Handb., p. 95 f.
3 Ib., p. 98.
Ἑκάτερος like πότερος has vanished, as implying duality. It is rare in the LXX (Thackeray, Gr., p. 192). Ἄμφω is gone, but ἄμφοτεροι lingers on in some fourteen instances (cf. Mt. 9:17). Ἀλλάθιον (composed of ἄλλος, ἄλλος) is naturally only in the oblique cases of the plural, but is fairly common (cf. Jo. 4:33). It has vanished in the modern Greek. Ἑκαστος on the other hand appears only in the singular except in Ph. 2:4 (probably twice there). It too has disappeared in the modern Greek. Ἐτερος is beside ἄμφοτεροι the only surviving dual pronoun, and it goes down in the modern Greek along with ἄμφοτεροι. It is less common (97 times) in the N. T. than ἄλλος (150), chiefly in Matthew, Luke, Paul, Heb., never in Revelation, Peter, and only once in Jo. (19:37) and Mk. (16:12) and this latter in disputed part. It is usually in the singular (73 times, plural 24). The distinction (not always observed in the N. T.) between ἄλλος and Ἐτερος belongs to Syntax. The use of ἐς τὸν ἐνα as reciprocal (1 Th. 5:11) and of ἑαυτῶν (1 Cor. 6:7) along with other uses of ἄλλος and Ἐτερος will receive treatment under Syntax.

V. Adverbs (ΕΠΙΠΡΗΜΑΤΑ)

1. NEGLECT OF ADVERBS. A glance at the average grammar will show that the grammarians as a rule have not cared much for the adverb, though there are some honorable exceptions. Winer has no discussion of the adverb save under Syntax. Still others have not understood the adverb. For instance, Green1 says that once in the N. T. "a preposition without change is employed as an adverb," viz. ὑπερ ἔνα (2 Cor. 11:23). That is a perfunctory error which assumes that the preposition is older than the adverb. It is of a piece with the idea that regards some adverbs as “improper” prepositions. Donaldson2 says that, with compliments to Horne Tooke, “the old grammarian was right, who said that when we know not what else to call a part of speech, we may safely call it an adverb.” Certainly it is not easy nor practicable always to distinguish sharply between the adverb and preposition, conjunction, interjections and other particles.3 But the great part played by the adverb in the history of the Greek language makes it imperative that justice shall be done to it. This is essential for the clear understanding of the prepositions, conjunctions and particles as well as the adverb itself. Substantive and verb blend at many points and glide easily.
into each other in English, for instance. Attention has often been called to the use of “but” in English as adverb, preposition, conjunction, substantive, adjective and pronoun.4

[Page 294] 2. Formation of the Adverb. The name suggests a mere addendum to the verb, an added word (like the adjective) that is not necessary. But in actual fact adverbs come out of the heart of the language, expressions fixed by frequent usage.

(a) Fixed Cases. A large number1 of words retain the case-ending in the adverb and often with the same function. Perhaps the bulk of the adverbs are either the simple case used directly in an adverbial sense or the formation by analogy. It is just because adverbs are usually fixed case-forms or remnants of obsolete case-forms that they deserve to be treated under the head of Declensions. They have to be approached from the standpoint of the cases to understand their history. Leaving analogy for the moment let us see some examples of the cases that are so used. The cases most commonly used thus are the ablative, locative, instrumental and accusative.2 The dative and genitive are seldom employed as adverbs. The vocative never occurs in this sense, and the nominative (so occasionally in Sanskrit) only in a phrase like καθές in the addition to John’s Gospel (Jo. 8:9), τὸ καθ’ ἐξ (Ro. 12:5). Cf. ὁνα-μίξ.

Examples of the various cases as used in the N. T. will be given without attempting to be exhaustive. The κοινή and the modern Greek illustrate the same general tendencies as to adverbs that we see in the earlier Greek. Here the N. T. is in close accord with the papyri as to adverbs in use.3

(1) The Accusative. The most obvious illustration of the accusative in adverbs is the neuter of adjectives in the positive, comparative and superlative (singular and plural). In the comparative the singular is the rule, in the superlative the plural, but variations occur.4 In the modern Greek accusative plural is more common even in the comparative (Thumb, Handb., p. 77). Take for the positive αὖριον, εὐθύ (ζ added later), ἐγγύς, μέγα, μέσον, πλησίον, πολύ, ταχύ, σήμερον, ἄλλα (ἄλλα), πολλά, μακράν. The comparative may be illustrated by ὑστερον, βέλτιον, and the superlative by πρῶτον (and πρῶτα) and ἡστα. Cf. also ταχίστην. Sometimes the article is used with the adjective where the adverbial idea is encroaching, as τὸ λοσπόν, τὸ πολλά, and note also τὴν ἀρχήν (Jo. 8:25), substantive with article. But the substantive alone has abundant examples also, as ἀκμή, ἀρχή, δορεάν, πέραν, χάριν. [Page 295] Σχεδόν is a specimen of the adverb in –δόν, –δά. Cf. also ὁμοθυμαδόν, ὅτι ἦδον. The accusative in adverbs is specially characteristic of the κοινή (cf. Mays er, Gr. d.)

2 Hirt, Handb. etc., pp. 320 ff.
(2) The Ablative. All adverbs in –ως are probably ablatives. Καλως, for instance, is from an original καλωδ. The δ (Sanskrit t) is dropped and a final ω is added.1 Cf. old Latin meritudo, facilum.2 The ουτως, ως of the Greek correspond exactly with the old Sanskrit tād, yād. The ending in –ως comes by analogy to be exceedingly common. Practically any adjective can by –ως make an adverb in the positive. Some, like διωλείπτως, belong to the later Greek (κοινή).3 Participles also may yield such adverbs as φειδομένως (2 Cor. 9:6), ὁμολογομένως (1 Tim. 3:16), ὄντως (Mk. 11:32). Radermacher (N. T. Gk., p. 54) cites ὅρκοντως, τετολμήκτως (Diod., XVI, 74. 6), etc. The bulk of the adverbs in –ως are from adjectives and pronouns. But the examples of –ως are rare in the modern Greek (Thumb, Handb., p. 77).

(3) The Genitive. There are not many adverbs in this case outside of those ending in –ου, like αὐτοῦ, ὅπου, ποῦ, ὁμοῦ and –ῆς (ἐξῆς). This use survives in modern Greek. Cf. the local use of the genitive in Ἐφέσου (Ac. 19:26). The common use of ἡμέρας, νυκτός verges toward the adverb.4 Cf. also τοῦ λοιποῦ (Gal. 6:17). The genitive is almost never used adverbially in Sanskrit.5

(4) The Locative. This is a rare use in Sanskrit,6 but more frequent in Greek. Instance ἐκεῖ, κύκλῳ, ὅκοι, πρωί. So also ἄει, πέριοι, etc. Hirt7 (but not Brugmann) likewise treats examples like δημοσία, ἱδία, πεζῇ, etc., as locative. Certainly ποῖ is

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).
locative, but it does not appear in the N. T. Cf. also τῷ ὄντι (article and participle) in adverbial sense (Ro. 7:23).

(5) The Instrumental. This case lends itself naturally to the adverb where the idea of manner (associative) is so common. ⁸ In the Sanskrit it is very common for adverbs to be in the instrumental. ⁹ Such adverbs as ḍu (cf. ablative ḍu from same root), ἐκφῇ, κρυφῆ (ἡ), λάθρᾳ (ἡ), μάλα, πάντῃ (ἡ), πανταχῆ (ἡ), τάχα, etc., are doubtless [Page 296] instrumental. In some cases ἦ is added to bring it in harmony with the locative-dative cases with which it blended. ¹ Brugmann ² also puts here such words as ὄνο, κάτω, ἔξω, ἀντέρω, ἀντιτῶ, οὖ-πω. –Πω is by ablaut from –πη (so Laconic πή-ποκα).

(6) The Dative. As in the Sanskrit, ³ so in the Greek the dative is very rare in adverbs. Indeed Hirt ⁴ is not far wrong when he says that it is not easy to find any dative adverbs distinct from the locative, though he accepts παραί, χαμαί, κτλ. as dative (p. 260). Brugmann ⁵ thinks otherwise, and one is slow to dissent from the modern master of comparative grammar. He cites πάλα, χαμαί, καταί, παραί, κόκλω, σπουδῆ, etc. But Delbrück ⁶ is against Brugmann here. Besides the dative in its proper sense is a little difficult to fit into an adverb. But we have given enough to justify the treatment of adverbs under the declensions. ⁷

(b) Suffixes. Other adverbs are formed by suffixes which may be relics of lost case-endings that are no longer clear to us. Here only the main suffixes in use in the N. T. will be mentioned. For –άκις take πολλάκις and the numeral adverbs like τετράκις, etc. For –αχοῦ note πανταχοῦ. For –δε take οἷκαδε. For –δον take

———, Syntaktische Forschungen. 5 Bde. (1871–1888).

6 Grundr., p. 60 f.
ὁμοθυμαδόν (Ac. 18:12). For –ης we may note ἐξαίφνης, ἐξῆς, ἐφεξῆς. Those in –θε(ν) are numerous, like ἄνωθεν, ἐξωθεν, οὐρανόθεν, παυδιόθεν, etc. Αὐτόθι is common in the papyri, but not in the N. T. The deictic ἓ appears in νυνί and οὖχι. An example of –τες appears in μόλις (cf. μόγις Text. Rec. in Lu. 9:39). For –τί we may note ἔξαίφνης, ἑξῆς, ἐφεξῆς. Those in –ν(ν) are numerous, like ἄνωθεν, ἔξωθεν, οὐρανόθεν, παυδιόθεν, etc. Αὐτόθι is common in the papyri, but not in the N. T.

(c) COMPOUND ADVERBS. Some adverbs are due to the blending of several words into one word, perhaps with modification by analogy. The κοινή is rather rich in these compound adverbs and Paul fairly revels in them. As samples take ἐκπαλαι (2 Pet. 2:3), κατέναντι (2 Cor. 12:19), κατενώπιον (Eph. 1:4), παρατήρια (2 Cor. 4:17), ἀπροσωπολημπτώς (1 Pet. 1:17), παραρημάμα (Lu. 1:64), ὑπερέλλον (Eph. 4:10), ὑπερέλλον (2 Cor. 10:16), ὑπερπερισσοῦ (1 Th. 3:10), ὑπερπερισσοῦ (2 Cor. 11:5), ὑπερπερισσοῦ (Mk. 7:37), etc. The intense emotion in 2 Cor. explains the piling-up and doubling of some of these prepositional phrases. Occasionally a verbal clause is blended into one word and an adverb made by analogy with –ως. So (from νοῦν ἔχω νουνεχόντως (Mk. 12:34), used by Aristotle and Polybius along with another adverb like νουνεχόντως in Isocrates. But in Mark it is used without any other adverb. ὑπερβαλλόντως (2 Cor. 11:23) is made from the participle and is common in Attic (Xen., Plato). There are, besides, adverbial phrases like ἄπο μακρόθεν (Mk. 15:40) ὑπὸ ἄνωθεν, ἔως κάτω (Mt. 27:51), etc. Cf. Con. and Stock, Sel. fr. LXX, p. 47. See chapter V, p. 170, for discussion of the formation of compound adverbs which are very common in the κοινή. Paul uses the idiom frequently. For the use of adverbs in the κοινή, see Mayser’s careful list from the papyri, pp. 455 ff., and Nachmanson, Magn. Inschr., p. 138 f. New adverbs are continually made in the later Greek, though many of the older ones survive in the modern Greek. Cf. Thumb, Handb., pp. 78 ff. He groups them under place, time, manner and quantity.

(d) ANALOGY. A word is needed to accent the part played by analogy in the formation of adverbs, though it has already been alluded to. The two examples mentioned above, νουνεχόντως and ὑπερβαλλόντως will serve as good illustrations of the

1 Giles, Man., p. 240.

———, Epigraphisch-grammatische Bemerkungen (Eranos 11, 1912).
———, Laute und Formen der magnetischen Inschriften (1903).
work done by the principle of analogy. The bulk of the –ως adverbs are ablatives made by analogy.  

(e) The Comparison of Adverbs. In general the adverb is like the adjective save that in the comparative the accusative singular is used, like τάχιον, and the accusative plural in the superlative, like τάχιστα. But, per contra, note πρῶτον and κατωτέρω (Mt. 2:16), περισσοτέρως (2 Cor. 1:12), σπουδαιότερως (Ph. 2:28), Ἐσχάτως (Mk. 5:23), πορροτέρω (Lu. 24:28. AB –ρον). Cf. further ch. XII, III.

3. Adverbial Stems. The derivation of the adverb deserves a further word, though the facts have already been hinted at. Brief mention is all that is here called for by way of illustration.

[Page 298] (a) Substantives. As N. T. examples of adverbs from substantives may be mentioned ἄρχην, δωρεάν, χάριν.

(b) Adjectives. It was and is always possible to make an adverb from any Greek adjective by the ablative ending –ως. Cf. both ταχύ (accusative) and ταχέως (ablative). Indeed the line between the adjective and adverb was never sharply drawn, as will be shown when we come to the study of the syntax of the adjective (cf. English “looks bad,” “feels bad,” a different idea from the adverb, however). In passing note ἐχούσα (Ro. 8:20) and δευτεραίοι (Ac. 28:13) in strict accordance with the Greek idiom. The comparison of adverbs is another link between adverb and adjective. In most cases, however, it is merely the use of the comparative and superlative forms of the adjective as an adverb. But in some cases the comparative and superlative adverb is made without any corresponding adjective, done by analogy merely. So μᾶλλον, μάλιστα, from μάλα, ἄνωτερον from the adverb ἄνω. Cf. also ἐγγύτερον (Ro. 13:11) from ἐγγύς, κατωτέρω (Mt. 2:16) from κάτω, and πορρότερων (Lu. 24:28) from πόρρω. Comparative adjectives made from positive adverbs are, on the other hand, seen in ἐξότερος (Mt. 8:12), ἐσώτερος (Heb. 6:19), κατώτερος (Eph. 4:9). Κατωτέρω, περισσοτέρως (Heb. 2:1, often in Paul; (Gal. 1:14), σπουδαιότερως (Ph. 2:28), τολμηρότερος (Ro. 15:15) rather than the forms in –τερον are due to analogy of the ablative –ως. Adverbs made from participles can be looked upon as adjectival or verbal in origin, since the participle is both verb and adjective.

(c) Numerals. All that is necessary here is to mention such words as πρῶτον, δίς, ἑπτάκις, etc. In Ac. 11:26 we have πρῶτος instead of πρῶτον. Blass (Gr. of N. T. Gk., p. 58) cites for –ως Clem., Hom. 9, 4; 16, 20; Polyb. vi, 5. 10; Diod., etc.

(d) Pronouns. The pronominal adverbs are very numerous, like οὗτος, ὡσαυτός, etc., αὕτοι, ποτέ, τότε, ὁδε, etc. As with the correlative pronouns, so the correlative adverbs are lessening. Of the indefinite adverbs only ποτε, ποῦ (a few times), and πως (only in ἐπίς, μὴ πως) appear. 1 Forms like ὃ, ὁποί, ποῦ have vanished before ὅ, ὁποί, ποῦ.
ὅπου, ποῦ. Cf. English, 2 “where (rather than ‘whither’) are you going?” Cf. also the accusative τί (Mk. 10:18) = “why.”

(e) VERBS. Besides such words as νουχεῖς (verbal phrase) and participles like ὀντως, ὀμολογουμένως, φειδομένως, ὑπερβαλλόντως one should note Ἐβραίστι (from Ἐβραίζω), Ἑλληστί (from Ἑλληνίζω), [Page 299] etc. In Jas. 4:13; 5:1 ἄγε is used with the plural as an adverb, if indeed it is not in reality an interjection. The modern view of the imperative forms like ἄγε (cf. vocative ἄγε from ἄγος) is that it is merely the root without suffix. 1 In the case of δεῦρο we actually have a plural δεῦτα.

Moulton2 illustrates the close connection between interjectional adverb and verb by the English “Murder!” which could be mere interjection or verbal injunction according to circumstances.

4. Use of Adverbs. This is still another way of looking at the subject, but it is a convenience rather than a scientific principle. Blass3 in his N. T. Grammar follows this method solely.

(a) ADVERBS OF MANNER. These are very numerous indeed, like πνευματικῶς, σπουδαίως, ἑσχάτως, ἐκεῖ (Mk. 5:23) is not like the English idiom. The phrase really means that she has it in the last stages. Cf. βαρέως ἔχει (Pap. Brit. M., 42).

/tcp, so common in Attic, has nearly gone in the N. T. (only in Mk. 14:7; Mt. 25:21, 23; Ac. 15:29; Eph. 6:3 quot.). ἔγε occurs also in Lu. 19:17 (W. H. text, margin tcp). Καλῶς is common. Bελτιων appears once (2 Tim. 1:18) and κρείσσον often (1 Cor. 7:38). The comparative adverb διπλότερον (Mt. 23:15) is irregular in form (ὕπλούστερον) and late. 4

(b) ADVERBS OF PLACE. These answer the questions “where” and “whence.” “Whither” is no longer a distinct idea in N. T. Greek nor the κοινή generally. Even in ancient Greek the distinction was not always maintained.5 Blass6 carefully illustrates how “here” and “hither” are both expressed by such words as ἐνθάδε (Ac. 16:28; Jo. 4:16), oddly enough never by ἐνταῦθα, though ὁδε (especially in the Gospels) is the common word (Lu. 9:33, 41). But ἐκεῖ is very common in the sense of ‘there’ and ‘thither’ (here again chiefly in the Gospels) as in Mt. 2:15, 22. Ἐκεῖσε (‘thither’) is found only twice, and both times in Acts (21:3; 22:5), which has a literary element. So ὁδος in both senses (Lu. 4:16; 10:1) and δου (very common in John’s Gospel, 14:3 f.). The interrogative ποῦ (Jo. 1:39; 3:8) follows suit. The indefinite ποῦ is too little used to count (Heb. 2:6) and once without local idea, rather ‘about’ (Ro. 4:19). ἄλλου ὁδοῦ occurs once (Mk. 1:38), but πανταχοῦ several times (Lu. 9:6, etc.). ὁμοῖος is found four times only (Jo. 4:36, etc.), and once D adds ὁμός (Ac. 20:18). [Page 300] Πανταχῆ(η) likewise is read once (Ac. 21:28), Syrian class –οῦ. In Ac. 24:3 πάντη(η) is contrasted with πανταχοῦ. Other adverbs of place in the N. T. are ἄνω, ἐπάνω,

2 Green, Handb. to N. T. Gk., p. 137.
1 Moulton, Prol., p. 171.

3 Gr. of N. T. Gr., pp. 58 ff.
4 Ib.
5 Ib.
6 Ib.
ἐκτός, ἄσω, ἔξω, κάτω. A number of adverbs answer to the question “whence.” They are usually words in –θεν. Ἀλλαχόθεν (Jo. 10:1) is found only once in the N. T. Ἀνωθεν (Mk. 15:38) is more frequent, though never κάτωθεν. The only pronominal forms that appear in the N. T. are ἐκείθεν (Rev. 22:2, rather common in Matthew), ἔνθεν (Mt. 17:20), ἔντ’ ὑθεν (twice in Jo. 19:18, and in contrast with ἐκείθεν Rev. 22:2), πάντοθεν (Mk. 1:45), ὑθεν (Mt. 12:44), πόθεν (Mt. 21:25). The last two are fairly frequent. Blass1 notes how “stereotyped and meaningless” the ending –θεν has become in many examples, especially with ἐπροσθεν (common in Matthew and Luke) and ὁπθεν (rare). See both in Rev. 4:6. In some cases by a little effort the real force of –θεν may be seen, but the old Greek soon allowed it to become dim in these words. In the case of ἐσωθεν and ἐξωθεν Blass2 insists on the force of –θεν only in Mk. 7:18, 21, 23; Lu. 11:7. Cf. also κυκλόθεν (Rev. 4:8). The addition of ἀπό occasionally may be due either to the weakened sense of –θεν or to a fuller expansion of its true idea. So ἀπό ἄνωθεν twice (Mt. 27:51, so W. H. against ΝL ἄνωθεν, Mk. 15:38), ἀπό μακρόθεν (Mk. 5:6; 15:40, etc.), ἐκ παιδιόθεν (Mk. 9:21). Blass3 observes that both μακρόθεν and παιδιόθεν are late words and that late writers are fond of using prepositions with –θεν as Homer had ἀπό οὐρανόθεν. But Luke used only οὐρανόθεν in Ac. 14:17.

(c) ADVERBS OF TIME. The list is not very great, and yet appreciable. Ἀεί (Ac. 7:51) is not in the Gospels at all and is largely supplanted by πάντοτε (Jo. 6:34) like the κοινή and modern Greek. Ἡνίκα is read twice only (2 Cor. 3:15 f.). Ἐπειτα (1 Cor. 12:28) and ἐπειτα (Mk. 4:17) are about equally frequent. ὅτε (Mt. 9:25) occurs 101, ὅταν (Mt. 9:15) 130 times. Ὅποτε appears only in the Syrian class in Lu. 6:3 against the neutral and Western ὅτε (so W. H.). Πότε (Mt. 17:17) and ποτέ (Lu. 22:32) are both far less common than ὅτε and ὅταν. But τότε and πάλιν amply atone for this scarcity. All the numeral adverbs (ἀπαξ, πρῶτον, δίς, ἐπτάκις etc.) belong here also.

5. Scope of Adverbs. Here again we are retracing ground and crossing our steps, but a brief word will be useful to show how from adverbs grew other parts of speech. The fact has been stated before. What is here called for is some of the proof and illustration.

[Page 301] (a) RELATION BETWEEN ADVERBS AND PREPOSITIONS. When we come to study prepositions (ch. XIII) a fuller discussion of this matter will be given. Here the principle will be stated. “The preposition therefore is only an adverb specialized to define a case-usage.”1 That puts the matter in a nutshell. Many of the older grammars have the matter backwards. The use of prepositions with verbs is not the original one. In Homer they are scattered about at will. So with substantives. “Anastrophe is therefore no exception, but the original type”2 like τίνος ἐνεκα (Ac. 19:32). To quote

1 Gr. of N. T. Gk., p. 59.
2 Ib.
3 Ib.
Giles again, “between adverbs and prepositions no distinct line can be drawn.” As samples of cases in prepositions take παρ-ός (gen.), παρ-άι (dat.), περ-ι (loc.), παρ-ά (instr.). It is unscientific to speak of adverbs which “may be used like prepositions to govern nouns” and then term them “preposition adverbs” or “spurious prepositions.” Prepositions do not “govern” cases, but more clearly define them. When adverbs do this, they are just as really prepositions as any others. These will be treated therefore in connection with the other prepositions. They are words like ἄμα, ἄνευ, ἓξω, ὀπίσω, etc.

(b) Adverbs and conjunctions. These are usually of pronominal origin like ὅτε (acc. plus τε), οὗ (gen.), ὡς (abl.), ὀλλά (acc. plural), ἕνα (instr.), etc. Some conjunctions are so early as to elude analysis, like δέ, τέ, etc.5 But in most cases the history can be traced. Blass (Gr. of N. T. Gk., p. 60) remarks on the poverty of the N. T. Greek in particles, a poverty as early as the Ἀθηναίων Πολιτεία of Aristotle, which is much barer than the N. T. These conjunctions and other particles in the N. T. are cited by Blass: ὀλλά, ἄμα, ἄρα, ἄραγε, ἄρα, ἄρα γε, ἄχρις, γάρ, γε, δέ, δή, δήπο, δό, δόσερ, έν, έπερ, εί, είπερ, είτα, είτε, έπαυν, ἐπει, ἐπεί, ἐπείδη, ἐπείδηπερ, ἐπείπερ (only as variation in Ro. 3:30), ἐπείτα, ἐοις, ἢ, ἢ or εἰ μήν, δήπο, δήνικα (ἐπερ only variation in Jo. 12:43), ἢτοι, ἵνα, καθά, καθάπερ, κάθο, καθότι, καθός, καί, καίπερ, καίτοι(γε), μέν, μευνόγίε, ἄντοι, μέχρις(ὁ) οὗ (μέχρις variation for), μή, μηδέ, μήπε, μήπτη, ναί, νή, δήμως, ὅποτε, ὅπως, ὅπως, ὅτεν, ὅτε, ὅτα, οὗ, οὐχί, οὐδέ, οὐκοῦν, οὖν, οὔτε, περ with other words, πλίν, πρίν, τε, τοι (in καίτοι, μέντοι, etc.), τοι-γαρ-οὖν, τοίνυ, ὡς, ὑσαν, ὑσί, ὑσπερ, ὑσπερεί, ὑστε. Several of these occur only once (δήπο, ἐπείδηπερ, νή, ὅποτε, οὐκοῦν). [Page 302] But Blass has not given a complete list. Cf. also δίπτ, δεν, οὗ, ὅποι, πότε, etc. Fifteen other Attic particles are absent from this N. T. list. The matter will come up again in ch. XXI.

(c) Adverbs and intensive particles. Πέρ is an older form of περ-ί. Usually, however, as with γε, the origin is obscure. Others used in the N. T. are δή, δήπο, μέν, τοί (with other particles). See ch. XXI.

(d) Adverbs and interjections. Interjections are often merely adverbs used in exclamation. So with ἀγα, δεῦρο, δεύτε, ἣ, ἴδε, ἴδοι, οὖν, οὖαί, ἤ. Interjections may be mere sounds, but they are chiefly words with real meaning. ἀγα and ἴδε are both verb-stems and ἴδοι is kin to ἴδε. The origin of the adverbs here used as interjections is not always clear. οὖα as in Mt. 11:21 (common in the LXX, N. T. and Epictetus) has the look of a dative, but one hesitates. As a substantive ἰ οὐαί is probably due to ἥλιψις or ταλαππορία (Thayer). Cf. chapters XII, V, and XVI, V, (e), for use of article with adverb, as το νῦν. For the adverb like adjective, as ἰ δντος χήρα (1 Tim. 5:5),

Giles

GILES, P., A Short Manual of Comparative Philology. 2d ed. (1901).

5 Giles, Man., p. 343.
see p. 547. In Lu. 12:49 τί may be an exclamatory adverb (accusative case), but that is not certain. Δεῦρο sometimes is almost a verb (Mk. 10:21). The relative adverb ὡς is used as an exclamation in ὡς ὑφραζότι (Ro. 10:15) and ὡς ὠνήξερενήτα (Ro. 11:33). The interrogative πῶς is likewise so employed, as πῶς δύσκολόν ἐστι (Mk. 10:24), πῶς συνέχομαι (Lu. 12:50), πῶς ἔφιλε οὐτόν (Jo. 11:36). Cf. Blass, Gr. of N. T. Gk., p. 258. Thus we see many sorts of adverbs and many ways of making them.

[PAGE 303] CHAPTER VIII

CONJUGATION OF THE VERB (ῬΗΜΑ)

I. Difficulty of the Subject. The discussion of the verb gives greater difficulty than that of the noun for two reasons especially. For one thing the declension (κλίσις) of nouns is more stable than the conjugation (συζυγία) of the verb. This difficulty applies to both the forms and the syntax of the verb. There is besides special difficulty in the Greek verb due to the ease and number of new verbal formations. Sanskrit and Greek can be compared with more ease than Greek and Latin. Giles indeed calls the Latin verb-system “only a mutilated fragment” of the original parent stock, so that “a curious medley of forms” is the result, while in the syntax of the verb no two Indo-Germanic languages are further apart than Greek and Latin. Both noun and verb have suffered greatly in the ravages of time in inflection. It is in declension (cases) and conjugation (personal endings) that noun and verb mainly differ. “These suffixes [used for the present tense], however, are exactly parallel to the suffixes in the substantive, and in many instances can be identified with them.”

II. Nature of the Verb.

(a) VERB AND NOUN. In itself verbum is merely ‘word,’ any word, and so includes noun also. As a matter of fact that was probably true originally. In isolating languages only position and the context can determine a verb from a noun, and that is often true in English to-day. But in inflected tongues the case-endings and the personal endings mark off noun and verb. But in simple truth we do not know which is actually older, noun or verb; both probably grew up together from the same or similar roots. Schoemann, however, is much more positive that “the first word [Page 304] which man spoke was essentially much more a verb than a noun.” But, whether the verb is the first word or not, it is undoubtedly the main one and often in the inflected tongue forms a sentence in itself, since the stem expresses the predicate and the ending the
It is worth noting also that by the verb-root and the pronominal root (personal endings) the verb unites the two ultimate parts of speech. The verb and noun suffixes, as already said, are often identical (Giles, Manual, etc., p. 424). In all sentences the verb is the main part of speech (the word par excellence) save in the copula (ἐστὶ) where the predicate is completed by substantive or adjective or adverb (another link between verb and noun). “A noun is a word that designates and a verb a word that asserts” (Whitney, Am. Jour. of Philol., xiii, p. 275). A man who does not see that “has no real bottom to his grammatical science.”

(b) MEANING OF THE VERB. Scholars have found much difficulty in defining the verb as distinct from the noun. Indeed there is no inherent difference between nouns and verbs as to action, since both may express that. The chief difference lies in the idea of affirmation. The verb affirms, a thing not done by a noun except by suggested predication. Verbs indicate affirmation by the personal endings. Affirmation includes negative assertions also. Farrar cites also the German “abstract conception of existence” (Humboldt) and action (Tätigkeitswort), but they do not fit the facts. Curiously enough many ancient grammarians found time to be the main idea in the verb.

(c) PURE AND HYBRID VERBS. The close kinship between nouns and verbs appears in the verbal nouns which partake of both. The infinitive is a verbal substantive, and the participle is a verbal adjective. There is also the verbal in –τος and –τέος. Some of the properties of both verb and noun belong to each. They are thus hybrids. They are generally called non-finite [Page 305] verbs, because they do not make affirmation. They have no personal endings. They fall short of being mere verbs, but they are more than the noun. The pure verb has personal endings and is thus finite (limited). The two must be kept distinct in mind, though they run together sometimes in treatment. The finite verb has person and number expressed in the personal ending. The verbum finitum has modes while the verbum infinitum (infinitive and participle) has no modes.

III. The Building of the Verb. This is not the place for a full presentation of the phenomena concerning verb-structure. The essential facts as to paradigms must be assumed. But attention can be called to the fact that the Greek verb is built up by means of suffixes and affixes around the verb-root. So it was originally, and a number of such examples survive. Afterwards analogy, of course, played the main part. The oldest verbs are those which have the simple root without a thematic vowel like φη-μι

---

1 Monro, Hom. Gr., p. 1. In the Sans. it is to be noted that the noun had an earlier and a more rapid development than the verb. The case-endings appear first in the Sans., the verb-conjugation in the Gk., though the personal endings are more distinct in the Sans.
3 Cf. Gr. Gén. of Port Royal; Farrar, Gk. Synt., p. 38.
4 Ib. He considers the verb later than the noun because of its-complex idea. Cf. Schramm, Über die Bedeutung der Formen des Verbums (1884); Curtius, Die Bildung der Tempora und Modi im Griech. und Lat. (1846); Junius, Evolution of the Greek Verb from Primary Elements (1843); Lautensach, Verbalflexion der att. Inschr. (1887); Hogue, Irregular Verbs of Attic Prose (1889).
or ἔ-βην. This root is the ground floor, so to speak, of the Greek verb. On this root the aorist and present-tense systems were built by merely adding the personal endings. This was the simplest form of the verb. There is no essential difference in form between ἔ-φην and ἔ-στην. We call one imperfect indicative and the other second aorist indicative, but they are originally the same form. The term second aorist is itself a misnomer, for it is older than the so-called first aorist –σα or –α. The thematic stem (vowel added to root) is seen in verbs like –λιπ-ο/εν. On this model the rest of the verb is built. So all Greek root-verbs are either non-thematic or thematic. The denominative verbs like τιμ-ων are all thematic. On roots or stems then all the verbs (simple or compound) are built. The modes, the voices, the tenses all contribute their special part to the whole. The personal endings have to carry a heavy burden. They express not only person and number, but also voice. There are mode-signs and tense-suffixes, but no separate voice suffixes apart from the personal endings. The personal pronouns thus used with the verb-root antedate the mode and tense suffixes. The Sanskrit preserves the person-endings more clearly than the Greek, though the Greek has a more fully developed system of modes and tenses than the later classical Sanskrit.3 It seems certain that these pronominal [Page 306] suffixes, like –µι, –σι, –τι, are not in the nominative, but an oblique case1 connected with the stem: µε, σε, τι (cf. demonstrative τό). But the subject of personal endings is a very extensive and obscure one, for treatment of which see the comparative grammars.2 There is a constant tendency to syncretism in the use of these personal endings. Homer has fewer than the Sanskrit, but more than Plato. The dual is gone in the N. T. and other endings drop away gradually. The nominative pronoun has to be expressed more and more, like modern English.

IV. The Survival of –µι Verbs.

(a) A CROSS DIVISION. Before we take up modes, voices, tenses, we are confronted with a double method of inflection that cuts across the modes, voices and tenses. One is called the –µι inflection from the immediate attachment of the personal endings to the stem. The other is the –οι inflection and has the thematic vowel added to the stem. But the difference of inflection is not general throughout any verb, only in the second aorist and the present-tense systems (and a few second perfects), and even so the –µι conjugation is confined to four very common verbs (ἴηµι, ἔτηµι, δίδωµι, τίθηµι), except that a number have it either in the present system, like δεῖκ-υο-µι (with νο inserted here), or the aorist, like ἔ-βη-ν.3 The dialects differed much in the use of non-thematic and thematic verbs (cf. Buck, “The Interrelations of the Greek Dialects,” Classical Philology, July, 1907, p. 724).

(b) THE OLDEST VERBS. This fact is a commonplace in Greek grammar. It is probable that originally all verbs were –µι verbs. This inflection is preserved in optative forms like λόσµι, and in Homer the subjunctive 4 ἔθελωµι, ἦσµι, etc. The

simplest roots with the most elementary ideas have the –µι form. Hence the conclusion is obvious that the –µι conjugation that survives in some verbs in the second aorist and present systems (one or both) is the original. It was in the beginning λέγω-µι with thematic as well as φη-µι with non-thematic verbs.

(c) GRADUAL DISAPPEARANCE. In Latin the –µι ending is seen only in inquam and sum, though Latin has many athematic stems. In English we see it in am. Even in Homer the –µι [Page 307] forms are vanishing before the –ω conjugation. Jannaris (Hist. Gk. Gr., p. 234) has an excellent brief sketch of the gradual vanishing of the –µι forms which flourished chiefly in pre-Attic Greek. The LXX MSS. show the same tendency towards the disappearance of –µι forms so noticeable in the N. T., the papyri and other representatives of the κοινή. See numerous parallel illustrations in Helbing, Gr. d. Sept., pp. 104–110. In the LXX the transition to –ω verbs is less advanced than in the N. T. (Thackeray, Gr., p. 244) and the middle –µι forms held on longest. In the κοινή this process kept on till in modern Greek vernacular εἶµαι is the only remnant left. In the Attic δεικνύω, for instance, is side by side with δεικνύω. In the N. T. we find such forms as διοδώ (Rev. 3:9), ἵστω (Ro. 3:31, EKL), συνιστῶ (2 Cor. 3:1, BD).

(d) N. T. USAGE AS TO –µι VERBS. The –µι verbs in the N. T. as in the papyri are badly broken, but still in use.

1. The Second Aorists (active and middle). We take first the so-called second aorists (athematic) because they come first save where the present is practically identical. In some verbs only the second aorist is athematic, the stem of the verb having dropped the –µι inflection. A new view1 makes the second aorist sometimes “a reduced root,” but this does not show that in the parent stock the old aorist was not the mere root. Analogy worked here as elsewhere. Kaegi2 properly calls the old aorists of verbs like βάλω (ἔβλητο instead of the thematic and later ἐ-βαλετο) “primitive aorists.” In the early Epic the root-aorists and strong thematic aorists outnumber the σ

2 Gk. Gr., 1893, p. 245.
or weak aorists by three to one. The important N. T. –μι verbs will now be considered.

Βαίνω. Only in composition in N. T. (ἀνα-, προσ-ανα-, συν-ανα-, ἀπο-, δια-, ἕκ-, ἔμ-, κατα-, μετα-, παρα-, προ-, συν-). In the LXX it is rare in simplex. The papyri use it freely with nine prepositions. Note the common forms like ἀνέβη (Mt. 5:1). The “contract” forms are in the imperative as in the Attic poets (ἔσβα, κατάβα). Mayser gives no examples from the papyri, nor does the LXX have any (LXX only ἀνάβηθι, κατάβηθι, –βητε, –βητω, –βήτωσαν). So ἀνάβα (Rev. 4:1), ἀνάβατε (Rev. 11:12), κατάβα (Syrian class in Mk. 15:30), καταβάτω (Mt. 24:17; 27:42. Cf. also Mk. 13:15; 15:32; Lu. 17:31), μετάβα (Mt. 17:20). On the other hand note the usual κατάβηθι (Mt. 27:40, etc.), μετάβηθι (Jo. 7:3), προσανάβηθι (Lu. 17:31), κατάβατω (Mt. 24:17; 27:42). On the other hand note the unusual κατάβη (Jo. 14:10). The forms in –άτω, –ατε, –άτωσαν are like the Doric.

Γινώσκω. This verb in the Ionic and κοινή γίνω form is very common in John's Gospel and the First Epistle. It is used in composition with ἀνα-, δια-, ἐπι-, κατα-, προ-, the papyri adding still other compounds. The N. T. shows the usual second aorist forms like ἑγνω (Lu. 16:4). What calls for remark is the second aorist subjunctive γνώςτης instead of γνώςτη. W. F. Moulton’s view on this point is confirmed by the papyri parallel in ἐποδότα and accepted by W. H. and Nestle. Analogy seems to have worked here to make γνώςτη like δοῦ. But Winer-Schmiedel (p. 115) cite γνώςτα from Hermas, Mand. IV, 1, 5. It is in accordance with the contraction of –ω verbs when we find forms like γνώςτα, δοῦ, etc., ὅτι=οῦ instead of ὅτι=Φ. For γνώςτα see Mk. 5:43; 9:30; Lu. 19:15. But see also γνώςτα in Jo. 7:51; 11:57 (D has γνώςτα); 14:31; Ac. 22:24 (ἐπι-). But the MSS. vary in each passage. In the LXX the regular γνώςτα occurs save in Judith 14:5, where B has ἐπιγνώςτα.

Δίδωμι. This very common verb is frequently compounded (ἀνα-, ἀντ-, ἀπο-, δια-, ἕκ-, ἐπι-, μετα-, παρα-, προ-) as in the papyri. The old indicative active appears only in παρέδωκα in the literary preface to Luke’s Gospel (1:2). Elsewhere the first aorist forms in –κα (like ἡκα, ἡθηκα) sweep the field for both singular and plural. These κ forms for the plural appear in the Attic inscriptions in the fourth

5 Blass, Gr. of N. T. Gk., p. 49.
century B.C. and rapidly grow. In the papyri Mayser finds only the κ aorists. The other modes go regularly δός, δῶ, etc. The indicative middle occasionally, as the imperfect, has ε for ο of the root. This is possibly due to proportional analogy (ἐξεδέτο: ἐξεδῶμην—ἐλύετο: ἐλύωμην). These forms are ἄποδετο (Heb. 12:16), ἐξεδέτο (Mk. 12:1; Mt. 21:33; Lu. 20:9). The usual form ἄπεδεόςθε, etc., appears in Ac. 5:8; 7:9. The subjunctive active third singular shows great variation between δοῖ, δῶ (cf. γνώι above), and δῶ (especially in Paul’s Epistles). The LXX MSS. occasionally give –δοῖ and [Page 309] even –δῆ by assimilation (Thackeray, Gr., p. 255 f.). For papyri examples see references under γινώσκω. Mark four times (all the examples) has also δοῖ according to the best MSS. (4:29; 8:37; 14:10 f.) and John one out of three (13:2). Tisch. (not W. H.) reads ἄποδοΐ in 1 Th. 5:15, but all MSS. have ἄποδοι in Mt. 18:30. W. H. accept δῶ in Jo. 15:16; Eph. 3:16; 1 Th. 5:15 (ἀπο—). Most MSS. read δῶ in Eph. 1:17 and 2 Tim. 2:25, in both of which places W. H. put δῶ (opt. for δοῖ) in the text and δῶ in the margin. The opt. δῶ appears in the LXX (Jer. 9:2) in the text of Swete. Con. and Stock, Sel. from LXX, p. 45, give δῶ twenty-nine times in LXX and δοῖ three times as variant. They give an interesting list of other forms of δίδωμι and its compounds in the LXX. Hort is doubtful about such a subjunctive in δῶ except in the epic poets. Blass is willing to take δῶ, and Moulton cites Bœotian and Delphian inscriptions which preserve this Homeric form. He adds that the subjunctive seems “a syntactical necessity” in Eph. 1:17 and 2 Tim. 2:25. The opt. δῶ=δοῖ (cf. subjunctive δῶ=δῶ) is without variant in 2 Th. 3:16; 2 Tim. 1:16, 18. Blass scours the idea of a possible first aorist active ἔδωσα from Ἰνα δῶσῃ (Jo. 17:2 Ν AC), δῶσωμεν (Mk. 6:37, ΝD), on the ground that ἐν and ει, ο and ω so often blend in sound in the κοινη. The so-called future subjunctive will be discussed later (ch. XIX).

'Ημι. Not in simplex in N. T. (see p. 314 for details), but ἰθὶμι is quite common (especially in the Gospels), and συνίημι less so. Besides a few examples occur also of ἰθἴμι, καθίμι, παρίμι. The papyri use the various prepositions freely in composition with ἴμι. The common μ second aorists, like ἱφες (Mt. 3:15), ἱφη (Mk. 12:19), ἰνέντες (Ac. 27:40), are found. In the indicative active, however, the form in –κα is used alone in both singular and plural, as ἱφήκαμεν (Mt. 19:27), ἱφήκατε (Mt. 23:23), ἱφήκαν (Mk. 11:6). This is true of all the compounds of ἴμι in the N. T. as in LXX (Thackeray, Gr., p. 252). The form ἱφήκας (Rev. 2:4) is on a par with the second person singular perfect active indicative as accepted by W. H. in κεκοπίακες (Rev. 2:3), πέπτωκες (Rev. 2:5), ἐλήφες (Rev. 11:17). ἱφήκαμεν is aorist in Mk. 10:28 as well as in its parallel Mt. 19:27 [Page 310] (=Lu. 18:28). So also as to συνίηκατε in Mt. 13:51. The perfect in –δικα does not, however, occur in the N. T. nor in the LXX (cf. Blass, Gr. of N. T. Gk., p. 51), though the papyri have it (Maysor, Gr. d. griech. Pap., p. 331).

'Ιστημι. This verb is used freely by itself, especially in the Gospels, and occurs in twenty prepositional combinations according to Thayer (ἀν—, ἐπ—, ἐξ—, ἀνθύ—, ἀφ—, δι—, ἔν—, ἐκ—, ἐφ—, κατ—, συν—, καθ—, ἀντικαθ—, ἀποκαθ—, μεθ—, παρ—, περι—, προ—, συν—), going quite beyond the papyri in richness of expression. The second aorist active indicative ἵστη (ἱπόστη, etc.) is common and is intransitive as in Attic, just like ἰστάθω (cf. Blass, Gr. of N. T. Gk., p. 50). The other forms are regular (στώ, στήθ, etc.) save that ἰσάστα (like ἰνάβα) is read in a few places (Ac. 9:11; 12:7; Eph. 5:14), but στήθω, ἰσάστηθι (Ac. 9:6, 34), ἰσάστηθι, στήθε, ἰστίστηθε, ἰσόποστηθε, ἰσοποστήθε. Winer cites ἰσόστα, παράστα also from late writers and a few earlier authors for ἰσάστα. The LXX shows a few examples also.

'Ονίνημι. This classic word (not given in the papyri, according to Mayser’s Grammatik) is found only once in the N. T., the second aorist opt. middle ὅναίμην (Phil. 20).

Τίθημι. The compounds of τίθημι in the N. T. (ἀνα—, προσ—, ἀνα—, ἀπο—, δια—, ἀντι—, ἐκ—, ἐκπ—, συν—, κατα—, κατα—, μετα—, παρα—, περι—, προ—, προσ—, συν—, ὑπο—) vie with those of ἴστημι and equal the papyri use. The first aorist active

7 Cf. Hort, Notes on Orth., p. 166. The evidence is “nowhere free from doubt,” some MSS. read ἔδοκες (Jo. 17:7 f.) and ἑφήκετε (Mt. 23:23), not to say ἑφράκες (Jo. 8:57), ἑληλύθες (Ac. 21:22, B also). Moulton (Prol., p. 52) considers –ες a “mark of imperfect Gk.” For further exx. of this –ες ending in the LXX and κοινή see Buresch, Rhein. Mus. etc., 1891, p. 222 f. For ἴμι and its compounds in the LXX see C. and S., Sel. fr. LXX, p. 45 f., showing numerous –ω forms, ἱφήκαν (Xen. Ἰκαν), etc.
1 Mayser, Gr. d. griech. Pap., p. 398.
2 Hort, Notes on Orth., p. 168.
3 W.-M., p. 94.
5 Mayser, Gr. d. griech. Pap., p. 411.
in –κα alone appears (so LXX) in the indicative singular and plural as ἔθηκαν (Mk. 6:29), but the subjunctive in –οῦ (Mt. 22:44), imperative πρόσθες (Lu. 17:5). The middle has the regular second aorist ἔθετο (Ac. 19:21 and often).

**Φημί.** If one is surprised to see this verb put under the list of second aorists, he can turn to Blass,6 who says that it is “at once imperfect and aorist.” It is common in the N. T. as aorist (Mt. 4:7, for instance, ἔφη). It is not always possible to decide.

2. Some –μι Presents. It is difficult to group these verbs according to any rational system, though one or two small groups (like those in –νυμι, –ημι) appear. The presents are more common in the N. T. than the aorists. The list is based on the uncompounded forms.

**Δείκνυ-μι.** Already in the Attic δείκνυω is common, but Blass1 observes that in the N. T. the middle-passive –μι forms are still rather common. It is compounded with ἄνα–, ἄπο–, ἄν–, ἄπι–, ὑπο–. No presents (or imperfects) occur with ἄνα– and ὑπο–. The word itself is not used very extensively. The form δείκνυμι is found once (1 Cor. 12:31), –ω not at all. So on the other hand δεικνύεις occurs once (Jo. 2:18), –ς not at all. Δείκνυσιν is read by the best MSS. (Mt. 4:8; Jo. 5:20). The middle ἐνδείκνυται appears in Ro. 2:15. The –μι participle active is found in Ac. 18:28 (ἐπιδείκνυσι) and 2 Th. 2:4 (ἐπιδεικνύντα). The middle –μι participle is seen in Ac. 9:39; Tit. 2:10; 3:2 (ὑμενος, etc.). In Heb. 6:11 the infinitive ἐνδείκνυσθαι is read, but δεικνύειν (Mt. 16:21 B –ναι).2 The other N. T. verbs in –νυμι (ἀπόλλυμι, ἥλινυμι, ὑποξύνυμι, ὑμνυμι, σβέννυμι, στρώννυμι, ὑποστρώννυμι, κτλ.) will be discussed in alphabetical order of the simplex. The inscriptions show these forms still in use (Schweizer, Perg. Inschr., p. 178). The verbs in –νυμι were the first to succumb to the –ω inflection. In the LXX the –μι forms are universal in the middle, but in the active the –ω forms are more usual (Thack., Gr., p. 245).

**Δίδωμι.** See under (d), 1, for list of compounds in the N. T. Attic Greek had numerous examples from the form διδό-ω (δίδου, ἔδίδου, –ους, –ου). This usage is

6 Gr. of N. T. Gk., p. 50. The verb is mentioned here to impress the fact that it is aorist as well as imperfect.
1 Ib., p. 48.
2 In the pap. both –νυμι and –ω, but only –ναι. Mayser, Gr. d. griech. Pap., p. 392. Schweizer

———, Grammatik der pergamen. Inschriften (1898).
extended in the N. T. as in the papyri\(^3\) to διδό (Rev. 3:9), though even here BP have δίδωμι. In Wisd. of Sol. 12:19 διδός occurs, but Lu. 22:48 has the regular παραδιδός. Δίδωσι is common (in LXX, Ps. 37:21, δίδοι appears) and διδάσκων in Rev. 17:13.

The uniform imperfect ἔδιδο (Mt. 15:36) is like the Attic. Hort observes that Mk. (15:23) and Ac. (4:33; 27:1) prefer ἔδιδον. Jo. (19:3) has, however, ἔδιδοσαν and Acts once also (16:4). Δίδο (Attic present imperative) is read by Syrian MSS. in Mt. 5:42 for δός. In Rev. 22:2 the \[Page 312\] text has participle ἀποδιδόντα for –όν (marg. –ούς), while παραδίδον is read by א in Mt. 26:46 and D in Mk. 14:42, etc.\(^1\) The middle-passive forms in –έτε (imperfect) from a present δίδω are like the aorist forms, which see above. So διεδίδετο (Ac. 4:35) and παραδιδότα (1 Cor. 11:23). So also subjunctive παραδιδότα is found only once (1 Cor. 15:24) and is probably to be rejected (BG), though the papyri amply support it.\(^2\) In the imperfect ἔδιδοσαν holds its place in the LXX, while in the present the –µ forms generally prevail (Thackeray, \textit{Gr.}, p. 250). The LXX is quite behind the N. T. in the transition from –µ to –ω forms.

\textbf{Δύναμι.} The use of δύνη (Mk. 9:22; Lu. 16:2; Rev. 2:2) instead of δύνασαι argues for the thematic δύναμι. Elsewhere δύνασαι (Lu. 6:42, etc.). This use of δύνη is found in the poets and from Polybius on in prose (Thayer), as shown by inscriptions\(^3\) and papyri.\(^4\) Hort\(^5\) calls it a “tragic” form retained in the κοινή. It is not surprising therefore to find B reading δύναμι (also –όµεθα, –όµενοι) in Mk. 10:39; Mt. 19:12; 26:53; Ac. 4:20; 27:15; Is. 28:20 (so נ in Is. 59:15). The papyri\(^6\) give plenty of illustrations also. MSS. in the LXX give δύναμι and δύνη.

\textbf{Εἰμί.} The compounds are with ἰπ-, ἐν-, ἐξ- (only ἐξεστιν, ἐξόν), παρ-, συν-, συν-παρ-. The papyri\(^7\) show a much more extended use of prepositions. This very common verb has not undergone many changes, though a few call for notice. In the present indicative there is nothing for remark. The imperfect shows the middle ἢµιν, ἢµεθα regularly (as Mt. 25:43; 23:30), as modern Greek uniformly has the middle present ἐµι, etc., as well as imperfect middle. Cf. already in ancient Greek the future middle ἐσµα. The use of ἢµιν, seen in the papyri\(^8\) and inscriptions\(^9\) also, served to mark it off from the third singular ἢν. But examples of ἢµεν still survive (Ro. 7:5, etc.). Moulton\(^10\) quotes from Ramsay\(^11\) a Phrygian inscription of ἐµατι for early fourth

\textbf{Ramsay, W. M., Cities and Bishoprics of Phrygia. 2 vols. (1895, 1897).}
century A.D. He cites also the Delphian middle forms ἦται, ἑώνται, Messenian ἦνται, Lesbian ἔσσο, as early instances of this tendency, not to mention the Northwest Greek. The peculiar classical second person ἦσσα is found in Mk. 14:67; Mt. 26:69, but elsewhere ἦς (Jo. 11:21, 32, etc.), the common form in the κοινή. Ἡτε (Ro. 6:20, for instance) is regular. So with the imperative ἦστι (as 1 Cor. 16:22) is less common than the usual ἔστω (Gal. 1:8). ἔστωσαν (never ὄντων nor ἔστον), as in Lu. 12:35, is a form found in Attic inscriptions since 200 B.C. Some of the papyri even have ἥτωσαν. Mention has already (Orthography) been made of the irrational ν with the subjunctive ἄν in the papyri, as in ὅταν ἦν—ἄναλώσω. The use of ἔστιν = ἔστιν (as 1 Cor. 6:5; Gal. 3:28, etc.) is an old idiom. ἔστιν and in modern Greek has supplanted ἔστι in the form εἶνε or εἶναι (so for εἴσι also). Cf. Sir. 37:2. N. T. has no example of imperative ἔστε.

Εἶμι. Only in compounds (ἀπ-, εἰσ-, ἔξ-, ἐκ-, συν-). The papyri and the inscriptions show only the compound forms. Blass indeed denies that even the compound appears in the popular κοινή, but this is an overstatement. The Attic employed ἔρχομαι for the present indicative and kept εἶμι for the future indicative. The κοινή followed the Ionic (and Epic) in the use of ἔρχομαι for all the tenses to the neglect of εἶμι. In the N. T. only Luke and the writer of Hebrews (once) use these compound forms of εἶμι and that very rarely. Ἀπεῖμι only occurs in the imperfect indicative (Ac. 17:10, ἀπῆσαν). Ἐσέμι appears four times, two in the present indicative (Ac. 3:3; Heb. 9:6), two in the imperfect indicative (Ac. 21:18, 26), while εἰσέρχομαι appears over two hundred times. Ἐξέμι also occurs four times, all in Acts (13:42; 17:15; 20:7; 27:43), against a host of instances of ἔξερχομαι. Ἐσέμι is read five times in Acts and all of them in the participle τῇ ἐπιούσῃ (Ac. 7:26, etc.). Σύνεμι is found only in Lu. 8:4. B reads ἐσθιθ in Ac. 9:6, not ἐσελθε. Blass rather needlessly construes ἔξιόντων (Ac. 13:42) in the aoristic sense (so as to 17:10, 15; 21:18, 26). Εἶμι is nearly gone from the LXX (Thackeray, Gr., p. 257).

10 Gr. of N. T. Gk., pp. 52, 54.
11 Ib., p. 52.
Ἐπίσταμαι. This verb occurs fifteen times in the N. T., chiefly in Acts (10:28, etc.) and always in the present tense.  

Ωπίσταμαι. Only in the compound συ-ζεύγνυμι and in the aorist active alone, συνέζευξεν (Mk. 10:9=Mt. 19:6).

Ζεύγνυμι. The compounds are with ἰνα-, δια-, περι-, ὑπο-, Curiously enough the verb does not appear in Mayser, Nachmanson nor Schweizer, though Mayser (p. 397) does mention ζεύγνυμι, which on the other hand the N. T. does not give save the one form above. But the uncompounded form is read in the N. T. only three times, one aorist indicative (Ac. 12:8), one future indicative (Jo. 21:18), and one imperfect (Jo. 21:18, ἔξωννυες, a form in –ὐω, not –υμι). There is only one instance of the compound with ἰνα- and that an aorist participle (1 Pet. 1:13). The three examples of δια-, all in Jo. (13:4, etc.), yield no presents nor imperfects. The same thing is true of the half-dozen instances of περι-, as Lu. 12:35. The LXX has περιζώννυται (Thackeray, Gr., p. 269). The one instance of ὑπος is in Ac. 27:17 and shows the form in –υμι, ὑποζωννύντες.

Ἦμαι. It is only in the compound form κάθημαι that this verb is seen in the N. T. and thus very frequently, twice with συν- prefixed (Mk. 14:54; Ac. 26:30). It is usually the participle καθήμενος that one meets in the N. T. (as Mt. 9:9). The imperfect is regularly ἐκάθημι, etc. (as Mt. 13:1), the future καθήσομαι (as Mt. 19:28). No –ω forms appear in the present, though κάθη (Ac. 23:3) is a contract form like δύνη for κάθησαι (already in Hyperides). The short imperative κάθου for κάθησο (as Jas. 2:3) is already in the LXX (cf. Mt. 22:44 from Ps. 110:1) and indeed in the late Attic (Blass, ib.), though chiefly postclassical.

Ἠμι. Like εἶμι this verb only appears in the N. T. in the compounded form (ἄν-, ἀφ-, καθ-, παρ-, συν–). The same thing appears to be true of the papyri as given by Mayser, though fifteen combinations greet us in the papyri. But the papyri and the κοινή inscriptions have not yet furnished us with the –ω formation with ἢμι compounds which we find in ἀφ- and συνήμα (Page 2001) in the N. T. and the LXX. But Philo and the N. T. Apocrypha and early Christian writers follow the LXX and the N. T. Ἀνίμι indeed has only ἄνειντες (Eph. 6:9) in the present stem. So also καθήμι shows only καθέμενον (–μένην) in Ac. 10:11; 11:5, while παρίμα has no present, but only an aorist (Lu. 11:42) and a perfect passive (Heb. 12:12). Ἀφίμι is the form of the verb that is common in the N. T. In Rev. 2:20 ἀφεῖς is probably a present from ἀφέω. But Blass (p. 51, of N. T. Grammar) compares the Attic ἀφίεις

1 Just so the pap., Mayser, Gr. d. grieich. Pap., p. 395.
3 W.-Sch., p. 118; Schweizer, Perg. Inschr., p. 177; Reinhold, De Graec., p. 89.
and τίθεις. Only ἀφίημι (Jo. 14:27) and ἀφίησα (Mt. 3:15) occur, but in Lu. 11:4 ἀφίμονα is from the Ionic ἀφί μοι (cf. δόθω). So also in Rev. 11:9 ἀφίσαυσαν and in Jo. 20:23 marg. W. H. have ἀφίνεται. Elsewhere ἀφίνεται (Mt. 9:2, etc.). In the imperfect ἡμεν from ἀφίμοι is read in Mk. 1:34; 11:16, ἀφέωντα (Lu. 5:20, 23, etc.) is a perfect passive (Doric Arcadian, Ionic).⁶ Cf. Ionic Ξικα. Simcox (Language of the N. T., p. 38) quotes also ἄνεωντα from Herodotus. With συνίη the task is much simpler. Blass⁷ sums it up in a word. In Ac. 7:25 συνιέναι gives us the only undisputed instance of a –μι form. All the others are –ω forms or have –ω variations. However συνιέντος is correct in Mt. 13:19 and συνίεσα in Lu. 24:45. There is a good deal of fluctuation in the MSS. in most cases. W. H. read συνίουσιν (Mt. 13:13), συνίωσιν (Mk. 4:12), συνίσκειν (Ro. 3:11). In 2 Cor. 10:12 W. H. read συνίουσιν after B. In the LXX only the compounded verb occurs, and usually the –μι forms save with συνίημι (Thackeray, Gr., p. 250 f.).

Ἡστημι. Cf. also ἔπ- ἂσταται (see above) and στήκω (from ἔστημα, imperfect ἔστηκε in Rev. 12:4, στέκω in modern Greek). For the list of compounds⁸ see list of aorists (1). But the essential facts can be briefly set forth. The –μι form in the present stem has disappeared in the active voice save in καθίστησιν (Heb. 7:28; 2 Pet. 1:8), συνίστημι (Ro. 16:1) and συνίστησι (2 Cor. 10:18; Ro. 3:5; 5:8).⁹ The middle (passive) forms retain the –μι inflection regularly with ἱστημι and its compounds (δι-, ἄφ-, ἄνθ-, ἐξ-, ἐφ-, προ-, συν–), as καθίσταται (Heb. 5:1), περιίστασο [Page 316] (2 Tim. 2:16).¹ Two –ω forms supplant the –μι conjugation of ἱστημι and its compounds, that in –άω and that in –άνω, though usually the MSS. vary greatly between the two.² In 1 Cor. 13:2 ἰΒDEFG read μεθιστάναι, though W. H. follow ACKL in μεθιστάνειν.³ The form in –άω is found in various MSS. for ἱσταμαι (as ἰστῶμαι Ro. 3:31), ἰποκαθ– (Mk. 9:12 Rec.), ἐξιστάω, καθιστάω, μεθιστάω, συνιστάω, but is nowhere accepted in the W. H. text, though Hort⁴ prefers συνιστάναι to συνιστάνειν in 2 Cor. 3:1. In 2 Cor. 4:2 a threefold division occurs in the evidence. For συνιστάνειν we have ABP (so W. H. and Nestle), for συνιστάνειν ΝCD*FG, for συνιστάνειν D*EKL.⁵ The form in –άνω is uniformly given by W. H., though the

3 Here Hort (Notes, etc., p. 168) differs from Westcott and prefers –άναι.
4 Ib.
5 Blass, Gr. of N. T. Gk., p. 48.
form in –άω comes from Herodotus on and is frequent in the LXX. But the –μι forms hold their own pretty well in the LXX (Thackeray, Gr., p. 247). The form in –άνω may be compared with the Cretan στανύειν and is found in the late Attic inscriptions. Instances of the form in –άνω in the W. H. text are Ac. 1:6; 8:9; 17:15; 1 Cor. 13:2; 2 Cor. 3:1; 5:12; 6:4; 10:12, 18; Gal. 2:18; Ro. 3:31; 6:13, 16). In Mk. 9:12 W. H. (not so Nestle) accept the form ἀποκαταστάνει after B, while ND read ἀποκαταστάνει (cf. Cretan στανύω). D has this form also in Ac. 1:6 and 17:15.

Κείμαι. This defective verb is only used in the present and imperfect in the N. T. as in the papyri, and with a number of prepositions in composition like the papyri also. The prepositions are ἀνα-, συν-ανα-, ἀντι-, ἀπο-, ἔπι-, κατα-, παρα-, περι-, προ-. The regular –μι forms are always used, and sometimes as the passive of τίθημι, as περίκειμαι (Ac. 28:20; Heb. 5:2). For ἄνακείμαι only the participle ἄνακείμενος appears (so Mt. 9:10) save once ἄνακείω (Mt. 26:20) and twice with συν– (Mt. 9:10=Mk. 2:15). In Lu. 23:53 ἦν κείμενος follows the Attic, but NB have ἦν τεθειμένος in Jo. 19:41. So in the LXX τίθημι partially replaces κείμαι (Thackeray, Gr., pp. 255, 272).

Κρέμαμαι. This verb is used as the middle of the active κρεμάννυμι (this form not in N. T.) and does not appear in Mayser’s list [Page 317] for the papyri. The form κρέμασσαται is read in Mt. 22:40 and the participle κρεμάσσεται(v) in Gal. 3:13; Ac. 28:4. In Lu. 19:48 NB (so W. H. and Nestle) read ἔξεκρέμετο, an –ω form and the only compound form of the verb in the N. T. The other forms are aorists which come from an active present κρεμάννυμι, –αννώ, –άω or –άζω. They are κρεμάσαντες (Ac. 5:30) and κρεμασθή (Mt. 18:6). But none of these presents occurs in the N. T. Cf. Veitch, Greek Verbs, p. 343 f., for examples of the active and the middle. So also no present of κεράννυμι (compound συν–) is found in the N. T., but only the perfect passive (Rev. 14:10) and the aorist active (Rev. 18:6).

Μίγνυμι. The only –μι form is the compound συν-ανα-μίγνυσθαι (1 Cor. 5:9, 11) and so 2 Th. 3:14 according to W. H., instead of συν-ανα-μίγνυσθε. Elsewhere, as in the papyri, the N. T. has only the perfect passive (Mt. 27:34) and the aorist active (Lu. 13:1).

---

6 Ib. W.-Sch., p. 122.
9 Blass, Gr. of N. T. Gk., p. 51.
1 In the LXX the active goes over to the –ω class. Thack., Gr., p. 273.
Veitch Veitch, W., Greek Verbs, Irregular and Defective. 2d ed. (1871).
2 Mayser, Gr. d. griech. Pap., p. 403.
Ὅγνυμι. This verb does not appear in the N. T. in the simple form, but always compounded with ἄν– or δι–ἀν–. Besides it is always an –ο verb as in the papyri and the LXX. It is worth mentioning here to mark the decline of the –ι forms.

Ὄλλυμι. Only in the common ἅπ– and once with συν–απ– (Heb. 11:31). In the active only the –ο forms are found as ἄπολλυει (Jo. 12:25), ἄπολλυε (Ro. 14:15). But in the middle (passive) only the –ι forms meet us, as ἄπόλλυται (1 Cor. 8:11), ἄπόλλυτο (1 Cor. 10:9). So the LXX.

Ὅμνυμι. A half-dozen examples of the present tense of this verb occur in the N. T. All but one (ὅμνυναι, Mk. 14:71) belong to the –ο inflection, as ὅμνοει (Mt. 23:21 f.). The Ptolemaic papyri also have one example of ὅμνυμι, the rest from ὅμνω. The LXX sometimes has the –ι form in the active and always in the middle (Thackeray, Gr., p. 279). Neither Πήγνυμι (aorist Heb. 8:2) nor προσπήγνυμι (aorist Ac. 2:23) appears in the present in the N. T.

Πίπλημι. No present tense in the N. T., though a good many aorists, save the compound participle ἐμπλῆν, from the –ο verb –ἄω. Mayser gives no papyri examples. LXX has –ο form usually.

Πίπρημι. The simple verb occurs once only, πίπρασθαι (Ac. 28:6) according to W. H. This is the only instance where a present occurs at all in the N. T. The papyri give no light as yet. No simplex in the LXX, but ἐνεπίπρων in 2 Macc. 8:6 (Thackeray, Gr., p. 249).

Ῥήγνυμι. The compounds are with δι–, περ–, προ–. No presents appear save in the simple verb and διαρ–. With διαρ. only the –ο forms are used as διερήσετο (Lu. 5:6), διαρήσατον (Lu. 8:29). But we have ῥήγνυται (Mt. 9:17) and ῥήσει (Mk. 9:18). Mayser gives no papyri examples of the present.

Ῥόγνυμι has no presents at all in the N. T., but only the perfect passive imperative ῥροσθε (Ac. 15:29).

Σβέννυμι. This verb has only three presents in the N. T. and all of the –ι form, one active σβέννυε (1 Th. 5:19, Tisch. ζβενν.), two middle σβέννυται (Mk. 9:48) and σβέννυνται (Mt. 25:8). The LXX has only –ι forms and in the more literary books (Thackeray, Gr., p. 284).

---

3 Ib., p. 404. And indeed the old Attic ἄνοιγω, Meisterh., p. 191.
4 Thack., Gr., p. 277.
5 So the pap. Mayser, Gr., p. 352; Thackeray, p. 246.
6 Mayser, ib., pp. 351 f., 404.
7 Ib., p. 406.
1 Tisch. reads ἐμπρασθαι from πιπράω. Nestle agrees with W. H.
Στρώννυμι. The compounds are with κατα–, ὑπο–. There are only two present stems used in the N. T., ἑστρώννυν (Mt. 21:8) and ὑποστ. (Lu. 19:36). Thus the –μι form is wholly dropped as in the papyri2 and the LXX.3

Τίθημι. For the list of compounds see Aorist (1). This verb has preferred the –μι form of the present stem as a rule in the κοινή. The inscriptions4 do so uniformly and the papyri5 use the –ω inflection far less than is true of δίδωμι. In the present indicative D has τίθη (τίθει) for τίθησι6 (Lu. 8:16). In the imperfect ἐτίθησαι is read twice (Ac. 2:47; 2 Cor. 3:13) from τίθω, as already in the Attic. So likewise ἐτίθον (as in Attic) twice (Ac. 3:2; 4:35), but the best MSS. have ἐτίθεσαν in Mk. 6:56 (NTBLΔ) and Ac. 8:17 (NA, though B has –οσαν and C –εισαν).7 The reading of B in Ac. 8:17 (ἐτίθεσαν) calls for a present τίθο which the papyri supply against the idea of Winer-Schmiedel,8 as παρατιθόμενος (BM 239), παρακατατίθομαι (B.U. 326).9 Good cursives show that the late language used τίθω in the present (Mk. 10:16; 15:17). Cf. ὑποτιθοῦσα in second century papyrus (B.U. 350).10 In the LXX –μι forms prevail in the present and imperfect (Thackeray, Gr., p. 250).[Page 319]

Φημί. The only N. T. compound is with συν–, none in the papyri according to Mayser.1 In the papyri φάσκω (lengthened form) is usually employed for the participle and infinitive2 of φημί. The participle is so used in the N. T. (Ac. 24:9; Ro. 1:22). Σύνφημι appears only once (Ro. 7:16). The –μι inflection is uniform in φημί both in the present and the imperfect (aorist). The only forms in the N. T. are φημί (1 Cor. 7:29), φῆσιν (Mt. 13:29), φασίν (Ro. 3:8), and the common ἔφη (Mt. 4:7). It is regular –μι in the LXX.

Χρή. This impersonal verb had a poetic infinitive χρῆναι of the –μι inflection, but Veitch (p. 627) and L. and S. get it from χράω. At any rate χρή is found only once in the N. T. (Jas. 3:10), δεῖ having supplanted it. Mayser does not find it in the papyri nor Nachmanson and Schweizer in the inscriptions.

3. Some –μι Perfects. There are only three verbs that show the active Perfects without (κ)σ in the N. T. (mere root, athematic).

Θνήσκω. The compounds are ἀπο– (very common), συν–ἀπο– (rare). The uncompounded verb occurs nine times and forms the perfect regularly as an –ω verb (τέθνηκα), save that in Ac. 14:19 DEHP read τεθνάναι instead of τεθνηκέναι, but the –μι form is not accepted by W. H. The N. T. has always τεθνηκός, never τεθνεώς. In

2 Mayser, Gr., p. 352.
3 Thack., Gr., p. 286.
5 Mayser, Gr. d. griech. Pap., p. 352 f.
6 Blass, Gr. of N. T. Gk., p. 49.
7 Hort, Notes on Orth., p. 167.
8 P. 121.
10 Ib. Mod. Gk. has θέτω.
the LXX these shorter second perfect forms occur a few times in the more literary books (Thackeray, Gr., pp. 253, 270). They show “a partial analogy to verbs in –μ” (Blass, Gr., p. 50).

Οἶδα is a –μ perfect in a few forms (Ἰσμν, Ἰστε) from root τί– (cf. Latin vid-eo, Greek ἤδον). The word is very common in the N. T. and σύνοιδα is found twice (Ac. 5:2; 1 Cor. 4:4). The present perfect indicative like the papyri usually has οἶδα, οἶδας, οἶδε, οἶδαμεν, –ατε, –ασιν, which was the Ionic inflection and so naturally prevailed in the κοινή. Three times indeed the literary Attic Ἰστε appears (Jas. 1:19; Eph. 5:5; Heb. 12:17). The passage in James may be imperative instead of indicative. In Ac. 26:4 Ἰσασιν (literary Attic also) is read. The imperfect also runs ἤδειν, ἤδεις, etc. Ἦδεσαν (Mk. 1:34; 14:40) is like ἢστηκεσαν (Rev. 7:11). Other modes go regularly ἐλθω (Mt. 9:6), ἐδέναι (1 Th. 5:12), ἐδώς (Mt. 12:25). The LXX usage is in accord with the N. T. Cf. Thackeray, Gr., p. 278.

V. The Modes (Ἐγκλίσεις). The meaning and use of the modes or moods belongs to syntax. We have here to deal briefly with any special items that concern the differentiation of the modes from each other by means of mode-signs. There is no clearly proper method of approaching the study of the verb. One can begin with tense, voice and then mode or vice versa. The first is probably the historical order to a certain extent, for the matter is complicated. Some tenses are later than others; the imperative as a complete system is a late growth. Since no purely historical treatment is possible by reason of this complicated development, a practical treatment is best. There are reasons of this nature for taking up modes first which do not apply to syntax. The two main ideas in a verb are action and affirmation. The state of the action is set forth by the tense, the relation of the action to the subject by voice, the affirmation by mode. Tense and voice thus have to do with action and mode with affirmation. Mode deals only with

4 Cf. W.-Sch., p. 114 f. Neither ὠθεῖτα nor ἤδειςθα appears in the N. T.
1 Mayser, Gr. d. grieich. Pap., p. 370 f.
3 See Hoffmann, Die grieich. Dial., Bd. II, pp. 572 ff., for –μ verbs in North Achaia. For the “strong” perfects, like γέγονα, see VII, (g), 2.
the manner of the affirmation. The same personal endings used for voice limit the action (hence finite verbs) in person and number.

(a) The Number of the Moods or Modes (Modi). This is not so simple a matter as it would at first appear. Modern grammarians generally agree in declining to call infinitives, participles and the verbal adjectives in –τός and –τέος moods. Some refuse to call the indicative a mood, reserving the term for the variations [Page 321] from the indicative as the normal verb by means of mode-signs. Thus Clyde thinks of “only two moods, viz. the subjunctive and the optative, because, these only possess, in combination with the personal endings, a purely modal element.” There is point in that, and yet the indicative and imperative can hardly be denied the use of the term. Jannaris admits three moods; indicative, subjunctive and imperative. He follows Donaldson in treating the subjunctive and optative as one mood. Others, like Mono, find the three in the subjunctive, optative and imperative. Once again five moods are seen in early Greek by Riemann and Goelzer: the indicative, injunctive, subjunctive, optative, imperative. On the injunctive see Brugmann, Griechische Grammatik, p. 332, though he does not apply the term mode to the indicative. So Hirt, Handbuch, p. 421 f. Moulton admits this primitive division, though declining to call the indicative a mode save when it is a “modus irrealis.” The injunctive is no longer regarded as a separate mood, and yet it contributed so much to the forms of the imperative that it has to be considered in an historical review. The indicative can only be ruled out when it is regarded as the standard verb and the moods as variations. Certainly it is best to let the indicative go in also. The modern Greek, having no optative, has a special conditional mode (UserProfile). Cf. Sanskrit. Indeed, the future indicative is considered by some grammarians as a separate mode. Cf. Thompson, Syntax of Attic Greek, p. 494; Moulton, Prolegomena, p. 151. Thumb accepts the four modes in modern Greek (Handbook, p. 115).

(b) The Distinctions Between the Moods. These are not absolute, as will be seen, either in form or in syntax. The indicative and the imperative blend in some forms, the subjunctive and the indicative are alike in others, the injunctive is largely merged into the imperative and subjunctive, while the subjunctive and optative are closely akin and in Latin blend into one. Greek held on to the optative with separate values to each mood. Moulton indeed despair of our being able to give the primitive root-idea of each mood. That subject belongs to [Page 322] syntax, but the

8 Prol., p. 164.
history of the mode-forms is in harmony with this position. As with the cases so with
the moods: each mood has fared differently in its development and long history. Not
only does each mood perform more functions than one, but the same function may
sometimes be expressed by several\(^1\) moods. The names themselves do not cover the
whole ground of each mood. The indicative is not the only mood that indicates,
though it does it more clearly than the others and it is used in questions also. The
subjunctive not merely subjoins, but is used in independent sentences also. The
optative is not merely a wish, but was once really a sort of past subjunctive. The
imperative has the best name of any, though we have to explain some forms as
“permissive” imperatives, and the indicative and subjunctive, not to say injunctive,
invade the territory of the imperative. “It is probable, but not demonstrable, that the
indicative was the original verb-form, from which the others were evolved by
morphological changes” (Thompson, *Syntax of Attic Greek*, p. 494). The origin of the
mode-signs cannot yet be explained.

\((c)\) The Indicative (ὅριστικῇ ἡγκλίσει). There is indeed little to say as to the form
of the indicative since it has no mode-sign. It is the mode that is used in all the Indo-
Germanic languages unless there is a special reason to use one of the others. In fact it
is the normal mode in speech. It is probably the earliest and the one from which the
others are derived. *Per contra* it may be argued that emotion precedes passionless
intellection. The indicative continues always to be the most frequent and persists
when others, like the conjunctive and optative, die. It is the only mode that uses all the
tenses in Sanskrit and Greek. In the Sanskrit, for instance, the future is found only in
the indicative (as in Greek save in the optative in indirect discourse to represent a
future indicative of the direct) and the perfect appears only in the indicative and
participle, barring many examples of the other modes in the early Sanskrit (Vedas). In
the Sanskrit the modes are commonest with the aorist and the present.\(^2\) And in Greek
the imperfect and past perfect never got beyond the indicative. The future barely did
so, never in the subjunctive till the Byzantine period. The perfect subjunctive and
optative, not to say imperative, were always a rarity outside of the periphrastic forms
and [Page 323] in the κοινή have practically vanished.\(^1\) Thus we can clearly see the
gradual growth of the modes. In modern English we have almost dropped the
subjunctive and use instead the indicative. In the modern Greek the indicative
survives with as much vigor as ever. The N. T. peculiarities of the indicative can best
be treated under Syntax. It may be here remarked, however, that besides the regular
indicative forms a periphrastic conjugation for all the tenses of the indicative appears
in the N. T. The present is thus found as ἦστιν προσαναπληροῦσα (2 Cor. 9:12), the
perfect as ἦστιν πεπραγμένον (Ac. 26:26), the imperfect as ἦν διδόσκοι (Lu. 5:17),
the past perfect as ἦσαν προσωρινοῖς (Ac. 21:29), even the aorist as ἦν βλήθεις (Lu.
23:19), the future as ἐσοσθε λαλοῦντες (1 Cor. 14:9), the future perfect as ἔσομαι
πεπιθώς (Heb. 2:13). This widening of the range of the periphrastic conjugation is
seen also in the LXX. Cf. Thackeray, *Gr.*, p. 195.

1 See discussion bet. Profs. Harry and Sonnenschein in Cl. Rev., 1905–6. Cf. also La
(d) **The Subjunctive (ὑποτακτική).** The function of the subjunctive as of the other modes will be discussed under Syntax. Changes come in function as in form. Each form originally had one function which varied with the course of time. But the bond between form and function is always to be noted.² The German grammarians (Blass, Hirt, Brugmann, etc.) call this the conjunctive mode. Neither conjunctive nor subjunctive is wholly good, for the indicative and the optative both fall often under that technical category.³ It is in the Greek that mode-building reaches its perfection as in no other tongue.⁴ But even in the Greek subjunctive we practically deal only with the aorist and present tenses, and in the Sanskrit the subjunctive rapidly dies out save in the first person as an imperative.⁵ In Homer ἴμεν is indicative⁶ and ἵμεν is subjunctive so that non-thematic stems make the subjunctive with the thematic vowel ό/ε. Thematic stems made the subjunctive with a lengthened form of it ω/η. Cf. in the Ionic, Lesbian, Cretan inscriptions⁷ forms like ἁμείκεται. The same thing appears in Homer also in the transition period.⁸ Jannaris⁹ indeed calls the aorist subjunctive a future subjunctive because he [Page 324] conceives of the aorist as essentially past, a mistaken idea. The subjunctive does occur more freely in Homer than in the later Greek, partly perhaps because of the fact that the line of distinction between it and the indicative (especially the aorist subjunctive and the future indicative) had not been sharply drawn.¹ Add to this the fact that σοιήσῃ and σοιήσει came to be pronounced exactly alike and one can see how the confusion would come again. Cf. ἵνα δώσῃ (δόσῃ) in the N. T. MSS.² On the short vocal ending of the subjunctive and its connection with the indicative one may recall ἐδομαί, πίσμαί, φάγομαί in the N. T., futures which have a strange likeness to the Homeric subjunctive ἵμεν. They are really subjunctives in origin. It is still a mooted question whether the future indicative is always derived from the aorist subjunctive or in part corresponds to the Sanskrit syā.³ The only aorist subjunctives that call for special comment in the N. T. are the forms γνοῖ and δοῖ, for which see this chapter, IV, (d), 1.⁴ There are parallels in the papyri as is there shown. The form ὁψησθε in Lu. 13:28 (supported by AL, etc., against ὁψεσθε, BD) is probably a late aorist form like ἔδωσα (δόσῃ) rather than the

⁵ Giles, Man., p. 458 f.
⁶ Ib., p. 459. In the Beotian dial. the subj. does not appear in simple sentences (Clafin, Synt. of Beotian, etc., p. 73)
⁷ Riem. and Goelzer, Phonét., p. 456 f.
⁸ Monro, Hom. Gr., p. 49.
⁹ Hist. Gk. Gr., p. 179.
² Cf. already in the Attic inscr. the spelling of the subj. in –εί. Meisterh., Att. Inscr., p. 166. For this phenomenon in the pap. see Mayser, Gr. d. griech. Pap., p. 324.
⁴ Cf. Moulton, Cl. Rev., 1901, p. 37, and 1904, p. 111, for subjs. ἀποδοῖ, ἐπιγνοῖ in the pap.
Byzantine future subjunctive. As already pointed out, the examples in N. T. MSS. of the Byzantine future subjunctive are probably due to the blending of ω with ο, ε with η, etc. N. T. MSS., for instance, show examples of ἀρκεσθαι (1 Tim. 6:8), γνῶσωσι (Ac. 21:24), γενήσεται (Jo. 15:8), δώσωσι (Lu. 20:10; Rev. 4:9), εὑρίσκος (Rev. 9:6), ζήσοι (Mk. 5:23), ἠξίωσι (Rev. 3:9), καυθήσομα (1 Cor. 13:3), κερδηθήσονται (1 Pet. 3:1), πορεύσομαι (Ro. 15:24), σωθήσονται (Ro. 11:26), etc. It is to be admitted, however, that the Byzantine future subjunctive was in use at the age of our oldest Greek N. T. MSS. Cf. Winer-Schmiedel, p. 107. Hort dismisses them all (Appendix, “Notes on Orthography,” p. 172). The present subjunctive δοῖ is parallel to δοῖ. No example [Page 325] of the periphrastic present subjunctive appears in the N. T. In Gal. 4:17 (ἡν ζηλοῦτε) the contraction of η is like that of the indicative η,1 unless indeed, as is more probable, we have here (cf. also 1 Cor. 4:6, φυσιοῦσθε) the present indicative used with ἢν as in 1 Jo. 5:20 (γινώσκομεν). In Gal. 6:12 ACFGBKLP read ἢν μὴ διώκονται. Cf. Ro. 14:19. Cf. Homer. The perfect subjunctive does not exist in the N. T. save in the second perfect εἰδὼ (ἡν εἰδόμεν, 1 Cor. 2:12) and the periphrastic form as ἦ πεποιηκώς (Jas. 5:15. Cf. πεποιθότες ὣμεν, 2 Cor. 1:9) and usually in the passive as ἦ πεπλήρωμένη (Jo. 16:24). In Lu. 19:40 Rec. with most MSS. read κεκράξονται (LXX). In the papyri ἦν sometimes is subjunctive=ἡν. Cf. Moultin, Cl. Rev., 1901, p. 38, 1904, p. 108; Prolegomena, pp. 49, 168. He cites ὅσα ἐὰν ἦν in Gen. 6:17 E. But the modern Greek constantly uses ἐὰν with the indicative, and we find it in the N. T. and papyri (Deissmann, Bible

5 Cf. ἀρξησθε in Lu. 13:25, but ἀρξεσθε (BEG, etc.) and ἀρξησθε (NAD, etc.) in verse 26.

1 Blass, Gr. of N. T. Gk., p. 48. But in 1 Cor. 16:2 we have regularly εὐοδῶται (margin. εὐοδῶθη). Hort (Notes on Orth., pp. 167, 172) is uncertain whether εὐοδῶται is perf. ind. or subj. (pres. or perf.). He cites παραξηγοῦμεν (1 Cor. 10:22) and διαβεβαιοῦνται (1 Tim. 1:7) as possible pres. subjs.

Studies, pp. 203 ff.). Some of the papyri examples may be merely the indicative with ἔαν, but others undoubtedly give the irrational ν. In the LXX the subjunctive shows signs of shrinkage before the indicative with ἔαν, ὅταν, ἰνα (Thackeray, Gr., p. 194).

(e) The Optative (εὐχετική). Like the subjunctive the optative is poorly named, as it is much more than the wishing mood. As Giles remarks, difference of formation is more easily discerned in these two moods than difference of meaning. In the Sanskrit the subjunctive (save in first person) gave way before the optative, as in Latin the optative largely (sim originally optative) disappeared before the subjunctive. The Greek, as already stated, is the only language that preserved both the subjunctive and the optative, and finally in the modern Greek the optative has vanished, μὴ γένοιτο being merely “the coffin of the dead optative.” It is doubtful if the optative was ever used much in conversation even in Athens (Farrar, Greek Syntax, p. 142), and the unlearned scribes of the late Greek blundered greatly when they did use it (Jannaris, Hist. Gk. Gr., p. 204). Moulton (Prol., p. 240) agrees with Thumb that the optative was doomed from the very birth of the κοινή, and its disappearance was not due to itacism between οι and ή, which was late. Clyde, however, suggests that the blending of sound between οι and ή had much to do with the disappearance of the optative. But apart from this fact the distinction was never absolutely rigid, for in Homer both moods are used in much the same way. And even in the N. T., as in Homer and occasionally later, we find an instance of the optative after a present indicative, οὐ παύομαι εὐχαριστῶν ἵνα δῶν Eph. 1:17, text of W. H., subj. δῶν or δῶ in marg., question of editing). Jannaris calls the Greek optative the subjunctive of the past or the secondary subjunctive (cf. Latin). Like the indicative (and originally the subjunctive) the non-thematic and thematic stems have a different history. The non-thematic stems use η (ι) and the thematic οι (composed of o and i). The σ aorist has α+ι besides the form in –εια. This two-fold affix for the optative goes back to the

3 Hist. Gk. Gr., p. 179.
earlier Indo-Germanic tongues \(^4\) (Sanskrit \(\text{yā}\) and \(\text{ū}\)). The optative was never common in the language of the people, as is shown by its rarity in the Attic inscriptions.\(^5\) The Boeotian dialect inscriptions show no optative in simple sentences, and Dr. Edith Claflin reports only two examples in subordinate clauses.\(^6\) The optative is rare also in the inscriptions of Pergamum.\(^7\) The same thing is true of the papyri.\(^8\) Examples of the periphrastic perfect optative survive in the papyri,\(^9\) but not in the N. T. There are only sixty-seven examples of the optative in the N. T. Luke has twenty-eight and Paul thirty-one (not including Eph. 1:17, whereas John, Matthew and James do not use it at all. Mark and Hebrews show it only once each, Jude twice and Peter four times. The non-thematic aorist appears in the N. T. sometimes, as \(\text{δύῃ}\) (perhaps by analogy). So W. H. read without reservation in 2 Th. 3:16; Ro. 15:5; 2 Tim. 1:16, 18. This is the preferred text in Eph. 1:17; 2 Tim. 2:25, but in Jo. 15:16; Eph. 3:16, W. H. read \(\text{δῷ}\) (subjunctive). In Eph. 1:17 the margin has \(\text{δύῃ}\) (subjunctive) also.\(^1\) The inscriptions\(^2\) and the papyri\(^3\) show the same form (–\(\text{ὐην}\) instead of –\(\text{οίην}\)). In Eph. 1:17 Moulton\(^4\) considers \(\text{δύῃ}\) (subjunctive) absolutely necessary in spite of the evidence for \(\text{δύῃ}\) (optative). But see above. The aorist optative in –\(\text{αι}\) is the usual form, as \(\text{kατευθύναι}\) (1 Th. 3:11), \(\text{πλεονάσαι καὶ περισσεύσαι}\) (1 Th. 3:12), \(\text{καταρτίσαι}\) (Heb. 13:21), etc., not the \text{Æolic-Attic –ειε}. So also \(\text{ποιήσαιεν}\) (Lu. 6:11), \(\text{καταρτίσῃ (Heb. 13:21)}\) according to the best MSS. (B, etc.).\(^5\) Blass\(^6\) comments on the fact that only one example of the present optative appears in the simple sentence, viz. \(\text{ἐρή (Ac. 8:20)}\), but more occur in dependent clauses, as \(\text{πάσχοιτε (1 Pet. 3:14)}\). The optative is rare in the LXX save for wishes. Thackeray, \textit{Gr.}, p. 193.

\(*\) \textbf{THE IMPERATIVE (προστακτική).} The imperative is a later development in language and is in a sense a makeshift like the passive voice. It has no mode-sign (cf. indicative) and uses only personal suffixes.\(^7\) These suffixes have a varied and interesting history.

6 Gr. of N. T. Gk., p. 220.
7 K.-Bl., Bd. II, p. 41.
1. The Non-Thematic Stem. An early imperative was just the non-thematic present stem. In the imperative the aorist is a later growth, as will be shown directly. Forms like ἵστη, δείκνυ are pertinent.

2. The Thematic Stem. Cf. ἄγε, λέγε. This is merely an interjection (cf. vocative λόγε). This is the root pure and simple with the thematic vowel which is here regarded as part of the stem as in the vocative λόγε. The accent εἰπέ, ἐλθέ, εὑρέ, ἰδέ, λάβε was probably the accent of all such primitive imperatives at the beginning of a sentence. We use exclamations as verbs or nouns. [Page 328] In Jas. 4:13 we have ἄγε νῦν οἱ λέγοντες, an example that will illustrate the origin of ἄγε. Note the common interjectional use of ἰδέ (so N. T.). Cf. also accent of λάβε. The adverb δεῦρο (Jo. 11:43, Λάζαρε δεῦρο Ξω) has a plural like the imperative in –τε (Mt. 11:28, δεῦτε πρὸς μὲ πάντες οἱ κοπιῶντες).

3. The Suffix –θι. The non-thematic stems also used the suffix –θι (cf. Sanskrit dhi, possibly an adverb; cf. “you there!”). So γνῶθι for second aorist active, ἴθι for present active, φάνηθι, λύθι for second and first aorist passive. In the N. T. sometimes this –θι is dropped and the mere root used as in ἄναβα (Rev. 4:1), μετάβα (Mt. 17:20), ἄναστα (Eph. 5:14; Ac. 12:7) according to the best MSS. The plural ἄναβατε (Rev. 11:12) instead of ἄναβητε is to be noted also. The LXX MSS. exhibit these short forms (ἄναστα, ἄποστα, but not ἄνάβα) also. Cf. Helbing, Gr. d. Sept., p. 70; Con. and Stock, Sel. from LXX, p. 46. See ἤμβα, κατάβα, etc., in Attic drama. But ἄναστηθι (Ac. 8:26), ἐπίστηθι 2 Tim. 4:2), μετάβηθι (Jo. 7:3), κατάβηθι (Lu. 19:5), προσανάβηθι (Lu. 14:10) occur as usual. In the papyri –θι has practically disappeared save in ἴθι.

4. The Suffix –τω. It is probably the ablative of the demonstrative pronoun (Sanskrit tād). It is used with non-thematic (ἐπτο) and thematic stems (λεγέ-τω). The Latin4 uses this form for the second person also (agito). In the case of ἐπτο (Jas. 1:19) the N. T. has also ἣτω (Jas. 5:12). The form κατάβατω (Mt. 24:17) has the unlengthened stem, but ἐλθάτω is like the first aorist ἐπιστρεψάτω. The N. T. like the κοινή generally6 has the plural only in τῶν which is made by the addition of σαν to

8 Giles, Comp. Philol., p. 464.
9 Ib., p. 269.
10 Ib., p. 464. Cf. Brug., Grundr., II, § 958; Riem. and Goelzer, Phonét., p. 359. It is coming more and more to be the custom to regard the thematic vowel as part of the root. Giles, Comp. Philol., p. 415.
11 Moulton, Prol., p. 171 f.
2 Hort, Notes on Orth., p. 168.
3 Mayser, Gr. d. griech. Pap., p. 327.
5 So pap. and late inscr., Moulton, Prol., p. 56.
τω. Cf. ἔστωσαν (Lu. 12:35). The middle σθω (of uncertain origin)7 likewise has the plural in the N. T. in σθωσαν. So προσευξάσθωσαν (Jas. 5:14). This is true of the plural of both present and aorist as in papyri and inscriptions. So the LXX cf. Helbing, Gr. d. Sept., p. 69 f.

5. The Old Injunctive Mood. It is responsible for more of the imperative forms than any other single source. “The injunctive [Page 329] was simply an imperfect or aorist indicative without the augment.”1 So λαβοῦ corresponds to ἔ-λαβεσο, λάβεσθε was ἔ-λάβεσθε, λήψθετε was ἔ-ληψθετε, λάβετε was ἔ-λάβετε.2 So σχες (ἔ-σχες) may be compared with ἔ-λαιες (θίγες with ἔ-θιγες), but δός, ἔς, θές Brugmann considers of uncertain origin, possibly subjunctive.3 Forms like λυετε may be injunctive (ἔ-λυετε)4 or merely the indicative.5 Note the difficulty of deciding on imperative and indicative in forms like ἐραυνάτε (Jo. 5:39), πιστεύετε (Jo. 14:1), ἵστε (Jas. 1:19). But in these cases, except Jo. 5:39, we probably have the imperative. In the case of ἵστε the N. T. indicative would be ὄδατε.6 In the N. T. κάθου (Jas. 2:3) is the shorter form of κάθησο, though not by phonetic processes. The injunctive survives to some extent in the Sanskrit and borders on the subjunctive and the imperative and was specially common in prohibitions.7 It consists of the bare stem with the personal endings.

6. Forms in –σαι. These, like βάπτισαι (Ac. 22:16), are probably just the infinitive sigmatic aorist.8 Cf. δεῖσαι. Cf. also Latin legimini with the Homeric infinitive λεγέµαι.9 The infinitive is common in the Greek inscriptions in the sense of an imperative.10 In the N. T. as in the papyri this use is not infrequent. So χαίρειν (Jas. 1:1), στοιχεῖν (Ph. 3:16), μὴ συναναγίνυσθαι (2 Th. 3:14). In modern Greek instead of the imperative in –σαι the form λύσου occurs with the sense of λύθητι.11

7. The Form in –σον (λῦσον). It is difficult of explanation. It may be injunctive or a verbal substantive.12 The N. T. has εἶπον (Mt. 4:3) rather than εἶπέ (Mt. 8:8) in about half the instances in W. H.13 This is merely in keeping with the common κοινὴ custom of using first aorist endings with second aorist stems. The form εἶπον is traced to the Syracuse dialect.14

10 Moulton, Prol., p. 179 f.
13 Hort, Notes on Orth., p. 164.
8. **First Person.** The Sanskrit used the first person subjunctive as imperative of the first person. Cf. English “charge we the foe.” The Greek continued this idiom. But already in the N. T. the use of the imperative ἄφες (cf. modern Greek ἄς and third person subjunctive) is creeping in as a sort of particle with the subjunctive. So ἄφες ἐκβάλω (Mt. 7:4). Cf. English “let” with infinitive. [Page 330] Cf. δεῦτε ὑποκείνομεν in Mt. 21:38. Besides ἄγε, δεῦτε we may have ὅρα with the subjunctive (Mt. 8:4), βλέπετε with future indicative (Heb. 3:12).

9. **Prohibitions.** Here the aorist subjunctive with μὴ held its own against the aorist imperative quite successfully. In the Sanskrit Veda the negative mā is never found with the imperative, but only with the subjunctive.¹ Later the Sanskrit uses the present imperative with mā, but not the aorist. This piece of history in the Greek² is interesting as showing how the imperative is later than the other modes and how the aorist imperative never won its full way into prohibitions. However, in the N. T. as in the inscriptions and papyri, we occasionally find the aorist imperative with μὴ in 3d person. So μὴ καταβάτω (Mt. 24:17).

10. **Perfect Imperative.** In the Sanskrit the imperative is nearly confined to the present tense. The perfect imperative is very rare in the N. T. (only the two verbs cited) as in all Greek. We find ἐρρωσθε (Ac. 15:29; in 23:30 W. H. reject ἐρρωσο) and πεφίσα (Mk. 4:39). The perfect imperative also occurs in the periphrastic form as ἔστωσαν περιεζωσέναι (Lu. 12:35).

11. **Periphrastic Presents.** Other periphrastic forms of the imperative are ἵσθι εὐνοοῦν (Mt. 5:25), ἵσθι ἔχων (Lu. 19:17), μὴ γίνεσθε ἐπεροώγουντες (2 Cor. 6:14) and even ἵστε γινώσκοντες (Eph. 5:5).

12. **Circumlocutions.** But even so other devices (see Syntax) are used instead of the imperative, as the future indicative (ὁγαπήσεις, Mt. 5:43); ἵνα and the subjunctive (Eph. 5:33); a question of impatience like ὅπως διαστρέφων (Ac. 13:10), etc.

VI. The Voices (διαθέσεις).

(a) **Transitive and Intransitive.** The point is that “transitive” is not synonymous with “active.” Transitive verbs may belong to any voice, and intransitive verbs to any voice. Take ἔδίδαξα, ἔδιδαξάμην, ἔδιδαξάην, which may be transitive in each voice. On the other hand ἐλήμ, γίνομαι, ἐλύθην, are intransitive. The same verb may be transitive or intransitive in the same voice, as ἦγο. A verb may be transitive in Greek while intransitive in English, as with καταγελάω and vice versa. This matter properly belongs to syntax, but it seems necessary to clear it up at once before we proceed to discuss voice. Per se the question of transitiveness belongs to the idea of the verb itself, not to that of voice. We [Page 331] actually find Green¹ making four voices, putting a neuter (οὐκ ἔστερον) voice (using active and middle endings) on a par

---

¹ Monro, Hom. Gr., p. 240.
2 Ib.; cf. also Delbrück, Synt. Forsch., IV, p. 120. Hence Delbrück argues that the aorist imper. did not come into use until after the pres. imper. The imper. was originally only positive, not negative.
1 Handb. to the Gk. of N. T., p. 55.
with the others! The Stoic grammarians did speak of a neuter voice as neither active (κατηγόρη) nor passive (ὑπτιον), meaning the middle (µέση). Jannaris confounds transitiveness with voice, though he properly says (p. 356) that “the active voice is usually transitive,” i.e. verbs in the active voice, not the voice itself. Even Whitney speaks of the antithesis between transitive and reflexive action being effaced in Sanskrit. Was that antithesis ever present? Farrar speaks of verbs with an “active meaning, but only a passive or middle form,” where by “active” he means transitive. Even the active uses verbs which are either transitive (ἄλλοπαθής) or intransitive (αὐτοπαθής). So may the other voices. If we clearly grasp this point, we shall have less difficulty with voice which does not deal primarily with the transitive idea. That belongs rather to the verb itself apart from voice. On transitive and intransitive verbs in modern Greek see Thumb, Handb., p. 112.

(b) THE NAMES OF THE VOICES. They are by no means good. The active (ἐνεργετική) is not distinctive, since the other voices express action also. This voice represents the subject as merely acting. The Hindu grammarians called the active parasmai padam (‘a word for another,’) and the middle (µέση) ātmane padam (‘a word for one’s self’). There is very little point in the term middle since it does not come in between the active and the passive. Indeed reflexive is a better designation of the middle voice if direct reflexive is not meant. That is rare. The middle voice stresses the interest of the agent. Cf. Moulton, Prolegomena, p. 155 f. In truth we have no good name for this voice. Passive (παθητική) is the best term of all, for here the subject does experience the action even when the passive verb is transitive, as in ἔδιδαχθην. But this point encroaches upon syntax.

[Page 332] (c) THE RELATIVE AGE OF THE VOICES. It is a matter of doubt as between the active and middle. The passive is known to be a later development. The Sanskrit passive is the या class. In Homer the passive has not reached its full development. The passive future occurs there only twice. The aorist middle is often

4 Sans. Gr., p. 200.
6 Giles, Comp. Philol, p. 476: “The distinction between the transitive and intransitive meanings of the active voice depends upon the nature of the root in each case.”
7 Whitney, Sans. Gr., p. 200. Cf. also Brug., Kurze vergl. Gr., II, p. 492. See also Clark, Comp. Gr., p. 182, for the meaningless term “middle.” It is as active as the “active” voice. Farrar, Gk. Synt., p. 119.
used in passive sense (βλήτω, for instance).\(^2\) That is to say, in Homer the passive uses all the tenses of the middle with no distinct forms save sometimes in the aorist. In later Greek the future middle (as τησῳμαί) continued to be used occasionally in the passive sense. The aorist passive in fact used the active endings and the future passive the middle, the passive contributing a special addition in each case (η, θη, θησ). Some languages never developed a passive (Coptic and Lithuanian, for instance), and in modern English we can only form the passive by means of auxiliary verbs. Each language makes the passive in its own way. In Latin no distinction in form exists between the middle and the passive, though the middle exists as in potior, utor, plangor, etc. Giles\(^3\) thinks that the causative middle (like διδάσκομαι, ‘get taught’) is the explanation of the origin of the Greek passive. Cf. βάπτισαι (Ac. 22:16). It is all speculation as between the active and middle. An old theory makes the middle a mere doubling of the active (as μα-μι=μαι).\(^4\) Another view is that the middle is the original and the active a shortening due to less stress in accent, or rather (as in τίθεμαι and τίθημι) the middle puts the stress on the reflexive ending while the active puts it on the stem.\(^5\) But Brugmann\(^6\) considers the whole question about the relation between the personal suffixes uncertain. Of one thing we may be sure, and that is that both the active and the middle are very old and long antedate the passive.

(d) The so-called “Deponent” verbs. These call for a word (cf. ch. XVII, III, (k)) at the risk of trespassing on syntax. Moulton\(^7\) is certainly right in saying that the term should be applied to all three voices if to any. The truth is that it should not be used at all. As in the Sanskrit\(^8\) so in the Greek some verbs were used in both active and middle in all tenses (like λάω); some verbs in some tenses in one and some in the other (like βαίνω, [Page 333] βήσομαι); some on one voice only (like κείμαι). As concerns voice these verbs were defective rather than deponent.\(^9\) Note also the common use of the second perfect active with middle verbs (γίνομαι, γέγονα).\(^2\) A number of verbs sometimes have the future in the active in the N. T. which usually had it in the middle in the older Greek. These are: ἀκούω (Jo. 5:25, 28, etc., but ἀκουσμαί, Ac. 17:32), ἀμαρτήσω (Mt. 18:21), ἀπαντήσω (Mk. 14:13), ἄρτασο (Jo. 10:28), βλέψω (Ac. 28:26), γελάσω (Lu. 6:21), διώξω (Mt. 23:34), ζήσω (Jo. 5:25), ἐπιρκῆσω (Mt. 5:33, LXX), κλαύσω (Lu. 6:25), κράζω (Lu. 19:40), παιξω (Mk. 10:34), ἰσώμαι (Jo. 7:38), σιωπήσω (Lu. 19:40), σιναντήσω (Lu. 22:10). But still note ἄποθενομαι, ἔσομαι, ζήσομαι, θαυμάσομαι, λήμψομαι, άφησομαι, πεσομαι, τέξομαι, φάγομαι, φεύξομαι, etc. Cf. Blass, Gr. of N. T. Gk., p. 42 ff.; Winer-Schmiedel, p. 107; Moulton, Prol., p. 155. See Helbing, Gr. d. Sept., p. 89 f.; Thackeray, pp. 231 ff., for illustrations in the LXX. The term “deponent” arose from the idea that these verbs had dropped the active voice. Verbs do vary in the use of the voices in different stages of the language.

(e) The passive supplanting the middle. In Latin the middle and passive have completely blended and the grammars speak no more of the Latin middle. Greek indeed is the only European speech which retains the original middle form and usage.3 In fact, when we consider other tongues, it is not strange that the passive made inroads on the middle, but rather that there was any distinction preserved at all.4 In most modern languages the middle is represented only by the use of the reflexive pronoun. The Greek itself constantly uses the active with reflexive pronoun and even the middle. Jannaris5 has an interesting sketch of the history of the aorist and future middle and passive forms, the only forms where the two voices differ. As already remarked, the old Greek as in Homer6 did not distinguish sharply between these forms. In Homer the middle is much more common than in later Greek,7 for the passive has no distinct form in the future and not always in the aorist. In the modern Greek the middle has no distinctive form save λύσοι (cf. λύσαι) and this is used as passive imperative second singular.1 Elsewhere in the aorist and future the passive forms have driven out the middle. These passive forms are, however, used sometimes in the middle sense, as was true of ἀπεκρίθη, for instance, in the N. T. The passive forms maintain the field in modern Greek and appropriate the meaning of the middle. We see this tendency at work in the N. T. and the κοινή generally. Since the passive used the middle forms in all the other tenses, it was natural that in these two there should come uniformity also.2 The result of this struggle between the middle and passive in the aorist and future was an increasing number of passive forms without the distinctive passive idea.3 So in Mt. 10:26 (μὴ φοβήθετε αὐτούς) the passive is used substantially as a middle. Cf. the continued use of τιµήσομαι as future passive in the earlier Greek as a tendency the other way. The history of this matter thus makes intelligible what would be otherwise a veritable puzzle in language. Here is a list of the chief passive aorists in the N. T. without the passive idea, the so-called “deponent” passives: ἀπεκρίθην (Mt. 25:9 and often, as John, Luke chiefly having Attic ἀπεκρίνετο also, Ac. 3:12), διεκρίθην (Ro. 4:20), συνυπεκρίθην (Gal. 2:13), ἐπελογήθην (Lu. 21:14, but see 12:11), ἤγελθοκρίθην (Jo. 5:35), ἐγενήθην (Mt. 6:10, but also ἐγενόμην often, as Ac. 20:18); cf. γέγονα and γεγένη, ἔδεσθην (Lu. 5:12); ἐγέρθην (Lu. 24:34), ἡδονάσθην (Mk. 7:24, as New Ionic and LXX) and ἡδονήθην (Mt. 17:16), διέλεχθην (Mk. 9:34), ἔκθαμβόθησθη (Rev. 13:3, but passive sense in 2 Th. 1:10), ἐθυμόθηθη (Mt. 1:27), ἐθυμηθέτες (Mt. 1:20), μετεμελήθη (Mt. 21:32), ἐφοβήθην (Mt. 21:46), εὐλαβηθέτε (Heb. 11:7), etc. For the LXX usage see Thackeray, p. 238. The future passives without certain passive sense are illustrated by the following: ἄνακληθομαι (Mt. 8:11), ἄποκριθομαι (Mt. 25:37), ἐπαναπαήσεται (Lu. 10:6), θαυμασθόμαι (Rev. 17:8), κοιμηθόμαι (1 Cor. 15:51), ἐντραπήσονται (Mk. 12:6), μεταμεληθόμαι (Heb. 7:21), φανήσομαι (Mt. 24:30), φοβηθόμαι (Heb. 13:6). But we have γενήσομαι, ἰδνήσομαι, ἐπιμελήσομαι,

7 Monro, Hom. Gr., p. 7.
1 Thumb, Handb., p. 111. So mod. Gk. has only two voices; V. and D., Handb., to Mod. Gk., p. 81.
3 Ib. Κοινή exx. are numerous, like ἥδέσθην, ἐνεθυμήθην, ἐπορεύθην, ἐφοβήθην, etc.

[Page 335] (f) The Personal Endings. They are probably pronominal, though Brugmann does not consider the matter as clear in all respects. One point to note is the heavy burden that is placed upon these endings. They have to express voice, person and number, everything in truth that has to do with the subject. Mode and tense are indicated otherwise. There was a constant tendency to slough off these personal endings and get back to the mode and tense-stems. Hence δίδωμι becomes δίδω (papyri) in late Greek. Λέγω was originally λέγομι.

(g) Cross-Divisions. These personal endings have two cross-divisions. The active and middle have a separate list, the passive having none of its own. Then there is another cleavage on the line of primary and secondary tenses in the indicative, i.e. the unaugmented and the augmented tenses. The subjunctive mode falls in with the primary endings and the optative uses the secondary endings. But the first person active singular of the optative has one primary ending (as λύομι). But may it not be a reminiscence of the time when there was no distinction between subjunctive and optative? The imperative has no regular set of endings, as has already been shown, and does not fall in with this development, but pursues a line of its own. As a matter of fact the imperative always refers to the future.

(h) The Active Endings. They have received some modification in the N. T. Greek. The imperative can be passed by as already sufficiently discussed. The disappearance of the –μι forms in favour of the –ω inflection has been carefully treated also, as ἄφιομεν (Lu. 11:4). The subjunctive δοι and optative δώῃ have likewise received discussion as well as the optative –αι and –ειε. But some interesting points remain.

The use of –οσαν instead of –ον is very common in the LXX (as Jer. 5:23, 26) and was once thought to be purely an Alexandrian peculiarity (Simcox, Language of the N. T., p. 37). For the LXX phenomena see Helbing, Gr. d. Sept., pp. 65–67; Con. and Stock, Sel. from the LXX, p. 32 f. The LXX is the principal witness to the –οσαν forms (Thackeray, Gr., p. 195), where they are exceedingly frequent (ib., pp. 212 ff.). It is not so abundant outside of the LXX, but the Bœotians used it for the imperfect and optative. Mayser has found more examples of it in the Tebtunis.

Hatzidakis HATZIDAKIS, G. N., Einleitung in die neugriechische Grammatik (1892).

2 Gk. Gr., p. 346.
3 Cf. Clyde, Gk. Synt., p. 54. The same thing has happened in Eng. where the loss is nearly complete save 2d and 3d pers. sing.
4 It is not worth while here to take time to make a careful discussion of each of these endings. For the hist. treatment of them see Brug., Griech. Gr., pp. 345 ff.; Giles, Comp. Philol., pp. 413 ff.; Riem. and Goelzer, Phonét., pp. 348 ff.
2 Gr. d. griech. Pap., p. 323.
Papyri, both aorist and imperfect, than Moulton had discovered. The inscriptions also show it. In the N. T. the contract verb ἐδολίῳσαν (Ro. 3:13) is a quotation from the LXX. In Jo. 15:22, 24, the imperfect ἐχοσαν has to be admitted. In 2 Th. 3:6 παρελάβοσαν is read by ΝΑΔ and W. H. put it in the margin. The text παρελάβετε is supported by BFG. This use of the –αν inflection may be compared with the use of τω-σαν in the imperative. In the modern Greek it is common with contract verbs (cf. LXX) like ἐδολίῳσαν above. The modern Greek ἔρωτοῦσα is a new formation (Thumb, Handb., p. 171) modelled after it.

Blass needlessly hesitates to accept –αν in the present perfect instead of the usual –δσι, and even Moulton is reluctant to admit it for Paul and Luke, preferring to regard it “a vulgarism due to the occasional lapse of an early scribe.” It is certainly not a mere Alexandrianism as Buersch supposed. The ending –αντι in the Doric usually dropped ν and became –δσι in Attic, but the later Cretan inscriptions show –αν after the analogy of the aorist. The Alexandrian κουνή followed the Cretan. The papyri examples are very numerous and it is in the inscriptions of Pergamum also. Hort (Notes on Orthography, p. 166) considers it “curious,” but has to admit it in various cases, though there is always some MS. evidence for –δσι. Thackeray (Gr., pp. 195, 212) thinks that in some instances –αν with the perfect is genuine in the LXX. The earliest examples are from Lydia, παρεύλησαν (246 B.C.) and ἡπέσταλκαν (193 B.C.). Cf. Dieterich, Unters., p. 235 f. The N. T. examples are ἡπέσταλκαν (Ac. 16:36), γέγοναν [Page 337] (Ro. 16:7; Rev. 21:6), ἐγενακαν (Jo. 17:7), εὔρηκαν (Rev. 19:3), εἰσελήλυθαν (Jas. 5:4), ἐόρακαν (Lu. 9:36; Col. 2:1), πέπτωκαν (Rev. 18:3), τετήρηκαν (Jo. 17:6). On the other hand the Western class of documents (ΝΑΔΝ Syr. Sin.) read ἤκασιν in Mk. 8:3 instead of εἰσίν. But it is in the LXX (Jer. 4:16), and Moulton finds ἤκασι in the papyri. The form of ἦκω is present, but the sense is perfect and the κ lends itself to the perfect ending by analogy.

---

3 Prol., p. 52; Cl. Rev., 1901, p. 36, 1904, p. 110.
5 Gr. of N. T. Gk., p. 46.
6 Prol., p. 52.
11 Schweizer, Per. Inschr., p. 167. Thumb (Hellen., p. 170) rightly denies that it is merely Alexandrian. For LXX exx. (ἐόρακαν, πέρακαν, etc.) see Helbing, Gr. d. Sept., p. 67.
Another ending that calls for explanation is the use of \textit{–eς} instead of \textit{–ας} in the present perfect and the first aorist (in \textit{–κα especially}). Hort considers the MS. evidence “scanty” save in Revelation. The papyri give some confirmation. Moulton\textsuperscript{2} cites \textit{ἀφήκες}, \textit{ἔγραψες}, etc., from “uneducated scribes” and thinks that in Revelation it is a mark of “imperfect Greek.” Deissmann\textsuperscript{3} finds the phenomenon common in a “badly written private letter” from Φαγύπα. Mayser\textsuperscript{4} confirms the rarity of its occurrence in the papyri. In the inscriptions Dieterich\textsuperscript{5} finds it rather more frequent and in widely separated sections. In Mt. 23:23 B has \textit{ἀφήκετε}; in Jo. 8:57 B has \textit{ἔδωκες} in Jo. 17:7 and in 17:8 B has \textit{ἐδοκες} once more in Ac. 21:22 B gives \textit{ἐλήλυθες}.\textsuperscript{6} It will hardly be possible to call B illiterate, nor Luke, whatever one may think of John. D has \textit{ἄπεκάλυψες} in Mt. 11:25.\textsuperscript{7} W. H. accept it in Rev. 2:3 (\textit{κεκοπίακες}), 2:4 (\textit{ἀφήκες}), 2:5 (\textit{πέπτωκες}), 11:17 (\textit{ἐκβλήστρα}), all perfects save \textit{ἀφήκες}. It is rare in the LXX (Thackeray, \textit{Gr.}, p. 215); found in A (Ex. 5:22, \textit{ἀπέσταλκες}) and in \textit{ἐδωκες} (Ezek. 16:21; Neh. 9:10). The modern Greek has it as in \textit{ἔδεσα}, \textit{–eς} (Thumb, \textit{Handb.}, p. 152).

We have both \textit{ἠσθα} (Mt. 26:69) and \textit{ἠς} (Mt. 25:21). The form in \textit{–θα} is vanishing (Schweizer, \textit{Perg. Inschr.}, p. 166). Cf. also Mayser, \textit{Gr. d. griech. Pap.}, p. 321. The papyri have \textit{οἶδας}, as N. T., and \textit{ἔφης}. But see \textit{–μ Verbs}.

Much more common is the use of the first aorist endings \textit{–α}, \textit{–ας}, etc., with the second aorist stem and even with the imperfect. This change occurs in the indicative middle as well as active. This matter more technically belongs to the treatment of the [Page 338] aorist tense, as the \textit{–α} is part of the tense-stem, but it is also conveniently discussed here. The Attic already had \textit{ἐπα}, \textit{ἐπεσα}, \textit{ἠνεγκα}. The Attic inscriptions indeed show \textit{ἔσχα}, \textit{ἐὑρέμυν} and even the imperfects \textit{ἐλπιζα}, \textit{ἐφερα}.\textsuperscript{1} This tendency towards uniformity spread in the \textit{κοινή} somewhat extensively.\textsuperscript{2} Moulton\textsuperscript{3} finds the strong aorists with \textit{–α} chiefly in “uneducated writing” in the papyri, but common in general. This process of assimilation of the strong with the weak aorist was not yet complete.\textsuperscript{4} Blass\textsuperscript{5} thinks it an “intermediate” form already in the ancient Greek which spread in the \textit{κοινή}. Cf. the liquid form \textit{γγειλα}. But both the strong and the weak aorists appear in the N. T. Thackeray (\textit{Gr.}, p. 195; cf. also pp. 210 ff.) notes that the –

\item 5 Unters. etc., p. 239. Blass, Gr. of N. T. Gk., p. 46, cites Apoll., Synt., I, 10, p. 37, as saying that \textit{ερηκες}, \textit{ἔγραψες}, \textit{γραψέτω}, etc., gave the grammarians trouble.
\item 6 Blass, Gr. of N. T. Gk., p. 46.
\item 7 Cf. W.-Sch., p. 113.
\item 1 Meisterh., Att. Inschr., p. 183 f.
\item 4 Ib. Cf. Deiss., B. S., p. 190 f.
\item 5 Gr. of N. T. Gk., p. 45. The LXX is in harmony with this tendency also. Is it Cilician according to Heraclides? W.-Sch., p. 111 note. Cf. in Hom. forms like \textit{ἐξοντο}, \textit{ἐβήσετο}, where the sec. aorist endings go with the first aorist stem (Sterrett, Hom. II., N. 42).
\end{itemize}
an termination was finally extended to all past tenses, though in the LXX the imperfect forms are due to later copyists. In the modern Greek we note it regularly with κατέλαβα, ἤθελα, εἴχα, etc. (Thumb, Handb., pp. 152, 160, etc.). Horst⁶ has a detailed discussion of the matter in the N. T. This mixture of usage is shown in εἶπα and εἶπον. The –α form is uniform with endings in –τ (εἶπατε, εἰπάτω, εἰπάτωσαν). Both εἶπόν and εἶπε occur. We have ἔσεσαμέθα (2 Cor. 4:2) and προείπαμεν (1 Th. 4:6). The participle is usually –όν, but sometimes εἴπασ. Both εἴπας and εἴπες, εἶπον and εἶπαν meet us. We always have the ἄνεγκριτι inflection save in the infinitive and the imperative. And even here we once have ἄνεγκριτα (1 Pet. 2:5) and once also προσένεγκαν (Mt. 8:4 BC). So also with ἔρεξα we have the weak or first aorist inflection in the indicative and imperative plural πέσατε (Lu. 23:30; Rev. 6:16). But in these two examples Horst⁷ (against W. H.) favours πέσετε on MS. grounds (NABD, NBC). In Lu. 14:10; 17:7 ἀνύπατος is correct. The other forms that are accepted by W. H. are ἔβιλαν [Page 339] once (Ac. 16:37); ἔπεβλαν twice (Mk. 14:46; Ac. 21:27); εἶδαν, εἴδαμεν in a few places (Mt. 13:17; Lu. 10:24; Mt. 25:37, etc.); the indicatives ἀνέθαν (Ac. 10:39), ἀνέλατε (Ac. 2:23), ἀνείλατο (Ac. 7:21), εἴλατο (2 Th. 2:13), ἐξειλάμην (Ac. 23:27), ἐξειλάτω (Ac. 7:10; 12:11); εὕραν once (Lu. 8:35, or ἀνεύραν), εὕραμεν once (Lu. 23:2), and εὐράμενος once (Heb. 9:12); the imperatives ἐλάτε, ἐλθάτε uniformly, both ἠλθαν and ἠλθῶν, once ἐπήλθα (Rev. 10:9), regularly ἠλθαμεν (Ac. 21:8). There are many other examples in various MSS. which W. H. are not willing to accept, but which illustrate this general movement, such as ἁπάθαναν (Mt. 8:32, etc.), ἁλαβαν (Jo. 1:12), ἁλάβαμεν (Lu. 5:5); ἁλάβατε (1 Jo. 2:27), ἁξεβάλαν (Mk. 12:8), ἡπαν (1 Cor. 10:4 D), ἠφυγαν (Lu. 8:34 D), κατέφαγαν (Mk. 4:4 D), συνέβαλαν (Ac. 7:57 D), γενάμενον (Lu. 22:44 Σ), etc. But let these suffice. Moulton¹ is doubtful about allowing this –α in the imperfect. But the papyri support it as Deissmann² shows, and the modern Greek³ reinforces it also as we have just seen. W. H. receive εἶχαν in Mk. 8:7; Ac. 28:2 (παρείχαν); Rev. 9:8; εἴχαμεν in 2 Jo. 5. But D has ἔχαν in Jo. 15:22, 24; Σ has ἔλεγαν in Jo. 9:10; 11:36, etc. There is a distinct increase in the use of the sigmatic aorist as in ἡμάρτησα (Mt. 18:15), ὄψησθε (Lu. 13:28). It appears already in the LXX (Thackeray, Gr., p. 235). But see further under VII, (d).

7 Notes on Orth., p. 164. Moulton (Prol., p. 51) speaks of “the functionally useless difference of ending between the strong and the weak aorist.”
2 B. S., p. 191, ἔλεγας, etc.
The past perfect has the –ειν forms exclusively as uniformly in the κοινή. So εἰστίκεισαν (Rev. 7:11), ἥδεσαν (Mk. 14:40), πεποιήκεισαν (Mk. 15:7). So the LXX. Cf. Helbing, *Gr. d. Sept.*, p. 68. But the imperfect ἔξεσαν (Ac. 17:15) is to be observed.

(i) **The Middle Endings.** These call for less remark. βούλει (Lu. 22:42) is the only second singular middle form in –ει, for ὄψῃ (Mt. 27:4) displaces ὄψει. The inscriptions sometimes show βούλη. Blass regards βούλει a remnant of literary style in Luke, [Page 340] but the papyri also have βούλει. The occasional use of δόνη (Mk. 9:22 f.) has been discussed under –μ Verbs. It appears only once in the LXX, but the “poetic and apparently Ionic” ἐπίστη is more frequent (Thackeray, *Gr.*, p. 217). Cf. also κάθοι (Jas. 2:3) as LXX and κάθῃ (Ac. 23:3). On the other hand we have φάγεσαι and πίεσαι (Lu. 17:8). This revival of the use of –σαι parallel with –μai, –ται in the perfect of vowel verbs in the vernacular amounts to a “new formation” in the view of Blass. So Moulton, *Prol.*, p. 54 f. To call this revival a “survival” is “antediluvian philology.” In the LXX πίεσαι is universal and φάγεσαι outside of the Pentateuch where φάγῃ holds on (Thackeray, p. 218). The –σαι form is universal in modern Greek. The love of uniformity made it triumph. But see Contract Verbs for further discussion. The middle form ἠμην (Mt. 25:35) and ἠμεθα (Mt. 23:30) is like the κοινή generally and the modern Greek ἔμαι. Cf. also ἔσοιμαι. For ἔξεκρήμενο (Lu. 19:48). The LXX has –εντο for –οντο (Thackeray, p. 216).

(j) **Passive Endings.** As already observed, the passive voice has no distinctive endings of its own. The second aorist passive, like ἐ-φάνη-ν, is really an active form like ἔ-βη-ν (ἐ-φάνη-ν is the proper division). Cf. Latin tacē-re. So ἔ-χαρη-ν from χαιρέω. The first aorist in –θην seems to have developed by analogy out of the old secondary middle ending in –οντα (ἔ-δό-οντα) parallel with σο (Sanskrit thās). The future passive is a late development and merely adds the usual σο/ε and uses the middle endings. The ending in –οντα is sometimes transitive in Archilochus, as the middle often is, and perhaps helps to understand how in the κοινή these forms (first aorist passive) are so often transitive (“deponents”) as in ἐπεκρίθην, ἐφοβήθην, etc. The second aorist passive as noticed above is really an active form. So the passive forms have a decidedly mixed origin and history. There is nothing special to note about these passive endings in the N. T. save the increased use of them when even the passive idea does not exist. In some verbs σ is inserted contrary to Attic practice. So

4 Giles, Man. of Comp. Philol., p. 411.
κέκλεισται (Lu. 11:7), λέλουσμαι (Heb. 10:22). It is a common usage in the LXX (Thackeray, Gr., pp. 219 ff.). See also VII, (g), 9. [Page 341] In Rev. 8:12; 18:23, W. H. print φάνη (first aorist active, cf. ἐπιφάναι in Lu. 1:79) rather than the passive φανη. Note ἐκφυή (Mt. 24:32, but Rec. ἐκφυή, though ἐκφυή in Mk. 13:28), συφυέσαι (Lu. 8:7) and παρεισδύησαι (Ju. 4) for ἔδυν (Rec. Mk. 1:32) which the LXX retains (Thackeray, Gr., p. 235). In the LXX, when a verb had both first and second aorist passive forms, the first disappeared (ib., p. 237). But see VII, (d), for further discussion.

(k) CONTRACT VERBS. The use of –σαι was mentioned above. It appears1 in καυχᾶσαι (1 Cor. 4:7; Ro. 2:17, etc.) and ὀδυνᾶσαι (Lu. 16:25) where αε regularly contracts into α. See χαρίεσαι (= –εῖσαι) P. Oxy. 292 (A.D. 25).

Verbs in –αω. The confusion with verbs in –εω is already seen in the Ionic (Herodotus). The LXX in general preserves the distinction between –αω and –εω verbs, but ΝΑΒ occasionally have the confusion (Thackeray, Gr., p. 241). In the modern Greek the blending is complete. One conjugation is made up, some forms from –αω, some from –εω (Thumb, Handb., p. 169 f.). The N. T. MSS. vary. W. H. receive ἣρωτουν in Mt. 15:23 (ΝΒCD), but ἥρωτον in Mk. 4:10 though –ουν is here supported by ΝC and by single MSS. elsewhere. Hatzidakis (Einl. in d. Neug., p. 128 f.) considers ἥρωτον due to Ionic influence. In Mt. 6:28 we have κοπιοῦσιν in B 33, but W. H. reject2 it, as they do νικοῦν in Rev. 2:7, 17; 15:2, and κατεγέλουν (Lu. 8:53). In Mk. 14:5 W. H. read ἐνεβριῶντο (ΝC –οῦντο) and in Jo. 11:38 ἐμβριώμονεος (ΝΑ –ούμενος). So there is a variation as to ήττωνται (2 Pet. 2:20) from ἡττῶσαι and ἡσώθησε (2 Cor. 12:13) from ἐσσώ after the analogy of ἐλασσοῦ.3 W. H. print ζήν (Ro. 8:12). This is a matter of much dispute with the editors, but it is more than doubtful if W. H. are correct. On the other side see Winer-Schmiedel4 and Moulton.5 But both ζάω (Ro. 8:12) and χράομαι (1 Tim. 1:8) have the η contraction rather than α (–ησ vs. verbs, Moulton, Prol., p. 54). In Ro. 7:9 B even has ἐζην for ἐζων. But the κοινή uses χρῆσθαι, though not in the N. T.6 Paul [Page 342] has χρῆται (pres. subj.) in 1 Tim. 1:8. Elsewhere also the α forms prevail in the κοινή as in διψῶν and πεινῶν. So πεινᾷ (1 Cor. 11:21), πεινῶν (Ph. 4:12), διψά (Ro. 12:20) as subjunctive (so πεινᾷ same verse). The LXX keeps Attic ζήν and χρῆσθαι, but διψάν και πεινῶν (Thackeray, Gr., p. 242).1

1 Cf. Mayser, Gr. d. griech. Pap., p. 328, for χαριέσαι. The LXX (1 Ki. 14:6 A) shows ὀπεξενοῦσαι. The only certain instance in the LXX is κτᾶσαι (Sir. 6:7). See Thack., p. 218. Cf. further Hatz., Einl., p. 188.
2 Hort, Notes on Orth., p. 166.
3 Ib. Moulton (Cl. Rev., 1901, p. 36) cites ἐνίκειαι and τιμοῦντες from pap.
6 Moulton, Prol., p. 54.
Verbs in –εω sometimes show forms in –αω. So ἔλλογα in Phil. 18, ἔλλογονται in Ro. 5:13, ἔλεγοντε in Ju. 22, 23, and ἔλεωντος in Ro. 9:16, but ἔλεειν in Ro. 9:18. LXX has both forms. The κοινή usually has the –ἐῖν forms. 2 For further examples of this confusion between –αω and –εω in LXX and isolated N. T. MSS. see Winer-Schmiedel. 3 In 1 Cor. 11:6 all editors print ξυράσθαι (cf. κείρασθαι just before), though in 1 Cor. 11:5 ἔξωρομεν and ξυρήσονται (Ac. 21:24) probably come from ξυρέω. 4 Cf. ἐώ, ἐσσω.

Contraction does not always take place with εε in verbs in –εω. In Lu. 8:38 W. H. follow BL in giving ἔδεσστο, but Hort6 admits that it is not free from doubt. Blass7 and Moulton8 consider ἔδεετο correct and the contraction a mere correction, and it is supported by the LXX and papyri. AP even have ἔδεσστο. In Rev. 16:1 ἐκχέετε is undoubtedly right and ἐξέχεεν in 16:2, but note ἐκχεῖ (Mt. 9:17). In Mk. 14:3 κατέχεει is to be noticed also (cf. Attic aorist). On the other hand in Jo. 3:8 note πνεῦ, ἐξεπλεῖ (Ac. 18:18), πλεῖν, ἄποπλεῖν (Ac. 27:1 f.). In the LXX these words appear now one way, now the other. 9 Δέω (‘to bind’), ἰέω have no ee forms in the N. T. W. H. accept in text only ἐξουθενέω in all the dozen examples in the N. T. (as Lu. 18:9, ἐξουθενοῦντας), but in Mk. 9:12 they have δ instead of θ. 10 Observe also ἀφέωνται (Lu. 5:20, etc.) instead of ἀφώνται or the regular ἀφένται. In the N. T., W. H. give ἐρρέθη (Gal. 3:16; Mt. 5:21, etc.), but Hort11 thinks the Attic ἐρρήθη should appear always in Matthew.

Verbs in –οω have two knotty problems. In Gal. 4:17 ζηλοῦτε and 1 Cor. 4:6 φυσιοῦσθε are regular if indicative. But if they are subjunctive, the contraction οη is like the indicative οε (cf. indicative of –οω verbs). So Blass1 and Moulton.2 Hort3 doubts the indicative here. If εὐοδοῦται (1 Cor. 16:2) be regarded as a present subjunctive no problem in contraction is raised. 4 But in Col. 4:17 we have the subjunctive in ἵνα πληροῖ as in Attic for both indicative and subjunctive. In Ro. 3:13 ἐδολοῦσαν is the common LXX form in –οσαν. The other point is the infinitive in –οῦν or –οῦν. W. H. give –οῦν for this infinitive everywhere

2 Hatz., Einl., p. 128 f. Moulton (Cl. Rev., 1904, p. 110) cites φρονοῦντες and per contra ὁγαγοῦντες from pap.
3 P. 117 note.
4 Hort (Notes on Orth., p. 166) prefers ξώρασθαι after Plut. and Lucian.
5 Cf. W.-Sch., p. 116 f. See further on this mixing of contract verbs, Mayser, Gr. d. griech. Pap., p. 349. The LXX MSS. show much the same situation as to contract verbs that we find in the N. T. and the pap. Helbing (Gr. d. Sept., pp. 110–112) gives the facts in detail.

3 Notes on Orth., p. 171 f.
except πληροῦν in Lu. 9:31. Cf. -ἀν and -ῆν in W. H. Blass considers the -οῖν termination “hardly established for the N. T.” since even in the N. T. the evidence is “small,” though “of good quality” Hort contends. In Mt. 13:32 κατασκεκηνοῦν is supported by BD (in Mk. 4:32 by B), in 1 Pet. 2:15 φησίν has Ν, and in Heb. 7:5 ὁποδεσκατοῦν has BD. Moulton finds no support earlier in date than B save one inscription cited in Hatzidakis (Einl., p. 193) and one papyrus of second century A.D. Mayser likewise finds no infinitive in -οῖν till after first century A.D. and gives some references for this late infinitive form. It looks as if the case will go against W. H. on this point. The form is probably due to some late grammarian’s refinement and is linguistically unintelligible.

Πιεῖν is often contracted (sounded finally ἶ, then ἵ) into πεῖν (so W. H., Jo. 4:7, 9, etc.) and in some MSS. (Ν 8/9 times) into πῖν. But πεῖν is the Syrian reading (Mt. 20:22, etc.). Contraction in –αω, –εω, –οο verbs, of course, takes place only in the present, imperfect and present participle.

VII. The Tenses (γρόνοι).

(a) THE TERM TENSE. It is from the French word temps, ‘time,’ and is a misnomer and a hindrance to the understanding of this aspect of the verb-form. Time does come finally to enter relatively into the indicative and in a limited way affects the optative, infinitive and participle. But it is not the original nor the general idea of what we call tense. Indeed it cannot be shown of any verb-form that it had originally any reference to time. We must therefore dismiss time from our minds in the study of the forms of the tenses as well as in the matter of syntax. It is too late to get a new name, however.

(b) CONFUSION IN NAMES. The greatest confusion prevails in the names given to the various tenses. The time idea appears in the names present, past perfect and future. The state of the action rules in the names aorist, imperfect and perfect. Thus it is clear that the time idea did not prevail with all the names that the grammarians used. In the indicative, indeed, in the past three tenses appear, in the present two, in the future one (sometimes two). In the other modes as a rule only three tenses are found; in truth, in the subjunctive, optative and imperative practically only two are in common usage, the aorist and the present.

As a matter of fact there are nine possible tenses for each voice in the indicative: the aorist present, the imperfect present, the perfect present, the aorist past, the

6 Gr. of N. T. Gk., p. 48.
7 Notes on Orth., p. 166.
9 Gr. d. griech. Pap., p. 349; Raderm., p. 74.
10 Hort, Notes on Orth., p. 170.
imperfect past, the perfect past; the aorist future, the imperfect future, the perfect future. These ideas do occur. In the past the distinction is clear cut. In the present no sharp line is drawn between the aorist and durative (unfinished or imperfect) save when the periphrastic conjugation is used or when Aktionsart comes in to help out the word itself. In the future, as a rule, no distinction at all is made between the three ideas. But here again the periphrastic conjugation can be employed. As a rule the future is aoristic anyhow. For further discussion see Jannaris, Hist. Gk. Gr., p. 180; Farrar, Greek Syntax, p. 120, and the references there to Harris’ Hermes, Harper’s Powers of the Greek Tenses, and H. Schmidt’s Doctrina Temporum Verbi Graeci et Latini. The modern Greek preserves as distinct forms the aorist, present, imperfect; the future, the perfect and past perfect using periphrastic forms. Mr. Dan Crawford reports 32 tenses for Bantu.

(c) THE VERB-ROOT. There were originally two types of verb-roots, the punctiliar and the durative. The tense called aorist (ἀόριστος, ‘undefined action’) is due to the use of the punctiliar verbs (the idea of a point on a line). The present tense comes out of the durative verb-root. But it is worth repeating that tenses are a later development in the use of the verb.\(^1\)

Hence it was natural that some verbs never developed a present tense, like ἔδω, and some made no aorist, like ὁρᾶω. The defective verbs thus throw much light on the history of the tenses. [Page 345] Out of these two ideas grew all the tenses. Each language had its own development. Some aorists in Sanskrit had no presents, like the Greek ἔδω. Each tense in the Greek pursued its own way. It is a complex development as will be seen. The idea of comparing the aorist to a point and the present to a line is due to Curtius, but it has since been worked out at length.\(^1\) Instead of saying “irregular” verbs, Delbrück (Vergl. Syntax, Tl. II, p. 256) speaks of “several roots united to one verb.”

This Aktionsart or kind of action belongs more specifically to syntax.\(^2\) But it is not possible to make a modern study of the tense formations without having clearly in mind this important matter. It will come out at every turn. Along with the various tense-suffixes which came to be used to express the tense-distinctions as they were developed there remains also the meaning of the verb-root itself. This is never to be

\(^{2}\) Thumb (Handb., p. 123) likewise feels the necessity of a word about Aktionsart under Morphology.
left out of sight. Prepositions also enter into the problem and give a touch much like a suffix (perfective). So θηρέσκειν is ‘to be dying’ while ἀποθανεῖν is ‘to die’ and ἀποτεθηκέναι is ‘to be dead.’ Cf. ἔχει, ἐπέχει, ἔφαγον and κατέφαγον. But more of this in Syntax. The point here is simply to get the matter in mind.

(d) The Aorist Tense (ἁόριστος χρόνος). It is not true that this tense was always the oldest or the original form of the verb. As seen above, sometimes a durative root never made an aorist or punctiliar stem. But the punctiliar idea is the simplest idea of the verb-root, with many verbs was the original form, and logically precedes the others. Hence it can best be treated first. This is clearer if we dismiss for the moment the so-called first aorists and think only of the second aorists of the –µ form, the oldest aorists. It is here that we see the rise of the aorist. Henry has put this matter tersely: “The ordinary grammars have been very unfortunate in their nomenclature; the so-called second perfects are much more simple and primitive than those called first perfects; the same is the case with the second aorists passive as contrasted with the first aorists,” etc. The same remark applies to second aorists active and middle. The non-thematic second aorists represent, of course, the most primitive form. The survivals of these forms in the N. T. have been discussed under –µ Verbs. The difference between the strong aorist (both thematic and non-thematic) and similar presents is syntactical and not formal. The point is that the strong aorists and the corresponding presents represent the simple stem of the verb. Brugmann indeed treats them together. It is not possible to make an etymological distinction between the imperfects ἔφην, ἔγραφον and the aorists ἔστην, ἔφαγον. The imperfect, of course, differs from the present only in the augment and secondary endings. The kinship between the aorist and present stems is further shown in reduplication. Reduplication in the aorist, as ἠγαγον, is supposed to be originally causative. Cf. the use of it with inceptive presents like γίνωσκω. The aorist was quite common in the older

Henry, Précis de grammaire du grec et du latin. 5th ed. (1894). Elliott’s tr. of 1st ed. (1890).

3 Cf. Giles, Man. of Comp. Philol., p. 453 f.
Sanskrit, but is rare in the later language. Cf. the blending of the aorist and the present perfect forms in Latin. The strong aorist (both non-thematic and thematic) is far more common in Homer than in the later Greek. Indeed in the modern Greek the strong aorist has wellnigh vanished before the weak aorist.

As often, the grammars have it backwards. The so-called second is the old aorist, and the so-called first is the late form of the verb. This weak form of the aorist has a distinct tense-sign, σ, the sigmatic aorist. The σ (–σα) was not always used, as with liquid verbs, like ἔστειλα. This sigmatic aorist appears also in the Sanskrit. The distinction was not always observed between the two forms, and mixed aorists of both kinds occur in Homer, like ἔξοντο, ἔνεικα. No wonder therefore that uniformity gradually prevailed at the expense of the strong aorist in two ways, the disuse of the strong aorist (so ἦξα) and the putting of first aorist endings to the second aorist stems, as ἔπα, ἔσχα.

The κ aorists in the indicative (ἔδωκα, ἔθηκα, ἔκα) continued to hold their own and to be used usually in the plural also. An extension of this usage (after the analogy of the perfect) is seen in the Byzantine and modern Greek form ἐλύθηκα for ἐλύθην.

There is one more aorist form, the aorist passive. As already shown, the so-called second aorist passive (–ην), like ἐφάνην, ἔχαρην, is merely the second aorist active. The so-called first aorist passive in –θην is a Greek creation after the analogy of the old Indo-Germanic. Homer makes little use of either of these passive aorists, but the second is the more frequent with him and the form in –θην is very rare.

If this emphasis upon the aorist forms seem unusual to modern students, they may be reminded that in English we have only two tenses (apart from the periphrastic conjugation) and that they are usually punctiliar, as “I sing,” “I sang.” One is a present aorist, the other a past aorist. We do not here enter into the Aktionsart of the aorist (whether ingressive, constative or effective). That belongs to syntax.

6 Munro, ib., p. 47.
The inscriptions agree with the development shown above in the aorist and support the N. T. phenomena. Mayser gives a careful discussion of the papyri development. In brief it is in harmony with what has already been observed. The non-thematic strong aorist is confined to a few verbs like βῆναι, γνῶναι, δοῦναι, ὀὖναι, θεῖναι, πρᾶσθαι, στῆναι. The κ aorists are used exclusively in both singular and plural. The thematic strong aorist is disappearing before the weak sigmatic aorist.

In the N. T. the κ aorists ἐδόκοκα, ἔθηκα, ἄφηκα occur always except that Luke (1:2 in the literary introduction) has παρέδοσαν. Elsewhere ἐδόκατε (Mt. 25:35), ἔθηκαν (Mk. 6:29), ἄφηκατε (Mt. 23:23), etc., and quite frequently. The LXX also nearly always has κ with these aorists in the plural.

The non-thematic aorists in the N. T. are not numerous. The list is found in the discussion of –µι verbs and includes ἄνέβην, ἔγνων, ἔστην, ἔφην, ὄναμην, and all the forms of δοῦναι, ἔναι and θεῖναι save the indicative active.[Page 348]

The thematic strong aorist in the N. T. shows the two developments noted above. The use of –α instead of –ον with the strong aorist-stem is very common. See this chapter, VI, (h), for N. T. list like ἔβαλαν, etc. The MSS. vary much in the matter. The other change is the increased use of the sigmatic aorist. Here again Blass has a careful presentation of the facts. ἔβιώσα (1 Pet. 4:2) is a case in point instead of the old Attic ἐβίων. So is ἔβλαστησα (Mt. 13:26; Heb. 9:4; Jas. 5:18) rather than ἔβλαστον. Both ἔγαμησα (Mt. 5:32) and ἔγημα (Mt. 22:25) occur. Cf. Helbing, Gr. d. Sept., p. 93 f., and Thackeray, Gr., pp. 233 ff., for LXX illustrations.

Helbing

HELBERG, R., Die Präpos. bei Herodot und andern Historikern (1904).

———, Grammatik der Septuaginta. Laut- und Wortlehre (1907).

Thackeray

Ἡξα occurs a few times instead of the common ἤγαγον, as ἐπάξας (2 Pet. 2:5), ἐπισυνάξαται (Lu. 13:34). Blass justifies it as appearing at least in dialects, LXX and late writers.7 It is part of the tendency towards the sigmatic aorist. Likewise ἀμαρτήσαω is slipping in beside ἀμάρτω (Mt. 18:15; Ro. 5:14, 16, cf. verse 12). Blass finds it in Emped., LXX, Lob., Phryn., 732. W. H. accept ἔδουεν (Mk. 1:32 on the authority of BD (NA, etc., ἄδι). Luke in Ac. 24:21 has the reduplicated aorist ἐκέκραξα like the LXX, but usually the N. T. has the late form ἐκραξα (Mt. 8:29 (ἐκραξαν), though once the Attic ἀνέκραγον appears (Lu. 23:18). Once Luke (Ac. 6:2) has καταλεύγαντας, a form that Blass4 finds in Herm., Vis. VIII, 3. 5, and Mayser5 observes ἀντειλήψαι in the papyri.

Ὅψηθε (Lu. 13:28) finds a parallel in an old Homeric aorist Ὀψάμῃν (Winer-Schmiedel, p. 109). In Rev. 18:14 the Text, Rec. (without any known authority) has an aorist form ἔδυρησα. So in Jas. 4:13 some MSS. have ἔμπορευσόμεθα. Indeed some verbs have dropped the strong aorist form entirely like βιόω, βλαστάνω, ἐγείρω, κτείνω. See careful discussion of Winer-Schmiedel, p. 109 f. MSS. frequently read δόση, δόσωμεν, etc., as if from an aorist ἔδωσα, as Jo. 17:2; Rev. 4:9. Cf. Winer-Schmiedel, p. 120. Cf. Helbing, Gr. d. Sept., p. 90 f., for LXX examples that further parallel these illustrations.

Conversely is to be noted a new strong aorist ἀνέθαλον (Ph. 4:10) which Blass6 takes in a causative sense (ἀνεθάλετε τὸ ὑπέρ ἐμοῦ φρονεῖν).

Verbs in –ζω make the aorist both in σ and ξ. Most of these [Page 349] verbs have dental stems in Attic, but some have guttural. Hence the σ forms prevail till to-day. The LXX agrees with the N. T. (Thackeray, Gr., p. 222 f.). So ἔνυσταξαν (Mt. 25:5), ἐμπαζέω (Mt. 20:19), ἐπεστήρισαν (Ac. 15:32); but on the other hand ἔστηρισεν (Lu. 9:51), ἔπεστιν (Ac. 8:39), ἔρήσιμῃν (2 Cor. 11:2), σαλπίζῃς (Mt. 6:2).1 The tendency in the papyri and the inscriptions on the whole is towards the use of σ and not ξ with the verbs in –ζω.2 Cf. Βαπτίζω, λογίζομαι, νομίζω, etc.

Like καλέω and τελέω3 we have ε in ἐφορέσαμεν (1 Cor. 15:49) and ἔρρέθη (Mt. 5:21), but εὐφόρησα (Lu. 12:16), ἤρθεν (Mt. 1:22) and ἐπεκόθησα (1 Pet. 2:2). Cf. also ἤνεσα, ἤρκεσε, ἐμέσα. Cf. ἐπείνασα (Mt. 4:2), but διψήσω, though D has –α in Jo. 6:35 and Ν in Rev.

3 Ib. Mayser (Gr. d. griech. Pap., p. 369) finds it in the pap. as well as ἄγαγήσαι.
4 Gr. of N. T. Gk., p. 43. Cf. καταλεύψῃ Mk. 12:19 Ν.

6 Gr. of N. T. Gk., p. 43.
1 Cf. W.-Sch., p. 105.
2 Cf. Mayser, Gr. d. griech. Pap., pp. 360 ff., for careful discussion and references for further research.
3 So πονέω and φορέω(ε) in the LXX. Cf. W.-Sch., p. 105.
The liquid verbs in –αίνω and –αίρω generally retain ἄ even when not preceded by ε or ι as in Attic. So ἐβάσκανα (Gal. 3:1); once κερδάνω (1 Cor. 9:21), elsewhere – ἄσα; ἐξεκάθαρα (1 Cor. 5:7); ἐλεύκανα (Rev. 7:14); ἐσήμανα (Rev. 1:1); ἐκφέναι (Lu. 1:79). In Rev. 8:12 and 18:23 note φάνε, not φάνῃ. The κοινή begins to use –άνα and –άρα with all verbs, and it is well-nigh universal in modern Greek. The LXX agrees with the N. T. (Thackeray, Gr., p. 223). A few –ηνα forms survive in modern Greek (Thumb, Handb., p. 140 f.).

The second aorist passive has a few late developments of its own. This substitution of the second aorist passive for the first is a favorite idiom in the N. T.4 The κοινή shows likewise fondness for the –ην formations.5 This is true of the inscriptions6 and the papyri.7 This development is directly the opposite of that in the case of the second and first aorist active and middle. It has already been observed that in Homer the passive aorist is very rare. Perhaps the increase in the use of –ην forms is partly due to the general encroachment of aorist passive forms on the middle, and this is the simplest one. The Attic, of course, had many such forms also. Here are the chief N. T. examples: ἠγγέλην (ἀπ–, ἀν–, δι–, κατ–, Lu. 8:20, etc.) is in the LXX and the papyri; ἠνοίγην (Mk. 7:35, etc.), but ἠνοίχθησαν also (Rev. 20:12); ἐξεκάθαρα (2 Cor. 12:2, 4), but the Attic ἐξεκάθαρη (Rev. 12:5); διετάγην is read by some MSS. in Mt. 24:43; διετάγην (Gal. 3:19), ἐκρύβη (Ro. 8:20, etc.), but the Attic διετάγη (Lu. 17:9 f.). [Page 350] κατεκάην (Rev. 8:7; 1 Cor. 3:15), but Attic ἐκκαθάρησαν (Ro. 1:27); κατενύχθησαν (Ac. 2:37); ἐφύην (Jo. 8:59). So also ἐφύην instead of ἐφύν follows the analogy of ἐφύν (Heb. 2:1) and ἐχάρην (Lu. 22:5). Thus we have ἐκφέν (Mk. 13:28)1 and συμφύεσαι (Lu. 8:6–8). Forms like ἐπλήγην (Rev. 8:12) and ἐφάνην (Mt. 1:20) are Attic. On the other hand the poetical ἐκλύθην (Mt. 14:19

4 Blass, Gr. of N. T. Gk., p. 43.
1 Cf. W.-Sch., p. 110, for exx. in Jos. and LXX. Cf. also Helbing, Gr. d. Sept., p. 95 f. MSS. simply read –φη.
ἀνακλιθῆναι) has displaced the Attic ἐκλίνην. Ἀπεκτάνθην occasionally appears (as in Mk. 8:31 and Rev. six times) where the Attic would have ἀπέθανον, and ἔτεχθην (Lu. 2:11) when the Attic would usually have ἔγενόμην. Both ἔγενόθην (Mt. 6:10 and often in 1 Th.) and ἔγενόμην (Mt. 7:28) are common, as ἦδυνήθην (Mt. 17:16) and ἦδυνᾶσθην (Mt. 7:24). The many aorist passives in the deponent sense have already been noticed under VI, (e).

1. **The Present Tense** (Ὄ ἐνεστώς χρόνος). The present indicative, from the nature of the case, is the most frequent in actual use and hence shows the greatest diversity of development. Brugmann finds thirty-two distinct ways of forming the present tense in the Indo-Germanic tongues and thirty of them in the Greek. But some of these represent very few verbs and for practical purposes a much simpler classification is sufficient. Unfortunately the grammars by no means agree on the simplification. As samples see Giles, *Man. of Comp. Philol.*, p. 425 f.; Hadley and Allen, p. 122 f.; Monro, *Homeric Grammar*, p. 9; Riemann and Goelzer, *Phonétique*, pp. 394 ff.; Kühner-Blass, II, pp. 88 ff. In simple truth the facts are so varied that they lend themselves to many combinations more or less artificial. One of the most satisfactory is that of Monro, who has the historical instinct at least in his arrangement.

1. **The Root Class.** This is the simple non-thematic present like φημί. This is the logical one to put first, as with the aorist like ἔβην. This class is disappearing in the N. T. though δύναμαι, ἐμί, ἐμι in composition (ἐδοκοῦσα, ἔδεικνυσα, κάθησα-μαι, κρέμα-μαι appear.

2. **The Non-Thematic Reduplicated Present.** So δίδωμι, ἵημι, ἱστημι, κίχρη-μι, ὁνίη-μι, πίλη-μι, τίθη-μι. It was never a very large class, but holds on in the N. T. And —ω forms are common with these verbs.

4. The Simple Thematic Present. So λέγω, λύω. This was a constantly increasing class at the expense of the –µ verbs. It had several branches also including root-verbs like ὑγίω, γράφω, a strengthened vowel like πεῖθ-ω (πιθ), λειπ-ω (λιπ), φεύγ-ω (φυγ), σήμα, τίκω, τρόχω, ὅλβιο, πνίγω, etc., Hadley and Allen’s “strong vowel class,” and the many contract denominative verbs like τιμ-ω, φιλ-ω, ἄξιό-ω. But see the 1 Class for these contract verbs. New verbs were added to this list from nouns and some also from verb-stems, γηγορ-ω from the old perfect ἐγρήγορα (this tense never in the N. T.), στήκ-ω (Mk. 11:25) from ἑστήκα (modern Greek στέκω). In Lu. 1:24 περιήκρυβεν is probably imperfect, not aorist, from κρύβω (κρύπτω). Cf. ἐκρύβην. The LXX shows these new presents from perfect stems (Thackeray, Gr., p. 224 ff.).

6. The Thematic Present with a Suffix. There are five (–ι, –ν, –σκ, –τ, –θ). Each of these divisions furnishes a number of verbs.

(a) The 1 class. It is very large. This suffix is used to make verbs from roots and substantives. It is probable that originally the suffix was –γι. It is thought that contract verbs in –αω, –εω, –οω, etc., originally had this 1 as j or v which was dropped. It is thus the chief way of forming denominative verbs and is preeminently a secondary suffix. Some of these verbs are causative, some intensive, some desiderative. The special Greek desiderative in –σείω does not appear in the N. T., but forms like κοπάω are found. In particular, forms in –ιζω become so common that they no longer have an intensive, iterative or causative force. [Page 352] But are used side by side with the older form, as βάπτω, βαπτίζω, βάπτω, ἐκβάπτω, etc. In all the –ζω forms the 1 has united with a palatal (guttural) or lingual (dental), a matter determined by the aorist or future. So φυλάσ-σω is from φυλάκ-ζω, φράζω from φράζω. Other familiar combinations are ι ἱ and λ, as βάλ-ζω=βάλλω, ι with v by transposition, as φαν-ζω=φανίων, ι with r likewise, as ἄρ-ζω=ἀφρ. In καιω and κλαίω the v has dropped between α and ι. In the N. T. verbs in –αινω, –αίρω have –ἄνα, – ἄρα in the first aorist active as already shown under the aorist tense (d). Αἱμφίαζω (Lu.

2 Gr., p. 122.
3 Blass, Gr. of N. T. Gk., p. 40.
4 Ib., p. 41. The LXX MSS. show both γηγορέω and στήκω. Cf. Helbing, Gr. d. Sept., p. 82.
5 Cf. Blass, Gr. of N. T. Gk., p. 41.
7 Hirt, ib., p. 383 f.
8 Giles, Man. of Comp. Philol., p. 440.
10 Jann., ib., p. 222.
12:28) is an example of a new present for ἀφιέννυμι. Cf. also ἀποκτεννόντων (Mt. 10:28) in some MSS. for the older ἀποκτείνω, –ννο, –νω. See Blass for the variations in the MSS. at many places in the N. T. with this word. So ἐκχύννυ (Mt. 26:28, etc.) in the best MSS. for ἐκχέω. Only in Mt. 9:17 we have ἐκχέαται from ἐκχέω and in Rev. 16:1 ἐκχέατε in some MSS.

(b) The ν class is also well represented in the N. T. with thematic stems. It takes various forms. There is the ν alone, as κόμ-νω, –αν as ἀμαρτ-άνω, –νε as ἀφ-ικ-νέ-μαι. Sometimes the ν is repeated in the root, as λαμβάνω (λαβ), μανθάνω (μαθ), τυγχάνω (τυχ). In the κοινή (so LXX and N. T.) this inserted ν (μ) is retained in the aorist and future of λαμβάνω (Ἐλήμφθην, λήμψαμαι) contrary to literary Attic. So the papyri.

(γ) The σκ class. It is commonly called inceptive, but Delbrück considers these verbs originally terminative in idea, while Monro calls attention to the iterative idea common in Homer with the suffix –σκε, –σκο. The verbs with σκ may be either without reduplication, as βό-σκω, θνή-σκω, ἱλά-σκομαι, φά-σκω, or with reduplication as γι(γ)νώ-σκω, δι-δά-σκο (for δι-δάχ-σκω), μι-μι-σκο, πά-σκω (for πάθ-σκω). Cf. ἀρέ-σκω, γαμ-ίσκω, γηρά-σκω, εὐρ-ίσκω, μεθή-σκω. Reduplication is thus a feature with root-verbs (non-thematic) like δι-δω-μί and thematic like γι(γ)νο-μαι as well as the σκ class. For reduplication in the aorist and the perfect see (h). The iterative idea of some of these σκ verbs suits well the reduplication.

(δ) The τ class. It is not a very numerous one (about 18 verbs), though some of the verbs are common. The verb has [Page 353] always a labial stem like ἄπ-τω, βάπ-τω, τύπ-τω. The root may end in β as in καλ-τω, π as in τόπ-τω, or φ as in βάπ-τω. It is even possible that πτ may represent an original πφ (cf. iota class).

1 Gr. of N. T. Gk., p. 41. The LXX has these new presents. Thack., p.225.
2 Blass, ib. The LXX MSS. illustrate most of these peculiarities of verbs in the present tense. Cf. Helbing, Gr. d. Sept., pp. 82–84.
3 Giles, Man. of Comp. Philol., p. 436.
Delbrück

DELBRÜCK, B., Ablativ Localis Instrumentalis (1867).
———, Syntaktische Forschungen. 5 Bde. (1871–1888).
5 Hom. Gr., p. 34.
(e) The θ class. Cf. ἀλή-θω, ἔσθω, κνή-θω, νή-θω in the present. The modern Greek has developed many new presents on the basis of the aorist or the perfect (Thumb, Handb., p. 143).

(f) The Future Tense (ὁ μέλλων χρόνος). The origin of this tense has given rise to much discussion and some confusion. Vincent and Dickson even say that the first aorist is derived from the σ future! Like the other tenses there has been a development along several lines. No general remark can be made that will cover all the facts. As already remarked, the future tense is fundamentally aoristic or punctiliar in idea and not durative or linear. The linear idea can be accentuated by the periphrastic form, as ἔσεσθε λαλοῦντες (1 Cor. 14:9). Cf. also Mt. 24:9; Lu. 1:20; 5:10; Mk. 13:25. But as a rule no such distinction is drawn. The truth is that the future tense is a late development in language. In the Sanskrit it is practically confined to the indicative and the participle, as in the Greek to the indicative, infinitive and participle (optative only in indirect discourse, and rarely then, not at all in N. T.). And in the Rigveda the σά form occurs only some seventeen times. The Teutonic tongues have no future form at all apart from the periphrastic, which existed in the Sanskrit also. In the modern Greek again the future as a distinct form has practically vanished and instead there occurs θά and the subjunctive or θέλω and the remnant of the infinitive, like our English “shall” or “will.” Giles thinks it uncertain how far the old Indo-Germanic peoples had developed a future.

Probably the earliest use of the future was one that still survives in most languages. It is just the present in a vivid, lively sense projected into the future. So we say “I go a-fishing” as Simon Peter did, ἔρχομαι ἀλείπειν (Jo. 21:3). The other disciples respond ἔρχομαι καὶ ἡμεῖς σὺν σοί. This usage belongs to the realm of syntax and yet it throws light on the origin of the future tense. So Jesus used (Jo. 14:3) the present and future side by side (ἔρχομαι καὶ παραλήμψω). We have seen already that a number of aorists and presents like φη-μί had identically the same root and with no original distinction. That is, the durative idea was not distinguished from the aoristic or punctiliar. It is not strange, therefore, to see a number of these roots with primary endings (cf. subj. and opt. aorists) used as futures without any tense-suffix at all. Some were originally either present or future in sense (cf. ἔρχομαι above), others came to be used only as future. These verbs appear in Homer naturally, as βίο-μι, ἔδο-μι, ἕμι, πίο-μι, etc. Cf. N. T. φάγο-μι. It is possible that those with variable vowel like ἔδο-μι may really be the same form as the Homeric subjunctive (like ἔρχο-μι as opposed to ἔρχο-μι). The form φάγο-μι is common in Attic (N. T.) and is from aorist root (ἔ-πι-ν). The form φάγο-μι (LXX and N. T.) is analogous (aorist, ἔφαγον). The Attic used χέω as future also, but LXX and N. T. have χεῖδω (Blass, Gr. of N. T. Gk., p.

Vincent and Dickson VINCENT and DICKSON, A Handbook to Modern Greek (1887).
1 Handb. of Mod. Gk., p. 82.
2 Hirt, Handb. etc., p. 401.
4 Thumb, Handb., pp. 161 f., 173.
1 Sterrett, Hom. II., N. 38.

It used to be said that the σ future was merely a variation of the Sanskrit ṣā, the y or j sound disappearing in the Greek. This gave a simple explanation of the σ futures. But a rival theory has been advanced which derives the σ future from the σ aorist.3 The frequency of the aorist subjunctive in Homer with κέ (Θν) in principal clauses much like the future indicative in Attic, and the absence of a future passive, not to say future optative, in Homer give some colour to this contention.4 Thus δείξω and the Latin dixō would be identical in form and meaning.5 But Brugmann6 has perhaps solved the problem by the suggestion that both explanations are true. Thus γράψω he derives from the aorist subjunctive γράψας, a mixed tense with a double origin. The use of –σιο/ε in the Doric lends weight to the derivation of these verbs at least from the ṣā (Sanskrit) type.7 Hirt8 regards σεο/ε (Doric) as a combination of the σ future and the ε future (liquid verbs, for instance) and considers it a new Greek formation. This Doric future therefore may be as old as any, [Page 355] if not the oldest suffix, in fact the really distinctively future suffix. In the N. T. this Doric form survives in πεσοῦμαι1 (Mt. 10:29). Ῥεω has Ῥέωσο (Jo. 7:38), κλαίω has κλαύσω (Lu. 6:25), while φεύγω has φεύξωμαι (Jo. 10:5). The other forms common in Attic have no future in the N. T. This mixed2 origin of the future (partly aorist subj., partly Indo-Germ. Siō) shows itself in the Aktionsart of the tense. So Moulton notes προοίμω (Mk. 14:28) as durative, but ἔξα (1 Th. 4:14) as aoristic. Cf. Thumb, *Handb.*, p. 123.

3 Ib., p. 446. Cf. also Hirt, *Handb.* etc., p. 401 f.
4 Sterrett, Hom. II., N. 27.
5 Giles, Man., p. 446.
6 Griech. Gr., p. 320. This position is accepted by K.-Bl., II, p. 105.
7 Ib., p. 105 f.
9 Handb. etc., p. 403 f.
1 And this πεσοῦμαι is possibly not from πετ-σοῦμαι, but a change of τ to σ. Cf. K.-Bl., II, p. 107; Brug., Griech. Gr., p. 322; Hirt. Handb., p. 404. Henry (Comp. Gr. of Gk. and Lat., p. 116) considers the Doric future to be the affix of the future twice over, as σεσο, σεο.
2 Moulton, Prol., p. 149.

Moulton

———, Characteristics of N. T. Greek (The Expositor, 1904).

———, Einleitung in die Sprache des N. T. (1911).

Thus we may gain further light on the Ionic-Attic future of verbs in –ιζω. It is like the Doric –σεοε. So we have –ισεω, dropping σ we get –ιεω=–ιω. These verbs in –ιζω are very common in the later Greek. In the N. T. the usage varies between this form of the future and the aoristic form in –σοε. The LXX, like the Ptolemaic papyri (Thackeray, p. 228), has usually –ιω in first singular and so μετοκιω (Ac. 7:43) and παροργιω (Ro. 10:19), both quotations. Elsewhere W. H. prefer the forms in –ισω, and Blass thinks that in the original passages of the N. T. the –ισω forms are genuine.

So the forms in –ισει (like βαπτίσει) are uniform in the N. T. (Lu. 3:16) save καθαριεί (Heb. 9:14) and διάκαθαριεί (Mt. 3:12). MSS. vary between ἀφοριει and –ισει, φωτιει and –ισει, χρονιει and –ισει. Cf. Blass. So in Eph. 6:8; Col. 3:25, the MSS. vary between κομιζται and κομίζεται. Some MSS. read κομίζμενοι in 2 Pet. 2:13.

All editors accept κομίζοθε in 1 Pet. 5:4. The active plural W. H. print as –τοῦσι always (as μακαριοῦσιν, Lu. 1:48) save in γνωρίσουσιν (Col. 4:9).

The syncopated futures from the dropping of σ do not survive in the N. T. in καλέσω, τελέσω which always retain the σ. So even ἀπολέσω (Mt. 21:41), though ἀπολῶ is common in the LXX and [Page 356] is quoted once in the N. T. (1 Cor. 1:19). However, the middle ἀπολοῦμαι is the N. T. form (Lu. 5:37) like ἀποθανοῦμαι. Ἐλαύνω has no future in the N. T. The N. T., like the LXX, has a future form ἀφελῶ (Rev. 22:19) from the aorist ἀναλον of αἱρέω.

———, The Science of Language (1903).

MOULTON, W. F., and GEDEN, A. S., A Concordance to the Greek Testament (1897).

MOULTON and MILLIGAN, Lexical Notes from the Papyri (The Expos., 1908—).

———, The Vocabulary of the N. T. Illustrated from the Papyri and other Non-Literary Sources. Part I (1914), II, III.
The liquid verbs in λ, ν, ρ present few problems. They belong to the aorist subjunctive type of formation.1 Here again we have syncopation of the σ. Verbs like βάλλω (βάλλο), μένω (μενῶ), αἴρω (ἀρέω) form the future with the variable vowel ο/ε added to the stem without σ in the N. T. as in the earlier Greek.

Blass2 has shown that in the N. T. the future active has largely displaced the future middle with verbs that were defective in the active voice. These futures are as follows: ἁμαρτήσω (Mt. 18:21), ἀπαντήσω (Mk. 14:13), ἀρπάσω (Ac. 28:26), γελάσω (Lu. 6:21), διώξω (Mt. 23:34), κράξω (Lu. 19:40 MBL), παίξω (Mk. 10:34), ρεύσω (Jo. 7:38), σπουδάσω (2 Pet. 1:15), συναντήσω (Lu. 22:10). We see this tendency already in the LXX (Thackeray, Gr., p. 231 f.). On the other hand the future middle alone occurs with ἀποθανοῦμαι (Jo. 8:24), γνώσομαι (1 Cor. 4:19), λήμψομαι (Mt. 10:41), δύνομαι (Mt. 24:30), πεσοῦμαι (Doric, Mt. 10:29), πίνομαι (Mk. 10:39), φάγομαι (Lu. 14:15), φεύγομαι (Jo. 10:5). Χαρήσομαι (Lu. 1:14) Blass3 regards as Attic future from the aorist (ἐχάρην) as compared with the future χαιρήσω from the present. Both ἔκκοσω (Jo. 5:25) and ἔκκοσμοι (Ac. 21:22, chiefly in the Acts) are found, and ζήσο (Jo. 5:25) and ζήσομαι (Jo. 11:25).

The so-called second future passive as seen in the case of χαρήσομαι above is really just the middle ending with σ put to the aorist active stem. There is no difference in form or sense between βήσομαι and σταλήσομαι save the –η– which was really a part of the active stem of these verbs.4 The point is that fundamentally these so-called second future passives are really future middles corresponding to active aorists like the future middles and presents above (λήμψομαι, for instance). This point is made clearer by the fact that the Doric5 used only active endings like ἀναγραφῆσο (not –εται). Homer, besides, only has one second future passive (μυγήσομαι, really middle) and none in –θησ–.6 Instead he uses the middle future as later Greek continued to do with verbs like τιμήσομαι. Cf. γενήσομαι from ἐ-γενόμην. Some verbs indeed used both this second future passive like φανήσομαι (Mt. 24:30) which (Page 357) is punctiliar and φανοῦμαι (1 Pet. 4:18) which may be durative like the Attic as Moulton1 argues. So παύσονται (1 Cor. 13:8) and ἐπαναπαύσεται (Lu. 10:6). Cf. also φανερόμαι (Mt. 7:7), ἀρπαγήσομαι (1 Th. 4:17), φανήσομαι (Mt. 24:30), ἐπιταγήσομαι (1 Cor. 15:28), ψυγήσομαι (Mt. 24:12), χαρήσομαι (Lu. 1:14, see above).

The first future passive so-called is built upon the distinctively2 Greek aorist in –θη–. It is unknown to Homer, as stated above, and, like the second aorist passive, is aorist in origin and idea. Here again the Doric used the active endings5 like

1 Brug., Griech. Gr., p. 321.
2 Gr. of N. T. Gk., p. 42.
3 Ib., p. 43.
4 Giles, Man., pp. 410, 427.
5 Ib., p. 447.
6 K.-Bl., II, p. 111.
1 Prol., p. 150.
2 Giles, Man., pp. 420, 447.
3 Ib., p. 447.
συναχθησοῦν. This later form in –θησ– grew continually in usage over the merely middle form like τιμήσομαι. But the passive future did not always have the passive sense, as has been shown in the case of ἀνακλιθήσομαι (Mt. 8:11), ἀποκριθήσομαι (Mt. 25:37), etc. Ἀναπροθήσομαι also appears in Lu. 11:9 f. in some MSS. As an example of the usual forms in the N. T. take γνωσθήσομαι (1 Cor. 14:7). Only μνησθήσομαι (not μεμνήσομαι) and σταθήσομαι (not ἑστήξω) appear in the N. T.4

For a periphrastic future passive expressing continuance see ἔσεσθε μισούμενοι (Mt. 10:22).5 This is naturally not a very common idiom for this tense, though the active periphrastic future is less infrequent as already shown.

(g) The Perfect Tenses (τέλειοι χρόνοι).

1. The Name. It does fairly well if we do not think of time in connection with the tense, a mistake that Clyde makes.7 The completed state does not of itself have reference to present time. That comes later and by usage in the indicative alone in contrast to past and future. Originally the perfect was merely an intensive or iterative tense like the repetition of the aoristic present.8

2. The Original Perfect. The Greek perfect is an inheritance from the Indo-Germanic original and in its oldest form had no reduplication, but merely a vowel-change in the singular.9 Indeed οἶδα (Sanskrit vēda, Latin vidi, English wot) has never had reduplication.10 It illustrates also the ablaut from ὁ– to οἱ– in the singular, seen in Sanskrit and Gothic also.11 Cf. Latin capio, cēpi (a to ē). Note also καὶ-μαι in the sense of τέ-θει-μαι.[Page 358]

But the vowel-change characteristic of the original perfects is seen in other verbs which did use reduplication. Reduplication will receive separate treatment a little later, as it pertains to the present and aorist tenses also. It may be here remarked that the reduplicated form of some iterative presents doubtless had some influence in fastening reduplication upon the perfect tense. Note the English “mur-mur” (Greek γογ-γύζω, ἀρ-αρ-ίσκω), where the syllable is doubled in the repetition. It was a natural process. A number of these reduplicated forms with the mere change in the vowel appear in the N. T. This so-called second perfect, like the second aorist, is a misnomer and is the oldest form.1 In Homer indeed it is the usual form of the perfect.2 These old root-perfects, old inherited perfect forms according to Brugmann,3 persist

15 Gk. Gr., p. 323.
in the κοινή and are reasonably common in the papyri, the inscriptions and the N. T. They are of two classes: (1) real µι perfects without any perfect suffix, like ἐστάναι (Ac. 12:14); (2) second perfects in –α, like γέγονα, λέλοιπα. As N. T. examples may be mentioned ἔκήκοα (Ac. 6:11), γέγονα (1 Cor. 13:1), εἰσθα (Lu. 4:16), γέγραφα (Jo. 19:22), ὄλωλα (ἐπ., Mt. 10:6), etc. These forms are found in the LXX. Cf. Helbing, Gr. d. Sept., p. 103; Thackeray, Gr., p. 252 f. But the κοινή gave up the shorter (without –α) forms of the plural indicative active perfect of ἔστηµ (ἔσταµεν, ἔστατε, ἔστασιν). See this chapter, IV, (d), 3, for details.

3. The κ Perfect. This is a new type created by the Greek language of which no adequate explanation has yet been offered. The Attic inscriptions already had the κ form (Meisterhans, p. 189 f.). It is apparently at first in the singular, as in ἔστηµ (pl. ἔσταµεν), etc.6 One might think that just as ἔκω has a perfect sense like καὶµαι and finally had a few perfect forms (like ἕκασιν), so by analogy some κ verbs became the type and analogy did the rest. But Giles8 observes that the stems of the twelve or fourteen κ perfects in Homer all end in a vowel, a liquid or a nasal, not one in κ. And then the [Page 359] three κ aorists (ἔδωκα, ἔθηκα, ἤκα) call for explanation. But per contra there are some perfects in Homer which have κ stems like δέδορκα, ἔοικα, τέτηκα, etc. So that after all analogy may be the true explanation of the κ perfects which came, after Homer’s time, to be the dominant type in Greek. But the –κα perfects are rare in Homer. The examples are so common (δέδωκα, etc.), in the κοινή as in the classic Greek, as to need no list. Note ἔστηµ intransitive and ἔστακα transitive.

4. The Aspirated Perfects. They are made from labials and palatals (φ, χ) and are absent from Homer. Even in the early classical period they are confined to πέποφα and τέτροφα.1 Homer did use this aspirate in the peculiar middle form like τετράφαται.2 He has indeed τέτροφα from τρέφω and probably just here, we may see the explanation by analogy of τέτροφα from τρέφω and so of all the aspirated forms.4 An important factor was the fact that κ, γ, χ were not distinguished in the middle perfect forms. As a N. T. example of this later aspirated perfect take προσενήνοχα (Heb. 11:17). Cf. also ἔιληφα, πέπραχα, τέταχα.

5. Middle and Passive Forms. It is only in the active that the perfect used the κ or the aspirated form (φ, χ). We have seen already that in the κοινή some active perfect forms drop the distinctive endings and we find forms like ἔφερακαν and ἐφάρακες. Helbing (Gr. d. Sept., pp. 101–103) gives LXX examples of root-perfects like

---

6 Hirt, Handb. etc., p. 412 f.
8 Man., p. 450.
2 Brug., Griech. Gr., p. 325.
3 Sterrett, Hom. II., N. 43.
κεκλημένος. The perfect active is now made with ἔχω and the passive participle (ἔχω δεμένο) or with ἔχω and a root similar to the third singular aorist subjunctive (ἔχω δέσεις or δέση). Cf. Thumb, Handb., p. 161. The only κ perfect in modern Greek is ἔχρηκα, "the only certain remnant of the ancient perfect" (ib., p. 148). Cf. ἔχει με παρθημένον (Lu. 14:18). Cf. also πεπωρωμένην ἔχετε τὴν καρδίαν ὑμῶν (Mk. 8:17). This is much like the English perfect in reality, not like the Greek ἔχω and aorist participle (like ἔχω ἄκοψας). Cf. Sonnenschein, Greek Grammar, Syntax, 1894, p. 284. The perfect passive in modern Greek vernacular is formed like ἔχω λθῆ (–εῖ) or λελυμένος εἶμι. But we are in no position to throw stones at the Greeks, for we in English have never had a perfect save the periphrastic form. How far the perfect and the aorist may have become confused in the N. T. in sense is a matter of syntax to be discussed later.²

7. The Perfect in the Subjunctive, Optative, Imperative. Hence the perfect is practically confined to the indicative. No example of the perfect optative occurs even in the periphrastic form. The subjunctive perfect, except the form εἰδῶ (εἰδῆτε, 1 Jo. 5:13), appears only in the periphrastic conjugation, of which a few examples remain. So the active, as ἔπειθήκως (Jas. 5:15), πεποιθότες ὑμεῖς (2 Cor. 1:9), and the passive, as ὑμῖν τετελειώμενοι (Jo. 17:23), κεκλημένοις (Lu. 14:18), πεπληρωμένη (Jo. 16:24). So also Jo. 17:19, 1 Cor. 1:10, etc. The imperative makes a little worse showing. We still have ἵστε (Jas. 1:19; Eph. 5:5; Heb. 12:17 all possible indicatives), πεφίωσο (Mk. 4:39) and ἔρρωσθε (Ac. 15:29). The periphrastic imperative perfect is also found as ἔστωσαν περιέξωσμέναι (Lu. 12:35). In simple truth, as previously remarked (see proof in Prof. Harry’s articles), the perfect subjunctive, optative and imperative never had any considerable vogue in Greek, not as much as in Sanskrit. In

7 Moulton, Prol., p. 142.
1 Thumb., Handb., p. 165. Certainly the aorists in –κα are very common in the mod. Gk. (Thumb, Handb., pp. 140, 146 ff.).
2 Cf. Moulton, Prol., p. 143 f.
8. The Perfect Indicative. It is to the indicative that we turn [Page 361] for the real development of the perfect. Here the perfect was for long very frequent indeed, and the time element comes in also. The ancients did not agree in the names for the three tenses of perfect action in the indicative. The Stoics called the present perfect συντελικός (or τέλειος) χρόνος ἔνεστιν, the past perfect συντελικός (τέλειος) χρόνος παρακείμενος, the future perfect συντελικός (τέλειος) χρόνος μέλλον. Sometimes the present perfect was called merely ὁ παρακείμενος χρόνος, the past perfect ὁ ὑπερσυντελικός χρόνος, and the future perfect ὁ μετ ὀλίγον μέλλον χρόνος (futurum exactum). The name plu-perfect is not a good one. The tense occurs in the N. T. with 22 verbs and 15 have the augment (H. Scott). Thus ἐστεμέλίωτο (Mt. 7:25) and ἐκλήθη (Jo. 6:17), but ἐβέβλητο (Lu. 16:20) and περιεδέδετο (Jo. 11:44). Cf. ἔγαν ἀποκειμένη (Lu. 19:20) in the light of modern Greek. In the N. T. the past perfect is not very frequent, nor was it ever as abundant as in the Latin. It goes down as a distinct form with the present perfect in modern Greek. Hirt calls attention to the fact that Homer knows the past perfect only in the dual and the plural, not the singular, and that the singular ending –η is a new formation, a contraction of –ειν into –η. In the N. T., however, only –ειν is used. It is not certain whether the past perfect is an original Indo-Germanic form. The future perfect was always a very rare tense with only two active forms of any frequency, ἔστήξεω and τεθνήξε. The middle and passive could make a better showing. In Heb. 8:11 εἰδήσουσιν is probably future active (from LXX), and in Lu. 19:40 some MSS., but not ΝΒΛ (rejected by W. H.), give κεκράξονται (cf. LXX). In Heb. 2:13 (another quotation from the LXX) we have the periphrastic form ἔσομαι πεποιθός. The future perfect passive occurs in the N. T. only in the periphrastic form in such examples as ἔσται δεδεμένον (Mt. 16:19), ἔσται λειμένα (Mt. 18:18), ἔσονται διωμερισμένοι (Lu. 12:52). Cf. ἔσῃ κατατεθεμένων (B.G.U. 596 (A.D. 84). In the nature of the case the future perfect would not often be needed. This periphrastic future perfect is found as early as Homer. The papyri likewise show some examples. [Page 362] The present perfect and the past perfect also have the periphrastic conjugation. So we find with comparative indifference ἔστιν γεγραμένα (Jo. 20:30) and in the next verse γέγραπται. So also ἔν γεγραμένον (Jo. 19:19) and ἔπεγέγραπτο (Ac. 17:23). Cf. also

4 Sterrett, Hom. II., p. 43.
1 K.-Bl., II, p. 2 f.
2 Blass, Gr. of N. T. Gk., p. 201. Brug. calls the past perf. a “neue Bildung.”
3 Handb. etc., p. 415 f.
4 So Hirt follows Wackern. in seeing a new stem here εἰδή–. Cf. ib., p. 416. B in Deut. 8:3 has εῖδήσαν like the aorist εἶδος from Arist. onwards. Cf. Mayser, Gr., p. 370; Thack., Gr., p. 278.
5 Sterrett, Hom. II., p. 27.
6 Mayser, G. d. griech. Pap., p. 377. In the Baetican inscr. the past perf. and the fut. perf. are both absent.
1 Blass, Gr. of N. T. Gk., p. 202 f. Brug. (Griech. Gr., p. 330 f.) points out how in prehistoric times the periphrastic form alone existed in the subj. and opt. middle and passive, as indeed was practically true always for all the voices.
Lu. 2:26. The active has some examples also, though not so many, as ἐστιῶς εἴμι (Ac. 25:10), and ἔστην προεωρακότες (Ac. 21:29).

9. Σ in Perfect Middle and Passive and Aorist Passive. It may be due to a variety of causes. Some of these verbs had an original σ in the present stem, like τελέ(σ)ω, άκού(σ)ω. Hence τετέλεσμαι, ἡκουσμαι (ἡκούσθην), etc. Others are dental stems like πειθ-ω, πέπεισμαι. Others again are ν stems which in Attic (apparently analogical) changed to σ, as φαίνω, πέφασμαι, but in the N. T. this ν assimilates to the μ as in ἔξηραμμένος (Mk. 11:20) from ἔξηραμι, μεμιαμμένος (Tit. 1:15) from μεμιαμι. Then again some verbs take the σ by analogy merely, as in the case of ἐγνωσμαι, ἑγνώσθην (1 Cor. 13:12), κέκλεισμαι (Lu. 11:7), λέλουσμαι (Heb. 10:22).

(h) REDUPLICATION (διπλασιασμός or ἀναδίπλωσις).

1. Primitive. Now this primitive repetition of the root belongs to many languages and has a much wider range than merely the perfect tense. Hence it calls for separate treatment. It is older, this repetition or intensifying of a word, than either the inflection of nouns or the conjugation of verbs. Root reduplication existed in the parent language.

2. Both Nouns and Verbs. Among nouns note ἄγ-ογός, βάρ-βαρος, Βέ-βηλος, etc. But it was among verbs that reduplication found its chief development.

3. In Three Tenses in Verbs. It is in the aorist, the present and the perfect. This is precisely the case with the Sanskrit, where very many aorists, some presents and nearly all perfects have reduplication. In Homer the reduplication of the second aorist is much more frequent than in later Greek, but forms like ἠγαγον, ἠνεγκον, ἕποιν, persist in N. T. Greek and the κοινή generally. Cf. ἔκέκραξα in Ac. 24:21. The Greek present shows reduplication in three classes of presents, viz. the root class (like δί-δωμι, Ἰ-μι, Ἰ-στήμι, etc.), the thematic presents (like γί-γνο-μαί, πί-πτω, etc.), inceptive verbs (like γι-γνώ-σκω, etc.). The most common reduplication in Greek is, of course, that in the perfect tense, where it is not like augment, mode-sign or personal endings. It is an integral part of the tense in all modes, voices and persons, until we see its disappearance (p. 365) in the later Greek. In the vernacular the extinction is nearly complete. Even presents like γνώσκω occur in modern Greek.

5 Brug., Griech. Gr., p. 176. Fritzsche (Ques. de redupl. graeca; Curtius, Stud. zu griech. and lat. Gr., pp. 279 ff.) considers the doubling of the syllable (iteration) the origin of all reduplication like ἄρ-αρ-ίσκω, βι-βά-ξω.
6 Whitney, Sans. Gr., p. 222.
7 Sterrett, Hom. II., N. 32.
1 See Jann., Hist. Gr., p. 190 f., for exx. like ἔτακτο even in Polyb., and later γραμμένος, etc.
Dieterich gives numerous examples of dropped reduplication in inscriptions and papyri. It is absent in the modern Greek vernacular, even in the participle.  

4. Three Methods in Reduplication. Perhaps the oldest is the doubling of the whole syllable, chiefly in presents and aorists, like γογ-γύζω, ἀρ-αρίσκω, ἤγ-αγ-ον, etc. This is the oldest form of reduplication and is more common in Greek than in Latin. The later grammarians called it Attic reduplication because it was less common in their day, though, as a matter of fact, Homer used it much more than did the Attic writers. But perfects have this form also, as ἀκ-κϊκα, ἀλ-λυθα, etc. But the reduplication by is confined to presents like δι-δουμ, γι-γνομαι, γι-γνώσκο, etc. And most perfects form the reduplication with ε and the repetition of the first letter of the verb as λέ-λοκα. But Homer had πέπιθον and other such aorists. Ἐπον is really an example of such an aorist.

5. Reduplication in the Perfect. The history is probably as follows in the main. Originally there were some perfects without reduplication, a remnant of which we see in ὅδα. The doubling of the whole syllable was the next step like ἀκ-κϊκα, ἐγρή-γορ-α, ἐλ-λυθα, ἀπόλωλα, etc., like the present and aorist usage. Then comes the ε with repetition of the initial letter of a consonant-stem [Page 364] like λέ-λοιπ. But here some further modifications crept in. The aspirates did not repeat, but we have τε-θεικα. Those with ε did not repeat it, but instead used the rough breathing as ἔστικα or the smooth like ἕ-σχικα. This was all for euphony. But forms like ἕ-σχικα, ἕ-σπασμα fall under another line also, for, if the verb begins with a double consonant, the consonant need not be used. So ἔ-γνωκα, but βέ-βληκα, γέ-γραφα. The Cretan dialect has indeed ἔγραται=γέ-γραται. So far the N. T. phenomena are in harmony with the general Greek history, as indeed is the case with the papyri and the inscriptions. In Lu. 1:27 and 2:5, we have ἐ-µηστευ-µένη, not µεµν. (cf. µέµνηµαι). Just as σ verbs did not repeat, so with ῥ verbs sometimes. So ἔριµµαι (Mt. 9:36), ἔρρωσθε (Ac. 15:29), etc. But in Rev. 19:13 W. H. read ῥ ῥαντεσµένον, though Hort advocates ῥ ερασµένον. D has ῥ ερµµένοι in Mt. 9:36 above. This

5 Hirt, Handb. etc., p. 369.
7 Jann., Hist. Gk. Gr., p. 190.
8 Sterrett, Hom. II., N. 32.
10 Ib., Helbing, Gr. d. Sept., pp. 70–82, treats together augment and reduplication, not a very satisfactory method.
1 Hirt, Handb. etc., p. 408.
3 Nachm., p. 150 f.; Schweizer, Perg. Inschr., p. 171.
4 Notes on Orth., p. 170.
reduplication of initial ρ is contrary to Attic rule. For the LXX see Thackeray, Gr., p. 204 f. This use of ε begins to spread in the κοινή and is seen in LXX MSS., as in A ἔπεγραστο (Deut. 9:10). For similar forms in Ionic and late writers see Winer-Schmiedel.5 Once more several verbs that begin with a liquid have ει as the reduplication in the Attic and Ionic, though not in all dialects. Perhaps euphony and analogy entered to some extent in the case of ε-λήφα (λαμβάνω), ε-ρήκα (cf. ἔρρήθην). Note also ε-ληχα and ε-λοχα. With verbs beginning with a vowel there was sometimes the doubling of the syllable as ἀκήκα, or the mere lengthening of the vowel as εἰκα (λαμβάνω). Cf. εἰσθα. In Jo. 3:21 (so 1 Pet. 4:3) we have ε-ργασ- in Attic and εικομένος in Lu. 16:20. In ὡραω we have ἡ-ρακα in Paul’s Epistles (1 Cor. 9:1) and sometimes a sort of double reduplication (like εἰσθα) as ἡ-ρακα (Jo. 1:18). So Attic. See Additional Note. In Col. 2:1 the form ἡ-ρακαν calls for notice both for its reduplication and its ending (cf. ἡ-ρακαν Lu. 9:36). So also ἰνέργεν (1 Cor. 16:9; ἰνεφρύγω, Jo. 1:51) and ἰνεφρύμενης (2 Cor. 2:12). Indeed in this last verb the preposition may receive additional reduplication (treble therefore), as in ἰνεφρύμενη (Rev. five times). See also ἰμεωμένον (Mt. 11:8=Lu. 7:25) from ἰμφενομη. But as a rule with compound verbs in the N. T. reduplication [Page 365] comes only between the prepositions and the verb. Sometimes the reduplication is not used, as in εὑαρεστηκέναι (Heb., 11:5), but DEP have εὑηρ-. We have ὠκοδόμητο (Lu. 4:29), but οκοδομήθη (Lu. 6:48).1 Cf. οκοδομήθη (Jo. 2:20) for absence of augment. Reduplication in the perfect has disappeared from the modern Greek (Thumb, Handb., p. 119) and is showing signs of decay in the κοινή. For suppression of reduplication in papyri see Maysers, p. 341.

(i) AUGMENT (α-ξησις).

1. The Origin of Augment. It has never been explained. It is generally conceded to be an independent word, an adverb, added to the verb, which is an enclitic after the augment like ἔ-λπε.2 We have mere conjectures for the origin of the adverb, possibly a locative of the pronoun-stem. In Sanskrit it is a.

2. Where Found. It is found in Sanskrit, Iranian, Armenian and Greek, and only in the past tenses of the indicative. But in Mt. 12:20 we actually have κατεάξει (fut. ind. of κατάγνυ), and in Jo. 19:31 κατεαγῶσιν (aor. pass. subj.), probably to distinguish these forms from κατάγω. So Winer-Schmiedel, p. 98. This “false augment” is very common in later Greek (Hatzidakis, Einl., p. 64). Augment persists in modern Greek (Thumb, p. 117).

3. The Purpose of Augment. It denotes past time. The secondary endings do that also and with sufficient clearness at first. More than half of the past tenses of the

5 P. 103. Cf. also K.-Bl., II, p. 23, and Blass, Gr. of N. T. Gk., p. 38.
1 Moulton (Cl. Rev., Feb., 1901, p. 36) cites ἰπατῆσα, ἐπομάκαμεν from the pap.
2 Brug., Comp. Gr. (transl.), IV, p. 25. Jann. (Hist. Gk. Gr., p. 185) thinks it is an archaic form of the imperf. of ειμι (ε, εν).
Hatzidakis HATZIDAKIS, G. N., Einleitung in die neugriechische Grammatik (1892).
Sanskrit do not have the augment. In Homer some verbs like ὁράω never had augment, and often for metrical reasons the augment is not found in Homer. He used much freedom in the matter. Jannaris is probably right in the opinion that this freedom is due to the original fulness of the verb-endings. Augment won a firm foothold in prose before it did in poetry, but never was everywhere essential. It varied greatly in its history as will be shown.

4. The Syllabic Augment (αὐξήσις συλλαβική). Its use with the past tenses of the indicative was not exactly uniform, being less constant with the past perfect than with the aorist and imperfect. The syllabic augment occurs also with some initial vowel verbs due to original digamma Φ, σ in the anlaut. So εἶδομεν (Mt. 2:2), εἶπεν (Mt. 2:8), εἴλησεν (2 Th. 2:13), etc. Cf. Thackeray, Gr., p. 200 f. In the N. T. it is absent from the past perfect more frequently than it is present, as is true of the papyri and late Greek generally. So, for instance, τεθηκέναι (Mt. 7:25), πεποιήκειν (Mk. 15:7), παρειδόχεἰς (Mk. 15:10), ἔληλθεν (Jo. 6:17), etc. On the other hand the augment does appear in such examples as ἔπεσον (Lu. 11:22), ἐβέβλητο (Lu. 16:20), ἠγέρθη (Jo. 6:17), συνετέθησα (Jo. 9:22), περιεδόθη (Jo. 11:44), etc. It was only in the past perfect that both augment and reduplication appeared. The κοινὴ strove to destroy the distinction between reduplication and augment so that ultimately reduplication vanished (Thumb, Hellenismus, p. 170). But first the augment vanished in the past perfect. The Attic sometimes had ἔστηκεν (Winer-Schmiedel, p. 100). Hort (Notes on Orthography, p. 162) contends for ἵστηκεν uniformly in the N. T. as more than mere itacism for ἐστηκεν, for even B has ἵ five times in spite of its fondness for α. So W. H. uniformly, as Rev. 7:11 and even in Jo. 1:35 and Lu. 23:49. Cf. similar itacism between ἐδον and ἔδον in the MSS. (Hort, Notes on Orthography, p. 162). On augment in the LXX see Conybeare and Stock, Sel. from LXX, pp. 36 ff.; Swete, Intr. to O. T., p. 305; Thackeray, Gr., pp. 195

5. The Temporal Augment (αὐξήσις χρονικῆ). The simplicity of the syllabic and the resulting confusion of the temporal had undoubtedly something to do with the non-use of the temporal augment in many cases. The κοινή shows this tendency. Even the Attic was not uniform in the use of the temporal augment. At bottom there is no real distinction between the temporal and syllabic augment. Both express time and both make use of the syllabic ε. The difference is more one of the eye and ear than of fact. What we call the temporal augment is the result of the contraction of this ε with the initial vowel of the verb. As remarked above, this very confusion of result, difficult to keep clear as the vowel-sounds tended to blend more and more, led to the disuse of this ε and contraction with initial vowel verbs, especially with diphthongs.

Hence in the N. T. we meet such examples as the following: of αι, ἐπαυσχύνη (2 Tim. 1:16); of ει, εὐλόγησεν (Mt. 14:19), εὐδόκησα (Mt. 17:5), εὐνοῦχασα (Mt. 19:12), εὐκάριον (Mk. 6:31), εὐφραίνοντο (Ac. 7:41), εὐπορεῖτο (Ac. 11:29), εὐθυδρόμησαμεν (Ac. 16:11), εὐχαρίστησαν (Ac. 27:35). But on the other hand we have ἑρμύσκα (Mk. 14:55), προσπήξατο (Ac. 8:15), ἑρχόμην (Ro. 9:3), ἑθοδόκησαν (Ro. 15:26); of οι, ὀκοδομήθη (Jo. 2:20), etc., but ἰκαδόμησαν (Lu. 7:5), etc.; of ει, εἶξαμεν (Gal. 2:5) just like Attic; of ει, διερμήσασαν (Lu. 24:27), διεγείρετο (Jo. 6:18), ἄνεθη (Ac. 16:26), ἄφθησαν (Ro. 4:7, Ps. 32:1); of ο, προφητεύσαν (Ac. 2:25; Ps. 16:8), and some MSS. in Lu. 13:13 (ἂνορθώθη) and Ro. 9:29 (ὅμοιώθημεν); of ι, ἰτουσέω (Lu. 8:43), ἰκάνοντος (2 Cor. 3:6) and ἰτα (Lu. 9:11); of ο, ὑνέμει has no augment, ὄνησατο (Ac. 7:16), and the same thing is true of ὁθεσ, αὐτοκόσματο (Ac. 7:27), ἐξωθεσ (Ac. 7:45). Εὐγάζομαι has η, not ει, as its augment according to W. H. So ἠγάζοντο (Ac. 18:3), but always ἐξο.
(Mt. 13:1), ἐκάθισεν (Jo. 19:13), ἐκαθέζετο (Jo. 4:6). In Mt. 13:15 ἐκάμµοςαν (from Is. 6:10) is assimilation of καταµµ. Verbs beginning with εὐ– vary in augmented tenses between εὐ– and ηὐ–, but when followed by a vowel, the verb is treated as a compound like εὐηγγελίσατο above.

7. Double Augment. It is fairly common in the N. T. In the [Page 368] case of ἔγαγον and ἐκαίνω the augment is added to the aoristic reduplication. But in ἔδρον (Jo. 6:2 in Tischendorf’s text, W. H. ἐθεώρον) there is a clear case of double augment like the double reduplication in ἔδρονα. So also the N. T. regularly ἐδοξάθην (Mt. 17:16) and ἐδοξάσθη (Mk. 6:5) and ἐδοξάστη (Mk. 14:5) appear and the MSS. vary much. This η (analogy to ἦθελον) first arises in the Attic in 300 B.C.1 With μέλλω, ἔμελλον is the usual form (Jo. 4:47), though ἔμελλον occurs also (Jo. 7:39). Βούλομαι in the N. T. never has η, though the Text. Rec. has it in 2 Jo. 12. On the other hand θέλω always has η (Gal. 4:20, ἦθελον) even after the initial ε was dropped. Ἀποκαθίστημι has always a double augment, one with each preposition. So ἄπεκατέστη (Mk. 8:25) and ἄπεκατεστάθη (Mk. 3:5).2 So LXX and later Greek.3 But in Heb. 12:4 ἄντικατέστης is the true text.4 Ἀνέχομαι has a peculiar history. It now has single augment on the preposition, as ἦνοιξεν (Rev. 6:3), now double augment of the verb, as ἅνερξαν (Jo. 9:14), now a triple augment on verb and preposition, as ἅνερξασθήσαν (Mt. 9:30). Ἀνείχωμα, on the other hand, has only one augment, as ἄνερχομαι (Ac. 18:14) and ἄνειχσθε (2 Cor. 11:1). For double augment in the LXX see Thackeray, Gr., pp. 202 ff.

VIII. The Infinitive (ἡ ἄπαρέμφατος ἐγκλησις). The most striking development of the infinitive in the κοινή belongs to syntax, and not accidence.5 Hence a brief discussion will here suffice. Blass, for instance, in his Grammar of N. T. Greek, has no discussion of the infinitive under “Accidence,” nor has Moulton in his Prolegomena. But the infinitive has a very interesting history on its morphological side.

1. No Terminology at First. Originally it was a mere noun of action (nomen actionis). Not all nouns of action developed into infinitives. Brugmann6 quotes from Plato τίν τοῦ θεοῦ ὄνομα ὃν γνώρισθαί οῡτος ἔγκλησι. This is, of course, not an infinitive. The older Sanskrit shows quite a variety of nouns of action used in a “quasi-infinitive sense,”7 governing cases like the verb, but having no tense nor voice.

2. Fixed Case-Forms. The first stage in the development was reached when these nouns of action were regarded as fixed case-forms. [Page 369] That stage was obtained in the Sanskrit. At first the dative was the most common case so used along with the accusative, genitive, ablative and sometimes the locative. In the later Sanskrit

the accusative supplanted the rest (tum or itum). Cf. the Latin supine.1 But the Sanskrit infinitive, while governing cases, never developed tense nor voice, and so remained essentially a substantive.

3. With Voice and Tense. But the second stage appears in the Greek and Latin where it had its most characteristic development.2 The infinitive becomes a real verbal substantive. Here voice and tense are firmly established. But while, by analogy, the Greek infinitive comes to be formed on the various tense and voice stems, that is an after-thought and not an inherent part of the infinitive. There was originally no voice, so that it is even a debatable question if ἔρχεσαι, for instance, and haberi are not formed exactly alike.3 The active and the passive ideas are both capable of development from δύναμις ἑρμαί, ‘capable for wondering.’4 The passive infinitive had only sporadic development in single languages.5 The middle is explained in the same way as active and passive. The tense-development is more complete in Greek than in Latin, the future infinitive being peculiar to Greek. The Latin missed also the distinctive aorist infinitive. But here also analogy has played a large part and we are not to think of ὑπόημα, for instance, as having at bottom more kinship with ἔλαφος than with λόσις.6 Indeed the perfect and future infinitives are both very rare in the N. T. as in the κοινή generally.7 This weakening of the future infinitive is general8 in the κοινή, even with μέλλω as well as in indirect discourse. In Jo. 21:25 late MSS. have χορήσας instead of χορήσων. Indeed the papyri in the later κοινή show a hybrid infinitive form, a sort of mixture of aorist and future like ἔπελεύσασθαι (even in early papyri).1 In the LXX we find τοῦξασθαι (2 Macc. 15:7) and ἐκφεύξασθαι in 2 Macc. 9:22. In other cases the two are used side by side. It is only in the state of the action that the infinitive has any true tense-action developed save in indirect discourse where the infinitive tense represents the time of the direct discourse. The infinitive thus is like a verb in that it expresses action, governs cases, has voice and tense.2

6 Moulton, Prol., p. 204.
7 Votaw, Use of the Inf. in Bibl. Gk., p. 59.
8 Moulton, Prol., p. 204.
4. *No Personal Endings*. The infinitive never developed personal endings and remained undefined, unlimited. The infinitive and the participle are thus both infinitives in this sense, that they are the unlimited verb so far as personal endings are concerned. They are both participles in that they participate in both noun and verb. The terms have no inherent distinction, but serve merely as a convenience. In the nature of the case neither can have a subject in any literal sense. But it is to be admitted even here that the line between the finite and the infinite verb is not absolute. Cf. the forms φέρε and φέρειν, for instance. But the cases used with the infinitive will be discussed in Syntax.

5. *Dative and Locative in Form*. The infinitive continued a substantive after the voice and tense-development. At first the case-idea of the form was observed, but gradually that disappeared, though the form remained. The Greek infinitives are always either datives or locatives, “dead datives or locatives” usually. All infinitives in –αι are datives. Thus all those in –ναι, –σαι, –έναι, –μεναι (Homer), –θαι (–θαι). Those in –σθαι alone give any trouble. It is probably a compound (σ, θαι), but its precise origin is not clear. The locative is seen in –ειν, and Homeric –μεν. But the origin of –ειν is again doubtful. But no distinction remains between the two cases in actual usage. In Homer the dative sense as well as form remain extremely common, as indeed is true of all Greek where the infinitive remains. The very common infinitive of purpose, like ἔλθον ἀγοράσαι, is a true dative. (Cf. Mt. 2:2.) But the very essence of the infinitive as a complete development is that this dative or locative form could be used in any case like any other substantive without inflection, an indeclinable substantive in a fixed case-form.

6. *The Presence of the Article*. After Homer’s day it was common and chiefly in the Attic, but this is a matter to be treated further in Syntax. The point to observe here is that the article did not make a substantive of the infinitive. It was that before voice and tense were used with it. But it is true that even in Homer the verbal aspect is more prominent than the substantival. In the vernacular the article was never much used with the infinitive; perhaps for convenience it was not so employed.

7. *The Disappearance of the Infinitive*. The old forms in –ειν and –ναι remain longest (Thackeray, Gr., pp. 210, 257). The causes for the disappearance of the infinitive in later Greek till in the modern Greek vernacular it is (outside of the Pontic dialect) dead and gone, lie largely in the region of syntax. The infinitive as a whole disappears before ὅτι and ἧνα (modern Greek νά). Farrar calls attention to the absence of the infinitive in Arabic. It was always a matter of discretion with a Greek writer whether in certain clauses he would use the infinitive or an object-clause (ὅτι, ἧνος, ἧνα, ἥνος).

7 Hirt, Handb., p. 432; Giles, Man., p. 470.
1 Moulton, Prol., p. 213 f.
2 Farrar, F. W., Greek Syntax (1876).
8. Some N. T. Forms. Not many N. T. forms call for special remark and those have been explained already, such as –όν (Mt. 13:32; Heb. 7:5), πεῖν and even πεῖν for πιεῖν (Jo. 4:9). In Lu. 1:79 ἐπιφώνησε instead of the Attic ἐφώνησε is noticeable. In Ph. 4:12 we have πεῖν, not –γεν. The Coptic has the infinitive ματιστρογίν (cf. W. H. κατασκηνών, Mt. 13:32=Mk. 4:32, and ἄποκρισιτών in Heb. 7:5). In 1 Cor. 11:6 we find both κείσθαι and ξυρᾶσθαι. In Mk. 14:71 ὁμώνυμαι is the regular –μ form. In Heb. 11:5 εὐφρενίζεσθαι is without reduplication in AKL. In Lu. 9:18 (11:1) a periphrastic infinitive appears, ἐν τῷ εἶναι αὐτῆν προσευχόμενον. The augment occurs with ὁντοφυλάκαται in Lu. 3:21. Cf. ἔσομαι διδόναι in Tob. 5:15 B.

IX. The Participle (ἡ μετοχή).

1. The Name. This does not really distinguish this verbal adjective from the verbal substantive, the infinitive. Both are participles [Page 372] and both are infinitives. Voss calls the participles “mules” because they partake of both noun and verb, but the infinitives are hybrid in exactly the same sense. Like the infinitive, the Greek participle has voice, tense, and governs cases, and may use the article. Unlike the infinitive the participle has regular inflection like other adjectives. Clyde would include participles in the infinitive. So Kühner-Blass. Dionysius Thrax puts the participle right: Μετοχή ἐστι λέξις μετέχουσα τῆς τῶν ῥημάτων καὶ τῆς τῶν ἀνομάτων ιδιότητος.

2. Verbal Adjectives. As a matter of fact no absolutely clear line can be drawn between verbal adjectives and other adjectives. An adjective may not only be used with a case like κενός with the ablative, but may even take on a verbal nature in certain connections. Some, like κλυτός, were always purely adjectival. Most of the forms in –τος in Greek are adjectival, but many of them have a verbal idea developed also, either that of completion, as σχηματικός (‘beloved,’ Mt. 3:17), or of possibility or capability, as παθητός (‘liable to suffering,’ Ac. 26:23). In Greek these verbals in –τος never became a part of the verb as in Latin perfect passive participle. Moulton shows how amatus est and “he is loved” represent different tenses, but scriptum est and “it is written” agree. But there was no reason why the –τος should not have had a further verbal development in Greek. For the structure of this verbal adjective see the

9 Prol., p. 221.
chapter on Formation of Words, where a list of the chief examples is given. Moulton\(^{10}\) points out the wavering between the active and passive idea when the true verbal exists in the N. T., by the example of ἀδύνατον in Ro. 8:3. Is it ‘incapable’ as in Ro. 15:1 or ‘impossible’ as is usual? Blass\(^{11}\) indeed denies the verbal character of the –τος form in the N. T. to any examples except παθητός (Ac. 26:23). But this is too extreme, as Moulton\(^{12}\) clearly proves. Ἀσύνετος is active in Ro. 1:31 while ἄσυνθετος is middle (συντίθεμαι). With the forms in –τος therefore two points have to be watched: first, if they are verbal at all, and then, if they are active, middle or passive. There is no doubt as to the verbal character of the form in –τέος, which expresses the idea of necessity. This is in fact a gerundive [Page 373] and is closely allied to the –τος form.\(^{1}\) It has both a personal construction and the impersonal, and governs cases like the verb. It is not in Homer\(^2\) (though –τος is common), and the first example in Greek is in Hesiod.\(^3\) The N. T. shows only one example, βλητέον (Lu. 5:38), impersonal and governing the accusative. It appears in a few MSS. in the parallel passage in Mk. 2:22. One further remark is to be made about the verbs, which is that some participles lose their verbal force and drop back to the purely adjectival function. So ἐκών, µέλλων in the sense of ‘future.’ Cf. eloquens and sapiens in Latin.\(^4\) In general, just as the infinitive and the gerund were surrounded by many other verbal substantives, so the participle and the gerundive come out of many other verbal adjectives. In the Sanskrit, as one would expect, the division-line between the participle and ordinary adjectives is less sharply drawn.\(^5\)

3. True Participles. These have tense and also voice. Brugmann\(^{6}\) indeed shows that the Greek participle endings go back to the proethnic participle. Already in the Sanskrit the present, perfect and future tenses (and in the Veda the aorist) have participles in two voices (active and middle),\(^7\) thus showing an earlier development than the infinitive. The endings of the Greek participles are practically the same as those of the Sanskrit. The Latin, unlike the Sanskrit and the Greek, had no aorist and no perfect active participle, and the future participle like acturus may have come from the infinitive.\(^8\) The Greek has, however, two endings for the active, –ντ for all tenses save the perfect, just like the Sanskrit. The perfect ending (–ως, –ωσ, –ος, Greek –ως, –στ, –υτ) is difficult of explanation, but is likewise parallel with the Sanskrit.\(^9\) The perfect participle is more common in Homer than any other form of the perfect (Sterrett, Homer’s Iliad, N. 44). The middle ending –µενο is uniform and is like the

1 Brug., Comp. Gr., IV, p. 605.
3 Hirt, Handb., p. 438. Moulton (Cl. Rev., Mar., 1904, p. 112) finds one ex. of –τέος in the pap. and “the –τος participle is common in neg. forms.” Note that he calls it a participle.
5 Whitney, Sans. Gr., p. 347.
8 Giles, Comp. Philol., p. 474.
9 Hirt, Handb., p. 436 f.
Sterrett STERRETT, J. R. S., Homer’s Iliad with Grammar (1907).
The Greek aorist passive participle ending (–θεντ) is peculiar to the Greek and is made by analogy from the old active form like φαν-έντ-ς (φαν-είς), like Latin, manens. The participles survive in modern Greek, though the active, like the third declension, takes on the form γράφοντας (γράφων).

The modern Greek uses chiefly the present active, the past passive participle (Dieterich, Unters., p. 206), and some middle or passive participles in –ούµενος or –άµενος (Thumb, Handb., p. 167). The use of the aorist and perfect active participles gave Greek a great superiority over the Latin, which had such a usage only in deponent verbs like sequor, secutus. But Greek used the other participles far more than the Latin. English alone is a rival for the Greek in the use of the participle. One of the grammarians calls the Greeks φιλοµέτοχοι because they were a participle-loving people. The use of the tenses of the participle belongs to syntax. One may merely remark here that the future participle is very rare in the N. T. as in the papyri and κοινή generally (cf. Infinitive). The LXX has it seldom (Thackeray, Gr., p. 194). It is found chiefly in Luke in the N. T., as Lu. 22:49; Ac. 8:27; 20:22; 22:5; 24:11, 17. The N. T. itself presents no special peculiarities as to the forms of the participle. In Rev. 19:13 ἐραµµένον has been cited under the question of reduplication. Ἐστώς is more frequent than ἔστηκώς. Other perfects like ἀπολογλώς call for no comment.

4. In Periphrastic Use. The participle is common in the N. T. in the periphrastic tenses. These have been given in detail under the various tenses, but a summary at this point is desirable. This use of the participle with various forms of the verb “to be” is so common in all languages, ancient and modern, as hardly to require justification. Modern English uses it largely in its verb-inflection, as does modern Greek. The use of the participle as the predicate is found all through the Indo-Germanic languages. It is very frequent in the Sanskrit, especially in the later language. Its oldest usage seems to be in the perfect tense, which exists as far back as we can go. In the N. T. the perfect optative does not appear, though once a good chance for the periphrastic perfect optative arises as in Ac. 21:33, ἐποιήθη τις ἀγαθὸς καὶ τι ἔστων πεποιηκώς. The perfect subj. save εἰδώ is seen in the N. T. only in the periphrastic form both in the active, as ἐστι τὸν πεποιηκός (Jas. 5:15), and the passive, as ἔργα πεπληρωµένα (Jo. 16:24). So 2 Cor. 9:3. The periphrastic perfect imperative is illustrated by ἔστωςαν περειξόμενα (Lu. 12:35). No example of the periphrastic perfect infinitive appears in the N. T., so far as I have noticed, except κατεσταλµένος ὑπάρχειν (Ac. 19:36). A periphrastic perfect participle also is observed in ἔστως

4 Blass, Gr. of N. T. Gk., p. 37. He cites elsewhere Mt. 27:49, σώσων, Jo. 6:64, 1 Cor. 15:37; Heb. 3:5; 13:17; 1 Pet. 3:13. Then there are the doubtful forms κωσούµενα (2 Pet. 3:10, 12) and κοιµούµενοι (2 Pet. 2:13).
5 Brug., Comp. Gr., IV, p. 444.
6 Whitney, Sans. Gr., p. 394.
7 Brug., Comp. Gr., IV, p. 446.
1 Brug., Griech. Gr., p. 331. Κεκτῶµαι and κεκτήµην had no following in Gk.
ἀπηλλοτριωμένος (Col. 1:21). Colloquial Attic has it (Arist. Ran. 721) and the inscriptions (Syll. 928.52 ii./b.c.) ἀποκεκρίμενος ὁ ὄσης (Moulton, ProL., p. 227). In the indicative the periphrastic form is the common one for the future perfect, both active, as ἔσομαι πεποιθός (Heb. 2:13), and passive, as ἔσται λελυμένα (Mt. 18:18). Cf. Lu. 12:52. Moulton (ProL., p. 227) finds three papyri with aorist participles in future perfect sense. With γίνομαι note γεγόνατε ἔχοντες (Heb. 5:12). Cf. Rev. 16:10, ἐγένετο ἐσκοτείνα (Jo. 6:31).

The periphrastic aorist appears only in ἦν βληθείς (Lu. 23:19) and only in the indicative. But note ἐγένετο στιλβοντα (Mk. 9:3).

The periphrastic future indicative is found several times in the active, as ἔσονται πίπτοντες (Mk. 13:25), and the passive, as ἔσεσθαι μισοῦμεν (Lu. 21:17).

The present tense is written periphrastically in the imperative, as ἰσθι εὐνοῶν (Mt. 5:25; cf. Lu. 19:17), and even with γίνομαι, as μὴ γίνεσθε ἐτεροζυγοῦντες (2 Cor. 6:14). Cf. Rev. 3:2. In Col. 1:18 we find an aorist subjunctive with a present participle, ἢν γέννηται προτέρων. The present infinitive occurs in ἐν τῷ εἶνα αὐτὸν προσευχόμενον (Lu. 9:18; 11:1). As an example of the present indicative active take ἦν στὶν ἔχοντα (Col. 2:23), and of [Page 376] the passive take ἦν στὶν μεθερμημένον (Jo. 1:42), though this last is not strictly an instance in point. Cf. also ἦν στὶν προσαναπληροῦσα (2 Cor. 9:12).

The periphrastic imperfect is the most common of all. It is not unknown to the old Greek, and is abundant in the papyri and the κοινή generally, but it is even more frequent in the LXX (Thackeray, Gr., p. 195) and in the Aramaic. As Blass shows, not all the examples in the N. T. are strictly periphrastic, like ἦσαν ... ἄγνωστος (Lu. 2:8). But they are abundant enough, as one can see on almost any page of the Gospels. Take ἦσαν ἄνωμαίνοντες καὶ ἦν προάγον (Mk. 10:32). So Ac. 2:2, ἦσαν καθήμενοι, and Gal. 1:22, ἦμιν ἄγνοιμενος.

For list of important verbs in the N. T. see Additional Notes and my Short Grammar of the Greek N. T. (third ed.), pp. 48–56, 241–244. For such verbs in the LXX see Thackeray, Gr., pp. 258–920 (Table of Verbs); Helbing, Gr. d. LXX, pp. 128–135. For list in the papyri see Mayser, Gr., pp. 387–415.

2 Blass, Gr. of N. T. Gk., p. 204. I am chiefly indebted to Blass for the facts in this summary.
1 Gr. of N. T. Gk., p. 203.
PART III
SYNTAX

CHAPTER IX
THE MEANING OF SYNTAX (ΣΥΝΤΑΞΙΣ)

I. Backwardness in the Study of Syntax. What the Germans call *Laut- und Formenlehre* has received far more scientific treatment than has syntax. In 1874 Jolly\(^1\) lamented that so little work on syntax of a really valuable nature had been done. To a certain extent it was necessary that the study of the forms should precede that of syntax.\(^2\) The full survey of the words and their inflections was essential to adequate syntactical investigation. And yet one can but feel that syntax has lagged too far behind. It has been the favourite field for grammatical charlatans to operate in, men who from a few examples drew large inductions and filled their grammars with “exceptions” to their own hastily made rules. Appeal was made to logic rather than to the actual facts in the history of language. Thus we had grammar made to order for the consumption of the poor students.

Others perhaps became disgusted with the situation and hastily concluded that scientific syntax was impracticable, at least for the present, and so confined their researches either to etymology or to the forms. In 1891 Müller\(^3\) sees no hope of doing anything soon for modern Greek syntax except in the literary high style on which he adds a few remarks about prepositions. Thumb\(^4\) likewise has added a chapter on syntax to his *Handbuch*. If you turn to Whitney’s *Sanskrit Grammar*, you will find no separate syntax, but merely some additional remarks on the “uses” of the aorist, the present, the subjunctive, etc. Monro in his *Homeric Grammar* follows somewhat the

———, Life and Growth of Language (1875).
same plan, but with much more attention to the “uses” of cases and modes. Brugmann\(^5\) in his *Griechische Grammatik* devotes far more space to *Formenlehre*, even in the third edition, which chiefly differs from the second in the increased attention to syntax. Giles in his *Manual of Comparative Philology*, even in the second\(^1\) edition (1900), kept his discussion of the uses of the noun and verb apart and did not group them as syntax. When he wrote his first\(^2\) edition (1895) nothing worthy of the name had been done on the comparative syntax of the moods and tenses, though Delbrück had written his great treatise on the syntax of the noun. When Brugmann planned his first volume of *Kurze vergleichende Grammatik* (1880), he had no hope of going on with the syntax either with the “Grundriß” or the “Kurze,” for at that time comparative grammar of the Indo-Germanic tongues was confined to *Laut- und Formenlehre*.\(^3\) But in the revision of Kühner the Syntax by B. Gerth has two volumes, as exhaustive a treatment as Blass’ two volumes on the Accidence. In the Riemann and Goeler volumes the one on Syntax is the larger. Gildersleeve (*Am. Jour. of Philol.*, 1908, p. 115) speaks of his convictions on “Greek syntax and all that Greek syntax implies.” No man’s views in this sphere are entitled to weightier consideration. May he soon complete his *Syntax of Classical Greek*.

As to the dialectical inscriptions the situation is still worse. Dr. Claflin\(^4\) as late as 1905 complains that the German monographs on the inscriptions confine themselves to *Laut- und Formenlehre* almost entirely. Meisterhans in Schwyzter’s revision (1900) is nearly the sole exception.\(^5\) Thieme\(^6\) has a few syntactical remarks, but Nachmanson,\(^7\) Schweizer\(^8\) and Valaori\(^9\) have nothing about syntax, nor has

The same thing is true of Thumb's *Hellenismus*, though this, of course, is not a formal grammar. A few additional essays have touched on the syntax of the Attic inscriptions and Schanz in his *Beiträge* has several writers who have noticed the subject. The inscriptions do indeed have limitations as to syntax, since much of the language is official and formal, but there is much to learn from them. Thackeray has not yet published his *Syntax of the LXX*. nor has Helbing.

We are somewhat better off as to the papyri as a result chiefly of the work of Dr. James Hope Moulton, who has published his researches in that field as applied to the

New Testament. Crönert in his *Mem. Graeca Hercul.* has a good many syntactical remarks especially on the cases, but no formal treatment of the subject. Völker has not finished his good beginning. No syntax has come from Mayser yet, who stopped with *Laut- und Formenlehre*, though he is at work on one. Moulton does not profess to cover all the syntactical points in the papyri, but only those that throw light on some special points in the N. T. usage.

II. New Testament Limitations. It is evident therefore that the N. T. grammarian is in a poorer plight when he approaches syntax. And yet, strange to say, the N. T. grammars have largely confined themselves to syntax. Winer-Moulton, out of 799 pages, has only 128 not syntax. Buttmann, out of 403 pages (Thayer’s translation), has only 74 not syntax. In Winer-Schmiedel syntax is reached on p. 145. Blass begins syntax on p. 72, out of 305 pages. Moulton in his *Prolegomena* starts syntax on p. 57 (232 in all). The present book has given the discussion of the forms more space at any rate. It is at least interesting to note that N. T. grammarians have reversed the example of the comparative philologists. Is it a case of rushing in where angels fear to tread?

THAYER, J. H., Greek-English Lexicon of the N. T. (1887).

———, Language of the N. T. (Hastings’ D. B., 1900).
One may plead in defence that the demands of exegesis are great and urgent, not to say more congenial. The distinctive character of the N. T. teaching is more closely allied to lexicography and syntax than to mere forms. That is very true, but many a theologian’s syntax has run away with him and far from the sense of the writer, because he was weak on the mere forms. Knowledge of the forms is the first great step toward syntax. Deissmann even complains of Blass for assuming too much in his Syntax and not making enough comments “to rouse up energetically this easy-going deference of the youthful reader” (Expositor, Jan., 1908, p. 65).

Blass urges, besides, that it is just in the sphere of syntax that the N. T. variations from the ancient Greek can be best observed, in this and the change in the meaning of words. This is true, but just as much so of the κοινή in general. This is just the opposite of Winer’s view, who held that the N. T. peculiarities of syntax

were very few. The explanation of the difference lies partly in the undeveloped state of syntax when Winer wrote, though he wrote voluminously enough himself, and partly in the wider conception of syntax that Blass holds as being “the method of employing and combining the several word-forms and ‘form-words’ current in the language.”

On the other hand attention must be called to the fact that the study of the forms is just the element, along with vocabulary, mainly relied on by Deissmann in his *Bible Studies* to show the practical identity of the vernacular κοινή in the papyri and in the N. T. Greek. Burton puts it rightly when he says of the N. T. writers: “The divergence of their language from that of classical writers in respect to syntax is greater than in reference to forms of words, and less than in respect to the meaning of words, both the Jewish and the Christian influence affecting more deeply the meanings of words than either their form or their syntactical employment.” Deissmann readily admits that Christianity has a set of ideas peculiar to itself, as has every system of teaching which leads to a characteristic terminology.

But one is not to think of the N. T. as jargon or a dialect of the κοινή in syntax. It is not less systematic and orderly than the rest of the vernacular κοινή, and the κοινή is as much a real language with its own laws as the Greek of Athens. As remarked above, the κοινή showed more development in syntax than in forms, but it was not a lawless development. It was the growth of life and use, not the artificial imitation of the old language of Athens by the Atticists. Blass properly insists on the antithesis here between the artificial Atticist and “the plain narrator of facts or the letter-writer” such as we meet in the N. T. Deissmann (*Expositor*, Jan., 1908, p. 75) holds that

Christianity in its classical epoch “has very little connection with official culture.” “It rejects—this is the second result of our inquiry—it rejects, in this epoch, all the outward devices of rhetoric. In grammar, vocabulary, syntax and style it occupies a place in the midst of the people and draws from the inexhaustible soil of the popular element to which it was native a good share of its youthful strength.” This is largely true. Men of passion charged with a great message do strike forth the best kind of rhetoric and style with simplicity, power, beauty. It is blind not to see charm in Luke, in John, in Paul, James and the writer of Hebrews, a charm that is the despair of mere “devices of rhetoric” or artificial rules of style and syntax.

It is not surprising to find variations in culture in the N. T. writers, men who had different antecedents (Jew or Greek), different environment (Palestine, Asia Minor and possibly Egypt), different natural gifts and educational advantages, as seen in Peter and Paul. These individual peculiarities show themselves easily and naturally in syntax and style. See chapter IV, The Place of the N. T. in the Koinē, for a larger discussion of this matter of the peculiarities of the N. T. writers. But even in 2 Peter and the Apocalypse one has no difficulty in understanding this simple vernacular Koinē, however far short these books come of the standard of Isocrates or Demosthenes. The study of N. T. syntax is a worthy subject and one entirely within the range of scientific historical treatment so far as that subject has advanced.

III. Recent Advance by Delbrück. Just as Brugmann is the great name in the
accidence of comparative grammar, so Delbrück is the great name in syntax.
Brugmann gladly recognises his own indebtedness to Delbrück. He has sought to
follow Delbrück in the syntax of his *Griechische Grammatik* and in the *Kurze
vergleichende Grammatik*. It is not necessary here to recount the story of how
Delbrück was finally associated with Brugmann in the *Grundriß*, and the *Syntax* by
Delbrück brought to completion in 1900. Brugmann tells the story well in *Kurze
vergl. Gr.* (pp. v ff.) and Delbrück in the *Grundriß* itself. It is a great achievement and
much led up to it. Delbrück has recounted the progress of comparative grammar in his
*Introduction to the Study of Language* (1882). In 1872 he had published *Die Resultate
der vergleichenden Syntax*. In 1879 he brought out *Die Grundlagen der griechischen
Syntax* ("Syntaktische Forschungen," [Page 384] Bd. IV). That marked him as the
man to do for syntax what Brugmann would do for forms. Delbrück does not claim all
the credit. Bernhardy in 1829 had published *Wissenschaftliche Syntax der
griechischen Sprache*, but Bopp, Schleicher and the rest had done much besides. The
very progress in the knowledge of forms called for advance in syntax. In 1883 Hübner

wrote *Grundriß zu Vorlesungen über die griechische Syntax*. It is not a treatment of syntax, but a systematized bibliography of the great works up to date on Greek syntax. It is still valuable for that purpose. One can follow Brugmann¹ and Delbrück, *Vergl. Syntax*, Dritter Teil, pp. xvi–xx, for later bibliography. As the founders of syntax Hübner² points back to Dionysius Thrax and Apollonius Dyscolus in the Alexandrian epoch. The older Greeks themselves felt little concern about syntax. They spoke correctly, but were not grammatical anatomists. They used the language instead of inspecting and dissecting it.

Delbrück (*Vergleichende Syntax*, Erster Teil, pp. 2–72) gives a lucid review of the history of syntactical study all the way from Dionysius Thrax to Paul’s *Principles of the History of Language*. He makes many luminous remarks by the way also on the general subject of syntax. I cannot accent too strongly my own debt to Delbrück.

Syntax, especially that of the verb, has peculiar difficulties.³ Not all the problems have been solved yet.⁴ Indeed Schanz so fully appreciates the situation that he is publishing a series of excellent *Beiträge zur historischen Syntax der griechischen Sprache*. He is gathering fresh material. Many of the American and European universities issue monographs by the new doctors of philosophy on various points of syntax, especially points in individual writers. Thus we learn more about the facts. But meanwhile we are grateful to Delbrück for his monumental work and for all the rest.

IV. The Province of Syntax.

(a) THE WORD SYNTAX (σύνταξις). It is from συντάσσω and means ‘arrangement’ (*constructio*).⁵ It is the picture of the orderly marshalling of words to express ideas, not a mere medley of words. The word syntax is indeed too vague and general to express clearly all the uses in modern grammatical discussion, but it is too late to make a change now.¹ Gildersleeve (*Am. Jour. of Philol.*, 1908, p. 269) says that

some syntacticians treat “syntax as a rag-bag for holding odds and ends of linguistic observations.”

(b) SCOPE OF SYNTAX. But the difficulty is not all with the term, for the thing itself is not an absolutely distinct province. What the Germans call *Lautlehre* (‘teaching about sounds’) is indeed quite to itself. But when we come to define the exact line of demarcation between syntax or the relation of words on the one hand and single words on the other the task is not always so easy. Ries indeed in his very able monograph makes the contrast between syntax (or construction) and single words. His scheme is this: Under *Wortlehre* (‘science of words’) he puts *Formenlehre* (‘theory of forms’) and *Bedeutungslehre* (‘meaning of words’). He also subdivides syntax in the same way. Syntax thus treats of the binding of words together in all relations. Brugmann follows Delbrück in rejecting the special use of syntax by Ries. Brugmann considers the breaking-up of the sentence by Ries into single words to be wilful and only conventional. It is in deed true that single words have a teaching both as to the word itself (form-word, as prepositions) and the form (inflection). That is to say, two things call for consideration in the case of single words: the facts as to the words and the inflection on the one hand and the meaning of these facts on the other. Now Ries refuses to give the term syntax to the meaning of these facts (words, inflections, etc.), but confines syntax to the other field of word-relations. One is bound to go against Ries here and side with Delbrück and Brugmann.

(c) CONSTRUCTION OF WORDS AND CLAUSES. We use syntax, therefore, both for construction of the single word and for clauses. But one must admit the difficulty of the whole question and not conceive that the ancients ran a sharp line between the form and the meaning of the form. But, all in all, it is more scientific to gather the facts of usage first and then interpret these facts. This interpretation is scientific syntax, while the facts of usage are themselves syntax. Thus considered one may properly think of syntax in relation to the words themselves, the forms of the [Page 386] words, the clauses and sentences, the general style. Clyde makes two divisions in his *Greek Syntax*, viz. Words (p. 126) and Sentences (p. 193). But this formal division is artificial. Here, as usual, Delbrück has perceived that syntax deals not only with words (both *Wortarten* and *Wortformen*), but also with the sentence as a whole and all its parts (*Vergl. Syntax*, Erster Teil, p. 83). How hard it is to keep syntactical remarks out of accidence may be seen in Thackeray’s vol. I and in “Morphology” in Thumb’s *Handbook* as well as in Accidence of this book.

Ries RIES, Was ist Syntax? (1894).
2 Was ist Syntax? 1894, p. 142.
3 lb., p. 142 f. Ries calls it a “naive misuse of the word syntax” not to take it in this sense. But he is not himself wholly consistent.

Thackeray
(d) **HISTORICAL SYNTAX.** But this is not to fall into the old pitfall of the Stoic grammarians and apply logic to the phenomena of grammar, using the phenomena of various grammatical categories previously laid down. Plato indeed first applied logic to grammar.\(^1\) The method of historical grammar and comparative grammar has had a long and a hard fight against the logical and philosophical method of syntax. But it has at last triumphed. “They sought among the facts of language for the illustration of theories,” as Dr. Wheeler\(^2\) so well puts it. We still need logic and philosophy in syntax, but we call these two agents into service after we have gathered the facts, not before, and after the historical and comparative methods have both been applied to these facts. Thus alone is it possible to have a really scientific syntax, one “definitely oriented” “as a social science” dealing with the total life of man.\(^3\)

(e) **IRREGULARITIES.** We shall not therefore be surprised to find many so-called “irregularities” in the use of syntactical principles in various Greek writers. This is a point of the utmost importance in any rational study of syntax. The personal equation of the writer must always be taken into consideration. A certain amount of elasticity and play must be given to each writer if one is to understand human speech, for speech is merely a reflection of the mind’s activities. If a tense brings one to a turn, perhaps it was meant to do so. This is not to say that there are no barbarisms or solecisms. Far from it. But it is unnatural to expect all speakers or writers in Greek to conform slavishly to our modern grammatical rules, of most of which, besides, they

---

3 Ib., p. 107.
were in blissful ignorance. The fact is that language is life and responds to the peculiarities of the individual temper, and it is to be remembered that the mind itself is not a perfect instrument. The mind is not always clear nor logical. The ellipses, anacolutha, etc., of language represent partially the imperfections of the mind. “It often depends on the writer which of the two tenses he will use,” Winer remarks about the aorist and the past perfect. It always depends on the writer which tense and which everything else he will use. Pray, on whom else can it depend? The writer happens to be doing the writing. He decides whether he will conform to the usual construction or will give added piquancy by a variation. This assumes, of course, that he is an educated writer. If he is not, he will often have the piquancy just the same without knowing it. “Syntactical irregularities are numerous in Greek,” Clyde observes, and, he might have added, in all other living languages. Greek is not, like “Esperanto,” made to order by any one man. In point of fact what we call idioms are the very peculiarities (ἰδιώματα) which mark it off from other languages or at least characterize it. Some of these idioms spring out of the common intelligence of men and belong to many tongues, others mark the variations of certain minds which gain a following. Compare the rapid spread of “slang” to-day, if it happens to be a “taking phrase.” Hence rules of syntax ought not to be arbitrary, though many of them are. Those that really express the life of language are in harmony with the facts. In general I would say that the fewer rules one gives the better for the student and for the facts.

V. The Method of this Grammar.

(a) PRINCIPLES, NOT RULES. As far as possible principles and not rules will be sought. The Greek grammarian is an interpreter of the facts, not a regulator of the facts. This point calls for special emphasis in syntax where the subjective element comes in so largely.

(b) THE ORIGINAL SIGNIFICANCE. The starting-point therefore in the explanation of any given idiom is to find the original significance. This is not always possible, but it generally is. Historical and comparative grammar lend strong help in this endeavour. Always the best place to begin is the beginning if you can find it.

(c) FORM AND FUNCTION. I would not insist that form and function always correspond. One does not know that the two did so correspond in the beginning in all instances. It is hard to prove a universal proposition. But certainly one is justified in beginning with one function for one form wherever he finds it to be true. Burton1 says: “It is by no means the case that each form has but one function, and that

1 Clyde, Gk. Synt., p. 4 f. Winer

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

2 W.-Th., p. 276.
each function can be discharged by but one form.” Certainly the same function can
come to be discharged by various forms, as is the case with the locative and dative
infinitive forms (λαβεῖν, ἀκοῦσαι). But that is not to say that originally the locative
and dative verbal substantive were identical in idea. The Sanskrit completely
disproves it. It may very well be true that each form had one function originally,
whereas later the same function came to be expressed by various forms. As a starting-
point, therefore, one may assume, till he learns otherwise, that form and function
 correspond. The necessity of getting at the ground-idea of an idiom is rightly
emphasized by Delbrück (Grundlagen, p. 1). It may indeed come to pass as in the
English “but,” that the one form may be used for most of the parts of speech (Giles,
Man. of Comp. Philol., p. 237 f.). On the whole subject of the agreement of form and
idea see Kühner-Gerth, I, pp. 64–77.

(d) Development. But the beginning is not the end. The actual development of a
given idiom in the Greek language up to the N. T. time must be observed. Each idiom
has a history. Now it cannot be expected that the space can be given to the actual
working-out of each idiom in history as Janeris has done in his Historical Grammar,
or minute comparison at every point by means of comparative grammar. What is
essential is that the grammarian shall have both these points in mind as he seeks to
explain the development from the etymological basis. This is the only secure path to
tread, if it can be found. Burton2 indeed distinguishes sharply between historical and
exegetical grammar and conceives his task to be that of the exegetical grammarian.
For myself I regard exegetical grammar as the last stage in the process and not to be
dissociated from the historical. Indeed how a Greek idiom is to be represented in
English is a matter of little concern to the Greek grammarian till the work of
translation is reached. The Greek point of view is to be observed all through the
process till translation comes. It is Greek syntax, not English.

(e) Context. There is one more stage in the interpretation of the Greek idiom.
That is the actual context in any given instance. The variation in the total result is
often due to the difference in the local colour of the context. The same idiom with a
given etymology may not have varied greatly in the long course of history save as it
responds to the context. In a word, etymology, history, context are the

Jannaris

JANNARIS, A. N., A Historical Greek Grammar (1897).

———, On the True Meaning of the Κοινή (Class. Rev., 1903, pp. 93 ff.).

2 Ib., p. 3.
factors that mark the processes in the evolution of a Greek idiom in a given case. These are the things to keep constantly in mind as we approach the idioms of Greek syntax. We may not always succeed in finding the solution of every idiom, but most of them will yield to this process. The result is to put syntax on a firmer scientific basis and take it out of the realm of the speculative subjective sciences.

(f) Translation. This is the translation of the total result, not of the exact Greek idiom. Translation crisply reproduces the result of all the processes in harmony with the language into which the translation is made, often into an utterly different idiom. It is folly to reason backwards from the translation to the Greek idiom, for the English or German idiom is often foreign to the Greek and usually varies greatly from the original Greek. English is English and Greek is Greek. Syntax is not translation, though it is the only safe way to reach a correct translation. Exegesis is not syntax, but syntax comes before real exegesis. The importance of syntax is rightly appreciated by Gildersleeve.1

(g) Limits of Syntax. After all is done, instances remain where syntax cannot say the last word, where theological bias will inevitably determine how one interprets the Greek idiom. Take ὕδατι in Ac. 1:5, for instance. In itself the word can be either locative or instrumental with βαπτίζω. So in Ac. 2:38 εἰς does not of itself express design (see Mt. 10:41), but it may be so used. When the grammarian has finished, the theologian steps in, and sometimes before the grammarian is through.

[PAGE 390] CHAPTER X

THE SENTENCE

I. The Sentence and Syntax. In point of fact syntax deals with the sentence in its parts and as a whole. And yet it is not tautology to have a chapter on the sentence, a thing few grammars do. It is important to get a clear conception of the sentence as well as of syntax before one proceeds to the work of detailed criticism. The sentence is the thing in all its parts that syntax treats, but the two things are not synonymous. At bottom grammar is teaching about the sentence.1

II. The Sentence Defined.

(a) Complex Conception. A sentence is the expression of the idea or ideas in the speaker’s mind. It is an opinion (sententia) expressed (πρὸς ὑπόθεσιν λόγος). This idea is in itself complex. It is this combination of “the small coin of language” into an intelligible whole that we call a sentence.2 Just a mere word accidentally expressed is

---

1 Synt. of Class. Gk., p. iv. C. and S., Sel. fr. the LXX, p. 22, observe that the life of a language lies in the syntax and that it is impossible to translate syntax completely. The more literal a translation is, like the LXX, the more it fails in syntax. 1 K.-G., I, p. 1. Cf. Brug., Kurze vergl. Gr., III, p. 623; Delbrück, Vergl. Synt., 1. Tl., pp. 73–85. 2 Giles, Man. of Comp. Philol., p. 235. Opposed to this idea of a sentence as due to synthesis is the modern psychological definition of Wundt who defines a sentence as “die Gliederung einer Gesamtvorstellung.”
not a sentence. “The sentence is the symbol whereby the speaker denotes that two or more ideas have combined in his mind.”3

(b) TWO ESSENTIAL PARTS. Only two parts are essential to this complex intelligible whole to form a sentence. These two parts are subject and predicate. A statement is made about something and thus an idea is expressed. These two parts are called substantive and verb, though the line of distinction between substantive and verb was originally very dim, as is now often seen in the English (“laugh,” “touch,” “work,” etc.). Many modern linguists hold that the verb is nominal in origin, [Page 391] since some primitive languages know only nominal sentences. We do not know which is the oldest, subject or predicate.1 In the Greek verb indeed subject and predicate are united in the one form, the original sentence.2

(c) ONE-MEMBERED SENTENCE. The sentence in form may be very brief, even one word in truth. Indeed the long sentence may not express as much as the short one. In moments of passion an exclamation may be charged with more meaning than a long rambling sentence.3 We have plenty of examples of one-word sentences in the N. T., like ἀπέχει (Mk. 14:41), προφήτευσον (Mk. 14:65), προεχόµεθα (Ro. 3:9), θέλω (Mt. 8:3), οὐχί (Lu. 1:60). Compare also πορεύθητι, ἔρχου, ποίησον (Mt. 8:9).

(d) ELLIPTICAL SENTENCE. Indeed, as seen in the case of οὐχί (Lu. 1:60) the sentence does not absolutely require the expression of either subject or predicate, though both are implied by the word used. This shortening or condensation of speech is common to all the Indo-Germanic languages.5 Other examples of such condensation are the vocative, as κύριε (Mt. 8:2), with which compare ὑπαγε, Σατανᾶ (Mt. 4:10), the interjections like ἅγε (Jas. 5:1), ἔα (Lu. 4:34), ἰδού (Rev. 14:14), ἴδε (Jo. 1:29), οὐαί (Rev. 8:13). These interjections may be used alone, as ἔα (Lu. 4:34), or with other words, as οὐαί and ἴδε above. Cf. Martha’s Ναί, Κύριε (Jo. 11:27), two sentences. Jo. 11:35 (Εἴδακρυσεν ὁ Ἰησοῦς) is the shortest verse, but not the shortest sentence in the N. T.

(e) ONLY PREDICATE. The subject may be absent and the predicate will still constitute a sentence, i.e. express the complex idea intended. This follows naturally from the preceding paragraph. The predicate may imply the subject. The subject in Greek is involved in the verbal personal ending and often the context makes it clear what the subject really is. Indeed the Greek only expressed the personal subject as a rule where clearness, emphasis or contrast demanded it. The N. T., like the κοινή in general, uses the pronominal subject more frequently than the older Greek (cf.

1 Thompson, Gk. Synt., 1883, p. xv. Delbrück (Vergl. Synt., 1. Tl., p. 77) quotes Schleicher as saying that nouns either have or had case-forms, verbs either have or had pers. endings, and that all words were originally either nouns or verbs. But it is not quite so easy as that unless pronouns be included in nouns.
2 K.-G., I, p. 2.
English). Often a glance at the context is [Page 392] all that is needed, as with καὶ παρεγίνοντο καὶ ἐβαπτίζοντο (Jn. 3:23), ἔφυγον (Mk. 2:3), etc. Sometimes indeed close attention is required to notice a change of subject which is not indicated. So καὶ ἔφαγον πάντες καὶ ἐχορτάσθησαν, καὶ ἤραν τὸ περισσεῦον τῶν κλασμάτων (Mt. 14:20). For this change of subject with no indication see Lu. 8:29; Jn. 19:31; 2 Cor. 3:16; 1 Jn. 5:16.1 Sometimes the subject is drawn out of the verb itself, as in σαλπίσει (1 Cor. 15:52), ‘the trumpet shall trumpet.’ So in οὐτε γαμοῦσιν οὐτε γαμίζονται (Mt. 22:30) men have to be supplied with the first and women with the second verb. God is considered by some the unexpressed, but well-known subject, as with βρέχει (Mt. 5:45), ἀρηκέν (Ac. 13:34), λέγει (Eph. 4:8), φησίν (Heb. 8:5).

Often what is said is a matter of common remark or usage and the subject is designedly concealed, indefinite subject. So when Paul uses φησίν (2 Cor. 10:10) of his opponent unless we follow B and read φασί. The plural is very common in this sense as διὰν ὀνειδίσωσιν ὑμᾶς (Mt. 5:11), μήτι συλλέγονται (Mt. 7:16), ὡς λέγουσιν (Rev. 2:24) like German man sagt, French on dit. Cf. also, not to pile up examples, Mt. 8:16; Mk. 10:13; Lu. 17:23; Jn. 15:6; 20:2; Ac. 3:2; Rev. 12:6. This general or rhetorical plural appears in προσφέρουσιν and δύνανται (Heb. 10:1) if the text is genuine. Moulton (Prol., p. 58) cites κλέπτοντες (Eurip. I. T., 1359).

1 See Viteau, Ét. sur le Grec du N. T., Sujet, Compl. et Attr., p. 55 f. Moulton

———, The Vocabulary of the N. T. Illustrated from the Papyri and other Non-Literary Sources. Part I (1914), II, III.
Sometimes the plural purposely conceals the identity of the person referred to, as when τεθνήκασιν (Mt. 2:20) is used of Herod the Great. The same principle applies to σιτοῦσιν (Lu. 12:20). Then again the verb may imply the subject, as with ἐβρεῖσθεν (Jas. 5:17), ἀπέχει (Mk. 14:41), ὁμοί (Lu. 24:21), οὐ μέλει σοι (Mt. 22:16), εἰ τύχοι (1 Cor. 14:10). Cf. ὡς ἐγένετο (Mk. 11:19). So the modern Greek still (Thumb, Handb., p. 179). Usually, then, such a verb in the N. T. is in the passive voice, so that the subject is involved in the action of the verb. Thus μετρηθήσεται (Mk. 4:24), δοθήσεται (Mk. 4:25), πιστεύεται and ὁμολογεῖται (Ro. 10:10), σπείρεται and ἐγέρεται (1 Cor. 15:42), etc. Sometimes indeed a verb appears to be without a subject, when really it is not. So ἐστο δὲ (2 Cor. 12:16) has the previous sentence as the subject. In 1 Pet. 2:6 the subject of περιέχει is the following quotation. In Ac. 21:35 συνέβη has as its subject the infinitive βαστάξεσθαι. So in general whenever the infinitive is used as subject, the verb is not without a subject, as ἀνέβη ἐπισκέψασθαι (Ac. 7:23). The examples are numerous, as ἔξεστιν ποιεῖν (Mt. 12:2), ἔδοξε γράψαι (Lu. 1:3), ἔδει [Page 393] διέρχεσθαι (Jo. 4:4), πρέπον ἐστίν πληρόσαι (Mt. 3:15), καθήκεν ἢν (Ac. 22:22), ἐνδέχεται ἀπολέσθαι (Lu. 13:33), and even ἀνένδεκτον ἐστίν τοῦ ὡς ἐλθεῖν (Lu. 17:1) and ἐγένετο τοῦ ἐσελθεῖν (Ac. 10:25) where the genitive infinitive form has become fixed. Ἐγένετο does indeed present a problem by itself. It may have the simple infinitive as subject, as διαπορεύεσθαι (Lu. 6:1) and ἐσελθεῖν (Lu. 6:6). Cf. Mk. 2:15. But often καὶ ἐγένετο or ἐγένετο δὲ is used with a finite verb as a practical, though not the technical, subject. So καὶ ἐγένετο, ἔλάλουν (Lu. 2:15), ἐγένετο δὲ, συνήντησαν (Lu. 9:37). So also καὶ ἔσται, ἔχεσθαι (Ac. 2:17). One is strongly reminded of the similar usage in the LXX, not to say the Hebrew יְהִי. Moulton\(^1\) prefers to think that that was a development from the κοινή (papyri) usage of the infinitive with γίνομαι as above, but I see no adequate reason for denying a Semitic influence on this point, especially as the LXX also parallels the other idiom, καὶ ἐγένετο καὶ ἦν διδάσκων (Lu. 5:17, cf. 5:1, 12, etc.), a construction so un-Greek and so like the Hebrew יְהִי. Here καὶ almost equals δὲ and makes the second καὶ clause practically the subject of ἐγένετο. The use of a δὲ or ἤνα clause as subject is common either alone or in apposition with a pronoun. Cf. Mt. 10:25 (ἵνα); 1 Jo. 5:9 (ὅτι); Jo. 15:12 (ἵνα). In a case like δρκεῖ (Jo. 14:8), ἄνήκεν (Col. 3:18), ἔλογίσθη (Ro. 4:3) the subject comes easily out of the context. So also the subject is really implied when the partitive genitive is used without the expression of τινός or πολλοί as συνήλθον δὲ καὶ τῶν μαθητῶν (Ac. 21:16) and ἔλαμψεν οὖν ἐκ τῶν μαθητῶν (Jo. 16:17), a clear case of the ablative with ἐκ. The conclusion of the whole matter is that the subject is either expressed or implied by various linguistic devices. The strictly impersonal verbs in the old Greek arose from the conception of θεός as doing the thing.\(^2\)

\(f\) ONLY SUBJECT. Likewise the predicate may be absent and only implied in the subject. Yet naturally the examples of this nature are far fewer than those when the predicate implies the subject. Sometimes indeed the predicate merely has to be

---

1 Prol., p. 17.
mentally supplied from the preceding clause, as with ἐλθόμεθα (2 Cor. 1:6), διαπήσει (Lu. 7:42), ἔχει (Lu. 20:24), λομβάνει (Heb. 5:4). Cf. Eph. 5:22. It may be that the verb would be [Page 394] slightly changed in form, if expressed, as σκάνδαλισθήσομαι (Mk. 14:29), ὑποτασσόμεθα (Eph. 5:24), τίθημεν (2 Cor. 3:13), etc. Sometimes again the affirmative is to be inferred from a negative as in 1 Cor. 7:19; 10:24. In Mk. 12:5 the principal verb has to be drawn from the idea of the two participles δέροντες and ἀποκτεννύντες. In particular with εἰ δὲ μὴ (or μὴ γε) the verb is always absent (as Mt. 6:1), so that the idiom becomes a set phrase (Lu. 10:6; 13:9). In Ro. 5:3 with οὐ μόνον δὲ, καυχώμεθα is to be supplied, and in 5:11 σωθησόμεθα. In Ro. 9:10 the verb has to come from verse 9 or 12. In Ro. 4:9 probably λέγεται (cf. verse 6) is to be supplied. Often εἶπεν is not expressed, as in Ac. 25:22. In Ro. 5:18 Winer supplies ἀπέβη in the first clause and ἀποβήσεται in the second. In 2 Cor. 9:7 he likewise is right in suggesting δότω from the context, as in Gal. 2:9 after Ἰνα we must mentally insert εὐαγγελίζομεθα, εὐαγγελίζωνται. In epistolary salutations it is not difficult to supply λέγει or λέγει χαίρειν as in Jas. 1:1; Ph. 1:1; Rev. 1:4. These are all examples of very simple ellipsis, as in 2 Pet. 2:22 in the proverb. Cf. also 1 Cor. 4:21; 2 Cor. 5:13; Gal. 3:5.

(g) Verb not the Only Predicate. But the predicate is not quite so simple a matter as the subject. The verb indeed is the usual way of expressing it, but not the only way. The verb εἰμί, especially ἔστι and ἐστίν, may be merely a “form-word” like a preposition and not be the predicate. Sometimes it does express existence as a predicate like any other verb, as in ἔγω εἰμί (Jo. 8:58) and ἡ θάλασσα οὐκ ἔστιν ἔτι (Rev. 21:1). Cf. Mt. 23:30. But more commonly the real predicate is another word and εἰμί merely serves as a connective or copula. Thus the predicate may be complex. With this use of εἰμί as copula (“form-word”) the predicate may be another substantive, as ὁ ἄγρος ἔστιν ὁ κόσμος (Mt. 13:38); an adjective, as τὸ φρέαρ ἔστι βαθύ (Jo. 4:11); a prepositional phrase, as ἔγγυς σου τὸ ῥῆμα ἔστιν (Ro. 10:8); and especially the participle, as ἦν διδάσκων (Mt. 7:29). Other verbs, besides εἰμί, may be used as a mere copula, as γίνομαι (Jo. 1:14), καθίσταμαι (Ro. 5:19), ἔστηκα (Jas. 5:9), and in particular φαίνομαι (2 Cor. 13:7), ὑπάρχω (Ac. 16:3).2 Predicative amplifications [Page 395] belong to apposition and will be so treated as an expansion of the predicate. The subject also has amplifications.

(h) Copula Not Necessary. Naturally this copula is not always considered necessary. It can be readily dispensed with when both subject and the real predicate are present. This indeed is the most frequent ellipsis of all in all stages of the language, especially the form ἔστι. But strictly speaking, the absence of the copula is not ellipsis, but a remnant of a primitive idiom, since some primitive tongues could do without the copula. Still, as Blass’ observes, the ellipsis never became a fixed usage save in a few phrases like δῆλον ὅτι (1 Cor. 15:27) or ὅτι…δῆλον (Gal. 3:11). In Ἰνα

Cor. 8:16

The copula may also be absent if not needed, as with Ph. 3:8, but absent in Ph. 3:7. The participle shows a similar ellipsis as in Jo. 1:50 ἔ. Exclamations, as well as questions, show the absence of the copula. Thus from ambiguity, as µ.

As a matter of fact the copula may be absent from any kind of sentence which is free from ambiguity, as µ. 5 Prol., p. 11. 4 Gr. of N. T. Gk., p. 74. 3 Ib.

1 Gr. of N. T. Gk., p. 74. 2 W.-Th., p. 586. 3 lb. 4 Gr. of N. T. Gk., p. 74. 5 Prol., p. 11.
interjections ἰδοῦ does not need a verbal predicate, though it may have one. As examples see Mt. 17:5; Lu. 5:18; Rev. 4:1. In the last example both ἰδοῦ and ἰδοῦ occur and the construction follows, now one now the other, as is seen in verse 4.

(i) **THE TWO RADIATING FOCI OF THE SENTENCE.** Thus, as we have seen, the subject and predicate are the two foci of the sentence regarded as an ellipse. Around these two foci all the other parts of the sentence radiate, if there are any other parts. The sentence may go all the way from one abrupt word to a period a couple of pages long, as in Demosthenes or Isocrates. Schoolboys will recall a sentence in Thucydides so long that he forgot to finish it. Giles speaks of the sentence as a kingdom with many provinces or a house with many stories. That is true potentially. But the sentence is elastic and may have only the two foci (subject and predicate) and indeed one of them may exist only by implication. [Page 397] The context can generally be relied on to supply the other focus in the mind of the speaker or writer. Thus by the context, by look and by gesture, words can be filled to the full and even run over with meanings that of themselves they would not carry. Emotion can make itself understood with few words. The matters here outlined about the Greek sentence apply to Greek as a whole and so to the N. T. Greek.

(j) **VARIETIES OF THE SIMPLE SENTENCE.** It is immaterial whether the simple sentence, which is the oldest sentence, be declarative, interrogative or imperative. That affects in no way the essential idea. All three varieties occur in great abundance in the N. T. and need not be illustrated. So likewise the simple sentence may be affirmative or negative. That is beside the mark in getting at the foundation of the sentence. All these matters (and also abstract and concrete) are mere accidents that give colour and form, but do not alter the organic structure. For an extensive discussion of the various kinds of independent sentences in the N. T. (declarative, interrogative, hortatory, wish, command) see Viteau, *Syntaxe des Propositions*, pp. 17–40. The matter will be discussed at length in the chapter on Modes.

**III. The Expansion of the Subject.**

(a) **IDEA-WORDS AND FORM-WORDS.** There are indeed, as already seen, two sorts of words in general in the sentence, idea-words and form-words, as the comparative grammars teach us. The idea-words (called by Aristotle φωνα ἑσημανικαί) have an inner content in themselves (word-stuff), while the form-words (φωνα ἀσημαί) express rather relations between words. Substantive, verb, adjective, adverb are idea-words, and pronouns, prepositions, some adverbs (place, time, etc.), the copula are form-words. In reality the form-words may have been originally idea-words (cf. ἐλπί, for instance, and the prepositions). The distinction is a real one, but more logical than
practical. The form-words, when prepositions, really help out the meanings of the cases.

(b) CONCORD AND GOVERNMENT. Clyde\(^3\) offers another distinction, that between concord and government, which has something in it if it is not pushed too far. “In concord, the substantive is, as it were, a syntactical chief, and all his followers wear the same badge as himself; in government, the substantive appears, as it were, in various conditions of service, and is dressed each time according to the particular function he discharges.” [Page 398] He uses concord where the substantive is king and government where the verb rules. There is something in this distinction between the two parts of the sentence, only at bottom the verb has concord too as well as the substantive, as can be shown, and as Clyde really admits by the term congruity for the case-relations with the verb. This distinction is not one between subject and predicate, but between substantive and verb.

(c) THE GROUP AROUND THE SUBJECT. This may be formed in various ways, as, for instance, by another substantive, by an adjective, by the article, by a pronoun, by an adverb, by a prepositional phrase (adjunct), by subordinate clause.\(^1\) Each of these calls for illustration and discussion. They may be explained in inverse order for practical reasons.

1. For Subordinate Clause take Lu. 1:43.
2. With the Article. In Ro. 7:10 we have ἡ ἑντολή ἡ εἰς ζωήν. Here the article shows that this prepositional phrase or adjunct is under the wing of the substantive ἑντολή. In the chapter on the Article this matter will call for more elaborate discussion. For the article and pronoun take οὖν ὁ Ἰησοῦς (Ac. 1:11).

3. The Adverb. As examples of adverbs with substantives take τῇ νῦν Ἰερουσαλήμ (Gal. 4:25) and ἡ δὲ ἄνω Ἰερουσαλήμ (verse 26).

4. The Adjective. The origin of the adjective and its close relation to the substantive was discussed under Declensions (chapter VII) and will be further shown in the chapter on Adjectives in Syntax. Take as an example ὁ ποιμήν ὁ καλὸς (Jo. 10:11).

5. The Substantive. The earliest and always a common way of expanding the subject was by the addition of another substantive. It was done in either of two ways.

(a) By an oblique case, usually the genitive. Even the dative may occur. The ablative is seen in ξένοι τῶν διαθηκῶν (Eph. 2:12). But the genitive, the case of genus or kind, is the case usually employed to express this subordinate relation of one word to another. This whole matter will be discussed under the genitive case and here only

---

3 Gk. Synt., p. 126.
1 As a matter of fact any substantive, whatever its place in the sentence, may be the nucleus of a similar grouping. But this is a further subdivision to be noticed later. On the grouping of words around the subst. see Delbrück, Vergl. Synt., 3. Tl., pp. 200–221. For various ways of grouping words around the subj. in a Gk. sentence see K.-G., I, p. 52.
one example will be mentioned, ὁ πατήρ τῆς δόξης (Eph. 1:17), as illustrating the point.

(b) Apposition. This was the earliest method. Apposition is common to both subject and predicate. Sometimes indeed the [Page 399] genitive is used where really the substantive is in apposition, as πέρι τοῦ ναοῦ τοῦ σώματος αὐτοῦ (Jo. 2:21), a predicate example where “temple” and “body” are meant to be identical. So with ἦν οἰκία τοῦ σκήνους (2 Cor. 5:1) and many other examples. But in general the two substantives are in the same case, and with the subject, of course, in the nominative. As a matter of fact apposition can be employed with any case. The use of ἄνηρ, ἄνθρωπος, γονὴ with words in apposition seems superfluous, though it is perfectly intelligible. The word in apposition conveys the main idea, as ἄνηρ προφήτης (Lu. 24:19), ἄνθρωπος οἰκοδεσπότης (Mt. 21:33). Cf. ἄνδρες ἄδελφοι (Ac. 1:16) and ἄνδρα φονέα (Ac. 3:14). So also ἄνδρες Ἰσραήλεοι (Ac. 2:22), ἄνδρες Ἀθηναίοι (Ac. 17:22), an idiom common in the Attic orators. Such apposition, of course, is not confined to the subject, but is used in any case in every sort of phrase. Thus γυναῖκα χήραν (Lu. 4:26), ἄνθρωπος οἰκοδεσπότης (Mt. 13:52), but note also 21:33), Σίμωνος Βυσσέως (Ac. 10:32). Sometimes the word in apposition precedes the other, though not usually. Thus οὗ κόσμος τῆς ἀδικίας, ἡ γλῶσσα (Jas. 3:6); καὶ γὰρ τὸ πάσχα ἦν ἔτυθη, Χριστός (1 Cor. 5:7). But this is largely a matter of definition. The pronoun, of course, may be the subject, as ἐγὼ Ἰησοῦς (Rev. 22:16). So ἐγὼ Παῦλος (Gal. 5:2). Cf. υἱὸς οἱ Φαρισαῖοι (Lu. 11:39). The word in apposition may vary greatly in the precise result of the apposition, a matter determined wholly by the word itself and the context. Thus in Ἀβραὰμ ὁ πατριάρχης (Heb. 7:4) a descriptive title is given. Cf. also εἶ ἐγὼ ἔνισχα ὑμῶν τῶν πόδας, ὁ κύριος καὶ ὁ διδάσκαλος (Jo. 13:14). Partitive or distributive apposition is common, when the words in apposition do not correspond to the whole, as οἱ δὲ ἀμελήσαντες ἀπῆλθον, δὲς μὲν εἰς τὸν ἱδίον ἄγρον, δἐς δὲ ἔπι τὴν ἐμποριάν αὐτοῦ (Mt. 22:5). Often the word in apposition is merely epexegetical, as ἥ ἐστιν ὁ τὸν Ισραήλ Ἰσραήλ Ἰσραήλ ἢ σκηνοπηγία (Jo. 7:2). Αὐτός is sometimes used in emphatic apposition, as ὁ Ἰησοῦς κυρίλη ἡ ἐκκλησίας, αὐτός σωτήρ τοῦ σώματος (Eph. 5:23). The phrase τοῦτο ἦστιν in apposition with the subject, as ὁλίγοι, τοῦτο ἦστιν ὀκτὼ ψυχαί (1 Pet. 3:20). But the phrase is a mere expletive and has no effect on number (as seen above) or case. It can be used indifferently with any case as the locative (Ro. 7:18), the instrumental (Mk. 7:2), the accusative (Ac. 19:4; Heb. 13:15; Phil. 12), the genitive (Heb. 9:11; 11:16). Any number of words or phrases may be in apposition, as in ἐβλήθη ὁ δράκων ὁ μέγας, ὁ δῆμος, ὁ ἀρχαῖος, ὁ καλοῦμενος Διάβολος καὶ ὁ Σατανᾶς, ὁ πλανῶν τὴν οἰκουμένην ἄλημα (Rev. 12:9). [Page 400] An infinitive may be in apposition with the subject, as οὗ γὰρ διὰ νόμου ἢ ἐπαγγελία, τῷ Ἀβραὰμ ἢ τῷ σπέρματι αὐτοῦ, τῷ κληρονόμον αὐτῶν εἶναι κόσμου (Ro. 4:13). Cf. 1 Th. 4:3; 1 Pet. 2:15. Once more, a clause with ὅτι or ἢ may be in apposition with the subject (or predicate either), as ἢ ἦστιν ἢ μαρτυρία, ὅτι ἤξυν ἀδιόνον ἔδωκεν ὁ θεὸς ἦμῖν (1 Jo. 5:11) and ἢ ἦστιν ἢ ἤγαγε τοῦ θεοῦ ἢ ναυτὸς ἢ τῶν ἐντολῶν αὐτῶν παρώμεν (1 Jo. 5:3). Cf. Jo. 6:29, 39, 40. For many more or less interesting details of apposition in the N. T. and the LXX see Viteau, Sujet, Complément et Attribut (1896), pp. 220–236.

**IV. The Expansion of the Predicate.**

(a) **Predicate in Wider Sense.** Here predicate must be taken in its full sense and not merely the verb, but also the other ways of making a predicate with the copula. One cannot do better here than follow Brugmann, though he makes the verb, not the predicate, the centre of this group. It is simpler just to take the predicate as the other focus answering to the subject. The predicate can be expanded by other verbs, by substantives, by pronouns, by adjectives, by adverbs, by prepositions, by particles, by subordinate clauses.

(b) **The Infinitive and the Participle.** These are the common ways of supplementing a verb by another verb directly. They will both call for special treatment later and can only be mentioned here. Cf. ἤθελεν παρελθεῖν (Mk. 6:48) and Ἐλαθὼν τινες ξενίσαντες (Heb. 13:2). But sometimes two verbs are used together directly without any connective, as ποῦ θέλεις ἐτοιμάσωμεν (Mt. 26:17). See discussion of asyndeton in this chapter (XII, Connection in Sentences).

(c) **The Relation between the Predicate and Substantives.** This matter receives full treatment under the head of Cases, and a word of illustration suffices here. It is not the accusative case alone that occurs, but any oblique case of the substantive or pronoun may be used to express this relation, as αὐτή ἐστίν ἡ Ἐπαγγελία (1 Jo. 2:25). In the case of a copula this case will be the nominative and forms the predicate, as ἀπεκατεστάθη ὑγιής (Mt. 12:13). Cf. ἦλθεν πρῶτος (Jo. 20:4), ἀπαράβατον ἔχει τὴν ἱερωσύνην (Heb. 7:24). The article and the participle often form the predicate, as σωτηρίαν ἡ ἐπιφάνεια (2 Pet. 1:11).

(d) **The Pronoun.** It is sometimes the expanded object, as τοιούτους ζητεῖ τοῦς προσκυνοῦντας αὐτὸν (Jo. 4:23).

[Page 401] (e) **Adjectives.** They are common with predicates and as predicates. So ἡ σπειρατεατθὴ ὡγὴς (Mt. 12:13). Cf. ἤθελεν πρῶτος (Jo. 20:4), ἀπαράβατον ἔχει τὴν ἱερωσύνην (Heb. 7:24). The article and the participle often form the predicate, as Mt. 10:20.

(f) **The Adverb.** The use of the adverb with the predicate is so normal as to call for no remark. So ὁμολογομένως μέγα ἐστίν τὸ τῆς εὐσεβείας μυστήριον (1 Tim. 3:16). Cf. οὕτως γὰρ πλούσιως ἑπιχορηγηθήσεται (2 Pet. 1:11).

Abbott

———, Johannine Grammar (1906).

———, Johannine Vocabulary (1905).

(g) Prepositions. Let one example serve for prepositions: ἵνα πληρωθῇ εἰς πᾶν τὸ πλήρωμα τοῦ θεοῦ (Eph. 3:19).

(h) Negative particles ōú and μῆ. These are not confined to the predicate, but there find their commonest illustrations. Cf. ōú γὰρ τολμῶμεν (2 Cor. 10:12) and μῆ γένοιτο (Gal. 6:14).

(i) Subordinate Clauses. Most commonly, though by no means always, they are expansions of the predicate. The adverbial clauses are mainly so, as ἔγραψα ὑμῖν ἵνα εἴδητε (1 Jo. 5:13), and most object (substantival) clauses, as the ὅτι ζωὴν ἔχετε αἰώνιον in the same sentence. But adjectival clauses likewise often link themselves on to a word in the predicate, as ἐν Χριστῷ Ἰησοῦ ὁν proθέτο (Ro. 3:24).

(j) Apposition with the predicate and looser amplifications. It is common also, but calls for little additional remark. Predicative amplifications, as Winer (Winer-Thayer, p. 527) calls them, are common. So εἰς ὅ ἐγὼ ἔτεθην κήρυξ (1 Tim. 2:7), ὅν προέθετο ὁ θεός Ἰασωπηρίων (Ro. 3:25). The participle with ὡς is frequent, as ἦμας ὡς κατὰ σάρκα περισσοτέρως (2 Cor. 10:2). Cf. 1 Pet. 2:5. Note also εἰς as εἰς ἀν (Ac. 7:21), a Greek idiom parallel to the Hebrew and very abundant in the LXX. A common construction is to have a clause in apposition with τοῦτο in an oblique case. So we see the accusative as in τοῦτο γινώσκετε ὅτι ἡγιασμένη ἡ βασιλεία τοῦ θεοῦ (Lu. 10:11), ablative as in μείζονα ταύτης ὁγιάσαιν οὐδείς ἔχει ἤνα τις τὴν νομήν αὐτοῦ θῇ ὑπὲρ τῶν φίλον αὐτοῦ (Jo. 15:13), locative ἐν τούτῳ γινώσκομεν ὅτι ἐν αὐτῷ μένομεν (1 Jo. 4:13). Cf. λέγω τοῦτο ὅτι ἐκαστος ὑμῖν λέγει (1 Cor. 1:12). Likewise the infinitive may be in apposition with τοῦτο, as ἔκρινα ἐμαυτῷ τοῦτο, ὅτι μὴ πάλιν ἐν λῷπῃ πρὸς ὑμᾶς ἔλθεν (2 Cor. 2:1). Cf. also Lu. 22:37 where τὸ καὶ μετὰ ἄνοιμον ἐλογίσθη is in apposition with τὸ γεγραμμένον δὲ τελεσθῇ ἐν ἔμοι.

For an extended predicate with numerous classes see Rev. 13:16, ποιῆν πάντας, τοὺς μικροὺς καὶ τοὺς μεγάλους, καὶ τοὺς πλουσίους καὶ τοὺς πτωχοὺς, καὶ τοὺς ἑλευθέρους καὶ τοὺς δούλους.

[Page 402] V. Subordinate Centres in the Sentence. Each of the words or phrases that the subject or predicate groups around itself may form a fresh nucleus for new combinations. Thus the long sentences with many subordinate clauses resemble the cell multiplication in life. The N. T. indeed does not show so many complications in the sentence as the more rhetorical writers of Athens. In Mt. 7:19 the subject δένδρον has the participle ποιοῦ, which in turn has its own clause with μῆ as negative and καρπὸν καλὸν as object. In Jo. 5:36 the predicate ἔχει has μαρτυρίαν as object, which has the predicate adjective μείζω, which in turn is followed by the ablative τοῦ Ἰωάννου. This is all too simple to need further illustration. Even adverbs may have expansive appositives as in οὗτος ἐν τῇ πατρίδι σου (Lu. 4:23). Cf. Delbrück, Vergl. Syntax, pp. 222–227, for discussion of the adjective and its connection, and p. 228 for the adverb.

VI. Concord in Person. The concord between subject and predicate as to person is so uniform as to call for little remark. In Greek the person was originally expressed in the ending. In the later Greek the pronoun was increasingly used in addition (see chapter on Pronouns). But only ignorance would allow one to mix his persons in the use of the verb. The only problem occurs when the subject comprises two or even all three persons. Then, of course, the first prevails over both the second and the third. So ἐγὼ καὶ ὁ πατὴρ ἐκέμεν (Jo. 10:30). Cf. Mt. 9:14; Lu. 2:48; 1 Cor. 9:6. But in Gal. 1:8 (Εἶδεν ἡμῖν ὁ ἄγγελος ἐξ οὐρανοῦ ἐπαγγελίσηται) the reverse is true either because Paul follows the nearest in both person and number or (Winer-Thayer, p. 518) because he acknowledges thus the superior exaltation of the angel. Then again in cases like Ac. 11:14 (σωθῆσῃ καὶ πᾶς ὁ ἄγγελος ὑμῶν) the speaker merely uses the person and number of the first and most important member of the group. Cf. Ac. 16:31. The subject of person thus easily runs into that of number, for the same ending expresses both. Sometimes indeed the first and second persons are used without any direct reference to the speaker or the person addressed. Paul in particular is fond of arguing with an imaginary antagonist. In Ro. 2:1 he calls him ὦ ἄνθρωπος ὁ κρίνων. So also 2:3. In Ro. 9:20 Paul is very earnest, μενοῦνγε σὺ τίς εἴ; cf. also 11:17; 14:4. In 1 Cor. 10:30 the first person may be used in this representative way. The same may be true of Gal. 2:18, but not of 2:19. Ro. 7:7–25 is not so clear. The vehemence of passion argues for Paul’s own experience, but note σε in 8:2. Cf. Blass, Gr. of N. T. Gk., [Page 403] p. 317. On the whole subject of agreement in person see Delbrück, Vergl. Synt., p. 229 f.; Kühner-Gerth, I, p. 82. For change in person see 2 Jo. 8; 1 Cor. 10:7–10.

VII. Concord in Number. Here we have a double concord, that between subject and predicate (both verb and adjective if copula is used) and that between substantive and adjective in general. It is simpler, however, to follow another division.

(a) Subject and Predicate.

1. Two Conflicting Principles. One follows the grammatical number, the other the sense (κατὰ σῶνεσιν). The formal grammatical rule is, of course, usually observed, a singular subject having a singular verb, a plural subject having a plural verb. This is the obvious principle in all languages of the Indo-Germanic group. It was once true of the dual also, though never to the same extent. Moulton aptly says: “Many Greek dialects, Ionic conspicuously, had discarded this hoary luxury long before the common Greek was born.” The Attic gave it a temporary lease of life, “but it never invaded Hellenistic, not even when a Hebrew dual might have been exactly rendered by its aid.” I doubt, however, as previously shown (ch. VII, I, 3), Moulton’s explanation that the dual probably arose in prehistoric days when men could count only two. That was indeed a prehistoric time! Probably the dual was rather the effort to accent the fact that only two were meant, not more, as in pairs, etc. Hence the dual verb even in Attic was not always used, and it was an extra burden to carry a special inflection for just this idea. No wonder that it vanished utterly in the κοινή.

2. Neuter Plural and Singular Verb. But the κοινή fails to respond to the Attic rule that a neuter plural inanimate subject takes a singular verb. Homer indeed was not so insistent and the “modern Greek has gone back completely and exclusively to the use

1 Prol., p. 57.
of the plural verb in this instance as in others.”

The N. T., like the κοινή in general, has broken away from the Attic rule and responds more to the sense, and also more often regards a neuter plural as really plural. It never was a binding rule, though more so in Attic than in Homer. In the vernacular κοινή the people treated the neuter plural like other plurals. (Radermacher, N. T. Gr., p. 96.) Usually a neuter plural in the N. T. that has a personal or collective meaning has a plural verb. So ἔπαναστησότατε τέκνα (Mt. 10:21), [Page 404] τά δαιμόνια πιστεύουσιν (Jas. 2:19), ἔθνη ἐπιζήτοῦσιν (Mt. 6:32), τὰ πνεύματα προεύρεστον (Mk. 3:11). But the only rule on the matter that is true for N. T. Greek is the rule of liberty. The papyri show the same variety of usage. So does the LXX. In the examples given above the MSS. often vary sharply and examples of the singular verb occur with all of them, δαιμόνια more frequently with the singular verb, as ἐσθήθην δαιμόνια πολλά (Lu. 8:30), but παρεκάλου in next verse. So in Lu. 4:41 we have δαιμόνια ἔξηρχετο and a little further on ὅτι ἦδεισαν. In Jo. 10:4 we see a similar change in the same sentence, τὰ πρόβατα αὐτῷ ὀκολοῦθεν ὅτι οἴδασιν. The same indifference to the Attic rule appears about things as about persons. Thus ἴνα φανερώθη τὰ ἔργα τοῦ θεοῦ (Jo. 9:3) and ἐφάνησαν τὰ ῥήματα (Lu. 24:11). In Rev. 1:19 we find ἃ εἰσὶν καὶ ἃ μέλλει γενέσθαι. The predicate adjective will, of course, be plural, even if the verb is singular, as φανερᾶ ἐστίν τὰ τέκνα (1 Jo. 3:10). Cf. Gal. 5:19. Winer and (to some extent) Blass feel called on to explain in detail these variations, but one has to confess that the success is not brilliant. It is better to regard this indifference to congruity as chiefly an historical movement characteristic of the κοινή as shown above. Even the Attic did not insist on a singular verb with a neuter plural of animate objects when the number of individuals was in mind. The neuter plural was in origin a collective singular. In 1 Cor. 10:11 the MSS. differ much between συνέβαινεν and –οιν. 3. Collective Substantives. These show a similar double usage, Thus we have ἐκάθητο περὶ αὐτῶν ὄχλος (Mk. 3:32) and so more commonly with these collective substantives like ὄχλος, πλήθος, οἰκία, λαός. But plenty of examples of construction according to sense occur. So ὁ δὲ πλεῖστος ὃ ἐστίν τὰ τέκνα (1 Jo. 3:10). Cf. Gal. 5:19. Winer and (to some extent) Blass feel called on to explain in detail these variations, but one has to confess that the success is not brilliant. It is better to regard this indifference to congruity as chiefly an historical movement characteristic of the κοινή as shown above. Even the Attic did not insist on a singular verb with a neuter plural of animate objects when the number of individuals was in mind. The neuter plural was in origin a collective singular. In 1 Cor. 10:11 the MSS. differ much between συνέβαινεν and –οιν.

3 Blass, Gr. of N. T. Gk., p. 78.
2 W.-Th., p. 514 f.
3 Gr. of N. T. Gk., p. 78.
4. The Pindaric Construction. Another complication is possible when several subjects are united. If the predicate follows this compound subject, it is put in the plural nearly always. But the “Pindaric construction” (σχήμα Πινδαρικόν) puts the verb in the singular. Blass says German cannot do this, and he ignores the N. T. examples. In Jas. 5:2 f. we have a striking example: ὁ πλοῦτος ὑμῶν σέσημεν, καὶ τὸ ἱματία ὑμῶν σποάροιτα γέγονεν, ὁ χρυσὸς ὑμῶν καὶ ὁ ἄργυρος κατώταται. Here κατώταται is natural like the English translation, ‘is cankered’ (A.V.). Note also Mt. 6:19, ὁς ής καὶ βρόχες ὄφαντες (‘where moth and rust doth corrupt,’ A.V.). Other examples are Mk. 4:41, καὶ ὁ ἄνεμος καὶ ἡ θάλασσα ὑπακούει αὕτη; 1 Cor. 15:50, ὅτι σάρξ καὶ ἀέμα βασιλείαν θεοῦ κληρονομήσα εὖ δύναται. Here the principle of anacoluthon suggested by Moulton will hardly apply. It is rather the totality that is emphasized by the singular verb as in the English examples. But when the predicate comes first and is followed by several subjects, anacoluthon may very well be the explanation, as in the Shakespearean examples given by Moulton. The simplest explanation (see under 5) is that the first subject is alone in mind. Thus in 1 Cor. 13:13 νοῦ δὲ μένει πίστες, ἔλπις, δόξῃ, τὰ τρία ταῦτα (cf. English ‘and now abideth faith, hope, love, these three,’ like the Greek). Cf. also 1 Tim. 6:4. However, in Mt. 5:18, ἡς ᾧ παρέλεξῃ ὁ οὐρανὸς καὶ ἡ γῆ, it seems rather the totality that is emphasized as above. See Jo. 12:22. In Rev. 9:12, ἐδοῦ ἔρχεται ἔτε δύο οὐαὶ μετὰ ταῦτα, probably the neuter conception of the interjection prevails, though just before we have ἢ οὐαὶ ἢ μία. In Lu. 2:33, ἤν ὁ τατῆρ αὐτοῦ καὶ ἡ μήτηρ ᾧ ἂν ἀνέκοψες, the copula follows one plan and the participle another. So also ἤν καθήμεναι (Mt. 27:61). Just so ἔφρονε Μουσῆς καὶ Ἡλείας συναλούντες (Mt. 17:3). Cf. Eph. 4:17 f. In Rev. 21:16, τὸ μήκος καὶ τὸ πλάτος καὶ τὸ ὄψιν αὐτῆς Ἰσα έστιν, the neuter plural adjective and singular copula are regular.

5. Singular Verb with First Subject. It is very common indeed for the verb to have the singular with the first of the subjects. Cf. Jo. 2:2, 12; 3:22; 18:15; Ac. 11:14. But on the other hand we have προσπορεύονται αὐτῷ Ἰάκωβος καὶ Ἰωάννης οἱ υἱοὶ Ζεβεδαίου (Mk. 10:35). Cf. also Lu. 23:12; Jo. 21:2; Ac. 5:24. In Ac. 25:23 one participle is singular and the other plural. So in Ac. 5:29 we meet ἄποκριθεὶς δὲ Πέτρος καὶ οἱ ἀποστόλοι ἐπέλαλαν. With ἢ [Page 406] the verb is usually in the singular in the N. T. So Mt. 12:25 πᾶσα πόλις ἢ οίκια μερισθέντα καθ’ ἑαυτῆς οὐ σταθήσεται. Cf. also Mt. 5:18; 18:8; Eph. 5:5. In Gal. 1:8 Blass thinks it would be impossible to have εὐαγγελιζώμεθα with ἡμῖν ἢ ἄγγελος. But the impossible happens in Jas. 2:15, ἢν ὁδελφὸς ἢ ὁδελφή γυμνοὶ ὑπάρχοσιν. We have a similar difficulty in English in the use of the disjunctive and other pronouns. One will loosely say: “If any one has left their books, they can come and get them.”

6. The Literary Plural. We have already mentioned the use of the plural in a kind of impersonal way to conceal one’s identity, as τεθνήκασιν (Mt. 2:20), αἰτοῦσιν (Lu. 12:20) and the general indefinite plural like ὃς κέγουσιν (Rev. 2:24). The critics

1 Ib., p. 79.
2 Prol., p. 58. Sometimes Shakespeare used a singular verb for the sake of metre (Farrar, Gk. Synt., p. 65), at other times more like our mod. Eng.: “It is now a hundred years since,” etc. Cf. Gk. ἔστιν οἷ, etc. Cf. also Riem. and Goelzer, Synt., p. 18; Giles, Man. of Comp. Philol., pp. 263–268.
3 Gr. of N. T. Gk., p. 80.
disagree sharply about it (the literary plural). Blass\(^2\) flatly denies that we have any right to claim this literary plural in Paul’s Epistles because he associates others with himself in his letters. Winer\(^3\) insists that Paul often speaks in his apostolic character when he uses the plural and hence does not always include others. Moulton\(^4\) considers the matter settled in favour of the epistolary plural in the koine. He cites from the papyri several examples. So Tb.P. 26 (ii/v.c.) ὑμεῖς ἔννοιαν ἔχετε—προσέπεσεν ἡμῖν, B.U. 449 (ii–iii/A.D.) άκούσας ὁ νοηράς ἄγνωστον, J. H. S. xix 92 (ii/A.D.) χαίρε μοι, μήτερ γλυκότατη, καὶ φροντίζετε ἡμῶν. Dick\(^5\) has made an exhaustive study of the whole subject and produces parallels from late Greek that show how easily ἐγώ and ἡμῖν were exchanged. The matter can be clarified, I think. To begin with, there is no reason in the nature of things why Paul should not use the literary plural if he wished to do so. He was a man of culture and used to books even if he used the vernacular koine in the main. The late Greek writers did; the papyri show examples of it. G. Milligan (Thess., p. 132) cites Tb. P. 58 (ii/v.c.) εὑρίσκαμεν—εὖρον—βεβούλεμέθα; P. Hib. 44 (iii/v.c.) ἐγράφαμεν—δρῶντες—ἐνίμην; P. Heid. 6 (iv/a.d.) πιστεύειν—γράφω καὶ φλυαρίσσω; and an inscription, possibly a rescript of Hadrian, O. G. I. S 484, λούμεν—[μετεπεμ-]ψάμην—βουλήθεις—ἐδοξεν ἡμᾶς—ἐκδοκιμάσαμεν—ἐπίστευον—ἡγημάνῃ—νομίζω. Besides, Blass\(^6\) admits that we have it in 1 Jo. 1:4, where ἐγράφαμεν does not differ in reality from γράφο of 2:1. But in Jo. 21:24 ὄδημεν probably is in contrast to John, who uses ὦμαι just [Page 407] below. In Jo. 1:14, as certainly in 1:16, others are associated with the writer. The author of Hebrews also uses the singular or plural according to the humour of the moment. Thus πεθοῦμεν—ἕξομεν (13:18) and the next verse παρακαλῶ—ἀποκατασταθῶ. Cf. also 6:1, 3, 9, 11, with 13:22 f. Now as to Paul. In Ro. 1:5 he has διὶ οὖν ἐλάβομεν χάριν καὶ ἀποστολὴν. Surely he is talking of no one else when he mentions ἀποστολὴν. Blass\(^1\) overlooks this word and calls attention to χάριν as applicable to all. Then again in Col. 4:3 ἡμῖν is followed in the same verse by ἀδέξαμα. It is clear also in 1 Th. 2:18, ἡθελήσαμεν—ἔγὼ μὲν Παύλος. But what really settles the whole matter\(^2\) is 2 Cor. 10:1–11:6. Paul is here defending his own apostolic authority where the whole point turns on his own personality. But he uses first the singular, then the plural. Thus παρακαλῶ (10:1), θαρρῶ, λογίζομαι (10:2), στρατευόμεθα (10:3), ἡμῖς (10:7), καυχήσομαι, αἰσχροθάπομαι (10:8), δόξω (10:9), ἔσμεν (10:11), καυχησόμεθα (10:13), etc. It is not credible that here Paul has in mind any one else than himself. Cf. also 2 Cor. 2:14–7:16 for a similar change from singular to plural. The use of the literary plural by Paul sometimes does not, of course, mean that he always uses it when he has a plural. Each case rests on its own merits. Jesus seems to use it also in Jo. 3:11, ὁ οὖν ὁ λαλοῦμεν καὶ ὁ ἐφαρμὸς μαρτυροῦμεν. In Mk. 4:30 (πῶς

(b) SUBSTANTIVE AND ADJECTIVE. The concord between adjective and substantive is just as close as that between subject and verb. This applies to both predicate and attributive adjectives. Here again number is confined to the singular and the plural, for the dual is gone. Cf. in lieu of the dual the curious καρφόν καὶ καρφοὺς καὶ Ἰμανου καρφῶ (Rev. 12:14). When adjectives and participles deviate from this accord in number or gender (Eph. 4:17 f.; 1 Cor. 12:2; Rev. 19:14), it is due to the sense instead of mere grammar, κατὰ σύνεσιν. Thus in Mk. 9:15 we have ὁ δύχος ἱδώντες, Ac. 3:11 συνέδραν πάντας ὁ λαὸς ἐκθαμβοῦντος, Lu. 2:13 στρατιάσεως ἀνούστων, Mk. 8:1 ὁχλοῦ ὄντος καὶ μὴ ἐχόντων (note both), Ac. 21:36 πλῆθος κράζοντες, etc. Cf. ὁ δύχος ἔπαρσας (Jo. 7:49). In Ph. 2:6 τὸ ἐναὶ ἱσα θεοῦ the plural adjective differs little from ἰσον in adverbial sense. Cf. ταῦτα τί ἐστιν ἐλές τοσούτως (Jo. 6:9), τί ἢ ἐλ ταῦτα (Lu. 15:26).

[Page 408] (c) REPRESENTATIVE SINGULAR. But other points come up also about the number of the substantives. One is the use of the singular with the article to signify the whole class. The examples are frequent, such as ὁ ἄγαθος ἄνθρωπος (Mt. 12:35), σημεῖα τοῦ ἡπτοστόλου (2 Cor. 12:12), ὁ ἐργατης (Lu. 10:7), τοῦ Ἰουδαίου (Ro. 3:1), τὸν πτωχὸν (Jas. 2:6). This discussion about the number of nouns could more properly be treated under syntax of nouns, but I have no such chapter. Cf. Cases.

(d) IDIOMATIC PLURAL IN NOUNS. Abstract substantives occur in the plural in the N. T. as in the older Greek, an idiom foreign to English. Thus πλασιοῦσιν (Mt. 7:22), προσωποληθευμένος (Jas. 2:1). Cf. also ὁνοι Mt. 15:19; τὰς πυρείς 1 Cor. 7:2. In 2 Cor. 12:20 and 1 Pet. 2:1 both the singular and the plural occur in contrast. This use of the plural of abstract substantives does indeed lay stress on the separate acts. Some words were used almost exclusively in the plural, or at any rate the plural was felt to be more appropriate. So αἰῶνες in the sense of ‘world’ (Heb. 1:2) or ‘eternity,’ as ἐλὲς τοὺς αἰῶνας τῶν αἰῶνων (Gal. 1:5), or with singular and plural, as τοῦ αἰῶνος τῶν αἰῶνων (Eph. 3:21). Cf. also τὸ ἄγιον for ‘the sanctuary’ (Heb. 8:2) and ἄγιον ἄγιων for ‘the most Holy Place’ (Heb. 9:3). The word οὐρανός is used in the singular often enough, and always so in the Gospel of John, as 1:32, but the plural is common also. Cf. Paul’s allusion to “third heaven” (2 Cor. 12:2), an apparent reflection of the Jewish idea of seven heavens. In English we use “the heavens” usually for the canopy of sky above us, but ἡ βασιλεία τῶν οὐρανῶν uniformly in the N. T., as Mt. 3:2. The Hebrew מַעָלִים is partly responsible for οὐρανοί. The so-called “plural of majesty” has an element of truth in it. For further details see Blass, Gr. of N. T. Gk., p. 83. A number of other words have this idiomatic plural, such as ἐκ δεξιῶν, ἔξ ὄριστερῶν, ἔξ εὐθυνόμων (Mt. 25:33), εἰς τὸ δεξιᾶ μέρη (Jo. 21:6), ἐν τοῖς δεξιοῖς (Mk. 16:5), ἀπὸ ἀνατολῶν (Mt. 2:1), ἀπὸ δυσμῶν (Mt. 8:11), θυραί (Ac. 5:19), πύλαι (Mt. 16:18), κόλποι (Lu. 16:23). But the singular of some of them is also found, as ἐν τῇ ἀνατολῆ (Mt. 2:9), ἐν δεξιᾷ (Eph. 1:20), πρὸ τῆς θύρας (Ac. 12:6). The plural of ὑμάτων seems to mean only ὑμάτων (not γίτων also) in Jo. 19:23 (cf. 19:2). For the plural ἀλμάτα (not ἀλμάτων) note Jo. 1:13. The names of feasts are often plural, such as τὰ ἐγκαίνια (Jo. 10:22), τὰ γενέσια (Mt. 6:21), τὰ ὄξωμα (Mk. 14:1), γάμοι (Mt. 22:2), σάββατα (Ac. 17:2). So also some cities have plural names, as Ἰεροσόλυμα (Mt. 2:1), Ἀθῆναι (Ac. 17:16),
KOLOSSAI (Col. 1:2). Different are ἔπιστολαι (1 Cor. 16:3), [Page 409] τὰ ἄργυρια (Mt. 27:5), τὰ ὀψώνια (Lu. 3:14), διαθήκαι (Ro. 9:4).

(e) IDIOMATIC SINGULAR IN NOUNS. On the other hand the singular appears where one would naturally look for a plural. A neuter singular as an abstract expression may sum up the whole mass. Thus πᾶν ὁ in Jo. 6:37 refers to believers. Cf. also Jo. 17:2. The same collective use of the neuter singular is found in τὸ ἔξαττον (Heb. 7:7). So not τὸ γεγεννόμενον (Lu. 1:35) but πᾶν τὸ γεγεννημένον (1 Jo. 5:4). The same concealment of the person is seen in τὸ κατέχον οἰδάτε (2 Th. 2:6). The neuter plural indeed is very common in this sense, as τὰ μωρά, τὰ ἄσθενι, etc. (1 Cor. 1:27 f.). Then again the singular is used where the substantive belongs to more than one subject. So πεπωρωμένην ἔχετε τὴν καρδίαν (Mk. 8:17), ἔθεντο ἐν τῇ καρδίᾳ αὐτῶν (Lu. 1:66), ἔχεσαν ἐπὶ πρόσωπον αὐτῶν (Mt. 17:6), περιζωσάμενοι τὴν ὀσφύν ὑμῶν (Eph. 6:14), ἐξόθη αὐτοίς στολῆ λευκῆ (Rev. 6:11), ἄνδρό προσώπου τῶν πατέρων (Ac. 7:45), διὰ στόματος πάντων (Ac. 3:18), ἐκ τῆς χειρὸς αὐτῶν (Jo. 10:39). In 1 Cor. 6:5, ἀνὰ μέσον τοῦ ἄδελφου, the difficulty lies not in μέσον, but in the singular ἄδελφου. The fuller form would have been the plural or the repetition of the word, ἄδελφοι καὶ ἄδελφοι. In all these variations in number the N. T. writers merely follow in the beaten track of Greek usage with proper freedom and individuality. For copious illustrations from the ancient Greek see Gildersleeve, Greek Syntax, pp. 17–59.1

(f) SPECIAL INSTANCES. Two or three other passages of a more special nature call for comment. In Mt. 21:7 (Ἐπεκάθισεν ἔπανω αὐτῶν) it is probable that αὐτῶν refers to τὰ ιμάτια, not to τὴν ὄνον καὶ τὸν πῶλον. In Mt. 24:26 ἐν τῇ ἐρήμῳ and ἐν τοῖς ταμείοις are in contrast. In Mt. 27:44 οἱ λῃσταὶ is not to be taken as plural for the singular. Probably both reproached Jesus at first and afterwards one grew sorry and turned on the other, as Lu. 23:39 has it. In Mt. 22:1 and Mk. 12:1 ἔπεσαν ἐν παραβολαῖς is followed by only one parable, but there were doubtless others not recorded. In Mt. 9:8, ἐδόξασαν τὸν θεὸν τὸν δόντα ἔξωσίαν τοιαύτῃ τοῖς ἄνθρωποις, we have a double sense in δόντα, for Jesus had the ἔξωσίαν in a sense not true of ἄνθρωποις who got the benefit of it. So in Ac. 13:40 τὸ εἴρημένον ἐν τοῖς προφήταις is merely equivalent to ἐν βιβλίῳ τῶν προφητῶν (Ac. 7:42). On these special matters see Winer-Schmiedel, p. 251. Cf. χερουβείν (Aramaic dual) and κατασκιάζοντα (Heb. 9:5).

[Page 410] VIII. Concord in Gender. Here we deal only with nouns, for verbs have no gender. But gender plays an important part in the agreement of substantive and adjective.

(a) FLUCTUATIONS IN GENDER. The whole matter is difficult, for substantives have two sorts of gender, natural and grammatical. The two do not always agree. The apparent violations of the rules of gender can generally be explained by the conflict in these two points of view with the additional observation that the grammatical gender of some words changed or was never firmly settled. All the constructions according to

---

Winer-Schmiedel WINER-SCHMIEDEL, Winer’s Grammatik des neusten. Sprachidioms. 8. Aufl. (1894—).
sense are due to analogy (Middleton in *Syntax*, p. 39). For further general remarks on
gender see chapter on Declensions. In Ac. 11:28 Luke has λύμον мегάλην, not μέγαν.
In Rev. 14:19 two genders are found with the same word, ἔβαλεν εἷς τὴν ληνὸν τοῦ
θημοῦ τοῦ θεοῦ τὸν μέγαν. Cf. Lu. 4:25 and 15:14. The papyri vary also in the gender
of this word (Moulton, *Prol.*, p. 60). The common gender of θεός (Ac. 19:37, cf. θεόν
19:27) and similar words is discussed in the chapter on Declensions. In Rev. 11:4 αἱ
ἐστῶτες skips over λυγνία curiously\(^1\) and goes back (the participle, not the article) to
οὕτωι (οὐτοὶ εἶσιν αἱ δύο ἔλαβαν καὶ αἱ δύο λυγνία αἱ ἐνώπιον τοῦ κυρίου τῆς γῆς
ἐστῶτες). But more about the Apocalypse later. In Mk. 12:28, ποία ἔστιν ἐντολή
πρώτη πάντων, Winer (Winer-Thayer, p. 178) thinks that πασῶν would be beside the
point as it is rather the general idea of omnium. Is it not just construction κατὰ
σόνεσιν? In Ph. 2:1 εἰ τις σπλάχνα is difficult after εἰ τι παραμῦθων and εἰ τις
κοινονία. Blass\(^2\) cuts the knot boldly by suggesting εἰ τι in all the examples here
which Moulton\(^3\) accepts with the sense of *si quid valet*, but he cites papyri examples
like ἐπὶ τι μιάν τῶν …οἰκίων, Par. P. 15 (ii/b.c.); εἰ δὲ τι περισσοῦ γράμματα, B.U.326
(ii/a.d.). See also ἐδὲ δὲ τι ἄλλα ἀπαιτηθῶμεν, Amh. Pap. II, 85, 11, and ἐδὲ δὲ τι
correction may be right or the text may be corrupt. The scribe could easily have
written τις for τινα because of the preceding examples. A nodding scribe may even
have thought σπλάχνα feminine singular. But what is one to say of ἡ οὐαί in Rev.
9:12; 11:14? Shall we think\(^4\) of θλίψις or ταλαιπωρία? In Mt. 21:42 (Mk. 12:11),
παρὰ κυρίου ἐγένετο αὐτῇ καὶ ἔστιν [Page 411] θαμαστῇ, we may have a translation
of the Hebrew ἠνίκι (Ps. (117) 118:23), for οὗτος is used just before in reference to
λίθον. Τοῦτο would be the Greek idiom for αὐτῇ. It is even possible that αὐτῇ may
refer to κεφαλὴν γονίας. So also τῇ Βάαλ in Ro. 11:4 comes from the LXX (Jer. 2:8;
2:28; 7:9; Hos. 2:8). Cf. τῇ Βααλ τῇ διμάλει in Tobit 1:5 B. See Declensions for
further remarks.

(b) *THE NEUTER SINGULAR.* This is not always to be regarded as a breach of
gender. Often the neuter conveys a different conception. So in the question of Pilate,
tί ἔστιν ἀλήθεια? (Jo. 18:38). Cf. also τί οὖν ὁ νόμος; (Gal. 3:19), τί ἔστιν ἄνθρωπος;
(Heb. 2:6), τί ὅ τε ταύτα; (Lu. 15:26), εἰ δοκεῖ τις εἶναι τι μηδὲν ὄν; (Gal. 6:3). But
on the other hand note εἶναι τινα (Ac. 5:36), αὐτῇ ἔστιν ἡ μεγάλη ἐντολή (Mt. 22:38),
tίς ἡ πρόσληψις; (Ro. 11:15), τίς ἔστιν ἡ ἐλπίς; (Eph. 1:18). In particular observe τί
ὁ Πέτρος ἐγένετο (Ac. 12:18) and οὗτος δὲ τι (Jo. 21:21). Cf. also τοῦτο χάρις (twice)

———, *The Doctrine of the Greek Article* (1855).

1 But Moulton (Cl. Rev., Apr., 1904, p. 151) cites from the pap. numerous false
gender concords like τὴν πεπτωκότα, etc. Cf. Reinhold, *De Graec. etc.*, p. 57;
2 Gr. of N. T. Gk., p. 81.
3 *Prol.*, p. 59.
4 W.-Sch., p. 255.
in 1 Pet. 2:19 f., where τούτο is predicate and really refers to εἱ ὑποφέρει τις καὶ εἱ ὑπομενεῖτε. Cf. also ἡ ψυχὴ πλέον ἔστιν τῆς τροφῆς (Lu. 12:23). Indeed τοῦτο may be the predicate with persons, as ταῦτα τινες ἦτε (1 Cor. 6:11). The neuter adjective in the predicate is perfectly normal in cases like ἰκανὸν τῷ τοιούτῳ ἢ ἐπιτιμία ἄῤῥητο (2 Cor. 2:6). So also ἄρκετον τῇ ἡμέρᾳ ἢ κακία ἄῤῥητς (Mt. 6:34). Cf. also the reading of D ἀρεστὸν in Ac. 12:3. Blass¹ treats ἄρκετον above and ἰκόνων ἔστιν in Lu. 22:38 as like the Latin satis. The neuter singular in the collective or general sense to represent persons is not peculiar to the N. T. So τὸ κατέχειν (2 Th. 2:6), πἀν ὃ (Jo. 17:2), τὸ ὀπολολόγος (Luk. 19:10), etc. So the neuter plural also as τὰ μορὰ τοῦ κόσμου, τὰ ὀφθαλμῆ (1 Cor. 1:27). The neuter article τὸ Ἀγαρ (Gal. 4:25) deals with the word Hagar, not the gender of the person. In Jas. 4:4 μοιχαλίδες W. H. stands without μοιχαλὸ καί, but none the less may be regarded as comprehensive.² Cf. γενέα μοιχαλίς (Mt. 12:39) and Hos. 2:4, 23. In 1 Cor. 15:10 note εἰμὶ ἐμ, not δε, a different idea.

(c) Explanatory ὃ ἔστιν and τοῦτο ἔστιν. A special idiom is the relative ὃ as an explanation (ὅ ἔστιν) and the demonstrative τοῦτο ἔστι, which are both used without much regard to the gender (not to say number) of antecedent or predicate. Thus in Mk. 3:17 ὅνυμα Θεονηργεῖς, ὃ ἔστιν υἱὸ βροντῆς; 12:42 λεπτὰ ὃ ὁ ἔστιν κοδράντες; 15:16 τῆς ἀβύθης, ὃ ἔστιν κρατίον ἐρωτόριον; 15:22 Γολγοθάν τόπον, ὃ ὁ ἔστιν κρανίου τόπος (cf. Mt. 27:33); ῥαββεῖ, ὃ λέγεται (Jo. 1:38); 1:42 Μεσσιάν ὃ ἔστιν; Col. 3:14 τὴν ὀγάπην, ὃ ἔστιν σύνδεσμος; [Page 412] Eph. 6:17 μάχαιραν, ὃ ἔστιν ῥῆμα θεοῦ. Blass¹ observes that it is only in the Apocalypse that this explanatory relative is assimilated to the antecedent or predicate, as λαμπάδες, ὃ ἔστιν τὰ πνεύματα (Rev. 4:5), but ῥηθαλμοὺς ἔστιν, ὃ ἔστιν τὰ πνεύματα (5:6). But it is otherwise with the ordinary relative, as ὁ ναὸς τοῦ θεοῦ, ὁ ἔστιν ὁ ἴππα (1 Cor. 3:17); Φιλίσπους, ἦτις ἔστιν πρώτη πόλις (Ac. 16:12); ὑπὸ τῶν ἄντικειμένων, ἦτις ἔστιν αὐτὸς ἐνδειξὶς ὄπωλείας (Ph. 1:28); ἐν ταῖς ὀλίγες ὑμῖν ὑπὲρ ὑμῶν, ἦτις ἔστιν δόξα ὑμῶν (Eph. 3:13). The use of τοῦτο ἔστιν is a common idiom in the later Greek (less so in the older) and is exactly equivalent to the Latin id est and has no regard to case, number or gender. So Ἐλαὶ—τοῦτο ἔστιν θεῖον μου (Mt. 27:46); τοῦτο ἔστιν τοὺς ἄδελφους (Heb. 7:5). Cf. Heb. 2:14; 9:11, etc. See further p. 399, and ch. XV, VII, (d), 10.

(d) The Participle. It often has the construction κατὰ σύνεσιν, as in Mk. 9:26, κράζεις καὶ πολλὰ σπαράξας referring to τὸ πνεῦμα. Cf. Lu. 2:13 στρατιῶς αλυόντων; πλῆθος κράζοντες (Ac. 21:36); βοῶντες (25:24). But on the other hand note ἄναστῶν πλῆθος (Lu. 23:1). So also in 1 Cor. 12:2 ἐδὸν ἀπαγόμενοι; Eph. 4:17 f. ἐδὸν ἐσκοτομένοι; Rev. 4:8 ζῷα, ἐν καθατοῦν, ἐν ἔχον λέγοντες; 11:15 φωνὼν μεγάλα λέγοντες (cf. φωνὴν λέγοντα, Rev. 9:14); 19:14 στρατευόμενα ἐνδεδυμένοι. Cf. ἡρίων γεμοῦντα (Rev. 17:3). Winer (Winer-Thayer, p. 526) takes ἐσκοτομόναι in Eph. 4:18 with ὑμᾶς. Cf. also πλῆθος φέροντες (Ac. 5:16). Cf. Lu. 19:37. So (οἱ ἐκκλησία) ἀκούοντες (Gal. 1:22 f.). But in Rev. 21:14 τὸ τέλος ἔχον seems a mere slip. But ἔχον—ἔχουν (Rev. 4:7) may be mere confusion in sound of ἔχον and ἔχουν. See also

1 Gr. of N. T. Gk., p. 76.
2 Cf. W.-Sch., p. 254.
1 Gr. of N. T. Gk., p. 77.
(e) Adjectives. The question of an adjective's using one form for more than one gender has already been discussed at length in the chapter on Declensions. Thus στρατιάς οὐρανίου (Lu. 2:13) is not a breach of concord, for οὐρανίου is feminine. If masculine and feminine are used together and the plural adjective or participle occurs, the masculine, of course, prevails over the feminine when persons are considered. Thus ἦν ὁ πατὴρ αὐτοῦ καὶ ἡ μήτηρ θαυμαζόντες (Lu. 2:33). So also Ἀγρίππας καὶ Βερνίκη ἰσπασάμενοι (Ac. 25:13) and even with the disjunctive ἃ, as ἀδελφός ἃ ἀδελφὴ γυμνοί (Jas. 2:15). In Rev. 8:7 the neuter plural is used of two nouns (one feminine and one neuter), χάλαζα καὶ πῦρ μεμιγμένα. Cf. φθαρτοῖς, ἄργυρῳ ἃ χρυσῷ (1 Pet. 1:18), same gender. So ποικίλως νόσοις καὶ βασάνοις (Mt. 4:24), πάσης ἀρχῆς καὶ [Page 413] ἐξουσίας (Eph. 1:21), etc. Thus we may note πόλεις ἀοιδία μερισθεῖσα (Mt. 12:25), the same gender. But when different genders occur, the adjective is usually repeated, as in ποταποί λίθοι καὶ ποταποὶ οἴκοδομαί (Mk. 13:1), πάσα δόσις καὶ πάν ἀλίμα (Jas. 1:17), οὐρανὸν καὶνὸν καὶ γῆν καινὴν (Rev. 21:1), etc. There is emphasis also in the repetition. But one adjective with the gender of one of the substantives is by no means uncommon. Thus in Heb. 9:9, δώρα τε καὶ θυσίαι μὴ δυνάμεναι, the last substantive is followed, while in Heb. 3:6, ἔδω ἦν παρρησία καὶ τὸ καῦχημα μέχρι τέλους βεβαιὰν κατάσχωμεν, the first rules in gender.1 Per contra note ὡς ὁ ἡσυχασμένος ἰδρύει Rev. 12:5. Radermacher (N. T. Gr., p. 86) cites φυλε τέκνον from the Iliad, XXII, 84.

**IX. Concord in Case.** This is not the place for the syntax of the cases. That matter belongs to a special chapter.

(a) Adjectives. They concur in the case of the substantive with which they are used. The variations are either indeclinable forms like πλήρης2 in Jo. 1:14 (agreeing with αὐτοῦ or δόξαν) or are due to anacoluthon, as Jas. 3:8 τὴν ἐγκώμισαν οὐδείς δυσμέναι δύναται ἄνθρωπον· ἀκατάστατον κοκκόν, μεστῇ Ἰού (so W. H. punctuate).

(b) Participles. They lend themselves readily to anacoluthon in case. Thus ἔδοξε τοῖς ἀποστόλοις καὶ τοῖς πρεσβυτέροις, γράψαντες (Ac. 15:22 f.). See Mk. 7:19 καθαρίζων. Mk. 6:9 has ὑποδεικνύοντος, whereas before we have αὐτοῖς and ἀλλοις, but W. H. read ἐνδόξασα (Nestle, ἐνδόξασθε). In Mk. 12:40, οἱ κατέσθοντες καὶ

---

2 The exx. of this indecl. use of πλήρης are abundant in MSS. of the N. T., occurring in most passages of the N. T. See Blass, Gr. of N. T. Gk., p. 81. The pap. confirm the N. T. MSS. See Moulton, Prol., p. 50. See ch. VII, 2, (f), of this book, for details. Nestle

———, Novum Testamentum Graece. 8th ed. (1910).
προσευχόμενοι, we have a nominative in apposition with the ablative ὑπὸ τῶν γραμματέων τῶν θελόντων. In Ph. 3:18 f. τοὺς ἐχθρούς is in agreement with the case of οὗς, while οἱ φρονοῦντες below skips back to πολλοί. Sometimes, as in ἐπιστεύθησαν τὰ λόγια (Ro. 3:2), the substantive will make sense as subject or object of the verb. In Heb. 9:10 δικαίωμα—ἐπικείμενα in apposition with θυσία skips over the parenthetical clause between. Cf. also perhaps ἄρξάμενοι (Lu. 24:47), ἄρξάμενος (Ac. 1:22. Cf. Lu. 23:5), ἄρξάμενος (Ac. 10:37). Note this idiom in Luke’s writings.

(c) THE BOOK OF REVELATION. It is full of variations (solecisms) from case-concord, especially in appositional clauses. Thus in Rev. 7:9 after ἰδοῦ, καὶ ἴδοι we first have the nominative [Page 414] with ἰδοῦ and then the accusative with ἱδοῦ.

Thus ὁ μάρτυς (Rev. 1:5) retains the nominative rather than the ablative ὁ Ἰησοῦν Χριστόῦ, whereas in 11:18 τοὺς μικροὺς is in apposition with the dative τοῖς δουλοῖς, κτλ. Cf. 20:2 where ὁ δορὶς (text, marg. acc.) is in apposition with the accusative τοῦ δρᾶκοντα. The papyri show the idiom. Cf. τοῦ ἀδέλφου—ὁ διάτοχος (=διαδ.) in Letr. 149 (ii/A.D.), Ἀντιφίλου Ἐκλήσι—Ἰππάρχης in B.G.U. 1002 (i/b.c.). Cf. Moulton, Prolo., p. 60. The Apocalypse is thus by no means alone. See also παρὰ τῷ Ποστίουμου τῶν εὐρόντα B.G.U. 846 (ii/A.D.), Ἦκουσα Τοῦ ἡγέγοντος Π. Par. 51 (B.C. 160), ἕνεκεν ἔλεγον Παρ. ib. In particular the participle is common in the nominative in the Apocalypse. In the case of ὁ ὁ ὁν καὶ ὁ θεός ἐν θεῷ the nominative is evidently intentional to accent the unchangeableness of God (1:4). Cf.

this formula in 1:8; 4:8; 11:17; 16:5. ὁ νικῶν occurs as a set phrase, the case being expressed by αὐτός which follows. So in 2:26 αὐτῷ (πηρῶν also); 3:12 αὐτόν, 21 αὐτῷ. But in τῷ νικῶν τῷ δόκῳ αὐτῷ 2:7, 17, the case is regularly in the dative without anacoluthon. The wrong case appears with ἔχον in 1:16 (almost separate sentence) if it is meant to refer to αὐτῷ or gender if φονί; 9:14 (ὁ ἔχον in apposition with ἐγγέλῳ); 10:2 ἔχον (sort of parenthesis, cf. 1:16); 14:14 ἔχον (loosely appended); 19:12 (loose connection of ἔχον). In 5:6 and 17:3 ἔχον has wrong gender and case. This participle seems to be strung on loosely generally, but in 21:11 f. the proper case and gender occur. Cf. also ἡ λέγονσα (2:20) and λέγον (14:7). In 14:21 ὁ προδότης is a loose addition like ἡ καταβαίνουσα (3:12). More difficult seems ἐν καμίνῳ πεπομμένης (1:15), margin πεπομμένοι. In 19:20 ἡ λήμνη τοῦ πυρὸς τῆς καυσίμης the participle agrees in gender with ἡ λήμνη and in case with πυρός.

Radermacher (N. T. Gr., p. 86) cites ἄπεξίον παρὰ αὐτοῦ τὸν ὁμολογοῦντα (Amh. Pap. II, 111 to 113, where regularly the accusative of a participle is in apposition with a genitive or ablative). He gives also Oxy. P. I N 120, 25, oú δέδοκται γὰρ ἦμιν ἔχειν τὸ ἀστυνοοῦντας: Flinders-Pet. Pap. III 42 C (3) 3, ἀδικοῦμενον ὑπὸ Ἀπολλώνιον ἐμβάλλουν. Dittenberger (Or. inscr. 611) gives Σβαστοῦ and υἱὸς in apposition. But the point of difficulty in the Revelation of John is not any one isolated discord in case or gender. It is rather the great number of such violations of concord that attracts

———, Septuagint (Hastings’ D. B., 1902).

attention. As shown above, other books of the N. T. show such phenomena. Observe especially Luke, who is a careful writer of education. Note also Paul in Ph. 1:30 where ἐχοντες (cf. this word in Rev.) is used with ὑμῖν, and 2 Cor. 7:5 ἡµῶν—02.ιβόµενοι. Similar discords occur in the LXX, as in Jer. 14:13; Dan. 10:5–7; 1 Macc. 13:16; 1 Macc. 15:28; and indeed occasionally in the very best of Greek writers. The example in 1 Macc. 13:16 (λαὸν λέγοντες) is worth singling out for its bearing on both case and number. Nestle (Einfl. in das griech. N. T., p. 90 f.) notes the indeclinable use of λέγων and λέγοντες in the LXX, like ἐρηµί. Cf. Nestle, Phil. Sacra., p. 7. See also Thackeray, Gr., p. 23. One must not be a slavish martinet in such matters at the expense of vigour and directness. The occasion of anacoluthon in a sentence is just the necessity of breaking off and making a new start. But the Apocalypse demands more than these general remarks. Winer (Winer-Thayer, p. 534) calls attention to the fact that these irregularities occur chiefly in the description of the visions where there would naturally be some excitement. Moulton1 argues from the fact that the papyri of uneducated writers show frequent discord in case that John was somewhat backward in his Greek. He speaks of “the curious Greek of Revelation,” “the imperfect Greek culture of this book.” He notes the fact that most of the examples in both the papyri and Revelation are in apposition and the writer’s “grammatical sense is satisfied when the governing word has affected the case of one object.”2 Moulton3 cites in illustration Shakespeare’s use of “between you and I.” This point indeed justifies John. But one must observe the comparative absence of these syntactical discords in the Gospel of John and the Epistles of John. In Ac. 4:13 both Peter and John are called ἄγραµµατοι καὶ ἱσόµηται. This need not be pushed too far, and yet it is noteworthy that 2 Peter and Revelation are just the two books of the N. T. whose Greek jars most upon the cultured mind and which show most kinship to the κοινὴ in somewhat illiterate papyri. One of the theories about the relation between 1 Peter and 2 Peter is that Silvanus (1 Pet. 5:12) was Peter’s scribe in writing the first Epistle, and that thus the Greek is smooth and flowing, while in 2 Peter we have Peter’s own somewhat uncouth, unrevised Greek. This theory rests on the assumption of the genuineness of 2 Peter, which is much disputed. So also in Acts Luke refines Peter’s Greek in the reports [Page 416] of his addresses. Now in Jo. 21:24 we seem to have the comment of a brother (or several) on the Gospel of John which he has read and approved. Moulton1 naturally suggests the hypothesis that the Gospel and Epistles of John had the smoothing hand of this brother of culture (perhaps in Ephesus), while in the Apocalypse we have John’s own rather uncultured Greek. One may add to this the idea of Winer about possible excitement and passion due to the great ideas of the book. In the Isle of Patmos John, if still there, would have little opportunity for scholarly help and the book may have gone out unrevised. There are other theories, but this matter of authorship is not the grammarians’ task. (d) Other Peculiarities in Apposition. Further examples of apposition call for illustration. Thus in 1 Jo. 2:25, αὕτη ἔστιν ἡ ἐπαγγελία, ἡν αὐτοῦ ἐπηγγείλατο ἡµῖν,
In the case of the relative (because nearer) and not in that of the antecedent. Then again in Jo. 1:38 ἐνσῆναι is explained as διδάσκαλε, vocative in the predicate (cf. also 20:16), while in 1:41 Μεσσήναν is naturally interpreted as Χριστός. In Jo. 13:13 ὁ διδάσκαλος is in apposition with με where we would use quotation-marks. But this passage needs to be borne in mind in connection with Revelation. In 1 Cor. 16:21, τῇ ἐν Χειρὶ Παύλου, note the genitive in apposition with the possessive pronoun ἐν according to the sense of the possessive, not its case. Once more the common use of the genitive of one substantive in practical apposition has already been noted in this chapter, III, (c), 5, Apposition. Thus ἣ ἐφρη τῶν ἀγώνων (Lu. 22:1). The use of τοῦτο ἐστὶν with any case has already been alluded to under Gender. Note Mk. 7:2; Ac. 19:4; Ro. 7:18; Phil. 12; 1 Pet. 3:20; Heb. 9:11; 11:16, etc. In αὐτὸς σωτῆρ τοῦ σώματος (Eph. 5:23) αὐτός gives emphasis to the apposition. Inverse attraction of antecedent to case of the relative (see Pronouns) is really apposition.

(e) THE ABSOLUTE USE OF THE CASES (nominative, genitive, ablative and accusative). These will receive treatment in the chapter on Cases. Some of the peculiar nominatives noted in Revelation are the nominativus pendens, a common anacoluthon. Cf. ταῦτα ὁ θεορεῖτε (Lu. 21:6), ὁ νικῶν καὶ ὁ νικηθὼν (Rev. 2:26). The parenthetic nominative is seen in Jo. 1:6, ὄνομα αὐτῷ Ἰωάνης, where Ἰωάνης might have been dative. But here merely the mention of the fact of the absolute use of the cases is all that is called for.2

(a) FREEDOM FROM RULES. The freedom of the Greek from artificial rules and its response to the play of the mind is never seen better than in the order of words in the sentence. In English, since it has lost its inflections, the order of the words in the sentence largely determines the sense. Whether a substantive is subject or object can usually be seen in English only thus, or whether a given word is verb or substantive, substantive or adjective. Even the Latin, which is an inflectional tongue, has much less liberty than the Greek. We are thinking, of course, of Greek prose, not of poetry, where metre so largely regulates the position of words. The N. T. indeed enjoys the same freedom that the older Greek did with perhaps some additional independence from the vernacular κοινή as contrasted with the older literary language. The modern Greek vernacular has maintained the Greek freedom in this respect (Thumb, Handb., p. 200). The Semitic tongues also have much liberty in this matter. In English it is common to see words in the wrong place that make absurd bungles, as this, for instance: “The man rode a horse with a black hat.” In Greek one may say φιλεῖ ὁ πατὴρ τὸν ιοῦ, ὁ πατὴρ φιλεῖ τὸν ιοῦν or φιλεῖ τὸν ιοῦν ὁ πατὴρ, according to the stress in the mind of the speaker.2

(b) PREDICATE OFTEN FIRST. In Greek prose, where the rhetorical element has less play, the predicate very commonly comes first, simply because, as a rule, the predicate is the most important thing in the sentence. Thus μακάριοι οἱ πτωχοὶ τῷ

1 Blass, Gr. of N. T. Gk., p. 287.
ἐκλογήμενη σύ ἐν γυναιξίν (Lu. 1:42), ἐγένετο δὲ (Lu. 2:1), καὶ ἐπορεύοντο (2:3), ἀνέβη δὲ (2:4), etc. But this is true so often, not because of any rule, but simply because the predicate is most frequently the main point in the clause. Blass\(^3\) even undertakes to suggest a tentative scheme thus: predicate, subject, object, complementary participle, etc. But Winer\(^4\) rightly remarks that he would be an empirical expositor who would insist on any unalterable rule in the Greek sentence save that of spontaneity.

\((c)\) Emphasis. This is one of the ruling ideas in the order of words. This emphasis may be at the end as well as at the beginning of the sentence, or even in the middle in case of antithesis. The emphasis consists in removing a word from its usual position to an unusual one. So ἅλικόν γὰρ ὑπήρχον ὑδώρ (Jas. 3:12). Thus [Page 418] in Lu. 1:12 we have καὶ φῶς ἔκπεπεσεν ἐπὶ αὐτὸν, but in Ac. 19:17 καὶ ἔκπεπεσεν φῶς ἐπὶ πάντας αὐτοὺς. Sometimes the words in contrast are brought sharply together, as in Jo. 17:4, ἐὰν σε ἔδοξασα, and 17:5, νῦν δὲσας ὑμῖν. So ὑμῶν ἔμοι Lu. 10:16. Note also the intentional position of ὁ πατριάρχης in Heb. 7:4 ὁ δὲκατάν Ἀβραὰμ ἔδωκεν ἐκ τῶν ἁκροθηνίων, ὁ πατριάρχης. So also in 1 Pet. 2:7, ὑμῖν ζῆν ἀπὸ τος πιστεύσοντοι, note the beginning and the end of the sentence. This rhetorical emphasis is more common in the Epistles (Paul’s in particular) than in the Gospels and Acts for obvious reasons. Thus observe the position of σω in Ro. 11:17 and of κάκενοι in verse 23. In Heb. 6:19 ἄσφαλὴ τε καὶ βεβαιαν do not come in immediate contact with ἰγκυρώσων as adjectives usually do. Observe also the emphatic climax in τετελειωμένον at the end of the sentence in Heb. 7:28. Cf. ἥδη—κεῖται in Mt. 3:10. Note the sharpness given to θεοῖ in 1 Cor. 1:17 by putting it first. So 10:5. In 1 Cor. 2:7 θεοῦ σοφίαν throws proper emphasis upon θεοῦ. The position of the subordinate clause varies greatly. It often comes first, as in Lu. 1:1–4.

\((d)\) The Minor Words in a Sentence. In general they come close to the word to which they belong in sense. Thus the adj. is near the subst. and after it. So ὑδώρ ζῶν (Jo. 4:10), διδασκαλέ ἔγαθέ (Mk. 10:17), ζωὴν αἰώνων (ib.). But observe ἄλον ἄνθρωπον ὑπή (Jo. 7:23), both adjs. So also note δι ἄνθρωπον τόπων (Mt. 12:43), καλὸν σπέρμα (Mt. 13:27), ἐξορθός ἄνθρωπος (Mt. 13:28), where the adj. gives the main idea. With the repeated article the adj. has increased emphasis in ὁ ποιμὴν ὁ καλὸς (Jo. 10:11). With πνεῦμα ἄγιον this is the usual order (as Mt. 3:11), but also τὸ ἄγιον πνεῦμα (Ac. 1:8) or τὸ πνεῦμα τὸ ἄγιον (Jo. 14:26). In Ac. 1:5 the verb comes in between the substantive and adjective (ἐν πνεύματι βαπτισθῆσον; ἄγιος) to give unity to the clause. So in Mt. 1:20, ἐκ πνεύματος ἔστιν ἄγιον. Cf. ζωὴν ἐχέτει αἰώνων (1 Jo. 5:13). In Ac. 26:24 note σε συν, τὰ πολλὰ γε σαμώτα εἰς μανίαν περιτρέπει. So also in 1 Cor. 10:4 ἔπιον comes between τό and πόμα. The position of the genitive varies greatly, but the same general principle applies. The genitive follows as in τῶν λόγων τῆς χάριτος (Lu. 4:22), unless emphatic as in τῶν ἀλλοτρίων τῆς φωνῆς (Jo. 10:5). There is sharp emphasis in τῶν ἵππων in Jas. 3:3. A genitive may be on each side of the substantive as in ἡμῶν οἰκία τοῦ σκήνους (2 Cor. 5:1). Sharp contrast may be expressed by proximity of two genitives, as in τῶν συνεστρατιωτῶν μου, ὑμῶν δὲ

\(^{3}\) Gr. of N. T. Gk., p. 287.
\(^{4}\) W.-Th., p. 551.

Sharp SHARP, G., Remarks on the Definitive Article in the Greek of the N. T. (1803).
 IPPROTOLO(Ph. 2:25). There may be some contrast also in σύ μου νίπτεις τούς πόδας (Jo. 13:6). But the personal enclitic [Page 419] pronouns have a tendency to come early in the sentence without emphasis, as πῶς ἦνεφθησάν σου οἱ ὄρθολμοι (Jo. 9:10). Cf. Ἰνα σου προσκυνήσω τὴν χέραν B.G.U. 423 (ii/A.D.). Radermacher (N. T. Gr., p. 90) notes great freedom in the position of the genitive in the Attic authors and in the inscriptions. In the case of ὁ ἄνθρωπος ὁ ὄστος and ὁ ἄνθρωπος ὁ ὄστος one must not look for any fine-spun distinction, though the same general principle of emphasis exists. In the matter of ταύτα πάντα (Lu. 12:30) and πάντα ταύτα (Mt. 6:32) the first word carries the emphasis just as in πᾶς ὁ ὅχλος and ὁ ὅχλος πᾶς. Cf. πάντα τὸ μέλη τοῦ σώματος (1 Cor. 12:12) and οἱ πατέρες ἦμων πάντες (1 Cor. 10:1) with ὁ πᾶς νόμος (Gal. 5:14). Note the common Greek σὺ τίς εἶ (Jo. 8:25). The vocative is often at the beginning of the sentence, as παντρὶ δίκαιε (Jo. 17:25), but not always, as in παρακαλῶ δέ ὑμᾶς, ἄδελφοι (1 Cor. 1:10). In Jo. 14:9 οὐκ ἐγνοκακὸς με, Φίληππε the vocative naturally comes after the pronoun. It comes within the sentence, as ὥ Θεόφιλε (Ac. 1:1), or at either end according as occasion requires. Some set phrases come in formal order, as ἄνδρες ἄδελφοι καὶ πατέρες (Ac. 7:2), like our “brethren and sisters,” “ladies and gentlemen,” etc. Other conventional phrases are ἄνδρας καὶ γυναῖκας (Ac. 8:3), χορῆς γυναικὸν καὶ παιδίον (Mt. 14:21), νύκτα καὶ ἡμέραν (Ac. 20:31), σάρξ καὶ αἷμα (Mt. 16:17), βριόσκες καὶ πόσις (Ro. 14:17), ζώντων καὶ νεκρῶν (Ac. 10:42); τὴν γῆν καὶ τὴν θάλασσαν (Ac. 4:24), ἡλίου καὶ σελήνης (Lu. 21:25), τοῦ οὐρανοῦ καὶ τῆς γῆς (Mt. 11:25), ἔργῳ καὶ λόγῳ (Lu. 24:19), Ὠσίαους τε καὶ Ἐξηναί (Ro. 3:9), δοῦλος οὐδὲ ἐλεύθερος (Gal. 3:28). The adverb generally has second place, as ὑψηλὸν λίαν (Mt. 4:8), but not always, as λίαν γὰρ ἄντεστησ (2 Tim. 4:15). Blass’ notes that Matthew often puts the adverb after imperatives, as καταβάτω νῦν (Mt. 27:42), but before indicatives, as ἔτι ὑποτεUTH (Mt. 19:20), a refinement somewhat unconscious, one may suppose. In general the words go together that make sense, and the interpretation is sometimes left to the reader’s insight. In Eph. 2:3, ἡμεθά τέκνα φίλοι ὄργης, note the position of φίλοι between τέκνα and ὄργης. In Ro. 8:3, κατέκρινε τὴν ὄμαρτίαν ἐν τῇ σαρκί, the adjunct ἐν τῇ σαρκί goes in sense with κατέκρινε, not ὄμαρτίαν. But this matter comes up again under the Article. In Mt. 2:2, ἐδούμεν ὧς αὐτοῦ τὸν ἀστέρα ἐν τῇ άνατολῇ, probably ἐν τῇ άνατολῇ belongs in sense to the subject (‘we being in the east,’ etc.).

(e) EUPHONY AND RHYTHM. It will not do to say that emphasis [Page 420] alone explains every unusual order of words in a Greek sentence. Take Jo. 9:6, for instance, ἐπέθηκεν αὐτῶν τὸν σηλὸν ἐπὶ τοὺς ὄρθολμοι. Here αὐτῶν is entirely removed from ὄρθολμοι and is without particular emphasis. It was probably felt that the genitive of the pronouns made a weak close of a sentence. Observe also Jo. 9:10, σοῦ οἱ ὄρθολμοι (cf. 9:11). Thus also 9:17, 26, 30. Note ἔπεθηκεν αὐτῶν πρὸς τοὺς πόδας (Jo. 11:32) and οὐκ ἦν μου ἄπειθανεν ὁ ἄδελφος (ib.). So σοῦ μου νίπτεις τοὺς πόδας (Jo. 13:6) where some emphasis by contrast may exist in spite of the enclitic form μου. Cf. ὑμῖν ἐμοί in Ph. 3:1 But on the other hand we have ὁ ἄδελφος μου in Jo. 11:21 (cf. 11:23 σοῦ) and τοῦ πατρὸς μου (Jo. 10:18). The tendency to draw the pronouns toward the first part of the sentence may account for some of this

1 Gr. of N. T. Gk., p. 289.
2 Porphyrios Logothetes as quoted by Agnes Lewis Smith in Exp. Times, Feb., 1908, p. 237.
transposition, as in τὰ πολλὰ σε γράμματα εἰς μανιάν περιτρέπει (Ac. 26:24), but the matter goes much beyond the personal pronouns, as in ἐν πνεύματι βαπτισθήσεσθε ἄγω (Ac. 1:5), μικρὸν ἔχεις δόνυμιν (Rev. 3:8), etc. But a large amount of personal liberty was exercised in such trajection of words.1 Is there any such thing as rhythm in the N. T.? Deissmann2 scouts the idea. If one thinks of the carefully balanced sentences of the Attic orators like Isocrates, Lysias and Demosthenes, Deissmann is correct, for there is nothing that at all approaches such artificial rhythm in the N. T., not even in Luke, Paul or Hebrews. Blass3 insists that Paul shows rhythm in 1 Cor. and that the book is full of art. He compares4 Paul with Cicero, Seneca, Q. Curtius, Apuleius, and finds rhythm also in Hebrews which “not unfrequently has a really oratorical and choice order of words.”5 He cites in Heb. 1:4 τοσοῦτον κρείττων γενόμενος τῶν ἄγγελῶν διὰ διαφορώτερον παρὰ αὐτοῦ κεκληρονόμηκαν δόματα; αὐτὰς κεκληρονόμηκαν δόματα; 1:5; 11:32; 12:1, 8, etc. In Greek in general he suggests that lively and animated discourse gives rise to dislocations of words. Now one would think Blass ought to know something of Greek style. But Deissmann will have none of it. He refers Blass to Schramm, who wrote in 1710 of De stupenda eruditione Pauli apostoli and thinks that Blass is wilful and arbitrary in his [Page 421] use and proof of rhythm. On the other hand Sir W. M. Ramsay1 contends that Paul was a better Hellenist in point of culture than some suppose, and knew Greek philosophy and used it. It is after all partly a dispute about terms. If by rhythm one means grace and charm of diction that naturally belong to the expression of elevated ideas under the stress of chastened

passion, surely one would be hypercritical to deny it to 1 Cor. 13 and 15, Ac. 17, Ro. 8 and 12, Eph. 3, Jo. 14–17, Heb. 2 and 11, not to mention many beautiful passages that seem perfect like pearls. At white heat nature often strikes off what is better than anything mere art can do even as to beauty of form and expression. Luke may even have known Thucydidies, and yet one has no right to expect the “niceties of language” in the vernacular which contribute so much to the charm of Plato.” Intonation and gesture in spoken language take the place of these linguistic refinements to a very large extent. It is true that Paul’s “Greek has to do with no school, with no model, but streams unhindered with overflowing bubbling direct out of the heart,” but “yet is real Greek,” as Wilamowitz-Möllendorff remarks. Wilamowitz-Möllendorff does indeed hold that Paul knew little Greek outside of the Greek Bible, but he thinks that his letters are unique in Greek literature. On Paul’s Hellenism see chapter IV, and also G. Milligan, *Epistles to the Thess.*, p. lv. On p. lvi Milligan takes the writer’s view that the “well-ordered passages” and “splendid outbursts” in Paul’s writings are due to natural emotion and instinctive feeling rather than studied art. Bultmann (*Der Stil der Paulinischen Predigt und die Kynisch-stoische Diatribe*, 1910) finds that Paul had the essential elements of the Stoic Diatribe in his argumentative style (question and answer, antithesis, parallelism, etc.). Paul’s art is indeed like that of the Cynic-Stoic Diatribe as described by Wendland, but he does not have their refinement or overpunctiliousness. It is not surprising to find that occasionally N. T. writers show unintentional metre, as is common with speakers and writers of any language. In the Textus Receptus of Heb. 12:13 there is a good hexameter, καὶ τῶν ὁσίων ὁ θάνατος πολλῶν [Page 422] ὑπονοίαν, but the critical text spoils it all by reading ποιετέ. So also one may find two trimeters in Heb. 12:14 f. (οὐ—ἀπὸ), one in Jo. 4:35 (τετραήμονος—ξηρασταί), one in Ac. 23:5 (Ἀρχοντα—κακῶς). Green (*Handbook to the Gr. of N. T. Gk.*, p. 356) cites the accidental English anapæstic line “To preach

the acceptable year of the Lord,” the hexameter “Husbands, love your wives, and be not bitter against them,” and the iambic couplet “Her ways are ways of pleasantness, and all her paths are peace.” But surely no one would call these writers poets because occasional metre is found in their writings. There is an unconscious harmony of soul between matter and form. Paul does indeed quote the Greek poets three times, once an iambic trimeter acataleptus from the comic poet Menander (1 Cor. 15:33) φθειροῡσιν ἦν ὁ θρηστα ὄμωσαν ἔκκαθη, though one anapest occurs (some MSS. have χρησθο); once half an hexameter from Aratus (Ac. 17:28) τοῦ γὰρ καὶ γένος ἐσμεν, and a full hexameter from Epimenides of Crete (Tit. 1:12) κρῆτες ἄναβαινον καὶ καταβαίνοντας. How much more Paul knew of Greek poetry we do not know, but he was not ignorant of the philosophy of the Stoics and Epicureans in Athens. Blass indeed thinks that the author of Hebrews studied in the schools of rhetoric where prose rhythm was taught, such as the careful balancing of ending with beginning, beginning with beginning, or ending with beginning. He thinks he sees proof of it in Heb. 1:1 f., 3, 4 f.; 12:14 f., 24. But here again one is inclined to think that we have rather the natural correspondence of form with thought than studied rhetorical imitation of the schools of Atticism or even of Asianism. We cannot now follow the lead of the old writers who saw many fanciful artistic turns of phrase. Antitheses and parallelisms could be treated here as expressions of rhythm, but they can be handled better in the chapter on Figures of Speech. As a specimen of an early Christian hymn note 1 Tim. 3:16. Harnack (The Independent, Dec. 28, 1912) takes this as a Christmas hymn. Elizabeth (Lu. 1:42–45), Mary (1:46–55) and Zacharias (1:67–79) break forth into poetic strains with something of Hebrew spirit and form. In Eph. 5:14 we have another possible fragment of a Christian hymn. The Lord’s Prayer in Mt. 6:9–13 is given in metrical arrangement by W. H. Cf. Hort, Intr. to N. T. in Gk., p. 319 f. In general on N. T. parallelism see Briggs, Messiah of the Gospels [Page 423] and Messiah of the Apostles. In 1 Cor. 13 one can see the beauty and melody of a harmonious arrangement of words. See also the latter part of 1 Cor. 15.

(f) PROLEPSIS is not uncommon where either the substantive is placed out of its right place before the conjunction in a subordinate clause like τὴν ἀγάπην Ἰνα γνῶτε (2 Cor. 2:4) and βιωτικά κριτήρια ἔδην ἔχητε (1 Cor. 6:4), or the subject of the subordinate clause even becomes the object of the previous verb like ἰδεῖν τὸν Ἰησοῦν τίς ἔστιν (Lu. 19:3). Cf. Ac. 13:32. But this betokens no studied art. Cf. Mk. 8:24; Lu. 10:26; Ro. 9:19, 20; 14:4, 10; 1 Cor. 15:36. So ἡμῖν in Ac. 3:12.

(g) HYSTERON PROTERON. We occasionally meet also an example of ὑστερον πρότερον like ἄγγελον τοῦ θεοῦ ἀναβαίνοντας καὶ καταβαίνοντας (Jo. 1:51), a natural inversion from our point of view. But Winer (Winer-Thayer, p. 553) does not

1 Gr. of N. T. Gk., p. 297 f.
Harnack

admit this figure in the N. T. Certainly not all the apparent examples are real. The order of πεπιστεύκαμεν καὶ ἐγνώκαμεν (Jo. 6:69) is just as true as that of ἔγνωσαν καὶ ἐπίστευσαν (Jo. 17:8). Cf. also περιπατῶ καὶ ἀλλόμενος (Ac. 3:8) and ἤκατο καὶ περιπατέω (Ac. 14:10) where each order suits the special case. Cf. 1 Tim. 2:4 and 2 Pet. 1:9 for alleged examples that disappear on close examination. 

(h) HYPERBATON. Adverbs sometimes appear to be in the wrong place, a phenomenon common in all Greek prose writers. In 1 Cor. 14:7 δὴ μοις would come in more smoothly just before ἐὰν, but it is perfectly intelligible where it is. Cf. also Gal. 3:15 for similar use of δὴ μοις. Cf. distance of ἤδη from κεῖται (Mt. 3:10). In Ro. 3:9 οὐ πάντως is our ‘not at all,’ while in 1 Cor. 16:12 πάντως οὐκ ‘wholly not,’ just as in 1 Cor. 15:36 πάντες οὐ κομϕηθησόμεθα means ‘all of us shall not sleep,’ not ‘none of us shall sleep.’ Cf. also οὐ πάντως in 1 Cor. 5:9 f., an explanation of the negative μὴ συναναίγνουσαι just before, ‘not wholly.’ In the case of οὐ μόνον in Ro. 4:12, 16, the words οὐ μόνον are separated and in 4:12 the repetition of the article τὸς makes οὐ μόνον seem quite misplaced. Winer (Winer-Thayer, p. 555) is certainly right in insisting that οὐχ ὅτι (2 Cor. 3:5) is not to be treated as ὅτι ὦκ. Cf. οὐχ ἡν—ἀδλ. ἤνα (2 Cor. 13:7). A more difficult passage is found in Heb. 11:3, εἰς τὸ μὴ ἐκ φαινομένων τὸ βλεπόμενα γεγονέναι, where μὴ is the negative of the phrase ἐκ φαινομένων τὸ βλεπόμενα γεγονέναι. In general the negative comes before the word or words that are negatived. Hence οὐκ ἔλαυν (Ac. 19:30), οὐκ ἔστιν (Gal. 3:20). But note μὴ πολλοὶ διδάσκαλοι γίνεσθε (Jas. 3:1). Blass (Gr. of N. T. Gk., p. 257) notes the possible ambiguity [Page 424] in Ac. 7:48 because of the use of οὐχ before ὁ ἐγνώστεσθαι of before κατοικῖα. Observe in strong contrasts how οὐ stands over against ἄλλα (Ro. 2:13). Blass has little sympathy with the grammatical device of hyperbaton to help out exegesis. The construction, found in ὦς ἀπὸ σταδίων ἐκεινὸν ᾧς φανερῶν (Jo. 11:18) has been supposed to be a Latinism when compared with Lu. 24:13. So also with πρὸ ἡμερῶν τοῦ πάσχα (Jo. 12:1) was formerly considered a Latinism. But Moulton shows conclusively that it is Doric and Ionic before the possibility of Latin influence, and besides is common in the κοινὴ papyri, a mere coincidence with the Latin. See also ch. XIII, VII, (m), 5.

(i) POSTPOSITIVES. A number of words are always postpositive in Greek. In the N. T. ὃν, γὰρ, γε, δὲ, μὲν, μὲντι, οὖν, τε never begin a sentence, in harmony with ancient Greek usage. These words commonly in the N. T. come in the second place, always so with μέντι (Jo. 4:27, etc.). In the case of μὲν the third place is occasionally found as 1 Pet. 2:4, the fourth as 2 Cor. 10:1, the fifth in Eph. 4:11; Jo. 16:22, or even the sixth in Jas. 3:17. It occupies the seventh place in Herm. Sim. viii, 5:1 (Mr. H. Scott has noted). In general these words vary in position according to the point to be made in relation to other words. So also οὖν is more commonly in the second, but varies to the third (Jo. 16:22) and fourth (1 Cor. 8:4). The same remark applies to γὰρ, for which see Mk. 1:38; 2 Cor. 1:19. As to δὲ, it may not only go to the fourth place (Jo. 8:16), but even appears in the fifth (1 Jo. 2:2), οὐ περὶ τῶν ἡμετέρων δὲ. It stands in the sixth place in Test. XII. Patr. Judah, 9:1 (Mr. H. Scott reports). In the case of γε it follows naturally the word with which it belongs as in Ro. 8:32 (繄 γε), even in the

1 Gr. of N. T. Gk., p. 290.
2 Prol., pp. 100 ff. Cf. also LXX, as Amos 1:1; 4:7, etc.
case of ὀλλά γε (Lu. 24:21) which is always separated in the older Greek. Cf. also εἰ γε Eph. 3:2. Ἀν in the apodosis (not-ἐὰν) or with relatives or conjunctives, never begins a clause in Greek. It is usually the second word in the apodosis, either after the verb, as ἐὰν ὅν (Jo. 14:2), or after οὕς, as οὔκ ὅν (Mk. 13:20), or the interrogative, as τίς ὅν (Lu. 9:46). With the relative ὅν follows directly or as the third word, as ὅς ὅν and ὅς δὲ ὅν (Mt. 23:16). Τὲ usually follows the word directly, as in πονηροὺς τὲ (Mt. 22:10), even after a preposition, as σύν τὲ χιλιάρχοις (Ac. 25:23); but note τῶν ἐθνῶν τὲ (Ac. 14:5).

(j) FLUCTUATING WORDS. There is another group of words that vary in the matter, now postpositive, now not. Thus ἄρα [Page 425] may be first in the clause (Mt. 12:28), contrary to older Greek custom. So also ἄρα γε (Mt. 7:20) and ἄρα οὖν (Ro. 7:3). Except in a few instances like Ro. 8:1 the examples where ἄρα is postpositive in the N. T. are in questions after the interrogative or after a conjunction. Once (Ro. 10:18) μενοῦνγε begins the sentence. Τοῖνυν occurs only three times and twice begins the sentence (Lu. 20:25; Heb. 13:13) as τοῖνυνγε does (Heb. 12:1). The indefinite τίς sometimes comes first in the sentence, as τινὲς δὲ (Lu. 6:2). Enclitics can therefore stand at the beginning, though not commonly so. In the case of ἔνεκεν its position is usually before the word except with the interrogative, as τίνος ἔνεκεν (Ac. 19:32), or a relative, as οὔ τινες ἔνεκεν (Lu. 4:18). But χάριν follows its case save in χάριν τίνος (1 Jo. 3:12). Χωρίς precedes the word, but note οὔ χωρίς (Heb. 12:14). The N. T. therefore shows rather more freedom with these words.

(k) THE ORDER OF CLAUSES IN COMPOUND SENTENCES. Blass¹ considers this a matter of style rather than of grammar. When the whole sentence is composed of a principal clause, with one or more subordinate clauses, the order of these clauses is largely dependent on the flow of thought in the speaker’s mind. In the case of conditional as Mt. 17:4, final as in Mt. 17:27, and relative clauses as in Mt. 16:25, the dependent by rule precedes the principal clause. There is usually a logical basis for this order. But in Jo. 19:28 the final clause somewhat interrupts the flow of the sentence. Cf. also Ro. 9:11. In 2 Cor. 8:10, οἵτινες οὐ μόνον τὸ ποιήσαι ἄλλα καὶ τὸ θέλειν προενήρξασθε ἀπὸ πέρυσι, there is no violent change of order. Logically the willing preceded the doing and makes the natural climax. Blass² is undoubtedly right in refusing to take τίνι λόγῳ εὑρηκελλούμην as dependent on οἱ κατέχετε (1 Cor. 15:2). In Jo. 10:36 we meet a somewhat tangled sentence because the antecedent of ὅν is not expressed. Here λέγετε is the principal verb, the apodosis of the condition, and has two objects (the relative clause and the ὅτι clause) with a causal clause added. So in Jo. 10:38 we have a good example of the complex sentence with two conditions, a final clause, an object-clause, besides the principal clause.³

XI. Compound Sentences.

(a) TWO KINDS OF SENTENCES. The sentence is either simple or compound. The compound is nothing but two simple sentences [Page 426] put together. All that is

1 Gr. of N. T. Gk., p. 291.
2 Ib.
3 On the whole subject of the position of words in the sentence see K.-G., Bd. II, pp. 592–604.
true of one part of this compound sentence may be true of the other as to subject and predicate. The same linguistic laws apply to both. But in actual usage each part of the compound sentence has its own special development. The two parts have a definite relation to each other. Originally men used only simple sentences. Cf. Brugmann, *Griech. Gr.*, p. 552.

**(b) TWO KINDS OF COMPOUND SENTENCES (Paratactic and Hypotactic).** In parataxis (παράταξις) we have co-ordination of two parallel clauses. Take Mk. 14:37 as an example, καὶ ἔρχεται καὶ εὐρίσκει αὐτοῦς καθεύδοντας, καὶ λέγει τῷ Πέτρῳ. In hypotaxis (ὑπόταξις) one clause is subordinated to the other, as in οὐκ οἶδατε τί αἴτεσθε (Mk. 10:38) where τί αἴτεσθε is in the accusative case, the object of οἶδατε. Parataxis is the rule in the speech of children, primitive men, unlettered men and also of Homer. Cf. Sterrett, *Homer’s Iliad*, N. 49.

**(c) PARATACTIC SENTENCES.** They are very common in the Sanskrit and in Homer (cf. Brugmann, *Griech. Gr.*, p. 555) and in the Hebrew. In truth in the vernacular generally and the earlier stages of language parataxis prevails. It is more common with some writers than with others, John, for instance, using it much more frequently than Paul or even Luke. In John καί sometimes is strained to mean ‘and yet,’ as in 3:19; 4:20, etc.¹ The κοινή shows a decided fondness for the paratactic construction which in the modern Greek is still stronger (Thumb, *Handb.*, p. 184). As in the modern Greek, so in the N. T. καί, according to logical sequence of thought, carries the notion of ‘but,’ ‘that,’ besides ‘and yet,’ introducing quasi-subordinate clauses. For details concerning paratactic conjunctions see chapter on Particles. In the use of καί (cf. Heb. 1) after ἔγένετο the paratactic καί borders very close on to the hypotactic ὅτι. Thus ἔγένετο δὲ καί—αὐτός τὸ πρόσωπον ἐστήρισεν (Lu. 9:51).

**(d) HYPOTACTIC SENTENCES.** They are introduced either by relative pronouns or conjunctions, many of which are relatives in origin and others adverbs. The subject of conjunctions will demand special and extended treatment later on (chapters on Modes and on Particles), and so will relative clauses. On the use of the relative thus see Brugmann, *Griech. Gr.*, p. 553. The propensity of the later Greek for parataxis led to an impoverishment of particles.[Page 427]

Hypotactic sentences, once more, are either substantival, adjectival or adverbial, in their relation to the principal or another subordinate clause. Thus in Lu. 22:2 τὸ πῶς ἄνέλοσιν is the substantive object of ἔξητον, as τὸ τίς εἴη is of συνζητεῖν in Lu. 22:23. As a sample of the subject-clause in the nominative take οὐ μέλει σοι ὅτι ἀπολλύμεθα (Mk. 4:38). In Mt. 7:12 ὅσον ἔδωκα ποιήσετε is an adjective sentence and describes πάντα. In Mt. 6:16 ὅταν νηστεύητε is an adverb in its relation to γίνεσθε.

---

1 Abbott, Joh. Gr., p. 135.

XII. Connection in Sentences.

(a) SINGLE WORDS. These have connectives in a very natural way, as δύναμιν καὶ ἔξοδον—διαμόνα καὶ νόσους (Lu. 9:1). But common also is καὶ—καὶ (Jo. 2:14), τε—καὶ (2:15), and rarely τε—τε (Ac. 26:16). This tendency to break up into pairs is well shown in Ac. 2:9–11. For ἢ see Mt. 5:17, ἀλλὰ 2 Cor. 7:11, οὐδὲ Rev. 5:3. In enumerations the repetition of καὶ gives a kind of solemn dignity and is called polysyndeton. Cf. Rev. 7:12 ἡ ἐνθύμησις καὶ ἡ ἀδικία, καὶ ἡ κακία, καὶ ἡ παθήσεις (Heb. 11:32). In lists the connective is used with part of the list (pairs) and not with the rest for the sake of variety, as in 1 Tim. 1:9 f. An example like εὐκαιροί ἀλλάζεις is compared by Blass to nolens volens.

(b) CLAUSES. But connection is by no means uniform between sentences. This remark applies to both the paratactic and the hypotactic sentences. Asyndeton in sentences and clauses is on the whole repugnant to the Greek language in the opinion of Blass. Hence compound sentences in the N. T. usually have connectives, but not always.

1. Paratactic Sentences. The co-ordinating conjunctions form the most frequent means of connecting clauses into one paratactic sentence. These conjunctions will receive special treatment in the chapter on Particles and here only some illustrations can be given. Καὶ, τε, δέ, οὔτε, μηδὲ, μὲν and δὲ, οὗτε, ἀλλά are the most frequent particles used for this purpose. They are more common indeed in historical writings, as in the Gospels and Acts. But in the Gospels the use of καὶ varies a good deal. Mark, for instance, has it more than 400 times, while John contains it only 100. Deissmann calls this use of καὶ primitive popular Greek. The presence of dialogue in John hardly

---

2 Gr. of N. T. Gk., p. 277.
3 lb.
1 Gr. of N. T. Gr., p. 276.
explains all the difference, and even in John the first chapter uses it much more frequently than the last. As a good example of the use of kai turn to Mt. 4:23–25. Cf. Lu. 6:13–17 and Mk. 9:2. Te is common chiefly in the Acts, as 14:11–13. Sometimes the use of kai between clauses amounted to polysyndeton, as in Jo. 10:3, 9, 12. Δε is perhaps less common in clauses (Jo. 4:6) except with μεν (Mt. 3:11). For δε και see Jo. 2:2. Ουδε is illustrated by Mt. 5:15, Διλα by 5:17, οου δε by Ac. 28:21. But asyndeton appears also, as in Lu. 6:27 f., ουδετε πουετε, ευλογετε, προσευχεσθε, even if it be to a limited extent. Cf. Gal. 5:22. Blass3 points out that that is not a case of asyndeton where a demonstrative pronoun is used which reflects the connection. Cf. thus the use of asyndeton where a demonstrative pronoun is used which reflects the connection. Cf. thus the use of τοουτον in Ac. 16:3; Jo. 5:6. Winer4 finds asyndeton frequent in cases of a climax in impassioned discourse, as in 1 Cor. 4:8, Ἡ δε κεκορεσμενον Εστε· Ἡ δε Επλουτησατε, χωρίς ημων Εβασιλεύσατε. The absence of the connective gives life and movement, as in σιωπα, πεφιμωσο (Mk. 4:39). Observe also ὅπαγε πρωτον διαλλαγη (Mt. 5:24), ὅπαγε Ἐλεγζον (18:15), Ἐγειρεθε ἄρωμεν (Mt. 26:46), ὅγε, κλαύσατε (Jas. 5:1). This use of ὅγε is common in the old Greek (Gildersleeve, Greek Syntax, p. 29). But in Jo. 1:46 we have ἔρχου και ἰδε. In 1 Tim. 3:16 the fragment of an early hymn is neatly balanced in Hebrew parallelism. [Page 429] Ὡς ἐφανερώθη ἐν σαρκι, ἐδικαιώθη ἐν πνευματι, ὧσθη ἄγγελοις, ἑκπρόχθη ἐν έθνεσιν, ἑπιστεύθη ἐν κόσμῳ, ἀνελήμφθη ἐν δόξη.

Here the connective would be quite out of place.

In contrast the connective may also be absent, as in ὑμεως προσκυνετε δ ουκ οδατε, ἡμεως προσκυνομεν δ οδαμεν (Jo. 4:22). So Ac. 25:12. Cf. in particular 1 Cor. 15:42 ff., σπειρεται ἐν φυσιν, ἐγειρεται ἐν άρχησία· σπειρεται ἐν άτιμια, ἐγειρεται ἐν δοξῃ σπειρεται ἐν άνθηναι, ἐγειρεται ἐν δυναμει· σπειρεται σωμα ψυχικον, ἐγειρεται σωμα πνευματικον. Here the solemn repetition of the verbs is like the tolling of a bell. Cf. also Jas. 1:19, ταχυς εις το άκουσαι, βραδυς εις το λαλησαι, βραδυς εις το οργην. John is rather fond of repetition with asyndeton in his report of Jesus’ words, as ἐγω ελι η οδος και η άλληθεια και η κοψη· ουδεις ἔρχεται προς τον πατέρα ει μη δι έμου (14:6). Cf. 10:11; 15:13, etc. But this sort of asyndeton occurs elsewhere also, as in 1 Cor. 7:15, ου δεδουλωται ο άδελφος. Cf. also 7:23; Rev. 22:13. A common asyndeton in Luke occurs after και ἐγένετο without another και, as επεν τις (11:1)
2. Hypotactic Sentences. In the nature of the case they usually have connectives. The subordinating conjunctions are more necessary to the expression of the exact shade of thought than in paratactic clauses. The closeness of connection varies greatly in various kinds of subordinate clauses and often in clauses of the same kind. The use of the correlative accents this point, as ὁδός ὃ ἐποιήσατος, τοιούτων καὶ ὁ ἐποιησάτω (1 Cor. 15:48); ὅσπερ—οὕτως (Mt. 12:40). But real antithesis may exist without the correlative, as in Mt. 5:48; 6:2. In relative clauses the bond is very close and is sometimes made closer by agreement of the relative and antecedent not only in number and gender but even in case, as ὁδὸς (Lu. 2:20) and τὸν ἄρμον ὅν (1 Cor. 10:16). There may be several relative clauses either co-ordinate (Ac. 3:2 f.) or subordinate to another (Ac. 13:31; 25:15 f.). So also the use of ἐπὶ, τότε, ἃρα, καὶ, ἀλλὰ, δὲ in the apodosis accents the logical connection of thought. Cf. Mt. 12:28; Mk. 13:14; Jo. 7:10; 20:21; 1 Cor. 15:54; 2 Cor. 7:12, etc. But much closer than with temporal, comparative, conditional, or even some relative clauses is the tie between the principal clause and the subordinate objective, consecutive, final and causal clauses. These are directly dependent on the leading clause. Interrogative sentences when in indirect discourse really become object-clauses, like τὸ τίς ἄρα εἶ (Lu. 22:23), object of συνεζητείν. The ὅτι, ἣν, ὅπως (and ὃς rarely) clauses are closely knit to the principal clause as subject, object (direct or indirect) of the verb. There is a natural interblending between object and causal sentences, as shown by the use of ὅτι for both and διότι in late Greek in the sense of ‘that,’ objective ὅτι. Cf. quod and quia in late Latin, and English the “reason that” and colloquial the “reason why.” In Greek ὅτι even interchanges with εἰ (cf. English “wonder if” and “wonder that”). So ἐξάνεσαν εἰ ὧδη τεθνηκέν (Mk. 15:44). Cf. Ac. 8:22; 26:8. Clauses with the consecutive idea usually have the infinitive in the N. T. Hypotactic sentences cannot be here discussed in detail, but only as illustrating the point of connection between sentences. Winer1 is hardly right in describing as asyndeton Jas. 5:13, κακοπαθεῖ τις ἐν ὑμῖν; προσωπικέσθω, where εἰ is not used, and the structure is paratactic. He cites also δοῦλος ἐκλήθης; μή σοι μελέτω (1 Cor. 7:21). The questions in Jas. 2:19 f. are also paratactic. But more certain examples exist than these, where either a conjunction has dropped out or, as is more likely, we have original parataxis. Thus ἄρα ἔξωλο (Mt. 7:4), ἔρχεται ἵκωμεν (Mt. 27:49) can be compared with δεῦτε ὅτε (Mt. 28:6), δεῦρο ἀποστείλω (Ac. 7:34), δεῦτε ἄρακτενομεν (Mk. 12:7) and the common Greek idiom with ὅτε, φέρε. Cf. Jas. 5:1. In Mk. 15:36 note ἄρατε δέομεν. One verb really supplements the other much as the infinitive or participle. Cf. English “let us see.” In the modern Greek ζάτε (abbreviation of ἄφες) is used uniformly as the English and almost like a particle. Of a similar nature is the asyndeton with θέλεις συμμετεχεῖς (Mt. 13:28) and βούλεσθε ἀπολύσω (Jo. 18:39). Cf. θέλετε ποιήσω (Mk. 10:36). Cf. also ἔγειρεν ἄρακτενομεν (Mt. 26:46) above. These are all paratactic in origin, though hypotactic in logical sequence. But see chapter on Modes for further details. In the case of ὅτι, ὅτατε, βλέπετε, we can find examples of both the conjunctival use of μή and clear cases of asyndeton with some on the border line. Thus clearly conjunctival μή is found in βλέπεται μή πέση (1 Cor. 10:12), βλέπετε μή ἔπιστευ (Ac. 13:40), βλέπετε μή παρατηρήσεσθε (Heb. 12:25). Asyndeton is undoubtedly in ὅτατε μὴ ἔπιστευ ἄρα μὴ ἁμαρτήσῃς (Mk. 1:44) with which compare ὅπως δεῖ (Mk. 1:27) in the same verse. Cf. also Mt. 8:4. Thus again ὅτατε μὴ ἔπιστευ (Mt. 9:30) where note two imperatives as in ὅτατε, μή θροεσθε (Mt. 24:6). But in βλέπετε μή τις ὑμᾶς

1 W.-Th., p. 541.
3. The Infinitive and Participle as Connectives. A very common connection is made between clauses by means of the infinitive or the participle, sometimes with particles like ὥστε and ἐπὶ with the infinitive or ὥς, ὥσπερ, καὶ περί, with the participle, but usually without a particle. The infinitive often is used with the article and a preposition, as ἐν τῷ εἰσελθεῖν (Lu. 9:34). Usually the infinitive is brought into the closest connection with the verb as subject (τῷ γὰρ θέλειν παράκειται μοι, Ro. 7:18) or object (βούλομαι προσεύχεσθαι ἄνδρας, 1 Tim. 2:8), or in a remoter relation, as ἔξῆλθεν ὁ σπείρων τοῦ σπείραι (Mk. 4:3). The participle sometimes is an essential part of the predicate, as ἐπαύσατο λαλῶν (Lu. 5:4), or again it may be a mere addendum or preliminary or even an independent statement. Thus observe εἰσέλθων, διαλεγόμενος καὶ πείθων in Ac. 19:8. As further examples of participles somewhat loosely strung together without a connective in more or less close relation to each other and the principal sentence see Ac. 12:25; 16:27; 23:27. The genitive absolute is common in such accessory participles. The only point to consider concerning the infinitive and participle here is the frequency with which they are used in the structure of the Greek sentence. Thus long sentences are easily constructed and sometimes the connection is not clear. Frequent examples of anakoluthon come from the free use of the participle, as will be shown later. See χειροτονηθείς and στελλόμενοι as instances in 2 Cor. 8:19 f. By means of the infinitive and participle the Greek enjoyed much elasticity and freedom which the modern Greek has lost. In modern Greek conjunctions and finite verbs have very largely displaced the infinitive and the participle. Even in the N. T. a tendency in that direction is discernible, as is seen in the use of ἵνα with θέλω (Mk. 6:25), ἄφημι (Mk. 11:16). One is inclined to think that Viteau overstates it when he says that the N. T. writers have a natural and general inability to combine and subordinate the elements of thought and so express them separately and make an abnormal use of asyndeton. I would rather say that there is a great simplicity and directness due partly to the colloquial style and the earnestness of the writers. They are men with a message rather than philosophical ramblers. But part of this absence of subordination may be due to the Hebrew temper as in John, and part to the general spirit of the time as less concerned, save in the [Page 432] case of the Atticists, with the niceties of style. Clearness and force were the main things with these N. T. writers. They use connectives or not as best suits their purposes. But the infinitive construction and the conjunction construction must not be regarded as identical even in the N. T. Note καλὸν αὐτῶι εἰ oūκ ἐγεννήθη (Mk. 14:21), ἐν τούτῳ γινόσκομεν ὅτι (1 Jo. 5:2), βουλὴ ἐγένετο Ἰνα (Ac. 27:42).

(c) Two kinds of Style. There are indeed two kinds of style in this matter, the running (εἰρομένη) and the periodic (ἐν περιόδοις) or compact (κατεστραμμένη), to

Viteau

VITEAU, J., Essai sur la syntaxe des voix dans le grec du N. T. (Rev. de Phil., 1894).

———, Étude sur le grec du N. T. I, Le Verbe (1893); II, Le Sujet (1896).

1 Le Verbe, Synt. des Prop., p. 9.
use Aristotle’s terminology.\(^1\) In the words of Blass\(^2\) the running or continuous style is characteristic of the oldest prose as well as unsophisticated, unconventional prose like the vernacular κοινή, and hence is the usual form in the N. T. The periodic style, on the other hand, belongs to “artistically developed prose” like that of Demosthenes and Thucydidides. As a matter of fact the O. T. narrative is also in the running style, while the prophets sometimes use the periodic. The longer N. T. sentences are usually connected by καί or use asyndeton as shown above. But occasionally something approaching a real period appears somewhat like that of the great Greek writers, but by no means so frequently. Interesting examples of some length may be found in Lu. 1:1–4; Ac. 15:24–26; 26:10–14, 16–18; Ro. 1:1–7; 1 Pet. 3:18–22; 2 Pet. 1:2–7; Heb. 2:2–4. In Lu. 1:1–4 Blass\(^2\) notes that the protasis has three clauses and the apodosis two, while in Heb. 1:1–3 he finds some ten divisions of the sentence which is not so neatly balanced as the passage in Luke. It is noticeable that Luke uses this classic idiom nowhere else in his Gospel, while the Epistle to the Hebrews has a fluent oratorical style of no little beauty. Chapter 11 finds a splendid peroration in 12:1 f., which should belong to chapter 11 as the closing period in the discussion about the promises. Cf. a similar peroration, though not in one sentence, in Ro. 11:33–36. So also Ro. 8:31–39, where verses 38 and 39 form a really eloquent period. Blass\(^3\) indeed gives a rather free interpretation to the term period and applies it to sentences of only two parts like a conditional sentence when the condition comes first, sentences with antithesis with µέν—δέ, disjunctive clauses with ἤ, or parallelisms with τε—καί. He even finds a period in a case of asyndeton like 1 Cor. 7:27. But this is to make nearly all complex sentences periods. Blass’\(^\text{[Page 433]}\) opinion on this point is to be borne in mind when he argues for literary rhythm on a considerable scale in the N. T. Paul indeed has some noble periods like Eph. 1:3–14; 2:14–18; 3:14–19. He would show many more than he does but for the fact that he seems to grow impatient with the fetters of a long sentence and breaks away in anacoluthon which mars the fulness and symmetry of the sentence as a period. Cf. 2 Cor. 8:18–21; Ro. 12:6–8; Col. 1:9–23. In Ro. 3:7 f. the καθώς and ὅτι clauses make a not very strong culmination. The ground element in Paul’s speech is the short sentence. Only occasionally does he combine these into a period.\(^1\) But Paul does use antithetic and comparative particles and apposition. One other reason for the absence of rhetorical periods is the avoidance of prolonged passages of indirect discourse. In truth none of that nature occurs at all, so that we do not have in the N. T. passages of much length in indirect discourse such as one meets in Xenophon or Thucydidides (cf. Cæsar). But the quotations are usually direct either with recitative ὅτι (Mt. 9:18) or without (Mt. 9:22). Winer\(^2\) well remarks that what the style thus loses in periodic compactness, it gains in animation and vividness. But the use of the participle in giving periodic compactness is to be noticed, as in Ac. 23:27. The attraction of the relative to the case of its antecedent, as already observed, adds another bond of union to the compactness of the relative sentence as in Lu. 5:9.

2 Ib.
3 Ib.
2 W.-Th., p. 545.
(d) The Parenthesis (παρένθεσις). Such a clause, inserted in the midst of the sentence without proper syntactical connection, is quite common in the N. T. Once the editors used too many parentheses in the N. T., but the number is still considerable. The term is somewhat loosely applied to clauses that really do not interrupt the flow of the thought. Thus it is not necessary to find a parenthesis in Jo. 7:39. The γάρ clause is merely explanatory. The same thing is true of Jo. 9:30 and Ac. 13:8. Certainly not every explanatory remark is to be regarded as parenthetical. On the other hand even a relative clause may be regarded as parenthetical where it is purely by the way as the interpretation of Ῥαββεί (Jo. 1:38 ὃ λέγεται) and of Μεσσίαν (ὅ ἐστιν, etc., Jo. 1:41). But see Mk. 7:11. Editors indeed will [Page 434] differ as to what constitutes a parenthesis as in the case of Mk. 3:16 where W. H. use the marks of parenthesis while Nestle does not consider this a parenthesis. In Jo. 1:15 W. H. print a double parenthesis, using the dash inside the parenthetical marks. Here again Nestle has the colon instead of the dash and the full stop in lieu of the parenthetical marks. W. H. are not uniform in the indication of the parenthesis. They do it by the curved lines () as in Mk. 3:16, or the dash as in Jo. 7:22; 10:12, or merely the comma as in the short phrases like φησίν (2 Cor. 10:10), or again with no punctuation at all as in the case of δοκεῖν (Heb. 10:29). The insertion of one or two words in the midst of the sentence is the simplest form of the parenthesis, like πολλοί, λέγω ὑμῖν, ζητήσουσιν (Lu. 13:24) and ὅτι κατὰ δύναμιν, μαρτυρῶ, καί (2 Cor. 8:3). Cf. φησίν (Mt. 14:8), ἔφη (Ac. 23:35), οὐ ψεύδομαι (Ro. 9:1), ἐν ἀφροσύνῃ λέγω (2 Cor. 11:21), etc. But the insertion of φησίν and ἔφη between words is rare in the N. T. Cf. Simcox, Language of the N. T., p. 200. A very interesting parenthesis is the insertion in the speech of Jesus to the paralytic, of λέγει τῷ παραλυτικῷ (Mk. 2:10). Mt. (9:6) adds τότε. Lu. (5:24) has εἶπεν τῷ παραλυτικῷ. The Synoptists all had the same source here. These phrases, common also to the ancient Greek, do not need marks of parenthesis, and the comma is sufficient. A little more extended parenthesis is found in a clause like δὸνομα αὐτῷ Ἰωάνης (Jo. 1:6), Νικόδημος δὸνομα αὐτῷ (Jo. 3:1), though this again may be considered merely a form of apposition. A more distinct parenthesis still is the insertion of a note of time like ἦσαν δὲ ἡμέραι τῶν ἄξωμαν (Ac. 12:3). Thackeray (Gr., p. 149 note) notes a tendency in the LXX to put numeral statements in parenthesis. Note also the explanatory parenthesis in Ac. 1:15.

Simcox

———, The Writers of the N. T.

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).
introduced by τε. Cf. also ὡσεὶ ἠμέραι ὡκτώ in Lu. 9:28, which can be explained otherwise. In Mt. 24:15 the parenthetical command of Matthew or of Jesus, ὁ ὄναγνούσκον νοείτω, is indicated by W. H. only with the comma. In general the historical books have fewer parentheses than the Epistles, and naturally so. In Paul it is sometimes hard to draw the line between the mere parenthesis and anacoluthon. Cf. 1 Cor. 16:5; Ro. 5:12 (18); 9:11; 15:23–28. ὅνι may look back beyond the parenthesis as in Jo. 4:7 ff. (Abbott, Johannine Grammar, p. 470). See Jo. 10:35 καὶ οὐ δόναται λυθῆναι ἴ γραφή. Cf. the sharp interruption in Jo. 4:1–3. In Gal. 2:5 f. we have two parentheses right together marked by the dash in W. H.’s text, besides anacoluthon. Cf. Lu. 23:51, Col. 1:21 f. for parenthesis of some length. But see 2 Pet. 2:8 for a still longer [Page 435] one, not to mention 2 Cor. 9:12; Heb. 7:20 f.; Lu. 6:4.

As illustrating once more the wide difference of opinion concerning the parenthesis, Blass1 comments on the harshness of the parenthesis in Ac. 5:14, while W. H. do not consider that there is a parenthesis in the sentence at all. At bottom the parenthesis in the text is a matter of exegesis. Thus if in Jo. 13:1 ff. εἰς τέλος ἠγάπησεν αὐτούς be regarded as a parenthesis and verses 1–5 be considered one sentence (note repetition of εἰδώς) a much simpler construction is the result.2 Instead of a parenthesis a writer switches off to one aspect of a subject and then comes back in another sentence as Paul does in 1 Cor. 8:1–4. He resumes by the repetition of περὶ—εἰδωλοθυτῶν ἀδιαμεν. Cf. also a similar resumption in Eph. 3:14 τούτου χάριν after the long digression in verses 1–13. This construction is not, however, a technical parenthesis.

(c) ANACOLUTHON. But a more violent break in the connection of sentences than the parenthesis is anacoluthon. This is merely the failure to complete a sentence as intended when it was begun (ἁνακόλουθον). The completion does not follow grammatically from the beginning. The N. T. writers are not peculiar in this matter, since even in an artistic orator like Isocrates such grammatical blemishes, if they be so considered, are found.3 And a careful historian like Thucydides will have ἔδοξεν αὐτοίς—ἐπικαλοῦντες (iii. 36. 2). It is just in writers of the greatest mental activity and vehemence of spirit that we meet most instances of anacoluthon. Hence a man with the passion of Paul naturally breaks away from formal rules in the structure of the sentence when he is greatly stirred, as in Gal. and 2 Cor. Such violent changes in the sentence are common in conversation and public addresses. The dialogues of Plato have many examples. The anacoluthon may be therefore either intentional or unintentional. The writer may be led off by a fresh idea or by a parenthesis, or he may think of a better way of finishing his sentence, one that will be more effective. The

Abbott

1 Gr. of N. T. Gk., p. 279.
2 S. M. Provence, Rev. and Exp., 1905, p. 96.
very jolt that is given by the anacoluthon is often successful in making more emphasis. The attention is drawn anew to the sentence to see what is the matter. Some of the anacolutha belong to other languages with equal pertinence, others are peculiar to the Greek genius. The participle in particular is a very common occasion. The Apocalypse, as already shown, has many examples of anacoluthon. The more important N. T. illustrations of anacoluthon will now be given. It is difficult to make a clear grouping of the examples of anacoluthon in the N. T. on any scientific principle. But the following will answer.

1. The Suspended Subject. What Abbott calls the suspended subject finds illustration elsewhere than in John, though he does have his share. It may be looked at indeed as suspended object as well sometimes. The point is that the substantive, pronoun or participle is left by the wayside and the sentence is completed some other way. Thus in πᾶν ῥῆμα ἀργών ὁ λαλήσωσιν οἱ ἄνθρωποι ἀποδώσουσιν περὶ αὐτοῦ (Mt. 12:36) observe how πᾶν ῥῆμα is dropped in the construction and perὶ αὐτοῦ used. In πᾶς οὖν ὅστις ὁμολογήσει—ὁμολογήσει κἂν ἐν αὐτῷ (Mt. 10:32) the same principle holds in regard to πᾶς and ἐν αὐτῷ. But in the same verse the regular construction obtains in ὅστις ἀρνήσηται—ἀρνήσομαι κἂν ἀυτόν. In Lu. 6:47 πᾶς ὁ ἐρήμωσος κλ., ὑποδέξεω οὐμίν τίνι ἔστεν ὁμοίος we see a similar anacoluthon unless πᾶς ὁ ἐρχ. be regarded as a rather violent prolepsis of the subject, which is not so likely in this instance. In Lu. 11:11 the anacoluthon is not quite so simple, though τίνα is after all left to itself (τίνα δὲ ἐξ ὑμῶν τὸν πατέρα αἰτήσει ὁ ἰδίος ἰχθύν, μὴ ἄντι ἰχθύος ὁρίζων αὐτῷ ἐπιδοξάσε.;). If instead of τίνα the sentence read εἰ or ἐὰν, all would go smoothly except that ἐξ ὑμῶν would be slightly awkward. Observe that αἰτήσει has two accusatives without τίνα. The apodosis is introduced by μὴ and as an interrogative clause expects the answer “no.” But in spite of the grammatical hopelessness of the sentence it has great power. In Lu. 12:48 the matter is simpler (παντὶ δὲ ὃ ἔδόθη πολύ, πολὺ ἐξητήθηται παρ’ αὐτοῦ). Here two things are true. We not only have the stranded subject (cf. παρ’ αὐτοῦ), but it has been attracted into the case of the relative (inverse attraction), παντὶ, not πᾶς. With this compare πᾶς ὁς ἐρεί—ὁφεθήσεται αὐτῷ (Lu. 12:10). In 2 Cor. 12:17 we merely have the anacoluthon without any attraction, τίνα expecting a verb governing the accusative (μὴ τίνα ὥν ἀπέσταλκα πρὸς ὅμᾶς, δι’ αὐτοῦ ἐπιλεωκήση ὅμᾶς.;). Here indeed ὥν is attracted into the case of τούτων unexpressed. A simpler instance is ὁ Μωυσῆς οὗτος—οὐδὲν ὁμιλεῖ ἐξ ὑμῶν (Ac. 7:40; Ex. 32:1). Blass finds anacoluthon in Mk. 9:20 (ἰδὼν αὐτὸν τὸ πνεῦμα συνεπιστάραξεν αὐτοῖς), but surely this is merely treating πνεῦμα as masculine (natural gender). But in Ac. 19:34 (Ἐπιγνώστε καὶ σὺ Ἰουδαῖος ἐστιν ψυχή ἐγένετο μια ἐκ πάντων) there is a clear case of anacoluthon in the change to ἐκ πάντων. The writings of John show similar illustrations. There is no anacoluthon in Jo. 6:22 in the text of W. H., which reads ὁδικὸν ὁτί instead of ἱδίῳν ὁτὶ—ὅτε (margin of W. H.). But in 6:39 there is real anacoluthon (πᾶν ὁ δὲδωκέν μοι μὴ ἀπολείπει ἐξ αὐτοῦ) in the change from πᾶν to ἐξ αὐτοῦ. It is possible to regard πᾶν μὴ here as equivalent to οὐδείς and not like πᾶς—μὴ in Jo. 3:16. In 7:38 another suspended subject is found in ὁ πιστεύων εἰς ἐμὲ (cf. αὐτοῦ further on). But 10:36 is
hardly anacoluthon,² since one has merely to supply the demonstrative ἐκεῖνος or the personal pronoun αὐτῷ with λέγετε to make the sentence run smoothly. In 15:2 πᾶν κλήμα—αὐτό we have very slight anacoluthon, if any, since both may be in the same case (cf. resumptive use of οὗτος). But in 15:5 the matter is complicated by the insertion of καθὼς ἐν αὐτῷ (ὅ μένον ἐν ἑμοί καθὼς ἐν αὐτῷ οὗτος φέρει). In 17:2 (πᾶν ὁ δέδοκας αὐτῷ δόσει αὐτός) we have the more usual anacoluthon. In 1 Jo. 2:24 (ὑμεῖς ἢ ἠκούσατε ἢπ άρχῆς ἐν ὑμῖν μενέτω) ὑμεῖς may be merely prolepsis, but this seems less likely in verse 27 (ὑμεῖς τὸ χρίσμα ὁ ἔλαβετε ἢπ αὐτοῦ μένει ἐν ὑμῖν) where note the position of ὑμεῖς and ἐν ὑμῖν. In Rev. 2:26 the anacoluthon (ὁ νικῶν—δόσω αὐτῷ) does not differ from some of those above.³ So also as to Rev. 3:12, 21, but in 2:7, 17 (τῷ νικῶντι δόσω αὐτῷ) the case is the same and may be compared with Jo. 15:2, 5. Cf. the probable reading (W. H. bracket as well as Mt. 4:16 (LXX); 5:40 (τῷ θέλοντι—αὐτῷ), where there is no real anacoluthon, but a resumptive use of αὐτῷ. Cf. also ὑμᾶς repeated after parenthesis in Col. 1:22. The LXX has other similar examples like Josh. 9:12; Ps. 103:15. A similar resumptive use of ὃ occurs in the text (not marg. in W. H.) of Ro. 16:27. In a similar way a relative clause may be left as a suspended subject or object, as in Lu. 9:5, ὅσοι ἃν μὴ δέχονται ὑμᾶς—Ἀποτινάσσετε ἢπ αὐτοῦς. Cf. Mt. 10:14; Lu. 10:8, 10. Cf. this with the very common use of resumptive οὗτος after the article and the participle, like ὁ ὑπομείνας εἰς τέλος οὗτος σωθήσεται (Mt. 10:22).

2. Digression. A somewhat more complicated kind of anacoluthon is where a digression is caused by an intervening sentence or explanatory clause. Those naturally occur mainly in the Epistles of Paul where his energy of thought and passion of soul overlap all trammels. In Jo. 5:44 the participle is dropped for the indicative overleap all trammels. In Jo. 21:12 (οὐδεὶς ἔτολμα τῶν μαθητῶν ἐξετάσαι αὐτόν Σὺ τίς εἶ; εἴδότες) the question breaks the smooth flow and εἴδότες [Page 438] agrees in case with οὐδεὶς and number with μαθητῶν. With this compare the change from ἣν μή οἴροσιν in Mk. 6:8 to the infinitive μὴ ἐνδύσασθαι in verse 9. Nestle has, however, ἐνδύσησθε. In Mk. 7:19 (καθαρίζον πάντα τὰ βρώματα) the participle can be connected in thought, as Mark probably did, with λέγει in verse 18, but the intervening quotation makes Mark’s explanatory addendum a real anacoluthon. The example in Jo. 1:15 Abbott¹

3 Blass, Gr. of N. T. Gk., p. 283, calls it a “very awkward instance.”
Nestle

———, Novum Testamentum Graece. 8th ed. (1910).

———, Septuagint (Hastings’ D. B., 1902).

1 Joh. Gr., p. 34.
calls “impressionism” due to the writer’s desire to make his impression first and then to add the explanatory correction. He compares 4:1 with 3:22. In 1:15 οὗτος ἦν ὁνεὶπων is taken by Abbott as a part of the Baptist’s statement, but W. H. read οὗτος ἦν ὁ εἰπών as a parenthetical remark of the writer. So in Jo. 20:18 καὶ ταῦτα ἔπειν αὐτῇ does not fit in exactly after ὅτι ἔφρακα τὸν κύριον. The added clause is the comment of John, not of Mary. The margin of Ac. 10:36 (W. H.) with ὅν is a case of anacoluthon, but the text itself is without ὅν. In Ac. 24:6 the repetition of ὅν καὶ leaves εὐρύντες cut off from ἐκρατήσαμεν. In Ac. 27:10 (θεωρῶν ὅτι—μέλλειν) the ὅτι clause is changed to the infinitive, a phenomenon noted by Winer² in Plato, Gorg. 453 b. The anacoluthon in Gal. 2:6 (ἀπὸ δὲ τῶν δοκοῦντων εἶναι τί—ὅπως ποτε ἦσαν οὖνδὲν μοι διαφέρει—πρόσωπον ὃ θεός άνθρώπος οὐ λαμβάνει—ἐμοὶ γὰρ οἱ δοκοῦντες οὖνδὲν προσανέθεντο) is noteworthy for the complete change of construction as shown by the repetition of the οἱ δοκοῦντες in the nominative and followed by the middle instead of the passive voice. Observe the two parentheses that led to the variation. It is easier in such a case to make a new start, as Paul does here. In Gal. 2:5 Blass³ follows D in omitting οἶς in order to get rid of the anacoluthon, as he does also in Ro., 16:27 (ὅ), but it is more than likely that the difficulty of the anacoluthon with οἶς led to the omission in D. One of the most striking anacolutha in Paul’s Epistles is found at the end of Ro. 5:12 where the apodosis to the ὥσπερ clause is wanting. The next sentence (ἄχρι γάρ) takes up the subordinate clause ἐφ’ ὧν ἡμαρτον and the comparison is never completed. In verse 18 a new comparison is drawn in complete form. The sentence in Ro. 9:22–24 is without the apodosis and verse 25 goes on with the comparative ὧς. 2 Pet. 1:17 shows a clear anacoluthon, for the participle λαβών is left stranded utterly in the change to καὶ ταύτῃ τῇ φονῇ ἡμεῖς ήκούσαμεν. Winer⁴ seems to be wrong in finding an anacoluthon in the long sentence in 2 Pet. 2:4–10. The apodosis is really οὖνδὲν in verse 9 (verse 8 being a long parenthesis as W. H. rightly punctuate). However, Winer¹ is justified in refusing to see anacoluthon in many passages formerly so regarded and that call for no discussion now. See further Mt. 7:9; 12:36; Mk. 2:28; 7:3 f.; Lu. 11:11 f.; 12:8, 10; 21:6; Jo. 6:39; 17:18; Ac. 15:22 ff.; 19:34; 24:20; 26:3; Ro. 16:25–27; 1 Cor. 9:15; Col. 2:2; 4:6; Eph. 3:8; 2 Cor. 7:5; 1 Th. 4:1; Heb. 3:15; 10:15 f.; 1 Tim. 1:3–5; Ju. 16. It is very common in the Apocalypse as in 2 Corinthians and Galatians.

3. The Participle in Anacolutha. It calls for a word of its own in the matter of anacoluthon, although, as a matter of fact, it occurs in both the kinds of anacoluthon already noticed. The reason is, the free use of the participle in long sentences (cf. Paul) renders it peculiarly subject to anacoluthon. The point with the participle is not that it is a special kind of anacoluthon in any other sense. Gal. 6:1, καταρτίζετε,

1 Ib., p. 571.
σκοπῶν σεαυτόν, μὴ καὶ σὺ πειράσθῃς may be regarded as anacoluthon in the change of number, but it is a natural singling-out of the individual in the application. In 2 Cor. 5:12 the ellipsis of γράφομεν ταύτα with διδόντες is so harsh as to amount to anacoluthon. Cf. also θλιβόμενοι in 2 Cor. 7:5. It is less certain about στελλόμενοι in 2 Cor. 8:20, for, skipping the long parenthesis in verse 19, we have συνεπέμψαμεν. But in the parenthesis itself ἔχειροτονηθὲς is an example of anacoluthon, for regularly ἔχειροτονηθῇ would be the form. In 2 Cor. 9:11, 13, the participles πλουτιζόμενοι and δοξάζοντες have no formal connection with a principal verb and are separated by a long parenthesis in verse 12. But these participles may be after all tantamount to the indicative and not mere anacoluthon. Just as sequimini (sec. pl. mid. ind.)=ἐπόμενοι, so other Greek participles may correspond to the indicative or imperative. Moulton cites numerous examples from the papyri which make this possible for the κοινή. But Moulton sees a sharp difference between the “hanging nominative” like ἔχον ὁ νόμος in Heb. 10:1 (if δύνανται be accepted, W. H. δύναται marg.) and ἔχοντες in Ph. 1:30, where, however, W. H. make a long parenthesis and seek to connect ἔχοντες with στήκετε (verse 27.) These are indeed mere anacolutha, but one wonders if the

2 Moulton, Prol., p. 223.
3 Ib.
4 Ib., p. 225.
connection between these and Ro. 12:6 (ἔχοντες) is so very distant after all. Participles are scattered along in this chapter in an “unending series” mingled with infinitives and imperatives. Thus in 12:9–13 we have participles, verse 14 the imperative, verse 15 infinitive, verse 16a participles, 16b imperative, 17 participles. Here the participle does seem to be practically equivalent to the imperative (cf. inf. also). See Participle (Verbal Nouns) for discussion of this point. In 2 Cor. 6:3 the participles skip over verse 2 and carry on the construction of verse 1, and it is resumed in verse 9. For a group of participles with the imperative see Eph. 5:15–22. Cf. also Col. 3:16. Here the participle does seem to be practically equivalent to the imperative (cf. inf. also). See Participle (Verbal Nouns) for discussion of this point. In Eph. 4:2 ἀνεχόμενοι may not be anacoluthon, but may be in accord with ἦς ἐκλήθητε. Col. 1:26 is the case of the indicative rather than a participle (ἔφανερώθη, not πεφανερωμένον). See 1 Cor. 7:37 where ἔχων is succeeded by ἔχει, but (W. H.) ἔγειράς καὶ καθίσας (Eph. 1:20). Cf. Rev. 2:2, 9. As to Heb. 8:10 (10:16) διδούς is explained by Winer as referring to διαθέσοις, while Moulton considers it equal to an indicative and parallel to ἐπιγράψω. I am inclined to agree with Winer on this point. In 2 Cor. 5:6 ff. Paul, after using θαρροῦντες, repeats it in the form of θαρροῦμεν because of the intermediate clauses before he expresses εὐδόκομεν, the main verb. Finally compare ἐφὸν ἂν Ἰδὴς τὸ πνεῦμα καταβάλλον καὶ μένον ἐπι τοῦ αὐτόν (Jo. 1:33) with ἐφον ἂν ἰδης τὸ πνεῦμα καταβαλλον ὡς περιστερὰν ἐξ οὐρανοῦ, καὶ ἔμεινεν ἐπι τοῦ αὐτόν (verses 32), where the last clause is the comment of the Baptist to give special emphasis to that point, more than the participle would.

4. Asyndeton Due to Absence of δέ and ἀλλά. Winer considers the absence of δέ or ἀλλά to correspond with μέν as a species of anacoluthon, and Blass shares the same idea. As a matter of fact (see chapter on Particles) μέν does not require δέ either by etymology or usage. It is rather gratuitous to call such absence an instance of anacoluthon. The examples will be discussed later, such as Ac. 1:1; 13:4; Ro. 11:13, etc.

(f) Oratio Variata.

1. Distinction from Anacoluthon. Sometimes indeed the line between anacoluthon and oratio variata is not very clearly drawn. Thus in Lu. 17:31 (ὅς ἦστατι ἐπὶ τοῦ δόματος καὶ τὰς σκέπας αὐτοῦ ἐν τῇ οἰκίᾳ) the second clause cannot repeat the relative ὅς, but has to use αὐτοῦ. Cf. 1 Cor. 8:6 (ἐξ οὗ—καὶ εἰς αὐτόν), 2 Pet. 2:3 (οἷς—καὶ αὐτῶν). So also in 1 Cor. 7:13 αὐτής repeats ἦτος. Cf. Rev. 17:2. [Page 441] In Ro. 2:6 ff. after the relative clause ὅς ἀποδόσει there is a subdivision of the object, on the one hand (τοῖς μὲν—ζητοῦσιν ζωῆν αἰώνιον), on the other (τοῖς δὲ—ὄδικίᾳ ὀργῇ καὶ

5 Blass, Gr. of N. T. Gk., p. 285.

2 Ib., p. 573.
3 Prol., p. 224.
4 W.-Th., p. 573.
5 Ib.
θυμός) where the nominative changes the construction and ὅς cannot here be repeated. In Ro. 11:22 indeed both of the phrases that extend the accusatives χρηστότης καὶ ἀποτομίαν θεοῦ are put in the nominative (ἀποτομία, χρηστότης). In Gal. 4:6 f. Paul changes from ἐστέ to εἶ. This is all oratio variata in reality and is in accord with the ancient Greek idiom. Blass¹ considers Tit. 1:2 f. an instance of oratio variata, but τὸν λόγον in all probability is to be regarded as in apposition with ἥν, which is the object both of ἔπηγεῖλατο and ἐφανέρωσεν. Thus W. H., but Nestle agrees with Blass.

2. Heterogeneous Structure. That is what oratio variata really is and it can be illustrated by a number of passages other than the relative and with less element of obscurity about them. In Rev. 2:18 ὁ ἔχων is followed by καὶ αὐτοῦ just like the relativ sentences above. Thus also 2 Jo. 2. In Rev. 7:9 after ἔδων καὶ ἰδοῦ we find a mixed construction, ὅλος ἐστῶτες (constr. κατὰ σύνεσιν) with ἰδοῦ, περιβεβλημένως with ἔδων. Winer² rightly distinguishes the variation in case in Rev. 18:12 f. (gen., acc., gen., acc.) and the similar phenomenon in Rev. 2:17 where there is a real distinction between the use of the genitive and the accusative. The use of ὑποδεδεμένους in Mk. 6:8 is probably due to the ellipse of πορεύεσθαι, for the correct text has μὴ ἐνόδοσθαι just after. For similar ellipse and oratio variata see 2 Cor. 8:23. In Mk. 12:38 after θελόντων περιπατήσειν it looks like a sudden change to find ὅσπασμαῖς, but after all both are in the accusative with θελόντων. The irregularity in Mk. 3:16 is met in the text of W. H. by a parenthesis, but it could have been cleared up also by ὃ (referring to Πέτρου instead of καὶ as Winer suggests). In Jo. 8:53 the continuity of the interrogative form of sentence is abruptly broken by the short clause καὶ οἱ προφήται ἐπέθανον, a very effective interruption, however. The case of 1 Jo. 2:2 is simple where instead of περὶ τῶν ὅλου τοῦ κόσμου (to be parallel with οὗ περὶ τῶν ἡμετέρων) John has merely περὶ ὅλου τοῦ κόσμου, a somewhat different conception. A similar example is found in Ac. 20:34 as between τὰς χρείας μου and τῶς οὐσί μετ᾽ ἔμοι. Heb. 9:7 furnishes the same point in inverse order (Ὑπὲρ ἐπιτοῦ καὶ τῶν τοῦ λαοῦ ἄγνοιατόν). A lack of parallel is shown also in Ph. 2:22 between πατρὶ τέκνων καὶ σὺν ἔμοι where Paul purposely puts in σὺν to break a too literal carrying out of the figure. In Rev. 1:6 the correct text in the parenthesis has [Page 442] ἡμᾶς βασιλείαν, ἱεράς τῷ θεῷ, a different conception from βασιλείας. See further Ac. 16:16 f.

3. Participle in Oratio Variata. These offer a frequent occasion for oratio variata, since they can so often be used parallel with subordinate clauses of various kinds. Thus in Jo. 5:44 λαμβάνοντες would naturally be followed by ἔχων, but we have ἄγιος. So, on the other hand, in 1 Cor. 7:13 καὶ συνευδοκεῖ does not fit in as smoothly with ἐπιστοῦ as καὶ συνευδοκοῦντα would. The same lack of parallel in the use of the participle is seen in Jo. 15:5 (ὅ μὲνον καγώ) and in Lu. 17:31 where the relative and the participle are paired off. So also Ph. 1:23 and 1 Jo. 3:24. Cf. the Participle in Anacolutha. In Ro. 12:6 f. participles and substantives are placed in antithesis, as in 2 Cor. 6:3 f. we have participles, in 4–7a ἔν, in 7b f. δὶά, in 9 f.

¹ Gr. of N. T. Gk., p. 286.
² W.-Th., p. 579.
³ Ib.
adjectives and participles. Cf. 2 Cor. 11:23 ff. where adverbs, adjuncts and verbs are in antithesis.

4. Exchange of Direct and Indirect Discourse. But the most striking instance of *oratio variata* is that between direct and indirect discourse. It is either from the indirect to the direct or from the direct to the indirect. As Blass¹ justly observes, the N. T. writers, like all popular narrators, deal very little in indirect discourse. The accusative and the infinitive is not common in the old sense nor is ὅτι always the sign of indirect quotation. Frequently it is merely recitative ὅτι and corresponds to our quotation-marks, as in Mk. 14:14, ἐπείτη τῷ οἰκοδεσπότῃ ὅτι ὁ διδάσκαλος λέγει. So also ὃμεῖς λέγετε ὅτι βλασφημεῖς (Jo. 10:36). This reversion to one form of discourse from another is not unknown to the ancient Greek. But it is peculiarly in harmony with the N. T. vernacular and essentially vivid narrative style. In Lu. 5:14 we have a typical instance of the change from indirect to direct discourse (παρῆγγελεν αὐτῷ μηδὲν εἰπεῖν, ὅλα ἀπελθὼν δείξον σεαυτόν). Exactly parallel with this is Ac. 1:4 ἀλλὰ περιμένειν τὴν ἐπαγγελίαν τοῦ πατρὸς ἢ ἥκουσατε μου where observe μου. Cf. also Ac. 17:3 where after διελέξατο ὅτι—ὁ Ἰησοῦς Luke concludes with the direct words of Paul ὃν ἔγω καταγγέλω ὃμιν. In Jo. 13:29 we have the reverse process where the writer drops from the direct to the indirect statement (ἀγόρισαν ὃν ῥείεν ἔχωμεν εἰς τὴν ἔορτην, ἢ τοῖς πτωχοῖς ἰνὰ τι δῷ). So also we see the same thing in Ac. 23:23 f. (Εὐτωμάσατε—τῆς νυκτὸς, κητίνη τε παραστήσατε ἵνα—διασώσωσιν). But in Ac. 23:22 the other change occurs, as παραγγείλας μηδὲν ἐκλαλῆσαι ὅτι ταῦτα ἔνεφάνισσας πρὸς ἐμὲ. In W. H.’s text of Ro. 12:1 f. [Page 443] we have παρακαλῶ ὃμις παραστήσατε καὶ μὴ συνσχηματίζοσθε (νοτ—σθαί). In Mk. 11:32 the writer proceeds with his own remarks (Ἐφοβοῦτο τὸν ὄρον) after the question rather in the nature of anacoluthon, though in Mt. 21:26 φοβοῦμεθα is read as indeed a few MSS. do in Mark. So also Mt. 9:6, where the writer injects into the words of Jesus τὸτε λέγει τῷ παραλυτικῷ, we probably have anacoluthon rather than *oratio variata* (see (d), Parenthesis).

(g) Connection between Separate Sentences. So far we have been considering the matter of connection between the various parts of the same sentence, whether simple or compound, and the various complications that arise. But this is not all. The Greeks, especially in the literary style, felt the propriety of indicating the inner relation of the various independent sentences that composed a paragraph. This was not merely an artistic device, but a logical expression of coherence of thought. Particles like καί, δὲ, ἀλλά, γάρ, οὖν, ὅτι, etc., were very common in this connection. Demonstrative pronouns, adverbs, and even relative pronouns were also used for this purpose. I happen to open at Mt. 24:32–51 a paragraph of some length. The first sentence begins with δὲ. The sentences in verses 33 and 34 have asyndeton and so are without a connective. In verse 36 δὲ reappears, while the two sentences in verses 37 and 38 both have γάρ. Verse 40 begins with τότε, a common word in this usage in Matthew, as ἐν αὐτῇ τῇ ὥρᾳ is in Luke. Verse 42 begins with οὖν as its connective, while 43 drops back to δὲ. In 44 δὲ τοῦτο answers as a link of union while 45 uses ὧρα. verse 46 f. have asyndeton while 48 has δὲ. This long sentence completes the paragraph save the short sentence in verse 51 introduced by ἐκεῖ. I think this paragraph a fair sample of the didactic portion of the Gospels. Asyndeton occurs, but

---

¹ Gr. of N. T. Gk., p. 286.
it is not the rule. In the Gospel of John οὖν is a much more frequent connective between sentences than καί, as any chapter (11 for instance) will show. The Beatitudes (Mt. 5:3–12) have no connectives at all, and are all the more effective because of the asyndeton. Winer¹ finds this didactic asyndeton common also in James, the Gospel of John (cf. 14–17) and 1 John. But asyndeton is sometimes noticeable also in the non-didactic portions of John, as 20:14–18. No formal rules on the subject can be made, as the individual speaker or writer follows his mood of the moment in the matter. The point is to observe that, while asyndeton often occurs, in general Greek writers even in the N. T. use connectives between separate sentences.

[Page 444] (h) CONNECTION BETWEEN PARAGRAPHS. It is only natural to carry the matter one step further and unite paragraph with paragraph. For a discussion of the origin of the paragraph see the chapter on Orthography and Phonetics. The paragraphs in our printed Greek texts are partly the work of the modern editors, yet not wholly so. But even in real or original paragraphs the connection varies greatly. In some there will be none at all, but an entirely new theme will be presented, whereas with others we merely have a new aspect of the same subject. I happen to turn to the sixth chapter of John. The chapter opens with μετὰ ταῦτα, a real connective that refers to the incidents in chapter 5, which may have been a full year before. The next paragraph in W. H. begins at verse 14 and has οὖν. At verse 22 there is no connective except τῇ ἐπαύριον which may be compared with the τότε of Matthew. The paragraph at verse 41 has οὖν again, which is very common in John in this connection, as can be seen illustrated also in verses 52 and 60. At verse 66 the paragraph begins with ἐκ τοῦτου, a real connective. If we go into chapter 7 we find καί in verse 1, δέ in verse 10, δέ again in verse 14, οὖν in verse 25, no connective in verse 32, δέ in verse 37, οὖν in verse 45. Asyndeton on the whole is rather more frequent in the Gospel of John than in the Synoptic Gospels.¹ Abbott² gives a detailed discussion of the kinds of asyndeton in John. In Paul’s Epistles one would expect little asyndeton between the paragraphs especially in the argumentative portions. In general this is true, and yet occasionally even in Ro. asyndeton is met as in 9:1; 13:1. But in chapter 8 every paragraph has its connective particle. Note also οὖν in 12:1 at the beginning of the hortatory portion after the long preceding argument. As between sentences, there is freedom in the individual expression on the subject. For Hort’s theory of the paragraph see Intr. to N. T. in Gr., p. 319. By means of spaces he has a system of sub-paragraphs, as is plain in the text of W. H.

XIII. Forecast. There are other things to be considered in the construction of the sentence, but enough has been treated in this chapter. What remains in syntax is the minute examination of the relations of words (cases, prepositions, pronouns, verbs in mood and voice and tense, infinitives and participles), the relations of clause with clause in the use of subordinating conjunctions, the particles, figures of speech (aposiopesis, ellipsis, paronomasia, zeugma, etc.). There is a natural order in the development of these matters which will be followed as far as possible in the discussion [Page 445] of syntax. The individual words come before the relation of

¹ W.-Th., p. 536.
¹ Abbott, Joh. Gr., p. 70 f.
² Ib. Cf. W.-Th., p. 537.
sentences or clauses. In the discussion of words either nouns or verbs could be taken up first, but, as verbs are connected more closely with conjunctions than nouns they are best treated just before conjunctural clauses. Prepositions are properly discussed after cases. The article is a variation of the demonstrative pronoun. But at best no treatment of syntax can handle every aspect and phase of language. The most that can be achieved is a presentation of the essential principles of N. T. syntax so that the student will be able to interpret his Greek N. T. according to correct grammatical principles derived from the living language of the time.

[PAGE 446] CHAPTER XI

THE CASES (ΠΤΩΣΕΙΣ)

I. History of the Interpretation of the Greek Cases.

(a) CONFUSION. Perhaps nowhere has confusion been worse confounded than in the study of the Greek cases. The tendency has been usually to reason backwards and to explain past phenomena by present conditions. The merely logical method of syntax has turned the pyramid on its apex and has brought untold error into grammar.¹ The Stoics took interest in grammar for philosophical purposes and gave the logical bent to it in lieu of the historical. Dionysius Thrax and Apollonius Dyscolus went off on the wrong trail in the matter of the Greek cases.

(b) BOPP’S CONTRIBUTION. Bopp brought daylight out of darkness by comparative grammar. Hübschmann² gives an admirable history of the matter. He illustrates the eight cases copiously from the Sanskrit, Zend and Persian. Thanks now to such workers as Schleicher, Brugmann, Delbrück, the eight Indo-Germanic cases are well

¹ Hübschmann, Zur Casuslehre, p. v.
² Ib. Cf. Dewischeit, Zur Theorie der Casus (1857); Rumpel, Die Casuslehre (1875).

Hadley (Essays Phil. and Crit., Gk. Gen. as Abl., p. 46) speaks of “the Beckerite tendency, too frequently apparent in Kühner, to impose a meaning on language rather than educe the meaning out of it.”

Brugmann

BRUGMANN, K., Elements of Comparative Grammar of the Indo-Germanic Languages (translation by Wright, 1895).

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).
wrought out and generally acknowledged. Cf. brief discussion of the forms of the Greek cases in chapter VII (Declensions). Greek grammarians still differ, however, in the terminology applied to the cases. In 1911 the Oxford and Cambridge scholars issued a tract “On Terminology in Grammar,” but confusion still reigns. See also W. Havers, Untersuchungen zur Kasussyntax der indog. Sprachen. When the Stoic grammarians wrote, the genitive and ablative had the same forms, and the locative, instrumental and dative likewise. There were occasional survivals of distinction like οἰκος and οἰκῳ, Cypriotic instrumental ὁδός and dative ὁδοῖ, etc. But in general the work of syncretism was complete in the respects just mentioned, though [Page 447] in Arcadian the genitive and the locative took the same form\(^1\) (cf. Latin Romae, domi). But the grammarians, ignorant of the history of the language, sought to explain the genitive and ablative ideas from a common source. Thus Winer\(^2\) boldly calls the genitive the “whence-case” and undertakes to explain every usage of the genitive from that standpoint, a hopeless exercise in grammatical gymnastics. The same sinuosities have been resorted to in the effort to find the true dative idea in the locative and instrumental uses of the forms called dative by the grammars.

(c) MODERN USAGE. Some modern grammarians\(^3\) help matters a good deal by saying true genitive, ablatival genitive, true dative, locatival dative, instrumental dative. This custom recognises the real case-distinctions and the historical outcome. But some confusion still remains because the locative and the dative never mean exactly the same thing and are not the same thing in fact. It partly depends on whether one is to apply the term “case” to the ending or to the relation expressed by the ending. As a matter of fact the term is used both ways. Ὄνομα is called indiscriminately nominative, vocative or accusative, according to the facts in the context, not nominativial accusative or accusatival nominative. So with βασιλεῖς or πόλεις. We are used to this in the grammars, but it seems a shock to say that πόλεως may be either genitive or ablative, that ἔμοι may be either locative, instrumental or dative. But why more of an absurdity than in the case of Ὄνομα and πόλεις? The only difference is that in the gen.-abl. the syncretism of form applies to all Greek words. For various examples of syncretism in the forms of the Greek cases with fragments of distinctive endings also see Brugmann, Griech. Gr., p. 375 f.; Brugmann, Kurze vergl. Gr., II, p. 420 f.; and chapter VII (Declensions).

3 Cf. Babbitt, A Gr. of Attic and Ionic Gk., 1902.
(d) GREEN’S CLASSIFICATION. I agree with B. Green, whom I shall here quote at some length: “I shall classify the uses of the cases under the heads of the Aryan Cases, as in every instance the true method of explanation of any particular idiom is to trace its connection to the general meaning of the original Aryan case, to which the case in Greek or Latin corresponds, and not arbitrarily to distinguish the uses of any case in Greek or Latin by terms which cannot be properly applied to that case; e.g., the term dative of manner is no explanation. Manner cannot be expressed [Page 448] by the true dative case. The correct explanation is that the use is instrumental, but the instrumental case in Greek has coalesced in form with the dative. This method of explanation has the advantage of demanding fewer set terms, while at the same time it requires a logical connection to be made between the particular use in question and the fundamental meaning of the case involved. Such an explanation is the better the simpler the words used in it are.” This is wonderfully well said and has the advantage of being true, which is not always said of grammatical comments. It is the method of history, of science, of life. It is the method pursued in the etymology and history of a word. It is the only way to get at the truth about the significance of the Greek cases.

(e) SYNCRETISM OF THE CASES. This method of interpretation does not ignore the syncretism of the cases. On the other hand it accents sharply the blending of the forms while insisting on the integrity of the case-ideas. There are indeed some instances where either of the blended cases will make sense, like τῇ δεξιᾷ τοῦ θεοῦ ὑψωθέτεις (Ac. 2:33), which may be locative ‘exalted at,’ instrumental ‘exalted by,’ or dative ‘exalted to’ (a rare idiom and in the older Greek), ‘the right hand of God.’ Cf. also τῇ ἔλπιδι ἐσώθησεν (Ro. 8:24). So in Heb. 12:11 χαρᾶς and λύπης may be explained either as genitive or ablative. But such occasional ambiguity is not surprising and these instances on the “border-line” made syncretism possible. In general the context makes it perfectly clear which of the syncretistic cases is meant, just as in English and French we have to depend on the order of the words to show the difference between nominative and accusative. Yet no one would say that nominative and accusative are the same in English and French.1

(f) FREEDOM IN USE OF CASE. As a matter of fact it was often immaterial whether a writer or speaker used one of several ways of expressing himself, for the Greek allows liberty and flexibility at many points. Thus τῷ γένος and τῷ γένει would either answer for the specifying idea, προσκυνέω is used with either accusative or dative, μυνήσκομαι with accusative or genitive, etc.2 But this is not to say that one construction is used for another or is identical with the other. The difference may be “subtle, no doubt, but real” (Moulton, Prolegomena, p. 66). Moulton properly (ib.) cites the [Page 449] well-known distinction between the accusative and genitive with ἀκούω in Ac. 9:7 and 22:9 as disproof of apparent self-contradiction and a gentle hint not to be too ready to blur over case-distinctions in Luke or elsewhere in the N. T. He notes also genitive and accusative with γεύεσθαι in Heb. 6:4 f. and the common use of εἰς with accusative after verbs of rest and ἔν with locative even after verbs of motion.

Green GREEN, B., Notes on Greek and Latin Syntax (1897).
4 Notes on Gk. and Lat. Synt., 1897, p. 11.
1 Simcox, Lang. of the N. T., p. 75, illustrates the rapid disappearance of case-endings in the Irish tongue, which as late as i/A.D. had a full set of inflections, whereas by the fifth century only traces of the dat. plur. survive.
2 W.-Th., p. 180.
But it is hazardous to insist always on a clear distinction between εἰς and ἐν, for they are really originally the same word. The point is that by different routes one may reach practically the same place, but the routes are different. Indeed one may take so many different standpoints that the border-lines of the cases come very close sometimes. So ἐξ ἀριστερᾶς (abl.), ἐν ἀριστερᾷ (loc.), εἰς ἀριστεράν (acc.) are all good Greek for ‘on the left’ (we have also in English ‘at the left,’ ‘to the left’).

II. The Purpose of the Cases.

(a) ARISTOTLE’S USAGE. He applied the term πτώσις to verb, noun, adverb, etc., but the later grammarians spoke only of the πτώσις ὁνόματος, though as a matter of fact adverbs and prepositions are in cases, and even conjunctions and other particles are usually in cases. But in ordinary parlance substantives, adjectives, pronouns, the article are in cases and have inflection. The cases originally had to do only with these. The adverbs were merely later modifications or fixed case-forms.

(b) WORD-RELATIONS. The cases were used to express word-relations, the endings serving to make it plain what the particular case was. The isolating languages, like the Chinese, show such relations by the order of the words and the tone in pronunciation. Modern English and French use prepositions chiefly besides the order of the words. These word-relations concern substantives in their relations with other substantives, with adjectives, with prepositions and with verbs. So adjectives and pronouns have all these relations. It is immaterial whether verb or substantive is the earliest in the use of a case with a substantive. In the old Sanskrit practically all the word-relations are expressed by the eight cases. This was a very simple plan, but as language became more complicated a great strain was bound to be put on each of these cases in order to convey clearly so many resultant ideas.

As a matter of fact the ground-meaning of the case-forms is not known. On Origin of Case-Forms see chapter VII, I, 2, (c).

[Page 450] III. The Encroachment of Prepositions on the Cases.

(a) THE REASON. The burden upon the cases was too great. Even in the later Sanskrit a number of set case-forms (adverbs) came to be used with some of the cases to make clearer the exact relations of words, whereas in the older Sanskrit no such helpers were felt to be needed. This was the beginning of prepositions. Prepositions have a wrong name. They do not come before anything essentially, and just as often in Homer came after the noun. Indeed ὁμώκτον ἕτοι is not anastrophe, but the original type. Nor was the preposition originally used with verbs. The preposition is merely an adverb that is used with nouns or in composition with verbs. But more about that hereafter (Prepositions). The point to note here is that when the burden upon the cases

1 Farrar, Gk. Synt., p. 67.
2 Cf. Steinthal, Gesch. der Sprachw., p. 259; Hübschm., Zur Casusl., p. 3.
3 Brugmann, Griech. Gr., p. 374.
1 Giles, Man. of Comp. Philol., p. 341.
grew too great adverbs were called in to make clearer the meaning of the case in harmony with the analytic tendency of language.2

(b) No “GOVERNING” OF CASES. These adverbs did not govern cases. They were merely the accidental concomitants, more or less constant, of certain cases. At best “the cases could express relationship only in a very general way. Hence arose the use of adverbs to go with cases in order to make the meaning more specific. These adverbs, which we now call prepositions, in time became the constant concomitants of some cases; and when this has happened there is an ever-increasing tendency to find the important part of the meaning in the preposition and not in the case-ending.”3 This quotation from Giles puts the matter in a nutshell. In spite of the average grammian’s notion that prepositions govern cases, it is not true. The utmost is that the preposition in question is in harmony with the case in question.4

(c) NOT USED INDIFFERENTLY. These prepositions were not used indifferently with all the cases. They are, of course, impossible with the vocative. But the nominative may be used with such adverbs, not called prepositions by the grammarians because it seems difficult to explain a preposition “governing” the nominative. But Paul does not hesitate to say ὑπερ ἐγώ (2 Cor. 11:23) though ὑπερ is not construed with ἐγώ. Cf. also εἷς κατὰ εἷς (Mk. 14:19), καθεἷς (Ro. 12:5). It is not certain that any prepositions are [see XII, (f)] used with the true dative and few with [Page 451] the instrumental (ἐμα, σν). Giles1 denies that the genitive is ever used with a preposition. Certainly what is called the genitive with prepositions is often the ablative. Probably ἐξ and ἀντι are used with the real genitive. Naturally the cases that are more local in idea like the locative (‘where’), the accusative (‘whither’) which is partly local, the instrumental (‘where-with’) and the ablative (‘whence’) are those that are most frequently supplemented by prepositions.2

(d) ORIGINAL USE WITH LOCAL CASES. Originally most of the prepositions were used with either of these local cases (loc., instr., abl.). Some few of them continued to be so used even in the N. T. This matter will come up again under the head of Prepositions, but we may note here that ἑξι and ἀντι are the only prepositions that use three cases with any frequency3 in the N. T., and in the case of ἑξι it is probably the true genitive, not the ablative. Προς has accusative 679 times, locative 6, and

Giles

GILES, P., A Short Manual of Comparative Philology. 2d ed. (1901).

4 Cf. Delbrück, Vergl. Synt., I, p. 173. Farrar (Gk. Synt., p. 94 f.) puts the matter succinctly: “It is the case which borrows the aid of the preposition, not the preposition which requires the case.”
1 Man. of Comp. Philol., p. 341.
2 Ib. But Monro, Hom. Gr., p. 125, correctly admits the gen.
3 Moulton, Prol., p. 106 f.
ablative 1 (Ac. 27:34, a literary example). 4 The bulk of those that have two are narrowing down to one case5 while δν, δντ, εκ, ἐν, πρò have only one, and ἄμφι has disappeared save in composition. If this N. T. situation, which is amply supported by the papyri, is compared with the usage of Homer, the contrast will be very great. 6 To carry the matter a step further one may note that in late Greek there is a constant tendency for all prepositions to be used with the accusative, so that in modern Greek vernacular all the “proper” prepositions are regularly employed with the accusative. 7 The occasional LXX use of σῦν + accusative, while a mere error, was in line with this tendency.

(e) INCREASING USE OF PREPOSITIONS. The constantly increasing use of prepositions is one of the main reasons for the blending of the case-forms. This was already partly apparent in the Sanskrit in the assimilation of genitive and ablative singular and in the plural of ablative and dative. So the Latin locative, dative, ablative, instrumental, in most words merged their forms. Moulton 8 accents the fact that it was the local cases (loc., abl., instr.) in the Greek that first gave way in their endings. That is true with the exception of the accusative (not a purely local [Page 452] case), which has shown more persistence than any case save the genitive. The genitive is a non-local case and has held on, though the dative has disappeared in modern Greek vernacular before εκ + accusative, the accusative without εκ, and the genitive. But this break-down of the case-endings seen in Sanskrit, much more apparent in Greek and Latin, has reached its climax in modern English and French. In modern English the six Anglo-Saxon endings, barring pronouns, have disappeared save one, the genitive (6), and even that can be expressed by the prep. of. In French the process is complete except in prons. Modern Greek vernacular shows the influence of this tendency very decidedly. The Greek of the N. T. comes therefore in the middle of the stream of this analytic tendency. In the old Sanskrit it was all case and no preposition. In modern French it is all preposition and no case-ending. The case-ideas have not disappeared. They are simply expressed more minutely and exactly by means of prepositions. By and by the case-endings were felt to be useless as the preposition was looked to entirely for the idea. The case without preposition belongs to the early stage of language history. 1 When Delbrück 2 speaks of a “living” case, he means the case-ending, as does Moulton 3 when he asserts that “we can detect a few moribund traces of instrumental, locative and ablative.” 4 If he means the case-meaning, the instances are abundant. And even in case-ending it is not all one-sided, for the locative –ι and the instrumental –οις both contributed to the common stock of forms. Henry 5 even suggests that in ὄνομα-τος we have the ablative τ(ο) for the Latin word is nomen (nominis).

(f) DISTINCTION PRESERVED IN THE N. T. But the N. T. has not lost distinctive use of the cases and prepositions. Special causes explain some of the phenomena in the N. T. The excessive use of ἐν in the N. T. is parallel to that in the LXX (cf. Jer. 21:5 f., 9 f.) and is doubtless due partly to the Hebrew י which it so commonly translates as Moulton⁵ observes. But the so-called instrumental use of ἐν like ἐν ὑμᾶς ἀγγέλῳ (Rev. 6:8; cf. Mt. 12:26 f.) is not due entirely to the Hebrew, for, while very common in the LXX, where it is in “the plenitude of its power,”⁶ yet the papyri show undoubted examples of the same instrumental [Page 453] usage.¹ See further Locative Case and also Prepositions (ἐν). Indeed in the N. T. ἐν outnumbers εἰς three to two.² If these two prepositions are left out of consideration, the disappearance of the locative with prepositions is quite marked in the N. T., a decay already begun a good while before,³ only to be consummated in the modern Greek vernacular, where εἰς has displaced ἐν (Thumb, Handb., p. 100). When one recalls that dative and instrumental also have gone from the modern Greek vernacular and that στό with the accusative (εἰς τόν) replaces all three cases in modern Greek and that originally ἐν and εἰς were the same preposition, he is not surprised to read ὁ εἰς τόν ὄρον (Mk. 13:16) where Mt. 24:18 has ὁ ἐν τῷ ὄρει. So Mt. 12:41, μετενόησαν εἰς τὸ κήρυγμα Ἰωάν. Moulton⁴ has a very suggestive study of πιστεύω. He omits those examples where the verb means ‘entrust’ and finds about forty others with the simple dative. In the majority of these forty the verb means ‘believe.’ There are some debatable passages like Jo. 5:24, 38; 8:31; Ac. 5:14; 16:34; 18:8. He finds only one passage outside of Eph. 1:13 where ἐν ὧς is assimilated (cf. ἔσφραγίσθητε), viz. Mk. 1:15 (πιστεύετε ἐν τῷ εὐαγγελίῳ), and

he follows Deissmann in taking ἐν as ‘in the sphere of.’ Πιστεύω ἐπὶ is found six times with the locative and seven with the accusative in the sense of ‘repose one’s trust’ upon God or Christ. But Πιστεύω ἐπὶ occurs 45 times (37 in Jo. and 1 Jo.) in the sense of ‘mystical union with Christ,’ like Paul’s ἐν Χριστῷ.  

IV. The Distinctive Idea of Each of the Cases.  

(a) FUNDAMENTAL IDEA. The point is, if possible, to get at the fundamental idea of each of the eight original cases. To do this it is essential that one look at the Greek cases historically and from the Greek point of view. Foreigners may not appreciate all the niceties, but they can understand the respective import of the Greek cases. The N. T. writers, as we now know perfectly well, were not strangers to the vernacular κοινή, nor were the LXX translators for that matter, though they indeed were hampered by translating a Semitic tongue into Greek. The N. T. writers were in their element when they wrote vernacular κοινή. They knew the import of the Greek cases as used at that time by the people at large.

6 Cf. Heitmüller, Im Namen Jesu, I, ch. 4  
7 Farrar, Gk. Synt., p. 68.
(b) CASES NOT USED FOR ONE ANOTHER. We have no right to assume in the N. T.
that one case is used for another. That is to say, that you have a genitive, but it is to be
understood as an accusative. Winer properly condemns such enallage casuum. Not
even in 2 Cor. 6:4 (συνιστάνοντες ἐκαίνιος ὡς θεοῦ διάκονοι) do we have an instance
of it, for the nominative (lit. plural) means ‘as minister of God I commend myself,’
while the accusative (διακόνους) would be, ‘I commend myself as a minister of God.’
We are then to look for the distinctive idea of each case just as we find it. In the
modern Greek, to be sure, the cases are in such confusion (dative, locative,
instrumental gone) that one cannot look for the old distinctions.

(c) VITALITY OF CASE-IDEA. This independence of the case-idea is not out of
harmony with the blending of case-forms (abl. and gen., loc. and instr. and dat.). This
is a very different matter from the supposed substitution of cases alluded to above.
The genitive continued to be a genitive, the ablative an ablative in spite of the fact that
both had the same ending. There would be, of course, ambiguous examples, as such
ambiguities occur in other parts of speech. The context is always to be appealed to in
order to know the case.

(d) THE HISTORICAL DEVELOPMENT OF THE CASES. This is always to be
considered. The accusative is the oldest of the cases, may, in fact, be considered the
original and normal case. Other cases are variations from it in course of linguistic
development. With verbs in particular which were transitive the accusative was the
obvious case to use unless there was some special reason to use some other. The other
oblique cases with verbs (gen., abl., loc., instr., dat.) came to be used with one verb or
the other rather than the accusative, because the idea of that verb and the case
coalesced in a sense. Thus the dative with πείθομαι, the instrumental with χράομαι,
etc. But with many of these verbs the accusative continued to be used in the
vernacular (or even in the literary language with a difference of idea, as ἄκοιμω). In
the vernacular κοινή the accusative is gradually reasserting itself by the side of the
other cases with many verbs. This tendency kept up to the complete disappearance of
the dative, locative and instrumental in modern Greek (cf. Thumb, Handb., p. 31), and
the [Page 455] genitive, accusative and εἰς compete for the function of the old dative
(ib., pp. 38 ff.). The accusative was always the most popular case. Krebs\(^2\) has made a
useful study of the cases in the literary κοινή, and Moulton\(^3\) thinks that these
tendencies of the literary κοινή are really derived from the vernacular. But not all the
verbs fall in with the decay of the dative-locative-instrumental. Thus προςκυνεῖν in
the N. T. has the dative twice as often as the accusative, just the opposite of the

1 Jann., Hist. Gk. Gr., p. 325.
Krebs

KREBS, F., Die Präpositionen bei Polybius (1882. Schanz’ Beiträge).

3 Prol., p. 64.
inscriptions. But the papyri show little proof of the decay of the dative save in the illiterate examples. The accusative gains from the genitive and ablative in the N. T. also, as Krebs found in the later literary Greek. Moulton finds that out of 47 examples κρατεῖν has the genitive only 8 times, but διαφέρειν (‘surpass’) has the ablative. ἐντρέπεσθαι takes only the accusative, and the accusative appears with verbs of filling (Rev. 17:3). Moulton concludes his résumé of Krebs by calling attention to the list of verbs that were once intransitive, but are transitive in the κοινὴ. This is a matter that is always changing and the same verb may be used either way. A verb is transitive, by the way, whether it takes the accusative or not; if it has any oblique case it is transitive. As illustrations of this varied usage Moulton cites from the N. T. ἐνεργεῖν, συνεργεῖν, ἐπέρχεσθαι, καταβαρεῖν, καταλαλεῖν, καταπονεῖν, πλεονεκτεῖν, προσφωνεῖν, ὑποτρέχειν, χορηγεῖν. He concludes his discussion of the matter with a needed caveat (p. 65 f.) against thinking that all distinctions of case are blurred in the N. T. “We should not assume, from the evidence just presented as to variation of case with verbs, that the old distinctions of case-meaning have vanished, or that we may treat as mere equivalents those constructions which are found in common with the same word.” Analogy no doubt played its part in case-contamination as well as in the blending of the case-endings.

The Method of this Grammar. In the study of each case the method of this grammar is to begin with the root-idea of the particular case in hand. Out of that by means of context and grammatical history the resultant meaning in the particular instance can be reached. This is not only more simple, but it is in harmony with the facts of the linguistic development and usage. Even in an instance like ἐν μαχαίρῃ (Lu. 22:49) the locative case is not out of place. The smiting (πατάξομαι) is conceived as located in the sword. Cf. ἐν ῥάβδῳ (1 Cor. 4:21). The papyri show the same usage, as indeed the older classical Greek did occasionally. In English we translate this resultant idea by ‘with,’ but we have no right to assume that the Greeks thought of ἐν as ‘with.’ The LXX shows that the Hebrew בְּ corresponded closely to the Greek ἐν in this resultant idea. In translation we often give not the real meaning of the word, but the total idea, though here the LXX follows closely the Hebrew. One of the chief difficulties in syntax is to distinguish between the Greek idiom and the English translation of the idiom plus the context. But enough of preliminary survey. Let us now examine each case in turn.

V. The Nominative (πτῶσις ὑθη, εὐθεῖα, ὀνομαστική).

6 Prol., p. 65.
7 Ib. Blass, Gr. of N. T. Gk., p. 102. Cf. Thumb, Theol. Lit., XXVIII, p. 422, for mod. Gk. usage. As a matter of fact the acc. was always more popular in the vernac. Gk., and no wonder that the pap. show it to be so even with verbs usually in the lit. lang. used with other cases. Cf. Völker, Pap. Graec. Synt., 1900, p. 5 f.
For the older books on the nominative case see Hübner, Grundriss etc., p. 36.

(a) Not the Oldest Case. The first thing to observe about the nominative is that it is not the oldest case. The accusative is treated first in some grammars and seems to be the oldest. That is the proper historical order, but it seems best on the whole to treat the so-called “oblique” cases together. The term “oblique cases” (πτώσεις πλάγιαι) has a history. The nominative was not originally regarded as a case, but merely the noun (ὀνομα). So Aristotle. The vocative is not a real case, as we shall see directly. Hence a case (casus) was considered ὡς ἀπὸ τοῦ ὀνόματος πεπτωκυία, a real πτώσις. All the true cases therefore were oblique. Indeclinable words are ἄπτωτα. When the nominative was considered a case it was still called by the word for noun (ὄνοματική, nominativus), the naming or noun case. The Hindu grammarians indeed call the nominative prathamā (‘first’) as the leading case, not in time, but in service. This is merely the logical arrangement followed by the Western scholars. There was once no need felt for a nominative, since the verb itself had its own subject in the personal endings. But originally one may suppose a word served as subject of the verb and may have become an ending. Even the impersonal verbs like καλῶς ἔχει have the subject in the same way. The use of a special case for this purpose was an after-thought.

(b) Reason for the Case. Why then was the nominative used? Why was it ever originated? Its earliest use was in apposition to the verbal subject alluded to above. Greater precision in the subject was desired, and so a substantive or pronoun was put in apposition with the verbal ending. Sometimes both substantive and pronoun are employed as in αὐτὸς δὲ ἔγὼ Παῦλος παρακάλω (2 Cor. 10:1). Other languages can even use other cases for such apposition in the predicate. Cf. English It’s me, French c’est moi and Latin dedecori est. And the Greek itself shows abundant evidence of lack of concord of case in apposition (cf. Rev. in the N. T.). But the nominative is a constant resource in appositional phrases, whatever case the other word may be in. The whole subject of apposition was discussed in the chapter on the Sentence. Cf. ὁ ἄνθρωπος ὑπός, where the same point applies. Cf. ἄνὴρ τῆς Ἀνανίας (Ac. 5:1). In the modern Greek this usage partly replaces the explanatory genitive, as σπυρὶ σινάπι, ‘mustard seed’ (Thumb, Handb., p. 33).

(c) Predicate Nominative. The predicate nominative is in line with the subject nominative. It is really apposition. The double nominative belongs to Greek as to all languages which use certain verbs as a copula like εἶναι, γίνεσθαι, καλεῖσθαι, etc. Cf. σὺ εἶ Πέτρος (Mt. 16:18). The Latin is fond of the dative in such examples as id mihi

Hübner HÜBNER, E., Grundriss zu Vorlesungen über die griech. Syntax (1883).

1 Ib., p. 302.
2 Cf. Delbrück, Vergl. Synt., I, p. 188.
3 Cf. Meisterh., Gr. d. att. Inschr., p. 203, for exx. of the free use of the noun in app.
4 Monro, Hom. Gr., p. 117.
honori est, and the Greek can use one dative, as ὅνομά ἐστι μοι.  
Thus in the N. T. ἔξωλήθη τὸ ὄνομα αὐτοῦ Ἰησοῦς (Lu. 2:21), ἀνὴρ καλούμενος Ζακχαῖος (Lu. 19:2), ἢν ὄνομα τῷ δούλῳ Μάλχος (Jo. 18:10), as well as Ἰωάνης ἐστιν ὄνομα αὐτοῦ (Lu. 1:63). The use of the nominative in the predicate with the infinitive in indirect discourse (φάσκοντες εἶναι σοφοί, Ro. 1:22) is proper when the subject of the principal verb is referred to. See Indirect Discourse (Modes and Initative). But the N. T., especially in quotations from the LXX and passages under Semitic influence, often uses [Page 458] εἶς and the accusative rather than the predicate nom. Moulton1 denies that it is a real Hebraism since the papyri show the idiom ἔσχον παρ’ ὕμων εἰς δάρκειον σπέρματα, K.P. 46 (ii/A.D.), where εἰς means ‘as’ or ‘for,’ much like the N. T. usage. But the fact that it is so common in the translation passages and that the LXX is so full of it as a translation of 5 justifies Blass2 in saying that it is formed on a Hebrew model though it is not un-Greek. Winer3 finds it in the late Greek writers, but the Hebrew is chiefly responsible for the LXX situation. The most frequent examples in the N. T. are with εἶναι (ἔσχον εἰς σάρκα μίαν, Mt. 19:5, which can be compared with Lu. 3:5; 2 Cor. 6:18; Ac. 8:23, etc.), γίνεσθαι (ἔγενεν ὀλίγα κεφαλῆς, Ac. 13:22, ἔλογισθον εἰς δικαιοσύνην (Ro. 4:3 ff.). Cf. also Jo. 16:20. Probably the following examples have rather some idea of purpose and are more in accord with the older Greek idiom. In 1 Cor. 4:3, ἔμοι εἰς ἴδια Ὀσίων ἔστιν, the point is not very different. Cf. also 1 Cor. 14:22 (εἰς σημεῖον). But observe μὴ εἰς κενὸν γένηται (1 Th. 3:5), εἰς πάντας ἄνθρωποις εἰς κατάκριμα (Ro. 5:18), ἔγενετο ἢ πόλες εἰς τρία μέρη (Rev. 16:19).

(d) SOMETIMES UNALTERED. As the name-case the nominative is sometimes left unaltered in the sentence instead of being put in the case of the word with which it is in apposition. Cf. Rev. 1:5; Mk. 12:38–40; Lu. 20:27; Ac. 10:37. This is in accord with the ancient Greek idiom, though the Book of Rev. has rather more than the usual proportion of such examples. See chapter on the Sentence, pp. 413 ff. In Rev. 9:11 observe ὄνομα ἑξήλιολον (cf. Ἀβαδάδων also), where the nominative is retained much after the fashion of our quotation-marks. The same thing4 is noticeable in Jo. 13:13 ἰμάεις φονέτε με Ο διάδοσιν τοῦ καλοῦ οὐρα τοῦ. For thus W. H. print it. This is a classic idiom. Cf. Xenoph., Oec. 6, 14 ἔχοντας, τῷ σεμνῷ τούτῳ τῷ καλῷ τῷ κάγαθῳ. Cf. Lu. 19:29; 21:37, where W. H. print εἶς τῷ δόρῳ τῷ καλοῦμενον ἐλαίῳν. But we know from Ac. 1:12 (ἐπὶ δόρου τοῦ καλοῦμένου ἐλαίῳν) that ἐλαίων could be in Luke a nominative (abundantly confirmed [Page 459] by the papyri). The most that can be said about the passages in Luke is unaltered in the sentence.

6 Cf. K.-G., I, p. 44.
7 Cf. W.-Sch., p. 256.
1 Prol., p. 71 f.
3 W.-Th., p. 184.
4 Moulton, Prol., p. 235, endorses Blass’s view (Gr. of N. T. Gk., p. 85) that in Jo. 13:13 we have the voc. The nom. is hardly “incredible” (Blass). Cf. loose use of the nom. in lists in Bœot. inscr. in the midst of other cases (Claflin, Synt., etc., p. 46).
entirely possible, perhaps probable.\(^1\) In Rev. 1:4 (Ἀπὸ ὁ ὦν καὶ ὁ ἡν καὶ ὁ ἔρχόμενος) the nominative is kept purposely, as has been shown, to accent the unchangeableness of God, not that John did not know how to use the ablative after ἀπό, for in the same sentence he has ἀπὸ τῶν πνευμάτων. Moulton\(^2\) aptly describes the nominative as “residuary legatee of case-relations not obviously appropriated by other cases.” But as a matter of fact the nominative as a rule is used normally and assimilation is general so that in Mt. 1:21 (cf. 1:25 also) we read καλέσεις τὸ ὄνομα αὐτοῦ Ἰησοῦν. Cf. Mk. 3:16 ὄνομα Πέτρου and Ac. 27:1 ἐκατοντάρχη ὄνοματι Ἰουλίῳ. Cf. Ac. 18:2. It is, of course, strange to see the nominative form in apposition with a vocative, as of φοβοῦμενοι (Rev. 19:5), πάτερ ἡμῶν ὃ ἐν τοῖς οὐρανοῖς (Mt. 6:9). This is only natural as the article and participles have no vocative form. Cf. ὃ ἀνθρωπες ὃ κρίνων (Ro. 2:3). Cf. even οὐάι ὑμῖν, οἱ ἐμπεπλησμένοι (Lu. 6:25), where we have really the vocative, not apposition.

(c) The NominaTive abSolute. The nominative is sometimes used absolutely, nominatus pendens, just as the genitive (ablative) and accusative are. Cf. ablative absolute in Latin, locative in Anglo-Saxon, and nominative absolute in modern Greek and modern English. In titles the nominative is the natural case and is left suspended. Cf. Παῦλος κλητὸς ἀπόστολος (1 Cor. 1:1). The LXX has an abnormal number of suspended nominatives, due to a literal translation of the Hebrew.\(^3\) But the N. T. has some also which are due to change of structure, as ὃ νικῶν ποιήσω αὐτόν (Rev. 3:12), ὃ νικῶν δώσω αὐτῷ (Rev. 3:21), ὃ γὰρ Μωϋσῆς ὄνομα—οὐκ οἴδαμεν τί ἐγένετο αὐτῶ (Ac. 7:40), πάν βῆμα ἄργων—ἀποδόσουσι περὶ αὐτοῦ λόγον (Mt. 12:36), ταῦτα ἐθεωρήσετε, ἐλεύσονται ἡμέραι (Lu. 21:6). In particular is the participle (cf. Jo. 7:38, ὃ πιστεύουν εἰς ἐμὲ) common in such a nominative, about which see the chapter on the Sentence (anacoluthon). Moulton\(^4\) considers this one of “the easiest of anacolutha.” Cf. further πᾶς ὃς ἐρεῖ—ἀφεθήσεται αὐτῷ (Lu. 12:10; cf. verse 8). Cf. Jo. 18:11. Some of the examples, like τὸ ἀδύνατον τοῦ νόμου, ἐν ᾧ ἦσθενε (Ro. 8:3), may be regarded as accusative as easily as nominative. The \([Page 460]\) papyri\(^1\) show plenty of examples of this suspended nominative. For classical instances see Riemann and Goelzer, Syntaxe, p. 41. For elliptical nominative see Εὐδοία (Mt. 16:2). There was a constant tendency in the LXX to drift into the nominative in a long series of words in apposition (Thackeray, p. 23).

(f) the ParenThetic NominaTive is of a piece with what we have been considering. So in Jo. 1:6 we have ὄνομα αὐτῷ Ἰωάννης all by itself. Cf. 3:1 (Νικόδημος ἄρωνα αὐτῶ). Similarly the nominative in expressions of time rather than the accusative may be explained.\(^2\) For example in Mk. 8:2 we read ὅπι ἡ ἡμέρα τρεῖς προσμένουσιν μοι and=Mt. 15:32. In Lu. 9:28 ὥσει ἡ ἡμέρα ὅκτω the matter is

2 Cf. Moulton, Prol., p. 70.
simple. Blass\(^3\) compares with this passage ὡς ὅρων τριῶν διάστημα (Ac. 5:7) and ἱδοὺ δέκα καὶ ὅκτω ἕτη (Lu. 13:16). The use of ἱδοὺ with the nominative is very common and may be a case of ellipsis. Cf. ἵδοὺ φωνὴ ἐκ τῶν υἱῶν λέγωσα (Mt. 3:17). Cf. Heb. 2:13, etc. In Mk. 6:40 observe ἄνεψατο πρασιαί πρασια. This leads one to suspect that the repetition is not a mere Hebraism, since the papyri show examples of it. See Eccl. one to suspect that the repetition is not a mere Hebraism, since the papyri show examples of it. See Eccl. one to suspect that the repetition is not a mere Hebraism, since the papyri show examples of it. See Eccl. one to suspect that the repetition is not a mere Hebraism, since the papyri show examples of it. See Eccl.

(h) USED AS VOCATIVE. It only remains to consider the nominative form which is used as a vocative. Cf. chapter VII, 7, (a), for details as to form. It all depends on what one means by the term “case” when he says that the nominative is used as a vocative. The form is undoubtedly the same as that of the vocative in a multitude of instances (all neuter nouns, for instance, singular and plural, plural of all nouns in truth). It is only in the singular that any distinction was made between the nominative and vocative in form, and by no means always here, as in the case of feminine nouns of the first declension, θεός (usually) in the second, liquid oxytones like ποιήσας in the third, etc. But if by the vocative one means the case of address, then the nominative form in address is really vocative, not nominative. Thus σοῦ, πατήρ (Jo. 17:21) is just as truly vocative as σο, πάτερ (17:5). Indeed in Jo. 17:25 we have παρήκα τοῖς γιοῖς, showing that πατήρ is here regarded as vocative. The article with the vocative in

address was the usual Hebrew and Aramaic idiom, as indeed in Aristophanes\(^2\) we have ὁ πατήρ (Mk. 14:36) whether Jesus said one or both. In Mt. 11:26 (ναί, ὁ πατήρ) we have the vocative. When the article is used, of course the nominative form must occur. Thus in Rev. 18:20 we have both together, οὐρανὸς καὶ οἱ ἄγιοι. Indeed the second member of the address is always in the nominative form.\(^3\) Thus Κύριε, ὁ Θεός, ὁ παντοκράτωρ (Rev. 15:3). Cf. Jo. 20:28. I shall treat therefore this as really the vocative, not the nominative, whatever the form may be, and now pass on to the consideration of the Vocative Case.

**VI. The Vocative (πτῶσις κλητική).**

(a) **Nature of the Vocative.** Dionysius Thrax called it also προσαγορευτική, but in reality it is not a case at all. Practically it has to be treated as a case, though technically it is not (Farrar, *Greek Syntax*, p. 69). It is wholly outside of syntax in that the word is isolated and has no word-relations.\(^4\) The isolation of the vocative may be compared to the absolute use of the nominative, genitive and accusative. The native Sanskrit grammarians do not name it in their list of cases, and Whitney\(^1\) merely treats it in the singular after the other cases. Indeed the vocative is sometimes as much a sentence as a case, since the word stands to itself and forms a complete idea. Thus Μαρία and Ραββουνεί (Jo. 20:16) tell the whole story of recognition between Jesus and Mary. When Thomas said Ὁ κύριός μου καὶ ὁ θεός μου (Jo. 20:28), he gave Christ full acceptance of his deity and of the fact of his resurrection.

(b) **Various Devices.** The vocative has no case-ending, but has to resort to various expedients. In general it is just like the nominative in form. This is true in all pronouns, participles and various special words like θεός, besides the plurals, neuters and feminines mentioned under V, (h). Cf. the same practical situation in the Sanskrit.\(^2\) Farrar\(^3\) indeed conjectures that originally there was no difference in form at all between the nominative and vocative and that the variation which did come was due to rapid pronunciation in address. Thus πατήρ, but πάτερ. Cf. ἄνερ (1 Cor. 7:16). In most languages there is no distinction in form at all between nominative and

\(^{2}\) Cf. Blass, Gr. of N. T. Gk., p. 86; Moulton, Prol., p. 70.

1 Sans. Gr., p. 89.

2 Whitney, p. 105.

3 Gk. Synt., p. 70.
vocative, and in Latin the distinction is rare. It need not be surprising, therefore, to find the nominative form of many singular words used as vocative as noted above under the discussion of the nominative. Moulton indeed remarks: “The anarthrous nominative should probably be regarded as a mere substitute for the vocative, which begins from the earliest times to be supplanted by the nominative.” Even in the singular the distinction was only partial and not very stable at best, especially in the vernacular, and gradually broke down till “in modern Greek the forms in ε are practically the only separate vocatives surviving.” Thus Blass observes: “From the earliest times (the practice is as old as Homer) the nominative has a tendency to usurp the place of the vocative.” This nominative form in the singular is just as really vocative as in the plural when used in address. The N. T. therefore is merely in line with the oldest Greek idiom in such examples. So θυγάτηρ (Mk. 5:34; Lu. 8:48; Jo. 12:15, LXX), but see θύγατερ in Mt. 9:22. In Jo. 17:21, 24, 25, W. H. read πατήρ, but πάτερ in Jo. 12:28; 17:1, 5, 11, etc. Moulton rightly refuses to follow Hort in writing πάτηρ in vocative. [Page 463] In the margin of Mt. 9:27 W. H. read υἱὲ Δαυείδ rather than υἱὸς Δ. Mt. 1:20 has Τοιοήτω υἱὸς Δαυείδ, and 15:22 κύριε υἱὸς Δαυείδ, all examples of apposition. Cf. Mt. 20:30. But in Lu. 8:28 and 18:38 we have υἱός. The adjective ἄφρων is vocative in Lu. 12:20 and 1 Cor. 15:36. Cf. also γενναν ἄπιστος in Lu. 9:41. In Acts 13:10 πλήρης is vocative. Cf. indeclinable use of this word. As is well known θεός was usually retained in the vocative in the older Greek, not θεέ. In the N. T. θεέ only appears in Mt. 27:46 in quotation from the LXX where it is rare. Jannaris indeed thinks that in the N. T. this idiom is rather frequent. Cf. λαός μου in Baruch 4:5. In Ac. 7:42 ὀνοὰ Ἰσραήλ is vocative (from LXX). Cf. also βάθος πλούτου (Ro. 11:33), not address, but exclamation. When the vocative has a separate form in the singular it is usually merely the stem of the word, like πολῖτα, δοῦλον, λέον, ἄνθρωπος (Ro. 2:1) as usual. In γόναι (Mt. 15:28) κ has dropped from the stem, as in forms like λέον the τ vanishes for euphony. In θύγατερ and πάτερ the mere stem suffers recessive accent. In Ps. 51:6 (γλύφοιν δόλιαν) we

actually have the accusative form used as a vocative. See further discussion in ch. VII (Declensions).

(c) USE OF ὥ WITH THE VOCATIVE. It is rare in the N. T., only 17 times, all but four of these in Luke and Paul. In Blass-Debrunner, p. 90, the rarity of ὥ is attributed to the Semitic influence. The common absence of it gives a sort of solemnity where it is found. Moulton observes that it is only in Luke's writings that it appears in the N. T. without emphasis after the classical fashion. Take as an instance of this literary usage ὥ Θεόφιλε (Ac. 1:1), but κράτιστε Θεόφιλε in Lu. 1:3. Moulton likewise notes the absence of ὥ in prayer in the N. T. (though sometimes in the LXX) and considers “the progressive omission of ὥ” in Greek not easy to explain. It came up from the vernacular and then gradually vanished from the vernacular much as our O has done. Blass notes that in most of the N. T. examples it expresses emotion, as ὥ γίναι (Mt. 15:28), ὥ γενεὰ ὅπιστος (Mk. 9:19), ὥ πλήρης (Ac. 13:10), etc. The tone may be one of censure as in Ro. 2:3; 9:20. But it is a mistake to think that the ancient Greeks always used ὥ in formal address. Simcox notes that Demosthenes often said ἄνδρες Ἀθηναῖοι just as Paul did in Ac. 17:22. Paul says ὥ ἄνδρες once (Ac. 27:21). But the addresses in the N. T. are usually without ὥ (cf. Ac. 7:2).

(d) ADJECTIVES USED WITH THE VOCATIVE naturally have the same form. Thus ὥ ἄνθρωπος κενέ (Jas. 2:20), δοῦλε πονηρέ (Mt. 18:32), πάτερ ἄγιε (Jo. 17:11), κράτιστε Θεόφιλε (Lu. 1:3). In Jo. 17:25 we read πατὴρ δίκαιε, clearly showing that πατήρ was regarded as a true vocative form. In Lu. 9:41 ὥ γενεὰ ὅπιστος the substantive has the same form in nominative and vocative and the adjective here follows suit. Cf. also Ac. 13:10; Lu. 12:20 where the adjective alone in the vocative has nominative form.

————, Pronunciation of Ancient Greek (translation by Purton in 1890 of 3. Aufl. of Über die Aussprache des Griech. 1888).

(e) **Apposition to the Vocative.** The nominative forms and distinctive vocative forms are freely used side by side, in apposition, etc., when the case is vocative. In Mt. 1:20 we have Ἰωσήφ υἱὸς Δαυείδ, and in 15:22 W. H. read in the text κύριε υἱὸς Αβαβεί. Cf. also Mt. 20:30. So κύριε, ὁ θεός, ὁ παντοκράτωρ (Rev. 15:3), and ὦ ἄνθρωπε, πᾶς ὁ κρίνων (Ro. 2:1). In the last instance the participle and article naturally are unchanged. See again ὤρανὲ καὶ ὁ ἱάγιοι, etc. (Rev. 18:20). Cf. also πάτερ ἡ ὕπος τοῦ ἐν τοῖς οὐρανοῖς (Mt. 6:9). So κύριε μου πατήρ, B.U. 423 (ii/A.D.). But two vocative forms are put together also. So Ἰησοῦ υἱὲ τοῦ ὕψίστου (Lu. 8:28), πάτερ κύριε τοῦ οὐρανοῦ (10:21), Ἰησοῦ υἱὸς Δαυείδ (18:38). In Ac. 13:10 the nominative form is followed by two vocative forms, ὦ πλήρης παντὸς δόλου κτλ., ὑἱὲ διαβόλου, ἔθρε πάσης δικαιοσύνης. But πλήρης may be here indeclinable. There is a distinct tendency among the less educated writers in the papyri to use the nominative as a convenient indeclinable (Moulton, Cl. Rev., April, 1904). So τῆς ἐπιτήρησις, N. P. 38 (iii/A.D.).

(f) **Vocative in Predicate.** The vocative is rarely found in the predicate, though not grammatical predicate. This was occasionally the case in the older Greek by a sort of attraction to a real vocative in the sentence. But in the N. T. we only have a few examples in the nature of quotation or translation. So in Jo. 1:38, Ῥαββεί, ὃ λέγεται Μεθερησίην Διδάσκαλε; 20:16 Ῥαββουεί, ὃ λέγεται Διδάσκαλε.

(g) **The Article with the Vocative.** This idiom is frequent in the N. T., some 60 examples. It is a good Greek idiom and not infrequent. Delbrück finds it in harmony with the Indo-Germanic languages. Moulton denies that the coincident Hebrew and Aramaic use of the article in address had any influence on the N. T. But one must admit that the LXX translators would be tempted to use this Greek idiom very frequently, since the Hebrew had the article in address. Cf. 3 Ki. 17:20, 21, etc. In Mk. 5:41 the Aramaic Тαλειθά is translated τὸ κοράσιον. One is therefore bound to allow some influence to the Hebrew and Aramaic. Cf. also Ἀββά ὁ πατήρ in Mk. 14:36, Gal. 4:6, and Ro. 8:15. It is doubtless true that Ἡ παίς ἔγειρε (Lu. 8:54) has a touch of tenderness, and that τὸ μικρὸν ποιμέν (Lu. 12:32) means ‘you little flock.’ But one can hardly see such familiarity in ὁ πατήρ (Mt. 11:26). But in Mk. 9:25 there may be a sort of insistence in the article, like ‘Thou dumb and deaf spirit’ (τὸ θάλαλον καὶ κωφὸν πνεῦμα). Even here the Aramaic, if Jesus used it, had the article. Moulton considers that βασιλεῖ in Ac. 26:7 admits the royal prerogative in a way that would be inappropriate in the mockery of Jesus in Jo. 19:3 (χαῖρε, ὁ βασιλεὺς τῶν

7 Moulton in a note (p. 235) does concede some Aram. influence. In Hebrews it only occurs, as he notes, in O. T. citations. Cf. also Dalman, Gr., p. 118.
Ἰουδαίων). But Mk. 15:18 does have βασιλεὺ τῶν Ἰουδαίων, due, according to Moulton, to “the writer’s imperfect sensibility to the more delicate shades of Greek idiom.” Possibly so, but may not the grammarian be guilty of slight overrefinement just here? In Mt. 27:29 the text of W. H. has βασιλεὺ while the margin reads ὁ βασιλεὺς. In Rev. 15:3 we have ὁ βασιλεὺς τῶν αἰώνων. In Heb. 1:8 it is not certain whether (ὁ θρόνος σου ὁ θεός) ὁ θεός is vocative or nominative. But ὁ δεσπότης ὁ θεός καὶ ἡλιθιόνος (Rev. 6:10) is vocative. As examples of participles in the vocative take ὁ κατάλυων (Mt. 27:40) and ὁ ἐµπεπλησένοι (Lu. 6:25). In Rev. 4:11 we have also the vocative case in ὁ κύριος καὶ ὁ θεός. In Jo. 20:28 Thomas addresses Jesus as ὁ κύριος μου καὶ ὁ θεός μου, the vocative like those above. Yet, strange to say, Winer calls this exclamation rather than address, apparently to avoid the conclusion that Thomas was satisfied as to the deity of Jesus by his appearance to him after the resurrection. Dr. E. A. Abbott follows suit also in an extended argument to show that κύριε ὁ θεός is the LXX way of addressing God, not ὁ κύριος καὶ ὁ θεός. But after he had written he appends a note to p. 95 to the effect that “this is not quite satisfactory. For xiii. 13, φωνεῖτε μὲν ὁ διδάσκαλος καὶ ὁ κύριος, and Rev. 4:11 ἄξιος εἶ, ὁ κύριος καὶ ὁ θεός ἡμῶν, ought to have been mentioned above.” This is a manly retraction, and he adds: “John may have used it here exceptionally.” Leave out “exceptionally” and the conclusion is just. If Thomas used Aramaic he certainly used the article. It is no more exceptional in Jo. 20:28 than in Rev. 4:11.

VII. The Accusative (ἡ αἰτιατικὴ πτῶσις).

(a) The Name. It signifies little that is pertinent. Varro calls it accusandei casus from αἰτιάω, while Dionysius Thrax explains it as κατα-αἰτία (‘cause’), a more likely idea. Glycas calls it also τὸ αἰττιώ. So Priscian terms it causativus. Gildersleeve (“A Syntactician among the Psychologists,” Am. Jour. Philol., Jan., 1910, p. 76) remarks: “The Romans took the bad end of αἰτία, and translated αἰτιατική, accusativus—hopeless stupidity, from which grammar did not emerge till 1836, when Trendelenburg showed that αἰτιατική πτῶσις means casus effectivus, or causativus... The object affected appears in Greek now as an accusative, now as a dative, now as a genitive. The object effected refuses to give its glory to another, and the object affected can be subsumed under the object effected.” With this I agree. Cf. Farrar, Greek Syntax, p. 81. Old English “accuse” could mean ‘betray’ or ‘show,’ but the “showing” case does not mark it off from the rest. Originally, however, it was the only case and thus did show the relations of nouns with other words. On the small

(b) AGE AND HISTORY. A more pertinent point is the age and history of the accusative, the oldest of all the cases. Farrar (*Greek Syntax*, p. 81) calls attention to the fact that ἐγών (old form of ἐγώ), Sanskrit त्वाम, त्वाम, Βεοτιανζτούν, Latin *idem*, all have the [Page 467] accusative ending though in the nominative. If it is true that the accusative is the oldest case, perhaps we are to think of the other oblique cases as variations from it. In other words the accusative was the normal oblique case for a noun (especially with verbs) unless there was some special reason for it to be in another case. The other oblique cases were developed apparently to express more exactly than the accusative the various word-relations. Indeed in the vernacular Greek the accusative retained its old frequency as the normal case with verbs that in the literary style used other cases. In the old Greek poets the same thing is noticeable. Pindar, for example, has “a multiplicity of accusatives.” In the modern Greek vernacular the accusative has regained its original frequency to the corresponding disuse of the other oblique cases. Cf. Thumb, *Handb.* p. 35. “When a fine sense for language is failing, it is natural to use the direct accusative to express any object which verbal action affects, and so to efface the difference between ‘transitive’ and ‘intransitive’ verbs.” There was therefore first a decrease in the use of the accusative as the literary language grew, then an increase in the κοινή vernacular, the later Greek, and especially the modern Greek vernacular. This gain or rather persistence of the accusative in the vernacular is manifest in the N. T. in various ways. But the literary κοινή shows it also, as Krebs has carefully worked out with many verbs.

(c) THE MEANING OF THE ACCUSATIVE. It is not so easy to determine this in the view of many scholars. Delbrück despairs of finding a single unifying idea, but only special types of the accusative. Brugmann also admits that the real ground-idea of the case is unknown, though the relation between noun and verb is expressed by it. The categories are not always sharply defined in the soul of the speaker. Hübschmann

Steinthal

———, Introduction to the Psychology and Science of Language (1900).

2 Giles, Man., p. 306.
6 Hatz., Einl., p. 221.
9 Kurze vergl. Gr., p. 441.
10 Griech. Gr., p. 379.
treats the expansion [Page 468] of the verb as the ground-idea of the accusative. “The relation of the accusative to its governing verb resembles the relation of the genitive to its governing substantive.”¹ La Roche considers it originally a local case and that the inner meaning came later. The usage of the accusative can indeed, for convenience, be divided into the outer (ὁκίαν, Mt. 7:24) and the inner (Ἠροθήηθεν φόρον μέγαν, Mk. 4:41) usage. But the whole case cannot be discussed on this artificial principle, as Monro³ rightly sees. He sees hope only in the direction of the wide adverbial use of the accusative. In the Sanskrit certainly “a host of adverbs are accusative cases in form.”⁴ Green⁵ calls it “the limitative case,” and he is not far out of the way. Farrar⁶ thinks that “motion towards” explains it all. Giles,⁷ while recognising all the difficulties, defines the accusative as the answer to the question “How far?” The word extension comes as near as any to expressing the broad general idea of the accusative as applied to its use with verbs, substantives, adjectives, prepositions. It is far more commonly used with verbs, to be sure, but at bottom the other uses have this same general idea. Being the first case it is naturally the most general in idea. If you ask a child (in English) “Who is it?” he will reply “It’s me.” This is, however, not a German idiom. The accusative measures an idea as to its content, scope, direction. But the accusative was used in so many special applications of this principle that various subdivisions became necessary for intelligent study.

(d) With verbs of motion. It is natural to begin with verbs of motion, whether we know that this was the earliest use or not, a matter impossible to decide. We still in English say “go home,” and the Latin used domum in exactly that way. Extension over space is, of course, the idea here. One goes all the way to his home. It is found in Homer and occasionally in Greek writers.⁸ Modern Greek (Thumb, Handb., p. 37, has a local accusative) πάμε σπίτι, ‘we are going home.’ Moulton (Prol., p. 61) notes that it is just the local cases that first lost their distinctive forms (ablative, locative, associative-instrumental); and the “terminal accusative” like ire Romam disappeared also. “The surviving Greek [Page 469] cases thus represent purely grammatical relations, those of subject, object, possession, remoter object and instrument.” The

place-adverb does supply the place of the terminal accusative, but not entirely of the locative, ablative and instrumental.

Some MSS. in Ac. 27:2 read πλείν τοὺς κατὰ τὴν Ἀσίαν τόπους, but the best (W. H.) have εἰς after πλείν. In ὑπεπλεύσαμεν τὴν Κύπρον and τὸ πέλαγος διαπλέσαντες (cf. English “sail the sea”), verses 4 f., the prepositions in composition help to explain the case. In Mt. 4:15 ὁδὸν θαλάσσης has no verb of motion and comes in the midst of vocatives in a way quite startling. Green refers to the LXX (Is. 9:1) for the explanation and quotes “Christ and Him Crucified.” But the LXX gives little relief, for, while B does not have it, several MSS. do and without a verb. B however reads οἱ παραλίαν, which presents the same difficulty as to case. Winer suggests οἱ κυντες with οἱ, possibly correct. But even in Matthew the writer may have had in mind the general accusative notion of extension, ‘along the way of the sea.’

(c) **Extent of Space.** The ordinary accusative for extent of space does not differ materially from that of motion above. Here the root-idea of the case is easily perceived apart from the force of the verb. The point is that this is not a special development of the accusative, but is the normal idea of the case, extension. The application to space is natural. The Greek continues all along to have this idiom as the Latin and English. The adverb µακρὰν (Ac. 22:21) is a good example. Take Jo. 6:19 Ἐλλακότες ὡς σταδίους πέντε ἢ τριάκοντα, Lu. 22:41 ἄπειπάσης ὑπεπλεύσαντες διαπλέσαντες (cf. English “sail the sea”), verses 4 f., the prepositions in composition help to explain the case. In Mt. 4:15 ὁδὸν θαλάσσης has no verb of motion and comes in the midst of vocatives in a way quite startling. Green refers to the LXX (Is. 9:1) for the explanation and quotes “Christ and Him Crucified.” But the LXX gives little relief, for, while B does not have it, several MSS. do and without a verb. B however reads οἱ παραλίαν, which presents the same difficulty as to case. Winer suggests οἱ κυντες with οἱ, possibly correct. But even in Matthew the writer may have had in mind the general accusative notion of extension, ‘along the way of the sea.’

(f) **Extent of Time.** It answers the question “how far?” in time, or “how long?” In the N. T. the examples of time are far more frequent than those of mere space. The locative, instrumental and genitive are also used to express time, but they bring out a different idea, as will be shown. The accusative is thus used for duration or extension in the Indo-Germanic languages generally. Cf. τι ὡς ἐστήκατε δὲν ἡ ἡμέραν ἄργοι (Mt. 20:6); τοσαῦτα ἐτή δουλεύω σοι (Lu. 15:29). A good example is ἐμείναν τὴν ἡμέραν ἐκείνην (Jo. 1:39). Cf. Jo. 2:12; 11:6. In Lu. 1:75 W. H. (text) read πάσας ταῖς ἡμέραις (instr.). Another good illustration is ἄπειρόθησαν χρόνους ἱκανούς (Lu. 20:9). Cf. ἤσ ημερία την ἡμέραν (Mt. 20:2) where the accusative well brings out the agreement between the landlord and the labourers. In νύκτα καὶ ἡμέραν (Mk. 4:27) the sleeping and rising go on continually from day to day. Cf. ἡμέραν ἦλθεν τὴ ἡμέρας (2 Pet. 2:8). The papyri examples are numerous, like τόκους διδράχμους τῇς

---

1 Handb., etc., p. 234.  
2 W.-Th., p. 231.
Perhaps little difficulty is felt in the accusative in Ac. 24:25, τὸ νῦν ἔχον πορεύσου. So also as to τὸ λοιπὸν (or λοιπόν) in Mk. 14:41, τὸ πλεῖστον (1 Cor. 14:27), and even ἐνεκοπτόμην τὰ πολλὰ (Ro. 15:22). But there are uses of the accusative in expressions of time that do furnish trouble at first blush. In some of these the accusative seems to be merely adverbal (Blass, Gr. of N. T. Gk., p. 94) with little stress on duration. Indeed a point of time may be indicated. Cf. τὸ πρῶτον (Jo. 6:62), πρῶτον (Heb. 10:32), πρῶτον (Mt. 5:24). It is not hard to see how the accusative of general reference came to be used here, although it is a point of time. Note the article (τὸ καθ’ ἠμέραν, Lu. 19:47) in the accusative. We can now go on to τὸ τέλος (1 Pet. 3:8) and even τὴν ἡρχήν (Jo. 8:25). But a more difficult example is found in Jo. 4:52, ἔχεις ὦραν ἐβδομήν, where a point of time is indicated. See also πολὺν ὄραν in Rev. 3:3; πᾶσαν ὄραν (1 Cor. 15:30). One may conjecture that this use of ὄραν was not regarded as essentially different from the idea of extension. Either the action was regarded as going over the hour or the hour was looked at more as an adverbal accusative like τὸ λοιπὸν above. Cf. also τὴν ἠμέραν τῆς πεντηκοσίτης γενέσθαι εἰς Ἑροσόλυμα (Ac. 20:16). In Blass-Debrunner, p. 98, examples are given from Ἀθηναίου, Ευριπίδης, Ἀριστοτῆς, Δεμοσθένης, where ὄραν = εἰς ὄραν. Cf. Moulton, Prol., p. 63, for τὸ πέμπτον ἔτος (O.P. 477, ii/A.D.) ‘in the fifth year.’ Τὸ παρόν B.U. 22 (ii/A.D.) means ‘at present’ (Moulton, Cl. Rev., 1901, p. 437). In the modern Greek vernacular the accusative is used freely to designate a point of time as well as extent of time [Page 471] (Thumb, Handb., p. 37). So in the N. T. the accusative is widening its scope again. In Ac. 10:30 ὑπὸ τετάρτης ἡμέρας μέχρι ταύτης τῆς ὥρας ἠμὴν τὴν ἑνάτην προσευχόμενος we can see an interesting example where τὴν ἑνάτην is explanatory of the previous note of time, a point of time, and yet a whole hour is meant. In Ac. 10:3 (περί ὦραν ἑνάτην) observe περί, though some MSS. do not have the preposition. Cf. Mk. 13:35 μεσονύκτιον (acc.) ἡ ἀλεκτοροφωνίας (gen.) ἡ προῖ (loc.) for points of time. \(^1\) The papyri have examples of a point of time in the accusative, \(^2\) as already seen. But the locative is still more frequent in the N. T. for a point of time, as ποίῳ ὦρᾳ (Lu. 12:39). It is not difficult to see the appropriateness of the accusative in τεσσαρεσκενδέκατην σήμερον ἠμέραν προσδοκώντες ἅπιτι διατελέστε (Ac. 27:33). It is good Greek with the ordinal.

\(^{(g)}\) With Transitive Verbs. The most common accusative is when it is the object of a transitive verb. One cannot hope to pursue all the uses of the accusative in the order of historical development. For instance, no one knows whether cognate accusative (of inner content or objective result) preceded the ordinary objective use of the case. Does the adverbal accusative (so common in adjectives) precede the accusative with verbs? These points have to be left unsettled. In actual usage the accusative with transitive verbs calls for most attention. But the term “transitive” needs a word. It means a verb whose action passes over to a noun. This idea may be

\(^{1}\) Blass, Gr. of N. T. Gk., p. 311.
intransitive in another language, as, for instance, μη ὤνομετε μήτε τὸν οὐρανόν μήτε τὴν γῆν (Jas. 5:12). In English ὤνομετα is rendered by ‘swear by.’ Cf. ἔργαζομαι μὴ τὴν βρόδον (Jo. 6:27), English ‘work for.’ Not all Greek verbs are transitive, as ἐμί, for example. The same verb may be used now transitively, now intransitively, as ἔμενον ἡμᾶς (Ac. 20:5) and ἔμενον παρ᾽ αὐτοῖς (Ac. 18:3). So ὁ βλέπων ἐν τῷ κρυπτῷ (Mt. 6:4) and τι δὲ βλέπεις τῷ κάρφῳ (Mt. 7:3). Cf. English word “see.” As further illustration of the freedom of the Greek verb note βλέπετε τι ὄκουετε (Mk. 4:24), βλέπετε τοὺς κόνας (Ph. 3:2), βλέπετε ἅπο τῆς ζομῆς (Mk. 8:15).3 There is indeed a difference between the accusative and the use of a preposition as in φεύγετε τὴν πορείαν (1 Cor. 6:18) and φεύγουν ἢ ὀπὸ τῆς εἰδολολατρείας (1 Cor. 10:14).

[Page 472] But for practical purposes many Greek verbs were used with liberty. In the case of φοβεῖμαι with accus. (Mt. 10:26, 28) or with ἃπο and ablative (Mt. 10:28) we have a Hebraism. Moulton (Prol., p. 102) admits that this use of ἃπο is a “translation-Hebraism” ([Page 473]). It occurs in both Mt. (10:28) and Lu. (12:4) and represents probably the Aramaic original. Cf. ὁρῶ, καὶ φωλά σσεσθε ἃπο (Lu. 12:15) and ὁρῶ, καὶ προσέχετε ἃπο (Mt. 16:6). Xen. (Cyr., 11. 3, 9) uses ἃπο with φωλάσσω. This matter will call for further discussion directly.

But we have (pp. 330 f.) observed that transitive verbs in Greek do not always have the accusative. The transpositeness may be as clearly expressed by a dative as with ἄκολουθεό, the genitive with ἐπιθυμία, the ablative with ἄποστερέω, etc. The accusative is indeed the normal case with transitive verbs, but not the only one. Some verbs continued to use the accusative parallel with the other cases. Thus ἐπιλαθάνομαι has τὸ μὲν ὅπεισιν in Ph. 3:13, but φωλάσσεις in Heb. 13:2. Sometimes the point lies in the difference of case, as ἄκοινοντες μὲν τῆς φωνῆς (Ac. 9:7), but τῆν δὲ φωνὴν οὐκ ἢκουσαν (Ac. 22:9). Then again verbs otherwise intransitive may be rendered transitive by the preposition in composition. Cf. δήρικετο τὴν Ἴρεν χώ (Lu. 19:1), but ἐκεῖνης in 19:4. So παραπλέσσω τὴν Ἐφεσον (Ac. 20:16), etc. Another introductory remark about transitive verbs is that it is not a question of the voice of the verb. Many active verbs are intransitive like ἐμί; middle verbs may be either transitive or intransitive; even passive verbs may be transitive. Thus ἢλιον ταῦτα (Lu. 16:14), ἐκπίστευσο τοῖς (Ac. 1:18), and μὴ οὖν φοβηθῆτε αὐτοῦ (Mt. 10:26) are all transitive constructions. Cf. Mk. 8:38; Ro. 1:16; 2 Tim. 1:8 for ἑπαινοῦμαι (passive) with accusative.

One cannot, of course, mention all the N. T. transitive verbs that have the accusative. Here is a list of the most frequent verbs that are not always transitive, but sometimes have the accusative.1 Ἄδικεω indeed may be either transitive (Mt. 20:13) or intransitive (Ac. 25:11), in the one case meaning ‘do wrong to,’ in the other ‘be guilty.’ Βάλλω (only twice in the N. T., Mk. 16:18; Lu. 4:35) is transitive both times. Ὁρηθείος has only dative (Mk. 9:22) and ὑφελέω only accusative (Mk. 8:36). In Lu. 17:2 we have ἀνεθείλησεν αὐτῷ. Ἀποφείμαται is always intransitive in the N. T. (like ὄποια) except in Ac. 25:20 (so ancient Greek sometimes). Ἀποστρέφομαι as in Attic is found with the accusative in Tit. 1:14 and Heb. 12:25. In 2 Tim. 1:15 the aorist passive [Page 473] (ἀπεστράφησαν με) is so used. For like use of the aorist or future

3 Green, Handb., etc., p. 230.
1 See Blass, Gr. of N. T. Gk., pp. 87–89. Cf. also W.-Th., pp. 221 ff.
passive with accusative see ἐντραπήσονται τὸν ὑπὸ μου (Mt. 21:37), where the earlier writers generally had dative (ἐντρέπομαι); ἐπαισχυνθῆ με (Mk. 8:38) from ἐπαισχύνομαι, whereas ἀπεχθῆναι is intransitive (ἀπό and abl. in 1 Jo. 2:28). So also οὐδὲν ἀπεκρίθη (Mk. 15:5) as οὐδὲν ἀπερίσκητο (Mt. 27:12), but note ἀπεκρίθη πρὸς οὐδὲν ἐν ῥήμα (Mt. 27:14). Cf. τί ἀποκρίθη (Mk. 9:6). For φοβηθῆτε αὐτοῖς see Mt. 10:26 and note φοβηθῆτε ὑπὸ τῶν ἀποκτεινόντων (10:28) which happens to be in imitation of the Hebrew idiom (יִעְרֹ כ) as of the English “be afraid of.” (Cf. above.) See Jer. 1:8. In Mt. 10:31 φοβεῖθηε is intransitive.

Βασκαίνω in Attic Greek was used with the dative in the sense of ‘envy,’ but in Gal. 3:1 the accusative in the sense of ‘bewitch.’ Βλασφημέω in the Attic had εἰς as in Lu. 12:10, but it also occurs as transitive with accusative (Mt. 27:39). In 2 Pet. 2:12 we find ἐν, not εἰς (cf. Jude 10). Ἐπιρρεάζω has the accusative, not dative as Attic, in Lu. 6:28; 1 Pet. 3:16. So καταράομαι has ὑμᾶς (some MSS. ὑμῖν like Attic) in Lu. 6:28. Cf. Mk. 11:21; Jas. 3:9. For λογοδοξέω with accusative see Jo. 9:28; Ac. 23:4, and for λομαίομαι see Ac. 8:3. The MSS. vary in Heb. 8:8 between αὐτοῖς and αὐτοῖς (as in Attic) with μέμορυμαι, but W. H. read αὐτοῖς. In Mt. 5:11 and 27:44 ὁνείδιζο has the accusative, though Attic used the genitive. The accusative alone occurs with ὑπρίζω (Lu. 11:45). So also both εὐλογέω (Lu. 2:28) and κακολογέω (Ac. 19:9) have the accusative. In Ac. 23:5 ὥσ πρῶτος κακῶς is found with the accusative. In the margin of Jo. 1:15 W. H. give ὢν ἐπο. In Jo. 8:27 we have τὸν πατέρα αὐτοῖς ἐλέγεν, with which compare οὐς ἔλεγον (Ph. 3:18), a construction common in the older Greek. A similar construction is found in Attic Greek with εὐ (καλῶς) ποιεῖ, κακῶς ποιεῖ, etc. In the N. T., however, note αὐτοῖς εὐ ποιεῖν (Mk. 14:7) and καλῶς ποιεῖτε τός μισοῦσιν (Lu. 6:27).

The remaining verbs1 that call for discussion in this connection cannot be grouped very well. They will be treated simply in alphabetical order. In the LXX γεῦμαι is fairly common with the accusative, and some examples occur in other later writers instead of the usual genitive.2 In the N. T. the genitive is still the usual case (θανάτου, Lu. 9:27; Jo. 8:52; Heb. 2:9; δείπνου, Lu. 14:24; δωρεάς, Heb. 6:4; μηδένος, Ac. 23:14), but the accusative [Page 474] is found in Jo. 2:9 (τὸ ὕδωρ) and Heb. 6:5 (καλὸν θεοῦ ῥῆμα). In Rev. 17:3 we even have γέμοντα ὀνόματα instead of ὀνόματον. The accusative appears with γονυπετέω (Mk. 10:17), but absolutely in Mk. 1:40, and with ἐμπροσθέν in Mt. 27:29. In Rev. 2:14 διδάσκω has the dative (τῷ βαλάκ), a construction which might a priori seem natural with this verb, but not so used in Greek (cf. Latin and English).3 Διψάω and πεινάω are intransitive in the N. T. save in Mt. 5:6 where the accusative is used, not the class. genitive. Δράσσομαι appears only once (1 Cor. 3:19) in a quotation from the LXX and has the accusative. ἔλεγον is transitive (Mt. 9:27, etc.) as is ὀκτέρο (Ro. 9:15, quotation from LXX). ἐμπορεύομαι occurs only twice, once intransitive ( Jas. 4:13), once with accusative (2

1 Völker, Pap. Gr. Synt. Spec., pp. 6–8, gives the following verbs as having the acc. in the pap.: ὀλλάσσω, δουλεύω, ἐπιθυμέω, ἐπιτυγχάνω, ἐπιλαμβάνομαι, ἐξέρχομαι, εὐδοκέω, κατιγορέω, κρατέω, κυριεύω, λυπέω, παρίσταμαι, πορεύομαι, πληρῶ, ὑπαντάω, χράομαι, etc.
3 Simcox, Lang. of the N. T., p. 80.
Pet. 2:3). ἔνεδρεύω likewise occurs only twice (Lu. 11:54; Ac. 23:21) and with accusative both times. Cf. O.P. 484 (ii/a.d.) in sense of ‘defraud’ with accusative. (Moulton, Cl. Rev., Apr., 1904). ἔπιθυμεῖω is found with the genitive (Ac. 20:33) or with the accusative (Mt. 5:28) according to W. H. (BD, etc.). ἔργαζομαι is often transitive, but τὴν ἀθλασαν ἔργαζονται (Rev. 18:17) is somewhat unusual, to say the least. ἔναγγελίζομαι (active in Rev. 10:7; 14:6; passive Gal. 1:11; Heb. 4:6, etc.) has the Attic idiom of accusative of the thing and dative of the person (Lu. 4:43; Eph. 3:8, etc.), but examples occur of the accusative of the person addressed (Lu. 3:18; Ac. 8:25). In Ac. 13:32 Blass (Gr. of N. T. Gk., p. 90 note) denies two accusatives to εὐαγγέλια, construing τὴν—ἐπαγγελίαν with ὃτι ταύτην ὁ θεὸς ἔκπεπλήρωκεν. This is rather forced, but even so the ὃτι clause would be in the accus. ἔδοκεν is trans. in the LXX and so appears in the N. T. twice (Mt. 12:18, quotation from the LXX; Heb. 10:6, 8, LXX also). ἔχαριστεῖω in 2 Cor. 1:11 occurs in the passive (τὸ χάρισμα εὔχαριστηθή) in a construction that shows that the active would have had an accusative of the thing and a dative of the person. Cf., for instance, πλεονεκτῆθομεν in 2 Cor. 2:11 with ἔπλεονεκτῆσα ὑμᾶς (2 Cor. 12:17 f.), only εὐχ did not go so far as to have the accusative. On the other hand in the N. T. θαρρέω is not transitive (2 Cor. 10:2 instr.), though in the older Greek it was sometimes. It occurs absolutely (2 Cor. 5:6), with ἐν (2 Cor. 7:16), with εἰς (2 Cor. 10:1). Θαμαζόω has the accusative in Lu. 7:9, Ac. 7:31 and Ju. 16. Θραμβεῦος has the accusative in 2 Cor 2:14 and Col. 2:15, though the verb has a different sense in each passage. Ἐρυγρηθείω occurs only once (Ro. 15:16) and with the accusative. In Heb. 2:17 Ἡλάσκομαι has accusative of the [Page 475] thing as in LXX, Philo and inscriptions (Blass, Gr. of N. T., p. 88). Καυχάομαι has accusative in 2 Cor. 9:2 and 11:30. Κλαίω has accusative in Mt. 2:18 (O. T. quotation unlike LXX), but ἐπὶ in Lu. 23:28. However, D omits ἐπι. Κληρονομεῖο has only the accusative. Κόπτομαι has accusative in Lu. 8:52 (ἔπι Rev. 1:7). Κρατέω out of forty-seven instances in the N. T. has the genitive in eight, accusative in 37, one absolute, one τοῦ and inf. 1 Μαθητεύω is a late word and has the accusative in Mt. 28:19 and Ac. 14:21. The other examples (Mt. 13:52; 27:57) are passive, but in Mt. 27:57 the active (intr.) is the marginal reading of W. H. Cf. old English verb “disciple.” Μέρισομαι has the accusative, not dative, in Heb. 8:8, but the text is doubtful. Μένω is usually intransitive, but in Ac. 20:5, 23, the accusative occurs (sense of ‘wait for’). Cf. also accusative with διαμένω (1 Th. 1:10), παριμένω (Ac. 1:4); ὑπομένω (Heb. 10:32) in sense of ‘endure.’ Νικάω is transitive with accusative usually, but in Rev. 15:2 it uses ἐκ with ablative. So ξενίζομαι is transitive with accusative in Heb. 13:2. Ὠμηρα usually has ἐν (Mt. 23:16, etc., cf. Hebrew ז), sometimes κατά (Heb. 6:13), or occurs absolutely (Mt. 5:34), but the accusative (sense of ‘swear by,’ common in ancient Greek, cf. Hos. 4:15 for LXX) appears only in Jas. 5:12, except ὅρκον ὃν ὤμοσεν (Lu. 1:73), a cognate accusative. The papyri show it with the accusative, B.U. 543 (i/b.c.). Moulton, Cl. Rev., Dec., 1901. Ὠνειδίζω has the accusative, not the dative, in the N. T. Ὀρκίζω has the accusative in both instances that occur in the N. T. (Mt. 5:7; Ac. 19:13), while ἐξορκίζω (Mt. 26:63) has the accusative and κατά also (σε κατὰ τοῦ Θεοῦ). Ὀμολογέω is common with the accusative or absolutely, but in Mt. 10:32 (two examples) and Lu. 12:8 (two

---

1 Moulton (ib., p. 235) comments on Wellhausen’s remark that D prefers uniformly acc. with ὁκοῦ, κατιγορέω and κρατέω.
examples) ἐν is used as the translation of the Aramaic 𐤌. Moulton\(^2\) is unable to find any justification for this idiom in Greek and calls attention to the fact that both Matthew and Luke have it in a parallel passage as proof of the Aramaic original as the language of Jesus. One may note περιβαλεῖται ἐν ἰματίοις (Rev. 3:5). The use of ἐν ἡμῖν ἔξελεξατο (Ac. 15:7) is not parallel as Winer\(^4\) observes.

Under the dative his remarks will be pertinent. Πιστεύω is often absolute (Jo. 1:50) and often means ‘entrust.’ When not absolute and not meaning ‘entrust.’ Under the dative the accusative is still the more usual case,\(^1\) but the N. T. uses the dative twice as often as the accusative.\(^3\) In Jo. 4:23 the accusative and the dative occur with little difference in result.\(^5\) Cf. also Rev. 13:4, 8. Abbott\(^4\) observes that the dative is the regular usage in the LXX. As to ὑστερέω we find it used absolutely (Mt. 19:20), with the ablative (Ro. 3:23) and once with the accusative (ἐν σε ὑστερεῖ, Mk. 10:21) as in Ps. 22:1. Some of the MSS. in Mark have oon, as the LXX usually.\(^6\) Ψφύγω occurs absolutely (Mt. 2:13), with ὄπο (Mt. 23:33), with ἔκ (Ac. 27:30) or with the accusative (Heb. 11:34; 1 Tim. 6:11). So ἐκφύγω is transitive (Lu. 21:36) with accusative while ἀποφύγω has accusative in 2 Pet. 2:20. Φυλάσσω has, of course, the accusative, but in Ac. 21:25 two accusatives occur with the sense of ‘shun.’ In Lu. 12:15 the middle is used with ἄπο and in 1 Jo. 5:21 φυλάξατε ἑαυτά ἄπο. Χράομαι still uses the instrumental (cf. utor in Latin), as Ac. 27:3, 17, etc., but in 1 Cor. 7:31 the accusative is found (χρῆμαν τὸν κόσμον) in response to the general accusative tendency. Cf. καταχρῶμενοι in the same verse. The accusative with χράομαι appears in later writers.\(^6\)

It remains in this connection to call special attention to the intransitive verbs which have the accus. by reason of a preposition in composition. This applies to intrans. verbs and trans. verbs also which in simplex used some other case. Ἄνα furnishes one example in ἄνα-θάλλω (Ph. 4:10) if τὸ φρονεῖν is the object of the verb after the transitive use in the LXX (Ezek. 17:24). But most probably this is the accusative of general reference. Ἀπελιπίζω (Lu. 6:35) is indeed transitive with accusative, but so is ἔπιζο (1 Cor. 13:7; 2 Cor. 1:13, etc.) sometimes. Here are some examples of διά: τὸ πέλαγος διαπελάσαντες (Ac. 27:5), διεπορεύοντο τὰς πόλεις (Ac. 16:4), διελθὼν τὴν Μακεδονίαν (Ac. 19:21; cf. acc. in Lu. 19:1 and gen. ἐκεῖνης in 19:4). In Heb. 11:29 (διέβησαν τὴν θάλασσαν ὡς διὰ ἐπὶ οὖς γῆς) Blass\(^7\) notes both accusative and genitive (with διὰ). Even ἐνεργέω has the accusative in 1 Cor. 12:6,

11. As examples of κατά observe κατεβάρησα ὑμᾶς (2 Cor. 12:16), [Page 477] ὑμᾶς καταβραβευέτο (Col. 2:18), κατηγορίσαντο βασιλείας (Heb. 11:33). Note also κατασοφιάζονος τὸ γένος (Ac. 7:19). Cf. καταφέρουμεν in 1 Cor. 7:31, but instrumental in 1 Cor. 9:18. For παρά note παραβιάζετε τὴν ἕντολὴν (Mt. 15:3) and παρέφρηκα τὴν κρίσιν (Lu. 11:42; cf. 15:29 and Mk. 6:48). Peri furnishes several examples like δοξαλή φυλάκα περιάγει (1 Cor. 9:5; cf. Mt. 9:35, etc.), but intransitive in Mt. 4:23. This verb, ὅγο, however, is both transitive (Mt. 21:7) and intransitive (Mk. 1:38) in the simple form. Περιερχόμεναι has the accusative in 1 Tim. 5:13, but elsewhere intransitive. So περιέστησαν αὐτὸν in Ac. 25:7, but intransitive (περιεστώς) in Jo. 11:42. In Mk. 6:55 we find περιέδραμον ὰλη τὴν χώραν. With πρό one notes προάγω (Mt. 14:22, προάγει αὐτός (Lu. 22:47), with which compare προελεύσεται ἐνώπιον αὐτοῦ (Lu. 1:17). In Ac. 12:10 both διέρχομαι and προέρχομαι are used with the accusative. Προσφονέω, like προσκυνέω, has either the accusative (Lu. 6:13) or the dative (Mt. 11:16). If ὁ θεός be accepted in Ro. 8:28 (πάντα συνεργεῖ ὁ θεός), which is more than doubtful, then συνεργεῖ would be transitive (cf. instr. in Jas. 2:22). For ὑπὸ observe ὑπερεκτεινομέν ἐαυτοῖς (2 Cor. 10:14) and ἡ ὑπερέχουσα πάντα νοῦν (Ph. 4:7). With ὑπὸ we can mention ὑπομένω (1 Cor. 13:7, but see μένου itself), ὑπεπλέσταμεν τὴν Κρήτην (Ac. 27:7) and νησίον δὲ τι ὑποδραμόντες (Ac. 27:16). Thus it will be seen that in the N. T. the accusative with transitive verbs, both simple and compound, follows the increase in the use of the accusative in line with the current vernacular.

Sometimes indeed the object of the verb is not expressed, but really implied, and the verb is transitive. Thus προσέχετε ἐαυτοῖς (Lu. 17:3) implies τὸν νοῦν. Cf. also προσέχετε ὑπὸ τῶν πειθόντων (Mt. 7:15) and ἐπέχον πῶς (Lu. 14:7); κατὰ κεφαλῆς ἔχον (1 Cor. 11:4). In ἐπιθύμεται σοι (Ac. 18:10) χείρας must be supplied, and with διέτριβον (Ac. 15:35) χρόνον is needed.

(h) THE COGNATE ACCUSATIVE. It may be either that of inner content, ἐχάρησαν χαρὰν (Mt. 2:10), objective result ἐμαρτάνοντα ἐμαρτάνειν (1 Jo. 5:16), φυλάσσοντες φυλακάς (Lu. 2:8), or even a kindred word in idea but a different root, as δαρῆσαι ὀλίγας (πληγάς, Lu. 12:48). Considerable freedom must thus be given the term “cognate” as to both form and idea. The real cognate accusative is a form of the Figura Etymologica as applied to either internal or external object. The quasi-cognate is due to analogy where the idea, not the form, is cognate.¹ The cognate is not very common in the papyri,¹ but in the Hebrew the idiom is very frequent.² It is perfectly good Greek to have this “playing with paronymous terms,” as a passage from Plato’s Protagoras 326 D illustrates, ὑπογράφαντες γραμμάς τῇ γραφῷ οὕτω τὸ γραμματεύων. Cf. τις ποιμαίνει ποίμνην (1 Cor. 9:7). So also in Lu. 8:5, ἐξῆλθεν ὁ σπείρων τοῦ σπέρου τὸν σπόρον. Gildersleeve (Am. Jour. of Philol., xxxiii, 4, p. 488) objects properly to Cauer’s crediting, in his Grammatica Militans, “the division of the

Cauer CAUER, Grammatica Militans. 3d ed. (1912).
accusative into the object affected and the object effected” to Kern, since Gildersleeve himself was using it as far back as 1867. In modern English this repetition of the same root is condemned, but it was not so in Greek. Conybeare and Stock⁴ observe that the Hebrew and the Greek coincide on this point, and hence the excess of such accusatives in the LXX in various applications. And the N.T., here unlike the papyri, shows an abundance of the cognate accusatives.

The accusative of the inner content may be illustrated by τήν δικαιών κρίσιν κρινετε (Jo. 7:24), τὸν φόβον αὐτῶν μὴ φοβηθῆτε (1 Pet. 3:14), αὔξεί τὴν αὔξησιν τοῦ θεοῦ (Col 2:19), ἵνα στρατεύῃ τὴν καλὴν στρατείαν (1 Tim. 1:18), ἄγονιζεν τὸν κωλόν ἄγωνα (1 Tim. 6:12), ὡμολογήσας τὴν καλὴν ὁμολογίαν (ib.), ἐθαύμασα ἕδον αὐτὴν θαῦμα μέγα (Rev. 17:6). Cf. Rev. 16:9. In Mk. 10:38, τὸ βάπτισμα ὡ ἐγὼ βαπτίζομαι, and Jo. 17:26, ἢ ἁγάπη ἢν ἡγάπησας με (cf. Eph. 2:4), the relative shows this use of the accusative. In Jo. 17:26 and Eph. 2:4 (ἢν ἡγάπησεν ἡμᾶς) the cognate accusative of the inner content is used along with the accusative of the person also.⁵

Indeed in Eph. 4:1, τῆς κλῆσεως ἦς ἐκλήθητε, the relative has been attracted from the cognate accusative. The modern Greek keeps this use of the accusative.

Some neuter adjectives are used to express this accusative, but far less frequently than in the ancient Greek.⁶ Thus, πεποίθως αὐτὸ τοῦτο (Ph. 1:6), πάντα ἱερίω (Ph. 4:13), νηστεύοντας πυκνά (Lu. 5:33), πάντα ἐγκρατεύεται (1 Cor. 9:25), perhaps even τρίτον τοῦτο ἔρχομαι (2 Cor. 13:1), μηδὲν διακρινόμενος (Jas. 1:6), οὐδὲν ὑστερήσα (2 Cor. 12:11). Cf. the interrogative τι ὑστερῶ (Mt. 19:20), [Page 479] the relative ὁ γὰρ ἀπέθανεν and ὁ δὲ ζή (Ro. 6:10). Cf. also ὁ δὲ οὐν ἐν σορόι (Gal. 2:20) which may be equal to ‘in that,’ adverbial accusative.¹ In 2 Cor. 12:13 the accusative relative follows the nominative interrogative τι ἐστιν ὁ ἡσώθητε. This neuter accusative of the adjective easily glides into the purely adverbial accusative, like πάντα τάσιν ἀρέσκω (1 Cor. 10:33), πάντα μου μέμνησθε (1 Cor. 11:2).

As a further example of the more objective result one may note ἡμιμαλώτευσαν αἰγιμαλολοπιαν (Eph. 4:8, LXX), but Winer² rightly shows that this type is chiefly represented in the N. T. by the relative. So μαρτυρία ἦν μαρτυρεῖ (Jo. 5:32), διαθήκη ἦν διαθήκαι (Heb. 8:10), βλασφημία ἦσα ἐὰν βλασφημήσωσιν (Mk. 3:28), Επαγγελία ἦν ἐπηγγελλατο (1 Jo. 2:25).

The cognate accusative of the outward object (result also) calls for little discussion. Besides φυλάσσοντες φυλακάς (Lu. 2:8) observe ὕκοδόμησαν τὴν οἰκίαν (Mt. 7:24), δῆσατε δεσμᾶς (Mt. 13:30, but ΝΒC have εἰς).

1 Blass, Gr. of N. T. Gk., p. 91.
2 W.-Th., p. 225.
The analogous cognate accusative is seen in such constructions as μὴ φοβοῦμενα
μηδὲμαν πτόησιν (1 Pet. 3:6), βίωσι χρόνον (1 Pet. 4:2), δαρήσεται πολλάς ( résultas) in
Lu. 12:47 (48), ἦλθον ἡμέρας ὅδην (Lu. 2:44), ἐπορεύετο τὴν ὅδην αὐτοῦ (Ac. 8:39), and the relative also as in ὁρκον ὑν ὃμοσεν (Lu. 1:73). Cf. the instrumental
ὁρκψ ὃμοσεν (Ac. 2:30), etc.

(i) DOUBLE ACCUSATIVE. Some verbs may have two accusatives. Indeed, if one
count space and time, three accusatives are possible.3 In Mk. 10:18 (τί μὲ λέγεις ἢγαθόν;) we have three accusatives, one being predicate. In the Sanskrit it is very
common to have two accusatives with one verb.4 When one recalls that the accusative
is the old and normal case with transitive verbs, it is not surprising that some verbs
use two accusatives, just as many transitive verbs have an accusative and a dative, an
accusative and an ablative, an accusative and an instrumental, an accusative and a
genitive. This double accusative is common in Homer5 and a “multiplicity of
accusatives is a characteristic of Pindar’s style.”6 It is a common idiom in the papyri
also.7 It [Page 480] is not unknown in Latin (cf. docedo) and English (teach). It is very
common in modern Greek (Thumb, Handb., p. 36), going beyond the ancient idiom.
Middleton1 holds that the double accusative is due to analogy, since, in a number of
examples, alternative constructions occur like accusative and ablative with αἰτέω (Ac.
3:2) and ἄφαιρέσαι (Lu. 16:3). Cf. two accusatives with ὀνείδιζον in Mt. 27:44.

Perhaps the simplest kind of a double accusative is what is called the predicate
accusative, really a sort of apposition. Thus οὐκέτι ὑμᾶς λέγω δοῦλους (Jo. 15:15).
This appositional feature is seen also in the passive of those verbs where a double
nominative occurs. For other examples with verbs of saying see λέγω (Mk. 10:18) and
ἐπον in Jo. 10:35 (ἑκείνους ἐπηθε νομάς), etc. Similar to this is καλέω (καλέσας τὸ
ὁνομα αὐτοῦ Ἰουάνην, Lu. 1:13; cf. Ἰησοῦν verse 31; ἐκάλουν αὐτὸ—Σαχαρίαν,
1:59). We happen to have the passive of this very construction in Lu. 2:21 (ἐκλήθη τὸ
ὁνομα αὐτοῦ Ἰησοῦς). Cf. further Mt. 22:43. Observe also ὃν καὶ ὃνομασεν Πέτρον
(Lu. 6:14). Ὄμωλογέω appears with the double accusative in Jo. 9:22; 1 Jo. 4:2; 2 Jo. 7
and curiously nowhere else outside of John’s writings. Ἡγούμαι likewise has two
observes that νομίζω and ὑπολαμβάνω do not have the double accusative in the N. T.

ἔτεσαν ὃμην τὴν ὅνωτάτην, B.U. 242 (ii/A.D.). For the Attic inscr. see Meisterh., p. 204. Middleton

MIDDLETON, Analogy in Syntax (1892).

———, The Doctrine of the Greek Article (1855).

1 Anal. in Synt., p. 25. 2 Gr. of N. T. Gk., p. 92.
This second accusative may be either substantive, adjective or participle. As specimens of the adjective take ὁ ποιήσας μὲ ὑγιὴ [Page 481] (Jo. 5:11), τοὺς τοιούτους ἐντιμοὺς ἔχετε (Ph. 2:29). In 1 Cor. 4:9 indeed the adjective makes three accusatives and with ὡς four, ὁ θεὸς ἡμᾶς τοὺς ἁπαστόλους ἐχάρισε πάντοτές ὑς ἐπιθυμητοὺς (so W. H.). As an example of the participle see κατέστησαν αὐτὸν ἐγκομίουν (Ac. 7:10). Cf. also Ac. 7:10; Heb. 7:28. In Gal. 2:18 we have ἐρμισμάτων οὐκ ὕπατον συνιστάνο. Ἀποδείκνυμι shows an example in 1 Cor. 4:9 and προορίζω in Ro. 8:29. For further verbs with two accusatives, not to weary one, see περὶσσο ἡμῶν (1 Cor. 9:5), ἱκανῶ (2 Cor. 3:6), ἐκλέγωμαι (1 Cor. 7:10), ὑψῶ (Ac. 5:31).

Sometimes ἦμα is used as the copula before such a predicate accusative where the sense is not greatly altered by its absence or presence. As a matter of fact with ἦμα we have indirect discourse with the accusative and infinitive. So ἐπικριτοῦς ἐξαιτίας ἦμα (Lu. 20:20); Mk. 1:17=Mt. 4:19. Cf. ἐνεπιστήμητα ἐλευθεροῦς ἦμα (2 Cor. 10:2), ἐκτίζεσθε ἑαυτοὺς ἦμα νεκροῦς (Ro. 6:11), but ADEFG do not have ἦμα. In Ph. 3:7 we do not have ἦμα, while in verse 8 we do after ἡγοῦμαι.

The predicate accusative with ἐς used to be explained as an undoubted Hebraism. But Moulton is only willing to admit it is a secondary Hebraism since the papyri show a few examples like ἔχον κατὰ Ἵμων ἐς ἀνδρικός σπάρτα, Κ.Ρ. 46 (ii./A.D.), “a recurrent formula,” a probable vernacular “extension of ἐς expressing destination.” Moulton pertinent remarks that “as a loan” (ὡς or just the accusative in apposition) and “for a loan” (ἐς) “do not differ except in grammar.” But certainly the great frequency of ἐς in the LXX as compared with even the vernacular κοινὴ is

---

due to the Hebrew  which it so often translates. Cf. δόσετε μοι τὴν παθὴ τώτην εἰς γυνάκα (Gen. 34:12). Cf. the similar use of εἶς and the accusative instead of the predicate nominative (λογίζομαι εἰς Ro. 2:26, etc.). Winer shows parallels for this predicate accusative from the late Greek writers. The N. T. exhibits this accusative in εἰς προφητὶν αὐτὸν ἐξον (Mt. 21:46), ἄνεθρησκον αὐτὸν [Page 482] ἐξον εἰς υἱόν (Ac. 7:21), ἐλάβετε τὸν νόμον εἰς διαταγής ὁγγέλων (Ac. 7:53), ἤγειρεν τὸν Δαυιδ αὐτοὺς εἰς βασιλέα (Ac. 13:22), Τέθεικα ἐς εἰς φῶς ἑων (Ac. 13:47, LXX). When all is said, one must admit some Hebrew influence here because of its frequency. Ph. 4:16 is not a case in point. See further under εἰς.

But there is another kind of double accusative besides the predicate accusative. It is usually described as the accusative of the person and of the thing. This in a general way is true of this group of double accusatives. Some of these were also cognate accusatives, as in κατακλίνατε αὐτοὺς κλίτας (Lu. 9:14) and, according to some MSS., δῆσατε αὐτὸ δεσμεύς (Mt. 13:30), ἤ ἠγάπησας με (Jo. 17:26; cf. also Eph. 2:4), both of the outer and the inner object. Cf. the passive ὁ ἐγώ βαπτίζομαι (Mk. 10:38) which really implies two accusatives in the active. Further examples of this cognate accusative of the inner object with the negative pronoun may be seen in οὐδὲν με ἡδικήσατε (Gal. 4:12; cf. 5:2), μηδὲν βλάψας (Lu. 4:35). See also Ac. 25:10, In Mt. 27:44 the second accusative is likewise a pronoun, τὸ αὐτὸ ὑνεβίδουν αὐτόν, while in Mk. 6:34 it is an adjective, διδάσκειν αὐτοῦς πολλά.

Indeed διδάσκω is just one of the verbs that can easily have two accusatives (asking and teaching). Cf. also ὑμᾶς διδάξει πάντα (Jo. 14:26). In Ac. 21:21 we have a normal example, ἰποστείπατε διδάσκεις ἀπὸ Μουσῆς τοῦ—Ἰσαίας. In Heb. 5:12 we note three accusatives, but one is the accusative of general reference with the infinitive, τοῦ διδάσκειν ὑμᾶς τινὰ τῇ στοιχείᾳ. Cf. Mt. 15:9 where one accusative is predicate. In Rev. 2:14 διδάσκαν τῷ Βαλάκ we have the passive, a construction entirely possible in the abstract, but elsewhere absent in the concrete. The number of verbs like διδάσκω which may have two accusatives is not considerable. They include verbs like αἰτέω in Mt. 7:9, ὅν αἰτήσεις ὁ υἱὸς αὐτοῦ ἄρτου, but not Mt. 6:8 where ὑμᾶς is merely accusative of general reference with the infinitive, though we do meet it with αἰτέω in Mk. 6:22 f.; Jo. 16:23; 1 Pet. 3:15. But instead of an accusative of the person we may have the ablative with ἵππο as in Mt. 20:20 BD (against παρά), αἰτόθεν τί ἄπα ἄντο, and in Jo. 5:15, or the ablative with παρά as in Jo. 4:9, παρέμοι παν ἄντες, and the middle ἡτήσατο in Ac. 9:2. Ἠρωτάτω likewise has two accusatives in Mt. 21:24 (ἥρωτάκα ὑμᾶς κάγω λόγον ἑνα); Mk. 4:10; Jo. 16:23. Ἀναμμήνησε in both active and middle is used only with the accusative in the N. T. (μυθήσκομαι only with the genitive save adverbial accusative in 1 Cor. 11:2), and two accusatives occur in 1 Cor. 4:17, ὃς ὑμᾶς ἁναμμήνησε τῶς δοῦς μου, and in 2 Tim. 1:6 (ἐν ἄναξοποιεῖν, both in the accusative). With ὑπομομάνησκο with the genitive occurs once in the passive (Lu. 22:61), the accusative elsewhere, and two accusatives in Jo. 14:26, ὑπομομάνησε ὑμᾶς πάντα, and in Tit. 3:1 (ἀὐτοὺς

3 C. and S., Sel. from the Sept., p. 81 f. Cf. also W.-Th., p. 228.
4 Ib. In the mod. Gk. the acc. of the thing to some extent takes the place of the dat. or abl. (Thumb, Handb., p. 37).
1 Simcox, Lang. of the N. T., p. 80.
5:7) is a case in point (cf. 5:12) perı́ toú tòu occurs rather than a second accusative. Εὐσαγγελίζομαι usually has accusative of the thing and dative of the person, as in Eph. 2:17; 3:8, etc. But in Ac. 13:32 the accusative of person1 and thing is found, and the same thing is true in Ac. 14:15 (UNCT—στρέφεσθεν), taking object-sentence as “thing.” Indeed in Gal. 1:9 (ό τις Οὐσία ἔσται παρὰ διασκάδαστε) the same thing exists, for while the antecedent of ὃ would be παρὰ τοῦτο, τι is really implied also, τι παρὰ τοῦτο ὃ.

Another group of verbs in the ancient Greek with two accusatives is that of depriving, etc. Here indeed the ablative may take the place of one accusative, as in 1 Tim. 6:5 with the passive of ἀποστερέω the ablative is retained (τῆς ἀληθείας). But in the N. T. neither ἀποστερέω, nor ἀφαίρέω, ὁρκίζω has two accusatives. Either the ablative alone occurs or with ὑπό (Lu. 16:3; Lu. 19:42; Rev. 6:16). With φυλάσσεσθαι (Ac. 21:25) αὐτοῦς is the accusative of general reference (so-called “subject”) of the infinitive.

But verbs of clothing or unclothing, anointing, etc., do have two accusatives, though not always. Thus ἔξεδυσαν αὐτόν τὴν χλαμύδα (Mt. 27:31; cf. Mk. 15:20; Lu. 15:22), ἔνεδυσαν αὐτόν τὰ ἵματα αὐτοῦ (Mt. 27:31; cf. Mk. 15:20). But ἀμφιβαθμοῦ does not have two accusatives nor περιτίθημι (Mt. 27:28). In Lu. 23:11 some MSS. give two accusatives with περιβαλλόν, but ΝBLT omit αὐτόν. In Jo. 19:2 the text is beyond dispute ἵματος πορφυροῦ περιβαλλόν αὐτόν. Cf. περιβαλλέται ἐν (Rev. 3:5). Moreover χρίω has two accusatives in Heb. 1:9 (ἐχρίσθην σὺ θεὸς ἑλαίῳ), a quotation from the LXX. In Rev. 3:18 κολλούριον is not the object of ἐγγράφη, but of ἐγγράφα. Ἀλείφο is not used with two accusatives, but has the thing in the instrumental case (Mt. 6:13). Πληρόω does not indeed have two accusatives in the N. T., but the passive with accusative in Ph. 1:11 and Col. 1:9 really involves the idiom.

The following causative verbs have two accusatives. Ὅρκίζω σὲ τὸν θεόν (Mk. 5:7) is a case in point (cf. ἦσσορκέα in Herod.). See [Page 484] also Ac. 19:13 and one example of ἑνορκίζω in 1 Th. 5:27. The idea is really to “cause to swear by.” In Jas. 5:12 (ὁμιλεῖς μιᾷ τὸν οὐρανὸν μιᾷ τῆν γῆν μιᾷ ἄλλων τινὰ ὅρκον) we have two constructions, one “swear by,” the other the cognate accusative. So διαμαρτύρομαι in 2 Tim. 4:1 f. Cf. P.O. 79 (ii/A.D.) ὁμιλεῖ τῷ ἀκτικράτῳ Καίσαρα Μᾶρκον ἄλληλον—ὁληθῇ ἐν[α] i δὲ ἀριστοτελεία. Ὅρκίζω is a good example of the causative sense. Thus ἠ λύσας υμῖν πολλάς καὶ ἐδόθης (Mk. 9:41). Cf. Mt. 10:42; 1 Cor. 3:2. In Ro. 12:20 ἔσομαι has the accusative of the person, in 1 Cor. 13:3 the accusative of the thing (cf. Jer. 23:15 for double accusative with both these verbs). In Lu. 11:46 we have φορτίζετε τοὺς ἀνθρώπους φορτία δυσβάστακτα. Cf. ἐλάττωσας αὐτὸν βραχύ τι in Heb. 2:7 (LXX).

Finally some words of doing good or ill have two accusatives. Thus μὴ δὲν βλάψαν αὐτὸν (Lu. 4:35) where the pronoun is really a cognate accusative, as is the case with ύμᾶς οὐδὲν ὠφελήσατε (Gal. 5:2). Cf. Ac. 25:10 Ἰουδαίοις οὐδὲν ἰδίκηκα. In Mt. 27:22 we read τι ὑπῆρξεν Ἰησοῦν. Cf. also Mk. 15:12, though D has τῷ

1 Simcox, Lang. of the N. T., p. 78 f., argues unsuccessfully against the idea that εὐσαγγελίζομαι has two accus.
βασιλεύ (Blass, *Gr. of N. T. Gk.*, p. 91). Elsewhere in the N. T. we meet the dative of the person as in Mt. 21:40; Ac. 9:13. See περὶ ὧν αὐτὴν ανέτικαν, P. Grefn. ii, 73 (late iii/A.D.), where ὧν is attracted from ὦς=of what they have done to her.’ Cf. μηδὲν πρᾶξῆς σεαυτῷ κακῶν (Ac. 16:28). In Mk. 7:12 the dative of the person is in keeping with ancient Greek usage. In Mt. 17:12 ἔν αὐτῷ may be more exactly ‘in his case’ (ND do not have ἐν), but note εἰς ὑμᾶς in Jo. 15:21 and the likeness of this to the modern Greek use of εἰς with accusative as the usual dative. Blass (*ib.*, p. 92) compares also the use of ἐν ἑμοί (Mt. 14:6) and εἰς ἔμε (Mt. 26:10) with ἔργαζομαι and observes that ἔργαζομαι in Attic had sometimes two accusatives. One may compare again the expression τί ὁ Πέτρος ἐγένετο (Ac. 12:18). Λέγω and οὖν indeed have two accusatives in the N. T., but in Jo. 1:15 the margin (W. H., R. V.) really has this idiom. Cf. also Ac. 23:5.

(*j*) With Passive Verbs. Indeed the accusative may be found with verbs in the passive voice. Draeger¹ calls the accusative with passive verbs in Latin “ein Gräcismus.” This accusative may be of several kinds. See cognate accusative in Mt. 2:10, ἔγαρησαν γαρᾶν. It occurs with the so-called passive deponents like ἀπεκρίθην (ὁ ἀδεδειμένον ἑνόμιμα γάμου (Mt. 22:11 and cf. Mk. 1:6; Rev. 1:13; 15:6; 19:14), ἐνεδιδύκτος πορφύραν (Lu. 16:19), ἐκαυματισθήσασιν καῦμα μέγα (Rev. 16:9), δορήσατε πολλάς (πληγάς, Lu. 12:47, ὀλίγας, 48), τὸ βάπτισμα ὁ βαπτίζομαι βαπτισθήναι (Mt. 10:38, two examples), ἐν πνεῦμα ἐπιτισθήμεν (1 Cor. 12:13), πεπελάμβα τὸ κρείσσονα (Heb. 6:9), πεπληρωμένων καρδίν ποικισθήσεται (Ph. 1:11; Col. 1:9 ἐνα πληρωθῆναι τὴν ἐπίγνωσιν and cf. Ex. 31:3, ἐνεπλεξαν αὐτὸν πνεῦμα σοφίας) and compare 2 Tim. 1:5 for genitive (Ἰων χαράς πληροθῆς), ἡμισυμβαπτὴ ὑπ' ὑπερθεῖν (Mt. 8:36=Mt. 16:26).

But the true passive of many verbs retains the accusative of the thing. This is true of verbs that have two accusatives in the active. So ἡν κατηχησεν αὐτῷ ὑμῖν ὡς τοῦ Κυρίου (Ac. 18:25), ὡς ἐδιδόξησε (2 Th. 2:15), ὡς ἐνδεδυμένον ἐνόμιμα γάμου (Mt. 22:11 and cf. Mk. 1:6; Rev. 1:13; 15:6; 19:14), ἐνεδιδύκτος πορφύραν (Lu. 16:19), ἐκαυματισθήσασιν καῦμα μέγα (Rev. 16:9), δορήσατε πολλάς (πληγάς, Lu. 12:47, ὀλίγας, 48), τὸ βάπτισμα ὁ βαπτίζομαι βαπτισθήναι (Mt. 10:38, two examples), ἐν πνεῦμα ἐπιτισθήμεν (1 Cor. 12:13), πεπελάμβα τὸ κρείσσονα (Heb. 6:9), πεπληρωμένων καρδίν ποικισθήσεται (Ph. 1:11; Col. 1:9 ἐνα πληρωθῆναι τὴν ἐπίγνωσιν and cf. Ex. 31:3, ἐνεπλεξαν αὐτὸν πνεῦμα σοφίας) and compare 2 Tim. 1:5 for genitive (Ἰων χαράς πληροθῆς), ἡμισυμβαπτὴ ὑπ' ὑπερθεῖν (Mt. 8:36=Mt. 16:26).

Cf. also Ph. 3:8; Heb. 10:22. See ὡς Ἐξ ἑμοί ὡφελήθης (Mt. 15:5); ὃ ὑφελήθησαν (Mt. 16:26); δραχύ το παρ ἀγέλους ἡλλαττομένου (Heb. 2:9) with active (two accs.) in Heb. 2:7. Once more observe ἀδικοῦμενον μισθὸν ἀδίκιας (2 Pet. 2:13). The predicate accusative, it should be said, becomes the nominative in the passive, as in αὐτοὶ ὑοὶ θεού κληθήσονται (Mt. 5:9). Cf. Heb. 5:10; 2 Tim. 1:11.

---

1 Hist. Synt., p. 362.
Völker

VÖLKER, F., Papyrorum graecorum syntaxis specimen (1900).

——, Syntax d. griech. Papyri. I, Der Artikel (1903).
Some verbs which have only one accusative in the active or middle yet retain the accusative of the thing in the passive with the person in the nominative. This is a freedom not possessed by the Latin. The person in the active was generally in the dative. Thus Paul a number of times uses πιστεύομαι (πιστευθῆναι τὸ ευαγγέλιον 1 Th. 2:4; ἐπιστεύθη τὸ μαρτύριον 2 Th. 1:10; cf. also 1 Cor. 9:17; Gal. 2:7; Ro. 3:2; 1 Tim. 1:11). Then again perifθάλλομαι is frequently so employed, as περιβεβλημένος σύνον (Mk. 14:51; cf. 16:5; and especially in Rev., as 7:9, 13; 11:3; 12:1; 17:4; 18:16; 19:13). This is not the middle as Blass has it, though the future middle does occur in Rev. 3:5 with ἐν, and the aorist middle with the accusative in Rev. 19:8. In Rev. 4:4 we have περιβεβλημένους σινδόνα (Mk. 14:51; cf. 16:5; and especially in Rev., as 7:9, 13; 11:3; 12:1; 17:4; 18:16; 19:13). This is not the middle as Blass has it, though the future middle does occur in Rev. 3:5 with ἐν, and the aorist middle with the accusative in Rev. 19:8. In Rev. 4:4 we have περιβεβλημένους ἵππους (loc.), and margin (W. H.) ἐν ἵππῳ. Once more περίκειμαι is used as the passive of περιτίθημι with the accusative of the thing, though the verb itself means to 'lie around' instead of 'be encompassed with.' So τὴν ἁλυσίν περίκειμαι (Ac. 28:20). Cf. also Heb. 5:2, but in Lu. 17:2 we have περὶ repeated. [Page 486]

There are once more still looser accusatives with passive verbs, partly by analogy and partly merely an extension of the principle illustrated already. Thus κατηχοῦμεν τὸν λόγον (Gal 6:6) does not really differ from ὃς ἐξεδέχθητε above. In δεδεμένος τοὺς πόδας καὶ τὰς χερίς (Jo. 11:44) we see a close parallel to περιβεβλημένος above. Note active in Mt. 22:13. In διεφθάρετο τὸν νοῦν (1 Tim. 6:5), ρ ο ἐκκεντρισμένος τὰς καρδίας (Heb. 10:22), λελουμένοι τὸ σῶμα (10:22) the accusative seems to be rather remote and to come close to the accusative of general reference, but not quite, for the force of the verb is still felt. This is still true of τὴν αὐτῆν εἰκόνα μεταμορφούμεθα (2 Cor. 3:18) and perhaps even of τὴν ἀντιμιθίαν πλατύνθητε (2 Cor. 6:13). In Ac. 21:3 ἀναφάναντες, but ἀναφανέντες, is the correct text, as Blass observes.

The impersonal verbal in –τέον occurs only once in the N. T. (Lu. 5:38) and as in the ancient Greek it is used with the accusative, ὃν νέον εἰς ἅπαν καινόν βλητέον. This verbal is more usually transitive than the personal form in –τέος, which is not found in the N. T.

(k) The adverbial accusative. It is not very common in the N. T. except in the case of pure adverbs. The adverbial accusative is really nothing more than a loose use of the accusative with intransitive verbs, with substantives or adjectives. It is rare in Homer and increases steadily till it becomes very common, though perhaps never quite so abundant as in the Sanskrit, where a veritable host of such accusatives occur. It is a perfectly normal development of the case, for extension is its root-idea. This accusative is sometimes called the accusative of general reference. As an example of such an accusative with an intransitive verb note καθίσταται τὰ πρὸς τὸν θεόν (Heb. 5:1). See also ἀνέπεσαν οἱ ἄνδρες τὸν ὄρο πεντακισχίλιον (Jo. 6:10), τὸν τρόπον ἐκπορνεύσασα (Jude 7), ὃν τρόπον ὅρνις ἐπισυνάγει (Mt. 23:37) and 2 Tim. 3:8 (ὁν τρόπον). Cf. ἀνείχσθε μου μικρόν τι (2 Cor. 11:1). In Ro. 15:17 the whole
verbal phrase is concerned with τὰ πρὸς θεόν, but see Ro. 12:18, τὸ ἔξω ὑμῶν μετὰ πάντων ἄνθρωπον ἐλημένοντες, where τὸ ἔξω ὑμῶν is acc. In Ro. 1:15 τὸ καθ᾽ ἐμὲ may be nom. In Heb. 2:17 this adv. acc. occurs with the adj. as in πιστὸς ἄρχερως τὰ πρὸς τὸν θεόν. So also with a subst. as in ὁ Χριστὸς τὸ κατὰ σάρκα (Ro. 9:5). The Text. Recept. in Ac. 18:3 had σκηνοποιοῦς τὴν τέχνην, but W. H. read σκηνοποιοῦ τῇ τέχνῃ. Indeed the [Page 487] instrumental is usual in the N. T. in such instances,\(^1\) as the following examples: Συροφοινίκισσα τῷ γένει (Mk. 7:26), Κύπριος τῷ γένει (Ac. 4:36), παντὶ τρόπῳ (Ph. 1:18), τῷ προσώπῳ (Gal. 1:22). But, on the other hand, observe τοῦναμα Ἰωσήφ (Mt. 27:57), but elsewhere in the N. T. we have ὄνοματι (Ac. 18:2). In Ro. 16:19 some MSS. have τὸ ἔφω ὑμῖν. The phrase τὸ καθ᾽ ἐξ (Ro. 12:5) is accusative, even though ἐξ itself is nominative in form. In 1 Cor. 11:18 see also μέρος τί πιστεύω. Perhaps thus is to be explained the accusative with the interjection in Rev. 8:13 οὐαὶ τούς κατοκουντας. Cf. οὐαὶ and nominative (or vocative) in Is. 1:4. There is only one instance of an accusative with an adverb of swearing in the N. T. and that is in 1 Cor. 15:31, νῇ τὴν ὑμετέραν καύχησιν. In Mk. 6:39 συμπόσια συμπόσια may be looked at as nominative (cf. προσωπί in verse 40) or accusative (cf. Lu. 9:14). Brugmann\(^2\) considers καὶ τοῦτο (1 Cor. 6:6, 8) nominative rather than accusative, but that seems hardly possible with αὐτό τοῦτο (2 Pet. 1:5), and καὶ τοῦτο may be accusative also (Ph. 1:29, etc.). Cf. also τοῦτο μέν—τοῦτο δὲ (Heb. 10:33). In Ac. 15:11; 27:25 we have καθ᾽ ὅν τρόπον. In Ph. 4:10 (ἀνεδόθητε τὸ ὑπὲρ ἐμοῦ φρονεῖν) the infinitive is probably the accusative of general reference. Cf. τὸν πόδαν πονεῖς ὑπὸ σκολάπτου, B.U. 380 (iii/A.D.).

There are indeed other expressions that come more closely to the pure adverb. Such, for instance, are τὸ καθ᾽ ἡμέραν (Lu. 11:3; 19:47; Ac. 17:11), τὴν ἄρχην (Jo. 8:25), τὸ λοιπὸν (Mk. 14:41; Ph. 3:1; Heb. 10:13, etc.), τὸ πρῶτον (Jo. 6:62, etc.), τὸ πρῶτον (Jo. 10:40; 12:16); τὸ πλείστον (1 Cor. 14:27), τὰ πολλὰ (Ro. 15:22, MSS. πολλάκις), τὰ νῦν (Ac. 17:30), τὸ νῦν ξένον (Ac. 24:25), τὸ τέλος (1 Pet. 3:8). In the case of τὸ λοιπὸν (1 Cor. 7:29) it may be either accusative or nominative. In 2 Cor. 6:13 τὴν ἄντιμοθηναν is considered adverbial accusative by some, as is πᾶντα with ἄρσα (1 Cor. 10:33) and with μένησθε (11:2). Observe also τὸ αὐτό (Ph. 2:18; Mt. 27:44). Cf. οὐδὲν χρείαν ξέναν (Rev. 3:17), and the common use of τὶ in the sense

Brugmann

BRUGMANN, K., Elements of Comparative Grammar of the Indo-Germanic Languages (translation by Wright, 1895).

———, Griechische Grammatik. 3. Aufl. (1900), the ed. quoted. Vierte vermehrte Aufl. of A. Thumb (1913).

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).

of ‘why’ as in Mt. 17:10 (ὅτι τί in verse 19). This phase of the adverbial accusative is common in the papyri.3

But the most numerous group of adverbial accusatives is found in the adverbs themselves. The accusative is not the only case used for adverbs, but it is a very common one. In Homer4 indeed adverbial accusatives of substantives are almost absent. But the N. T. shows a few in harmony with the development of the language. Thus ἄκοψα (Mt. 15:16), δωρεάν (Mt. 10:8), χάριν as a preposition (Eph. 3:1, etc.). But adjectives in the accusative were numerous in Homer1 both in the singular and the plural. They occur in the positive, comparative and occasionally the superlative. As examples of the positive singular may be taken πολύ (2 Cor. 8:22), ὀλίγον (Mk. 6:31), μέσον (Ph. 2:15), ταχύ (Mt. 5:25), λοιπὸν (1 Cor. 1:16, etc. Cf. B.U., iv, 1079, 6). Indeed the participle τυχόν (1 Cor. 16:6) is used as an adv. acc. (see Acc. Absolute). As an example of the plural positive note πολλά in Ro. 16:6, though this may be construed as cognate acc. with ἐκοπίασεν. Cf. Jas. 3:2; 1 Cor. 16:12, 19. For the comparative singular note μᾶλλον κρείσσον (Ph. 1:23), σπουδαίτερον (2 Cor. 8:22), δεύτερον (1 Cor. 12:28), περισσότερον (Mk. 7:36), τάχειον (Jo. 13:27), etc. Cf. πολὺ σπουδαῖότερον (2 Cor. 8:22) with μᾶλλον κρείσσον (Ph. 1:23), the instrumental and usual idiom in the N. T. In the superlative it is usually the plural form like ἡδίστα (2 Cor. 12:9), μάλιστα (Ac. 20:38), τάχιστα (Ac. 17:15), etc. But note πρῶτον (1 Cor. 12:28), ἐπτάτον (ib.). The later Greek continued to exhibit a wealth of adverbs in the accusative.5

(i) THE ACCUSATIVE BY ANTIPTOSIS.3 It is not in reality a special use of the accusative, but merely a shifting of the noun or pronoun out of its usual order and into the government of the other preceding clause, and thus it becomes accusative whereas it would otherwise be nominative. So in Mk. 1:24, οἶδα σὲ τίς ἐλ (cf. Lu. 4:34), Lu. 19:3, ἰδεῖν Ἰησοῦν τίς ἔστιν. But in Mt. 15:14 we have a kind of prolepsis (not the technical sort) without any change of case, τυφλὸς τυφλὸν ἐὰν ὁ δήμος. In the case of μή τινα ὑμῖν ἐπέστασα τρίς ὑμῖν, δι᾽ αὐτοῦ ἐπέλειψαν ὑμᾶς (2 Cor. 12:17) the τινα is left to one side and anacoluthon takes place and the sentence is concluded by δι᾽ αὐτοῦ.

(m) THE ACCUSATIVE BY INVERSE ATTRACTION. Thus ὅρκον ὃν ὤμοσεν (Lu. 1:73), τὸν ἐπτάτον δὲν κλῆμεν (1 Cor. 10:16). Cf. τῷ ποτήριον (1 Cor. 10:15). In Mk. 3:16 but for the parenthesis (καὶ ἐπέθηκεν ὅνομα Σιμωνὶ) Πέτρον we should seem to have the dative and the accusative in apposition.

[Page 489] (m) THE ACCUSATIVE WITH THE INFINITIVE. The grammars generally speak of the accusative as the subject of the infinitive. I confess that to me this seems a grammatical misnomer. The infinitive clause in indirect discourse does correspond

4 Giles, Man., etc., p. 309.
3 Farrar, Gk. Synt., p. 85.
to a finite clause in English, and a clause with ὅτι and the indicative may often be used as well as the infinitive clause. But it is not technically scientific to read back into the Greek infinitive clause the syntax of English nor even of the ὅτι clause in Greek. Besides, not only is the infinitive a verbal substantive¹ and in a case like the verbal adjective (the participle), but being non-finite (in-finitive) like the participle (partaking of both verb and noun), it can have no subject in the grammatical sense. No one thinks of calling the accusative the “subject” of the participle. Take ἔχεις ἰδοὺ τὸν υἱὸν τοῦ ἄνθρωπου ἔρχόμενον (Mt. 16:28). Here the accusative is the object of ἰδοὺν and the participle is descriptive of υἱόν. Now with the infinitive in indirect discourse it is as a rule the infinitive, not the substantive, that is the object of the verb. No further case is needed with the infinitive, if the pronoun or substantive be the same as the subject of the principal verb. Thus ἐὰν τὸν ἐσχῆμον ἡμῖν—νομίζει (1 Cor. 7:36). If such a word is used, it may be in the pred. nom. in apposition with the subject of the verb, as φάσκοντες εἶναι σοφοί (Ro. 1:22), or the accusative may be used. This accusative may be with a verb that can have two accusatives, as in ἡγοῦν ἐμαυτὸν οὐ λογίζομαι κατευθύνει (Ph. 3:13) or the accusative of general reference as in πέποιθας τῇ σεαυτὸν ὄντον εἶναι τυφλῶν (Ro. 2:19). This latter usage is the explanation of the accusative with the infinitive in the instances where the word used with the infinitive is other than the subject of the principal verb. Typical examples are seen in οἱ λέγοντες αὐτὸν ζῆν (Lu. 24:23), νομίζοντες αὐτὸν τεθνηκέναι (Ac. 14:19), βούλομαι προσεύχεσθαι τοῦς ἄνδρας (1 Tim. 2:8). In these examples the infinitive is the object of the verb and the affirmation is made as far forth as the word in the accusative. They affirm living as to him; considering having died or death as to him; and wish praying as to the men. This is the psychology of this accusative with the infinitive. The fact that later grammarians call it the “subject” of the infinitive cuts no figure in the matter of the origin of the usage. Clyde² has interpreted the matter correctly. He sees that “grammarians framed this rule in ignorance of the etymology

[Page 490] of infinitives,” and that “since the infinitive was originally a case, the accusative could not originally have been its subject.” This descriptive accusative or accusative of definition (general reference) has a very wide range in Greek, as seen above, and is the true historical explanation of the accusative with the infinitive (other than the accusative which may be the object of the infinitive itself). When the infinitive is used with the accusative, it indicates the agent who has to do with the action by the accusative, since the infinitive can have no subject in the technical sense. This use of the accusative with the infinitive is common also when the infinitive is in a prepositional clause like ἐν τῷ ἐλπισεν τοὺς γονέας τῷ παιδίῳ Ἰησοῦ (Lu. 2:27). Here the matter becomes clearer for the reason that the article τῷ cannot be slurred over and it becomes imperative to explain one of the accusatives as that of general reference. The context makes it clear that τῷ παιδίῳ is the object of ἐλπίσεν, while τοὺς γονέας is the accusative of general reference. Many examples of this sort occur. Cf. Mt. 13:4. In Mt. 26:32, μετὰ τὸ ἐχερθῆναι με, note the accusative με rather than nothing or αὐτὸς or ἐμαυτόν. Cf. also Ac. 23:15. The article may be so used without a preposition, and either the nominative appear, as δέομαι τῷ μη παρῴων θαρρῆσαι (2 Cor. 10:2), or the accusative, as τῷ μη εὑρεθῆν με Τίτον (2 Cor.

¹ For inf. as subject and as object. see ch. on Verbal Nouns.
Clyde CLYDE, J., Greek Syntax (1876).
Then again the accusative may be used with the infinitive in such constructions as καὶ δὲν ἔστιν ἣμᾶς ὁ δὲν ἐδόθη (Mt. 17:4). Note here the infinitive as subject, as the infinitive as object occurs in 2 Cor. 10:2. There is one example of three accusatives with the infinitive in Heb. 5:12 (πᾶλιν χρείαν ἔχετε τοῦ διδάσκειν ὑμᾶς τινὰ τὸ στοιχεῖον). Here we have a verb that is used with two accusatives, and τινὰ is the accusative of general reference. Cf. the three accusatives in Lu. 11:11. This subject will call for further discussion in the chapters on Indirect Discourse and Verbal Nouns. There was a constant tendency in the later Greek to exchange this use of the infinitive and accusative for the ἅπαξ clause.\(^1\)

\( (o) \) THE ACCUSATIVE ABSOLUTE. The absolute use of the accusative is rare in the N. T. as compared with the earlier Greek.\(^2\) Usually the genitive occurs with the participle and substantive when used absolutely. In 1 Cor. 16:6 τῷ ὑπόκοιν ἐν ὅποιν σε. In 1 Tim. 2:6 τὸ μαρτύριον καυροῦ ἱδίους is in the accusative without any \[Page 491\] immediately connection unless it is in apposition with the preceding clause\(^1\) (Elicott \textit{in loco}) or is loosely united with δοῦς. As to τὸ ὑπόκοιν τοῦ νόμου (Ro. 8:3) we have either the nominativus pendens, the accusative in apposition with the object of the sentence, the accusative of general reference, or an instance of anacoluthon.\(^2\) In Lu. 24:47 the Text. Recept. reads ἥρξεν εἶναι, which would be anacoluthon, but W. H. rightly have –ου. Twice ἔξόν occurs in the N. T., once with ἰν (Mt. 12:4) and once alone, ὁ οὐκ ἔξον (2 Cor. 12:4), but in both instances in the nominative. In Ph. 1:7 ὑμᾶς ὑπεράναυ τοῦ ὑμᾶς is repeated and is not accusative absolute. A subordinate sentence may also be in the accusative of general reference. Thus τὸ εἰ δοῦν (Mk. 9:23), τὸ τίς ἐν ἑπτα ἐπυξεν ἀφιῶν (Lu. 9:46). See further chapter on Verbal Nouns.

\( (p) \) THE ACCUSATIVE WITH PREPOSITIONS. Only a general remark is needed here, since each preposition will be discussed later in detail. In general one may note that the accusative is the most frequent case with prepositions.\(^3\) Indeed in modern Greek these all have the accusative. Πρὸς in the N. T. has ablative 1, locative 6, accusative 679 times.\(^4\) Here the preposition, like all prepositions, is merely an adverb that is used to express more exactly the idea of the case. The preposition does not technically govern a case. The accusative with the preposition has, of course, its usual force, extension. The following prepositions occur in the N. T. with the accusative, one example being given in each instance. ἄν ἢ ὑμᾶς (Mk. 7:31), διὸ τὸν φόβον (Jo. 7:13), εἰς τὴν πόλιν (Mt. 26:18), ἐπὶ τὴν γῆν (Mt. 15:35), κατὰ τὸν νόμον (Lu. 2:22), μετὰ ἡμέρας τρεῖς (Lu. 2:46), παρὰ τὴν ὁδὸν (Mt. 20:30), πέρι αὐτόν (Mt. 8:18), πρὸς αὐτόν (Mt. 3:5), ὑπὲρ δοῦλον (Phil. 16), ὑπὸ τὸν μόδιον (Mt. 5:15). Of these εἰς is, of course, by far the most frequent and has only the accusative. Διὰ, μετὰ, περὶ, ὑπὲρ, ὑπὸ have the genitive-ablative more than the accusative, while ἐπὶ, κατὰ, πρὸς have

\(^1\) Jann., Hist. Gk. Gr., p. 484 f.
\(^2\) It is rare also in the pap. Völker, Pap. Gr. Synt. Spec., p. 18.
\(^1\) For acc. in apposition with sentence in pap. see Moulton, Cl. Rev., 1904, p. 152, τὸ μῆν ὅποι, T.P. 1 (ii/b.c.).
\(^2\) Green, Handb., etc., p. 234.
\(^3\) Giles, Man., etc., p. 311.
\(^4\) Moulton, Prol., p. 106.
the accusative more often. For exact figures see Moulton, *Prol.*, pp. 105–107. In the chapter on Prepositions there will be further discussion of the matter.

**VIII. The Genitive (True) Case (ἡ γενικὴ πτώσις).**

*(a) Two Cases with One Form.* It is now generally accepted by the comparative grammars that in Greek two cases appear under the form of the genitive: the genitive proper and the [Page 492] ablative.¹ It is a syncretistic form. The matter has already had some discussion in this grammar under Declensions and calls for little remark here. Moulton is not too hard on Winer when he calls it “an utterly obsolete procedure” to speak of the genitive as “unquestionably the *whence-case.*”² Winer is

followed by Green. Now the ablative is the whence-case, but the genitive is a different case. Delbrück gives an interesting sketch of the fate of the ablative case in the Indo-Germanic languages. In the Sanskrit singular the two cases (gen. and abl.) have the same form, except I.-G. -o (Sansk. -ā) stems (Sansk. gen. -āṣyā, abl. -ād). In the Balto-Slavic tongues ablative and genitive have the same endings. In the Italic languages, ablative, locative, instrumental (and partly dative) have the same form. Indeed in the Thessalian dialect as in the Latin some forms of the genitive and locative coincide (like domi). Dionysius Thrax had the idea that both cases flourished under one form in Greek, for he describes this case as ἡ γενικὴ κτητικὴ καὶ πατρική. Thompson indeed recognises the two cases, but thinks it is not possible to group the uses of the form under these two divisions because some suit either case. There is a “debatable land” as Giles observes, but this applies to only a very small part of the examples and is very natural indeed. As a matter of fact it is not possible to give a really scientific explanation of the usage in Greek from any other standpoint. The ablative will therefore be treated as a separate case and the true genitive discussed now.

(b) NAME INCORRECT. The genitive case has the wrong name. The Latin *genitivus* is a translation of γενετική (more like the ablative in idea). It is ἡ γενικὴ πτῶσις. The name γενική comes from γένος (γένος), ‘kind,’ and corresponds to the Latin

7 Man., p. 313.
generalis.\,Priscian\,so calls it (generalis casus). It is a pity that one still has to call it “genitive.”

[Page 493] (c) THE SPECIFYING CASE. It is this and no other. The idea of the genitive case is at bottom simple. The genitive shows διαίρεσιν and something εἰδικόν. It is the case of genus (γένος) or kind. For a very full discussion of the genitive see Delbrück, Vergl. Synt., III, pp. 307–360. The genitive does indeed resemble the adjective, but it is not adjectival in origin,\,though the source of the genitive ending is unknown. The adjectival possessive pronoun (like ἔμοις) is a mere variation of the genitive case (ἔμοι) and the two may be in apposition with one another, as τῇ ἔμοι χείρι Παύλου (2 Th. 3:17). But the function of the case is largely adjectival as in ἡμέρα παρασκευῆς (Lu. 23:54), though the adjective and the genitive are not exactly parallel, for with two substantives each idea stands out with more sharpness, as in ἐν καινότητι ζωῆς (Ro. 6:4) and ἐπὶ πλούτου ἀδηλότητι (1 Tim. 6:17).\,It is the specifying case, then, the case of appurtenance.\,In the Sanskrit Whitney finds the genitive adjectival in idea and defining the noun more nearly. So also Kühner-Gerth who find it qualitative with nouns or verbs. But Delbrück,\,followed by Brugmann,\,makes the verb the starting-point for explaining the genitive. One hesitates to part company with Delbrück and Brugmann, but the older view that it was first used with nouns seems here to have the best of it.\,It may be remarked that the genitive is the most persistent of all the cases in retaining its forms, as is seen in the English of. Indeed in the modern Greek the form shares with the accusative the result of the loss of the dative, so that we often meet a construction like αὐτοῦ τὸ εἴπα (‘I told him so’).\,One other remark is called for concerning the meaning of the genitive in Greek. It is that the case does not of itself mean all that one finds in

9 In late Gk. the true gen. survives while the abl. fades further away. Jann., Hist. Gk. Gr., p. 333.
translation. The case adheres to its technical root-idea. The resultant idea will naturally vary greatly according as the root-conception of the case is applied to different words and different contexts. But the varying element is not the case, but the words and the context. The error must not be made of mistaking the translation of the resultant whole for the case itself. Thus in Mt. 1:12 we have πετοικεσίαν Βαβυλῶνος. It is translated ‘removal to Babylon.’ Now the genitive does not mean ‘to,’ but that is the correct translation of the total idea obtained by knowledge of the O. T. What the genitive says is that it is a ‘Babylon-removal.’ That is all. So in Mt. 12:31, ἂ τοῦ πνεύματος βλασφημία, it is the ‘Spirit-blasphemy.’ From the context we know that it is blasphemy against the Spirit, though the genitive does not mean ‘against.’ When a case has so many possible combinations in detail it is difficult to make a satisfactory grouping of the various resultant usages. A very simple and obvious one is here followed. But one must always bear in mind that these divisions are merely our modern conveniences and were not needed by the Greeks themselves. At every stage one needs to recall the root-idea of the case (genus or kind) and find in that and the environment and history the explanation.

(d) The Local Use. This is normally the first to begin with. In Greek literature it appears mainly in poetry and in adverbs of place like αὐτοῦ, οὗ, ποῦ, ὅπου, ὅμου, πανταχοῦ. But it is possible that these are locatives like ἄλλοθι in a shortened form. But on the other hand in Homer the genitive undoubtedly appears in local relations with the archaic genitive in –οι, though even in Homer the examples are chiefly stereotyped ones. There are in the N. T. only these examples in Luke and Acts. In Lu. 5:19 μὴ εὑρόντες ποίας ἐσπενέγκοσιν αὐτόν and 19:4 ἔκείνης ἠμέλλεν διέρχεσθαι we have two undoubted examples. Blass indeed calls these “incorrect” on the ground that “classical Greek” would not have used the genitive thus. But it is sufficient reply to say that Luke was not writing classical Greek. Certainly Xenophon might have used ποία, ἔκείνη (as D has in Lu. 19:4). Moulton finds often in the papyri νότου, λιβός, though in Rev. 21:13 we have the ablative νότον. In Ac. 19:26 we have a very striking example that the commentators have failed to notice as Moulton observes. It is οὗ μόνον Ἐφέσου ἄλλα σχεδὸν πάσης τῆς Ἀσίας ὁ Παῦλος πείσας μετέστησεν ἢμαν οὕλον. Moulton on the whole agrees with Hackett that the genitive here is dependent on οὕλον. In Homer one has a parallel like οὔκ Ἀγρέος ἦ σεν, but Moulton finds none in the vernacular κοινή. Still, since Luke did use ἔκείνης and ποίας, it does not seem difficult to believe that he was ready to employ the genitive of place in Acts.

There is another passage in Luke also (Lu. 16:24) where the genitive of place occurs, ἢνα βάπτῃ τὸ ἄκρον τοῦ ὁδοτύλου αὐτοῦ ὡδατος. Here ὡδατος emphasizes the kind of material which the speaker clearly has in mind. Ἰκ has ὡδατι. One may note in this connection the Homeric idiom λουεθαι ποταμοῖο, ‘to bathe in the river.’ Cf. also

7 Ib.
the classic ποῦ γῆς. Somewhat similar also is ἡ διασπορὰ τῶν Ἑλλήνων (Jo. 7:35) and ὁ ἄνδρον (Mt. 10:5), which are objective genitives but of place also. Cf. Ἕλλην (Acts 22:3) which is described by Blass-Debrunner, p. 101, as partitive genitive.

(e) THE TEMPORAL USE. It is common enough. This is a very old use of the genitive.1 This is the true genitive.2 The accusative when used of time expresses duration over the period, the locative regards the period as a point even if it is of some length (cf. καιρὸς ἤδη, 1 Tim. 6:15), while the genitive implies nothing3 as to duration. In Mt. 24:20 this distinction can be seen in χειμῶν καὶ σαββάτος, one the case of genus, the other a point of time. Brugmann4 indeed regards the genitive of time as a development of the partitive genitive, but this seems hardly necessary. Moulton,5 on the other hand, connects it with the genitive of possession and finds it very frequently in the papyri, like ἡ χρειάζομαι τῆς ἡμέρας, F.P. 124 (ii/A.D.). On the difference between the genitive and the accusative of time see ημέρας καὶ νύκτος (Lu. 18:7) and νύκτα καὶ ημέραν (Lu. 2:37), the genitive the time within which (kind of time), the accusative the time during which (all through). Cf. also νυκτὸς τὸ πρῶτον (Jo. 19:39). See also τοῦ λυποῦ (Gal. 6:17) and τὸ λυπόν (Heb. 10:13). Once more observe μεσονύκτον ἢ ἀλεξηφωνίας (Mk. 13:35) where some MSS. have μεσονυκτίου. The accusative here is more like the adverb ὅστις just preceding. Further examples of the genitive may be seen in μέσης νυκτός (Mt. 25:6), ὅρθρου βωθείου (Lu. 24:1). For adverbs in expressions of time, see VIII, (h).

(f) WITH SUBSTANTIVES. This is the chief use of the case. The accusative indeed is chiefly connected with the verb, while the genitive is mainly related to substantives.6

1. The Possessive7 Genitive. In simple point of fact it is not necessary to see any particular inner connection between the many uses of the genitive with substantives other than the common root-idea of the case. For convenience it suits us to group these usages, but one must think that the Greeks themselves looked at the whole matter much more simply. After all it is the context that varies rather than the genitive.1 The resultant idea is therefore a matter of exegesis rather than due to any particular label to be attached.2 The most obvious illustrations like πατάξας τὸν δοῦλον τοῦ ἀρχιερέως ἀφεῖλεν αὐτοῦ τὸ ὄψιν (Mt. 26:51) call for little remark. It is the high-priest’s servant, not another’s, and it is the servant’s ear, not another’s. The possessive pronouns, especially ἐμὸς in John’s Gospel, were used to some extent in

2 Delbrück, Grundl., etc., IV, p. 45.
5 Prol., p. 73.
6 Giles, Man., etc., p. 311.
7 Delbrück, Vergl. Synt., I, p. 344.
1 Giles, Man., etc., p. 312.
2 Moulton, Prol., p. 72. Blass, also (Gr. of N. T. Gk., p. 95) thinks that the exact shade of the gen. idea is often a matter of theological, not grammatical interpretation.
the N. T., but usually the genitive of the personal pronoun is found. In Jo. 7:16 they occur side by side. Cf. τῇ ἐμῇ χειρὶ Παύλου (1 Cor. 16:21).

2. **Attributive Genitive.** Like an adjective the genitive may be either attributive or predicate. This is sometimes called the genitive of quality. But the name helps little, as all genitives have this idea. The sense of attribute is indeed the usual one with the genitive, as Παῦλος δοῦλος Ἰησοῦ Χριστοῦ (Ro. 1:1). Thus observe the descriptive genitive in Mt. 18:9 εἰς τὴν γένναν τοῦ πυρός, Ro. 6:6 τὸ σῶμα τῆς ἁμαρτίας, τὸ σῶμα τῆς ταπεινώσεως (and τῆς δόξης, Ph. 3:21), τὸ σῶμα τῆς σαρκός (Col. 1:22), βάπτισμα μετανοίας (Mk. 1:4), ἡμέρας δόν (Lu. 2:44), ὁ οἶκονόμος τῆς ἄδικίας (Lu. 16:8). And even expressions like υἱὸς φωτός (1 Th. 5:5) are shown by the inscriptions and coins (Deissmann, *Bib. Stud.*, p. 165) to be not mere Hebraisms, though far more frequent in the LXX than in the N. T. because of the Hebrew. Other examples are λόγοι τῆς χάριτος (Lu. 4:22), σκεῦος ἐκλογής (Ac. 9:15), σκεῦος ὑγιείας (Ro. 9:22), κριτὴς τῆς δικίας (Lu. 18:6), πάθη δημιουργίας (Ro. 1:26), υἱὸς τῆς παρενίκας (Col. 1:13), νόμον τῆς ἐλευθερίας και ἀκροασίας ἐπιθυμηθημένης (Jas. 1:25), ἐπαινήσαμα τῆς δόξης (Heb. 1:3), κωδία ἀποστάσις (Heb. 3:12), βία πικρίας (Heb. 12:15), ἡ πλῆθυ τοῦ θανάτου (Rev. 13:3), where the descriptive attributive genitive expresses quality like an adjective indeed, but with more sharpness and distinctness. Cf. again ἐν καινότητι

The Predicate Genitive. While having the copula εἰναί, γίνεσθαι, etc., in reality it is to be explained as a genitive with substantives. It is not the copula that affects the case of the genitive at all. It is just the possessive genitive in the predicate instead of being an attribute. Often the substantive or pronoun is repeated in sense before the predicate genitive. Thus οὐκ ἔστιν ἀκαταστασίας ὁ θεός (1 Cor. 14:33). Cf. ἡμέρας οὐκ ἔσμεν ὑποστολῆς — ἄλλα πίστεως (Heb. 10:39), πᾶσα παιδεία οὐ δοκεῖ χαράς εἶναι (Heb. 12:11). So ἢν γὰρ ἔτων δόδεκα (Mk. 5:42). So Lu. 2:42. Cf. also ἡν τινας εὐρη τῆς ὅντος ὑών (Ac. 9:2), and indeed ἐγένετο γνώμης (Ac. 20:3) is to be explained the same way. There is as much latitude in the predicate genitive as in the attributive possessive genitive. We have οὐλοί φωτὸς ἐστε καὶ οὐλοί ἡμέρας (1 Th. 5:5) and οὐκ ἔσμεν νυκτός οὐδὲ σκότους (1 Th. 5:6) and ἡμέρας ὄντες (verse 8). 2 We may continue the illustrations like ἐγνω ἐμί Παύλου (1 Cor. 1:12), οὐκ ἐστε ἑαυτῶν (1 Cor. 6:19), τὸν θεοῦ οὐ εἶμι (Ac. 27:23), πᾶντα ἤμων ἔστιν (1 Cor. 3:21), οὖς ἦμων ἔστιν γνώναι (Ac. 1:7), ἵνα ἠμῶν γένηται ἡ κληρονομία (Lu. 20:14), τίνος αὐτῶν ἔσται γυνή (Mk. 12:23), τελείων ἔστιν ἡ στερεά τροφή (Heb. 5:14), Χριστοῦ ἐστιν (2 Cor. 10:7), ὅν ἔστιν Φύγελος καὶ Ἐρυμογένης (2 Tim. 1:15), ἵνα ἡ ὑπερβολή τῆς ἡμέρας ἐστιν.
δυνάμεως ἵ τοῦ (2 Cor. 4:7), and finally, though by no means all that can be adduced, ὃν ἐστὶν οὖχ ὁ—κόσμος (1 Pet. 3:3). These passages not only illustrate the variety of the predicate genitive, but show that this is essentially a substantival genitive (cf. predicate nominative) and not a verbal genitive. As an example of the objective genitive in the predicate take σκάνδαλον ἵ ἐμοῦ (Mt. 16:23). In the modern Greek the predicate genitive has been still further extended (Thumb, Handbuch., p. 33).

4. Apposition or Definition. This is a very simple use of the case, but is not an extremely common idiom in the N. T., since the two substantives can easily be put in the same case. In the modern Greek mere apposition rules (Thumb, Handbuch., p. 33). But some interesting examples occur. It is a well-known idiom in Homer and certainly needs no appeal to the Hebrew for justification. Kühner-Gerth may also be consulted for other poetical examples. In the N. T. we note πόλεις Σοδόμων καὶ Γομόρρας (2 Pet. 2:6) which Blass compares with Ἰλίου πόλιν of Homer and observes that πόλεως Θυατέρων (Ac. 16:14) is merely the genitive of πόλις Θυάτειρα (cf. πόλει Ἰοππῆ in Ac. 11:5). In 2 Cor. 11:32 the adjective is used as τῆς πόλεως Δαμασκηνῶν, while in Rev. 18:10 we have true apposition. One may note further τοῦ ναοῦ τοῦ σώματος αὐτοῦ (Jo. 2:21), τὸν ἅρπαξαν τοῦ πνεύματος (2 Cor. 5:5), σημεῖον περὶ τῆς καθήσεως (Ro. 4:11, AC περὶ τῆς ἱάσεως (Ac. 4:22), ή κοίμησιν τοῦ ὤμου (Jo. 11:13), θώρακα πέταλως καὶ ἀγάθης (1 Th. 5:8), τὸ ἔργον τῆς πεπερατέος (1 Th. 2:3), ἐν τῷ ὀνόματί τῆς ἄλληθρες τοῦ εὐαγγελίου (Col. 1:5), ἡ ἀνταπόδοσις τῆς κληρονομίας (Col. 3:24), ἐν χρήσις κακίας (1 Cor. 5:8), ἡ δικαιοσύνη τό ἑκάστῳ αὐτοῦ (2 Cor. 2:14), ἡ προσφορὰ τῶν ἐποίησε (Ro. 15:16), τὸ μετανοήσαν τοῦ φραγμοῦ (Eph. 2:14), ὁ θεμέλιος τῶν ἀποστόλων (Eph. 2:20), θεμέλιος μετανοίας (Heb. 6:1), ἡ ἀπόκρισιν τοῦ θανάτου (2 Cor. 1:9), ὁ ἑμπλοκῆς τριχὼν—κόσμος (1 Pet. 3:3), ὁ στέφανος τῆς ζωῆς (Rev. 2:10), ὁ στέφανος τῆς δόξης (1 Pet. 5:4), ὁ τῆς δικαιοσύνης στέφανος (2 Tim. 4:8), ἡ ἐορτὴ τῶν ἀζύμων (Lu. 22:1), ἡ

4 Gr. of N. T. Gk., p. 98. Cf. also W.-Sch., p. 266 f.
ἡ οἰκία τοῦ σκῆνους (2 Cor. 5:1), ἡ ἀπαρχὴ τοῦ πνεύματος (Ro. 8:23), τῆς ἐπαγγελίας τοῦ πνεύματος (Ac. 2:33), νόμος πίστεως (Ro. 3:27). These are by no means all, but they illustrate at least the freedom of the N. T. in the use of the genitive of definition or of apposition. It is, of course, possible, as Moulton (Proli., p. 74) suggests, that the vernacular has preserved the poetical [Page 499] idiom in this as in so many other matters. Poetry often expresses better than prose the language of the people. In Eph. 4:9 εἰς τὰ κατώτερα μέρη τῆς γῆς we probably have not this usage, but the ablative after the comparative. Cf. Ellicott in loco. In Jo. 21:8 τὸ δίκτυον τῶν ἱζθόων the genitive merely gives the content (cf. material and quantity as opposed to quality). Cf. also ἀλάβαστρον μύρου (Mk. 14:3) and κεράμιον ὑδατος (Mk. 14:13), ἄγελη χόρων (Mt. 8:30) and Ἐκατόν βάτους ἔλαιου (Lu. 16:6).

5. The Subjective Genitive. It can be distinguished from the objective use only by the context. Sometimes the matter is not clear. This genitive is the common possessive genitive looked at from another angle. In itself the genitive is neither subjective nor objective, but lends itself readily to either point of view. The subjective genitive can indeed be applied to the merely possessive genitive noted above.1 Take Ro. 1:17 where δικαιοσύνη θεοῦ means the righteousness which God has and wishes to bestow on us. A typical example is found in 2 Cor. 5:14, ἡ γὰρ ἀγάπη τοῦ Χριστοῦ συνέχει ἡμᾶς. Here it is unquestionably the love that Christ has for sinners and so for Paul that is the constraining influence in his life. In Ro. 8:39 the matter is explained indeed by the phrase ἀπὸ τῆς ἀγάπης τοῦ θεοῦ τῆς ἐν Χριστῷ Ἰησοῦ. Abbott2 is apparently right in finding only a couple of passages in the N. T. where ἀγάπη is used with the objective genitive (2 Th. 2:10, ἡ ἀγ. τῆς ἀληθείας; Lu. 11:42, παρέρχεσθε τὴν κρίσιν καὶ τὴν ἀγάπην τοῦ θεοῦ). Jo. 5:42 τὴν ἀγάπην τοῦ θεοῦ οὐκ ἔχετε ἐν ἑαυτοῖς might be either subjective or objective, but see Ro. 5:5. In Ph. 4:7 ἡ εἰρήνη τοῦ θεοῦ is probably subjective and so ‘the peace that God has and gives,’ but the meaning is richer than any phrase, as Simcox3 well observes. Cf. Col. 3:15. In Ro. 15:8, ὑπὲρ ἀληθείας θεοῦ, we seem to have the subjective genitive. Note also δικαιοσύνη πίστεως (Ro. 4:13), which is explained as subjective by Paul in the phrase

3 Lang. of the N. T., p. 87.
6. The Objective Genitive. It is quite frequent in the N. T., especially when it is vanishing in the later Greek. The adnominal genitive preserves a remnant of the old objective genitive in modern Greek (Thumb, Handb., p. 34). Here again we must appeal to the root-idea of the genitive as the case of genus or kind. The resultant idea is due to the context and one must not suppose that the Greek genitive means all the different English prepositions used to translate the resultant idea. Thus in Mk. 11:22 έχετε πίστιν θεοῦ we rightly translate ‘have faith in God,’ though the genitive does not mean ‘in,’ but only the God kind of faith. Cf. Ro. 3:22. Take Mt. 12:31, ἢ δὲ τοῦ πνεύματος βλασφημία, where the context makes it clear that it is blasphemy ‘against’ the Holy Spirit. Another striking example is Ac. 4:9, ἔστι εὐφρενιστὸν ἄνθρωπον ἀνθενοῦς, where the good deed is done ‘to’ a sick man. In Jo. 7:13, διὰ τὸν φόβον τῶν Ἰουδαίων, it is fear ‘towards’ or ‘in reference to’ the Jews, while Jo. 17:2, ἔξοσια πάσης σαρκός, means authority ‘over’ all flesh (cf. ἔξοσιαν πνευμάτων ἄκωφτων, Mt. 10:1, and τῆς ὑμῶν ἔξοσιας, 1 Cor. 9:12). In 1 Cor. 10:6, τόποι θημῶν, we have types ‘for’ us. In Jo. 18:29 we have accusation ‘against’ this man, κατηγορία θεοῦ, etc. Each example calls for separate treatment. So τὸ σημεῖον Ἰουνᾶ (Lu. 11:29) may be the sign shown in Jonah, while νόμος τοῦ ἄνδρος (Ro. 7:2) is the law ‘about’ the husband (cf. θυόμος τοῦ λεπροῦ, Lev. 14:2). In 1 Pet. 2:19, διὰ συνείδησιν θεοῦ, it is a good conscience ‘toward’ God, while ἐν τῇ προσευχῇ τοῦ θεοῦ (Lu. 6:12) we have prayer ‘to’ God. Ὅξιος τοῦ οἴκου σου (Jo. 2:17) is zeal ‘concerning’ thy house. See Ro. 10:2; cf. also Heb. 11:26, τὸν ἀνέκδημὸν τοῦ Χριστοῦ. In Col. 2:18, θηρικεῖται τῶν ἀγγέλων, it is worship ‘paid to’ angels, while εἰς τὴν ὑπακοήν τοῦ Χριστοῦ (2 Cor. 10:5) is obedience ‘to’ Christ. But see per contra ὑπακοή πίστεως (Ro. 1:5) which is subjective genitive. In 1 Cor. 1:6, ἀρτιτιον τοῦ Χριστοῦ, we have again witness ‘concerning’ Christ. Cf. also ὁ λόγος ὁ τοῦ σταυροῦ (1 Cor. 1:18) and ἄκοι πολέμιον (Mt. 24:6). So in 1 Cor. 8:7 ἡ συνείδησις τοῦ εἰδώλου is consciousness ‘about’ the idol, not the idol’s consciousness. See also the two objective uses of ἐγήσα in 2 Th. 2:10 and Lu. 11:42 and possibly also Jo. 5:42; 2 Th. 3:5; 1 Jo. 2:5. In Ro. 5:5 either will make good sense. The phrase φόβος θεοῦ (Ro. 3:18) is objective, and note also 2 Cor. 5:11 (τὸν φόβον τοῦ κυρίου). Eph. 5:21 is objective. See also καθ ὑπομονήν ἔργου ἐγαθοῦ (Ro. 2:7), ‘in’ a good work, and εἴς δικαίωσιν ζωῆς (Ro. 5:18), ‘to’ life. Cf. ἀνάστασιν ζωῆς—κρίσεως (Jo. 5:29). Indeed one may go on and include those genitives of “looser relation” usually set off to themselves. They are really just the objective genitive. So as to ὁδὸς ἐθνῶν (Mt. 10:5), way ‘to’ the Gentiles: ὁδὸν θαλάσσης (Mt. 4:15), way [Page 501] ‘by’ the sea; τὴν διασπορὰν τῶν Ελλήνων (Jo. 7:35), dispersion ‘among’ the Greeks; πρόβατα σφαγῆς (Ro. 8:36), ‘doomed to’ slaughter; θύρα τῶν προβάτων (Jo. 10:7), door ‘to’ the sheep; μετοικεσία Βαβυλῶνος (Mt. 1:11), and even ἄπολυτρόσως τῶν παραβάσεων (Heb. 9:15), though this last may be regarded as an ablative. But βαπτισμῶν διάσχην (Heb. 6:2) is objective genitive. Note also τροπῆς ἀποσκίασμα (Jas. 1:17), a shadow ‘cast by’ turning, and

4 Green, Handb., etc., p. 219.
πίστει ἅληθείας (2 Th. 2:13), faith in the truth. In Heb. 10:24, παροξυσμὸν ἅγιας καὶ καλῶν ἔργων there is little cause for comment. The same remark applies to κινδύνοι ποταμῶν, ληστῶν (2 Cor. 11:26). In Jo. 19:14 ἡ παρασκευὴ τοῦ πάσχα probably already means the day ‘before’ the Sabbath (Friday). Ἡ παραβολὴ τοῦ σπείροντος (Mt. 13:18). Cf. also the genitive of price. χοίνιξ σίτου διναρίου (Rev. 6:6), ‘for’ a penny; ἀντάλλαγμα τῆς ψυχῆς αὐτοῦ (Mt. 16:26), exchange ‘for’ his soul. Cf. Lu. 10:36. Enough has been said to show how carefully the genitive must be interpreted and what great latitude was used in connection with it. Deissmann (St. Paul, pp. 140 ff.) thinks that Paul’s use of the genitive is “very peculiar” and transcends all rules about subjective and objective. He even suggests “mystic genitive” for Paul.

7. Genitive of Relationship. For lack of a better name this use of the genitive is called “genitive of membership” \(^2\) or “of relationship.” \(^3\) In reality it is merely the possessive genitive of a special application. The substantive is not used because the context makes it clear. Thus Ἰωάννης (Lu. 24:10) is James’ Mary; whether mother, wife, daughter or sister, the context must decide. In this instance it is James’ mother. Cf. Mk. 16:1. Mk. 15:47 gives us Μαρία ἡ Ἰωάννης, while in 15:40 we have both James and Joses. In Mt. 27:56 as in Mk. 15:40 we have the full construction with µήτηρ. But in Jo. 19:25 Μαρία ἡ τοῦ Κλωπᾶ it is the wife (γυνὴ) that is meant. So in Mt. 1:6 ἔκ τῆς τοῦ Οὐρίου. In Lu. 6:16 and Ac. 1:13 we have Ἰουδαίας Ἰακώβου, which probably means the brother (ἄδελφος) of Jude in view of Jude 1 (ἄδελφος Ἰακώβου) rather than son. But υἱὸς is the word usually to be supplied, as in Ἰακώβου τοῦ Ἰακώβου (Mt. 4:21), τοῦ Ἰουδαίαν Σίμωνος (Jo. 6:71), Σίμων Ιωάννου (Jo. 21:15 ff.), Δαυεὶδ τοῦ Ἰσσαί (Ac. 13:22). See also Ac. 20:4, Σώσπατρος Πύρρου. Cf. Lu. 3:2 where υἱὸς is used, as υἱὸς generally is for ‘sons of Zebedee’ (Mk. 10:35). In Jo. 21:2 we have οἱ τοῦ Ἰακώβου so used. [Page 502] But sometimes the article refers to the family in general as in ὑπὸ τῶν Χλόης (1 Cor. 1:11). Cf. οἱ περὶ αὐτῶν (Lu. 22:49). In Mk. 5:35, ἀπὸ τοῦ ἄρχουσαναγώγου, it is possible that οἶκος is to be supplied, since the man himself (verse 22) has already come. \(^1\) In Ac. 2:27, 31, W. H. read ἐκ οἴκου, while some MSS. have ἐκ ὀίκου (cf. Brugmann, Griech. Gr., p. 395) and the MSS. vary also in Ps. 16:10 (LXX). Cf. ἐν τῷ οἴκῳ in Lu. 16:23. It is more likely that in Lu. 2:49, ἐν τοῖς τοῦ πατρὸς, we have the idea of ‘house’ rather than that of ‘business.’ Cf. ἐκ τοῦ Ιωάννου (Jo. 19:27) and ἐκ τῶν ἁγίων and ὄν τοῦ in Jo. 1:11. See ἐν τοῖς Ἰακώβων, P.O. 523 (iii/A.D.), for ‘house of’. It is a classic idiom. Cf. Lysias ἐκ τοῦ ἄδελφου. These constructions are all in harmony with the ancient Greek idiom. \(^2\) In an example like τὸ άληθείως ἐκπορεύματος (2 Pet. 2:22) it is not the genitive that calls for remark so much as the article without any substantive. The discussion belongs to the chapter on the Article.

8. Partitive Genitive. Here a part of the whole is given. See ἐν τοῖς (Mt. 6:29), τὸ δέκατον τῆς πόλεως (Rev. 11:13), ἡμίσιος τῆς βασιλείας (Mk. 6:23), ἡμίσιος καιροῦ (Rev. 12:14), τῇ ἡμείᾳ μου τῶν ὑπαρχόντων (Lu. 19:8), τὸ περισσεύον τῶν

2 Blass, Gr. of N. T. Gk., p. 95 f.
9. The Position of the Genitive. In general one may note that the genitive usually comes after the limiting substantive, as τὴν γέενναν τοῦ πιστοῦ (Mt. 5:22), but the genitive comes first if it is emphatic like Ἐλλήνων πολὺ πλήθος (Ac. 14:1) or if there is sharp contrast like τὸν συνετάτητα τοῦ ὃν, ὥμων δὲ ἀπόστολον (Ph. 2:25). In Eph. 6:9 both genitives precede, καὶ αὐτῶν καὶ ὑμῶν ὃ κύριος. If the article is used with both words we may have the usual order, as τὴν πανοπλίαν τοῦ θεοῦ (Eph. 6:11), or less often the classic idiom, as τὸν τῆς πίστεως ἄρχηγόν (Heb. 12:2). Sometimes indeed the article may be repeated, as ὁ λόγος ὃ τοῦ σταυροῦ (1 Cor. 1:18).[Page 503] Ἀντίκειται usually comes after the noun in the Synoptics, as τὴν ἄλκινα αὐτοῦ (Lu. 3:17), but John sometimes puts αὐτοῦ first2 (1:27; 9:6; cf. σου in 9:10, σου οἱ ὁφθαλμοί). Sometimes a word intervenes between the substantive and the genitive as ἐν ημεθά τέκνα φύει ὁργής (Eph. 2:3). Cf. also Ph. 2:10; Ro. 9:21, etc. But note εἰς ἀλεύρου σάτα τρία (Mt. 13:33).

10. Concatenation of Genitives. Two or more genitives may be used together. This is, of course, common in the earlier Greek. Paul in particular is fond of piling up genitives. Take 1 Th. 1:3 as a typical example, μνημονεύοντες ὑμῶν τοῦ ἔργου τῆς πίστεως καὶ τοῦ κόσμου τῆς ἅγιας καὶ τῆς ὑπομονῆς τῆς ἐλπίδος τοῦ κυρίου ἡμῶν Χριστοῦ. Here we have practically all the points, viz., two simple genitives, two in apposition, three together, one of the person and the other of the thing. A very simple case is found in Ro. 8:21, τὴν ἐλευθερίαν τῆς δόξης τῶν τέκνων τοῦ θεοῦ, and in verse 23 τὴν ἀπολύτρωσιν τοῦ σώματος ἡμῶν. Cf. also Jo. 6:1; 2 Cor. 4:4; Eph. 1:6; 4:13; Col. 1:13, etc. In Rev. 16:19 we have four genitives, τὸ ποτήριον τοῦ οὐνοῦ τοῦ θυμοῦ τῆς ὀργῆς αὐτοῦ, and five occur in Rev. 19:15, counting the appositives, τὴν ληθόν τοῦ οἴνου τοῦ θυμοῦ τῆς ὀργῆς τοῦ θεοῦ τοῦ παντοκράτορος. Blass3 calls this “a really burdensome accumulation of words,” but surely the sense is clear enough. The governing genitive comes before the dependent genitive in regular order here. But in 2 Pet. 3:2 this smooth order is not observed, yet all five can be readily understood: ὑπὸ τῶν ἁγίων προφητῶν καὶ τῆς τῶν ἀποστόλων ὑμῶν ἐντολῆς τοῦ κυρίου. Cf. Ph. 2:30 also. In 2 Cor. 3:18, ὑπὸ κυρίου πνεύματος, it is not clear whether κυρίου is genitive or is the ablative in apposition with πνεύματος. In Jas. 2:1 it is difficult to put into brief compass the Greek idiom, τὴν πίστιν τοῦ κυρίου ἡμῶν Χριστοῦ τῆς δόξης. Here ἧν. Χρ. is in apposition with κυρίου. Κυρίου has

---

1 Cf. Green, Handb., etc., p. 215.
3 Gr. of N. T. Gk., p. 99.
ἡμῶν and is itself the objective genitive with πίστιν, while τῆς δόξης is probably in apposition with Ἰη. Χρ. (see Mayor in loco).

(g) The Genitive with Adjectives. Giles⁴ observes how natural it is for adjectives to take the genitive, since many of them are developed from substantives in apposition. Adjectives of fulness can logically take either the genitive or the instrumental. Giles⁵ explains how with the Latin plenus, by analogy to vacuus, the ablative is used and also because the ablative and instrumental forms [Page 504] are the same in Latin. Indeed even in the case of the participle we have the genitive when the participle is regarded no longer as an adjective, but as a substantive, as τῶς ὑπάρχοντά μου (1 Cor. 13:3). Cf. Lu. 12:33; Lu. 2:27, τὸ εἰδομένον τοῦ νόμου; and Ph. 3:8, τὸ ὑπερέχον τῆς γνώσεως. The adjective itself is so used in 1 Cor. 10:33, τὸ ἐμαυτοῦ σύμφωνον. Cf. 1 Cor. 7:35. But different is συμμόρφους τῆς εἰκόνος τοῦ νυόν αὐτοῦ (Ro. 8:29). Here we have the true adjective, but the genitive is due to the principle just stated. In συνεργός, Ro. 16:21, we have the substantive also. The case with verbs in –τος may be considered genitive, but see the ablative also. Thus οἶνος (Ro. 1:7), γεννητοὶ γυναικῶν (Lu. 7:28), ἐκλεκτοὶ θεοῦ (Ro. 8:33), κλητοὶ Ηρῴου (Ro. 1:6). In διδακτοὶ θεοῦ (Jo. 6:45), οὐκ ἐν διδακτοῖς ἄνθρωπως σοφίας λόγος (1 Cor. 2:13) one may question if we do not have the ablative. But in εὐλογημένοι τοῦ πατρὸς (Mt. 25:34) the genitive is likely the case. There is only one adjective in –κός in the N. T. which has the genitive, κριτικὸς ἵνα κυριεύσουσιν (Heb. 4:12). Ἀξιός is very common with the genitive in the N. T., as ἄξιον τῆς μετανοίας (Mt. 3:8). But ἀνάξιος probably has abl. because of α–privative, as ἀνάξιοι ἑστε κριτηρίων ἑλεχίστων (1 Cor. 6:2). Delbrück¹ confesses his inability to explain this genitive, though Blass⁵ considers it genitive of price. The figure of weighing or scales seems to be involved in the word. In 1 Cor. 9:21 (Ἐννομὸς Χριστοῦ) we have a very “bold use” of the genitive¹ due to the substantive idea involved (νόμος). But probably in Heb. 3:12, καρδία πονηρὰ ἀπιστίας, the genitive is dependent on καρδία, not πονηρά. Ἐνοχὸς brings up an unusual genitive in Mt. 26:66 Ἐνοχὸς θανάτου, and Mk. 3:29 (correct text) Ἐνοχὸς ἦστε τοῦ ἄιων ιδαρτήματος. Moulton⁷ considers this genitive “aberrant” and still more Ἐνοχὸς κρίσεως in Syrian class of MSS. in Mk. 3:29. In 1 Cor. 11:27, Ἐνοχὸς ἦσται τοῦ σώματος, we have the usage of the pre-Syrian classes in Mk. 3:29 and not the idiom in Mt. 26:66. The usual construction appears also as in Ἐνοχὸς ἦσται τῇ κρίσει (Mt. 5:21 f.) and even Ἐνοχὸς εἰς τὴν γένεσιν (ib.). In the instance of κοινωνοῦς the construction is also interesting. In 2 Cor. 1:7 we have κοινονοῖ έστε τῶν παθημάτων, but it is debatable if the adjective has not here become a substantive as with κοινωνὸς ἐμός (2 Cor. 8:23; cf. συνεργός in same verse). Κοινωνοῦς has also the dative, as κοινονοῦ τῷ Σίμωνι (Lu. 5:10). See συνκοινωνοῦς αὐτοῦ (1 Cor. 9:23) and in Ph. 1:7 two genitives, συνκοινωνοῦς μου τῆς χάριτος. But in Rev. 1:9 we have Ἐν with locative. Note also μεστοὶ ὑποκρίσεως [Page 505] (Mt.

---

5 Ib.
2 Gr. of N. T. Gk., p. 106.
3 Ib.
4 Cl. Rev., Apr., 1904, p. 152.
23:28) and πλήρης χάριτος (Jo. 1:14). The case of μέτοχος in Heb. 3:1 (κλήσεως ἐπουρανίου μέτοχοι) is similar to that of κοινονός above, though more decidedly adjectival. Cf. μέσος υμῶν (Jo. 1:26). In Jo. 8:55 W. H. read ὅμοιος υμῖν, though NCLX have ὑμῶν, a construction sometimes found in ancient Greek. One may note also in 1 Pet. 5:9, τά αὐτά τῶν παθημάτων, which is perhaps to be understood as the same “kinds” of sufferings, rather than the same sufferings.

(h) The Genitive with Adverbs and Prepositions. At bottom there is little difference between the adverb and the genitive and the preposition and the genitive. The preposition is an adverb that is used with a case for clearer expression. Some adverbs indeed are only used as prepositions, but this is in the later stages of the language. Αξίως, like the adjective ἄξιος, occurs with the genitive, as ἄξιος τοῦ εὐαγγελίου (Ph. 1:27; cf. Ro. 16:2). The genitive is not persistent with some of the adverbs and prepositions in late Greek. It is more especially with adverbs of time that the genitive is found. Thus ἐπάξ τοῦ ἔνωστός (Heb. 9:7), δίς τοῦ σαββάτου (Lu. 18:12), ἔπτάκες τῆς ἡμέρας (Lu. 17:4). Giles indeed observes that it is only the genitive of place that uses prepositions. Here only specimens without discussion can be given. Thus ἄντικρυς Χίου (Ac. 20:15), ἀπέναντι τοῦ τάφου (Mt. 27:61), ἀντὶ χάριτος (Jo. 1:16), ἀγαθός καιροῦ (Lu. 4:13), διὰ παραβολῆς (Lu. 8:4), ἕγγος σου (Ro. 10:8), ἔμπνεο τοῦ θεοῦ (Lu. 1:8), ἐμαυτόν τοῦ θεοῦ (Lu. 1:6), ἔμπνευ τοῦ θεοῦ (Mt. 5:11), ἐντὸς ὑμῶν (Lu. 17:21), ἐνώπιον κυρίου (Lu. 1:15), ἐπάνω ὃς (Mt. 5:14), ἐπὶ τῆς γῆς (Rev. 6:10), ἔσω τῆς αὐλῆς (Mt. 15:16), ἔως ἡμῶν (Ac. 9:38), κατὰ τοῦ Ἰησοῦ (Mt. 26:59), κατέναντί ὑμῶν (Mt. 11:2), κατενώπιον τῆς δόξης (Ju. 24), κύκλῳ τοῦ ὥρου (Rev. 4:6), μέσον γενεάς σκολίης (Ph. 2:15), μεθ᾽ ἡμῶν (Mt. 1:23), μεταξὺ σου (Mt. 18:15), μέχρι τῆς σήμερον (Mt. 11:23), παραπλήσιον θανάτου (Ph. 2:27), πλησίον τοῦ χωρίου (Jo. 4:5), περὶ τοῦ φωτὸς (Jo. 1:8), τοῦτο τῆς χαρίν (Eph. 3:1), Εἰμπροσθεν, ὑπερευς, πρὸς, πρός, ὑπέρ, etc., all have the ablative. Cf. τῷ ἔσωθεν ὑμῶν (Lu. 11:39) where ἔσωθεν may be looked at more as a noun. Εἰν μέσῳ has almost the force of a preposition with the genitive (ὑμῶν, for instance, 1 Th. 2:7).

(i) The Genitive with Verbs. As already remarked, Delbrück begins his discussion of the genitive with the verb. In Lu. 5:19, πολλὰς ἐξενέγκασιν, the genitive is not due to the verb and is a rather loose almost adverbal phrase.

1. Very Common. In Greek the genitive with verbs cuts a larger figure than in Latin. Broadus used to say that the genitive with verbs means ‘this and no other,’ while the accusative with verbs means ‘this and no more.’ Probably therefore the

2 Giles, Man., p. 315.
Broadus BROADUS, JOHN A., Comm. on Matt. (1886).
genitive with verbs is a variation from the accusative with verbs, the original and normal case with verbs. This point may be illustrated by ἰδοῦτε αὕτοῦ (Mk. 9:7) and ἤκουσαν τὸν ἄσπασμόν (Lu. 1:41). Some verbs yield themselves naturally to the idea of the genitive, while others use the accusative. Others again use now one, now the other. The predicate genitive is passed by here, having been discussed under Substantives.

2. Fading Distinction from Accusative. But it must not be assumed that it is wholly a matter of indifference whether the accusative or the genitive is used with a verb, though the accusative in the later Greek constantly made inroads on the genitive. Even in the old Greek much freedom existed. In the modern Greek the genitive with verbs occurs only in some dialects (Thumb, Handb., p. 35). Cf. μηνιμουνεύετε τῆς γυναικὸς Λώτ (Lu. 17:32), but μηνιμουνεύετε τοὺς πέντε ἄρτους (Mt. 16:9). In πάντα μου μέμνησε (1 Cor. 11:2) both cases occur. This is all in accord with classical usage. So also ἐπιλαθέσθαι τοῦ ἣγου υμῶν (Heb. 6:10), but τά μὲν ὀπίσω ἐπιλαθόνμενος (Ph. 3:13); γεύσεται μου τοῦ δείπνου (Lu. 14:24), but ἔγεισατο τὸ ὕδωρ (Jo. 2:9); γέμουσιν ὀστέων (Mt. 23:27), but even γέμονται ὀνόματα βλασφημίας (Rev. 17:3). But it is perfectly proper to appeal to the distinction in the cases in the apparent contradiction between ἄκουοντες μὲν τῆς φωνῆς (Ac. 9:7) and τὴν δὲ φωνὴν οὐκ ἤκουσαν (22:9). The accusative (case of extent) accent the intellectual apprehension of the sound, while the genitive (specifying case) calls attention to the sound of the voice without accenting the sense. The word ἄκονω itself has two senses which fall in well with this case-distinction, one ‘to hear,’ the other ‘to understand.’ Cf. οὔ οὐκ ἤκουσαν (Ro. 10:14) and μὴ οὐκ ἤκουσαν (Ro. 10:18). And yet the genitive can be used where the sense is meant, though not stressed, as ἤκουσα φωνῆς (Ac. 22:7), but ἤκουσεν φωνῆ (Ac. 9:4; and 26:14). But see further under 3.

3 Simcox, Lang. of the N. T., pp. 87 ff., has an extensive discussion of the gen. and acc. with ἄκονω, but seems to miss the point after all. They heard the sound but not the words. Blass, Gr. of N. T. Gk., p. 103, admits this classic distinction sometimes in the N. T.
of hear, to understand, and even to obey (hearken). The sense of hearken is often in John’s Gospel with the genitive, as οὗτος ὄντων τὰ πρόβατα (Jo. 10:8). Cf. Rev. 3:20, etc. The apparent double genitive in the last passage τῆς φωνῆς μου is not to be attributed to the verb, for μου is merely possessive. Cf. Ac. 22:1. Blass makes careful distinction between the usages in the various N. T. writers, but that is not to be pushed too far. In 2 Cor. 6:2 (LXX, Is. 49:8) we have ἔπιθηκουσα σου, but ὑπακοῦσε uses the dative (Mt. 8:27). But we have ἔπιθηκοῦντο αὐτῶν οἱ δέσμιοι (Ac. 16:25) in the sense of hearken. No verb of smelling is used with the genitive in the N. T., but ἔμπνευν ἄπειλήκη καὶ φόνου (Ac. 9:1) is certainly analogous. as Blass observes, who refers to the LXX for parallels (Jo. 2:9, ἔμπνευσεν τοις ἑρεμοῖς), for both genitive and accusative. Cf. Johannessohn, Der Gebrauch der Kasus und der Präpositionen in der Septuaginta. Teil I (1910).

3. Verbs of Emotion. These naturally have the genitive, such as to desire, care for, neglect, have compassion, spare, bear with, aim after, obtain, remember, forget, enjoy, etc. Ἐπιθυμῶ has the genitive in Ac. 20:33, ἄργυριον ἡ χρυσίον ἡ ἰματίσμοι οὐδενός, but the accusative probably in Mt. 5:28 (text uncertain, but LXX has

---

1 Gr. of N. T. Gk., p. 103.
2 lb.
3 Moulton, Prol., p. 66.
1 Gr. of N. T. Gk., p. 101.
accusative, Ex. 20:17). Ὄρεγομαι also has the genitive, as in Heb. 11:16, κρείττονος ὀρέγονται. Cf. 1 Tim. 3:1, where both ὀρέγεται and ἔπιθυμεῖ are used with the genitive. Cf. also ὀμιλέουσι (1 Th. 2:8). The verbs of concern are fairly numerous and uniform. Thus ἄνεχόμενοι ἀλλήλων (Col. 3:13) in the N. T. as in the older Greek. So μὴ ἴμελε τοῦ ἐν σοὶ χαρίσματος (1 Tim. 4:14), μὴ ὁλογράφησε παιδείας κυρίου (Heb. 12:5). But these three verbs may have the ablative. Ἀνέχομαι here is ‘hold oneself back from.’ Like the earlier Greek also is ἐπιμελήθη αὐτοῦ (Lu. 10:34) and μὴ τῶν βοῶν μέλει τῷ θεῷ; (1 Cor. 9:9). Blass considers οὖδὲν τούτων τῷ Γαλλίωνι ἔμελεν (Ac. 18:17) the personal construction, [Page 509] as often in the classical Greek. But already in the Attic inscriptions (Meisterhans, p. 211) we have ἐπιμελέομαι with the dative. So, too, περὶ appears with the genitive in Jo. 10:13, etc. Consider further τῶν ἱδίων καὶ μάλιστα οἰκεῖον οὐ προνοεῖ (1 Tim. 5:8) and ἰδανοίδαν οἰκεῖοι καλῶν ἔργων (Tit. 3:8). In Mt. 6:34 we have μηρυμῆσθαι αὕτης; though some MSS. read τῇ ἐπανή. Once again take τοῦ ἱδίου οὐκ ἐφείσατο (Ro. 8:32). These all are in regular order. In Mt. 18:27 τοῦ δοῦλου is more likely dependent on ὁ κύριος rather than on σπλαγχνίσεις. Verbs of obtaining are illustrated by ἔλασα τοῦ θυμίσα (Lu. 1:19), not mere “appearance,” though the accusative is elsewhere found in the N. T. as in Ac. 1:17 (cf. classic frequency of the accusative). On the other hand τυγχάνω always has the genitive in the N. T., as τοῦ αἰῶνος ἐκείνου τυγχάν (Lu. 20:35). But with ἔπετυχον we have ἔπετυχον ἔπαγγελτόν (Heb. 11:33) and τούτῳ οὐκ ἔπέτυχεν (Ro. 11:7). Moulton (Cl. Rev., p. 437, Dec., 1901) notes genitive and accusative with ἐπιτυχόντες—τῆς ᾿Ρωμαίων πολιτείας καὶ ἐπαγγελμαί, B.U. 113 (ii/a.d.). In general the papyri confirm the N. T. use of these verbs. Verbs of remembering and forgetting call for little remark. Thus μνηθήσεται διαθήκης (Lu. 1:72), μνημονεύετε τοῦ λόγου (Jo. 15:20). Μνημήσκομαι always has the genitive and mnemonivus usually. But ἄναμμησικο (act., mid. and pass.) always has the accusative in the N. T. Cf. ἀνεμίσθη τῷ ῥήμα (Mk. 14:72), whereas ancient Greek usually had the genitive. With ὑπομνήσκομαι the usage is divided again, as the accusative is alone used in the active (Jo. 14:26), but the genitive in the passive (deponent), as ὑπεμνήσθη τοῦ ῥήματος (Lu. 22:61; cf. Mk. 14:72 above). Ἐπιλανθάνομαι again has usually the genitive, as φιλοξενίας μὴ ἐπιλανθάνεσθε (Heb. 13:2), but the accusative once (Ph. 3:13) and ἄνθρωπος ἐπιλανθάνεσθε (Heb. 12:5). Of verbs of enjoying we have only ἔγω σου ὑπεμνήσατο (Phil. 20). ᾿Απολαύω does not occur in the N. T., and neither ἀγαλλίαις nor σαρκώ is used with the genitive, but only absolutely, with the instrumental, or with prepositions. ᾿Αισθάνομαι appears only once (Lu. 9:45) and with accusative.

5. Verbs of Sharing, Partaking and Filling. Indeed, verbs of sharing can be looked at as taking the partitive genitive. Thus with μετέχειν we have τραπέζης (1 Cor. 10:21), ἐκ τοῦ ἐνοῦ ἄρτου (verse 17, clearly ablative) and χάρπο (verse 30, instrumental by analogy of συνκοινονέω). Cf. κεκοινώκηκεν σύμματος καὶ συνοικίαις (Heb. 2:14), though elsewhere in the N. T. the associative [Page 510] instrumental occurs with persons. Μεταδίδωμι has only the accusative and

3 Gr. of N. T. Gk., p. 104.
1 Blass, Gr. of N. T. Gk., p. 102.
instrumental. As to μεταλαμβάνω and προσλαμβάνω it is more doubtful if it is not ablative rather than genitive. Cf. IX, (f), 7, for discussion. The partitive idea is divided between the genitive and the ablative. Radermacher (N. T. Gr., p. 102) finds in the partitive idea the explanation of the local and temporal use of the genitive, but not rightly. The true genitive is found with verbs of filling like ἐπλήσθη ἡ πόλις τῆς συγχύσεως (Ac. 19:29), πεπλήρωκατε τὴν Ἱερουσαλήμ τῆς διδασκῆς ὕμων (Ac. 5:28), γεμίσατε τὰς ὑδάτιες ὦδατος (Jo. 2:7), περισσεύονται ἄρτοιν (Lu. 15:17), ἐνέπλησαν ἄγαθον (Lu. 1:53). In Latin words of filling (plenus, etc.) use the ablative or instrumental, as the Greek has the ablative with words of lacking (ὑστεροῦνται τῆς δόξης (Ro. 3:23). By analogy therefore we find ἐκ and the ablative with πληρῶσθῃ ἐκ τῆς ὀσμῆς (Jo. 12:3) and γεμίζω, as ἐγέμισαν αὐτόν ἐκ τοῦ πυρὸς (Rev. 8:5). For the instrumental with the passive see Ro. 1:29, etc. Indeed the accusative is seen in Ph. 1:11 and Rev. 17:3 and some MSS. in Ac. 2:28.

6. Verbs of Ruling. These probably have the true genitive, though verbs of excelling use the ablative. Thus in Mk. 10:42 we have three such verbs in one sentence, οἱ δοκοῦντες ἄρχειν τῶν ἔθνων κατακυριεύοντος αὐτῶν καὶ οἱ μεγάλοι αὐτῶν κατεξουσιάζουσιν αὐτῶν. Other examples are ἄνθυπατεύοντος according to some MSS. in Ac. 18:12, αὐθεντοῦν άνδρός (1 Tim. 2:12), βασιλεύει τῆς Ἰουδαίας (Mt. 2:22 ἢδα; elsewhere ἢπι), ἡγεμονεύοντος τῆς Συρίας (Lu. 2:2), κυριεύομεν ὕμων τῆν πίστεος (2 Cor. 1:24), καταδυναστεύουσιν ὕμων (Jas. 2:6), τεταραχρούντος τῆς Ἰτουραίας (Lu. 3:1). These verbs all have a distinct substantive-affinity like ‘be ruler of,’ etc. See further Lu. 22:25 for κυριεύω and έξουσιάζω, Mt. 16:18 for κατασχέω.

7. Verbs of Buying, Selling, Being Worthy of. It is not perfectly clear what the origin of this usage is. The use of ἐκ δηναρίου with συμφονήσας (Mt. 20:2) may be noted, but in verse 13 δηναρίου συνεφώνησας. Cf. also ἡγοῦσαν ἐν αὐτῶν (Mt. 27:7) with προσθήκα τολλόδι (Mt. 26:9). Ἀγοράζω is used also with ἐν (Rev. 5:9). So again one may note ἐκτίθεσα χωρίον ἐκ μισθοῦ τῆς δικαίας (Ac. 1:18. Cf. Lu. 16:9, ἐκ τοῦ μισθοῦ διὰπερποίμασα). Cf. διὰ with περισσοῦμαι (Ac. 20:28). These examples show that it was easy to go from the genitive to ἐκ and the ablative. Consider also ὄνυσα τοῦ της ἰσαρίου (Ac. 7:16), ἰσαρίου πωλήσας (Mt. 10:29), τοσοῦτον ἤπεδοσθε (Ac. 5:8), ἠγοράσθη τῇς αἵτις [Page 511] (1 Cor. 6:20). In Mk. 14:5, προσθήκα ἐπάνω δηναρίων τριακοσίων, the adv. ἐπάνω has no effect on the case as is shown by ὄρθη ἐπάνω πεντακοσίως ἀδέλφος (1 Cor. 15:6). Blass compares the use of ἐκ in the Ἀττικα ἑγγραφαι with προσθήκα. And Monro (Homeric Grammar, p. 109) considers this the ablative, which is certainly possible. But on the other hand the undoubted genitive with ἐξίωσι suggests the idea of exchange or barter as the true origin and thus a real genitive. Ἀλλάσσω is not so used itself, but buying and selling easily fall in with the notion of worth. Thus Ἰνα ὕμων ἐξίωσῃ τῆς κλήσεως (2 Th. 1:11), καταεξουσίσας τῆς βασιλείας (2 Th. 1:5). Cf. also 1 Tim. 5:17; Heb. 3:3; 10:29. On the whole one is inclined to this explanation of the usage and to treat it as a true genitive. Cf. Rev. 6:6 for the genitive of price without a verb. But the use of ἐπό

with verbs of buying and selling goes back in single instances to the Attic time (Radermacher, \textit{N. T. Gr.}, p. 91). So στέφανον διδόντες ἅπαντα πεντήκοντα χρυσῶν, Inscr. of Magn., 16, 29.

8. \textit{Verbs of Accusing and Condemning}. Blass\textsuperscript{2} observes that the old Greek usage of the genitive of the thing has well-nigh vanished in the N. T. We do have ἐγκαλεῖθαι στάσεως (Ac. 19:40), but περὶ with the genitive is the usual construction in the N. T. both with ἐγκαλεῖ (Ac. 23:29), κρίνω (Ac. 23:6), and even κατηγοροῦμεν (Ac. 24:13). However, in the case of κατηγοροῦμεν we do find ὄν in Lu. 23:14 and Ac. 25:11, but in each instance the genitive seems to be due to attraction to the case of the suppressed antecedent τούτων. Cf. Ac. 24:13 for περὶ. Still the point is not absolutely certain and ὄν could be due to κατηγοροῦμεν. At any rate κατηγοροῦμεν is also used with the genitive of the person as in ἱνα κατηγορήσωσιν αὐτοῦ (Mt. 12:10). Cf. also Mk. 15:3 where we have genitive and accusative, κατηγόρουν αὐτὸν πολλά. Moulton (\textit{ProL.}, p. 235) notes that D often has accusative with κατηγοροῦμεν as with ἅκοιοι, κρατείω.

9. \textit{Genitive Due to Prepositions in Composition}. Some verbs have the genitive because of the preposition in composition which gives a distinct change in idea to the verb. The preposition is often repeated with the noun. As a matter of fact the only\textsuperscript{3} preposition that seems to figure thus in the N. T. is κατά which is used with a number of verbs with the genitive.\textsuperscript{4} Not all the κατά compounds [Page 512] use the genitive. Cf. the accusative case and note as illustrations of the accusative in the N. T. καταγωνίζομαι, καταβραβεύω, κατακρίνω, κατασοφίζομαι. It may be that some of the verbs already instanced as using the genitive may owe it to κατά in composition, like κατηγοροῦμεν (Mt. 12:10). But the point seems to be reasonably plain as to κατεγέλων ἡμῶν (Mt. 9:24), ἐκάθεν κατακαυχᾶται ἡμῶν ἡ καρδία (1Jo. 3:20, and note verse 21), though ἡμῶν might go with καρδία, κατακαυχᾶται ἔλεος κρίσεως (Jas. 4:11), καταλαλεῖται ἀλλήλων (Jas. 4:11), κατακαχθομαι σου ἀλλήλων (Mt. 27:13), κατεγέλων ἡμῶν (2 Cor. 12:13), κατακαψάσθωσιν τοῦ Χριστοῦ (1 Tim. 5:11), αἰσχύνοντες καταφρονήσας (Heb. 12:2), κατέχειν αὐτοῦ τῆς κεφαλῆς (Mt. 14:3); but in Mt. 26:7 the text of W. H. has ἔπι with genitive as some MSS. in Mk.

10. \textit{Attraction of the Relative}. A word only is needed about the attraction of the relative, a matter treated properly in the chapter on Pronouns, which see. Here it may only be noted that the genitive (as of other oblique cases) of the relative sometimes appears with a verb when the case is due, not to the verb, but to the antecedent. Thus we note περὶ πάνων ὃν ἐποίησεν (Lu. 3:19), an idiom common in Luke, but rare elsewhere, as ὡστέραν οὗ ἔδεις (Rev. 1:20).

(j) \textit{THE GENITIVE OF THE INFINITIVE}. This is more properly an instance of the genitive of substantives as it is the substantival aspect of the infinitive that is in the case. The full discussion of the matter belongs to the chapter on Verbal Nouns. Here it may simply be remarked that the infinitive with τοῦ is not unknown to ancient Greek,

\textsuperscript{2} Ib., p. 104.
\textsuperscript{3} Blass, \textit{Gr. of N. T. Gk.}, p. 106.
\textsuperscript{4} Jann. (\textit{Hist. Gk. Gr.}, p. 341) comments on the blending of meaning between prep. and verb in the later Gk.
though nothing like so common as in the LXX as the translation of the Hebrew infinitive construct. But the Hebrew infinitive is not an exact analogy as it does not have the article. But Thucydides had already shown a fondness for this idiom which is thoroughly Greek. As an example from the LXX take τοῦ ἐξελέσθαι (Dan. 6:14). For the N. T. note ἔξηλθεν ὁ σπείρων τοῦ σπείρειν (Mt. 13:3). The substantival nature of this infinitive with τοῦ is well shown in καὶ ἔρξασθαι (1 Pet. 4:17). But in general τοῦ with the infinitive has as wide an extension of meaning in the vernacular κοινή as the genitive absolute. The details come later.

(k) THE GENITIVE ABSOLUTE. It may indeed be ablative absolute as Farrar holds, following the analogy of the Latin. But, as Giles observes, the Latin absolute is very likely instrumental as well as genitive and locative. The various languages differ greatly, however, in the use of the absolute cases, nearly all having a turn in one language or another. Cf. dative in Anglo-Saxon. Since the Sanskrit uses genitive as well as instrumental and locative (usual construction), Giles considers the Greek genitive absolute a true genitive. In this he is perhaps correct. But Brugmann (Griech. Gr., p. 523) discusses the genitive absolute separately from both genitive and ablative. Cf. Moulton, Cl. Rev., 1901, p. 437. Mullach observes that the genitive absolute is a mark of the higher style and was not much used in the vernacular. Jebb remarks that in the modern Greek the genitive absolute is more commonly paraphrased in harmony with the general disuse of the participle. However, in the vernacular κοινή “the rapid extension of the genitive absolute is a very obvious feature,” and the N. T. is in line with the papyri on this point also as in most other matters of grammar. Moulton observes further that “in the papyri it may often be seen forming a string of statements, without a finite verb for several lines,” which is rather more than can be said of the N. T. It naturally occurs in the N. T. chiefly in the historical books. Abbott has felt that Mark uses the genitive absolute “somewhat monotonously to introduce the circumstances of a new narrative,” and he finds it common in Matthew in temporal clauses. John, he observes, has the construction nowhere in recording

4 Joh. Gr., p. 83.
Christ’s words, though he elsewhere⁵ “employs it with more elasticity of meaning than is found in the Triple Tradition.” The LXX shows many examples of the genitive absolute and with abundant freedom also.⁶ The normal usage in the older Greek is to have a genitive absolute when a participle occurs with a noun that is disconnected from the rest of the sentence as in ἄναχορησάντων αὕτων (Mt. 2:13). Cf. 2 Cor. 2:12. But the older Greek did not always conform to this norm, and variations appear also in the N. T. Thus sometimes the participle is found alone as in ἐλθόντων (Mt. 17:14) and εἰσόντος (17:26), a very frequent idiom in the papyri.⁷ Cf. ἄναγγελθέντων B.U. 925 (iii/A.D.?), δηλωθέντος B.U. 970 (ii/A.D.). The papyri also show ἡξόντος instead of the old ἡξόν.⁸ Cf. οὕκ ἡξόντος P.O. 275 (A.D. 66). The papyri also show ἐξόντος instead of the old ἐξόν. Then again the genitive absolute occurs when as a matter of fact the noun or pronoun is not absolute and the participle might have merely [Page 514] agreed in case with the word in question. The simplest example is the repetition of the pronoun in the same case as εἰσῆλθόντων αὑτοῦ εἰς ὅκον οἱ μαθηταὶ αὐτοῦ (Mk. 9:28). But more noticeable is an example like μή ἡξόντος δὲ αὑτοῦ ἄποδουνέν ἐξέλευσεν αὐτόν (Mt. 18:25), or ταῦτα δὲ αὐτοῦ ἐνθύμητόν τοῦ—φάνη αὐτῷ (Mt. 1:20), a usage more common apparently in the N. T. than in the papyri. But note οὗ κινδυνεύσαντος εἰς θάλασσαν ἔσωσε, B.U. 423 (ii/A.D.), where με is implied with ἔσωσε. One even notes the genitive absolute when the nominative is present as in μητρόπαν τῆς Μαρίας ἐνθυθέντος—ἐφάνη κατήθεντος—ἐφάνη αὐτῷ (Mt. 18:25). Moulton¹ notes “a violent use” of the genitive absolute in Heb. 8:9 from the LXX, where we have ἐν ᾧμέρᾳ ἐπιλαμβανομένου μου. Here the participle is treated almost like the infinitive (as a substantive). Moulton regards it as due to the original Hebrew, and Westcott (in loco) cites ἐν ᾧμέρᾳ ἐντελεμένου σου αὑτῶ (Baruch 2:28). See further under Participles.

IX. The Ablative (“Ablatival Genitive”) Case (ἡ ἄφαιρετική πτῶσις). The treatment of this case will be briefer, for it never had the manifold development of the Greek genitive. In the original speech the genitive and ablative had no distinctive endings save in the o stems in the singular.³ See chapter VII, II, (a), for discussion of form.

(a) The Name. But the name ablative is credited to Julius Cæsar.³ Besides ἄφαιρετική it is also called πατρική. The name is quite appropriate.

(b) The Meaning. The ablative is then the ‘whence’ case, the case of origin, source, separation or departure. Some of the grammars use the expression “ablative genitive.” That implies that the case is after all a kind of genitive. That is only true as to form, not as to sense, and causes some confusion. In Greek the ablative is not a live case in form, but in sense it is.

8 Ib.
1 Prol., p. 74.
Westcott WESTCOTT, B. F., Language of the N. T. (Smith’s B. D.).
(c) RARE WITH SUBSTANTIVES. It is possible (though not probably correct) to regard ἀπόστισιν ἥθελα (Ro. 1:17) as ablative, ἥθελα being the source of the righteousness. More likely are the following examples: τὴν ἐκβασιν τῆς άναστορφῆς (Heb. 13:7), διαστολὴ Ἰουδαίου τε καὶ Ἐλληνος (Ro. 10:12), διάκρισις καλοῦ καὶ κυκοῦ (Heb. 5:14). See Monro, Homeric Grammar, p. 146. In 2 Pet. 1:20 we have a clear case of the ablative in the predicate after the copula γίνεται. Here ἐπιλύσεως (‘disclosure’) is in the ablative. Cf. also τοῦ θεοῦ in 2 Cor. 4:7. One may note also ἐγένετο γνώμης (Ac. 20:3) as probably parallel. In Heb. 12:11 χαρᾶς and λόγους may be considered either true genitives or ablatives. Doubtful also are ὑποστολῆς καὶ πίστεως in Heb. 10:39. But we have a clear ablative in Ac. 20:37 ἰκανός δὲ κλαυθμὸς ἐγένετο πάντων. Moulton1 notes the obvious fact that ἄπο and ἐκ (with abl.) are freely used for the old “partitive genitive.” Delbrück2 thinks the genitive of material originally abl. Cf. VIII, (f), 8, for the true genitives in the partitive sense. This partitive gen. may be illustrated by ἔν τούτων (Mt. 6:29) which is to be compared with ἐν ἐξ αὐτῶν (Mt. 10:29). In Jo. 3:25 the use of ἐκ makes clear the ablative, ἐγένετο ζήτησις ἐκ τῶν μαθητῶν. Blass3 rather needlessly explains this usage by appeal to the Hebrew |2. Note also πᾶς ἐς ὑμῶν (Lu. 14:33). The matter may be further illustrated by τίς αὐτῶν (Lu. 7:42) and τίς ἐς ὑμῶν (Mt. 6:27). Indeed with τίς, as Blass4 observes, the N. T. nearly always uses ἐς in such examples. He finds the opposite true of τίς save in John. Thus τινὲς τῶν γραμματέων (Mt. 12:38), but τινὲς ἐς αὐτῶν (Lu. 11:15. Cf. Jo. 6:64). But ἄπο is also found with τίς (Mt. 27:21). One may note also τίς ἐς ὑμῶν (Jas. 5:13). A classical but curious use of this idiom, like the partitive genitive (already noted), is as the subject or object. The explanation lies, of course, in the ellipsis. Thus συνήθηκαν καὶ τῶν μαθητῶν (Ac. 21:16) may be compared with ἐπαν ἐκ τῶν μαθητῶν (Joh. 16:17), ἐκ τοῦ ὀχλου συνεβίβασαν (Ac. 19:33). Cf. Rev. 11:9. Take Mt. 23:34 as an example of the use as object, ἐς αὐτῶν ἁποκτενέθη, ἐς αὐτῶν μαστίγωσετε. Cf. especially ἐκ τῶν τέκνων σου περισσαπούντας (2 Jo. 4). In Ac. 15:2 we have the full expression ὄλλους ἐς αὐτῶν. Brugmann (Griech. Gr., p. 397) notes the syncretism between the ablative and the genitive with the superlative. See a like confusion in the predicate (Monro, Hom. Gr., p. 148). W. Havers (Indog. Forsch., XXXI, Bd. 1, Heft 3, 1912) “on the splitting of the genitive in Greek” suggests that the partitive genitive was originally independent and adverbal.

(d) THE ABLATIVE WITH ADJECTIVES. The number is not large (cf. the Genitive with Adjectives). In Plato we have, for instance, ἐπιστήμης κενός, ἐλεόθερος αἰδώς, but see Kühner-Gerth5 for a full list in the ancient writers. Thus in the N. T. we find with preposition καθαρὸς ἄπο τοῦ ἂματος (Ac. 20:26), a clear ablative. Cf. also ἐλεοθέρα ἄπο τοῦ νόμου (Ro. 7:3) and ἐλεόθερος ἐκ πάντων (1 Cor. 9:19). But the ablative occurs without prepositions. So ἐξένοι τῶν διαθηκῶν (Eph.

---

3 Gr. of N. T. Gk., p. 97.
4 lb.
2:12). It is probably best to regard the verbal adjectives as having the ablative in these examples: ἄγαπης τοῦ (Ro. 1:7), γεννητοὶ γυναικῶν (Mt. 11:11), δίδακτος τοῦ (Jas. 1:15), διδακτος πνεύματος (1 Cor. 2:13), κλητοὶ Ἰσσοῦ Χριστοῦ (Ro. 1:6). One may also suggest here εὐλογημένοι τοῦ πατρὸς (Mt. 25:34), but on the whole it is to be regarded as a true genitive. The ablative with adjectives with α—privative have “plentiful illustrations from papyri.” For instance ἄκινδυνος παντὸς κινδύνου Tb. P. 105 (iii/b.c.), τῆς εἰς ἄπαντας εὐεργεσίας—ἀβοηθητος B.U. 970 (ii/iii A.D.). In Mt. 27:24 we find ὁθόδος εἰμὶ ἀπὸ τοῦ ἀματος with ἄπο. Cf. also ἄσπιλον ἀπὸ τοῦ κόσμου (Jas. 1:27). Thus we easily see the ablative in ἄκαταπάστους ἕμαρτης (2 Pet. 2:14), ἄναξίος κριτηρίων (1 Cor. 6:2), ἄνομος θεοῦ (1 Cor. 9:21), ἄσπιρος λόγου (Heb. 5:13), ἄσπιραστος κακῶν (Jas. 1:13).

Moreover, the ablative after the comparative is very common in the N. T., apparently more so than in the papyri. Let a few examples suffice: ἵσχυστος μου (Mt. 3:11), μικρότερον ἵνα πάντων τῶν σπερμάτων (Mk. 4:31), πλείονας πῶς πρῶτον (Mt. 21:36), πλείον τῆς τροφῆς (Lu. 12:23), ποιητέρα ἑαυτοῦ (Mt. 12:45), μείζων τοῦ κυρίου (Jo. 13:16). Cf. Jo. 21:15; 1 Cor. 10:22; 1 Tim. 5:8. Here the ablative idea of difference or distinction is very plain. The Latin also uses the ablative in this sense. Cf. χήρα μὴ ἐλαττον ἔτων ἐξήκοντα (1 Tim. 5:9). In Jo. 5:36, μαρτυρίαν μείζω τοῦ Θεού, it is not clear whether it is the witness borne by John or to him. In Ac. 4:19 ἰσθανήν after ἰ is genitive, not ablative, due to ἀκούσαν. The superlative may likewise have the ablative as in πρῶτος μου (Jo. 1:15), a usage found in the papyri. Abbott rather needlessly endeavours to explain πρῶτος as a substantive meaning ‘chief,’ like τῷ πρῶτῳ τῆς νήσου (Ac. 28:7). Note also ποιεῖν ἔντολῃ πρώτῃ πάντων (Mk. 12:28) where πάντων is neuter plural (a possible partitive genitive). Cf. ἐσχατον πάντων (1 Cor. 15:8). The positive περισσός may even have the ablative, as τὸ περισσόν τοῦτον (Mt. 3:37). Cf. πλέον with the verb περισσεῖ and the ablative πλέον τῶν—Φαρισαίων (Mt. 5:20). In Eph. 3:8, ἐμοί τῷ ἐλαχιστοτέρῳ πάντων ἄγιων, the comparative and the superlative are combined.

(e) THE ABLATIVE WITH PREPOSITIONS. It is very common in the N. T. Thus ἄνευ λόγου (1 Pet. 3:1), ἄφανταν πάντων [Page 517] (Ac. 3:16), ἀπὸ τῆς ὥρας (Mt. 9:22), ὀτὲρ δόχου (Lu. 22:6), ἐκ τοῦ ὄντας (Mk. 1:10), ἐκτός αὐτοῦ (Mt. 23:26; cf. ἐντός in same verse), ἔμπροσθεν πάντων (Mt. 26:70), ἐπέκεινα Βαβυλώνιος (Ac. 7:43), ἔξω τῆς οἰκίας (Mt. 10:14), ἔξωθεν τῆς πόλεως (Rev. 14:20), ὑπείπεν τὸ Ἰσσοῦ (Lu. 23:26), ὑπίποι μου (Mt. 4:19), possibly ὅψε σαββάτων (Mt. 28:1), παρ ἀυτῶν (Mt. 2:4), παρεκτὸς λόγου πορνείας (Mt. 5:32), πέραν τοῦ Ἰωρδάνου (Mt. 19:1), πλην τοῦ πλοίου (Ac. 27:22), πρὸ τοῦ πάσχα (Jo. 11:55), πρὸς τῆς ὑμετέρας συστηρίας (Ac. 27:34), ὑπὲρ πάντων (2 Cor. 5:15, true genitive according to some), ὑπὲρκυρίων αὐτῆς (Heb. 9:5), ὑπερέκεισαν ὑμῶν (2 Cor. 10:16), ὑπερκυρίοι, ὑπερκυρίας ὑμῶν (Eph. 3:20), ὑπὸ κυρίου (Mt. 1:22), ὑποκάτω τῶν ποιῶν (Mk. 6:11), χωρίς παραβολῆς (Mt. 13:34). In the case of ὅψε σαββάτων (Mt. 28:1) ὅψε means ‘late from’ (Moulton, ProL., p. 72). Cf. ὅψε τῆς ὥρας, Par. P. 35, 37 (ii/b.c.), ὅψειον τῆς ὥρας Tb. P. 230 (ii/b.c.) and ὅψε τοῦτον in Philostratus (Blass, Gr. of N. T. Gk., p. 312). Cf. Blass-Debrunner, p.

1 Moulton, ProL., pp. 74, 235; Cl. Rev., 1904, p. 152 f.
2 Ib., 1901, p. 437, σοῦ πρῶτος εἰμὶ, L.P. o (ii/iii A.D.).
3 Joh. Gr., p. 90.
101, for still other examples in late Greek. See also ὁ λίγον τούτων in Xen., Hellen., I, 1, 2. The list of such adverbs was growing constantly. This is a considerable list, but the ablative idea is patent in all with the notion of separation. An interesting example of the ablative is τήν ἄπο σοῦ ἐπελέγατο (Ac. 23:21). In ὑπέρ, πρό, πρός it is the comparative idea that is involved and that implies separation. Hence it seems likely that ἄπο is to be construed also with the ablative rather than the genitive, though this point is debatable. “In both Greek and Latin the ablative expresses the agent as the source of the action, almost invariably with prepositions” (Buckland Green, Notes on Greek and Latin Syntax, p. 32). There is some truth here. For the ablative with prepositions in Cypriot see Meister, Bd. II, p. 295. See chapter on Prepositions. A number of adverbs are themselves in the ablative case, like καλῶς, οὕτως, (all adverbs in –ως), ἄνω, etc.

(f) The Ablative with Verbs. The ablative is not used so frequently with verbs as the accusative, genitive or dative, and yet it is by no means uncommon. Of course, wherever ἄπο (cf. Ac. 5:2), ἐκ (cf. Mk. 1:10) and παρά (Mt. 2:4) are used with the ablative after a verb, these examples are not considered, but they throw light on the use of the same case without the preposition. ἄπο and ἐκ have only the ablative. The ablative is so common with compound verbs like ἀφίστημι, ἀποστέρω, etc., that no effort is made to separate the simple from the compound verbs. There are examples where the ablative seems to be due purely to the preposition, as τῆς χάρτης ἔξεπέσατε (Gal. 5:4; cf. same word in 2 Pet. 3:17). But in many other instances the ablative idea in the verb is due to the effect of the preposition.

1. Verbs of Departure and Removal. This is the simplest ablative with verbs. Take, for instance, οὐκ ἀφίστατο τοῦ ἱεροῦ (Lu. 2:37) where the ablative idea is perfectly plain. So also ἀποστήσονται τινὲς τῆς πίστεως (1 Tim. 4:1). The predicate ablative of source in 2 Pet. 1:20 (ἔπιλυσεως) was noticed under the discussion of substantives. As a rule ἄπο, ἐκ or παρά will be found with the mere idea of departure. So χωρίζω ἄπο (1 Cor. 7:10). In Lu. 7:6 ἄπέκρισε has ἄπο, but ὩΝ have merely the ablative.

Naturally verbs meaning to free from, to separate, to deprive of, to hinder from, etc., use the ablative. ἔλευθερώω always has ἄπο (Ro. 6:18), as καθαρίζω ἄπο (1 Jo. 1:7), λύω ἄπο (Lu. 13:16), λύω ἄπο (Ac. 16:33), λυτρόω ἄπο (Tit. 2:14), ῥύομαι ἄπο.
but have the ablative alone in ἅπελευτριμένοι τῆς ἡμέρας (Eph. 4:18), ἀπεσταρμένον τῆς ἀλήθειας (1 Tim. 6:5), ἀποθέλομεν τῆς ἁπεδεικτικαῖ (Lu. 13:12), καθαρίζοντας τῆς μεγαλείδητος αὐτῆς (Ac. 19:27), ἕκατοτόν τοῦ μη ἑπεγνώθαι (Lu. 24:16), ἐκολούθου αὐτοῦ τοῦ βουλήματος (Ac. 27:43). Cf. Lu. 10:42, αὐτῆς. This use of the mere ablative was not unknown to good prose in the ancient Greek. Moulton finds it also in the papyri. Thus τούτων ἀφέλεται ὑποκείμενος τὸν ᾐδωκαν Ο.Ρ. 237 (II/A.D.). One may note here again ἐκπίπτει ουτώς the ablative in Gal. 5:4 and 2 Pet. 3:17. Cf. κολύμο υπό (Lu. 6:29).

2. Verbs of Ceasing, Abstaining. So one may interpret οὕτως θραύσαντες (2 Pet. 3:9), the marginal reading in W. H. (1 Pet. 4:1) πέπωμεν ἡμεῖς, and ἀπεχθασαί εἰδολολάθησθον (Ac. 15:28; cf. also 15:20; 1 Tim. 4:3; 1 Pet. 2:11), though ὑπό also is used with ἄπεχθασα (1 Th. 4:3; 5:22). One can only repeat that these divisions are purely arbitrary and merely for convenience. For έκ with ἀναπάυομαι, ὑπό with καταπάυσα see Rev. 14:13; Heb. 4:4, 10.

3. Verbs of Missing, Lacking, Despairing. Thus we note οὗν τινες ἁθανάθσαντες (1 Tim. 1:6), λείπεται σοφίας (Jas. 1:5), ὑπερτριμένοι τῆς δόξης (Ro. 3:23), ὑποκείμενος προσδέμητος (Lu. 11:8), προσδέμητος τινως (Ac. 17:25), ἐξαιρετικαὶ ἡμᾶς καὶ τοῦ ζην (2 Cor. 1:8). Cf. τὸν ἄναγκαιον ὑστερέων ὑποκείμενος ἡμᾶς καὶ τοῦ ζην (2 Cor. 1:8). Moulton, Cl. Rev., p. 437, Dec., 1901.

4. Verbs of Differing, Excelling. Here the comparative idea is dominant. We observe πολλαὶ στροφαὶ διαφέροντες ύμεῖς (Mt. 10:31), τὴν ὑπερβάλλουσαν τῆς γνώσεως ἀγάπης (Eph. 3:19), ὑπερέχοντας ἑαυτῶν (Ph. 2:3), ὑπερτριμένοις ἑαυτῶν ἑπορτώσαν (2 Cor. 11:5; cf. use of ὑστερέω in sense of lack above. Here the comparative idea of ὑστερος is upmost.

5. Verbs of Asking and Hearing. These may also use the ablative. This is the usual construction with δέομαι, especially in Luke, as δέομαι σοι (Lu. 8:28). The person is in the ablative, but the thing will be in the accusative, as δέομαι δὲ τὸ μή παρὰν θαρρήσαν (2 Cor. 10:2). So also note ἦν ἦκοψατε μου (Ac. 1:4), but both ὑπό (Lu. 22:71) and παρά (Jo. 1:40), and έκ (2 Cor. 12:6) occur.

6. Verbs with the Partitive Idea. Here a sharp difference exists between the accusative which presents the whole and the genitive or the ablative which accents a part. Thus in Rev. 2:17 we have δόγμα αὐτώ τοῦ μάναν where the point lies in the idea of "some" of the manda, but B reads τὸ καὶ Ν ἐκ τοῦ. In the same verse note the accusative δόγμα αὐτῶ τοῦ ψήφων λειτυκήν. When the whole is expressed in the N. T. the accusative is used. Thus φαγαίνει εἰδολολάθησα (Rev. 2:14), but ἐσθιεὶ ὑπό τῶν ψυχῶν (Mt. 15:27) and ἐκ τοῦ ἄρτου ἐσθήσατο (1 Cor. 11:28). Thus also πίνων ὑπόν (Lu. 7:33), but πίπτε εξ αὐτοῦ (Mt. 26:27), δὲ δὲν πίη ἐκ τοῦ ὑδάτος (Jo. 4:14). Cf. also ἐνέχυκτε ὑπό τῶν ψυχῶν (Jo. 21:10). Phrynichus says: ἔφαγον ὑπόν Ἀττικόν, ὑπόν Ἐλληνες—ἔφαγον κρέας Ἀττικόν, κρέας Ἐλληνες. Cf. ὑπό τοῦ καρποῦ δάοσουσιν

1 An "impossible" reading to Blass, Gr. of N. T. Gk., p. 106.
(Lu. 20:10), ἴνα λάβῃ ὑπὸ τῶν καρπῶν (Mk. 12:2). Cf. also 1 Jo. 4:13. Cf. Mt. 28:1; Ac. 21:16. See Moulton, *Introduction to the Study of N. T. Gk.*, p. 72, where the “partitive gen.” is shown to be often ablative in idea. In modern Greek ὑπὸ is the regular construction for the partitive sense, as δῶσε μοι ὑπὸ τοῦτο, ‘give me some of that’ (Moulton, *Prol.*, p. 245). Prepositions ὑπὸ and ἐκ are thus uniformly used in the N. T. with this construction of the part (clearly ablative therefore) save in Rev. 2:17 above and in προσελάβοντο τροφῆς (Ac. 27:36). In this last example the MSS. vary a good deal. Μεταλαμβάνω (see (i)), 3) may be abl. or gen. in μεταλάμβανον τροφῆς (Ac. 2:46). Blass notes that only Luke, Paul and the author of Hebrews, the more literary writers in the N. T., use the ablative (gen.) with μεταλαμβάνο and προσλαμβάνο. Examples like Ro. 9:16; Heb. 12:11 may be regarded as either ablative or genitive.

Pronouns.

X. The Locative (“Locatival Dative”) Case (ἡ τοπικὴ πτῶσις).

(a) The NAME Locative. It is derived from the Latin *locus* and is a “grammatical neologism,” but is modelled after vocative. Still Delbrück prefers “local” to locative and uses it. It is indeed a local case. It is worth noticing that in the Thessalian dialect the old genitive had this locative ending as did the Arkadian also, though this –οι may have come from –οιο. The Latin grammarians took this 1 for the dative. We have remnants of the ending in English *here, there, where*. The modern grammars generally recognise the distinction in the three cases (locative, instrumental and dative), which have usually identical endings, though Blass is correct in saying that it is not always possible to decide the case. However that uncertainty exists but seldom. Jannaris makes four cases, counting the associative as a separate case. Compare the blending in the Latin.

(b) The SIGNIFICANCE of the LOCATIVE. It is indeed the simplest of cases in its etymological idea. It is the in case as Whitney finds it in the Sanskrit. It is location, a

Jannaris

JANNARIS, A. N., A Historical Greek Grammar (1897).

———, On the True Meaning of the Κοινή (Class. Rev., 1903, pp. 93 ff.).

7 Hist. of Gk. Gr., p. 342.
point within limits, the limits determined by the context, not by the case itself. The word itself is the main determining factor in the resultant sense, and each example has its own atmosphere. There is indeed variation in the resultant idea. Hence, besides in, we come to the ideas of on, at, amid, among, by, with. This development was not only in the early Greek but in the still earlier Sanskrit. The use of the locative without ἐν is much more common in Homer than in the later Greek. In the modern Greek vernacular indeed the locative disappears along with the instrumental and dative before ἐς and the accusative. As to ἐν it adds so little to the locative case that it is not surprising to find it so frequently used, especially as the locative, instrumental and dative all used the same endings. Thus we may compare τῷ πλοιαρίῳ ἡλθον (Jo. 21:8) with ἐν πλοΐῳ (Mt. 14:13), ὑδατὶ βαπτίζῳ (Lu. 3:16) with βαπτίζῳ ἐν ὕδατι (Mt. 3:11), τῇ ἐσχάτῃ ἡμέρᾳ (Jo. 6:40) with ἐν τῇ ἐσχάτῃ ἡμέρᾳ (Jo. 6:44). The tendency in the older Greek was constantly towards the use of ἐν, though the mere locative survived, especially [Page 521] in some constructions. In Mt. 13:52 MSS. vary between the mere locative τῇ βασιλείᾳ and ἐν with locative and ἐς with accusative.

(c) Place. This was probably the original locative. Place of rest was put in the locative without a preposition. As already indicated, this usage abounds in Homer. Some of these distinctively locative forms persisted in the Greek as in the Latin. Thus οἶκοι, ἔσχατα, Μαραθώνια, Αἴθηνας, Θύραι, humi, Corinthi, Romae (ai). Brugmann (Griech. Gr., p. 226) thinks that ἱματιαί is dative. Indeed the locative forms and the dative forms used as locative, after the blending of the three case-forms into one, still occur in Pindar side by side. The orators up to the time of Demosthenes use the mere locative frequently. The Æolic has µέσοι=ἐν μέσῳ (cf. οἶκοι and οἰκῖς). But the rule in Attic literary prose is to use a preposition with the locative of place. Thus ἐν Αἴθηνας (1 Th. 3:1), ἐν οἴκῳ (1 Cor. 11:34)=‘at home’ and usually ἐν τῷ οἴκῳ (Jo. 11:20). But observe ῥηστὰς περιέπεσεν (Lu. 10:30), where the resultant idea is “among” and περί is used with the verb in composition, but none the less it is the locative. Blass indeed remarks that the “local dative” does not occur in the N. T. He means the pure locative of place without a preposition, not considering the adverb κύκλῳ (Mk. 3:34), and possibly ἱματιαί (Jo. 18:6). We have indeed ἐκτρέφει ὁδῷ ἐκβαλλόντα (Jas. 2:25), possibly instrumental. Cf. the figurative usage in 2 Pet. 2:15, etc. It is indeed a very short step to the figurative usage, πορεύομαι ταῖς ὁδοῖς αὐτῶν (Ac. 14:16), μιθὲ τοῖς ἔθεσιν περιπατεῖν (Ac. 21:21), στοιχεύομαι τοῖς ἱέρεσιν (Ro. 4:12). I think that we have the pure locative also in τῷ πλοιαρίῳ ἡλθον (Jo. 21:8), ὑδατὶ βαπτίζῳ (Lu. 3:16), καθαρίσας τῷ λουτρῷ τοῦ ὕδατος (Eph. 5:26), τῷ θυσιαστήρῳ παρεδρούοντες (1 Cor. 9:13). Cf. also ἐπέθηκαν αὐτοῦ τῇ κεφαλῇ (Jo. 19:2), ἀδύνατος τοῖς ποιεῖν (Ac. 14:8). Hence it is overstating it to assert that the locative of place without prepositions has entirely disappeared from the N. T. The scarcity of this usage in comparison with Homer is in perfect harmony with the

9 Giles, Man., etc., p. 329 f.
2 Giles, Man., etc., p. 330.
3 Main, Loc. Expr. in the Attic Orators (1892), p. 231.
5 Gr. of N. T. Gk., p. 119.
linguistic development. Moulton⁶ indeed finds the locative of place [Page 522] in inscriptions as late as the sixth century A.D., B.C.H., 1903, p. 335, τῷ τύβῳ.

(d) TIME. It is expressed much more persistently with the mere locative. It has outlived the usage as to place and is “fairly frequent” in the N. T. Cf. Sanskrit, Latin, older Greek, Anglo-Saxon. Here, of course, time is regarded from the point of view of a point, not of duration (accusative). But the accusative is making inroads on the locative and is already used occasionally for a point of time. See Accusative. For papyri examples take τοῖς παλαιοῖς χρόνοις B.U. 903 (ii/A.D.) and γενεσίοις, γάμοις B.U. 1 (iii/A.D.), Moulton, Cf. Rev., April, 1904, and Dec., 1901. See also τῇ ἀναβάσει, O.P. 742 (ii/B.C.). Observe the difference between the accusative (τῷ σάββατον ἡμέρας) and the locative (τῇ δὲ μὲ τῶν σαββάτων ἡμέραν) and the genitive (ὁρθοὺς βαθέως) all in the same sentence (Lu. 24:1). The accusative is easily differentiated from both the locative and the genitive. As between the locative and the genitive the matter is not quite so clear. Brugmann² indeed thinks that originally there was little difference. The difference lies in the essential meaning of the two cases. The locative is a point and the genitive is the case of genus. Thus in Mt. 24:20 we have ἰνα μὴ γένηται ὡς ὑμῖν χειμῶνος μηδὲ σαββάτῳ. It is not mere hair-splitting to note that winter is here set over against summer (time within which) and that Sabbath is the point of time. In practical result the difference is very slight, but it is hardly just to regard the two usages as without difference. Cf. νυκτός (Mt. 25:6), νυκτὶ (Mk. 14:30), νύκτα (Ac. 26:7). Καιρῷ (Lu. 20:10) for ‘in due time’ may be illustrated by τῷ δέοντι καιρῷ, O.P. IV, 729, 5, and τῷ τῆς ὑπόρας καιρῷ, ib., 11. As further examples of the mere locative we may note the various instances of ἡμέρα. So τῇ τρίτῃ ἡμέρᾳ (Mt. 20:19), τῇ μὲν σαββάτων (Jo. 20:1), τῇ πρώτῃ ἡμέρᾳ τῶν ἀζωμόν (Mk. 14:12), τῇ ἡμέρᾳ τῇ ὕγδῃ (Ac. 7:8), τῇ ἐσχάτῃ ἡμέρᾳ (Jo. 6:40), ποὺ ἡμέρᾳ (Mt. 24:42), ἡ ἡμέρᾳ (Lu. 17:29 f.), τακτῇ ἡμέρᾳ (Ac. 12:21), τῇ ἡμέρᾳ ἐκείνῃ (Jo. 20:19), τῇ ἐπαύσῃ ἡμέρᾳ (Ac. 7:26), τῇ ἐχομένῃ ἡμέρᾳ (Ac. 21:26), and even ἡμέρᾳ καὶ ἡμέρᾳ (2 Cor. 4:16). The substantive is not expressed in τῇ ἐπιφοινοκούσῃ (Mt. 28:1) and τῇ ἐξῆς (Ac. 21:1).³ Cf. also σήμερον ταύτῃ τῇ νυκτί (Mk. 14:30), where the adverb is accusative, but the substantive locative. With some of these phrases ἔν is also [Page 523] found as with ταύτῃ (Lu. 19:42), ἐκείνῃ (Lu. 6:23), ὑγδῇ (Lu. 1:59), μῷ (Lu. 20:1), ἐσχάτῃ (Jo. 6:44), with ἡμέρᾳ and σαββάτῳ (Lu. 4:16), ἡμέρᾳ and genitive (Lu. 4:25), with ἐξῆς (Lu. 7:11), where W. H. read in text ἔν τῷ rather than ἐν τῷ. The MSS., especially D, vary a good deal. Νυκτὶ occurs without ἐν (Lu. 12:20) and with ἐν (Mt. 26:31). So also we find σαββάτῳ (Mt. 24:20), σάββασιν (Mk. 2:24), but also ἐν with each (Mt. 12:2; Mk. 2:23). With ὄρα we have both ὄρᾳ (Lu. 2:38) and ἐν (Lu. 12:12). Once more ψυχικῇ occurs without ἐν (Mt. 14:25) and with ἐν (Lu. 12:38). With ἔτος we have ἔν once (as Lu. 3:1) and without ἐν twice (Jo. 2:20; Ac. 13:20), but these two examples (ἔτειν τεσσαράκοντα, ὃς ἔτειν τετρακόσια καὶ πεντήκοντα) are probably associative-instrumental.¹ Cf. προβεβηκότας ἢ δή τοῖς

---

1 Blass, Gr. of N. T. Γκ., p. 119.
Observe also (Gal. 1:24), ἐν Mk. 8:38. Novi (chiefly in Paul, as Ro. 3:21) is a locative form (cf. οὐχί). Other locative adverbs to note are ἄει (2 Cor. 6:10), ἀκαί (Mt. 6:21), πέρας (2 Cor. 8:10), προί (Mk. 16:2).

(e) **LOCATIVE WITH ADJECTIVES.** Thus we note of πτωχοὶ τῷ πνεύματι (Mt. 5:3), καθαρὶ τῇ καρδίᾳ (5:8), ἀδιάντος τοῖς ποισίν (Ac. 14:8), στερεός τῇ πίστει (1 Pet. 5:9), νοθροὶ ταῖς ἁκοίς (Heb. 5:11), περιτομῆ ὁκταήμερος (Ph. 3:5), ἐλευθεροὶ τῇ δικαιοσύνη (Ro. 6:20), ταπεινῶς τῇ καρδίᾳ (Mt. 11:29), ἀπερίτμητοι καρδίαις (Ac. 7:51), ἄγια καὶ σῶματι καὶ πνεύματι (1 Cor. 7:34). Cf. Ro. 12:10–13. In Blass-Debrunner, p. 118, these examples are treated as instrumental.

(f) **LOCATIVE WITH VERBS.** Cf. δεδεμένος τῷ πνεύματι (Ac. 20:22), περιβεβλημένου ἵματίου λευκοῖς (Rev. 4:4, marg. ἐν). In Ro. 12:10–13 note the various examples of the locative with participles, though ταῖς χρείας κοινονοῦντες is probably instrumental. Cf. also ἐκκοπούμενοι τῇ διανοϊᾷ (Eph. 4:18), ἐκποθημεριῶς πνεύματι (1 Pet. 3:18), σχήματα εὑρέθησι (Ph. 2:8). We seem to have the locative in κατεργάσατο τῇ ἐρήμῳ (Gal. 1:24). Further examples with verbs are [Page 524] toῖς ἐθεσιν περιστατέν (Ac. 21:21), πορευόμενός τῷ φόβῳ (Ac. 9:31), ὅταν πειρασμοὶ περιστεράτης ποικίλοις (Jas. 1:2), λατρεῖς περίπεσαν (Lu. 10:30), ἐπιφανείτης τῇ πίστει καὶ ἐπιφάνειον τῷ ἄρτῳ (Ac. 16:5), κάμπτε ταῖς ψυχαῖς (Heb. 12:3), ἐμμένων τῇ πίστει (Ac. 14:22), ἐπιμένων τῇ ἀπείτῃ (Ro. 11:23, cf. 22), ἐνκεντρισθέντων τῇ ἱδρυ ἐλαίῳ (Ro. 11:24), τῷ σῷ ὄνοματι ἐπαφησισταμέν (Mt. 7:22; cf. ἐξεβάλομεν also), τῶν τῷ πνεύματι (Ac. 18:25; cf. Lu. 10:21 and Mk. 5:29), τῇ οἴης ὑπομόνεντες (Ro. 12:12), and perhaps even ἐμπάστηκε ὑμᾶς πνεύματι ἄγιῳ (Mk. 1:8). See Ac. 16:5. For the so-called instrumental use of ἐν (like ἐν μαχαίρῃ, Mt. 26:52) see the chapter on Prepositions (cf. also Instrumental Case). As a matter of fact ἐν always has the locative, and this use of ἐν has the locative also. The activity of the verb is conceived as finding expression in the object mentioned. It is not a mere Hebraism, for the papyri have it as indeed the earlier Greek occasionally. But as a practical matter this use of ἐν with the locative was nearly equivalent to the instrumental case. The use of ὕμωλογεν ἐν (Mt. 10:32=Lu. 12:8) Moulton (Prol., p. 104) considers a Semiticism due to the common Aramaic original. Cf. the usual dative (Heb. 13:15).

(g) **THE LOCATIVE WITH SUBSTANTIVES.** Cf. ἡβ. 11:12, καθῆς τῷ ἄστρα τοῦ οὐρανοῦ τῷ πλήθει. So in Col. 2:14, τῷ καθ ἡμῶν χειρόγραφον τοῖς δόγμασιν, the adjective is used as a substantive. In 1 Cor. 14:20 we have the locative with substantive, verb and adjective, μὴ παιδία γίνεσθε ταῖς φρεσίν, ἀλλὰ τῇ κακίᾳ νηπιάζετε, ταῖς δὲ φρεσίν τέλειοι γίνεσθε.

(h) **THE LOCATIVE WITH PREPOSITIONS.** Just because the prepositions that were used with the locative were only “adverbial elements strengthening and directing its
meaning" they were very numerous. Originally nearly all the prepositions occurred with the locative. Thus in Homer and epic and lyric poetry generally we meet with the locative with ἄμφι, ἀνά, μετά (Buck, Class. Phil. II, 264), and when the so-called dative is found in Greek with ἐν, ἐπί, παρά, περί, πρὸς, ὑπό, it is really the locative case. But with a compound verb the case may not always be locative, as instance προκείμενον ἥμιν (Heb. 12:1). A number of the prepositions like ἄμφι, ἁνί, ἐν (ἐνι), ἐπί, περί, πρὸς (προτι) are themselves in the locative case. Cf. the locative adverbs of time already mentioned and ἐβραίοςτι (Jo. 5:2), ἐλληνιστὶ (Jo. 19:20), κύκλῳ (Mk. 3:34), the conjunction καί, etc. There are only four prepositions in the N. T. that use the locative. As examples note ἐν τῷ [Page 525] Ἱορδάνῃ (Mt. 3:6), ἐπί θύρας (Mt. 24:33), παρὰ τῷ σταυρῷ τοῦ Ἱσαοῦ (Jo. 19:25), πρὸς τῷ μνημεῖῳ (Jo. 20:11). But of these πρὸς has the locative only 6 times, παρὰ 50, while ἐπί has it 176 times. Ἐν, of course, having only the locative, is very common. One may note here ἐν πρότοις (1 Cor. 15:3) almost like an adverb.

(i) The Pregnant Construction of the Locative. It is common in the N. T. with ἐν, as the accusative with εἰς after verbs of motion or rest. This matter comes up for discussion again under the head of Prepositions, but a few words are perhaps needed here. The identity of ἐν and εἰς in origin and early usage must be borne in mind when one approaches these two prepositions. Cf. ὁ εἰς τὸν ἄγρον in Mk. 13:16. On the other hand note ὁ ἐμβάνας μετ ἐμοῦ τὴν χαῖρα ἐν τῷ τρυβλίῳ (Mt. 26:23). Here Mark (14:20) has εἰς τὸ τρυβλίῳν. This interchange of ἐν and εἰς is a feature of the LXX (Moulton, Prol., p. 245). Originally there was no difference, and finally ἐν vanishes before εἰς in modern Greek. Each writer looks at the matter in his own way. Cf. English vernacular, “come in the house,” “jump in the river,” etc. So also Mt. (3:6) has ἐβαπτίζοντο ἐν τῷ Ἱορδάνῃ ποταμῷ, while Mk. (1:9) reads ἐβαπτίζεθη εἰς τὸν Ἱορδάνην. Cf. ἐν οἴκῳ ἐστίν, text of Mk. 2:1 and marg. εἰς οἴκον ἐστιν. This same pregnant idiom appears with παρὰ as στάσα ὑπὸ παρὰ τοῦς πόδας αὐτοῦ (Lu. 7:38). See also Mk. 4:1. Cf. again ἐμβάνατε εἰς τὸ πλοῖον (Mt. 8:23). But observe the locative with ἐν in composition (Ro. 11:24). With ὅνομα we have the mere locative (Mt. 7:22), ἐν and the locative (Mt. 21:9), ἐπί and locative (Mt. 18:5), εἰς and accusative (Mt. 10:41; 28:19). Cf. also Mt. 12:41.

XI. The Instrumental (“Instrumental Dative”) Case (ἡ χρηστικὴ πτῶσις).

(a) The Term Instrumental. As applied to case it is modern and the adjective itself appears first in the fourteenth century. The Hindu grammarians, however, recognised this case. There are not wanting signs indeed that it survived in the Greek as a separate case-form. Meister concludes that in the Cyprian dialect the instrumental was still a separate case-form (a “living” case). He cites ἄρα, ἐψχολά, ἐπὶ,
besides σὺν τῷ ἔθνῳ, and in Kühner-Gerth\textsuperscript{6} we find οἶκος locative, οἶκῳ instrumental, and οἶκῳ dative. Other examples are ὅμα, ὀικχω, τάχα in later Greek, not to mention the many adverbs\textsuperscript{[Page 526]}\textsuperscript{1} in –α and –η (–α, –η) like κρυφῆ, λάθρη, σιγῆ, ἔθη, etc. This corresponds with the Sanskrit singular ending, and the plural бhis may be compared with the Homeric φί (φίν), θεόφι, θεόφιν. But in Homer one must note that these endings for singular and plural are used for the locative, ablative, and possibly for the dative also.\textsuperscript{2} It is not always easy to draw the line of distinction between the locative and instrumental in Greek after the forms blended.\textsuperscript{3} Sometimes indeed a word will make good sense, though not the same sense, either as locative, dative or instrumental, as τῇ δέξι, τοῦ θεοῦ ὑψωθεῖς (Ac. 2:33; cf. also 5:31). The grammars have no Greek term for the instrumental case, but I have ventured to call it χρηστική πτῶσις. The increasing use of prepositions (ἐν, διὰ, μετά) makes the mere instrumental a disappearing case in the N. T. as compared with the earlier Greek,\textsuperscript{4} but still it is far from dead.

\textit{(b) SYNCRETISTIC?} It is a matter of dispute as to whether this instrumental case is not itself a mixed case combining an old associative or comitative case with the later instrumental. Both of these ideas are present in the Sanskrit case (Whitney, \textit{Sanskrit Grammar}, p. 93). On the whole, however, one is constrained to doubt the existence of this so-called comitative case. Most of the difference is due to the distinction between persons (association, accompaniment) and things (means, implement, instrument). Cf. Delbrück, \textit{Vergl. Syntax}, I, p. 231. Hence neither term covers exactly the whole situation. We have a similar combination in our English “with” which is used in both senses. So also the Greek σῶν (cf. Latin cum) and even μετά (Εξήλθατε μετὰ μαχαίρων καὶ ξόλων, Mk. 14:48). In Mk. 14:43, μετὰ αὐτοῦ—μετὰ μαχαίρων, both senses occur together. But we may agree that the associative was the original usage out of which the instrumental idea was easily and logically developed.\textsuperscript{5} The comitative usage, for instance, is very common in Homer\textsuperscript{6} and Herodotus.\textsuperscript{7}

\textit{(c) PLACE.} There is no example of this usage in the N. T. except παντάχω (W. H. text, Ac. 21:28). In Jas. 2:25, ἐκβάλεται ὠδῶς [Page 527] ἐκβαλλόντως, we probably have the locative, though the instr. is possible.

\textit{(d) TIME.} But we do find examples of the associative-instrumental used with expressions of time. This is indeed a very old use of the instrumental, as Brugmann\textsuperscript{1}

---

6 I, p. 405.

Brugmann, K., Elements of Comparative Grammar of the Indo-Germanic Languages (translation by Wright, 1895).
and Delbrück show. The Sanskrit had it also as the time “by the lapse of which anything is brought about.” The singular, like χρόνῳ ἤκαν (Lu. 8:27; Ac. 8:11), finds parallel in the papyri, as is seen also in Pindar, Euripides, Aristophanes, Thucydides. For the papyri note πολλοὶ χρόνοις N.P. 50 (iii/A.D.), χρόνῳ A.P. 77 (ii/A.D.). Cf. Polybius xxxii, 12, πολλοὶ χρόνοις (Moulton, Prol., p. 76). There is no

doubt about the plural instrumental in Ro. 16:25, χρόνος αἰωνίος, a parallel to which Moulton\textsuperscript{6} finds in the epistolary formula in the papyri, ἐρρωσθαι σε εὖχομαι πολλοῖς χρόνοις. He rightly doubts the necessity of appealing to the Latin as W. Schulze\textsuperscript{7} does for the explanation of the use of the plural, since the classical τῷ χρόνῳ could easily give the impulse.

In Jo. 2:20, τεσσεράκοντα καὶ ἔτεσιν οἴκοδομήθη, we have the instrumental also, though, of course, this might be looked at as a locative, the whole period regarded as a point of time. In an example like πολλοῖς χρόνοις συνηρπάκει αὐτόν (Lu. 8:29) we probably have the instrumental also, though here the locative would give a good idea, ‘on many occasions’ (‘oftentimes’ Rev. V.), whereas the marg. (‘of a long time’) gives the instrumental idea. For the instrumental idea Moulton\textsuperscript{8} cites from Letronne (p. 220, fourth century A.D.) πολλοῖς ὑστερον χρόνοις. See also ὦς ἔτεσι τετρακοσίοις καὶ πεντήκοντα (Ac. 13:20). Cf. also πάσαις ταῖς ἡμέραις (Lu. 1:75), but marg. of W. H. has accusative. As Moulton\textsuperscript{9} observes, only the context can decide which is locative and which instrumental in such examples and he suggests that this uncertainty had something to do with the increasing use of ἐν to make the locative clear and distinct from instrumental or dative. “Speakers of Greek were certainly beginning to feel that they could not trust the dative out alone, and we can understand the occasional employment of nursemaid ἐν in places where she would have been better left at [Page 528] home, or replaced by σῶν.” Blass\textsuperscript{1} comments on the frequency of the instrumental with expressions of time in Josephus with no perceptible difference between it and the accusative. One can hardly agree to Blass\textsuperscript{2} explanation of the instrumental of time that it is due to the disinclination of the writer to put another accusative beside the direct object of the verb. Certainly the accusative is the most frequent idiom in the N. T. for the idea of extension of time, as can be seen in Mk. 2:19; Lu. 13:8; Ac. 13:18; Rev. 20:3, etc. In Jo. 14:9 W. H. have τοσοῦτον χρόνον in the text and put τοσοῦτῳ χρόνῳ in the marg. In Lu. 8:27 some MSS. have instead of the instrumental χρόνῳ ἰκανῷ the ablative ἐκ (ἂπὸ) χρόνου ἰκανὼν.

9 Ib.
2 Ib.
(e) THE ASSOCIATIVE IDEA. The idea of association alone is responsible for a good many examples, chiefly with verbs, though adjectives are not wanting. Substantives cut no figure at all according to Blass, for τίς κοινωνία φωτί πρός σκότος (2 Cor. 6:14) is an example of the pure dative (cf. also Lu. 5:10; 2 Cor. 6:16), and in Ro. 15:26 we have εἷς τούς πτωχούς and in 1 Jo. 1:3, 6, 7 μεθ᾽ ἕμών. But another example in 2 Cor. 6:14, τίς μετοχή δικαιοσύνη καὶ ἄνωμι, comes much closer to the substantive use of the associative-instrumental. But an undoubted example of a substantive followed by the associative-instrumental appears in εἷς ὑπάντησιν τῷ Ἰησοῦ (Mt. 8:34). So εἷς ἀπάντησιν ἤμιν (Ac. 28:15). Cf. also Jo. 12:13 (αὐτῷ) and 1 Macc. 3:11 εἷς συνάντησιν αὐτῷ. There is nothing in this construction out of harmony with the Greek idiom. The verb has the associative-instrumental. The genitive with this substantive occurs in Mt. 27:32 (δ text) and 1 Th. 4:17 (but δ text has associative-instrumental). Cf. Moulton, Prol., p. 14. There is no doubt as to the adjectives σύμμορφος and σύμφωτος. Thus τοῦ σώμα σύμμορφον τῷ σώματι (Ph. 3:21) and σύμφωτοι τῷ ὑμώματι (Ro. 6:5), but σύμμορφος has the genitive τῆς εἰκόνος in Ro. 8:29 like a substantive. The other compounds in σῶν are treated as substantives4 with the genitive, like συναχμάλωτος, συγγενής, συνεργός, σύντροφος, μέτοχος (Heb. 1:9). But note ἐναντίος αὐτός (Mk. 6:48), ὑπεναντίον ἤμιν (Col. 2:14). With verbs the associative-instrumental is very common in the N. T. as in the older Gk. The most important examples will be given in illustration. Ἀκολουθεῖ is a common instance, as ἤκολοθρίσαν αὐτῷ (Mk. 1:18). Cf. also συναχ. (Mk. 5:37). Rather oddly ἔσομαι is not so used, but once we find συνείσηκα αὐτῷ (Ac. 20:4). So [Page 529] διελέγετο αὐτός (Ac. 20:7), though πρός (Mk. 9:34) also is used. Other compounds of δία with this case are διαλλάγη τῷ ὀδελῳ (Mt. 5:24), διεβλήθη αὐτῷ (Lu. 16:1), τῷ διαβόλῳ διακρινόμενος (Ju. 9), τοῖς Ἰουδαίοις διακατηλέγετο (Ac. 18:28). But closely allied to these words are κατηλάγην τῷ θεῷ (Ro. 5:10), σοι κριθήναι (Mt. 5:40), ὠμίλει αὐτῷ (Ac. 24:26), which last may have πρός and accusative (Lu. 24:14). Then again note ἐτερογυγοῦντες (2 Cor. 6:14), τοῖς πνευματικοῖς ἐκοινώνησαν (Ro. 15:27), κολλᾶσθαι αὐτοῖς (Ac. 5:13), ἐνυγχαίρει τῷ θεῷ (Ro. 11:2). Cf. further ἀνδρὶ δέδεται (Ro. 7:2) and μεμιγμένη ποτι (Rev. 15:2). In Rev. 8:4 we may (R. V. dative) have the associative-instrumental1 ταῖς προσεχαῖς with ἀνέβη. Moulton cites ἄποδοσι σοι τῷ ἔνγιστα δοθησομένῳ δοσιών, B.U. 69 (ii/A.D.) ‘with your next wages’ (Cl. Rev., Dec., 1901). Cf. the old Greek αὐτοῖς ἄνδρας and the “military dative” (Moulton, Prol., p. 61). The compounds that with σῶν that use this case are numerous. Thus συλλαβάσθαι (Lu. 5:7), συμβουλεύοσας τοῖς Ἰουδαίοις (Jo. 18:14), though this might be a dative (cf. συμβαίνω and συμφέρει), συνεφώνησε ὑμῖν (Ac. 5:9; cf. 15:15),2 μὴ ψυχῇ συναφλούντες τῇ πίστε (Ph. 1:27, two examples probably of the instrumental, the first of manner), συνηκολούθει αὐτῷ (Mk. 14:51), αἱ συναναβέβαις αὐτῷ (Mk. 15:41), συνανακείμενο τῷ Ἰησοῦ (Mt. 9:10), μὴ συναναγγέλλεσθαι αὐτῷ (2 Th. 3:14), συνασκαόνεσθαι ὑμῖν (Ro. 15:32), συνήθησεν αὐτῷ (Lu. 9:37), μοι συναντλήθησαν (Lu. 10:40; cf. Ro. 8:26), συναποθανεν σοι (Mk. 14:31), οὗ συναπώλετο τοῖς ἀπεθήκασιν (Heb. 11:31),

3 Gr. of N. T. Gk., p. 115.
4 lb.
1 Cf. Moulton, Prol., p. 75.
2 Considered peculiar by Blass, Gr. of N. T. Gk., p. 114.
with words of likeness and identity. We find this usage with several adjectives. Thus δύοιος ἄνθρωπος (Luke 6:48) and always, save the accusative in Rev. 14:14 and in 1:13 (true text). In John 8:55 some MSS. actually have δύοιος ὑμῶν instead of ὑμῖν. Cf. our vulgar “the likes of you.” So also ἵσσος ἡμῖν (Matthew 20:12) and ἰσότιμον ἡμῖν πίστιν (2 Peter 1:1). ο άυτός with the instrumental is found once only, ἐν κατ' αὐτό τῇ ἐξουσιαστείᾳ (1 Corinthians 11:5). In 1 Thessalonians 2:14 we find τό αὐτό καθος, and in Philippians 1:30 τόν αὐτόν συγχάρησεν. Several verbs are used the same way. So ἐστέκεν ἀνάπλος (James 1:23), τοῖς ἀνδροφοις ὑπομονῆς (Hebrews 2:17), παραμοναίας τάφος (Matthew 23:27), ἔφρειν αὐτό (Hebrews 2:10). Some MSS. have ὅμοιος αὐτή in Matthew 22:39. In Revelation 4:3 δύοιος ὄρασε ἑλθο we have two instrumental examples.

MANNER. It is expressed by the instrumental case. This, like the other uses of the case in the N. T., is in harmony with ancient usage,1 not to say that of the koine.

Some N. T. adverbs illustrate this usage well, like δήμοσίς (Acts 16:37), εἰκῇ (1 Corinthians 15:2), ἀδιάφορος (1 Corinthians 12:11), κρησί (Ephesians 5:12), λάθρα (Matthew 2:7), πανοικεῖ (Acts 16:34), πανπληθεί (Luke 23:18), πάντη (Acts 24:3), πεξί (Mk. 6:33), τάχα (Romans 5:7). But the usage is abundant outside of adverbs, chiefly with verbs, but also with adjectives and even with substantives. Thus we find τέκνα φύσει ὑγμης (Ephesians 2:3) and Κύριος τῷ γένει (Acts 4:36; cf. also 18:2, ὄνοματι Ἀκύλαν, Ποντικόν τῷ γένε). See also the participle τῷ ἄντοι (Romans 7:23). Cf. also φύσει in Galatians 2:25 and τῷ προσώπῳ in Galatians 1:22. Here are some of the chief examples with verbs: χάριτι μετέχει (1 Corinthians 10:30), προσευχομένη ἀκατακλύστη τῇ κεφαλῇ (1 Corinthians 11:5), περιτμήθη τῷ άθεα (Acts 15:1), τῷ προδέσει προσεμένειν (Acts 11:23), ὅτι πατὶ τρόπῳ, ἐνταξεῖ ἄλληθος, Χριστός καταγελλείται (Philemon 1:18, all three examples), άνακεκαλυμμένῳ προσώπῳ κυτταρετμοῦμενοι (2 Corinthians 3:18). Blass notes also ἄπιστον αὐτόν ἐλαβον

1 K.-G., I, p. 435.
(Mk. 14:65) as a vulgarism which finds a parallel in a papyrus\(^2\) of the first century

[A PAGE 531] A.D., κονδύλοις ἔλαβεν. Cf. τῇ βίᾳ, B.U. 45 (iii/A.D.). But often μετά and the genitive (μετά βίας, Ac. 5:26), ἐν and the locative (ἐν δέκα χιλιάσιν, Lu. 14:31), κατά and the accusative (Ac. 15:11) or the mere accusative (Mt. 23:37) occur rather than the instrumental. There is one usage in the N. T. that has caused some trouble. It is called \(^1\) “Hebraic” by some of the grammarians. The instances are rather numerous in the N. T., though nothing like so common as in the LXX.\(^2\) Conybeare and Stock quote Plato to show that it is, however, an idiom in accordance with the genius of the Greek language. Thus λόγῳ λέγειν, φεύγων φυγῆ, φύσει περικυκλών, etc. They call it the “cognate dative.” That will do if instrumental is inserted in the place of dative. Moulton\(^3\) admits that this idiom, like βλέποντες βλέψετε (Mt. 13:14), is an example of “translation Greek,” but thinks that a phrase like ἐξολεθρεύσαι ὑποῦκ ἐξωλέθρευσαν (Josh. 17:13) is much more like the Hebrew infinitive absolute which is reproduced by this Greek instrumental or participle. Blass\(^4\) insists that the classical parallels γάῳ γαῖν, φυγῇ φεύγειν are not true illustrations, but merely accidentally similar, an overrefinement in the great grammarian, I conceive. The Latin has the idiom also, like curro curriculo. Here are some of the important N. T. instances: ἀκοῇ ἀκούσετε (Mt. 13:14), ἴσῳ ἴσας ἴσας ἴσας ἴσας (Ac. 23:14), ἴσῃ ἴσας ἴσας (Ac. 2:17), ἴσῳ ἴσας ἴσας ἴσας (Lu. 22:15), ἴσῳ ἴσας ἴσας (Mt. 15:4), ἴσῃ ἴσας ἴσας ἴσας (Ac. 2:30), ἴσῳ ἴσας ἴσας ἴσας (Mk. 5:42), ἴσῃ ἴσας ἴσας (Ac. 5:28), ἴσῃ ἴσας ἴσας (Jas. 5:17), ἴσῃ ἴσας ἴσας (Ro. 8:24) [Page 532]

(\(h\)) DEGREE OF DIFFERENCE (Measure kin to idea of manner). The accusative is sometimes used here also with the comparative, as πολὺ μᾶλλον (Heb. 12:9), But in Lu. 18:39 we have πολλῷ μᾶλλον (cf. Mt. 6:30). Cf. πολλῷ μᾶλλον, P. Par. 26 (ii/B.C.). In Ph. 1:23 we find the instrumental with the double comparative πολλῷ μᾶλλον κρείσσον. In particular observe τοσοῦτῳ μᾶλλον διότι βλέπετε (Heb. 10:25) which corresponds to the English idiom “the more, the less” in “the more one learns,

\(^{3}\) Prol., p. 75 f. Cf. θάνων θανάτῳ in Homer.

\(^{4}\) Gr. of N. T. Gk., p. 119.

\(^{5}\) Ib. Thack. (Jour. of Theol. Stu., July, 1908, p. 598 f.) shows that in the Pentateuch the Hebrew infinitive absolute was more frequently rendered by the instr. case, while in the Books of Samuel and Kings the participle is the more usual. In the LXX as a whole the two methods are about equal. On p. 601 he observes that the N. T. has no ex. of the part. so used except in O. T. quotations, while several instances of the instr. occur apart from quotations, as in Lu. 22:15; Jo. 3:29; Ac. 4:17; 5:28; 23:14; Jas. 5:17. See also Thack., Gr., p. 48.
the humbler he grows.” As a matter of fact the English “the” here is instrumental also, as is seen in the Anglo-Saxon ð. Cf. also τοσούτῳ κρείττων (Heb. 1:4).

(i) Cause. The instrumental may be used also to express the idea of cause, motive or occasion. This notion of ground wavers between the idea of association and means. Here are some illustrations: ἐγὼ δὲ λυμῷ ὡδε ἀπόλλυμαι (Lu. 15:17), ἵνα σταιρῷ τοῦ Χριστοῦ μὴ διόκονται (Gal. 6:12), λῷπι κατατακθῇ (2 Cor. 2:7), τινὲς δὲ τῇ συνήθεις ἐσθίουσιν (1 Cor. 8:7), οὐ διεκρίθη τῇ ἄπιστῃ ἄλλα ἐνευδοκιμῶθη τῇ πίστει (Ro. 4:20), τῇ ἄπιστῃ ἐξεκλίσθησαν (Ro. 11:20), ἥλεχθητε τῇ τούτῳ ἄπιστῃ (Ro. 11:30), τῷ ὑμετέρῳ ἐλέει ἵνα καὶ αὐτοῖς νῦν ἐλεηθῶσιν (11:31), μὴ ἐξενζεσθε τῇ ἐν ὑμῖν πυρώσει (1 Pet. 4:12), τοιαύταις γὰρ θυσίαις εὐαρεστεῖται (Heb. 13:16), τῷ μὴ εὑρεθί με Τίτον (2 Cor. 2:13), εὐδοκίσασθες τῇ δοκίμῳ (2 Th. 2:12). In 1 Cor. 9:7 we have τὶς κατεχόμεθα ἰδίως ὑπομονής ποτε; cf. τῇ ὑπερβολῇ (2 Cor. 12:7). But some verbs in the N. T. prefer a preposition for this idea, but not with the instrumental case. Thus ἤγαλλίσασαν ἔπει τῷ θεῷ (Lu. 1:47), ἐξεπλήσσοντο ἔπει τῇ διδαχῇ (Mt. 7:28), ἐν σοι εὐδοκησα ( Mk. 1:11), εὐφραίνοντο ἐν τοῖς ἔργοις (Ac. 7:41). With ταὐτάκις we find ἐν (Lu. 1:21), ἔπει (Lu. 4:22), περί (Lu. 2:18), διὰ (Rev. 17:7), not to mention ἐς (1 Jo. 3:13), ὑπερβολῇ (2 Cor. 12:7). 1

(j) Means. But no usage of this case is more common than that of means. With things sometimes we call it means, with persons agent, though more often the agent is expressed by ὑπὸ with genitive-ablative (cf. ab with the ablative in Latin). There is no essential difference in the root-idea. Donaldson (New Cratylus, p. 439) calls it the “implementive case.” This is, of course, an idiom found with verbs. Note especially χράομαι (cf. Latin utor with instrumental, not ablative), τῷ Παύλῳ χρησάμενος (Ac. 27:3), πολλῇ παρηγορήσῃ χρώμεθα (2 Cor. 3:12), ἐὰν τῶν αὐτῶν [Page 533] νομίμως χρῆται (1 Tim. 1:8), in which examples we have both thing and person. 1 Cf. 1 Cor. 9:12, 15, etc. But see accusative in 1 Cor. 7:31. Among the many examples we can only select the most striking. Thus μὴ ποτὲ ἵσσον τοῖς δραπαλοῖς (Mt. 13:15), ἑξεβάλεν τῷ πνεύματα λόγῳ (Mt. 8:16), πέδαις καὶ ἀλλαζέσας διδάσκαλοι (Mk. 5:4), ψάχνοντες τάς χερίν (Lu. 6:1), τάς θρεψέν ἐξεμαζέσσε (Lu. 7:38), ἥλεψεν τῷ μύρῳ (ib.), ὑπνῷ (Lu. 9:32), φιλήματα παραδίδωσ (Lu. 22:48), ταῖς μαγίαις ἑξεστάκεναι αὐτοῦς (Ac. 11:18), ἔρισαν αὐτῶν πνεύματα καὶ δινάμει (Ac. 10:38), ἀνέλειν Ἰάκωβον μαχαιρὴ (Ac. 12:2), διδάσκαλοι τῇ φύσει (Jas. 3:7), συναπήξῃ αὐτῶν τῇ ὑποκρισεί (Gal. 2:13), πεπληρωμένοις πίστει ἄδικις, πονηρές, κτλ. (Ro. 1:29), χάρις ἐστε σεσωσιμένοι (Eph. 2:5, 8), μὴ μεθύκεσθε οὖν (Eph. 5:18), ὑποτιθέσθε δικίου καὶ ᾅριαν (Eph. 6:11, one dative and two instrumental cases). Cf. κατακρινοῦμὲν αὐτὸν ἤθελων (Mt. 10:33, but ὅθεν in D, and in Mt. 20:18 ἔσται ἄνατον). See the frequent use of πίστεi in Heb. 11, which is more than mere manner, though in verse 13 we have κατὰ πίστις. Moulton (Cl. Rev., Dec., 1901) cites διήλωσόν ἐν πλοίῳ ἐξέρχεσθα τῇ ἄνω, O.P. 112 (iii/iv

1 In Herod., we find a double instr. with χρῆσθαι. Cf. Helbing, Der Instrumental in Herod., 1900, p. 8.
A.D.). Cf. Jo. 19:40, ὀθὸνίος μετὰ τῶν ἀρωμάτων for proximity of μετὰ to the instrumental. Moulton (Prol., p. 76) notes “the remarkable instrumental in Ep. Diogn. 7, ὡς τοὺς οὐρανοὺς ἐκτίσεν.” Besides some examples are open to doubt. Thus κατακαῆσε πυρὶ ἄδειστῳ (Mt. 3:12) may be either locative or instrumental. The same might be true of τῷ πλούτῳ ἔρχον (Jo. 21:8) and ἐβάπτισεν ὄδατι (Ac. 1:5), though the locative is pretty clearly right here. Then again in Ac. 22:25, προέτειναν τοῖς ἱμασιν, we have either the instrumental or the dative. But in 2 Pet. 1:3 ἰδίῳ δόξῃ καὶ ἄρεσθή (marg. in W. H.) are clearly instrumental, not dative. In Ro. 8:24, τῇ ἐλπίδι ἐξομήνευον, we have either the modal instrumental or the instrumental of means. Cf. also 1 Cor. 14:15. Blass² perhaps over-emphasizes the influence of the Heb. essay on the N. T. Greek in what is called the instrumental use of ἐν (the case with ἐν is always locative, historically considered). This is a classic idiom³ and the papyri give numerous illustrations⁴ of it, though the Heb. essay [534 Page] did make it more frequent in the LXX. Some of the uses of ἐν and locative, like ἐν μαχαίρῃ ἔπολοῦνται (Mt. 26:52), πολεμήσω ἐν τῇ ὑμοιασίᾳ (Rev. 2:16), ἐν φόνῳ μαχαίρῃ ἔπεξανον (Heb. 11:37), are fairly equivalent to the pure instrumental case, as ἀνεῖλεν μαχαίρῃ (Ac. 12:2), πεσοῦνται στόματι μαχαίρης (Lu. 21:24). But others without ἐν in Blass’ list are more debatable and may be construed as merely locatives after all, as seen above. Besides the examples already mentioned, πυρὶ ὑλοθήρεται (Mk. 9:49) may be compared with ἐν τινὶ αὐτῷ ἁρτύσετε (9:50) and ἐν τινὶ ὑλοθήρεται (Mt. 5:13). See further Mt. 7:2 and ἐν ῥάβδῳ ἔλθω (1 Cor. 4:21) which stands over against ἐν ἄγάπῃ πνεύματι τε πράσθητος.

Some doubt remains as to whether the instrumental case is used for the agent. In the Sanskrit¹ the instrumental is a common idiom with a perfect passive verb or participle. But the Latin uses the dative in such an example as is seen by mihi, not me. Most of the grammarians take the Greek passive perfect and verbal as the Latin with the dative.² But Delbrück³ recognises the doubt in the matter. The one example in the N. T. is in Lu. 23:15, οὐδὲν ἔξεν θανάτου ἔστιν πεπραγμένον αὐτῷ. D here reads ἐν αὐτῷ and Blass⁴ suggests that the right reading is without πεπραγμένον as in Ac. 25:5. It is possible also that in 2 Pet. 2:19, ὡς τις ἤτεται, we have person, not thing, of whom (Am. St. V), not of what. Cf. also Jas. 3:7. One may mention here also as a possible instrumental καὶ γὰρ ἐρήθω ὑμῖν (2 Cor. 12:20), ὡς ἐγένσθη αὐτοῖς (Lu. 24:35), ἰδίῃ ἀγγέλους (1 Tim. 3:16), but these are most probably true datives. The usual way of expressing the agent in the N. T. is ὑπὸ for the direct agent and διὰ for the intermediate agent, as in Mt. 1:22. But other prepositions are also used, like ὑπὸ (Ac. 2:22), ἐκ (Jo. 1:13), ἐν (Col. 1:17), παρὰ (Jo. 1:6), etc. See a real distinction between ὑπὸ and ἐν in Ro. 12:21.

2 Gr. of N. T. Gk., p. 117.
1 Whitney, Sans. Gr., p. 95.
2 K.-G., I, p. 422; Brug., Griech. Gr., p. 400 f.; Meisterh., p. 210, for inscr. (Attic);
Jann., Hist. Gk. Gr., p. 344; Monro, Hom. Gr., p. 98 f., considers it a true dative.
4 Gr. of N. T. Gk., p. 112.
(k) WITH PREPOSITIONS. The Greek uses the instrumental with only two prepositions ἄµα and σύν, both with the comitative idea. In the Cypriot Greek we have σῦν τόγα, the distinctive instrumental ending. Cf. the Sanskrit सम with the instrumental and the Latin *cum*. There is only one instance of ἄµα in the N. T. with the instrumental, ἄµα αὐτοῖς (Mt. 13:29), but note ἄµα σῦν αὐτοῖς (1 Th. 4:17; cf. also 5:10). Σῦν appears chiefly in Luke’s [Page 535] writings, as σῦν αὐτῇ (Lu. 1:56). But in composition σῦν is very common, as has already been shown. So συγχαίρετέ μοι (Ph. 2:18).

XII. The Dative (True) Case (ἡ δοτικὴ πτώσις).

(a) SYNCRETISM. That of the locative, instrumental and dative cases has not advanced so far in Greek as has that between the genitive and the ablative. Monro¹ thinks that “distinct forms for these three cases survived down to a comparatively late period in Greek itself.” He rightly conceives that it is not difficult, as a rule, to distinguish the three cases in usage. Brugmann² gives various examples of how the three cases made contribution to the common endings for the final blending.

(b) THE DECAY OF THE DATIVE. But in modern Greek this syncretistic combination has vanished in the vernacular. Moulton³ can properly speak of the “decay of the dative,” a decay that applies for the modern Greek to the locative and instrumental also. In the Sanskrit (Lanman) the dative, after the ablative, was the most infrequent case. The modern Greek simply uses εἷς and accusative for the usual dative (and locative) ideas and μέ (μετά) with accusative for the instrumental. We see an approach to this use of εἷς in the N. T., ἐλεημοσύνας ποιήσων εἷς τὸ ἐθνὸς μου (Ac. 24:17), τὴν βουλήν τοῦ θεοῦ ἠθέτησαν εἷς ἑαυτοῦς (Lu. 7:30). So εἷς ὑμᾶς (1 Pet. 1:4). Winer (Winer-Thayer, p. 213) is correct in refusing to consider εἷς with κηρύσσω or εὐαγγέλζομαι (Mk. 13:10; Lu. 24:47; 1 Pet. 1:25) as at all out of the way. The pregnant idea is in Mk. 8:19 and Ro. 8:18. Εἷς is found also with ἐνοχος (Mt. 5:22), ἐθέτος (Lu 14:35), ἐχρήστος (2 Tim. 4:11), but ὠφέλμος with πρός (1 Tim. 4:8). Only in the most illiterate papyri is the decay of the dative seen, as in τίνι λόγου, N.P. 47 (iii/A.D.), and in the late inscrs. like ὁ βοηθῶν ὑμῶν, J. H. S., XIX, 14. Cf. Moulton, Cl. Rev., Apr., 1904. Per contra note ἐπιτελήθη[η] τῷ ποιίῳ, P. Oxy. 744 (i/b.c.). Leaving out ἐν, the locative, instrumental and dative show a contraction

Winer

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

in the N. T. as compared with the earlier Greek. But even in the N. T. “ἐν is considerably more than a match for εἰς,” yet the vernacular revived and intensified the old identity of ἐν and εἰς seen in the early-dialects. Hatzidakis shows how this tendency increased in the later Greek till εἰς triumphed over ἐν in the modern Greek. But even in the N. T. it is often impossible to insist on the idea of motion or extension in εἰς, as ὁ ὅν εἰς τὸν κόλπον (Jo. 1:18), ὁ εἰς τὸν ἄγριν (Mk. 13:16). Cf. τοῖς εἰς τὸν οἶκον (Lu 9:61). Moulton cites from D ἐν as equivalent to εἰς in Acts 7:12; 8:23. One may compare the disappearance of the locative with ὑπὸ and the use of the accusative for both motion and rest, whereas in Appian and Herodian (Atticists) the locative is in the lead. Cf. the disappearance of the dative forms in English save in the pronouns him, whom, etc. Even Wyclif had “believe ye to the gospel” (Mk. 1:15).

(c) The Idea of the Dative. It is that of personal interest. It is sometimes used of things, but of things personified. Apollonios Dyscolos calls the dative the case of περιποίησις. The accusative, genitive and dative are all cases of inner relations, but the dative has a distinctive personal touch not true of the others. The dative is not a local case. There was originally no idea of place in it. It is thus a purely grammatical case (rein grammatisch). Even ἔρχομαι σοι (Rev. 2:16) is used of a person, not place. Cf. ἔρχεται σοι (Mt. 21:5, from the LXX) and ἐλθεῖτε μοι, P. Par. 51 (B.C. 160). But in physical relations the dative approaches the accusative in idea. Thus we find the dative of place in Heb. 12:22, προσεληλύθατε Σιὼν ὠρει καὶ πόλει θεοῦ ζῶντος (cf. 12:18) and ἤγγισεν τῇ Δαμασκῷ (Ac. 22:6). Cf. ἤγγισεν τῷ πύλῃ (Lu. 7:12). It is not used for the notion of time.

(d) The Dative with Substantives. I am not here insisting that the dative was used first with substantives rather than with verbs, but only that the dative has often a looser relation to the verb than the accusative or the genitive. It is more common to have the verb without the dative than without the accusative or genitive (Brug., ib.). This is seen also in the common use of the dative as the indirect object of verbs that have other cases and in the use of the dative with substantives somewhat after the manner of the genitive. Not all substantives admit of this idiom, it is true, but only those that convey distinctly personal relations. But some of these substantives are allied to verbs that use the dative. So εὐχαριστῶν τῷ θεῷ (2 Cor. 9:12), θλίψιν τῇ Ἐβραίας (13:7).
σαρκί (1 Cor. 7:28), ἰνεσιν τῷ πνεύματι μου (2 Cor. 2:13), σκόλιον τῇ σαρκί (2 Cor. 12:7). Blass compares Latin (1 Th. 2:10), εὐθυδία τῷ θεῷ (2 Cor. 2:15), ἔς τοις ἐξενοῦς (Mt. 27:7), τοῖς ἀπολλυμένοις μορίᾳ (1 Cor. 1:18). Cf. Lu. 5:14. With some of these examples verbs occur, but the dative is not here due to the verb. Some of them are in the predicate also, as χάρις τῷ θεῷ (Ro. 7:25), with which compare marg. εὐχαριστῶ. See Lu. 10:5. Cf. τοῖς ἀπεθανέναιν (1 Cor. 8:9). So in 1 Cor. 9:2, οἱ ἄλλοις οὐκ εἰμὶ ἀπόστολος, ἀλλὰ γε ὑμῖν εἰμὶ, the dative is not due to εἰμί. Cf. in next verse ἢ ἐμὴ ἀπολογία τοῖς ἢ ἄνακρίνουσιν. Cf. also αὐτοῖς in Ph. 1:28. So νόμος ἔπανοικός (Ro. 2:14), ἢμοι θάνατος (Ro. 7:13), and, not to multiply examples, τούτῳ μου καρπὸς ἔργου (Ph. 1:22), ἢ ἐπίστασίμοις (2 Cor. 11:28). Cf. Ro. 1:14: 8:12. In 1 Cor. 4:3 both the dative and ἐκ and accusative occur, but properly so, ἢμοι δὲ ἢ ἔλαχιστὸν ἐπιστεύν. Cf. 1 Cor. 14:22 for the same thing. The dative due to attraction of the relative is seen in οἷς Lu. 9:43.

(e) WITH ADJECTIVES. This dative occurs naturally. These adjectives and verbs, like the substantives, have a distinctly personal flavour. Here are the most striking examples: ἄπειθείς τῇ οὐφαντώ ἀπτασία (Ac. 26:19), ἄρεστὰ αὐτῶ (Jo. 8:29), ἀρκετῶν τῷ μαθητῇ (Mt. 10:25), ἄσπολοι καὶ ἀμώμητοι αὐτῶ (2 Pet. 3:14), στείρους τῷ θεῷ (Ac. 7:20), γνωστὸς τῷ ἄρχηρεί (Jo. 18:15), δούλα τῇ ἀκαθαρσίᾳ (Ro. 6:19), ἄναστὰ τῷ θεῷ (2 Cor. 10:4), σωτήριους πᾶσιν (Tit. 2:11), ἐμφανῇ—ἡμῖν (Ac. 10:40), ἔνοχος ἐσται τῷ συνεδρίῳ (Mt. 5:22), τὸ εὐσήχημον καὶ εὐπάρεδρον τῷ κυρίῳ (1 Cor. 7:35), ἱκανὸν τῷ τοιοῦτῳ (2 Cor. 2:6), καλὸν σοὶ ἐστιν (Mt. 18:8), μονογενῆς τῇ μητρί (Lu. 7:12), νεκροὺς τῇ ἀμαρτίᾳ (Ro. 6:11), πιστὴν τῷ κυρίῳ (Ac. 16:15), πτωχοὺς τῷ κόσμῳ (Jas. 2:5), σωτήριος πᾶσιν (Tit. 2:11), ὥσπερ ἵπποι (Ac. 7:39), φανερὸν ἐγένετο τῷ θαρσῳ (Ac. 7:13), ὄντες αὐτῶν ὕπαλοι (Ac. 19:31), ὄρθρωσις τοῖς ἀνθρώποις (Tit. 3:8). Wellhausen (Einl., p. 33 f.) calls ἔνοχος τῷ “ungriechisch.” But note ἔνοχος ἐστω τοῖς Ἰσοῖς ἐπιτε[ useCallback] (P. Oxy. 275 (A.D. 66). The participle in Lu. 4:16 (Ac. 17:2) almost deserves to be classed with the adjectives in this connection, τὸ εἰσοδῆς αὐτῶ.

(f) WITH ADVERBS AND PREPOSITIONS. The dative is found a few times with adverbs. Thus ὡς ὅσιος καὶ δικαίως καὶ ἀμέμπτως ὑμῖν τοῖς πιστεύουσιν ἐγνώρισαν (1 Th. 2:10), όµα τῷ κόσμῳ (Mt. 18:7) and so frequently (but accusative in Rev. 8:13; 12:12). Blass compares Latin vae mihi and vae me. Brugmann indeed considers κατα, παρά, πάλαι, χαμάι all to be dative forms. But, while this is true, the dative is not used with prepositions in the Sanskrit' and not certainly in the Greek. The locative is very common with prepositions, and the instrumental appears with two, but the dative is doubtful. In reality this statement must be modified a bit, for ἔγγυς has the dative twice in the N. T. (Ac. 9:38), τῇ Ἰορκῆ; ὃ ἔγγυς (Ac. 27:8), though the genitive is the usual case employed. Cf. ἔγγυζο with dative, Ac. 9:3;

1 Whitney, Sans. Gr., p. 96.
2 Giles, Man., etc., p. 329, but see Prepositions (ch. XIII).
A good example is ἀφεῖναι αὐτῷ καὶ τῷ ἱμάτιον (Mt. 5:40), ἀφεὶν ἡμῖν τὰ ὀφειλέματα ἡμῶν (Mt. 6:12), ἀνευρήσας αὐτῷ (marg.) οἱ οὐρανοί (Mt. 3:16), δώτε τῷ ἄγιον τοῖς κυρίοις (Mt. 7:6), δόθη χάριν τοῖς πτωχοῖς (Mt. 14:5), ὑμῖν πρῶτον... ἀπεσταλεῖν (Ac. 3:26), ἀπειλησόμεθα αὐτοῖς μηκέτι λαλεῖν (Ac. 4:17), ἃ δὲ γράφῳ ὑμῖν (Gal. 1:20), ἐπέβαλον αὐτοῖς τὰς χείρας (Ac. 4:3), λέγει αὐτοῖς ὅτι (Mt. 14:27), ὑμῖν δείξει ἄνάγαυον (Mt. 14:15), ἐφεύρεθη τοῖς ὁργητικοῖς (Mt. 5:21), προσέφερον αὐτῷ παιδία (Mt. 10:13), εὐαγγέλιζομαι ὑμῖν χαράν μεγάλην (Lu. 2:10), ὄφειλεν αὐτῷ ἐκατὸν δηνάριον (Mt. 18:28), πάντα ἀποδώσας σοι (Mt. 18:26), ὅλων ἐγείρειν τοίς δεσμοῖς σου (Ph. 1:17), ποιήσῳ δὲ τρεῖς σκηνάς, οὐ μίαν κτλ. (Mt. 17:4), ἢν αὐτὸς ἐπιγγέλατο ἡμῖν (1 Jo. 2:25). An example like ἐπέβλεψεν αὐτοῖς (Ac. 3:5) is really the indirect object. Cf. Ac. 26:27. In 2 Cor. 12:7, ἐδόθη μοι σκόλοπ τῇ σωρί, the moi is indirect object and σωρί may be either dative of advantage or locative.

1. *Indirect Object.* Perhaps the earliest use. Certainly it remains the one most commonly met. Indeed there are few transitive verbs that may not use this dative of the indirect object. In the passive of these verbs the dative is retained. Some representative illustrations are here given. Ἀφεῖναι αὐτῷ καὶ τῷ ἱμάτιον (Mt. 5:40), ἀφεῖν ἡμῖν τὰ ὀφειλέματα ἡμῶν (Mt. 6:12), ἀνευρήσας αὐτῷ (marg.) οἱ οὐρανοί (Mt. 3:16), δώτε τῷ ἄγιον τοῖς κυρίοις (Mt. 7:6), δόθη χάριν τοῖς πτωχοῖς (Mt. 14:5), ὑμῖν πρῶτον... ἀπεσταλεῖν (Ac. 3:26), ἀπειλησόμεθα αὐτοῖς μηκέτι λαλεῖν (Ac. 4:17), ἃ δὲ γράφῳ ὑμῖν (Gal. 1:20), ἐπέβαλον αὐτοῖς τὰς χείρας (Ac. 4:3), λέγει αὐτοῖς ὅτι (Mt. 14:27), ὑμῖν δείξει ἄνάγαυον (Mt. 14:15), ἐφεύρεθη τοῖς ὁργητικοῖς (Mt. 5:21), προσέφερον αὐτῷ παιδία (Mt. 10:13), εὐαγγέλιζομαι ὑμῖν χαράν μεγάλην (Lu. 2:10), ὄφειλεν αὐτῷ ἐκατὸν δηνάριον (Mt. 18:28), πάντα ἀποδώσας σοι (Mt. 18:26), ὅλων ἐγείρειν τοίς δεσμοῖς σου (Ph. 1:17), ποιήσῃ δὲ τρεῖς σκηνάς, οὐ μίαν κτλ. (Mt. 17:4), ἢν αὐτὸς ἐπιγγέλατο ἡμῖν (1 Jo. 2:25). An example like ἐπέβλεψεν αὐτοῖς (Ac. 3:5) is really the indirect object. Cf. Ac. 26:27. In 2 Cor. 12:7, ἐδόθη μοι σκόλοπ τῇ σωρί, the moi is indirect object and σωρί may be either dative of advantage or locative.

2. *Dativus Commodi vel Incommodi.* The so-called dative of advantage or disadvantage does not differ very greatly from the indirect object. A good example is ἔρχομαι σοι (Rev. 2:5, 16). Moulton (Prol., p. 245) cites *Eschylus* (P.V. 358), Ἄλλην αὐτῷ Ζηνὸς ἄφρονον βέλος. It is indeed rather more loosely connected at times and varies more in the resultant idea. Thus in μαρτυρίζετε ἑαυτοῖς ὅτι (Mt. 23:31) we have to translate ‘against yourselves,’ though, of course, the dative does not mean ‘against’ any more than it means ‘for’ or ‘in behalf of.’ The personal relation is expressed by the case and it may be favorable or unfavourable. [Page 539] Indeed, nowhere does the personal aspect of the dative come out more clearly than in this usage. Thus πάντα τὰ γεγραμμένα—τῷ ὑμῖν τῷ ἀνθρώπῳ (Lu. 18:31), γραμματεύεις μαθητευεῖς τῇ βασιλείᾳ (Mt. 13:52), νόμῳ κεκεκομημένην τῷ ἀνδρί (Rev. 21:2), ἀναπληρεῖται αὐτοῖς (Mt. 13:14), δικαίῳ νόμος οὐ κεῖται (1 Tim. 1:9; note long list of datives), ἀνασταρκόντως ἑαυτοῖς τὸν ὑμῖν (Heb. 6:6), ὃς σὺ μεμαρτύρηκας (Jo. 3:26), ἐκείνα ἐμαυτῷ τοῦτο (2 Cor. 2:1), μὴ μεριμνᾶτε τῇ ψυχῇ (Mt. 6:25) ἀσεβείς τεθεικός (2 Pet. 2:6), ἐξε ἐξεστήσατε, θεῷ ἐπε ἐφερονοῦσαν, ὑμῖν (2 Cor. 5:13), ἐνέβλεψεν αὐτῷ (Mk. 6:19). Blass notes how frequent this idiom is in Paul’s Epistles, especially in the vehement passages. Thus μηκέτι ἑαυτοῖς ζῶσιν (2 Cor. 5:15), ἵνα θεῷ τῷ ζῴῳ (Gal. 2:19), ἀπεδάνομεν τῇ ἡμαρτίᾳ (Ro. 6:2; cf. 6:10 f.), ἐθανάτωθε τῷ νόμῳ—ἐς τὸ γενέσθαι ὑμῖν ἔτερῳ (Ro. 7:4), εὐθύνει μοι (Ro. 7:10), τῷ ἱδίῳ κυρίῳ στήκει ἥ πάπτει (Ro. 14:4), κυρίῳ ἐστί (Ro. 14:6), ἑαυτῷ ἡ—ἐαυτῷ ἀποθνήσκει (verse 7). Cf. ἐμοὶ in Ro. 7:21, ὑμῖν in 2 Cor. 12:20 and μοι with ἐγένετο in Ac. 22:6. A good example is ἀπομασσόμεθα ὑμῖν, Lu. 10:11. See ἑαυτῷ in 2 Cor. 2:1 and τῷ

3 Griech. Gr., p. 455.
1 Gr. of N. T. Gk., p. 111.
πνεύματι (2:13). Cf. βαστάζων αὐτῷ τὸν σταυρὸν (Jo. 19:17). In Mk. 10:33 note also the other datives, either the indirect object or the direct object like ἐμπαιζόμοναι αὐτῷ. Cf. also πίστις and τοῖς Ιουδαίοις in 1 Cor. 9:19 f. In this connection one may note also τί μοι τὸ δῆμος (1 Cor. 15:32), τί ἡμῖν καὶ σοί (Lu. 4:34). The intense personal relation is also manifest in the examples in 1 Cor. 1:23 f. Cf. also 1:18, 30. Prof. Burkitt (Jour. of Theol. Stud., July, 1912) interprets τί ἐμοι καὶ σοί (Jo. 2:4) to mean ‘What is it to me and thee?’ That is, ‘What have we to do with that?’ In a word, ‘Never mind!’ like the modern Egyptian mā ʿalāsh in colloquial language. The so-called ethical dative (cf. σοί in Mt. 18:17) belongs here. A very simple example is συμφέρει γάρ σοι (Mt. 5:29). Moulton2 cites a papyrus example for ἔρχομαι σοι (Rev. 2:5, 16), though from an illiterate document. For μέλει see Ac. 18:17; 1 Pet. 5:7.

3. Direct Object. Then again the dative is often the direct object of transitive verbs. These verbs may be simple or compound, but they all emphasize the close personal relation like trust, distrust, envy, please, satisfy, serve, etc. Some of them vary in construction, taking now the dative, now the accusative, now a preposition. But this is all natural enough. Thus καὶ ἣπιστοῦν αὐτῷ (Lu. 24:11), ἀπεθάνων τῷ ὑπό (Jo. 3:36), ἐκπέμβατο ἀντὶ τῶν ἀνθρώπων (Ac. 5:36), ὑπακούοντων αὐτῷ (Mk. 1:27). Once we find the dative with πέποιθα (Ph. 1:14), but elsewhere prepositions, as ἐν (2 Th. 3:4) εἰς (Gal. 5:10), ἐπί (Lu. 18:9). In particular πιστεύω calls for a word. Deissmann1 has made an exhaustive study of the subject, and Moulton2 has given a

Burrritt BURKITT, F. C., Syriac Forms of N. T. Proper Names (1912).
2 Prol., p. 75. Blass, Gr. of N. T. Gk., p. 113, calls this the ethical dative. The so-called dative of “majesty” Blass considers a Hebraism. He compares ἅστερος τῷ θεῷ with πόλις µεγάλη τῷ θεῷ (Jonah, 3:3), ‘a very great city.’ But it is doubtful if the N. T. follows the LXX here.

Deissmann

DEISSMANN, A., Bible Studies (1901). Tr. by A. Grieve; cf. Bibelstudien (1895) and Neue Bibelstudien (1897).

clear summary of results. This verb may be used absolutely (Jo. 20:31) or with an object clause (ib.) in the sense of believe. Moreover, it often means entrust (Gal. 2:7). Leaving out these uses Moulton finds that πιστεύω occurs with the dative 39 times and always in the sense of believe or trust (especially in John, as Jo. 5:46, εἰ γὰρ ἐπιστεύετε Μωϋσεὶ ἐπιστεύετε ἐν ἐμοῖ). It is rather remarkable that ἐν occurs only once (Mk. 1:15, πιστεύετε ἐν τῷ εὐαγγελίῳ) explained by Deissmann3 as meaning ‘in the sphere of,’ to which Moulton agrees. In Eph. 1:13 ἐν more properly belongs to ἐνομάσται. The LXX uses ἐν rarely with πιστεύω and no other preposition. But in the N. T. εἰς occurs 45 times (37 times in John’s Gospel and 1 Jo.) while ἐπί appears 6 times with the locative and 7 with the accusative. Moulton objects to overrefining here between εἰς and ἐπί (at most like believe in and believe on). So also as to accusative and locative with ἐπί. What he does properly accent is the use of these two prepositions by the Christian writers to show the difference between mere belief (dative with πιστεύω) and personal trust (εἰς and ἐπί). This mystic union received a further development in Paul’s frequent ἐν Χριστῷ. The relation between ἐν τῷ ὄνοματι and ἐπί τῷ ὄνοματι is parallel.4

We must note other groups with the dative, like verbs of serving. Thus διηκόνουν αὐτῷ (Mt. 4:11), τῷ νομῷ δουλεύω νόμῳ θεοῦ (Ro. 7:25, both instrumental and dative here), λατρεύειν αὐτῷ (Lu. 1:74), ὑπηρετεῖν αὐτῷ (Ac. 24:23). But in Ph. 3:3 we have the instrumental with λατρεία, and προσκυνέω uses either the dative (Mt. 2:2) or the accusative (Jo. 4:23), not to mention ἐνόπιον (Lu. 4:7). The dative with δουλόω in 1 Cor. 9:19 is merely the indirect object.

Another convenient group is verbs to please, to suffice, to be envious, angry, etc. Thus θεῷ ἰρέσαι (Ro. 8:8), ἐνεβριμῶντο αὐτῇ [Page 541] (Mk. 14:5), μετριοπαθεῖν τοῖς ἄνδροις ἐν οἴκοις (Heb. 5:2), ὁ ὕποκριτής τῷ ἀδελφῷ (Mt. 5:22), ἄκει σοι (2 Cor. 12:9), ἀλλήλοις φθονοῦντες (Gal. 5:26, accusative, margin of W. H.).

Once more, we may note verbs meaning to thank, to blame, to enjoin, etc. So εὐχαριστῶ σοι (Jo. 11:41), ἐγκαλεῖσαι ἄλληλος (Ac. 19:38), ἐπετίμησεν αὐτοῖς (Mt. 12:16), τοῖς ἄνδροις ἐπιτάσσει (Lu. 8:25). So also προσέταξεν αὐτῷ (Mt. 1:24), διεστέλλετο αὐτοῖς (Mk. 8:15), ἔμοι χολότε (Jo. 7:23). But κελεύω has accusative, though the dative occurs in the papyri.

---

1 In Christo, p. 46 f. My friend, Prof. Walter Petersen, of Lindsborg, Kan., does not believe that the dative is ever the direct object of a verb, and Dr. W. O. Carver agrees with him.
2 Prol., p. 67 f.
3 In Christo, p. 46 f.
4 Moulton, Prol., p. 68; Heitmüller, Im Namen Jesu, I, ch. i.
There remain verbs meaning to confess, to lie, to help, to shine, etc. Thus we find ὁμολογοῦντος τῷ ὄνοματι (Heb. 13:15) and ἄνθρωπος ὑπὲρ τῆς θεᾶς (Lu. 2:38), οὐκ ἔφευγον ἄνθρωπος (Ac. 5:4), βοήθει μοι (Mt. 15:25, but ὑφελέω has accusative), ἵνα φαινομαι αὐτῇ (Rev. 21:23). In the later κοινή we find βοηθέω with accusative or genitive (Radermacher, N. T. Gr., p. 110). Cf. also τῷ θεῷ προσεύχομαι (1 Cor. 11:13), ὃς ἀντίστητε (1 Pet. 5:9). Cf. two datives in Lu. 11:4.

4. The Dative with Intransitive Verbs. However, this is not a point that it is always easy to decide, for in ἅρκεσι (2 Cor. 12:9) one is not sure where to place it. See above. Cf. Lu. 3:14. We are so prone to read the English into the Greek. The same remark applies in a way to τί ἐγένετο (Ac. 7:40), ἔσται αὐτῷ (Mt. 1:20), ἔρημη τοῖς ἄρχαιοις (perhaps indirect object, Mt. 5:21). The same thing is true of a number of the examples of “advantage or disadvantage” already given, like Ro. 6:10; 14:4, etc. Cf. also μελέτῃ τῷ θεῷ (1 Cor. 9:9). See ἐν σοι λείπει (Lu. 18:22), but ἐν σε ὑστερεῖ (Mk. 10:21).

5. Possession. The Greek, like the Latin, may use the dative for the idea of possession. Thus οὐκ ἔστι τὸς τόπος (Lu. 2:7), οὐκ ἔστι σοι μερίς (Ac. 8:21), ὑμῖν ἔστιν ἡ ἐκκλησία (Ac. 2:39), τίνι ἔσται (Lu. 12:20), εἰς ἡμῖν τέσσαρες ἄνδρες (Ac. 21:23), ἐστιν ἀντίθεσι ημῖν (Jo. 18:39), ἐὰν γεννηται τινι ἄνθρωπω ἐκατόν πρόβατα (Mt. 18:12). The idiom is extended even to examples like οὕτως ἔσται σοι τοῦτο (Mt. 16:22), ἔσται χαρὰ σοι (Lu. 1:14). Cf. Ac. 2:43; Lu. 9:38. This is a frequent idiom in the ancient Greek and a perfectly natural one. This predicative dative at bottom is just like the usual dative.

6. Infinitive as Final Dative. Giles calls attention to the infinitive [Page 542] as a final dative. This was the original use of the dative in –α, the expression of purpose. So ἔλθομεν προσκυνήσαι αὐτῷ (Mt. 2:2). Here we have the dative form and the dative of purpose. Cf. the old English “for to worship.” This dative form continued, however, when the case of the infinitive was no longer dative.

7. The Dative of the Agent. It was discussed under the instrumental and there is nothing new to be said here. The one clear example is found in Lu. 23:15. But not very different is the idiom in Mt. 6:1 (πρὸς τὸ θεαθῆναι αὐτοῖς) and 23:5. Cf. also 2 Pet. 3:14.

1 But note Mt. 10:32 ἐν, and ὁμολογῶ ἐν αὐτῷ in Lu. 12:8.
2 Man., p. 327.
8. The Dative because of the Preposition. We have already had examples of this. Compound verbs often have the dative where the simplex verb does not. The case is due to the total idea of the compound verb. The dative occurs with ἄντικείμενοι in Ac. 25:14; Gal. 2:2. So1 with ἄντι, as ὁ ἄντικείμενος (1 Pet. 5:9), ἄντικείμενοι τῷ Καύσαρι (Jo. 19:12). ἄντικείμενοι ἀυτῷ (Lu. 13:17), τῷ ἄγιῳ ἄντικείμενοι (Ac. 7:51). Ἀπό in ἄποτάσσομαι goes with the dative (Mk. 6:46). The same thing is sometimes true of ἕν, as ἕνεκαίζεται (Mk. 15:20), ἕμβλεψας αὐτὸς (Mt. 6:46). Sometimes with ἄντι— we have πρός, as with ἔν we find ἐν or πρός after the verb. With ἐνδέχεται ἠτύῳ (Mk. 6:19) we must supply θημόν or some such word. Εἰς and ἐπί usually have a preposition after the compound verb, except that compounds of ἐπί often have the indirect object in the dative (especially ἐπιτίθημι). But compare ἐπιτάσσω and ἐπιτιμάω above. Cf. ἐπέστη αὐτοῖς (Lu. 2:9), but ἐπί repeated (Lu. 21:34). With παρά we note παρέχω and παρίστημι with indirect object. In παρέστησαν αὐτῶν (Ac. 9:39) we can see either the dative or the locative. Cf. παρεδρεύειν (1 Cor. 9:13). In 2 Pet. 1:9 we may have the possessive dative with πάρεστιν. With περί again there is doubt as between the locative and dative in περίκειμαι (Heb. 12:1), περιστέρειν (1 Tim. 6:10), περιστύπτω (Lu. 10:30). Πρός with προστίθημι has the indirect object in the dative (Mt. 6:33), but with προσέρχομαι the dative directly as with ἐπι (Heb. 12:18, 22). With προσέχετε αὐτοῖς (Lu. 17:3) the object νοῦν has to be supplied, but this is not the case with προσκυλίζεται καὶ δὲ (Ac. 2:42), nor with ὀρέει (Heb. 12:18, 22). With προσκυλίζεται αὐτοῖς (Mt. 27:60) the dative is merely the indirect object, but note ἐπι in Mk. 15:46. Compounds of οὖσα likewise generally have the dative, as [Page 543] ὕπατον (Mt. 8:27), ὕπαρχο (Lu. 12:15), ὑποτάσσω (Lu. 10:17), ὑποτίθημι (1 Tim. 4:6).

(h) Ambiguous Examples. Sometimes it is not easy to decide whether the case is locative, instrumental or dative. The example in Ac. 2:33, ὑψόων τῇ δεξιᾷ, has already been cited. This may mean ‘to lift up to the right hand,’ ‘at the right hand’ or ‘by the right hand.’ Cf. also Ro. 8:24; Jo. 21:8. But it is not often that there is any serious difficulty in the matter. In 2 Cor. 11:1, ἄνειξεσθε μοι μικρὸν τι ἄρρωστονς, note ablative, accusative, genitive. And, if some cases remain, as with the genitive and ablative, that cannot be finally settled, the matter must simply remain in abeyance. It so happens that in Lu. 8:29 f. we have all eight cases used if πολλοίς χρόνοις be here locative and not instrumental. It may serve as a good exercise to discriminate in this passage each of the cases and explain the distinctive meaning and the result in this special context. The cases have kept us for a good while, but the subject is second to none in importance in Greek syntax. Nowhere has comparative philology shed more light than in the explanation according to historical science of the growth and meaning of the Greek cases.

[PAGE 544] CHAPTER XII

ADVERBS (ἘΠΙΡΡΗΜΑΤΑ)

I. Special Difficulties. See chapter VII (Declensions) for discussion of the origin, formation and history of adverbs. The matter will come up again in chapter XIII (Prepositions) where the so-called “improper” prepositions are treated. Brugmann\(^1\) has no syntactical handling of the subject, though Delbrück\(^2\) gives an exhaustive presentation of the matter. But even Delbrück gives less than a page to the purely syntactical phases of the adverb (p. 643), whereas Winer\(^3\) treats the adverb only under syntax.

(a) NATURE OF THE ADVERB. The first difficulty is in deciding what is an adverb. As shown in chapter VII, the adverb not only has great variety in its origin, but also wide expansion in its use. In simple truth a large portion of the “parts of speech” are adverbs. Brugmann\(^4\) pointedly says that it is not possible to draw a sharp line between adverb, particle and preposition. The development of adverb into preposition, conjunction, intensive particle and even interjection was illustrated in chapter VII with perhaps sufficient fulness. To this list may be added the negative particles which are really adverbs. In particular in the Sanskrit is there difficulty in the treatment of preposition and conjunction as distinct from adverb, since the indeclinable words were less distinctly divided.\(^5\) But this vagueness applies to other members of the Indo-Germanic group.\(^6\) In Greek and Latin no distinct line can be drawn between adverbs and prepositions.\(^7\)

(b) THE NARROWER SENSE OF ADVERB. These wider and more specialized forms of the adverb must be dropped out of view before we can do anything with the mere adverb which is not preposition, conjunction, particle nor interjection. There is a good deal that needs to be said concerning the syntax of the mere adverb, for, in spite of its being a fixed case-form, it has a varied and interesting usage in the Greek sentence. The adverb has been treated by the grammars as a sort of printer’s devil in the sentence. It has been given the bone that was left for the dog, if it was left.

II. Adverbs with Verbs.

(a) COMMONEST USE. This is indeed the etymology of the word and the most frequent use of the pure adverb. But one cannot say that this was the original use, as the name ἐπίρρημα might suggest. The truth is that the adverb has such a varied origin that it is difficult to make a general remark on the subject that will be true. Only this may be said, that some adverbs began to be used with verbs, some with adjectives, some absolutely, etc. At first they were not regarded as strictly adverbs, but were used progressivelly so (cf. χάριν) until with most the earlier non-adverbial uses ceased.

(b) N. T. USAGE. Winer\(^1\) suspects that the N. T. writers did not understand the finer shades of meaning in the Greek adverbs, but this is true only from the point of

\(^1\) Griech. Gr., pp. 250–257.
\(^3\) W.-Th., pp. 462–473.
\(^4\) Griech. Gr., p. 250. On final ζ in adv. see Fraser, Cl. Quarterly, 1908, p. 265.
\(^6\) Delbrück, Vergl. Synt., I, p. 536.
\(^7\) Giles, Man., p. 341.
\(^1\) W.-Th., p. 462.
view of the Attic literary style and applies to the vernacular κοινή in general. But he is wholly right in insisting on the necessity of adverbs for precise definition in language. The grammarians find offence\(^2\) in the adverbs of the κοινή as in other portions of the vocabulary. Some of the “poetic” adverbs in Winer’s list are at home in the papyri as in the N. T., like εὖαρέστως. A few examples will suffice for the normal usage in the N. T. See the majestic roll of the adverbs in Heb. 1:1, πολυμετρικός καὶ πολυτρόπως πάλαι Cf. σπουδιαστέρους (Ph. 2:28), περισσοτέρως and τάχειον (Heb. 13:19), περιτέρω (Ac. 19:39) as examples of comparison.

\[(c)\] **Predicative Uses with γίνομαι and ἐμί.** There is nothing out of the way in the way in the adverb with γίνομαι in 1 Th. 2:10, ὃς ὅσιος καὶ δικαίος καὶ ἀμέμπτως ὢμοι τοῖς πιστοῖς εἴησθημεν. Here the verb is not a mere copula. Indeed ἐμί appears with the adverb also when it has verbal force. Thus καθὼς ἀληθῶς ἐστίν (1 Th. 2:13) is not equivalent to καθὼς ἀληθείᾳ ἐστίν. Cf. καθὼς ὀστίν ἀληθείᾳ ἐν τῷ Ἰησοῦ (Eph. 4:21). So also ἡ γένεσις ὅποιος ἐν (Mt. 1:18), εἰ ὄποιος ἐστίν ἡ αἰτία τοῦ ἀνθρώπου (Mt. 19:10), τὸ ὄποιος εἶναι (1 Cor. 7:26). Cf. 1 Cor. 7:7. The adverb in all these instances is different from the adjective. Cf. τί μὲ ἐποίησες ὅποιος (Ro. 9:20) for \[Page 546\] a similar predicate use of the adverb. Cf. also ὅποιος πεσόν and ὃντως ὡς ὢμοι ὢμοι ἐστίν (1 Cor. 14:25) and ἄλληθρος ἐν Mt. 14:33. In Ph. 4:5, ὁ κύριος ἐγγύς, the copula ἐστίν is to be supplied and here the adverb is not far from the adjective idea. Cf. also πόρρω ὅντος (Lu. 14:32), μακράν (Mk. 12:34), ἴσα (Ph. 2:6).

\[(d)\] **With ἔχω.** It has some idiomatic constructions with the adverb that are difficult from the English point of view. Thus τοῦς κακῶς ἔχοντας (Mt. 14:35), and with the instrumental case in Mk. 1:34. Cf. Lu. 7:2. In English we prefer the predicate adjective with have (He has it bad), whereas the Greek likes the adverb with ἔχω. So ἔσχάτως ἔχα (Mk. 5:23) and in Jo. 4:52 κομψότερον ἔχειν the comparative adverb. One must be willing for the Greek to have his standpoint. Cf. ὅποιος ἔχαι in Ac. 7:1 and πόρρω ἔχει (Mk. 7:6). Πώς ἔχουσιν (Ac. 15:36) needs no comment. It is a common enough Greek idiom. Cf. βαρέως ἔχουσα, P.Br.M. 42 (b.c. 168).

\[(e)\] **With Participles.** Ἀμα ἐλπίζων (Ac. 24:26) belongs to the discussion of participles. But one may note here ἡδή τεθνηκότα (Jo. 19:33) and ὡς μελλόντας (Ac. 23:15). Cf. also the use of ἡδή with παρῆθεν (Mt. 14:15), a matter that concerns the aorist tense. But note both νῦν and ἡδή with ἐστίν in 1 Jo. 4:3.

\[(f)\] **Loose Relation to the Verb or any other part of the sentence.** So ἀκμὴν (cf. ἐπι) in Mt. 15:16 and τὴν ἄρχὴν in Jo. 8:25, for this accusative is really adverbal. Cf. also τὸ λοιπὸν (Ph. 3:1), τοῦναντίον (Gal. 2:7).

**III. Adverbs Used with Other Adverbs.** There is, to be sure, nothing unusual about this either in Greek or any other tongue. So πολὺ μᾶλλον (Heb. 12:9), μᾶλλον κρέασον (Ph. 1:23), μᾶλλον περισσότερον (Mk. 7:36) are merely normal uses barring the double comparative in the two examples which, however, have their own explanation. The compound adverbs, which are common in the N. T. (as ὑπερπερισσός, Mk. 7:37; cf. πολυτρόπως in Heb. 1:1), call for no more explanation.

\(^2\) Ib., p. 463.
than other compound words. Cf. καθόλου (Ac. 4:18). The Greek, like the German, easily makes compound words, and the tendency to long compound words grows with the history of language. See ἀπεριστάτως in 1 Cor. 7:35. For compound adverbs see chapter VII, II, (c). For the comparison of adverbs see ib., II, (e).

IV. Adverbs with Adjectives. A typical illustration is found in 1 Tim. 3:16, ὦμολογομένος μέγα. So οὖθε μέγας in Rev. 16:18. The instances are not very numerous in the N. T., since indeed, especially in the Gospels, the adjective is not excessively abundant. [Page 547] In Ac. 24:25, τὸ νῦν ἔχον, the participle being both verb and adjective, causes no difficulty. In Ac. 23:20, ὦς μέλλουν τι ἄκριβέστερον πυθάνεσθαι περὶ αὐτοῦ, we have the adverbial use of τι as well as ἄκριβέστερον. Cf. ἀπεριστάτως with εὐπαρέδρον in 1 Cor. 7:35.

V. Adverbs with Substantives. Here indeed one may recall that the substantive as well as the adjective gives a basis for this idiom (cf. Jordan River). Νῦν is a typical example in the N. T. Thus we find ἐν τῷ νῦν καρφῷ (Ro. 3:26), τῇ νῦν Ἰερουσαλήμ (Gal. 4:25), ζωῆς τῆς νῦν (1 Tim. 4:8), τὸν νῦν ἀλῶνα (2 Tim. 4:10). Here indeed the adverb has virtually the force of the adjective, just as the substantive in this descriptive sense gave rise to the adjective. The English can use the same idiom as “the now time,” though this particular phrase is awkward. The Greek has so much elasticity in the matter because of the article which gives it a great advantage over the Latin.1 Cf. also ἥ δὲ ὄντως χήρα (1 Tim. 5:5), ἥ δὲ ἄνω Ἰερουσαλήμ (Gal. 4:26), τῆς ἀνω κλήσεως (Ph. 3:14), ὥ τότε κόσμος (2 Pet. 3:6).

VI. Adverbs Treated as Substantives.2 The very adverbs named above may be here appealed to. It is especially true of words of place and time. Thus έκ τῶν ἄνω εἰμι (Jo. 8:23), τὸ νῦν (2 Cor. 1:17), τὸ ἄνω (Col. 3:1 f.), τὸ νῦν (Ac. 5:38), ἐὰς τοῦ νῦν (Mk. 13:19), ἀπὸ τοῦ νῦν (Lu. 1:48) and often. Cf. τοῖς ἐκεῖ (Mt. 26:71), τὰ ὄπερ (Col. 4:9). So πλησίον always in the N. T. save once as preposition with genitive (Jo. 4:5). It usually has the article (Mt. 5:43), but may be used without it in the nominative case (Lu. 10:29). A striking instance of the adverb treated as substantive appears in χωρίς τῶν παρεκτῶς (2 Cor. 11:28). Other examples of the adverb with the article are ἄχρι τοῦ δεύρου (Ro. 1:13), ἐκ τῶν κάτω (Jo. 8:23), εἴς τὸ ὄπισω (Mk. 13:16), τοὺς ἐξω (1 Col. 5:12), τὸ ἔξωθεν καὶ τὸ ἔξωθεν (Lu. 11:40), εἰς τὸ ἐμπροσθεν (Lu. 19:4). In τοῖς μακρόν and τοῖς ἐγγύς (Eph. 2:17) the adverb is rather adjectival in idea. In τῆς ἐξῆς (Ac. 21:1) we have to supply, of course, ἡμέρα, though the text of Lu. 7:11 reads ἐν τῷ ἐξῆς. Here the adverb is treated rather as an adjective, but the point of distinction between the use as substantive and adjective is not always clear. Cf. also ἦν αὖριν (Mt. 6:34), περὶ τῆς σήμερον (Ac. 19:40). But it is not merely when the adverb has the article that it is treated as a substantive. Prepositions are used with adverbs without any article. Then it is not always clear whether we have two words or one. Thus editors print ὑπὲρ ἐκείνα as well as ὑπὲρκείνα (2 Cor. 10:16), ὑπὲρ ἐκ περισσοῦ as well as ὑπερκερισσοῦ [Page 548] (Eph. 3:20), ὑπὲρ λίαν as well as ὑπερλίαν (2 Cor. 11:5). Cf. ἐπετα, ἐπάνω, ἐφάπαξ, and ἐως ἄρτι in 1 Cor. 15:6. Thus ἐπὶ πέρυσι (2 Cor. 9:2), ἄπε ἄνωθεν ἐως κάτω (Mk. 15:38), ἄπο ἄρτι (Mt. 23:39).

1 Riem. and Goelzer, Synt., p. 798.
VII. The Pregnant Use of Adverbs. Just as the prepositions ἐν and εἰς are used each with verbs of rest and motion (and παρά with locative or accusative), so adverbs show the same absence of minute uniformity. Ποία, for instance, is absent from both the LXX and the N. T., as is ὅποια. Instead we find τοῦ ὑπάγει (Jo. 3:8) and οὗ ημῖν ὑπάγω (Jo. 13:33), but πόθεν ἔρχεται (Jo. 3:8) and ὧν ἔξαλθον (Mt. 12:44). So also ἔρχεται ἐκεῖ (Jo. 18:3) like our “come here.” But ἐκεῖ is regular in Ac. 21:3. Winer calls this an “abuse” of language, which is putting it rather too strongly, since it is found in the best Greek. It is largely a matter of usage, for with οὗ ἐνθάδε and ἐνθέων the ideas of hic and hoc had long coalesced, while ἔξωθεν, ἔσωθεν, κάτω mean both ‘without’ (Mt. 23:27) and ‘from without’ (Mk. 7:18), ‘within’ (Mt. 7:15) and ‘from within’ (Mt. 7:23), ‘below’ (Mt. 4:6) and ‘from below’ (Jo. 8:23). Cf. μετάβα ένθεν ἐκεῖ (Mt. 17:20) and ἐνθεν—ἐκεῖθεν (Lu. 16:26). In Mt. 25:24, 26, ἄρα ὧν οὗ ὑπερκόρπισας, we have ἐκεῖθος οὗ merged into ὧν by attraction. In οὗ ἔνθεν ἔνθες Ἡλιας (Heb. 13:24) it is uncertain what standpoint the writer takes. With ἐν we have not only the normal idiom like τοῖς ἐκ περιτομῆς (Ro. 4:12) and οἱ ἐκ τῆς Καίσαρος οἰκίας (Ph. 4:22), but the pregnant use where ἐν could have occurred. Thus ἄρα τὰ ἐκ τῆς οἰκίας (Mt. 24:17) with which compare ὦ εἰς τὸν ἄγρον (Mk. 13:16, ἐν in Mt. 24:18). Cf. ὁ πατὴρ ὁ ἐξ οὐρανοῦ in Lu. 11:13, though some MSS do not have the second ὥ. The correlation of adverbs belongs to the chapter on Pronouns.

VIII. Adverbs as Marks of Style. Thus ἀρτι is not found in Mark, Luke, James, Jude nor Hebrews, though fairly often in Matthew, John and Paul. Νῦν, on the other hand, is frequent throughout the N. T. as a whole. Abbott has an interesting discussion [Page 549] of καὶ νῦν in John and Luke. Νῦν is found only in Acts, Paul and Hebrews, the most literary portions of the N. T. Then again Mark has abundant use of εὗθος, but not εὕθεως, while Matthew employs both. John uses each only three times. Abbott notes that wherever Matthew uses εὗθος it is found in the parallel part

1 Ib., p. 20.
of Mark. Εὐθείως prevails in Luke (Gospel and Acts). Abbott insists on difference in idea in the two words, εὐθείως (‘immediately’), εὐθος (‘straightway’). So in Matthew τότε is exceedingly common, while in 1 Cor. Εἰσῆλθα is rather frequent, though the two words have different ideas. Then again ἑγγὺς is more common in John than all the Synoptists together. The context must often decide the exact idea of an adverb, as with ἐκαθεξέτοι οὕτως (Jo. 4:6). Cf. ὦς ἐν τῷ πλοίῳ (Mk. 4:36).

IX. The Adverb Distinguished from the Adjective.

(a) Different Meaning. The adjective and the adverb often mean radically different things. Thus in Jo. 8:29, οὐκ ἀφήκεν με μόνον, the adjective μόνον means that ‘he did not leave me alone.’ As an adverb, if the position allowed it, it would be ‘not only did he leave, but,’ etc., just the opposite. In 2 Tim. 4:11 μόνος means that Luke is alone with Paul. So in Lu. 24:18 σὺ μόνος may be contrasted with μόνον πίστεων (Lu. 8:50). The context is specially clear with πρῶτος and πρῶτον. Thus in Ac. 3:26 we have ὑμῖν πρῶτον ἀναστήσας, not ὑμῖν πρῶτος. It is not ‘you as chief,’ but ‘the thing is done first for you.’ So also Ro. 2:9 (Ἰουδαίου τε πρῶτον καὶ Ἐξυπνοι). But in 1 Jo. 4:19 note ἡμεῖς οὐκ αἰσχραίνουμεν, ὅτι αὐτός πρῶτος ἠγάπησεν ἡμᾶς. ‘God is the first one who loves.’ Cf. also ἦλθεν πρῶτος εἰς τὸ μνημεῖον (Jo. 20:4) where John is the first one to come to the tomb. In Jo. 1:41 the MSS. vary between πρῶτος and πρῶτον (W. H.). One can but wonder here if after all πρῶτος is not the correct text with the implication that John also found his brother James. The delicate implication may have been easily overlooked by a scribe. Cf. also the difference between ἐλάλει ὁ ῥόθως (Mk. 7:35) and ἐνάστηθι ἐπὶ τοὺς πόδας σου ὁ ῥόθος (Ac. 14:10). The English has a similar distinction in “feel bad” and “feel badly,” “look bad” and “look badly.” We use “well” in both senses. Cf. ἔδραος in 1 Cor. 7:37.

(b) Difference in Greek and English Idiom. But the Greek uses the adjective often where the English has the adverb. That is, the Greek prefers the personal connection of the adjective with the subject to the adverbial connection with the verb. So we have αὐτομάτη ἡ γῆ καρποφόρη (Mk. 4:28) and αὐτομάτη ἐγκόμη [Page 550] (Ac. 12:10). In Lu. 21:34 the same construction is found with ἐφονίδος ἡ ἡμέρα ἐκεῖνη. The ancient Greek idiom of the adjective rather than the locative of time appears in Ac. 28:13, δευτεραπόδι ἐλάβομεν. So ὁρθίναι (Lu. 24:22). The same use of the adjective rather than the adverb meets us in 1 Cor. 9:17, εἰ γὰρ ἔχων τοῦτο πρᾶσσον—εἰ δὲ ᾧκον, just as we see it in the ancient Greek. Cf. the Latin nolens volens. See Ro. 8:20. In μέσος the Greek has an adjective that we have to use a phrase for. Thus μέσος ὑμῶν στήκει (Jo. 1:26), ‘there stands in the midst of you.’ Cf. a very different idea in ἡμέρας μέσης (Ac. 26:13), ‘middle of the day.’

X. Adverbial Phrases.

(a) Incipient Adverbs. Some of these are practically adverbs, though they retain the case-inflection and may even have the article. Thus τὴν ὄρχην (Jo. 8:25), τὸ λοιπὸν (Ph. 3:1), τοὐναντίον (Gal. 2:7), τὸ πρῶτον (Jo. 12:16), τὸ πρῶτον (Jo. 6:62), τὸ πλέοντος (1 Cor. 14:27), τὸ καθ’ ἡμέραν (Lu. 19:47), τοῦ λοιποῦ (Eph.

2 Ib., p. 19.
6:10), etc. These expressions are not technically adverbs, though adverbial in force. Cf. also the cognate instrumental like χαρᾷ χαίρει (Jo. 3:29). So O.P. 1162, 5 (iv./A.D.).

(b) Prepositional Phrases. These adjuncts have the substantial force of adverbs. Indeed there is little practical difference in structure between ἄποιερον (2 Cor. 9:2) and ὑπερβάλλω (2 Cor. 11:5), ὑπεράνω (Eph. 4:10) and ἔως κάτω (Mk. 15:38). Since the uncial MSS. had no division between words, we have to depend on the judgment of the modern editor and on our own for the distinction between an adverb like παραχρήμα (Lu. 1:64) and an adverbial phrase like παρά τοῦτο (1 Cor. 12:15). Cf. also ἑπέκεινα (Ac. 7:43), ὑπερέκεινα (2 Cor. 10:16), καθόλου (Ac. 4:18). In Ro. 7:13 καθ’ ὑπερβολήν is used with an adjective. Other examples are κατ’ ἀδιάν (Mt. 14:13), κατὰ μόνας (Mk. 4:10), κατὰ ἐκούσιον (Phil. 14), κατ’ ἐναυτόν (Heb. 10:1), ἐκ δευτέρου (Mk. 14:72), ἐκ ψυχῆς (Col. 3:23), ἔχζ ἀρχῆς (Jo. 6:64), ὅπε ἀρχῆς (2 Th. 2:13), ἐξ κενόν (Ph. 2:16), ἐν ἀληθείᾳ (Mt. 22:16), ἐν πρώτος (1 Cor. 15:3), ἐν δικαιοσύνῃ (Ac. 17:31), ἐπὶ ἀληθείας (Lu. 22:59), καθ’ ἡμέραν (Mk. 14:49), ἐν νυκτί (1 Th. 5:2), ἐν ἐκτενείᾳ (Ac. 26:7), ἀπὸ μέρους (Ro. 11:25), ἐκ μέρους (1 Cor. 12:27). Cf. μέρος τι, 11:18), κατὰ μέρος (Heb. 9:5), ἀπὸ μᾶς (Lu. 14:18), ἐλ τὸ παντελῆς (7:25). With μέσον we have quite a list, like ἄνα μέσον (Mt. 13:25), ἐκ μέσου (Mt. 13:49), ἐν μέσῳ (Mk. 6:47), διὰ μέσου (Lu. 4:30), διὰ μέσου (Lu. 17:11), ἐλ τὸ μέσον (Lu. 5:19), ἐκ μέσον (Mk. 14:60), κατὰ μέσον (Ac. 27:27), μέσον (Ph. 2:15). In Mk. 14:30 adverb and phrase occur together, σήμερον ταύτῃ τῇ νυκτί. This is not a [Page 551] complete list by any means, but it will suffice to illustrate the point under discussion. A striking example is found in 1 Cor. 12:31, καθ’ ὑπερβολήν ὃδὸν ὑμῖν δείκνυμι, where the adverbial phrase has practically the force of an adjective with ὃδὸν. Clearly, then, many of the adverbs grew out of these prepositional phrases like παραστάτικα (2 Cor. 4:17), ἔκπαλα (2 Pet. 2:3), etc. Cf. even νουνεχῶς (Mk. 12:34).

(c) Participles. Some participles come to be used adverbially. This is not merely true of adverbs made from participles, like ὁντος (Mk. 11:32), ὁμολογουμένος (1 Tim. 3:16), ὑπερβαλλόντως (2 Cor. 11:23), but it also applies to τῷ ὠν (Ro. 7:23), τῷ νῦν Ἐχον (Ac. 24:25), τῷ γόν (1 Cor. 16:6) and verbs like ἄναγκαστος (1 Pet. 5:2). Besides, the intensive use of the participle is adverbial in effect like εὐλογήσω σε (Heb. 6:14). Then again a case like ἴσον εἰσαγίνου (Mt. 5:11) is in point. Cf. θέλων in Col. 2:18. See also προσθέσεις έπεν (Lu. 19:11) which Blass (Gr. of N. T. Gk., p. 258) compares with προσθέσεις ἔτεκεν (38:15). See chapter on Verbal Nouns.

(d) The Verb Used Adverbially. This is, of course, not true technically, but only in the result. The old Greek idiom with λανθάνω and φθάνω, where the participle expressed the chief idea and the verb was subordinate, occurs twice in the N. T. So ἔλαθον τινες ἐξεισάντες (Heb. 13:2) and προεξάσκασεν λέγων (Mt. 17:25). But it must be borne in mind that the Greek idiom is perfectly consistent in this construction, as ‘they escaped notice in entertaining,’ ‘he got the start in saying.’ Cf. λάθρᾳ elsewhere in N. T. It is not necessary in Ac. 12:16, ἐπέμενεν κρούων, to take the verb as an adverb in sense. It is simply, ‘he continued knocking.’ The infinitive may likewise present the chief idea as in προέλαβεν μυρίσαι (Mk. 14:8), προσέθετο πέμψαι (Lu.
20:11 f.), like the Heb. לִשְׁלֹחַ רַיּוֹסֶף. But in Mk. 12:4 we have the regular Greek idiom πάλιν ἀπέστειλεν. Cf. Ac. 12:3 προσέθετο συλλαβεῖν. This idiom is exceedingly common in the LXX. In Lu. 6:48, ἔσκαψεν καὶ ἐβάθυνεν (‘he dug and went deep’), we have an idiom somewhat like our English vernacular “he went and dug,” “he has gone and done it,” etc. Cf. Ro. 10:20 ἄποτολμᾷ καὶ λέγει, Mt. 18:3 ἔἀπν μὴ στραφῆτε καὶ γένησθε. But I doubt if θέλω with the infinitive is to be taken in the N. T. either adverbially or as the mere expletive for the future tense. In Jo. 7:17 θέλη πουέῖ means ‘is willing to do.’ So in Jo. 8:44, etc. The text is obscure in Col. 2:18 and [Page 552] there θέλων may have an adverbial force. Blass conceives that in Mt. 6:5, φιλόουσιν ... προσεύχεσθαι, we may translate ‘gladly pray.’ But what advantage has this over ‘love to pray,’ ‘are fond of praying’?

[Page 553] CHAPTER XIII

PREPOSITIONS (ΠΡΟΘΕΣΕΙΣ)

I. The Name. As is often the case, so here the name describes a later development, not the original, nor the essential, idea.

(a) SOME POSTPOSITIVE. Prepositions may indeed be postpositive like the Latin mecum, the Greek τούτου χάριν, τέκνων πέρι (anastrophe). In the Turkish tongue they are all postpositive. And Giles (Manual, p. 341) thinks that ὀυμάτων ἀπο is earlier than ὀπο ὀματων.

(b) NOT ORIGINALLY USED WITH VERBS. Moreover, the name implies that they properly belong with verbs (prae-verbia, προθέσεις). But we now know that the use with verbs was a much later development. There are indeed in Greek no “inseparable” prepositions, which are used only in composition with verbs. In the Attic, outside of Xenophon, οὖν was used mainly in composition. In the N. T. ἀμφι is found only with compound words like ἀμφιβάλλω, ἀμφιέννυ. In the Sanskrit most of the verbal prefixes can be traced to adverbs with cases.

(c) EXPLANATION. Hence the name must be explained. The later grammarians used the term for those adverbs which were used in composition with verbs and in connection with the cases of nouns. Both things had to be true according to this definition. But it will be seen at once that this definition is arbitrary. The use with verbs in composition was the last step, not the first, in the development. Besides, what

1 W.-Th., p. 468.
2 C. and S., Sel. from the LXX, p. 97.
1 Farrar, Gk. Synt., p. 95.
2 Monro, Hom. Gr., pp. 123, 147. Courtoz (Les Préfixes en Grec, en Lat. et en Français, 1894, p. 51) says: “Outre les dix-huit prépositions que nous venons de passer en revue, il y a encore, en grec, quelques particules inséparables, qui s’emploient comme préfixes dans les mots composés. Ces particules sont ὅ, ἀρι ou ἐρι, δύο, ἄα et νη.” But these are not the “prepositions” under discussion.
is to be said about those adverbs that are used, not with verbs, but with cases, and no longer appear as mere adverbs? Take ἄνευ, for instance, with the ablative. It is not found in composition with verbs nor by itself [Page 554] apart from a noun. It is, of course, a preposition. The grammars call it an “improper” or adverbial preposition. It is only “improper” from the standpoint of the definition, not from that of the Greek language. The truth seems to be that by preposition one must mean a word used with cases of nouns and many of which came to be used in composition with verbs. The facts do not square with the other definition.

II. The Origin of Prepositions.

(a) ORIGINALLY ADVERBS. This is now so well recognised that it seems strange to read in Winer¹ that “prepositions e.g. often assume the nature of adverbs, and vice versa,” even though he adds “that the prepositions are adverbs originally.” Giles² puts the matter simply and clearly when he says: “Between adverbs and prepositions no distinct line can be drawn.” Thus even in Homer ὄνει, περί, etc., appear still as adverbs.³ Delbrück⁴ goes a bit further and says that originally the prepositions were place-adverbs. Brugmann⁵ qualifies that to “mostly,” and he adds that we cannot draw a sharp line between the use as adverb and the use as pre-verb or preposition.⁶

(b) REASON FOR USE OF PREPOSITIONS. “The preposition is, therefore, only an adverb specialized to define a case-usage.”⁷ This definition gives the reason also. The case alone was enough at first to express the relation between words, but, as language developed, the burden on the cases grew heavier. The analytic tendency in language is responsible for the growth of prepositions.⁸ The prepositions come in to help out the meaning of the case in a given context. The notion, therefore, that prepositions “govern” cases must be discarded definitely. Farrar⁹ clearly perceived this point. “It is the case which indicates the meaning of the preposition, and not the preposition which gives the meaning to the case.” This conception explains the use and the non-use of a preposition like ἐν, for instance, with the locative, ἐπί or παρά with the ablative, etc. In the Sanskrit the prepositions do not exist as a separate class of words, though a good many adverbs are coming to be used with the oblique cases (except the dative) to make clearer the case-idea.¹⁰

[Page 555] (c) VARYING HISTORY. The adverbs that come to be used with the cases vary greatly in their history. Some cease to be used as adverbs, as συν, for instance. Others continue (besides the use with cases and with verbs) to be employed occasionally as adverbs (ἅνα ἐξ, Rev. 21:21; κατα ἐξ, Mk. 14:19; ὑπερ ἐγὼ, 2 Cor.

1 W.-Th., p. 356.
2 Man., etc., p. 341.

9 Ib.
11:23). Some are used both with nouns, and in composition with verbs, like ἐν, περί and the other seventeen “proper” classical prepositions. ἀμφί occurs only in composition. Others are not used in composition with verbs, but are no longer mere adverbs like ἄνω. Others are employed both as adverb and with cases of nouns, like ἄνα, ἔξω, etc. Some occur both as preposition and conjunction, like ἄχρι, μέχρι, ἐκς, πλήν. Some figure as substantive, adverb and preposition with case, like χάριν.

III. Growth in the Use of Prepositions.

(a) Once No Prepositions. As already noted, in the Sanskrit there is no separate class of prepositions, though a number of adverbs are already coming to be used as prepositions, and verbs have some prefixes. Some adverbs in Greek are occasionally used with cases, like ἀξίως and the genitive, but are not prepositions. Here we see the use of prepositions started, tentatively at any rate. We may suppose a time further back in the history of the Indo-Germanic tongues when no adverbs were used with cases, when the cases stood all alone.

(b) The Prepositions Still Used as Adverbs in Homer. Not only do the “adverbial” prepositions have their usual freedom, but a considerable number of adverbs are found in composition with verbs. Homer marks a distinct advance over the Sanskrit in the increase of prepositions. There is in Homer a real class of prepositions. But in Homer the limitation of the preposition to cases of nouns and composition with verbs is far from being established. ἀμφί, ἐν, etc., may be simply adverbs, ‘on both sides,’ ‘inside.’ So common is the separation of the preposition from the verb that the term tmesis is used for it, but no strict line can be drawn between this usage and the ordinary adverb.

(c) Decreasing Use as Adverbs After Homer. It is not common thereafter for the eighteen classical prepositions, those used in composition with verbs as well as with cases of nouns, to occur separately as adverbs. It is not common, but still possible. This list comprises ἀμφί, ὀνά, ὄντι, ἁπάς, διά, εἰς, ἐξ, ἐν, ἐπί, κατά, μετά, παρά, περί, πρό, πρός, σύν, ὑπέρ, ὑπό. Now these words were used with steady increase so that one of the marks of later Greek is the abundance of compound verbs as well as the more extensive use of these prepositions with the various cases. Not only is this true, but continually new adverbs joined the already large list of adverbial prepositions employed with cases. In a word, as Blass remarks, the use of a preposition with nouns was “a practice which in the course of the history of the language became more and more adopted in opposition to the employment of the simple case.” The Emperor Augustus was noted for his excessive use of prepositions in his effort to speak more clearly (quod quo facilius exprimeret, Suetonius). Other Latin writers show the same tendency.

(d) Semitic Influence in N. T. The N. T. writers were once supposed to make such free use of prepositions because of the Hebrew and Aramaic. But the N. T. does

---

1 Monro, Hom. Gr., p. 123.
2 Ib., p. 124.
1 Gr. of N. T. Gk., p. 121.
not make abundant use of all the prepositions. Ἀμφί has dropped out entirely save in composition, and ἄνα is nearly confined to the distributive use and ἄνα μέσον, a sort of compound preposition. It occurs only 12 times, omitting the adverbial use in Rev. 21:21. Ἀντί appears 22 times, but as Moulton explains, five of these are due to ἄνθ ὄν. But ἄπο is very abundant in the N. T., as are διὰ, εἰς, ἐκ, ἐπί, κατά, μετά, πρός. But παρά, περί, πρό, σύν, ὑπέρ, ὑπό are, like ἄνα, already going the way of Ἀμφί.

Krebs has made a careful study of the prepositions in Polybius, as Helbing has done for Herodotus and Johannessohn for the LXX. They show the same general tendency towards the increased use of some prepositions to the disuse of others. For the N. T., Moulton has made a careful calculation which is worth reproducing. Ἐν and εἰς far outnumber any of the other prepositions in the N. T. And Ἐν leads εἰς by a good margin. Moulton takes Ἐν as unity and finds the other N. T. prepositions ranging as follows: ἄνα .0045, ἄντι .008, ἄπο .24, διὰ .24, εἰς .64, ἐκ .34, ἐπί .32, κατά .17, μετά .17, παρά .07, περί .12, πρό .018, πρός .25, σύν .048, ὑπέρ .054, ὑπό .08. The three commonest prepositions in Herodotus are εἰς, Ἐν and Ἐπί, in this order. In Thucydides and Xenophon the order is Ἐν, [Page 557] εἰς and Ἐπί. But Xenophon varies the order of frequency in his various books. In Polybius the three chief prepositions are κατά, πρός, εἰς; in Diodorus εἰς, κατά, πρός; in Dionysius Ἐν, Ἐπί, εἰς; in Josephus (War) πρός, εἰς, κατά; (Ant.) εἰς, Ἐπί, πρός; in Plutarch Ἐν, πρός, εἰς; in Dio Cassius Ἐν, εἰς, Ἐπί. In the N. T. the three main ones, as seen above, are Ἐν, εἰς, Ἐκ, though Ἐπί is not far behind Ἐκ. In the literary κοινή it will be seen that the use of εἰς

10 See Helbing, Präp. bei Herod., p. 8 f., for the facts here used.
is nearly double that of ἐν, whereas in the N. T. εἰς is ahead of ἐν only in Mark and Hebrews.¹ In the vernacular κοινή, ἐν makes a rather better showing. The large increase of the adverbial prepositions in the N. T., as in the κοινή, calls for special treatment a little later. It may be here remarked that they number 42, counting varying forms of the same word like διπλωθεν, ὑπέσθιο.

(c) In Modern Greek. The varying history of the eighteen prepositions goes still further.² Thus ἀντί(ζ) survives in the vernacular as well as ὀπί (Ἀπέ), διά (γιά), εἰς (Ἐς, σέ, ζ), μετά (μέ), κατά (κά) and ὡς. Cf. Thumb, *Handb.*, pp. 100 ff. The bulk of the old prepositions drop out in the mediæval period. Their place is supplied largely by the later prepositional adverbs, as ἄνω by ἅνω, ἐξ by ἐξω, but partly also by a wider use of the remaining prepositions, as εἰς for ἐν and πρὸς, μέ for σύν. Then again all prepositions in the modern Greek use the accusative case as do other adverbs, and sometimes even with the nominative (γιὰ σοφός, ‘as a sage’).

In a sense then the Greek prepositions mark a cycle. They show the return of the accusative to its original frequency. They have lost the fine distinctions that the old Greek prepositions once possessed when they were used to help out the ideas of the cases. They drop out before the rise of other prepositions which more clearly exhibit the adverbial side of the preposition. The so-called improper prepositions are more sharply defined in modern Greek (Thumb, *Handb.*, pp. 107 ff.). But in the N. T. the prepositions have not gone so far in their history.

IV. Prepositions in Composition with Verbs.

(a) Not the Main Function. As has already been shown, this was not the original use of what we call prepositions, though this usage has given the name to this group of words. Besides it debars one technically from calling those numerous

---

1 Moulton, Prol., p. 62.

 Thumb

———, Die griech. Sprache im Zeitalter des Hellenismus (1901).

adverbs prepositions which are used with cases, but not used in composition with verbs. But no “inseparable” prepositions were developed [Page 558] in Greek, apart from the similar use of ἄφι of already mentioned. In most dialects ἄφι was obsolete (Buck, Gk. Dialects, p. 102). In modern Greek ᾄνα–, παρά– and ἕκ– (ξε) are used chiefly in composition (Thumb, Handb., p. 99), but ὀχ occurs with accusative.

(b) PREPOSITION ALONE. Sometimes indeed the preposition is used alone (ellipsis) and the verb has to be supplied, as in οὐκ ἐν (Gal. 3:28) for οὐκ ἔνεστι. So ὑπὲρ ἔγινο in 2 Cor. 11:23. Cf. ἀλλα ὄνα (“but up!”) in Homer. This ellipsis does not differ greatly from the common use of tmesis in Homer, where the preposition is regarded more as an adverb.

(c) INCREASING USE. The use of prepositions in composition increased with the history of the Greek language. One characteristic of the later Greek is the number of compound verbs employed. This is a matter partly of impression and will remain so till one “χαλκέντερος grammarian” arrives “who will toil right through the papyri and the κοινή literature.” No one is anxious for that task, but Krebs is able to say that verbs compounded with prepositions play a noteworthy rôle in the later Greek. This is not simply true of new compounds like ἐν-κακέω, etc., but “there is a growing tendency to use the compounds, especially those with διά, κατά and σύν, to express what in the oldest Greek could be sufficiently indicated by the simplex.” The N. T. does not indeed show as lavish a use of compound verbs as does Polybius, the chief representative of the literary κοινή of his time. But these διπλά belonged to the language of the people in Aristotle’s time and the papyri show a common use of compound verbs. As compared with Polybius the N. T. makes less use of certain verbs, but the matter varies with different verbs and different writers.

(d) REPETITION AFTER VERB. Sometimes the preposition is repeated after the verb, as in the older Greek. The prepositions most frequently repeated are ἀπό, εἰς, ἐν, ἐπί. This is partly because these prepositions are so common in the N. T. and partly because they emphasize the local notions of ‘from,’ ‘in,’ or ‘upon,’ and ‘to’ or ‘into.’ Perhaps also the preposition in composition is a bit worn down. The

5 Moulton, Prol., p. 115.
6 Blass, Gr. of N. T. Gk., p. 70.
7 Mayser, Gr. d. griech. Pap., pp. 486 ff. Kuhring (de praepositionum Graecarum in chartis Aegyptiis usu quaeestiones selectae, 1906) and Rossberg (de praep. Graec. in chartis Aegypt. Ptol. aetatis usu, 1909) have both attacked the problems in the pap., as Geyer (Observationes epigraphicae de praep. Graec. forma et usu, 1880) has done for the inscr.
8 Moulton, Prol., p. 116 f. The great work on prepositions is Tycho Mommsen’s Beitr. zu der Lehre von den grieich. Präp., 1895.
papyri and inscriptions show the same repetition of the preposition, though hardly so frequently, if one may judge by his impressions. See ἔπιλθεν ἐπὶ αὐτοῦ (Mk. 1:42). With ἀπὸ indeed Winer¹ finds that for the most part the preposition is repeated in the N. T. Thus we notice also ἄπαρθῃ ἐπὶ αὐτῶν (Mt. 9:15), ἄφαρεται ἐπὶ ἐμοῦ (Lu. 16:3, but not so in 10:42), ἀπηλλαγθαί ἐπὶ αὐτοῦ (Lu. 12:58), ἀπεδήνετε ἀπὸ τῶν στοιχείων (Col. 2:20), ἐπὶ αὐτῶν ἀποβάντες (Lu. 5:2), ἀπέπεσαν ἀπὸ τῶν ὑφοθάλμων (Ac. 9:18), ἀποφανασιθέντες ἄφι ὑμῖν (1 Th. 2:17), ἀφορίσεται ἐπὶ ἀλλήλων (Mt. 25:32), ἀπεσπάσθη ἐπὶ αὐτῶν (Lu. 22:41), ἀποστρέψει ἀπὸ Ἰακώβ (Ro. 11:26), ἀποχορεῖτε ἐπὶ ἐμοῦ (Mt. 7:23), ἀπόστητε ἐπὶ ἐμοῦ (Lu. 13:27, but not 2:37).

Likewise ἐκ may be repeated as with ἐκβάλλει ἐκ τοῦ θησαυροῦ (Mt. 13:52), ἐκ σοῦ ἐξελέιται (Mt. 2:6), ἐξαρωφύνες ἐκ τοῦ λαοῦ (Ac. 26:17), ἐξελεξάμην ἐκ τοῦ κόσμου (Jo. 15:19), ἐκ τῆς κατὰ φύσιν ἐξεκόπης (Ro. 11:24), ἐξέπεσαν ἐκ τῶν χειρῶν (Ac. 12:7), ἐκπορευόμενον ἐκ τοῦ στόματος (Mt. 15:11), ἐκφυγὸν ἐκ τοῦ οἴκου (Ac. 19:16).

Verbs compounded with ἐς “uniformly repeat ἐς” (Winer-Thayer, p. 430). So, for instance, ἐσήγαγον (Lu. 22:54), ἐσιέναι (Ac. 3:3), ἐσῆλθεν (Mt. 2:21), ἐσπορεύονται (Mk. 1:21), ἐσφέρει (Ac. 17:20), but see Ac. 28:30 (ἐσ—πρός).

With ἐν we observe the repetition in some verbs appears, though often ἐς occurs instead both where motion is implied and where the idea is simply that of rest (pregnant construction). As is well known, ἐν and ἐς are really the same word. Hence the rigid distinction between the two prepositions cannot be insisted on. There are two extremes about ἐς and ἐν, one to blend them entirely because of alleged Hebraism, the other to insist on complete distinction always. As a rule they are distinct, but ἐς frequently encroached on ἐν where one has to admit the practical identity, like ἐς ὀικὸν ἐστιν (Mk. 2:1, marg. in W. H.), ὅ ὡς ἐς τὸν κόλπον τοῦ πατρὸς (Jo. 1:18), etc. For the frequent LXX examples see Conybeare and Stock, p. 81. Still, for the sake of uniformity, only examples of ἐν are here given, like ἐμβάλας ἐν τῷ τρυβλίῳ (Mt. 26:23), ἐμβιβάσατο ἐν ἐκατῷ (Jo. 11:38), ἐνεγκαμμένη ἐν τοῖς καρδιάς (2 Cor. 3:2), ἐνδημοῦντες ἐν τῷ σώματι (2 Cor. 5:6), ἐνεργήν ἐν ὑμῖν (Ph. 2:13), ἐνέμειναν ἐν τῇ διαθήκῃ (Heb. 8:9), ἐνοικεῖτο ἐν ὑμῖν (Col. 3:16), ἐνυφώντες ἐν ταῖς ἀπάταις (2 Pet. 2:13).

A number of verbs have ἐπὶ repeated, such as ἐπιβεβηκὼς ἐπὶ with accusative (Mt. 21:5), ἐπιβάλλει ἐπὶ with accusative (Lu. 5:36), ἐπηρεὼν ἐπὶ ἐμὲ (Jo. 13:18), ἐφαλόμενος ἐπὶ αὐτοῖς (Ac. 19:16), ἐπελεύσεται ἐπὶ σὲ (Lu. 1:35), ἐπὶ ἐπὶ ταῖς κτλ. (Ac. 4:29), ἐπέκειτο ἐπὶ αὐτῷ (Jo. 11:38), ἐπέβλεψεν ἐπὶ τὴν κτλ. (Lu. 1:48), ἐπέπεσεν ἐπὶ αὐτόν (Lu. 1:12), ἐπὶ οὐδεὶς αὐτῶν ἐπιπεπτοκός (Ac. 8:16), ἐπιρίψαντες ἐπὶ αὐτόν (1 Pet. 5:7), ἐπιτιθέασαν ἐπὶ τοὺς κτλ. (Mt. 23:4), ἐπικοδομεῖ ἐπὶ τὸν κτλ. (1 Cor. 3:12), ἐπικοδομηθέντες ἐπὶ τῷ κτλ. (Eph. 2:20).

¹ W.-Th., p. 427.
As to διὰ not many verbs have it repeated, but note διαπερεύομαι αὐτὸν διὰ σπορίσων (Lu. 6:1), διεσώθησαν διὰ ὕδατος (1 Pet. 3:20), διήρχεται διὰ ἀνυδρον (Mt. 12:43), διήρχετο διὰ μέσον (Lu. 17:11).

A similar rarity as to repetition exists in the case of κατά, but we note κατηγορεῖτε κατὰ αὐτοῦ (Lu. 23:14), κατακαυχόμεθα κατὰ τῆς ἄλλης (Jas. 3:14).

Very seldom is παρὰ repeated as in παρελάβετε παρὰ ἡμῶν (1 Th. 4:1, cf. 1 Th. 2:13; 2 Th. 3:6).

Περί is repeated with more verbs than παρὰ. Thus περιαστράψαι περὶ ἐμὲ (Ac. 22:6), περιεφυγέται περὶ τὰ κτλ. (Rev. 15:6), περικείται περὶ τὸν κτλ. (Lu. 17:2), περιεπέτα περὶ πολλὴν (Lu. 10:40).

Πρό, like μετά, shows no example of repetition in the critical text, though some MSS. read προπορεύομαι πρὸ προσώποι (for ἐνώπιον) in Lu. 1:76.

As examples of πρὸς repeated take προσκολληθήσεται πρὸς τὴν κτλ. (Eph. 5:31), προσεπεσεν πρὸς τοὺς κτλ. (Mk. 7:25), προσετέθη πρὸς τοὺς κτλ. (Ac. 13:36). It is seldom repeated.

As a lonely example of σὺν repeated see συνεξωποίησεν σὺν αὐτῷ (Col. 2:13).

We have no example of ὑπό repeated and but one of ὑπὲρ in some MSS. (not the critical text) for Ro. 8:26 (ὑπὲρνυστηρέας—ὑπὲρ ἡμῶν).

(e) DIFFERENT PREPOSITION AFTER VERB. Once more, a different preposition may be used other than the one in composition. This is, of course, true where the meaning differs radically, as in συνακολουθοῦσαι ὑπὸ (Lu. 23:49), but even when the prepositions do not differ very greatly. Thus εἰς frequently follows compounds of ἐν, as ἐμβάνῃ εἰς πλοῦν (Mt. 8:23), ἐμβαλέν εἰς τὴν γέενναν (Lu. 12:5), ἐμβαπτόμενος εἰς τὸ κτλ. (Mk. 14:20), ἐμβλέψατε εἰς τὰ κτλ. [Page 561] (Mt. 6:26), ἐμπεσόντος εἰς τοὺς κτλ. (Lu. 10:36), ἐνύπτασαν εἰς τὸ κτλ. (Mt. 26:67), ἐνεκεντρίσθης εἰς καλλέλαιον (Ro. 11:24). There is little cause for comment here.

In general the varying of the preposition is pertinent and is to be noted. So, for instance, ὑπὸ, ἐκ, παρά. Here παρά calls attention to the fact that one is beside the place or person whence he starts; ὑπὸ merely notes the point of departure, while ἐκ distinctly asserts that one had been within the place or circle before departing. Cf. therefore Mt. 3:16 ἀνέβη ὑπὸ τοῦ ὑδάτος and Mk. 1:10 ἀναβαίνων ἐκ τοῦ ὑδάτος. Thus ὑπὸ follows παραβίαιν in Ac. 1:25, παραλαμβάνω in 1 Cor. 11:23, παραφέρω in Mk. 14:36, and παρέρχομαι in Mt. 5:18. Verbs compounded with ἐκ (besides ἐκ) may have ὑπὸ as ἐκκλίνω in 1 Pet. 3:11, or παρὰ as ἐξέρχομαι in Lu. 2:1, while ἐκπορεύομαι shows either ἐκ (Mt. 15:18), ὑπὸ (Mt. 20:29) or παρὰ (Jo. 15:26). So compounds of κατά use either ὑπὸ as καταβαίνω (Lu. 9:54) or ἐκ as ἐκβάλω (Jo. 6:41). See further discussion under separate prepositions.
Compsounds of ἀνά likewise are followed by eἰς as with ἀναβαίνω (Mt. 5:1), ἀνάγω (Lu. 2:22), ἀναβλέπω (Lu. 9:16), ἀναλαμβάνομαι (Mk. 16:19), ἀναπίπτω (Lu. 14:10), ἀναφέρω (Lu. 24:51), ἀνέργομαι (Gal. 1:18); or by ἐπί as ἀναβαίνο (Lu. 5:19), ἀναβιβάζω (Mt. 13:48), ἀνακάμπτω (Lu. 10:6), ἀνακλίνομαι (Mt. 14:19), ἀναπίπτω with accusative (Mt. 15:35) or genitive (Mk. 8:6), ἀναφέρω (1 Pet. 2:24); or by πρός as ἀναβαίνω (Jo. 20:17), ἀνακάμπτω (Mt. 2:12), ἀναπέμπω (Lu. 23:7). As a rule πρός refers to personal relations while eἰς and ἐπί differ in that ἐπί more distinctly marks the terminus. But the line cannot be drawn hard and fast between these prepositions, because ἐπί and πρός show a variation. Thus verbs compounded with ἐπί may be followed by eἰς as in ἐπιβάλλω (Mk. 4:37), ἐπιβαίνω (Ac. 20:18), ἐπάτροφος (Lu. 18:13), ἐφικνέομαι (2 Cor. 10:14). ἐπιγράφω is even followed by ἐν in Ac. 17:23. On the other hand, πρός may be followed by ἐπί as in προστίθημι (Mt. 6:27) or ἐν as in προσεμένω (1 Tim. 1:3). And even ἐλέειμαι has πρός in Ac. 21:18 and ἐίσορφος has ἐπί (Lu. 12:11). Ἐπά in composition may be followed by eἰς as in ἐπιβαίνω (Ac. 16:9), πρός (Lu. 16:26) or ἀνά (1 Cor. 6:5), etc.

Comports with μετά usually have eἰς, like μεταβαίνω (Lu. 10:7 both ἐκ and eἰς), μεταλλάσσω (Ro. 1:26), μετανοεῖν (Mt. 12:41), μεταπέμπομαι (Ac. 10:22), μεταστρέφω (Ac. 2:20), μετασχηματίζω (1 Cor. 4:6), μετατίθημι (Ac. 7:16), μετατρέπω (Jas. 4:9), μετοικίζω (Ac. 7:4). But μεταθάλασσω (Ro. 1:25) and μεταλλάσσω (Ro. 1:25) have ἐν. [Page 562]

Περιάγω is followed by ἐν in Mt. 4:23. As to πρός in Lu. 1:17 we have προελεύσεται followed by ἐνώπιον.

Verbs compounded with σὺν may have μετά (cf. the displacing of σύν by μετά in modern Greek) as in συναίρω (Mt. 25:19) συνάλλαγμα (Mt. 17:3), συμπέμπω (2 Cor. 8:18), συμφωνῶ (Mt. 20:2) and even συναγωγήσῃ μετά τῶν ἐνδέκα ἁπαστόλων (Ac. 1:26). But note συνάγω eἰς (Mt. 3:12), ἐπί (27:27) and πρός (Mk. 7:1), ἐπί (1 Cor. 11:20) and eἰς (11:33 f.).

For ὑπερβάλλων παρά see Ro. 12:3. Cf. ὑπερβάλλω ἐπί in 2 Cor. 9:14 and ὑπεράρχω τε ἐπί in 2 Th. 2:4.

With ὑπό we find a number of prepositions especially with ὑπάγω, as μετά (Mt. 5:41), eἰς (9:6), ἁπά (13:44), πρός (Jo. 13:3), ἐν (Jas. 2:16), with which compare ὑπίστω (Mt. 16:23) and μεταξῶ (18:15). Cf. also ὑποστρέφω with eἰς (Lu. 1:56) and ἐπί (Ac. 8:28). Delicate shades of meaning will be found in all these prepositions without undue refinement. See Conybeare and Stock, p. 88, for different prepositions with verbs in the LXX.

(f) SECOND PREPOSITION NOT NECESSARY. But it is not always necessary for any preposition to follow the compound verb. Often the preposition with the verb may be followed by the case that is usual with the preposition without much regard to the verb itself. That is to say, the preposition in composition may be tantamount in result to the simple verb followed by that preposition. This is not always true, but it sometimes happens so. It is not necessary to give an exhaustive list. As examples we may note the following: Ἐπιπίπτειν ἀφυπνά (Mk. 3:10) with the dative may be
compared with τῆς χάριτος ἔξεπέσατε (Gal. 5:4) with the ablative. Here the two prepositions and the cases correspond exactly. The instrumental case is illustrated by συνχάρητε μοι (Lu. 15:6). Cf. also the ablative in Lu. 10:42 with ἄφαρεθήσεται. As an example of the locative take ἐξακολούθησαν τῇ πίστει (Ac. 14:22). An example of the ablative in Lu. 10:42 with ἀφαιρεθήσεται. As another example of the genitive is seen in σου καταρτύσιν (Mt. 26:62). Cf. also Mt. 16:18 and of the accusative in τῆν ἁλυσιν ταύτην περίκεισαι (Ac. 28:20) where a change of standpoint takes place, since the chain is around Paul. Cf. Heb. 12:1. In a case like διεπορεύοντο τὰς πόλεις (Ac. 16:4) one may either regard the accusative as loosely associated with the preposition (cf. διὰ µέσον in Lu. 17:11) or consider that the preposition has made an intransitive verb transitive (see next point). See ch. XI for further exx.

(g) **Effect of Preposition on Meaning of the Verb.** Sometimes there is no effect at all. The preposition is merely local as in ἔξερχοµαι, ‘go out.’ The preposition may be “perfective” and merely intensify the meaning of the verb, as in καταστίω (‘eat up’), καταδιώκω (‘hunt down’). The preposition is sometimes weakened in idea as in ἄποδέχοµαι, ἄποκρίνοµαι. Prepositions in composition sometimes change the meaning of the verb and blend with it. A resultant meaning arises with a new construction. The use of διὰ alluded to above may be a case in point. Thus take διαβάίνω with accusative (Heb. 11:29), διέρχοµαι (Lu. 19:1). The use of διαπλέω with the accusative in Ac. 27:5 is probably the result of the preposition in composition. See also προάξω ὑµᾶς in sense of ‘go before’ (Mt. 26:32). Cf. further ἄποδεκατοῦν, μεταδίδωµι, συγκλείειν. These examples will suffice, though they could be multiplied easily.

(h) **Dropping the Preposition with Second Verb.** Winer1 denies that we have in the N. T. an instance of the old Greek idiom of using the preposition with the first verb and dropping it with the repeated verb though really retained in sense. But Moulton2 seems to show that the N. T. does offer some examples of this construction, like the κατηγον, ἢγον, ἢγον, of Euripides’ Bacchides, 1065 (English ‘pulled down, down, down,’ Moulton). He cites παρέλαβον, ἔλαβον (Jo. 1:11 f.); προεγράφη, ἔγραφη (Ro. 15:4); ἐξηράνησαν, ἐραυνῶντες (1 Pet. 1:10 f.); ἐπενδύσασθαι, ἐνδυσάµενοι (2 Cor. 5:3); ἀντιστῆναι, στῆναι (Eph. 6:13); κατέφαγον, ἔφαγον (Rev. 10:10). These are certainly possible illustrations, though I have doubts about 2 Cor. 5:3 and Eph. 6:13. In Eph. 6:13 especially στῆναι is stronger alone than with ἄντι. I do not agree that in 1 Cor. 12:2 we have an illustration in ἢγεσθε ἄπαγόµενοι.

(i) **Intensive or Perfective.** There is still another very common use of the preposition in composition. It is that of a mere adverb and intensifies or completes the idea of the verb. Sometimes the frequent use of the compound form tends to obscure this adverbial idea. Thus in ἄποκρίνοµαι the force of ἄπο has largely faded and in ἄποθνήσκω it is quite obscure. Doubtless ‘die off’ was the original idea for the one, as ‘answer back’ for the other. The appeal to the original usage will explain the force of the preposition. But in most instances the idea is very clear, as in συνκαλεῖ τούς φίλους (Lu. 15:6), ‘calls his friends together.’ This common function of the preposition in all the Indo-Germanic tongues was probably the original use with

---

1 W.-Th., p. 433.  
2 Prol., p. 115.  
3 Ib.
verbs. At any rate it is common enough in English, though we usually separate verb and preposition. We say “up-set” as well as “set up,” but they [Page 564] mean different things. We all see the adverbial force in “come home,” “come back,” “come away,” etc., but it is the adverb just as truly in “fore-close,” “pre-clude,” etc. Indeed, prepositions when compounded are etymologically pure adverbs. The English may be compared with the Homeric Greek in the separateness of the adverb from the verb.1 In German the compound use of the preposition is very extensive, but later Greek and Latin illustrate it abundantly.2 The German prepositions are either inseparable or detachable. As applied to the meaning of the verb the term “perfective” is used for the force of the preposition, but it is not a very happy designation, since one is at once reminded of the perfect tense with which it has nothing to do.3 Moulton gives a number of luminous examples such as θνῄσκω ‘to be dying,’ ἀποθάνειν ‘to die (off)’; φεύγειν ‘to flee,’ διαφυγεῖν ‘to escape (flee clean through)’; διώκω ‘to pursue,’ καταδιώκω ‘to hunt down’; τηρεῖν ‘to watch,’ συντηρεῖν ‘to keep safe’; ἔργαζομαι ‘to work,’ κατεργάζομαι ‘to work out (down to the end),’ etc. The preposition in this “perfective” sense does have a bearing on the present and aorist tenses of any given verb, but that phase of the matter belongs to the discussion of the tenses. Indeed, not all of the N. T. verbs by any means show examples of this “perfective” use of the preposition. Moulton4 notes this absence, as compared with Polybius, in the case of ἄρχομαι, θεάομαι, θεωρέω, λογίζομαι, κινδυνεύω, μέλλω, ὁργίζομαι, πράσσω. He finds that the papyri support this “perfective” use of the preposition as between simplex and compound. N. T. illustrations are interesting. Thus σπάομαι (Mk. 14:47) is used of Peter’s drawing his sword (note voice), but διασπάζῃ (Ac. 23:10) expresses the fear that Paul may be drawn in two. So ἐργάζομαι is a common verb for doing work (as Mk. 14:6), but κατεργάζομαι accents the carrying of the work through as in Ph. 2:12, and in verse 13 ἐνεργεῖν is used for the idea of in-working as contrasted with the out-working or development taught by κατεργάζομαι. Cf. also μηδὲν ἔργαζόμενος ἀλλὰ περιεργάζόμενος (2 Th. 3:11) where the whole idea turns on peri, ‘doing nothing but doing about’ is a free rendering. The same distinction is seen between ἐσθίον ‘to eat’ (Mt. 15:2) and κατεσθίω ‘to eat up (down)’ in Lu. 20:47. Cf. also ἔφαγον (Mt. 6:25) and κατέφαγον (Mt. 13:4). As one further illustration note ἀρτί γενώσιμον ἐκ μέρους (1 Cor. 13:12) and τότε δὲ ἐπιγνώσθη καθὼς καὶ ἐπεγνώσθην (ib.). In general, on the whole subject of prepositions in composition see Delbrück, Vergleichende [Page 565] Syntax, I, pp. 660 ff. Cf. also Brugmann, Griech. Gr., p. 431 f. See also ch. XVIII for further remarks.

(j) DOUBLE COMPOUNDS. It is always interesting to note the significance of both prepositions. As noted in chapter V, Word Formation, IV, (e), these double compounds are frequent in the κοινῆ and so in the N. T. The point to emphasize here is that each preposition as a rule adds something to the picture. There are pictures in prepositions if one has eyes to see them. For instance, note ὄντι-παρ-γολόθεν (Lu. 10:31 f.), συν-αντι-λάβηται (10:40. Cf. Ro. 8:26. First known in LXX, but now found in papyrius and inscriptions third century B.C. Cf. Deissmann, Light., p. 83), ὑπερ-εν-

1 Moulton, Prol., p. 112.
2 Riem. and Goelzer, Synt., p. 815.
3 Moulton, Prol., p. 111.
V. Repetition and Variation of Prepositions. A few words are needed in general on this subject before we take up the prepositions in detail.

(a) Same Preposition with Different Cases. Sometimes the same preposition is used with different cases and so with a different resultant idea. Take διά, for instance. In 1 Cor. 11:9 we have οὖκ ἐκτίσθη ἄνηρ διά τὴν γυναίκα, while in verse 12 we read ἄνηρ διὰ τῆς γυναικὸς. In Heb. 2:16 the whole point turns on the difference in case, διὰ δὲν τὰ πάντα καὶ διὰ οὖ τὰ πάντα. In Heb. 11:29 the verb with διὰ in composition has the accusative while διά alone has the genitive, διέβησαν τὴν Ἑρωδίαν Ὑπάλλασσαν ὡς διὰ ἔξοδος γης. Cf. διὰ μέσου (Lu. 4:30) and διὰ μέσον (Lu. 17:11). But the resultant idea is here the same. Ἐπί is a pertinent illustration. In Rev. 5:1 we find Ἐπὶ τὴν δεξίαν and Ἐπὶ τοῦ θρόνου, while in Rev. 11:10 observe Ἐπὶ τῆς γῆς and Ἐπὶ αὐτοῖς. Cf. also Rev. 14:6. So again in Mt. 19:28 note Ἐπὶ θρόνου and Ἐπὶ θρόνους and in Mt. 24:2 Ἐπὶ λίθων, but λίθος Ἐπὶ λίθῳ in Lu. 21:6. Cf. Ἐπὶ τοῦ and Ἐπὶ τῆν in Rev. 14:9. So Ἐπιτίκος Ἐπί with dative in 1 Tim. 4:10 and accusative in 5:5. This is all in harmony with the ancient Greek idiom.

For an interesting comparison between the Synoptic and the Johannine use of prepositions and the varying cases see Abbott, Johannine Vocabulary; pp. 357–361. The variation is especially noticeable in διά, Ἐπί and παρά. The LXX shows abundant use of the preposition after verbs. Cf. Conybeare and Stock, Selections from the LXX, p. 87 f., and Johannessen, Der Gebrauch etc. In some stereotyped formulae one notes even in modern Greek ἀνά καρδίας, μετα βίας, κατα διαβόλου (Thumb, Handb., pp. 103 ff.).

Page 566 (b) Repetition with Several Nouns. When several nouns are used with the same preposition the preposition is repeated rather more frequently than in the earlier Greek. Winer thinks that the repetition occurs only when the two or more substantives do not come easily under the same category. Within limits this is true (cf. repetition of the article), but there is rather more freedom in the later Greek on this point. In Jo. 4:23 we do have a similar idea in the phrase ἐν πνεύματι καὶ ἀληθείᾳ as in ἄνδρον φόβου καὶ προσδοκίας in Lu. 21:26. Cf. also ἐν Λύστροις καὶ Ικανω (Ac. 16:2), but in verse 1 observe καὶ εἰς Δέρβην καὶ εἰς Λύστραν, where perhaps the double conjunction plays some part. Indeed with καὶ—καὶ or τε—καὶ the preposition is commonly repeated. Thus καὶ ἐν ὄλγῳ καὶ ἐν μεγάλῳ (Ac. 26:29), ἐν τε τοῖς δεσμοῖς μου καὶ ἐν τῇ ἅπασε (Ph. 1:7). With disjunctive conjunctions the repetition is usual also, as ἄπο δικαιῶν ἢ ἄπο τριβόλων (Mt. 7:16). With antithesis the repetition is the rule, as μὴ ἐν σοφίᾳ ἄλλο ἐν δυνάμει (1 Cor. 2:5. Cf. also verse 4). But one cannot properly insist on any ironclad rule when he considers a case like ἄπο Μουσσάρως καὶ ἄπο πάντων τῶν προφητῶν (Lu. 24:27), πρὸς Σίμωνα Πέτρου καὶ πρὸς τῶν ἄλλων (Jo. 20:2), ἐν δυνάμει καὶ ἐν πνεύματι ἄγιῳ καὶ ἐν πληροφορίᾳ (1 Th. 1:5). In a comparison again the preposition is repeated, as Ἐπὶ αὐτοῦς—ἀμφὶ καὶ ἐφ

1 Simcox, Lang. of the N. T., p. 158.
2 W.-Th., p. 420.
κρίσεως (Ac. 11:15). But even with disjunctive conjunctions the preposition is not always repeated, as ἐν δυνῃ Ἱ τρισίν (Heb. 10:28). In Ac. 26:18 ἄνω is not repeated, though εἰς occurs in one member of the sentence and ἐπί in the other. In Jo. 16:8 περί is repeated for rhetorical reasons, περὶ ἰμαρτίας καὶ περὶ δικαιοσύνης καὶ περὶ κρίσεως. Cf. Eph. 6:12 where the repetition occurs without a conjunction, πρὸς τὰς ἀρχάς, πρὸς τὰς ἐξουσίας, πρὸς τοὺς κοσμοκράτορας, etc. Cf. also Jo. 17:9.

(c) Repetition with the Relative. The preposition is not always repeated with the relative. Usually the classic authors did not repeat the preposition with the relative when the antecedent had it. So the N. T. shows similar examples, as ἐν ἰμέρας αἷς ἔπειθεν (Lu. 1:25), εἰς τὸ ἔργον δὲ προσκέκλημαι (Ac. 13:2), ἄπο πάντων ἦν (Ac. 13:39), etc. But the repetition is seen in such examples as εἰς τὴν γῆν ταύτην, εἰς ἦν (Ac. 7:4); ἄπο πρώτης ἰμέρας, ἀφ ἦς (Ac. 20:18). In Jo. 4:53, ἐκεῖνη τῇ ὑπήρξε, ἐν ἦν, the preposition occurs with the relative, but not with the antecedent. However, there is very little difference between the mere locative case and ἐν added. Especially noticeable is a case where the antecedent is [Page 567] not expressed and the relative has the preposition of the antecedent. So περὶ ἦν in Jo. 17:9 is equal to περὶ τούτων οὕς δέδωκας μοι. Cf. εἰς δὲν (Jo. 6:29).

(d) Condensation by Variation. Once more, the variation of the preposition is a skilful way of condensing thought, each preposition adding a new idea. Paul is especially fond of this idiom. Thus in Ro. 3:22 we note δικαιοσύνην δὲ θεοῦ διὰ πίστεως Ἰησοῦ Χριστοῦ εἰς πάντας. Cf. verses 25 f. A particularly striking example is ἐξ αὐτοῦ καὶ διὰ αὐτοῦ καὶ εἰς αὐτὸν τὰ πάντα (Ro. 11:36). Cf. also Col. 1:16 ἐν αὐτῷ ἐκτίσθη τα πάντα—διὰ αὐτοῦ καὶ εἰς αὐτὸν ἐκτίστη. Cf. ἐπὶ, διὰ, ἐν in Eph. 4:6. In Gal. 1:1 Paul covers source and agency in his denial of man’s control of his apostleship by the use of ἄνω and διὰ. See Winer-Thayer, p. 418 f. Cf. also ὑπὸ Κυρίου διὰ τοῦ προφήτου (Mt. 1:22) for mediate and intermediate agent. One should not make the prepositions mere synonyms. Cf. ὑπέρ (Ro. 5:6), ἄντι (Mt. 20:28), and περί (Mt. 26:28) all used in connection with the death of Christ. They approach the subject from different angles.

VI. The Functions of Prepositions with Cases.

(a) The Case Before Prepositions. Both in time and at first in order. In the Indo-Germanic tongues at first the substantive was followed by the preposition as is still seen in the Greek ἔνεκεν, χάριν, etc. The Greek, however, generally came to put the preposition before the substantive as with compound verbs.

(b) Notion of Dimension. The prepositions especially help express the idea of dimension and all the relations growing out of that, but they come to be used in

3 W.-Th., p. 422.
4 Blass, Gr. of N. T. Gk., p. 174.
various abstract relations also. Indeed it was just the purely “local” cases (ablative, locative and instrumental) that came to lose their independent forms (Moulton, Prol., p. 60 f.), due partly to the increase in the use of prepositions.

(c) ORIGINAL FORCE OF THE CASE. The case retains its original force with the preposition and this fundamental case-idea must be observed. The same preposition will be used with different cases where the one difference lies in the variation in case as already noted. Take παρά, for instance, with the ablative, the locative or the accusative. The preposition is the same, but the case varies and the resultant idea differs radically.

[Page 568] (d) THE GROUND-MEANING OF THE PREPOSITION. This must always be taken into consideration. It is quite erroneous to say that παρά, for instance, means now ‘from,’ now ‘beside,’ now ‘to.’ This is to confuse the resultant meaning of the preposition, case and context with the preposition itself. It is the common vice in the study of the prepositions to make this crucial error. The scientific method of studying the Greek preposition is to begin with the case-idea, add the meaning of the preposition itself, then consider the context. The result of this combination will be what one translates into English, for instance, but he translates the total idea, not the mere preposition. It is puerile to explain the Greek prepositions merely by the English or German rendering of the whole. Unfortunately the Greeks did not have the benefit of our English and German. Kühner-Gerth well observe that it is often impossible to make any translation that at all corresponds to the Greek idiom.

(e) THE OBLIQUE CASES ALONE WITH PREPOSITIONS. See also ch. XI. The vocative was obviously out of the question, and the nominative only appeared with pure adverbs like ἀνά-ἐξ (Rev. 21:21). Cf. Mk. 14:19; Ro. 12:5, καθ-ἐξ. But not all the six oblique cases were used with equal freedom with prepositions. Certainly in the original Indo-Germanic tongues the dative was not used with prepositions. The dative is not originally a “local” case and expresses purely personal relations. Delbrück thinks that the Greek dative did come to be used sometimes with ἐπί as in Homer, ἐπὶ Τρώσσαν μάχεσθαι. Indeed some N. T. examples of ἐπί may naturally be datives like ἐπὶ προδρόμιοι ἐπὶ αὐτοῖς (Mt. 14:14), μακροθύμησον ἐπὶ ἐμοί (Mt. 18:26). But usually even with ἐπί the case is locative, not dative. We do have two examples of ἐπὶ γάρ with the dative, as Ac. 9:38; 27:8. Originally again the genitive was not used with prepositions, but the Greek undoubtedly uses the genitive, though not a “local” case, with some prepositions like ἀντί, διά, ἐπί.

(f) ORIGINAL FREEDOM. That is to say, most of the prepositions could be used with ablative, locative, accusative and some with the genitive or instrumental. But the three first mentioned (‘whence,’ ‘where,’ ‘whither’ cases) called upon most of the

---

3 Delbrück, Grundl. etc., pp. 130, 134. Cf. also Monro, Hom., Gr. p. 125.
4 Ib., p. 130.
5 Ib., p. 134.
prepositions. The dialect inscriptions give many proofs of this matter. Thus ἀπό and ἐξ both appear in the Arcadian and Cyprian dialects [Page 569] with the locative as well as the ablative. Ἀμφί originally occurred with locative, accusative and genitive. The same thing was true of ἐπί, μετά περί and ὑπό (possibly with ablative, not genitive). Indeed περί once used the ablative also. Παρά and πρός were used with locative, accusative or ablative. It is possible indeed that πρός may have been used with five cases, adding true dative and true genitive to the above. In the case of ἐπί four cases occur (Delbrück) since it apparently used the dative also. Other prepositions once were used with two cases, as ἀνά and ἐν with locative and accusative (even the gen. with ἐν and εἰς like εἰς ἔδωκα), whereas κατά seems to use accusative, genitive, ablative. Πρόσ originally had locative as well as ablative, while ὑπέρ had ablative (genitive?) and accusative and διά accusative and genitive. Ἀντί has only genitive, while σύν has only instrumental. Ἀμφί still occasionally occurs in the papyri as a free preposition.

(g) NO ADEQUATE DIVISION BY CASES. It is very difficult, therefore, to make any adequate division of the prepositions by the cases. There were indeed in early Greek two with only one case, eight with two, and eight with three cases. But the point to observe is that the usage varies greatly in the course of the centuries and in different regions, not to say in the vernacular and in the literary style. Besides, each preposition had its own history and every writer his own idiosyncrasies. For the detailed comparison of the prepositions see Helbing, and for the history of the cases with the prepositions see Krebs. But in the Ptolemaic times prepositions are more and more used with the accusative to the corresponding disappearance of the other oblique cases. In particular one must note (cf. ch. XI) the disappearance of the locative, instrumental and dative before the accusative and the genitive, until in the modern Greek εἰς and the accusative have superseded ἐν and the locative and the dative proper also. Even σύν and the instrumental disappear in the modern Greek vernacular before μέ (μετά) and the accusative.

(h) SITUATION IN THE N. T. But in the N. T. the matter has not developed that far and the cases are not so much blurred, though the range of the prepositions in the matter of cases is greatly limited. The seventeen “proper” prepositions (Ἀμφί drops out) in the N. T. use the cases as will be now shown.

1. Those with One Case. Ἀνά, ἄντι, ἀπό, εἰς, ἐκ, ἐν, πρό, σύν use only one case, eight as opposed to two in the early Greek (ἄντι and σύν). The cases used are not the same (accusative with ἄνα and εἰς; genitive with ἄντι; ablative with ἀπό, ἐκ and πρό; locative with ἐν; instrumental with σύν), but nearly half of the prepositions have come to one case in the N. T. In the modern Greek all the prepositions occur usually with the accusative (or even the nom.). The use of the genitive (abl.) is due to literary

---

4 Die Präp. bei Polyb., p. 6 f.
influence. The common proper prepositions in modern Greek are εἰς, ἐπί, µέ, γιά, and less commonly κατά, παρά, ὑπέρ, and in dialects πρός (Thumb, Handb., p. 98). This tendency towards case simplification is well illustrated by the so-called improper prepositions which use only one case (abl., gen. or dat.), though they do not feel the movement towards the accusative.

2. Those with Two Cases. Five (as opposed to eight) use two cases: διά, µετά, περί, ὑπέρ, ὑπό. The cases used are genitive and accusative each with διά, µετά, περί; ablative and accusative with ὑπέρ and ὑπό. In the case of περί some of the examples can be explained as ablative (from around), while ὑπό seems, like ὑπέρ, to use the ablative (cf. Latin sub) and possibly the genitive also.

3. Those with Three Cases. Only four prepositions (as against eight) retain three cases: ἐπί, κατά, παρά, πρός, unless περί, ὑπέρ and ὑπό have both ablative and genitive. Κατά in Mt. 8:32, ἄφροσς εὐπαρχοι τοῦ κρήμνου, is used with the ablative. Πρός indeed only has the ablative once (Ac. 27:34) and that is due to the literary influence on the N. T. If πρός drops out, only three prepositions still use three cases, barring περί, ὑπέρ and ὑπό. Of these παρά is not very common (gen. 78, acc. 60, loc. 50), stil less κατά, while ἐπί is still frequent (acc. 464, gen. 216, loc. 176).

4. Possibly Four with ἐπί. In the case of ἐπί indeed we may have to admit four cases, if there are examples of the pure dative like Mt. 18:26, µακροθύμησον ἐπί ἔμοι. But at any rate ἐπί and παρά alone show the old freedom in the use of the cases.

(i) Each Preposition in a Case. Like other adverbs the prepositions are fixed case-forms, some of which are still apparent. Thus ὑπέρ εἰς in the locative case, like ἐν(i), ἐπί, περί. Cf. also πρότι (πρός). The forms διάτι and ὑπαι occur also (datives). The old dative παραί occurs, while παρά is instrumental. So ὄνα, διά, κατά, µετά are [Page 571] in the instrumental case. What ὑπό is we do not know. But the case in which the preposition may be itself has no necessary bearing on the case with which it is used. It is just a part of the word’s own history, but still it is always worth observing.

VII. Proper Prepositions in the N. T.

(a) ἄνα. The case of ἄνα is not clear. Originally it was ἄνα and may be the same as the Lesbian, Thessalian and Cyprian ὄν. Cf. English “on.” It may be compared with the Old Persian and Gothic ἄνα, the Latin and German an. One may compare the Greek ἄν and Sanskrit ἄन. The fundamental idea seems to be “on,” “upon,” “along,” like German auf, and this grows easily to “up” like ὄνω in contrast with κατά (κάτω). Homer uses the adverb ὄνω as an ellipsis to mean “up.” The locative was once used with ὄνω, but in the N. T. only the accusative occurs. The distributive use may be up and down a line or series, and MSS. give κατά in several of these instances (a common use of κατά also). While ἄνα is very common in composition with verbs in

1 Moulton, Prol., p. 106.
the N. T. (over ten pages of examples in Moulton and Geden’s *Concordance*), only thirteen examples of the preposition alone occur in the N. T. One of these (Lu. 9:3) is absent from W. H. (Nestle retains it), while in Rev. 21:21 (ἀνά ΄ς) the word is merely adverb (cf. Homer), not preposition. Of the remaining eleven instances, four are examples of ἀνά μέσον with the genitive, a sort of compound prepositional phrase with the idea of “between” (like Mt. 13:25), similar to the modern Greek ἀνάμεσα, and found in the LXX, Polybius, etc. One (1 Cor. 14:27, ἀνά μέρος, means ‘in turn,’ while the remaining six are all examples of the distributive use, like ἀνά δόο (Lu. 10:1). The distributive use is in Xenophon. For examples in papyri and inscriptions see Radermacher, p. 15. Cf. our “analogy.” In Ac. 8:30, γινώσκεις ἃ ἀναγινώσκεις, the point turns on ἀνα—, but it is not clear how ἀνα— turns “know” to “read.” See Ac. 10:20 ἀναστάτας κατάβηθι for contrast between ἀνά and κατά. Abbott, *Johannine Gr.*, pp. 222 ff., argues at length to show that the one example in John (2:6) is distributive. Ἀνά does not survive in modern Greek vernacular (Jannaris, *Hist. Gk. Gr.*, p. 366). In the papyri ἀνά shows some new compounds not in the N. T., like ἀναπορεύομαι (Mayser, [Page 572] Gr. d. Griech. Pap., p. 486). Delbrück, *Vergl. Syntax*, I, p. 734, considers ἀνά, like ἀντί, one of the “proethnic” prepositions. It is rare in the papyri and the inscriptions (Radermacher, *N. T. Gr.*, p. 115). But ἀναστάτω με, ‘he upsets me’ (P.Oxy. 119, ii/iii a.d.), is strangely like Ac. 17:6 οἶ τῆν οἶκ. ἀναστατώσαντες.

*(b) Ἀντί.* This preposition is in the locative case of ἀντα. Cf. Sanskrit ἀtti, Latin ante, Lithuanian ant, Gothic and, German ant (-ent), Anglo-Saxon andlang, and-swerian (‘answer’). The root-idea is really the very word “end.” Brugmann (Greek, Gr., p. 437) thinks it may mean “front.” If so, “in front of” would be the idea of the word in the locative. Cf. ante-room, ἀντίος, ἀντίο (ὑπ—, ὑπ—), ἐναντίος, ‘at the end’ (ἀντί). Suppose two men at each end of a log facing each other. That gives the etymological picture, “face to face.” The case used with it was originally the genitive and naturally so, though in modern Greek the accusative has displaced it. It is obviously the real adnominal genitive and not ablative (cf. Sanskrit adverb ἀτ्तί) that we have with ἀντί and is like the genitive with the adverbs ἄντα, ἄντιον, ἄντια, and the adjective ἄντιος, etc. In Homer indeed ἀντί has just begun to be used in composition with verbs so that it barely escapes the list of the “improper”

---

3 Blass, Gr. of N. T. Gk., p. 122, cites Polyb. Jannaris

———, *On the True Meaning of the Κοινή* (Class. Rev., 1903, pp. 93 ff.).

prepositions. Blass calls it “one of the prepositions that are dying out,” but as a matter of fact it survives in modern Greek. In the N. T. it is used in composition with twenty-two verbs (single compounds) and occurs twenty-two times also with nouns and pronouns. It is not therefore very flourishing in the N. T. It does not occur often in matter of fact it survives in modern Greek. In the N. T. it is used in composition with

3 Monro, Hom. Gr., p. 150.
4 Gr. of N. T. Gr., p. 124.
5 Gr. d. griech. Pap., p. 487.
“instead,” which is not true, but because the context renders any other resultant idea out of the question. Compare also ἄντιλυτρον ὑπὲρ πάντων by Paul (1 Tim. 2:6) where both ἄντι and ὑπὲρ combine with λύτρον [Page 574] in expressing this idea. Cf. ἄντι-τυπος (Heb. 9:24). In Mt. 2:22 ἄντι τοῦ πατρός the substitution takes the form of succession as son succeeds father on the throne. Cf. ἄνθυπαιρός (Ac. 13:7). In Jas. 4:15 ἄντι τοῦ λέγειν the result is also substitution, the points of view being contrasted. In Heb. 12:2 the cross and the joy face each other in the mind of Jesus and he takes both, the cross in order to get the joy. The idea of exchange appears also in 1 Cor. 11:15 ἡ κόµη ἄντιπεριβολαίου. Blass¹ considers χάριν ἄντι χάριτος (Jo. 1:16) as “peculiar,” but Winer² rightly sees the original import of the preposition. Simcox³ cites from Philo χάριτας νέας ἄντι παλαιότερων ἐπιδίδωσιν as clearly explaining this “remarkable” passage. But really has not too much difficulty been made of it? As the days come and go a new supply takes the place of the grace already bestowed as wave follows wave upon the shore. Grace answers (ἄντι) to grace. The remaining examples are five of ἄνθων in the sense of ‘because’ (‘therefore’), when two clauses or sentences correspond to each other, one the reason for the other. This is indeed classical enough (LXX also). Similar is ἄντι τοῦ του (Eph. 5:31) where the LXX (Gen. 2:24), which Paul does not quote, has ἔνεκεν τοῦ του (cf. Mk. 10:7; Mt. 19:4). There is yet another idea that comes out in composition like ἄντι-ἀπο-δίδωµι (Lu. 14:14) where ἀπό has the meaning of ‘back’ and ἄντι of ‘in return’ (cf. “in turn”). Cf. ἄντι-ἀπο-κρίνοµατι (Lu. 14:6) and ἄνθω-οµολογέω (Lu. 2:38). In Col. 1:24, ἄντι-ἀνα-πληρόω, Paul uses ἄντι in the sense of ‘in his turn’ (answering over to Christ). As Christ, so Paul fills up the measure of suffering. One may remark that prepositions in composition often best show their original import.

(c) Ἀπό. The etymology of this preposition is very simple. We note the Sanskrit अर, Latin ab, Gothic af, English of, off. Some of the older dialects used the form ἄπω (Arcad., Cypr., Thess.) and the Epic ἄπαι is to be noted.⁴ We may compare ἄψ (ἄπ-ς) with Latin aps (ab; cf. έκ, έξ). The case of ἄπω cannot be determined, but observe ἄπαι above. In the Arcadian and Cyprian ἄπω is found with the locative, but in the literary Greek only the ablative is used with ἄπο, a case in perfect harmony with the meaning of the word. The nominative ἄπω ὁ ὅν in Rev. 1:4 is, [Page 575] of course, for a theological purpose, to accent the unchangeableness of God. It is one of the most tenacious of the prepositions, being extremely frequent in the N. T. both with nouns

2 W.-Th., p. 364.
Simcox

———, The Writers of the N. T.

and in composition with verbs. Jannaris\(^1\) gives an interesting sketch of the history of ἀπό in the later Greek. In the modern Greek it is used with the accusative (the ablative only in set phrases). This accusative usage is found as early as Hermas.\(^2\) Ἐκ finally vanished before ἀπό (cf. ἐν before ἐν), but in the modern Greek ἀπό also supplants to some extent ἐνάφ, πρός and ὑπό. The explanation of ἀπό is somewhat complicated therefore\(^3\) since the increase of its use is due partly to the general tendency regarding prepositions (cf. ἀπό with ablative instead of the “partitive genitive”) and partly to its supplanting other prepositions like ἔκ, παρά, ὑπό.

1. Original Significance. It can be easily perceived in the N. T. It is clear enough in ἀπο-κόπτω, for instance, ‘to cut off,’ ἀπο-ἐκουσεν Πέτρος τῷ ὠτίον (Jo. 18:26). Cf. ἀπο-καλύπτω, ‘to take the veil off,’ ‘unveil’ (cf. Mt. 10:26 for contrast between καλύπτω and ἀποκαλ.). So ἀπο-θῆκη, ‘a treasure-house for putting things away’ (Mt. 3:12). Cf. ἀπε-δήμησεν (Mt. 21:33) for ‘a man off from home.’ So ἀπεβλέπεν in Heb. 11:26 and ἄρ-ορόντες in 12:2. It is needless to multiply examples from the compound words\(^4\) like ἀπο-χωρέω. Moulton\(^5\) seems right against Blass\(^6\) in considering ὡς ἰδίου σταδίου δεκαπέντε (Jo. 11:18) not a real Latinism, but a mere accidental parallel to a millibus passuum duobus. The same idiom occurs in Jo. 21:8 and also in Rev. 14:20. It is indeed rather late Greek (Strabo, Diodorus and Plutarch), but it is not such a manifest Latinism as Jannaris\(^7\) supposes. It is not the meaning of ἀπό that is unusual here, but merely the position. We say ten miles off, not off ten miles. Cf. ἀπό ὄρας 0 , , at 9 o’clock,” P. Oxy. 523 (ii/A.D.). The idea of “off” or “away from” is enough to explain the bulk of the N. T. passages. The context as a rule does not alter this simple idea. Thus ἀπό τῆς Γαλαταίας (Mt. 3:13), ἀπό τοῦ ὀδατος (3:16), ἀπό ἀναστολῶν (2:1), βάλε ἀπό σοῦ (5:29), ἀπό τοῦ πονηροῦ (6:13), ἀπό τοῦ μνημείου (Lu. 24:2), ἄρ ξιεὶς (Mt. 7:23), κατάπενθεν ἀπό πάντων (Heb. 4:4), ἀπό τῆς ὥρας ἐκείνης (Mt. 9:22), ἀπό τῶν ὁμαρτιῶν (Mt. 1:21), ἀπό τοῦ Ἰησοῦ (Mt. 17:17) a Hebraism. The construction is in the LXX, but there is nothing un-Greek about it. For ἀπό in expressions of time take ἄρ ης ἡμέρας (Col. 1:9). In Mt. 7:16, ἀπό τῶν καρπῶν ἐπετυγώσεθε, the notion of source is the real idea. Cf. διελέξατο αὐτῶς ἀπό τῶν γραφῶν (Ac. 17:2). In Ac. 16:33, ἔλουσεν ἀπό τῶν πληγῶν, it seems at first as if the stripes were washed from Paul and Silas and not, as here, Paul and Silas washed from the stripes. Winet\(^1\) suggests the addition in thought of “and cleansed.” Cf. καθαρίσωμεν ἐαυτοὺς ἀπό παντὸς μολυσμοῦ (2 Cor. 7:1).

---

2 Ib., p. 373.
5 Prol., p. 102.
1 W.-Th., p. 372.
which idiom Deissmann (Bible Studies, p. 216) illustrates from the inscriptions, and on p. 227 he further cites from the inscriptions three examples of λούομαι ἀπό in illustration of Ac. 16:33. Cf. ἀπό-εἰναι τός χείρας (Mt. 27:24). In Ac. 15:38, τόν ἀποστάντα ἀπ’ αὐτῶν ἀπὸ Παμφυλίας, no difficulty should be found in the threefold use of ἀπό, since the Greek, unlike the English, loves to repeat words in varying relations. Here we have ἀπό in composition, with persons, with place. See Αὐθίνος ἀπό τοῦ ἀματος (Mt. 27:24). Certainly there was never any reason for thinking καθαρός ἀπό τοῦ ἀματος (Ac. 20:26) a Hebraism, since it is the pure ablative idea, and the usage is continuous from Demosthenes to late Greek writers and papyri.2 We even find πλατύς ἀπό τῶν ὄμων, Pap. Par. 10, 20 (Radermacher, p. 116). The Pastor Hermæ shows ἀπό after ἐγκρατεύομαι, καθαρίζομαι, παῦμαι, φυλάσσομαι (Radermacher, p. 113). Many similar examples of this simple use of ἀπό occur in the N. T. Cf. the mere ablative with ἰφίσταται (Lu. 2:37) and then with ἀπό (4:13). Cf. ἀπεθάνετε ἅπο (Col. 2:20), μετανόησον ἀπό (Ac. 8:22), etc. Like other prepositions ἀπό may occur with adverbs, like ἀπὸ τότε (Mt. 4:17).

2. Meaning ‘Back.’ We see it clearly in ἀπὸ-δίδωμι, ‘give back’ (Mt. 16:27). But even here the point of view is simply changed. The giver gives from himself to the recipient. In the case of a debt or reward from the recipient’s point of view he is getting back what was his due. This idea appears in ἀπολαμβάνω as in Lu. 6:34. A particularly good example is found in ἐπέχουσιν [Page 577] τὸν μισθὸν αὐτῶν (Mt. 6:2). Cf. ἀπ-ἐχει (Mk. 14:41). This notion of receipt in full is common (“in countless instances,” Deissmann) for ἐπέχο in the ostraca, papyri and inscriptions. Cf. Deissmann, Light fr. the Anc. East, pp. 110 ff. Cf. τὸν τειμὸν ἐπέχο πᾶς (i/A.D., Delphi Inscr., Bull. de Corr. Hell., 22, p. 58), ‘I have received the whole price’ for the slave’s manumission. Cf. ἐπέλαβο τὰ τροφεῖα, P. Oxy. 37 (A.D. 49). Cf. ἐξεδόθη τὴν ἀποδοχήν, P. Oxy. 1133, 16 (A.D. 396). This idiom seems to be confined to composition (cf. ἀπό-κριμα, 2 Cor. 1:9) and ἀπ-ἀρχή (Ro. 8:23).

3. “Translation-Hebraism” in φοβεῖσθαι ἁπό. Cf. Lu. 12:4.1 In Mt. 10:28, φοβεῖσθαι τὸν δον., we have the usual accusative, and in verse 26 we even see φοβηθεῖ τὸν αὐτοῦς; but verse 28 again shows φοβεῖσθαι ἁπό. In Lu. 12:1, προσέχετε ἐκοινοῦ ἁπό τῆς ζωῆς, we have the usual ablative as above. Cf. βλέπω ἁπό in Mk. 8:15. ἁπό in the LXX was used to translate the Hebrew יָרַשׁ,2 but not all the examples in the LXX are necessarily pure Hebraisms, as Conybeare and Stock imply.3 Besides, the papyri show βλέπε σατῦν ἁπό τῶν Ἰουδαίων, B.G.U. 1079 (A.D. 41), the first reference to the Jews as money-lenders. Some of the N. T. examples are merely for the so-called “partitive genitive.” Thus ἐκλεξάμενος ἁπό αὐτῶν δῶδεκα (Lu. 6:13), ἐνέκατο ἁπό τῶν υἱών (Jo. 21:10), ἐκεῖθε ἁπό τοῦ πνεύματος (Ac. 2:17), ἐσθίει ἁπό τῶν υἱών (Mt. 15:27), πῖο ἁπό τοῦ γενήματος (Lu. 22:18), τίνα ἁπό τῶν δύο (Mt. 27:21), etc. The point is not that all these phrases occur in the older Greek, but that they are in perfect harmony with the Greek genius in the use of the ablative and

1 Moulton, Prol., p. 102.
2 Blass, Gr. of N. T. Gk., p. 126.
3 Sel., etc., p. 83.
in the use of ἀπό to help the ablative. Moulton (ProL., p. 246) cites ὦ ἀπό τῶν Χριστιανῶν, Pelagia (Usener, p. 28) as fairly parallel with οὔτα—ἀπό τῶν σκανδάλων (Mt. 18:7). The partitive use of the ablative with ἀπό does come nearer to the realm of the genitive (cf. English of and the genitive), but the ablative idea is still present. One may note τῶν ἀπό Κέλτων φόβου in Polybius XVII, 11, 2 (Radermacher, N. T. Gr., p. 116). Cf. ἔνδομα ἀπό τριχῶν (Mt. 3:4) with the old genitive of material.

4. Comparison with ἐκ. But ἀπό needs to be compared more particularly with ἐκ which it finally displaced save4 in the Epirot ὤχ or ὄχ. But the two are never exactly equivalent. ἐκ means ‘from within’ while ἀπό is merely the general starting-point. ἀπό does not deny the “within-ness”; it simply does not assert it as ἐκ does. Thus in Mk. 1:10 we read ἄναβαινον ἐκ τοῦ ὕδατος when [Page 578] the assertion is made by ἐκ that Jesus had been in the water (cf. κατά—εἰς, ἄνα—ἐκ in Ac. 8:38 f.). But in Mt. 3:16 we merely read ἄνεβη ἀπό τοῦ ὕδατος, a form of expression that does not deny the ἐκ of Mark. The two prepositions are sometimes combined, as ἐξελθόν ἄπο αὐτῆς (Ac. 16:18) and ἀφορισθήσεται ἐκ μέσου (Mt. 13:49). Even with the growth in the use of ἀπό it still falls behind ἐκ in the N. T.1 Both ἀπό and ἐκ are used of domicile or birthplace, but not in exactly the same sense.2 Thus in Jo. 1:44 see ἦν ἐκ τοῦ Φιλίππος ἀπό Βηθσαιδά, ἐκ τῆς πόλεως Ἀνδρέου, where ἀπό corresponds closely with the German von and French de which came to be marks of nobility. So even Luke in Ac. 24:18, Ἰωσῆφ τὸν ἀπό Ναζαρέτ, where (in both verses) no effort is made to express the idea that they came from within Nazareth. That idea does appear in verse 46, ἐκ Ναζαρέτ. In Lu. 2:4 both ἀπό and ἐκ are used for one’s home (ἀπό τῆς Γαλιλαίας ἐκ πόλεως Ναζαρέτ). Indeed ἐκ in this sense in the N. T. seems confined to πόλες.3 Both appear again in Jo. 11:1. Cf. also Jo. 7:41 f., ἐκ τῆς Γαλιλαίας, ἀπό Βηθλεέμ, where the two prepositions are reversed. The Latin versions render both ἀπό and ἐκ here by a.4 Cf. ἀπό Αριμαθαίας (Jo. 19:38). Abbott5 is clear that John does not mean to confuse the two prepositions, but uses each in its own sense, though ἀπό is not found in the older writers for domicile. The sense of variety, as in English, may have led to the use of now one, now the other, since at bottom either answers. So Luke in Ac. 23:34 has ἐκ ποιας ἐπάρχειας, but ἀπό Καλλίας. Cf. Ac. 1:4. Blass6 notes that outside of John the N. T. writers use ἀπό for one’s country. So even Luke in Ac. 24:18, ἀπό τῆς Αἰγίας. The MSS. indeed vary in some instances between ἀπό and ἐκ as in Ac. 16:39 with τῆς πόλεως. Cf. MS. variation between ἀπό and παρά in Mk. 16:9. Cf. also Ac. 13:50 for ἐκ—ἀπό. In a case like ἀπό τῆς Ἰταλίας (Heb. 13:24) the preposition does not determine whether the persons are still in Italy or are outside of it. Cf. Moulton, ProL., p. 237. But Deissmann (Light, etc., p. 186) thinks that ἀπό here means ‘in,’ like ἀπό Φιλιαδ in an ostraca from Thabes, a.d. 192. Cf. τῶν ἀπό Ὀξυρύγχων πόλεως, P. Oxy. 38, a.d. 49. ἂπό is also, like ἐκ (Ac. 10:45, etc.), used for members of a party in

4 Moulton, ProL., p. 102.
1 Moulton, ProL., p. 102.
3 Blass, Gr. of N. T. Gk., p. 125.
4 Abbott, Joh. Gr., p. 228.
5 Ib., p. 229.
6 Gr. of N. T. Gk., p. 125.
5. Comparison with παρά. As to παρά, it suggests that one has [Page 579] been by the side of the one from whom he comes. In relation to God we find ἐκ τοῦ θεοῦ ἐξήλθον (Jo. 8:42), παρά τοῦ πατρὸς ἐξήλθον (16:27), ἀπὸ τοῦ θεοῦ ἐξήλθες (16:30). Cf. πρὸς τὸν θεόν (Jo. 1:1). It would be overrefinement to insist on a wide and radical difference here between ἀπό, ἐκ and παρά; and yet they are not exactly synonymous. In the older Greek παρά was the common preposition for the conscious personal departure.1 But in N. T. ἀπό occurs also with persons. So ὁκηκόμεν ἀπὸ αὐτοῦ (1 Jo. 1:5), μαθεῖν ἄφι θυμῶν (Gal. 3:2), παρέλαβον ἀπὸ τοῦ κυρίου (1 Cor. 11:23). One must not, however, read too much into ἀπό, as in Gal. 2:12, where τινὰς ἀπὸ Ἰακώβου does not mean 'with the authority of James,' though they doubtless claimed it. Cf. Mk. 15:45; 1 Th. 3:6. One doubts if we are justified in insisting on a radical distinction between παρά τοῦ πατρὸς (Jo. 10:18) and ἀπὸ τοῦ κυρίου (1 Cor. 11:23) save as etymology throws light on the matter.2

6. Compared with ὑπό. The MSS. of ancient writers,3 as of the N. T., varied often between ἀπό and ὑπό. As instances of this variation in the N. T. take Mk. 8:31; Ac. 4:36; 10:17; Ro. 13:1. The MSS. often vary where ἀπό is the correct text. The use of ἀπό with the agent is not precisely like ὑπό, though one has only to compare ἀπό with Latin ab and English of to see how natural it is for ἀπό to acquire this idiom. Observe κατενεχθείς ἀπὸ τοῦ ὄπνου (Ac. 20:9). So in Jas. 1:13, ἀπὸ θεοῦ πειράζομαι, we translate 'tempted of God.' The temptation, to be sure, is presented as coming from God. Cf. also ὁ μισθὸς ὁ ἀφοσιωμένος ἄφι θυμῶν (Jas. 5:4), where the keeping back of the reward is conceived as coming from you. Cf. Ac. 4:36. In Mt. 16:21, παθεῖν ἀπό τῶν πρεσβυτέρων, 'at the hands of,' is a free rendering of the idea of agency or source. In Lu. 16:18, ἀποδοκιμασθῆναι ἀπὸ τῶν πρεσβυτέρων, we have the same construction as in 16:18 above (cf. 17:25). Cf. ᾧ τομασάμενον ἀπὸ τοῦ θεοῦ (Rev. 12:6) and Ac. 2:22 ἀποδεικνυμένον ἀπὸ τοῦ θεοῦ. The use of ἀπό after substantives throws some light on this matter. Thus τὴν ἀπὸ σοῦ ἐπαγγελίαν (Ac. 23:21), ἀπὸ σοῦ σημεῖον (Mt. 12:38). This use of ἀπό after passive verbs came to be the rule in the later writers. Cf. Wilhelm, I. G. XII. 5, 29.

But it is not alone a form of agency that ἀπό comes to express. [Page 580] It may also be used for the idea of cause, an old usage of ὑπό. For instance, take ἀπό τῆς χαρᾶς σύν οὗτοι ὑπάγει (Mt. 13:44), ἀπὸ τοῦ φόβου ἐκράζει (14:26), οὐά τῷ κόσμῳ ἀπό τῶν σκανδάλων (18:7), κομιμώμενος ἀπὸ τῆς λίπης (Lu. 22:45), οὐκέτι ἵσχυον ἀπὸ τοῦ πλήθους (Jo. 21:6), οὐκ ἐνεβλησθον ἀπὸ τῆς δόξης (Ac. 22:11). Cf. further Lu. 19:3; 24:41; Ac. 12:14; 20:9; Heb. 5:7, etc. The LXX gives abundant illustration.

2 Cf. W.-Th., p. 370.
3 Simcox, Lang. of the N. T., p. 138.
of the same idiom,¹ the causal use of ἄπο. As a matter of sound see ἔφοβος and ἔφοβος υπὸ in Heb. 7:13.

(d) Διά. Delbrück² says: “Of the origin of διά I know nothing to say.” One hesitates to proceed after that remark by the master in syntax. Still we do know something of the history of the word both in the Greek and in other Indo-Germanic tongues. The form διά may be in the instrumental case, but one must note διαί (dative) in the lyric passages of Ἀeschylus, not to say the Thessalian δί.³ But there is no doubt about διά being kin to δῶος, δικ. Sanskrit dvā, dvī (cf. τραγαστρί, τρί), dvīs; Latin duo, bis (cf. Sanskrit dvīs, Greek δίς, b=v or u); German zwei; English two (fem. and neut.), twain (masc.), twi-ce, twi-light, be-tween, two-fold, etc.

1. The Root-Idea. It is manifest in δικόσιον, δισ-χίλιοι, δι-δραχμα, δι-πλοῦς (cf. ἀ-πλοῦς). The etymology of the word is ‘two,’ δῶος, as shown in these three words as well as in δῖς, δι-πλῶ, all of which occur in the N. T. Thus it will be seen how persistent is the etymological force in the word. Cf. Mk. 6:37; Rev. 18:6; Mk. 5:13. See also δίς μεριδάδες (Text. Rec., δῶο μ. Rev. 9:16), δι-λογος (1 Tim. 3:8), δι-στομος (Heb. 4:12), δι-ψυχος (Jas. 1:8), δι-δραχμον (Mt. 17:24), Δι-δύμος (Jo. 11:16). Cf. ἔσχισθη εἰς δῶος (Mt. 27:51).

2. ‘By Twos’ or ‘Between.’ But the preposition has advanced a step further than merely “two” to the idea of by-twain, be-tween, in two, in twain. This is the ground-meaning in actual usage. The word δι-θέλασσας originally meant ‘resembling two seas’ (cf. Euxine Sea, Strabo 2, 5, 22), but in the N. T. (Ac. 27:41) it apparently means lying between two seas (Thayer). The notion of interval (be-tween) is frequent in the N. T. both in composition and apart from composition. Thus in ἡμερῶν δια-γενομένων τινῶν (Ac. 25:13), ‘some days came in between’ (διά). Cf. δια-γνώσομαι τὰ καθ’ ὑμᾶς (Ac. 24:22) with Latin di-gnosco, dis-cerno and Greek-English di-a-gnosis (διά-γνωσθεν, Ac. 25:21). Δια-θήκη is an arrangement or covenant between two (Gal. 3:17). See δια-αυτοῦ (1 Cor. 12:11); δια-δίδωμι (Lu. 11:22) ‘divide’; οὕθεν δια-κρίνεις μεταξὺ ἡμῶν τε καὶ αὐτῶν (Ac. 15:9) where μεταξὺ explains διά. Cf. δια-κρίσις (Heb. 5:14), ‘dis-crimination’; [Page 581] δια-λείπω (Lu. 7:45), ‘intervals of delay’; δια-λίπω (Ac. 5:36), ‘dis-solve’; δια-μερίζω (Ac. 2:45), ‘dis-tribute’; δια-ρίγνου (Lu. 8:29), ‘rend asunder’; δια-σκορπίζω (Jo. 11:52), opposed to συνάγω, ‘disperse’; δια-στάσα (Mk. 5:4), ‘rend in two’; δια-σπέρω (Ac. 8:1) = ‘scatter abroad’; δια-στράτα (Jo. 7:35), ‘dispersion’; δια-στέλλω (Heb. 12:20), ‘divide’; διά-στημα (Ac. 5:7), ‘distance’ or ‘interval’; δια-στολή (1 Cor. 14:7), ‘distinction’; δια-τίθεμαι (Lu. 22:29), ‘dispose’; δια-φέρω (Ac. 27:27, Mt. 6:26), ‘bear apart,’ ‘differ’; διάφορος (Ro. 12:6), ‘different’; δι-χάζω (Mt. 10:35), ‘set at variance’ (‘cleave asunder’). These

Thayer

THAYER, J. H., Greek-English Lexicon of the N. T. (1887).

———, Language of the N. T. (Hastings’ D. B., 1900).
numerous examples ought to be sufficient to show what the real meaning of the word in itself is. A particularly noticeable instance appears in Lu. 24:51, where we have δι- ἐστιν ἀπὸ αὐτῶν.

The N. T. preserves this notion of interval in expressions of time and so it is hardly “peculiar only to literary style.” Thus in Mk. 2:1 δι ήμερῶν means ‘interval of days,’ ‘days between,’ ‘after some days,’ though surely no one would think that διὰ really means ‘after.’ Cf. Mt. 26:61, διὰ τριῶν ήμερῶν (cf. ἐν, 27:40); διὰ ἐτῶν πλειόνων, Ac. 24:17; Gal. 2:1, διὰ δεκατεσσάρων ἑτῶν. Cf. Ac. 5:7. In Ac. 1:3, δι ήμερῶν τεσσάρων ἑτῶν, the appearance of Jesus was at intervals within the forty days. But see opposition to this idea in Abbott, Johannine Grammar, p. 255 f. In the phrase διὰ νυκτός (Ac. 5:19; 16:9, etc.), ‘by night,’ διὰ adds little to the genitive itself. It is the real adnominal genitive. The preposition is very common in the N. T., especially with the genitive (gen. 382, acc. 279), though the accusative becomes dominant later.

3. ‘Passing Between’ or ‘Through.’ The idea of interval between leads naturally to that of passing between two objects or parts of objects. ‘Through’ is thus not the original meaning of διὰ, but is a very common one. The case is usually the genitive, though in Homer3 the accusative is common also, as we find it once in the N. T. (Lu. 17:11), διὰ μέσου Σαμαρίας (cf. διὸ μέσου, 4:30), and even here note the genitive after μέσου. Some MSS. in Jo. 8:59 read also διὰ μέσου. Blass4 wrongly calls the accusative an “inadmissible reading” in view of Homer and the growing use of the accusative in the vernacular with all prepositions (cf. modern Greek). This use of ‘through’ or ‘thorough’ is common in composition and sometimes has a “perfective” idea (‘clear through’) as in δια-καθαριεῖ τὴν ἁλωνα (Mt. 3:12), ‘will thoroughly cleanse.’ Cf. also δια-βαίνω (Heb. 11:29), δια-βλέπω (Mt. 7:5), δια-αγγέλλω (Lu. 9:60), δια-γρηγορεῖ (Lu. 9:32), δια-άγω (1 Tim. 2:2), δια-δέχομαι (Ac. 7:45), δια-κατελέγχομαι (Ac. 18:28), δια-μάχομαι (Ac. 23:9), δια-μένω (Lu. 1:22), δια-νυκτερεύω (Lu. 6:12), δια-ανύω (Ac. 21:7), δια-παρατρίβη (1 Tim. 6:5); δια-σέιο (Lu. 3:14), δια-σώζω (Lu. 7:3), δια-φυλάσσω (4:10). This sense of διὰ is used with words of place, time, agent or abstract word. In all of these relations the root-idea of the preposition is easily perceived. Thus in Mt. 12:43, διέρχεται δι άνδρον τόπων, δια ξηρᾶς (Heb. 11:29), δια τῆς Σαμαρίας (Jo. 4:4), δια πυρός (1 Cor. 3:15), δι έσώπρου (1 Cor. 13:12). Cf. Ac. 13:49; 2 Cor. 8:18. In Ro. 15:28, ἀπελεύσομαι δι

2 Moulton, Prol., p. 105.
4 Gr. of N. T. Gk., p. 132.
Ὑμῶν εἰς Σπανίαν, Winer (Winer-Thayer, p. 378) takes διὰ ὑμῶν to be ‘through you,’ i.e. ‘through your city,’ ‘through the midst of you.’ In all these examples the idiom runs just as in the older Greek. The use of διὰ with expressions of time was never very common and gradually was transferred1 to εἰς. But some examples occur in the N. T. like διὰ ὀλίγος νοκτὸς (Lu. 5:5), which may be compared with διὰ παντὸς τοῦ ζῆν (Heb. 2:15) and the common phrase διὰ παντὸς (Mk. 5:5). Here the idea of through is applied to time. Rouffiac (Recherches, p. 29) cites διὰ τοῦ σφετερός ὅλου from inscriptions of Priene II, 98 and 99 (i/b.c.). The agent may also be expressed by διὰ. This function was also performed in the ancient Greek, though, when means or instrument was meant, the instrumental case was commonly employed.2 Διὰ is thus used with inanimate and animate objects. Here, of course, the agent is conceived as coming in between the non-attainment and the attainment of the object in view. One may compare γράφαντες διὰ χειρὸς αὐτῶν (Ac. 15:23) with διὰ ἔπιστολάς, διὰ Νησίδου μιᾶν, διὰ Κρονίου μαχαρυφόρου μιᾶν, B.U. 1079, A.D. 41 (Milligan, Greek Pap., p. 39). So οὗ θέλω διὰ μέλανος καὶ καλάμου σοι γράφειν (3 Jo. 13), διὰ γλώσσης (1 Cor. 14:9), τά διὰ τοῦ σώματος (2 Cor. 5:10), διὰ τῶν ὄνειρον (2 Cor. 6:7), μήτε διὰ πνεύματος μήτε διὰ λόγου μήτε διὰ ἐπιστολῆς (2 Th. 2:2). In 2 Pet. 3:5 note the difference between εξ ὃδατος and διὰ ὃδατος. Abstract ideas are frequently so expressed, as σεσωσάντων διὰ πίστεως (Eph. 2:8), διὰ θελήματος θεοῦ (Eph. 1:1), διὰ τοῦ εὐαγγελίου (1 Cor. 4:15), διὰ νόμου (Ro. 3:27), διὰ ἀποκάλυψεως (Gal. 1:12). Cf. 1 Cor. 6:14. When διὰ occurs with the personal agent, he is regarded as the intermediate agent. Sometimes the immediate agent is also expressed by ὑπὸ. So ὑπὸ Κυρίου διὰ τοῦ προφήτου (Mt. 1:22, etc.). Cf. also διὰ τῆς γυναῖκος—Εκ τοῦ θεοῦ (1 Cor. 11:12), where source and mediate agent are distinguished. In Gal. 1:1, ἀπὸ ἀνθρώπων—[Page 583] διὰ ἀνθρώπων, Paul takes pains to deny both ideas. In 1 Cor. 8:6, εἰς οὖ—διὰ οὖ, the first refers to God the Father as the source of all things and the second refers to Jesus as the mediate agent by whom all things come into existence. Cf. Col. 1:16. Indeed God himself may be regarded as source, mediate agent, and ultimate object or end, as Paul does in his noble doxology in Ro. 11:36, ὅτι

———, The N. T. Documents (1913).
ἐξ αὐτοῦ καὶ διʼ αὐτοῦ καὶ εἰς αὐτὸν τὰ πάντα. There are other instances also where God is looked upon as the intervening cause or agent. So διʼ οὗ (Heb. 2:10; 1 Cor. 1:9). But διʼ is often used with Christ in regard to our relation to God (cf. Paul’s use of ἐν). Thus Ro. 1:8; 5:1, etc. Cf. διʼ ἐμοῦ in Jo. 14:6, διʼ πολλῶν μαρτύρων (2 Tim. 2:2), διʼ ἀγγέλων (Heb. 2:2). The intermediate idea of διʼ appears well in 1 Cor. 3:5 διʼ κοινοῦ διʼ ἐν ἐπιστεύσει, Heb. 3:16 διʼ Μωυσέως, Ro. 5:5 διʼ πνεύματος. In 1 Th. 4:2, τίνας παραγγέλεις ἐδόκησεν ὑμῖν διʼ τοῦ κυρίου Ἰησοῦ, the matter seems turned round, but, as Paul was the speaker, he conceives Jesus as also making the commands. Abbott, Johannine Grammar, p. 236, rightly argues in favour of ‘through him’ (not ‘it’) in Jo. 1:7. It is important to note διὰ Ἰησοῦ Χριστοῦ (Eph. 1:5), pregnant with meaning. Cf. Schettler, Die paulinische Formel “Durch Christus,” pp. 28 ff. This use of διὰ occurs in the papyri (Wenger, Die Stellvertretung im Rechte der Papyri, 1906, p. 9 f.). Christ is conceived as our representative (Deissmann, Light, etc., p. 340). It is not far from the notion of means like διὰ πίστεως to that of manner like διὰ παραβολῆς (Lu. 8:4). Indeed the two shade off into one another as διὰ ὦμπατος (Ac. 18:9). Note also διὰ ἀγάπης (Gal. 5:6), διὰ ἐπαγγελίας (Gal. 3:18), διὰ βραχέων (Heb. 13:22), διὰ ὀλίγων (1 Pet. 5:12), διὰ ὀλίγων καὶ ὀλίγων (1 Jo. 5:6), διὰ γράμματος καὶ περιτομῆς (Ro. 2:27), διὰ προκόμματος (14:20), διὰ δόξης (2 Cor. 3:11), διὰ ὑπομονῆς (Heb. 12:1), διὰ πολλῶν δακρύων (2 Cor. 2:4). Cf. Rom.

2:27. But here also the notion of between is always present. This is true even in a case like διὰ τὸν οἰκτημόν τοῦ θεοῦ (Ro. 12:1). Cf. also διὰ τῆς χάριτος in Ro. 12:3 with διὰ τὴν χάριν in 15:15.

4. *Because of.* ‘With the accusative διὰ comes to be used with the idea of ‘because of,’ ‘for the sake of,’ ‘on account of.’ The notion of between is still present. Take Mt. 27:18, διὰ φθόνον παρέδωκαν αὐτόν. Envy is the reason that prompted the betrayal and so came in between and caused the act. The accusative (extension) is natural and helps also to distinguish this idiom from the others. For instance, in Heb. 2:10, διὸν τὰ πάντα καὶ διὰ τὰ πάντα, the two ideas are distinguished entirely by means of the [Page 584] cases. One may note also διὰ τὴν γυναῖκα and διὰ τὴν γυναικός (1 Cor. 11:9, 12). Cf. διὰ τὴν χάριν above. In Ro. 8:11 the MSS. vary between διὰ τὸ ἐνοικοῦν and διὰ τοῦ ἐνοικοῦντος (W. H., Nestle). Note also the difference between διὰ πίστεως and διὰ τὴν πάρεσιν in Ro. 3:25. Cf. also the common διὰ τὸ ονόμα (Mt. 10:22), διὰ τὴν πολλὴν ἀγάπην (Eph. 2:4), διὰ τὸν λόγον (Jo. 15:3), διὰ τὸν χρόνον (Heb. 5:12). Cf. Heb. 5:14; Rev. 12:11. The personal ground is common also as in ἐγὼ διὰ τὸν πατέρα (Jo. 6:57), διὰ τοῦ θεοῦ (Heb. 6:7), etc. Cf. 1 Jo. 4:9 ἐκεῖνος καὶ διὰ αὐτοῦ. The aim (usually expressed by ἐκεῖνος) may be set forth by διὰ also. So τὸ σάββατον διὰ τὸν ἀνθρωπόν ἐγένετο καὶ οὐ χάρις ὁ ἀνθρώπος διὰ τὸ σάββατον in Mk. 2:27. Cf. also διὰ ἐμει and ἐν τῷ θεῷ διὰ τοῦ θεοῦ, ἐν τῷ δειασεῖτε, ἐγείρο ἐν τῇ θεώσει (Heb. 13:20; Ph. 3:7. Moulton (Prol., p. 105) cites ἰνα διὰ σε βασιλεὺ τοῦ δικαίου τύχο, M.P. 16

and 20 (iii/B.C.), in illustration of Jo. 6:57. The Pauline phrase διὰ Ίησοῦν (2 Cor. 4:5) is illustrated by διὰ τοῦ Κυρίου in a Berlin Museum papyrus letter (ii/A.D.) which Deissmann (Light, pp. 176 ff.) thinks curiously illumines the story of the Prodigal Son in Lu. 15. In the modern Greek γιὰ (διὰ) this notion of aim or purpose with the accusative is the usual one. A common idiom in the Græco-Roman and Byzantine Greek is the use of διὰ τὸ and the infinitive in the sense of ἵνα. It is practically equivalent in the N. T. to ὅτι and the indicative and is frequent. In Jo. 2:24 ff. we have both constructions parallel, διὰ τὸ αὐτὸν γινώσκειν πάντας, καὶ ὅτι οὐ χρείαν εἶχεν. In the modern Greek we actually have γιὰ νὰ (διὰ Ίνα) with the subjunctive. Cf. English “for that.” The use of διὰ τὶ does not differ practically from τὶ alone.

(e) Ἐν. Inasmuch as εἰκ. (ἐν-ζ) is merely a later variation of Ἐν it will be treated after Ἐν. There is an older form ἔνι (locative case), ἔνι, and in Homer ἔνι or ἐν for metrical reasons. But some of the dialects (Arcadian, Cretan) wrote ἐν like the Latin in. But compare Latin en-do, Umbrian ἐν, (Latin inter), German in (ein), English in (en-).

1. Old Use of Ἐν with Accusative or Locative. Originally Ἐν was used with either locative or accusative, not to say genitive in a case like ἐν Αἰδαο which Brugmann does not consider mere ellipsis. He cites also ἐμποδῶν as being really Ἐν ποδῶν. But there is no manner of doubt as to the accusative and the locative. The inscriptions of many of the dialects show abundant illustrations of Ἐν with the accusative such as the Thessalian, Bœotian, Northwest Greek, Arcadian, etc. Cf. Ἐν τάγμα, Ἐν ὁπλίτας, etc. So ἐν τὰ Ἑργα, etc. Indeed in Cypriote Greek Ἐν usually has the accusative. In North Arcadian Ἐν alone appears (not Ἐν-ζ, εἰκ.) and with either locative

3 Solmsen, Inscr. Graecae, p. 4.
or accusative like Latin in.\textsuperscript{5} Besides in Homer we have ἐν-ὦπα, not to mention the common compound verbs like ἐμ-βάλλω, ἐμ-βαίνω, where one might look for εἰς. Cf. ἐμβαίνει εἰς πλοίον (Mt. 8:23), ὁ ἐμβάμας ἐκ τῶν τροπειών (Mt. 26:23). This so-called pregnant use of ἐν seems very natural after all. It is only in composition that the old usage is preserved in the N. T. or a case like ἐν τῶν τροπειών above after a verb of motion where εἰς might at first seem more natural. Cf. Lu. 9:46; 1 Cor. 11:18; Ro. 1:25. In Ro. 1:24 ἐν occurs with παρέδωκεν, but εἰς in verse 26. Indeed (Blass, Gr. of N. T. Gk., p. 130) we find ἐν with διότι, ἵστημι and τίθημι. Remnants of this early usage survive in the N. T., as διδόντι ἐν θῇ καρδίᾳ (2 Cor. 8:16), ἐμπότι ἐν τῷ τρυφείῳ (Mt. 24:18), ὁ ἐμβάψας ἐν τῷ τρυφείῳ (Mt. 26:23). This so-called pregnant use of ἐν seems very natural after all. It is only in composition that the old usage is preserved in the N. T. or a case like ἐν τῷ τρυφείῳ above after a verb of motion where εἰς might at first seem more natural. Cf. ἐμβάντο ἐν φυλακῇ (Mt. 8:23), ὁ ἐμβάντος ἐν φυλακῇ (Mt. 14:3). Cf. the spurious verse Jo. 5:4 κατέβαινεν ἐν τῇ κολυμβήθρᾳ; Par. P. 10, 2 (iii/α.δ.) ἄνακεκυρηκεν ἐν Ἀλεξάνδρείῳ; Epict. (I, 11, 32) ἄνερχεται ἐν Ρώμῃ; Tob. 5:5 πορευθῆναι ἐν Ῥώμῃ. Cf. Blass-Debrunner, p. 131. The LXX shows similar examples. Cf. Conybeare and Stock, p. 83. But it was only by degrees that ἐν came to be associated exclusively with the locative case and εἰς with the accusative as a result of the triumph of the Ionic-Attic Greek.\textsuperscript{6} In Homer indeed ἐν appears as an adverb.\textsuperscript{7} In origin therefore we are not to associate ἐν primarily with the locative any more than in Latin, though ultimately that came to be true. Other examples of ἐν in composition in the N. T. with verbs of motion are ἐμβατεύω (Col. 2:18), ἐμβιβάζω (Ac. 27:6), ἐμπίπτω (Lu. 10:36 followed by εἰς). The word therefore evidently expresses the idea of ‘within,’ whether of rest or of motion depending on the context. Compare vernacular English, “Come in the house.” Note in Ac. 26:20 that ἐν is not repeated with Ἰεροσολύμοις.

2. Ἐν Older than εἰς. It seems certain that originally ἐν stood alone without εἰς, whereas in the modern Greek vernacular ἐν [Page 586] has entirely disappeared before εἰς which uses only the accusative.\textsuperscript{1} There is once more unity, but not exactly on the same terms. In the Greek N. T. this process of absorption is going steadily on as in the κοινή generally. There is rarely much doubt as to the significance of ἐν, whereas εἰς has already begun to resume its old identity with ἐν, if indeed in the vernacular it ever gave it up.\textsuperscript{2} We may compare ἐν τῷ ἀγρῷ in Mt. 24:18 with εἰς τὸν ἄγρον in Mk. 13:16. Cf. ἐπέσχεν χρόνον εἰς τὴν Ἀσίαν (Ac. 19:22), τηρεθήκα εἰς Ἐκκλησίαν (25:4), εἰς οἶκόν ἐστιν (some MSS. in Mk. 2:1). Cf. Jo. 1:18.

\end{thebibliography}
In the N. T. ἐν is so frequent (2698 instances) that it is still the most common preposition. Indeed Moulton¹ thinks that its ultimate disappearance is due to the fact that it had become too vague as “a maid of all work.”

3. Place. The simplest use is with expressions of place, like ἐν τῇ θύρᾳ (Mt. 20:3), ἐν δεξιᾷ (Heb. 1:3), ἐν τῷ θρόνῳ (Rev. 3:21), ἐν τῷ πλοῖῳ (Mt. 4:21), ἐν τῷ πόλεμι (Lu. 7:37), ἐν τῷ Ἰορδάνῃ ποταμῷ (Mt. 3:6), ἐν ὑδάτι (3:11), ἐν τῷ ἡμιπέλαξ (Jo. 15:4). Cf. also ἐξῆλθεν ὁ λόγος ἐν τῷ Ἰουδαίῳ (Lu. 7:17) and ἐν τῷ γαζοφυλακίῳ (Jo. 8:20). For the “pregnant” construction of ἐν after verbs of motion cf. chapter XI, X, (i). Cf. examples given under 1. In these and like examples ἐν indeed adds little to the idea of the locative case which it is used to explain. See also ἐν τοῖς (Lu. 2:49) in the sense of ‘at the house of’ (cf. εἰς τῷ ἱδίῳ, Jo. 19:27) for which Moulton⁴ finds abundant illustration in the papyri. Cf. ἐν τοῖς Ἀπολλονίου, R. L. 38² (iii/B.C.). The preposition in itself merely states that the location is within the bounds marked by the word with which it occurs. It does not mean ‘near,’ but ‘in,’ that is ‘inside.’ The translation of the resultant idea may be indeed in, on, at, according to the context, but the preposition itself retains its own idea. There is nothing strange about the metaphorical use of ἐν in expressions like ἐν βασάνοις (Lu. 16:23), ἐν τῷ θανάτῳ (1 Jo. 3:14), ἐν δόξῃ (Ph. 4:19), ἐν μοστρηρίῳ (1 Cor. 2:7), etc.

4. Expressions of Time. Ἐν may appear rather oftener than the mere locative. Cf. ἐν τῇ ἔσχάτῃ ἡμέρᾳ in Jo. 6:44, but τῇ ἔσχάτῃ ἡμέρᾳ in 6:54, while in 6:40 the MSS. vary. By ἐν τρισὶν ἡμέρας (Jo. 2:19) it is clear that Jesus meant the resurrection [Page 587] will take place within the period of three days. Cf. τῇ τρίτῃ ἡμέρᾳ (never with ἐν in the N. T.) in Mt. 16:21.¹ More common expressions are ἐν σαββάτῳ (Mt. 12:2), ἐν τῇ ἡμέρᾳ (Jo. 11:9), ἐν τῇ νυκτί (11:10), ἐν τῷ δευτέρῳ (Ac. 7:13), ἐν τῷ καθεξῆς (Lu. 8:1), ἐν τῷ μεταξῷ (Jo. 4:31), ἐν ταῖς ἡμέραις ἑκείναις (Mt. 3:1), ἐν τῇ καροσοίᾳ (1 Th. 2:19), ἐν τῇ ἄνωστε (Mk. 12:23), ἐν ἡμέρᾳ κρίσεως (Mt. 10:15), ἐν τῇ ἔσχάτῃ σάλπιγγι (1 Cor. 15:52), etc. Cf. Lu. 1:17. Another temporal use of ἐν is ἐν ὑς in the sense of ‘while’ (Mk. 2:19). Cf. also ἐν οἷς in Lu. 12:1. The frequent use, especially in Luke (cf. ἐν τῷ ὑποστρέφειν, 8:40), of ἐν τῷ with the infinitive calls for a word. Examples of this idiom occur in the ancient Greek (16 in Xenophon, 6 in Thucydides, 26 in Plato)² and the papyri show it occasionally.³ Cf. ἐν τῷ λογίζεσθαι, Par. P. 63 (ii/B.C.). But in the LXX it is a constant translation of έμ and is much more abundant in the N. T. as a result of the LXX profusion.

5. ‘Among.’ With plural nouns ἐν may have the resultant idea of ‘among,’ though, of course, in itself it is still ‘in,’ ‘within.’ Thus we note ἐν γεννητοῖς γυναικῶν (Mt. 11:11), ἔστιν ἐν ἡμῖν (Ac. 2:29), ἦν ἐν αὐτοῖς (4:34), ἦν ὑμῖν (1 Pet. 5:1), ἐν τοῖς ἥγεμόσιν Ἰούδο (Mt. 2:6). This is a common idiom in the ancient Greek. Not very

3 Prol., p. 103. In the Ptol. papyri, Rossberg (Präp., p. 8) finds 2245 examples of ἐν and it is the most common preposition.
1 See especially Field’s valuable note on this verse showing how impossible it is for the resurrection to have occurred on the fourth day. Cf. also Abbott, Joh. Gr., p. 255 f.
2 Moulton, Prol., p. 215.
different from this idea (cf. Latin *apud*) is the use ἐν ὀφθαλμοῖς ἡμῶν (Mt. 21:42), like Latin *coram*. One may note also ἐν υἱῶν in 1 Cor. 6:2. Cf. ἐν τοῖς ἔθνεσιν (Gal. 1:16). See also 2 Cor. 4:3; 8:1.

6. ‘In the Case of,’ ‘in the Person of’ or simply ‘in.’ A frequent use is where a single case is selected as a specimen or striking illustration. Here the resultant notion is ‘in the case of,’ which does not differ greatly from the metaphorical use of ἐν with soul, mind, etc. Cf. Lu. 24:38. Thus with ἄποκαλύπτω note ἐν ἑμοί (Gal. 1:16), εἰδὼς ἐν ἑαυτῷ (Jo. 6:61), γένηται ἐν ἑμοί (1 Cor. 9:15), ἐν τῷ ξηρῷ τί γένηται (Lu. 23:31), ἐν ἡμῖν μάθητε (1 Cor. 4:6), ἐν τῇ κλάσει (Lu. 24:35). One may note also ἐν τῷ Ἀδὰμ πάντες ἑποθνήσκουσιν (1 Cor. 15:22), ἐν τῷ Πατρὶ καταγγέλλειν (Ac. 4:2), ἡγομένη ἐν πνεύματι ἄγιῳ (Ro. 15:16), ἡγίασται ἐν τῇ γυναικί (1 Cor. 7:14), etc.

Paul’s frequent mystical use of ἐν κυρίῳ (1 Cor. 9:1), ἐν Χριστῷ (Ro. 6:11, 23, etc.) may be compared with Jesus’ own words, ἐν ἑμῖν μάθητε (Jo. 15:4). Cf. also ἐν τῷ [Page 588]θεῷ in Col. 3:3. The LXX usage is not quite on a par with this profound meaning in the mouth of Jesus and Paul, even if “extremely indefinite” to the non-Christian. 1 But Moulton 2 agrees with Sanday and Headlam (Ro. 6:11) that the mystic indwelling is Christ’s own idea adopted by Paul. The classic discussion of the matter is, of course, Deissmann’s *Die Neutestamentliche Formel “in Christo Jesu”* (1892), in which by careful study of the LXX and the N. T. he shows the depth and originality of Paul’s idea in the use of ἐν Χριστῷ. Moulton 3 doubts if even here the N. T. writers make an innovation, but the fulness of the Christian content would amply justify them if they did have to do so. See ἐν αὐτῷ ἐκτίσθη τὰ πάντα (Col. 1:16). As further examples cf. Ro. 9:1; 14:14; Ph. 3:9; Eph. 4:21.

7. As a Dative? One may hesitate to say dogmatically that in 1 Cor. 14:11, ὁ λαλῶν ἐν ἑμοί βάρβαρος, we have ἐν used merely as the dative (cf. εἰς in modern Greek). But τῷ λαλοῦντι βάρβαρος in the same verse looks that way, 4 and Moulton 5 cites τοῖς ἐν θεῷ πατρὶ ἡγομένοις (Ju. 1) and reminds us of the common ground between the locative and dative in Sanskrit where the locative appears with verbs of speaking. Cf. also ἐν ἑμοί in Ph. 1:26. Note also ἐν ἑμοί κύριε in late LXX books (Thackeray, *Gr.*, p. 14). One may compare ἐποίησαν ἐν αὐτῷ (Mt. 17:12). There

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).
seems no doubt that ὀμολογέω ἐν (Mt. 10:32=Lu. 12:8) is due to literal translation of the Aramaic. The use of ἐν with ἰμνύναι (Mt. 5:34) is similar to the Hebrew.

8. Accompanying Circumstance. It is needless to multiply unduly the various uses of ἐν, which are “innumerable” in the LXX where its chief extension is due to the imitation of the Hebrew. But by no means all these uses are Hebraic. Thus ἐν for the idea of accompanying circumstance is classical enough (cf. ἐν δόλοις ἐδόνα, Xen. Anab. 5. 9, like English “The people are up in arms”), though the LXX abounds with it. It occurs also in the papyri. Cf. Tb.P. 41 (119 B.C.). Here ἐν draws close to μετά and σύν in usage. Note, for instance, ἐν δέκα χιλιάσιν ὑπαντήσαι (Lu. 14:31), ἤλθεν ἐν ἀγίας μυριάσιν αὐτοῦ (Ju. 14), ἐν πᾶσιν ἄναλαβόντες (Eph. 6:16), ἐν στολαῖς περιπατέαν (Mk. 12:38), ἔρχονται ἐν ἐνδύμασιν προβάτων (Mt. 7:15), ἐν λευκοῖς καθεξομένους (Jo. 20:12), μετεκαλέσατο—ἐν ψυχαῖς (Ac. 7:14), ἀσέρχεται ἐν αἵματι (Heb. 9:25), ἐν τῷ θαυματί καὶ ἐν τῷ αἵματι (1 Jo. 5:6), ἐν ράβδῳ ἐλθω (1 Cor. 4:21), ἐν πληρώματι (Ro. 15:29), ἐν κέλευσματι (1 Th. 4:16), περιβαλέσται ἐν ἱμάτιοις (Rev. 3:5; cf. Mt. 11:8). Note also ἐν μυστηρίῳ λαλούμεν (1 Cor. 2:7) where ‘in the form of’ is the idea. These examples show the freedom of the preposition in this direction. Somewhat more complicated is a passage like ἄνθρωπος ἐν πνεύματι ἀκάθαρτῳ (Mk. 1:23), which Blass properly compares with πνεῦμα ἀκάθαρτον ἔχει (Mk. 3:30), and the double use in Ro. 8:9, ὑμεῖς δὲ οὐκ ἔστε ἐν σαρκί ἄλλα ἐν πνεύματι, εἴπερ πνεῦμα θεοῦ οὐκ ἔχει (followed by πνεῦμα Χριστοῦ οὐκ ἔχει). The notion of manner is closely allied to this idiom as we see it in ἐν δικαιοσύνῃ (Ac. 17:31), ἐν παρθησίᾳ (Col. 2:15), ἐν τάχει (Lu. 18:18, cf. ταχύ and ταχέως). Cf. Mt. 6:18 and Jo. 18:20.

9. ‘Amounting to,’ ‘Occasion,’ ‘Sphere.’ Moultone2 considers Mk. 4:8, ἔφερεν εἰς τρίακοντα καὶ ἐν ἐξήκοντα καὶ ἐν ἕκαστον (note similarity here between εἰς and ἐν), as showing that ἐν sometimes is used in the sense of ‘amounting to.’ Cf. also Ac. 7:14 (LXX). The idiom is present in the papyri. Moultone cites προῖκα ἐν δραχμαῖς ἐνακοσίως, B.U. 970 (ii/a.d.), τὴν πρώτην δόσιν ἐν δραχμαῖς τεσσαράκοντα, O.P. 724 (ii/b.c.), He. Prol. p. 76) quotes Hb. P. 42 (iii/b.c.), δόσομεν ἐν ὀφειλήματι, as “predicative” use of ἐν. He compares Eph. 2:15, ἐν δόγμασιν, ‘consisting in decrees.’ Certain it is that in Rev. 5:9 ἡγούμενος ἐν τῷ αἵματι σου we have price indicated by ἐν. Cf. Ro. 3:25; Ac. 20:28. In a few examples ἐν gives the occasion, as ἐφοβηθεν ἐν τῷ λόγῳ τοῦτω (Ac. 7:29), ἐν τῇ πολυλογίᾳ αὐτῶν εἰσκουσώσθησαν (Mt. 6:7), ἐν τούτῳ (Jo. 16:30). Note also λατρεύω ἐν τῷ πνεύματι μου ἐν τῷ εὐαγγελίῳ (Ro. 1:9) where the second ἐν suggests ‘in the sphere of.’ Cf. ἐν μέτρῳ (Eph. 4:16), ἐν τούτοις ἑσθι (1 Tim. 4:15), ἐν νόμῳ ἡμαρτὼν (Ro. 2:12). In simple truth the only way to know

6 Ib., p. 104.
7 C. and S., Sel., etc., p. 82. Cf. Thack., Gr., p. 47, for the frequent use of ἐν of accompanying circumstance in the LXX.

1 Gr. of N. T. Gk., p. 131.
2 Prol., p. 103.
the resultant meaning of ἐν is to note carefully the context. It is so simple in idea that it appears in every variety of connection.

10. Instrumental Use of ἐν. See previous discussion under Cases. Blass\(^4\) considers it due to Hebrew influence as does Jannaris.\(^{Page 590}\) The ancient Greek writers did use ἐν with certain verbs as the N. T. καίω ἐν πυρί (Rev. 17:16, some MSS.), ἀποκάλυψις ἐν πυρί (1 Cor. 3:13), ὄλιγος ἐν τίνι (Mt. 5:13), μετρέω ἐν ὧν μέτρῃ (Mt. 7:2).\(^5\) The construction in itself is as old as Homer.\(^3\) Cf. ἐν ὅθεν ἐξῆσθαι (Il. i. 587), ἐν πυρί καίειν (Il. xxiv. 38). It is abnormally frequent in the LXX under the influence of the Hebrew בְּ,\(^4\) but it is not so common in the N. T. Besides, the papyri show undoubted examples of it.\(^5\) Moulton finds Ptolemaic examples of ἐν μαχαίρῃ, Tb.P. 16 al.; διαλύειν ἐν τῷ αἵματί Par.P. 28 (ii/b.c.), while 22 has τῷ λίμῷ διαλύειν and note τοὺς ἐνεσχημάτως ἐν τισιν ἄγνομαιν, Par.P. 63 (ii/b.c.). We can only say, therefore, that the LXX accelerated the vernacular idiom in this matter. The Aramaic probably helped it on also. The blending of the instrumental with the locative in form facilitated this usage beyond a doubt,\(^6\) and the tendency to use prepositions abundantly helped also.\(^7\) But even so one must observe that all the N. T. examples of ἐν can be explained from the point of view of the locative. The possibility of this point of view is the reason why ἐν was so used in the beginning. I pass by examples like βαπτίζω ἐν ὑδάτι, βαπτίσει ἐν πνεύματι καὶ πυρί (Mt. 3:11) as probably not being instances of the instrumental usage at all. But there are real instances enough. Take Lu. 22:49 ἐκ πατάξομεν ἐν μαχαίρῃ; Here the smiting can be regarded as located in the sword. To be sure, in English, we translate the resultant idea by ‘with,’ but ἐν in itself does not mean ‘with.’ That resultant idea can only come in the proper context. So ἐν τῷ Bεβελεθήναι ἠρχοντι τῶν δαιμονίων ἐκβάλλει (Mt. 12:24). Here the casting out is located in the prince of demons. Cf. κρίνω ἐν ὄναρ (Ac. 17:31), ἐν βραχίονι (Lu. 1:51), ἐν ὀλίγῳ (Mk. 14:1), ἐν φόνῳ μαχαίρῃς (Heb. 11:37). The Apocalypse has several examples, like πολέμησον ἐν τῇ ὀμοφραίᾳ (2:16), ἀποκτείνας ἐν ὀμοφραίᾳ καὶ ἐν λίμῳ καὶ ἐν θανάτῳ (6:8), ἐν μαχαίρῃ ἀποκτείνα (13:10). In Rev. 14:15, κράζων ἐν φωνῇ, we do not necessarily have to explain it in this manner. Cf. Ro. 2:16; 2:28; 1 Jo. 2:3; Jas. 3:9. On the whole there is little that is out of harmony with the vernacular κοινή in the N. T. use of ἐν, though Abbott\(^8\)

thinks that the examples [Page 591] of Deissmann and Moulton do not exactly parallel the N. T. instrumental use. For repetition of ἐν see 2 Cor. 6:4 ff.

(f) Ἐις. There is nothing to add to the etymology of ἐις as compared with that of ἐν save that ἐις is known to be really ἐν-ς as we find it in the inscriptions of Argos, Crete, etc. So Ἐις Ἀθηναίων.¹ This σ seems to have been added to ἐν by analogy to ἐξ.² Usually with the disappearance of ν the form was ἐις, but Thucydides, like the Ionic and Doric writers and the poets, preferred ἐις which was current in the inscriptions before 334 B.C.³ So ἰς appears in a Phrygian Christian inscription.⁴ But the Ἀeolic ἐις gradually drove out all the other forms.⁵ Originally, therefore, ἐν alone existed with either locative or accusative, and ἐις appears nowhere else save in the Greek. The classic use of ἐις Αἴδου (some MSS. in Ac. 2:27, 31 and reading in Is. 14:15) is the true genitive, according to Brugmann (Griech Gr., p. 439), 'in the sphere of Hades.'⁶

1. Original Static Use. In Homer ἐισ-κατάστασι means merely to lie within. But, though ἐις really means the same thing as ἐν, it was early used only with the accusative, and gradually specialized thus one of the usages of ἐν. The locative with ἐν, however, continued to be used sometimes in the same sense as the accusative with ἐις. The accusative indeed normally suggests motion (extension), and that did come to be the common usage of ἐις plus the accusative. The resultant idea would often be ‘into,’ but this was by no means always true. Ἐις is not used much in composition in the N. T. and always where motion is involved save in the case of ἐις-ἀκούω where there seems little difference between ἐις and ἐν (cf. 1 Cor. 14:21; Mt. 6:7). In itself ἐις expresses the same dimension relation as ἐν, viz. in.⁶ It does not of itself mean into, unto, or to. That is the resultant idea of the accusative case with verbs of motion. It is true that in the later Greek this static use of ἐις with the idea of rest (in) is far more common than in the earlier Greek. This was naturally so, since in the vernacular ἐις finally drove ἐν out entirely and did duty for both, just as originally ἐν did. The only difference is that ἐις used the one case (accusative), whereas ἐν used either accusative [Page 592] or locative. But¹ then the accusative was once the only case and must be allowed large liberty. And even in the classic writers there are not wanting examples. These are usually explained² as instances of “pregnant” construction, but it is possible to think of them as survivals of the etymological idea of ἐις (ἐν-ς) with only the general notion of the accusative case. Certainly the vernacular laid less stress on the

1 Solmsen, Inscr. Graecae, p. 46.
5 Cf. H. W. Smyth, p. 80, Transactions of Am. Philol. Assoc. for 1887. J. Fraser (Cl. Quarterly, 1908, p. 270) shows that in Cretan we have ἐνς ὅρθόν (before vowel), but ἐς τόν (before consonant).
1 Jann., Hist. Gk. Gr., p. 376.
distinction between εἰς and ἐν than the literary language did. Though εἰς falls behind ἐν in the N. T. in the proportion of 2 to 3, still, as in the papyri and the inscriptions and the LXX, a number of examples of static εἰς occur. Some of these were referred to under ἐν, where the “pregnant” use of ἐν for εἰς occurs. Hatzidakis gives abundant examples of ἐν as εἰς and εἰς as ἐν. Cf. εἰς Αλεξάνδρειᾶν ἔστη, B. U. ii. 385; εἰς τύβον κέμα, Kaibel Epigr. 134; κινδυνεύσαντος εἰς θάλασσαν, B. U. 423 (ii/A.D.).

Deissmann (Light, p. 169) notes Paul’s κινδύνον ἐν θαλάσσῃ and that the Roman soldier in the last example writes “more vulgarly than St. Paul.” In these examples it is not necessary nor pertinent to bring in the idea of ‘into.’ ‘Blass’ comments on the fact that Matthew (but see below) has no such examples and John but few, while Luke has most of them. I cannot, however, follow Blass in citing Mk. 1:9 ἐβαπτίσθη εἰς τὸν Ἰορδάνην as an example. The idea of motion in βαπτίζω suits εἰς as well as ἐν in Mk. 1:5. Cf. νίψαι εἰς (Jo. 9:7). But in Mt. 28:19, βαπτίζοντες εἰς τὸ ὄνομα, and Ro. 6:3 f., εἰς Χριστὸν and εἰς τὸν θάνατον, the notion of sphere is the true one. The same thing may be true of βαπτισθήτω εἰς ὄψεων τῶν ἄμαρτων (Ac. 2:38), where only the context and the tenor of N. T. teaching can determine whether ‘into,’ ‘unto’ or merely ‘in’ or ‘on’ (‘upon’) is the right translation, a task for the interpreter, not for the grammarian. One does not need here to appeal to the Hebrew הובטח as Tholuck does (Beiträge zur Spracherklärung des N. T., p. 47 f.). Indeed the use of ὄνομα for person is common in the papyri (Deissmann, Bible Studies, p. 196 f.). Deissmann gives examples of εἰς ὄνομα, ἐπὶ ὄνοματος, and the mere locative ὄνοματι, from the papyri. The static use of εἰς is seen in its distributive use like ἐν in Mk. 4:8, εἰς τριάκοντα καὶ ἐν ἔξηκοντα καὶ ἐν ἐκατόν. But there are undoubted examples where only ‘in,’ ‘on’ or ‘at’ can be the idea. Thus [Page 593] κηρύσσων εἰς τὰς συναγωγάς (Mk. 1:39) where there is some excuse for the “pregnant” explanation because of θλῦν. So ἐλθὼν κατάφωνεν εἰς πόλιν (Mt. 2:23; 4:13), but note only παρώκησεν εἰς γῆν (Heb. 11:9) and ἐφέστη εἰς Ἀζωτον (Ac. 8:40). Cf. καθημένου εἰς τὸ ὄρος (Mk. 13:3), ὁ εἰς τὸν ἄγρον (Mk. 13:16), τὸς εἰς τὸν ὠκόν (Lu. 9:61), εἰς τὴν κοίτην εἰσίν (Lu. 11:7), ἐγκαταλείψεις εἰς ἄδην (Ac. 2:27; cf. verse 31), τοὺς εἰς μακρὰν (2:39), εἰς χολάν—ὄντα (Ac. 8:23), ἐπέσχεν χρόνον εἰς τὴν Ἀσίαν (Ac. 19:22), ὕποθενεν εἰς Ἰερουσαλήμ (Ac. 21:13), εἰς Ἰορμήν μαρτυρήσα (Ac. 23:11), τηρήσας εἰς Κασαρίαν (Ac. 25:4), ὁ ὦν εἰς τὸν ἱλαρόν (Jo. 1:18), οἱ τρεῖς εἰς τὸ ἐν εἰσίν (1 Jo. 5:8), εἰς ἧν στήθη (1 Pet. 5:12). Nor is this quite all. In some MSS. in Mk. 2:1 we have εἰς οἰκόν ἔστην (NBBDL ἐν οἰκώ). In Ac. 2:5 the MSS. vary between εἰς and ἐν as in Mk. 10:10. Another instance is found in Eph. 3:16, κραταωθηναι εἰς τὸν ἔσω ἄνθρωπον. Cf. Jo. 20:7; Mk. 13:9. But in ἔστη εἰς τὸ μέσον (Jo. 20:19, 26) we have motion, though ἔστη εἰς τὸν αὐγαλόν (Jo. 21:4) is an example of rest. Jo. 17:23 is normal. In Mt. 10:41 f., εἰς ὄνομα προφήτου (μαθητοῦ, δικαίου) one can see little difference between εἰς and ἐν. Certainly this is true of Mt. 12:41, μετανόησαν εἰς

Tholuck THOLUCK, Beiträge zur Spracherklärung des N. T.
κύριγμα Ἰωνᾶ, where it is absurd to take εἰς as ‘into’ or ‘unto’ or even ‘to.’ See also συνηγμένοι εἰς τὸ ἐμὸν ὅνομα (Mt. 18:20).

2. With Verbs of Motion. But the usual idiom with εἰς was undoubtedly with verbs of motion when the motion and the accusative case combined with εἰς (‘in’) to give the resulta of ‘into,’ ‘unto,’ ‘among,’ ‘to,’ ‘towards’ or ‘on,’ ‘upon,’ according to the context. This is so common as to call for little illustration. As with ἐν so with εἰς, the noun itself gives the boundary or limit. So εἰς τὴν οἰκίαν (Mt. 2:11), εἰς τὸ ὅρος (5:1), εἰς τὸ πραπτόριον (27:27), εἰς ἀλάσσαν (17:27), εἰς τὸν οὐρανόν (Rev. 10:5), εἰς Ἕβην (Ac. 22:21), εἰς περισσόν (Mt. 6:13), εἰς τὸ μνημεῖον (Jo. 11:38), εἰς τὴν ὄδον (Mt. 11:8), εἰς τοὺς μαθητάς (Lu. 6:20), εἰς τοὺς λῃστάς (Lu. 10:36), εἰς κλίνην (Rev. 2:22), εἰς τὸ δεξία (Jo. 21:6), εἰς τὴν κεφαλὴν (Mt. 27:30), εἰς τὰς ἀγκάλας (Lu. 2:28), εἰς ἄλον τὸν κόσμον (Mk. 14:9), εἰς ὑμῖς (1 Th. 2:9). These examples fairly illustrate the variety in the use of εἰς with verbs of motion. For idea of ‘among’ see Jo. 21:23. It will be seen at once, if one consults the context in these passages, that the preposition does not of itself mean ‘into’ even with verbs of motion. That is indeed one of the resultant meanings among many others. The metaphorical uses do not differ in principle, such as εἰς ὅλιμν (Mt. 24:9), συνάγειν εἰς Ἔν (Jo. 11:52), εἰς τὴν ζωήν (Mt. 18:8), εἰς κρίσιν (Jo. 5:24), εἰς ὑπακοήν (2 Cor. 10:5), [Page 594] εἰς χήρας (Mt. 17:22), etc. For many interesting examples of ἐν and εἰς see Theimer, Die Präpositionen εἰς, ἐν, ἐκ in N. T., Beiträge zur Kenntnis des Sprachgebrauches im N. T., 1896.

3. With Expressions of Time. Here εἰς marks either the limit or accents the duration expressed by the accusative. Thus in 2 Tim. 1:12 we find φιλάξει εἰς Εκείνην τὴν ἡμέραν where ‘until’ suits as a translation (cf. ‘against’). Cf. Ph. 1:10, εἰς ἡμέραν χριστοῦ. Not quite so sharp a limit is εἰς τὴν αὔριον (Mt. 6:34). Cf. 1 Pet. 1:11. There is little that is lost by the preposition to the accusative in such examples as εἰς τὸ μέλλον (Lu. 13:9), εἰς τὸν αὐθαίνα (Mt. 21:19), εἰς γενεάς καὶ γενεάς (Lu. 1:50), εἰς τὸ διμηνίκες (Heb. 7:3), etc. Cf. Lu. 12:19. But a more definite period is set in cases like εἰς τὸν καιρόν (Lu. 1:20), εἰς τὸ μεταξὺ σάββατον (Ac. 13:42).

4. Like a Dative. It is not strange to see εἰς used where disposition or attitude of mind is set forth. Indeed already εἰς and the accusative occur where the dative alone would be sufficient. This is especially true in the LXX, but the papyri show examples also. Cf. οἱ εἰς Χριστὸν (Mart. Pauli, II). Moulton (ProL., p. 246) cites Tb. P. 16, οὐ λήγοντες τῇ [εἰς] ὑποτεύχαι, “where εἰς actually stands for the possesive genitive.” One must remember the complete disappearance of the dative in modern Greek1 vernacular. Note τῆς λογίας τῆς εἰς τοὺς σχίσους (1 Cor. 16:1), πλουτὸ εἰς πάντας (Ro. 10:12), πλονεύσω εἰς (Ph. 4:17), ἕκμοσινοις ποιήσων εἰς τὸ ἔθνος (Ac. 24:17), λειτουργόν εἰς τὴ ἐθνω (Ro. 15:16), ἀποβλέπω εἰς (Heb. 11:26), λέγει εἰς (Ac. 2:25), ὠμοῦ εἰς (Mt. 5:34 f.), τὸ αὐτὸ εἰς ἄλληλος (Ro. 12:16), πιστεύειν εἰς (Mt. 18:6), χριστός εἰς (Eph. 4:32), δημάπην εἰς (Ro. 5:8), etc. If one entertains hostile feelings the resultant idea with εἰς will be ‘against,’ though the word does not of itself mean that. So in Lu. 12:10 εἰς τὸν ὦν τοῦ ἄνθρωπο (cf. κατὰ in Mt. 12:32) and εἰς

---

1 Moulton, ProL., p. 63; C. and S., p. 82; W.-Th., p. 396 f.
τὸ ἄγιον πνεῦμα βλασφημήσαντι, βλάσφημα εἰς (Ac. 6:11), ἐπιβουλή εἰς (Ac. 23:30), ἰδαρτάνειν εἰς (Lu. 15:18), etc. As a matter of fact all that εἰς really accentuates here is the accusative case (with reference to) which happens to be in a hostile atmosphere. But that is not true of such examples as ἣθετσαν εἰς ἑαυτοὺς (Lu. 7:30), εἰς τὴν ἐσαγγελίαν τοῦ θεοῦ (Ro. 4:20), etc. For ἤσονται εἰς in Jo. 19:37 see Abbott, Johannine Grammar, p. 245. In the modern Greek εἰς has displaced the dative in the vernacular.

5. *Aim or Purpose.* Sometimes indeed εἰς appears in an atmosphere where aim or purpose is manifestly the resultant idea. [Page 595] Thus we may note ἐλθὼν εἰς τὴν Τριφάδα εἰς τὸ εὐαγγέλιον (2 Cor. 2:12). Here the second εἰς suggests the purpose of his coming. Cf. also τοῦτο ποιέτες εἰς τὴν ἐμὴν ἀνάμνησιν (1 Cor. 11:24), where εἰς does not mean ‘for,’ though that is clearly the resultant idea. So with εἰς μαρτύρων αὐτοῦ (Mt. 8:4). Take Ro. 11:36, for instance, where εἰς αὐτόν is set over against εἰς αὐτοῦ. Cf. again εἰς δοξάζων θεοῦ in Ph. 1:11, εἰς φόβον in Ro. 8:15, εἰς ἔνδειξιν in Ro. 3:25, εἰς ζωήν ἀλώνων in Jo. 6:27. One may not doubt also that this is the idea in Mt. 26:28, τὸ περὶ πολλῶν ἔκρυνόμενον εἰς ἄφεσιν ἁμαρτιῶν. But it by no means follows that the same idea is expressed by εἰς ἄφεσιν in Mk. 1:4 and Ac. 2:38 (cf. Mt. 10:41), though that may in the abstract be true. It remains a matter for the interpreter to decide. One must not omit here also the frequent use of εἰς τὸ and the infinitive to express design. Cf. εἰς τὸ έξαίρετο in Mt. 20:19, εἰς τὸ σταυροθῆκην in 26:2. See chapter on Verbal Nouns for further discussion. Cf. also εἰς τοῦτο (Mk. 1:38), εἰς αὐτό τοῦτο (2 Cor. 5:5), ἄγοραὲ εἰς (Jo. 13:29), εἰς ἀπάντησιν (Mt. 25:6), εἰς ὑπάντησιν αὐτῷ (Jo. 12:13). Cf. ξύλων εἰς ἐλαιοῦνας μου (Fay. P., 50 A.D.), ‘sticks for my olive-gardens’ (Deissmann, Light, etc., p. 157), εἰς Ἴππον ἑνόξαμενον (P. Fl.-Pet., ii. xxv, 226 B.C.), ‘for a sick horse’ (Deissmann, B. S., p. 118). Radermacher (N. T. Gr., p. 112) cites ὑκοδόμησαν—εἰς ἑαυτόν (83 N. Chr. Wadd. Inscr., 2614).

6. *Predicative Use.* But there remains one more use of εἰς which, though good κοινῆ, was greatly accelerated by the influence of the LXX. 1 This is where εἰς occurs in the predicate with εἰμί or γίνομαι, κτλ. Radermacher (N. T. Gr., p. 16 f.) quotes ἐν μὴ εἰς γνωσμὸν γέννηται, P.Fay. 119, 276 (100 A.D.); Heliod., Ἁθιῷ, VI, 14, τὴν πάροικαν εἰς καθέδραν ποιησάμην; and even the Attic author Ἀπία 114, 5 H, γνωστάς ὀπλίσασας ὧς εἰς ἄνδρας. Thus in Lu. 3:5, ἔσται τὰ σκολιὰ εἰς εὐθείαις (Is. 40:4). So ἔσεσθε μοι εἰς υἱός καὶ θυγατέρας (2 Cor. 6:18, LXX); ἔσονται οἱ δῶο εἰς σάρκα μιᾶν (Mt. 19:5; cf. Gen. 2:24); ἢ λύμη ὑμῶν εἰς χαρὴν γενήσεται (Jo. 16:20). Cf. Lu. 13:19. As already remarked, this predicative use of εἰς appears in the papyri 2 and in the Apostolic Fathers, 3 but not with [Page 596] the frequency that we find it in the LXX.

---

1 This can no longer be called a Hebraism, since the pap. have it. Moulton, Prol., p. 14. Cf. εἰς ἅπαντας σιν, Tb. P. 43 (ii/b.c.). Rouffiac (Recherches, p. 28) finds εἶναι εἰς φυλάκην in inscr. of Priene 50, 39 (ii/b.c.).

2 C. and S., p. 81 f.

Cf. pp. 481 f. Blass credits είς in ὑπαγε είς εἰρήνην (Mk. 5:34) to the Hebrew through the LXX (cf. 1 Sam. 1:17). Cf. also είς διαταγὰς ἀγγέλων (Ac. 7:53) where είς is much like ἐν. In general therefore, as with ἐν so with είς we must hark back to first principles and work out to the resultant idea by means of the context and the history.

7. Compared with ἐπί, παρά and πρός. The growth in the use of είς is shown by its appearance where ἐπί or πρός would be expected in the older Greek. Cf. ἐκχέει είς πόλιν (Jo. 4:5), where the point is not ‘into,’ but ‘to.’ So 11:31, ὑπάγει είς τῷ μνημείῳ. In 11:38 D has ἐπί, not είς. So in Mk. 3:7, ἀνεχώρησεν πρὸς τὴν θάλασσαν, DHP have είς. Cf. Mk. 2:13, ἀρχεται εἰς πόλιν (Jo. 4:5), where the point is not ‘into,’ but ‘to.’ So 11:31, ὑπάγει εἰς τὸ μνημείον.

1. Meaning. The word means ‘out of,’ ‘from within,’ not like ἀπό or παρά. It stands in contrast to ἐν (ἐν-ς). In the modern Greek vernacular ἄπο has displaced ἐκ except in the Epirot ἄχ or ὅχ. But in the N. T. ἐκ is still ahead of ἄπο. The indifference of the scribes as to which they used is shown in the MS. variations between ἐκ and ἄπο as in Mt. 7:4; 17:9; Mk. 16:3. The writings of John (Gospel, Epistles, Revelation) use ἐκ more frequently than any other N. T. books. In the late Greek (eighth century A.D.) we find the accusative with ἐκ, and this was the last usage to survive. Brugmann indeed thinks that ἐκ may even rarely use the genuine genitive besides the ablative, but I doubt this. But it is certain that ἐκ used the locative in Arcadian, Cypriotic and Pamphylian dialects after analogy of ἐν (Buck, Greek Dialects, p. 101 f.).

2. In Composition. It is very common and sometimes with the “perfective” idea. So we note ἐξ-απορούμενοι contrasted with ἀπορούμενοι in 2 Cor. 4:8. Cf. also ἐκ-διαπανάω (2 Cor. 12:15). [Page 597] ἐκ-διηγόμαι (Ac. 13:41), ἐκ-θαμβέω (Mk. 9:15), ἐκ-θαυμάζω (Mk. 12:17), ἐκ-καθαίρω (2 Tim. 2:21), ἐκ-εραυνάω (1 Pet. 1:10). The other uses in composition follow the root-idea of the word closely, meaning ‘out of,’ ‘away,’ etc., like ἐξέρχομαι, ἐκβάλλω, etc. ἐκ has a causative force in

---

1 Gr. of N. T. Gk.
3 Moulton, Prol., p. 102. On p. 246 he cites Psichari as saying that ἐκ τῶν is still “une forme vivante.”
4 Simcox, Lang. of the N. T., p. 145.
5 Blass, Gr. of N. T. Gk., p. 126.
6 Jann., Hist. Gk. Gr., p. 381.
7 Griech. Gr., p. 440.
9 Moulton, Prol., p. 237.
composition sometimes as in ἐξαμαρτάνω, ‘cause to sin’ (LXX), and ἐκφοβέθη (2 Cor. 10:9).

3. Place. The preposition naturally is common with expressions of place. The strict idea of from within is common, as in φωνῇ ἐκ τῶν οὐρανῶν (Mt. 3:17), ἐκ τοῦ ὄφθαλμου (Lu. 6:42), ἐκ τῶν μνημείων (Mt. 8:28), etc. Often it appears in contrast with εἰς as in ἐκ τῆς Ιουδαίας εἰς τὴν Γαλιλαίαν (Jo. 4:47), τοῦ ἑκ σκότους ὑμᾶς καλέσαντος εἰς τὸ φῶς (1 Pet. 2:9), where the metaphorical follows the literal usage. In Lu. 6:42 ἐκ τοῦ ὄφθαλμου is set in opposition to εἰς τῷ ὄφθαλμῳ. In Ac. 8:38 f. we have both εἰς τὸ ὄφον and ἐκ τοῦ ὄπωτος. So in Mk. 1:10 ἀναβαίνων ἐκ τοῦ ὄπωτος a previous presence ἐν τῷ ὄπωτοι is implied. In a case like καταβαινόντος ἐκ τοῦ ὄρους (Mt. 17:9; parallels in Mk. and Lu. ἀπὸ) we are not to suppose that they had been in a cave, but merely up in the mountain (cf. English idiom), the term “mountain” including more than the earth and rock. Cf. εἰς τὸ ὄρος in Mt. 5:1. But in Mt. 8:1 we merely have ἐπὶ τοῦ ὄρους. Note likewise ὥρις ἐκ τῆς κεφαλῆς (Lu. 21:18), ἐκ τῶν χειρῶν (Ac. 12:7). Thus we explain also κρεμάμενον τὸ θηρίον ἐκ τῆς χειρὸς αὐτοῦ (Ac. 28:4), ἐκ ἐξεῖδων (Mt. 20:21), ἐκ ἐκαταλαγής (Mk. 15:39), etc. It is not necessary to record all the verbs with which ἐκ occurs. In Lu. 5:3 ἐξίδασκεν ἐκ τοῦ πλοίου the teaching is represented as proceeding out of the boat (Jesus was in the boat). One may compare with this ἑγείρεται ἐκ τοῦ δείπνου (Jo. 13:4), ἀναλύει ἐκ τῶν γάμων (Lu. 12:36), ἀποκολούθει τὸν λίθον ἐκ τῆς θύρας (Mk. 16:3), διασωθέντα ἐκ τῆς θαλάσσης (Ac. 28:4).

4. Time. With expressions of time ἐκ gives the point of departure, like ἐκ νεότητος (Mk. 10:20), ἐξ ἀρχῆς (Jo. 6:64), ἐξ ικανῶν χρόνων (Lu. 23:8), ἐκ τοῦ αἰῶνος (Jo. 9:32), ἐκ πολλῶν ἐτῶν (Ac. 24:10), ἐκ τοῦτοι (Jo. 6:66). In cases where succession is involved the point of departure is really present. Thus with ἐκ δευτέρου (Jo. 9:24), ἐκ τρίτου (Mt. 26:44), ἡμέραν ἐξ ἡμέρας (2 Pet. 2:8). Other adverbial phrases have a similar origin as with ἐκ μέρους (1 Cor. 12:27), ἐκ μέτρου (Jo. 3:34), ἐξ ἀνάγκης (2 Cor. 9:7), ἐκ συμφόνου (1 Cor. 7:5). Cf. ἐκ πάλαι.

5. Separation. The use of ἐκ for the idea of separation is merely the fuller expansion of the ablative. Thus with ἐξελύοντος ἐκ πάντων (1 Cor. 9:19), ἄναπαυμένον ἐκ τῶν κοπίων (Rev. 14:13), υψωθῷ ἐκ τῆς γῆς (Jo. 12:32), ἐπιστρέφειν ἐκ τῆς ἐντολῆς (2 Pet. 2:21), ἀρετῆς ἐκ τοῦ κόσμου [Page 598] (Jo. 17:15). Cf. Jo. 17:6. Abbott1 doubts if in the LXX and John ἐκ always implies previous existence in the evils from which one is delivered when used with σώζω and τηρέω. Certainly in Jo. 17 ἐκ occurs rather frequently, but τηρήσεις ἐκ τοῦ πονηροῦ (17:15) may still imply that the evil one once had power over them (cf. Jesus’ prayer for Peter). Certainly in Jo. 12:27, σώζον μὲ ἐκ τῆς ὅρας ταύτης, Jesus had already entered into the hour. Cf. συνάψαμεν σόζειν ἐκ θανάτου (Heb. 5:7) where ἐκ may accentuate the power of God (δυνάμενον), though he had not yet entered into death. In Rev. 3:10 τηρήσω ἐκ τῆς ὅρας τοῦ πονηροῦ we seem to have the picture of general temptation with the preservation of the saints. Cf. ἐξελύσας in 1 Cor. 10:13. So in Mt. 13:41 συλλέξουσιν ἐκ τῆς βασιλείας the idea is ‘out from among,’ just as cheat or cockle grows in among the wheat in the same field. The two kingdoms coexist in

---

1 Joh. Gr., p. 251 f.
the same sphere (the world). The notion of separation is common with a number of verbs like ἐξολεθρεύω ρευμάτοσα ἐκ τοῦ λαοῦ (Ac. 3:23), ἠγερεν ἐκ νεκρῶν (Jo. 12:1), ἢ ἀνάστασις ἢ ἐκ νεκρῶν (Lu. 20:35), ἐξελεξάμην ἐκ τοῦ κόσμου (Jo. 15:19), etc. This all seems simple and clear. Not quite so apparent is νικώντας ἐκ τοῦ θηρίου (Rev. 15:2). Thayer and Blass both take it like τηρέω ἐκ, 'victorious over' (by separation). Cf. μετενόησαν ἐκ τῶν ἔργων (Rev. 16:11) and Jo. 3:25, ζήτησις ἐκ.

6. Origin or Source. Equally obvious seems the use of ἐκ for the idea of origin or source. Thus ἐξήλθον ἐκ τοῦ πατρὸς (Jo. 16:28), σύχ εἰμὶ ἐκ τοῦ κόσμου (17:14, 16), ἐκ τῶν λίθων τοῦτον ἔχειρα τέκνα (Mt. 3:9). Naturally this usage has a wide range. Cf. ἐκ Ναζαρέτ (Jo. 1:46 ἐκ), ἐκ πόλεως (Jo. 1:44), ἐκ τῆς Σαμαρίας (Jo. 4:7), ἐξ ἔβραιος ἐξ ἔβραιών (Ph. 3:5), ἐκ τῆς γῆς (Jo. 3:31), ἐκ θεοῦ (Ph. 3:9), ἐκ ἐθνῶν (Gal. 2:15), ἐκ πλάγες (1 Th. 2:3), ἐκ πολλής θλίψεως (2 Cor. 2:4), τῇ ἐς ἣμῶν ἐν υἱὸν ἡγάπη (2 Cor. 8:7). Cf. Lu. 12:15. This list is by no means exhaustive, but it is at least suggestive. One may note here στέφανον ἐς ἀκανθῶν (Mt. 27:29), where the material is expressed by ἐς.

7. Cause or Occasion. Closely allied to the above cause which may also be conveyed by ἐκ. Thus note τὸ ἐς ὑμῖν ἐκ Ro. 12:18, ἐμπνεύστω ἐκ τοῦ πνεύματος ὑμῶν ἐκ πίστεως (Ro. 5:1), ζητεῖται ἐκ ἐργῶν (Gal. 3:10), ἐκ τοῦ εὐαγγελίου χῦν (1 Cor. 9:14), ἐς θεσποντες (2 Cor. 13:4), ἐκ τοῦ μαμοῦδου (Lu. 16:9). Cf. also ἐπέθανεν ἐκ τῶν ὑδάτων (Rev. 8:11). Perhaps here belongs ἐπηλημέρηθεν ἐκ τῆς ὁμοθῆς (Jo. 12:3). Cf. γεμίζω ἐκ in Jo. 6:13 (Abbott, Johannine Gr., p. 253). At any rate a [Page 599] number of verbs use ἐκ in this general sense like ὄφελεω (Mk. 7:11), ζημιούσατε (2 Cor. 7:9), δικηθεὶσα (Rev. 2:11), πλοῦτα (Rev. 18:3), χορτάζεσθαι (Rev. 19:21), κοπαίω (Jo. 4:6), ἐς (Ro. 1:17), etc. Cf. ἐβλασφημήσαν τῶν θεῶν ἐκ τῆς πληγῆς (Rev. 16:21). Indeed ἐκ with the notion of price does not differ radically from this idiom. Thus ἡγοράσαν ἐκ αὐτῶν τῶν ἄγγελων (Mt. 27:7), ἐκτίσετο ἐκ μισθοῦ (Ac. 1:18), συμφωνήσας ἐκ διηνέργου (Mt. 20:2). ἐκ διαταγῆς, ‘by order,’ was a regular formula in the papyri (Deissmann, Light, etc., p. 87). Deissmann, Bible Studies, p. 248, finds the idiom ἐκ τῶν τεσσάρων ἰδέων (Mt. 13:27) in the papyri as well as in Zech. 11:6.

8. The Partitive Use of ἐκ. It is not infrequent, marking an increase over the earlier idiom.1 Thus in Jo. 16:17 ἐκ τῶν μαθητῶν is even used as the subject of ἐπάνω. Cf. Ac. 21:16 without ἐκ. See also Jo. 7:40. John is specially fond of the partitive use of ἐκ (Radermacher, N. T. Gr., p. 115) and the inscriptions and papyri have it also. Cf. ἐκ τῶν πρωτοευρέων, Petersen-Luschan, Reisen, p. 113, xviii. A. 5. Further examples are ἐκ τῶν Φαρισαίων (Jo. 3:1), μὴ τὰς ἐκ τῶν ἄρχωντων (Jo. 7:48), ἐκ τοῦ ὄχλου ἀκούσαντες (Jo. 7:40), ἐκ τοῦ τόπου ἱκάνων εὖ ἐκ μισθοῦ (Lu. 21:16), ἐκ αὐτῶν ἀπόκτενετε (Mt. 23:34), βλέπουσιν ἐκ τῶν λαῶν (Rev. 11:9), διηκόνουσιν ἐκ τῶν ὑπαρχόντων (Lu. 8:3), ἐκ αὐτῶν φάγην (Jo. 6:50), ἐκ τοῦ πνεύματος δέδωκεν (1 Jo. 4:13), πίνον ἐκ τοῦ ὑδάτος (Jo. 4:13), οὐδὲ ἐκ αὐτῶν (Jo. 17:12), etc.2 In Heb. 13:10 it is what is on the altar that is eaten. The use of ἐκ with a class or for a side or position may as well be mentioned here also. Thus ἐκ τῆς ἀληθείας (Jo. 18:37),

1 Simcox, Lang. of the N. T., p. 145.
2 Cf. Blass, Gr. of N. T. Gk., p. 100.
οἱ ἐκ νόμου (Ro. 4:14), ὁ ἐκ πίστεως (Ro. 3:26), οἱ ἐκ παρτικοπηκτῶν (Ac. 11:2), οἱ ἐκ ἐρημίας (Ro. 2:8), etc. The partisan use is allied closely to the partitive. Cf. Ph. 4:22 οἱ ἐκ τῆς Κοινωνίας οἰκίας. See further ch. XI, Cases.

9. Ἐκ and Ἐν. A word in conclusion is needed about the so-called blending of Ἐκ with Ἐν. Blass doubts if this classic idiom appears in the N. T. The passages that seem to have it are μὴ καταβάτω ἄρα τά ἐκ τῆς οἰκίας αὐτοῦ (Mt. 24:17) where Ἐν might indeed have been employed, but Ἐκ coincides in idea with ἄρα. Cf. Mk. 13:15, where Ἐκ does not have τά before it. In Lu. 11:13 ὁ πατὴρ ὁ ἐκ οὐρανοῦ ὁ δόσει πνεῦμα ζηγαν W. H. bracket ὁ before Ἐκ, and with ὁ the sending of the Holy Spirit by the Father has [Page 600] caused Ἐκ to displace Ἐν which would otherwise have been regular. In Jo. 3:13 some MSS. add ὁ ὢν ἐν τῷ οὐρανῷ ὁ ὢν ὑπὸ τοῦ ἄνθρωπον, thus making Jesus in heaven at that moment when he was speaking to Nicodemus. In Col. 4:16, τὴν Ἐκ Λαοδικίας, the Ἐκ assumes, of course, that an Epistle had been sent to Laodicea, and suggests that the Colossians get it from (Ἐκ) them. Cf. Ro. 3:25 f. for examples of διά, Ἐν, ἐκ, πρός, Ἐκ. See ἐπὶ and παρά.

(h) Ἐπί. See Sanskrit āpi (locative case), Zend aip, Latin ob, Lithuanian pi.

1. Ground-Meaning. It is ‘upon’ as opposed to ὑπό. It differs from ὑπὲρ in that Ἐπί implies a real resting upon, not merely over.1 But the very simplicity of this idea gives it a manifoldness of resultant uses true of no other preposition. Sometimes indeed in the causal and ethical usages the root-idea seems dim,2 but none the less it is there. The only safety consists in holding on to the root-idea and working out from that in each special context. It marks a delicate shade of difference from Ἐν, as is seen in ὦς Ἐν οὐρανῷ καὶ Ἐπί γῆς (Mt. 6:10). For Ἐν cf. Lu. 8:15.

2. In Composition in the N. T. It is very common, always retaining the root-idea (cf. Ἐπὶ-ἐν-δόσω, 2 Cor. 5:2), though sometimes the perfective idea is clear. Thus with Ἐπὶ-αὐτῶ in Lu. 16:3, Ἐπι-γινώσκω in 1 Cor. 13:12, Ἐπί-γνωσίς in Col. 1:9, Ἐπι-τελέω in 2 Cor. 8:11.

3. Frequency in N. T. In the N. T. Ἐπί is still in constant use, though it ultimately dropped out of the vernacular4 before ἕπανο. Note ἐκ Ἐπί διαλογίσμος, P. Oxy. 294 (A.D. 22) like ἄνα ἐξ, etc. But in the N. T. it is the one preposition still used freely with more than two cases (acc. 464, gen. 216, dat. and loc. 176).3 Most of the examples called dative in the lexicons and grammars are really locatives, but some of them are possibly true datives.6 So then Ἐπί really has four cases still in the N. T. In Homer Ἐπί often stands alone for Ἐπὶ-ἐστὶ. Farrar,7 quoting Donaldson, finds in the

3 Ib., p. 258. Cf. also Field, Ot. Norv., Pars III, Mk. 5:30, on τὴν Ἐξ αὐτοῦ δόναμι.

Farrar FARRAR, F. W., Greek Syntax (1876).
locative with ἐπί the idea of absolute superposition, while the genitive expresses only partial superposition and the accusative implies motion with a view to superposition and the dative would be superposition for the interest of one. There is some truth in this distinction and the case-idea must always be observed. But [Page 601] the growth of the accusative in the later language at the expense of the other cases caused some confusion in the usage according to the standard of the earlier Greek. Simcox¹ considers it “almost a matter of indifference” whether in the N. T. one uses locative, genitive or accusative. This is somewhat true, but even so it does not follow that there was no difference in the cases. The locative accentuated mere location, the genitive brought out rather the kind or genus, while the accusative would present the general idea of extension modified by the fact that the accusative tended to absorb the other cases without insisting on the distinct case-idea. Thus sometimes either case with ἐπί would give substantially the same idea, though technical differences did exist. For instance, in Ac. 5:9 note ἐπὶ τῇ θύρᾳ, while in verse 23 we have ἐπὶ τῶν θυρῶν. So compare ἐγγύς ἐστιν ἐπὶ θύρας (Mk. 13:29) with ἐστήκα ἐπὶ τὴν θύραν (Rev. 3:20). Here the notion of rest exists with all three cases, though in Rev. 3:20 καὶ κροῦω may have some effect on the presence of the accusative. Once more observe καθίσθη ἐπὶ θρόνου and καθίσετε ἐπὶ δώδεκα θρόνους in Mt. 19:28. Rev. 4:2 gives us ἐπὶ τὸν θρόνον καθήμενος, verse 9 (marg. of W. H., text of Nestle) τῷ καθήμενῳ ἐπὶ τῷ θρόνῳ, while verse 10 has τοῦ καθήμενου ἐπὶ τοῦ θρόνου, three cases with the same verb. It would be overrefinement to insist on too much distinction here. But the cases afford variety of construction at any rate. In Rev. 14:9 the single verb λαμβάνει ἐπὶ τοῦ μετέχου αὐτοῦ ἡ ἐπὶ τὴν χεῖρα αὐτοῦ (cf. Ac. 27:44). Compare also ἔπι λίθος ἐπὶ λίθον in Mt. 24:2 with λίθος ἐπὶ λίθῳ in Lu. 21:6. In Ph. 2:27 the MSS. vary between λύπην ἐπὶ λύπην and λύπην ἐπὶ λύπην. Cf. also ἐπὶ ὀλίγα and ἐπὶ πολλῶν in Mt. 25:21. The use of πιστεύω ἐπὶ with locative or accusative has already been discussed.

7 Greek Synt., p. 102.
Simcox

———, The Writers of the N. T.

Nestle

———, Novum Testamentum Graece. 8th ed. (1910).

———, Septuagint (Hastings’ D. B., 1902).

The accusative suggests more the initial act of faith (intrust) while the locative implies that of state (trust). We find ἐπί also used with this verb as well as dative (both common in John). Once we have πιστεύειν ἐπί (Mk. 1:15). See Moulton, *Prol.*, p. 68. But, after all is said, the only practical way to study ἐπί is from the point of view of the cases which it supplements.

4. *With the Accusative.* As already noted, it is far in excess of the other cases combined. It is hardly necessary to make minute subdivision of the accusative usage, though the preposition with this case follows the familiar lines. With expressions of place it is very common and very easy to understand. So ἐλθεῖν ἐπί τὸ ὕδατα (Mt. 14:28), περιπάτησαν ἐπί τὰ ὕδατα (14:29), ἀναπεσοῦν ἐπί τὴν γῆν [Page 602] (Mt. 15:35), skότος ἐγένετο ἐπί πᾶσαν τὴν γῆν (Mt. 27:45), πορεύον ἐπί τὴν ὄδον (Ac. 8:26), ἐπέβαλον τὰς χεῖρας ἐπί τὸν Ἱησοῦν (Mt. 26:50), ἀναπεσοῦν ἐπί τὸ στήθος (Jo. 13:25). The metaphorical use is in harmony with this idiom. Thus φοβοῦσα ἐπέπεσαν ἐπί αὐτὸν (Lu. 1:12), κατέστησαν αὐτὸν ἐπί τὸ ἔργα (Heb. 2:7), βασιλεύσα ἐπί τὸν οἶκον (Lu. 1:33), ἰνα ἐπισκηνώσῃ ἐπί ἐμὲ ἡ δόναμις τοῦ Χριστοῦ (2 Cor. 1:23). Cf. also καθήμενον ἐπί τὸ τελῶν (Mt. 9:9) and others given above. So ἐπί τὸ προσκεφάλαιον καθεδόν (Mk. 4:38), πνεῦμα ἦν ἡγοῦν ἐπί αὐτόν (Lu. 2:25), ἑμείνειν ἐπί αὐτόν (Jo. 1:32), ἐπέστησαν ἐπί τὸν πυλῶν (Ac. 10:17), ἐφ’ ὑμᾶς ἀναπαύεται (1 Pet. 4:14), κάλλιμα ἐπί τὴν καρδίαν κεῖται (2 Cor. 3:15), ἔσονται ἀληθεύειν ἐπί τὸ αὐτό (Lu. 17:35). Here it is hard to think of any idea of ‘whither.’

Sometimes indeed ἐπί seems not to imply strictly ‘upon,’ but rather ‘as far as.’ So with ἔρχονται ἐπὶ τὸ μνημεῖον (Mk. 16:2), κατέβησαν ἐπὶ τὴν θάλασσαν (Jo. 6:16), ἠλθον ἐπὶ τὶ ὄνομα (Ac. 8:36). The aim or purpose is sometimes expressed by ἔπι, as ἐπὶ τὸ βάπτισμα (Mt. 3:7), ἐφ’ ὁ πάρσι (Mt. 26:50). It may express one’s emotions as with πιστεύειν ἐπί (Ro. 4:24), ἐλπίζω ἐπὶ (1 Pet. 1:13), σπλαγχνίζομαι ἐπί (Mt. 15:32). Cf. ἔφ’ ὁ γεγόνει in Ac. 4:22 and the general use of ἐπὶ in Mk. 9:12 γέγραπται ἐπὶ τὴν ὕλον τοῦ ἀνθρώπου. In personal relations hostility is sometimes suggested, though ἐπί in itself does not mean ‘against.’ Thus ὡς ἐπὶ λήτην ἐξῆλθον (Mt. 26:55). In Mt. 12:26 ἔφ’ ἐκεῖνῃ ἐμερίσθη is used side by side with μερισθῆναι καθ ἐκείνης in the preceding verse. Cf. also Mk. 3:26, etc. Abbott notes that John shows this usage only once (19:33). For ἐπὶ with the idea of degree or measure see ἔφ’ ὁδοῦ (Ro. 11:13). Cf. ἐπὶ τὸ αὐτὸ in the sense of ‘all together’ (Ac. 1:15). With expressions of time ἐπί may merely fill out the accusative, as with ἐπὶ ἔτη τρία (Lu. 4:25, marg. of W. H.), ἐπὶ ἠμέρας πλείους (Ac. 13:31), ἐφ’ ὁδον χρόνον (Ro. 7:1), or a more definite period may be indicated, as with ἐπὶ τὴν ὥραν τῆς προσευχῆς (Ac. 3:1), ἐπὶ τὴν αὔριον (Lu. 10:35). It is common with adverbs like ἐφ’ ἀπαξ, ἐπὶ τρίς, etc.

5. *With the Genitive.* The genitive with ἐπί has likewise a wide range of usages. Usually the simple meaning ‘upon’ satisfies [Page 603] all requirements, as in ἐπὶ κλίνης (Mt. 9:2), ἐφ’ οὐ χωκοδόμητο (Lu. 4:29), κηρύζετε ἐπί τῶν δομάτων (Mt.

---

1 Blass, Gr. of N. T. Gk., p. 136. For LXX ex. of rest see C. and S., p. 85.
2 Joh. Gr., p. 259.
3 A postclassical usage, Simcox, Lang. of the N. T., p. 147.
10:27), ἐρχόμενον ἐπὶ νεφελῶν (Mt. 24:30), ἐθηκεν ἐπὶ τοῦ σταυροῦ (Jo. 19:19), καθίσας ἐπὶ τοῦ βήματος (Ac. 12:21), ἐπὶ τῆς κεφαλῆς (Jo. 20:7), ἐπὶ τῆς θαλάσσης (Rev. 5:13), ἐπὶ ξύλου (Ac. 5:30). In Mk. 12:26, ἐπὶ τοῦ βάτου, an ellipsis in thought occurs “in the passage about the bush.” Sometimes, indeed, as with the accusative, so with the genitive, ἐπὶ has the idea of vicinity, where the word itself with which it is used has a wide meaning. Thus in Jo. 21:1 ἐπὶ τῆς θαλάσσης seems to mean ‘on the sea-shore,’ and so ‘by the sea.’ So with ἐπὶ τῆς δούλου (Mt. 21:19), the fig-tree being not on the path, but on the edge of the road. Abbott¹ notes how Matthew (14:25 f.) has ἐπὶ τὴν θαλάσσην which is not ambiguous like the genitive in Jo. 6:19. Cf. Ac. 5:23 ἐπὶ τῶν θυρῶν. The classic idiom with ἐπὶ and the genitive in the sense of ‘towards’ is not so common in the N. T., though it has not quite disappeared as Simeon² thinks. Cf. ἐγένετο τὸ πλοῖον ἐπὶ τῆς γῆς (Jo. 6:21), καθίεμον ἐπὶ τῆς γῆς (Ac. 10:11), βαλοῦσα τὸ μύρον ἐπὶ τοῦ σώματος (Mt. 26:12), ἐσπέρετε ἐπὶ τῆς γῆς (Mk. 14:35), γενόμενος ἐπὶ τοῦ τόπου (Lu. 22:40), τὸν ἐπὶ αὐτῆς ἐρχόμενον (Heb. 6:7), πεσόν ἐπὶ τῆς γῆς (Mk. 9:20). In these examples we see just the opposite tendency to the use of the accusative with verbs of rest. Cf. πεσότα ἐπὶ τὴν γῆν (Mt. 10:29) with Mk. 9:20 above and βαλεῖν ἐπὶ τὴν γῆν (Mt. 10:34) with Mk. 4:26. With persons ἐπὶ and the genitive may yield the resultant meaning of ‘before’ or ‘in the presence of.’ Thus ἐπὶ ἡγεμόνων (Mk. 13:9), κρίνεσθαι ἐπὶ τῶν ὁλίκων (1 Cor. 6:1), ἐκτὸς εἰ μὴ ἐπὶ δόο ἦ τριῶν μαρτύρων (1 Tim. 5:19), ἐπὶ Ποντίου Πειλάτου (1 Tim. 6:13), ἐπὶ σοῦ (Ac. 23:30), ἐπὶ ἐμοί (25:9). Blass³ observes how in Ac. 25:10 ἐπὶ τοῦ βήματος Καίσαρος the meaning is ‘before,’ while in verse 17 the usual idea ‘upon’ is alone present (καθίσας ἐπὶ τοῦ βήματος). Cf. ἐπὶ Τίτου in 2 Cor. 7:14. With expressions of time the result is much the same. Thus ἐπὶ ἐσχάτου τῶν χρόνων (1 Pet. 1:20) where ἐπὶ naturally occurs (cf. Ju. 18). With ἐπὶ τῶν προσευχῶν μου (Ro. 1:10) we have period of prayer denoted simply by ἐπὶ. Cf. ἐπεάρχει ἐπὶ (Magical papyrus, Deissmann, Light, etc., p. 252). There is no difficulty about ἐπὶ τῆς μετουσίας (Mt. 1:11). With persons a fuller exposition is required, since ἐπὶ Κλαυδίου (Ac. 11:28) is tantamount to ‘in the time of Claudius’ or ‘during the reign of Claudius.’ Cf. also ἐπὶ ἀρχιερέως Ἀννα (Lu. 3:2), ἐπὶ Ἑλισάβετ (4:27), ἐπὶ Ἀβίαθαρ ἀρχιερέως (Mk. 2:26).

6. With the Locative. Here ἐπὶ is more simple, though still with a variety of resultant ideas. Blass³ observes that with the purely local sense the genitive and accusative uses outnumber the locative with ἐπὶ. But still some occur like ἐπὶ πίνακι (Mt. 14:8), ἐπὶ τῇ πηγῇ (Jo. 4:6), ἐπὶ ίματίῳ παλαιῷ (Mk. 9:16), ἐπὶ ταύτῃ τῇ πέτρᾳ οἰκοδομήσῳ (Mt. 16:18; cf. some MSS. in Mk. 2:4, ἐφ’ ὑπατείατο, ἐπὶ τοῖς...

κραβάττοις (Mk. 6:55), ἐπὶ τῷ χόρτῳ (Mk. 6:39), ἐπὶ ἕρμημες τόποις (Mk. 1:45), ἐπέκειτα ἐπὶ αὐτῷ (Jo. 11:38), ἐπὶ σανίσι (Ac. 27:44; cf. also ἐπὶ τίνοις). In Lu. 23:38, ἐπιγραφῇ ἐπὶ αὐτῷ, the resultant idea is rather that of ‘over,’ Mt. 27:37 having ἔπάνω τῆς κεφαλῆς αὐτοῦ. As with the accusative and genitive, so with the locative the idea of contingency sometimes appears, as in ἐπὶ θύρας (Mt. 24:33), ἐπὶ τῇ προβατικῇ (Jo. 5:2), ἐπὶ τῇ στοᾷ (Ac. 3:11). Here the wider meaning of the substantive makes this result possible. Cf. also ἐπὶ τῷ ποταμῷ (Rev. 9:14). Ἐπὶ is used very sparingly with the locative in expressions of time. Cf. Ἐπὶ συντελεία τῶν αἰώνων (Heb. 9:26). The use of Ἐπὶ πάσῃ τῇ μνείᾳ οἷῶν (Ph. 1:3), οὐ συνήκαν Ἐπὶ τοῖς ἄρτοις (Mk. 6:52), ἐφεδρίες Ἐπὶ εὐλογίας (2 Cor. 9:6) wavers between occasion and time. Cf. also Ἐπὶ τῇ πρώτῃ διαθήκη (Heb. 9:15). The notion of Ἐπὶ τρίσιν μάρτυροιν (Heb. 10:28) is rather ‘before,’ ‘in the presence of.’ Cf. Ἐπὶ νεκροῖς (Heb. 9:17). All these developments admit of satisfactory explanation from the root-idea of Ἐπί, the locative case and the context. There are still other metaphorical applications of Ἐπί. Thus in Mt. 24:47, Ἐπὶ πάσιν, ‘over’ is the resultant meaning. So in Lu. 12:44 Ἐπὶ πάσιν τοῖς ὑπάρχονσι. The notion of basis is involved in Ἐπὶ ἄρτῳ μόνῳ in Mt. 4:4, Ἐπὶ τῷ βηματί σου in Lu. 5:5, ἔλευσονται Ἐπὶ τῷ ὄνοματί μου in Mt. 24:5, Ἐπὶ ἐπίδοτι in Ac. 2:26, etc. Ground or occasion likewise may be conveyed by Ἐπί. Thus note Ἐπὶ τοῦτῳ in Jo. 4:27 and in particular Ἐφ᾽ ὧν, like Ἐπὶ τοῦτῳ ὃτι, in Ro. 5:12 and 2 Cor. 5:4. Cf. Ἐφ᾽ ὧν ἐφρονεῖτο (Ph. 4:10) where ‘whereon’ is the simple idea. See [Page 605] also Ἐπὶ παροργισμῷ ὑμῶν (Eph. 4:26), cf. 2 Cor. 9:15. The idea of aim or purpose seems to come in cases like Ἐπὶ ἔργοις ἔργαθεῖν (Eph. 2:10), Ἐφ᾽ ὧν καὶ κατελήφθην (Ph. 3:12). Note also Gal. 5:13, Ἐπὶ ἐλεοθερίᾳ; 1 Th. 4:7, οὗκ Ἐπὶ ἄκαθαρσίᾳ (cf. ἐν ἁγιασμῷ), Ἐπὶ καταστροφῆ (2 Tim. 2:14). Cf. Ἐπὶ ἐλεοθερία inscr. at Delphi ii/b.C. (Deissm., Light, p. 327). The notion of model is involved in ἐκάλουν Ἐπὶ τῷ ὄνοματι (Lu. 1:59) and Ἐπὶ τῷ ὦμοιωματι (Ro. 5:14). Many verbs of emotion use Ἐπὶ with the locative, as ἔχαριν Ἐπὶ πάσιν (Lu. 13:17), θαυμάζοντες Ἐπὶ (Lu. 2:33), etc. But some of the examples with these verbs may be real datives, as is possibly the case with the notion of addition to, like προσέθηκαν καὶ τούτῳ Ἐπὶ πάσιν (Lu. 3:20).

7. The True Dative. As we have seen, it was probably sometimes used with Ἐπί. The N. T. examples do not seem to be very numerous, and yet some occur. So I would explain διὰ τήν ὑπερβάλλουσαν χάριν τοῦ θεου Ἐφ᾽ ὑμῖν (2 Cor. 9:14). This seems a clear case of the dative with Ἐπί supplementing it. The same thing may be true of Ἐφ᾽ ὑμῖν in 1 Th. 3:7 and Ro. 16:19. Cf. also πεποιθότας Ἐφ᾽ ἐπαυτοῖς in Lu. 18:9 and μακροθύμησαν Ἐπὶ ἐμοῖ in Mt. 18:26 f. So Lu. 1:47 Ἐπὶ τῷ θεῷ. In Lu. 12:52 ἀρ, τρεῖς Ἐπὶ δυσίν, δύο Ἐπὶ τρισίν, ὡς Ἐπὶ πατρὶ (cf. also Ἐπὶ θυγατέρα), the resultant sense is ‘against.’ Cf. also προφητεύειν Ἐπὶ λαοῖς in Rev. 10:11. In Jo. 12:16, ἦν Ἐπὶ αὐτῷ γεγραμένα, and Ac. 5:35, Ἐπὶ τοῖς ἀνθρώποις τούτοις, the idea is rather ‘about’ or ‘in the case of.’ Cf. also τῆς γενομένης Ἐπὶ Στεφάνῳ (Ac. 11:19). Here the personal relation seems to suit the dative conception better than the locative. The notion of addition to may also be dative. Cf. Lu. 3:20 above and Col. 3:14, Ἐπὶ πάσιν δὲ τούτοις; Heb. 8:1, Ἐπὶ τοῖς λεγομένοις. In Eph. 6:16 the best MSS. have ἐν. It is possible also to regard the use of Ἐπί for aim or purpose as having the true dative as in 1 Th. 4:7.
(i) **Κατά.** There is doubt about the etymology of this preposition. In ἀνεσις it appears as κάτα, and in Arcadian and Cypriote Greek it has the form κατó. It is probably in the instrumental case, but an apparently dative form καταί survives a few times. Brugmann compares it with Old Irish cŪ, Cymric cant, Latin com-, though this is not absolutely certain.

1. **Root-Meaning.** Brugmann thinks that the root-meaning of the preposition is not perfectly clear, though ‘down’ (cf. ἀνά) seems to be the idea. The difficulty arises from the fact that we sometimes find the ablative case used when the result is down from, then the genitive down upon, and the accusative down along. But ‘down’ (cf. κάτω) seems always to be the only idea of the preposition in itself. In the N. T. three cases occur with κατά.

2. **Distributive Sense.** Κατά came to be used in the distributive sense with the nominative, like ἀνά and σύν, but chiefly as adverb and not as preposition. Hence this usage is not to be credited to the real prepositional idiom. Late Greek writers have it. So ἔξις καταὶ ἔξις in Mk. 14:19 (and the spurious Jo. 8:9), τὸ καθὸ ἔξις in Ro. 12:5. The modern Greek uses καθεὶς or καθένας as a distributive pronoun. Deissmann, *Bible Studies*, p. 138 f., considers also ἔξις καθὸ ἐκαστός (A Lev. 25:10) merely the adverbial use of κατά. But see καθὸ ἔνα in 1 Cor. 14:31, κατά δὲ ἔορτην (Mt. 27:15).

3. **Κατά in Composition.** It is true to the root-idea of ‘down,’ like κατέβη in Mt. 7:25, καταγαγέω in Ro. 10:6. But the various metaphorical uses occur also in composition. Often κατά occurs with “perfective” force. So, for instance, observe καταρτίσας (1 Pet. 5:10), κατηγωνίσαντο (Heb. 11:33), κατεδίωξεν (Mk. 1:36), καταδουλοῦσι (2 Cor. 11:20), κατακαύσει (Mt. 3:12), κατασκευάσει (Mk. 1:2), κατανοήσατε (Lu. 12:24), κατατίθενται (Ro. 23:24), κατασκευάσει (Mk. 1:2), καταφύγεσθε (Ph. 2:12), κατέφαγεν (Mt. 13:4), καθορίζει (Ro. 1:20). This preposition vies with διά and σύν in the perfective sense. Κατέχω in Ro. 1:18 is well illustrated by ὁ κατέχων τὸν θυμόν from an ostracon (Deissmann, *Light*, p. 308). In the magical texts it means to ‘cripple’ or to ‘bind,’ ‘hold fast.’ But in Mk. 14:45, καταφύγεσθε, the preposition seems to be weakened, though the A. S. V. puts “kissed him much” in the margin. Cf. Moulton, *Cl. Rev.*, Nov., 1907, p. 220.

4. **With the Ablative.** This construction is recognised by Brugmann, Monro, Kühner-Gerth, Delbrück. There are some examples of the ablative in the N. T.,

where ‘down’ and ‘from’ combine to make ‘down from’. Thus, for instance, is to be explained ἔβαλεν κατ’ αὐτής δὲνεις τυφωνικός (Ac. 27:14), where αὐτής refers to Κρήτην, and the meaning (cf. American Standard Revision) is manifestly ‘down from’ Crete. In 1 Cor. 11:4, προφητεύων κατὰ κεφαλῆς ἔχων, we have ‘down from’ again, the veil hanging down from the head. In Mk. 5:13 we find ὠρμησεν ἢ ἀγέλη κατὰ τοῦ κρημνοῦ (Mt. 8:32=Lu. 8:33) where ‘down from the cliff’ is again the idea.

5. With the Genitive. It is more usual with κατά than the ablative in the N. T. as in the earlier Greek. The idea is ‘down upon,’ the genitive merely accenting the person or thing affected. A good example of this sense in composition followed by the genitive appears in κατακυριεύσας ἀµφοτέρων (Ac. 19:16). Some MSS. in Mk. 14:3 have κατά with τῆς κεφαλῆς, but without it κατέχεεν means ‘pour down on’ the head. In 2 Cor. 8:2, ἡ κατὰ βάθους πτωχεία, the idea is ‘down to’ depth. But with the genitive the other examples in the N. T. have as resultant meanings either ‘against,’ ‘throughout’ or ‘by.’ These notions come from the original ‘down.’ Luke alone uses ‘throughout’ with the genitive and always with ὅλος. The earlier Greek had καθ’ ὅλον (also alone in Luke in the N. T., Ac. 4:18), though Polybius employed κατὰ in this sense. Cf. in Lu. 4:14 καθ’ ὅλης τῆς περιχώρου; Ac. 9:31 καθ’ ὅλης τῆς Ιουδαίας (so 9:42; 10:37). The older Greek would have used the accusative in such cases. But cf. Polyb. iii, 19, 7, κατὰ τῆς νήσου διεσπάρησαν. The notion of ‘against’ is also more common” in the κοινή. But in the modern Greek vernacular κατά (κά) is confined to the notions of ‘toward’ and ‘according to,’ having lost the old ideas of ‘down’ and ‘against’ (Thumb, Handb., p. 105 f.). Certainly the preposition does not

Thumb

———, Die griech. Sprache im Zeitalter des Hellenismus (1901).

mean ‘against.’ That comes out of the context when two hostile parties are brought together. Cf. English vernacular “down on” one. This κατά then is ‘down upon’ rather literally where the Attic usually had ἐπί and accusative.3 Among many examples note κατά τοῦ Ἰησοῦ μαρτυρίαν (Mk. 14:55), νύμφην κατά πενθερᾶς (Mt. 10:35), κατά τοῦ πνεύματος (Mt. 12:32), κατά τοῦ Ποιλοῦ (Ac. 24:1), etc. Cf. Ro. 8:33. Sometimes μετά and κατά are contrasted (Mt. 12:30) or κατά and ὑπέρ (Lu. 9:50; 1 Cor. 4:6). The other use of κατά and the genitive is with verbs of swearing. The idea is perhaps that the hand is placed down on the thing by which the oath is taken. But in the N. T. God himself is used in the solemn oath. So Mt. 26:63, ἐξορκίζω σε κατά τοῦ θεοῦ. Cf. Heb. 6:13, 16. In 1 Cor. 15:15 έμαρτυρήσαμεν κατά τοῦ θεοῦ may be taken in this sense or as meaning ‘against.’

6. With the Accusative. But the great majority of examples [Page 608] in the N. T. use the accusative. Radermacher (N. T. Gr., p. 116) notes the frequency of the accusative in the papyri where περί would appear in the older Greek. Farrar1 suggests that κατά with the genitive (or ablative) is perpendicular (‘down on’ or ‘down from’) while with the accusative it is horizontal (‘down along’). Curiously enough John has only some ten instances of κατά and several of them are doubtful.2 On the whole, the N. T. use of the accusative with κατά corresponds pretty closely to the classic idiom. With a general horizontal plane to work from a number of metaphorical usages occur. But it appears freely in local expressions like ἀπέλθε καθ ὅλην τὴν πόλιν κηρύσσων (Lu. 8:39), διήρχοντο κατά τὰς κώμας (Lu. 9:6), κατά τὴν ὅδον (Lu. 10:4), ἔγενετο λιμός κατά τὴν χώραν (Lu. 15:14), κατά τὴν Κλίκιαν (Ac. 27:5), βλέποντα κατά λίβα (Ac. 27:12), κατά μεσημβρίαν (Ac. 8:26), κατά πρόσσοπον (Gal. 2:11), κατά ὀφθαλμούς (Gal. 3:1), κατά σκοπόν (Ph. 3:14). The notion of rest may also have this construction as κατά οἶκον (Ac. 2:46). Cf. τὴν κατά οἶκον αὕτης ἔκκλησιάν (Col. 4:15). Cf. Ac. 11:1. In Ac. 13:1 a rather ambiguous usage occurs, κατά τὴν οὖσαν ἔκκλησιάν προφήτευσε. But this example may be compared with τῶν κατὰ Ἰουδαίους ἔθων (Ac. 26:3), οἱ καθ ἡμᾶς ποιηταὶ (Ac. 17:28, some MSS. καθ ημᾶς), νόμον τοῦ καθ ἡμᾶς (Ac. 18:15). This idiom is common in the literary κοινή and is one of the marks of Luke’s literary style.3 But this is merely a natural development, and κατά with the accusative always expressed direction towards in the vernacular.4 Schmidt (de eloc. Joseph., p. 21 f.) calls κατά a sort of periphrasis for the genitive in late Greek. Cf. τὰ κατά ἐμὲ (Ph. 1:12). It is more than a mere

3 Blass, Gr. of N. T. Gk., p. 133.
1 Gk. Synt., p. 100.
2 Abbott, Joh. Gr., p. 266.
3 Simcox, Lang. of the N. T., p. 149; Blass, Gr. of N. T. Gk., p. 133.
circumlocution for the genitive in the examples above and such as τὴν καθ’ ὑμᾶς πίστιν (Eph. 1:15), τὸ κατ’ ἐμὲ (Ro. 1:15), τὸ κατὰ σάρκα (Ro. 9:5), τὸ κατ’ ἐμὲ (Eph. 6:21; cf. Ac. 25:14), ἀνδράσιν τοὺς κατ’ ἐξοχήν (Ac. 25:23; cf. par excellence).

Kata is used with expressions of time like κατ’ ἐκείνον τὸν καιρὸν (Ac. 12:1), κατὰ τὸ μεσονύκτιον (Ac. 16:25), καθ’ ἐκάστην ἡμέραν (Heb. 3:13), κατὰ πᾶν σάββατον (Ac. 13:27). The notion of distribution comes easily with κατά, as in κατὰ πόλιν (Lu. 8:1), κατὰ τάξιν συναγωγάς (Ac. 22:19), κατ’ ἔτος (Lu. 2:41), καθ’ ἡμέραν (Ac. 2:46), καθ’ ἑνα πάντες (1 Cor. 14:31), κατ’ ὄνομα (Jo. 10:3), etc. See Mt. 27:15=Mk. 15.6. Cf. κατὰ δῶν, P. Oxy. 886 (iii/A.D.). As a standard or rule of measure κατὰ is very common [Page 609] and also simple. So κατὰ τὸ εὐαγγέλιον (Ro. 16:25) with which compare the headings to the Gospels like κατὰ Μαθθαίου, though with a different sense of εὐαγγέλιον. Here the examples multiply like κατὰ νόμον (Lu. 2:22), κατὰ φόνον (Ro. 11:21), κατὰ χάριν (Ro. 4:4), κατὰ θεόν (Ro. 8:27), κατὰ τὴν πίστιν (Mt. 9:29), κατὰ δύναμιν (2 Cor. 8:3), καθ’ ὑπερβολήν (Ro. 7:13), κατὰ συνγνώμην (1 Cor. 7:6), etc. Various resultant ideas come out of different connections. There is no reason to call κατὰ πᾶσαν αἰτίαν (Mt. 19:3) and κατὰ ἄγνοιαν (Ac. 3:17) bad Greek. If there is the idea of cause here, so in 1 Tim. 6:3, καθ’ ἐνοχαῖεν, the notion of tendency or aim appears. We must not try to square every detail in the development of κατὰ or any Greek preposition with our translation of the context nor with classic usage, for the N. T. is written in the koine. This preposition is specially common in Acts and Hebrews. Κατ’ ἱδιὰν (Mt. 14:13) is adverbial. But κατὰ πρόσωπον is not a mere Hebraism, since the papyri have it (Deissmann, Bible Studies, p. 140). As a sample of the doubling up of prepositions note συνεπέστη κατ’ αὐτόν (Ac. 16:22).

(j) Μετά. Most probably μετά has the same root as μέσος, Latin medius, German mit (miði), Gothic miþ, English mid (cf. a-mid). Some scholars indeed connect it with ἄμα and German samt. But the other view is reasonably certain. The modern Greek uses a shortened form μέ, which was indeed in early vernacular use. Some of the Greek dialects use πεδά in ‘mid-air’. In the N. T. we have a metaphorical example (Lu. 12:29) which is intelligible now in the day of aeroplanes and dirigible balloons. The root-idea is manifest also in μέτ-ωπον (Rev. 7:3), ‘the space between the eyes.’

1. The Root-Meaning. It is (‘mid’) ‘midst.’ This simple idea lies behind the later developments. Cf. μεταξό and ἄνυμεσα. We see the root-idea plainly in μετεωρίζω (from μετ-ἐωρός, in ‘mid-air’). In the N. T. we have a metaphorical example (Lu. 12:29) which is intelligible now in the day of aeroplanes and dirigible balloons. The root-idea is manifest also in μέτ-ωπον (Rev. 7:3), ‘the space between the eyes.’

2. In Composition. The later resultant meanings predominate in composition such as “with” in μεταδόει (Ro. 12:8), μεταλαμβάνω (Ac. 2:46), μετέχω (1 Cor. 10:30); “after” in μεταπέμπω (Ac. 10:5); or, as is usually the case, the notion of change or transfer is the result as with μεθίσμη (1 Cor. 13:2), μεταβαίνω (Mt. 8:34), μεταμορφόω (Ro. 12:2), μεταμέλομαι (Mt. 27:3), μετανοεῖ (Mt. 3:2).

5 Blass, Gr. of N. T. Gk., p. 133.
1 Ib.
3 Giles, Comp. Philol., p. 342.
3. Compared with σῦν. Μετά is less frequent in composition than σῦν, though far more common as a preposition. Simcox¹ thinks that it is useless to elaborate any distinction in meaning between μετά and σῦν. The older grammars held that σῦν expressed a more intimate fellowship than μετά. But in the N. T. μετά has nearly driven σῦν out.

4. Loss of the Locative Use. Μετά was originally used with the locative. It is common in Homer, but even with him the genitive has begun to displace it.² Homer uses the locative with collective singulars and plurals.³ Mommsen⁴ indeed considers that in Hesiod ἃμα, μετά and σῦν all use the instrumental case and with about equal frequency, while μετά with the genitive was rare. But in the N. T. μετά, along with περί and ὑπό, has been confined to the genitive and accusative, and the genitive use greatly predominates (361 to 100).⁵ The idea with the locative was simply ‘between.’⁶ With several persons the notion of ‘among’ was present also.⁷

5. With the Genitive. In Homer it occurs only five times and with the resultant idea of ‘among.’ So once (Iliad, 13. 700, μετά Βοιωτῶν ἐμάχοντο), where indeed the idea is that of alliance with the Boeotians. In Rev. 2:16, etc., μετά occurs with πολεμῶ in a hostile sense, a usage not occurring in the older Greek, which Simcox⁸ considers a Hebraism. But the papyri may give us examples of this usage any day. And Thumb (Hellenismus, p. 125; cf. Moulton, Prol., p. 106) has already called attention to the modern Greek use of με with πολεμῶ. Deissmann (Light, p. 191) finds μετά στρατιώτου with οἰκέω in an ostracon (not in hostile sense) and possibly with ἄντιλογέω, ‘elsewhere.’ In Jo. 6:43 μετά occurs in a hostile sense with γογγύζω and probably so with ζήτησις in Jo. 3:25, though Abbott⁹ argues for the idea of alliance here between the Baptist’s disciples and the Jews to incite rivalry between the Baptist and Jesus. In 1 Cor. 6:6 f. we have the hostile sense also in legal trials, ἀδελφῶν μετά ἀδελφοῦ κρίνεται. Cf. Jo. 16:19. This notion gives no difficulty to English students, since our “with” is so used. But Moulton¹⁰ admits a translation Hebraism in Lu. 1:58, ἐμεγάλυνεν Κύριος τὸ Ἐλεος αὐτοῦ μετὰ αὐτῆς. But what about ὅσα ἐποίησεν ὃ θεὸς μετὰ αὐτῶν [Page 611] (Ac. 14:27) and τετελείωται ἡ ἀγάπη μεθ᾽ ἡμῶν (1 Jo.

5 Moulton, Prol., p. 105.
8 Lang. of the N. T., p. 150.
10 Prol., p. 106.
6. *With the Accusative.* At first it seems to present more difficulty. But the accusative-idea added to the root-idea (“midst”) with verbs of motion would mean “into the midst” or “among.” But this idiom does not appear in the N.T. In the late Greek vernacular μετὰ with the accusative occurs in all the senses of μετὰ and the genitive,¹ but that is not true of the N.T. Indeed, with one exception (and that of

place), μετὰ τὸ δεύτερον καταπέτασμα (Heb. 9:3), in the N. T. μετὰ with the accusative is used with expressions of time. This example in Hebrews is helpful, however. The resultant notion is that of behind or beyond the veil obtained by going through the midst of the veil. All the other examples have the resultant notion of “after” which has added to the root meaning, as applied to time, the notion of succession. You pass through the midst of this and that event and come to the point where you look back upon the whole. This idea is “after.” Cf. μετὰ δῶρον ἡμέρας (Mt. 26:2). In the historical books of the LXX μετὰ ταῦτα (cf. Lu. 5:27) is very common.² Simcox³ treats οὐ μετὰ πολλὰς ταῦτας ἡμέρας (Ac. 1:5) as a Latinism, but, if that is not true of πρό, it is hardly necessary to posit it of μετὰ. Cf. μετὰ ἡμέρας ἐκκοσμήσει Herm. Vis. IV, 1, 1. The litotes is common. Jannaris⁴ comments on the frequency of μετὰ τὸ with the infinitive in the LXX and N. T. So μετὰ τὸ ἀναστῆναι (Acts 10:41). Cf. 1 Cor. 11:25; Heb. 10:26, etc. This comes to be one of the common ways of expressing a temporal clause (cf. ἐπέι or δητ.). Cf. μετὰ βραχὺ (Lu. 22:58), μετὰ μικρόν (Mk. 14:70), adverbial phrases.

(k) Παρά.

1. Significance. Delbrück⁵ does not find the etymology of παρά clear and thinks it probably is not to be connected with ὅρα (Sanskrit), which means ‘distant.’ Brugmann⁶ connects it with the old word μαραδί like Latin por-, Gothic faúra, Anglo-Saxon fore (cf. German vor). Giles⁷ thinks the same root furnishes παρός (gen.), παρά (instr.), παραῖ (dat.), περί (loc.). He also sees a kinship in these to πέραν, πέρα, πρός.

2. Compared with πρός. In meaning¹ παρά and πρός do not differ essentially save that παρά merely means ‘beside,’ ‘alongside’ (cf. our “parallel”), while πρός rather suggests ‘facing one another,’ an additional idea of contrast. This oldest meaning explains all the later developments.² Radermacher (N. T. Gr., p. 116) thinks that the N. T. shows confusion in the use of παρά (διελογίζοντο παρ’ ἑαυτούς, Mt. 21:25) and διελογίζοντο πρὸς ἑαυτούς (Mk. 11:31). But is it not diversity the rather?

3. In Composition. The preposition is exceedingly common in composition, though with nouns it falls behind some of the others a good deal. Παρά does not survive in modern Greek vernacular save in composition (like ἄνα and ἐκ) and some of its functions go to ἐπί and εἰς. All the various developments of παρά appear in composition, and the simplest use is very common. Thus παραβολή (Mk. 13:28) is a ‘placing of one thing beside another.’ So παρα-θαλάσσιος (Mt. 4:13) is merely ‘beside the sea.’ Cf. also παρα-θήκη (2 Tim. 1:14), παρα-καθεδρείας (Lu. 10:39), παρα-καλέω (Ac. 28:20), παρά-κλήτος (Jo. 14:16), παρα-λέγωμαι (Ac. 27:8), παρά-άλοις (Lu. 6:17), παρα-μένω (Heb. 7:23; cf. μενῶ καὶ παρα-μενῶ Ph. 1:25), παρα-πλέω (Ac. 20:16), παρα-ρρέω (Heb. 2:1), παρα-τίθημι (Mk. 6:41), πάρ-εμι (Lu. 13:1), etc. A specially noticeable word is πάρ-οινος (1 Tim. 3:3). Cf. also ἄντι-παρ-ῆλθεν in Lu. 10:31 f. Sometimes παρά suggests a notion of stealth as in παρ-εισ-ἁγο (2 Pet. 2:1), παρ-εισ-δόω (Ju. 4), παρ-εἰσ-ακτος (Gal. 2:4), but in παρ-εἰσ-ἔρχομαι in Ro. 5:20 this notion is not present. Cf. Mt. 14:15, ἡ ὥρα ἡ ἡ παρῆλθεν, ‘the hour is already far spent’ (‘gone by’). Note also the Scotch “far in” like modern Greek παρά-καθίσμα (Moulton, Prol., p. 247). A few examples of the “perfective” use occur as in παρα-ξύνω (Ac. 21:16), παρα-πίπτω (Heb. 3:16), παρά-σημος (Ac. 28:11), παρα-τηρέω (Gal. 4:10, but in Lu. 14:1 the idea of envious watching comes out). With παρα-φρονέω the notion is rather ‘to be beside one’s self,’ ‘out of mind.’ Cf. also παρα-πίπτω in Heb. 6:6, found in the ostraca (Wilcken, i. 78 f.) as a commercial word ‘to fall below par.’ For παρενοχλεῖν (Ac. 15:19) see παρενοχλεῖν Ἡμᾶς, P. Tb. 36 (ii/b.c.). Παρά occurs in the N. T. with three cases. The locative has 50 examples, the accusative 60, the ablative 78.

[Page 614] 4. With the Locative. Παρά with the locative is nearly confined to persons. Only one other example appears, ἰστήκεσαν παρά τῷ σταυρῷ (Jo. 19:25). This confining of παρά to persons is like the usual Greek idiom, though Homer used it freely with both. Homer used it also as an adverb and in the shortened form παρά. The only instance in the N. T. of the locative with παρά after a verb of motion is in Lu. 9:47, ἔστησεν αὐτῷ παρά ἑαυτῷ, though here D reads ἑαυτόν. The locative with παρά leaves the etymological idea unchanged so that we see the preposition in its simplest usage. Cf. ἐν ἐπέλευσον παρά Κύριῷ (2 Tim. 4:13) as a typical example of the use with persons which is much like apud in Latin, ‘at one’s house’ (Jo. 1:40), ‘in his society,’ etc. So καταλύεσε παρά (Lu. 19:7), μένῳ παρά (Jo. 14:17), ἐξεκόπω παρά (Ac. 21:16). Cf. Ac. 21:8. In Rev. 2:13; Mt. 28:15, παρά has the idea of ‘among.’ The phrase παρά τῷ θεῷ (Lu. 1:30) is common. The word is used in ethical relations, also like παρά ἑμοί (2 Cor. 1:17). Cf. τι ἄσπον κρίνεται παρά ὑμῖν (Ac. 26:8) and φρόνιμοι παρά ἑαυτοῖς (Ro. 12:16). Παρά with the locative does not occur in Hebrews.

5. With the Ablative. But it occurs only with persons (like the older Greek). The distinction between παρά and ἐπί and ἐκ has already been made. In Mk. 8:11 both

---

3 Thumb, Handb., p. 102.
4 Moulton, Prol., p. 106.
2 Simcox, Lang. of N. T., p. 151.
παρά and ἄπο occur, ξητούντες παρὰ αὐτοῦ σημεῖον ἄπο τοῦ οὐρανοῦ (cf. 12:2), and in Jo. 1:40 we have both παρά and ἐκ, εἰς ἐκ τῶν δύο τῶν άκουσάντων παρὰ Ιωάνου. In a case like Jo. 8:38 the locative is followed by the ablative,3 ἐδόθη παρὰ τῷ πατρί—ἥκουσατε παρὰ τοῦ πατρός, though some MSS. have locative in the latter clause also. But the ablative here is in strict accordance with Greek usage as in a case like ἀκούσασα παρὰ σοῦ (Ac. 10:22). On the other hand in Jo. 6:45 f. we find the ablative in both instances, ὢν ἀκούσας παρὰ τοῦ πατρός—ὁ ὄν παρὰ τοῦ θεοῦ (cf. ὢν ἐς τὸν κόλπον τοῦ πατρός in Jo. 1:18). But this last παρὰ implies the coming of Christ from the Father, like παρὰ τοῦ πατρός ἔξηλθον (Jo. 16:27). Παρὰ with the ablative means ‘from the side of’ as with the accusative it means ‘to the side of.’ The phrase of παρά αὐτοῦ therefore describes one’s family or kinsmen (Mt. 3:21). In the papyri the phrase is very common for one’s agents, and Moulton4 has found one or two like of παρὰ ἡμῶν πάντες parallel to of παρὰ αὐτοῦ in Mk. 3:21. Cf. also τὰ παρ’ [Page 615] αὐτῶν (Lu. 10:7) for one’s resources or property. Rouffiac (Recherches, etc., p. 30) cites ἔδαπνήσασα παρὰ ἑαυτοῦ (cf. Mk. 5:26) from inscription from Priene (111, 117). Note also ἡ παρὰ ἐμοῦ διαθήκη (Ro. 11:27) with notion of authorship. With passive verbs the agent is sometimes expressed by παρὰ as in ἁπεσταλμένος παρὰ θεοῦ (Jo. 1:6), τοὺς λελαλήμενοις παρὰ Κυρίου (Lu. 1:45). Cf. Text. Rec. in Ac. 22:30 with κατηγορεῖται παρὰ τῶν Ἰουδαίων, where W. H. have ὑπό. Παρὰ occurs with the middle in Mt. 21:42, παρὰ Κυρίου ἐγένετο. In the later Greek vernacular παρὰ with the ablative helped supplant ὑπό along with ἄπο, and both παρὰ and ὑπό (and ἐκ) vanished1 “before the victorious ἄπο.”

6. With the Accusative. It is not found in John’s writings at all2 as it is also wanting in the other Catholic Epistles. The accusative is common in the local sense both with verbs of motion and of rest. The increase in the use of the accusative with verbs of rest explains in part the disuse of the locative.3 One naturally compares the encroachments of εἰς ὧν ἔνα ἐν Dead Sea Scrolls and W.-Th., p. 138. less naturally explains παρὰ here as meaning ‘by virtue of,’ but not Debrunner.

3 Blass, Gr. of N. T. Gk., p. 138.
4 W.-Th., p. 404. Blass, Gr. of N. T. Gk., p. 138, less naturally explains παρὰ here as meaning ‘by virtue of,’ but not Debrunner.
Greek vernacular keeps παρὰ τρίχα, ‘within a hair’s breadth’ (Thumb, Handb., p. 98). The notion of ‘beyond’ is common enough in classic writers and is most frequent in Hebrews in the N. T. It occurs with comparative forms like διαφορώτερον (Heb. 1:4), πλείονος (3:3), κρείττοσι (9:23; cf. 12:24), [Page 616] with implied comparison like ἥλιος βραχύ τι (2:7), or merely the positive like διαφορώτερον (Lu. 13:2; cf. 13:4). Indeed no adjective or participle at all may appear, as in ἥλιος βραχύ τι (2:7), or with merely the positive like ἁµαρτώλει τον δέλτην παρὰ πάντας (Lu. 13:4; cf. 13:2). The use of the positive with παρά is like the Aramaic (cf. Wellhausen, Einl., p. 28). Here the notion of ‘beyond’ or ‘above’ is simple enough. Cf. παρά after ἄλλος in 1 Cor. 3:11 and ἤµέραν in Ro. 14:5; Heb. 11:11. The older Greek was not without this natural use of παρά for comparison and the LXX is full of it.1 In the later Greek vernacular the ablative and ἤ both retreat before παρά and the accusative.2 In the modern Greek vernacular we find παρά and the accusative and even with the nominative after comparison (Thumb, Handb., p. 75). The notion of comparison may glide over into that of opposition very easily. Thus in Ro. 1:25, ἐλατρευσαν τῇ κτίσει παρὰ τὸν κτίσαντα, where ‘rather than’ is the idea (cf. “instead of”). Cf. Ro. 4:18, παρ ἐλπίδα ἐπὶ ἐλπίδι, where both prepositions answer over to each other, ‘beyond,’ ‘upon.’ So in 2 Cor. 8:3 κατὰ δύναµιν and παρὰ δύναµιν are in sharp contrast. Cf. Ac. 23:3. In Gal. 1:8 f. παρὰ ὁ has the idea of ‘beyond’ and so ‘contrary to.’ Cf. Ro. 11:24; 12:3; 16:17. To exceed instructions is often to go contrary to them. In a case like παρὰ νόµον (Ac. 18:13), to go beyond is to go against. Cf. English transgression, παρὰ-πτωθήσειµα. Once more παρὰ with the accusative strangely enough may actually mean ‘because of,’ like propter. So in 1 Cor. 12:15 παρὰ τοῦ θεοῦ. Cf. D in Lu. 5:7. The Attic writers used παρὰ thus, but it disappears in the later vernacular.3 The notion of cause grows out of the idea of nearness and the nature of the context. Farrar4 suggests the English colloquial: “It’s all along of his own neglect.”

(l) Περί. There is some dispute about the etymology of περί. Some scholars, like Sonne,5 connect it in etymology and meaning with ὑπέρ. But the point is not yet clear, as Brugmann6 contends. Whatever may be true about the remote Indo-Germanic root, περί belongs to the same stem as παρά and is in the locative case like pāri in the Sanskrit.7 Cf. also Old Persian pāriy, Zend pārī, Latin per, Lithuanian per, Gothic fair-, Old High German far-, fer, German ver-. The Greek uses περί as an adverb (Homer) [Page 617] and the Æolic dialect1 even uses πέρ instead of περί. The intensive particle περ is this same word.

---

1 C. and S., p. 85 f.; Thack., Gr., p. 23.
3 Ib., p. 390.
4 Gk. Synt., p. 104.
1 K.-G., I, p. 491.
1. **The Root-Meaning.** It is ‘round’ (‘around’), ‘on all sides’ (cf. ἁμφί, ‘on both sides’). Cf. περί (Ac. 5:16), where the root-idea is manifest. Cf. Latin circum, circa. The preposition has indeed a manifold development, but after all the root-idea is plainer always than with some of the other prepositions. The N. T. examples chiefly (but cf. Ac. 28:7) concern persons and things, though even in the metaphorical uses the notion of ‘around’ is present.

2. **In Composition.** The idea of ‘around’ in the literal local sense is abundant. Cf. περιῆγεν (Mt. 4:23), περιαστράψαι (Ac. 22:6), περιεστῶτα (Jo. 11:42), περιέδραμον (Mk. 6:55), περιετέρω (Mk. 6:55), περι-έχομαι (Ac. 19:13), φραγμὸν αὐτῷ περιέθηκεν (Mt. 21:33). In περι-πατέω (Mt. 9:5) περί has nearly lost its special force, while in περιεργαζομένους (2 Th. 3:11) the whole point lies in the preposition. Note in Mk. 3:34, περι-βλεψάμενος τούς περί αὐτόν κύκλῳ καθημένους, where κύκλῳ explains περί already twice expressed. Cf. also περι-κυκλώσουσίν σε (Lu. 19:43). The perfective idea of περί in composition is manifest in περι-ελεῖν ἁμαρτίας (Heb. 10:11), ‘to take away altogether.’ Cf. περι-αψάντων πῦρ ἐν μέσῳ τῆς αὐλῆς (Lu. 22:55), where note the addition of περί to ἐν μέσῳ. In Mk. 14:65 περι-κάλυπτοπwä means ‘to cover all round,’ ‘to cover up,’ like περι-κρύπτω in Lu. 1:24. This is the “perfective” sense. Cf. περι-λυπος in Mt. 26:38. Per contra note περιέργος (1 Tim. 5:13) for ‘busybody,’ busy about trifles and not about important matters. In 1 Tim. 6:10 note περιέπειραν in the sense of ‘pierced through.’ But in 2 Cor. 3:16, περιαιρεῖται, ‘the veil is removed from around the head.’

3. **Originally Four Cases Used.** These were the locative, accusative, genitive, ablative. The locative was never common in prose and died out in the late Greek, not appearing in the N. T. Delbrück is very positive about the ablative in some examples in Homer and the earlier Greek. Indeed he thinks that the true genitive is a later development after the ablative with περί. I think it probable that some of these ablative examples survive in the N. T., though I do not stress the point.

4. **With the Ablative.** There is some doubt as to how to explain the ablative with περί. In Homer it is usually explained as like ablative of comparison. Cf. ὑπέρ. Thus περί is taken in the sense of ‘beyond’ or ‘over,’ and is allied to πέρα (πέραν) and ὑπέρ, according to the original sense. Brugmann cites also περί-εμμεναι where the notion of superiority comes in. With this compare περικρατεῖσα γενέσθαι τῆς σκόψης (Ac. 27:16), which would thus have the ablative in σκόψης. But Monro admits that the origin of this notion with περί is not quite clear. On the other hand, the use of περί in composition may throw light on the subject. In 2 Cor. 3:16, περι-αιρεῖται τὸ κάλυμμα, ‘the veil is taken from around.’ Cf. also Ac. 27:20. The same notion occurs in περι-κάθαρμα (1 Cor. 4:13) and περιψῆ (ib.), ‘off-scouring’ and ‘off-scraping.’ The same idea of from around occurs in περι-ρήξαντες τῷ ἱμάτια

5 With the Genitive. This is the common case with ἐπί in the [Page 619] N. T. If the genitive and ablative examples are counted together (the real ablatives are certainly few) they number 291 as against 38 accusatives. But in the later Greek the accusative gradually drives out the genitive (with the help of διά also). The genitive was always rare with ἐπί in the local or temporal sense. The N. T. shows no example of this usage outside of composition (Ac. 25:7), unless in Ac. 25:18 ἐπί οὐ be taken with σταθέντες, which is doubtful. Curiously enough the Gospel of John has the genitive with ἐπί almost as often as all the Synoptic writers and the accusative not at all in the critical text, Jo. 11:19 reading πρὸς τὴν Μάρθαν. This frequency in John is due largely to the abundant use of μαρτυρίω, λέγω, λαλέω, γράφω, etc. Cf. Jo. 1:7, 22; 7:13, 17, etc. ἐπί may occur with almost any verb where the notion of ‘about,’ ‘concerning’ is natural, like ἔσπαθταχθή (Mt. 9:36), ἐγανάκτησαν (20:24), μέλει (22:16), ἔλεγχομένος (Lu. 3:19), ἐθαμμασαν (Lu. 2:18), etc. The list includes verbs like ὄκοι, γινώσκω, διαλογίζομαι, ἐνθυμόμαι, ἐπιζητέω, etc. The usage includes both persons, like προσέγγισαν ἐπὶ ημῶν (1 Th. 5:25), and things, like ἐπὶ ἐνδόματος τί μεριμνήτε (Mt. 6:28). One neat Greek idiom is τὸ ἐπί τῆς ὁδοῦ (Ac. 24:22), τὸ ἐπί Ἱησοῦ (18:25; Mk. 5:27), τὸ ἐπί ἰματοῦ (Ac. 24:10). Blass considers ποιεῖν ἐπὶ αὐτοῦ (Lu. 2:27) “an incorrect phrase,” which is putting it too strongly. Cf. λαγχάνο ἐπί in Jo. 19:24, like classical μάχομαι ἐπί ἐπί. Sometimes ἐπί appears rather loosely at the beginning of the sentence, ἐπὶ τῆς λογίας (1 Cor. 16:1), ἐπί Ἀπολλω (16:12). Sometimes ἐπί is used with the relative when it would be repeated if the antecedent were expressed, as in ἐπὶ ὡν ἐγγράψατε (1 Cor. 7:1) or where ἐπί properly belongs only with the antecedent, as in ἐπὶ ὡν δεδοκάς μοι (Jo. 17:9). In Lu. 19:37, ἐπί πασῶν ὡν ἔδωκαν ὑπάρχουσαν, the preposition strictly belongs
only to the antecedent which is incorporated. In a case like περὶ πάντων εὕχομαι (3 Jo. 2) the subject-matter of the prayer is implied in περὶ as cause is involved in περὶ τοῦ καθάρισμου (Mk. 1:44) and as advantage is expressed in περὶ αὐτῆς (Lu. 4:38). But this is merely due to the context.

6. With the Accusative. This construction in reality occurs with much the same sense as the genitive. The accusative, of course, suggests a placing around. It is rare in the N. T., but in later Greek displaced the genitive as already remarked. But it does not survive in the modern Greek vernacular. With the accusative [Page 620] περὶ is used of place, as in σκάψω περὶ αὐτῆς (Lu. 13:8), περὶ τὸν τόπον ἐκέινον (Ac. 28:7). Cf. Mk. 3:8. So with expressions of time, as in περὶ τρίτην ὥραν (Mt. 20:3). Note the use of περὶ with the different parts of the body, as περὶ τὴν ὀσφύν (Mt. 3:4), περὶ τὸν τράχηλον (18:6). Cf. Rev. 15:6. Περὶ is used of persons as in περιστράπτωμεν περὶ ἐμὲ (Ac. 22:6), ἀδεων περὶ αὕτους (Mk. 9:14). An ancient Greek idiom occurs in οἱ περὶ Πιοῦλον (Ac. 13:13), like οἱ περὶ Ξενοφόντα (Xen. Anab. 7, 4, 16), where the idea is ‘Paul and his companions.’1 But in a case like οἱ περὶ αὐτὸν (Lu. 22:49) the phrase has only its natural significance, ‘those about him.’ The still further development of this phrase for the person or persons named alone, like the vernacular “you all” in the Southern States for a single person, appears in some MSS. for Jo. 11:19, πρὸς τὰς περὶ Μάρθαν καὶ Μαρίαν, where only Martha and Mary are meant,2 the critical text being πρὸς τὴν Μάρθαν. Blass3 notes that only with the Philippian Epistle (2:23, τὰ περὶ ἐμὲ) did Paul begin the use of the accusative with περὶ (cf. genitive) in the sense of ‘concerning,’ like Plato. Cf. in the Pastoral Epistles, περὶ τὴν πίστιν (1 Tim. 1:19), περὶ τὴν ἀλληλεπιαν (2 Tim. 2:18). But Luke (10:40 f.) has it already. Cf. περὶ τῶν τοιαύτη (Ac. 19:25). But κύκλῳ in the LXX, as in the κοινῆ, is also taking the place of περὶ (Thackeray, Gr., p. 25). Αμφί could not stand before περὶ, and finally περὶ itself went down. The entrance of ὑπὲρ into the field of περὶ will call for notice later.

(m) Πρό. Cf. the Sanskrit ग्रां and the Zend frā, Gothic frā, Lithuanian prā, Latin pro, German für, vor, English for (for-ward), fore (fore-front). The case of πρό is not known, though it occurs a few times in Homer as an adverb.4 Cf. ὄπω and ὤπο. The Latin prod is probably remodelled from an old *pro like an ablative, as prae is dative (or locative).

1. The Original Meaning. It is therefore plain enough. It is simply ‘fore,’ ‘before.’ It is rather more general in idea than ὄρι and has a more varied development.5 In πρὸ τῆς θύρας (Ac. 12:6) the simple idea is clear.

2. In Composition. It is common also in composition, as in προ-αὐλον (Mk. 14:68), ‘fore-court.’ Other uses in composition grow out of this idea of ‘fore,’ as προ-βαίνο (Mt. 4:21), ‘to go on’ (for-wards), προ-κόπτο (Gal. 1:14), προ-ἀγο (Mk. 11:9; cf. ὄκο-λουθέω in contrast), πρὸ-δῆλος (1 Tim. 5:24), ‘openly manifest,’ [Page

4 Monro, Hom. Gr., p. 149.
621] ‘before all’ (cf. Gal. 3:1, προ-εγράφη); προ-έχω (Ro. 3:9), ‘to surpass’; προ-αμαρτάνω (2 Cor. 12:21), ‘to sin before,’ ‘previously’; προ-ορίζω (Ro. 8:29), to ‘pre-ordain.’ Cf. πρό-κριμα (1 Tim. 5:21), ‘pre-judgment.’ In these respects the N. T. merely follows in the wake of the older Greek.1 One may illustrate πρό still further by the comparative πρό-τερος and the superlative πρῶ-τος (cf. Doric πρῶ-τος). Cf. also πρό-σω, προ-τέρου.

3. The Cases Used with πρό. These call for little comment. It is barely possible that οὐρανόθι πρό in Homer may be a remnant of a locative use.2 Brugmann3 thinks that a true genitive is seen in πρὸ ὄδωρ, but this is not certain. But the ablative is probably the case. In very late Greek πρό even appears with the accusative.4 It is not in the modern Greek vernacular. The ablative is due to the idea of comparison and is found also with the Latin pro.5 Πρό occurs only 48 times in the N. T. and is almost confined to Matthew’s and John’s Gospels, Luke’s writings and Paul’s Epistles (12 times).

4. Place. Thus it occurs only in four instances, πρὸ τῆς θύρας (Ac. 12:6), πρὸ τῶν θυρῶν (Jas. 5:9), πρὸ τοῦ πυλῶνος (Ac. 12:14), πρὸ τῆς πόλεως (14:13). Cf. ἔμπροσθεν (Mt. 5:24), which is more common in this sense in the N. T. Some MSS. have πρὸ in Ac. 5:23. In Cyprus (borrowing from the literary language) to-day we still have πρὸ κεφαλῆς, ‘at the head of the table’ (Thumb, Handb., p. 98).

3 Griech. Gr., p. 449.
Thumb

———, Die griech. Sprache im Zeitalter des Hellenismus (1901).

5. Time. This is the more common idea with πρὸ in the N. T. Thus we find such expressions as τοῦς πρὸ ὕμων (Mt. 5:12), πρὸ καιροῦ (8:29), πρὸ τοῦ κατακλυσμοῦ (Mt. 24:38), πρὸ τοῦ ἄριστου (Lu. 11:38), πρὸ τοῦ πάσχα (Jo. 11:55), πρὸ τῶν αἰώνων (1 Cor. 2:7), πρὸ χειμῶνος (2 Tim. 4:21). This is all plain sailing. Nor need one stumble much at the compound preposition (translation Hebraism) πρὸ προσώπου σου (Mk. 1:2 and parallels). Cf. Ac. 13:24; Lu. 9:52. Nine times we have πρὸ τοῦ with the infinitive, as in Lu. 2:21; 22:15; Jo. 1:48. Here this phrase neatly expresses a subordinate clause of time (antecedent). Cf. ante quam. A real difficulty appears in πρὸ ἐξ ἡμερῶν τοῦ πάσχα (Jo. 12:1), which does look like the Latin idiom in ante diem tertium Kalendas. [Page 622] Jannaris\(^1\) attributes this common idiom in the late Greek writers to the prevalence of the Roman system of dating. This has been the common explanation. But Moulton\(^2\) throws doubt on this “plausible Latinism” by

Jannaris

showing that this idiom appears in a Doric inscription of the first century B.C. (Michel, 694), πρὸ ἡμερῶν δέκα τῶν μυστηρίων. The idiom occurs also in the inscriptions, πρὸ ἐς Καλανδῶν Αὐγούστου, I.M.A. iii. 325 (ii/A.D.), and the papyri, πρὸ δύο ἡμερῶν, F.P. 118 (ii/A.D.). So Moulton proves his point that it is a parallel growth like the Latin. Rouffiac (Recherches, p. 29) re-enforces it by three citations from the Priene inscriptions. Cf. also πρὸ πολλῶν τούτων ἡμερῶν Acta S. Theogn., p. 102. Moulton thinks that it is a natural development from the ablative case with πρό, ‘starting from,’ and refers to ὑψε σαββάτων in Mt. 28:1 as parallel. May it not be genuine Greek and yet have responded somewhat to the Latin influence as to the frequency (cf. LXX and the N. T.)? Similarly πρὸ ἐτῶν δεκατεσσάρων (2 Cor. 12:2), ‘fourteen years before (ago).’ Abbott3 considers it a transposing of πρό, but it is doubtful if the Greek came at it in that way. Simcox4 calls attention to the double genitive with πρό in Jo. 12:1, really an ablative and a genitive.

6. Superiority. Πρό occurs in the sense of superiority also, as in πρὸ πάντων (Jas. 5:12; 1 Pet. 4:8). In Col. 1:17 πρὸ πάντων is probably time, as in πρὸ ἔμοι (Jo. 10:8; Rom. 16:7). Cf. πρὸ τούτων πάντων in Lu. 21:12.

(n) Πρός. The etymology of πρός is not perfectly clear. It seems to be itself a phonetic variation5 of προτί which is found in Homer as well as the form ποτί (Arcad.

πός, ποτ in Bœotian, etc.). What the relation is between ποτι and προτι is not certain. The Sanskrit प्रति is in the locative case. The connection, if any, between πρός and πρό is not made out, except that προ-τι and प्राति both correspond to πρό and प्रात.

Thayer considers –τι an adverbial suffix.

1. The Meaning. It is the same as ποτι and ποτι. The root-idea is ‘near,’ ‘near by,’ according to Delbrück, though Brugmann inclines to ‘towards.’ In Homer πρός has an adverbial use, πρός δέ, with the notion of ‘besides.’1 ‘Near,’ rather than ‘towards,’ seems to explain the resultant meanings more satisfactorily. The idea seems to be ‘facing,’ German gegen. Cf. πρόσωπον. In ὁ λόγος ἢν πρός τὸν θεόν (Jo. 1:1) the literal idea comes out well, ‘face to face with God.’

2. In Composition. Probably one sees the original notion in προσ-εδρεύω, ‘to sit near’ (cf. Eurip., etc.). Some MSS. read this verb in 1 Cor. 9:13, though the best MSS. have παρεδρεύω. But we do have προσ-κεφάλαιον (Mk. 4:38) and προσ-μένω (Mt. 15:32; 1 Tim. 5:5). Cf. also προσ-φάγιον (Jo. 21:5), and προσ-ορμίζω (Mk. 6:53). The other resultant meanings appear in composition also as ‘towards’ in προσ-άγω (Lu. 9:41), ‘to’ in προσ-κολλάω (Eph. 5:31), ‘besides’ in προσ-οφείλω (Phil. 19), ‘for’ in πρό-καιρος (Mt. 13:21). This preposition is common in composition and sometimes the idea is simply “perfective,” as in προσ-καρτερέω (Ac. 1:14), πρός-πεινος (Ac. 10:10).

9 Grieb. Gr., p. 449.

3. Originally with Five Cases. The cases used with προς were probably originally five according to Brugmann,2 viz. locative, dative, ablative, genitive, accusative. The only doubt is as to the true dative and the true genitive. Delbrück3 also thinks that a few genuine datives and genitives occur. Green4 (cf. προς, 3) speaks of “the true genitive” with προς; it is only rarely true of προς and ὑπέρ. The genitive with προς is wanting in the papyri and the Pergamon inscriptions (Radermacher, N. T. Gr., p. 117). And in the N. T. no example of the genitive or dative appears. In Lu. 19:37 προς τῇ καταβάσει might possibly be regarded as dative with ἔγγιζοντος; but it is better with the Revised Version to supply “even” and regard it as a locative. In composition (προσέχετε ἐως τῶν, Lu. 12:1) the dative is common. 2 Maccabees shows the literary use of προς with dative of numbers (Thackeray, Gr., p. 188).

4. The Ablative. There is only one example of the ablative in the N. T. and this occurs in Ac. 27:34, τοῦτο προς τῆς ὑμετέρας σωτηρίας ὑπάρχει. This metaphorical usage means ‘from the point of view of your advantage.’ It is possible also to explain it as true genitive, ‘on the side of.’ This is a classical idiom. So then προς in the N. T. is nearly confined to two cases. Moulton5 agrees [Page 624] with Blass1 that this is a remnant of the literary style in Luke. Moulton finds the genitive (ablative) 23 times in the LXX. The true genitive appeared in examples like προς τοῦ ποταμοῦ, ‘by the river’ or ‘towards the river.’ In the modern Greek vernacular προς fades2 before εἰς and διά as the ablative use is going in the N. T. It is rarely used of place and time, and even so the usage is due to the literary language (Thumb, Handbook, p. 106).

5. With the Locative. Προς indeed occurs in the N. T. with the locative only seven times, so that it is already pretty nearly a one-case preposition. These seven examples are all of place and call for little remark. Cf. προς τῷ ὄρει (Mk. 5:11), προς τῷ μνημείῳ (Jo. 20:11). They are all with verbs of rest save the use with ἔγγιζοντος in Lu. 19:37. See under 3. The correct text gives the locative in Mk. 5:11 and Jo. 20:11, else we should have only five, and D reads the accusative in Lu. 19:37. These seven examples illustrate well the etymological meaning of προς as ‘near’ or ‘facing.’ Moulton counts 104 examples of προς and the dative (locative) in the LXX. Four of

2 Jann., Gk. Gr., p. 366.
these seven examples are in John’s writings. Cf. especially Jo. 20:12. Moulton (Prol., p. 106) notes “P. Fi. 5 προς τῷ πυλῶνι, as late as 245 A.D.”

6. With the Accusative. It was exceedingly common in Homer and always in the literal local sense. The metaphorical usage with the accusative developed later. How common the accusative is with προς in the N. T. is seen when one notes that the number is 679. This was the classic idiom with προς both literally and metaphorically. It is not necessary to say that προς with the accusative means ‘towards.’ The accusative case implies extension and with verbs of motion προς (‘near’) naturally blends with the rest into the resultant idea of ‘towards.’ This is in truth a very natural use of προς with the accusative, as in ἄνεχώρησεν προς τὴν θάλασσαν (Mk. 3:7). In Mk. 11:1 note both εἰς (Ἱεροσόλυμα) and προς (τὸ ὄρος) with ἐγγίζω. In Phil. 5 (W. H.) the margin has both with persons. Here Lightfoot (in loco) sees a propriety in the faith which is towards (προς) Christ and the love exerted upon (εἰς) men. But that distinction hardly applies in Ro. 3:25 f.; Eph. 4:12. Cf. Mk. 5:19. In Mk. 9:17 W. H. and Nestle accent προς σε. There seems to be something almost intimate, as well as personal, in some of the examples of προς. The examples of προς with persons are very numerous, as in ἐξεπορεύετο προς αὐτὸν (Mt. 3:5), [Page 625] δέθη προς με (Mt. 11:28), etc. But one must not think that the notion of motion is essential to the use of προς and the accusative (cf. εἰς and ἐν). Thus in Mk. 4:1, πᾶς ὁ δὲ χλος προς τὴν θάλασσαν ἐπὶ τῆς γῆς ἦσαν, note both ἐπὶ and προς and the obvious distinction. Cf. also θερμαίνομενος προς τὸ φῶς (Mk. 14:54). It is not strange, therefore, to find προς ἡμᾶς εἰσίν (Mt. 13:56), προς σε ποιῶ τὸ πάσχα (26:18). Cf. also τα προς τὴν θύραν in Mk. 2:2. The accusative with προς is not indeed exactly what the locative would be, especially with persons. In Mk. 14:49 we find καθ ἡμέραν ἡμῖν προς ὑμᾶς ἐν τῷ ἱερῷ διδάσκειν. Abbott properly illustrates Jo. 1:1, ὁ λόγος ἦν προς τὸν θεόν with this passage in Mk. and with 2 Cor. 5:8, ἐνδίδημου προς τὸν κύριον. It is the face-to-face converse with the Lord that Paul has in mind. So John thus conceives the fellowship between the Logos and God. Cf. στόμα προς στόμα 2 Jo. 12, 3 Jo. 14 and πρόσωπων προς πρόσωπων in 1 Cor. 13:12. But, while this use of προς with words of rest is in perfect harmony with the root-idea of the preposition itself, it does not occur in the older Greek writers nor in the LXX. Jannaris is only able to find it in Malalas. Certainly the more common Greek idiom would have been παρά, while μετά and σὺν might have been employed. Abbott, however, rightly calls attention to the frequent use of προς with verbs of speaking like λέγω, λαλέω, etc., and Demosthenes has it with ζω. So then it is a natural step to find προς employed for living relationship, intimate converse. Two very interesting examples of this personal intercourse occur in Lu. 24:14, ὑμῖν προς ἄλληλους, and verse 17, ἀντιβάλλετε προς ἄλληλους. Cf. also προς with περιπατέω (Col. 4:5), κοινωνία (2 Cor. 6:14), διαθήκη (Ac. 3:25 as in ancient Greek), λόγος (Heb. 4:13),

3 Monro, Hom. Gr., p. 142.

1 Joh. Gr., p. 273 f.
2 lb.
etc. Certainly nothing anomalous exists in πίπτει πρὸς τούς πόδας (Mt. 5:22) and προσκόψης πρὸς λίθον (Mt. 4:6). Πρὸς is not used often with expressions of time, and the notion of extension is in harmony with the accusative case. Cf. πρὸς καυρόν in Lu. 8:13, πρὸς οὐρανόν in Jo. 5:35, πρὸς ὠλίγας ἡμέρας in Heb. 12:10. In πρὸς ἐσπέραν (Lu. 24:29) the resultant notion is ‘toward,’ rather than ‘for.’ Blass points out that πρὸς τῷ παρόν (Heb. 12:11) is classical. The metaphorical uses of πρὸς are naturally numerous. Disposition towards one is often expressed by πρὸς, whether it be friendly as in μακροθυμεῖτε πρὸς πάντας (1 Th. 5:14) or hostile as in ἔν έχθρῷ ὄντες πρὸς αὐτούς (Lu. 23:12). [Page 626] Cf. met—ἀλλήλων (ib.). Πρὸς does not of itself mean ‘against,’ though that may be the resultant idea as in γογγύσιοι—πρὸς τοὺς Ἑβραίους (Ac. 6:1). Cf. also πρὸς πλησιμοῦν τῆς σαρκός (Col. 2:23) and πρὸς τοὺς κτλ. (2 Cor. 5:12). Sometimes πρὸς adds nothing to the vague notion of extension in the accusative case and the idea is simply ‘with reference to.’ Thus πρὸς τοὺς σφυγέων (Ev. 3:20) and σφυγεῖν (Heb. 1:7). Cf. also Lu. 20:19. Πρὸς in the κοινή shares with εἰς and περὶ the task of supplanting the disappearing dative (Radermacher, N. T. Gr., p. 112). In particular πρὸς αὐτόν (–οῦς) takes the place of αὐτῷ (–οῖς) after λέγω, ἐπον, ὀποκρίνομαι, as shown by parallel passages in the Synoptic Gospels, as in Lu. 3:14, where MSS. vary between αὐτοῦς and πρὸς αὐτοῦς. Adjectives may have πρὸς in this general sense of fitness, like ἀγαθός (Eph. 4:29), δυνατά (2 Cor. 10:4), ἰκανός (2 Cor. 16), λευκια πρὸς θερισμόν (Jo. 4:35), etc. Cf. also τῷ πρὸς τὸν θεόν (Ro. 15:17). The phrase τῷ πρὸς ἡμᾶς (Mt. 27:4) has ancient Greek support. The notion of aim or end naturally develops also as in ἐγώ ἐγὼ ἐπρόσεσθαι νουθεσίαν (1 Cor. 10:11), πρὸς τί οὖν (Jo. 13:28), τῷ πρὸς τὴν ἐλεημοσύνην καθήμενος (Ac. 3:10). Cf. 1 Cor. 14:26; 15:34. Some examples of the infinitive occur also in this connection, like πρὸς τὸ θεοθότητι ἀντάρτι (Mt. 6:1), πρὸς τὸ κατακαύσαι αὐτά (13:30), etc. In πρὸς τὸ δεῖν προσεχεσθαι (Lu. 18:1) the notion is hardly so strong as ‘purpose.’ But see Infinitive. Then again cause may be the result in certain contexts as in Μωυσῆς πρὸς τὴν σκληροκαρδίαν ὑμῶν ἐπέτρεψεν (Mt. 19:8). There is no difficulty about the notion of comparison. It may be merely general accord as in πρὸς τῷ θέλημα αὐτοῦ (Lu. 12:47), πρὸς τὴν ἀλήθειαν (Gal. 2:14), or more technical comparison as in οὕτως σὺ καθήμεν τοῦ νῦν καυροῦ πρὸς τὴν μέλλουσαν δόξαν ἀποκαλύφθηναι (Ro. 8:18). With this may be compared πρὸς φθόνον in Jas. 4:5, where the phrase has an adverbial force.

(o) Σύν. The older form ξύν (old Attic) appears in some MSS. in 1 Pet. 4:12 (Beza put it in his text here). This form ξύν is seen in ξύνων. In μετὰ-ξύν both μετά and ξύν(ν) are combined. Delbrück is indeed in doubt as to the origin of σύν, but see Mommsen, and some (Giles, Comp. Philol., p. 343) consider ξύν and σύν different.

5 Gr. of N. T. Gk., p. 139.
1 Blass, Gr. of N. T. Gk., p. 139.
Mommsen

Mommsen, T., Beiträge zur Lehre der griech. Präpositionen (1886–1895).
1. **The Meaning.** This is in little dispute. It is ‘together with.’\(^5\) Cf. Latin *cum* and English *con*-comitant. The associative instrumental is the case used with σύν as with ἃμα and it is just that idea that it was used to express originally.\(^1\) It never departed from this idea, for when the notion of help is present it grows naturally out of that of association. The Attic, according to Blass,\(^2\) confines σύν to the notion of ‘including,’ but the Ionic kept it along with μετά for ‘with.’

2. **History.** It is not without interest. In Homer it is sometimes an adverb (tmesis). Indeed it never made headway outside of poetry save in Xenophon, strange to say. The Attic prose writers use μετά rather than σύν. Thus in 600 pages of Thucydides we find μετά 400 times and ξύν 37, while Xenophon has σύν more than μετά. In Demosthenes the figures run 346 of μετά and 15 of σύν, while Aristotle has 300 and 8 respectively.\(^3\) Monro\(^4\) thinks that μετά displaced σύν in the vernacular while σύν held on in the poets as the result of Homer’s influence and finally became a sort of inseparable preposition like dis- in Latin (cf. ἄμφι-- in N. T.). In the modern Greek vernacular σύν is displaced by μέ (μετά) and sometimes by ἃμα.\(^5\) The rarity of σύν in the N. T. therefore is in harmony with the history of the language. Its use in the N. T. is largely confined to Luke’s Gospel and Acts and is entirely absent from John’s Epistles and the Apocalypse as it is also from Hebrews and 1 Peter, not to mention 2 Thessalonians, Philo and the Pastoral Epistles. It is scarce in the rest of Paul’s writings and in Mark and Matthew,\(^6\) and John’s Gospel has it only three times (12:2; 18:1; 21:3). It occurs in the N. T. about 130 times (over two-thirds in Luke and Acts), the MSS. varying in a few instances.

3. **In Composition.** Here σύν is extremely common. See list of these verbs in chapter on Cases (Instrumental). Cf. Thayer’s Lexicon under σύν. The use in composition illustrates the associative idea mainly as in συν-άγω (Mt. 2:4), συν-έρχομαι (Mk. 3:20), though the notion of help is present also, as in συν-αντι-λαμβάνομαι (Lu. 10:40), συν-εργέω (1 Cor. 16:16). Cf. χαίρω καὶ συγχαίρω (Ph. 2:17 f.). The “perfective” use of σύν is seen in συν-καλόπτω (Lu. 12:2), συν-κλείσιο (Ro. 11:32), συν-κύπτω (Lu. 13:11). Cf. συντελέω, συντηρέω, etc. In σύνοιδα the knowing may be either with another, as possibly Ac. 5:2, or with one’s self, as in 1 Cor. 4:4.

2 Gr. of N. T. Gk., p. 132.

3 Cf. Mommsen, Entw. etc., p. 4 f.

4 Hom. Gr., p. 147.

6 Cf. on the whole subject Mommsen, Entw., p. 395.
The verb συνέχω (Lu. 22:63; Ac. 18:5) is found in the papyri (Deissmann, *Bible Studies*, p. 160. Cf. Moulton and Milligan, *Expositor*, 1911, p. 278). As already explained, the case used is the associative-instrumental. In the very late Greek the accusative begins to appear with σύν (as indeed already in the LXX!) and both σύν and ἃμα show examples of the genitive like μετά.

4. *N. T. Usage.* There is very little comment needed on the N. T. usage of the preposition beyond what has already been given. The bulk of the passages have the notion of accompaniment, like σύν σοι ἀποθανεῖν (Mt. 26:35). So it occurs with μένειν (Lu. 1:56), καθίσαι (Ac. 8:31), etc. Cf. also σύν ὅλῃ τῇ ἐκκλησίᾳ (Ac. 15:22),

2 Cf. Westcott on Jo. 1:2 for discussion of distinction between σύν and μετά.
where the use of σὸν may subordinate the church a bit to the Apostles (Thayer). 3 Cf. also Ac. 14:5; Lu. 23:11, where καί rather than σῶν might have occurred. As applied to Christ, σῶν, like ἐν, may express the intimate mystic union, as in κέκρυπται σὸν τῷ Χριστῷ ἐν τῷ θεῷ (Col. 3:3). The phrase οἱ σῶν is used much like οἱ παρά, οἱ περί, οἱ μετά. Thus Πέτρος καὶ οἱ σῶν αὐτῶν (Lu. 9:32). Cf. Lu. 5:9 and Mk. 2:26. Once σῶν occurs in a context where the idea is ‘besides,’ ἀλλά γε καὶ σὸν πέποιν τούτους (Lu. 24:21). Cf. Neh. 5:18. So probably also Ph. 1:1. It appears in the papyri in this sense also. Cf. Moulton and Milligan, “Lexical Notes on the Papyri,” *The Expositor*, 1911, p. 276. In Mt. 8:34 Text. Rec. reads also Ac. 14:5; Lu. 23:11, where 2 Hist. Gk. Gr., p. 398. 

1. The Meaning. It is therefore clear enough. It is the very English word ‘over’ or ‘upper.’ Chaucer uses ‘over’ in the sense of ‘upper.’ As an adverb it does not occur in Homer, though Euripides (*Medea*, 627) has ὑπὲρ ἄγαν. Jannaris calls ὑπὲρ (Blass ὑπὲρ) ἔγιν (2 Cor. 11:23) “the monstrous construction,” which is rather overdoing the matter. The use of the preposition is not remarkably abundant in the N. T.

2. In Composition. The N. T. has also the compound prepositions ὑπεράνω (Eph. 1:21), ὑπερεκπερισσοῦ (Eph. 3:20), ὑπερέκιευμα (2 Cor. 10:16) and the adverbs ὑπερλίαν (2 Cor. 11:5), ὑπερβαλλόντος (2 Cor. 11:23). The literal meaning of ὑπέρ (‘over’) appears in ὑπερ-ἀνόω (Heb. 9:5), ὑπὲρ αὐτὴν (ib. D), ὑπὲρ-ῶν (‘upper room,’ Ac. 1:13). The notion of ‘excess,’ ‘more than’ (comparison), appears in ὑπερ-αἰρώ (2 Cor. 12:7), ὑπερ-ἐκπερισσοῦ (1 Th. 3:10), ὑπερ-ἐχο (Ph. 4:7), ὑπερ-νικάω (Ro. 8:37), ὑπερ-ὐψόμο (Ph. 2:9), ὑπερ-φρονέω (Ro. 12:3). ‘Beyond’ is rather common also, as in ὑπέρ-ακμος (1 Cor. 7:36), ὑπερ-ἀκμαῖον (2 Th. 1:3), ὑπερ-βαινό (1 Th. 4:6), ὑπερ-εκτείνω in 2 Cor. 10:14, ὑπερ-ἐκείνω (10:16), and this grows into the “perfective” idea as in ὑπερ-ήμανος (Ro. 1:30), ὑπερ-ὑψώσειν (Ph. 2:9), ὑπερ-σχή (1 Tim. 2:2), ὑπερ-πλεονάζω (1 Tim. 1:14). Cf. English “over-zealous,” “over-anxious,” etc. The negative notion of ‘overlook’ appears in ὑπερ-ἐδον (Ac. 17:30). The idea of ‘defence,’ ‘in behalf of,’ ‘bending over to protect,’ occurs in ὑπερ-

3 Cf. the use of σῶν καὶ in the pap. Deiss., B. S., p. 265 f.
1 Monro, Hom. Gr., p. 146; Brugmann, Griech. Gr., p. 228.
In the late Greek vernacular ὑπέρ fades before ὑπέράνω and ὑπερ and already in the N. T. the distinction between περί and ὑπέρ is not very marked in some usages, partly due to the affinity in sound and sense. Passages where the MSS. vary between ὑπέρ and περί are Mk. 14:24; Jo. 1:30; Ac. 12:5; Ro. 1:8; Gal. 1:4, etc.

3. With Genitive? A word is needed about the cases used with ὑπέρ. There is no trouble as to the accusative, but it is a mooted question whether we have the true genitive or the ablative. Brugmann views the case as genitive without hesitation and cites the Sanskrit use of upari in support of his position. But [Page 630] on the side of the ablative we note Kühner-Gerth and Monro, while Delbrück admits that either is possible, though leaning to the genitive. Where such doctors disagree, who shall decide? The Sanskrit can be quoted for both sides. The main argument for the ablative is the comparative idea in ὑπέρ which naturally goes with the ablative. On the whole, therefore, it seems to me that the ablative has the best of it with ὑπέρ.

4. With Ablative. Certainly as between the ablative and the accusative, the ablative is far in the lead. The figures are, ablative 126, accusative 19. On the whole, therefore, ὑπέρ drops back along with ὑπό. There is no example of the strictly local use of ὑπέρ in the N. T. unless οἱ βαπτίζοντες ὑπὲρ τῶν νεκρῶν (1 Cor. 15:29) be so understood, which is quite unlikely. This obscure passage still remains a puzzle to the interpreter, though no difficulty arises on the grammatical side to this or the other senses of ὑπέρ. The N. T. examples are thus metaphorical. These uses fall into four divisions.

The most common is the general notion of ‘in behalf of,’ ‘for one’s benefit.’ This grows easily out of the root-idea of ‘over’ in the sense of protection or defence. Thus in general with προσεύχομαι (Mt. 5:44), δέομαι (Ac. 8:24), ἀγωνίζομαι (Col. 4:12), καθίσταμαι (Heb. 5:1), προσφέρω (ib.), etc. The point comes out with special force in instances where κατά is contrasted with ὑπέρ as in εἰς ὑπέρ του ἐνός φυσιοῦσθε κατὰ τοῦ ἑτέρου (1 Cor. 4:6). Cf. also Mk. 9:40; Ro. 8:31. We must not, however, make the mistake of thinking that ὑπέρ of itself literally means ‘in behalf of.’ It means ‘over.’

It is sometimes said that ὁντί means literally ‘instead’ and ὑπέρ ‘in behalf of.’ But Winer sees more clearly when he says: “In most cases one who acts in behalf of

3 Jann., ib., p. 366.
4 Ib., p. 398.
1 I, p. 486.
2 Hom. Gr., p. 147.
4 Moulton, Prol., p. 105.
5 Cf. W.-Th., p. 382.
6 Simcox, Lang. of the N. T., p. 156. Winer (W.-Th., p. 38) implies the same thing.
another takes his place.” Whether he does or not depends on the nature of the action, not on ὦντι or ὑπέρ. In the Gorgias of Plato (515 C.) we have ὑπέρ σοῦ for the notion of ‘instead.’ Neither does πρό (nor Latin pro) in itself mean ‘instead.’ In the Alcestis of Euripides, where the point turns on the substitutionary death of Alcestis for her husband, [Page 631] ὑπέρ occurs seven times, more than ὦντι and πρό together. Cf. Thucydides 1, 141 and Xenophon Anab. 7:4, 9 for the substitutionary use of ὑπέρ. In the Epistle to Diognetus (p. 84) we note λύτρον ὑπέρ ἡμῶν and a few lines further the expression is ὦνταλλαγή. Paul’s combination in 1 Tim. 2:6 is worth noting, ὦντιλυτρον ὑπέρ πάντων, where the notion of substitution is manifest. There are a few other passages where ὑπέρ has the resultant notion of ‘instead’ and only violence to the context can get rid of it. One of these is Gal. 3:13. In verse 10 Paul has said that those under the law were under a curse (Ὕπῳ κατάραν). In verse 13 he carries on the same image. Christ bought us “out from under” the curse ( ἐκ τῆς κατάρας τοῦ νόμου) of the law by becoming a curse “over” us (γενόμενος ὑπέρ ἡμῶν κατάρα). In a word, we were under the curse; Christ took the curse on himself and thus over us (between the suspended curse and us) and thus rescued us out from under the curse. We went free while he was considered accursed (verse 13). It is not a point here as to whether one agrees with Paul’s theology or not, but what is his meaning. In this passage ὑπέρ has the resultant meaning of ‘instead.’ The matter calls for this much of discussion because of the central nature of the teaching involved. In Jo. 11:50 we find another passage where ὑπέρ is explained as meaning substitution, ἵνα ἐὰς ὀνθρωπος ἀποθάνῃ ὑπέρ τοῦ λαοῦ καὶ μὴ ὄλον τὸ ἔθνος ἀπολέσῃ. Indeed Abbott1 thinks that “in almost all the Johannine instances it refers to the death of one for the many.” In Philemon 13, ὑπέρ σοῦ μοι διακονῆ, the more obvious notion is ‘instead.’ One may note ἔγραψα ὑπέρ αὐτοῦ μὴ ἱδότος γράμματα, P. Oxy. 275 (A.D. 66), where the meaning is obviously ‘instead of him since he does not know letters.’ Deissmann (Light, p. 152 f.) finds it thus (ἔγραψεν ὑπέρ αὐτοῦ) in an ostracon from Thebes, as in many others, and takes ὑπέρ to mean ‘for’ or ‘as representative of,’ and adds that it “is not without bearing on the question of ὑπέρ in the N. T.” Cf. ἔγραψα ὑπέρ αὐτοῦ γράμματος, B.U. 664 (i/A.D.). In the papyri and the ostraca ὑπέρ often bore the sense of ‘instead of.’ In 2 Cor. 5:15 the notion of substitution must be understood because of Paul’s use of ὁρα οἱ πάντες ἀπέθανον as the conclusion2 from ἐς ὑπέρ πάντων ἀπέθανεν. There remain a [Page 632] number of passages where the notion of substitution is perfectly natural from the nature of the case. But in these passages one may stop in translation with ‘in behalf of’ if he wishes. But there is no inherent objection in ὑπέρ itself to its

Winer, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

7 Ib. Blass, Gr. of N. T. Gk., p. 135, has nothing on this use of ὑπέρ. Moulton, Prol., p. 105, merely calls ὑπέρ “the more colourless” as compared with ὦντι.

1 Joh. Gr., p. 276.

conveying the notion of ‘instead’ as a resultant idea. In fact it is *per se* as natural as with ἄντι. In the light of the above one finds little difficulty with passages like Ro. 5:6 f.; 8:32; Gal. 2:20; Jo. 10:11, 15; Heb. 2:9; Tit. 2:14, etc. In Mk. 10:45 we have λότρον ἄντι πολλῶν and in 14:24 τὸ αἷμα μου—τὸ ἐκχυννόμενον ὑπέρ πολλῶν. But one may argue from 1 Jo. 3:16 that ὑπέρ in case of death does not necessarily involve substitution. Surely the very object of such death is to save life.

The two other uses of ὑπέρ may be briefly treated. Sometimes the resultant notion may be merely ‘for the sake of,’ as in ὑπέρ τῆς δόξης τοῦ θεοῦ (Jo. 11:4), ὑπέρ ἀληθείας θεοῦ (Ro. 15:8), ὑπέρ τοῦ ὅνοματος (Ac. 5:41), ὑπέρ Χριστοῦ (Ph. 1:29), etc. This is natural in relations of intimate love.

A more general idea is that of ‘about’ or ‘concerning.’ Here ὑπέρ encroaches on the province of περί. Cf. 2 Cor. 8:23, ὑπέρ Τίτου, 2 Th. 2:1, ὑπέρ τῆς παρουσίας τοῦ κυρίου. Perhaps 1 Cor. 15:29 comes in here also. Moulton finds commercial accounts in the papyri, scores of them, with ὑπέρ in the sense of ‘to.’ We see the free use (‘concerning’) with verbs like καυχάομαι (2 Cor. 7:14), φρονέω (Ph. 1:7), κράζω (Ro. 9:27), ἔρωτα (2 Th. 2:1), etc. The Latin super is in line with this idiom also. Cf. Jo. 1:30, ὑπέρ οὖν ἑρωτεύομαι. In 1 Cor. 10:30, τί βλασφημοῦμαι ὑπέρ οὖν ἑρωτεύομαι, the preposition suits antecedent as well as relative. In 2 Cor. 1:6 and Ph. 2:13 ὑπέρ suggests the object at which one is aiming. Cf. ὑπέρ οὖν ἡ βουλήμαθα ἀπεστάλκαμεν, P. Goodspeed 4 (ii/b.c.); ὑπέρ οὖν λέγω, P. Oxy. 37 (A.D. 49); ὑπέρ ἀραβιδόνος, P. Grenf. ii. 67 (A.D. 237), ‘by way of earnest-money.’

5. The Accusative with ὑπέρ calls for little remark. The literal local use of ὑπέρ occurs in D in Heb. 9:5, ὑπέρ δὲ αὐτήν, “an unparalleled use,” in the sense of ‘above,’ the other MSS. having ὑπεράνω. The accusative with ὑπέρ has the metaphorical sense of ‘above’ or ‘over,’ as in οὐκ ἔστιν μαθητής ὑπέρ τόν διδάσκαλον (Mt. 10:24). Cf. also τὸ δόμομα τὸ ὑπέρ πάν τῶν δόμων (Ph. 2:9), κεφαλὴν ὑπέρ πάντα (Eph. 1:22), οὐκέτι ὑπὲρ τῶν δούλων ἄλλα ὑπέρ δούλων (Phil. 16). This notion easily gets into that of ‘beyond’ in harmony with the accusative case. Thus ὑπέρ ἄγερματα (1 Cor. 4:6), πεποιθήσατε ὑπέρ δὲ δύνασθε (1 Cor. 10:13). Cf. ὑπέρ δύναμιν (2 Cor. 1:8), [Page 633] ὑπέρ πολλούς (Gal. 1:14), ὑπέρ τῆς λαμπρότητας (Ac. 26:13). Classical Greek only shows the beginning of the use of ὑπέρ with comparatives, but the N. T. has several instances. Thus the LXX often uses it with comparatives, partly because the Hebrew had no special form for the comparative degree. But the koine shows the idiom. So we find φρονμότερον ὑπέρ τούς ιερός (Lu. 16:8), τομοτέρος ὑπέρ πᾶσαν μάχαιραν (Heb. 4:12). In Jo. 12:43 W. H. read ἤπερ in text and ὑπέρ in margin after μᾶλλον. But ὑπέρ has the comparative sense of ‘more than’ after verbs, as ὁ φύλαξ πατέρα ἠ μητέρα ὑπέρ ἐμέ (Mt. 10:37). In the LXX the positive adjective occurs with ὑπέρ, as ἔνδοξος ὑπέρ τούς ἀσέλφους (1

1 Prol., p. 105.
2 Blass, Gr. of N. T. Gk., p. 313.
1 Ib., p. 108.
2 C. and S., Sel. from LXX, p. 84.
Chronic. 4:9). In Ro. 12:3, μὴ ὑπερφορεύειν παρ ὁ δὲ ἐφορεύειν, note the conjunction of ὑπέρ and παρά. Moulton (Prol., p. 237) cites ὑπὲρ ἐαυτὸν φορεύειν, T.P. 8 (ii/B.C.). Blass doubts whether ὑπερλίαν, ὑπερπερισσοῦ can be properly regarded as compounds. He would separate ὑπέρ as an adverb, ὑπὲρ λίαν. But the modern editors are against him. It has disappeared in modern Greek vernacular before γά (Thumb, Handb., p. 105).

**(q) ὑπό.** Little is called for by way of etymology since ὑπό is the positive of ὑπέρ. Cf. the Sanskrit ṛṣa, Latin sub, Gothic uf, possibly also German auf; English up, ab-ove. The form ὑπό is of unknown case, but the Elean dialect has also ὑπαί (dative.)

1. *The Original Meaning.* This was probably ‘upwards’ or ‘from under.’ Unlike κατά, ὑπό never means ‘downwards.’ As a matter of fact, ‘up’ and ‘under’ are merely relative terms. The very English word *up* is probably ὑπό. Cf. ὑψι ‘aloft,’ ὑπτίος ‘facing upwards,’ ὑπτιος ‘uppermost,’ ὑψιστος. The meaning of under or beneath is common in the N. T., as ὑπό τὸν μόδιον (Mt. 5:15).

2. *In Composition.* Here ὑπό appears simply with the notion of ‘under’ as in ὑποκάτω (Mk. 7:28), ὑποσιπάζω (1 Cor. 9:27), ὑπογραμμός (1 Pet. 2:21), ὑποπόδιον (Mt. 5:35), ὑποδέω (Mk. 6:9). Cf. also ὑπό-δειγμα (Jo. 13:15), ὑπό-ζύγιον (Mt. 21:5). In ὑπό-κρισις (Mt. 23:28), ὑπό-κριτής (Mt. 6:2) the notion of an actor under a mask lies behind the resultant idea. The idea of hospitality (under one’s roof) is natural with ὑπό-δέχομαι (Lu. 10:38), ὑπό-λαμβάνω (3 Jo. 8). In Ro. 16:4 ὑπό-τίθημι has the idea of ‘put under,’ as ὑπό-ζώννυμι (Ac. 27:17), ‘undergird.’ In ὑπό-λαβὼν [Page 634] ὑπέν (Lu. 10:30) the notion of interrupting or following a speech comes from the idea of ‘up’ in ὑπό, taking up the talk, etc. The “perfective” idea appears in ὑπο-λείπο (Ro. 11:3), ‘leave behind or over.’ So with ὑπο-τρέχω (Ac. 27:16), ‘run under or over.’ Cf. ὑπο-πλέω (Ac. 27:4, 7), ‘sail close by.’ But in ὑπο-πνέο (Ac. 27:13) the preposition minimizes the force of the verb, ‘blow softly.’ Cf. our suspicion, the French *soupçon.* So with under-estimate. In ὑπο-βάλλω (Ac. 6:11) the notion of suggestion has an evil turn, but in ὑπο-μιμήσα (Jo. 14:26) there is no such colour. The idea of subjection (note how these ideas appear in English usage all along) occurs in ὑπο-ακούω (Ph. 2:12), ὑπο-εἶκο (Heb. 13:17), etc. In ὑπο-αντίω (Mt. 8:28) the special force of ὑπό has rather disappeared. Cf. our vulgar “meet up” with one. So ὑπο-ἐναντίος (Col. 2:14).

3. *The Cases Once Used with ὑπό.* The locative was originally very common with ὑπό, as in Homer, even with verbs of motion. As a matter of fact, however, in the historical writers the locative and accusative with ὑπό are very rare as compared with the ablative, though Appian and Herodian use the locative more than the accusative.
But the locative retreated\(^4\) before the accusative with ὑπό till in the N. T. and the modern Greek it has disappeared. In the N. T.\(^5\) the accusative shows 50 examples and the ablative 165, but in the vernacular of the Byzantine Greek the accusative with ὑπό disappears before ὑποκάτω and ὑποκάτω.\(^6\) In the modern Greek vernacular ὑπό has displaced ὑπό (Thumb, *Handb.*., p. 102). Brugmann\(^7\) even thinks that ὑπό once occurred with the instrumental case, and he is clear that the ablative, as well as the genitive, was found with it. Delbrück\(^8\) agrees to both ablative and genitive. Thus originally ὑπό occurred with five cases (loc., instr., acc., abl., gen.).

In the N. T. we meet only the accusative and ablative. No example of the pure genitive with ὑπό occurs in the N. T. In Jo. 1:50 we find ἔσοντε σε ὑποκάτω τῆς συκῆς, but not ὑπό. So also in some other N. T. passages where a genitive with ὑπό might have been used. Cf. Mk. 7:28; Lu. 8:16, etc. The accusative with ὑπό, as in ἔντα ὑπό τὴν συκῆν (Jo. 1:48), supplants the genitive also in the N. T. The use of ὑπό for agency and cause is ablative like the Latin usage with *ab (a)*.

4. *With the Accusative.* It is considered by Winer\(^1\) to be the original use of ὑπό. This indeed would accord with the notion of ‘upwards,’ ‘up from under.’ But in the N. T., as in the later Greek, the accusative occurs with the notion of rest (cf. ἔλευ).\(^2\) The accusative in the N. T. takes the place of the local use of ὑπό with locative and genitive.\(^3\) Thus we find (motion) τιθέασιν αὐτῷ ὑπό τὸν μύδιον (Mt. 5:15), but also (rest) ὑπό τὴν συκῆν (Jo. 1:48). Other examples with verbs of rest are ὑπό τὴν σκιάν κατασκηνοῦν (Mk. 4:32), ὑπό τὸν οὐρανόν (Ac. 4:12), with ἐλίμι, we have ὑπό τὰ χείλη (Ro. 3:13), ὑπό νόμον (Ro. 6:14 f.), ὑπό παῦλογον (Gal. 3:25), etc. These examples are as freely used as those like ἱνα μου ὑπό τὴν στέγην ἐισέλθῃς (Mt. 8:8). The examples are both local as with ἐπισυνάγω (Lu. 13:34) and figurative as with ταπεινώ (1 Pet. 5:6). Cf. Ac. 4:12 ὑπό τὸν οὐρανὸν with ὑπό Διὰ Γῆν Ἡλιον ἑπὶ λότρος P. Oxy. 48, 49, 722 (A.D. 86, 100, 91). Cf. Deissmann, *Light*, etc., p. 332. Only one instance of the use of ὑπό with time appears in the N. T., ὑπό τὸν ὄθθον (Ac. 5:21), where it has the notion of ‘about’ (or ‘close upon’) dawn. John uses ὑπό with the accusative only once\(^4\) (Jo. 1:48) and with the ablative only five times (Jo. 14:21; 3 Jo. 12 bis; Rev. 6:8, 13), an incidental argument for unity of authorship.

5. *With the Ablative.* In the sense of efficient cause or agent it was the commonest classical usage and it continues so in the N. T.\(^5\) The local and temporal uses do not occur, but only the metaphorical. These occur after passive or neuter verbs. Abbott\(^6\) thinks that John preferred to represent the agent as performing the act and so avoided

7 Griech. Gr., p. 452 f.
1 W.-Th., p. 407.
3 Blass, Gr. of N. T. Gk., p. 135.
4 Abbott, Joh. Gr., p. 278.
6 Joh. Gr., p. 279.
ὑπό. The ancient Greek indeed used ὑπό chiefly in this sense of agent. The use of ἀποθνῄσκω ὑπό as the correlative of ἀποκτείνω τις is well known. 7 In the N. T. once (Rev. 6:8) ὑπό actually occurs with the active of ἀποκτείνω (ἀποκτείνα ἐν ῥομφαία—καὶ ὑπὸ τῶν θηρίων). This is probably due to the desire to distinguish between the living agent and the lifeless causes preceding. 8 But the N. T. has neuter verbs with ὑπό, like ὀπόλλωμαι (1 Cor. 10:9), λαμβάνω (2 Cor. 11:24), πάσχω (Mk. 5:26), ὑπομένω (Heb. 12:3). In the case of passive verbs the usage follows the traditional lines. Cf. Mt. 4:1 for two examples, ἀνίχθη ὑπὸ τοῦ πνεύματος,  [Page 636] περισοθῆναι ὑπὸ τοῦ διαβόλου. It is to be noted that in Lu. 9:8 ὑπό is not repeated with ἄλλων. The bulk of the N. T. instances of ὑπό occur of personal agency like ἐβαπτίζοντο ὑπάυτοῦ (Mt. 3:6), διεσπάσθαι ὑπάυτοῦ (Mk. 5:4), etc.

Sometimes, when διά is added to ὑπό, a distinction is made between the intermediate and the mediate agent, as in τὸ ῥηθὲν ὑπὸ κυρίου διὰ τοῦ προφήτου (Mt. 1:22). Cf. 2:15. There is nothing peculiar about the use of ὑπό in 2 Pet. 1:17, φωνῆς ἐνεχθείσης ὑπὸ τῆς μεγάλοπρεποῦς δόξης. 1 But ὑπό is not the only way of expressing the agent. Besides διά for the indirect agent ὑπό is the most common 2 substitute for ὑπό, though ἐκ and παρά both are found for the notion of agency. Radermacher (N. T. Gr., p. 116) speaks of ὑπό as “die eigentlich prädestinierte Partikel.” The instrumental case and ἐν and the locative must also be recalled. But διά with the accusative (motive or cause) must not be confounded with this idea. Cf. Lu. 21:17 for ὑπό with ablative and διά with the accusative. The prepositions will richly repay one’s study, and often the whole point of a sentence turns on the prepositions. In Lu. 5:19 eight prepositions occur, counting ἐμπροσθεν, and many such passages are found as Gal. 2:1, 2. Cf. Joy, On the Syntax of Some Prepositions in the Greek Dialects (1904).

VIII. The “Adverbial” Prepositions. The list in the N. T. of those prepositions which do not occur in composition with verbs is considerable. As already remarked in the beginning of this chapter, what are called “proper” prepositions were originally adverbs, fixed case-forms which came to be used with nouns and in composition with verbs. We have followed the varied history of this most interesting group of words. Homer 3 in particular used most of them at times merely adverbially. In Homer the “regular” prepositions often retain this adverbial force, as ἐν δέ, παρά δέ, and this separation from a verb is no longer considered a “surgical operation” (tesis). Cf. Seymour, Homeric Language and Verse, 25, 78. Some of these prepositions gradually

Seymour

———, Life in the Homeric Age (1907).

———, The Use of the Gk. Aor. Part. (Trans. Am. Phil. Assoc., XII, 1881, pp. 88 ff.).
disappeared, but the total use of prepositions greatly increased. This increase was due
to the wider use of the remaining prepositions and the increasing use of so-called
“improper” prepositions, adverbs with cases that never came to be used in
composition with verbs. The Sanskrit\(^4\) had no proper class of prepositions, but a
number of [Page 637] adverbs which were sometimes used with cases. These
adverbial prepositions varied constantly in the history of the Greek. Some of them,
like ὧνευ, ἐγγύς, ἔνεκα, come right on down from Homer. Others drop by the way
while each age sees a new crop coming on. But in the late vernacular a number of
these prepositional adverbs are followed by the preposition\(^1\) before the case, like
ἀποκάτω ἀπό. In the modern Greek the improper prepositions are used either with the
genitive (only with enclitic pronoun) or by the addition of ζ, ἀπό, με with the
accusative. They are quite new formations, but made from ancient Greek material
(Thumb, Handb., p. 107). From our point of view any adverb that occurs with a case
may be regarded as a prepositional adverb,\(^2\) like ἄνευ τοῦ εὐθεγελίου (Ph. 1:27).
Some of these prepositional adverbs, as already shown, occur both as adverbs, as ἃμα
cαὶ ἔμπλείζον (Ac. 24:26), and as prepositions, as ἃμα αὐτοῖς (Mt. 13:29), while others
appear only as prepositions with cases, as ὧνευ τοῦ πατρός (Mt. 10:29). But it is not
necessary to make a separate list on this basis. Blass,\(^3\) who treats these words very
scantily, is right in saying that no hard and fast line can be drawn between adverb and
preposition here. The LXX shows some adverbial prepositions which do not occur in
the N. T.\(^4\) Thus ἀπάνωθεν (Judges 16:20) may be compared with ἐπάνωθεν (classical
also), and ὑποκάτωθεν (Deut. 9:14), which in ancient Greek is only an adverb.
Simcox\(^5\) carefully explains ἐνώπιον, so common in the LXX, as a translation and
imitation of וְינֵי, but even Conybeare and Stock\(^6\) surrender this word as not a
Hebraism before Deissmann’s proof.\(^7\) The N. T., like the κοινή in general, makes free
use of these prepositional adverbs. I have given the list in my Short Grammar of the
Greek New Testament (3 ed., 1912, p. 116 f.), forty-two in all, more than twice as
many as the “regular” prepositions.\(^8\) Ἀξίως noted above is not included. Cf. ἀπαξ τοῦ
ἐναντίου (Heb. 9:7). Conybeare and Stock (p. 87) even count ἔχωμενα πέτρας (Ps.
140:6), but surely that is going too far. Cf. τὸ κρείσσονα καὶ ἔχωμενα σωτηρίας (Heb.
6:9). There is more excuse for claiming ἔσώτερον τῆς κολυμβήθρας (Is. 22:11). [Page
638] It will pay us to take up briefly these adverbial prepositions. All of them use the
genitive or the ablative case except ἃμα (instrumental) and ἐγγύς (dative).

\(^{8}\) Krebs, Die Präpositionsadverbien in der späteren hist. Grác., I. Tl., p. 4 f., gives a
list of 61, and 31 of his list do not appear in the N. T., while 12 are in the N. T. that he
does not mention, viz. ἔναντι, ἔνσπινον, κατέναντι, κατενόπιον, κυκλόθεν, μέσον,
ὅπισω, ὅψε, παραπλήσιον, παρεκτός, ὑπέκεινα, ὑπερεκπερισσοῦ. This list by Krebs
shows the freedom in the κοινή development of adv. prep.
1. Ἅμα. It is probably in the instrumental case itself. Brugmann¹ connects the word with the root of ἡείς, μία, ἕν as seen in ἀ-παξ, ἀ-πλοῦς, Cretan ἄμωκς, Latin semel, Sanskrit शर, English same. Cf. also ἄμοι, ἐ-κατόν. It occurs in Homer with the associative-instrumental case.² The word occurs in the N. T. only ten times and usually as adverb, either merely with the verb as in Ro. 3:12, LXX, or with δὲ καὶ (1 Tim. 5:13; Phil. 22). Cf. καὶ in Col. 4:3. Three of the examples are with participles (Col. 4:3 above and Ac. 24:26; 27:40). Twice we find ἅμα σῶν with the instrumental, a sort of double preposition after the manner of the later Greek (1 Th. 4:17; 5:10) and once ἅμα προὶ with adverb (Mt. 20:1). The use of ἅμα σῶν Thayer explains by taking ἅμα as an adverb with the verb. Only once does it occur as a simple preposition with the instrumental, ἅμα αὔτοις (Mt. 13:29). For the later revival of ἅμα and use like μετὰ see Jannaris.³ In 2 Esdr. 17:3 ἅν is translated by ἅμα. In the Acta Nerei ἅμα is used only with the genitive (Radermacher, N. T. Gr., p. 119).

2. Ἀνευ. It is of uncertain etymology.⁴ Homer has another form, ἄνευθεν, the Eleatic ἄνευ-ς, the Epidaurian ἄνευ-ν, the Megarian ἄνις. There is, however, no doubt as to the meaning, ‘without’ or ‘besides,’ and the case used is the ablative. There are only three examples in the N. T., not counting Mk. 13:2, where W. H. and Nestle reject ἄνευ χείρων. Two of these (1 Pet. 3:1; 4:9) occur with abstract words, and one (Mt. 10:29) with τοῦ πατρός. The word is rare in the late Greek, especially with a case.⁵

3. Ἀντικρυς (some editors ἀντικρύ). It is a compound form that originally meant ‘straight on,’ but in later Greek occurs in the sense of ‘opposite,’ ‘face to face.’ It was common in the ancient Greek as adverb of place or as preposition. In the N. T. we find it only once (Ac. 20:15) and the case used is the genitive, ἄντικρυς Χίου. It occurs in modern Greek vernacular (Thumb, Handb., p. 109).

4. Ἀντίπερα (ἀντί-πέραν, Polybius, etc.). It is just ἄντι and πέραν combined. Thucydides uses ἄντιπέρας as adverbial preposition. Only one example occurs in the N. T. (Lu. 8:26), ἄντιπερα τῆς Γαλιλαίας. The case is open to dispute, since ἄντι comes with the genitive and πέραν with the ablative. ‘Over against’ would be genitive, ‘on the other side of’ would be ablative. Either will make sense in Lu. 8:26. Probably genitive is the case here.

5. Ἀπέναντι. It is a triple compound of ἀπό, ἐν, ἄντι. A number of adverbial prepositions were formed on ἄντι as a base. In the N.T. we find also ἄναντι, ἄναντιον, κατέναντι. These are late, except ἄναντιον (from Homer on. Cf. ἄντα, ἐν-αντα). Polybius uses ἄπεναντι with the genitive, and it is common with this case in the LXX¹ (cf. Gen. 3:24). In the N. T. it occurs only six times, and in two of these (Mt. 27:24; Mk. 12:41) W. H. put κατέναντι in the text and ἄπεναντι in the marg. Of the

¹ Griech. Gr., pp. 85, 211, 230.
⁵ Jann., Hist. Gk. Gr., p. 337. In Eleatic ἄνευς occurs with the acc.
¹ C. and S., Sel. from the LXX, p. 86.
remaining four examples two (Ac. 3:16; Ro. 3:18) have the sense merely of ‘before,’ ‘in the sight or presence of.’ One (Mt. 27:61) has the notion of ‘opposite’ or ‘over against,’ while the fourth (Ac. 17:7) takes on a hostile idea, ‘against.’ These resultant ideas all come naturally out of the threefold combination. The other compounds with ἄντι will be noted later.

6. Ἄτερ. This word is of unknown origin, but compare Old Saxon sundir, Old High German suntar, Sanskrit sānutār. It is common in Homer and the poets generally. Later prose uses it. But it occurs only once in the LXX (2 Macc. 12:15) and twice in the N. T. (Lu. 22:6, 35). The case is clearly the ablative, and the meaning is ‘without.’ One example, ἄτερ ἰχλου, is with persons and the other, ἄτερ βαλλαντίου, is with a thing.

7. Ἀχρι(ς). It is related to μέχρι(ς) whatever its origin. Cf. usque in Latin and Ἀχρι εἰς like usque ad. As a mere adverb it no longer occurs in the N. T., but it is common both as a preposition and as a conjunction. In the form Ἀχρι οὖ (Ac. 7:18) and Ἀχρι ἢ ἡμέρας (Mt. 24:38) it is both preposition and conjunction (resultant temporal phrase). Leaving out these examples, Ἀχρι is found 30 times in the N. T. (W. H. text) and some MSS. read Ἀχρι in Ac. 1:22 and 20:4, while in Mt. 13:30 the MSS. vary between Ἀχρι, μέχρι and ἢς (W. H.). The meaning is ‘up to’ and the case used is the genitive. It occurs with place (Ac. 13:6), persons (Ac. 11:5), time (Ac. 13:11) and abstract ideas (Ac. 22:4, 22). It occurs mainly in Acts, Paul’s writings and Revelation. Cf. its use with the adverb Ἀχρι τοῦ νῦν (Ro. 8:22).

8. Ἐγγύς. It is a mere adverb (see comp. ἐγγύτερον, superl. ἐγγύστα) possibly related to Ἐγγυ-γη. It is common in Homer both as adverb and with the genitive. The late Greek added the true [Page 640] dative and all three uses (adverb, gen., dat.) occur in the N. T. There are nineteen examples of the pure adverb in the N. T. (cf. Mt. 24:32), one the comparative (Ro. 13:11) and the superlative in some MSS. in Mk. 6:36. There are eight examples of the genitive with Ἐγγύς (cf. Jo. 11:54). Only four times does Ἐγγύς have the dative (Ac. 9:38; 27:8), counting the indeclinable Ἐνρουσαλήμ (Lu. 19:11; Ac. 1:12), in which case Luke (4) would have the dative uniformly and John (6) and Heb. (2) the genitive (H. Scott). Once (Heb. 6:8) it is postpositive.

9. Ἐκτός. It is a combination of ἐκ and the adverbial ending –τος with which may be compared Latin coelitus. The case used with it is, of course, the ablative and it is just a fuller expression of ἐκ, meaning ‘without.’ In the N. T. we find it only eight times, four of these with the ablative, as in 1 Cor. 6:18 (cf. with the relative in Ac. 26:22). Note position of Ἐκτός λέγων ὅν in Ac. 26:22. Three times we have Ἐκτός εἰ μή (1 Cor. 14:5; 15:2; 1 Tim. 5:19), which is a pleonasm due first to the use of Ἐκτός εἰ. Deissmann (Bible Studies, p. 118) cites an inscription of Mopsuestia for “this jumbled phrase,” peculiarly apropos since Paul was Cilician, Ἐκτός εἰ μή [ἐ]ἀν Μάγνα μονή θε[λή]ση. Once (Mt. 23:26) Ἐκτός is probably a mere adverb used as a substantive, though even here it may be regarded as a preposition.

10. Ἐπροσθεν. This is merely ἐν and πρόσθεν which adverb used the ablative2 when it had a case. In the N. T. it is still four times a mere adverb of place, as in Rev. 4:6, but it is usually a preposition with the ablative. It occurs with words of place, as in Mt. 5:24, with persons (Mt. 5:16), and sometimes with the notion of rank (Jo. 1:15). As a preposition it appears 44 times in the N. T.

11. Ἐναντι. (Cf. Ἐναντα in Homer.) It is one of the ἀντι compounds and is found with the genitive case when it has a case. It is very common in the LXX even after Swete3 has properly replaced it often by Ἐναντίον. The old Greek did not use it. In the N. T., W. H. accept it in Lu. 1:8 and Ac. 8:21 (though some MSS. in both places read Ἐναντίον) and reject it in Ac. 7:10. It is not found in the N. T. as a mere adverb.

12. Ἐναντίον. This is, of course, merely the neuter singular of Ἐναντιος (cf. Mk. 6:48), and is common in the older Greek as in the LXX. For the papyri see Ἐναντίον ἐν ὑπό τινων P. Eleph. 1 [Page 641] (b.c. 311). In the N. T. it does not occur as a mere adverb, but we find it five times as a preposition with the genitive (cf. Lu. 1:6), all with persons (cf. Latin coram).

13. Ἐνεκα. It occurs in three forms in the N. T., either Ἐνεκα (Lu. 6:22), Ἐνεκέν (9:24) or Ἐνεκέν (18:29), but always as a preposition (‘for the sake of’), never as mere adverb. These variations existed in the earlier Greek also. In the κοινη, Ἐνεκαν is the more usual (Schweizer, Perg. Inschr., p. 35). Only twice, however, is it postpositive in the N. T., and this after the interrogative (Ac. 19:32) or the relative (Lu. 4:18, LXX). The case used is the genitive. The etymology is quite uncertain, but the form

Schweizer

———, Grammatik der pergamen. Inschriften (1898).

14. Ἐντός. It is like the Latin in-tus (opposite of ἐκτός) and has the same ending – τος. It means ‘within’ and as a preposition is used with the genitive. The word occurs only twice in the N. T., once as an adverb with the article (Mt. 23:26), though even this may be regarded as a preposition with the article and the genitive (cf. ἐκτός, Mt. 23:26), and once as a preposition (Lu. 17:21) with the genitive. Thayer cites two passages from Xenophon where Ἐντός may have the idea of ‘among’ and claims that this is the idea in Lu. 17:21, because of the context. But the meaning in Xenophon is disputed and Liddell and Scott give only ‘within’ for Ἐντός. Besides, in one of the new Logia of Jesus we have a similar saying in a context that makes ‘within’ necessary and would seem to settle the point about the passage in Luke: ἡ βασιλεία τῶν οὐρανῶν Ἐντός ὑµῶν ἐστίν.

15. Ἐνώπιον. This is the neuter singular of the adjective Ἐνώπιος which (Thayer) is from the phrase ἐν ὠπί (ὁ ἐν ὠπί ὄν). Homer uses τὸ Ἐνώπια, but no example of the adverb or preposition Ἐνώπιον occurs before the time of the LXX. Deissmann3 thinks it possible, but not probable, that it was first used in this sense as a translation of the Hebrew לִפְנֵי. A papyrus of the Thebaid from the second or third century b.c. has it also. As a preposition it is very common4 in the LXX and in the N. T. also. Curiously enough it does not occur in Matthew and Mark, though very common5 in Luke’s writings and Revelation. The Gospel of John has only one example and the Johannine Epistles two. Cf. also κατενώπιον. In the N. T., Ἐνώπιον is always a preposition with the genitive and it occurs 92 times. It appears sometimes with place (Rev. 4:10), but usually with persons (Lu. 5:25; 12:9 bis), and especially of God (1:15). Sometimes the notion is that of judgment, as in 1 Tim. 2:3. See Wikenhauser, Ἐνώπιος—Ἐνώπιον—κατενώπιον (Bibl. Z., 1910, pp. 263–270).

16. Ἐξω. It is an adverb from ἐξ (cf. ἐσω, ἐξ) and is probably in the ablative case like ὐὕτω. As adverb and preposition it is common in the N. T. (16 times) as in the older Greek. It is found as preposition only with the ablative and that 19 times. It means ‘outside’ or ‘without’ and is used in the N. T. only with places, like Ἐξω τῆς οἰκίας (Mt. 10:14). John’s Gospel has it 13 times, first Ep. 1, Rev. 2; Paul has it 5, and only as adverb.

17. Ἐξοθεν. It is the same word plus the suffix –θεν, ‘from without,’ and was common in the poets (cf. Ἐσωθεν). The case used is the ablative. In the N. T. it is much less frequent (13 times) both as adverb and preposition than Ἐξω. Indeed, if τὸ Ἐξοθεν τοῦ ποτηρίου (Mt. 23:25; Lu. 11:39) be not considered the prepositional

4 C. and S., p. 87.
usage, there would be only three left (Mk. 7:15; Rev. 11:2; 14:20). There is the same ambiguity in the two passages above that was noted about ἐκτός and ἐντός (Mt. 23:26=Lu. 11:40). Cf. 547 vi.

18. ἔπ-άνω. This is just the preposition ἔπι and the adverb ἄνω. It occurs in Attic Greek both as adverb and as preposition. As an adverb it is rare in the N. T. (4 times), once with the relative adverb οὗ (Mt. 2:9), once with a numeral with no effect on the case (1 Cor. 15:6; cf. Mk. 14:5 where the case may arise from πραθήκαι), once where a pronoun is really implied (Lu. 11:44). As a preposition we find it fifteen times in the N. T. Cf. ἐπάνω ὅρους (Mt. 5:14) where it has the somewhat weakened sense of ‘upon’ rather than ‘above.’ The case used is the genitive. Modern Greek vernacular uses it as (ἂν)άνω (Thumb, Handbook, p. 109).

19. ἐπέκειναι. It is merely ἔπι and ἐκέινα. Thayer suggests the ellipsis of μέρη. It occurs in the Attic Greek both as adverb and as preposition. In the N. T. it appears only once in a quotation from Amos 5:27 and as a preposition with the ablative in the sense of ‘beyond’ (Ac. 7:43. Cf. ὑπερέκεινα).

20. ἔσω. It is the adverb of ἔς (cf. ἔσω) and is in the ablative case. The form ἔσωτο (ἔς) does not occur in the N. T. nor in the LXX. Indeed the word ἔσω is found only nine times in the N. T. and only one, ἔσω τῆς αὐλῆς (Mk. 15:16), is the prepositional use. The case used with it is the genitive. This, however, is a genuine example, while ἔσωθεν (12 times) is never a preposition in the N. T., unless in Lu. 11:39, τὸ ἔσωθεν ὕμων (see p. 642). Cf. ἔσωτερον τῆς κολομβῆθρας (Is. 22:11).

21. ἔως. In Homer it is both demonstrative and relative adverb (from ἔος, ἔοις). Cf. ὡς and ὡς. The use of ἔως as a preposition appears in Demosthenes, Aristotle, Polybius, etc. In Northern England and Scotland “while” is used as “till” (Liddell and Scott) and illustrates how ἔως as conjunction is used in the N. T. It is more common in the N. T. as preposition than conjunction, if the phrases ἔως οὗ, ἔως ὅτου be treated as conjunctions, as indeed they are, though technically composed of the preposition ἔως with the genitive of the relative. It is in the later Greek mainly, therefore, that it appears as a preposition (cf. LXX and papyri). The case used with it is the genitive (but very late Greek shows accusative sometimes), and it is found 86 times in the N. T. and 51 of the examples are in the Synoptic Gospels. The preposition is used with places, like ἔως ὧν (Mt. 11:23), ἔως αὐρανοῦ (Lu. 10:15), ἔως Ἀντιοχείας (Ac. 11:22); with persons, like ἔως αὐτοῦ (Lu. 4:42); with expressions of time, like ἐως τῆς σήμερον (Mt. 27:8), ἐως ὥρας ἐνάτης (27:45); with abstract expressions, like ἔως θεοῦ (Mt. 26:38); with notion of measure, like ἔως ἡμίσους (Mk. 6:23). See Rom. 3:12 ἔως ἔνός (LXX). Cf. ἀπό—ἔως in Mt. 1:17; 20:8; 27:51. Seventeen of the examples are uses of ἔως with an adverb, like ἔως κάπο (Mt. 27:51), ἔως ὃς ὃς (Jo. 2:10), while seven instances of ἔως πότε occur, like Mt. 17:17. Four times ἔως occurs with another preposition, like ἔως πρὸς (Lu. 24:50), ἔως ἔπι (Ac. 17:14), ἔως ἔσω (21:5). In Mk. 14:54 note ἔως ἔσω εἰς. Once (cf. Demosthenes, Aristotle, LXX) we find it with the article and the infinitive ἔως τοῦ ἔλθειν (Ac.

1 Blass, Gr. of N. T. Gk., p. 129.
1 Monro, Hom. Gr., p. 151.
In ἔως τέλους (2 Cor. 1:13), the phrase is almost adverbial. In D (Ac. 19:26), ἕως Ἐφέσου, Blass finds the notion of ‘within.’ In the LXX 2 [Heb.] Esdr. 6:20, ἕως εἰς πάντες, and 1 Chron. 5:10 A, ἕως πάντες, Deissmann (B. S., p. 139) sees a Hebraism.

22. Κατέναντι. It is not found in the older Greek, but appears in the LXX and the N. T. It is especially frequent in the Book of Sirach. But in poetry we find κατέναντα and the word is merely [Page 644] the threefold preposition κατά, ἐν, ἀντί. The MSS. in the N. T. often vary between κατέναντι and ἀπέναντι as in Mt. 21:2; 27:24; Ac. 3:16, etc. In Mt. 27:24 and Mk. 12:41 W. H. put ἀπέναντι in the margin. Κατεναντίον, found in Hesiod and Herodotus, does not occur in the N. T. There are only nine examples of κατέναντι in the N. T. One of these (Lu. 19:30) is merely adverbial, while the rest are prepositional. The idea is ‘before,’ ‘over against,’ ‘in the presence of,’ and the case used with it is the genitive. It occurs with place (Mt. 13:3) and persons (Mt. 27:24). Cf. κατέναντι θεοῦ ἐν Χριστῷ (2 Cor. 2:17; 12:19) and the attraction of relative (ὡς) in the dative to the genitive case of θεοῦ, the incorporated antecedent (Ro. 4:17).

23. Κατενώπιον. It is just ἐνώπιον (see above) and κατά. Homer uses κατένωπα with the genitive, but κατενώπιον appears in the LXX. The N. T. shows only three examples (cf. the frequency of ἐνώπιον), two with persons (Eph. 1:4; Col. 1:22), one with abstract word (Ju. 24). The case used is the genitive and the word means ‘in the presence of.’

24. Κυκλόθεν. It is an old adverb in –θεν that occasionally occurs in the LXX (Jer. 17:26) as a preposition. In the N. T. it appears as a preposition twice with the genitive θρόνου (Rev. 4:3 f.) and once as an adverb (4:8).

25. Κύκλῳ is, of course, merely an adverb in the instrumental case and is common from Homer down. In the LXX it is extremely frequent and occasionally as a preposition with the genitive (Is. 6:2). In the N. T. it is merely an adverb except with τοῦ θρόνου (Rev. 4:6; 5:11; 7:11). Cf. κύκλῳ µέχρι (Ro. 15:19).

26. Μέσον. As a preposition it occurs in Herodotus 7, 170, but was not common. It appears in the late Greek writers and the papyri. Many adverbial phrases were made from µέσον which were used as prepositions, some of which survive in the N. T., like ἄνα µέσον, διὰ µέσου (–ον), εἰς µέσον (and εἰς τὸ µέσον), ἐν µέσῳ (and ἐν τῷ µέσῳ), ἐκ µέσου, κατὰ µέσον. But these will be discussed later. The adjective µέσος occurs with the genitive (Lu. 22:55; Jo. 1:26), so that it is not strange to find the adverb with the genitive as in Ph. 2:15, µέσον γενεάς. In Mt. 14:24 W. H. put µέσον in the margin and D reads µέσον in Lu. 8:7; 10:3. See Hatzidakis, Einl., p. 214, for examples. Cf. Homeric µεσημίας. The modern Greek vernacular uses µέσας, µέσα ἰπό (Thumb, Handbook, p. 108).

1 Blass, Gr. of N. T. Gk., p. 128.
Hatzidakis HATZIDAKIS, G. N., Einleitung in die neugriechische Grammatik (1892).
27. **Μεταξό.** Like so many of the adverbial prepositions, it is a compound (μετά, ξύν). As a mere adverb, we meet it only twice in the N. T., once in the sense of ‘meanwhile’ (Jo. 4:31), once in the sense of ‘afterwards’ (Ac. 13:42), as commonly in the later Greek. Cf. twofold use of μετά. As a preposition it occurs seven times in the N. T., with places (Mt. 23:35), persons (Mt. 18:15) and in abstract relations (Ro. 2:15). A good example occurs in Ac. 15:9 where both διά and μεταξό appear.

28. **Μέχρι.** Like ἄχρι and ἕως, it is both preposition and conjunction as well as originally adverb. No example of the mere adverb is found in the N. T., as it was rare in the older Greek. The form is akin to ἄχρι and the sense is the same. If μέχρις οὐ be treated as a conjunction (cf. ἄχρις οὐ, ἕως οὐ), the preposition with the genitive appears fifteen times with another doubtful reading in Mt. 13:30. It is used with places (Ro. 15:19), persons (Lu. 16:16), time (Ac. 10:30), abstract expressions (Ph. 2:8). Like ἄχρις, the notion of ‘measure’ or ‘degree’ is sometimes present (Heb. 12:4).

29. **Ὁπίσθεν.** It is of uncertain etymology, perhaps related to ἐπί. It occurs in Homer both as adverb and as preposition. In the N. T. we find it five times as adverb and twice as preposition, and some MSS. have it in Rev. 1:10. The case used with it is the ablative. So ὁπίσθεν τοῦ Ἱησοῦ (Lu. 23:26). It means ‘from behind’ and so ‘after’ (Mt. 15:23). It is the opposite of ἐμπροσθεν.

30. **Ὅπισω.** It is the opposite of πρόσω (cf. πόρρω) and is an ablative adverb from ὁπίς (as above). It is very common in the older Greek as an adverb, but it is extremely common in the LXX as a preposition. In the N. T. ὁπίσω occurs alone as an adverb only twice (Mt. 24:18; Lu. 7:38), though we meet τὰ ὁπίσω seven times as in Mk. 13:16. But as a preposition we find it 26 times, mostly with persons, as in the common ὁπίσω μου (Mt. 3:11). It is used with the ablative, ‘behind.’ Cf. δεῦτε ὁπίσω μου in Mt. 4:19.

31. **Ὅψε.** This word seems to be another variation of ὁπίς and occurs in the ancient Greek, both as an adverb and as a preposition with the genitive (Thuc. 4, 93) with the sense of ‘late on.’ But Philostratus shows examples where ὅψε with the ablative has the sense of ‘after,’ like ὅψε τούτων=‘after these things.’ Philostratus uses it also in the sense of ‘late on.’ The papyri use it in the sense of ‘late on’ with the genitive. So ὅψε τῆς ὑπαξ. P. Par. Hence in Mt. 28:1, ὅψε σαββάτου may be either late on the Sabbath or after the Sabbath. Either has good support. Moulton is uncertain, while Blass prefers ‘after.’ It is a point for exegesis, not for grammar, to decide. If Matthew has in mind just before sunset, ‘late on’ would be his idea; if he means after sunset, then ‘after’ is correct. Cf. δός τοῦ σαββάτου (Lu. 18:12).

1 Moulton, Prol., p. 72 f.
2 Gr. of N. T. Gk., p. 97.
32. 

Παρα-πλήσιον. It is merely the neuter of the adjective παραπλήσιος. This adjective usually had the associative-instrumental, seldom the genitive. But the one example of the adverbial preposition in the N. T. (Ph. 2:27), θανάτου, has the genitive. See πλησίον.

33. Παρ-εκτός. It is a late compound for the earlier παρέκ. It appears in the N. T. only three times, save in the margin of Mt. 19:9 of W. H.'s text. Once it is a mere adverb (2 Cor. 11:28), and twice it is a preposition with the ablative (Mt. 5:32; Ac. 26:29) meaning 'without.'

34. Πέραν. It comes from the root περ (cf. περάω, ‘fare,’ ‘ferry,’ etc.), Ionic πέρην. It is an adverb (cf. adv. πέρ), probably accusative case. Both as adverb and as preposition with ablative (sometimes with accusative), it survives from Homer. In the N. T. it occurs ten times as an adverb in the phrase εἰς τὸ πέραν (Mt. 8:18). It is found 13 times as a preposition with the ablative, chiefly in the expression πέραν τοῦ Ἰορδάνου (Mt. 4:15).

35. Πλήν, Doric πλάν. It is probably from πλέον, ‘more,’ and so is used with the ablative. In the N. T. it occurs only four times as a preposition with the ablative and in one of these we find πλέον—πλήν τούτων (Ac. 15:28). Twice it is a mere adverb, πλήν δέ (Ac. 20:23; Ph. 1:18), unless indeed the δέ clause is in the ablative. Cf. English “except that.” In all the other rather numerous instances πλήν is an adverbial conjunction at the beginning of a clause (cf. δέ) as in Mt. 11:22. These three usages come on down from the older Greek.

36. Πλησίον, Doric πλατίον. The word is allied to πέλας and is neuter adj. from πλησίος. In the older Greek the adverb occurs absolutely or with the art. ὁ πλησίον, ‘neighbour,’ as in the N. T. (Mt. 5:43). As a preposition it appears with the associative-instrumental or with the genitive. But in the N. T., it is found only once and with the genitive in Jo. 4:5. In Lu. 10:29, 36, the genitive is also found with πλησίον, but the word here has more of the substantive idea ('neighbour') than the prepositional usage.

37. Ὑπερ-άνω. It is a simple compound that in the late Greek [Page 647] gradually displaced ὑπέρ. It occurs in writers from Aristotle on both as adverb and as preposition and is common in the LXX. In the N. T. we find it only three times and with the ablative each time. Twice it occurs literally of place (Heb. 9:5; Eph. 4:10) and once of rank (Eph. 1:21).

38. Ὑπερ-ἐκπερισσοῦ. It is merely ὑπέρ and the pronoun ἐκεῖνα (cf. ἐκ-ἐκπερισσοῦ in Ac. 7:43) which appears in the Byzantine Greek. It occurs only once in the N. T. (2 Cor. 10:16), εἰς τὰ ὑπερἐκπερισσοῦ οὐμῖν, with the ablative in the sense of ‘beyond,’ ‘into the (regions) beyond you.’

39. Ὑπερ-ἐκπερισσοῦ. It is written separately in Liddell and Scott and some N. T. editors print it ὑπέρ ἐκπερισσοῦ. It is found in Dan. 3:22 (Ald., Compl.). W. H. read it

2 Cf. Deiss., B. S., p. 283 f.
three times (Eph. 3:20; 1 Th. 3:10; 5:13), though in the last passage ὑπερεκπερισσῶς is put in the margin by W. H. As a preposition with the ablative, we find it only in Eph. 3:20 (Ὧν attracted to case of omitted antecedent).

40. Ὑπο-κάτω. It is another compound word which in the ancient Greek was used both as adverb and as preposition and especially in the κοινή writers (Polybius, Diodorus, Plutarch). In the late Greek it gradually\(^3\) displaced ὑπό. In the LXX both ὑπεράνωθεν and ὑπερκάτωθεν occur as prepositions as well as κατόπισθεν.\(^4\) In the N. T. it is no longer adverb, but appears as preposition eleven times with the ablative, five of them with τῶν ποδῶν (as Mk. 6:11). The examples are all literal, not metaphorical. Cf. ὑποκάτω τῆς τραπέζης (Mk. 7:28).

41. Χάριν. This word is just the accusative of χάρις and it is still common as the substantive in the accusative (Lu. 1:30). The ancients used it freely with the genitive and with the possessive pronoun, ἐμὴν χάριν. The idea of ‘for the sake of’ (cf. Latin gratia) may be due to apposition originally. The usage continues in the late Greek.\(^5\) Among the ancients it was generally postpositive, but in the LXX it is now one way, now the other. In the N. T. it occurs nine times, and is postpositive (as Gal. 3:19) always except 1 Jo. 3:12 with interrogative. It is only once in the Gospels (Lu. 7:47).

42. Χωρίς. It is of doubtful etymology (cf. χάω, χήρα), but appears [Page 648] in Homer freely as an adverb and in Pindar as a preposition. It holds on steadily in both senses. In the N. T. we have only one pure adverbial use (Jo. 20:7), while as a preposition with the ablative we find it 40 times. The usage is chiefly with persons (Mt. 14:21) or abstract relations (Mt. 13:34), though it may be used with place (Lu. 6:49). In Ro. 10:14 note χωρίς κηρύσσοντος without the article. It is postpositive once, οὗ χωρίς (Heb. 12:14). Ramsay, C. and B., II, 391 (No. 254), cites from the inscriptions χωρὶς εἰ μή τι πᾶθη (Moulton, Prol., p. 239).

Of these 42 words in the N. T. the following are only used as prepositions: ἄνευ, ἀντίπερα, ἀπέναντι, ἀπερ, ἐγκατέστηκα, κατενώπιον, παραπλήσιον, ὑπερέκπερια, ὑπεράνωθεν, ὑποκάτω. Of the rest μέσον is also adjective; χάρις substantive; πλησίον substantive and adjective; ἀχρις, ἔως, μέχρι, πλήν conjunctions; and the rest are also adverbs.

IX. Compound Prepositions. A considerable number of these adverbial prepositions are compound words. So are ἄντι-κρύ(ς), ἄντι-περα, ἄπ-ἔν-αντι, ἐμ-
X. Prepositional Circumlocutions. Blass calls these Hebraisms and it is true that the frequency of these phrases in the LXX and the N. T. is due to the influence of the Hebrew idiom. But the construction itself is good Greek, though not so common, as the papyri show.1

(a) Μέσον. This word furnishes a number, one of which, ὀνόμα μέσον, “has turned up abundantly in the papyri.”2 In the N. T. we find this compound preposition only four times. Moulton thinks that in 1 Cor. 6:5, διακρίνει ὀνόμα μέσον τοῦ ἀδελφοῦ, the text is corrupt, but probably the phrase is not to be taken too literally and etymologically (cf. διὰ here). Διὰ μέσου is read once (Lu. 17:11) and διὰ μέσου once in W. H. (Lu. 4:30). Εἰς μέσον (Mk. 14:60) appears once, but εἰς τὸ μέσον (Lu. 4:35) six times. Ἐκ μέσου, like all the circumlocutions with μέσον, is followed by the genitive (Mt. 13:49) and it occurs 7 times. Κατὰ μέσον is found once (Ac. 27:27). The commonest (27 times) of these circumlocutions is ἐν μέσῳ (ἐμμέσῳ some MSS.) as in Mt. 10:16. Ἐν τῷ μέσῳ (Mt. 14:6; Ac. 4:7) is not a prepositional phrase. Cf. ἐκ τοῦ μέσου (Col. 2:14). See also chapter XII, X, (b).

[Page 649] (b) Ὄνομα. It is sometimes adduced as an example of a prepositional circumlocution and as a pure Hebraism. Deissmann1 has given abundant illustrations from the papyri to show that the use of εἰς τὸ ὄνομα, ἐν τῷ ὄνομα τοῦ ὄνομα, as in the LXX and the N. T., ὄνομα represents the person. It is more than doubtful if we are justified in considering these phrases as mere prepositional circumlocutions with the genitive. The examples that come nearest to it are εἰς ὄνομα προφήτου, εἰς ὄνομα δικαίου, εἰς ὄνομα μαθητῶν (Mt. 10:41) but even here ὄνομα brings out the notion that one has the name or character of prophet, righteous man, disciple. In Mt. 28:19, ὄνομα has the idea of ‘the authority of.’

(c) Πρόσωπον. This word also furnishes a number of such phrases which in the LXX seem to be based on Hebrew originals (translation Hebraisms).2 Thus ὀπὸ προσώπου τοῦ κυρίου (Ac. 3:19) is like לִפְנֵי, while πρὸ προσώπου σου is like לִפְנֵי, and κατὰ πρόσωπον Πειλάτου (Ac. 3:13) Blass3 finds like לִפְנֵי. Cf. πρόσωπον πρὸς πρόσωπον (1 Cor. 13:12).

(d) Στόμα. This again is a Hebraism in the LXX due to translation. In Mt. 4:4 we have διὰ στόματος θεοῦ, a quotation from Deut. 8:3. In Mt. 18:16, ἐπὶ στόματος δύο

---

2 Moulton, Prol., p. 99 f.
1 B. S., pp. 146 f., 197. Cf. Moulton, Prol., p. 100. See also Heitmüller’s proof, Im Namen Jesu, pp. 100 ff.
2 Moulton, Prol., pp. 81, 99; Blass, Gr. of N. T. Gk., p. 129 f.
3 Ib.
μάρτυρον is likewise from Deut. 19:15. So in Mt. 21:16, ἐκ στόματος νηπίων is from Ps. 8:3. Cf. also ὑπὸ τοῦ στόματος αὐτοῦ (Lu. 22:71), ἐν τῷ στόματι σου (Ro. 10:8 from Deut. 30:14). But this picturesque phraseology belongs to all language as a matter of fact.

(e) Ἐχείρ. It shows several similar examples. Thus διὰ χειρὸς αὐτῶν (Ac. 15:23), διὰ τῶν χειρῶν αὐτῶν (Ac. 14:3), εἰς χεῖρας (Lu. 24:7), εἰς τὴν χειρὰ αὑτοῦ (Lu. 15:22), ἐκ χειρὸς πάντων (Lu. 1:71), ἐν τῇ χειρὶ αὑτοῦ (Jo. 3:35), σὺν χειρὶ ἄγγέλου (Ac. 7:35). Here again the Greek idiom follows the Hebrew particularity, but with perfect ease. The classical Greek is not without examples of this use of χείρ and one may note the English idiom also. See 2 Sam. 15:2, ὅν χειρὰ τῆς ὀδοῦ τῆς πύλης.

See also ἔξ ἐναντίας αὐτοῦ (Mk. 15:39) and παρεκτὸς λόγου πορνείας in the margin (W. H.) of Mt. 19:9.

[PAGE 650] CHAPTER XIV

ADJECTIVES (ἜΠΙΘΕΤΑ)

I. Origin of Adjectives. This matter was touched upon in the chapter on Declensions, but calls for a further word here. There is no absolute line of cleavage between substantive and adjective either in form or sense. The Alexandrian grammarians had no special treatment of the adjective. “The division line between substantive and adjective, always an uncertain one in early Indo-European language, is even more wavering in Sanskrit than elsewhere.” Indeed it is not difficult to conceive the time when there was no distinct adjective. The substantive would be used in apposition as in English, brother man, church member. Cf. the common use of titles also like doctor, president, governor, etc. This attributive use of the substantive is not a peculiarity of any language, but belongs to Hebrew, Sanskrit, Greek, Latin, English, etc. It is out of this use of the substantive that the adjective as a separate part of speech developed. The adjective is not therefore a mere variation of the genitive, though, like the genitive, it is descriptive. The term noun (ὄνομα) is used to cover both substantive and adjective, but many substantives continue to be used in a substantive sense and many adjectives in a substantival sense. The term adjective covers words of one, two or three genders, and indeed includes numerals and some of the pronouns also. But the pronouns require treatment in a separate chapter. Participles are verbal adjectives. See later. The close relation between adjective and substantive is well illustrated by δοῦλα (Ro. 6:19). Cf. δοῦλοι.

4 Blass, Gr. of N. T. Gk., p. 130.
5 Cf. for the LXX, Swete, Intr. to O. T. in Gk., p. 308.
1 Monro, Hom. Gr., p. 117.
2 Whitney, Sans. Gr., p. 111.
3 “It is this change from subst. in apposition to adj. which according to Delbrück is the explanation of the numerous Gk. adjectives in o.” Giles, Man., etc., p. 239.
4 Monro, Hom. Gr., p. 117. Cf. Schoemann, Die Lehre von den Redet. nach den Alten, 1862, p. 15, where he makes the quality of the thing essential to the idea of noun.
II. The Adjectival or Appositional Use of the Substantive.

Examples have already been given in the chapter on the Sentence. Let one suffice here: ἐν τῷ Ἰορδάνῃ ποταμῷ (Mt. 3:6). Cf. further Lu. 24:19; Ac. 1:16; 3:14. This idiom is common enough in the N. T. I must demur, however, at this point to Winer’s idea (Winer-Thayer, p. 236) that “a notion which should naturally be expressed by an adjective as an epithet, is sometimes, by a change of construction, brought out by a substantive.” What I object to is the word “should.” He is right in saying that “the N. T. is by no means poor in adjectives,” but wrong in urging that the N. T. ought to use more. As already observed, substantives continued to be used in a descriptive sense not only in apposition, but also in the genitive. This original use of the substantive never ceased. Hence it is useless to talk of “this substitution of a substantive for an adjective” and to explain it as “a Hebraistic mode of expression” due to “the want of adjectives in Hebrew” and to “the peculiar vividness of the Oriental languages” (p. 237). He admits, however, that the matter is not arbitrary, but the principal word stands in the genitive. There is this difference between the adjective as an epithet and the genitive. The two substantives do not merge into one idea quite so completely. Winer’s examples illustrate this point well: μηδὲ ἡλικέναι ἐπὶ πλούτου ᾖδη (1 Tim. 6:17), ἡμεῖς ἐν καινότητι κατοικίᾳ (Ro. 6:4), σταυροῦ μὴ πίστευε (Col. 2:6), κρίτης μὴ σκοτεινής (2 Cor. 11:13), etc. It was just the shade of difference between the substantive in the genitive and the adjective that led to the expressions above. Phrases like τὰ πνευματικὰ τῆς πονηρίας (Eph. 6:12) are analogous to the use of the adjective as substantive to be discussed directly. The use of υἱὸς or τέκνον with the genitive is exactly like the Hebrew idiom with בֵּן and is extremely common in the LXX and fairly so in the N. T. Thus υἱὸς ἀπειθίας (Eph. 2:2), τέκνα φωτός (Eph. 5:8), etc. But this “Hebraistic circumlocution” turns up in inscriptions and on coins, so that it is clearly not un-Greek. Deissmann, however, since the idiom is so common and many of the N. T. examples are quotations from the LXX or translations from the Aramaic, admits that the majority in the N. T. are due to “translation Hebraisms” and the rest to analogical formation.

III. The Adjective as Substantive. Simcox thinks that the N. T. shows a more frequent use of this idiom than the earlier Greek. But the earlier Greek shows abundant evidence of the use of the adjective without the substantive as a practical substantive, usually with the article, but not always.
(a) ANY GENDER. Such adjectives may be of any gender, according to the gender of substantive. So ὁ καλός, ἡ ἐρήμος, τὸ χρηστόν. This is no peculiarity of Greek alone, though it has its own development in the substantival use of the adjective. Indeed the participle was often used as a substantive. Thus ὁ σπείρων (Mt. 13:3), ἡγούμενος (Mt. 2:6). In Ph. 3:8 we have the participle used as a substantive with the genitive, τὸ ὑπέρεχον τῆς γνώσεως. Cf. Lu. 16:1, τὸ ὑπάρχοντα αὐτοῦ. So τὸ ἐξαιτοῦ σύμφωνον (1 Cor. 10:33) where the adjective, like a substantive, has the genitive.

(b) WITH MASCULINE ADJECTIVES. With masculine adjectives the substantives naturally suggest themselves out of the context or the nature of the case.3 Thus in Mt. 11:5, τυφλοὶ ἁναβλέπουσιν καὶ χολοὶ περιπατοῦσιν, κτλ. Cf. οἱ ἄγιοι (1 Cor. 6:2), ἄμαρτολοὺς (1 Tim. 1:15), δικαίους and τοὺς ἁγιοῦ (Ro. 5:7), ἐκλεκτῶν θεοῦ (8:33), τὸν ἀληθινὸν (1 Jo. 5:20), ὁ ἄγιος τοῦ θεοῦ (Jo. 6:69) and probably τοῦ πονηροῦ (Mt. 6:13). In Jas. 5:7, πρόμυλον καὶ ὄμημον, supply ὑπέρτον. Sometimes only the context can determine the gender, as in Eph. 6:16; 1 Jo. 3:12.

(c) WITH FEMININE ADJECTIVES. These are usually examples of the ellipsis of ὅδος, χεῖρ, γῆ, γυνῆ, ἡμέρα, γλώσσα. I follow Blass4 mainly in these examples. Thus γῆ is responsible for the feminine gender in τῆν ξηρὰν (Mt. 23:15; Heb. 11:29), ἡ περίχωρος (Mt. 3:5), τὴν ὀρεινὴν (Lu. 1:39), τῇ ἐρημῷ (Mt. 3:2), τῆς οἰκουμένης (Ro. 10:18), etc. In ἐκ τῆς ὑπὸ τὸν οὐρανὸν (Lu. 17:24) Blass prefers μερίδος to γῆς and urges that we do not refine too sharply over ἐξ ἑναντίας (Mt. 15:39; Tit. 2:8). As examples of the influence of ὅδος note εὐθείας (Lu. 3:5), ποιῆς (5:19), ἐκείνης (19:4). For χεῖρ observe ἡ δριστερά and ἡ δεξιά (Mt. 6:3), ἐν δεξίᾳ (Ro. 8:34), τῇ δεξίᾳ (Ac. 2:33). But ἐκ δεξιῶν (2:34) may be compared with εἰς τῇ δεξιᾷ μέρη (Jo. 21:6). The ellipsis of ἡμέρα is noticed by Blass in τῇ ἐχομένῃ (Lu. 13:33), τῇ ἐπιούσῃ (Ac. 16:11), [Page 653] τῇ ἐπέρα (20:15), τῇ ἐπαύριον (Mt. 27:62), τῇ τρίτῃ (Lu. 13:32), τῆς ἐβδομής (Heb. 4:4), τῇ μίᾳ τῶν σαββάτων (Ac. 20:7), μέχρι τῆς σήμερον (Mt. 11:23), ἦς (2 Pet. 3:4), τῇ ἐξῆς (Ac. 21:1). But Blass rightly supplies ὄρα with ὄφῳ ἦς in Lu. 7:45, as with ὄψις (Mt. 8:16), προφαί (Mt. 27:1). To conclude the list of feminine examples with τῇ πνεούσῃ (Ac. 27:40) supply αὐρά, with ἐν τῇ Ἐλληνικῇ (Rev. 9:11) supply γλώσσῃ (but cf. τῇ Ἐβραϊκῇ διαλέκτῳ, Ac. 22:2), with πολλάς and ὀλίγας (Lu. 12:47 ἐ) supply πληγάς, with ὄπδο μίδας (Lu. 14:18) insert φωνῆς. But κατ’ ἱδίαν (Mk. 6:31) and ἰδία (1 Cor. 12:11), though stereotyped, may refer to ὅδῳ. Cf. also κατὰ μόνας (Mk. 4:10) as an instance of ὅδος. So δημοσία (Ac. 16:37).

Words like σωτήριος (Tit. 2:11), αἰώνιον (Jo. 6:47), εὐπρεπίστατον (Heb. 12:1) are, of course, feminine, not masculine. See chapter on Declensions.

(d) WITH THE NEUTER. The neuter furnishes a number of interesting examples. Thus πονηροῦ ψυχή (Mt. 10:42), where ὑδάτος is referred to. So ὑδας is meant by τὸ γλυκὸ καὶ τὸ πικρὸν (Jas. 3:11). With ἐν λευκοῖς (Jo. 20:12), one must insert ἰμάτιος as with ἐν μαλακοῖς (Mt. 11:8). Cf. πορφυροῦν in Rev. 18:16. With τοῦ διοπτοῦ (Ac. 19:35) Blass5 suggests ἄγαλματος, and with τὸ τρίτου τῆς γῆς (Rev.

---

3 Blass, Gr. of N. T. Gk., p. 140.
4 Ib., p. 140 f.
1 Ib., p. 141.
we must supply μέρος (“not classical,” Blass). Cf. εἰς τὸ ἱερόν (Mt. 21:23). In Mt. 6:13, ἐστὶν τοῦ πονηροῦ, most likely διάβολος is meant, not mere evil. In Mt. 19:17 we have περὶ τοῦ ἄγαθοῦ explained by ὁ ἄγαθός, though the American Standard Version gives it ‟that which is good.’ But cf. Ro. 5:7. The number of these neuter adjectives used substantively in the N. T. is large and varied, but the older Greek shows abundant illustrations of the same thing, especially in philosophical discussions. With prepositions in particular we meet with this use of the neuter. Thus εἰς τὸ μέσον (Jo. 20:19), ἐν τῷ κρυπτῷ (Mt. 6:4), εἰς φανερόν (Mt. 4:22), μετὰ μικρόν (Mt. 26:73), ἐν μέσῳ (Mt. 10:16), ἐν ὀλίγῳ (Ac. 26:28), ἐν μεγάλῳ (26:29), μετὰ βραχύ (Lu. 22:58), etc. Cf. εἰς ὑπαθία (Jer. 24:6). Very common is the adverbial usage of this neuter like βραχύ (Ac. 5:34), μικρόν (Mt. 26:39), μόνον (Mt. 8:8), τὸ πρῶτον (Jo. 12:16), but the adjective’s relation to the adverb will receive special treatment. See xi. Cf. τῷ ὄντι. Sometimes the neuter singular was used in a collective sense for the sum total (cf. English ‟the all”). Thus in Jo. 6:37, 39, πᾶν ὃ, 17:24 ὃ, where persons are meant. The neuter plural is common in this sense like τὰ πάντα (Col. 1:16) where the universe is thus described. Cf. τὰ ὄντα and τὰ μὴ ὄντα (1 Cor. 1:28). B in the LXX (Helbing, p. 51) frequently has πᾶν=πάντα (acc. sing. masc.). (Cf. also Ps. of Sol. 3:10; 8:23 V; Test. xii, Pat. Reub. 1:10 πᾶν ὄντον, Gad 3:1 πᾶν νόμον.) See also the common collective neuter in the LXX (Thackeray, Grammar, p. 174 f.). Usually the neuter plural is concrete, however, as in τὰ ὀρατά καὶ ὄρατα (Col. 1:16), where πάντα is thus explained. Cf. τὰ βαθέα (Rev. 2:24), ὄρατα (2 Cor. 5:17). In Ro. 1:20, as Winer points out, τὰ ὀρατά makes more concrete ἢ τέ ὀφθαλμοῦ ὄντας καὶ θειότητας. But one must confess that in Eph. 3:10, ἐν τοῖς ἐπουράνιοις, it is not clear what the idea is, whether places, things or relations. In Jo. 3:12 ἐπάνω and ἐπουράνια seem to refer to truths. In 1 Cor. 2:13, πνευματικῶς πνευματικῶς συνκρίνοντες, a like ambiguity exists, but the presence of λόγος inclines one to the notion that Paul is here combining spiritual ideas with spiritual words. The neuter singular with the article is very common for the expression of an abstract idea. One does not have to say that the adjective is here used instead of the abstract substantive, but merely as an abstract substantive. Cf. English ‟the beautiful and the good” with ‟beauty and goodness.” This is good ancient Greek. Cf. also in the papyri τὸ ὀδύκιμον Tb.P. 40 (B.C. 117) and (ib.) τὰ κυθήκοντα. Winer was troubled over τὸ ὀδύκιμον τῆς πίστεως (1 Pet. 1:7) and said that no such adjective existed and therefore

3 W.-Th., p. 235.

Helbing, R., Die Präpos. bei Herodot und andern Historikern (1904).

2 Ib.
this was a mere substantive. There was none in the lexica, but Deissmann\(^3\) has found a number of instances of the adjective in the papyri. So \(χρυσοῦ\ \deltaοκιμίου\), P.E.R. xii. 6 f. (93 A.D.), ‘good gold.’ One need not be troubled over \(τὸ \ γνωστὸν\) (Ro. 1:19) any more than over the other neuter adjectives. Cf. \(τὸ \ χρηστὸν\) τοῦ \(θεοῦ\) (Ro. 2:4), \(τὸ\ \ μωρὸν\) τοῦ \(θεοῦ\) and \(τὸ\ \ θαθενέζ\) τοῦ \(θεοῦ\) (1 Cor. 1:25), \(τὸ\ \ άμεταθέτων\ \ τῆς\ \ βουλῆς\) (Heb. 6:17), \(τὸ\ \ έλαφρόν\ \ τῆς\ \ θλίψεως\) (2 Cor. 4:17), \(τὸ\ \ άδύνατον\ \ τοῦ\ \ νόμου\) (Ro. 8:3), \(τὸ\ \ υπόστολον\ \ αὐτοῦ\) (9:22). It is thus frequent with the genitive. Cf. also \(τὸ\ \ κατ'\ \ έπρόθυ\) (Ro. 1:15). See Heb. 7:7. In Lu. 12:23, \(η\ \ πυχὴ\ \ πλεῖον\ \ έστιν\ \ τῆς\ \ τροφῆς\), we have \(πλεῖον\) because the abstract idea of thing is expressed. This also is a frequent Greek idiom. Cf. also \(οὐ\ \ δέν\) (1 Cor. 7:19), \(ὅ\) (1 Cor. 15:10), \(ταύτα\) (1 Cor. 6:11).

IV. Agreement of Adjectives with Substantives.

(a) In Number. It is not necessary to repeat what has been \([Page 655]\) said on this subject in chapter X, VII, (b), on concord between adjective and substantive in number. The normal thing is for adjective and substantive to agree in number. But one must not get the idea that “construction according to sense” of the grammarians is an anomaly. “The term is unobjectionable, provided we remember that constructions according to the meaning are generally older than those in which meaning is overridden by idiom or grammatical analogy.”\(^1\) Thus there is no cause for astonishment in seeing \(ἔκθαμβοι\) with \(ὁ\ \ λαός\) in Ac. 3:11, nor \(πλήθος\ \ κράζοντες\) in Ac. 21:36.

(b) In Gender. For concord in gender see chapter X, VIII. Here again the construction according to sense is normal like \(στρατιῶ\ \ οὐρανίου\ \ αἰωνοῦτων\) (Lu. 2:13), but \(οὐρανίου\) in the same phrase is the feminine (cf. \(αἰωνιος\), etc.). The N. T. does not have the Attic idiom with \(ήμυσς\) of agreement with the gender of the genitive substantive, though it is still in the LXX. Cf. \(τὰ\ \ ήμίσεις\ \ τῶν\ \ άμαρτίων\) (Ezek. 16:51). Instead see \(ἐκ\ \ ήμίσους\ \ τῆς\ \ βασιλείας\) \(μου\) (Mk. 6:23). But \(α_utf80\) and \(θαυμαστή\) in Mt. 21:42 (Mk. 12:11) are probably due to the Hebrew \(πιΝΙΤ\), the Hebrew using the feminine for abstract ideas, since it had no neuter. But even here in Ps. 117:23 the context has \(κεφαλή\ \ γονίας\).\(^2\) One other remark is to be made which is that when an adjective occurs with more than one substantive it may agree with the gender of the nearest, as in \(πᾶσα\ \ πόλιν\ \ καὶ\ \ τόπον\) (Lu. 10:1), be repeated with each, as in \(πᾶσα\ \ δόσις\ \ άγαθή\ \ καὶ\ \ πᾶν\ \ δώρημα\ \ τέλειον\) (Jas. 1:17) and \(ἐν\ \ ποίη\ \ δύναμα\ \ \(η\ \ \varepsilon\)\ \ \(πο\)\ \ \(νό\)\ \ \(μα\)\ \ \(α\)\ \ \(τέλειο\) (Ac. 4:7), or agree with the masculine rather than the feminine or neuter, as in \(γνυμοῖ\) (Jas. 2:15). With the same gender there may be repetition (Mt. 4:23; 9:35) or not (Mt. 12:31).

(c) In Case. For concord in case see chapter X, IX. The main instances of variation here belong to the participle as in Ac. 15:22 f.), and in particular the Book of Revelation furnishes illustrations (Rev. 3:12, etc.), as already shown.

---

3 B. S., p. 259 f.
1 Monro, Hom. Gr., p. 118.
2 Cf. W.-Th., p. 238; Moulton, Prol., p. 59.
(d) **Two or More Adjectives.** When two or more adjectives occur together the conjunction may be used as in πολλά καὶ βαρέα αἴτιώματα (Ac. 25:7) and even πολλά καὶ ἄλλα σημεῖα (Jo. 20:30), as in Latin. But see ἐτέρων πολλῶν (Ac. 15:35) and the repetition of the adjective with the article (Rev. 2:12).

**V. The Attributive Adjective.** The adjective (from adjaceo) is a word joined on to another (ἐπίθετον). The adjective is by no means the only attribute used with substantives. Thus the attribute may be substantive in apposition with another substantive, like ἄνθρωπος θεοῦ μακροθυμία (Mt. 13:52), or a genitive, like ἤ του θεοῦ μονογενῆς (Mt. 18:20). When the article is used before the adjective or participle it is, of course, attributive, as in ὁ καλός (Jo. 10:11), ἐν τῇ παρουσίᾳ ἃλλα ἀληθείᾳ (2 Pet. 1:12). But adjectives and participles may be attributive when no article is used. Thus with στρατιάς ὑπαρχόντων (Lu. 2:13), ὡς ῥησίν (Jo. 4:10). Cf. τὸ ὑδωρ τὸ ἐν χείρι (Mt. 12:13), ὡς ῥησίν, ὡς ἅρπαξ (Heb. 7:24). Cf. Mk. 8:17; Jo. 5:35; 1 Cor. 11:5. As further interesting examples of the predicate adjective, note ὁ θεός (Jo. 9:34), δόκιμος φανήμα (1 Cor. 13:7), ὑγιής (Mt. 12:13), πρῶτος (Jo. 20:4), ἔχον (1 Cor. 11:5), ὁρθός (Ac. 14:10), μόνος (Lu. 24:18; cf. Mt. 3:1.

2 Hom. Gr., p. 117.
VII. Adjective Rather than Adverb. See ch. XII, IX, for discussion of this subject. A few items are added here. Cf. πρῶτος Μωσῆς λέγει (Ro. 10:19), ‘Moses is the first who says,’ with πρῶτον διαλλάγητι τῷ ἄδελφῳ σου (Mt. 5:24), ‘Be reconciled with thy brother as the first thing that you do.’ In Mt. 10:2 πρῶτος Σίμων means that first in the list is Simon, whereas πρῶτον, in Jo. 1:41, means that Andrew finds his brother Simon as the first thing as which he does. Πρῶτον ἱρθον (Mt. 17:27) means the first fish that came up. Cf. ἐν ἐμοί πρῶτῳ (1 Tim. 1:16), ‘me as chief.’ The exact idea of πρῶτη in Lu. 2:2 is not certain, but most probably Luke’s idea is that there were two enrolments under Cyrenius. Cf. Ramsay, Was Christ Born at Bethlehem? With μόνος and μόνων a like distinction is to be observed. Take ἄνεξώρησεν πάλιν εἷς τὸ δρός αὐτὸς μόνος (Jo. 6:15) and σὺ μόνος παροικεῖς Ἰερουσαλήμ (Lu. 24:18). The difference is much like that between the English “alone” and “only.” So in Lu. 9:36, εὑρέθη Ἰησοῦς μόνος, ‘Jesus was found alone,’ and in Mt. 17:8 (cf. Mk. 9:8), οὐδένα ἔδωκα εἰ μὴ αὐτόν Ἰησοῦν μόνον, it is adjective, not adverb. Cf. οὐκ εἰμὶ μόνος (Jo. 16:32) with οὐ μόνον in Ac. 21:13. Cf. 2 Jo. 1. Contrast μόνον in Mt. 8:8 with μόνος in Mt. 14:23. There are some examples where either adverb or adjective would make good sense, as in Mk. 6:8, μηδὲν εἰ μὴ ῥάβδον μόνων, where D reads μόνην; Ac. 11:19, μηδὲν εἰ μὴ μόνον Ἰουδαίος, where D has μόνος; and 1 Jo. 5:6, οὐκ ἐν τῷ ὑδάτι μόνον, where B reads μόνω. But this is not all. The Greek often uses an adjective where other languages prefer adverbs or prepositional phrases. Latin and English have similar expressions for other ideas. Naturally this idiom is common in Homer. For time note δεσποταῖοι ἔκθεομεν (Ac. 28:13), ‘we came second-day men’ (‘on the second day’). Cf. τεταρτάδος Jo. 11:39. D has likewise πεσπαταῖος in Ac. 20:6. So γενόμεναι ὁρθόναι ἐπὶ τὸ μνημέον (Lu. 24:22), ἐπιστῆ ἐφνίδιος (Lu. 21:34), αὐθαίρετος (2 Cor. 8:17), ὀκταήμερος (Ph. 3:5).

VIII. The Personal Construction. This matter belongs more properly to indirect discourse and the participle, but it calls for [Page 658] just a word here. The Greeks were more fond of the personal construction than we English are. Farrar1 indeed doubts if Greek has a true impersonal verb. But ἔγενοτο in a passage like Lu. 1:8 comes close to it. Cf. Lu. 1:23. We have fewer examples in the N. T. of the personal

Farrar FARRAR, F. W., Greek Syntax (1876).
1 Gk. Synt., p. 89.
construction, none in truth with either δῆλος (1 Cor. 15:27 is impersonal construction) or with φανερός. But we do have φανερούμενοι ὅτι ἔστε ἐπιστολή Χριστοῦ (2 Cor. 3:3). Cf. Χριστὸς κηρύσσεται ὅτι in 1 Cor. 15:12. Note also ἀξιός ἵνα λύσω (Jo. 1:27), but the impersonal construction is found with δίκαιον in Ph. 1:7. See also ἰκανός ἵνα in Mt. 8:8. Δωριτὸς occurs with the infinitive (2 Tim. 1:12). This personal construction is probably due to assimilation of gender by analogy. Cf. δόκει σοφὸς εἶναι (1 Cor. 3:18), perfectly regular predicate nominative. See good example in 1 Cor. 15:9.

IX. Adjectives Used with Cases. Examples were given under the various oblique cases of adjectives that were construed with the several cases. A mere mention of the matter is all that is required here. Thus the genitive appears with ἐνοχος θανάτου (Mt. 26:66), the ablative with ξένοι τῶν διωθηκόν (Eph. 2:12), the dative (Mt. 20:1) and accusative with ὁμοίς υἱὸν ἄνθρωποι (Rev. 14:14), the acc. with πιστὸς τῷ πρὸς τὸν θεόν (Heb. 2:17), the dative with ἐνοχος τῇ κρίσει (Mt. 5:21) and καλὸν σοὶ ἑστίν (Mt. 18:8), the instrumental with ᾨσοὺς ἥμιν (Mt. 20:12), the locative with βραδεῖς τῇ καρδίᾳ (Lu. 24:25). Cf. locative in Col. 2:13 f. The adjective is, of course, used with various prepositions, as τῷ ἄγαθον πρὸς πᾶντας (Gal. 6:10), πιστὸς ἐν ἐλαχιστῷ (Lu. 16:10), βραδύς εἰς ὄργην (Jas. 1:19).

X. Adjectives with the Infinitive and Clauses. If cases can occur with adjectives, it is natural that the verbal substantive known as the infinitive should come within that idiom and be in a case. The case of the infinitive will vary with the adjective. Thus in ἀξιός κληθῆναι (Lu. 15:19) the infinitive is probably in the genitive case. Cf. also ἀξιός ἵνα λύσω (Jo. 1:27). With δωριτὸς κωλύσατι (Ac. 11:17) we have the accusative of general reference. In the case of ἰκανός βαστάσαι (Mt. 3:11) we may see either the accusative of general reference, as above, or the dative, according to the original idea of the form and the common case with ἰκανός. Cf. also ἰκανός ἵνα εἰλεξέλθης (Mt. 8:8). The instances of both infinitive and ἵνα are numerous in the N. T. As specimens of the infinitive and preposition after the adjective, take ταχὺς εἰς τὸ ἄκουσαι, βραδύς εἰς τὸ λαλῆσαι (Jas. 1:19). Indeed the genitive article τὸ with the infinitive occurs with adjectives where it would not naturally be looked for, as in ἐτοιμοὶ ἐσμὲν τοῦ ἀνελθέν (Ac. 23:15). Cf. ἐτοιμός εἰμι πορεύεσθαι (Lu. 22:33). But see further βραδεῖς τοῦ πιστεύειν (Lu. 24:25).

XI. The Adjective as Adverb. This subject has been treated in the chapter on the Cases as well as in the one on Adverbs. Hence a few words will suffice here. The border line between adjective in the nominative and adverb gets very dim sometimes. Thus in English we say “I am well,” “He spoke well.” Farrar1 even says that it is “more correct” to use an adverb than an adjective in a phrase like ἰσομερὸς ὑμᾶς ἠδον. But that is going too far even if we call it antimeria. He quotes Milton (Par. Lost, vii, 161), “Meanwhile inhabit lax,” and Shakespeare (Taming of Shrew, I, i, 89), “Thou didst it excellent.” We can see the difference between ἄναστηθι ὁρθός (Ac. 14:10) and ὁρθὸς ἐκρινα (Lu. 7:43). But, as already observed, the difference between μόνον and μόνῳ grows faint in 1 Jo. 5:6 and similar examples. Hence it

---
2 Middleton, Anal. in Synt., p. 15.
1 Gk. Synt., p. 90.
becomes very easy for the adjective form in the accusative to be used indiscriminately as adverb where the adjective idea disappears. Thus only the context can tell whether μόνον is adjective (Jo. 8:29) or adverb (Gal. 1:23). So as to μικρόν (Jo. 7:33 and 16:19), πολύ (Lu. 12:48 and Ro. 3:2), ὀλίγον (Mk. 1:19), etc. Πρώτον, for instance, is very common as an adverb (cf. Mt. 7:5, and even τὸ πρῶτον is found, Jo. 10:40), but πρώτος occurs only once (Ac. 11:26). It is needless to multiply here examples like these. Other cases are used besides the accusative to make adverbs from adjectives, as the ablative in πρώτος above, the genitive as ὁ ὄνομ (Jo. 4:36), the associative-instrumental as δημοσία (Ac. 16:37). Cf. πολλά (Ro. 5:9). All degrees of comparison furnish adverbs, thus πολύ (Ro. 3:2; 2 Cor. 8:22), πλέον (Jo. 21:15), μάλιστα (Ac. 20:38). The accusative singular of the comparative is the common adverb of that degree as περισσότερον (Heb. 7:15), but see περισσότερως (2 Cor. 1:12). In the superlative both the singular as πρῶτον (Lu. 6:42) and the plural as μάλιστα (above). These examples sufficiently illustrate the principles involved.

XII. The Positive Adjective.

(a) RELATIVE CONTRAST. In discussing the positive adjective first one must not get the idea that the positive was originally the absolute idea of the adjective as distinct from the comparative or superlative. This notion of absolute goodness or greatness, [Page 660] etc., is itself later than the notion of comparison. Indeed the adjective itself has a relative sense and suggests the opposite, as light implies darkness. And then many of the oldest comparative forms have no positive at all and never did have, like ἀμφότερος, ὑπερήφανος, ἐξωτερικός, etc. More of this under the comparative. The point to get hold of just here is that the adjective per se (like many other words) implies contrast, and that originally this is what the comparative form meant. Thus in Homer some comparatives in –τερος have no notion of greater or less degree, the idea of duality, but merely contrast, like θηλύτερα as opposed to male, ὑπερήφανος as opposed to valley, ὑπερήφανος opposed to right, δεξιότερος opposed to left, ἐξωτερικός opposed to ὠξικός and vice versa. Cf. the comparative idea (and ablative case after) in τὸ περισσότερον τοῦτων (Mt. 5:37).

(b) USED AS COMPARATIVE OR SUPERLATIVE. With this notion of the relative contrast in the adjective and the first use of the comparative one is not surprised to find the positive still used alongside of the comparative. In Lu. 1:42, εὐλογημένη σὺ ἐν γυναιξίν, we do not have a mere Hebraism, though a very natural one in this translation from the Aramaic talk of Elizabeth. The Hebrew has no degrees of comparison at all and has to resort to circumlocutions. But Homer and other early Greek writers show a similar idiom, like διὰ θεάων, διὰ γυναικῶν (Eurip., Alc., 471). Other examples occur in the N. T., like ὡς ἡ γῆ (Heb. 9:2 f., frequent in the LXX), ποιά ἐν τῷ νόμῳ (Mt. 22:36). Cf. βασιλεύς βασιλέων (Rev. 19:16) ἐν τῷ νόμῳ (Mt. 22:36). Cf. βασιλεύς βασιλέων (Rev. 19:16), κύριος τῶν κυριευόντων (1 Tim. 6:15), τοῦ αἰῶνος τῶν αἰῶνων (Eph. 3:21). The vernacular κοινή uses repetition of the adjective, as in μεγάλοι μεγάλοι, B.U. I, 229, μεγάλοι καὶ μεγάλοις στάθην, Inscription of Thera (Herm. 1901, p. 445), θερμαο

3 C. and S., Sel. from LXX, p. 64.
θερμά, Herondas IV, 61. Cf. Radermacher, *N. T. Gr.*, p. 57. The positive suggests contrast clearly in τῶν πολλῶν (Mt. 24:12). Cf. οἱ πολλοί in Ro. 5:15, 19; 1 Cor. 10:33. Here the majority is the idea, a comparative notion. Cf. Paul’s use of τοῦς πλείονας (1 Cor. 9:19) and Matthew’s ὁ πλείστος ὅχλος (21:8). See also Mk. 12:37 ὁ πολύς ὅχλος and Lu. 7:11 ὅχλος πολύς, and in 2 Cor. 8:15 τὸ πολύ καὶ τὸ ὀχί. Hence it is not surprising in Lu. 16:10 to see ἐν ἐλαχίστῳ and ἐν πολλῷ by side by side (cf. ἐν ὀλίγῳ καὶ ἐν μεγαλῷ in Ac. 26:29), as in Mt. 5:19 also ἐλάχιστος and [Page 661] μέγας are set over against each other. Cf. also Mt. 22:38. In Ac. 26:24, τὰ πολλὰ γράμματα, we have an implied comparison.1

(c) WITH PREPOSITIONS. The positive may be used with prepositions also where comparison is implied. Thus ἀμαρτωλοὶ παρὰ πάντας τοὺς Γαλιλαίους (Lu. 13:2). Winer2 properly compares this idiom with the use of ὡς in Heb. 3:2, for in the next verse the author uses πλείονος δόξης as the sense of verse 2. But in the LXX this is a very common idiom3 and it is found in the classical Greek. The correct text in Lu. 18:14 (א BL) has also δεδίκαιων παρὰ ἔκεινον. Cf. ἡξία πρὸς in Ro. 8:18.

(d) COMPARISON IMPLIED BY ἤ. Once more the positive may occur with ἤ. It is not necessary, in view of the preceding discussion, to suggest the “omission” of μᾶλλον.4 It is true that we have only one such example in the N. T., καλὸν σοί ἐστιν εἰς ἑσθεῖν ἤ βληθήσαι (Mt. 18:8). Cf. Mk. 9:43, 45. But the LXX again furnishes many illustrations5 like λευκὸ ἤ (Gen. 49:12). The ancient Greek also is not without parallels. And there are N. T. examples, as in LXX, of verbs so employed like θέλω ἤ (1 Cor. 14:19) and λυσίτελε ἤ (Lu. 17:2) and substantives as χαρὰ ἤ (Lu. 15:7). Older Greek writers show this idiom with substantives and verbs.6 In Mt. 18:8 we have the positive adjective both before and after ἤ as καλὸν ἤ χωλόν. But cf. 2 Tim. 3:4 for comparative before and positive after.

(e) IN ABSOLUTE SENSE. After the three grades of comparison were once established, analogy worked to form and use positive, comparative and superlative. And sometimes the positive occurs in the absolute sense. So we find Christ discussing the absolute meaning of the positive ἁγαθός in Mt. 19:17 (Mk. 10:18). Thus it comes to pass that sometimes the positive is more absolute than comparative or superlative which are relative of necessity. God is alone ἁγαθός in this sense, while others are βελτίονες and βελτίστοι. Our God, ὁ ἁγαθὸς θεός, is higher in ideal and fact than Jupiter Maximus or Ζεὺς ἄριστος ἤ μέγιστος.7 Of καλὸς the opposite is οὐ καλός and this is not the positive attribute ἁλοχρός. In Mt. 17:4 we find Peter saying

fervently καλὸν ἡμᾶς ὑδε εἶναι. “The positive represents the highest absolute idea of a quality and cannot therefore be increased.”

[a] XIII. The Comparative Adjective (συγκριτικὸν ὄνομα).

(a) CONTRAST OR DUALITY. On the forms see chapter VII, II, 3. As already observed, the first use of the comparative form was to express contrast or duality. This is clear in Ἦ ἄρσενα (Mt. 6:3), though Ἡ δεξία occurs in the same verse. But Homer uses δεξίτερος as comparative. Cf. also ἀμφότερος, ἡμέτερος, ὑμέτερος, ἔτερος, ἐκάτερος, ὑπότερος, ὑπέτερος, where the notion of two is accentuated.

Contrast between two or duality, therefore, is clear in these pronouns. They will receive separate treatment later. Here they are merely used to illustrate the origin of the comparative form. Ἄλλος (Latin alius) is also comparative, ὁ ἄλος. So is δεξιός, which explains the disappearance of δεξίτερος. One of the comparative endings is –τος. This leads one to remark that the oldest comparative forms are not formed from positives as such, but from their own roots. Thus δεξίτερος, which is obviously comparative and expresses duality, has no positive form. Cf. ἀμφότερος and the examples just mentioned. This original comparative need not be formed from an adjective at all, but from a substantive like βασιλεύτερος, κόντερος, etc., in Homer where the comparative expresses the possession of the quality “in contradistinction to objects which are without it” (Monro, Homeric Gr., p. 82). Σο ρότερος (from the adverb πρό) is not ‘more forward,’ but ‘forward’ in opposition to ὑστερος, ‘backward.’ Cf. Brugmann, Griech. Gr., p. 415. Cf. ἔλευθερος, ‘free to come.’ So ἐξότερος is ‘outside,’ not ‘more outside.’ These oldest forms represent the original meaning which was not the comparison of greater or less, not a matter of degree, but a question of contrast or duality. So βέλτερος, ἠμέινον have no positive forms. There is indeed a distinct weakening of this original duality in adjectives as in pronouns.

Cf. the dropping of the dual endings. Thus in the N. T. πότερος as an adjective occurs only once, κατὰ τὴν προτέραν ἄναστροφήν (Eph. 4:22). It is rare in the papyri (Moulton, Prol., p. 79). Elsewhere πρῶτος holds the field when only two objects or persons are in view, like πρῶτος μου (Jo. 1:15), πρῶτος and Ἄλλος (20:4), etc. Cf. our ‘first story’ when only two stories are contemplated, ‘first volume,’ etc. And as an adverb πρῶτον survives only ten times (cf. 2 Cor. 1:15), while πρῶτον is very common. [Page 663] Luke does not use πρῶτος (adjective or adverb) so that πρῶτος in Ac. 1:1 with ὁ λόγος does not imply τρίτος. Moulton finds πρῶτος only once in the Grenfell-Hunt volumes of papyri so that this dual form vanishes before the superlative πρῶτος. Winer (Winer-Thayer, p. 244) sees this matter rightly and calls it a Latin point of view to insist on “former” and “latter” in Greek, a thing that the ancients did not do.

8 Ib., p. 19.
1 Moulton, Prol., pp. 77 ff.
5 Ib., pp. 4 ff.
1 Prol., p. 79.
(b) DEGREE. The next step was for the notion of degree to come into the comparative. The notion of “two-ness” remained, but it had the added idea of more in degree. They run along then parallel with each other. The comparative form, therefore, has two ideas, that of contrast or duality (Gegensatz) and of the relative comparative (Steigerung), though the first was the original.2 Relative comparison is, of course, the dominant idea in most of the N. T. examples, though, as already remarked, the notion of duality always lies in the background. Thus ἄνεκτότερον ἔσται (Mt. 10:15), βεβαιότερον (2 Pet. 1:19), εἰς τὸ κρείσσον (1 Cor. 11:17), σοφότερον and ἱσχυρότερον (1 Cor. 1:25).

(c) WITHOUT SUFFIXES. But the comparative did not always use the comparative suffixes, though this was usual. Sometimes μᾶλλον was employed with the positive, though this idiom is not very frequent in the N. T. Thus we find μᾶλλον with καλὸς (Mk. 9:42), with μικρὸν (Ac. 20:35), with ἄναγκα (1 Cor. 12:22), with πολλά (Gal. 4:27). Once indeed (2 Tim. 3:4) μᾶλλον occurs with one adjective before ἤ and not with the other after ἤ. The Greeks preferred to put both qualities in the comparative degree when two adjectives were compared.3 But here we have φιλόθεον μᾶλλον ἤ φιλόθεοι. “In Jo. 3:19 μᾶλλον—ἤ is used with two substantives” (H. Scott). In Phil. 16 we have a distinction drawn between μᾶλλα and μᾶλλον with ἄδελφον ὑγιαπτόν. No example occurs in the N. T. of two comparatives with ἤ, but in Ro. 9:12 we have ὁ μείζων δουλεύσῃ τῷ ἐλάσσονι and in Heb. 1:4, τοσοῦτῳ κρείττων γενόμενος ὅσῳ διαφορότερον.

(d) DOUBLE COMPARISON. Sometimes indeed μᾶλλον occurs with the comparative form itself. This applies to adjectives and adverbs. Thus μᾶλλον περισσότερον (Mk. 7:36), περισσοτέρως μᾶλλον (2 Cor. 7:13). Cf. ἤτι μᾶλλον καὶ μᾶλλον (Ph. 1:9), περισσότερον ἤτι κατάδηλον (Heb. 7:15). Recall also the double comparative form like vernacular English “lesser,” μειζοτέραν (3 Jo. 4), and the comparative on the superlative ἑλαχιστότερος (Eph. 3:8. It occurs [Page 664] in Test. xii, Pat. Jos. 17:8). All this is due to the fading of the force of the comparative suffix and the desire for emphasis. Homer has χειρότερος, Αeschylus μειζονώτερος and ὑπερτερότερος, Xenophon ἐσχατότερος, Aristophanes προτεραίτερος, Cf. Schwab, Hist. Syntax etc., Heft iii, p. 60. Modern Greek vernacular has πλειότερος and χειρότερος. The papyri give illustrations like πρεσβυτερότερα (Moulton, Prol., p. 236). Cf. Latin double comparative dex-ter-ior, sinis-ter-ior. See list in Jannaris, Hist. Gk. Gr., p. 147. This double comparative is due to analogy and weakened sense of the form (Middleton, Analogy in Syntax, p. 38). Other means of strengthening the comparative were the accusative adverb πολύ, as in Heb. 12:9, 25 (cf. 2 Cor. 8:22), and in particular the

2 Schwab, Hist. Synt. etc., Heft i, p. 21 f.
3 Clyde, Gk. Synt., p. 42.

Middleton

MIDDLETON, Analogy in Syntax (1892).

———, The Doctrine of the Greek Article (1855).
instrumental πολλῷ, as in Lu. 18:39. In 1 Cor. 12:22 we have πολλῷ μᾶλλον over against δοθενέστερα. But in Ph. 1:23 note πολλῷ μᾶλλον κρείσσον where all this emphasis is due to Paul’s struggling emotion. The ancient Greek used all these devices very often. Cf. Schwab, Hist. Syntax, etc., Heft iii, pp. 59 ff. Blass (Gr. of N. T. Gk., p. 143) rightly observes that in 2 Cor. 12:9 ἡδοστα μᾶλλον are not to be taken together. The older Greek used also μέγα and μακρῷ to strengthen the comparison. Cf. Mayer, Verstärkung. Umschreibung und Entwertung der Comparationsgrade in der älteren Græcität, 1891, p. 16 f.

(e) WITHOUT OBJECT OF COMPARISON. Sometimes the comparative form is used absolutely. It is beside the mark to say with Clyde1 that this idiom occurs “through politeness for the positive.” It is not used for the positive. It is true that no object of comparison is expressed, but that is because the context makes the point perfectly clear. In rapid familiar conversation this would often be true. Blass2 also thinks that sometimes the comparative is no more than a positive. Winer3 more justly holds that the point of comparison may “ordinarily be gathered from the context.” The point is always in the context. Thus ὃ ποιεῖς ποίησον τάχειον (Jo. 13:27) may mean more quickly than Judas would have done but for the exposure. Note that this is a conversation and Judas would understand. In Heb. 13:19 περισσοτέρως and τάχειον correspond easily, and in verse 23, ἐὰν τάχειον ἔρχηται, perhaps it means ‘if he come before I leave.’ None of the examples of Blass are convincing, for πρεσβύτερος, though used of an official, is one who is older (elder) as compared with νεώτερος, and the bishop is not to be a neophyte (1 Tim. 3:6). The point, of course, lies more in length of experience than of age. Deissmann (B. S., p. 154 f.) finds in the papyri ὁ πρεσβύτερος ὁ κώμης, an official title. Pap. Lugd. A, 35 f. (Ptol. Per.). In Ac. 17:21 καινότερον means, of course, something newer than what they had recently heard. Socrates said to Hippocrates when he came in (Plato, Protagoras 309 C): µή τι νεώτερον ἄγγέλεις; Then again, in Ac. 17:22, δεισιδαιµονεστέρους is more religious (or superstitious, as the case may be, a matter for exegesis. I prefer religious) than ordinary or than I had supposed. One does not need to deny the “elative” comparative sense of “very”1 here and elsewhere. The elative comparative is still comparative. But Blass2 denies even the elative comparative in a number of these examples. This is to a certain extent to surrender to translation the true interpretation of the Greek idiom. In Ac. 18:26 ἄκριβέστερον ἔξετασθεντο teaches that Apollos received more accurate information than he had previously had. Cf. ἔξετασθεσθαι περὶ τοῦτον ἄκριβεστερον, B.U. 388 (ii/A.D.). Moulton, Cl. Rev., 1901, p. 439. So in Ac. 24:22 ἄκριβεστερον εἰδὸς means that Felix more accurately than one would suppose, and in verse 26 πυκνότερον shows that he sent for Paul more frequently than he had been doing before. Ac. 25:10 κάλλιον ἐπιγινώσκεις is an interesting example. Paul hints that Festus knows his innocence better than he is willing to admit. Cf. βέλτιον σὺ γινώσκεις (2 Tim. 1:18), ‘better than I.’ Βελτίων occurs in the papyri as adjective,

Clyde CLYDE, J., Greek Syntax (1876).
1 Gk. Synt., p. 41.
2 Gr. of N. T. Gk., p. 142.
3 W.-Th., p. 242.
1 Moulton, Prol., p. 236. He notes some “elative comparatives” in D, in Ac. 4:16 φανερότερον, 10:28 βέλτιον.
2 Gr. of N. T. Gk., p. 142.
though not in the N. T. Thus one could go through all the rather numerous examples of elative comparative adjectives and adverbs in the N. T. and show that with proper attention to the context the point of comparison appears plainly enough. The comparative even without the expressed object of comparison is not just the positive. So in Ac. 27:13 ἀσσον παρελέγοντο clearly means ‘nearer than they could do before’ (cf. παραλεγόμενου in verse 8). Again in Jo. 4:52 κομψότερον ἔσχεν (note the construction) is ‘better than before the word of Christ was spoken.’ As further illustrations, not to overdo the point, note μᾶλλον in 2 Cor. 7:7 (cf. Ph. 1:12), σπουδαιότερος in 2 Cor. 8:17 (cf. 2 Tim. 1:17) and σπουδαιότερος in Ph. 2:28 (cf. 1 Th. 2:17), τολμηρότερος (Ro. 15:15), μείζονες (2 Pet. 2:11), κατώτερα in Eph. 4:9. The common expression οἱ πλείνας (Ac. 19:32), and ὑπερπλείονας (1 Cor. 9:19) for ‘the majority’ should occasion no difficulty. In free translation one may sometimes use ‘very’ or ‘rather,’ but this is merely the resultant idea. Cf. ἥτεροις λόγοις πλείον (Ac. 2:40). The older Greek shows this idiom.1

(f) FOLLOWED BY ἢ. This ἢ is merely the disjunctive conjunction. But ἢ is not common in the N. T. in this connection. Indeed Blass2 considers that it does not occur where any other construction would be perfectly clear. As is well known in the ancient Greek, ἢ is not common after πλείων and ἐλάττων with numerals. This use of the comparative as a mere parenthesis is in the papyri. Cf. Moulton, Cl. Rev., 1901, p. 438. O.P. 274 (i/A.D.) πλείων πήχεις ἐννέα. Cf. Schwab, Hist. Syntax, Heft ii, pp. 84 ff. Cf. also ἐπάνω in Mk. 14:5 and 1 Cor. 15:6, where it has no effect on the construction. In Mt. 5:20 there is an ellipsis (πλείον τῶν Φαρ.), ‘than that of the Pharisees.’ So in Mt. 26:53 πλείω δώδεκα λεγίωνας occurs with no change in the case of λεγίωνας. In Ac. 4:22; 23:13; 24:11 likewise ἢ is absent without change of case. So in Ac. 25:6 οὐ πλείους ἄκτω ἢ δέκα, for ἢ here does not go with πλείους. But in Lu. 9:13 we do find οὐκ ἔσιν ἢ μὴν πλείον ἢ ἄρτοι πέντε. And in 1 Tim. 5:9 the ablative construction occurs. In justification of Blass’ point3 above, he points out that with two adjectives we have ἢ (2 Tim. 3:4); with a conjunction, as ἐγγύτερον ἢ οὐτε (Ro. 13:11); with an infinitive, εὐκρίτερον εἰσελθεῖν ἢ (εἰσελθεῖν to be repeated, Mt. 19:24). Cf. Ac. 20:35; with a genitive (same form as the ablative would be if ἢ were absent), like ὑμῶν ὑποκύπτειν μᾶλλον ἢ τοῦ θεοῦ. In Ac. 4:19); with a dative, like ἑκατότερον γῇ Σοδόμων ἢ τῇ πόλει ἐκείνῃ (Mt. 10:15). These are all pertinent and striking examples. There remain others (against Blass’ view) which are not so justified, like πλείους μαθητὰς Ποιῶν ἢ Ἰωάνης (Jo. 4:1); ἡγάπησαν μᾶλλον τῷ σκότῳ ἢ τῷ φῶς (Jo. 3:19), etc. But it remains true that ἢ is becoming rare in this usage in the N. T.

(g) FOLLOWED BY THEABLATIVE. The ablative is the most common means of expressing the standard of the comparison: so we must take the case, and not as genitive. As remarked in the chapter on the cases, this ablative construction seems rather more common in the N. T. than in the papyri. It is found in Homer.4 In the old Sanskrit the ablative was found with comparatives,5 though occasionally the locative

1 Schwab, Hist. Synt. etc., Heft ii, p. 178; Blass, Gr. of N. T. Gk., p. 143.
2 Gr. of N. T. Gk., p. 107 f.
4 Monro, Hom., Gr., p. 109.
or the instrumental appeared. [Page 667] Indeed the various constructions after the comparative (particle like ἧ, case, preposition) occur in the other Indo-Germanic languages.1 Schwab2 estimates that in Attic prose the ablative after the comparative stands in relation to ἧ as 5.5 to 1 and in poetry 18 to 1. Blass3 thinks that in the κοινή the ablative is three times as common in this idiom as in Attic prose. So in the N. T. this is the usual construction after the comparative. As further examples observe μείζον τοῦ τοῦτον (Mk. 12:31), μείζον τοῦ πατρὸς ἡμῶν (Jo. 4:12), πλέον τοῦτον (Jo. 21:15), σοφότερον τῶν ἄνθρωπων (1 Cor. 1:25), etc. Cf. 1 Jo. 3:20; Heb. 7:26.

Sometimes the comparison is a little complicated, as in Mt. 5:20, ὑμῖν ἡ δικαιοσύνη πλέον τῶν γραμματέων, where ‘righteousness’ is dropped in the second member. Note πλέον as a fixed or stereotyped form.4 Cf. also Jo. 5:36. In Mt. 21:36, ἄλλους δούλους πλείονας τῶν πρώτων, note the use of comparative and superlative side by side.

(h) FOLLOWED BY PREPOSITIONS. Prepositions occur not infrequently after the comparative. We have already seen the positive so used with παρά, and πρός. Wellhausen5 considers this positive use like the Aramaic. In the classical Greek we see beginnings of this usage.6 In the modern Greek, the normal7 way of expressing comparison is to use ὑπό with the accusative and occasionally παρά with the nominative. The examples of the use of παρά are chiefly in Luke and Hebrews. Thus Lu. 3:13, μηδὲν πλέον παρὰ τὸ διατεταγμένον ὑμῖν; Heb. 1:4, διαφορότερον παρὰ αὐτούς; 3:3, πλέονος δόξης παρὰ Μωυσῆν; 9:23, κρείττοσι θυσίαις παρὰ ταύτας. So Heb. 11:4; 12:24. Examples of ὑπέρ in this sense occur likewise in Lu. 16:8, φρονιμότεροι ὑπέρ τούς ιδιούς; Heb. 4:12, τομότερος ὑπέρ πᾶσαν μάχημαν. In the LXX8 comparison was usually completed by means of παρά or ὑπέρ.

(i) THE COMPARATIVE DISPLACING THE SUPERLATIVE. This increase of the comparative in contrast to the corresponding decrease of the superlative is one of the most striking peculiarities of the adjective in the κοινή. Indeed one may broadly say with Blass,9 that in the κοινή vernacular the comparative with the article takes [Page 668] over the peculiar functions of the superlative. In the modern Greek vernacular the comparative with the definite article is the only idiom employed for the true superlative.1 The form in –τατος in modern Greek is rare and always elative.

1 Ib., p. 1.
2 Hist. Synt. etc., Heft ii, p. 92.
3 Gr. of N. T. Gk., p. 329. The abl. is sometimes used with personal pronouns after the comp. in mod. Gk. (Thumb, p. 76).
4 Blass, ib., p. 108.

7 Thumb, Handb., p. 75 f.
8 C. and S., Sel., pp. 84 ff. For various prepositions so used in older Gk. see Schwab, Hist. Synt., Heft i, pp. 45 ff.
9 Hermeneutik und Kritik, p. 199.
1 Thumb, Handb., p. 73.
Moulton\textsuperscript{2} finds the papyri supporting this disappearance of the superlative form before the comparative to a certain extent. "It seems fair to conclude that (1) the superlative, apart from its elative use, was dying, though not dead; (2) the comparative had only sporadically begun to be used in its place."\textsuperscript{3} He reminds us that the literary use had as much weight as the vulgar idiom. As a matter of fact the superlative form is not essentially necessary. The Armenian has no superlative and is like the vernacular modern Greek. The root-difference between the comparative and the superlative is that between "twoness" and "moreness." As the notion of duality vanished or was no longer stressed, the need for a distinction between the comparative and superlative vanished also. Both are in reality comparative in relation to the positive.\textsuperscript{4} In the N. T. therefore we see this blurring of distinction between comparative and superlative. Cf. 1 Cor. 13:13 \textit{μεῖζων δὲ τοῦτον ἥ ἁγάπη} where three things are compared. In English we say "greatest of these." Sir W. M. Ramsay gives \textit{πάντων μεῖζων} in a Christian inscription.\textsuperscript{5} In Mt. 18:1 we have τίς ἄρα μεῖζων, etc. Cf. Mk. 9:34. So in Mt. 11:11 (cf. Lu. 9:48) note ὁ δὲ μικρότερος (but note also μεῖζων αὐτοῦ). In Lu. 7:42 f., πλεῖον and τὸ πλεῖον do indeed refer to the two debtors (verse 41), though it is questionable if that fine point is here insisted on. But in 1 Cor. 12:23 the comparatives have their usual force. Moulton\textsuperscript{6} cites from O.P. 716 (ii/A.D.) τὴν ἰμείνον ἀφέσαν διὸν, ‘to the highest bidder.’ Winer\textsuperscript{7} indeed finds similar examples in Demosthenes and Athenagoras. Note the adverb ὡσπέρ πάντων (Mt. 22:27), obviously as superlative. So in 1 Tim. 4:1, ἐν ὑστέροις καιροῖς. In Eph. 4:9, τὸ κατώτερα μέρη is likewise in the superlative sense. The Epistle of Barnabas shows similar examples. Blass\textsuperscript{8} reminds us that the Italian does not distinguish between the comparative and the superlative. The modern Greek to-day says ὁ σοφώτερος ἀπὸ ὁλους ‘the wisest of all.’\textsuperscript{9} [Page 669] Moulton\textsuperscript{1} notes the fact that, while \textit{κρείττων} and \textit{χείρων} in the N. T. are strictly comparative, they have no superlative, but he notes (p. 236) that the papyri show χείριστος, as Tb.P. 72 (ii/b/c).

XIV. The Superlative Adjective (ὑπερθετικὸν ὄνομα). For the forms see chapter VII, II, 3, (c). As already set forth, the superlative is moreness rather than twoness.

(a) The Superlative Vanishing. As already remarked, the superlative forms are vanishing in the N. T. as in the \textit{koinē} generally. Blass\textsuperscript{2} observes that ἐσχάτος and πρῶτος are the only exceptions to this disappearing tendency. Under the weakening of dualism πρῶτος goes down. Usually ἐσχάτος refers to more than two, the last of a series or last of all, like ἐν ἐσχάτῃ ἡμέρῃ (Jo. 11:24), ἐσχάτον πάντων (1 Cor. 15:8).

\textsuperscript{4} Ib., Heft i, pp. 17 ff.

\textsuperscript{6} Prol., p. 78 f.
\textsuperscript{7} W.-Th., p. 242.
\textsuperscript{8} Gr. of N. T. Gk., p. 33.
\textsuperscript{9} Jebb, V. and D.’s Handb., p. 309.
\textsuperscript{1} Prol., p. 78.
\textsuperscript{2} Gr. of N. T. Gk., p. 141 f.
\textsuperscript{3} On this word cf. Gonnet, Degrès de signif. en Grec et en Lat., 1876, p. 131.
Sometimes first and last are contrasted, like ἡ ἐσχάτη πλάνη χείρων τῆς πρώτης (Mt. 27:64). Note comparative also. Cf. Mt. 19:30. So ὁ πρῶτος καὶ ὁ ἐσχάτος about Jesus (Rev. 1:17). In the LXX ἐσχάτος occurs as comparative (cf. in Deut. 24:3), and even as an adverb meaning ‘after’ in Deut. 31:29. Cf. Thackeray, p. 184. Even more common than ἐσχάτος is πρῶτος. It is used in the usual sense often (Mk. 12:20), but is also common where only two are concerned (1 Cor. 15:45; Jo. 20:4) as already shown. Sometimes πρῶτος expresses mere rank as in Ac. 17:4. In Mt. 22:38 note ἡ μεγάλη καὶ πρώτη ἑντολή. Cf. πρώτη πάντων in Mk. 12:28 (note gender also). These are true superlatives. Sir W. M. Ramsay (Expositor, Nov., 1912) shows that πρώτη in Lu. 2:2 is not in sense of πρότερος. It is first of a series of enrolments as we now know. But this proves nothing as to Ac. 1:1. Radermacher (N. T. Gr., p. 60) quotes I Gr. XII, 5, 590, ἔφθασας ἀλάχου πρῶτος, where two are compared.

(b) A FEW TRUE SUPERLATIVES IN THE N. T. But a few other true superlatives survive in the N. T. Thus ὁ ἔλαχιστος in 1 Cor. 15:9 is a true superlative, ‘the least.’ But it is elative in Lu. 12:26. Cf. Mt. 2:6; 5:19. Moulton finds ἔλαχιστος as a true

superlative in a papyrus of second century B.C. Tb.P. 24. But there are very few true superlatives in the papyri. In Ac. 17:15 ὡς τάχιστα is a true superlative. Ἑγγιστα is a true superlative [Page 670] both when applied to God, τοῦ ἡγγιστου (Mk. 5:7), and the abode of God, ἐν τοῖς ἡγγιστοῖς (Mt. 21:9). Some MSS. (D, etc., W. H. marg.) have ἡγγιστα in Mk. 6:36, which is a true superlative. In Ac. 20:38 μᾶλιστα, 'most of all,' is probably a true superlative. In 1 Cor. 14:27 τὸ πλείστον, 'at the most,' is a true superlative. In Mt. 11:20 αἱ πλείσται δυνάμεις we probably have the true superlative. Cf. τῇ ἐγγιστῇ ὑμῶν πίστει (Ju. 20) and τῇ ἀκριβεστάτῃ αἴρεσιν (Ac. 26:5), true superlatives in –τατος. In Rev. 18:12; 21:11 τιμίωτατος is probably elative. Cf. μονόστατος, 1 Kt. 8:39. The list is indeed very small.

(c) THE ELATIVE SUPERLATIVE. In the sense of 'very' or 'exceedingly' it comprises the great majority of the superlative forms that survive in the N. T. In the papyri the immense majority of superlative forms are elative. Cf. Moulton, Cl. Rev., 1901, p. 439. Κράτιστος is elative always in the N. T. and is indeed merely a sort of title. So κράτιστε in Lu. 1:3. So ἡγιστα is only elative (2 Cor. 12:9, 15). Μέγιστος occurs only once (2 Pet. 1:4) and is elative, τὰ τίμια καὶ μέγιστα ἡμῶν ἐκαθεξελίματα (permagnus, Blass). In Lu. 12:26 ἐλάχιστον is elative as also in 1 Cor. 4:3; 6:2, while in Eph. 3:8 the comparative superlative ἐλαχιστότερος is doubtful. Πλείστος, generally elative in the papyri, is so in Mk. 4:1, ὅχλος πλείστος. Μάλιστα occurs some 12 times and is usually elative, as in Ph. 4:22.

(d) NO DOUBLE SUPERLATIVES. The scarcity of the superlative in the N. T. removes any ground for surprise that no double superlatives occur. In Eph. 3:8 ἐλαχιστοτέρῳ is indeed a superlative strengthened by the comparative. In Gal. 6:10 the superlative μᾶλιστα occurs by way of repetition with τὸ ἐγγαθόν, as in Phil.

2 Moulton, Prol., p. 78.
3 Ib., p. 236.
4 Ib., p. 79.
16 it does with ἄγαπητόν. Schwab\textsuperscript{5} gives a considerable list of double or strengthened superlatives from classic writers, like πλεῖστον ἡδίστος (Eurip., \textit{Alc.}), μέγιστον ἔχθεστος (Eurip., \textit{Med.}), μάλιστα φιλοτατος (Eurip., \textit{Hippol.}), μάλιστα δεινότατος (Thuc.), etc. Cf. Latin \textit{minimissimus} and English “most straitest sect,” “most unkindest cut of all,” etc.

(c) \textbf{FOLLOWED BY ABLATIVE.} The superlative, like the comparative, may be followed by the ablative.\textsuperscript{6} Thus with πρῶτον ὑμῶν (Jo. 15:18), πρῶτος μου (Jo. 1:15), and possibly in ἐπὶ ἐσχάτου \textbf{[Page 671]} τῶν ἠμερῶν τούτων (Heb. 1:2), though this passage may be merely the genitive.

(f) \textbf{NO “HEBRAISTIC” SUPERLATIVE.} It is gratuitous to consider ἀστεῖος τῶθεῶ (Ac. 7:20) and similar passages superlatives.

\textbf{XV. Numerals.} For the general discussion of the forms see chapter VII, III. The ordinals are indeed adjectives, as are the first four cardinals and all after two hundred. The syntactical peculiarities of the numerals are not many.

(a) Ἐἷς AND Πρῶτος. The use of Ἐἷς rather than πρῶτος is one of the most striking points to observe. Before we can agree with Blass\textsuperscript{1} that this is “undoubtedly a Hebrew idiom,” who follows Winer,\textsuperscript{2} we must at least hear what Moulton\textsuperscript{3} has to say in reply. To begin with, in modern Greek “the cardinals beyond 4 have ousted the ordinals entirely.”\textsuperscript{4} Then we learn from the inscriptions that this usage of cardinals as ordinals is as old as the Byzantine Greek.\textsuperscript{5} Moulton\textsuperscript{6} also quotes from papyri of the second and third centuries A.D. τῇ μὴ καὶ ἐκάδι, B.U. 623 (ii/iii A.D.), a construction like μὴ καὶ ἐκάδι τοῦ μηνός in Haggai 2:1.\textsuperscript{7} The Germans, like the English, can say “page forty.”\textsuperscript{8} In the N. T. we only find this substitution of the cardinal in the case of Ἐἷς, while in the modern Greek the matter has gone much further. In the classic Greek no real analogy exists, though Ἐἷς stands in enumerations when δεύτερος or ἄλλος follows, and in compound numerals a closer parallel is found, like Ἐἷς καὶ τριάκοστὸς,

\begin{flushleft}

Winer

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

\end{flushleft}
though even here the case is essentially different. 9 Cf. Latin unus et viciimus, “a case of the formation of the ordinal being imperfectly carried out.”9 Certainly then it was possible for this development to have gone on apart from the Hebrew, especially when one considers that πρώτος is not derived from εἷς, though Moulton10 admits that the Hebrew has the same peculiarity. Moulton11 further objects that if Semitic influence had been at work we should have had τῇ πέντε in the modern Greek, since the Hebrew used the later days of the month in cardinal numbers.12 Still, the striking fact remains that in the LXX (cf. Numb. 1:1) and in the N. T. the first day of the month is expressed by µία, not by πρώτη. This was obviously in harmony with the κοινή of a later time, but the first evidence of its actual use so far is in the LXX, and it is in exact imitation of the Hebrew idiom on the point. It is hard to resist the idea that the LXX at least is here influenced by the Hebrew. And, if so, then the N. T. naturally also. Later on we need not attribute the whole matter to the Hebrew influence. In the N. T. indeed we once have πρώτῃ σαββάτου (Mk. 16:9), which belongs to the disputed close of the Gospel.1 Cf., on the other hand, εἷς µίαν σαββάτων (Mt. 28:1), προφ [τῇ] µιὰ τῶν σαββάτων (Mk. 16:2), τῇ µιὰ τῶν σαββάτων (Lu. 24:1; Jo. 20:1; Ac. 20:7); κατὰ µίαν σαββάτου (1 Cor. 16:2). There is nothing peculiar in the use of ἔναυτὸν καὶ µὴνας ἕξ (Ac. 18:11). Cf. Rev. 12:14.

(b) THE SIMPLIFICATION OF THE “TEENS.” This began in the classical period as is seen in the Attic inscriptions.2 Hence from the third century B.C. on we usually find “simplified ordinals from 13th to 19th.”3 So we have τρισκαιδέκατος, τεσσαρεσκαιδέκατος, etc. So the papyri4 usually have δέκα τρεῖς, δέκα ἕξ, and even δέκα δύο rather more5 frequently than δώδεκα. Cf. τεσσαρεσκαιδεκάτη in Ac. 27:27, 33. Hence καὶ is not always inserted when the smaller number precedes and “omitted” when the larger comes first. It was never a uniform custom (Winer-Thayer, p. 250), least of all in the N. T. Cf. Gal. 3:17, etc. But three numerals may appear without καὶ, as in ἑκατὸν πεντήκοντα τριῶν (Jo. 21:11). Cf. Rev. 7:4; 14:3; 21:17. See further chapter VII, III, 2, (b).

(c) THE INCLUSIVE ORDINAL. Cf. αὐτὸς τρίτος, ‘he and two others.’ It has one illustration in the N. T., δύον Νῶε (2 Pet. 2:5), ‘Noah and seven others’ or ‘Noah an eighth.’ The idiom is classical enough, though the ancient writers usually had αὐτός also.6 Moulton7 finds one parallel in the papyri, τρίτος ὅν in P.P. iii. 28, though

THE DISTRIBUTIVES. There is no trouble over the classic use of ἀνά (Mt. 20:9) and κατά (Mk. 6:40) in this sense. We have already (chapter XIII, ἀνά and κατά) discussed ἀνά εἰς (Rev. 21:21) and καθεὶς (Ro. 12:5). The point here that calls for comment is whether δώο δώο in Mk. 6:7 is a Hebraism. Cf. ἀνά δώο δώο in Lu. 10:1. Winer¹ termed it “properly Hebraistic,” while Blass (Gr. of N. T. Gk., p. 145) more guardedly described it as “after the Semitic and more colloquial manner.” The repetition of the numeral is a Hebrew way of expressing the distributive idea. Cf. in the N. T. also συμπόσια συμπόσια (Mk. 6:39), πρασία πρασία (verse 40). Moulton² cites also δεσμάς δεσμάς, as the reading of Epiphanius for Mt. 13:30. But Winer³ had himself cited Ἄσχυλος, Persae, 981, μυρία μυρία, and Blass⁴ compares in Eris, the lost drama of Sophocles, μιᾶν μιᾶν. The Atticists had censured this as “colloquial,” but at any rate “it was not merely a creation of Jewish Greek.” Deissmann⁵ besides quotes τρία τρία from the Oxy. Papyri. W. F. Moulton⁶ had

already called attention to the fact that modern Greek shows the same usage. Hence we must conclude, with Moulton7 and Thumb,8 that the κοινή development was independent of the Hebrew. Moulton9 comments also on the reading of B in Lu. 10:1, ἀνὰ δύο δύο, and notes how in the papyri μεγάλου μεγάλου = the elative superlative μεγίστου. See also κατὰ δύο δύο in P. Oxy. 886 (iii/α.δ.).

For the proportionals the N. T. has only –πλασίων, not the classic –πλάσιος. Cf. ἐκατονταπλασίων, Mk. 10:30 and Mt. 19:29 ΝCDX; πολλαπλασίων, Lu. 18:30 and Mt. 19:29 BL. Cf. Blass-Debrunner, p. 38.

(e) The Cardinal Ἑπτά. With ἐβδομηκοντάκις Ἑπτά (Mt. 18:22) rather than Ἑπτάκις D the rendering ‘until seventy times seven’ is certainly possible in itself and follows literally the Greek words. The identical expression (ἐβδομηκοντάκις Ἑπτά) occurs in Gen. 4:24 (where the Revised Version renders it ‘seventy and seven fold’) and in Test. xii, Pat. Ben. 7:4. The margin of the Revised Version for Mt. 18:22 gives “seventy times and seven” which [Page 674] Winer1 interprets as “seventy-seven

Thumb

———, Die griech. Sprache im Zeitalter des Hellenismus (1901).

8 Hellen., p. 128.

1 W.-Th., p. 251.
times.” Moulton considers rightly that the passage in Genesis settles the usage in Matthew to which an allusion may be made. He cites a possible parallel from the Iliad, xxii, 349, δεκάκης και ἠκόησι.

(f) Substantive Not Expressed. Sometimes with numerals the substantive for money is not expressed. Thus ἄργυριον μυρίας πέντε (Ac. 19:19), but in Mt. 26:16 note ἄργυρια. The use of τρίτον τοῦτο (2 Cor. 13:1) is merely an instance of the adjective used absolutely without a substantive. Cf. the neuter τὸ δεύτερον (2 Cor. 13:2).

(g) Adverbs with Numerals. They have no effect on the construction. Thus πράθηναι ἐπάνω τριακοσίων δηναρίων (Mk. 14:5), ὡς δισχίλιοι (Mk. 5:13), ὡς πεντακισχίλιοι (Mt. 14:21), ἑκατονταετής που (Ro. 4:19). In the case of ὡς and ὡσεί we really have conjunctions. In ἕως ἐπάνω (Mt. 18:21) we have, of course, the preposition. Cf. Winer-Moulton, p. 313, for classical parallels with ἐλαττον, πλέον, ἐν, περί, ὑπέρ, μέχρι.

(h) Ἐἷς as Indefinite Article. The Greek, as a rule, had no indefinite article. The older Greek did occasionally use τις with no more apparent force than an indefinite article, but usually nothing was used for that idea in Greek. Still in Aristophanes (Av. 1292) Moulton rightly sees ἔἷς κατάκλιθος, as an example of the later κοινή idiom. Aristophanes indeed preserves much of the colloquial speech. In the modern Greek ἕνας may be used. Ἐἷς became naturally more popular than τις since it has all three genders. Moulton finds numerous papyri illustrations. The modern languages have followed the Greek model here, for the English an (Scottish an) is really one, like the German ein and the French un. It is therefore hardly necessary to fall back on the Hebrew precedent in the use of תְני, though it here coincided with the κοινή idiom. Hence N. T. usage on this point is in full accord with the development of the Greek. Cf. ἔἷς γραμματεύς (Mt. 8:19), μία παιδίσκη (26:69), μία χήρα πτωχήν (Mt. 12:42), ἕἷς ὀφελέτης (Mt. 18:24), etc. In Jo. 6:9 some MSS. have ἕν with παιδάριον, but the sense is not materially altered either way. Cf. ἥκουσα ἕν τοῦ του (Rev. 8:13), ἐδώσεν συκῆν μίαν (Mt. 21:19), etc. [Page 675] Moulton properly criticizes Meyer on Mt. 8:19 for his “exegetical subtleties” in denying this idiom for ἕἷς in the N. T.

(i) Ἐἷς=Τις. Sometimes indeed ἔἷς stands alone with practically the same sense as τις, as in Mt. 19:16; Mk. 10:17, though in the parallel passage (Lu. 18:18) τις ἄρχων

3 Cf. Green, Handb., etc., p. 276.
5 Prol., p. 97.
6 Thumb, Handb., p. 81.
9 Blass, Gr. of N. T. Gk., p. 144.
10 Prol., p. 95.
occurs. The use of εἷς with genitive (or ablative), like ἐν τῶν πολιτῶν (Lu. 15:15), ἐν μὴ τῶν ἡμερῶν (Lu. 8:22), or the ablative, like εἷς ἔμυδων (Jo. 13:21), is, of course, merely the same idiom expanded. Cf. εἷς ὑπερτῶν, Lu. 22:50; Jo. 11:49. In Mk. 14:10, ὁ εἷς τῶν δώδεκα, the article at first looks incongruous, ‘the one of the twelve,’ but the early papyri give illustrations of this usage also.2 It is as a pronoun that εἷς is to be construed here and in the rather frequent alternative expressions εἷς—εἷς (Mt. 24:40), μία—μῖα (verse 41), τῶν ἐνα—τῶν ἔτερον (Mt. 6:24), ἐνδός—τοῦ ἐπέρου (ib.), εἷς—τοῦ ἑνός (1 Cor. 4:6). Cf. εἷς καὶ εἷς (Mt. 27:38) and the reciprocal use in 1 Th. 5:11. Cf. εἷς ἔκαστος, Mt. 26:22.

(j) THE DISTRIBUTIVE USE OF Εἷς. So ἐν καθ ἐν in Rev. 4:8 and the “barbaric” (Winer-Schmiedel, p. 247) εἷς κατὰ εἷς (Mk. 14:19), τῶ καθ εἷς (Ro. 12:5), ὁνᾶ εἷς ἔκαστος (Rev. 21:21). This “barbaric” idiom came to be very common in the later Greek. Cf. modern Greek κάθε, καθένας = ἕκαστος. The free adverbial use of prepositions like ἐως, ὁνά, παρά, κατά is copiously illustrated in Winer-Schmiedel, p. 247, from the LXX and the late Greek writers. For the use of ὁδικός, οὖθεις, μηδείς, μηθείς see next chapter on Pronouns. Cf. also there οὖ—πᾶς and πᾶς—οὐ.

2 Ib.
Winer-Schmiedel WINER-SCHMIEDEL, Winer’s Grammatik des neutest. Sprachidioms. 8. Aufl. (1894—).
1 Cf. Schoemann, Die Lehre von den Redet. nach den Alten, p. 95: “Die Nomina benennen die Dinge nach ihren Qualitäten, die Pronomina bezeichnen sie nach ihren Verhältnissen.”
due to desire for emphasis. Then the separate expression of the pronoun led to the gradual sloughing off of the personal ending. In modern English this process is nearly complete. In Greek this process was arrested, though in modern Greek all verbs save ἐμα are —ω verbs. In most cases, therefore, in Greek the existence of the personal pronoun in the nominative implies some emphasis or contrast. But this is not quite true of all examples. “The emphasis of the first and second persons is not to be insisted on too much in poetry or in familiar prose. [Page 677] Notice the frequency of ἐγώ, ἐγόμαι.” In conversation it was particularly common to have the personal pronoun in the nominative. In the later Greek generally the personal pronouns show a weakening of force, but never to the actual obliteration of emphasis, not even in the modern Greek. Moulton agrees with Ebeling that there was “no necessary emphasis in the Platonic ἦν δὲ ἐγώ, ἐφην ἐγώ, ὡς σύ φής.” Clearly then the frequency of the pronoun in the N. T. is not to be attributed to the Semitic influence. Even Conybeare and Stock see that it is not necessary to appeal to the well-known Hebrew fondness for pronouns for this usage. But Blass thinks that some of the MS. variations may be due to Semitic influence. We are free therefore to approach the N. T. examples on their merits.

1. The First Person, ἐγώ and ἡμεῖς. It is easy to find in the N. T. numerous examples where ἐγώ shows contrast. So ἐγώ χρείαν ἔχω ὑπὸ σοῦ βαπτισθῆναι (Mt. 3:14), ἐγώ δὲ λέγω (5:22), ἐγώ σε ἐδόξασα (Jo. 17:4). Cf. ἐγώ and σο in Jo. 17:23. The amount of emphasis will vary very greatly according to circumstances and may sometimes vanish entirely so far as we can determine. Different shades of meaning appear also as in ὑπὲρ οὗ ἐγώ ἔπον (Jo. 1:30), ‘I, myself.’ Cf. κάγω οὐκ ἴδειν αὐτόν (Jo. 1:33) and κάγω ἐόρακα καὶ μεμαρτύρηκα (verse 34) and note absence with second verb. Cf. Jo. 6:48; 16:33; 1 Cor. 2:1, 3. Note absence of ἐγώ in Mt. 5:18, 20, λέγω ὑμῖν. Cf. also τίς ἄσθενε καὶ οὐκ ἄσθενώς; (2 Cor. 11:29) with τίς σκανδάλιζεται καὶ οὐκ ἐγώ πείραμα; (ib.) as proof that the point must not be pressed too far in either direction. Further examples of ἐγώ may be seen in Ro. 7:17; Jo. 5:31, 34; 10:30; Eph. 5:32; Ph. 4:11. For the plural ἡμεῖς see ἡμεῖς προσκυνοῦμεν (Jo. 4:22) in opposition to ἰμεῖς, but then follows merely δ οἶδαμεν. So in Ac. 4:20 note οὐ δύναμαι ἡμεῖς δ ἐίδαμεν and τί καὶ ἡμεῖς κινδυνεύομεν; (1 Cor. 15:30). Cf. Mt. 6:12. The “editorial” ‘we’ has already received discussion (cf. The Sentence) and may be merely illustrated here. Blass considersita “wide-spread tendency among Greek

10 In general the N. T. follows the classic idiom. W.-Sch., p. 194.
11 Gr. of N. T. Gk., p. 166. Cf. Moulton, Prol., p. 86 f., who leaves the matter to the exegete.
writers, when they speak of themselves to say ἡμεῖς instead [Page 678] of ἐγώ." This is not always true in Paul’s Epistles (Ro. 1:5), for sometimes he associates others with him in the address at the beginning. There are undoubted examples in the N. T. like οἱ ἐσμέν (2 Cor. 10:11), παθόμεθα (Heb. 13:18), γράφομεν (1 Jo. 1:4). But sometimes the plural merely associates the readers or hearers with the writer or speaker. So ἐφορέσαμεν (1 Cor. 15:49), ὁμοίωσομεν (Mk. 4:30). Sometimes the first person singular is used in a representative manner as one of a class (cf. the representative article like ὁ ἄγαθος). Blass¹ does not find this idiom so common in Greek as in other languages, but it occurs in Demosthenes and certainly in Paul. So τί ἐτι κἀγὼ ὥς ἄμαρτολος κρίνωμαι; (Ro. 3:7). Cf. in next verse βλασφημούμεθα. See 1 Cor. 10:30; Gal. 2:18. In Ro. 7:7–25 special difficulties occur.

2. The Second Person, σῦ and ὑμεῖς. Thus in Jo. 17:5 note the contrast in με σῦ. Cf. Jo. 1:42 σὺ Ἐλ Σίμων—σὺ κληθήσῃ, 2:10 σὺ τετήρηκας, 4:10 σὺ ἐν δήμησας, Ro. 2:3 σὺ ἐκεῖνης, Lu. 1:76 καί σὺ δέ, etc. Cf. also Mt. 27:11. Sometimes σῦ has a very emphatic position, as in σὺ τίς εἶ (Ro. 9:20; 14:4). In 1 Cor. 15:36, ἄφρων, σὺ σπείρεις, is it possible,² though not necessary, to take σῦ with ἄφρων (cf. Ac. 1:24). In καί σὺ ἔξι αὐτῶν εἶ (Lu. 22:58) one is reminded of the Latin Et tu, Brute. See Lu. 10:15; Ac. 23:3; ἡ καί σὺ τί ἐξουθενεῖς (Ro. 14:10). As examples of the plural take ἐσσεσθε ὑμεῖς (Mt. 5:48), δότε ἐπτας ὑμεῖς φαγεῖν (Mk. 6:37). See ἐκείνος and ὑμεῖς contrasted in Jo. 5:38; ὑμεῖς in verse 39 and also in 44 f. Cf. Ac. 4:7; Lu. 10:24, and in particular ὑμεῖς ὁφεισεθε (Mt. 27:24). For ὑμεῖς and ἡμεῖς contrasted see Jo. 4:22. In Jo. 4:35, οὐχ ὑμεῖς λέγετε, we have the same inclusive use of the second person that we noticed in the first. In Ro. 2:3, 17, the second person singular occurs in the same representative sense that the first has also. Cf. also Ro. 9:20; 11:17, etc. In Jo. 3:10, σὺ ἔγυ ὁ διδάσκαλος, we have a case of distributed emphasis. Cf. also Mt. 16:16; Jo. 9:34; 2 Cor. 1:23, as examples of this sustained emphasis, where the emphasis of the pronoun passes on to the remainder of the sentence and contributes point and force to the whole.³ On the whole the Greek language has freedom in the construction of the pronouns.⁴ Moulton raises⁵ the question if in σὺ εἶκας (Mt. 26:64), σὺ λέγεις (27:11), ὑμεῖς λέγετε (Lu. 22:70), we do not have the equivalent of ‘That is right,’ [Page 679] but πλὴν (Thayer) is against it in Mt. 26:64. Σῦ occurs in John more frequently than in all the Synoptics put together (Abbott, Johannine Gr., p. 297).

Abbott
3. *The Third Person*. It has had a more radical development or lack of development. As a matter of fact the Greek had and has no definite third personal pronoun for the nominative like ἐγώ and σο. No nominative was used for οὗ, of, etc., and this pronoun was originally reflexive. Besides it is not used in the N. T., though literary κοινή writers like Aristides, Arrian, Lucian, Polybius use it. Where another pronoun was desired for the third person besides that in the personal ending, various devices were used. The Attic writers usually employed a demonstrative (ὁ δὲ, ὁ μὲν, οὗτος, ἐκεῖνος, ὁς ὁ δὲ, ὁδε, etc.). The N. T. shows examples of all these constructions which will be illustrated in the discussion of the demonstrative pronouns. But the N. T. uses also αὐτός as the subject, an idiom foreign to Attic writers, but found already in Homer and common in the modern Greek, where indeed it has come to be itself a demonstrative. Simcox rightly remarks that the main point to observe is not whether it has emphasis, but its appearance at all as the mere subject. All the personal pronouns in the nominative have more or less emphasis. The use of αὐτός in contrast with other persons is natural like αὐτός καὶ οἱ μετα αὐτοῦ (Mk. 2:25). We are not here considering the intensive use of αὐτός as ‘self’ nor the use of ὁ αὐτός ‘the same.’ There is no dispute as to use of αὐτός as emphatic ‘he’ in the N. T. like the Pythogorean (Doric) αὐτός ἔφα. So Ac. 20:35 αὐτός ἔπειτα, as much as to say ‘The Master said.’ Cf. the way in which some wives refer systematically to their husbands as “He.” Other undoubted examples are αὐτός γὰρ σώσει τὸν λαόν (Mt. 1:21). Here the emphasis is so clear that the Revised Version renders: “For he it is that shall save.” In Mt. 12:50 αὐτός μου ἀδελφός is resumptive, gathering up ὁστες, and is distinctly emphatic. Cf. likewise αὐτός βαπτίσει, referring to ὁ ἐρχόμενος in Mt. 3:11; ὁ πρῶτος—καὶ αὐτός, 1 Jo. 3:24; ἐν δὲ φιλήσας αὐτός εστιν, Mk. 14:44. Strong emphasis also appears in examples like καὶ αὐτός ἔστιν πρὸ πάντων (Col. 1:17). In Mt. 8:24 ἀυτός δὲ ἐδείκνυται ἐπὶ τῶν ανάργυρων καὶ ἰησοῦ καὶ ἀυτός ἔστιν, Mk. 4:38 καὶ αὐτός Jesus is the chief person in the story and the pronoun has emphasis. Cf. likewise Mt. 1:16, 17; 24:21; Mt. 16:20. In Lu. 19:2 W. H. and Nestle follow B in reading καὶ αὐτός twice. Some emphasis is present both times. In Ac. 7:21 (Rec.) the pronoun αὐτόν appears three times. As regards καὶ αὐτή, the editors differ between this accent and καὶ αὐτή in Lu. 7:12;

Simcox

———, The Writers of the N. T.

5 Prol., p. 86.
8:42; 1 Cor. 7:12; Ro. 7:10. In Lu. 2:37; Ro. 16:2, Nestle agrees with W. H. in καὶ ἀὐτῆ. But in Lu. 2:37 ἀὐτῇ χήρα may be a ‘widow by herself.’ There is no real reason for objecting to the feminine use of this idiom. The plural ἀὑτοί appears in Mk. 7:36; Lu. 2:50; 9:36. The only remaining question is whether ἀὑτός occurs in the nominative free from any emphasis just like the personal ending in a word. It is in Luke’s Gospel and the Apocalypse that such instances occur. It is not a question whether ἀὑτός is so used in ancient Greek. Winer denies that any decisive passages have been adduced in the N. T. of such unemphatic use. Certainly the matter is one of tone and subjective impression to a large extent. And yet some examples do occur where emphasis is not easily discernible and even where emphasis would throw the sentence out of relation with the context. What emphasis exists must be very slight. Cf. Lu. 1:22; 2:50; 6:8; 8:1, 22; 15:14; 24:14, 25, 31; Rev. 14:10; 19:15. Thus we see all grades of emphasis. Abbott holds that in John ἀὑτός never means ‘he,’ either emphatic or unemphatic, but always ‘himself.’ But in Jo. 2:12 (ἀὑτός καὶ ἠμετάφραστο ἀὑτοῦ) there is little difference between the emphatic ‘he’ and ‘himself.’ Cf. also 18:1. But the intensive idea is clear in Jo. 4:2, 12. In 4:53 it might be either way. In the LXX we find ἀὑτός sometimes unemphatic. Cf. Gen. 3:15 f.; 1 Sam. 17:42; 18:16.

(b) THE OBLIQUE CASES OF THE PERSONAL PRONOUNS.

1. Originally Reflexive. In pre-Homeric times the pronominal stem was reflexive. The reflexive form, as distinct from the personal pronoun, was a later development. The personal pronouns may be reflexive in Hesiod, the Homeric Hymns, Pindar and the other Lyric poets. Indeed, the early Attic inscriptions show the same thing, not to mention the Dramatic poets and Herodotus. It was only gradually that the distinctively reflexive form came into common use in the Attic prose, first for the

1 W.-Sch., p. 195; Blass, Gr. of N. T. Gk., p. 164.
2 Simcox, Lang. of the N. T., p. 61.
4 Joh. Gr., p. 279.
6 Ib., pp. 68, 75, 80 f.
7 Ib., 2. Abt., p. 1 f.
third person, and [Page 681] then for the first and second persons. The use of the personal pronoun in the reflexive sense survived longest in the vernacular. It is not “abnormal” therefore to find in the N. T. (vernacular κοινή) the personal pronouns where a reflexive form might have been used. The N. T. does not here exactly represent Attic literary prose. Cf. ἀδράτω τὸν σταυρὸν ἀνέπτυσε (Lu. 9:23), μετὰ τὸ ἔγερθην εἰς προάξειον (Mk. 14:28; cf. Lu. 10:35), βάλε ὅποιον σοῦ (Mt. 5:29). See Ro. 15:16, 19. It is not necessary to split hairs here as to whether the reflexive idea is present. It is in perfect harmony with the Greek history. Indeed English does not differ here from the Greek.

2. ἁύτοι. The use of ἁύτοι rather than ὦ and σφῶν is noticeable. As a matter of fact, ὦ,σφῶν had long been the main pronoun for the oblique cases of the third person. In archaic and poetic forms the early use of ὦ and σφῶν survived.2 In the N. T. ἁύτοι is the only form found, as in ἁύτων, ἁύτος, ἁύτον (Mt. 17:22 f.), κτλ.

3. Genitive for Possession. The genitive of the personal pronoun is very common as a possessive rather than the possessive pronoun or the mere article. In Jo. 2:12 ἁύτοι occurs twice, but once (οἱ ὀδερποὶ) we do not have it. These examples are so common as to call for mere mention, as ὁ πατήρ μου (Jo. 5:17), τὸν κράβαττον σου (5:8), τὸν κράβαττον ἁύτοι (5:9). The presence of the personal pronoun in the genitive is not always emphatic. Thus no undue emphasis is to be put upon ἁύτοι even in its unusual position in Jo. 9:6, nor upon σου in 9:10, nor upon σου in 9:15. See chapter on The Sentence. See also ἐπάρας τοῦς διαθλήματος ἁύτοι εἰς τοὺς μαθητὰς ἁύτοι (Lu. 6:20), ἐν τῇ ὑπομονῇ ἱμᾶς κτήσασθε τὰς ψυχὰς ἱμῶν (Lu. 21:19). See also position of μου in Mt. 8:8 and Jo. 11:32. As a matter of fact the genitive of personal pronouns, as is common in the κοινὴ (Moulton, Prol., p. 40 f.), has nearly driven the possessive pronoun out. The use of the article with this genitive will be discussed in that chapter (The Article). Cf. τὸν πατήρα μου (Mt. 26:53) and φίλον μου (Jo. 15:14). Both ἱμῶν in Paul (1 Cor. 9:12) and ἁύτοι (Tit. 3:5) may be in the attributive position. The position of ἁύτοι is emphatic in Eph. 2:10 as is that of ἱμῶν in 1 Cor. 9:11 and ἡμῶν in Jo. 11:48. The attributive position of ἡμῶν (2 Cor. 4:16) and ἁύτοι with other attributes (Mt. 27:60) is not unusual.

4. Enclitic Forms. The first and second persons singular have enclitic and unenclitic forms which serve to mark distinctions of emphasis in a general way. We may be sure that when the long [Page 682] form ἐμοῦ occurs some slight emphasis is meant, as in ἱμῶν τε καὶ ἐμοῦ (Rom. 1:12). But we cannot feel sure that all emphasis is absent when the short form is used. Thus οἴκοδομήσω μου τὴν ἐκκλησίαν (Mt. 16:18), πάντα μοι παρεδόθη ὑπὸ τοῦ πατρὸς μου (11:27). With prepositions (the “true” ones) the long form is used as in ancient Greek except with πρὸς, which uniformly has με everywhere emphasis is obvious.1 Thus δεῦτε πρὸς με (Mt. 11:28), καὶ σὺ ἐργῇ πρὸς με (3:14). Some editors here and in the LXX print πρὸς μέ. But in Jo. 6:37 πρὸς ἐμέ is the true text. Cf. πρὸς ἐμέ also in P.Tb. 421 (iii/A.D.). With σοῦ the only difference is one of accent and we have to depend on the judgment of the

---

1 Ib., 2. Abt., pp. 69, 89.
1 Cf. Blass, Gr. of N. T. Gk., p. 165.
editor. It is difficult, if not impossible, to lay down any fundamental distinction on this point. On σου and σου see chapter VII, IV, 4, (a). See also ἔξομολογοῦμαι σοι (Mt. 11:25) and καθὼς δὲ σοι λέγω (16:18). Cf. ἔγινο (Jo. 17:4) and με σο (17:5). Blass (Gr. of N. T. Gk., p. 168) says that ἔξομι and σου, the emphatic forms, occur only with other genitives like αὐτοῦ καὶ ἔμου (Ro. 16:13). Simcox (Language of the N. T., p. 55) argues that the enclitic form occurs always except when there is emphasis. But the trouble is that the enclitic form seems to occur even where there is emphasis. The genitive of the third person can be used with emphasis. Cf. αὐτῶν in Lu. 24:31. See further chapter VII, V, 4.

(c) THE FREQUENCY OF THE PERSONAL PRONOUNS. It is at bottom a differentiation from the substantive, though the roots are independent of verb and substantive and antedate historical evidence. This pronoun came into play where the sense required it. Thus καὶ ἐπιθέντες τὰς χεῖρας αὐτοῖς ἀπέλυσαν (Ac. 13:3). Cf. Mk. 6:5. There is no doubt of the fact that the N. T. uses the pronoun in the oblique cases more frequently than is true of the older Greek. What is the explanation of this fact? The Hebrew pronominal suffixes at once occur to one as the explanation of the situation and Blass accepts it.4 The LXX shows a similar “lavish use of pronouns.”5 But a glance at the modern Greek reveals the same fondness for pronouns, and the papyri abundantly prove that the usage belongs to the vernacular. Thus in Lu. 6:20 note αὐτοῦ twice, ἦμεν twice in Lu. 21:19, σο in Mt. 6:17 as the reflexive twice (ʔελεψαί σου τὴν κεφαλήν καὶ τὸ πρόσωπόν σου νίψαι). It is not necessary to go as far as Moulton does and deny that there is any Semitic influence in the N. T. on this point. It was here in harmony with the current Greek. Cf. Lu. 24:50 for three examples of αὐτοῦ (–ούς). Cf. σε—ς in Jo. 1:48. For αὐτό—‘it’ see Ro. 7:20. In Lu. 1:62 αὐτό and αὐτοῦ both refer to παῖδιον.

(d) REDUNDANT. The pronoun was sometimes redundant. This was also a Hebrew idiom, but the vernacular κοινή shows similar examples. The two streams flow together as above. With participles note τῷ θέλοντι—ἀφεῖς αὐτῷ (Mt. 5:40), καταβάντος αὐτοῦ—ηκολούθησαν αὐτῷ (8:1), ἐμβάντι αὐτῷ εἰς πλοῖον ηκολούθησαν αὐτῷ (8:23). There are besides the anacolutha like ὃ νικῶν καὶ ὁ πλοῖον—δόσσω αὐτῷ (Rev. 2:26). Cf. also τὸ ποτήριον—οὐ μὴ πίω αὐτό (Jo. 18:11) which does not differ radically from the other examples.2 Cf. also the redundant personal pronoun with the relative like the Hebrew idiom with the indeclinable ρήσει, οὐ—αὐτοῦ (Mt. 3:12), ἤς—αὐτῆς (Mk 7:25), οὐς—αὐτοὺς (Ac. 15:17), οῖς—αὐτοῖς

(e) According to sense. See also chapter X, VII, VIII, IX. The personal pronouns are sometimes used freely according to the sense. In Ac. 26:24, τὰ πολλὰ σε γράμματα εἰς μανίαν περιτρέπει, the position of σε is probably a matter of euphony and a case in point. Sometimes there is no immediate reference in the context for the pronoun. The narrative is compressed and one must supply the meaning. So with αὐτοῦ (Lu. 1:17), αὐτοῖς (Mt. 8:4), αὐτῶν (12:9), αὐτῶν (Mt. 11:1), αὐτόν (Jo. 20:15), αὐτῶν (1 Pet. 3:14). But this is no peculiarity of N. T. Greek or of the koinē. It is common at all times. In Jo. 8:44, ψεύστης ἦστιν καὶ ὁ πατήρ αὐτοῦ, the αὐτοῦ refers to ψεύστης suggested by ψεύστης. In 2 Cor. 5:19 αὐτοῖς refers to κόσμον, as in Ro. 2:26 αὐτοῦ has in mind ἀκροβυστία [Page 684] suggested by ἀκροβυστία. So in Ac. 8:5 αὐτοῖς refers to πόλιν. In Mk. 5:41 αὐτῇ follows the natural gender of παιδίον rather than the grammatical. But in Jo. 6:39 αὐτῷ agrees grammatically with the abstract collective τῶν ὄ. In Lu. 6:6 we find a usage much like the original Homeric absence of the pure relative.1 We have καὶ αὐτοῦ used with ἀνθρώπος much as οὐ was. In Mt. 28:19 αὐτοῖς refers to ἔδοξα. In Mk. 6:46 αὐτοῖς points to ὄχλον.

(f) Repetition of the substantive. Sometimes the substantive is merely repeated instead of using the pronoun. Thus in Jo. 11:22 we have τὸν θεόν—ὁ θεός. This is usually due to the fact that the mere pronoun would be ambiguous as in the use of Ησσοῦς in Jo. 4:1. Sometimes it may be for the sake of emphasis as in ὁ ὑιὸς τοῦ ἀνθρώπου (Lu. 12:8) rather than ἐγὼ. Sometimes antithesis is better sustained by the repetition of the substantive. Thus with κόσμῳ—κόσμου (Jo. 9:5), ἄμαρτία—ἀμαρτίας (Ro. 5:12). But this is no peculiarity of Greek.

II. The possessive pronouns (κτητικαὶ ἀντωνυμίαι).

(a) Just the article. It is not merely the possessive relation that is here under discussion, but the possessive pronoun. Often the article alone is sufficient for that relation. Thus in ἐκτείνας τὴν χείρα (Mt. 8:3) the article alone makes the relation clear. Cf. also τὰς χείρας (Mk. 14:46), τὴν μάχαραν (14:47), τὸν αδελφὸν (2 Cor. 12:18). The common use of the genitive of the personal pronoun is not under consideration nor the real reflexive pronoun like ἐκατοῦ.

(b) Only for first and second persons. There is in the n. t. no possessive form for the third person. The other expedients mentioned above (usually the genitive αὐτοῦ, αὐτῶν) are used. The personal pronouns are substantival, while the possessive forms are adjectival. In modern Greek no adjectival possessive exists. Just the genitive occurs (Thumb, Handbook, p. 89). The possessive ἐμὸς and σῶς are disappearing in the papyri (Radermacher, N. T. Gk., p. 61). Originally the accent2 of

1 Farrar, Gk. Synt., p. 35.
Εμός was *Εμος. The forms ἰμε-τερος and ὑμε-τερος are both comparative and imply emphasis and contrast, the original meaning of the comparative.3

(c) Emphasis, When Used. When these possessive forms occur in the N. T. there is emphasis. But it is not true, as Blass4 affirms, that there is no emphasis when the genitive forms are used. See I, (b), 4. The possessives do not occur often in the N. T. For details see chapter VII, IV, 4, (d).

(d) With the Article. The possessives in the N. T. usually have the article save when predicate.1 Thus ἦ ἐμή (Jo. 5:30), τῆς ἐμῆς (Ro. 10:1), τῷ ἐμὸν (Mt. 18:20), τῷ σῶ (Mt. 7:3), etc. When the article is absent the possessive is usually predicate as in τῷ ἐμῇ πάντα σά έστιν, καὶ τά σά ἐμά (Jo. 17:10; Lu. 15:31). In μὴ ἔχων ἐμὴν δικαιοσύνην τήν ἐκ νόμου (Ph. 3:9) the possessive is attributive, a righteousness of my own, though the article comes later. In Jo. 4:34 we have ἔμον βρῶμα ἐστίν ἵνα where the attributive use also occurs. But see Mt. 20:23. One may note ὑμῶν in predicate (1 Cor. 3:21).

(e) Possessive and Genitive Together. Paul’s free use of the possessive and genitive together as attributives is well illustrated by τῷ ἐμὸν πνεῦμα καὶ τῷ ὑμῶν (1 Cor. 16:18). In 1 Cor. 16:17 the MSS. vary between τῷ ὑμῶν υπερήμα καὶ τῷ ὑμέτερον (BCD) ὑπερ. So in 1 Jo. 2:2 we have both περὶ τῶν ἀμαρτίων ἡμῶν and also περὶ τῶν ἡμετέρων. Indeed the genitive may be in apposition with the genitive idea in the possessive pronoun. Thus τῇ ἐμῇ χειρί Παύλου (1 Cor. 16:21). Cf. 2 Th. 3:17; Col. 4:18; Jo. 14:24.

(f) Objective Use. The possessive pronoun may be objective just like the genitive. This is in full accord with the ancient idiom. So τὴν ἐμὴν ἀνάμνησιν (Lu. 22:19; 1 Cor. 11:24), τὴν ἡμετέραν καίχησιν (15:31), τῷ ἡμετέρῳ ἐλέει (Ro. 11:31), τὴν ἡμετέραν διδασκαλίαν (15:4). Cf. τῆς ὑμῶν παρακλήσεως (2 Cor. 1:6).

(g) Instead of Reflexive. The possessive, like the personal pronoun, occurs where a reflexive might have been used. Thus τῷ σῶ with κατανοεῖν in Mt. 7:3, ἄκοιος τά ἐμά τέκνα (3 Jo. 4), ἔγραψα τῇ ἐμῇ χειρί (Phil. 19). The pronoun ἵνα is possessive, but is best treated as a reflexive.

III. The Intensive and Identical Pronoun (σύντονον ἄντονυμία). The use of αὐτός was originally “purely anaphoric.”2 As the third personal pronoun it was, of course, anaphoric. The intensive use is more emphatic.

(a) The Nominaive Use of Αὐτός. As already remarked, it is not always clear whether we have the emphatic ‘he’ or the intensive ‘self’ with αὐτός in the nominative. Cf. αὐτός καὶ ἦ μὴτρη [Page 686] αὐτοῦ (Jo. 2:12). The intensive αὐτός

3 Seymour, The Hom. Dial., p. 60.
4 Gr. of N. T. Gk., p. 168. Brugmann (Vergl. Gr., ii. 283) derives the poss. from the gen., while Delbrück (V, i. 213) obtains the gen. from the poss. Who can tell?
1 Simcox, Lang., etc., p. 54.
appears in all persons, genders and numbers. Thus αὐτός ἐγώ (Ro. 7:25; cf. ἐγώ ἀυτός, Ac. 10:26), αὐτοὶ ἄκτισκομεν (Jo. 4:42), δύνασαι—αὐτός (Lu. 6:42), αὐτοὶ ἤμεξι (1 Th. 4:9; cf. Ac. 18:15), αὐτός ὁ Ἰωάνης (Mt. 3:4), αὐτοὶ προφητεύει (Ac. 15:32), αὐτό τὸ βιβλίον (Heb. 9:19), αὐτὰ τὰ ἐξουσίαν (9:23), αὐτὰ τὰ ἔργα (Jo. 5:36). The article is not always used. Cf. αὐτός Δαυείδ (Lu. 20:42), αὐτή Σάρρα (Heb. 11:11), αὐτοὶ προφητεύται (Ac. 15:32). Cf. ἐγώ δὲ αὐτός, P.Oxy. 294 (A.D. 22). In 2 Cor. 10:1 note αὐτός ἐγώ Παύλος. There is nothing particularly essential in the order whether αὐτός ἐγώ or ἐγώ αὐτός (see above). Ἐγώ ἐστι is not in the N. T. 

(b) VARYING DEGREES OF EMPHASIS. For a list of the various shades of meaning possible with αὐτός see Thompson, Syntax of Attic Greek, p. 59 ff. In Ro. 15:14 αὐτός occurs with the first person and αὐτοὶ with the second in sharp contrast. In Shakespeare we have “myself” as subject: “Myself have letters” (Julius Cæsar, iv. 3). Cf. Latin ipse. In Jo. 2:24, αὐτός δὲ Ἰησοῦς, we have Jesus himself in distinction from those who believed on him. In 1 Cor. 11:14 ἡ φύσις αὐτή is ‘nature of itself.’ Note αὐτοὶ οὐδάτε (1 Th. 3:3), ‘ye for yourselves.’ In Ac. 18:15, ὅψεσθε αὐτοί, we find ‘ye by yourselves.’ Each instance will vary slightly owing to the context. Cf. αὐτοί (Ac. 16:37); αὐτός μόνος (Mk. 6:47). On αὐτός μὲν οὖν see Ac. 13:4. See ἄφ. ἐκαύτων (Lu. 12:57), not αὐτοὶ.

(c) Αὐτός WITH ΟὝΤΟΣ. In Ac. 24:15, 20, the classical idiom αὐτοὶ οὕτοι occurs. Cf. εἰς αὐτὸ τοῦτο (Ro. 9:17), πεποιθόν ἄριστο τοῦτο (Ph. 1:6), αὐτό τοῦτο (2 Pet. 1:5, accusative of gen. reference). Cf. 2 Cor. 7:11. The other order is found in ἔγραψα τοῦτο αὐτό (2 Cor. 2:3).

(d) Αὐτός ALMOST DEMONSTRATIVE. In Luke αὐτός ὁ is sometimes almost a pure demonstrative as it comes to be in later Greek. The sense of ‘very’ or ‘self’ is strengthened to ‘that very.’ Thus αὐτή τῇ ὁρᾷ (Lu. 2:38), ἐν αὐτῷ τῷ καιρῷ (13:1), ἐν αὐτῇ τῇ ἡμέρᾳ (23:12). The modern Greek freely employs this demonstrative sense. Cf. Thumb, p. 90. Moulton (Prol., p. 91) finds this demonstrative use of αὐτός ὁ in the papyri. So αὐτόν τὸν Ἀντάν, O.P. 745 (i/a.d.). Moulton thinks that αὐτός is demonstrative also in Mt. 3:4. See VI, (h), for further discussion.

(e) IN THE OBLIQUE CASES. It is not so common as the nominative. So αὐτοῖς τοῖς κλήτοις (1 Cor. 1:24). Cf. καὶ αὐτοῖς in Ac. 15:27 (cf. 15:32). But examples occur even in the first and second persons. Thus ἐμοῦ αὐτοῖ (Ro. 16:2), σοῦ αὐτῆς (Lu. 2:35), αὐτοῖς ἡμᾶς (2 Th. 1:4), εξ ὑμῶν αὐτῶν (Ac. 20:30, probable text). Here the use is intensive, not reflexive. The same thing is possible with ὑμῶν αὐτῶν in 1 Cor. 7:35 (cf. 11:13). But I think this reflexive. This intensive use of αὐτός with ἐμοῦ and σοῦ is found in Attic. In αὐτῶν ἡμῶν and ὑμῶν only the context can decide which is intensive and which reflexive. Cf. Thompson, A Syntax of Attic Greek, p. 64. Cf. ἐξ αὐτῶν τῶν νεκροτάφων, ‘from the grave-diggers themselves,’ P. Grenf. ii, 73 (iii/a.d.).

I Farrar, Gk. Synt., p. 35.
(f) Αὐτός SIDE BY SIDE WITH THE REFLEXIVE. So αὐτὸς ἐαυτῷ (Eph. 5:27), αὐτοὶ ἐν ἑαυτοῖς (Rom. 8:23). Cf. 2 Cor. 1:9; 10:12. The distinctively reflexive pronouns are, of course, compounded of the personal pronouns and αὐτός. They will be treated directly. The N.T. does not have αὐτότατος (cf. Latin ipsissimus). Some N.T. compounds of αὐτός are αὐτάρκης (Ph. 4:11), αὐτοκατάκριτος (Tit. 3:11), αὐτόματος (Mark 4:28), αὐτόπτης (Luke 1:2).

(g) ὁ Αὐτός. The use of ὁ αὐτός for identity (‘the same,’ ‘the very’) is close kin to the original ‘self’ idea. Cf. ipse and idem. The idiom is frequent in the N.T. Thus ὁ αὐτός κύριος (Rom. 10:12), ἢ αὐτή σάρξ (1 Cor. 15:39), τὰς αὐτάς θυσίας (Heb. 10:11), and with substantive understood τὸ αὐτό (Mt. 5:47), τῶν αὐτῶν (Heb. 2:14), τὰ αὐτὰ (Luke 6:23). In 1 Cor. 11:5 we have the associative instrumental case with it, τὸ αὐτό τῇ ἐξουσίαν. But in 1 Pet. 5:9 we actually have the genitive (‘the same sort of’), τὰ αὐτὰ τῶν παθημάτων.

IV. The Reflexive Pronoun (Ἄντανακλαστική Ἄντωνυμία).

(a) DISTINCTIVE USE. As already explained in this chapter under Personal Pronouns, the origins of the personal pronouns in oblique cases were also reflexive.1 Only gradually the distinction between personal and reflexive arose. But even so the personal pronouns continued to be used as reflexive. Hence I cannot agree with Blass2 that ἐμαυτοῦ, σαυτοῦ, ἐαυτοῦ “have in the N.T. been to some extent displaced by the simple personal pronoun.” It is rather a survival of the original (particularly colloquial) usage. Thus we have in Mt. 6:19 f. θησαυρίζετε ὑμᾶς θησαυρούς, 5:29 f. and 18:8 f. βάλε ἅπα σοῦ, 6:2 μὴ σαλπίζεις ἐμπροσθόν σου, 11:29 ἀπαίτε τὸν θρόνον μου ἐφ’ ὑμᾶς, 17:27 δὸς ἄντι ἐμοῦ καὶ σοῦ, 18:15 ἐλεγξὼν . . . μετοξύσε σοῦ καὶ σύντοι. Matthew has rather more of these survivals. But see ἀφίδεω τὰ περὶ ἐμὲ (Ph. 2:23), τὸ κατ’ ἐμὲ πρόθυμος (Rom. 1:15). For this idiom in Attic see Thompson, Syntax [Page 688] of Attic Greek, p. 64. This is not indeed the classic Attic idiom, but the vernacular Attic (as in the κοινή) is not so free from it. In particular the third person presents peculiar problems, since the ancient MSS. had no accents or breathings. The abbreviated reflexive αὐτῷ and αὐτῶ would look just alike. It is a matter with the editors. See chapter VI, IV, (f), for details. Thus W. H. give ὁρᾶτο τὸν σταυρὸν αὐτοῦ (Luke 9:23), but ὁκε ἐπίστευον αὐτὸν ἐαυτοῦ (Joh. 2:24). In Luke 9:24 we have τὴν ψυχὴν αὐτῶν, but in 14:26 τὴν ψυχὴν ἐαυτοῦ. In the last passage ἐαυτοῦ occurs with πατέρα and ψυχὴν, but not with the other words. Cf. αὐτῷ, Ac. 4:32. In the light of the history of the personal pronouns the point is not very material, since αὐτοῦ can be reflexive also. The Attic Greek used to have δοκῶ μοι. But Luke in Ac. 26:9 has ἔδοξα ἐμαυτῷ as Paul in 1 Cor. 4:4 says ἐμαυτῷ σύνοιδα. Old English likewise used the personal pronouns as reflexive. Thus “I will lay me down and sleep,” “He sat him down at a pillar’s base,” etc. Cf. Ac. 19:21, μὲ twice. See also chapter VII, IV, 4, (c).

(b) THE ABSENCE OF THE REFLEXIVE FROM THE NOMINATIVE. It is impossible to have a reflexive in the nominative. The intensive pronoun does occur as αὐτός ἐγώ (2

---

2 Blass, Gr. of N. T. Gk., p. 166 f.
1 Farrar, Gk. Synt., p. 33.
Cor. 10:1). The English likewise, as already shown, early lost the old idiom of "myself," "himself" as mere nominatives.\(^2\) Cf. ἄφετο, Jo. 11:51, where ὁτός could have been employed.

(c) THE INDIRECT REFLEXIVE. It is less common in the N. T. It does indeed occur, as in the ancient Greek. So ἔλεγον τάνας ἄνθρωπος εἶναι ὑς καὶ ἐμαυτόν (1 Cor. 7:7), συνείδησιν δὲ λέγον ὁυὶ τὴν ἑαυτοῦ ὅλλα τὴν τοῦ ἔτερου (10:29). But on, the other hand, note ἄγω ἐν τῷ ἐπανέρχεσθαι με ἄποδόσω σοι (Lu. 10:35), παρακλῆ— συναγωνίσασθαί μοι (Ro. 15:30). Cf. 2 Cor. 2:13. This on the whole is far commoner and it is not surprising since the personal pronoun occurs in the direct reflexive sense. Cf. ἣν ἐκούσατέ μου (Ac. 1:4). In Thucydides the reflexive form is generally used for the indirect reflexive idea.\(^3\)

(d) IN THE SINGULAR. Here the three persons kept their separate forms very well. Hence we find regularly ἑαυτόν (Jo. 14:21), σεαυτῷ (Ac. 16:28), ἑαυτῷ (Lu. 18:4). Indeed ἑαυτόν never stands for ἐμαυτό.\(^4\) For σεαυτῷ or σεαυτόν some MSS. read ἑαυτῷ in Mk. 12:31; Jo. 18:34; Gal. 5:14; Ro. 13:9. In 1 Cor. 10:29 ἑαυτῷ='one’s own’ (Moulton, Cl. Rev., 1901, p. 441; Prol., p. 87). There was some tendency towards this usage in the ancient Greek,\(^1\) though the explanation is not perfectly clear.\(^2\) But the usage is clearly found in the Atticists, Dio Chrys., Lucian and Philost. II.\(^3\) In Rev. 18:24 ἐν αὐτῇ is a sudden change from ἐν σοί of the preceding verses, but is hardly to be printed αὐτῇ, for it is not strictly reflexive. The same\(^4\) use of αὐτή is rather than σε appears in Mt. 23:37 and parallel Lu. 13:34. Cf. also Lu. 1:45. But Moulton (Cl. Rev., Dec., 1901, p. 441, April, 1904, p. 154) finds in the papyri several examples of this “uneducated use of ἑαυτό” for first and second persons singular, συγχωρὲτα αὐτήν ἑαυτῷ τελευτήν, B.U. 86 (Iü/A.D.). Radermacher (N. T. Gr., p. 61) cites ἐπέγραψα ἑαυτῶ (Petersen-Luschan, Reisen etc., p. 26, n. 32). Thucydides has a few possible examples and certainly the Latin is is in point (Draeger, Historische Synt. d. Lat. Spr., p. 84). In early Greek Delbrück finds the

Delbrück

DELBRÜCK, B., Ablativ Localis Instrumentalis (1867).

———, Syntaktische Forschungen. 5 Bde. (1871–1888).
reflexive referring indifferently to either person. The recurrence is not surprising. In the modern Greek the singular ἐαυτός occurs constantly for first and second persons and even τοῦ ἐαυτοῦ μου, τοῦ ἐαυτοῦ σου for emphasis. Cf. “myself,” “thyself,” “herself” and vulgar “hisself.” See Simcox, Language of the N. T., p. 63. In translation from Semitic originals we sometimes find ψυχήν rather than ἐαυτόν as in Lu. 9:24 (cf. Mk. 8:36). Cf. Moulton, Prol., p. 87; Robinson, Study of the Gospels, p. 114. The form αὐτόν (Jo. 2:24), αὐτῷ (Lu. 12:21) is preserved in some 20 passages by W. H. and Nestle.

(e) In the plural. Here the matter is not in any doubt. It is rather too much to say with Simcox that ἐαυτῶν is the only form for the reflexive plural. This is indeed true for the first and third persons as ἄνεθεματίσαμεν ἐαυτοῖς (Ac. 23:14). In 2 Th. 1:4 αὐτῶν ἡμᾶς is intensive, as already shown (chapter VII). In the third person also only ἐαυτῶν occurs as in Mt. 18:31. In the second person plural a few examples of the reflexive ὑμῶν αὐτῶν apparently survive, as in Ac. 20:30; 1 Cor. 5:13 and probably so in 1 Cor. 7:35; ὑμῖν αὐτοῖς in 1 Cor. 11:13. But the common idiom for the second person plural is undoubtedly ἐαυτῶν, as προσέχετε ἐαυτοῖς (Lu. 17:3). Cf. Mt. 25:9; Ro. 6:13; 1 Jo. 5:21, etc. There are some seventy examples of ἐαυτῶν for first and second persons plural in the N. T. (Moulton, Prol., p. 87), as is the custom in the papyri, chiefly in illiterate documents. Cf. Ἰνα γεινόμεθα πρὸς τοῖς καθ ἐαυτοῖς, Tb. P. 6 (ii/b.C.); Ἰνα κοιμισώμεθα τὸ ἐαυτῶν, Tb. P. 47. The LXX (Conybeare and Stock, Sel., p. 30) has this use of ἐαυτῶν for first and second persons plural. We even find reflexive and personal together like ὑμῖν ἐαυτοῖς (Ex. 20:23).

(f) Article with. The reflexive is used with or without the article and in any position with the article. But curiously enough σεαυτοῦ is never so found and ἔμαυτοῦ only once in sharp contrast, μὴ ζητῶν τὸ ἔμαυτοῦ σύμφορον ἄλλα τὸ τῶν πολλῶν (1 Cor. 10:33). Instead of this reflexive genitive (possessive) we have the genitive of the personal pronoun. Cf. τιμῶ τὸν πατέρα μου (Jo. 8:49), ἄφες τὸ δώμαν σου (Mt. 5:24). The examples of ἔμαυτοῦ are, of course, abundant as in τὴν ἐαυτοῦ αὐλήν (Lu. 11:21), the common idiom in the older Greek. But note also the order τὸ ἔργον ἐαυτοῦ (Gal. 6:4), ἐαυτοῦ τοὺς πόδας (Ac. 21:11), δούλους ἐαυτοῦ (Lu. 19:13), κῆπον ἐαυτοῦ (Lu. 13:19). These are all attributive, but the sense is not quite the same in the two last. The use of αὐτοῦ in such examples has already been noted as in Mt. 16:24. Sometimes the MSS. vary between ἔμαυτον and αὐτοῦ as in Lu. 4:24. The plural ἔμαυτῶν is likewise found thus, τοὺς ἐμαυτῶν νεκροῖς (Mt. 8:22), τῷ κυρίῳ ἐμαυτῶν (Mt. 18:31), ἐμαυτῶν τῷ ιμάτια (Mt. 21:8). See further chapter XVI, The Article.

(g) Reflexive in the reciprocal sense. This use of ἐαυτῶν does not really differ in idea from ἄλληλων. This is in harmony with the ancient Greek idiom. The papyri show this same blending of ἐαυτῶν with ἄλληλων. Cf. P. P. 8 (ii/b.C.) three times, O. P. 260 (i/a.D.), C. P. R. 11 (ii/a.D.) twice. Thus we may note ὅτι κρίματα ἔχετε μεθ ἐαυτῶν (1 Cor. 6:7), λαλοῦντες ἐαυτοῖς (Eph. 5:19), νοοῦσαν ὑμᾶς ἐαυτοῖς (Col. 3:16), etc. Sometimes it occurs side by side with ἄλληλων as if by way of variety, as in ἄνεθεματικα ἄλληλων καὶ χαριζόμενοι ἐαυτοῖς (Col. 3:13). Cf. also

1 Moulton, Prol., p. 87.
ἀλλήλων and αὐτοῖς in Lu. 23:12. In Ph. 2:3 ἀλλήλους ἤγομενοι ὑπερέχοντας ἑαυτῶν each word retains its own idea.

(h) Reflexive with Middle Voice. Sometimes indeed the reflexive occurs with the middle voice where it is really superfluous, as in διεμερίσαντο ἑαυτοῖς (Jo. 19:24, LXX), where Mt. 27:35 (free paraphrase of LXX) has only διεμερίσαντο. So also σεαυτὸν παρεχόμενος (Tit. 2:7). But usually such examples occur where the force of the middle is practically lost, as in ἥγημα ἑμαυτόν (Ac. 26:2), ἀρνησάθω ἑαυτόν (Lu. 9:23). On the use of the reflexive in Anglo-Saxon see Penny, A History of the Reflexive Pronoun in the English Language, p. 8. Cf. "me myself," "you yourselves." Cf. Thackeray, p. 191. See further chapter XVII, Voice.

(i) The Use of ἴδιος. This adjective is frequent in the N. T. It is usually treated as a possessive, opposed τοις κοινοῖς or δημόσιοις. In the N. T. we find it, especially (17 times) in κατά ἴδιαν (cf. Lu. 9:10), in the sense of 'private.' So this sense occurs also in Ac. 4:32 and Heb. 7:27. Cf. ἴδιώται in Ac. 4:13 (1 Cor. 14:16). Sometimes also the word implies what is peculiar to one, his particularity or idiosyncrasy, as in 1 Cor. 3:8, 7:7 (cf. the classic idiom). Cf. our "idiot." But in general ὁ ἴδιος or ἴδιος without the article (cf. ἑαυτοῦ) means simply 'one's own,' a strong possessive, a real reflexive. To all intents and purposes it is interchangeable in sense with ἑαυτοῦ. The examples of this reflexive idea are many. Thus in Mt. 9:1; Lu. 6:41; 10:34; Jo. 1:41; 4:44, etc. The use of ὁ ἴδιος for 'one's own people' (cf. also αἰκένου, 1 Tim. 5:8, classic idiom) is not strange. Cf. Jo. 1:11; 13:1, etc. Moulton finds the singular in the papyri as a term of endearment. The use of τῶν ἴδιων for 'one's home' (Jo. 1:11; 19:27; Ac. 21:6) is seen also in the papyri. Moulton (Cl. Rev., 1901, p. 440) cites τῶν ἴδιων, B.U. 86 (ii/iii A.D.), 183 (ii/iii A.D.), 168 (ii/iii A.D.) bis, etc. The papyri also illustrate Jo. 1:11, ὁ ἴδιος, for 'one's relations.' So πρὸς τοὺς ἴδιους, B. U. 341 (ii/iii A.D.). Examples without the article are δεσπόταις ἴδιοις (Tit. 2:9), καιροῖς ἴδιοῖς (1 Tim. 6:15). Cf. ὁ ἴδιος λόγος, B. U. 16 (ii/iii A.D.). Moulton Cl. Rev., 1901, p. 440. In Jo. 1:41 Moulton rightly agrees with Westcott in seeing in τῶν ἴδιων an implication that some one else went after his brother also. The only other point that here calls for remark is the question whether ὁ ἴδιος is used in an "exhausted" or unemphatic sense. Blass finds it so in εἰς τῶν ἴδιων ἀγρόν (Mt. 22:5). Meisterhans (p. 235) finds a few examples in the Attic inscriptions and Deissmann finds the weakened use of ἴδιος in the literary κοινή. Deissmann argues further that this exhausted sense may be assumed in the N. T. because some examples in the LXX (Job 24:12; Prov. 27:15), etc., seem to occur.

V. The Reciprocal Pronoun (ἡ ἰμοιβαία ἄντονυμία). The use of the reflexive in the reciprocal sense has just been discussed (cf. personal pronouns as reflexive).

From one point of view it might seem hardly necessary to give a separate discussion of reciprocal pronouns. But, after all, the idea is not exactly that of the mere reflexive. ἄλληλον is, of course, reduplicated from ἄλλος, one of the alternative pronouns. Cf. the Latin alterius and alter alteri. The Latin idiom is common in the classic Greek and is found in Ac. 2:12, ὁ ἄλλος πρὸς ἄλλον λέγοντες; 19:32, ἄλλοι τι ἐκραύγασαν; 21:34, ἄλλοι τι ἐπεφώνουν. Cf. in the papyri ὁ ἄλλο ἔγω, ἄλλο πάντες, B.U. 1079 (A.D. 41). But the true reciprocal ἄλληλον has no nominative and is necessarily plural or dual (in older Greek). It occurs 100 times in the N. T. (W. H.) and is fairly well distributed. We have examples of the genitive (Ro. 15:5 ἄλληλων μελησάτο), the ablative (Col. 3:13 ἄνευχομαι ἄλληλον), the accusative (2 Cor. 16:20 ἀσπάσασθε ἄλληλους), 1 Jo. 4:7 θαυμάσατε ἄλληλους), the locative (Ro. 15:5 ἐν ἄλληλοις), the dative (Gal. 5:13 δουλεύετε ἄλληλους). The prepositions are used 48 times with ἄλληλον. This pronoun brings out the mutual relations involved. In 1 Th. 5:11, παρακαλεῖτε ἄλληλος καὶ οἰκοδομεῖτε εἰς τὸν ἔνα, note the distributive explaining the reciprocal.

Moulton (ProL., p. 246) compares the modern Greek ὁ ἔνας τὸν ἄλλον. In Ph. 2:3 note both ἄλληλος and ἐκατοντῶν. In 1 Th. 5:15 we have εἰς ἄλληλος καὶ εἰς πάντας. [Page 693] In 2 Th. 1:3 note ἔνδεικνύστατο et εἰς ἄλληλος. The N. T. does not, like the LXX (Ex. 10:23), use ἄδελφος as a reciprocal pronoun. The middle voice is also used in a reciprocal sense as in συνεβουλεύσατο (Mt. 26:4). Cf. chapter XVII, Voice.

VI. Demonstrative Pronouns (ἐξαιτικαὶ ἄντονυμίαι).

(a) Nature. Curiously enough the demonstrative pronoun, like all pronouns, has given the grammarians a deal of trouble to define. For a discussion of the various theories during the ages see Riemann and Goelzer. Originally all pronouns were...
“deictic,” “pointing.” The “anaphoric” use came gradually. Indeed the same pronoun often continued to be now deictic, now anaphoric, as ὁς, for instance, originally demonstrative, but later usually relative. Indeed the anaphoric use blends with the relative. Monro marks out three uses of pronouns, not three kinds of pronouns. The “deictic” “marks an object by its position in respect to the speaker.” Thus ἐγώ, σύ, ὁδε, οὗτος, ἐκεῖνος all fall under this head. The “anaphoric” pronoun “is one that denotes an object already mentioned or otherwise known.” Thus the resumptive use of ὁδε, οὗτος, ἐκεῖνος, ὁς, ὁστις, ὁς, ὁσος, etc. As a matter of fact, for practical purposes the two Greek terms “deictic” and “anaphoric” may be placed beside the Latin “demonstrative” and “relative.” See further chapter VII, IV, 4, (e).

(b) DIFFERENT SHADES OF MEANING. The demonstrative pronouns do not indeed always have the same shade of meaning. They may point out, as far or near (ὁδε, οὗτος, ἐκεῖνος), as in apposition (ἐκεῖνος), as well known (ἐκεῖνος), as already mentioned (resumptive οὗτος, ὁδε). These uses belong to the various demonstratives and will come out in the context. I do not care to press the parallel with the personal pronouns (first, second, third person demonstratives) as applied to ὁδε, οὗτος, ἐκεῖνος. The pronouns had best be treated separately, not according to the special uses.

(c) ὁ, ἡ, τὸ. This was the simplest demonstrative. The grammarians call this word ἄρθρον πρωτακτικόν as distinct from ὁς which is ἄρθρον ὑποτακτικόν. As a matter of fact ὁ, ἡ, τὸ is the same word as the Sanskrit sā (sás), sā, tā. The Lithuanian nominative singular [Page 694] was tā-s, tā, and the Greek nominative plural oī, αἱ came “instead of τοί, ταί” (Brugmann, Comp. Gr., vol. III, p. 327). This form, like der in German and this in English, was used either as demonstrative, article

or relative. See Kühner-Gerth, I, p. 575. One is not to trace actual historical connection between ὁ and der (cf. Brugmann, Griech. Gr., p. 559). Its old use was a sort of personal demonstrative (cf. σὺ δὲ in Lu. 1:76).\(^1\) Cf. also σὺ δὲ τι and ἦ καὶ σὺ τι (Ro. 14:10) and σὺ τίς (14:4). Cf. Brugmann, Griech. Gr., p. 428. This substantival use is the main one in Homer.\(^2\) Indeed, as a demonstrative it means rather contrast than far or near like ὁδὲς, οὕτος, ἐκεῖνος, but after all ὁδὲ is nothing but ὁ with the ending –δε. The demonstrative use of ὁ is seen in τοῦς ὅσοι in Agathias\(^3\) and τῶν ὅσα in Maximus of Tyre.\(^4\) This demonstrative as antecedent to the relative (τοῦς οἱ) appears in Justin Martyr\(^5\) and Tatian’s Oration to the Greeks.\(^6\) Plato shows a good many examples\(^7\) (like τὸν ὅς, τὸν ὅσος). We meet in Xenophon and Demosthenes\(^8\) καὶ τὸν as demonstrative, especially τὸν καὶ τὸν, τὸ καὶ τό, τῷ καὶ τῷ. The modern Greek uses τοῦ, τῆς, τῶν, etc., as short forms of αὐτοῦ, etc., and Jebb\(^9\) pertinently asks if this is not “a return to the earliest use of ὁ, ἦ, τό as a pronoun.” The demonstrative ὁ is frequent in the comic writers. Cf. Fuller, De Articuli in Antiquis Graecis Comoedis Usu, p. 9. Völker (Syntax, p. 5) gives papyri illustrations of demonstrative ὁ, ὁ δὲ, τοῦ δὲ, πρὸς τοῦ, πρὸ τοῦ, τῷ μὲν, τῷ δὲ etc.).\(^10\) The oblique cases have only two examples in the N. T., one a quotation from Aratus, τοῦ καὶ (Ac. 17:28), the other τοῦς μὲν, τοῦς δὲ (Eph. 4:11), where contrast exists. It is possible indeed that τὸν in Ph. 1:11 is demonstrative. Cf. also τὸν ἄρχῃς in 1 Jo. 2:13 and τῆς in 1 Cor. 10:29. In Mt. 14:2 (Mk. 6:14) αὐτὸς is nearly equivalent to ‘these.’ In Mk. 12:5 the correct text is oὐκ ὅσον, etc. But in the nominative the examples of this

10 Cf. Moulton, Prol., p. 81.
demonstrative in the N. T. are quite numerous. There are three uses of the nominative in the N. T. (1) One is the demonstrative pure and simple without any expressed contrast. So οἱ δὲ ἑράπτον (Mt. 26:67), οἱ δὲ ἐδίστασαν (Mt. 28:17). In Mt. 26:57 οἱ δὲ κρατήσαντες we may have [Page 695] this usage or merely the article. In Acts we often have οἱ μὲν οὖν in this sense, usually with the participle (Ac. 1:6; 8:4, 25). But even in these examples there is apparently an implied contrast. In Mt. 16:14 and Lu. 9:19 the use of οἱ δὲ (3, below) refers to those already mentioned in an oblique case. (2) The use of ὁ μὲν, ὁ δὲ, etc. This is no longer very frequent in the N. T.¹ So ὁ μὲν οὖτως, ὁ δὲ οὖτως (1 Cor. 7:7); οἱ μὲν, ὁ δὲ (Heb. 7:20, 23); οἱ μὲν, οἱ δὲ (Ac. 14:4); οἱ μὲν, ἄλλοι δὲ, ἔτερον δὲ (Mt. 16:14 f.). In Mt. 13:23 we most likely have ὁ μὲν, ὁ δὲ not ὁ μὲν, ὁ δὲ. Cf. ὁ μὲν (Lu. 8:5). In Ac. 17:18 note τνες, οἱ δὲ, and in Ro. 14:2 ὁς μὲν, ὁ δὲ. (3) The most common use of the demonstrative is where ὁ δὲ, ἦ δὲ, οἱ δὲ refer to persons already mentioned in an oblique case. Thus in Mt. 2:5 οἱ δὲ refers to παρ᾽ αὐτῶν. So in οἱ δὲ (Lu. 23:21) the reference is to αὐτοῖς, while ὁ δὲ in the next verse points to αὐτόν. In Mk. 14:61 ὁ δὲ refers to Ἰησοῦν, as in Ac. 12:15, ἦ δὲ to αὐτήν. In Lu. 22:70 ὁ δὲ has no antecedent expressed, but it is implied in the εἰςαν πάντες before.

(d) Ὁς. The grammarians call it ἄρθρον ὑποτακτικόν or relative.² It did come to be chiefly relative, as already the Sanskrit yāś, yāḍ, yāḍ has lost its original demonstrative force.³ But in the Lithuanian j-i-s Brugmann (Comp. Gr., III, p. 332) finds proof that the pro-ethnic i-o was demonstrative as well as relative. Cf. also ṝ-va in Homer=both ‘there’ and ‘where’ and then ‘that.’ In Homer Ὁς, like Ὁς (dealloc), is now demonstrative, now relative, and was originally demonstrative.⁴ This original demonstrative sense continues in Attic prose, as in the Platonic ἦ ὁ Ὁς; καὶ Ὁς; ὅν μὲν, ὅν δὲ, etc.⁵ However, it is not certain that the demonstrative use of Ὁς (καὶ Ὁς, ἦ ὁ Ὁς) is the same word as the relative. Brugmann⁶ indeed finds it from an original root, *so-s like Sanskrit śa-s. The examples of this demonstrative in the nominative are few in the N. T. Thus note in Jo. 5:11 (correct text) ὁς ὁ δὲ ἔπεκρίθη, and also ὁς ὁ δὲ οὖκ ἔλαβεν in Mk. 15:23. Indeed ὁς ὡς in Mt. 13:23 is close to the same idea. But this verse furnishes a good example of this demonstrative in contrast, ὁ μὲν ἐκατόν ὁ δὲ ἐξήκοντα ὁ δὲ τρίακοντα. This example happens to be in the accusative case (cf. Ro. 9:21), but the nominative appears also as in ὁ δὲ ἔπεσεν (Mt. 13:4), ὁς μὲν εἰς ὅν ἱδιον ἔγρον, ὁς δὲ ἐπὶ τὴν ἐμπορίαν (Mt. 22:5), ὁς μὲν πιστεύει (Ro. 14:2), ὁς μὲν γὰρ κρίνει—ὅς δὲ κρίνει (14:5). So 1 Cor. 11:21. [Page 696] Instances of other cases occur also. I see no adequate reason for refusing to consider ὁν μὲν ἐδειράν, ὁ δὲ ἄπεκτεινάν, ὁν δὲ ἐλθοβόλησαν (Mt. 21:35) examples of the demonstrative Ὁς.¹ Cf. Lu. 23:33. In the accusative plural note οὖς μὲν, οὖς δὲ, Mk. 12:5; Ac. 27:44; Lu. 22 f. For the dative singular, ὁ μὲν, ὁ δὲ, note Mt. 25:15. In 1 Cor. 12:8 we have ὁ μὲν,

¹ Blass, Gr. of N. T. Gk., p. 145.
² K.-Bl., I, i, p. 608.
⁴ Monro, Hom. Gr., p. 185.
⁵ Thompson, Synt. of Att. Gk., p. 68.
¹ So Thompson, Synt. of Att. Gk., p. 68, n. 3.
Thus, for the dative plural see ὦς μὲν, ὦς δὲ, 2 Cor. 2:16. In 1 Cor. 12:28 we have ὦς μὲν as demonstrative without any corresponding ὦς δὲ. Cf. ol μὲν οὖν in Ac. 8:4, 25; 11:19; 15:3, 30, and ὦ μὲν οὖν in Ac. 23:18 as above in (c). The relative at the beginning of sentences or paragraphs, like ἐν ὦς in Lu. 12:1 (cf. ὅν οὖν verse 3), may indeed at bottom be a reminiscence of the old demonstrative. Cf. Latin and English usage. The demonstrative is often used to connect sentences, as in Mt. 11:25; 12:1; Mk. 8:1, etc. Cf. Blass, Gr. of N. T. Gk., p. 276. In Mt. 26:50, ἐφὸς ἀρεταί, we may also have an instance of the demonstrative. But we do not have in the N. T. καὶ ὦς, καὶ τὸν, τὸν καὶ τὸν, πρὸ τοῦ. Radermacher (N. T. Gr., p. 62) finds demonstrative ὅδε in an inscription in Heberdey-Wilhelm, Reisen. N. 170.

(e) ὅδε. Brugmann² finds the enclitic –δε the same that we have in δε-ὑπο, δή, ί-δε (?), Latin quan-de, German der hier, English this here. It refers to what is “immediately near” in space or time,³ and is of relatively more importance than ὦτος. As a matter of fact ὅδε occurs only ten times in the N. T. In the LXX “ὅδε is much commoner than in the N. T.” (Thackeray, Gr. of the O. T. in Gk., vol. I, p. 191), especially in the more literary parts. For its rarity in papyri and inscriptions see Mayser, Gr., etc., p. 308. It is already failing in the first century B.C. (Radermacher, N. T. Gr., p. 62). For τὰδε see chapter VII, IV, 4, (e). In Lu. 16:25 ὅδε is the correct text. In Ac. 15:23 τὰδε is not well supported and in 2 Cor. 12:19 τὰ δε is right. In one of the remaining examples, τῇδε ἤν ὄντολφ (Lu. 10:39), Blass⁴ bluntly calls it “not even used correctly,” a rather curt judgment. But he cites the LXX (Gen. 25:24; 38:27). In Winer-Schmiedel⁵ this example is not considered as ὅδε used for ὦτος, but rather like the classic ὅδε ἐγὼ, ὅδε ἡμέρας (cf. Ex. 8:25; Gen. 50:18). In Jas. 4:13, πορευόμεθα εἰς τήνδε τὴν πόλιν, it is hardly necessary to take τήνδε as like the classical τὴν δεινα or τὴν καὶ τὴν (cf. Plato), though that is a possible construction. Cf. [Page 697] ποιήσομεν τούτῳ ἣ ἐκέννοσ in verse 15. Plutarch¹ seems to use τὴνδε in this sense. More likely in James τήνδε merely means ‘this’ city which the enterprising Jew exploits for a year before he passes on to the next.

(f) ὦτος. Of doubtful etymology, possibly an original root τ.² With this combine ὄ, ἡ, τὸ=οὔ, αὖ, τοῦ. Then add το-ς, τὰ(η), τό. In reality, therefore, ὦτος is a doubled demonstrative (combination of so and to, Giles, p. 296). It is like the Latin is-te

GILES, P., A Short Manual of Comparative Philology. 2d ed. (1901).  
Οὗτος is more often anaphoric than deictic. In Homer, it (deictic) expresses an object present to the speaker, but not near him. The word is limited in use in Homer and usually refers to what is previously mentioned (anaphoric). It is very common in the N.T. and on the whole the usage accords with that of the older Greek. Naturally there is much diversity in the context.

1. The Purely Deictic. This use is not wanting. Thus in Mt. 3:17, οὗτος ἐστιν ὁ Υἱός μου, the demonstrative identifies the one present as the Son of God. For further examples of the purely deictic use see Mt. 12:23; 17:5; 21:10 f. (a particularly good illustration); 21:38; 27:37, 47, 54; Mk. 6:3; 15:39; Lu. 4:22; 8:25, etc. But a still plainer example is in Jo. 21:21, when Simon pointed to John as οὗτος δὲ τί.

2. The Contemptuous Use of οὗτος. It is merely one variation of the purely deictic idiom due to the relation of the persons in question. It is rather common in the N.T. So in Mt. 26:61 οὗτος ἐφη, we find a “fling” of reproach as the witnesses testify against Jesus. Cf. Mt. 26:71 (parallel Lu. 22:56 καὶ οὗτος), the maid about Peter; Mk. 2:7, the Pharisees about Jesus; Lu. 15:2; Jo. 6:42; 9:24; 12:34; Ac. 7:40, Jews about Moses; 19:26; 28:4, about Paul; Lu. 15:30, the elder son at the younger; 18:11, the Pharisee at the publican, etc. A striking example occurs in Ac. 5:28.

3. The Anaphoric Use. The pronoun here refers to one previously mentioned, as in Mt. 27:58 where οὗτος alludes to Ἰωσήφ in verse 57, where note the anacoluthon. So in Heb. 7:1 οὗτος points to the mention of Melchizedek in the preceding verse. There are many variations in the anaphoric idiom. The simplest is the one already mentioned, where the subject of discussion is merely continued by οὗτος, as in Mt. 3:3 (cf. the Baptist in verse 1). In particular observe καὶ οὗτος, as in Lu. 8:41; 16:1. In Lu. 22:59 καὶ οὗτος is rather deictic. A striking example of the anaphoric use occurs in Ac. 7:35, 36, 37, 38, 40. Here the pronoun is repeated as often as is desired. So Jo. 6:42. Cf. the use of the pronoun because of prolepsis (Ac. 9:20). The more frequent use is the resumptive or epexegetical use which is rather more abundant in the N.T. Here οὗτος is really in apposition. In Ro. 7:10, ἡ ἑντολή ἢ εἰς ζωῆν αὐτῆς εἰς θάνατον, we seem to have the resumptive use with a substantive. But a clear example (different in number and gender) occurs in Mt. 13:38, τὸ δὲ καλὸν σπέρμα, οὗτοι έλεησον. One may note a similar use of ἐκείνος (Jo. 12:48; 16:13) and of αὐτός (Jo. 12:49). Another plain instance is in Ac. 2:23, where τούτον refers to Ἰησοῦν (verse 22). Cf. also τούτον (2d) in Ac. 7:35. In Ac. 4:10 ἐν τούτῳ is resumptive referring to the preceding substantive followed by two relative clauses, while οὗτος is deictic. In verse 11 again οὗτος is continuative. In Ro. 9:6, οἱ ἕξις Ἰσραήλ οὗτοι (cf. Gal. 3:7), the resumptive use is plain. The participle before οὗτος is a very common idiom, as ὁ δὲ ὑπομείνας εἰς τέλος οὗτος (Mt. 10:22; 24:13); ὁ ἐμβάψας μετ’ ἑμοῦ—οὗτος (26:23). Cf. 1 Cor. 6:4; Lu. 9:48; Jo. 7:18, etc. The participle, of course, often follows οὗτος not resumptive, as in Jo. 11:37. The relative is followed by resumptive οὗτος as in ὁ δὲ ἄν σαλωσή—οὗτος (Lu. 9:24), ὁ θέλω

2 Ib.
τοῦτο πρᾶσσω (Ro. 7:15 f., 20). So Mt. 5:19; Mk. 6:16; Ac. 3:6; Gal. 5:17; 6:7; 2 Tim. 2:2. The plural is seen in Jo. 8:26, ὁ—ταῦτα also in Ph. 4:9. For ἄτινα—ταῦτα see Ph. 3:7, and ὅσοι—οὕτω Ro. 8:14; Gal. 6:12; Ph. 4:8. Cf. Winer-Schmiedel, p. 218. See ὃταν—τότε, καθὼς—ταῦτα (Jo. 8:28). In Ph. 1:22 τοῦτο resumes τὸ ἔχειν. In 2 Th. 3:14 τοῦτον is resumptive with ἐν τις as in Jas. 1:23. Cf. also 1 Cor. 8:3; Ro. 8:9; Jas. 3:2. For ἐὰν τις see Jo. 9:31. Sometimes only the context can clear up the exact reference of the anaphoric οὗτος. So in Ac. 8:26 αὕτη points to ἦδος.

4. In Apposition. See also chapter X, IX. Οὗτος itself may be expanded or explained by apposition. The simplest form of this construction is where a substantive is in apposition as in 2 Cor. 13:9, τοῦτο καὶ εὐχόμεθα, τὴν ὑμᾶν κατάρτισιν, where agreement in gender does not occur. Cf. the nominative ἡ πίστις in 1 Jo. 5:4. Cf. 1 Th. 4:3. Οὗτος is, of course, the antecedent of the relative ὅς, as in Mt. 11:10; Jo. 7:25; τοῦτο ὃ in Jo. 16:17. In [Page 699] Ph. 2:5 note τοῦτο—ὁ καί.

Sometimes a clause is in apposition with οὗτος which may be either nominative or in an oblique case. Thus with ὃτι we have the nominative (with feminine predicate noun), as in αὕτη ἔστιν ἡ κρίσις ὃτι (Jo. 3:19). Cf. 1 Jo. 1:5; 5:9, 11, 14. In Mk. 4:41, τίς ἄρα οὗτος ἔστιν ὃτι, the ὃτι is almost equal to ὅστε. The accusative with ὃτι we have in τοῦτο ὃτι (Ro. 2:3; 6:6; Lu. 10:11; Ac. 24:14; 1 Cor. 1:12; 15:50; 2 Cor. 5:14; 10:7, 11; 2 Th. 3:10; Ph. 1:6 (αὐτό τοῦτο), 25; 1 Tim. 1:9; 2 Tim. 3:1; 2 Pet. 1:20; 3:3, 8. Cf. also διὰ τοῦτο ὃτι in Jo. 12:39. In Gal. 3:17, after τοῦτο λέγω, we have the direct discourse without recitative ὃτι, but the quotation is really in the accusative in apposition with τοῦτo. Cf. also Lu. 12:18, τοῦτο ποιήσω—καθελόμαι τος ὃς ἀποθηκεύω, and Jo. 4:17. The locative with ὃτι appears in ἐν τούτῳ ὃτι, 1 Jo. 4:9, 10, 13. Cf. ἐν τούτῳ ὃτι (Jo. 16:30; 1 Jo. 3:19, 24) in a slightly different sense where ὃτι is really the accusative. But in general these substantive clauses have the same case as τοῦτο.

Closely allied to this use of ὃτι is that of Ἔνα. Thus the nominative, πόθεν μοι τοῦτο Ἔνα ἔλθη, occurs in Lu. 1:43. In Jo. 17:3, αὕτη δέ ἔστιν ἡ αἰώνιος ζωῆ Ἔνα, the pronoun is feminine because of the predicate substantive. Cf. Jo. 15:12; 1 Jo. 3:11, 23; 5:3; 2 Jo. 6. The accusative as the direct object of the verb is seen in τοῦτο προσεύχομαι Ἔνα in Ph. 1:9. Cf. also ταῦτα—Ἔνα, Jo. 15:11, 17; 1 Jo. 5:13. The feminine substantive occurs in the accusative also, as in ταύτην τήν ἐντολήν ἔχουμεν ἅν αὐτοῦ, ἔνα, 1 Jo. 4:21. The accusative is found also with prepositions. So εἰς τοῦτο, Ἔνα, Ac. 9:21; Ro. 14:9; 2 Cor. 2:9; 1 Pet. 3:9; 4:6; 1 Jo. 3:8. In Eph. 6:22 we have εἰς αὐτὸ τοῦτο Ἔνα. Cf. Col. 4:8. Likewise note διὰ τοῦτο, Ἔνα in 2 Cor. 13:10; 1 Tim. 1:16; Phil. 15. In 2 Cor. 2:3, ἔγραψα τοῦτο αὐτῶ Ἔνα, we probably have the direct accusative, though τοῦτο αὐτῶ could be adverbial accusative, ‘for this very reason.’ The locative appears in ἐν τούτῳ ἐξαδέλφη Ἔνα, Jo. 15:8. Cf. 1 Jo. 4:17. The ablative case appears in Jo. 15:13, μεταξὺ ταύτης ἰδίας ὀνομάζεσται ἔχει, Ἔνα. In 3 Jo. 4 the ablative plural is found, μεταξύτερον τούτων Ἔνα. The accusative in these various constructions varies in degree of directness. An example of ὃν διὸ with εἰς αὐτῶ τοῦτο

---

3 Ib., p. 66.
4 Cf. Blass, Gr. of N. T. Gk., p. 171.
1 Cf. W.-Sch., p. 217, where it is observed that elsewhere often διὰ τοῦτο points to what goes before.
occurs in Ro. 9:17 quoted from the LXX (Ex. 9:16). Cf. also στελλόμενοι τοῦτο μὴ in 2 Cor. 8:20.

In 1 Pet. 2:19 note also the use of οὗτος (though χάρις [Page 700] is predicate), τοῦτο γὰρ χάρις εἰ. Here the εἰ clause is in the same case as τοῦτο, nominative. So in 1 Jo. 2:3 we have ἐὰν in apposition with ἐν τῷ τῷ (locative).

In 1 Jo. 5:2 the correct text has ὅταν in similar apposition with ἐν τῷ τῷ. The infinitive also occurs in apposition with τοῦτο. In Heb. 9:8 the perfect infinitive in indirect discourse with the accusative is in apposition to τοῦτο which is itself accusative, τοῦτο δηλοῦντος τοῦ πνεύματος τοῦ ὅγιον, μήπω πεφανερώθησαί τῇ κτλ. In Eph. 4:17 likewise μηκέτι περιπατεῖν, in apposition to τοῦτο (after λέγω), is in indirect discourse, though here it is indirect command, not indirect assertion. But in 1 Cor. 7:37 τηρέων τῆς ἑαυτοῦ παρθένου is merely explanatory of τοῦτο κέκρικεν. The same thing is true in 2 Cor. 2:1, where the article is added to the infinitive which is also in the accusative, ἐκρίνα ἐμαυτῷ τοῦτο, τῷ μὴ—ἐξελθέν. In Ac. 26:16 the infinitive προσεχίσασθαι is in the accusative like εἷς τοῦτο. Cf. οὗτος. 1 Pet. 2:15.

The nominative infinitive in Jas. 1:27 is in apposition with αὐτή (τηρεσκεπτεῖσθαι—it is possible to see a similar example in Lu. 8:21, ὅταν τοῖς εἶσον οἱ—ἄκοιντες. Here it is, truth would seem unnecessary.

5. Use of the Article. The article commonly occurs with the noun when the noun is used with οὗτος. The noun is not by no means always necessary with οὗτος. See 6. Indeed the resumptive dem. alone is often sufficient, as in Jo. 1:2, 7, etc. So αὐτοῦ οὗτοι (Ac. 24:15, 20). In a sense a double demonstrative thus occurs, since the article was originally demonstrative. This is in exact accord with classic usage and calls for no special comment, except that it is an idiom foreign to Latin and English. The modern Greek preserves this idiom with the demonstrative. So τούτη ἡ γυναῖκα, αὐτῆς ὁ ἄνδρας (Thumb, Handb., p. 92). It is material whether οὗτος comes first, as οὗτος ὁ τελώνης (L. 18:11), or last, as ὁ ἄνδρος ὁ οὗτος (L. 23:47). Cf. Jo. 9:24. When an adjective is used with the substantive, then the article may be repeated with the adjective, as ἡ χήρα αὐτή ἡ ἡγομένη (Mk. 12:43), or οὗτος may, like the adjective, be brought within the rule of the article. So τῆς ἡ [Page 701] κανῆ αὐτή [ἡ] ὑπὸ σοῦ λαλομόμενη διδαχή (Ac. 17:19). Even if the second article be admitted here, the point made still applies. The position of οὗτος with the article, οὗτος ὁ rather than ὁ οὗτος, does not mean simply the predicate idea, though the position is predicate. But not so τῆς ἐξουσίας τούτης ἐπαύσαν in Lu. 4:6. Here the real predicate notion appears. In Kühner-Gerth (I, p. 628) the explanation is given that it is either apposition (οὗτος ὁ ἄνθρωπος “this, the man”) or predicative sense (ὁ ἄνθρωπος οὗτος “the man here”). Probably so, but in actual usage the connection is much closer than that.

---

1 For exx. in earlier Gk. and literary κοινὴ see W.-Sch., p. 217.
2 W.-Sch., p. 218.
1 See Gildersleeve, Synt., p. 331, for this “pseudo-attributive position.”
6. Article Absent. The article does not always occur with substantives when οὗτος is used. When οὗτος occurs with proper names in the N. T., the article is present. So Ac. 1:11 οὗτος ὁ Ἰησοῦς, 19:26 ὁ Παῦλος οὗτος, 7:40 ὁ γὰρ Μωϋσῆς οὗτος, 2:32 τοῦτον τὸν Ἰησοῦν, Heb. 7:1 οὗτος γὰρ ὁ Μελχισεδέκ, except in Ac. 6:14 Ἰησοῦς ὁ Ναзиωνῖος οὗτος, where the article is used with the adjective, not with Ἰησοῦς. So uniform indeed in the Greek is the presence of the article with the noun and οὗτος, that the absence of the article causes something of a jolt. In Ro. 9:8 the conjunction of the words τά ἔτη τέκνα must not deceive us. The copula ἐστίν must be supplied between. The American Revision indeed calls in the English relative to render the idiom οὗ τὰ τέκνα τῆς σαρκὸς τοῦτα τέκνα τοῦ θεοῦ. Cf. the simple predicate use in 1 Cor. 6:11, καὶ τοῦτα τινὶς ἐστιν. In Lu. 1:36, οὗτος μὴν ἔκτοτε ἐστίν, the substantive is predicate. The same thing is clearly true of Lu. 2:2, ἀντὶ ἰσογραφὴ πρῶτη ἐγένετο. Cf. also τοῦτο ὡς σημεῖον in Lu. 2:12. Some MSS. have τό, but in either case the copula is supplied. The remaining examples are not so simple, but ultimately resolve themselves into the predicate usage unless one has to except Ac. 24:21 (see below). In Lu. 7:44, τοῦτη τὴν γυναῖκα, the article does not occur in L 47ev. Winer2 considers the reading without the article "unexceptionable," since the woman was present. In Lu. 24:21 the predicate accusative really is found, τρίτην τοῦτην ἡμέραν ἀγείᾳ ὅ γε ὦ τοῦτα ἐγένετο, a common Greek idiom difficult to put into English. It is not 'this third day,' but 'this a third day.' Cf. also 2 Pet. 3:1, τοῦτην δευτέραν γράφω ἐπιστολήν. In this instance the English translation resorts to the relative 'that' to bring out the predicate relation, 'this is the second epistle that I write.' In Jo. 2:11, [Page 702] τοῦτην ἐποίησεν ἄρχην τῶν σημείων, even the American Revision has a wrong translation, 'this beginning of miracles.' It is rather 'this Jesus did as a beginning of miracles.' But ἔ and Chrys. here have τὴν. In Jo. 4:18, τοῦτο ἀληθῆς εἰρήκας, the English relative is again necessary, 'this is a true thing that thou didst say' or 'thou didst speak this as a true thing.' The translation 'truly' rather obscures the idea. In Ac. 1:5, οὗ μετὰ πολλὰς τοῦτας ἡμέρας, several difficulties appear. The litotes, οὗ μετὰ πολλὰς, does not have the usual order.1 Cf. Ac. 27:14 for μετὰ ὀλόκληρον. There is besides a use of μετά somewhat akin to that of πρὸ ἐξ ἡμερῶν τοῦ πάσχα (Jo.

Gildersleeve

GILDERSLEEVE, B. L., Editions of Pindar and Justin Martyr.

———, Latin Grammar. Many editions since 1867.

———, Notes on Stahl’s Syntax of the Greek Verb (1910).

———, Numerous articles in the American Journal of Philology.

2 W.-Th., p. 110.
1 W.-Sch., p. 221.
12:1). The order would more naturally be οὐ πολλὰς ἡμέρας μετά ταύτας or οὐ πολλὸν ἡμέραν μετά ταύτας. However, the predicate use of ταύτας without the article permits the condensation. The free translation ‘not many days hence’ is essentially correct. It is literally ‘after not many days these’ as a starting-point (from these). In Jo. 21:14, τοῦτο ἦν τρίτος ἐφανερώθη Ἰησοῦς, the matter is very simple, ‘this already a third time,’ or to use the English relative, ‘this is now the third time that.’ So also in 2 Cor. 12:14 and 13:1, τρίτον τοῦτο. The most difficult instance to understand is in Ac. 24:21, περὶ μᾶς ταύτης φωνῆς ἦς ἐκέκραξα. Here ‘concerning this one voice which I cried’ makes perfectly obvious sense. The trouble is that it is the only N. T. example of such an attributive usage without the article. Blass3 takes it to be equivalent to ἦ φωνῆ ἦ ἐγένετο ἦν μία αὕτη. This is, of course, the normal Greek idiom and is possibly correct. But one wonders if a lapse from the uniform idiom may not occur here. Radermacher (N. T. Gr., p. 92) cites τοῦτον πράγματος, ταῦτα δοκίματα, τοῦτο κτήμα from inscriptions in Magnesia (Petersen-Luschan, Reisen in Lykien, p. 35, n. 54) and ἐξήστησαν τόδε μνήμα from a Bithynian inscription (Perrot, Exploration arch. de la Galatie, p. 24, N. 34). Hence one had best not be too dogmatic as to Luke’s idiom in Ac. 24:21. After all, the predicate use may be the original use, as with ἔκεινος. Cf. Brugmann, Griech. Gr., p. 426 f.; Thompson, Syntax of Attic Greek, p. 67. See also chapter XVI.

7. Οὗτος in Contrast with ἔκεινος. The distinction between δοκεί for what follows and οὗτος for what precedes4 (not strictly observed in the ancient Greek) amounts to little in the N. T., since δοκεί is so rare. But οὗτος does, as a rule, refer to what is near or last mentioned and ἔκεινος to what is remote. See αὕτη and οὗτος in [Page 703] 2 Jo. 6 f. and τοῦτο in 2 Cor. 13:9. This idiomatic use of οὗτος is plain in Ac. 7:19. In 1 Jo. 5:20 οὗτος really refers to αὐτοῦ (ἐν τῷ οὐδὲν, αὐτοῦ and so no difficulty exists. In Ac. 4:11 οὗτος is resumptive and takes up the main thread of the story again (cf. οὗτος in verse 9). In Ac. 8:26 αὕτη may refer to Γάζαν, but more probably (see 3, end) refers to δοκεί, a more remote substantive, indeed. In Lu. 16:1 again only the sense5 makes it clear (ἁνθρωπὸς τὸς ἦν πλούσιος δὲ εἶχεν οἰκονόμον, καὶ οὗτος) that οὗτος refers to οἰκονόμον. In Lu. 18:14, κατέβη οὗτος διδακασμένος εἰς τὸν οίκον αὐτοῦ παρὰ ἔκεινον, the two pronouns occur in sharp contrast, one pointing out the publician, the other the Pharisee. In such contrasts οὗτος refers to the last mentioned. This is clearly one example (besides 2 Jo. 6 f.) in the N. T., which curiously enough Blass (Gr. of N. T. Gk., p. 171) does not recognise. Cf. also Jo. 13:24; ἔκεινος τοῦτο ἐκέκραξα in Jo. 5:38, and ταῦτα ἔκεινος in 1 Cor. 10:11. In Jo. 1:7 f. both οὗτος and ἔκεινος are used of John and in proper idiom.6 Instead of ἔκεινος we might have had οὗτος properly enough because of αὐτοῦ, but ἔκεινος calls us back pointedly to Ἰωάννης. Cf. Abbott, Johannine Grammar, p. 236. Note οὗτος ὁ λόγος—ὁ μαθητής ἔκεινος in Jo. 21:23. In 1 Cor. 6:13, ὁ δὲ θεὸς καὶ ταῦτα καὶ ταύτα καταργήσει, we find οὗτος used for both the near and the remote. The number and gender make it clear. In 1 Cor. 9:3

2 Cf. Blass, Gr. of N. T. Gk., pp. 126, 133.
3 Ib., p. 172.
4 Thompson, Synt. of Att. Gk., p. 66.
1 Blass, Gr. of N. T. Gk., p. 171.
2 Blass, ib., p. 172, explains ἔκεινος as showing that the discourse passes from John to Jesus. But ἔκεινος refers to John.
αὕτη points to what follows. In a case like ἐν τούτῳ χάρισι (Ph. 1:18), the main thought is meant by the demonstrative. So with ἐν τούτῳ δίδωμι τούτῳ γὰρ ὑμῖν συμφέρει (2 Cor. 8:10). Cf. τούτῳ Ac. 24:14, etc.

8. As Antecedent of the Relative Pronoun. The absence of the demonstrative pronoun before the relative pronoun will be discussed later. This absence is in the case of a possible pronoun before the relative and after it also. The resumptive use of the demonstrative pronoun after the relative sentence has been already treated. But it is “the normal correlative” οὗτος—δέ. So οὗτος περὶ οὗ (Mt. 11:10), οὗτος δὲν (Jo. 7:25), οὗτος δὲ (Ac. 7:40), τούτῳ—ὁ (Ph. 2:5). See interrogative demonstrative and relative in τις ἐστὶν οὗτος ὃς (Lu. 5:21; 7:49); τί τούτῳ ὁ (Jo. 16:17 f.). Cf. Lu. 24:17. On the whole, however, the demonstrative before the relative is not common in the N. T. In Gal. 2:10 both αὐτό and τούτῳ are incorporated into the relative clause, ὁ καὶ ἑσπούδασα αὐτὸ τοῦτο ποιήσαι.

9. Gender and Number of οὗτος. See chapter X. In general, like other adjectives, οὗτος agrees with its substantive in gender and number, whether predicate or attributive. Cf. Jo. 2:11. In 1 Cor. 6:13, καὶ ταύτην καὶ ταύτα, note the number and gender. But sometimes the construction according to sense prevails. So the masculine, not feminine, in Ac. 8:10, οὗτος ἐστιν ἡ Δύναμις τοῦ θεοῦ. So σκέφθος έκλογής ἐστίν μοι οὗτος (Ac. 9:15), οὗτοι and έδοξή (Ro. 2:14). Cf. also Ju. 12, οὗτοι—νεφέλαι, δένδρα, κύματα, ἀστέρες; 2 Pet. 2:17, οὗτοι ἐστίν πηγαί, and οὗτοι—ἐλάιαι (Rev. 11:4). In these examples assimilation to the gender of the predicate does not occur. Cf. ταῦτα τί, Jo. 6:9. In Mt. 21:42 (Mk. 12:11), παρὰ κυρίου ἐγένετο αὐτή, the feminine occurs where the neuter would be natural in Greek. This is a piece of “translation” Greek (Ps. 118:23). In Hebrew the feminine is the case for abstract words, the Hebrew having no neuter gender. In Eph. 2:8, τῇ γὰρ χάρις ἐστε σεσωσμένοι διὰ πίστεως καὶ τοῦτο οὐκ ἔξ ὑμῖν, there is no reference to πίστεως in τοῦτο, but rather to the idea of salvation in the clause before. But in 1 Pet. 2:19 f. we have two examples of the neuter (τοῦτο) on purpose to present a more separate and abstract notion than αὕτη would have done, an ancient Greek idiom, τοῦτο γὰρ χάρις εἰ—τοῦτο χάρις παρὰ θεῷ. In 1 Cor. 10:6 the same principle applies, ταῦτα δὲ τῦσοι ἡμῖν ἐγεννήθησαν. A striking example is found in 1 Cor. 6:11, καὶ ταῦτα τίνες ἦτε. Here ταῦτα is much like τοῦτοι, but more definite and emphatic. For this use of οὗτος see also Jo. 12:34. In Ph. 3:7, ἃν γὰρ ἦν μοι κέρδη, ταῦτα ἔγινα—ζημίαν, assimilation to the gender of the predicate is also absent.

Sometimes the plural ταῦτα occurs where a single object is really in mind. The adverbial phrase μετὰ ταῦτα (Lu. 12:4) can refer either to one or more incidents. It is not necessary to consider ταῦτα as singular in idea in Jo. 19:36 and 1 Cor. 9:15 But the usage does appear in 3 Jo. 4, μειζόνεσθαι τούτων οὐκ ἔχω χάριν (οχ χαράν), and the adverbial accusative καὶ ταῦτα in Heb. 11:12. Some MSS. have καὶ ταύτα instead of καὶ τοῦτο in 1 Cor. 6:8.

3 Thomp., Synt. of Att. Gk., p. 66.
But assimilation to the predicate both in gender and number occurs. So in Lu. 8:14 f., τὸ … πεσόν, οὗτοι ἐστιν οἱ ἄκούσαντες. The same thing\(^1\) appears in Gal. 4:24, ἀκούσαντι ἐστιν ἀλληγορικός: αὗται γὰρ ἔστιν δύο διαθήκαι. Note the assimilation of αὕτη in Lu. 2:2; 8:11; 22:53; Jo. 1:19; Ro. 11:27; 1 Cor. 9:3; 1 Jo. 2:25; 5:3, 4, 9, 11, etc., and οὗτος in Mt. 7:12.

10. The Adverbial Uses of τοῦτο and ταύτα. See chapter XII. [Page 705] Here we have καὶ τοῦτο (adverbial accusative or nominative absolute) like Latin idque (English ‘and that too’) in 1 Cor. 6:6 (CD\(^b\) ταύτα), 8 (L ταύτα); Ro. 13:11; Eph. 2:8 (this last could be otherwise explained). Καὶ ταύτα, the usual classical idiom,\(^1\) appears in Heb. 11:12 with a concessive participle. In τοῦτο μὲν, τοῦτο δὲ (Heb. 10:33) Blass\(^2\) sees a literary usage. In 2 Cor. 2:3 Paul has τοῦτο αὐτό in the adverbial sense, while Peter (2 Pet. 1:5) turns the phrase around καὶ αὐτὸ τοῦτο δὲ. Cf. the adverbial use of κεφάλαιον in Heb. 8:1. The case of οὗτος in Jo. 21:21 is noteworthy.

11. The Phrase τοῦτο ἐστιν. See also chapter X, VIII, (c). It is used without any regard to the number, gender or case of the word in apposition with it, exactly like the Latin id est. There are eighteen examples of it given in Moulton and Geden’s Concordance, all but three of them from the Acts, Romans, Philémon and Hebrews. It is a mark of the more formal literary style. In Mt. 27:46 the case explained is the vocative, in Mk. 7:2 the instrumental, in Heb. 2:14 the accusative, in Heb. 9:11 the genitive, in Heb. 7:5 the plural, in 1 Pet. 3:20 the plural. In Ro. 1:12 the uncontracted form occurs with δέ. In 1 Macc. 4:52 οὗτος ὁ μὴν Χασελεῦ is in apposition with the genitive.\(^3\) Here οὗτος performs the function of τοῦτο ἐστιν. Cf. the case-irregularities in the Apocalypse.

12. In Combination with Other Pronouns. Mention may be made of ἐν τοῦτῳ οὗτος (Ac. 4:10) and other instances of the double use of οὗτος. Cf. Mk. 6:2. Cf. οὗτος οὗτος in Mk. 2:7, ταύτα οὗτος (Ac. 24:9), οὗτος τοῦτο (1 Cor. 5:3), and in 2 Pet. 3:11 τοῦτον οὗτος πάντων. Examples of αὐτό τοῦτο are common in Paul (Ro. 9:17; 13:6; 2 Cor. 7:11; Ph. 1:6. Cf. 2 Pet. 1:5). For τοῦτο αὐτό see 2 Cor. 2:3, αὐτό τοῦτο Ro. 13:6. For αὐτῶν οὗτος see Ac. 24:15, 20. For τοῦτο δολον cf. Mt. 1:22; 26:56. There is no doubt some difference between ταύτα πάντα (Mt. 4:9; Lu. 12:30; 16:14) and πάντα ταύτα (Mt. 6:32). “In the first expression, πάντα is a closer specification of ταύτα; in the second, πάντα is pointed out demonstratively by means of ταύτα.”\(^4\)

13. Ellipsis of οὗτος. The demonstrative is by no means always used before the relative. Often the relative clause is simply the object of the principal verb, as in ὁ λέγω υμῖν ἐν τῇ σκοτίᾳ ἔφθατε (Mt. 10:27). Sometimes the implied demonstrative must be expressed in the English translation. The simplest form of this [Page 706] idiom is where the case of the demonstrative would have been the same as that of the

\(^3\) Ib.
\(^4\) W.-Sch., p. 219.
\(^4\) W.-Th., p. 548.
relative. Thus συγγενῆς ὁν oũ ἄπεκολοσὶς Πέτρος τῷ ὑπίου (Jo. 18:26). Cf. ὁν in Ac. 1:24. In Ac. 8:24 ὁν is for τοῦτον ὁ by attraction. But the ellipsis occurs also when a different case would have been found. So in Mt. 19:11 oũς δέδοτα would have been οὗτοι oũς δέδο. In Jo. 13:29 ὁν would have been preceded by ταύτα. Cf. also Ac. 8:19; 13:37, etc. In Ro. 10:14, πῶς πιστεύσωσιν oũ o}" ήκουσαν, the antecedent of oũ would be either τοῦτο (or ἐξ τοῦτο) or more probably εἰς τοῦτον (preposition also dropped). When a preposition is used, it may belong to the relative clause, as in πῶς ἔπικαλέσωσιν εἰς ὃν o}" ἔπιστεύσαν (Ro. 10:14; cf. Jo. 19:37), or to the implied demonstrative, as in ἣν πιστεύσετε eἰς ὃν ἐπέστειλεν (Jo. 6:29). In Ro. 14:21 ὃ ὁν illustrates the preposition with the relative, while in the next verse it illustrates the preposition with the antecedent. In Jo. 11:6 ὃ ὁν τόπω is an example where ὃν would have been used with both antecedent and relative. So as to ὁφι ὁν in 2 Cor. 2:3, etc. The same principle of suppressed antecedent applies to relative adverbs, as in ἡλεθὲν ὁποῦ ἦν (Jo. 11:32), strictly ἐκεῖσε ὁποῦ.

14. Shift in Reference. It is possible that in Ac. 5:20, λαλεῖτε ὃν τῷ ἱερῷ τῷ λαῷ πάντα τῷ ἡμιτετο ης ζωῆς ταύτης, a slight change in sense has occurred, τών τε more naturally going with ἡμιτα. Cf. ἐκ τοῦ σώματος τοῦ θανάτου τοῦτο (Ro. 7:24). But the point is not very material.

(g) ἐκεῖνος. Cf. Latin ille. The old form (Epic, Pindar, Tragic poets) was καῖνος or κῆνος (Doric and Lesbian). Brugmann indeed connects it with the old Indo-Germanic root ko. The locative adverb ἐ-καῖ (cf. καῖ-θεν, καῖ-θεν, Doric, Lesbian) is the immediate source of the pronoun καῖ-νος, ἐ-καῖ-νος. Cf. English hi-ther. The original usage was therefore predicative. Thus in Thuc. i, 52. 2, νῆς ἐκεῖναι ἐπιστεύσειι (‘ships yonder are sailing ahead’), we must not confuse it with αἱ νῆς ἐκεῖναι (‘those ships’). Cf. the “adverbial” use of ὁποῦς. By a strange coincidence, while at work on this paragraph (Nov., 1908), I received a letter from Rev. R. H. Graves, D.D., of Canton, China, concerning Chinese pronouns, suggested by the chapter on Pronouns in my Short Grammar of the Greek N. T. He says: “The ordinary pronoun for the third person is κ’ει. In Canton we also use κ’νι. Compare ἐκεῖνος.” He mentions other accidental similarities, but I dare not venture into Chinese etymology.

[Page 707] 1. The Purely Deictic. We have a few examples in the N. T. So in Jo. 13:26, ἐκεῖνος ἐστιν ὁ ἔγω βάψω τῷ ψωμίου καὶ δῶσο αὐτῷ, for Judas was present at the table. In Mt. 26:23 we have ὁποῦς. A gesture may also have accompanied the remark of the Pharisees in Jo. 9:28, σὺ μαθητῆς ἔσῃ ἐκείνος. Cf. also Jo. 19:21. If ἐκεῖνος in Jo. 19:35 be taken as an appeal to God as a witness to the truth of what the writer is saying (possible, though by no means certain), the usage would be deictic. Blass considers that “everything is doubtful” as to this verse, a doubt shared by

1 W.-Th., p. 158.
2 Cf. ib., p. 159.
3 Brug., Griech. Gr., p. 242 f.
4 Ib.
5 Ib., p. 426 f.
1 Gr. of N. T. Gk., p. 172.
Abbott.² For myself I think that ἐκεῖνος is here anaphoric and refers to αὐτοῦ (cf. the similar reference of οὗτος to αὐτοῦ in 1 Jo. 5:20; but see Remote Object). Another possible deictic example is in Jo. 7:11. Jesus was not present, but in the minds of the people a subject of discussion. Cf. also 9:12.

2. The Contemptuous Use (cf. οὗτος). It appears unmistakably (see 1) in Jo. 9:28, σὺ μαθητής εἰς ἐκεῖνον. It may also exist₁ in Jo. 19:21. Cf. the solemn repetition of ἐκεῖνος with ὁ ἄνθρωπος in Mt. 26:24, as well as the change from οὗτος in verse 23.

3. The Anaphoric. This is the more frequent use of this pronoun. Thus in Jo. 1:8 ἐκεῖνος takes up οὗτος of verse 7 (Ἰωάννης of verse 6). In Jo. 18:15 ὁ δὲ μαθητής ἐκεῖνος resumes the story of ἄλλος μαθητής immediately preceding. Cf. ἄλλος and ἐκεῖνος in Jo. 5:43. In Jo. 13:25 ἐκεῖνος refers indeed to the preceding τούτῳ (cf. ἐκεῖνος οὗτος). In Jo. 5:19 the reference is to πατέρα just before. Cf. Jo. 4:25. Ἐκεῖνος δὲ (Jo. 2:21) is continuous like οὗτος. The articular participle may be followed by the resumptive ἐκεῖνος. So ὁ πέμψας με—ἐκεῖνος Jo. 1:33). Cf. Jo. 5:11; 2 Cor. 10:18. So in Jo. 1:18 the pronoun refers to θέος followed by ὁ ὄν. Cf. Mk. 7:20 Ἐκεῖνο. See Jo. 14:21. For distinction between ἐκεῖνος and αὐτοῦ see 2 Tim. 2:26; 3:9.

4. The Remote Object (Contrast). This is not always true, as is shown by Jo. 18:15. Cf. Tit. 3:7. It is common thus to refer to persons who are absent. So in Jo. 3:28 (cf. Jo. 7:11) John speaks of Christ in contrast to himself, ἀπεσταλμένος εἰμὶ ἐμπρόσθεν ἐκεῖνον. So in verse 30, ἐκεῖνον—ἐμέ. In 1 Cor. 9:25 note ἐκεῖνοι μέν—ἡμεῖς δέ. So in 10:1 ἐκεῖνος—ἡμῶν, 15:11 εἰς ἔγω εἰς ἐκεῖνον. In Ac. 3:13 the contrast is sharp between ἡμεῖς—ἐκεῖνοι, and in 2 Cor. 8:14 between ἡμῶν—ἐκεῖνον (cf. ἐκεῖνον—ἡμῶν in same verse). Cf ὁ θεός—ἐκεῖνος in Mt. 13:11. In Jo. 5:39 ἐκεῖνοι [Page 708] is in opposition to ἡμεῖς, as ἐκεῖνος to ἡμῖν in the preceding verse. Cf. 2 Cor. 8:9. For a contrast between those present in the same narrative see οὗτος and ἐκεῖνος in Lu. 18:14. Cf. ἐκεῖνος and αὐτός in 1 Jo. 2:6 and τούτῳ ἦ ἐκεῖνο in Jas. 4:15. It is common in expressions of place, like διὰ τῆς ὀδοῦ ἐκεῖνης (Mt. 8:28), εἰς δόλων τὴν γῆν ἐκεῖνην (9:26; cf. ἐν 9:31), etc. It is frequent also with general phrases of time, like ἐν ταῖς ἡμέρας ἐκείναις (Mt. 3:1). Cf. Mk. 8:1; Lu. 2:1. It usually occurs at a transition in the narrative and refers to something previously mentioned. Blass¹ notes that Lu. (1:39) uses also ταῦτα in this phrase and that in 6:12 D has ἐκεῖνας rather than ταῦτας. In particular observe the phrase ἐκεῖνη ἡ ἡμέρα for the Last Day (Mt. 7:22; Mk. 14:25; Lu. 21:34; 17:31; Jo. 16:23, etc. Cf. Jo. 6:40, etc.).

5. Emphasis. Sometimes ἐκεῖνος is quite emphatic. Abbott² notes that in John’s Gospel, outside of dialogue, ἐκεῖνος usually has considerable emphasis. Instance Jo. 1:8, 18, 33; 2:21; 3:30; 4:25; 5:19, 38; 6:29; 8:42; 14:26; 15:26, etc. In the First Epistle of John he observes that it occurs only seven times and all but one refer to

---

3 Abbott, ib., p. 568. He cites Mt. 27:19, 63 as exx. of the good and the bad sense of ἐκεῖνος. Cf. Lat. ille.
1 Gr. of N. T. Gk., p. 171.
2 Joh. Gr., p. 283.
Christ. He is the important one in John’s mind. Cf. αὐτός in Ac. 20:35. But ἐκεῖνος is not always so emphatic even in John. Cf. Jo. 9:11, 25; 10:6; 14:21; 18:17; Mk. 16:10 ff; 2 Tim. 3:9.

6. With Apposition. It is not common with words in apposition. But note Jo. 16:13, ἐκεῖνος, τὸ πνεῦμα τῆς ἀληθείας (cf. Jo. 14:26). Note also ἐκεῖνο γινόσκετε, ὅτι (Mt. 24:43) after the fashion of οὗτος with ὅτι. Cf. also the resumptive uses with participles (Jo. 1:18, etc.).

7. Article with Nouns except when Predicate. When the noun is used with ἐκεῖνος in the N. T., the article always appears, except when predicate. In Jo. 10:1, ἐκεῖνος κλέπτης ἐστίν, the substantive is predicate, as in 10:35, ἐκεῖνος εἶπεν θεοῦς. With adjectives we may note the repetition of the article in Jo. 20:19 and the ambiguous position of ἐκεῖνη in Heb. 8:7 due to the absence of διάθηκη. With δῶς we find this order, εἰς δῶν τὴν γῆν ἐκεῖνην (Mt. 9:26, etc.) and πᾶς the same, πᾶσαν τὴν ὀφειλήν ἐκεῖνην (Mt. 18:32, etc.).

8. As Antecedent to Relative. So ἐκεῖνος ἐστίν ὁ (Jo. 13:26), ἐκεῖνον ὑπὲρ οὗ (Ro. 14:15) ἐκεῖνος ὅτι οὐς (Heb. 6:7). Note also ἐκεῖνος ἐστίν ὁ ἄγαπων (Jo. 14:21) where the articular participle is the practical equivalent of a relative clause.

9. Gender and Number. Little remains to be said about variations in gender and number. Two passages in John call for remark. [Page 709] inasmuch as they bear on the personality of the Holy Spirit. In 14:26, ὁ δὲ παρὰκλητὸς, τὸ πνεῦμα τὸ άγιον ὁ πέμψει ὁ πατὴρ ἐν τῷ δόμωμαι μου, ἐκεῖνος ήμᾶς διδάσκει, the relative ὁ follows the grammatical gender of πνεῦμα. Ἐκεῖνος, however, skips over πνεῦμα and reverts to the gender of παρὰκλητος. In 16:13 a more striking example occurs, ὅταν δὲ ἔλθῃ ἐκεῖνος, τὸ πνεῦμα τῆς ἀληθείας. Here one has to go back six lines to ἐκεῖνος again and seven to παρὰκλητος. It is more evident therefore in this passage that John is insisting on the personality of the Holy Spirit, when the grammatical gender so easily called for ἐκεῖνο. Cf. ὁ in Jo. 14:17, 26 and αὐτό in 14:17. The feminine ἐκεῖνης in Lu. 19:4 evidently refers to ὁδοῦ unexpressed.

10. Independent Use. The frequency of ἐκεῖνος in John’s Gospel may be noticed, but the Synoptics and Acts are not far behind. More curious, however, is the fact that in the Synoptics ἐκεῖνος is nearly always used with a substantive (adjectival) while the independent pronounal use of the singular is almost confined to the Gospel of John (and First Epistle). All the uses in the First Epistle and nearly all in the Gospel are independent. As exceptions note Jo. 4:39, 53; 11:51, 53; 16:23, 26, etc. On the other hand only two instances appear in the Apocalypse (9:6; 11:13) and both with substantives.

(h) Αὐτός. It has undoubtedly developed in the κοινή a demonstrative force as already shown on p. 686, and as is plain in the modern Greek. Moulton² quotes plain examples from the papyri (see above). In the N. T. it is practically confined to Luke

(and Mt. 3:4 perhaps), where it is fairly common, especially in the Gospel. So ἐν αὐτῇ τῇ ὀχλῇ (Lu. 10:7), ‘in that house.’ Moulton\(^3\) notes that in Mt. 11:25 (parallel to Lu. 10:21) we have ἐν ἐκείνῳ τῷ καιρῷ and in Mk. 13:11 ἐν ἐκείνῃ τῇ ὄρᾳ; (parallel to Lu. 12:12 ἐν αὐτῇ τῇ ὀρφῇ). The tendency was not foreign to the ancient Greek and it is common enough in the modern vernacular\(^4\) to find οὗτος ὁ = ‘this.’

\((i)\) The Correlative Demonstratives. Only four occur in the N. T. One of them appears only once and without the article, φωνῆς ἐνεχθείσης αὐτῷ τοιᾶσθε (2 Pet. 1:17). It has died in the vernacular (Radermacher, N. T. Gr., p. 63) like δὲς, τηλικός and τοσός. Ἡλικοῦτος appears once as predicate, ἡλικιαῦτα δήνα (Jas. 3:4), [Page 710] elsewhere attributive. The article is not used. This correlative of age always refers to size in the N. T. (2 Cor. 1:10; Heb. 2:3). Once indeed it is in connection with οὗτος μέγας (Rev. 16:18) and so redundant. The other two are τοιούτους and τοσοῦτος. Τοιούτος is the demonstrative of quality (Latin talis) and it is used with a good deal of freedom. It is, of course, merely οὗτος and οὗτος combined. The compound form alone occurs in the N. T. and became more frequent generally.\(^1\) Τοιούτους without a substantive is used either without the article (Lu. 9:9) or more usually with the article in the attributive position (Mt. 19:14; Ac. 19:25; Ro. 1:32; 1 Cor. 7:28; 2 Cor. 10:11, etc.). In Jo. 4:23, τοιούτους ἄνεξα τοὺς προσκομιοῦντας, the articular participle is in the predicate accusative. When used with substantives' τοιούτους may be anarthrous, as in Mt. 9:8; 18:5; Mk. 4:33; Heb. 7:26; 8:1; Jas. 4:16, etc., but the article occurs also (Mk. 6:2; 9:37; 2 Cor. 12:3). In Mk. 6:2 we have the order of δύναμεις τοιαύται (cf. οὗτος, ἐκεῖνος). It comes before the substantive (Jo. 9:16) or after (Ac. 16:24). It is used as the antecedent of οὗς (Mk. 13:19; 1 Cor. 15:48; 2 Cor. 10:11) following οὗς. But note also τοιούτους ὅποιος in Ac. 26:29, τοιούτους ὁς in Heb. 7:26 f.; 8:1, and in 1 Cor. 5:1 τοιοῦτα ἢς. We even have τοιούτους ὡς in Phil. 9. Cf. ποιός =τοιούτος in a Logion of Jesus, P.Oxy. IV, p. 3, 1. Τοιούτος (τόσος, οὗτος) is the pronoun of degree (Latin tantus), both size, τοσοῦτος πίστιν (Mt. 8:10), and quantity, ἢρτοι τοσοῦτοι (Mt. 15:33). It occurs with the article only once, ὁ τοσοῦτος πλοῦτος (Rev. 18:16). Sometimes it appears without a substantive, as in Ac. 5:8; Gal. 3:4; Heb. 1:4, etc. It is the correlative with οὗς in Heb. 1:4 τοσοῦτος ὁ θυσίας, 7:20—22 καθ' ὅσον =κατὰ τοσοῦτο, and in 10:25 τοσοῦτος ὁ μακάριος. It is worth while at this point to note the correlative adverbs, οὗτος ὠστε (Ac. 14:1), οὗτος ὡς (1 Cor. 4:1), οὗτος—ὁπερ (Mt. 5:16). Cf. ὠστε—οὗτος δέ (Ro. 15:20).

VII. Relative Pronouns (Ἀναφορικοὶ Ἀντονυμίαι).

\((a)\) List in the N. T. The only relatives in the N. T. (not counting adverbs) are ὁς, ὅστις, ὅς, ὅποιος, ὅσος, ἡλικός, and ὁ in the Apocalypse. The others have fallen by the way. Some MSS. read ὄνυπερ in Mk. 15:6, while ὄσοδήπερ in Jo. 5:4 is not in the critical text. The LXX has ὄσερ (ὑπερ) five times,\(^2\) but ἡλικος not at all. These

\(^3\) Ib.
\(^1\) Jann., Hist. Gk. Gr., p. 162.
relative pronouns do not occur with uniform frequency as will be seen. Ὅς is the only one very common.

[Page 711] (b) THE NAME “RELATIVE.” It is not very distinctive. The idea of relation (anaphoric use) belongs to the demonstrative and to the personal pronouns also. The anaphoric demonstrative use is indeed the origin of the relative. The transition from demonstrative to relative is apparent in Homer in the case of both ὁ and Ὅς. Sometimes it is difficult in Homer to tell the demonstrative and the relative apart. Cf. English that, German der. Homer often used τε and τις with ὁ and Ὅς to distinguish the relative from the demonstrative. Gradually the relative use, as distinct from the anaphoric demonstrative, won its way.

(c) A BOND BETWEEN CLAUSES. The relative becomes then the chief bond of connection between clauses. Indeed many of the conjunctions are merely relative adverbs, such as ὡς, ὡτε, ὡπως, etc. The relative plays a very important part in the structure of the subordinate sentence in Greek. That matter will receive due treatment in chapter XIX, Mode. The agreement of the relative with antecedent in person, number, gender, and sometimes case, is just the natural effort to relate more exactly the two clauses with each other. These points will receive discussion under Ὅς which best exemplifies them. The assimilation is at bottom the same that we see in other adjectives (cf. demonstrative pronouns). The assimilation of the relative in person, gender, number, and even case of the antecedent may be compared to assimilation in the adjective and even verbs (compound verbs especially) and prepositions. Cf. Josef Liljeblad, De Assimilatione Syntactica apud Thuc. Questiones, 1900, p. 1).

(d) Ὅς.

1. In Homer. See discussion of the demonstrative Ὅς for origin. But already in Homer the relative sense, ὃϑρον ὑποτακτικόν, is the main one, and the demonstrative is on the decline.

2. Comparison with Other Relatives. Though Ὅς in the N. T. far outnumbers all the other relatives, yet the distinction between Ὅς and the other relatives is breaking down. Indeed in the vernacular it may be questioned if it was ever preserved. One may compare the unchangeable Hebrew אֲשֶׁר. Moulton observes that in Polybius the distinction between Ὅς and Ὅςτις has “worn rather thin.” In the LXX Ὅς

1 Robertson, Short Gr. of the Gk. N. T., p. 81.
1 Prol., p. 92.
is frequent, but in the modern Greek ὁς “is used rarely even in writing.” It is wholly absent in the vernacular. The modern Greek vernacular uses ποῦ or ὅπου. In the oblique cases the conjunctive pronoun τοῦ, τῆς is added to ποῦ (cf. the Hebrew idiom). See Thumb, Handb., p. 93. Jebb (Vincent and Dickson’s Handb., etc., p. 303) calls it “a curious example of false analogy” and finds an instance in Aristophanes (Birds, 1300), μελή ὅπου. Here ὅπου=ἐν ὁς. The vernacular carried it further. He cites modern English vernacular, “The men as he met.” Indeed in Rev. 2:13 ὅπου really points to an unexpressed παρ ὤμοιν. In Col. 3:11 ὅπου is almost personal. The occasional apparent confusion between ὁς and interrogative pronouns will be discussed directly. On the whole, ὁς in the N. T., as in the κοινή generally, is still used in accord with the classic idiom.

3. With Any Person. In itself, of course, ὁς, like all relatives, has no person. So the first person in 1 Cor. 15:10, the second person in Ro. 2:23, the third person in Mt. 5:19; Lu. 6:48 f.; 1 Cor. 4:17. These examples may suffice.

4. Gender. This is not so simple. The normal thing is for the relative to agree with the antecedent in gender, as in 1 Cor. 4:17, Τιμᾶεον, ὁς ἐστίν μου τέκνον. So in Col. 1:24 ὑπὲρ τοῦ σώματος αὐτοῦ, ὁ ἐστιν ἡ ἐκκλησία; Col. 2:10 ἐν αὐτῷ, ὁς ἐστιν ἡ κεφαλή (cf. Eph. 4:15); Col. 2:17 συμβατῶν, ὁ (some MSS. ὁ) ἐστιν σκιά τῶν μελλόντων; Rev. 5:6 ὡρθαμβόος ἐπιτά, οὗ ἐστίν τὸ [ἐπιτά] πνεύματα. In Rev. 21:8, τὸ μέρος αὐτῶν ἐν τῇ λίμνῃ τῇ καιομένῃ πορεί καὶ θείῳ ὁ ἐστιν ὁ θάνατος ὁ δεύτερος, the agreement is regular, but the idea of ὁ may be more inclusive than merely μέρος. Cf. 1 Pet. 3:4.

On the other hand the relative is assimilated in gender to the predicate substantive. This is also a perfectly natural agreement. Winer5 considers that this is true particularly when the predicate presents the main idea. See Mk. 15:16, τῆς αὐλῆς, ὁ ἐστιν πραττόμενον; Gal. 3:16, τῷ σπέρματί σοι, ὁς ἐστιν Χριστός; Eph. 6:17, τὴν μάχαιραν τοῦ πνεύματος, ὁ ἐστιν ῥήμα θεοῦ; Rev. 4:5, λαμπάδες—ὁ ἐστιν τὸ ἔπτα πνεύματα (but some MSS. αἱ). Cf. 2 Th. 3:17. The MSS. vary in a number of instances between agreement with antecedent and predicate. So Col. 1:27, τοῦ μυστηρίου τούτου—ὁς (or ὁ) ἐστιν Χριστὸς. Cf. also 1 Tim. 3:16, where the true text ὁς is changed in the Western class of documents to ὁ to agree with μυστήριον. See also Eph. 1:13 f., τῷ πνεύματι—ὁ (MSS. ὁς) ἐστιν ἄρρητον. So αἱ or ὁ in Rev. 5:8. In Mt. 13:31 f. κόκκῳ is followed first by ὁν and then by ὁ (cf. σπέρματον).

In another group of passages the change is made according to the real gender rather than the grammatical. Thus in Ac. 15:17 τῷ ἔθνη ἐφ ὀου (cf. 26:17), Jo. 6:9 παιδάριον ὁς ἔχει, Ro. 9:23 f. σκεύη ἐλέους—οὖς, Col. 2:19 κεφαλῆν ἐξ ὀου, Phil. 10 τέκνον ὅν, Rev. 13:14 θηρίῳ ὁς. In Gal. 4:19 οὖς is preceded by both ὁμοιοῦς and ὠμοιοῦς.

---

3 V. and D., Handb., etc., p. 56. “The disuse of ὁς in common speech is characteristic; so simple a form ceased to satisfy the desire of emphasis.” Jebb in V. and D., p. 302.
4 Cf. W.-Sch., p. 231 f.
5 W.-M., p. 207.
In a passage like 1 Cor. 15:10, εἷμι δὲ εἰμὶ, there is no mistake. See ὃς above in verse 9. It is not ‘who I am,’ but ‘what I am,’ not exactly ὃς either, but a more abstract idea than that. Cf. ὃς in Jo. 4:22, used twice for the object of worship, God. So in 1 Jo. 1:1 observe ὃς ὢν—ὁ ὄρκομεν, ὃς ἐφοράκαμεν (cf. verse 3) for Jesus. One may recall here that the collective abstract neuter, πᾶν ὃς (Jo. 6:37, 39; 17:2), is used for the disciples. Cf. ὃς—καὶ ἥκεν τί (Jo. 17:24).

Sometimes also the relative agrees neither with the antecedent nor with a predicate substantive, but gathers the general notion of ‘thing.’ A good example occurs in 1 Jo. 2:8, ἐντολήν καὶ στις γράφω ὢν, ὃς ἐστιν ἀληθής, ‘which thing is true.’ So Eph. 5:5, πλεονέκτης, ὃς (Western and Syrian classes read ὃς) ἐστιν ἐδωλολάτρης, ‘which thing is being an idolater.’ A particularly good example is Col. 3:14 where ὃς comes in between a feminine and a masculine, τὴν ἄγαπην, ὃς ἐστιν σύνδεσμος. In Mk. 12:42 we have a similar example, λεπτὸ δύο, ὃς ἐστιν κοπράντης.

Indeed ὃς ἐστιν comes to be used as a set expression, like τοῦτο ἐστιν, without any regard to the antecedent or the predicate, as ὃς ἐστιν ὦλοι βροντῆς, Mk. 3:17. Three phrases go together in this matter, ὃς ἐστιν, ὃς ἐρμηνεύεται, ὃς λέγεται. The two latter occur in the periphrastic form also. Indeed the examples just noted above may very well be explained from this point of view. So Mt. 1:23, Ἐμμανουὴλ, ὃς ἐστιν μεθερμηνευόμενον μεθ᾽ ἡμῶν ὅ θεός, where observe [Page 714] the neuter participle like ὃς. Cf. Ac. 4:36. In Mt. 27:33, Γολγοθα ὃς ἐστιν κρανίου τόπος λεγόμενος, the participle is masculine like τόπος (cf. Mk. 15:22). In Jo. 1:39 ὃς λέγεται μεθερμηνευόμενον connects two vocatives. Cf. 20:16. In Jo. 1:41 note the accusative and nominative connected with neuter participle, Μεσσίαν ὃς ἐστιν μεθερμηνευόμενον Χριστός. So ὃς ἐστιν occurs between verb-forms, as in Mk. 5:41; 7:34; or genitives as in Heb. 7:2; Rev. 20:12; 21:17; or whole clauses, as in Mk. 15:34. But see Jo. 9:7; Rev. 20:2. In Ac. 9:36, however, the personal construction occurs, Τοβεθα, Ἡ διερμηνευόμενη λέγεται Δορκάς. See also chapter X, VIII, (c).

Once more, ὃς is used to refer to a verbal idea or to the whole sentence. Instance Mt. 12:4, τοὺς ὃς ἔφη προθέσεως ἐφαγον δὲ οὐκ ἔξον ἦν αὕτω φαγεῖν. Here probably τὸ φαγεῖν is the idea referred to,¹ though in Mk. 2:26 and Lu. 6:4 we have οὐ. The neuter gender is only natural here. In Ac. 2:32 οὗ is most likely ‘whereof,’ though ‘of whom,’ referring to Ἰησοῦν, is possible. So as to 3:15. But there is no doubt as to Ac. 11:30, ὃ καί ἔποιησαν; 26:10, ὃ καί ἔποιησα; Gal. 2:10, ὃ καί ἐποίωσα αὐτὸ τούτο ποιήσα (note here the use of αὐτῷ τοῦτο in the relative clause); Col. 1:29 εἰς ὃ καὶ κοπιῶ (cf. εἰς ὃ in 2 Th. 1:11; 2:14; 1 Pet. 2:8). Cf. also ὃ καὶ ὕμᾶς ἄντιτύπον νῦν σώζει βάπτισμα (1 Pet. 3:21). Per contra see in the papyri ὅν

1 W.-Sch., p. 233.
used like ὁ after analogy of τοιοῦτον.² Note in passing ὁ ὁ in Lu. 2:15, like ἦ ἦ τε in Heb. 9:2.

5. Number. Here again, as a rule, the relative concurs with the antecedent in number, as in ἀστήρ ὁν (Mt. 2:9), θεοῦ ὁς (Ro. 2:6). The construction according to sense is not infrequent, as in πλήθος τοῦ (Lu. 6:17 f.), κατά πόλιν πάσαν ἐν αὐτός (Ac. 15:36, note distributive idea), μωρολογία ἔτυμπελία ὅ (Eph. 5:4, where feminine singular could have occurred because of ἦ), γενναῖος— ὁς (Ph. 2:15), δευτέρον ὑμῖν γράφω ἐπιστολήν, ἐν αὐτός (2 Pet. 3:1, referring to both, probably). Cf. ὁ— λέγοντας (Rev. 5:13). On the other hand note the change from the plural to the singular in ἡμέραι δόδεκα ὅς (Ac. 24:11), and ἐν οὐρανοῖς— ἐξ οὗ (Ph. 3:20). For the neuter plural in the relative (cf. τοῦτο) to cover a vague general idea see ὅν in 1 Tim. 1:6, ὅν οὐν Lu. 1:20, ὅν ὁς Lu. 12:11 (cf. Ac. 26:12), ἐξ ὁς Ro. 6:21, etc. Cf. Col. 2:22.

6. Case.

(a) Absence of attraction normal. The obvious way is for the case of the relative to be due to the construction in which it is used or to follow the same law as other nouns and pronouns (so [Page 715] with prepositions). That is to say, assimilation of case is not a necessity. It was indeed in a sense an after-refinement. One must not get the notion that assimilation of case had to be. Thucydides,¹ for instance, did not use it so extensively in his rather complicated sentences, where the relative clauses stand to themselves. Indeed the absence of it is common enough in the N. T., outside of Luke. Cf. Mt. 13:31 κόκκῳ ὁν, Mk. 13:19 κτίσεως ἦν, Jo. 2:22 λόγῳ ὁν (cf. 4:50), Jo. 4:5 χωρίου ὅ (CD οὗ), Tit. 3:5 ἔργων ὅ, Mt. 27:60 μυθείῳ ὅ, Ac. 8:32 γραφῆς ἦν. Not to be exhaustive, one may refer to the rather long list in Winer-Schmiedel² (Mt. 13:44, 48; 23:35; Lu. 13:19, 21; Ac. 1:4; 4:10; 1 Tim. 6:21; Heb. 6:19; 8:2; 9:7; 1 Pet. 1:8; Rev. 1:20, etc.). The absence of assimilation in case is not only common in the old Greek, but also in the LXX, the Apocrypha and the papyri. In Aristotle attraction is nearly confined to the more recondite essays (Schindler, De Attractionis Pronominum Rel. Usu Aristotelico, p. 94).

(b) Cognate accusative. The accusative in Ro. 6:10, ὃ ἀπέθανεν, ὃς, and Gal. 2:20, ὃς κατά, may be called adverbial. In reality it reproduces the idea of the verb (cognate acc.). Cf. Mk. 10:38 f.

(c) Attraction to the case of the antecedent. This is very common in the N. T., especially in the writings of Luke. The papyri, even “the most illiterate of them,”³ show numerous examples of attraction, “a construction at least as popular in late as in classical Greek.” This applies to the LXX also. The MSS. naturally vary sometimes,

² Mayser, Gr., p. 310.
1 Blass, Gr. of N. T. Gk., p. 173.
2 P. 226.
some having attraction, others not. Indeed Blass\(^4\) finds this “always” in the passages in W. H. without attraction save in Heb. 8:2. Cf. ἐν (Ἡς) in Mk. 13:19, ὥ (ἡ) in Jo. 2:22; 4:50, etc. On the whole attraction seems the more common. But this “idiomatic attraction of the relative” occurs only twice in Matthew (18:19; 24:50) and once in Mark (7:13),” whereas it “is very common in Luke” (Plummer, Comm., p. lii). The effect of “this peculiar construction” was to give “a sentence more internal unity and a certain periodic compactness.”\(^5\) No instance of attraction of a nominative to an oblique case occurs in the N. T., though this idiom is found in the ancient Greek.\(^6\)

[Page 716] It is usually the accusative case that is assimilated into another oblique case. Thus the accusative may be attracted into the genitive, as πράγματος ὦ (Mt. 18:19), λόγου ὦ (Jo. 15:20), πάντων ὄν (Ac. 1:1; 3:21; 22:10), διαθήκης ἦς (Ac. 3:25), ἐπαγγελίας ἦς (7:17), ἐθνῶν ὄν (7:45), πνεύματος ἦς ὄν (Tit. 3:6). Cf. also Ac. 9:36; 22:10; 1 Cor. 6:19; 2 Cor. 10:8, 13; Eph. 1:8; Heb. 6:10; 9:20; Jas. 2:5. In several instances it is the accusative of the inner object that is attracted. Cf. Eph. 1:19 f. So παρακλήσεως ἦς παρακαλούμεθα (2 Cor. 1:4), χάριτος ἦς ἐχαρίτωσεν (Eph. 1:6), κλήσεως ἦς ἐκλήθητε (4:1), φονῆς ἦς ἐκέκραξε (Ac. 24:21), ἐργον συμβείαι ὄν ἥσσεβήσαν (Ju. 15).\(^1\) There are examples also of the accusative attracted to the ablative. So ἐκ τῶν κερατίων ὄν (Lu. 15:16), ἐκ τοῦ ὑδάτος ὦ (Jo. 4:14), ἀπὸ τῶν ὑψιαίων ὄν (21:10), ἐκ τοῦ πνεύματος ὄν (1 Jo. 3:24). Cf. Jo. 7:31. Then again the assimilation of the accusative to the pure dative might have been expected, but curiously enough I find so far no example of it in the N. T. In 1 Cor. 7:39 there is an instance of the relative attracted from the accusative to the dative of an omitted antecedent, ἔλευθερα ἔστιν ὥς θέλει γαμηθῆναι, unless γαμηθῆναι be repeated, when ἦς is the necessary case. However, several examples occur where the accusative is attracted to the locative or the instrumental. Instances of the locative are found in ἐν ἡμέρᾳ ὦ—ἐκ ὥρα ἦς (Mt. 24:50. This is not an instance of one preposition for antecedent and relative), ἐπὶ πᾶσιν οἷς (Lu. 2:20; 9:43; 24:25), ἐκ τῶν ὄνοματι σου ὦ (Jo. 17:11 f.), ἐν τῷ μνήματι ὦ (Ac. 7:16), ἐν ἀνδρί ὦ (17:31), ἐπὶ τῷ λόγῳ ὦ (20:38), ἐπὶ τῇ ἀκαθαρσίᾳ ἦς (2 Cor. 12:21), ἐπὶ ἐργοῖς ἐγαθῶν οἷς (Eph. 2:10), \(^2\) ἐν—θλίψειν αἷς (2 Th. 1:4), ἐκ τῶν ποτηρίων ὦ (Rev. 18:6). This is probably true also of 1 Cor. 7:20, ἐν τῇ κλήσει ἦς ἐκλήθη, where ἦς would have been the cognate accusative.\(^3\) For attraction to the instrumental see παραδότει ἦς (Mk. 7:13), δοξη ἦς (Jo. 17:5, but W. H. have ἦς in margin), σημείον ἦς (Ac. 2:22), θυσίας αἷς (Heb. 10:1, but W. H. ἦς). In a few instances it is an open question whether we have attraction or not. Thus in Jo. 13:5, τῷ λευθ ὦ ἦς διέξωσάμενος, either the instrumental ὦ or the accusative ὦ (cf. Jo. 21:7) is correct. In Ac. 9:17, ἐν τῇ ὧδῳ ἦς ἦρξατο, the cognate accusative ἦς is possible, though the locative originally is more likely. In 1 Th. 3:9, ἐκλάκη ἦς ἄνοιγμα, a cognate accusative was possible (ἡν) attracted [Page 717] to the locative or an original instrumental. In Col. 1:23, τοῦ εὐφαγείλου οὗ ἱκουσατε, either the accusative or the genitive might occur with ἤκοιο. But in 2 Tim. 1:13, λόγων ὄν

4 Gr. of N. T. ἀκ., p. 173.
5 W.-Th., p. 163.
6 Thompson, Synt. of Att. ἀκ., p. 71; W.-Sch., p. 227.
1 Cf. Blass, Gr. of N. T. ἀκ., p. 174; Moulton, Prol., p. 93.
2 But in W.-Sch. (p. 225) οἷς is held to be essential to the structure. For attraction in John see Abbott, Joh. ἀκ., p. 298.
3 But see per contra, W.-Sch., p. 223.
(δ) Inverse attraction. What is called inverse attraction is due to the same tendency to identify antecedent and relative, only the assimilation is that of the antecedent to the relative. In itself this phenomenon is no more peculiar than the other. Plato, who uses the ordinary attraction very often, seldom has inverse attraction (Cleef, De Attractionis in Enuntionibus Rel. Vsv Platonico, pp. 44–46). No inverse attraction is found in Pisidian Greek (Compernass, De Sermone Gr. Volg. Pisidiae Phrygiaeque meridionalis (1895)). The examples are not very numerous in the N. T., but the ancient Greek amply supports the [Page 718] idiom.\(^1\) One example, λίθον ὄν ἅπαξ σκόμμασι, occurs in Mt. 21:42; Mk. 12:10=Lu. 20:17. It is from the LXX (Ps. 118:22). In 1 Pet. 2:7 W. H. read λίθος. Cf. also Lu. 1:73, ὅρκον ὄν ἅμωσον, which might have been ὅρκον ὄν after μηνήθησάν.\(^2\) See also 1 Cor. 10:16, τὸν ἄρτον ὄν κλώμεν. Hence also τὸ ποτήριον ὃ εὐλογοῦμεν of verse 16. If ὃ is a part of the text (not W. H.) in Ac. 10:36, we have τὸν λόγον ὄν.\(^3\) Sometimes anacoluthon occurs also as in παῦν ῥῆμα ἄργαν ὃ—περὶ αὐτοῦ, Mt. 12:36; ἐὰς ὃς ἄρεῖ—ἀφεθήσεται αὐτῷ, Lu. 12:10; παῦν ὃ ἐδόθη—ζητηθήσεται παρ ἄρτοι, 12:48; παῦν ὃ ὅρκον ἅμωσον, Jo. 6:39; παῦν ὃ ἅμωσον αὐτῷ δοσὶ αὐτῷς, 17:2. In 2 Cor. 12:17, μὴ τινὰ ὃν—ζεὶ αὐτοῦ, we have anacoluthon, but not attraction. In Mt. 25:24, συνάγεις δόθεν ὃν διεσκόρπισας, we

---

1 W.-Sch., p. 225. Hort in note to text says: "ἄν probably a primitive error for ὄν."
2 Cf. W.-Sch., p. 226 f.
3 Compernass COMPERNASS, De Sermone Gr. Volg. Pisidiae Phrygiaeque meridionalis (1895).
1 Cf. Thompson, Synt. of Att. Gk., p. 71.
2 Blass, Gr. of N. T. Gk., p. 175.
have ἐκεῖθεν ὅπου shortened to ὅθεν. There is not inverse attraction in οὗδεῖς ὃς (1 Cor. 6:5) since ἦν precedes οὗδεῖς.

(c) Incorporation. But the most striking instance of this close unity between antecedent and relative is the incorporation of the antecedent into the relative clause with identity of case. I count 54 such examples in Moulton and Geden. They are fairly well distributed through the different portions of the New Testament.

1) The simplest form of such incorporation is where no change of case is required. Thus Lu. 24:1, φέρουσαι θητόμεσας ἀρόματα; Jo. 6:14, ἰδόντες ὁ ἐποίησαν σημεῖα (W. H.); Mt. 7:2, ἐν ὃς γὰρ κρίνετε κρίνετε κρίθησετε, καὶ ἐν ὃς μέτρῳ μέτρετε μετρηθήσεται ὑμῖν=Mt. 4:24=Lu. 6:38; Mt. 24:44, ἦν οὐ δοκεῖτε ὃς=Lu. 12:40 (not Mt. 24:50). For further examples of this simple incorporation see Mt. 23:37=Lu. 13:34 (the set phrase, adverbial accusative, ὃν τρόπον), so also Ac. 1:11; 7:28; 15:11; 27:25; Mk. 2:19 (ὁς γρόνου; but not Lu. 12:46=Mt. 24:50); Lu. 17:29 f.; Jo. 9:14; 11:6; 17:3; Ac. 7:20; 25:18; probably 26:7; Ro. 2:16; 7:19; 9:24 (οὗς—ἡμᾶς note); 16:2; Ph. 3:18 (but probably only predicate accusative like Mk. 15:12); 2 Tim. 1:6 (ὁι ἤν). In 1 Jo. 2:25 there is not exactly incorporation, but apposition to the relative. In Lu. 8:47; Ac. 22:24 and Heb. 2:11 the case is the same also, but the preposition would have been needed only with the relative. Cf. Phil. 10; 2 Tim. 1:12; Heb. 13:11. See ὁν—πονηρῶν, Ac. 25:18, where there is incorporation and attraction to the case of the antecedent. The same thing is true of [Page 719] of Rev. 17:8, where βλεπόντων agrees with ὁν. In Heb. 13:11, ὃς θέλων—τοίνυν, the substantive is incorporated, but the demonstrative is repeated afterwards. Cf. also ὁ—αὐτὸ τοῦτο (Gal. 2:10). It is possible that Ro. 4:17 belongs here, the preposition κατέναντι being understood twice. The same thing may be true of Lu. 1:4, περὶ ὧν κατηχήθης λόγων τῆς δισφάλειαν (either λόγων [or περὶ λόγων] περὶ ὧν or πεπὶ λόγων οὗς).

2) But sometimes besides incorporation there has resulted a change of case also. The antecedent may be drawn into the case of the relative (cf. inverse attraction) as in Mk. 6:16, ὁν ἐγὼ ἀπεκεφάλισα Ἰκώνην οὕτος ἤγερθη. Here the demonstrative pronoun is resumptive. The change is made from nominative to accusative. The same thing is true of the spurious passage in Jo. 5:4, ὃ δῆποτε κατείχετο νοσήματι (change from genitive to instrumental). This is probably true of Ac. 21:16, ἄγνοτες παρ ὃς ἐξεισθάναντο Μνᾶσοντι τινι Κιπρίῳ. The resolution of this passage is not certain, but it may be ἄγνοτες Μνᾶσον παρ ὃς (change from accusative to locative). But πρὸς Μνᾶσον may be correct.

In Ro. 6:17, ὑπηκοούσετε ἐλι παρεδόθητε τίποτι διάφυς, the resolved form would probably be τίποτι διάφυς ἐλι παρεδόθητε. In Heb. 7:14, ἐλι ἦν φυλή, the substantive would have been in apposition with ἔλι Ἰουδα (the ablative). In Heb. 10:10 ἐν ὃς θελήματι the accusative τὸ θέλημα is present in the preceding sentence. The same thing is true of 1 Pet. 1:10, περὶ ἔς σωτηρίας (σωτηρίαν just before). In 2 Cor. 10:13 we have in the same sentence the substantive repeated (once incorporated and

4 This is more than “occasional,” as Blass says (Gr. of N. T. Gk., p. 174). He rightly notes the absence of the article.
1 Thompson (Synt. of Att. Gk., p. 71 f.) finds this change only in the acc. But this is not Attic.
attracted to the case of the relative, but the relative itself attracted to the case of κανόνος), κατὰ τὸ μέτρον τοῦ κανόνος οὗ ἐμέρισεν ἡμῖν ὃ θεὸς μέτρου.

3) In a few instances the attraction has been that of the relative to the case of the antecedent, transferred to the relative clause. See Ac. 25:18, ὅν ἐγὼ ὑπενόμενον πονηρῶν. For examples with prepositions (see chapter on Prepositions) note: περὶ πάντων ὃν ἐποίησεν πονηρῶν (Lu. 3:19), περὶ πασῶν ὃν ἐδόν δινάμεων (19:37), where the incorporation is only partial. It is clear therefore that in the great majority of instances there is no change of case required. Very many also are set phrases like ὃν τρόπον, ἦν ὃρφη, ἦν ἠμέρη, διὰ ἦν αἰτίαν, etc. For presence of the antecedent see Jo. 16:17 f.

7. Absence of Antecedent. It so often happens that the relative has no antecedent that it calls for special consideration. [Page 720] The clause indeed often becomes a substantive rather than an adjective clause. ὃς thus occurs in general statements as in Mt. 10:14; 23:16, 18 (cf. also substantive rather than an adjective clause.

So both may be examples of the genitive, as συγγενής ὃν οὗ ἀπέκοψεν Πέτρος τῷ ὦτιον (Jo. 18:26) where οὗ = τοῦτοι οὗ. So in 1 Cor. 7:1 περὶ ὃν = περὶ τούτων (or πραγμάτων) περὶ ὦν. But in ὥρα ὅν (Rev. 2:25) we really have ὥρα καιροῦ ὃν (or ὅν ὃν). In Lu. 23:41, ἦν ὃν ἐπράξεις, the resolution is τοῦτον ὃν (gen. and acc.). So in Jo. 17:9 περὶ ὃν ἰδέας = περὶ τούτων οὗς. In Ac. 21:24 ὃν κατήχηται περὶ σοῦ οὐκ ὄδευ = τούτων ὃν, etc. Exactly so ὃν in Lu. 9:36; 22:22; 25:11; Ro. 15:18; 2 Cor. 12:17. In Ac. 26:16, μάρτυρα ὃν τε ἐδέξασθε, the second ὃν that gives trouble. The antecedent would be τούτων and the relative before attraction either ὃ (acc. of general reference) or οἷς (locative or instrumental). In Ro. 4:7 ὃν has as its unexpressed antecedent ὄρατον. Cf. also Ac. 13:25. In Mt. 6:8 (so Jo. 13:29), ὃν χρείαν, the antecedent would be in the accusative. So also περὶ ὃν, Ac. 24:13. In Lu. 17:1 δὲ οὗ is resolved into τούτῳ δὲ οὗ (dative). In Ro. 10:14, πῶς πιστεύσωσιν οἷς οὐκ ἠκούσαν, we probably have οἷς = εἰς τούτων (or τούτῳ) οὗ.

The examples of the ablative are not many. See Jo. 7:31 where ὃν after πλείονα σημεῖα is to be resolved into τούτων ὃν (abl. and acc.). So in Ac. 26:22 ἐκτὸς ὃν ἐκτὸς τούτων ὃν. In Heb. 5:8 ἄφρο = ἀπὸ τούτων ὃν, while in 2 Cor. 2:3 ἄφρο = ἀπὸ τούτων ᾦν. Cf. Lu. 6:34, παρὰ ὃν, 1 Cor. 10:30. In Ac. 13:39, ἀπὸ πάντων ὃν, the one preposition covers both ablatives.

For the dative I note ὃς δέδοται (Mt. 19:11), where the antecedent like πάντες would have been in the nominative. Cf. Lu. 7:43, 47 ὃς; Ro. 15:21 οἷς and 2 Pet. 1:9
In 1 Cor. 7:39, ὁ ἀπέλευ καθημερινα, the antecedent would have been in the dative also. So also 2 Cor. 2:10 ὁ; Ro. 6:16 ὁ twice. In 2 Tim. 1:12, οἷς ὁ [Page 721] πεπατεσκεα, it is the accusative rather followed by dative, αὐτὸν ὁ. In Mt. 20:23 (Mk. 10:40) the antecedent of οἷς is probably τούτων. In Ro. 10:14 the antecedent of οὗ would be τούτῳ.

Some few examples of the locative appear also. Cf. ἐξο οἷς, Ro. 6:21, where the antecedent would have been ἐπὶ τούτους. So Ro. 2:1 and 14:22 ἐν ὁ implies ἐν τούτῳ (cf. also 1 Pet. 2:12; 3:16), but not so verse 21 where ἐν ὁ refers to an involved τί or μηδέν. In Ro. 7:6 ἐν ὁ may involve τούτῳ ἐν ὁ. In Heb. 2:18 ἐν ὁ (=ἐν τούτῳ ἐν ὁ) really has a causal force. In Ph. 4:11 ἐν οἷς=ἐν τούτους ἐν οἷς, but in 2 Tim. 3:14 ἐν οἷς=ἐν τούτους ὁ Cf. 2 Pet. 2:12 (but ταύτα ἐν οἷς may be correct).

I have noticed no examples of the instrumental. But great freedom and variety are manifest.

8. Prepositions with the Antecedent and Relative. The preposition may be used twice1 “in the case of a sharper division of the relative clause.” So eἰς τὴν γήν ταύτην, εἰς ἑνη, Ac. 7:4; ἀπὸ πρώτης ἠμέρας ἐκ ης, 20:18. Then again the preposition may occur with the antecedent, but not with the relative, though implied, as in ἐν παντὶ χρόνῳ ὁ σεληνεῖν, Ac. 1:21. So the margin in Ro. 2:16 ἐν ἡμέρᾳ ἡ. Cf. Lu. 1:25. It is possible also so to understand ἐν τῇ δόξῃ Ἐν ἡρχο, Ac. 9:17. But it is clearly true of ἀπὸ πάντων ὁν, Ac. 13:39.

On the other hand the preposition may occur with the relative, but not with the antecedent. Thus ἐκεῖνη τῇ ὁρᾷ ἐν ἤ, Jo. 4:53.

When the antecedent is absent, the preposition may be the one common to both, as in ἐξ ὁν (2 Cor. 2:3), or which belongs to only one. Cf. παρ ὁν (Lu. 6:34), ἐξ ὁις (Ro. 6:21), ἐν ὁις (Ph. 4:11), ὑπὲρ ὠ (1 Cor. 10:30), ἐν ὁ (Ro. 14:22), εἰς ὁν (Ro. 10:14), περὶ ὁν (1 Cor. 7:1), etc. This “one” may be the antecedent, as in the following examples, εἰς ὁν (Jo. 6:29)=εἰς τούτον ὁν, περὶ ὁν (Jo. 17:9)=περὶ τούτων ὁις, ὑπὲρ ἃ (1 Cor. 4:6)=ὑπὲρ ταῦτα ἃ, ἐν ὁν (Heb. 5:8)=ὑπὸ τούτων ἃ, εἰς ὁν (Jo. 19:37)=εἰς τούτων ὁν, etc. Or the “one” may be the relative, as δἰ ὧν (Lu. 17:1)=τούτῳ δἰ ὧν, ἐξ ὧν (Heb. 7:13)=οὗτος ἐξ ὧν, etc. The use of prepositions is common in the same way with the relative and its incorporated antecedent. See ἐν ὁ κρίματι (Mt. 7:2), ἄχρι ἡς ἠμέρας (Lu. 1:20), δἰ ἡν αἰτίαν (Lu. 8:47), παρ ὁ—Μνάσωνι (Ac. 21:16), εἰς ὅν—τόπον (Ro. 6:17), ἄφρ ἡς ἠμέρας (Col. 1:9), περὶ ἡς σωτηρίας (1 Pet. 1:10), etc. Cf. Ro. 16:2.

---

1 Blass, Gr. of N. T. Gk., p. 174.
As a matter of fact the examples are not very numerous in the N. T. It occurs several times in Rev. (3:8; 15:8; 22:18). Indeed καθό (Ro. 8:26) is καθό, καθότι (Ac. 2:45) is καθό, καθότερον (Ro. 4:6) is καθό ἀπερ. Cf. ἐκείνον (Mt. 9:15), καθό ἰδέαν (Heb. 3:3).

Adverbs show the same phenomena as other relative forms. Thus in Ro. 5:20 οὗ has no antecedent. In 1 Cor. 16:6 οὗ ἐκέλευσεν ὡς. So ὃν τοῦ in Jo. 11:32 ἐκέλευσεν ὡς and in Jo. 20:19 ἐνταῦθα ὡς. In 2 Sam. 14:15 ὃ = conjunction.

10. Pleonastic Antecedent. The redundant antecedent incorporated into the relative clause has attracted considerable attention. In Herodotus 4, 44 ὃς—ὁτός occurs, and Blass cites Hyper. Eux. § 3, ὡς—ὁτός. But in ancient Greek it was a very rare usage. In Winer-Schmiedel examples of pleonastic ὃς—ὁτός are cited from Xenophon, Diodorus Siculus, Pausanius, Sophocles. Pleonastic ὃς—ὁτός appears in Aristophanes, Birds, 1237, ὃς ὑπερέτον ἀπότος. Reference also is made to Sophocles and Lucian. In the LXX the idiom is extremely common, manifestly under the influence of the Hebrew יְלַעֲשַׁי (cf. Aramaic יָשַׁי). It “is found in all parts of the LXX and undoubtedly owes its frequency to the Hebrew original. But the fact that it is found in an original Greek work, such as 2 Macc. (xii. 27 ἐν ἰδίᾳ ἐν ἀυτῇ) and a paraphrase such as 1 Esdras (iii. 5, 9; iv. 54, 63; vi. 32), is sufficient to warrant its presence in the koine.” For numerous examples of the idiom in the LXX see Winer-Schmiedel, p. 200, and Winer-Moulton, p. 185. Cf. also Conybeare and Stock, Selections, pp. 65 ff. As a matter of fact the examples are not very numerous in the N. T. It occurs several times in Rev. (3:8 ἐν—ὁτήν, 7:2 ἡς ἐδόθη ἀπότος, 7:9 ὡς—ὁτόν, 13:8 οὗ—ὁτοῖ, 20:8 ἰδέας—ὁτόν). Outside of the Apocalypse, which so strongly bears the influence of the LXX, the usage is infrequent. See Mt. 3:12, ὡς τὸ πτῶν ἐν ἰδίᾳ ἐπί τοῖς ἔντει ἀυτοῖς, an example hardly parallel as a matter of fact. But a clearer instance is Mk. 1:7 (=Lu. 3:16 f.), ὡς—ὁτοῖ, and still more so 7:25, ἂς ἐξεί τὸ νομίσμα τοῦ ἀυτοῦς. Cf. also ὅς—τοιαύτη (Mk. 13:19), ὅς—ὁτοί (Mk. 9:3), ὡς—ἐκεῖ (Rev. 12:6, 14), ὡς—ἐκεῖ (Rev. 17:9). In Ac. 15:17, ἐκεῖνος—ἐκεῖνος we have a quotation from the LXX (Amos 9:12). “The N. T. examples are all from places where Aramaic sources are certain or suspected”

Moulton, *Prol.*, p. 95. One almost wonders, after this admission, why Moulton, p. 94, seems so anxious to prove that the idiom in the N. T. is not a Hebraism. By his own admission it seems a practical Hebraism there, though the idiom had an independent development in the Greek. The early sporadic examples in the ancient Greek\(^2\) blossom out in the later Greek again and in the modern Greek become very common. Psichari\(^3\) considers it rather far-fetched in Moulton to appeal to the modern Greek vernacular, ὁ γιατρὸς ποῦ τὸν ἔστειλα, ‘the doctor whom I sent for,’ since the modern Greek vernacular just as readily uses ποῦ without αὐτόν. Psichari complains that Thumb\(^4\) also has not explained clearly this idiom. But Psichari believes that the

Thumb
idiot existed in the vernacular κοινή (and so fell in readily with the Hebrew usage) and has persisted to the present day. He considers the example from a papyrus of the third century A.D. (P.Oxy. I, 117, 15) decisive, ἐξ ὧν—ἐξ αὐτῶν. See also P. Amh. II, 11, 26, διὰ τοῦ ψαφερὸν τοῦ ἐγένετο. Moulton has given abundant examples from Old English. So in Chaucer (Knightes Tale, 1851 f.):

“Namely oon,

That with a spere was thirled his brest-boon.”

He compares also the German der du bist. Simcox cites vernacular English “a thing which I don’t like it.” Evidently therefore the idiom has had independent development in various languages in the vernacular. According to Jannaris (Hist. Gk. Gr., p. 353) the relative is in such cases regarded as “a mere connective.”

Jannaris

JANNARIS, A. N., A Historical Greek Grammar (1897).

———, On the True Meaning of the Koivή (Class. Rev., 1903, pp. 93 ff.).
In Gal. 3:1, οἷς—ἐν ὑµῖν, W. H. reject ἐν ὑµῖν. In Gal. 2:10, δ—αὐτὸ τοῦτο, we have the intensive use of αὐτὸ, but τοῦτο is pleonastic. In 1 Pet. 2:24, δὲς—αὐτὸς, we have again intensive αὐτός.

11. The Repetition of ὅς. Winer⁸ rightly remarks that it is a misapprehension of the Greek genius to expect the relative rather than αὐτός or αὐτοῦ in a case like Jo. 1:7; Lu. 2:36; 19:2; Ac. 10:36. The old Greek could, and commonly did, use οὗτος or more usually αὐτός with καί to continue the narrative. Blass² rather curiously calls it “negligent usage.” Cf. Lu. 13:4, ἐφοῦ οὗς ἔπεσεν ὁ πῦργος καὶ ἀπέκτεινεν αὐτοὺς; 1 Cor. 8:6, ἐξ οὗ—καὶ εἰς αὐτὸν and δι οὗ—καὶ δι αὐτοῦ (cf. Heb. 11:4); 2 Pet. 2:3, οἷς—καὶ αὐτῶν; Rev. 17:2, µἐθησὲν ὅς—καὶ αὐτῆς. In Lu. 17:31 καὶ ὅ occurs rather than καὶ αὐτός. Cf. Jo. 13:24. In Jo. 1:33, ἐφὶνοῦ—καὶ ἐπὶ αὐτῶν, the repetition of the relative would have been impracticable. But in 1 Cor. 7:13 Paul might very well have written ἠτίς—καὶ ὅς rather than καὶ οὖτος (a sort of parenthesis). It is common,³ also, to have neither the relative repeated nor the demonstrative. So ὅς γε τοῦ ἰδίου ὑιοῦ οὐκ ἔφεστο, ἀλλὰ ὑπὲρ ἡμῶν πάντων παρέδωκεν αὐτόν (Ro. 8:32). Cf. Ph. 4:9.

But the relative may be repeated. A good many such examples occur in the N. T. Καί may be used, as ὅν καὶ ὅν (Ro. 4:7). Cf. also οὖ—ὡς καὶ (Ac. 27:23) and ὁν τε— ὅν τε— (Ac. 26:16). Cf. 1 Cor. 15:1 f., ὅ—ὅ καὶ—ἐν ὅς καὶ—δι οὗ καὶ. See Jo. 21:20.

But examples occur also of the repetition of the relative without any conjunction, as in ὅς—ὅν—παρ ὦ (Ac. 24:6). See 1 Cor. 4:17. Cf. ὅς—ὁς, etc. (Ph. 4:8). This repetition of ὅς is specially frequent in Paul. Cf. Col. 1:24, 28 f.; Eph. 3:11 f.; 1 Cor. 2:7 f., though it is not exactly “peculiar” to him (Winer-Moulton, p. 209). In 1 Jo. 1:1 ὅ is repeated without conjunction three times, while in verse 3 ὅ is not repeated with the second verb. In 1 Pet. 1:6–12 four sentences begin with a relative. In Ro. 9:4 f. we have οἵνας—ὡν—ὡν—καὶ ἐξ ὅν.

The use of ὅν ὅν ὅς together (Lu. 12:3) finds abundant parallel in the LXX, easily falling in with the Hebrew construction⁴ with יְבָשָׂ. Thus a double relative occurs.

Winer

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

8 W.-M., p. 186.
2 Gr. of N. T. Gk., p. 175.
3 “Normal” indeed. Thompson, Synt., p. 70.
4 Thack., Gr. of O. T. in Gk., p. 25.
In Ro. 4:21 the conjunction of ὅτι ὁ is merely accidental; but that is not true of ὅτι in 1 Jo. 4:3. Cf. also oloth ὅτι in Ro. 9:6.

12. A Consecutive Idea. This may be implied in ὅς. Thus in Lu. 7:4, ὅς ἐστιν ὃ χαρέϊ τουτο. One is reminded of qui in Latin.5 Cf. also τίς ἐστιν ὁ πότερος ὁπως in Ro. 9:6. Cf. also οἷον ὅτι in Ro. 9:6. Cf. also 1 Jo. 4:3. See also chapter XIX, Mode.

13. Causal. ὅς may also introduce a causal sentence. So ὅς [Page 725] γε in Ro. 8:32. Cf. Latin quippe qui. This is perfectly regular in ancient Attic. Cf. Thompson, Syntax of Attic Greek, p. 374. See also chapter XIX, Mode.

14. In Direct Questions. The passage in Mt. 26:50, ἔταρκε ὁ πάση, is the only one in the N. T. where such a construction is possible. There is no doubt as to the occasional use of ὅς (see (e), 9), ὅπως, ὅποτερος, ὅπως in direct questions in the ancient Greek. For examples see Jannaris, Hist. Gk. Gr., p. 473 f. See further chapter XIX, Mode. This double use of relative pronouns is on a par with the double use of interrogative stems (cf. indefinite) so common in the Indo-Germanic tongues.1 The Latin qui and quis are kin in root and usage. Moulton2 rightly considers it “superfluous to say that this usage cannot possibly be extended to direct question.” Winer3 explained the “misuse” as belonging to late Greek. A few examples4 of ὅς in a direct question do occur. So in Euseb., P. E. vi, 7.257 d, Gaisford edition, ἄν ἤνεκα; Just., Cohort. 5 (p. 253 A), ὅν αἰτίαν—προσέχεις ὁμήρῳ; Apophth., 105 C, Ἀρσένε, ὅ ἐξῆλθες; Certainly the idiom was chiefly in the vernacular and rare even there. Blass’ conjectures a slip in the text, ἀπεραν ἐξ ἐν οἷον ὅς συνβιβάσῃ αὐτόν; We may suppose “a rather harsh ellipsis” of the principal verb and treat it as an ordinary relative.6 ὅς may indeed here be demonstrative as suggested by Noah K. Davis.7 There was undoubtedly in the later Greek considerable confusion in the use of the relatives and the interrogatives. It is not impossible for ὅς here to be interrogative. That is as much as one can at present say. Blass thought it “quite incredible.”

15. In Indirect Questions. Here the matter is much clearer. Even Blass8 admits that “relatives and interrogatives become confused in Greek as in other languages.” In the classical language ὅς (still more ὅςτις) is “frequently” so employed. This use comes from Homer on down and occurs in Aristophanes, Sophocles, Herodotus, Xenophon, Plato, Lysias. Thucydides’9 uses it side by side with ὅςτις. The papyri have it as

8 Gr. of N. T. Gk., p. 175.
9 Thompson, Synt., p. 74. Cf. also Jann., Hist. Gk. Gr., p. 473; Moulton, Prol., p. 93.
Moulton has shown.10 [Page 726] Cf. φράζοντες ἐν ἐνί κόμημι οἴκουσίν, R. L. 29 (iii/B.C.); φροντίζω δὲ ὅσοι ἔργασθήναι, P. P. ii. 37 (ii/B.C.). It is a little surprising, however, to find Blass1 saying that this usage “is wanting in the N. T.” W. F. Moulton2 in his footnote gives undoubted examples of ὁς in indirect questions after verbs of knowing, declaring, etc. So οὕδε—ὡν χρείαν ἔχετε, Mt. 6:8; ἄρα, ὁ ἄντρατε ἄγκουστε, 11:4; εἰδόθα πάντες, Mk. 5:33; ἄνεγγοτε ὅ ἐποίησεν, Lu. 6:3 (cf. Mt. 12:3 τί); μὴ ἔστις ὅ λέγετι, 9:33; δι᾽ ἑνώ πάντες ἔκαλεσαν, ἄνεγγοτε, Lu. 8:47 (cf. Ac. 22:24); ἐκδίδαει ημᾶς ὅ δὲ οὖσιν ἔμεθεν, 12:12. But not 2 Tim. 1:12. And then in 1 Tim. 1:7 we find ὅ λέγουσιν and περὶ τίνων διαβεβαιοῦται used side by side after μὴ νοοῦντες. Cf. also Jo. 18:21. One may compare3 also Lu. 11:6, οὐκ ἔχοι ὃ παραθήσω αὐτῷ, with Mk. 8:2 (Mt. 15:32), οὐκ ἔχουσιν τί φάγωσιν. See also ὁς ἵνη in Lu. 8:47, and note ὃς in Lu. 23:55; 24:35, not to mention ὁς, ὁσοῦ.

16. The Idiom οὐδεὶς ἐστιν ὁς. It occurs in the N. T., as Mk. 9:39; 10:29; Lu. 1:61; 18:29; 1 Cor. 6:5. For οὐδεὶς ἐστίν ὁς οὐ see Mt. 10:26 (cf. Lu. 8:17). Here one is reminded of the old idiom οὐδεὶς ὁστὶς. Mayser (Grammatik, p. 310) calls attention to the papyri use of ὁδοῦ = ὁ of ὁστὶς ὃς after analogy of τοσοῦτον(v). Cf. τίς—ὁς οὖ in Ac. 19:35. The N. T. does not use4 ἐστιν ὁς, εἰσὶν οὐ=τίς, τινὲς.

(e) ὁστὶς.

1. Varied Uses. The form is, of course, merely ὁς and τίς. But we have seen a variety of uses of ὁς, and τίς likewise is not entirely uniform. Hence the combination cannot be expected to be so.

2. The Distinction between ὁς and ὁστὶς. It was not ironclad in the ancient language, as may be seen by reference to the Epic, Ionic, Attic poets, and to Herodotus (once Thucydidides).5 Blass6 finds that the distinction between them is no longer regularly preserved in the N. T., least of all in Luke, best of all in Paul. Moulton7 finds some examples in the papyri of ὁστὶς in the sense of ὁς, but doubts if the two relatives are ever absolutely convertible and thinks that on the whole the classical distinction remains undisturbed, though sometimes during the κοινὴ period it had worn rather thin.8 But Jannaris9 holds that ὁστὶς, having a wider scope [Page 727] than ὁς, in postclassical times was used indiscriminately for ὁς. He is supported by

Kaelker about Polybius. But in the vernacular modern Greek ὅτι is alone common, other forms of ὅστις being rare, though ὅστιος and ὅστινοι are found (Thumb, Handb., p. 93 f.). Krüger calls ὃς “objective” and ὅστις “qualitative and generic.” W. F. Moulton defines ὅστις as properly indicating the class or kind to which an object belongs. But no exact parallel can be drawn nor uniform distinction preserved. Each has its own history. Jebb takes ὅστις to refer to class in ancient Greek and hence is either indefinite or causal. In the modern Greek it is still indefinite, but has also in the vernacular displaced ὅς in the masculine and feminine nominative. In the LXX ὅστις is less frequent than ὃς and is almost confined to the nominative and accusative. In the papyri it is less frequent than ὃς and is usually in the nominative as in the N.T. (Moulton, Cl. Rev., 1904, p. 154).

3. The Indefinite Use. This is, as a matter of fact, still the least frequent in the N. T. There are about 27 of the indefinite and 120 of the definite use (Scott). Cf. ὅστις σὲ ῥαπιζεὶ εἷς τὴν δεξίαν σιαγόνα (Mt. 5:39), ὅστις ἄρνησιται μὲ (10:33), ὃς ἄν αἰτήσητε (Jo. 14:13), ὅστις ἔδω ῃ (Gal. 5:10). Thus it is used with indicative or subjunctive, with or without ἄν (ἐάν). Cf. Mt. 13:12. In Mk. 8:34 ἐὰν τίς does not differ very greatly from ὅστις. Cf. also ἐὰν μή, Mk. 10:30. Πᾶς ὅστις is, of course, indefinite also. Thus Mt. 7:24; πῶς ὃ τι ἐὰν ποιηθεί (Col. 3:17), etc. For πᾶσα ψυχή ἦτε ἄν see Ac. 3:23 (LXX). In P. Par. 574 (iii/A.D.) note ὅστις ποτὲ ἐὰν εἴ.

4. The Definite Examples. These are partly causal clauses. Some indeed seem merely descriptive. Thus Mt. 7:15, τῶν ψευδοπροφητῶν ὅστις ἔρχονται. Cf. also Mt. 7:26; 13:52; 21:33, etc. The value of the pronoun sometimes does not differ greatly from ὃς and expresses quality. Thus εὐνοοῦχοι ὅστις, Mt. 19:12; ἄλλοις γεωργοῖς ὅστις, 21:41; παρθένοις ὅστις, 25:1, etc. Once indeed we actually have τοιαύτη ἦτε (1 Cor. 5:1). Cf. also ποταπὴ ἡ γυνὴ ἦτε (Lu. 7:39). See also Gal. 4:24, 26. Then again it may be merely explanatory as in γυναικὲς πολλὰ—ἀἵτινες ἥκολούθησαν τῷ Ἰησοῦ (Mt. 27:55). Cf. Mk. 15:7; Lu. 12:1; Col. 3:5; Rev. 11:8, etc. This use of ὅστις is particularly frequent with proper names. [Page 728] So Lu. 2:4,

1 Quest., p. 245 f.
2 Gr., p. 139. For the confusion between ὅς and ὅστις see also Brug., Griech. Gr., p. 558 f.
3 W.-M., p. 209, n. 3, where a very helpful discussion occurs.

5 Thack., Gr., p. 192.
6 Mayser, Gr., p. 310.
εἰς πόλιν Δαυείδ ἦτις καλεῖται Βηθλεέμ. Cf. also Lu. 8:26; Ac. 16:12, etc. Abbott, *Joh. Gr.*, p. 303, takes the explanatory or illustrative examples=‘now he,’ ‘one that.’ Moulton points out that ὅστις at the beginning of a parable (cf. Mt. 20:1) is really a type and so appropriate. In an example like Lu. 1:20, τοῖς λόγοις μου οἰνίνες πληρωθῆσονται, Moulton takes it to be ‘which for all that’ (almost adversative), while in Lu. 10:42 ἦτις οὐκ ἐφαρμοθησται αὐτής="and it shall not be taken away from her.’ There is no doubt about the causal use of ὅστις (cf. qui and quippe qui). See Jo. 8:53, Ἀβραὰμ ὅστις ἀπέθανεν (‘seeing that he died’); Ac. 10:47, οἰνίνες τὸ πνεῦμα τὸ ἅγιον ἑλάβον (‘since they received the Holy Spirit’). Cf. also Ac. 7:53; Ro. 2:15; 6:2; Heb. 8:6; 10:35; Eph. 3:13; Ph. 4:3; Col. 3:5; Jas. 4:14; 1 Pet. 2:11, etc.

5. *Value of ὃς?* It is a matter of dispute whether in the N. T., as usually in modern Greek, ὅστις has come already to have merely the force of ὃς. There are undoubted examples where it is equal to ὅσπερ (‘which very’). So Ac. 11:28, ἦτις ἐγένετο, ἔπι Κλαυδίου. Cf. also Ac. 13:31; 16:16; 1 Cor. 3:17, etc. Blass goes further and finds ὅστις in Luke purely in the sense of ὃς. He is supported by Jebb who says that “no natural interpretation can make it more in Lu. 2:4.” In Acts at any rate a fairly good case can be made out for this weakened sense of ὅστις. Cf. 8:14 f. Πέτρον καὶ Ἰωάνης ὅτινες, 12:10 τὴν πύλην ἥτις, 17:10. See also Rev. 12:13. Moulton gives an exact parallel from the papyri for Mt. 27:62, τῇ ἐπαύριον ἦτις ἔστιν μετὰ τὴν παρασκευὴν (ἀφιν ἦτις ἔστιν ἰδί). He quotes Hort also (*Comm.*, 1 Pet. 2:11) in favour of the position that in some places in the N. T. no distinction can be drawn between ὃς and ὅστις. Blass denies that Paul uses ὅστις as the equivalent of ὃς. I confess that I fail to see a great deal of difference between οἰνίνες and ὃς in Ro. 16:4, οἰνίνες and of in 16:7. Cf. also ὃς and ἦτις in verses 5 f.

6. *Case.* There is little here that calls for comment. We do not have attraction or incorporation. As a matter of fact only three cases occur (nom., gen., acc.). The stereotyped phrase [Page 729] with ἐως and the genitive, ἐως ὅτου, occurs five times.

Abbott

———, Johannine Grammar (1906).

———, Johannine Vocabulary (1905).

2 Gr. of N. T. Gk., p. 173.
3 V. and D., Handb., p. 302.
4 Prol., p. 91.
5 Gr. of N. T. Gk., p. 173.
6 The pap. show the same situation. Moulton, Cl. Rev., April, 1904, p. 154. Thus ἔντινα BM 77 (viii/A.D.), ἔντινα inscr. J.H.S., 1902, p. 349, ἐξ ὅτου BM 190 (iii/?), ἐως ὅτου NP 56 (iii/A.D.).
Cf. Mt. 5:25; Lu. 12:50 (Luke three times, Matthew and John once each). This is the only form of the shortened inflection. The LXX once¹ (2 Macc. 5:10) has ἦστινος, elsewhere ὅτι. The accusative is found in the N. T. only in the neuter singular ὅτι (absent from modern Greek). But see (note 6, p. 728) occasional ὅτινα and ἦτινα in the papyri. So Lu. 10:35, ὅτι ἐν προσδαπανήσῃς. Cf. ὅτι ἐν, Jo. 2:5; 14:13; 15:16; ὅτι ἔν, Mk. 6:23; 1 Cor. 16:2 f.; Col. 3:17; ὅτι alone, Jo. 8:25; Ac. 9:6. The other examples are all in the nominative. In Ac. 9:6 the clause is nominative.

7. Number. In general the number of ὅστις agrees with that of the antecedent. But in a few instances ὅστις agrees with the predicate. So with 1 Cor. 3:17, ναὸς ὅστις—ἀμείας, Eph. 3:13, θλίψεως ἡτις—δόξα. Cf. Ac. 16:12.

9. Direct Questions. Examples of ὅστις in direct questions are found in Aristophanes and Plato as quoted by Jannaris.² An example of it occurs also in 1 Chron. 17:6, ὅτι οὐκ ὡδομήσατε μοι οίκον κέδρινον; Here the Hebrew has ἡμῖν. Cf. also 2 Ki. 8:14 in AB, ὅτι where other MSS. have τί. In Barn. Ep. c. 10 we have ὅτι δὲ Μωϋσῆς ἐξηκρέν; Vulgate has quare.³ Jannaris⁴ gives a number of instances for the later Greek. And yet Blass⁵ calls it “quite incredible,” a remark impossible to justify in the light of the facts. It is, indeed, unusual, but there is no a priori reason why the N. T. writers could not occasionally use ὅστις as a direct interrogative. One may note also the use of ὅτι in a direct question.¹ The N. T. examples are all confined to ὅτι. In Mt. 7:14 ὅτι is certainly merely causal, not exclamatory nor interrogative. In Mk. 2:16 ὅτι (sec.) read by BL 33, is accepted by

⁵ Gr. of N. T. Gk., p. 176.
¹ Lachmann, Praef., p. 43.
W. H. and Nestle as interrogative. AC al. read τί ὅτι, while ΝΔ have διὰ τί. It is possible, to be sure, that ὅτι may be an “abbreviation”\(^2\) or “ellipsis”\(^3\) for τί ὅτι. But it is more probable that it is here regarded as tantamount to an interrogative (τί ὅτι or διὰ τί). Moulton (Cl. Rev., 1904, p. 154) quotes ὅτι τί in B.U. 607 (ii/ii.A.D.) γράψον μοι ὅτι ἔπραξας. But in Mk. 9:11 the Greek uncialss all give the first ὅτι. This is all the more remarkable since the second ὅτι is clearly a conjunction. The Latin MSS. give variously quare, quia, quid, etc., and some Greek cursives πῶς οὖν. ‘Why’ is the natural and obvious idea.\(^4\) So in Mk. 9:28 ὅτι is read by the great mass of MSS. (including ΝBCL), though AD and a number of others have διὰ τί, some even have ὅτι διὰ τί (conflate reading), a few τί ὅτι. In John 8:25 both W. H. and Nestle print as a question, Τὴν ἄρξην ὅτι καὶ λαλῶ ὑμῖν; The Latin versions have quod or quia. It is a very difficult passage at best. Τὴν ἄρξην ὅτι may be taken to mean ‘Why do I speak to you at all?’ (τὴν ἄρξην=διὰ λόγου). But there may be ellipsis,\(^5\) ‘Why do you reproach me that (ὅτι) I speak to you at all?’ If necessary to the sense, ὅτι may be taken here as interrogative.\(^6\) Moulton\(^7\) admits the N. T. use of ὅστις in a direct question. Recitative ὅτι is even suggested in Winer-Schmiedel,\(^8\) but the occasional interrogative use of ὅτι is sufficient explanation. But the passage in Jo. 8:25 is more than doubtful. Chrysostom takes ὅτι there as relative, Cyril as causal.\(^9\)

10. **Indirect Questions.** In ancient Greek ὅστις is exceedingly common in indirect questions, sharing the honours with τίς.\(^10\) The astonishing thing about this use of ὅστις is its almost entire absence from the N. T. (cf. modern Greek, where it is not used in this sense). No example has yet been shown from the papyri. Indeed the relative forms, the so-called indirect interrogatives, are not common in the N. T. in that sense.

5 Blass, Gr. of N. T. Gk., p. 176.
6 Simcox, Lang. of N. T., p. 68.
7 Prol., p. 94.
8 P. 238. The use of ὅτι τί lends colour to the notion of recitative ὅτι.
The direct interrogatives are the rule in the N. T. in indirect questions.1 Only one instance of ὅς in an indirect question is found in the N. T., Ac. 9:6, λαλήσεται σοι ὅτι σε δέν ποιλόν. Even this reading, though supported by ḌABC, Blass rejects “in view of the general practice elsewhere,” a needless conclusion. Why not call it a “literary” mark in Luke? ὅπως is so used once (Lu. 24:20), ὅποι not at all (not even Jo. 14:4), ὅποι in 1 Th. 1:5, and ὅποιος only in 1 Cor. 3:13; Gal. 2:6; 1 Th. 1:9; Jas. 1:24. See further chapter XIX.

(f) Ὁἶος.

1. Relation to ὅς. This correlative form is related to ὅς as qualis is to qui. The antecedent τοιοῦτος is not, of course, always expressed. But it is qualitative, and not a mere relative like ὅς or even ὅστις. In the modern Greek the word has disappeared except the form ὅγιος (Ὅ ὅς)3 in the dialects and is rare (14 times) in the N. T. Mayser4 merely mentions it in his Grammatik d. griech. Papyri. It is in the N. T. usually without τοιοῦτος, as in Mt. 24:21, but it is several times followed by τοιοῦτος, as in 1 Cor. 15:48; 2 Cor. 10:11. A rather unusual instance is ὅς—τῆλικοῦτος σασμάς ὅτως μέγας (Rev. 16:18). In 2 Cor. 12:20 ὅν is, of course, first person. So ἔν 1 Th. 1:5.

2. Incorporation. No instance of attraction occurs, but an example of incorporation is found in 2 Tim. 3:11, ὅς διωκμοῦς ὑπήγεικα. In Rev. 16:18 the addition of τῆλικοῦτος ὅτως μέγας after ὅς is by way of explanatory apposition. But in Mk. 13:19, ὅς ὅποι πέραντος τοιαῦτη, the incorporation is redundant after the fashion of ὅν—αὐτόν.

3. Indirect Question.5 Like ὅς we have ὅς so used. Cf. 1 Th. 1:5, ὅδετε ὅιοι ἐγενήθημεν. In 2 Tim. 3:11 we may have an indirect question also. The Textus Receptus for Lu. 9:55 (D has ποίου) has another instance of the use of ὅς in an indirect question, ὅποι ὅδετε ὅιον πνεῦματος ἐστε ὑμεῖς.

4. Number. ὅς may agree in number with the predicate rather than the antecedent. So 1 Cor. 15:48, ὅς—τοιοῦτοι. Note the difference in the position of the negative in ὅχι ὅς and ὅν oύ, 2 Cor. 12:20. Blass, Gr. of N. T. Gk., p. 179, calls τὸν αὐτόν—ὁν (Ph. 1:30) peculiar.

5. ὅν τε ἔστιν. The only example1 in the N. T. is in Ro. 9:6, ὅχι ὅν δέ ὅτι, where note the absence of τε. It does not occur in exclamations.

(g) ὅποιος.

---

2 Gr. of N. T. Gk., p. 175.
3 Jann., Hist. Gk. Gr., pp. 87, 168; Thumb, Handb., p. 94.
4 P. 311.
5 Cf. K.-G., II, p. 439, for exx. in the older Gk.
1 For a different explanation=οὗ δῆ που ἐκπεπτ. see Blass, Gr. of N. T. Gk., p. 179.
1. **Qualitative.** It corresponds to the interrogative ποιος. It is very rare in the N. T. (see Declensions), but occurs in modern Greek vernacular for ‘whoever’ (Thumb, p. 93). In the literary modern Greek ὁ ὅποιος, Jannaris thinks that the use of the article was due to the Italian *il quale* and the French *lequel* (cf. Old English *the which*), since educated scribes objected to the vernacular ὅπου and ποι.  

2. **Double Office.** Like ὅποιος, ὅσος and ἡλίκος it has the double office of relative and indirect interrogative. Four of the N. T. instances are indirect questions (1 Cor. 3:13; Gal. 2:6; 1 Th. 1:9; Jas. 1:24). In Gal. 2:6, ὅποιοι ποτε, we have the indefinite form (‘whatever kind’). Note here the use of τι and ὅποιος. In 1 Cor. 3:13 the antecedent is expressed and repeated by redundant αὐτό.  

3. **Correlative.** Only one instance is correlative, Ac. 26:29, τοιοῦτος ὅποιος. Cf. *qualiscumque*. Note here the difference in number.  

4. **Quantitative.** It is found in the LXX like ὅποιος and ὅσος and survives in the modern Greek. There are a hundred and eight instances in the N. T. (W. H. text) which display great variety of usage. Radermacher (*N. T. Gr.*, p. 63) notes that in Philo ὅσος is often equal to οὐ.  

5. **Antecedent.** The presence of the antecedent is not common outside of πάντες ὅσοι (Ac. 5:36, 37), πάντα ὅσα (very common, as Mt. 7:12; 13:46; 18:25; Mk. 11:24, etc.), ὅσοι—αὐτός (also frequent, as Ro. 8:14; Gal. 6:12, etc.). Cf. ὅσοι—αὐτός in Jo. 1:12. But in Mk. 3:28 ὅσα ἔχει ἀμαρτήματα and βλασφημίαι as antecedents and naturally is neuter. Cf. Ac. 3:24; 9:39; Rev. 21:16. It is common without antecedent both in the masculine (ὅσοι Mt. 14:36) and the neuter (ὅσα Mk. 9:13).  

6. **Attraction.** This was possible in Jo. 6:11, ἐκ τῶν ὅσαρίων ὅσον ἥθελον, but it does not occur. In Lu. 11:8, ὅσαι αὐτῶν ὅσων χρῆσαι, the regular construction occurs. In Winer-Schmiedel it is stated that attraction is found in the N. T. with ὅσος. I find no real examples outside of the few cases of incorporation now to be mentioned.  

---

3 V. and D., Handb., p. 303.  
4 Moulton, Prol., p. 93.  
6 Thack., Gr., p. 192.  
1 P. 224.  
4. Incorporation. In Ac. 9:13 ὥσα κακά is an instance. Mk. 2:19 has ὥσον χρόνον. The other examples (Ro. 7:1; 1 Cor. 7:39; Gal. 4:1) are all instances of ἔφῳ ὥσον χρόνον.

5. Repetition. In Mk. 6:30 we have in W. H. ὥσα καὶ ὥσα (not Tisch.). But in Ph. 4:8 ὥσα is repeated six times without καὶ. In Heb. 10:37 ὥσον ὥσον (LXX) is in imitation of the Hebrew in Hab. 2:3. Cf. also Is. 26:20 and D on Lu. 5:3 where ὥσον ὥσον=Ὀλίγον of the other MSS. But that this is not an essential Hebraism, but a vernacular idiom in harmony with the Hebrew, is now clear.4

6. With ἄν. Note the use as an indefinite relative (Mk. 6:56; Lu. 9:5; Jo. 11:22; Ac. 2:39; 3:22, etc.) and with ἐὰν (Mt. 7:12; 18:18; 23:3; Mk. 3:28, etc.).

7. Indirect Questions. The instances are fairly numerous. So ἄκοιντες ὥσα ποιεῖ (Mk. 3:8); ἄπαγγελον ὥσα—πεποίηκεν (5:19). Cf. 5:20; Lu. 8:39; 9:10; Ac. 4:23; 2 Tim. 1:18, etc.

9. Adverbial. ἔφῳ ὥσον (Mt. 9:15; 25:40; Ro. 7:1, etc.) and καθ ὥσον (Heb. 3:3; 7:20; 9:27) partake of the nature of conjunctions.

(i) Ἡλίκος. This form was used to express both age and size. Hence the corresponding ambiguity of ἡλίκια. Cf. for age Jo. 9:21, for stature Mt. 6:27. The pronoun is absent from the LXX, never very common, but survives in the literary modern Greek.5 It appears also in the papyri.6 Like the other relatives it might have had a double use in the N.T. (relative and indirect interrogative). But the few examples are all indirect interrogatives: Col. 2:1 εἰδέναι ἡλίκον ἄγωνα Ἐχώ, Jas. 3:5 ἰδοῦ ἡλίκον πῦρ ἡλίκην [Page 734] ὄντες. The examples in James may be regarded as exclamatory. Note also that ἡλίκον refers to smallness and ἡλίκην to greatness of the size. In Gal. 6:11 W. H. and Nestle read πηλίκος in the text and ἡλίκος in the margin. This again is indirect question after ἰδέει.

(j) Ὅ AS RELATIVE. The use of the τ forms of Ὅ, ἴ, τό as relative is very old in Greek. It appears in Homer and is common in Herodotus. In Arkadian Ὅ appears as demonstrative, as article and as relative (Meister, Die griech. Dialekten, Bd. II, p. 182 ff. For hist. of the matter see K.-Bl., I, pp. 608 ff. Meister

3 Blass, Gr. of N. T. Gk., p. 179. Blass also cites Aristoph., Vesp., 213.
4 Moulton, Prol., p. 97; Blass, Gr. of N. T. Gk., p. 330.
6 Mayser, Gr., p. 311.
1 Monro, Hom. Gr., pp. 182 ff. For hist. of the matter see K.-Bl., I, pp. 608 ff. Meister

MEISTER, R., Beiträge zur Lautlehre d. LXX (1909).
116). Cf. also South Ach. (Hoffmann, Griech. Dial., pp. 257, 292–300). Jannaris\(^2\) gives examples of it from Ionic (where very common), Doric and Attic (inscriptions), and sporadically in the later Greek. In modern Greek it survives only in sententious sayings with τά and in Crete and Southeast Greek (Thumb, p. 94). Mayser\(^3\) finds a few doubtful instances in the papyri. Wilcken (Archiv, I) gives some examples from B. M. as τό μοι δέδωκες (p. 292), τήν ἀγάπην τήν ποιεῖς (p. 301), and Moulton (Cl. Rev., 1904, p. 155) quotes πρός τό δύνομεν from B.U. 948 (iv/v A.D.) “very illiterate.” Mayser (op. cit.) gives numerous examples of ὁ καί which “first in Roman time” appears in the nominative. He compares this with the relative use ὃς καί and is inclined to regard ὁ καί as relative. The analogy of the Latin qui et favours the relative idea, but the article alone is sufficient in Greek. I would not insist on the relative for Ἐλῖος ὁ καί Πιλᾶος (Ac. 13:9), though admitting the possibility of it. It means (Deissmann), not ‘Saul who is henceforth Paul,’ but ‘also Paul.’ Cf. also Hatch, Jour.

of Bibl. Lit., Pt. II, p. 141 f., 1908. In truth this use of ὁ καὶ with double names was very common in N. T. times. Dieterich see no instance of ὁ as relative in the N. T. But in Rev. 1:4, 8; 11:17, we have ὁ ἦν. One either has to say that here ὁ is used as a relative or that it is a relative. It all comes to the same in the end. It may be a bit artificial, ὁ ὕν καὶ ὁ ἦν καὶ ὁ ἐρχόμενος, but the antique and vernacular relative ὁ came in as a resource when John did not wish to use γενόμενος of God, and since there is no aorist participle for ἐμί. Psychologically the article is called for here between two articles, but grammar can do nothing with it. If ἦν is treated as a substantive, that would call for τό as in τό δὲ Ἄνεβη (Eph. 4:9). Moulton finds several examples in late papyri of ὁ as relative (for ὁ as demonstrative see pp. 693 ff.), like τὴν χράτην τὴν δεδωκέν (p. 304). The only real difficulty in Rev. 1:4, 8, etc., is the nominative use, and that was not insuperable when the exigencies of the sentence demanded it. It is possible that this phrase had come to be a set phrase among the Christians for the eternity and unchangeableness of God. For the possible use of τίς as relative see under VIII.

VIII. Interrogative Pronouns (Ἀντωνυμία Ἐρωτηματικά).

(a) Τίς. The root of the interrogative τίς (Thess. κίς. Cf. Ionic κῶς, κότερος), indefinite τίς (cf. τε), is at bottom the same as the Indo-Germanic root quīs and Latin quis (aliquis, que). Curiously enough some of the grammars, Monro’s Homeric Grammar, for example, give no separate or adequate discussion of the interrogative pronouns.

1 Cl. Rev., April, 1904, p. 155.
1. **Substantival or Adjectival.** Τίς is either adjectival as τίνα μισθόν ἔχετε; (Mt. 5:46), or, as more commonly, substantival like τίς ὑπεδείξεν; (Mt. 3:7).

2. **The Absence of Gender.** That it appears only in the nominative and accusative is noteworthy. This fact probably had something to do with the gradual retreat of τίς before ποίος. The neuter in the N. T. occurs with adjectives only, as τίς ὑπέδειξεν; (Mt. 3:7).

3. **Τίς=ποίος.** An opposite tendency is seen in the use of τίς=ποίος. Hatzidakis has shown examples of this idiom as early as Euripides. As New Testament illustrations one may note τίς ὑπέδειξεν; (Lu. 19:16).

4. **Indeclinable τί.** In Jo. 18:38, τί ἔστιν ἀλήθεια, the neuter in the predicate calls for no special remark. So Gal. 3:19. Cf. Latin quid and English what in such a sentence. This idiom belongs to the ancient Greek and distinguishes between the essence of a thing (τί) and the classification of a thing (τίς), as Gildersleeve puts it (Syntax of Cl. Gk., p. 59). Cf. ὑμέν τίνας ἔστις; (Ac. 19:15) and τί ἐστιν ἔνθρωπος (Heb. 2:6). But this explanation will not hold for 1 Jo. 3:2, τί ἑσομένα, nor Ac. 13:25, τί ἐμὲ ὑπονοεῖτε. The text in Acts is not certain. The κοινή shows this development outside of the N. T. In the modern Greek “the neuter τί is used with all genders and cases both in the singular and plural” (Vincent and Dickson, Handb., p. 55). Cf. τί δῶρα εἶναι: ‘what o’clock is it?’ Τί γυναῖκα; ‘which woman?’ Thumb, Handb., p. 94. It

Vincent and VINCENT and DICKSON, A Handbook to Modern Greek (1887).
is not unusual in classical Greek to have τί as predicate to ταῦτα, as in Lu. 15:26 τί ὃν εἶν ταῦτα, Jo. 6:9 ταῦτα τί ἦσταν. So probably τί ταῦτα ποιήσατε; (Ac. 14:15), though τί here may be ‘why’ and not predicative. The usual construction appears in Ac. 17:20 τίνα θέλει ταῦτα εἶναι (cf. Jo. 10:6), 11:17 ἐγὼ τίς ἦμων; cf. Lu. 8:9. In Ac. 21:33 τίς and τί are sharply distinguished. The use of τί with γίνομαι is hardly in point here (Ac. 5:24; 12:18) as it is found in the Attic, τί γένομαι. In Jo. 21:21 οὗτος δὲ τί; we must supply γενόμηται.

5. Predicate Use of τί with τοῦτο. In Ac. 23:19, τί ἐστιν ὁ ἑξεις, we find the full expression. In Lu. 16:2, τί τοῦτο ὁκοῦ ἔρησον, we meet the abbreviated idiom. Cf. Ac. 14:15 τί ταῦτα (see also 9). Cf. Lu. 1:66; Ac. 5:24. The phrase τί πρός ἡμᾶς (Mt. 27:4), τί πρὸς σέ (Jo. 21:22) is matched by the Attic τί ταῦτα ἐμοί (Kühner-Gerth, II, 417; Blass, Gr. of N. T. Gk., p. 177). Cf. οὗτος τί (Jo. 21:21). Blass (ib.) also compares τί γάρ μοι τοὺς ἑξον κρίνειν (1 Cor. 5:12) with the infinitive in Arrian, Diss. Epict., ii, 17. 14. Τί ἐξοι καὶ σοι (Jo. 2:4, etc.) is in the LXX (2 Ki. 3:13), but it is also a Greek idiom (ellipsis, Kühner-Gerth, ib.).

6. In Alternative Questions. Quality in general is nearly gone from the κοινή. Τίς when πότερος might have been used is not unknown in ancient Greek. Indeed even in Latin quis occurs sometimes instead of the more usual uter. In the LXX πότερος (Page 737) is supplanted by τίς and the particle πότερον occurs only once, and that in Job (literary). Moulton finds only one example of πότερος in the papyri, and that unintelligible. So in the N. T. πότερος does not occur as an adjective. So in Mt. 9:5 τίς γὰρ ἦστιν εὐκοπότερον εἰπεῖν—ἡ εἰπεῖν, 21:31 τίς ἐκ τῶν δύο ἐποίησαν, 27:21 τίνα θέλετε ἀπὸ τῶν δύο. Cf. also 23:17, 19; 27:17; Mk. 2:9; Lu. 7:42; 22:27; 1 Cor. 4:21; Ph. 1:22. Moulton notes that “whether, adjectivally, is as archaic as πότερος,” and predicts that “the best of the two” will be the English of the future.

8. As Relative. Just as ὃς and ὅστις came to be used as interrogatives, so τίς drifted occasionally to a mere relative. We have seen (1 Tim. 1:7) how the relative and the interrogative come to be used side by side. “In English, the originally interrogative pronouns ‘who’ and ‘which’ have encroached largely on the use of the primitive
relative ‘that.’”5 Moulton’s sketch of the facts6 makes it clear that in the N. T. τίς may be relative if the exigencies call for it. Moulton finds it only in the illiterate papyri, but the usage is supported by inscriptions7 and by the Pontic dialect today.8 Moulton9 gives from the papyri, εὕρων γεοργῶν τίς οὐτά ἐλκόση, B.U. 822 (iii A.D.); τίνος ἢν γράϕαι ἔχῃς, B.M. 239 (iv A.D.). From the inscriptions see τίς ἀν κακῶς ποιήσει, J. H. S., XIX, 299. Moulton8 also quotes Jebb on Soph., O. T. 1141: “Τίς in classical Greek can replace ὅτες only where there is an indirect question.” The plainest New Testament example of τίς as ὅς appears to be Mk. 14:36 οὐ τί ἐγὼ θέλω ὅλλα τί σοῦ. Cf. Mt. 26:39 οὐχ ὡς ἐγὼ θέλω, ὅλλα ὡς σοῦ. But it is not much more so than Mt. 15:32 οὐκ ἔχουσιν τί φάγοσιν (cf. Mk. 8:1 f) and Mk. 6:36 ἵνα—ἀγρόφασοιν ἐστοι τί φάγοσιν. Cf. οὐκ ἔχει ποῦ—κλίνη (Mt. 8:20), but ὅπου—φάγω (Mk. 14:14). See in the papyri, ὁδὲν ἔχω τί ποιήσω σοι, B.U. 948 (iv/v A.D.), as quoted by Moulton (Cl. Rev., 1904, p. 155). But even so Xenophon has this idiom, and Sophocles, Oed. [Page 738] Col. 317, has οὐκ ἔχω τί φῶ, which looks like an indirect question. Cf. Winer-Moulton, p. 211; Winer-Schmiedel, p. 240. It is not necessary to bring1 under this construction οὐ γὰρ ήδει τί ἀποκριθή (Mk. 9:6) nor Mk. 13:11. Here the idiom is really that of indirect question (deliberative question). Cf. the direct question in Mt. 6:31 with the indirect in 6:25. So in Mt. 10:19 (first example) and see 9. But the second example in Mt. 10:19 (ἀδόθησατο—τί λαλήσῃς) may be the relative use. Cf. also Lu. 17:8. In Ac. 13:25 the punctuation can (so Nestle, but not W. H.) be made so that τί is relative, τί ἐμὲ ὑπονοεῖτε; εἶναι, οὐκ εἰμὶ ἐγὼ. It is possible also thus to construe Lu. 19:3, ἰδοὺ ἠσόρου τίς ἔστιν, instead of τις ἔστιν as an accusative of general reference. Cf. Mk. 1:24, οἶδα σὲ τίς εἶ (Lu. 4:34 also). Cf. the prolepsis σοῦ τίς εἶ in Jo. 8:25. So Ro. 14:4, 10. The rhetorical questions in Lu. 11:5; 15:4, 8; Jas. 3:13 are not, of course, instances of this usage.2 Perhaps the anacoluthon in Lu. 11:11 (τίνα δὲ ἕξ ὑμῶν τὸν πατέρα εἰρήσῃ—ἐπιδόσῃ;) may have arisen because of this idiom. The distinction between τίς and ὅς is, of course, usually maintained (Jo. 16:18; Ac. 23:19; Heb. 12:7). It is at least noteworthy that in 1 Cor. 15:2 Paul changes from ὅς (used four times) to τίνα λόγῳ. An indirect question comes with a jolt and makes one wonder if here also the relative use of τίς does not occur. In Mt. 26:62 (οὐδὲν ἀποκριθή; τί οὗτοι σοι καταμαρτυροῦσιν;) we may have an indirect question (cf. Mk. 14:60), though πρός would be usual (cf. Mt. 27:14). It is better to follow W. H. with two separate questions3 and even so τί—τίς ἔστιν ὅ. The use of τίς as relative Blass4 calls “Alexandrian and dialectical.” The LXX (Lev. 21:17 ἄνθρωπος τίνι ἐδόν ἤ; Deut. 29:18 ἄνηρ—τίνος, Ps. 40:6 οὐκ ἔστιν τίς) does show examples of

9 Prol., p. 93.
9 Prol., p. 93.
1 As Simcox does, Lang. of the N. T., p. 69 f.
2 Cf. W.-Sch., p. 241; Moulton, Prol., p. 93.
3 W.-Sch., p. 241; Blass, Gr. of N. T. Gk., p. 331.
4 Gr. of N. T. Gk., p. 175.
it, but it is not confined to Egypt, as has been already shown.⁵ Brugmann (Griech. Gr., p. 561) finds τίς as relative in Bœotian and even rarely in the older Attic.

9. Adverbial Use. The neuter accusative τί is frequently used in the sense of ‘why’ in the N. T. This is classical and common and calls for little comment. It still appears in modern Greek (Thumb, p. 94). See Mt. 7:3 (τί βλέπεις τὸ κάρφος;) 8:26 (τί δειλοὶ ἔστε;) 19:17; 20:6, etc. In Ac. 14:15 τί ταῦτα ποιεῖτε we probably have τί=‘why.’ Cf. Mk. 11:3. In Mk. 2:24 τί ποιοῦσιν τοῖς σάββασιν ὃ ὑμᾶς ἔξεστιν; note ‘why,’ though τί is followed by ὃ. It [Page 739] is interesting to note πῶς ἦ τί, Mt. 10:19; Lu. 12:11. In Jo. 14:22 τί γέγονεν ὃτι we see the full form of the idiom τί ὃτι (Lu. 2:49; Ac. 5:4, 9). Here τί still=‘why.’ But in ἵνα τί (1 Cor. 10:29 and Mt. 9:4; 27:46; Lu. 13:7; Ac. 4:25; 7:26) τί is really the subject of γένηται (ellipsis). It is not unknown in Attic Greek.¹ W. H. never print ἵνα τί (cf. Mt. 9:4; Lu. 13:7). It is common in LXX.

10. With Prepositions. There is very little difference between τί=‘why’ and διὰ τί=‘because of what’ (Mt. 15:2, 3; 17:19; Lu. 24:38, etc.). Κατὰ τί (=‘according to what’) is practically ‘how.’ Cf. Lu. 1:18. For ἐν τίνι see Mt. 5:13. But πρὸς τί (Jo. 13:28)=‘for what purpose.’ In Jo. 13:22 περὶ τίνος λέγει there is no such idea. But purpose again is expressed by εἰς τί (Mt. 14:31; 26:8; Mk. 14:4; Ac. 19:3).

12. As Exclamation. In Mt. 7:14 W. H. read ὅτι (causal), not τί στενὴ ἡ πύλη. But in Lu. 12:49 καὶ τί θέλω εἰ ἦν ἁγίῳ there is no doubt of the text. W. H. punctuate as a question, but Nestle as an exclamation. Examples of exclamatory τί=‘how’ are found in 2 Sam. 6:20; Song of Sol. 7:6 and in the modern Greek, τί καὶ χαίρετε! Cf. Mullach, Vulg., pp. 210, 321; Winer-Moulton, p. 562. Blass² compares the Hebrew נָא. On the whole it is best to take τί in Lu. 12:49=‘how.’

² Gr. of N. T. Gk., p. 177.
13. **Indirect Questions.** It is, of course, the ancient idiom to have τίς in an indirect question. But in the N. T. the indirect interrogative ὃστις has disappeared in this idiom save in Ac. 9:6 (MSS. divided here). A good example of τίς occurs in Ac. 10:29 πιθάνομαι τίνι λόγῳ μετεπέμψασθέ με. In Luke we meet the neuter article rather frequently before the indirect question. So τὸ τί ἔδειλ (1:62), τὸ τίς ἔστη (9:46). Cf. 22:23, 24, etc. Blass (Gr. of N. T. Gk., p. 158) sees no special point in the article (cf. English “the which”). Paul sometimes uses it also (Ro. 8:26; 1 Th. 4:1 τὸ πῶς). The question is brought out rather more sharply by the article. The Attic use of τὸ τί or τὸ ποῖον (Thompson, Synt., p. 74) in reference to something previously mentioned is like our “The what?” Cf. Herm., Sim., VIII, i, 4, Clem., Hom., i, 6.

14. **Τίς or τίς.** Sometimes it is difficult to decide whether τίς or τίς is right. So 1 Pet. 5:8 W. H. have ζητῶν καταπιεῖν with τινὰ in the margin. But Nestle actually prints ζητῶν τίνα καταπιεῖν. In Heb. 5:12 W. H. road τινὰ and Nestle τινα (both indefinite). In Jas. 5:13 the reading is, of course, τις, not τίς. So 1 Cor. 7:18.

(b) Ηοῖος.

1. **Qualitative.** It occurs sixteen times in direct questions. It is still used in its original qualitative sense. Clearly this is true in Jo. 12:33, σημάινων ποίῳ θεών ἢμελλεν ὑποθνήσκειν (cf. 18:32), Ro. 3:27 (δι' αὐτοῦ νόμου; τῶν ἔργων;). The same thing is true of 1 Cor. 15:35 (ποίῳ σώματι ἔρχονται;), cf. also 1 Pet. 2:20. In 1 Pet. 1:11 we find both τίνα and ποίον in apparent contrast. Other possible instances are Jo. 10:32; Ac. 7:49 (LXX); Jas. 4:14. The common ἐν ποίῳ ἔρχονται (Mt. 21:23; Mk. 11:28; Ac. 4:7, LXX, etc.) seems also to retain the qualitative force. Cf. also Lu. 24:19. The qualitative sense is clear in D ποίου πνεύματος ἔστε (Lu. 9:55), a spurious passage, however.

2. **Non-qualitative.** But some examples clearly have lost the qualitative sense. In the modern Greek ποιός is used regularly=τίς, and is the usual interrogative. Note the accent ποιός. Indeed examples of this weakened sense of ποιός Jannaris finds as early as ΑEschylus and Euripides. See (a), 3. In Mt. 24:42 οὐκ οἴδατε ποίῳ ἢμέρᾳ ὃ κύριος ὑμῶν ἔρχεται there seems to be merely the force of τίς, not quality. Cf. also 24:43 ποίῳ φυλακῇ, Lu. 12:39 ποίῳ ὃρᾳ, Ac. 23:34 ποίας ἐπαρχείας, Rev. 3:3 ποῖαν ὥραν. This is probably true also of Mt. 22:36 ποία ἐντολή (Mk. 12:28). In Lu. 5:19 ποίας and 6:32 ο. ποία χάρις either point of view will answer.

3. **In Indirect Questions.** It occurs sixteen times (not counting Lu. 9:55) in this construction against four for ἢμελλος. Cf. indicative in Mt. 21:24; 24:42; Jo. 12:33; 21:19, and the subjunctive in Lu. 5:19 μὴ ποίας ἐσπενέγκωσιν. Ποιός is found in the LXX and in the papyri.

(c) Πόσος.
1. **Less Frequent than πόος.** It occurs chiefly in the Synoptic Gospels (twenty-seven times in W. H. text).

2. **Meaning.** It is used in the sense of ‘how much’ (πόσῳ Mt. 12:12), ‘how great’ (πόσον Mt. 6:23), and of ‘how many’ (πόσους ἄρτους ἔχετε; Mt. 15:34). Eleven examples of πόσῳ occur almost like an adverb (Mt. 7:11; 10:25, etc.). The use of πόσος χρόνος—ὡς (Mk. 9:21) is noteworthy.

[Page 741] 3. **In Indirect Questions.** See οὐκ ἀκούεις πόσα σου καταµαρτυροῦσιν; (Mt. 27:13). Cf. Ac. 21:20, etc.

4. **The Exclamatory Use.** This is found in Lu. 15:17 πόσοι μίσθοι τοῦ πατρός μου, and in 2 Cor. 7:11 πόσην κατειργάσατο ὑμῖν σπουδήν. The exclamatory use of πώς may be mentioned (Mk. 10:23 f.; Jo. 11:36). Cf. ὡς in Ro. 10:15 and 11:33. Cf. πόσος—ὡς in Mk. 9:21.

(d) Πηλίκος.

1. **Rare.** It is found only twice in the N. T. (Gal. 6:11; Heb. 7:4) and W. H. put ἡλίκοις in the margin of Gal. 6:11. It is rare also in the LXX (cf. Zech. 2:2), and has disappeared from the modern Greek vernacular.

2. **Indirect Questions.** Both of the N. T. examples are indirect questions. The example in Heb. 7:4 describes greatness of Melchisedek (how great), the one in Gal. 6:11 presents the size of the letters (how large).

(c) Ποταπός. It is the late form for ποδαπός. It no longer in the N. T. means ‘from what country,’ but merely ‘of what sort’=πόος. It is found only once in LXX (Susanna O 54, “where it keeps something of its original local meaning”). It exists in the late Greek vernacular. It occurs once in a direct question (Mt. 8:27) and once probably in an exclamation (2 Pet. 3:11). Four times we find it in indirect questions (Mk. 13:1; Lu. 1:29; 7:39; 1 Jo. 3:1). In Lu. 7:39 it is contrasted with τίς.

(f) Πότερος. As a pronoun it has vanished from the LXX (Thackeray, Gr., p. 192) and from the papyri (Moulton, Prol., p. 77). The only example in the N. T. (cf. LXX, Thackeray, p. 192) is in an alternative indirect question as the conjunction πότερον (Jo. 7:17). Cf. Latin utrum—an. Blass (Gr. of N. T. Gk., p. 176) cites Herm., Sim., ix, 28, 4.

Thackeray

---

———, Relation of St. Paul to Contemporary Thought (1900).
IX. Indefinite Pronouns (ἀνωνυμίαι ἄδριστοι).

(a) Τίς.

1. The Accent. Jannaris\(^4\) calls it “irrational” to accent the nominative τίς rather than τίς. But then the nominative singular never has an accent unless at the beginning of a sentence or in philosophical writings (Thompson, Syntax, p. 76) and cannot otherwise be distinguished in looks from τίς the interrogative.

2. Relation to τίς. The same connection is seen in the Latin \[Page 742\] quis, aliquis and quis-quis (cf. τίς in Argive dialect).\(^1\) Brugmann\(^2\) considers –κι in οὐκί, πολλάκις the same word as τίς and cites κις in the Thessalian dialect. Just as in modern Greek τίς disappears before ποιός, so τίς vanishes before κανείς (Thumb, Handb., p. 95). But in the N. T. τίς is still very common, especially in Luke and Acts. In general the usage is in harmony with that of ancient Greek. We do not have ἐνιοί in the N. T. In Ac. 25:26 note τίς γράψαι and τί γράψω. Cf. Lu. 7:40. See τις τί, Ro. 8:24, in margin of W. H.

3. Τίς as Substantive. As a substantive τίς may be equal to ‘any one,’ ‘anybody’ or ‘anything,’ as in οὐδὲ τὸν πατέρα τὸς ἐπιγνωσκει, Mt. 11:27; πῶς δύναται τίς, 12:29; εἶ τις θέλει, 16:24; ἡμῖν εἴπη τί (note both examples like τίνος τί Lu. 19:8; cf. Mk. 11:25; Col. 3:13), Mt. 21:3. For several instances of τίς=‘anything’ see Ac. 25:5, 8, 11. But the substantive use of τίς may be=’somebody’ or ‘something,’ as ἔρχεται τίς τίς, Lu. 15:36; ὑπὸ τινος Hebrew 3:4. Cf. Lu. 8:46. Often the partitive genitive (or ablative) occurs with τίς as substantive. So τίνες τῶν γραμματέων Mt. 12:38; τίς τῶν μαθητῶν Lu. 11:1; τις ἕκ τού χρύου 12:13. The plural is usually=’some,’ as Mk. 9:1; 1 Cor. 9:22. In Homer τίς was sometimes “public opinion, the man in the street” (Gladstone, quoted in Thompson’s Syntax, p. 75). This idiom is very nearly represented by ἔντις = τίς τίς τῶν δραματοῦ ὑπὸ τινος Hebrew 3:4 (cf. 11:1; 7:36). In Heb. 2:6, διεμαρτύρατο ποῦ τίς, the τίς is really quite definite in the writer’s mind, though he writes thus.

4. With Numerals=‘About.’ With numerals τίς sometimes in classical Greek gives an approximate idea rather than exact reckoning, like our “about.” No certain instances of this idiom appear in the N. T. Certainly not Ac. 19:14, where τίνος, not τινες, is the correct text. In Lu. 7:19, προσκαλεσάμενος δύο τίνος τῶν πατέρων τῷ δικαίῳ, the meaning may be ‘about two,’ but it could mean ‘certain two’ just as well. The same thing is true of Ac. 23:23, προσκαλεσάμενος τίνας δύο, where it is even less likely that the idea is ‘about two.’ Classical also is εἶς τίς (Lu. 22:50; Jo. 11:49, and probably Mk. 14:47). The adjectival uses of τίς are quite varied.

5. With Substantives. Here τίς may=‘a kind of,’ as ἄπαρχήν τινα, Jas. 1:18. Cf. Ac. 17:20, though this is not true of Col. 2:23 \[Page 743\] because of the negative.\(^1\) But

---

\(^4\) Hist. Gk. Gr., p. 163.
\(^1\) Brug., Griech. Gr., p. 244.
\(^2\) Ib. Interrogative and indefinite is at bottom the same word. Cf. Hartung, Über die Casus in der griech. und lat. Sprache, p. 279.
\(^1\) W.-Sch., p. 242.
the commonest use of τις with substantives is = ‘certain’ (really rather uncertain!). Thus ἵερεύς τις, Lu. 1:5; ὄνθερσας τις, Lu. 14:2, 16; 15:11, etc. Cf. τι ὑδωρ, Ac. 8:36. Sometimes it is difficult to give more force to τις than the English indefinite article. Cf. νομικός τις, Lu. 10:25; κριτής τις ἢν ἐν τινὶ πῶλει, Lu. 18:2. Indeed it is nearly always true that our “certain” is too emphatic.

6. With Adjectives. The effect is rhetorical. Thus Ac. 8:9, τινὰ μέγαν, = ‘a very great man’ (= ‘some great man’), in his own estimation. Blass needlessly considers this passage an interpolation. Cf. νομικός τις, Lu. 10:25; κριτὴς τις ἦν ἐν τινὶ πόλει, Lu. 18:2. Indeed it is nearly always true that our “certain” is too emphatic.

7. As Predicate. Here τις may be emphatic = ‘somebody in particular,’ as Ac. 5:36, λέγον ἐναί τινα ἐκατόν (cf. 8:9). See also Gal. 2:6, ἄπό των δοκοῦντον ἐναί τι, where note difference between τι and τινες. In Gal. 6:3 note in εἰ δοκεῖ τις εἶναι τι μηδὲν ὀν both senses of τις. But the predicate may have the other meaning of τι (= ‘anyone,’ ‘anything’). So 1 Cor. 3:7; 10:19; Gal. 6:15. In Gal. 2:6 compare τι and ὁ ποίος.

8. The Position of τις. It is not material. It naturally follows the substantive or adjective as in εἰς κόμην τινὰ, Lu. 10:38, but we often have the other order as in τινὰ χηραν, Lu. 21:2. Τινὲς may indeed begin a sentence (Ph. 1:15; 1 Cor. 8:7).

9. As Antecedent. In Mt. 16:28 τινές is the antecedent of οἱ τινες, but here οἱ τινες is more definite than οἱ would have been. Cf. Lu. 9:27. In 2 Cor. 10:2 note τινας τοὺς λ.

10. Alternative. It is used to express alternative ideas, as τινὲς μὲν—τινὲς δὲ in Ph. 1:15. Cf. ὑπὸ τινὸν—ὑπὸ τινὸν—ἄλλων δὲ in Lu. 9:7 f. and τις—ἄλλος in 1 Cor. 3:4.

11. The Negative Forms οὐ τις, μή τις. These are not printed as single words by W. H., except μήτι as an interrogative particle expecting the answer No, as in Mt. 26:22, μήτι ἐγὼ εἰμι, κύριε; cf. Jo. 4:33. It is all a matter with the editor whether in ἵνα μή τις [Page 744] εἰπῃ, 1 Cor. 1:15 (cf. Eph. 2:9), we may not really have μήτις. The separation in Heb. 3:13; 4:11 is against it. Cf., for instance, μή τινα (2 Cor. 12:17) and μήτι in the next verse. The anacoluthon with τινὰ here is noticeable.

12. Indeclinable τι. The use of τις with σπλάγχνα καὶ οἴκτημοι (Ph. 2:1) may be compared with indeclinable τι. Indeclinable τι itself survives in modern Greek κάτι (Moulton, Prol., p. 244).

---

3 Moulton in W.-M., p. 213.
4 Gr. of N. T. Gk., p. 178.
(b) **Εἷς=Τις.** This is merely one usage of εἷς, the cardinal numeral. The idiom is common after Plutarch, but traces of it occur earlier. Moulton sees no difference between εἷς and τις in Aristophanes, Av., 1292. The papyri furnish similar examples. “The fact that εἷς progressively ousted τις in popular speech, and that even in classical Greek there was a use which only needed a little diluting to make it essentially the same, is surely enough to prove that the development lay entirely within the Greek language, and only by accident agrees with Semitic.” This use of εἷς alone, with genitives, with substantives, was treated at the close of the chapter on Adjectives. For εἷς τις see τις. For εἷς—εἷς as alternative pronoun see later, and for εἷς—οὐ and οὐδείς (μηδείς) see Negative Pronouns under XI.

(c) Πᾶς=‘any one’ no matter who, ‘anything’ no matter what. Cf. quidvis. We see this construction in Ac. 2:21 (LXX), πᾶς ὁ ἄνω ἐπικαλέσηται. So Gal. 3:10 (LXX); Lu. 14:33. Πᾶς with a participle may have the same force, like παντὸς ὁκούοντος τὸν λόγον Mt. 13:19 (cf. Lu. 11:4), and πᾶς ὁ ὀργίζομενος, Mt. 5:22, etc. For πᾶς—οὐ=‘no one’ see negative pronouns. For the adjectival uses of πᾶς, see chapter on Adjectives and chapter on Article.

(d) **Ὁ Δένα.** This rare pronoun was current chiefly in colloquial speech (Jannaris, Hist. Gk. Gr., p. 166). It survives in the modern Greek (Thumb, p. 98). It means “Mr. So-and-So.” It occurs only once in the N. T., πρὸς τὸν δένα, Mt. 26:18.

X. Alternative or Distributive Pronouns (Ἀντωνυμίαι διατηρίαι).

I apply a term from Æschylus in lieu of a better one. The reciprocal pronoun ἀλλήλων has been already treated.

(a) **Ἄμφωτεροι.** Ἀμφω has vanished from the κοινή. Ἀμφότεροι has taken its place. It continues in the later Greek, but Thumb [Page 745] does not give it for modern Greek. It is frequent in the LXX, but is found only fourteen times in the N. T. It occurs without the article in all but five instances. So Mt. 9:17. Once the article is used with the substantive, ἰμφότερα τὰ πλοῖα, Lu. 5:7. The other four examples have the article before the pronoun, like of ἰμφότεροι, Eph. 2:18. It is possible, even probable, that in two instances duality has disappeared from the word. It seems certain that three items are referred to in Ac. 23:8 and in Ac. 19:16 the seven sons of Sceva are alluded to. A corruption of the text is possible (cf. the Bezan text for 19:16), but it is hardly necessary to postulate that in view of “the undeniable Byzantine use” of ἰμφότεροι for more than two (cf. “both” in old English). The papyri show undoubted examples also and “the Sahidic and some later versions took ἰμφότεροι as ‘all.’”

3 Ib.
But Moulton\textsuperscript{4} hesitates to admit in Luke “a colloquialism of which early examples are so rare,” a rather surprising objection from Dr. Moulton. On the whole one is safe in the two passages in Acts here quoted to admit the free use of ἀφότεροι. The papyri examples bearing on this usage include N.P. 67, 69 (iv/A.D.) “where it is used of four men” (Moulton, \textit{Cl. Rev.}, 1904, p. 154), probably also B.M. 336 (ii/A.D.). See Bury, \textit{Cl. Rev.}, XI, p. 393, for the opposite view. Nestle (\textit{Berl. Phil. Woch.}, 1900, N. 47) shows that German also uses “beide” for three and more persons.

\textbf{(b) Ἐκαστός.} In the LXX ἐκάτερος is still used to a limited extent (Gen. 40:5) and occasionally—ἐκαστός, without dual idea (cf. ἀφότεροι), as often in the papyri.\textsuperscript{5} In O.P. 256 (i/A.D.) and B.M. 333 (ii/A.D.) ἐκάτερος is used of three and of four in G. H. 23\textsuperscript{a} (ii/b.c.). See Moulton, \textit{Cl. Rev.}, 1901, p. 440, and proper use of ἐκάτερος in P.Oxy. 905 (A.D. 170), πρός τὸ ἐκάτερον μέρος. But in the N. T. ἐκάτερος does not appear. “Ἑκαστός is common in the N. T., but comes to be replaced in modern Greek by κάθε, καθείς and καθένας (cf. καθ οὐς ἐκαστός in the N. T.).\textsuperscript{6}

1. Without Substantive. This is indeed the usual idiom, as in Mt. 16:27; Jo. 6:7.

2. With Substantive. Never with the article. So Eph. 4:16; Heb. 3:13; Rev. 22:2. Thus very rare.

3. With ἔς. This is very frequent. So ἔς ἐκαστός Mt. 26:22, etc. We even have ἄνα ἔς ἐκαστός, Rev. 21:21. But in Ac. 21:19, ἐξηγεῖτο καθό ἐν ἐκαστον ὧν ἐποίησαν, we must not\textsuperscript{1} connect ἐκαστον with ἐν.

4. With Genitive. It is common also with the genitive, as in Lu. 13:15; Eph. 4:7.

5. Partitive Apposition. This is frequent also. Thus ἄφητε ἐκαστὸς Mt. 18:35, ἐπορεύοντο πάντες—ἐκαστὸς Lu. 2:3, etc. The same thing is true in Eph. 5:33 ὑμεῖς καθό ἐνα ἐκαστὸς. This is a classical construction.\textsuperscript{2}

6. Rare in Plural. So ἐκαστοί Ph. 2:4, but even here W. H. have ἐκαστος in the margin.

\textbf{(c) Ἀλλος.} Cf. Latin \textit{alius}, English \textit{else}.

\textsuperscript{4} Ib.
\textsuperscript{5} Ib., p. 79. Cf. Thack., \textit{Gr.}, p. 192.
\textsuperscript{1} W.-Sch., p. 246 f.
\textsuperscript{2} Blass, \textit{Gr. of N. T. Gk.}, p. 179.
1. Used absolutely=‘An-other,’ ‘One Other.’ This is the commonest use of the pronoun. Cf. 1 Cor. 12:8–10 where ἄλλω occurs six times. So Mt. 13:5–8 where ἄλλα appears three times. But it is found alone also, as ἄλλους, Mt. 27:42. For ἄλλος τις see Lu. 22:59. Cf. ὀφθέν ἄλλο (Gal. 5:10)=‘nothing else.’ It occurs in modern Greek vernacular.

2. For Two. But ἄλλος occurs where the idea of two is present (pair). Here ἕτερος might have been used, but even in Euripides, I. T. 962 f., Blass finds θετερον—τό ὁ ἄλλο, though he considers it a “most striking encroachment” for ἄλλος to supplant ἕτερος in this fashion. Moulton (Cl. Rev., 1901, p. 440) cites τῆς μεν μίας—της ὁ ἄλλης G. H. 23a (ii/b.c.); δύο, τόν μεν ἔνα—καὶ τόν ἄλλον B.U. 456 (iv/a.d.). Moulton explains the existence of καὶ τήν ἄλλην (σιαγόνα) in Lu. 6:29 as a failure on Luke’s part to correct his source, a like failure appearing in Mt. 5:39, unless that was his source. But the matter goes much further than that. In Mt. 12:13 ἡ ἄλλη refers to the other hand (χείρ). In Jo. 19:32 note τοῦ πρώτου—καὶ τοῦ ἄλλου. Cf. also Jo. 18:16; 20:3 f. In Jo. 5:32 ἐγὼ and ἄλλος are contrasted. So Mt. 25:16, τὰ πέντε τάλαντα—ἄλλα πέντε, for which Blass finds “complete illustration in classical [Page 747] authors.” There are other N. T. examples such as ἄλλην in Mt. 19:9, τοῦ δόο—ἄλλα δύο Mt. 25:17, ἄλλην Mk. 10:11, ἄλλον 10:12, ἄλλον παράκλητον Jo. 14:16.

3. As Adjective. Common. Cf. Mt. 2:12; 4:21; and in particular Rev. 14:6, 8, 15, 17 and 1 Cor. 15:39, 41.

4. With the Article. It is not frequent. The article sharply refers to a preceding example. Cf. Mt. 5:39; Mt. 27:61. John alludes to himself in his Gospel as ὁ ἄλλος μαθητής (18:16; 20:2, 3, 4). The article may be repeated, as in Jo. 18:16; 19:32.

5. The Use of ἄλλος ἄλλο=‘One One Thing, One Another.’ This is classical and is illustrated in Ac. 19:32; 21:34. In Ac. 2:12, ἄλλος πρὸς ἄλλον, the idiom is almost reciprocal like ἄλληλον.

6. In Contrast for ‘Some—Others.’ We have ἄλλη μὲν—ἄλλη δέ, 1 Cor. 15:39 and 41; ὁ μὲν—ἄλλα δέ, Mt. 13:4 f. (cf. καὶ ἄλλο, Mk. 4:5); ὁ μὲν—ἄλλοι δέ—ἕτεροι δέ, Mt. 16:14; καὶ ἄλλοι—ἄλλοι δέ, Mk. 8:28; ὑπὸ τινῶν—ἄλλων, Lu. 9:8; ὁ ἐξ—ὁ ἄλλος, Rev. 17:10.

7. Ellipsis of ἄλλος is possible in Ac. 5:29, Πέτρος καὶ οί (sc. ἄλλοι) ἀπόστολοι. Blass cites also Ac. 2:14, Πέτρος σὺν τοῖς (sc. λοιποῖς) ἐνδέκα. But psychologically this explanation is open to doubt.

3 Ib., p. 180.
4 Prol., p. 79.
5 W.-Sch., p. 245.
1 Ib.
8. *The Use of ἄλλος and ἕτερος Together.* Blass\(^2\) finds this “probably only for the sake of variety.” Certainly in 1 Cor. 12:9 f. no real distinction can be found between ἄλλος and ἕτερος, which are here freely intermingled. But I am bound to insist on a real difference in Gal. 1:6 f. The change is made from ἕτερον to ἄλλο for the very reason that Paul is not willing to admit that it is a gospel on the same plane (ἄλλο) as that preached by him. He admits ἕτερον, but refuses ἄλλο. The use of ἐὰν μὴ by Paul does not disturb this interpretation. The same thing would seem to be true of 2 Cor. 11:4, ἄλλον Ἰησοῦν—πνεῦμα ἔτερον—ἐὐαγγέλιον ἔτερον. It may be that variety (as in 1 Cor. 12:9 f.) is all that induces the change here. But it is also possible that Paul stigmatizes the gospel of the Judaizers as ἕτερον (cf. Gal. 1:6) and the Spirit preached by them, while he is unwilling to admit another (ἄλλον) Jesus even of the same type as the one preached by him.

9. = ‘Different.’ Besides, it is not to be forgotten that in ancient Greek ἄλλος itself was used for ‘different kind.’ Thompson (*Syntax*, p. 76) cites ἄλλα τῶν δικαίων from Xen., *Mem.*, IV, 4, 25. Cf. also ἄλλα in the sense of ‘but.’ Cf. ἄλλα ἄλλῃ in 1 Cor. 15:39. [Page 748] Indeed in 1 Cor. 15:39, 41, ἄλλη μὲν—ἄλλη δὲ, it is expressly stated that the glory is not ἡ αὐτὴ. In verse 40 ἄρρη ὁῥα occurs. Here ἄλλος seems to be used in the sense of ‘different,’ like ἕτερος. In Latin alius was often used where earlier Latin would have used alter. Cf. Draeger, *Hist. Synt.*, p. 105.

10. ἄλλοτριος. This variation of ἄλλος has the same relation to it that alienus has to alius. It means ‘belonging to another,’ and occurs fourteen times in the N. T. Cf. Ro. 15:20. The contrast with αὐτῶν is seen in Mt. 17:25. In Heb. 11:34 it has the notion of alienus.

(d) ἕτερος.

1. *Absolutely.* So often as in Lu. 14:19 f., but it is also used more frequently with substantives than is ἄλλος. Cf. Lu. 4:43; Ac. 7:18 (LXX), etc. For ἕτερος τις see Ac. 8:34; Ro. 13:9. For the genitive with ἕτερος cf. Mt. 8:21; Gal. 1:19.

2. *With Article.* The article is also more common with ἕτερος than with ἄλλος. Cf. Mt. 10:23; 11:16, etc.

3. *Second of Pair.* A commonly, probably the original, use of ἕτερος is for the second of a pair. Cf. Latin alter. It is the only surviving dual pronominal word in the N. T. (except ἅμα τετεροτοί), and is common in the LXX\(^2\) and the papyri.\(^2\) For σὺν ἕτερῳ μὴ see P. Thb. 421 (iii/A.D.). The examples are rather abundant in the N. T. of this dual (comparative) sense (ἕτερος). So τὸν ἐνα—τὸν ἐτερον, Mt. 6:24; σὺ—ἤ ἕτερον, 11:3; ἐν τῷ ἕτερῳ πλοίῳ, Lu. 5:7. Cf. also Lu. 7:19 f.; 14:31; 16:13; 17:34 f.; 18:10; 20:11.\(^3\) Not radically different from this conception is the use of it for ‘next,’ as in Lu.

\(^{2}\) Thack., Gr., p. 192.

\(^{1}\) Mayser, Gr., p. 312.

\(^{3}\) Cf. W.-Sch., p. 244.
4. = ‘Different.’ The sense of ‘different’ grows naturally out of the notion of duality. The two things happen just to be different. Cf. Latin alius and alienus. The word itself does not mean ‘different,’ but merely ‘one other,’ a second of two. It does not necessarily involve “the secondary idea of difference of kind” (Thayer). That is only true where the context demands it. But note how Latin alter lends itself to the notion of change. Thompson⁴ suggests that this sense may be “an euphemism for κακός.” The N. T. examples are rather numerous. So ἐγένετο—τὸ εἶδος τοῦ προσώπου αὐτοῦ ἔτερον, Lu. 9:29. Cf. also Ac. 2:4; Ro. 7:23; 1 Cor. 14:21; 2 Cor. 11:4; Gal. 1:6; Heb. 7:11, 13, 15; Ju. 7. [Page 749] Cf. also ἔτερος in Ph. 3:15 and ἐν ἔτερῳ μορφῇ Mk. 16:12 (disputed part of Mark.)¹ Cf. Ac. 17:21. We have already seen that ἄλλος may be equal to ‘different’ (1 Cor. 15:39). ἔτερος occurs in verse 40 in the sense of ‘different.’ Ramsay (on Gal. 1:6) argues that, when ἔτερος occurs in contrast with ἄλλος, it means not ‘different’ (as Lightfoot in loco), but ‘another of the same kind.’ Moulton (Prol., p. 246) stands by Lightfoot in spite of Ramsay’s examples.

5. = ‘Another’ of Three or More. But ἔτερος comes also to be employed merely for ‘another’ with more than two and with no idea of difference. This usage probably grew out of the use with two groups. So Lu. 10:1, ἀνεδέαξεν ἔτερος ἔβιοδικόντα δόο. In Mt. 12:45, ἐπὶ ΄τερα πνεύματα πονηρότερα ἐμοντού, the notion of difference is present. This difference may also be implied by Luke in 23:32, καὶ ἔτεροι κακούργησαν δόο. Cf. Lu. 8:3. But this is hardly true of Ac. 2:13. In Ac. 4:12 the point of ἔτερον is rather that no other name at all than that of Jesus, not that of difference in kind. In Lu. 19:16–20 we have this order, ὁ πρῶτος, ὁ δεύτερος, ὁ ἔτερος. So in 1 Cor. 4:6, εἷς ὑπὲρ τοῦ ἄνδρος ψυχισοῦσθε κατὰ τοῦ ἔτερου, the third is again presented by ἔτερος. Then, again, ἔτεροι occupies third place in Mt. 16:14 and Heb. 11:36. In Mt. 15:30 it comes in the fifth place. Blass² admits that this use of ἔτερος “at the close of enumerations may be paralleled from Attic writers.” See further Lu. 3:18; Ro. 8:39; 1 Tim. 1:10. But in 1 Cor. 12:8–10 ἔτερῳ occurs in the third and the eighth places. We are not surprised then to learn that the papyri furnish plenty of examples where ἔτερος refers to more than two.³ Blass indeed considers this extension not correct, and Moulton seems surprised that Luke should change the correct ἄλλος (Mk. 4:5–8=Mt. 13:5–8) to ἔτερον in Lu. 8:6–8. But Luke is reinforced by Paul in this laxity as to ἔτερος. Cf. πολλὰ καὶ ἔτερα in Lu. 3:18. Moulton (Cl. Rev., 1904, p. 154) calls this “incorrect ἔτερος” and finds it in the papyri, as in O.P. 494 (ii/A.D.). But we do not

⁴ Synt., p. 77.

Ramsay

Ramsay, W. M., Cities and Bishoprics of Phrygia. 2 vols. (1895, 1897).

———, St. Paul the Traveller (1896).

² Gr. of N. T. Gk., p. 179.
³ Moulton, Prol., p. 79.
need to hold ἐπερος in leading strings. The “subtlety” (Cl. Rev., 1901, p. 440) is only called for in that case.

6. In Contrast. ἐπερος may also be used in contrast for ‘the one,’ ‘the other.’ So 1 Cor. 15:40, ἐπερα μὲν—ἐπερα δὲ. It is common in contrasts with other pronouns. Thus with ελγ in Mt. 6:24; ὁ ελγ in Lu. 7:41; Lu. 17:34 ff.; with τις, Lu. 11:15 f.; with ὁ μὲν, Lu. 8:5 f.; with οἱ μὲν and ὁλλοι, Mt. 16:14. But [Page 750] neither οὐθἐτερος (μηδ—) nor οὐθἐτερος (μηθ—) occurs in the N. T., though μηθἐτερος is read in Prov. 24:21. In Clem. Hom. XIX, 12 we have οὐθἐτερος.

(e) OTHER ANTITHETIC PRONOUNS. For ελγ—ελγ (Mk. 10:37), ελγ—ο δὲ (Gal. 4:24 f.), ὁ ελγ—ὁ ὁλλος (Rev. 17:10) see ελγ under Numeral Adjectives. So likewise τις may be contrasted with τις (Ph. 1:15), with ὁλλος (Lu. 9:7 f.), with ἐπερος (1 Cor. 3:4). For the very common ὁ μὲν—ὁ δὲ, ὁς μὲν—ὁς δὲ see Demonstrative Pronouns. The repetition of the substantive is to be noted also. So οἰκος ἐπι οἰκον πίπτει, Lu. 11:17; ὁ σατανᾶς τὸν σατανᾶν ἐκβάλλει, Mt. 12:26 (=Lu. 11:18). This notion of repetition is seen in ἡμέρᾳ και ἡμέρᾳ (2 Cor. 4:16; cf. Heb. יְהִי יְהִי). Cf. also ελγ και ελγ (Mt. 20:21; 24:40 f.; 27:38, etc.); ὁ ελγ—ὁ ἐπερος, Lu. 7:41. For ελγ—και ελγ—και ελγ see Mk. 9:5=Mt. 17:4=Lu. 9:33. This threefold repetition of ελγ is rhetorical.1 The distributive use of ελγ with κατά and ἀνά (ἐν καθ ἐν, ελγ καθ ελγ, ἀνά ελγ) was treated under Numeral Adjectives.

XI. Negative Pronouns (ἀντωνυμίαι ἄρνητικαι).

(a) Οὐδείς.

2. Οὐθείς. This is made from οὐθε ελγ (sometimes also from οὐδε ελγ, ‘not even,’ Brugmann, Griech. Gr., p. 146) and occurs sometimes in the best N. T. MSS. Cf. W. H.’s text for Lu. 22:35; 23:14; Ac. 15:9; 19:27; 26:26; 1 Cor. 13:2; 2 Cor. 11:9. Jannaris2 finds it a peculiarity of the Alexandrian school. Meisterhans3 has shown from the inscriptions how οὐθείς and μηθείς came to be practically universal during the third century and the first half of the second century B.C. Thackeray4 has reinforced this position from the uncials for the LXX. The papyri are in full accord.5 In the fourth and fifth centuries A.D., the date of the great uncials, οὐθείς and μηθείς had disappeared from current speech, and yet a number of instances survive in the MSS. of the O. T. and the N. T., though others were probably replaced by οὐδείς and

1 W.-Sch., p. 246.
2 Hist. Gk. Gr., p. 170. But see Schweyzer, Perg. Inschr., p. 114, for idea that the change is due to τ and δ being pronounced alike.
3 Att. Inschr., p. 259.
4 Gr., pp. 58 ff.
5 Thumb, Hellen., p. 14; Mayser, Gr., p. 180 f.
Indeed [Page 751] οὐθείς was a sort of fashion (Moulton, Cl. Rev., Mar., 1910, p. 53) that came in iv/B.C. and vanished ii/A.D. It was nearly extinct in N. T. times. See further chapters VI, III, (g), and VII, III, 2.

3. Gender. The feminine form is less frequent in the N. T. than the masculine and neuter. The word occurs with substantives (Mk. 6:5), with other pronouns (Ἄλλος, Ac. 4:12; Ἐστίν Εὐθείς, 17:21), but usually alone, as in Mt. 5:13; 6:24. It is common with the genitive (Lu. 18:34). The adverbial use of οὐθέν is seen in Gal. 4:1 οὐθέν διαφέρει δοῦλου, but the cognate accusative is a possible explanation (Gal. 2:6). Cf. οὐθέν in 1 Cor. 7:19. In Rev. 3:17, οὐθέν χρείαν ἔχω, the neuter is not to be construed with χρείαν.

4. Οὐθέξ. This is, of course, more emphatic than οὐθείς. The usage appears often in Xenophon, Demosthenes and other classic writers, the LXX and the Atticists. For examples in the N. T. see Mt. 27:14; Jo. 1:3; Ac. 4:12; Ἑτορος 17:21. The same principle appears in οὐκ ἔστιν ἔχως ἑνός, Ro. 3:12 (Ps. 14:1, 3). Cf. also the separation of οὖ—ποτέ in 2 Pet. 1:21.

5. Εἷς—οὖ. It is after the analogy of πᾶς—οὖ and distinctly emphatic, and is found in Demosthenes. Cf. Lu. 12:6, Ἐν Εὐτέν οὐκ ἔστιν. So likewise Mt. 10:29, Ἐν Εὐτέν οὐκ ἔστιν. In Mt. 5:18 we have Ἐν—οὖ μή. For οὐθείς ὅστις see ὅστις.

(b) Μηδείς. In general the history of μηδείς is parallel to that of οὐθείς. It is naturally much less frequent and its use instead of οὐθείς belongs to the discussion of Modes and Negative Particles. It follows in that matter the fate of μή. Μηθείς appears only once in the text of the N. T., Ac. 27:33. The use of μηδεὶς ὅν, Gal. 6:3, may be compared with οὐθέν ὅν, 1 Cor. 13:2. In 1 Th. 4:12 note μηδενὸς χρείαν ἔχετε.

(c) Οὗτις AND Μῆτις. These were treated under τίς. Following the editors in the separation of these forms, it is to be observed that μήτι as mere particle occurs not merely in questions like μήτι οὕτως ἔστιν ὁ Χριστός; Jo. 4:29, but also with εἰ. So εἰ μήτι in 1 Cor. 7:5; 2 Cor. 13:5. But in Lu. 9:13, εἰ μήτι πορευθέντες ἡμᾶς ἔφοράσωμεν, it is possible to take μήτι as the object of ἔφοράσωμεν. Cf. Jo. 6:12, Ἰνα μή τι ἐπιλάθηται. But note μήτις, 1 Cor. 6:3. The use of τίς with the conjunction μή is not infrequent (Mk. 13:5) and with the negative adverb μή also (Jo. 3:3, 5, etc.). So we have, contrary to the usual classic idiom, οὐ—τίς, μή—τίς. The [Page 752] undoubted separation of οὗ and μή from τις in such examples as Mt. 11:27; 12:19; Lu. 8:51; 12:4; 7:4; 10:28; Ac. 28:21; 1 Cor. 4:5, etc., argues for the same thing where μή τις and μή τι happen to come together. The κοινή (Moulton, Prol., p. 246) supports the use of τις with the negative: Tb.P. 1 (ii/B.C.) μηδεμίας κρατήσεως μηδὲ κυρείας τινὸς ἐγγαίον περιγινομένης.

6 Thack., Gr., p. 60.
1 W.-Sch., p. 248; Schmid, Atticismus, II, p. 137 f.
2 Cf. W.-Sch., p. 249.
3 Ib., p. 178.
4 Cf. Blass, Gr. of N. T. Gk., p. 256.
(d) Witj ἄς.

1. Οὐ πᾶς. Used together the words call for little in the way of explanation. Οὐ merely negatives πᾶς as in classic Greek and=‘not every one.’ Thus in Mt. 7:21, οὐ πᾶς ὁ λέγων—ἐλθεῖν ἑστήκεται, Jesus did not mean to say that ‘no one’ who thus addressed him could enter the kingdom of heaven. He merely said that ‘not every one’ would. Cf. also οὐ πᾶσα σάρξ, 1 Cor. 15:39. The same principle applies to the plural οὐ πάντες ὁροφοῦσι τὸν λόγον, Mt. 19:11. Cf. Ac. 10:41; Ro. 9:6; 10:16. But my friend, Mr. H. Scott, notes that in Ro. 10:16 and 1 Cor. 15:39 οὐ πᾶς can well mean ‘no,’ and that in Mt. 7:21 and the other clauses where ἀλλά occurs the ἀλλά negatives the whole of the preceding clause. This is certainly worth considering. Cf. Mt. 7:21 οὐ πᾶς ὁ λέγων with πᾶς ὁ ἀκούων in 7:26.

2. Οὐ—πᾶς. Here we have a different situation. The negative goes with the verb. A negative statement is made as to πᾶς. The result is the same as if οὐδείς had been used with an affirmative verb. So Mt. 24:22 (Mk. 13:20) οὐκ ἐὰν ἐσώσῃ πᾶσα σάρξ, the idea is ‘no flesh,’ not ‘not all flesh,’ i.e. ‘some flesh,’ would have been lost. Cf. Lu. 1:37 οὐκ ἄδυνατει—πᾶν ρῆμα, Ro. 3:20 (Gal. 2:16) οὐ δικαιωθήσεται πᾶσα σάρξ. See also Ac. 10:14 οὐδέκατε—πᾶν. Cf. οὐδεὶς πᾶν Rev. 7:16; 9:4. It is true that this idiom is very common in the LXX1 as a translation of לֹא—כּל. Cf. Ex. 12:16, 43; 20:10, etc. But it is not without analogy also in the papyri use of πᾶς “with prepositions and adjectives of negative meaning. Thus ἄνευ or χωρὶς πᾶσης ὑπερθέσεως, a recurrent formula, ἀνυπεύθενοι παντὸς ἐπίμου, Tb.P. 105 (ii/B.C.); δίχα πᾶσης ἐξουσίας, Plutarch, Cons. ad Uxor., 1 (cf. Heb. 7:7).”2 Clearly the construction was in harmony with the κοινή.

3. Μή—πᾶς. The same principle applies. Cf. 1 Cor. 1:29, διὸς μὴ καυχήσηται πᾶσα σάρξ. Here it is ‘no flesh’ as above with οὐ—πᾶς. See also Rev. 7:1. On the other hand μὴ πᾶς (1 Jo. 4:1)=’not every’ like οὐ πᾶς.

4. Οὐ μὴ—πᾶν in Rev. 21:27 does not differ at all from the οὐ—πᾶς and μὴ—πᾶς in construction.

5. Πᾶς—οὐ. Here the ancient Greek idiom to a certain extent comes to one’s relief.1 But the נל—בל lies behind the LXX translation. It is less harsh than οὐ—πᾶς. Cf. Blass, Gr. of N. T. Gk., p. 178. The denial about πᾶς is complete as with οὐ—πᾶς. See 1 Jo. 2:21, πᾶν ψεύδος ἐκ τῆς ἀληθείας οὐκ ἐστιν. Cf. 1 Jo. 3:15; Eph. 5:5; Rev. 22:3.

6. Πᾶς—μὴ falls into the same category. Cf. Jo. 3:16; 6:39; 12:46; Eph. 4:29; 5:3. Here also the denial is universal. But most probably μηδείς would have pleased an older Greek more.

---

1 W.-M., p. 215.
7. Πᾶς—οὖ μὴ. In Rev. 18:22 the same explanation holds.

8. Οὐ—πάντες. With the plural οὐκ ἐσίν πάντες ἐξ ἡμῶν, 1 Jo. 2:19, the matter is not so clear. Two translations are possible, as is seen in the American Revision. The text there is: “they all are not of us.” The margin has: “not all are of us.” The analogy of οὖ—πᾶς in the singular favours the first.

9. Πάντες οὖ. With πάντες οὐ κοιμηθήσομεθα, 1 Cor. 15:51, the οὖ goes with the verb. The effect is the same as πᾶς—οὖ above. ‘We all shall not sleep’ means that ‘none’ of us shall sleep. ‘We shall all be changed.’ Per contra, see οὖ πάντες, Ro. 10:16=‘not all.’

[PAGE 754] CHAPTER XVI

THE ARTICLE (TO ἈΡΘΡΟΝ)

I. Other Uses of ὁ, ἡ, τό. For the demonstrative ὁ and the relative ὁ see chapter on Syntax of Pronouns. It is confusing to say with Seyffart: “Der Artikel hat die ursprüngliche demonstrative Bedeutung.” It is then just the demonstrative, not the article at all. Why call the demonstrative the article? Great confusion of idea has resulted from this terminology. It is important to keep distinct the demonstrative, the article and the relative.

II. Origin and Development of the Article.

(a) A GREEK CONTRIBUTION. The development of the Greek article is one of the most interesting things in human speech. Among the Indo-Germanic languages it is “a new Greek departure.” It is not found in Sanskrit nor in Latin. It does not appear to be pro-ethnic and first shows itself in Homer. Indeed, the existence of the genuine article in Homer is denied by some. But it seems an overrefinement to refuse to see the article in such Homeric phrases as ὁ πλέονες, ὁ ἄριστος, etc. And it is beyond dispute that it is in the Attic prose, particularly in Plato, that the Greek article reaches its perfection. The article has shown remarkable persistency and survives with very little modification in modern Greek. In the N. T. the usage is in all essentials in harmony with Attic, more so than is true of the papyri. But Völker finds the papyri

in practical accord at most points with Attic. Simcox\textsuperscript{11} points out that even the Hebrew article does not differ radically in use from the Greek article.

\textbf{Page 755} (b) DERIVED FROM THE DEMONSTRATIVE. The Greek article is the same form as the demonstrative ὁ, ἡ, τό. Indeed the German \textit{der} is used as demonstrative, article, relative. So English \textit{the} is related to the demonstrative \textit{that} (also relative). Clyde (\textit{Greek Syntax}, p. 6) calls the article a “mere enfeeblement” of the demonstrative. So the French \textit{le}, the Italian \textit{il}, the Spanish \textit{el}, all come from the Latin demonstrative \textit{ille}. But while this is true, the demonstrative, relative and article should not be confused in idea. The Greek grammarians applied ἃρθρον to all three in truth, but distinguished them as ἃρθρον προτακτικόν (dem.), ἃρθρον ὑποτακτικόν (rel.), ἃρθρον ὅμιστικόν (art.). Some, however, did not distinguish sharply between the demonstrative and the article. The article always retained something of the demonstrative force (Gildersleeve, \textit{Syntax}, Part II, p. 215). It is an utter reversal of the facts to speak of the demonstrative use of the article. It is only of recent years that a really scientific study of the article has been made.\textsuperscript{1} Even Brugmann\textsuperscript{2} gives no

separate treatment for the article. But Part II of Gildersleeve’s *Syntax* (1911, pp. 215–332) has a really scientific treatment of the article. Professor Miller collected material for it. But even here I must demur against “the substantive use of the article” (p. 216) instead of plain substantival demonstrative. Gildersleeve uses “article” in two senses (form and idea). The Latin word *articulus* has the same root as the Greek ἄρθρον (ἀρ– as seen in ἀρ-ἀρ-ἰσκῳ, ‘to fit,’ ‘join’). The origin of the article from the demonstrative can probably be seen in Homer. Monro³ thinks it due to apposition of a substantive with the demonstrative ὁ. So Iliad, 4. 501, ἡ ὁ ἐπέρησεν αἰχμὴ χαλκείη. Here αἰχμή explains ἡ and ἡ wavers between demonstrative and article and illustrates the transition. So with new proper names ὁ anticipates the name which is loosely added later. “In Attic the article shows that a particular known person is spoken of; in Homer it marks the turning of attention to a person.”⁴ In Homer the article usually marks contrast and not mere definiteness. But this contrast or singling out of the special object is in essence the real article which is thus attributive.

### III. Significance of the Article

The article, unlike the demonstrative, does not point out the object as far or near. It is not deictic. There is either contrast in the distinction drawn or allusion (anaphoric) to what is already mentioned or assumed as well [Page 756] known. The article is therefore τὸ ὁριστικὸν ὁρθρον, the definite article. The article is associated with gesture and aids in pointing out like an index finger. It is a pointer. It is not essential to language, but certainly very convenient and useful and not “otium loquacissimae gentis instrumentum,” as Scaliger¹ called it. The Greek article is not the only means of making words definite. Many words are definite from the nature of the case.² The word itself may be definite, like γῆ, οὐρανός, Ἰησοῦς. The use of a preposition with definite anarthrous nouns is old, as ἐν ὁ ὁ. Possessive pronouns also make definite, as do genitives. The context itself often is clear enough. The demonstrative may be used besides the article. Whenever the Greek article occurs, the object is certainly definite. When it is not used, the object may or may not be. The article is never meaningless in Greek, though it often fails to correspond with the English idiom, as in ἡ σοφία, ὁ Παῦλος. It is not a matter of translation. The older language and higher poetry are more anarthrous than Attic prose. Dialects vary in the use of the article, as do authors. Plato is richer in the article than any one. Its free use leads to exactness and finesse (Gildersleeve, *Syntax*, Part II, p. 215 f.).

### IV. The Method Employed by the Article

The Greek article points out in one of three ways.³ It distinguishes:

---
² Griech. Gr.
³ Hom. Gr., p. 178.
4 lb.
¹ Quoted by Farrar, Gk. Synt., p. 57.
² The old idea that the article was necessary to make a word definite is seen in Madvig, Synt. of the Gk. Lang., p. 8.
³ Robertson, Short Gr. of the Gk. N. T., p. 70.
(a) INDIVIDUALS FROM INDIVIDUALS. The article does not give the reason for the distinction drawn between individuals. That is usually apparent in the context. The translators of the King James Version, under the influence of the Vulgate, handle the Greek article loosely and inaccurately.\(^4\) A goodly list of such sins is given in “The Revision of the New Testament,”\(^5\) such as ‘a pinnacle’ for τὸ περόμενον (Mt. 4:5).

Here the whole point lies in the article, the wing of the Temple overlooking the abyss. So in Mt. 5:1 τὸ ὄρος was the mountain right at hand, not ‘a mountain.’ On the other hand, the King James translators missed the point of μετὰ γυναικός (Jo. 4:27) when they said ‘the woman.’ It was ‘a woman,’ any woman, not the particular woman in question. But the Canterbury Revisers cannot be absolved from all blame, for they ignore the article in Lu. 18:13, τῷ ἄμαρτολῷ. The vital thing is to see the matter from the Greek point of view and [Page 757] find the reason for the use of the article. In Mt. 13:55, ὁ τοῦ τέκτονος υἱός, it is the son of the (well known to us) carpenter. In 1 Cor. 4:5 ὁ ἔργανος means the praise due to each one. Cf. ὁ μισθὸς in Ro. 4:4. In 1 Cor. 5:9, ἐν τῇ ἐπιστολῇ, Paul refers to a previous letter which the Corinthians had received. In 15:8, τῷ ἐκτρέφσαι, Paul speaks thus of himself because he alone of the Apostles saw Jesus after His Ascension. The examples of this use are very numerous in the N. T. Thus in Mt. 5:15, τὸν μοίδιον, τὴν λυχνίαν, the article singles out the bush, the lampstand present in the room. In 15:26, τοῖς κυναρίοις, Jesus points to the little dogs by the table. In Lu. 4:20, τῷ βιβλίῳ ἀποδοῦς τῷ ὑπηρέτῃ, the roll was the usual one and the attendant was there at his place. So in Jo. 13:5, βάλλει ὕδωρ εἰς τὸν νυμφήμα, the basin was there in the room. The article in Jo. 7:17, γνώσεται περὶ τῆς διασκέδαστος, means the teaching concerning which they were puzzled.

(b) CLASSES FROM OTHER CLASSES. The (generic) article is not always necessary here any more than under (a). See σοφοὶ καὶ ἄγαθοι (Mt. 5:45); δίκαιος ὑπὲρ ἄδικον (1 Pet. 3:18). Cf. in particular 1 Cor. 12:13 ἐίτε Ἰουδαῖοι ἐίτε Ἑλλήνες, 12:29. So also ποῦ σοφός; ποῦ γραμματεύς; (1 Cor. 1:20). But it is quite common to use the article with different classes. So in Mt. 8:20 note αἱ ἀλώπεκες, τὰ πετεινά. So αἱ γυναίκες (Eph. 5:22), οἱ ἄνδρες (5:25), τὰ τέκνα (6:1), οἱ πατέρες (6:4), οἱ δούλοι (6:5). In these examples the vocative often has the article. Cf. Col. 3:18 ff. A good example of the use with classes is found in Mt. 5:3–10 (the Beatitudes), οἱ πιστοὶ, etc. Cf. τοὺς σοφοὺς, τὸ ἀσθενῆ, etc., in 1 Cor. 1:27. So οἱ ἄρσαται and οἱ ποιηταὶ in Ro. 2:13. Cf. Rev. 11:18; 22:14. It is very common to find the singular used with the article in a representative sense for the whole class. So in ὁ υἱὸς τοῦ ἀνθρώπου (Mt. 8:20, and often) Jesus calls himself the Son of Mankind. Cf. Lu. 10:7, ὁ ἔργατης, where the labourer represents all labourers. In Mt. 18:17 note ὁ ἔθνος καὶ ὁ τελὼν. The Gospel of John is especially rich in examples of this kind (both ideals and types).\(^1\) Other examples are Mt. 12:35 ὁ ἄγαθος ἄνθρωπος, 12:29 τοῦ ἱσχυροῦ, Jas. 5:6 τὸν δίκαιον, 2 Cor. 12:12 τοῦ ἄπιστολοῦ, Gal. 4:1 ὁ κληρονόμος, Mt. 13:3 ὁ σπείρων. But even here the article is not always needed. So Ἰουδαῖοι τε πρῶτον καὶ Ἐλληνος (Ro. 2:9). Cf. καλῶς τε καὶ κακῶς, Heb. 5:14. In examples like ὁ ὀφθαλμός καὶ ὁ κόλπος (Mt. 24:35), where there is only one of the kind, the explanation is not far

\(^4\) Lightfoot, Trench, Ellicott, p. xxx f.
\(^5\) Lightfoot, Trench, Ellicott, p. xxx f.
\(^1\) Abbott, Joh. Gr., p. 47. On literature upon the article see E. Schwartz in the Index to Eusebius, p. 209.
from the class from class [Page 758] idea. So θεός, like proper names, may use the article where we do not need it in English (Jo. 3:16). Völker (Syntax, p. 19) notes in the papyri examples like γυνὴ καὶ υἱοί, ἡ γυνὴ καὶ οἱ υἱοί, γυνὴ καὶ οἱ υἱοί, ὁ ἄνδρ καὶ τέκνα. For the generic article see further Gildersleeve, Syntax, pp. 255 ff.

(c) Qualities from Other Qualities. The English does not use the article with abstract qualities unless they have been previously mentioned. But French and German are like the Greek in the use of the article here. It is not necessary to have the article with qualities. So in 1 Cor. 12:9–11 the gifts mentioned have no article. So in chapter 13, ἀγάπη in verses 1–3, but ἡ ἀγάπη in 4, 8; but πίστις, ἐλπίς, ἀγάπη (verse 13). In 1 Jo. 4:18 φόβος is first without the article, then is repeated with the article, while ἡ ἀγάπη each time. There is much of the same freedom as to the use or non-use of the article here as elsewhere. Cf. Ro. 12:7, 9; 13:9 f.; Col. 3:5. Blass (Gr. of N. T. Gk., p. 150) from the standpoint of the German sees more difficulty in the absence than in the presence of such articles. But he is correct in saying that the relative in Col. 3:5 explains the use of the article. It is interesting to observe that in the list of attributes of God in the songs in Rev. 4:11; 5:13; 7:12, the article is expressed with each quality, while in 5:12 one article (τὴν) is used with the whole list. In Ro. 13:7 the article is used with each thing and quality. It is possible that τῷ here is the article also for which the participle has to be supplied. But for the absence of µέν and ὅς one might suspect τῷ to be the demonstrative. In Ro. 16:17, σκοπεῖν τοὺς τὰς διηγομένας καὶ τὰ σκάνδαλα παρὰ τὴν διδακτικήν ἦν ὑμεῖς ἔμαθετε ποιοῦντας, note how neatly τοὺς, τάς, τὰ, τῆν come in and illustrate the three uses of the article. Note also the neat classic idiom τοὺς—ποιοῦντας. For the article with abstract nouns see further Gildersleeve, Syntax, pp. 257 ff.

V. Varied Usages of the Article.

(a) With Substantives.

1. Context. Whether the substantive is pointed out as an individual, class or quality, the context makes clear. The English may or may not have need of the article in translation. But that point cuts no figure in the Greek idiom. Thus in Ac. 27:23, τοῦ θεοῦ οὗ εἶμι, the article points out the special God whose Paul is and is to be preserved in English. In the very next verse, ὁ θεός, we in English do not need the article, even if, as is unlikely, the angel has the notion of “the special God.” Cf. also Jo. 1:1. In Mt. 23:2, οἱ γραμματεῖς καὶ οἱ Φαρισαῖοι, the two classes are distinguished as in English. In Ro. 11:36, ἡ δόξα, it is the glory due to God. See ὁ µισθός, 1 Cor. 9:18 (cf. Ro. 4:4).

2. Gender of the Article. It will, of course, be that of the substantive. Cf. τὴν—τῶν—τὸ in Lu. 2:16. But sometimes the construction is according to the sense. So in Mt. 4:13, τὴν Ναζαρᾶ, because of the implied πόλιν. Cf. also Καφαρναοῦµι τὴν. But in Gal. 4:25, τὸ δὲ Ἀγαθ, Paul purposely uses the grammatical gender of the word rather than the natural feminine. Cf. also ὁ ἰµήν (Rev. 3:14), where Jesus is meant. But note the usual τὸ ἵµήν in 1 Cor. 14:16. The N. T. does not have the neuter article
with the plural of a Hebrew word, as we occasionally see in the LXX (Thackeray, p. 34). Cf. τῷ βεελεὶµ (Ezek. 27:4).

3. With Proper Names. This seems rather odd to us in English, since the proper name itself is supposed to be definite enough. But at bottom the idiom is the same as with other substantives. We do not use the article with home, husband, wife, church, unless there is special reason to do so. The word itself is usually sufficient. We must rid ourselves of the notion that any substantive requires the article. But, just because proper names are so obviously definite, the article was frequently used where we in English cannot handle it. But this is very far from saying that the article meant nothing to the Greek. It meant definiteness to him. We often have the same difficulty with the article with classes and qualities. Sometimes we can see the reason for the use of the article with proper names. So τὸν Ἱησοῦν ὄν Παῦλος κηρύσσει, Ac. 19:13. But in most instances the matter seems quite capricious to us. The writer may have in mind a previous mention of the name or the fact of the person being well known. In 2 Tim. 4:9–21 the proper names are all anarthrous. The same thing is true of Ro. 16, even when the adjective is not anarthrous, as in Ἀπελλῆν τὸν δόκιμον ἐν Χριστῷ (verse 10). So in the ancient Greek for the most part the article was not used with proper names (Gildersleeve, Syntax, p. 229). Its use with persons is a mark of familiar style, but Plato uses it for anaphora or for contrast. In some sections it is common to use the article with titles, as The Reverend Doctor So-and-So. In South Germany der is used with the name alone.1

It seems needless to make extended observations about the presence or absence of the Greek article with names of countries, cities, rivers, persons. The usage among Greek writers greatly varies about rivers, mountains, etc. Cf. Kallenberg, Stud. über den [Page 760] griech. Art. (1891). See exhaustive treatment by Gildersleeve (Syntax, pp. 236–253) and his paper in American Journal of Philol., XI, pp. 483–487. Different words vary. “Names of cities most rarely have the article when connected with prepositions,”1 but that is true of other words also. Ἰερουσαλήµ does not have the article save when an adjective is used (so Gal. 4:25 f.; Rev. 3:12) except in one instance (Ac. 5:28). Curiously Ἰεροσόλυµα has the article (in the oblique cases) only2 in Jo. 2:23; 5:2; 10:22; 11:18. As instances of the article used with a city mentioned the second time (anaphoric) see Ac. 17:10, εἰς Βέροιαν, and 17:13, ἐν τῇ Βεροίᾳ;

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).

1 W.-Th., p. 113.
1 W.-Th., p. 112.
17:15, ἔως Ἀθηνῶν; and 17:16, ἐν ταῖς Ἀθήναις. For further details see Winer-Schmiedel, p. 152 f.

Substantives in apposition with proper names may have the article, as in Ἡρῴδης ὁ βασιλεύς, Mt. 2:1; and ὁ βασιλεύς Ἡρῴδης, Mt. 2:3; or not, Ἡρῴδου βασιλέως, Lu. 1:5. In βασιλεύς Ἀργίττα, Ac. 25:26, it is like our ‘King George.’ So in Xenophon, when the King of Persia is meant we find βασιλεύς. In Mt. 3:6, ὁ Ἰωράδηςς τοταμώς, we have the usual order, but see the order reversed and the article repeated in Rev. 9:14; 16:12. Cf. τοῦ ὄρους Σινᾶ (Ac. 7:30) and ὄρους Σινᾶ (Gal. 4:24), τὸ ὄρος Σιὼν (Rev. 14:1) and Σιὼν ὄρει (Heb. 12:22). For the article with appositive proper names see Gildersleeve, Syntax, p. 231. Cf. Ἰουδαῖς ὁ Ἰσκαριώτης, Mt. 10:4; Ηρῴδης ὁ τετραάρχης and Ἰωάννης ὁ Βαπτιστής, 14:1 f.; Ἰησοῦς ὁ Ναζαρηνός, Mk. 10:47; Ac. 1:13, Σίων ὁ ζηλωτής, etc. Here the word in apposition has the article, but not the proper name.3 Cf. 1 Cor. 1:1.

In the Gospels as a rule Ἰησοῦς has the article. Χριστός in the Gospels usually has the article=the Anointed One, the Messiah. In the Epistles it usually is like a proper name and commonly without the article, illustrating the development of Christology in the N. T. Indeclinable proper names usually have the article if the case would not otherwise be clear. Cf. the list in Mt. 1:2–16, where the nominative has no article, but the accusative does have it. So Ἰσραήλ in Ro. 10:19, but τὸν Ἰσραήλ in 1 Cor. 10:18. See also Mt. 22:42; Mk. 15:45; Lu. 2:16; Ac. 7:8; 15:1 f.; Ro. 9:13; Heb. 11:17. The use of τὸν Βαραββᾶν in Lu. 23:18 is not abrupt. In Xenophon’s Anabasis the article is not often used with proper names unless the person is previously mentioned.1 In Homer the article appears only occasionally with a proper name when a new person is introduced, and “marks the turning of attention to a person,” rather than pointing to a particular person as in Attic. “In short the Homeric article contrasts, the Attic article defines.” But, as a matter of fact, no satisfactory principle can be laid down for the use or non-use of the article with proper names.3 For good discussion of the matter see Gildersleeve, Am. Jour. of Philol., XI, pp. 483 ff. In modern Greek the article occurs with all kinds of proper names (Thumb, Handb., p. 41). Moulton (Prol.,...

2 Monro, Hom. Gr., p. 179.

Thumb

———, Die griech. Sprache im Zeitalter des Hellenismus (1901).
p. 83) admits the inability of scholars to solve “completely the problem of the article with proper names.” Abbott (Joh. Gr., p. 57 f.) notes that John generally introduces a proper name without the article and then uses it. The papyri also follow this classical idiom of using the article with proper names when mentioned a second time. So when

a man’s father or mother is given in the genitive, we usually have the article. Cf. Deissmann, *Phil. Wochenschrift*, 1902, p. 1467; Moulton, *Prol.*, p. 83. The papyri throw no great light on the subject. Radermacher (*N. T. Gr.*, p. 95), claims that the papyri confirm the N. T. usage. In the papyri slaves regularly have the article, even when the master does not (Völker, *Syntax*, p. 9). For Σαῦλος ὁ καὶ Παῦλος (Ac. 13:9) the papyri show numerous parallels. Cf. Deissmann, *Bible Studies*, pp. 313 ff. Mayser (*Gr. d. griech. Pap.*, p. 310 f.), as already shown, takes ὁ here as relative. See also Hatch, *Journal of Bibl. Lit.*, Part II, 1908, p. 141 f. In Luke’s list (Lu. 3:23–38) Ἰωσήφ has no article, while all the long line of genitives have τοῦ including τοῦ θεοῦ.

Among the ancient writers ὁ θεός was used of the god of absolute religion in distinction from the mythological gods. 4 Gildersleeve (*Syntax*, pp. 232–236) gives a full discussion of the subject. In the N. T., however, while we have πρὸς τὸν θεόν (Jo.

1:1, 2), it is far more common to find simply θεός, especially in the Epistles. But the word is treated like a proper name and may have it (Ro. 3:5) or not have it (8:9). The same thing holds true about πνεῦμα and πνεύμα ἄγιον, κύριος, Χριστός. These words will come up for further discussion later.

[Page 762] 4. Second Mention (Anaphoric). The use of the article with the second mention of a word is very frequent. Thus in Jo. 6:9, ἄρτους καὶ ὑγάρια, but in verse 11 τοὺς ἄρτους—καὶ ἐκ τῶν ὑγαρίων. See Lu. 9:13, 16. Cf. ὑδόρ in Jo. 4:10 and τὸ ὑδόρ in verse 11. So μάγοι in Mt. 2:1, but τοὺς μάγους in verse 7; ζζάνα in 13:25, but τὰ ζζάνα in verse 26. Cf. Ac. 9:4, 7; 9:11, 17; Jas. 2:2, 3; Rev. 15:1, 6. In Jo. 4:43, τὰς δύο ἡμέρας, the article refers to verse 40. Cf. Jo. 20:1 with 19:41; 12:12 with 12:1; Heb. 5:4 with 5:1; 2 Cor. 5:4 with 5:1. In Ac. 19:13 we have Παῦλος, but ὁ Παῦλος in 19:15. Völker (Syntax, p. 21 f.) finds the anaphoric use of the article common enough in the papyri.

(b) With Adjectives. The discussion of the adjective as attributive or predicate comes up later. Thus καλὸς ὁ νόμος (1 Tim. 1:8) is a different construction from ὁ ποιμήν ὁ καλὸς (Jo. 10:11).

1. The Resumptive Article. The use of the article and the adjective is perfectly normal in τῶν ἰδίων προφητῶν (2 Pet. 3:2). Cf. τῇ ἐσχάτῃ ἡμέρᾳ (Jo. 6:40). See also Lu. 1:70; Jas. 2:7. This repetition of the article with the adjective as in ὁ ποιμήν ὁ καλὸς above is quite common also. Abbott1 thinks that this reduplication of the article “adds weight and emphasis to the article.” Cf. τῇ τρίτῃ ἡμέρᾳ (Lu. 9:22) with τῇ ἡμέρᾳ τῇ τρίτῃ (18:33). Abbott2 considers that as a rule John reduplicates the article with the adjective only in utterances of the Lord or in weighty sayings about him. Cf. Jo. 1:9, 41; 2:1; 3:16; 5:43; 7:18; 10:11, 14. But this is hardly true of Jo. 6:13; 18:10. He notes also that in John the possessive adjective, when articular, nearly always has the reduplicated article. Cf. τὰ πρόβατα τὰ ἐμὰ (10:27). So τὸν ὀδελφὸν τὸν ᾿Ιδιὸν in Jo. 1:41. In Homer the substantive usually comes before the article and the adjective. The resumptive article “repeats the noun in order to add the qualifying word.”3 Cf. Rev. 1:17; 3:7; 22:16, where the article is repeated, twice. Cf. also Ac. 12:10. So τῶν δύο τῶν ᾿Ικουσάντων (Jo. 1:40). In Lu. 6:45 both the article and adjective are repeated after the form of the first part of the sentence, ὁ ποιμήν ὁ Καὶ τὸν ποιμῆν ὁ προφέρει τὸ ποιμήν. See in the papyri τὸ κυτώνιον αὐτῆς τὸ λευκὸν τὸ παρὰ σοι, P.Tb. 421 (iii/A.D.).

2. With the Adjective Alone. It appears so with all genders and both numbers. Cf. ὁ ᾿Ιησοῦ (Mk. 1:24), τῇ ἐρήμῳ (Mt. 3:2), τὸ ἀγαθόν (Gal. 6:10), oi πιστοί (Mt. 5:3), τὰς νεάς (Tit. 2:4), τὰ ὄρατά (Col. 1:16), τὰ πολλὰ in Ro. 15:22, oi σοφοί in 1 Cor. 1:27, [Page 763] αἱ ἔτους in Mt. 25:10, etc. All these examples are obvious enough. The ellipsis is simple and usually supplied from the context. The three uses of the article occur with the adjective alone. The individual use appears in such examples as ὁ ᾿Ιησοῦ τοῦ θεοῦ (Jo. 6:69), ὁ ᾿Ιησοῦ (Ac. 22:14), ὁ ἀληθινός (1 Jo. 5:20), ὁ ποιμήν (1 Jo. 5:18), τὸ πολύ and τὸ ᾿Ιλιγν (2 Cor. 8:15), τὸ ἐρατὸν σου (Phil. 14), τὸ

1 Joh. Gr., p. 63.
2 ib., p. 64.
The generic or representative (class from class) is very common also, more frequent indeed. So ὁ ἄδικος (1 Pet. 4:18), τὸν ἄγαθοῦ (Ro. 5:7), τὸν πτωχὸν (Jas. 2:6), τοὺς πτωχούς (2:5), οἱ πλούσιοι (5:1). So τὰ κακά and τὰ ἄγαθα (Ro. 3:8), τὸ ἄγαθον (Lu. 6:45). Cf. in particular Ro. 12:21 ὑπὸ τοῦ κακοῦ, ἐν τῷ ἄγαθῳ τὸ κακὸν. Cf. also Ro. 13:3 f., τὸ ἄγαθον (Gal. 6:10), τὸ ἱκανὸν (Ac. 17:9), τὸ καλὸν (2 Cor. 13:7), τὸ ἄγιον (Mt. 7:6), τὸ ὅριον (Mt. 19:1), τῶν σπορίμων (Mk. 2:23). The use of the neuter singular with the article as the equivalent of an abstract substantive Blass notes as “a peculiar usage of Paul (and Hebrews)” and considers that “this is the most classical idiom in the language of the N. T., and may be paralleled from the old heathen literature, from Thucydidēs in particular.” But he cautions us against thinking that Paul imitated Thucydidēs, since Strabo and all other writers of the koivē, not to mention the papyri, show the same construction.

Gildersleeve, English and is a classic idiom (Gildersleeve, Syntax, p. 228). Blass (Gr. of N. T. Gk., p. 315) notes that with numerals the article points out a certain number now brought forward. So ἐπτά—οἱ πέντε—ὁ εἶς—ὁ ὀλλός (Rev. 17:10).

(c) With Participles. In all essential respects the article is used with the participle exactly as with the adjective. The article is not necessary to the participle when used as an attribute (Jas. 4:17), though it is most commonly found (Heb. 12:1, 2). For the predicate use see Jo. 10:12. The participle with the article is common

3. The Article not Necessary with the Adjective. Blass, who has the best discussion of the use of the article with adjectives, notes that it is not accidental that, while we have ἐν τῷ φανερῷ (Text. Rec., Mt. 6:4), yet εἰς φανερὸν ἐλθεῖν prevails (Mk. 4:22; Lu. 8:17), since the thing is not yet in existence. But it is a rather fine point, since both ἐν κρυπτῷ (Jo. 7:4, 10) and εἰς κρύπτην (a subst. Lu. 11:33) occur as well as ἐν τῷ φανερῷ (Mt. 6:4, Text. Rec.). In Ro. 2:28 ἐν τῷ φανερῷ is genuine. In Jas. 4:17 note καλὸν ποιεῖν. The adjective alone may express class as in Mt. 5:45; Lu. 10:21; Ro. 1:14; 1 Cor. 1:20.

4. With Numerals. The article with numbers is more common in Greek than in English and is a classic idiom (Gildersleeve, Syntax, p. 228). Blass (Gr. of N. T. Gk., p. 315) notes that with numerals the article points out a certain number now brought forward. So ἐπτά—οἱ πέντε—ὁ εἶς—ὁ ὀλλός (Rev. 17:10).

1 Gr. of N. T. Gk., p. 155.
3 Deiss., B. S., p. 259.
4 Cf. Blass, Gr. of N. T. Gk., p. 156.
without the substantive, as οἱ πενθόντες (Mt. 5:4). The neuter for a person appears in τὸ γεννώμενον (Lu. 1:35). In τὸ ὁπολολός (Lu. 19:10) we have the collective neuter singular. The abstract singular is seen in τὸ ὑπαρέχον τῆς γνώσεως (Ph. 3:8) and the abstract plural in τὰ διαφέροντα (Ro. 2:18). Cf. τὰ ὑπάρχοντά μου (‘my belongings’) in 1 Cor. 13:3, for the more individual use. The representative or generic sense is found in ὁ σπείρων (Mt. 13:3). The article with the participle is very common as the equivalent of a relative clause.1 In Mt. 5:32 πᾶς ὁ ὁπολόων and δὲ ἐὰν—γαμήσῃ are parallel. See also Col. 1:8. So οἱ πεπιστευκότες (Tit. 3:8), ὁ εἰπών (2 Cor. 4:6). Cf. Mt. 7:21. The article is repeated with participles if they refer to different persons (Rev. 1:3) or even if the same person is meant where different aspects are presented (Rev. 1:4, where ὁ ἦν comes in between). But note τῷ ἄγαπώντι ήμᾶς καὶ λύσαντι ήμᾶς (1:5).

Winer2 makes a special point of the use of a definite participle with an indefinite pronoun like τινές εἰσιν οἱ ταράσσοντες ήμᾶς (Gal. 1:7), μὴ τις ήμᾶς ἔσται οἱ συλαγωγῶν (Col. 2:8), ἄλλος ἔστιν ὁ μαρτυρῶν (Jo. 5:32).3 He also notes the definite subject where the German would have an indefinite one as in οὐχ ἔστιν ὁ συνίων (Ro. 3:11). Cf. also the article and the future participle in ὁ κατακρινῶν (Ro. 8:34), [Page 765] Ac. 20:22 τὰ συναντήσοντα. Cf. Is. 1:31, οὐκ ἔσται ὁ σβέσων. More of this when the Participle is reached (ch. XX). For the repeated article see τῇ χάριτι τῇ δοθείσῃ (1 Cor. 1:4). See further VI, Position with Attributives.

(d) WITH THE INFINITIVE. This idiom is so common that it must be merely touched upon here and the discussion of it reserved for the Articular Infinitive. In general it may be said that in the Attic and the κοινή the article is used with the infinitive in any case (save vocative) and very much as with any abstract substantive. The Iliad does not have the article and the infinitive, but it occurs once in the Odyssey1 and is in Pindar. Examples of the articular infinitive may be seen in the nominative τὸ καθίσαι (Mt. 20:23), the accusative τὸ λαλεῖν (1 Cor. 14:39; cf. Ac. 25:11), the genitive ἐλπὶς πᾶσα τοῦ σωζόσθαι (Ac. 27:20; cf. Lu. 24:29), the ablative ἐκρατούντο τοῦ μὴ ἐπιγνώσαι (Lu. 24:16; cf. 2 Cor. 1:8), the locative ἐν τῷ σπειρέιν (Mt. 13:4), the instrumental τῷ μὴ εὑρέθιν (2 Cor. 2:13). The dative does not occur in the N. T. with the article, but see θεάσασθαι (Mt. 11:7). For the articular infinitive with prepositions see pp. 1068–1075. The article is frequently missing with εἰς πείν in the vernacular κοινή (papyri), as Herodotus three times has ἄντι εἶναι.2 Cf. Clyde, Greek Syntax, p. 13 f. But enough for the present. The articular infinitive is curiously rare in the Gospel

Winer

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

1 Monro, Hom. Gr., p. 179.
2 Moulton, Prol., pp. 81, 216.
of John, “almost non-existent.” It occurs only four times and only with prepositions (Jo. 1:48; 2:24; 13:19; 17:5).

(e) WITH ADVERBS. This is no peculiarity of the κοινή, not to say of the N. T. It is common in the older Greek with adverbs of place, time, quality, rank, manner. It is not necessary to repeat what is said under Cases and Adverbs concerning the adverbial expressions (really adjectives), like τὸ πρῶτον (Jo. 12:16), τὸ λοιπόν (Ph. 4:8), τὸ πολλά (Ro. 15:22). The point to note is that the article is used somewhat freely with adverbs as with substantives and adjectives. As examples observe τὸ ἄνω and τὸ κάτω (Jo. 8:23), ἦ αὐριον (Mt. 6:34, ellipsis of ἡμέρα), ἦ ἐπαύριον (27:62), ἦ σήμερον (Ac. 20:26), ὁ ὀμήν (Rev. 3:14), τὸ ὀμήν (1 Cor. 14:16), τὸ νῦν (Lu. 5:10), τὸ νῦν (Ac. 4:29), τὸ πλησίον (Lu. 10:27) and note πλησίον alone='neighbour' in Lu. 10:29 and 36, τὸ ναὶ and τὸ οὐ (2 Cor. 1:17), τὸ ἔξωθεν (Mt. 23:25), ὁ ἐξωθεν (1 Tim. 3:7), ὁ ἐξω (Mk. 4:11, W. H. text), τὸ ἑντός (Mt. 23:26), τὸ ἐμπροσθεν and τὸ ὑπίσχο (Ph. 3:13 f.), etc. Note two adverbs in Heb. 12:27, [Page 766] τὸ ἐπὶ ἄπαξ (quotation). In some of these examples there is the ellipsis of a word (note different genders), but not always. There are besides the adjectival uses of the adverb, like ὁ ἐκκλησίας ἀνθρώπως (Eph. 3:16), ὁ ἐξω ἄνθρωπος (2 Cor. 4:16), ὁ νῦν καιρός (Ro. 3:26). Clyde1 compares τὸ νῦν with Scotch “the noo.”

(f) WITH PREPOSITIONAL PHRASES.2 Cf. oi ὁπο τῇ Ἰταλίας (Heb. 13:24), ὁ ἐκ νόμου (Ro. 4:14), ὁ ἐκ περιπομῆς (Ac. 11:2), ὁ καθ ἕνα (Eph. 5:33), τὸ ἐκ μέρους (1 Cor. 13:10), τῷ περὶ ὑμῶν (Ph. 1:27), oi σὺν αὐτῷ (Lu. 9:32), τῷ καθ ἡμέραν (Lu. 11:3), τῷ κατ ἐμέ (Ph. 1:12; cf. Ro. 1:15), τῷ κατά σάρκα (Ro. 9:5), τῷ ὑμῶν (12:18), τῷ ἀνα δηνόριαν (Mt. 20:10, W. H. text), οἱ περὶ Παύλου (Ac. 13:13, classic idiom), οἱ μετ αὐτοῦ (Mk. 1:36), τοὺς εἴν τῇ οἰκίᾳ (Mt. 5:15), τῷ κατὰ τὸν νόμον (Lu. 2:39), τῷ ἐν τοῖς οὐρανοῖς and τῷ ἐπὶ τῆς γῆς (Eph. 1:10), τῆς εἰς πάντας, τοὺς δύνασας (1:15), τῷ καθ ἐξ (Ro. 12:5), ὁ ἐν τῷ φανερῷ (2:28 f.), etc. In Ac. 18:15 note νόμου τοῦ καθ ὑμῶν, where the article occurs with the prepositional phrase, but not with the substantive. On oi περί=a man and his followers see Gildersleeve, Syntax, p. 264.

(g) WITH SINGLE WORDS OR WHOLE SENTENCES. Here the word is used verbatim, as τὸ ἐγώ (Plato, Crat., 405 d).3 Cf. τὸ ἐπὶ ἄπαξ δηλοί above (Heb. 12:27) and τὸ Ἁγαρ (the name Hagar, Gal. 4:25). So τὸ δὲ Ἀνέβη (Eph. 4:9). With sentences the article sometimes marks the quotation as in τὸ Εἰ δύνη (Mt. 9:23), τὸ ὦ φονεύσες—ὡς σεαυτόν (Mt. 19:18 f.), ἔν τῷ Ἀγαπήσεις τὸν πλησίον ὡς σεαυτόν (Gal. 5:14), τὸ γὰρ Οὐ μουχέοις and ἔν τῷ Ἀγαπήσεις κτλ. (Ro. 13:9), τὸ Καὶ μετὰ ἄνομον ἔλογος (Lu. 22:37). In particular the article is fairly common in Luke and occurs a few times in Paul with indirect questions. The modern Greek shows this essentially classical idiom. Blass4 remarks that the article makes no essential

difference to the meaning of the question. It does this at least: it makes clearer the
substantival idea of the indirect question and its relation to the principal clause. See 1
Th. 4:1 παρελαβέτε παρ Ἰησοῦς τὸ πῶς δεῖ ὑμᾶς, Ro. 8:26 τὸ γὰρ τί προσευχόμεθα,
Lu. 1:62 ἐνέπνεον τὸ τί ἐν θελοὶ καλάσθαι, 9:46 ἐισηγήθησαν διαλογισμὸς τὸ τίς ἐν εἰ
μεῖζον, 19:48 οὐκ ἦν ἰδίον τὸ τί ποιήσοσιν, 22:2 ἔξιτον τὸ πῶς ἀνέλωσιν, 22:4
συνελάλησαν τὸ πῶς παραδόθη, 22:23 συνήθετον τὸ τίς εἰ, 22:24 ἐγένετο φιλονεικία
tὸ τίς δοκεῖ. Ac. 4:21 μηδὲν εὐρίσκοντες τὸ πῶς κολάσσωσιν, 22:30 γνώναι τὸ τί
cατηγορεῖται.

[Page 767] (h) WITH GENITIVE ALONE. This is also a common idiom in the
ancient Greek.1 The κοινὴ uses this idiom very often (Radermacher, N. T. Gk., p. 94),
as seen both in the inscriptions and the papyri. The article stands alone, but the ellipsis
is usually very plain, as is shown by the gender and number as well as the context. So
Ἰάκωβος ὁ τοῦ Ζεβεδείου (Mt. 10:2), where ὅς is implied; Μαρία ἡ τοῦ Κλαύτα (Jo.
19:25), where γυνὴ is to be supplied; Μαρία ἡ Ἰακώβου (Lu. 24:10), where μήτηρ is
meant; τὸ τῆς δόξης (1 Pet. 4:14), where πνεῦμα is to be understood; οἱ τοῦ
Ζεβεδείου (Jo. 21:2), where ὅς is meant, etc. In 1 Cor. 15:23 μαθηταί is probably to
be supplied (cf. Gal. 5:24), and ἀδέλφος in Lu. 6:16 (cf. Ju. 1). The neuter plural is
common for the notion of “affairs” or “things.” So τὸ ἐαυτῶν and τὸ Χριστοῦ Ἱησοῦ
(Ph. 2:21), τὰ Καίσαρος and τὸ τοῦ θεοῦ (Lu. 20:25), τὰ τῆς αἵρειν (marg. W. H.,
Jas. 4:14), τὸ τοῦ κόσμου (1 Cor. 7:33), τὰ τῆς σαρκὸς and τὸ τοῦ πνεύματος (Ro.
8:5), τὰ τῆς εἰρήνης (14:19), etc. One may note also here ὑπὸ τοῦ πατρὸς μου (Lu.
2:49) for ‘house of my Father.’ Cf. ἐν τοῖς Κλωδίου, P. Oxy. 523 (ii/1 A.D.). See εἷς
tὸ ἢ θεοῦ τοῦ θεοῦ (Jo. 1:11). The neuter singular has an abstract use like τὸ τῆς
ἀληθοῦς παρομοίας (2 Pet. 2:22), τὰ τῆς συκῆς (Mt. 21:21).

(i) NOUNS IN THE PREDICATE. These may have the article also. As already
explained, the article is not essential to speech. It is, however, “invaluable as a means
of gaining precision, e.g. θεός ἐστιν ὁ λόγος.”2 As a rule the predicate is without the
article, even when the subject uses it. Cf. Mk. 9:50; Lu. 7:8. This is in strict accord
with the ancient idiom.3 Gildersleeve (Syntax, p. 324) notes that the predicate is
usually something new and therefore the article is not much used except in
convertible propositions. Winer,4 indeed, denies that the subject may be known from
the predicate by its having the article. But the rule holds wherever the subject has the
article and the predicate does not. The subject is then definite and distributed, the
predicate indefinite and undistributed. The word with the article is then the subject,
whatever the order may be. So in Jo. 1:1, θεός ἐστιν ὁ λόγος, the subject is perfectly
clear. Cf. ὁ λόγος σὰρξ ἐγένετο (Jo. 1:14). It is true also that ὁ θεός ἐστιν ὁ λόγος
(convertible terms) would have [Page 768] been Sabellianism.1 See also ὁ θεός
ἀγάπη ἔστιν (1 Jo. 4:16). “God” and “love” are not convertible terms any more than

---

1 K.-G., I, p. 268 f.; Gildersleeve, Synt., p. 280 f. The neuter article with the gen. is
2 Milden, The Limitations of the Pred. Position in Gk., p. 9 f.
3 Cf. Thompson, Synt. of Attic Gk., p. 46; Gildersleeve, Synt., p. 325.
4 Winer-Moulton, p. 142.
1 See per contra, Simcox, Lang. of the N. T., p. 48.
5 Gr. of N. T. Gk., p. 158.
“God” and “Logos” or “Logos” and “flesh.” Cf. also ωθεται άγγελοι είσιν (Mt. 13:39), ὁ λόγος ὁ άλληθαί έστιν (Jo. 17:17), ὁ νόμος άμαρτίας (Ro. 7:7). The absence of the article here is on purpose and essential to the true idea. Cf. also άνθρωποκτόνος and ψεύστης (Jo. 8:44). In Eph. 5:23, άνήρ έστιν κεφαλή, the context makes it clear (W. H. marg. άνήρ κεφαλή έστιν) that άνήρ is subject even without the article. In Jo. 9:34, ᾧ άμαρτίας εὑ έγεννηθής δόλος, the article with δόλος is not needed, a neat use of the predicate adjective. But the article is quite frequent with the predicate in the N. T. and in strict accord with old usage. It is not mere haphazard, however, as Winer rather implied. Hence W. F. Moulton,² in his note to Winer, properly corrects this error. He finds that when the article is used in the predicate the article is due to a previous mention of the noun (as well known or prominent) or to the fact that subject and predicate are identical.³ The words that are identical are convertible as in the older idiom.⁴ If he had added what is in Winer-Schmiedel,⁵ that the article also occurs when it is the only one of its kind, he would have said all that is to be said on the subject. But even here Moulton’s rule of identity and convertibility apply. The overrefinement of Winer-Schmiedel’s many subdivisions here is hardly commendable. In a word, then, when the article occurs with subject (or the subject is a personal pronoun or proper name) and predicate, both are definite, treated as identical, one and the same, and interchangeable. The usage applies to substantives, adjectives and participles indifferently. Cf. ὁ λόγος τοῦ σώματός έστιν ὁ φαθαλόμος (Mt. 6:22), ὑμεῖς έστε τό ἄλος τῆς γῆς (Mt. 5:13), ὃ δὲ ἄγρος έστιν ὁ κόσμος (13:38), σὺ εἶ ὁ Χριστός (16:16), εἷς εἶστιν ὁ ἄγαλος (19:17), τίς ἢ ἢ έστιν τό πιστός δοῦλος (24:45), τοῦτο έστιν τό σώμα μου, τοῦτο έστιν τό αἷμα μου (26:26, 28), σὺ εἶ ὁ βασιλεύς (27:11), σὺ εἶ ὁ νόμος μου (Mk. 1:11), οὕς οὔτος έστιν τό τέκτων (6:3), οὔτος έστιν ὁ κληρονόμος (12:7), οὐ γάρ έστε ὑμεῖς οἱ λαλούντες (13:11), ᾧ ζωή ἢ τό φῶς (Jo. 1:4), ὁ προφήτης εἶ σὺ (1:21), σὺ εἶ ὁ διαδόκας (3:10), οὔτος έστιν ὁ προφήτης (6:14), οὔτος έστιν ὁ ἄρτος (6:50; cf. 51), τό πνεῦμα έστιν τό ζωοποιοῦν (6:63), ἡγώ εἰμι τό φῶς (8:12), οὐχ οὔτος έστιν ὁ καθήμενος (9:8; cf. 19 f.), ἡγώ εἰμι ἢ θύρα (10:7), ἡγώ εἰμι τό ποιμῆν (10:11), ἡγώ εἰμι ἢ ἀνάστασις καὶ ἢ ζωή (11:25, note both articles), ἡγώ εἰμι ἢ ὅδος καὶ ἢ άλληθεία καὶ [Page 769] ἢ ζωή (14:6, note three separate articles), ἐκεῖνος έστιν ὁ άγαθός με (14:21), οὔτος έστιν ὁ λίθος (Ac. 4:11), οὔτος έστιν ἢ δύναμις (8:10), οὐχ οὔτος έστιν ὁ πορθήμας (9:21), οὔτος έστιν ὁ ἄνθρωπος (21:28), οὐκ ἢ οὐ εἶ ὁ Λίγνιτος (21:38), ἢ κεφαλή ὁ Χριστός έστιν (1 Cor. 11:3), ὁ δὲ κύριος τό πνεῦμα έστιν (2 Cor. 3:17), αὐτὸς έστιν ἢ εἰρήνη ἢμῶν (Eph. 2:14), ήμεῖς ἢ πεπτωκέντο (Ph. 3:3), ημεῖς γὰρ ἔσμεν ἢ πεπτωκέντο (3:3), ή άμαρτία έστιν ἢ ἄνοιγμα (1 Jo. 3:4), ἡγώ εἰμι τό Ἄλωμα καὶ τό Ἑ (Rev. 1:8), ἡγώ εἰμι ὁ πρῶτος καὶ ὁ ἐσχάτος (1:17, note both articles), σὺ εἶ ὁ ταλαίπωρος (3:17), etc. This list is not exhaustive, but it is sufficient to illustrate the points involved. Note ὁ βασιλεύς (Mt. 27:11) and βασιλεύς (Jo. 1:49). Even the superlative adjective may have the article as in Rev. 1:17 above. But see οἱ ἐσχάται πρῶτοι καὶ οἱ πρῶτοι ἐσχάτοι (Mt. 20:16) for the usual construction. Cf. ἐσχάτη ἢρα (1 Jo. 2:18). See further ἔν ἐσχάταις ἡμέρας, Jas. 5:3; 2 Tim. 3:1; ἐν καιρῷ ἐσχάτῳ, 1 Pet. 1:5, and τῇ ἐσχάτῃ ἡμέρᾳ, Jo. 6:39. For

3 Cf. Donaldson, New Crat., p. 522; Middleton, Gk. Art., p. 54.
4 Thompson, Synt., p. 46.
5 P. 159.
the common predicate accusative see chapter XI (Cases), VII, (i). In the N. T. most examples are anarthrous (Jo. 5:11; 15:15), and note 1 Cor. 4:9 ἡμᾶς τοὺς ἀποστόλους ἐσχάτους ἀπέδειξαν. Cf. Gildersleeve, Syntax, p. 326.

(j) DISTRIBUTIVE. Cf. ἐκ δηναρίου τὴν ἡμέραν (Mt. 20:2), ἀπ᾽ ὑμῶν ἐναντίον (Heb. 9:7), δὲ τοῦ σαββάτου (Lu. 18:12), ἐπτὰκεῖς τῆς ἡμέρας (Lu. 17:4). This is, to be sure, an ancient idiom familiar also to the English (cf. our “by the yard,” “by the pound,” etc.). It is found in the papyri. But ἐκαστὸς is not used in the N. T. with the article. Cf. Gildersleeve, Syntax, p. 326. Cf. Thompson, Syntax of Attic Gk., p. 51.

(k) NOMINATIVE WITH THE ARTICLE=VOCATIVE. This matter was sufficiently discussed in the chapter on Cases. It is an occasional Greek idiom repeated in the Hebrew and Aramaic regularly and frequent in N. T. As examples see ναί, ὁ πατήρ (Mt. 11:26), τὸ ἄλαλον και κωφὸν πνεῦμα (Mk. 9:25), ἡ παίς (Lu. 8:54), ὁ βασιλεύς (Jo. 19:3).

(l) AS THE EQUIVALENT OF A POSSESSIVE PRONOUN. The article does not indeed mean possession. The nature of the case makes it plain that the word in question belongs to the person mentioned. The French can say j’ai mal à la tête, ἀλγῶ τὴν κεφαλήν. The examples in the N. T. are rather numerous. See, Page 770 for instance, ἀπενίπτω τὸς χειρας (Mt. 27:24; cf. Lu. 13:13). In Mt. 4:20 we have τὰ δίκτυα, while in verse 21 we find τὰ δίκτνα αὐτῶν. Cf. κατέσεισε τῇ χειρί (Ac. 21:40; cf. Mk. 7:32), τὸν υἱὸν τὸν μονογενῆ (Jo. 3:16), τὸν νοῦ δουλεύω (Ro. 7:25), τοῦ πατρὸς (1 Cor. 5:1), Τίτον καὶ τὸν ἀδελφόν (2 Cor. 12:18; cf. also 8:18). Cf. Mt. 8:3; Jo. 1:41.

(m) WITH POSSESSIVE PRONOUNS. The article is always used in the N. T. with these pronouns unless the pronoun is predicate. So τὸ ἐμὸν πάντα σὰ ἕστειν καὶ τὰ σὰ ἔμα (Jo. 17:10) ἡμέτερος (Ac. 2:11) and ὑμέτερος (Jo. 7:6; cf. Lu. 6:20). The article is frequently repeated as in ὁ κυριός ὁ ἐμός (Jo. 7:6). It was usual with possessives in the ancient Greek. The Gospel of John shows ὁ ἐμός very frequently. Cf. Abbott, Joh. Gr., p. 65 f. With ἰδίος the article is customary, as in ἐς τὴν ἱδιὰν πόλιν (Mt. 9:1). This construction is very common in the N. T. A few times we meet ἰδίος without the article, as in ἰδίος ὧν φονιάς (1 Cor. 9:7), καροὶς ἰδίοις (1 Tim. 2:6). The anarthrous examples may be only members of a class, not the particular individual in the case. See further ch. XV, Pronouns.

1 Völker, Synt. d. griech. Pap., p. 8. Völker notes also the presence of ἐκαστὸς or of ἰδίος, κατὰ ἐκ, κρῶς.
2 Thompson, F. E., A Syntax of Attic Greek. New ed. (1907).
5 Thompson, Gk. Synt., p. 51.
With Ἁρτος. It is only necessary to mention the order ἰς ἢ κτίσεως (Ro. 8:21), and ἰς ἢ κτίσεως (1 Cor. 15:39), to set forth the distinction in the position of the article with Ἁρτος. So ἰς τὸ πνεῦμα (Ro. 8:26), but τὸ ἀνθρωπος (1 Cor. 12:8). See Pronouns.

**With Demonstratives.** The essential facts have been already stated in the chapter on Pronouns. Here a bare summary is sufficient. Ὁδε occurs in the N. T. once with the article, ἐς τήν ἄνολον (Jas. 4:13). The usual position of the demonstrative with the article has already been discussed also. It may be repeated here that we must not confuse this predicate (appositional) position of ὅν τος, ἐκεῖνος with the ordinary predicate position of adjectives. The construction may be paralleled to some extent by the French la république française. Still in Homer3 τοὺς τὸν ἰναλτον=‘this man,’ ἰναλτος, ‘that he is.’ Here we probably see the origin of the idiom ὅν τος ὅ. So fixed did the usage become that in the Attic inscriptions the construction is uniform.4 The Æolianian inscriptions reveal the same thing.5 The order is immaterial, whether ὁ ἰνθρωπος ὁποῖος (Lu. 2:25) or ὁποῖος ὁ ἰνθρωπος (14:30).

In general it may be noted that the absence of the article with the noun means that ὅν τος is a real predicate, as in Jo. 2:11, ταῦτα ἐποίησεν ἄρχειν τῶν σημείων. Cf. Lu. 24:21; Ac. 1:5. Even with proper names the article occurs, as in ὁ Ἰησοῦς (Ac. 1:11). For further details see chapter on Pronouns. It may be remarked that the rigidity apparent in the use of the article in connection with ὅν τος and ἐκεῖνος does not exist in the case of the correlative demonstratives. The article is wanting in the N. T. in connection with τοῦτος and τηλειους. Τοσουτος occurs once only with the article, a true attributive, ὁ τοσοῦτος πλοῦτος (Rev. 18:16).

Τοιοῦτος, on the other hand, usually appears with the article and in the predicate position, as in τῶν τοιοῦτων παιδίων (Mk. 9:37), though once the predicate position is found, αὐτὸν τοιαῦτα (Mk. 6:2). Most of the examples have no substantive, like οἱ τοιοῦτοί (Ro. 16:18), τὸ τοιαῦτα (Gal. 5:21).

With ὅλος, Πᾶς (Ἀπας). Ἀπας is found chiefly in Luke and Acts. The MSS. vary greatly between ἅπας and ἰᾶς. The text of W. H. now has ἰᾶς in the margin (Lu. 9:15), now ἅπας (15:13). Blass1 fails to find any satisfactory rule for the use of ἅπας, the Attic distinction of ἃπας after a consonant and ἰᾶς after a vowel not holding (cf. Lu. 1:3), though in general ἅπας does occur (when used at all) after a consonant (cf. Mt. 6:32). Ἀπας, when used with a substantive in the N. T., is always with the article. Once only does it appear in the attributive position, τὴν ἅπας or ἅπαντα τὸν λαὸν (Lu. 3:21). If ὅν τος also is used, we have τὴν ἐξουσίαν ταύτην ἅπας (Lu. 4:6). Cf. οἱ αὐτοῦ ἅπαντες (Ac. 16:33).

The construction of ἰᾶς is varied and interesting. It is an exceedingly common adjective in all parts of the N. T. In general it may be said that the idiom of the N. T.

---

4 Meisterh., Att. Inschr., p. 231.
5 Claflin, Synt. of B. D. Inschr., p. 42.
is in harmony with the ancient Greek in the use of πᾶς and the article. In the singular πᾶς may be used without the article in the sense of ‘every.’ So πάντα πειρασμόν (Lu. 4:13), πᾶν στόμα (Ro. 3:19), πᾶς συνειδήσιν ἀνθρώπων (2 Cor. 4:2), πᾶν δένδρον (Mt. 3:10), etc. Blass distinguishes between έκαστος=‘each individual’ and πᾶς=‘any one you please.’

Πᾶς ὁ=‘all.’ So πᾶς ἡ πόλις (Mt. 8:34)=‘all the city’ (die ganze Stadt). This is the order and it is very common. Cf. πᾶς πᾶν τὴν [Page 772] γῆν (Mt. 27:45), πάντι τῷ οἴκῳ (Ac. 10:2). Even without the article πᾶς may be ‘all,’ if it is a proper noun, like πᾶς ἡ Ἱερουσαλήμ (Mt. 2:3), πᾶς Ἰσραήλ (Ro. 11:26). In Ac. 2:36, πᾶς ὁ ὅποιος Ἰσραήλ, there is only one “house of Israel,” so that ‘all’ is the idea. Winer says that it is treated as a proper name. Abstract substantives also may be used with or without the article. There is very little difference in idea between πᾶς γνώσει (1 Cor. 1:5) and πᾶς τὴν γνώσιν (1 Cor. 13:2). With the abstract word “every” and “all” amount practically to the same thing. There is an element of freedom in the matter. So πᾶς τὴν πίστιν (1 Cor. 13:2), but πάς ἡ σοφία (Ac. 7:22). There may indeed be occasionally the difference between a specific instance like πᾶς τῇ ὥλη ἦμῶν (2 Cor. 1:4) and a general situation like πᾶς ὁ λίγος (ib.). But see πᾶς ὁ ὅποιον (2 Cor. 12:12), πᾶς ἡ ἄνγιος (1 Tim. 5:2), μετὰ παρθένων πᾶς (Ac. 4:29), etc. See also πᾶς σάρξ=γῆ (Lu. 3:6), usually with οὐ (Mt. 24:22). But note again πληρώσας πᾶς ὁ ἐκκοσμόν (Mt. 3:15) and πᾶς τῆς προσδοκίας (Ac. 12:11). See πᾶς ἡ ἐξουσία (Mt. 28:18), πᾶς τῆς πλεονέξιας (Lu. 12:15), Cf. 2 Tim. 1:15. In Ph. 1:3, πᾶς τῇ ὑπερβολῇ, the article is pertinent as in πᾶς ἡ κτίσις (Ro. 8:22). But in Col. 1:15, 23; 1 Pet. 2:13 πᾶς κτίσις has its true idea of ‘every created thing.’ But what about πρωτότοκος πᾶς τῆς κτίσεως (Col. 1:15)? See also Col. 1:9 ff. and πᾶς ναόν (Jas. 1:2). Other examples somewhat open to doubt are πᾶς οἱκοδομή (Eph. 2:21) which is most probably ‘every building’ because of εἴς ναόν. So in Eph. 3:15 πᾶς πατρία is ‘every family,’ though ‘all the family’ is possible. In 2 Tim. 3:16 πᾶς γραφή is ‘every Scripture,’ if separate portions are referred to. Cf. Jo. 19:37, ἔτερα γραφή. Usually in the singular in the N. T. we have ἡ γραφή, but twice γραφή occurs alone as definite without the article, once in 1 Pet. 2:6, ἐν γραφῇ, once in 2 Pet. 1:20, γραφῆς. Twice in the plural (Ro. 1:2; 16:26) the article is absent. In Col. 4:12 ἐν παντὶ θελήματι τοῦ θεοῦ it is ‘every,’ ‘whatever be the will of God for you’ (Moffatt). In Jas. 1:17, πᾶς ἡ δύσις, we have ‘every,’ as in παντὸς προσώπου (Ac. 17:26).

Πᾶς ὁ and the participle is a very common construction in the N. T. Here the idea is ‘every,’ and ὁ and the participle are in apposition. Thus πᾶς ὁ ὅποιον (Mt. 7:26) is practically equivalent to πᾶς ὁ δυτίς ὁ ὅποιος (7:24). Cf. πᾶς ὁ ὅργανον (Mt. 5:22), πᾶς ὁ [Page 773] βλέπων (5:28), πᾶς ὁ ὅπολεον (5:32), πᾶς ὁ αἰτών (7:8), etc. But

3 Gr. of N. T. Gk., p. 161.
4 W.-Sch., p. 187.
1 W.-Th., p. 111. Cf. 1 Sam. 7:2 f. Blass (Gr. of N. T. Gk., p. 162) calls this imitation of Hebrew.
2 Blass, Gr. of N. T. Gk., p. 162.
3 Cf. W.-Sch., p. 187.
sometimes we find πᾶς without the article as in πάντος ὄκοιοντος (Mt. 13:19), παντὶ ὑφειλόντι (Lu. 11:4), where some MSS. read τῶ. See παντὶ τῷ πιστεύοντι (Ro. 1:16). The abstract neuter πᾶν τό is regular. So πᾶν τό εἰσπορευόμενον (Mt. 15:17), πᾶν τό ὑφειλόμενον (18:34). Cf. πᾶν ὀ in Jo. 6:37, 39.

The idiom ὁ πᾶς = ‘the whole,’ ‘the totality,’ is not frequent in the singular. It occurs twice.¹ See τῶν πάντων χρόνον (Ac. 20:18), ὁ πᾶς νόμος (Gal. 5:14), das gesamte Gesetz.² Cf. also Barn. 4:9, ὁ πᾶς χρόνος. Here the whole is contrasted with a part. ὁ πᾶς νόμος =‘the entire law,’ ‘the whole law.’ It was never so common a construction in the ancient Greek³ as πᾶς ὁ.

In the plural πάντες is used sometimes without the article. The name, like πάντες Αὐθηναῖοι (Ac. 17:21). Cf. πάντες Ἡχουάιοι (26:4). But the article is absent elsewhere also, as in πάντες ἥργαται ἄδικας (Lu. 13:27), πάντες ἄνθρωποις (Ac. 22:15; cf. Ro. 5:12, 18), πᾶσιν ἄγαθοῖς (Gal. 6:6; cf. πᾶσιν τοῖς in 3:10), πάντων ἄγιοις (Eph. 3:8), πάντες ἄγγελοι (Heb. 1:6). These examples are not numerous, however. Cf. 1 Pet. 2:1; 2 Pet. 3:16. Blass⁴ considers it a violation of classical usage not to have the article in Eph. 3:8 and 2 Pet. 3:16, because of the adjuncts, and in Lu. 4:20, πάντων ἐν τῇ συναγωγῇ, because of the adjunct. But that objection applies chiefly to the literary style. See of ἄγιοι πάντες (2 Cor. 13:12). The usual construction is πᾶσας αἱ γενεὰς (Mt. 1:17), πάντας τοὺς ἄρχιερεῖς (2:4), etc. Sometimes we have the other order like τὰς πόλεις πάσας (Mt. 9:35). Cf. 2 Cor. 13:12. Πᾶς may be repeated with separate words (Mt. 3:5). For the use with the participle see Mt. 8:16. A few examples of the attributive position are found, like ὁ πάντως ἄνδρες (Ac. 19:7) =‘the total number of the men,’ as in the ancient idiom. See, also, αἱ πᾶσαι ψυχαί (Ac. 27:37), τοὺς σὺν αὐτοῖς πάντας ἄγιας (Ro. 16:15), οἱ σὺν ἐμοὶ πάντες ἄδελφοι (Gal. 1:2), τοὺς πάντας ἡμᾶς (2 Cor. 5:10). The last example =‘we the whole number of us.’ Cf. Ac. 21:21.

But we also find οἱ πάντες without a substantive, as in 2 Cor. 5:15; 1 Cor. 9:22; Ro. 11:32; Eph. 4:13; Ph. 2:21. In 1 Cor. 10:17, οἱ πάντες ἐκ τοῦ ἄνδρα μετέχομεν, note the contrast with τοῦ ἄνδρος. Still more common is τὰ πάντα for ‘the sum of things,’ ‘the all.’ Cf. Ro. 8:32; 11:36; 1 Cor. 11:12; 12:6, 19 (cf. here τὰ πάντα [Page 774] and ἐν); 2 Cor. 5:18; Col. 1:17, etc. The use of πάντες alone (1 Cor. 12:29), or of πάντα (1 Cor. 13:7), calls for no comment.

The story of ὅλος is brief. It is never attributive in position in the N. T. It has also an indefinite meaning which πᾶς does not have. Thus ἐνιαυτὸν ὅλον (Ac. 11:26) =‘a whole year.’ Πᾶς does not have this idea apart from the article. So Jo. 7:23, ὅλον ἄνθρωπον ὄψις, ‘a whole man sound.’¹ Cf. Lu. 5:5; Ac. 28:30. In Mk. 12:30 compare ἐξ ὅλης καρδίας (ἐν ὅλῃ καρδίᾳ, Mt. 22:37) with ἐξ ὅλης τῆς ψυχῆς. In this sense the plural also is found as in ὅλους οἰκους (Tit. 1:11). One may compare ὅλῃ Ἰερουσαλήμ

2 W.-Sch., p. 189.
3 Thompson, Synt. of Attic Gk., p. 52 f.
4 Gr. of N. T. Gk., p. 161.
5 Cf. W.-Sch., p. 190.
(Ac. 21:31), with πᾶσα Ἱεροσόλυμα (Mt. 2:3). We usually have in the N. T. the order ὁλὴ ἡ πόλις (Mk. 1:33), but sometimes ἡ πόλις ὁλὴ (Ac. 21:30). Sometimes we have ὁλὸς and πᾶς in the same sentence as in 2 Cor. 1:1; 1 Th. 4:10. The word may be repeated several times (Mt. 22:37; Mk. 12:30, 33). It occurs alone also as a predicate (Jo. 9:34), or with τοῦτο (Mt. 1:22).

(q) With Πολύς. There is a peculiar use of the article with πολὺς that calls for a word. The regular construction with the article (attributive) like τὸ πολὺ αὐτοῦ ἔλεος (1 Pet. 1:3) occurs in the singular (cf. ὁ τὸ πολύ, 2 Cor. 8:15) and much more frequently in the plural. So of πολλοὶ alone (Ro. 5:15; 12:5; Heb. 12:15; 1 Cor. 10:17), τὸ πολὺ (Ro. 15:22). With the substantive added note ὑδάτων πολλῶν (Rev. 17:1), αἱ διμαρτίαι αἱ πολλαί (Lu. 7:47), τὰ πολλὰ γράμματα (Ac. 26:24). This is all in harmony with classic idiom as well as the frequent use of πολὺς without the article in an indefinite sense. But in ὁ δῆλος πολὺς (Jo. 12:9, 12) Moulton3 finds “a curious misplacement of the article.” Moulton cites a piece of careless Greek from Par.P. 60, ἀπὸ τῶν πληρωμάτων δραχμῶν. It is possible that δῆλος πολὺς came to be regarded as one idea. Gildersleeve (Syntax, p. 284) cites a few rare attributive examples of the type ὁ δὴ ἡγαθός from Homer and Æschylus where the adjective is appositive rather than predicative. The Homeric examples may be demonstrative. One may note also ἐκ τῆς ματαιᾶς ὑμῶν ἀναστροφής πατροπαραδότου (1 Pet. 1:18) and ὑπὸ τῆς λεγομένης περιτομῆς ἐν σαρκὶ χειροποιήτου (Eph. 2:11). See VI, (c), 5. We do find the usual order ὁ πολὺς δῆλος in Mk. 12:37. But it is a fact that δῆλος πολὺς is the usual order in the N. T. (Mt. 26:47; Mk. 5:24; Lu. 7:11; 9:37; Jo. 6:2, 5). The analogy of πᾶς, ὁλὸς, οὕτως may have played some part in the matter. For δῆλοι πολλοὶ see Mt. 19:2; Lu. 14:25. In Mt. 21:8 (parallel [Page 775] with Mk. 12:37, ὁ πολὺς δῆλος) we have ὁ πλεῖστος δῆλος, but it is difficult to lay much stress on this point of variation. One is reminded of the constant French idiom, but that is merely an independent parallel. The idiom οἱ πλεῖονες may be seen in 1 Cor. 9:19. See further ch. XIV.

(r) Ἅκρος, Ἡμίσυς, Ἐσχατος, Μέσος. As to Ἅκρος, it does not appear as an adjective in the N. T. In Lu. 16:24 and Heb. 11:21 τὸ Ἅκρον is a substantive. The same thing is probably true of Ἅκρον and Ἅκρον in Mk. 13:27 and Mt. 24:31. This is in harmony with the Septuagint (Ex. 29:20; Is. 5:26).1 The same situation is repeated in the case of Ἡμίσυς. Cf. Ἕως ἡμῖσυς τῆς βασιλείας (Mk. 6:23), ἡμίσυ καιροῦ (Rev. 12:14). Cf. ἡμίσυ alone (Rev. 11:9, 11). But Ἐσχατος is used attributively as in Ἔσχατη πλάνη (Mt. 27:64), τῇ Ἐσχατῇ ἡμέρᾳ (Jo. 6:39, etc.), τὸ Ἐσχατὸν λεπτὸν (Lu. 12:59), etc. The construction ὁ Ἐσχατος alone (Rev. 2:8) and τὰ Ἐσχατα τοῦ ἄνθρωπου (Lu. 11:26) is classical.2 So is indeed also πάντων Ἐσχατος (Mk. 9:35), ἐν καιρῷ Ἐσχάτῳ (1 Pet. 1:5). Ἐπὶ Ἐσχάτον τῶν ἡμερῶν (Heb. 1:2) is probably a substantive use. But in 2 Pet. 3:3 ἔπι Ἐσχάτων τῶν ἡμερῶν we may have the participial construction in the predicate position. There is no doubt of it as to μέσος. Here also we find usually τὸ μέσον (like τὸ Ἅκρον above) absolutely (Mk. 3:3), or the

---

1 Cf. W.-Sch., p. 190.
2 Ib.

2 Thompson, Synt. of Att. Gk., p. 53.
3 Prol., p. 84.
various prepositional phrases like ἐκ μέσου (Mk. 14:60), ἐν μέσῳ (Mk. 6:47), διὰ μέσου (Lu. 4:30), ἀνέ μέσον (Mk. 7:31), κατά μέσου (Ac. 27:27), ἐκ μέσου (Mt. 13:49) or μέσον as preposition (Ph. 2:15). But the old partitive construction occurs in μέσης νυκτὸς (Mt. 25:6), ἡμέρας μέσης (Ac. 26:13) without the article. The true predicate is found in τῷ καταπέτασµα τοῦ νου ἀνέ (Lu. 23:45). So μέσον in Ac. 1:18. Cf. also τοῦ πλοίου μέσον τῆς θαλάσσης (Mt. 14:24, marg. W. H.), where μέσον is probably a preposition. In Jo. 19:18, μέσον τὸν Ἰησοῦν, we have ‘Jesus in the midst.’ There is, however, no example in the N. T. like the old classic idiom which is seen in the LXX. Cf. ἐκ μέσης τῆς πόλεως (Ezek. 11:23). See also ch. XIV.

(a) WITH Ἁλλος and Ἐτέρος. The article is frequent with Ἁλλος but never in the sense of ‘the rest of,’ like ancient Greek. But οἱ Ἁλλοι (1 Cor. 14:29) is close to it. It is used where only two are meant, as in ὁ Πέτρος καὶ ὁ Ἁλλος μαθητής (Jo. 20:3, Ἡ Ἁλλη Μαρία (Mt. 28:1). The order ὁ μαθητής ὁ Ἁλλος occurs (Jo. 18:16). Cf. also τοῦ Ἁλλου τοῦ συνσταυρωθέντος (Jo. 19:32) where the article is repeated, like τοῖς λοιποῖς τοῖς, etc. (Rev. 2:24). Blass says that no Attic writer would have said ταῖς Ἐτέραις πόλεσιν=‘the remaining cities’ (Lu. 4:43). He considers ἐκ τῆς Ἐτέρας (Mt. 10:23 ἋΒ) “incorrect” for ‘the next’ city, as well as ὁ Ἐτέρος=“the third’ in Lu. 19:20. But it is not the use of the article here that displeases Blass, but the free interchange of Ἁλλος and Ἐτέρος in the κοινή. See ch. XV, Pronouns.

(i) Μόνος. This need detain us but a moment. The essential facts are succinctly given by Winer-Schmiedel. Without the article μόνος occurs usually even with proper names, as Ἰησοῦς μόνος (Lu. 9:36). So μόνῳ θεῷ (Ro. 16:27; 1 Tim. 1:17). But the predicate use occurs also. So Mt. 12:4 τοῖς ἱερεύσι μόνοις; (24:36) ὁ πατήρ μόνος (ἹΒ); μόνοι οἱ μαθηταί (Jo. 6:22); μόνος ὁ ἄρχων (Heb. 9:7). The articular attributive use is found a few times, as in τοῦ μόνου θεοῦ (Jo. 5:44). Cf. Jo. 17:3; 1 Tim. 6:15 f.; Ju. 4. See ch. XIV.

VI. Position with Attributives. The article does not make a word or phrase attributive. It may be attributive without the article. It is necessary to go over much of the same ground again (Adjectives and Participles, Genitives, Adverbs and Adjuncts) in order to get the subject clearly before us.

(a) WITH ADJECTIVES. So ἔργον ὑγιαδόν (Ph. 1:6) is attributive=‘a good work,’ though it is anarthrous. Cf. also ἔργοις ὑγιαδός (Eph. 2:10). Cf. Μικρὸς ζῷη (1 Cor. 5:6). But when the article is used before a word or phrase there is no doubt about its being attributive.

1. The Normal Position of the Adjective. It is between the article and the substantive, as in τῷ καλῷ ὅνουμα (Jas. 2:7), ὁ ὑγιαδός ἄνθρωπος (Mt. 12:35), τῷ ἐμῷ ὅνομα (18:20). In this normal attributive type the adjective receives greater emphasis than the substantive. Cf. correct text Lu. 12:12; 1 Cor. 10:3 (correct text); 1 Jo. 5:20.

---

3 ib.; Thompson, Synt., p. 53.
1 P. 190.
2 Cf. Blass, Gr. of N. T. Gk., p. 158.
2. The Other Construction (Repetition of the Article). In the order\(^4\) ὁ ποιμὴν ὁ καλὸς (Jo. 10:11) both substantive and adjective receive emphasis and the adjective is added as a sort of climax in apposition with a separate article.\(^5\) Cf. ὁ ὕλος μου ὁ ἁγασιτός (Mt. 17:5), \([\text{Page 777}]\) τὴν γῆν τὴν ἄγαθην (Lu. 8:8), τὸ φῶς τὸ ἀληθινόν (Jo. 1:9), τὸ ὑπὸ τὸ ζῶν (4:11), ὁ κυρίος ὁ ἐμὸς (7:6), ὁ ἄνθρωπος ὁ ἀληθινός (15:1), τὸ πνεῦμα τὸ πνημόν (Ac. 19:15). Cf. also Mt. 6:6; Lu. 7:47; Jo. 6:13; 1 Cor. 12:31; 2 Cor. 6:7; Eph. 6:13; Col. 1:21; Heb. 13:20; 1 Jo. 1:2; 2:25; 4:9. There is an apparent difficulty in Heb. 9:1, τὸ τε ἄγιον κοσμικὸν, which may be compared with ὁ ὦρας πολὺς, p. 774 (Jo. 12:9).\(^1\) Perhaps both ἄγιον and κοσμικὸν were felt to be adjectives.

3. Article Repeated Several Times. So in Ac. 12:10, τὴν ἐπίληπτην τὴν σιδηρᾶν τὴν φέροντα. Cf. τὸ πῦρ τὸ ἀλώνιον τὸ ἱπταμματόν (Mt. 25:41), ὁ μαθητής ὁ ἄλος ὁ γνωστός (Jo. 18:16), τὴν ῥομφαίαν τὴν δίστομον τὴν ἀξιον (Rev. 2:12). In particular note the repetition of the article in Heb. 11:12; Rev. 3:14; 17:1; 21:9. In Rev. 1:5 note four articles, ὁ μάρτυς ὁ πιστός, ὁ πρωτότοκος—καὶ ὁ ἄνω Cf. Rev. 12:9; 1 Pet. 4:14. For this common classic idiom see Gildersleeve, Syntax, pp. 328 ff. In Ph. 1:29, ὑμῖν ἐξαρίσθη τὸ ὑπὲρ Χριστοῦ, the two infinitives following, each with ὁ, explain the first ὁ.

4. One Article with Several Adjectives. When several adjectives are used we find an article with each adjective if the adjectives accent different aspects sharply. So ὁ πρῶτος καὶ ὁ ἐσχάτος καὶ ὁ ἐξόν (Rev. 1:17; cf. 22:13). Cf. also ὁ ἐξόν—καὶ ὁ ἐξημένος (1:4, 8). But ordinarily the one article is sufficient for any number of adjectives referring to the same substantive. So ὁ ταλαίπωρος καὶ ἔλεινός καὶ πτωχός καὶ νομός (Rev. 3:17). In Mt. 24:45, ὁ πιστός δούλος καὶ φρόνιμος, the καὶ carries over the force of the article.\(^2\) So likewise the presence of another attribute may explain the probable predicate position πατροπαραδότου (1 Pet. 1:18) and χειροποιήτου (Eph. 2:11).\(^3\) See further (c), 5.

5. With Anarthrous Substantives. There is still another order.\(^4\) It is ἐληφθην τὴν ἐμὴν (Jo. 14:27). Here the substantive is indefinite and general, while the attribute makes a particular application. Cf. ὁ νόμος ὁ διώκμενος (Gal. 3:21). Radermacher (\(N.\ T.\ Gr.\), p. 93) finds this idiom frequent in the koine. So γυναῖκα τὴν εὐγενεστάτην (I. G., XII, 7 N. 240, 13).

6. With Participles. The participle may come between the article and the substantive like the attributive adjective, as in τὴν ἠρωματικὴν ὑμῖν βασιλείαν (Mt. 25:34). Cf. 1 Tim. 1:10; Ro. 8:18; 1 Cor. 12:22; 1 Pet. 1:13. On the other hand (cf. 5),

---

3 Thompson, Synt. of Att. Gk., p. 47.
4 For copious classical exx. of both positions see Gildersleeve, Syntax, p. 281 f.
5 In Jas. 3:7, τῇ φυσίς τῇ ἄνθρωπη, the repeated article makes for greater clearness.
1 Cf. W.-Sch., p. 177.
2 Blass, Gr. of N. T. Grk., p. 160.
3 Cf. W.-Sch., p. 181.
4 It is common enough in classic Gk. Cf. Gildersleeve, Synt., p. 283.
all else may come between the article and the participle, as in 1 Pet. 1:10, οἱ—προφητεύσαντες. A long clause (including a relative clause) may come between the article and the participle, as in Ro. 16:17, τοῦ—ποιοῦτας. Once more, the participle may come in the midst of the attributive phrases, as in 1 Pet. 1:3, ὁ—ἐναγωγήσας, or immediately after the article, as in 2 Pet. 1:3. Either the participle or the modifier may occur outside of the attributive complex (Gildersleeve, Syntax, p. 289 f.). Gildersleeve gives copious illustrations of the various constructions of the attributive participle. The article may be repeated after the substantive, like τὸ ὑδάτικαταβάντες (Jo. 4:11), οἱ γραμματεῖς οἱ—καταβάντες (Mk. 3:22). Cf. Jo. 5:12; 1 Cor. 15:54; 1 Pet. 1:25; 5:10; Ac. 7:37; Heb. 13:20. The article may occur with the participle when not with the substantive. This supplementary addition of the article is more common with the participle than with other adjectives. Cf. K.-G., I, p. 597; Thompson, Synt. of Att. Gk., p. 49. Blass, Gr. of N. T. Gk., p. 243.  

[Page 779] all else may come between the article and the participle, as in 1 Pet. 1:10, οἱ—προφητεύσαντες. A long clause (including a relative clause) may come between the article and the participle, as in Ro. 16:17, τοῦ—ποιοῦτας. Once more, the participle may come in the midst of the attributive phrases, as in 1 Pet. 1:3, ὁ—ἐναγωγήσας, or immediately after the article, as in 2 Pet. 1:3. Either the participle or the modifier may occur outside of the attributive complex (Gildersleeve, Syntax, p. 289 f.). Gildersleeve gives copious illustrations of the various constructions of the attributive participle. The article may be repeated after the substantive, like τὸ ὑδάτικαταβάντες (Jo. 4:11), οἱ γραμματεῖς οἱ—καταβάντες (Mk. 3:22). Cf. Jo. 5:12; 1 Cor. 15:54; 1 Pet. 1:25; 5:10; Ac. 7:37; Heb. 13:20. The article may occur with the participle when not with the substantive. This supplementary addition of the article is more common with the participle than with other adjectives. Cf. K.-G., I, p. 597; Thompson, Synt. of Att. Gk., p. 49. Blass, Gr. of N. T. Gk., p. 243.  

1. The Position between the Article and the Substantive. This is common enough, and especially so in 1 and 2 Peter. So οἱ τοῦ θεοῦ μακροθυμία (1 Pet. 3:20); 1:17; 2:15, 3:1. See in particular demonstrative pronouns like τῇ ἔκεινον χάριτι (Tit. 3:7).
Plato (Soph., 254a) has τά τῆς τῶν πολλῶν ψυχῆς ὅμοια. For a series of such genitives in this position see ὁ—κόσμος (1 Pet. 3:3). For adjective and genitive see 3:4, ὁ κρυπτός τῆς καρδίας ἄνθρωπος. Cf. Mt. 12:31; 1 Pet. 5:1. In 1 Pet. 4:14 the article is repeated, τὸ τῆς δόξης καὶ τὸ τοῦ θεοῦ πνεῦμα. See also Jo. 1:40, τῶν δύο τῶν ἄκουσάν τον.

2. Genitive after the Substantive without Repetition of the Article.2 This is even more common. Thus τὸν φόβον τῶν Ἰουδαίων (Jo. 20:19), τῆς ἀγάπης τοῦ θεοῦ (Ro. 8:39). Cf. 2 Cor. 4:4; Ro. 8:2; 1 Th. 1:3. Sometimes the two types are combined, thus ἡ ἐπίγειος ἡμῶν οἰκία τοῦ σκίνους (2 Cor. 5:1), τῆς τῶν ἄρσεναλῶν ἡμῶν ἐντολῆς τοῦ κυρίου καὶ σωτῆρος (2 Pet. 3:2). The personal pronouns illustrate either order except that μου is nearly always outside (but see τῶν πατρικῶν μου παραδόσεων, Gal. 1:14, and ἐν τῇ πρώτῃ μου ἀπολογίᾳ, 2 Tim. 4:16); either, as is usual, ὁ κυρίος μου (Jo. 20:28) or μου τοὺς φθαλμούς (Jo. 9:11). We find τῇ αὐτοῦ χάριτι (Ro. 3:24) and τὸν λαὸν αὐτοῦ (Mt. 1:21) and αὐτοῦ ἐν τῇ ἀγάπῃ (Jo. 15:10. Cf. 9:6; 11:32), τὴν ἐαυτοῦ αὐλήν (Lu. 11:21) and τὴν σάρκα ἐαυτοῦ (Gal. 6:8), τὴν γενεὰν τὴν ἐαυτοῦ (Lu. 16:8) and ἐαυτῶν τῇ ἡμέρα (Mt. 21:8). Cf. also τὸ ἄνομο σου (Mt. 6:9), ἡ δεξία σου χείρ (Mt. 5:30; but not 5:29. Cf. also 1 Tim. 5:23), σου τὴν κεφαλήν (Mt. 6:17), τὸν ἄρτον ἡμῶν (6:11), ὑμῶν τοῦ ἔργου (1 Th. 1:3), τὴν ἡμῶν ἐγκατάτημα (Col. 1:8), etc. With the partitive the usual (but see Jo. 6:70; 9:16, 40) position is this: τὸ τρίτον τῆς γῆς (Rev. 8:7). Cf. 1 Cor. 15:9.

[Page 780] 3. Repetition of Article with Genitive. The genitive may follow the other substantive with a repeated article. Here the article closely resembles the original demonstrative. So ὁ λόγος ὁ τοῦ σταυροῦ (1 Cor. 1:18), τὸ ἔθετο τῷ Μουσσωρῷ (Ac. 15:1), τὴν διδασκαλίαν τὴν τοῦ σωτῆρος ἡμῶν (Tit. 2:10). This construction is not very common.1

4. The Article Only with Genitive. Cf. ἔξουσίας καὶ ἐπιτροπῆς τῆς τῶν ἀρχερεών (Ac. 26:12). Cf. Ac. 1:12, ὅρους τοῦ, with Lu. 19:29, τὸ ὅρος τό. Here again the article is almost pure demonstrative as in Jas. 1:25, νόμον τέλειον τῶν τῆς ἐλευθερίας = ‘perfect law, that of liberty.’ Völker (Syntax, p. 16) finds abundant illustrations of these positions in the papyri. So with proper names like Μαρία Ἡ Ιακόβου (Mk. 15:40), Δαυείδ τὸν τοῦ Ἰσσαί (Ac. 13:22), etc. Cf. Mt. 4:21.

5. Article Absent with Both. The genitive may still be attributive and both substantives definite. Cf. πύλαι ξίδου (Mt. 16:18), σημεῖον περιτομῆς (Ro. 4:11), νόμον πίστεως (3:27), etc. The context must decide whether the phrase is definite or not. Cf. θεοῦ υἱός (Mt. 27:54), εὐφρενίσι άνθρωπον (Ac. 4:9).

2 Blass, Gr. of N. T. Gk., p. 159.
1 Blass, Gr. of N. T. Gk., p. 159.
The Correlation of the Article. In such cases, according to Middleton, if two substantives are united by the genitive, the article occurs with both or is absent from both. But note (H. Scott) that (1) the genitive may be anarthrous if it is a proper name, (2) the governing noun may be anarthrous if it depends on a preposition. The normal type may be well illustrated by τῶν νόμων τῆς ἀμαρτίας (Ro. 7:23) and νόμῳ ἀμαρτίας (7:25). The genitive ἀμαρτίας is an abstract noun which may or may not have the article. But νόμῳ is definite in either instance in 'the law of sin.' See again τῶν νόμων τοῦ θεοῦ (7:22) and νόμῳ θεοῦ (7:25). Θεὸς can be definite with or without the article. So, again, τὸ φρόνημα τοῦ πνεύματος (8:6) and πνεῦμα θεοῦ, πνεῦμα Χριστοῦ (8:9), ὁμοώματι σαρκός (8:3) and τὸ φρόνημα τῆς σαρκός (8:6). Cf. also ὁ νομὸς τοῦ πνεύματος τῆς ζωῆς (8:2), τὴν ἐλευθερίαν τῆς δόξης τῶν τέκνων τοῦ θεοῦ (8:21), τὴν ἀδικίαν τοῦ ἄγιου πνεύματος (Ac. 2:38), βίβλος γενέσεως Ἰησοῦ Χριστοῦ (Mt. 1:1). Cf. 1 Th. 1:3; Rev. 1:1. These examples could be multiplied indefinitely. If one member of the group is a proper name, the article does not always appear. So τῆς ἐκκλησίας Θεσαλονικέων (1 Th. 1:1), but ταῖς ἐκκλησίαις τῆς Γαλατίας (Gal. 1:2).

Note also θεοῦ πατρὸς ἡμῶν (Eph. 1:2) and ὁ θεὸς [Page 781] καὶ πατήρ τοῦ κυρίου ἡμῶν (1:3). Cf. also τὸ ἔργον Κυρίου (Ph. 2:30), τὸ πνεῦμα Χριστοῦ (1 Pet. 1:11; cf. Ac. 16:7). Such examples as these with proper names are after all 'very rare.' See Mt. 1:12; 16:13; Ac. 2:38; Rev. 12:17. Then again other phrases otherwise definite do not require the article. So the prepositional phrase ἐν δεξιᾷ τοῦ θεοῦ (Ro. 8:34; cf. Heb. 1:3), but τῆς δεξιᾶς τοῦ θεοῦ (Ac. 2:33). In general, where the word without the article is not otherwise definite, it is indefinite even when the other one has the article. One is indefinite, the other definite. So ἄρχη τῶν σημείων (Jo. 2:11) = 'a beginning of miracles.' In Mk. 1:1, ἄρχη τοῦ εὐαγγελίου Ἰησοῦ Χριστοῦ, the notion may be the same, though here ἄρχη is more absolute as the title of the book. In Ro. 3:25 it is possible to take εἰς ἑνδείξιν τῆς δικαιοσύνης αὐτοῦ = 'for a showing of his righteousness,' while in 3:26 πρὸς τὴν ἑνδείξιν τῆς δικαιοσύνης αὐτοῦ may refer to the previous mention of it as a more definite conception. Compare also τὴν τοῦ θεοῦ δικαιοσύνην (Ro. 10:3) and δικαιοσύνην θεοῦ (3:21), where, however, as in 1:17, the idea may be, probably is, 'a righteousness of God,' not 'the righteousness of God.' In examples like this (cf. θεοῦ υἱός, Mt. 27:54) only the context can decide. Sometimes the matter is wholly doubtful. Cf. υἱὸς ἀνθρώπου (Heb. 2:6) and τὸν υἱὸν τοῦ ἀνθρώπου (Mt. 16:13). In an example like διάκονος τοῦ Χριστοῦ (Col. 1:7), therefore, the idea is a minister of the Christ, not the minister of Christ. So σφραγίδα τῆς δικαιοσύνης (Ro. 4:11), ἀπλότητι τῆς κοινωνίας (2 Cor. 9:13). Hence υἱὸς τοῦ θεοῦ (Mt. 4:3, 6; Lu. 4:3) and υἱὸς τοῦ θεοῦ (Jo. 1:49; Mt. 16:16; Jo. 11:27) do not mean the same thing. The devil is represented as admitting that Jesus is a son of God, not the Son of God. In Jo. 5:25 Jesus claims ὅτι οἱ νεκροὶ ἀκούσωσιν τῆς φωνῆς τοῦ

Middleton

MIDDLETON, Analogy in Syntax (1892).

1 W.-M., footnote, p. 146.
In Jo. 10:36 Jesus uses *argumentum ad hominem* and only claims to be *ὑιός τοῦ θεοῦ*. Cf. the sneer of the passers-by in Mt. 27:40 (W. H.), *ὑιὸς τοῦ θεοῦ*, and the demand of Caiaphas in 26:63, *ὁ υἱός τοῦ θεοῦ*. In Jo. 5:27 *ὑιὸς θεοῦ* may be either ‘the son of man’ or ‘a son of man.’ Cf. a similar ambiguity in the Aramaic *בַּתְנַנָּשָׁא*. The point may become very fine indeed. Cf. *παντὸς ἄνθρωπος ή κεφαλὴ ὁ Χριστός* and *κεφαλὴ γυναικός ὁ άνήρ* (1 Cor. 11:3). At any rate man is not affirmed to be woman’s head in quite the same sense that Christ is man’s head. But see also *κεφαλὴ τοῦ Χριστοῦ ο θεος*. In these examples the anthropos substantive is predicate as is the case with *ἀνήρ* ἠστίν *κεφαλὴ τῆς γυναικός ὡς καὶ ὁ Χριστὸς κεφαλὴ τῆς ἐκκλησίας* (Eph. 5:23). Hence the matter is not to be stressed here, as another [Page 782] principle comes into play. It is possible also that the qualitative force of anthropos substantives comes in here (Eph. 5:23, κεφαλὴ τῆς γυναικός, κεφαλὴ τῆς ἐκκλησίας, σωτήρ τοῦ σώματος). See VIII, (j). Cf. *ἐνοι τῶν διαθηκῶν τῆς ἐπαγγελίας* (Eph. 2:12). So ἐν ὑποτασίων (Jo. 5:1): ‘a feast of the Jews,’ ἄρχων τῶν Ἰουδαίων (3:1). Cf. Ac. 6:1. Cf. βάπτισμα μετανοίας εἷς ἄφθος ἄμαρτων (Mk. 1:4) and εἷς ἄφθος τῶν ἄμαρτων ὑμῶν (Ac. 2:38), εἷς κοινονίαν τοῦ υἱοῦ (1 Cor. 1:9), prepositional phrase. But enough of a somewhat thorny subject.1

(c) With Adjuncts or Adverbs. In general the same usage applies to adjuncts as to adjectives.

1. Between the Article and the Noun. Thus ἦ ἄνω κλῆσις (Ph. 3:14), ἦ κατ’ ἐκλογὴν πρόθεσις (Ro. 9:11), ἦ παρὰ ἐμοῦ διαθήκη (11:27), ἦ ἐν ἑλαχίστῳ ἄδικος (Lu. 16:10), τίν τὸν σῷ ὕρθτομῳ δοκόν (Mt. 7:3), οἶκος περίποτος πίστοι (Ac. 10:45), τὰς πρότερον ἐν τῇ ἄγνοιᾳ ὑμῶν ἐπιθυμίας (1 Pet. 1:14). Cf. Ro. 2:27.

2. Article Repeated.2 Thus πάντων τῶν σπερμάτων τῶν ἐπὶ τῆς γῆς (Mk. 4:31), αἰ δυνάμεις αἴ ἐν τοῖς ωράνοις (13:25), τῆς ἀπολυτρώσεως τῆς ἐν Χριστῷ Ἰσραήλ (Ro. 3:24), τὰ παθήματα τὰ διὰ τοῦ νόμον (7:5), ἦ ἐντολή ἢ εἰς ζωήν (7:10). See further Mt. 5:16; Lu. 20:35; Jo. 1:45; Ac. 8:1; 24:5; 26:4; Ro. 4:11; 8:39; 15:26; 16:1; 1 Cor. 2:11 f.; 4:17; 2 Cor. 2:6; 9:1; 11:3; Ph. 3:9; 1 Th. 1:8; 1 Tim. 1:14; Rev. 5:5; 11:2, 19, etc. In Eph. 1:15 we find both constructions τὴν καθ’ ὑμᾶς πίστιν καὶ τὴν εἰς πάντας τοὺς άγίους. In Rev. 8:3 (9:13), τὸ θυσιαστήριον τὸ χρυσοὺν τὸ ἐνώπιον τοῦ θόρυβο, the article is repeated with both adjective and adjunct.

3. Only with Adjunct. So οἴκονομίαν θεοῦ τῇ ἐν πίστει (1 Tim. 1:4), δικαιοσύνην τῇ ἐν πίστεως (Ro. 9:30), ἐν ἀγάπῃ τῇ ἐν Χριστῷ Ἰσραήλ (2 Tim. 1:13). For numerous classic illustrations of these three positions see Gildersleeve, *Syntax*, pp. 285 ff.

4. Only with the Noun. In such cases the adjunct may be either attributive or predicate. Only the context can decide. In conversation the tone of voice, the manner, the inflection make clear what in written speech is ambiguous. Still in most instances in the N. T. the point is plain.3 The cases here dealt with are those that occur without

---

2 Cf. W.-Th., p. 133, for long list of exx.
3 Ib., pp. 135 ff.; W.-Sch., p. 179 f.; Blass, Gr. of N. T. Gk., p. 159 f.
other defining phrases. In Eph. 6:5 some MSS. read τός κυρίος κατά σάρκα. So in Lu. 16:10 we find both ὁ ἐν ἑλαχιστῷ δόκος and ὁ πιστός ἐν ἑλαχιστῷ. I see no point in Blass[Page 783]' remark that “the closely connected predicative clause could not be severed by the insertion of the article.” The article could easily have been repeated or the same order preserved in both clauses. It is much simpler and truer to say that the need of another article was not felt. The same remark applies to τοῦς πλουσίους ἐν τῷ νῦν αἰῶνι (1 Tim. 6:17), τῶν ἀπειθοῦντος ἐν τῇ ίουδαίᾳ (Ro. 15:31), τῶν Ἰσραήλ κατά σάρκα (1 Cor. 10:18), τὸ ἔθνον ἐν σαρκί (Eph. 2:11), τῶν ἐντολῶν ἐν δόγμασι (2:15), τὸ δέσμιον ἐν κυρίῳ (4:1), oi νεκροι ἐν Χριστῷ (1 Th. 4:16), τῆς κοινωνίας εἰς αὐτούς (2 Cor. 9:13), τὸν δόξην ἐν Χριστῷ (Ro. 16:10), oi κοιμηθέντες ἐν Χριστῷ (1 Cor. 15:18). Cf. Ph. 1:1. In Col. 1:4, τὴν πίστιν ὑμῶν ἐν Χριστῷ, and Ph. 4:19, τὸ πλοῦτος αὐτοῦ ἐν δόξῃ ἐν Χριστῷ Ἰησοῦ, more than one adjunct occurs outside the article. Cf. Eph. 3:4, 13. Blass[Page 784] considers this idiom peculiar to the N. T., but pertinent examples are cited from Herodotus V, 108, ἡ ἀγγελία περὶ τῶν Σαρδίων, Thucydides, II, 52. 1, etc. The vernacular character of the N. T. diction renders it more frequent. It is not common in classic Greek.

5. When Several Adjuncts Occur. “It often becomes inconvenient and clumsy to insert all of these between the article and the substantive.” Even so, but at bottom the matter does not differ in principle from the examples above. We have seen the same freedom with a second attributive adjective (cf. Mt. 24:45). See a good example of two adjuncts in Eph. 1:15, τὴν καθ’ ὑμᾶς πίστιν ἐν τῷ κυρίῳ Ἰησοῦ. The first attribute may be adjective, genitive, adverb or adjunct. So τὸ καθ’ ἡμῶν χειρόγραφον τοῖς δόγμασιν (Col. 2:14), τῆς ἐμῆς παρουσίας πάλιν πρὸς ὑμᾶς (Ph. 1:26), τὴν ἐκ θεοῦ δικαιοσύνην ἐπὶ τῇ πίστει (3:9), τὴν ἑμὴν ἁναστροφήν ποτε ἐν τῷ ίουδαίῳμοι (Gal. 1:13). Cf. Ph. 1:5. The article and the participle readily yield examples like ὁ κατὰ πολὺ ἄναγκησαμεν εἰς ἐλπίδα (1 Pet. 1:3), τοὺς ἐν δυνάμει θεοῦ φρονουμένους διὰ πίστεως (1:5). But sometimes the several adjuncts (cf. adjectives and genitives) are inserted between the article and the substantive. So τῆς ἐν τῷ κόσμῳ ἐν ἐπιθυμίᾳ φθορῶς (2 Pet. 1:4). Cf. Ac. 21:28. For similar position of several genitives and adjuncts see 2 Pet. 2:7; Lu. 1:70. In particular note Ro. 16:17 for the various phrases between τούς and ποιουόντας. Note the many adjuncts in Ro. 3:25 f. See further VI, (a), 6.

[Page 784] 6. Phrases of Verbal Origin. Phrases that are consciously verbal in origin readily do without the repeated article. So in Ro. 6:3 we have εἰς τὸν θάνατον αὐτοῦ ἐξαπτισθημένων and in the next verse we read συνετάρμασεν αὐτῷ διὰ τοῦ βαπτισμός εἰς τὸν θάνατον. It is plain, therefore, that here εἰς τὸν θάνατον is to be construed with βαπτισμός, not with συνετάρμασεν. In other examples the verbal construction appears in other contexts. It is, however, possible that the usage with the verb renders the anarthrous construction more frequent. So Ph. 1:26, τῆς ἐμῆς παρουσίας πάλιν πρὸς ὑμᾶς, may be compared with παρέμειναι πρὸς ὑμᾶς (Gal. 4:20).

1 Gr. of N. T. Gk., p. 160.
2 Ib., p. 159.
3 W.-Sch., p. 180.
4 The three regular positions are common. Cf. Gildersleeve, Synt., p. 286.
5 Blass, Gr. of N. T. Gk., p. 160.
1 W.-Th., p. 136; W.-Sch., p. 180.
Cf. also παθήματα άπερ (Col. 1:24) with πάσχειν άπερ (1 Pet. 2:21), θλίψεως άπερ (Eph. 3:13) with θλιβόμεθα αύπερ (2 Cor. 1:6). The classic idiom shows similar examples.  

7. Exegetical Questions. Sometimes it is quite important for doctrinal reasons to be careful to note whether the adjunct is attributive or predicate. Thus in Ro. 8:3, κατέκρινε τήν ἄμαρτίαν ἐν τῷ σαρκί, if ἐν τῷ σαρκί is attributive with ἄμαρτίαν, there is a definite assertion of sin in the flesh of Jesus. But if the phrase is predicate and is to be construed with κατέκρινε, no such statement is made. Here the grammarian is helpless to decide the point. The interpreter must step in and appeal to the context or other passages for light. One conversant with Paul’s theology will feel sure that ἐν σαρκί is here meant to be taken as predicate. The same ambiguity arises in verse 2, ὁ νόμος τοῦ πνεύματος τῆς ζωῆς ἐν Χριστῷ ἡλευθέρωσεν σε ἀπó τοῦ νόμου τῆς ἄμαρτίας καὶ τοῦ θανάτου. Here it is reasonably clear that ἐν Χριστῷ is predicate with ἡλευθέρωσεν. So in Ro. 3:25 probably ἐν τῷ αὐτοῦ αἵματι, as well as εἰς ἔνδειξιν is predicate with προέθετο. Another example from Romans is found in 5:8, where εἰς ἡμᾶς belongs to συνιστήσιν, not ἁγάπην. So in Jo. 15:11 ἐν ὑμῖν is construed with Ἰησοῦ, not ἦ Εμή. For further illustration see Ac. 22:18; 1 Cor. 2:7; 9:18; Eph. 2:7; 3:12; 5:26; Ph. 1:14; 3:9; Col. 1:9; Phil. 20; Heb. 13:20.  

8. Anarthrous Attributives. Examples occur also of attributives when the article is absent from both substantive and adjunct. Thus ἄνθρωπον τυφλόν ἐκ γενετής (Jo. 9:1), ἄνθρωπος ἐν πνεύματι ἰκανότρεπω (Mk. 1:23), χαρὰ ἐν πνεύματι θυγόρ (Ro. 14:17), ἔτι καθ ὑπερβολὴν ὄδον (1 Cor. 12:31), etc. Note in particular 2 Cor. 11:23, 27. The older Greek furnishes illustration of this idiom.  

Page 785 (d) Several Attributives with Καί.

1. Several Epithets Applied to the Same Person or Thing. See already under VI, (a). 4. Usually only one article is then used. For classic examples see Gildersleeve, Syntax, p. 330. So, for instance, ὁ ταλαιπώρος καὶ ἔλεινός καὶ πτωχός καὶ τυφλός καὶ γυμνός (Rev. 3:17). This is the normal idiom in accord with ancient usage. So Mk. 6:3 ὁ νιόδς τῆς Μαρίας καὶ ἀδελφός Ἰακώβου, Lu. 6:49 ὁ δὲ ἄκοος καὶ μὴ θηράσας, Ac. 3:14 τὸν ἄγιον καὶ δύσιον, Jas. 3:9 τὸν κύριον καὶ πατέρα, 2 Pet. 2:20 (3:2) τοῦ κυρίου καὶ σωτήρος, 1 Tim. 4:3 τοῖς πιστοῖς καὶ ἑπεμνηκόσι. Cf. also Gal. 1:7; Eph. 6:21; 1 Tim. 6:15; Heb. 3:1; Rev. 1:9 (both ὁ and τῇ). When a second article does occur, it accentuates sharply a different aspect of the person or phase of the subject. So in Rev. 1:17 ὁ πρώτος καὶ ὁ ἔσχατος, καὶ ὁ βαπτισθησόμεθα, 21:6. In Jo. 21:24 W. H. read ὁ μαρτυρῶν περὶ τοῦτον καὶ ὁ γράψας ταύτα, but they bracket καὶ ὁ. The second article is very doubtful. A similar superfluity of the second article appears in the second Ἰησοῦ (brackets W. H.) in Ac. 17:19, and in the second τῷ in 1 Pet. 4:14, τῷ τῆς δόξης καὶ τῷ τοῦ θεοῦ πνεύμα (due probably to the second genitive to emphasize each). So Jo. 1:40. See pp. 762, 782. Outside of special cases like these only one article is found when several epithets are applied to the same person. The presence of a genitive with the group of words does not materially alter

2 W.-Sch., p. 180.
3 Ib. But Blass (Gr. of N. T. Gk., p. 159) doubts it.
the construction. The genitive may occur with either substantive and apply to both. So ὁ θεός καὶ πατήρ ἡμῶν (1 Th. 3:11) and κυρίου ἡμῶν καὶ σωτήρος (2 Pet. 1:11). As a matter of fact such genitives (see above) occur either inside or outside of the regimen of the article. Cf. τῷ θεῷ καὶ πατρὶ ἡμῶν (Ph. 4:20), ὁ θεός καὶ πατήρ τοῦ κυρίου ἡμῶν (1 Pet. 1:3; 2 Cor. 1:3; Eph. 1:3). The presence of ἡμῶν with κυρίου does not affect the construction any more than the use of κυρίου itself or ἡμῶν above. In Ph. 3:3 one adjunct comes before one participle, the other after the other participle, but only one article occurs. A most important passage is 2 Pet. 1:1, τοῦ θεοῦ ἡμῶν καὶ σωτήρος Ἰησοῦ Χριστοῦ. Curiously enough Winer\(^2\) endeavours to draw a distinction between this passage, “where there is not even a pronoun with σωτήρος” and the identical construction in 2 Pet. 1:11, τοῦ κυρίου ἡμῶν καὶ σωτήρος Ἰησοῦ Χριστοῦ, which he cites\(^3\) as an example of “merely predicates of the same person.” Stranger [Page 786]\(^{\ref{Stranger}}\) still, he bases his objection on doctrinal grounds, a matter that does not \textit{per se} concern the grammarian. The matter is handled in Winer-Schmiedel,\(^1\) where it is frankly admitted that the construction in 2 Pet. 1:1 is the same as that in 1:11 and also in 2:20; 3:2, 18. Schmiedel says also that “grammar demands that one person be meant.” In Ju. 4, τὸν μονὸν δεσπότην καὶ κύριον ἡμῶν Ἰησοῦν Χριστόν, the same point holds, but the fact that κύριος is so often anarthrous like a proper name slightly weakens it. The same remark applies also to 2 Th. 1:12, τοῦ θεοῦ ἡμῶν καὶ κυρίου Ἰησοῦ Χριστοῦ, and Eph. 5:5, ἐν τῇ βασιλείᾳ τοῦ Χριστοῦ καὶ θεοῦ (since θεοῦ often occurs without the article). One person may be described in these three examples, but they are not so clear as the type τοῦ κυρίου ἡμῶν καὶ σωτήρος (2 Pet. 1:11). In Tit. 2:13, τοῦ μεγάλου θεοῦ καὶ σωτήρος ἡμῶν Χριστοῦ Ἰησοῦ, it is almost certain that one person is again described. Cf. also τὴν μακαρίαν ἐλπίδα καὶ ἐπιφάνειαν τῆς δόξης, where the one article unites closely the two substantives. Moulton\(^2\) quotes most pertinently papyri examples of vii/A.D., which show that among Greek-speaking Christians “our great God and Saviour” was a current form of speech as well as the Ptolemaic formula, τοῦ μεγάλου θεοῦ εὐεργέτου καὶ σωτήρος (G. H. 15, ii/B.C.). He cites also Wendland’s argument\(^3\) that the rival rendering in Titus is as great an “exegetical mistake” as to make two persons in 2 Pet. 1:1. Moulton’s conclusion\(^4\) is clear enough to close the matter: “Familiarity with the everlasting apotheosis that flaunts itself in the papyri and inscriptions of Ptolemaic and Imperial times lends strong support to Wendland’s contention that Christians, from the latter part of i/A.D. onward, deliberately annexed for their divine Master the phraseology that was impiously arrogated to themselves by some of the worst of men.”

\(^4\) Prol., p. 84.
2. **When to be Distinguished.** Then the article is repeated. So Mt. 23:2 ἕν ἐγκαλοματις καὶ οἱ Φαρισαίοι, Mk. 2:18 ὁ μαθητὴς Ιωάννου καὶ οἱ Φαρισαῖοι, 6:21 τὸς μεγιστάσαιν αὐτοῦ καὶ τοῖς χιλάρχοις καὶ τοῖς πρώτοις, 11:9 οἱ προάγοντες καὶ οἱ ἀκολουθοῦντες, 11:18 (cf. 14:43) οἱ ἄρχερες καὶ οἱ γραμματεῖς, Mk. 12:13 τῶν Φαρισαίων καὶ τῶν Ἡρώδιανῶν, Lk. 11:39 τοῦ ποιησίου καὶ τοῦ πίνακος, 15:6 τοὺς φίλους καὶ τοὺς γειτονάς, 23:4 τοὺς ἄρχερες καὶ τοὺς δήλους, Jn. 4:37 ὁ σπείρων καὶ ὁ θερίζων, 1 Cor. 3:8 ὁ φυτεύσαν καὶ ὁ ποτίζων, Jas. 3:11 τὸ γλυκὸ καὶ τὸ πικρόν, Ac. 26:30 ὁ βασιλεὺς καὶ ὁ ἄγιοι καὶ οἱ ἄποστολοι καὶ οἱ προφῆται. Cf. Rev. 11:4; [Page 787] 13:16; 2 Th. 1:8. The list can be extended almost indefinitely. But these are examples of the same number, gender and case. Nor have I referred to abstracted words of quality like the list in Rev. 7:12, or examples like τάς συναγωγάς καὶ τάς ἄρχας καὶ τάς ἐξουσίας (Lk. 12:11). It is not contended that these groups are all absolutely distinct (cf. οἱ γραμματεῖς καὶ οἱ Φαρισαῖοι), but that they are treated as separate. Even with the scribes and Pharisees they did not quite coincide. Cf. Mt. 21:45; Ac. 11:6. The use of another attributive may sometimes be partly responsible for two articles. So Lk. 8:24 τῷ ἄνεμῳ καὶ τῷ κλύδωνι τοῦ ὄδοςος, Mk. 2:18 οἱ μαθηταὶ Ἰωάννου καὶ οἱ Φαρισαῖοι, 11:15 τὰς τραπεζὰς τῶν κολλυβιστῶν καὶ τὰς καθάρας τῶν πωλούντων. Cf. also Lu. 20:20; Ac. 25:15; 1 Cor. 11:27; Rev. 13:10.

3. **Groups Treated as One.** Sometimes groups more or less distinct are treated as one for the purpose in hand, and hence use only one article. Cf. τὰς φίλας καὶ γείτονας (Lk. 15:9), τοὺς νομικοὺς καὶ Φαρισαίους (14:3), τὰς πλατείας καὶ ῥόμας (14:21), τῶν πρεσβύτερων καὶ γραμματέων (Mt. 15:1), τῶν Ἑπικουρίων καὶ Στοιχείων (Ac. 17:18), τῶν Φαρισαίων καὶ Σαδδουκαίων (Ac. 23:7), τῶν ἄποστόλων καὶ προφητῶν (Eph. 2:20), τῇ ἀπολογίᾳ καὶ βεβαιώσει τοῦ εὐαγγελίου (Phil. 1:7), τὸ πλάτος καὶ μῆκος καὶ βάθος καὶ ὑψός (Eph. 3:18), τὴν κλῆσιν καὶ ἐκκλησίαν (2 Pet. 1:10). Cf. τὴν in Tit. 2:13. See in Mt. 17:1 (W. H. text) we have τὸν Πέτρον καὶ Ἰάκωβον καὶ Ἰοάννην, where the three are one group. This is probably more frequent in examples where a genitive occurs also, or some other attribute. So Ph. 1:20 τὴν ἀποκαραδοκίαν καὶ ἐπιλίδα μου, 1:19 τῆς ὕμων δεήσεως καὶ ἐπιπορισίας τοῦ πνεύματος, 2:17 τῇ θυσίᾳ καὶ λειτουργίᾳ τῆς πίστεως. Cf. also 1 Th. 2:12; 3:7; Mt. 24:3; Ro. 1:20; Col. 2:8; Eph. 3:5; 2 Cor. 1:6; 1 Pet. 2:25; Phil. 1:25. These are all the simplest and clearest illustrations.

4. **Point of View.** Obviously, therefore, whether one or more articles are to be used depends on the point of view of the speaker or writer. In geographical terms the matter of freedom is well illustrated. Thus in 1 Th. 1:7 we have ἐν τῇ Μακεδονίᾳ καὶ ἐν τῇ Ἀχαιᾳ, while in the very next verse we meet ἐν τῇ Μακεδονίᾳ καὶ Ἁχαιᾳ as in Ac. 19:21. These two Roman provinces are distinct, but adjacent. Cf. also τῆς Ἰουδαίας καὶ Σαμαρίας (Ac. 8:1; cf. 1:8), τῆς Ἰουδαίας καὶ Γαλατίας καὶ Σαμαρίας (9:31), where these sections of Palestine are treated together. Cf. Ac. 27:5. In Ac. 15:3 note τὴν τε Φοινίκην καὶ Σαμαρίαν, the two sections treated together are not even contiguous. In Ac. 15:23, κατὰ τὴν Ἀντιόχειαν [Page 788] καὶ Συρίαν καὶ Κύπριαν, we have a city grouped with two countries (as in Lk. 5:17; Mt. 4:25), while in 15:41

---

1 Cf. W.-Th., p. 128.
2 W.-Sch., p. 156 f.
we meet τὴν Συρίαν καὶ τὴν Κυλικίαν (W. H. text). Hence no absolute conclusions can be drawn from the one article in Ac. 16:6, τὴν Φρυγίαν καὶ Γαλατικήν χώραν (cf. reverse order in 18:23) as to the separateness of the terms “Phrygia” and “Galactic region.” Cf. also Lu. 3:1, τῆς Ἰουρυάσις καὶ Τραχωνιτίδος χώρας. But the matter is not wholly whimsical. In Ac. 2:9 f. note the τὴν with Μεσοποταμίαν, which stands alone, while we have also Πόντον καὶ τὴν Ασίαν, probably because the province of Asia (not Asia Minor as a whole) is meant. Then again we meet τὸ μέρη τῆς Λιβύης τῆς κατὰ Κυρήνην, because of the details stated. In Ac. 6:9 the use of τῶν twice divides the synagogues into two groups (men from Cilicia and Asia on the one hand, men from Alexandria, Cyrene and Libertines (?) on the other). The matter is simple geography but for Λιβερτίνον, and may be after all if we only knew what that term means. See Winer-Schmiedel, p. 158. Cf. also Rev. 14:7, where two words have articles and two do not, and Ac. 15:20, where three words in the list have articles and one, πινκτού, does not. So in Ac. 13:50 we have τὸν Παύλον καὶ, while in 15:2 we find τῷ Π. καὶ τῷ Β. Then (cf. 4) in Mt. 17:1 observe the one article with Peter, James and John, while in Heb. 11:20 we see εὐλόγησεν Ἰσαὰκ τῶν Ἰακώβ καὶ τῶν Ἡσαύ. The articles here emphasize the distinction between subject and object as in Mt. 1:2–16. Cf. also τῶν ἁπ. καὶ τῶν πρ. (Ac. 15:4) and οἱ ἃπ. καὶ οἱ πρ. (15:6) with τῶν ἃπ. καὶ πρ. τῶν (16:4).

5. Difference in Number. If the words combined differ in number, usually each one has its own article. The reason is that they generally fall into separate classes. So ὁ ἀναγινόσκων καὶ οἱ ἄκοινοις (Rev. 1:3), τῆς σαρκός καὶ τῶν διανοιῶν (Eph. 2:3), τὴν ἁγιάσθη καὶ τὰς κοσμικὰς ἐπιθυμίας (Tit. 2:12). But one article may also be found, as in τῷ κόσμῳ καὶ ἄγγελοις καὶ ἄνθρωποις (1 Cor. 4:9). Here, however, the anarthrous words “particularize the τῷ κόσμῳ.” Yet in 1 Jo. 2:16 πᾶν τὸ ἐν τῷ κόσμῳ is “particularized” by three words each with the article.

6. Difference in Gender. So, if the gender is different, there is likewise usually the repetition of the article. Cf. Ac. 17:18 τῶν Ἰησοῦν καὶ τὴν ἄναστασιν, Mt. 22:4 οἱ παύροι μου καὶ τὰ σιτιστά, Lu. 10:21 τοῦ οὐρανοῦ καὶ τῆς γῆς. Ac. 13:50 τὰς εὐσχήμονας καὶ τοὺς πρώτους, Ro. 8:2 τῆς ἁμαρτίας καὶ τοῦ θανάτου, Col. 4:1 τὸ δίκαιον [Page 789] καὶ τὴν ἱσότητα, Eph. 2:1 τοὺς παραστάσιν καὶ τὰς ἁμαρτίας, Heb. 3:6 τὴν παραστάσιν καὶ τὸ καώσημα. Though usual, the repeated article is not necessary. See τὰς δοξὰς καὶ φραγμοὺς (Lu. 14:23), τῶν ὀλκατομάτων καὶ θυσιῶν (Mk. 12:33), τὰ ἐντάλματα καὶ δίδασκαλίας (Col. 2:22).

If indeed the words differ in both gender and number, in that case it is still more customary to have separate articles. Cf., for instance, Lu. 14:26, τὸν πατέρα ἐπηντοῦ καὶ τὴν μητέρα καὶ τὴν γυναῖκα καὶ τὰ τέκνα καὶ τοὺς ἀδελφοὺς καὶ τὰς ἀδελφὰς. So also Ac. 15:4, 20; 26:30; Col. 2:13; 1 Tim. 5:23; Rev. 2:19. The papyri illustrate the

---

2 W.-Th., p. 127.
3 Ib.

7. With Disjunctive Particle. If a disjunctive preposition be used, there will naturally be separate articles (even when καί is the connective), whatever be true about number and gender. So μεταξὺ τοῦ ναοῦ καὶ τοῦ θυσιαστηρίου (Mt. 23:35=Lu. 11:51). So when the conjunction ἦ occurs as in τὸν νόμον ἡ τοὺς προφήτας (Mt. 5:17), τῷ πατρὶ ἦ τῇ μητρὶ (15:5), τῷ σκότος ἦ τῷ φῶς (Jo. 3:19), ὑπὸ τὸν μόδιον ἦ ὑπὸ τὴν κλίσην (Mt. 4:21), τῷ λαῷ ἦ τοῖς ἔθεσι (Ac. 28:17). Blass2 makes the point that outside of Ac. 14:5, τὰς ἀγαθὰς ἡμῶν καὶ τοῖς ἄρχοντις (5:24) with difference in number also.

VII. Position with Predicates. It is not the use of the article with the predicate noun, like οὐτὸς ἐστιν ὁ κληρονόμος (Mk. 12:7), that is here before us. That point has already been discussed under V, (i). When the article occurs with the substantive, but not with the adjective, the result is the equivalent of a relative clause. Cf. μεγάλη φωνῇ (Ac. 14:10) and φωνῇ μεγάλῃ (7:57)=‘with a loud voice,’ with μεγάλῃ τῇ φωνῇ (26:24)=‘with the voice elevated.’ See also ἄνακκαλυμμένῳ προσώπῳ (2 Cor. 3:18)=‘with unveiled face’ and άκατακαλυμμένῳ τῇ κεφαλῇ (1 Cor. 11:5)=‘with the head unveiled.’ Cf. Mk. 3:1, ἔξηραμμένῳ ἔχον τὴν χεῖρα. Other examples are ἐπεφωνομένῃ τὴν καρδίαν (Mk. 8:17), τὴν μαρτυρίαν μείζον (Jo. 5:36), τὴν ἀγάπην ἐκτενῇ (1 Pet. 4:8), τὴν ἀνταρκτικήν καλήν (2:12), ἀποπλεκόντων τὴν ἱεροσολύμου (Heb. 7:24), τὰ αἰσθητήρια γεγυμναμένα (5:14). In all these and similar examples the point is quite different from that of the attributive position of the article. Most of the instances occur with ἔχο. Note the absence of the article with ἀπογραφή πρώτη (Lu. 2:2) because it is in the predicate. Cf. τοῦτο ἄληθες ἄρχηκας (Jo. 4:18).

The position of οὐτὸς ἐς καλομένη (Lu. 1:36) may be noted. D in Mk. 7:5 reads κοιναὶ τοῖς χερσίν.1 Gildersleeve (Syntax, p. 292) considers this use of the predicate position “a gnomon of artificial style” outside of the more simple combinations. See

Blass

2 Gr. of N. T. Gk., p. 163.
1 Blass, Gr. of N. T. Gk., p. 315.
also Milden, The Limitations of the Predicative Position in Greek (1900, p. 43). It is noticeable in prepositional phrases, as in Xen., Anab., 1, 3, 14, διὰ φιλίας τῆς χώρας.

**VIII. The Absence of the Article.** I do not care to use the term “omission” in connection with the article. That word implies that the article ought to be present. As has been already shown, the article is not the only means of showing that a word is definite. This luxury in language did not become indispensable. The servant never became master. There remained in the classic period many parallel phrases which were intelligible without the article. Indeed, new phrases came into use by analogy without the article. I do not think it is necessary to devote so much space to this phase of the subject as is done in most grammars. Most of the cases have already come up for discussion in one way or another. It is sufficient here to give a résumé of the chief idioms in the N. T. which are without the article and are still definite. Much of the modern difficulty about the absence of the Greek article is due to the effort to interpret it by the standard of the English or German article. So Winer (Winer-Thayer, p. 119) speaks of “appellatives, which as expressing definite objects should have the article”! Even Gildersleeve, in discussing the “Absence of the Article” (note the phrase, Syntax, p. 259), says that “prepositional phrases and other formulæ may dispense with the article as in the earlier language,” and he adds “but anaphora or contrast may bring back the article at any time and there is no pedantical uniformity.” Admirably said, except “dispense with” and “bring back,” dim ghosts of the old grammar. Moulton cites Jo. 6:68, ῥῆ ματα ζωῆς αἰωνίου, which should be translated ‘words of eternal life’ (as marg. of R. V.). There are indeed “few of the finer points of Greek which need more constant attention”\(^3\) than the absence of the article. The word may be either definite or indefinite when the article is absent. The context and history of the phrase in question must decide. The translation of the expression into English or German is not determined by the mere absense of the Greek article. If the word is indefinite, as in Jo. 4:27; 6:68, no article, of course, occurs. But the article is absent in a good many definite phrases also. It is about these that a few words further are needed. A brief summary of the various types of anarthrous definite phrases is given.\(^1\) A sane treatment of the subject occurs in Winer-Schmiedel.\(^2\)

(a) **WITH PROPER NAMES.** Here the article is used or not at the will of the writer. So τὸν Ἰησοῦν ὄν Παῦλος κηρύσσει (Ac. 19:13), but τὸν Παῦλον in verse 15. The reason is apparent in these three examples. Words in apposition with proper names are usually anarthrous. Cf. Mt. 3:6=Mk. 1:5. See further V, (a), 3.

(b) **WITH GENITIVES.** We have seen that the substantive may still be definite if anarthrous, though not necessarily so. Cf. πύλαι ζῶν (Mt. 16:18), ἀνάστασις νεκρῶν (Ac. 23:6), χάριτι θεοῦ (1 Cor. 15:10), λόγοι θεοῦ (1 Th. 2:13), ποτήριον κυρίου (1 Cor. 10:21), οὐδὲ διαβόλου (Ac. 13:10), etc.\(^3\) In particular, personal pronouns in the

3 See extensive list in W.-Sch., p. 166 f.
genitive were not always felt to need the article. Cf. κῆπον ἑαυτοῦ (Lu. 13:19). See further V, (h). The LXX uses this idiom freely (Blass-Debrunner, p. 151). English can show the same construction.

“Eye of newt and toe of frog,
Wool of bat and tongue of dog,
Adder’s fork and blind worm’s sting.
Lizard’s leg and hornet’s wing.”—Macbeth.

(c) PREPOSITIONAL PHRASES. These were also often considered definite enough without the article. So ἐν οίκῳ (1 Cor. 11:34. Cf. ἐν τῷ οίκῳ, ‘in the house,’ Jo. 11:20)=‘at home.’ So we say “go to bed,” etc. Moulton 4 pertinently cites English “down town,” “on ’change,” “in bed,” “from start to finish.” This idiom is not therefore peculiar to Greek. It is hardly necessary to mention all the N. T. examples, so common is the matter.

Thus with ἀνά observe ἀνά μέρος (1 Cor. 14:27). With ἀπό note ἀπό ἀγροῦ (Mk. 15:21), ἀπό ἀγρός (Mk. 7:4), ἀπό οὐρανοῦ (Lu. 17:29), ἀπό οὐρανόν (Heb. 12:25), ἀπὸ ἀνατολῆς (Rev. 21:13), ἀπὸ ἀνατολῶν (Mt. 2:1), ἀπὸ ἀρχῆς (1 Jo. 1:1), ἀπὸ καταβολῆς (Mt. 13:35), ἀπὸ μέρους (Ro. 11:25), ἀπὸ νεκρῶν (Lu. 16:30). Cf. Rev. 21:13, ἀπὸ βορρᾶ, ἀπὸ νότου, ἀπὸ δυσμῶν. So ἀχρι καρποῦ (Lu. 4:13).

For διὰ note διὰ νυκτὸς (Ac. 5:19), διὰ μέσου (Lu. 4:30), διὰ μέσον (17:11). [Page 792]

For εἰς see εἰς ἄδην (Ac. 2:27), εἰς οὐρανόν (1 Pet. 3:22), εἰς θάλασσαν (Mt. 17:27), εἰς οἶκον (Mk. 3:20), εἰς πρόσωπον (Mk. 12:14), εἰς μέσον (Mk. 14:60), εἰς οἰκίαν (2 Jo. 10), εἰς τέλος (Mt. 10:22).

For ἐν may be noticed ἐν οὐρανῷ (Mt. 6:20), ἐν οὐρανοῖς (Heb. 12:23), ἐν ὑψίστοις (Lu. 2:14), ἐν δεξιᾷ (Heb. 1:3), ἐν κόσμῳ (Col. 2:20), ἐν ἀγρῷ (Lu. 15:25), ἐν ἀγρῷ (Lu. 7:32), ἐν οίκῳ (1 Cor. 14:35), ἐν ἐκκλησίᾳ=’at church’ (1 Cor. 14:19), ἐν προσώπῳ (2 Cor. 5:12), ἐν ἡμέρᾳ (Ro. 13:13), ἐν καιρῷ (Mt. 24:45), ἐν ἀρχῇ (Jo. 1:1), ἐν σαρκί (2 Cor. 10:3), ἐν ἀνθρώπωις (Lu. 1:25), ἐν νυκτί (Ac. 18:9).

Examples of ἐξ are ἐκ μέρους (1 Cor. 12:27), ἐκ ψυχῆς (Eph. 6:6), ἐκ νεότητος (Ac. 26:4), ἐκ ἀρχῆς (Jo. 6:64), ἐκ δεξιῶν (Mt. 27:38), ἐκ εὐθυνόμων (Mt. 25:41), ἐκ ἀριστερῶν (Lu. 23:33), ἐκ μέσου (2 Th. 2:7), ἐκ καρδίας (Ro. 6:17), ἐκ νεκρῶν (Lu. 9:7), ἐξ οὐρανοῦ (Jo. 1:32).

For ἐκος observe ἐκος ἄδου (Mt. 11:23), ἐκος οὐρανοῦ (Mt. 11:23), ἐκος δυσμῶν (Mt. 24:27), ἐκος ἔσπερας (Ac. 28:23), ἐκος τέλους (1 Cor. 1:8).

Examples of ἐπί are ἐπὶ γῆς (Lu. 2:14), ἐπὶ θύρας (Mt. 24:33), ἐπὶ πρόσωπον (Lu. 5:12).

For κατά see κατ ὀφθαλμοὺς (Gal. 3:1), κατὰ λίβα καὶ κατὰ χῶρον (Ac. 27:12), κατὰ μεσημβρίαν (Ac. 8:26), κατ  ἄρχας (Heb. 1:10), κατὰ πρόσωπον (Ac. 25:16), κατὰ μέρος (Heb. 9:5), κατὰ σάρκα (2 Cor. 10:3), κατὰ ἀνθρώπους (1 Pet. 4:6).

For μέχρι observe μέχρι μεσονυκτίου (Ac. 20:7), μέχρι τέλους (Heb. 3:6).

For παρά note παρὰ θάλασσαν (Ac. 10:32), παρὰ ποταμόν (Ac. 16:13).

For πρὸ see πρὸ καιροῦ (Mt. 8:29).

For πρὸς observe πρὸς πρόσωπον (1 Cor. 13:12), πρὸς ἔσπεραν (Lu. 24:29).

For ὑπό see ὑπὸ οὐρανόν (Lu. 17:24).

It will be noted that this usage after all is confined to a rather narrow range of words, some of which, like οὐρανός and γῆ, represent single objects. More of this a little later. Most of these examples have articular parallels. See also V, (f). For classic examples see Gildersleeve, Syntax, p. 259 f. The papyri furnish abundant parallels (Völker, Syntax, pp. 15–17) as do the inscriptions (Radermacher, N. T. Gr., p. 92).

(d) WITH BOTH PREPOSITION AND GENITIVE. It is not surprising to find no article with phrases which use both preposition [Page 793] and genitive like εἰς εὕαγγέλιον θεοῦ (Ro. 1:1), ἐπὶ ὀφθαλμῶν σου (Lu. 19:42), ἐκ δεξιῶν μου (Mt. 20:23), ἐπὶ ἄρχης κόσμου (Mt. 24:21), παρὰ καυρόν ἥλικιας (Heb. 11:11), ἐν καυρῷ πειρασμοῖ (Lu. 8:13), ἐπὶ καταβολῆς κόσμου (Mt. 25:34), ἐν βραχίονι αὐτοῦ (Lu. 1:51), etc.

(e) TITLES OF BOOKS OR SECTIONS. These may be without the article, being already specific enough. So Ἐὕαγγέλιον κατὰ Μᾶρκον before the Gospel in many MSS., Ἀρχη τοῦ εὐαγγελίου (Mt. 1:1), βιβλίον γενέσεως Ίησοῦ Χριστοῦ (Mt. 1:1), Ἀποκάλυψις Ίησοῦ Χριστοῦ (Rev. 1:1). A good example of anarthrous headings may be seen in 1 Pet. 1 f. (cf. Hort, 1 Peter, p. 15), where no article occurs in the whole opening sentence of five lines. The article is used quite idiomatically in 1 Peter.

(f) WORDS IN PAIRS. These often do without the article. Very often, of course, the article is used. Words for day and night (as in English) frequently occur together. Cf. νυκτὸς καὶ ημέρας (Mt. 5:5), ημέρας καὶ νυκτὸς (Rev. 4:8). They occur singly also without the article, as νυκτὸς (Jo. 3:2), ημέρας (Rev. 21:25), μέσης νυκτὸς (Mt. 25:6). See also other pairs like ἐν οὐρανῷ ἐμε ἐπὶ γῆς (1 Cor. 8:5; cf. 2 Pet. 3:5), πατέρα ἶ ἑαρέα (Mk. 7:10), ζῶντας καὶ νεκροὺς (1 Pet. 4:5). Indeed the anarthrous construction is common in contrast with ὑ, ἐμε, οὕτε, μήτι, οὐ—όλλα (cf. Ro. 6:14).

For long lists of anarthrous words (definite and indefinite together) see Ro. 8:35; 1 Cor. 3:22; 12:13, 28; 2 Cor. 11:25 f.; 1 Pet. 1:2; Heb. 12:18, 23; 1 Tim. 3:16.1 Cf. also ἄνθρωπος (1 Cor. 11:8). Some of these usages belong to proverbs, formulae and enumerations. See Gildersleeve, Syntax, p. 260. The κοινή (inscriptions and papyri) shows the idiom (Radermacher, N. T. Gr., p. 94).

(g) Ordinal Numerals. The article is usually absent in expressions of time. The ancient idiom is here followed.2 This ordinal was often felt to be definite enough alone. This was true of the predicate. Cf. ἀπογραφὴ πρώτη (Lu. 2:2), ἦν ὁ θάνατος τέκνων (Mk. 15:25), ἦν ὡς ἐκτίμητο (Jo. 19:14). Cf. Eph. 6:2; Ac. 2:15. But it was not confined to the predicate by any means, nor even to prepositional phrases like ἀπὸ πρώτης ἡμέρας (Ac. 20:18), ἦν ὡς τρίτης ἡμέρας (Ac. 10:30), περὶ ὡραίων ἐκτιμήτων (Ac. 10:9), ἦν ἐκεῖ πεντεκαίδεκάτῳ (Lu. 3:1). Cf. Eph. 6:2; Ac. 23:23. The same construction occurs also in διελθόντες πρώτην φυλακὴν (Ac. 12:10). Cf. Mk. 15:33, γενοµένης ἡμέρας ἐκτίμηται. Examples with the article are not wanting. Cf. Mt. 27:64; Lu. 12:38; Ac. 10:40.

(h) In the Predicate. As already shown in V, (i), in the predicate the article is often absent. See V, (i). Cf. θεὸς ὁ λόγος (Jo. 1:1), ὁ θεὸς ἀγάπη ἔστιν (1 Jo. 4:8), etc. This is the rule unless the terms be convertible or the predicate is singled out as prominent. For the superlative without the article see also 1 Jo. 2:18. Cf. 1 Pet. 1:5, ἐν ἐσχάτῳ καιρῷ.

(i) Abstract Words. In English the presence, not the absence, of the article with abstract words needs explanation. Hence the anarthrous lists in Gal. 5:20 f., 22 f., seem to us much more in harmony with our idiom than the lists with the article in Rev. 5:12, 13; 7:12. In German,1 however, the opposite is often true. The article is often absent in the Greek, where the German would have it. Cf. Ro. 1:29. See IV, (c), for discussion of article with abstract nouns. No vital difference was felt between articular and anarthrous abstract nouns (Gildersleeve, Syntax, p. 259).

(j) Qualitative Force. This is best brought out in anarthrous nouns. So εἰ ἐξεστιν ἅθροι γυναῖκα ἄπολύσει (Mk. 10:2; cf. 1 Cor. 7:10), παραδώσει ἅθλος ἅθλος ἄθλος τῆς θανάτου καὶ πατήρ τέκνων—τέκνα ἐπὶ γονέως (13:12), ὡς μονογονοῦς παρῆκαν πατρός (Jo. 1:14), γονεότατον ἅπαντες (Ro. 1:13). Cf. also Eph. 5:23, ἤνη ἐστὶν κεφαλὴ τῆς γυναικὸς, ὁ Χριστὸς κεφαλὴ τῆς ἐκκλησίας and αὐτὸς συνήθως τοῦ σώματος. In αἱ γυναῖκες τοῖς ἁθρόις (verse 24) note the generic article, class and class. See υἱός—πατήρ (Heb. 12:7).2

(k) Only Object of Kind. These partake of the nature of proper names and often occur without the article. They also often have the article. Some of these anarthrous examples appear in prepositional phrases like ἐν ἀριστερῶι (Lu. 23:33), ἐν δεξιῶι

1 Cf. W.-Sch., p. 168; Blass, Gr. of N. T. Gk., p. 149.
2 Thompson, Synt., etc., p. 54; W.-Th., p. 126. See further J. Thompson, Cl. Rev., 1906, p. 304; Gildersleeve, Synt., p. 261.
1 Blass, Gr. of N. T. Gk., p. 150.
2 Cf. Moulton, Prol., p. 82 f.; W.-Sch., p. 170.
(ib.), etc. These may be passed by (already discussed). The point is best illustrated by such words as γῆ and οὐδαμοί (2 Pet. 3:5). Cf. English “heaven and earth.” Cf. (f), Words in Pairs. Θάλασσα we find sometimes anarthrous with prepositions (Ac. 7:36; 10:32) and in Lu. 21:25 ἡχοῦς θαλάσσας καὶ σάλον. But it has the article in contrast with γῆ. See also Lu. 21:25 ἐν ἡλίου καὶ σελήνῃ καὶ ἄστροις. Mt. 13:6 ἡλίου ἄνατελαντος, 1 Cor. 15:41 δόξα ἡλίου. So we can say “sun, moon and stars,” etc. Θάνατος should also be noted. Cf. 1 Cor. 15:21; Mt. 16:28; 20:18; Lu. 23:15; Ph. 1:20, etc. It is anarthrous as subject, object, with adjectives and with prepositions.

Many of these examples occur with prepositions like Lu. 21:25 above, or with a genitive like ὑπὲρ διαβόλου (Ac. 13:10). The word θεός, like a proper name, is freely used with and without the article. But it is “beyond comparison the most frequently in the Epistles without the article.” I doubt that. As subject ὁ θεός, but as a predicate, θεός ἢν ὁ λόγος (Jo. 1:1); as genitive, γνώσεως θεου (Ro. 11:33); with prepositions, ἐν θεῷ (Jo. 3:21); with participles also, θεὸς εὐλογητός (Ro. 9:5); with participles also, θεῷ ἐγνώστηκεν καὶ ἀληθῶς (1 Th. 1:9); in conjunction with πατήρ (Gal. 1:1). These illustrations can be greatly multiplied. So also πνεῦμα and πνεύμα ἔγινον may occur with and without the article. Garvie quotes Bartlet on Acts as saying that when πνεῦμα ἐγινότα is anarthrous it describes the human condition, not the divine agency. But it may be questioned if this is not a purely artificial rule, as there are evident exceptions to it. The use of πνεῦμα with a genitive like πνεῦμα Χριστοῦ (Ro. 8:9) and with a preposition, ἐκ πνεύματος (Jo. 3:5), accounts for some examples. An example like οὐπω ἢν πνεῦμα (Jo. 7:39) merely illustrates the use of πνεῦμα like θεός as substantially a proper name. As for Middleton’s rule that the article is present when the personality of the Holy Spirit is taught, that is illustrated by Jo. 14:26, τὸ πνεῦμα τὸ ἅγιον, where the Holy Spirit is spoken of in distinction from the Father and the Son. Cf. also 15:26. See also τὸ πνεῦμα τὸ ἅγιον (Lu. 3:22), at the baptism of Jesus. Κύριος, like θεός and πνεῦμα, is often practically a proper name in the N. T. In the Gospels it usually refers to God, like the O. T. Lord, while in the Epistles of Paul in particular it nearly always means the Lord Jesus. It is not merely in a prepositional phrase like the common ἐν κυρίῳ (1 Cor. 7:22), or the genitive like τὸ ἐγενέσθαι κυρίου (1 Cor. 16:10), but especially κύριος Ἰησοῦς Χριστός (Ph. 1:2; 2:11, etc.). In the Gospels ὁ Χριστός is usually a verbal adjective=the Anointed One, the Messiah (Mt. 2:4; Jo. 1:41). In Mt. 1:1; Mk. 1:1, we have Χριστός as a proper name and even in the words of Jesus as reported in Mk. 9:41, Χριστοῦ, and in the address of Peter in Ac. 2:38, Ἰησοῦ Χριστοῦ. It was a natural growth. In Paul’s Epistles Χριστός is more frequent than ὁ Χριστός. There is even a development in Paul’s use of Ἰησοῦς Χριστός and Χριστός Ἰησοῦς. [Page 796] In his earlier Epistles the former is the rule (cf. 1 Th. 1:1), while in the later Epistles he prefers Χριστός Ἰησοῦς (2 Tim. 1:1). Other examples of this idiom are seen in

3 W.-Th., p. 121.
1 Blass, Gr. of N. T. Gk., p. 148.
2 W.-Th., p. 122.
5 W.-Th., p. 124.
6 See Rose’s list for Paul’s use of κύριος, Χριστός, etc., in Middleton’s Doctrine of the Gk. Art., pp. 486 ff. It is based on Textus Rec.
κόσμος, which even in the nominative is anarthrous, ἐμὸι κόσμος ἔσταϊται (Gal. 6:14). Cf. Ro. 4:13. See also ἐν κόσμῳ (Ro. 5:13) and ὁπὸ καταβολῆς κόσμου (Lu. 11:50), etc. Νόμος is a word that is used with a deal of freedom by Paul. In general when νόμος is anarthrous in Paul it refers to the Mosaic law, as in ἐπαναπαύῃ νόμῳ (Gal. 6:14). Cf. Ro. 4:13. See also ἐν κόσμῳ (Ro. 5:13) and ἀπὸ καταβολῆς κόσμου (Lu. 11:50), etc.

Νόμος is a word that is used with a deal of freedom by Paul. In general when νόμος is anarthrous in Paul it refers to the Mosaic law, as in ἐπαναπαύῃ νόμῳ (Ro. 2:17). So ἔδαν νόμον πρόσεχες (2:25), etc. It occurs so with prepositions, as ἐν νόμῳ (2:23), and in the genitive, like ἐξ ἐργων νόμου (Gal. 2:16). Cf. ἐγὼ διὰ νόμου νόμῳ ἄπέθανον (2:19), ὑπὸ νόμου ἀλλὰ ὑπὸ χάριν (Ro. 6:14). In ἔπερον νόμον (7:23) νόμος=‘principle,’ and is here indeterminate. In 2:14, ἔθνη τὰ μὴ νόμον ἔχοντα, the Mosaic law is meant, but not in ἐπιτοίχες ἐλάν νόμος. It is at least problematical whether νόμος in 2:13, ὢν ἄκροσται νόμον, and ὢν ποιηταὶ νόμου (note the article with the other words) means the Mosaic law and so really definite or law as law (the hearers of law, the doers of law).

IX. The Indefinite Article. The Greek had no indefinite article. It would have been very easy if the absence of the article in Greek always meant that the noun was indefinite, but we have seen that this is not the case. The anarthrous noun may per se be either definite or indefinite. But the Greek made an approach to the modern indefinite article in the use of εἷς and τις. The later writers show an increasing use of these words as the practical equivalent of the present indefinite article. This matter has already been discussed under these two words (ch. XV). An example of τις is seen in νομικός τις (Lu. 10:25). The tendency was constantly for εἷς to displace τις, so that “in modern Greek the process is complete,” i.e. εἷς drives out τις in this sense. This use of εἷς is seen in the papyri and need not be denied in the N. T. As a N. T. example of εἷς=‘a’ see εἷς γραμματεύς (Mt. 8:19). The indefinite article does not appear with predicates in the modern Greek. Unus in the sense of the indefinite article is one of the peculiarities of the Latin Vulgate (Jacquier, Le N. T. dans l’Égl. Chr., Tome II, p. 122).

[PAGE 797] CHAPTER XVII

VOICE (ΔΙΑΘΕΣΙΣ, GENUS)

I. Point of View. For a discussion of the nature of the verb see chapter VIII, Conjugation of the Verb, I and II.

(a) DISTINCTION BETWEEN VOICE AND TRANSITIVENESS. See II, (b), and chapter VIII, VI, for a discussion of this point. The matter might have been well reserved for syntax, but it seemed worth while to set forth at once the fundamental facts about voice. It is here assumed, therefore, that one understands that voice per se does not deal with the question of transitive or intransitive action. That point concerns the verb

1 For a full and detailed discussion of the whole matter see W.-Sch., pp. 174 ff.
2 Moulton, Prol., p. 96. See Thumb, Handb., p. 41.
4 Cf. for LXX use, C. and S., Sel., p. 25.
5 Thumb., Handb., p. 42.
itself, not the voice. Active and middle verbs may be either transitive or intransitive. Passive verbs may even be transitive, though usually intransitive, in one sense of “transitive.” But Gildersleeve\(^1\) holds that “a transitive verb is a verb that passes over to a passive rather than one that passes over to an object.” That is truer of Latin than of Greek, which, “with a lordliness that reminds one of English,” makes a passive out of any kind of an active. Terminology in syntax is open to dispute at many points, but I see only hopeless confusion here unless voice is kept to its real meaning. In Kühner-Gerth\(^2\) it is held that “the active has a double meaning,” either intransitive or transitive. My point is that the voice per se has nothing to do with that question. Some verbs are intransitive, some are transitive, some are used either way. This freedom in the use of verbs increased till in the later Greek verbs that were once intransitive become transitive.\(^3\) Brugmann\(^4\) properly separates the question of transitive and intransitive verbs from that of voice (cf. iterative, intensive, inchoative, desiderative verbs). Some of the intransitive uses of verbs were due to the absence of the reflexive pronoun, as in περιψή (Mk. 6:6), ἄπορρίψαντας (Ac. 27:43).\(^5\) The modern Greek preserves the same freedom in the use of transitive and intransitive verbs and has peculiarities of its own.\(^1\)

\(b\) MEANING OF VOICE. Voice relates the action to the subject. The use of voice then is to direct attention to the subject, not to the object. That concerns transitive and intransitive verbs. Stahl\(^2\) puts it crisply: “The voice of the verb describes a relation of the verb-idea to the subject.”

\(c\) NAMES OF THE VOICES. Cf. chapter VIII, VI, (b). The names come from Dionysius Thrax (about B.C. 30), but “he has no inkling of a middle sense,”\(^3\) showing that already the middle is disappearing before the passive. The terminology is very poor. Gildersleeve\(^4\) calls the fashion of the Germans “a positively indecent nomenclature,” since they call the voices genera (γένη), “based on a fancied resemblance to the genders.” We in English follow the French voix (Latin vox), found first in this sense in the Grammatica graeca nova of J. Weller (A.D. 1635).\(^5\)

3 Thompson, Synt., p. 158.
5 Riem. and Goelzer, Synt., p. 233.
(d) HISTORY OF THE VOICES. See chapter VIII, VI, (c), (d), (e). Cf. also Jannaris, *Historical Gr.*, p. 362 f.; Moulton, *Prol.*, p. 152. In the pro-ethnic language there were probably both active and middle. Cf. Delbrück, *Vergl. Syntax*, Bd. II, p. 413. There was no passive as there was none in the Sanskrit, save in the present system. The rise of the passive meaning with the use of middle and active endings was sure to bring confusion and a tendency towards simplification. It was inevitable that the three voices should go back to two. In the actual outcome, the passive, though an interloper, ousts the middle of its forms and of most of its uses. In the modern Greek vernacular, therefore, we find only two voices as to form, for the passive has taken over the meaning of the middle also (Thumb, *Handb.*, p. 111 f.). In the beginning there were only active and middle. In the end we find only active and passive.

(e) HELP FROM THE SANSKRIT. The verb development in the Indo-Germanic languages has been more independent than that of nouns. Latin, for instance, has recast its verb-system, and it is quite difficult to compare the Greek and Latin voices. Sanskrit [Page 799] and Greek have preserved the voices best of all. Hence the Sanskrit can throw a good deal of light on the Greek voices.

(f) DEFECTIVE VERBS. Not all verbs were used in all the voices. Some were used only in one, some in two, some in all three. Then again, some verbs had one voice in one tense, another voice in another tense. This is just like the Sanskrit, and just what one would expect from a living language in contrast with an artificial one. Brugmann, indeed, divides verbs, as to voices, according to this principle (those with active only, middle only, with both, etc.). In the N. T. Blass (Gr. of N. T. Gk., p. 180) finds the same general use of the voices as in the older Greek, the same difficulty in differentiating the voices, and the same “arbitrariness” in the use of individual verbs.

Delbrück

———, *Syntaktische Forschungen*. 5 Bde. (1871–1888).

But much of this difficulty is due to coming at the matter with preconceived rules. Blass’ treatment of the voices is quite unsatisfactory. Cf. further for this matter, chapter VIII, VI, (d).

II. The Active Voice (διάθεσις ἐνεργετική). The Stoics called the active ὁρθή also.

(a) Meaning of the Active Voice. In this voice the subject is merely represented as acting or existing, for state (cf. εἰμὶ) must be included as well as action. It is not certain whether the active or the middle is the older, but the active is far the more common.

(b) Either Transitive or Intransitive. There is nothing peculiar in the N. T. about this. Each verb has its own history. One originally transitive may become intransitive and vice versa.4 Cf. ἰγω which may be intransitive ἰγομεν (Mt. 26:46; cf. the interjectional ἰγε, Jas. 4:13) or transitive ἰγαγον αὐτόν (Lu. 19:35). In ἄμαντες (Ac. 27:13, 17) the object is probably understood (ἢν νοῦν). Cf. also αὐξάνω in Mt. 6:28 and 2 Cor. 9:10. Βάλλω is usually transitive, even in Jo. 13:2 (cf. Ac. 22:23), but it is intransitive in Ac. 27:14 (ἔβαλεν, ‘rushed’). Cf. Βλαστάνω in Jas. 5:18 (tr.) and in Mt. 13:26 (intr.). So βρέχω is transitive in Lu. 7:38, but intransitive in Mt. 5:45.

ἔγειρον is usually transitive (Mt. 10:8), but see Mt. 26:46. Ἠπαγελλίζο is transitive in Rev. 10:7, but intransitive in 14:6. Ἰχνο is transitive except when used with adverbs, when, as in ancient Greek, it may be intransitive. Cf. τοὺς κακῶς Ἰχοντας (Mt. 4:24), ἵππος Ἰχει (Mk. 5:23), [Page 800] ἧπῃ Ἰχοντα (Jo. 11:17), οὖς Ἰχει (Ac. 7:1), τὸ νῦν Ἰχον (Ac. 24:25). Κλίνω is transitive in Mt. 8:20, but intransitive in Lu. 9:12. In Ac. 7:42 στρέφω is intransitive, though also transitive elsewhere. In the N. T. θριαμβεύω is transitive and the same is true of μαθητεύω. But in Text. Rec. ἐκθέτεος is intransitive in Mt. 27:57. Cf. δόνοι intransitive in Lu. 4:40 and φώ in Heb. 12:15. Let these serve as specimens of many such verbs in the N. T. Modern Greek is specially rich in intransitive active verbs (Thumb, Handb., p. 112) and verbs that oscillate from one use to the other.

(c) Effect of prepositions in composition. These may make the verb transitive or the result may be just the opposite. As examples of transitive compounds from an intransitive simplex take διαβαίνω (Heb. 11:29), but intransitive in Lu. 16:26. So διήρχετο τὴν Ἰερειώ (Lu. 19:1), παρέρχεσθε τὴν κρίσιν (11:42). On the other hand, intransitive compounds abound. The compounds of ἰγω (simplex either tr. or intr.) which are often intransitive are ἰπάγο (Mt. 7:13), παράγο (Mt. 9:9), περάγο (Ac. 13:11), προάγο (Lu. 18:39), ὑπάγο (Jo. 3:8), but not ἰνάγο. Cf. also παραδίδωμι in Mk. 4:29. With βάλλω note ἐπιβάλλω in Mk. 4:37 and the peculiar ἐπιβάλλον in 14:72. Examples of several intransitive compounds of Ἰχνο occur in the N. T. Thus ἰπέχω (Mk. 14:41), ἐνέχω (Mk. 6:19), ἐπέχω (Lu. 14:7; Ac. 19:22), περαίχο (1 Pet. 2:6), προσέχω (Mt. 7:15), ὑπερέχω (Ph. 4:7). Here the substantive has dropped out in most cases and the verb comes to stand alone (cf. προσέχο νοῦν). Cf. ὑποκάμπτω (Mt. 2:12), ἐκκλίνω (Ro. 16:17) and προσκόπτω (Jo. 11:9). Καταπαύω is transitive in Ac. 14:18, but intransitive in Heb. 4:4, 10. Cf. ἰπορρίπτω in Ac. 27:43. Στρέφο shows intransitive compounds with ἰνα– (Ac. 5:22), ἤπο– (Ac. 3:26), ἐπι– (Lu. 2:39).

The modern Greek surpasses even the κοινή in its facility for making all sorts of compound verbs (tr. and intr.) and in particular verbs compounded with nouns, like ἐτεκνοτρόφησεν and ἐξενοδόχησεν (1 Tim. 5:10). Cf. Thumb, Handb., p. 112.

(d) **DIFFERENT TENSES VARY.** Thus where both second and first aorists occur, the second is intransitive and the first transitive. Cf. ἐστη (Lu. 6:8), but ἐστήσεν αὐτό (Mk. 9:36). This distinction applies to all the compounds of ἵστημι. Acts 27:28 (διαστήσαντες) is no exception, as τὴν ναῦν is to be supplied. Some of the “strong” or primitive perfect actives are intransitive when the present is transitive. Thus ἀνέφη (1 Cor. 16:9) from ἀνεφέω, ἀπόλλω (Mt. 10:6) from ἀπόλλυμι, ἐστάναι (Lu. 13:25) from ἵστημι, πέποιθα [Page 801] (Ro. 2:19) from πείθω, σέσηπα (Jas. 5:2) from σήπω. Moulton¹ seems to confuse “transitive” with “active,” and “intransitive” with “middle” in his discussion of these perfects: “We have a number of cases in which the ‘strong’ perfect active attaches itself in meaning to the middle.” The middle is not in itself intransitive, nor is the active in itself transitive. “The conjecture that the perfect originally had no distinction of active and middle, its person-endings being peculiar throughout, affords the most probable explanation of the facts: when the much later –κα perfect arose, the distinction had become universal.” It is doubtless true that in the primitive –α perfect there was no distinctive middle form. But why seek for a middle sense in the primitive perfect active because it happens in many cases to be intransitive? It does happen that γέγονα (Jo. 1:4) is found with γίνοιμαι and ἐλήλυθα (Jo. 17:1) from ἔρχομαι, two intransitive middles. It is also true that future middles are the rule with a few verbs which have this primitive, but not always intransitive, perfect. So it is with ἄδικος (trans., Ac. 6:11), ἔλησα (trans., Rev. 11:17), πέπονθα (intr. as the verb itself is, Lu. 13:2), τέτυχα (trans., Heb. 8:6). So with κέκραγεν (Jo. 1:15, intr. like the verb itself), though κεκράξο (some MSS. in Lu. 19:40) is future perfect middle. ὁδό (Jo. 10:4) is transitive, though defective, while ἔοικα (Jas. 1:6), like ἔφθα (Mk. 10:1), is intransitive. But γέγραφα (Jo. 19:22) is transitive.

(e) **THE ACTIVE AS CAUSATIVE.** But this usage is not due to the voice, and is, besides, common to all languages.² Cf. the Hebrew Hiphil conjugation. Viteau (“Essai sur la Syntaxe des Voix dans le Grec du N. T.,” Revue de Philologie, 1894, p. 2) says that the Greek voices would not be strange to a Jew who was used to the seven conjugations of the Hebrew verb. But the point is not strictly parallel. In one sense this idiom is due to the fact that what one does through another he does himself.³ Cf. τὸν Ἱλίου αὐτοῦ ἀνατέλλα (Mt. 5:45), strictly causative. But in Jo. 19:1, ἔλαβεν ὁ Πιλάτος τὸν Ἰησοῦν καὶ ἐμαστίγωσεν, the other kind of causative occurs. So also with περιέτε (Ac. 16:3). There was indeed a remarkable increase in the LXX in the

Viteau

VITEAU, J., Essai sur la syntaxe des voix dans le grec du N. T. (Rev. de Phil., 1894).

———, Étude sur le grec du N. T. I, Le Verbe (1893); II, Le Sujet (1896).

3 Gildersleeve, Synt. of Cl. Gk., p. 63.
number of verbs used in the causative sense, many of which had been usually intransitive. Cf. βασιλεύω, which occurs 36 times in the causative sense in the LXX (cf. Judg. 9:6). The Hebrew Hiphil is partly [Page 802] responsible for this increase.1 See further verbs in –ωω, like καταδουλάω (Gal. 2:4).

(f) Active with Reflexives. Certainly there is nothing unusual in this construction. Cf. σῶσω σεαυτόν (Mk. 15:30), ἔβαλεν ἑαυτόν (Jo. 21:8), προσέχετε ἑαυτοῖς (Lu. 17:3). Cf. Jo. 21:18. Blass2 indeed says that the “active for middle” occurs. One hesitates to subscribe to that dictum. It is indeed true that the use of the reflexive pronoun with the active brings out much more sharply the reflexive relation than the mere middle. It is not necessary to say that καταδουλάω (2 Cor. 11:20) is used “for” the middle. It is true that πειράζω in the κοινή supplants the Attic πειράομαι, but this is not due to a confusion of voice. With ποιέω the N. T. does show a number of examples of the active where the middle was more common in the Attic, though the N. T. generally has ποιεῖσθαι ἰαματιλήν, ἱόγον, πορείαν, συνοιήν. And the MSS. vary greatly between active and middle of ποιέω with words like μονήν (Jo. 14:23), κοπετόν (Ac. 9:3), συνοιήσαν (23:13), but not with συμβούλον (Mk. 15:1), ἐκδίκησιν (Lu. 18:7 f.), συντροφήν (Ac. 23:12), πόλεμον (Rev. 11:7). But this is precisely what we find in the κοινή (inscriptions and papyri). Cf. Radermacher, N. T. Gr., p. 120. So even βιάζω and ἐπιλανθάνω (Mayser, Gr., p. 386). The same tendency appears in modern Greek (Thumb, Handb., p. 114). Cf. διέρρηξεν τὸ άμάτια αὐτοῦ (Mt. 26:65). In these examples Blass has in my judgment read too much into the active voice. But it is certain that in προσέχετε ἑαυτοῖς (Lu. 12:1) there is more emphasis on the reflexive idea than in φυλάσσεσθε (12:15). Cf. Moulton, Prol., p. 157.

(g) Impersonal Active. Some impersonal verbs occur in the active. Cf. περιέχει ἐν τῇ γραφῇ (1 Pet. 2:6), and ἔβρεξεν (Jas. 5:17).

(h) Infinitives. These do not always reflect the force of the voice, especially in the “epexegetie” use,3 like our English “fair to see,” “good to eat.” Cf. κρύθηκαν and λαβέθι, Mt. 5:40. The infinitive has no voice in Sanskrit. See further under Infinitive (ch. XX, Verbal Nouns).

(i) Active Verbs as Passives of Other Verbs.4 Thus ἄποθνήσκω is more common than the passive of ἀποκτείνω (κτένω), though examples of this passive occur in the N. T. (Rev. 6:11, etc.). W. H. read κακῶς ἔχει in Mt. 17:15 rather than κακῶς πάσχει (cf. ποιῶ κακῶς, etc.). So ἐκπίπτω (Ac. 27:17, 26, 29) occurs [Page 803] as passive of ἐκβάλλω, but note ἐκβάλλεσθαι in Mt. 8:12. Cf. Gildersleeve,

Gildersleeve

GILDERSLEEVE, B. L., Editions of Pindar and Justin Martyr.
III. The Middle Voice (διάθεσις μέση).

(a) ORIGIN OF THE MIDDLE. See chapter VIII, VI, (c), for the uncertainty as to the priority of active and middle. That question is an open one and must be left open. Both active and middle appear in Sanskrit and in Homer. The prehistoric situation is purely speculative. Logically the active would seem to come first, though the difference in form may be due to variation in sound (ablaut).1 Probably at first there was neither active nor middle, the distinction being a development. In the Sanskrit2 we meet a full system of both active and middle forms for all the tenses (not all the modes), the participle, however, having only a partial system and the infinitive no voice at all. But each verb has its own development and that was by no means uniform. Some had a very limited use as to voice, tense and mode. In Homer indeed the middle is rather more common than in later Greek.3 It is only in the Sanskrit, Zend (Old Persian), Greek and Gothic that the middle is kept as a distinct voice.4 In the Gothic only remnants of the middle are found,5 while in Latin the middle as a separate voice disappears.6 It is very difficult to run a parallel between the Latin and Greek voices. But there is a considerable remnant of Latin middles like miror, sequor, utor (cf. Draeger, Hist. Syntax, pp. 145 ff.). The final disappearance of the Greek future and aorist middle before the passive is well sketched by Jannaris.7 But at first we are not to think of the passive at all, that interloper that finally drove the middle out of use.

1 Moulton, Prol., p. 152.
4 Cf. O. Hoffmann, Das Präsenz der indog. Grundspr., 1889, p. 25. In the Bantu language Mr. Dan Crawford finds 16 voices (reflexive, reciprocal, intensive, etc., all having special forms).
6 Ib., p. 405.
Jannaris

JANNARIS, A. N., A Historical Greek Grammar (1897).

———, On the True Meaning of the Koinē (Class. Rev., 1903, pp. 93 ff.).
(b) MEANING OF THE MIDDLE. It is urged that the term “middle” is good because the voice in meaning stands between the active and the passive. But, unfortunately for that idea, the middle is older than the passive. It is true that the passive arose out of the middle and that the middle marks a step towards the passive. The passive idea existed before there was a separate passive form, a thing never true of all tenses and all verbs. The Hebrew Hithpael conjugation is somewhat parallel, but not wholly so. The only difference between the active and middle voices is that the middle calls especial attention to the subject. In the active voice the subject is merely acting; in the middle the subject is acting in relation to himself somehow. What this precise relation is the middle voice does not say. That must come out of the context or from the significance of the verb itself. Gildersleeve is clearly right in holding that the interpretation of the difference between active and middle is in many cases more lexical than grammatical. “The middle adds a subjective element.” Sometimes the variation from the active is too minute for translation into English. This “word for one’s self” is often very difficult of translation, and we must not fall into the error of explaining the force of the middle by the English translation.

(d) THE USE OF THE MIDDLE NOT OBLIGATORY. This remark may sound like a truism, but it is justified when one can read this: “As the active is used in place of the middle, so the middle often stands for the active which would naturally be expected.” Winer also speaks of the two voices being used “interchangeably.”

8 Clyde, Gk. Synt., p. 57.
5 Gildersleeve, Synt. of Class. Gk., p. 66.
1 Blass, Gr. of N. T. Gk., p. 185.

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).
Winer loses one of his examples, for W. H. have συγκαλεῖ in Lu. 15:9, as in verse 6. Winer correctly says that “it depended on the writer” which he would use. Of course, but that is not to say that no distinction existed. In Jas. 4:2 f., αἰτεῖτε καὶ οὐ λαμβάνετε, διότι κακῶς αἰτεῖτε, the middle seems rather on purpose (‘ye ask for yourselves amiss,’ Farrar, Gk. Syntax, p. 118). Blass calls this “an arbitrary interchange,” though he admits in general the N. T. use of αἰτεῖσθαι for ordinary requests (as from God), but αἰτεύομαι in business transactions (its usual use in the N. T., Mt. 27:20; Lu. 23:23). This may be the very point in Jas. 4:2 f. and 1 Jo. 5:14. Moulton agrees with Mayor (James in loco) on the correctness of the distinction. Mayor (in loco) says: “When αἰτεῖτε is thus opposed to αἰτεῖσθαι, it implies using the words, without the spirit of prayer.” See the same distinction drawn in Mk. 6:22–25; 10:35, 38 (Mt. 20:20, 22); 1 Jo. 5:15. Blass (Gr. of N. T. Gk., p. 186 note) observes that Herod’s offer to Salome gave her business relations to him justifying her use of the middle (Mk. 6:24 f.). When the active and the middle occur side by side the attention is drawn to the distinction. It is to be recalled again that the same verb varied in different stages of the language in the voice used. Hence it is hardly pertinent to bring

4 Prol., p. 160.
an indictment against the N. T. writers, because the middle is not used with all verbs just as it was in the Attic Greek. As a matter of fact, Homer differs from the Attic. Blass (Gr. of N. T. Gk., p. 186) succinctly says that “the New Testament writers were perfectly capable of preserving the distinction between the active and the middle.” So in Mk. 14:47 note σπασάµενος τήν µάχαιραν, while in Mt. 26:51 we have ἀπέσπασεν τήν µάχαιραν αὐτοῦ. In Matthew we have the pronoun αὑτοῦ and ὁ πόλλων supplanting the middle in Mark (cf. Radermacher, N. T. Gr., p. 120 f.). Radermacher (op. cit., p. 119), however, as a result of his researches, finds in the κοινή „Unsicherheit im Gebrauch des Mediums.” The point of the middle is not the same always. So in Ac. 7:24 ἐμένεσα = ‘assist,’ not ‘ward off from one’s self,’ but the force of the middle is present. So in Col. 2:15, ἄπεκδοσάµενος τάς ἀρχάς, it is not ‘undress,’ but ‘throw off from one’s self.’ Cf. also πληροῦσαι in Eph. 1:23 and πληρῶν in 4:10. Moulton shows that there is as much freedom in the papyri in the use of active and middle as in the N. T. Thus ἔδω αὐρήτης and ἔδω αὐρήσθη (G. H. 36, B.C. 95) occur side by side. So γαμεῖσθαι=nubere fell out of use. See also II, (f).

(e) Either Transitive or Intransitive. Thus ἔδω µή νίψωνται τάς χερᾶς (Mk. 7:3) and ἔδωσαν αὐτοῖς (6:56), but ἔξισταντο (6:52) and ἐθερεύοντο (6:56) are intransitive. The middle is not, therefore, intransitive in itself. That is a matter that belongs to the verb-stem. As to the future middles, like βήσομαι, see discussion a little later. Some verbs, indeed, are transitive in the active, but intransitive in the middle (ἀπόλλυμι, ἀπόλλυμαι, φαίνω, φαίνομαι). Cf. Hatzidakis, Einl., pp. 201 ff.; Thompson, Syntax, p. 161.

(f) Direct Middle. It is necessary to discuss the various uses of the middle, but the divisions made by the grammarians are more or less arbitrary and unsatisfactory. They are followed here merely for convenience. The middle voice is very broad in its scope and no one word, not even reflexive, covers all the ground. It is essentially the voice of personal interest somewhat like the dative case. Grosse (Beiträge zur Syntax des griechischen Mediums und Passivums, 1891, p. 4) denies that the reflexive is the original use of the middle. But Rutherford (First Gk. Syntax, 1890, p. 74), derives both passive and middle out of the reflexive use. For the various uses of the middle in Homer, who is specially fond of this voice, see Monro, Homeric Gr., p. 7. But, curiously, Monro mentions “the Intransitive use” as one of the separate idioms of the

1 Prol., p. 158 f. He cites also συνεδριά δέσιν, B.U. 775 (ii/A.D.). But the pap. use the middle also.
Rutherford

RUTHERFORD, W. G., A Chapter in the History of Annotation (1905).

———, The New Phrynichus (1881).

middle. Nearly every grammarian has his own division of these “uses” of the middle, none of which the Greeks themselves had. Gildersleeve is justly impatient with this overrefinement and observes that “one must needs fall back on the way of the language,” which “is capricious in such matters.” It is needless to take up philosophical abstractions like “subjective” and “objective.” It is not possible to tell whether the direct middle (reflexive middle) was the original use of the voice or not. The direct middle is comparatively rare in Homer and in the early Greek generally. It began in the κοινή to disappear, before the active and the reflexive pronoun (cf. N. T.), but the direct middle revived again as the indirect middle disappeared before the passive because of “its subtle meaning.” Hence in Neo-Hellenic “almost every transitive verb, if active, admits of a direct middle.” In modern Greek this direct reflexive is nearly the sole use of the middle. The modern Greek has no distinction in forms between middle and passive, but the middle signification survives. Thus λούσαμαι means ‘I bathe myself’ (Thumb, Handb., pp. 111, 114). Thumb finds the direct reflexive use common. Moulton practically confines this idiom in the N. T. to ἀπήγαγα (Mt. 27:5), ‘he hanged himself,’ and even here Moulton suggests ‘choked’ as a truer English translation. This is indeed “a survival from classical Greek,” but there seem to be other N. T. examples also. The example cited by Winer from Jo. 8:59 (cf. also 12:36), ἔκρυψεν, is passive, as Moulton points out. But in ὡς λουσάνη (2 Pet. 2:22) the direct middle is evident, as Moulton admits in the Appendix (p. 238). Cf. λούσασθε (Is. 1:16), ‘wash you.’ Note also ἀπελούσασθε, ‘washed yourselves’ (1 Cor. 6:11, correct translation in margin of Rev.

V.). A good example also is θερμαίνομενος (Mk. 14:54), 'warming himself' (Rev. V.). It is rather gratuitous to doubt the direct middle παρασκευάζεται, 'prepare himself' (1 Cor. 14:8). But Moulton adds μη σκόλλου (Lu. 7:6) to Winer's list and illustrates by "the illiterate contemporary papyrus O.P. 295, μη σκόλλη ἐστήν" (active and reflexive pronoun). So also ἔπαινος (W. H., Mk. 7:4) and βαπτίσσονται (marg.) are both direct middles. Ζῶσαι (Ac. 12:8), 'gird yourself,' is also direct middle. Δογματίζεσθε (Col. 2:20) is probably direct middle, 'subject yourselves to ordinances.' And ὑποτάσσεσθε (Col. 3:18) may be also. Ἀποστομαι ('fasten myself to,' 'touch') is really the direct middle (Mk. 8:22). Ἐπεκτεινόμενος (Ph. 3:13) is 'stretching myself forward.' Cf. also ὑπεστελάμη (Ac. 20:27), 'withdraw myself'; ἄντισσομενος (Ro. 13:2), 'line one's self up against.' In the case of περιβάλλω it is probable that we have the direct middle 'clothe one's self' (Mt. 6:29). The accusative of the thing is added in Rev. 3:18. It is possible to regard ἄναπωσθε (Mt. 26:45) as direct middle. Ἀπογράφασθαι (Lu. 2:5) may be merely the direct middle, 'enrol himself,' though the causative idea is possible. In Lu. 12:15 φυλάσσεσθε ('guard yourselves from') follows the classic idiom. Ἀνεχόμενοι ὀλλήλων (Eph. 4:2) is also the direct middle, 'holding yourselves back from one another.' [Page 808] The same thing is true of ἀπέκτεινοι ἐδόκησαν (Ac. 15:29). In 1 Pet. 5:5 τασινοφροσύνην ἐγκομιώσατε, 'gird yourselves with humility,' we may have the same idiom. In Ac. 18:5, συνείχετο τῷ λόγῳ, we may have the direct middle, 'held himself to the word.' There are to be added, besides, some of the causative middles, like βάπτισαν (Ac. 22:16), 'get yourself baptized' (cf. βαπτίσαντο, 1 Cor. 10:2). It is true that the list is not a large one, but the idiom is clearly not obsolete in the N. T. The causative middle has a wider use also, as will be shown directly.

(g) CAUSATIVE OR PERMISSIVE MIDDLE. Cf. the German sich lassen. This occasional use of the middle does not distinguish it from the active and occurs both with the direct and the indirect use of the middle. It is just so in modern Greek (Thumb, Handb., p. 114 f.). It is, like transitive and intransitive, more the notion of the word than a phase of the middle voice. In later Greek the causative sense occurs only with the direct middle. It is not to be forgotten that originally there was no passive form at all. The verb-idea and the context then alone decided the voice as between middle and passive. Even in the aorist and future, where the passive later has a distinct form, the line was not always sharply drawn, especially in the future. More about this a little later. But in the aorist in particular one hesitates to find a passive voice in the middle form, though it sometimes happens. Some few of these causative middles could be explained as passives, but by no means all. Certainly ἐκλεξαμένους (Ac. 15:22) is a true middle. A considerable residuum remains. "In Tb.P. 35 (ii/B.C.) ἐναντίον αὐτόσατα, 'will get himself accused,' is a middle." In Ac. 22:16, βάπτισαν καὶ ἄφωλοιν ταύς διαβρώσας σου, we have the causative middle, one a direct, the other an indirect, middle, 'get yourself baptized and get your sins washed away.' So then βαπτίσασθεν (W. H. text in 1 Cor. 10:2) is causative, though many MSS. read βαπτίσησαν. Blass has eccentric notions of textual criticism, for he rejects the
middle here and contends for it in Lu. 11:38 on the authority of one minuscule! Blass also argues that the sense of ‘let’ or ‘allow’ belongs to the passive rather than to the middle, but this is by no means certain. Thus ἀδικεῖσθε and ἀποστερεῖσθε (1 Cor. 6:7) may be middles (cf. actives in next verse), ‘let yourselves be wronged and robbed.’

[Page 809] This permissive sense of the middle is closely allied to the causative and approaches the passive.1 In Lu. 2:5 ἀπογράψασθαι may be (see (f) above) causative, ‘have himself enrolled,’ though ἀποστερεῖσθαι (2:1) is passive. In Mt. 5:42 δανίσασθαι is ‘to have money lent’ (‘to borrow’). Μισθώσασθαι (Mt. 20:1) is ‘to let out for wages’ (‘to hire’). In 1 Cor. 11:6, κειράσθαι, κείρασθαι ή ἡμεράσθαι (or ζώρασθαι), we find the permissive middle. Cf. ἐξηρήσονται τὴν κεφαλήν (Ac. 21:24). But ἀποκόψονται (Gal. 5:12) is causative, ‘have themselves castrated’ (cf. Deut. 23:1). So ἀποκόψονται, according to text of Rev. V. (1 Cor. 6:11). In Rev. 3:5 περιβαλεῖται comes rather close to the passive sense. See (f) above. In Lu. 14:18, 19, ἔχεµε παρατήσεσθαι, according to text of Rev. V. (1 Cor. 6:11). Indirect Middle. In the flourishing period of the language this was by far the most frequent use, but it finally faded before the active and the intensive (reflexive) pronoun or the passive.2 In 1 Cor. 15:28, ὑποταγήσεται, the passive may bear the middle force (Findlay, Expos. Gr. T., in loco). But in general the indirect middle is abundant and free in the N. T. In the modern Greek Thumb gives no instances of the indirect middle. The precise shade of the resultant meaning varies very greatly. The subject is represented as doing something for, to or by himself. Often the mere pronoun is sufficient translation. Each word and its context must determine the result. Thus in Heb. 9:12, αἰωνίαν λύτρωσιν εὑράμενος, Jesus is represented as having found eternal redemption by himself. He found the way. In Mt. 16:22, προσλαβόµενος αὐτόν, ‘Peter takes Jesus to himself.’ In Mk. 9:8, περιβλεψάµενοι, ‘the disciples themselves suddenly looking round.’ In Lu. 8:27, οὐκ ἐνεδύσατο Ἰάκωβον, ‘did not put a garment on himself.’ In 8:52, ἐκατερίζεται ἐν Χριστῷ (Eph. 1:10) is not due to the voice, but to the verb itself (–όω).

(h) INDIRECT MIDDLE. In the flourishing period of the language this was by far the most frequent use, but it finally faded before the active and the intensive (reflexive) pronoun or the passive.3 In 1 Cor. 15:28, ἑποταγήσεται, the passive may bear the middle force (Findlay, Expos. Gr. T., in loco). But in general the indirect middle is abundant and free in the N. T. In the modern Greek Thumb gives no instances of the indirect middle. The precise shade of the resultant meaning varies very greatly. The subject is represented as doing something for, to or by himself. Often the mere pronoun is sufficient translation. Each word and its context must determine the result. Thus in Heb. 9:12, αἰωνίαν λύτρωσιν εὑράμενος, Jesus is represented as having found eternal redemption by himself. He found the way. In Mt. 16:22, προσλαβόµενος αὐτόν, ‘Peter takes Jesus to himself.’ In Mk. 9:8, περιβλεψάµενοι, ‘the disciples themselves suddenly looking round.’ In Lu. 8:27, οὐκ ἐνεδύσατο Ἰάκωβον, ‘did not put a garment on himself.’ In 8:52, ἐκατερίζεται ἐν Χριστῷ (Eph. 1:10) is not due to the voice, but to the verb itself (–όω).

6 Ib., p. 185.
1 Thompson, Synt., p. 162.
3 Moulton, Prol., p. 157.
(‘sold’). Ἐνοσφίσατο (Ac. 5:2) means ‘kept back for himself.’ In ἐπιδεικνύομαι χιτῶνας (Ac. 9:39) the women were ‘showing garments belonging to themselves.’ Note the fullness of meaning in περιποίησάτο (Ac. 20:28). Cf. παρατηρεῖσθαι (Gal. 4:10), ἀπειπάμην (2 Cor. 4:2), ἐκτρέπομαι (1 Tim. 6:20). In διεξόσατο (Jo. 21:7) we have ‘he girded round himself.’ Παρατίθησθε (Heb. 12:25) is ‘beg off from yourselves’ (‘reject’). In Col. 4:5, τὸν καρόν ἔξαγοραζόμενοι, we have ‘buying the opportunity for yourselves out of the open market.’ Ἀποθέμενοι (Heb. 12:1) is ‘laying aside from yourselves every weight.’ In ἔξελέξατο (Lu. 10:42) we have ‘she selected for herself’ (‘chose’). Ἑνεδόθησεν (Lu. 16:19) is ‘he put clothes on himself,’ though this may be direct middle with accusative of thing added. Κατοπτρίζομενοι (2 Cor. 3:18) is probably ‘beholding for ourselves out of a mirror.’ In Ro. 3:25, ὰν προέθετο ὁ θεός, note that it was God’s own Son whom he set forth. This free indirect reflexive use came to be the typical middle in the flourishing period of the Greek language. No fixed rule can be laid down for the translation of this or any other use of the middle. Even “deponents” like χράομαι may be indirect middles. This word from χρή (‘necessity’) means ‘I make for myself what is necessary with something’ (Moulton, Prol., p. 158). An interesting group of middles occurs in Ac. 24:22–25, ἐνεβάλετο, διαγνώσαμαι, διατεξάμενος, παραγενόμενος, μεταπέμπαι, διαλειψάμενον, πορεύου, μετακαλέσαμαι. These are not all “indirect” middles, as is obvious. Cf. also ἐξβαλλόμενοι (Ac. 27:38) and προσελάβετο (Ro. 14:3). It is interesting to note the difference between παρέσχε in Ac. 16:16 (the damsel who furnished gain for her masters) and παρείτετο in Ac. 19:24 (Demetrius who furnished gain for his craftsmen and himself). So πείθω is ‘to exercise suasion,’ and πείθομαι ‘to admit suasion to one’s self’ (Moulton, Prol., p. 158).

(i) Reciprocal Middle. Since ἕωςτόν was used in the reciprocal sense, it was natural for the middle to fall in with this idiom. [Page 811] Thus συνεβουλεύσαντο (Mt. 26:4), ‘they counselled with one another,’ does not differ radically from ἔξελέξατο (Lu. 14:7), ‘they selected the first seats for themselves.’ So also ἕξουσίασαν (Jo. 12:10), συνετέθειν (9:22), συναναγινόθησα (1 Cor. 5:9), κρίνεσθαι (6:1), ἔμαχοντο (Jo. 6:52), διαλειψάμενος (Ac. 19:8. In Mk. 9:34, πρὸς ἄλληλος διελέχθησαν, we have passive deponent with reciprocal pronoun). The reciprocal middle survives in modern Greek (Thumb, Handb., p. 114). For classic examples see Gildersleeve, Syntax, p. 66.

(j) Redundant Middle. Here the pronoun and the middle both occur. This idiom is found as early as Homer and indicates a dimness in the force of the middle on the part of the speaker. “The effect is artificial” according to Thompson. Gildersleeve (Syntax, p. 68) sees in this idiom the effort to bring out more clearly the reflexive force of the middle. Moulton (Prol., p. 162) cites from the papyri ἔσωτόν αὐτῶν ἀνέρθησαται, Τν. 35 (ii/b.c.). This redundance probably began very naturally. Thus in Ac. 7:58, ἀπέθεντο τὸ ἱμάτια αὐτῶν, the personal pronoun is added, not the reflexive. So in ὑπόδησαι τὸ σανδάλιά σου καὶ περιβαλοῦ τὸ ἱμάτιόν σου (12:8) and ἄδεικνυσσος τὴν κεφαλὴν (Mt. 6:17). Cf. νίπτωσθαι τὰς χεῖρας (Mt. 15:2) without the pronoun. So in Lu. 14:1, καὶ αὐτοὶ ἔσαν παρατηροῦμενοι, the αὐτοὶ wavers between mere personal

1 Moulton, Prol., p. 157.
3 Synt. of Att. Gk., p. 166.
and intensive. Cf. the active in Eph. 5:27, παραστήσῃ αὐτὸς ἐαυτῷ. But in Jo. 19:24 the LXX quotation is given as διεμερίσαντο—ἐαυτὸς, while in Mt. 27:35 it is merely διεμερίσαντο. Note also σεαυτὸν παρεχόμενος (Tit. 2:7) and ποιοῦμαι—ἐμαυτῷ (Ac. 20:24). See also ἀνεθρέψατο αὐτὸν ἐμαυτῷ ἐις ψύχον (Ac. 7:21) and 1 Tim. 3:13 ἐαυτὸς περιποιοῦνται. Most of the examples, however, in the N. T. occur with verbs which are not found in the active. Cf. Lu. 9:23 ἄρνησάσθω ἐμαυτὸν, Ac. 24:10 τὰ περὶ ἐμαυτοῦ ἐπολογοῦμαι, 26:2 ἥγημαι ἐμαυτὸν, Ph. 3:12 ἐμαυτὸν ὁφεὶ λογίζομαι.

(k) DYNAMIC (DEPONENT) MIDDLE. “I would fain call the drip-pan middle, the πανδέκτης middle, the middle that is put at the bottom to catch the drippings of the other uses.” And this is the most difficult use of the middle to explain. Some writers distinguish between the dynamic and the deponent. Others, like Thompson, make the dynamic include the deponent. The name “deponent” is very unsatisfactory. It is used to mean the laying [Page 812] aside of the active form in the case of verbs that have no active voice. But these verbs in most cases never had an active voice. Moulton is clearly right in his contention that the term in reality applies as well to active verbs that have no middle as to middle verbs that have no active. The term is usually applied to both middles and passives that have no active (Clyde, Gk. Syntax, p. 61). Others use the term for middle verbs that have no longer a reflexive idea. But “deponent” is a very poor definition. Nor is the word “dynamic” much better. Winer’s remark is not very lucid: “From Middle verbs are to be carefully distinguished Deponents.” They are indeed either transitive or intransitive, but some are in the middle voice, others passive. But the point about all the “dynamic” middles is that it is hard to see the distinctive force of the voice. The question is raised whether these verbs have lost the middle idea or never had it. “Like the rest of us, Stahl has to go into bankruptcy,” Gildersleeve remarks on Stahl’s attempt to explain this use of the middle. Moulton (Prol., p. 158) thinks that in these verbs “it is useless to exercise our ingenuity in interpreting the middle, for the development never progressed beyond the rudimentary stage.” But these verbs persist in the modern Greek (Thumb, Handb., p. 113). It is possible that the Greeks were more sensitive to the exact force of this middle than we are, just as they used the intensive particles so freely. Where guessing is all that we can do, is it not clear that these “dynamic” middles represent the original verb before the distinction was drawn between active and middle? The French says je m’aperçois, ‘I perceive.’ The intensive force of this middle is partially seen in verbs of mental action which are so common in Greek, like αἰσθάνομαι (Lu. 9:45), ἄρνεομαι (Lu. 12:9), προσατάμασι (Ro. 3:9), ἀπάρασπομαι (Ac. 25:13), διαβεβαιούμαι (Tit. 3:8), καταλαμβάνω (Ac. 4:13, but note καταλαμβάνω in the same sense in Ph. 3:12), ἐντέλλομαι (Heb. 11:22), ἐπιλαμβάνομαι (Mt. 16:5), εὖχομαι (Ro. 9:3), ἤγεομαι (Ph. 3:8), λογίζομαι (Ph. 4:8), μαίνομαι (Ac. 26:25), μέμψομαι (Ro. 9:19),

4 Am. Jour. of Philol., 1908, p. 278.
φείδομαι (Ro. 8:32). I imagine that the personal interest of the subject is not so difficult to recognise in such verbs, especially since in a word like καταλαμβάνωμαι it is not “deponent,” but occurs also in the active. The papyri vary, as does the N. T. in the use of ποιούμαι and ποιῶ with nouns. Thus we have συμβούλουν ποιήσαντες (Mk. 15:1), but μνέαν ποιούμενος [Page 813] (Eph. 1:16). There is the utmost freedom in the matter in the N.T. Not all the “deponents” of mental action are middles in the aorist. Cf. βούλομαι, ἐνθυμέομαι, ἐπιμελέομαι, εὐλαβέομαι. These are commonly called passive deponents in the present as well as in the aorist and future, but the matter is not clear by any means. At any rate there are middle verbs which are very hard to explain, like γίνομαι, (Mt. 8:26), ἄλλομαι (Jo. 4:14), ἄφικνέομαι (Ro. 16:19), διαμαρτύρομαι (Ac. 2:40), ἔρχομαι (Jo. 1:39), ἔργαζομαι (Mt. 25:16), καθέζομαι (Mt. 26:55), κάθημαι (Mt. 13:1), συνέπομαι (Ac. 20:4; cf. sequior). Κάμια is probably passive. It is not hard to see the reflexive idea in δέχομαι (Mt. 10:14). Περιβλέπομαι is always middle in the N. T. (cf. Mk. 3:5), accenting the movement of the eyes or concern expressed in the look. There are also passive deponents that correspond to this list that really do not seem to be passive in idea, like βούλομαι, δόναμαι, φοβέομαι. Some of these verbs have both middle and passive forms, like γίνομαι (Ἵγένετο, Εγενήθην), δέχομαι (Ἅδεξατο, Ἑδέχθην). Not all of these middle “deponents” have middle forms in all tenses. Cf. γέγονα, ἧλθον, Ἑλήλυθα, Ἐλάθον. Then, again, some verbs have the deponent or dynamic middle only in the future, like ἔσωμαι, though Homer is fond of the middle forms of this verb.1 But the aorist and future middle call for special treatment.

1 Middle Future, Though Active Present. Some verbs, active in the other tenses, have the future only in the middle. No real explanation of this phenomenon is known. For a list see chapter VIII, VI, (d). Some of them are really separate verbroots, as ὁδίκω, ἔσωμα, ἔσθω, φάγομαι. Others represent a special variation of the future form, like ἐποιεῖμαι, πεσοῦμαι, πίμαι, but both κοιμῶμαι and κοιμῶμαι. Others are regular enough, like ἐκούμεναι, –βήσεαι, γνώσεαι, έσιμαι, θαυμάσομαι, τέξομαι, φευξόμαι. In other instances the old classic middle has vanished in the N. T. before the active future, as in ἐμαρτήσα, ἐπαντήσα, ἐρπάσα, γελάσο, κλείσο, κράξο, παίξο, βεῦσα, etc. Some verbs, like ὠδίκω, ζώω, use either voice in the future. Some of these middle futures create no difficulty. Thompson2 calls them all “strict middles,” but most of them are as “deponent” as the verbs in the previous section. Clyde3 quotes Curtius’ explanation that an act in the future lies mainly in the mind of the speaker. But on the whole the matter remains unexplained, though the number has greatly decreased in the N. T. as in the κοινή generally.4 See also

4 Moulton, Prol., p. 154.
Dieterich, *Untersuch.* p. 205; Radermacher, *N. T. Gr.* p. 120. Moulton\(^1\) justly takes “the existence of this large class of futures as additional evidence of a close connection between the middle flexion and the stressing of the agent’s interest in the action of the verb.” The use of the middle future (and occasionally aorist) as passive comes under the passive voice, for it is really passive. See under IV.

\((m)\) THE MIDDLE RETREATING IN THE N. T. This is happening because of the active (cf. ἁμαρτήσω above) as well as the passive. This is true of the κοινή in general.\(^2\) There was a considerable amount of variation and even of confusion among writers in the later period.\(^3\) Different words had different histories in the matter. But we have just seen from the list of “dynamic-deponent” middles plenty of evidence that from the day of Homer on the function of the middle voice was indistinct in many verbs.\(^4\) “The accuracy with which the middle was used would naturally vary with the writer’s Greek culture.”\(^5\) And, it may be added, with the author’s feelings at the moment. The judgment of Simcox\(^6\) is right, that the middle “is one of the refinements in Greek idiom which is perhaps beginning to be blurred in some of the N. T. writers, but is preserved to a greater or less extent in most.” But it is no more “blurred” than in other writers of the κοινή. It is simply that all the distinctions of earlier times did not survive with all the verbs. On the whole, in the N. T., ἀρτῶ is used colloquially and ἀρτοῦμαι for the more elevated style, but usage varies with different writers as in the LXX. Cf. Abbott, *Johannine Gr.* p. 389. So ἀστερέω in Heb. 4:1, but ἀστεροῦμαι in Ro. 3:23. But the change in the N. T. is mainly in the disuse of the middle, not in a new use of it. From Homer to modern Greek plenty of middles are hard to define, and the N. T. is no more erratic than the rest of Greek, not to say of the κοινή (Moulton, *Prol.*, p. 159). But the delicate distinctions between the active and the dynamic middle are lost in modern Greek (Thumb, *Handb.* p. 112), if indeed they ever really existed.

IV. The Passive Voice (διάθεσις παθητική).

(a) ORIGIN OF THE PASSIVE. See chapter VIII, VI, (e), for a discussion of the rise of the passive voice.7 In Sanskrit the middle [Page 815] was liable to be used in the passive sense.1 As is well known in Homer, the future passive forms do not occur except two, μήγεσθαι and δαήσεαι (Stahl, Syntax, p. 66), and the distinction between aorist middle and aorist passive is indistinct. Indeed, strictly speaking, there was no passive voice as to form in Greek, as there was none in the original Indo-Germanic speech.2 The passive sense was developed in various languages in different ways. This sense may be due to verbs of state, but Greek fell upon various devices like the active of some verbs (κακῶς ἔχω, πάσχω), the mere use of the middle, the development of two special tenses by the use of active endings (aorist) and middle (future) with a special suffix. In Homer3 ἔβλημην, ἔκτάμην, ἔσχόμην occur as passives just like βάλλομαι, ἔχομαι. “Even in Attic ἔσχόμην appears as a passive, ἔσχέθην being late.”4 In Homer also the distinctive aorist passive form sometimes has practically the active or middle signification.5 This much of repetition is necessary to get the position of the passive clearly before us. It is really no voice at all in form as compared with the active and middle. Cf. French je me trouve and the use of reflexive pronouns in English.

(b) SIGNIFICANCE OF THE PASSIVE. The subject is represented as the recipient of the action. He is acted upon. The name “passive” comes from patior (cf. πάσχω ὑπό in Mt. 17:12). Ἀποκτάνθην (Mk. 9:31) occurs as well as ἀποθνήσκειν. The use of περίκειμαι as the transitive passive (Ac. 28:20) of περιτίθημι is somewhat different. The idea of having an experience is very vague and allows wide liberty. The point to note is that at first this idea had no distinctive form for its expression. Only the context and the force of the verb itself could make it clear. The future passive, being built upon the earlier aorist passive, reflects the Aktionsart of the aorist.6

(c) WITH INTRANSITIVE OR TRANSITIVE VERBS. “Theoretically the passive ought to be formed from transitive verbs only with an accusative object.”7 But Greek follows no such narrow rule. That is an artificial rule of the Latin which Greek knows nothing about.8 Cf. κατηγορεῖται ὑπό τῶν Ἰουδαίων (Ac. 22:30). Other N. T. examples are διακοινοθῆκαί (Mk. 10:45), ἐγκαλεῖται [Page 816] (Ac. 19:40), εὐαγγελεῖται (Heb. 13:16), κατεγνώσθη (Gal. 2:11), ματαιρεῖται (Ac. 6:3), χρηστεύεται (Mt. 2:12). Blass (Gr. of N. T. Gk., p. 185) notes that “only in Lu. 2:26 do we have τὸν ἄνθρωπον κεραυνησίου.” The passive is used with both active and middle verbs. Thus we have from λογίζομαι both ἐλογίσαμην and ἐλογίσθην. Cf. ἐγενόμην and ἐγενήθην from γίνομαι.

2 Thompson, Synt., p. 162.
4 Gildersleeve, Am. Jour. of Philol., 1908, p. 278.
5 Sterrett, The Dial. of Hom., N. 27.
7 Gildersleeve, Am. Jour. of Philol., 1908, p. 279.
(d) The Passive Usually Intransitive. But it is not necessarily so. Διδάσκω, for instance, is transitive in the passive, ἄς ἔδιδαχθητε (2 Th. 2:15), and note κατηχημένος τὴν ὄδον (Ac. 18:25). See also 1 Cor. 9:17; Lu. 7:25; 9:25; Gal. 2:7.

Transitive passives are usually verbs that in the active have two accusatives or an accusative of the thing with the person in the dative or ablative. This accusative of the thing is retained in the passive. Cf. ἐπιστεύθησαν τὰ λόγια τοῦ θεοῦ (Ro. 3:2), περιθελμένους στολὰς λευκὰς (Rev. 7:9). For full list see “Accusative” in chapter XI, Cases. Cf. also τὴν ἄλλην ταῦτην περίκεμα (Ac. 28:20). The transitive passive “deponents,” like μὴ φοβηθῆτε αὐτούς (Mt. 10:26), call for special discussion a little later. Certainly there is no “passive” sense in πορευθήνατε. The vernacular in later times preferred the active to passive. Cf. ἀστεύσαν (Lu. 12:20) as a N. T. illustration.

In ἄγνοιασθη (Ac. 21:24) the passive apparently has the force of ‘let’ or ‘get’ (cf. the causative middle). Cf. also περιτέμνησθε (Gal. 5:2). It is possible so to regard ὀδικέσθαι and ἀπορριπτέσθαι (1 Cor. 6:6 f.). Sometimes, indeed, it is difficult to tell whether a verb is middle or passive. Cf. πτερυγοὶ εὕψαγγλιζονται (Mt. 11:5), προεχόμεθα (Ro. 3:9), ἐνθυναμοῦσθε (Eph. 6:10). Indeed, as already said, in all the Greek tenses save the aorist and the future it is always an open question whether we have middle or passive. “The dividing-line is a fine one at best” (Moulton, Prol., p. 162). Only the context and the verb-idea can decide. So with ἐγείρομαι (Mt. 27:63), περισσᾶτο (Lu. 10:40) and θωρυβάζῃ (10:41), βιάζεται (Mt. 11:12). Cf. perfects in Ac. 13:2; 25:12; Ro. 4:21; 1 Pet. 4:1; Jo. 9:22.

(e) Aorist Passive. This tense calls for special comment. As already stated, in Homer the aorist middle form, like the other middle forms, was sometimes used as passive. In itself there is no reason why this should not be so. The distinctive passive aorist (second and first) grew up side by side with this use of the aorist middle.

Ἐφάνην and ἔβην are really the same form at [Page 817] bottom. Out of this intransitive aorist active (cf. ἀπόλολολα) grew the so-called second aorist passive forms (–νην) with active endings. We have ἐκρύβην (Jo. 8:59) from the transitive κρύπτω (cf. ἔσταλην from στέλλω, etc.) and ἔχαρην (Jo. 14:28) from the intransitive χάριον. It is probable that ἤγερθη sometimes (as in Mk. 16:6) is merely intransitive, not passive, in idea. Moulton (Prol., p. 163) says “often.” In 1 Cor. 15:15 f., etc., the true passive “emphasizes the action of God.” But ὑπεστάγησαν (Ro. 10:3) is more likely passive in sense, like ἔκομηθήνα (1 Th. 4:14), ‘was put to sleep’ (Moulton, Prol., p. 162). Moulton quotes from the papyrus “a purely middle use of κοιμηθῆναι, ‘fell asleep’,” ἤνικα ἡμέλλον κοιμηθῆναι ἔγραψα, Ch.P. 3 (iii/b.c.). He finds a “clear passive” in Ἰνα τὸ πρόβατα ἐκεῖ κοιμηθῆνι, F.P. 110 (i/A.D.), but ἐκολλήθη (Lu. 15:15) can be explained as passive or middle in sense. In a few verbs (ἔστην, ἔσταθην) a distinction was developed. W. F. Moulton thinks (Winer-M., p. 315, n. 5) that “a faint passive force” may be observed in στωθήνα in the N. T., but hardly in Mk. 3:24. Cf. also intransitive στωθήσιμαι in Mt. 12:25, 26. Ἐστάθηκα in modern Greek is aorist passive for στέκω, ‘stand,’ and ἔσταθήκα for στήνος, ‘place’ (Thumb, Handb., p. 145).

1 Jann., Hist. Gk. Gr., p. 359.
2 Cf. Blass, Gr. of N. T. Gk., p. 185.
2 Blass, Gr. of N. T. Gk., p. 181.
correct text (W. H.) in Ac. 21:3 is ἄναφαντες τήν Κύπρον (active), not ἄναφαντες (passive). But still some MSS. do have this transitive second aorist passive participle. If one keeps in mind the origin of this aorist passive form (from the active), he may be the less surprised to find it also transitive like the active. Already in Homer this was true.

The so-called passive “deponents,” verbs which had no active, formed the aorist passive form. But they were not always intransitive. Some of them were so, like παρέσκευμα (Mt. 8:9), μεταμέλομαι (Mt. 27:3), δόναμαι (Mt. 17:16), but most of them are really transitive. They probably represent a survival of the old active origin of the aorist passive forms.3 As examples of the transitive passive deponents note ἔβουλήθη (Mt. 1:19), ἔδεικνυτο (Lu. 5:12), ἔνθυμηθέντος (Mt. 1:20), ἐπεμελήθη (Lu. 10:34), ἐφοβήθη (Mt. 14:5). These passive aorists have precisely the construction that the middle or active would have so far as case is concerned. The distinctive passive sense is absent. Some of the “deponents” have both a middle and a passive aorist with a distinct passive sense. Thus note the middle and passive voices side [Page 818] by side in ἄφησαμενος and ἀπαρνήθησαται (Lu. 12:9). It so happens that this context is full of passive forms. Some of them in the strict passive sense, like ἐπισυναχθεὶσον (12:1), συγκεκαλυμένον ἐστίν δ’ οὐκ ἐποκαλυφθήσεται (12:2), γνωσθήσεται (12:2), ἀκουσθήσεται (12:3), κηρυχθήσεται (12:5), ἀπολούνται and οὐκ ἔστιν ἐπιελεξμένον (12:6), ἦρθησαν (12:7), ἀποθέτησαν (12:10). But note also the passive deponents φοβήθητε (12:4 f.), φοβήθητε (12:5), φοβέθηκε (12:7). Cf. also ἀποδέξασθαι (Ac. 18:27) and παρεδέχθησαν (15:4), where the voices are distinguished, θεᾶσθαι τοὺς ἀνακειμένους (Mt. 22:11) and πρὸς τὸ θεάθηναι αὐτοῖς (Mt. 6:1), λογεύμενος (Heb. 11:19) and ἐλογίσθη (Lu. 22:37), ἱάσατο (Lu. 9:42) and ἱάθη (Mt. 8:13), ἐρύσατο (Col. 1:13) and ἔρυσθην (2 Tim. 4:17), ἐχαρίσατο (Lu. 7:21) and χαρισθήσαται (Ac. 3:14). One may note also παρηθήσαντο (Heb. 12:19) and ἐξε με παρηκτήσανον (Lu. 14:19, perfect passive); ἐξελέξατο (Mk. 13:20), but ὃ ἐκλεξεθηκένος (Lu. 9:35); κορεσθέντες τροφῆς (Ac. 27:38) and ἦν κεκορεσμένον ἦστε (1 Cor. 4:8). It is possible to see a difference also between ἔγενετο (Jo. 1:14) and γενεθῆτο (Mt. 6:10). Ἀπεκρίθη (Mt. 25:9) steadily drove out ἀπεκρῖνατο (Ac. 3:12), though both are used transitively with no difference in sense. The papyri more frequently1 have ἀπεκρίναμην, though both forms continue in the koine. Cf. also ἀπολογηθήναι (Lu. 21:14), διελέξθησαν (Mk. 9:34), ἐθωμαῖσθη (Rev. 13:3), though with passive sense in 2 Th. 1:10. As a result of this inroad of the comparatively new passive forms the aorist middle forms vanished. In modern Greek the passive aorist form is almost invariably used for both the middle and the passive ideas. This tendency seen in the N. T. (and the rest of the koine) has triumphed over the aorist middle.2 In Ro. 10:3, τῇ δικαιοσύνῃ τοῦ θεοῦ οὐκ ὑπετάγησαν, the Rev. V. translates ‘they did not subject themselves to the righteousness of God.’

(/) FUTURE PASSIVE. As has been mentioned several times already, Homer has only two future passive forms (second futures). The passive voice indeed occurs but

3 See ch. VIII, VI, (e), for list of these N. T. passive aorists.
1 Moulton, Prol., p. 161.
rarely in the Bœotian dialect. The future in –θήσομαι is comparatively late. At first, certainly, the distinction between passive and middle (and active also, –ην, –θην) was “a distinction of function, not of form.” It is not surprising to find the middle future form in Homer used with the passive sense (cf. all the other tenses save aorist), where the forms [Page 819] for the two voices are identical. In later prose the future middle form continued to be used in the passive sense even in the great prose writers (Herodotus, Thucydides, Xenophon, Plato, Demosthenes). In the LXX Conybeare and Stock (Selections, p. 75 f.) find the same idiom. Cf. Ex. 12:10, οὐκ ἀπολείπεται ἢπ αὐτοῦ ἐξω προί, καὶ ἐστοῦν οὐ συντρίπτεται ἢπ αὐτοῦ. It is quite within bounds, therefore, to speak of “medio-passives” in the future as in the aorist. The idiom appears in the papyri. So narrow is the dividing-line between middle and passive. Is περιβάλεται (Rev. 3:5) middle or passive in sense? The same ambiguity exists as to ἀποκόψονται (Gal. 5:12). Considering the rather large list of verbs that once used the middle future as passive in sense the idiom is rare in the N. T. In general, therefore, the future passive form has made its place secure by the time of the κοινή. Even verbs that have no active form have the future passive as well as the future middle. Thus ἀπαρνήσομαι (Mk. 14:31), but ἀπαρνηθήσομαι (Lu. 12:9); ἱάσομαι (Ac. 28:27), but ἱάσθεται (Mt. 8:8); and in Ro. 2:26 λογισθήσεται is passive in sense. But the future passive form was destined, like the other futures, to disappear as a distinct form. Only the compound tense occurs in the modern Greek. But, meanwhile, the future passive form took over the uses of the vanishing future middle forms. It is possible to find a passive sense in ἐπαναστάσεται (Lu. 10:6), μεταμεληθήσεται (Heb. 7:21), ἰδιαλλήσθονται (Mt. 8:11), κομψωθόμεθα (1 Cor. 15:51), κολληθήσεται (Mt. 19:5). Cf. also θαυμασθήσονται (Rev. 17:8), πεισθήσονται (Lu. 12:9), ὑπαναπαήσεται (Lu. 10:6), μετατραπήσεται (Heb. 7:21), ἰδιαλλήσθονται (Mt. 8:11), κομψωθόμεθα (1 Cor. 15:51), κολληθήσεται (Mt. 19:5). Cf. also θαυμασθήσονται (Rev. 17:8), πεισθήσονται (Lu. 12:9), ὑπαναπαήσεται (Lu. 10:6), μετατραπήσεται (Heb. 7:21), ἰδιαλλήσθονται (Mt. 8:11), κομψωθόμεθα (1 Cor. 15:51), κολληθήσεται (Mt. 19:5). In 1 Cor. 15:28 note also ὑποταττεί, which reinforces the argument for the true passive. But the future passive may also be devoid of the passive idea and even transitive just like the aorist passive. Cf. ἀποκρηθήσομαι (Mt. 25:37), ἐντραπήσονται τὸν ὑλόν (Mt. 21:37), φοβηθήσεται (Heb. 13:6). The passive ἄφαιρεθήσεται (Lu. 10:42) has the usual sense, but one wonders if τὸν ὑλὸν to be attracted to the case of τούτων from οἷς (‘in which,’ ‘wherein’). Then ὁφθήσοισι would be ‘I will appear to thee.’ Note the new present ὁπάνοιμι (Ac. 1:3). But the future middle persisted in γενήσομαι, ἰδιαλλήσομαι, ἠπαναπαήσεται, πεισθήσομαι.

The Agent with the Passive Voice. As already noted, the Greek has no difficulty in using a verb in the passive which was not used with the accusative in the active. Thus note ἐγκαλεῖσθαι (Ac. 19:40), κατηγορεῖται ὑπὸ τῶν Ἰουδαίων (Ac. 22:30), πεπίστευμαι τῷ εὐαγγέλιον (Gal. 2:7). A few verbs idiomatically use the dative with the passive. Thus ἐγνώσθη τῷ Σαῦλῳ (Ac. 9:24), εὑρέθην (Ro. 10:20), ἔφανε (Mt. 1:20), ὑπὸ τῶν Ἰουδαίων (Ac. 22:30), πεπίστευμαι τῷ εὐαγγέλιον (Gal. 2:7). A few verbs idiomatically use the dative with the passive. Thus ἐγνώσθη τῷ Σαῦλῳ (Ac. 9:24), εὑρέθην (Ro. 10:20), ἔφανε (Mt. 1:20), ὑπὸ τῶν Ἰουδαίων (Ac. 22:30), πεπίστευμαι τῷ εὐαγγέλιον (Gal. 2:7). The direct agent is most commonly expressed by ὑπὸ (Mt. 4:1), the intermediate by διά (Mt. 1:22). The agent (see chapter on Prepositions) is also expressed by ἀπό (2 Cor. 3:18), ἐκ (Gal. 4:4), παρά (Jo. 17:7). See also discussion under Instrumental Case (chapter XI, Cases) for discussion of ἀντί with ἔστιν πεπραγμένον (Lu. 23:15), whether dative or instrumental. In the N. T., as in ancient Greek (Gildersleeve, Syntax, p. 72), the instrument is sometimes personified and treated as an agent. Cf. κάλαμον ὑπὸ ἄνθρωπον σαλεύομεν; (Mt. 11:7).

Impersonal Construction. This is the usual idiom in the Coptic in lieu of the absence of the passive. But it is often rather rhetorical than syntactical as Moulton shows. He compares also the French on, the German man, the English one. Wellhausen shows how in the Aramaic this impersonal plural was common. One notes αὐτῶν (Lu. 12:20), where a passive would be possible. Cf. συνάγουσιν καὶ βάλλουσιν αὐτὰ (Jo. 15:6) where the passive occurs in καίεται. Note in particular ἔξηράνθη καὶ συνάγουσιν αὐτά (Jo. 15:6). Cf. also τρέφεσθαι αὐτά (Rev. 12:6). The use of the impersonal passive like πιστεύεται and ὁμόλογεται (Ro. 10:10) is another matter and calls for no comment. It is rare in Greek as compared with Latin (Gildersleeve, Syntax, p. 77). Cf. the plural in 10:14 f. See also the personal construction in 1 Cor. 15:12 ὡς ἔδε Χριστὸς κηρύσσεται ὃτι.

I. Complexity of the Subject.

Probably nothing connected with syntax is so imperfectly understood by the average student as tense. This is due to various causes.

1. The Difficulty of Comparing Greek Tenses with Germanic Tenses. “The translators of our English version have failed more frequently from their partial knowledge of the force of the tenses than from any other cause.” Ignorance, one may add, both of English and Greek still stands in the way of proper rendering of the

1 Cf. Gildersleeve, Synt., etc., p. 77.
2 Cf. Blass, Gr. of N. T. Gk., p. 185.
3 Prol., p. 58 f.
4 Einl., p. 25 f.
1 Farrar, Gk. Synt., p. 123.
Greek. The English, like the other Germanic tongues, has only two simple verb-forms. We have a great wealth of tenses in English by means of auxiliary verbs, but they do not correspond with any of the Greek tenses. It is the commonest grammatical vice for one to make a conjectural translation into English and then to discuss the syntactical propriety of the Greek tense on the basis of this translation. Burton indeed justifies this method for the benefit of the English student of Greek. But I submit that the practice brings more confusion than help. “The Aorist for the English Perfect, and the Aorist for the English Pluperfect” Burton urges as “a pertinent illustration.” But that method keeps the student at the English standpoint, just the thing to be avoided. The Greek point of view affords the only sure basis of operation. Winer laments that “N. T. grammarians and expositors have been guilty of the greatest mistakes” here, though it cannot be said that Winer himself always lives up to his just ideal. Translation into English or German is the least point to note in judging a tense.

2. BAD INFLUENCE OF THE LATIN ON GREEK GRAMMARIANS. Most of the older Greek grammars were made by men who knew Latin better than Greek. Even to-day the study of the Greek tenses is hampered by the standpoint of Latin idioms which developed under very different conditions. This is true of school grammars in particular, whereas Latin has had no influence on the Greek tenses themselves by the time of the κοινή. The perfect and the aorist blend in Latin, while that is not true in Greek till a very late date (1000 A.D.). The separate Greek development (cf. the Sanskrit) was due to the genius and spirit of the Greek people and has continued throughout the history of the language, though in modern times the Greek tenses have suffered serious modification. The Latin tenses must be left to one side. The time element is more prominent in the Latin.

3. ABSENCE OF HEBREW INFLUENCE. There is no time element at all in the Hebrew tenses. Hence it is not strange that the LXX translators had much trouble in rendering the two Hebrew tenses (perfect and imperfect) into the Greek with its richness of tense. A similar difficulty exists for the English translators. Curious devices (possibly slips) sometimes occur, like ἐγὼ εἶμι καθίσομαι (B in Ju. 6:18), ἔσομαι διδόναι (BA in Tob. 5:15). But such translation Greek left no lasting impress on the Greek of the N. T. save in προσέθετο πέψαι (Lu. 20:12; cf. Ex. 25:21). The problems of the Greek tenses are not to be solved by an appeal to the Semitic influence.

5 Cf. Swete, Intr. to O. T. in Gk., p. 308.
4. **GRADUAL GROWTH OF THE GREEK TENSES.** There is no future optative in Homer and no future passive. The aorist passive is also rare. The past perfect is rare in Homer, and it does not occur with the idea of relative time. “In the examination of tense usages, we must be careful to observe that tenses, in the sense in which the word is now used, are of comparatively late development.” In the beginning the verb-root was used with personal suffixes. At first this was enough. Some verbs developed some tenses, others other tenses, some few all the tenses.

5. **“AKTIONSART” OF THE VERB-STEM.** Aktionsart (“kind of action”) must be clearly understood. The verb-root plays a large part in the history of the verb. This essential meaning of the word itself antedates the tense development and continues afterwards. There is thus a double development to keep in mind. There were originally two verb-types, the one denoting durative or linear action, the other momentary or punctiliar action. Hence some verbs have two roots, one linear (durative), like φέρω (féro), the other punctiliar (momentary), like ἔγνευκον (túlî). So ὁράω, ἐδον; τολμᾶω, ἔστην. With other verbs the distinction was not drawn sharply, the root could be used either way (cf. φη-μι, ἔ-φη-ν, ἔ-γγ-ω, ἔ-λεγ-ο-ν). All this was before there was any idea of the later tense. So ἔ-φαγ-ον is punctiliar, while ἔσθιο is linear or durative. Moulton rightly observes that this is the explanation of “defective” verbs. Moulton notes ἔχω as a word that can be used either for durative, as in Ro. 5:1, or punctiliar, like aorist ἔσχον (cf. ἔσχες and ἔχεις in Jo. 4:18). The regular idiom for a papyrus receipt is ἔσχον παρὰ σοῦ. This matter of the kind of action in the verb-root (Aktionsart) applies to all verbs. It has long been clear that the “tense” has been overworked and made to mean much that it did not mean. The verb itself is the beginning of all. But scholars are not agreed in the terminology to be used. Instead of “punctiliar” (punktuelle Aktion, Brugmann), others use “perfective” (Giles, Manual, p.

**Giles**

478). But this brings inevitable confusion with the perfect tense. All verbs may be
described as “punctiliar” (punktuell) and “non-punctiliar” (nicht-punktuell). But the
“non-punctiliar” divides into the indefinite linear (durative) and the definite linear
(completed or perfect). The notion of perfect action as distinct from point action came
later. The three essential kinds of action are thus momentary or punctiliar when the
action is regarded as a whole and may be represented by a dot (.), linear or durative
action which may be represented by a continuous line -----, the continuance of
perfected or completed action which may be represented by this graph . The
distinction between punctiliar and perfected action is not clearly drawn in the verb-
root itself. That is a later refinement of tense. Brugmann credits this “perfected” idea
to the perfect stem. “Iterative” action belongs to certain [Page 824] stems
(reduplicated, like γίγνομαι), but it is not a fundamental kind of action.

6. THE THREE KINDS OF ACTION EXPRESSED IN TERMS OF TENSE. These ideas
(punctiliar, durative, perfected state) lie behind the three tenses (aorist, present,
perfect) that run through all the moods. The forms of these tenses are meant to
accentuate these ideas. The aorist stem presents action in its simplest form (ἄ-
οριστος, ‘undefined’). This action is simply presented as a point by this tense. This
action is timeless. The present is also timeless in itself as is the perfect. It is
confusing to apply the expression “relations of time” to this fundamental aspect of
tense, as is done by some grammars. Radermacher (N. T. Gr., p. 121) uses Zeitart
and Zeitstufe, but why Zeitart instead of Aktionsart? It is better to keep “time” for its
natural use of past, present and future, and to speak of “kind of action” rather than
“kind of time.” These three tenses (aorist, present, perfect) were first developed
irrespective of time. Dionysius Thrax erred in explaining the Greek tenses from the
notion of time, and he has been followed by a host of imitators. The study of Homer
ought to have prevented this error. The poets generally do not bring the time relations
to the fore. Even Paul (Principles of the History of Language, p. 300) falls into this
error. It is doubtless easier to trace the history of the verb than of the noun, but as
many mistakes lie along the way.

7. TIME ELEMENT IN TENSE. But for the indicative the Greek tenses would have
had a simple history. There are no past tenses in the subjunctive. The future
subjunctive is an anomaly of very late Greek. The future optative occurs only in
indirect discourse and is not found in the N. T. The time element in the infinitive is
confined to indirect discourse and μέλλω. Time in the participle is only relative to the
principal verb. It is thus kind of action, not the time of the action, that is expressed in

5 Griech. Gr., p. 472.

2 Brug., Griech. Gr., p. 469.
3 Jann., Hist. Gk. Gr., p. 433; Gildersleeve, Synt. of Class. Gk., p. 79.
4 Cf. Benard, Formes Verb. en Grec, 1890, p. 279.
5 Mutzb., Die Grundl. d. griech. Tempusl., 1890.
these forms. But in the indicative the three grades of time had tenses of their own. The Greeks evidently felt that there was no need for time in the other modes except in a relative sense. As a matter of fact, the real time of subjunctive, optative, and imperative is future [Page 825] in relation to speaker or writer. It was evidently with difficulty (cf. absence of time in Hebrew) that time was expressed in a positive (non-relative) sense even in the indicative. It is only by the augment (probably an adverb) that past time is clearly expressed. “Homer and later Greek writers often use the present with an adverb of time instead of a past tense, a construction which has an exact parallel in Sanskrit and which is therefore supposed to be Indo-Germanic.”

There is no really distinctive form for the present indicative. The future was a later development out of both the present and aorist. See chapter VIII, Conjugation of Verb. The augment was not always used. Homer used it only when it suited him. But past time was objective and the three kinds of action (punctiliar, durative, perfected) were regularly expressed with the tenses (aorist, imperfect, past perfect). There is Aktionsart also in the present and future time, but the tense development did not go on to the full extent here. There are only two tense-forms in the present and practically only one in the future. But both punctiliar and linear action are expressed, but not differentiated, in the present time by the same tense, as is true also of the future. The kinds of action exist, but separate tense-forms unfortunately do not occur. There might thus have been nine tenses in the indicative: three punctiliar (past, present, future), three linear (past, present, future), three perfect (past, present, future). Because of this difference between the indicative and the other moods in the matter of time some grammars give a separate treatment to the indicative tenses. It is not an easy matter to handle, but to separate the indicative perhaps accents the element of time unduly. Even in the indicative the time element is subordinate to the kind of action expressed. A double idea thus runs through tense in the indicative (kind of action, time of the action).

8. Faulty Nomenclature of the Tenses. There is no consistency in the names given the tenses, as has already been explained. Cf. chapter VIII, VII, (b). The terms aorist, imperfect and perfect (past, present, future) are properly named from the point of view of the state of the action, but present and future are named from the standpoint of the time element. There is [Page 826] no time element in the present subjunctive, for instance. But the names cannot now be changed, though very unsatisfactory.

9. The Analytic Tendency (Periphrasis). This is the common way of expressing tense in the Germanic tongues. It was not unknown to the older Greek and was very frequent in the LXX under the Hebrew influence. See an extended list in Conybeare and Stock, Selections from the LXX, pp. 68–71. The tendency is strong in the N. T. See the summary already given (pp. 374–376). In the modern Greek the periphrastic form has displaced the usual inflected forms in all the tenses but the

7 Cf. Spyridis, Lang. grec. actuelle ou mod., 1894, p. 287.

3 Giles, Man., etc., p. 487.
5 Cf. Farrar, Gk. Synt., p. 120 f.
6 Cf. Goodwin, Gk. Moods and Tenses, pp. 8, 22.
present, imperfect and aorist. These are “simple.” The rest are “compound” (Thumb, *Handb.*, p. 115). This analytic tendency affected the durative and perfect kinds of action. It did not suit the purely punctiliar idea.

10. THE EFFECT OF PREPOSITIONS ON THE VERB. This is another aspect of Aktionsart. This subject has already been briefly discussed from the standpoint of the prepositions. Delbrück has worked the matter out with thoroughness and he is followed by Brugmann. Moulton has applied the principle to N. T. verbs. The point is that often where the simple verb is durative it is rendered “perfective” by the preposition in composition. This peculiarity is common to all the Indo-Germanic tongues and reaches its highest development in the Germanic (cf. English and German) and the Balto-Slavic languages. Thus we in English say *bring* and *bring up*, *burn* and *burn up*, *carry* and *carry off*, *come* and *come on*, *drive* and *drive away* ([home, in, off, out]), *drink* and *drink up*, *eat* and *eat up*, *follow* and *follow up*, *go* and *go away*, *grow* and *grow up*, *knock* and *knock down*, *make* and *make over*, *pluck* and *pluck out*, *run* and *run away*, *speak* and *speak out*, *stand* and *stand up*, *take* and *take up*, *wake* and *wake up*, *work* and *work out.* The “imperfective” simplex becomes “perfective” in the compound. Prof. A. Thumb has a paper “Zur Aktionsart der mit Präpositionen zusammengesetzten Verba im Griechischen,” in which he compares some tables of Schlachter for Thucydides with some by Prof. S. Dickey for the N. T. Thucydides shows for the present tense 260 *simplicia* verbs to 83 compound, for the aorist 158 to 199. Dickey has investigated about thirty N. T. verbs like ἄπέχω, etc. He reports for the present tense a proportion of 1160 *simplicia* to 83 compound, for the aorist 885 to 226. It is unfortunate that the term “perfective” is

7 Cf. Moulton, Prol., p. 112.
used for this idea, since it inevitably suggests the perfect tense. Some writers use “perfective” also for the aorist or punctiliar action, a means of still further confusion. Brugmann uses “Perfektive Aktion” for the effect of the preposition in composition and “Perfektische Aktion” for the perfect tense, a distinction hard to draw in English. Latin and Greek both show abundant illustrations of this use of prepositions. Cf. sequor and consequor, facio and efficio, teneo and sustineo. Moulton thinks that the freedom in the position of the preposition in Homer helped the adverb to retain its force longer than in later Greek and Latin. The point of the preposition here is best seen in the prepositions ἀπό—, δια—, κατα—, συν—. But even in these the actual majority of examples preserve the original local meaning and so are not perfective.

But in Lu. 8:29, πολλοῖς χρόνοις συνηρπάκει αὐτόν, the perfective sense of σύν combines with the past perfect tense and the locative (or instrumental) πολλοῖς χρόνοις to denote “not the temporary paroxysm, but the establishment of a permanent hold” (Moulton, Prol., p. 113). So γινώσκω is durative (‘gaining knowledge,’ as in Mk. 13:28), ἔγνων is effective (‘grasping the point,’ as in Lu. 16:4, ἔγνων τί ποιήσω), ἔμπνευσκόμαι is perfective (‘knowing my lesson,’ as in 1 Cor. 13:12), and ἐπιγνωσκόμαι also (‘recognising,’ as in Mt. 14:35). Moulton (ib., p. 114) calls particular attention to ὅλ ἀπολλόμενοι (1 Cor. 1:18), ‘the perishing,’ where the destiny is accentuated by ὅλο, and the process is depicted by the tense. In Heb. 6:18, οἱ καταιροῦντες, the perfective sense of κατά coincides with the effective aorist. So even when the tense is durative, the notion of completion is expressed in the preposition as contemplated or certain. In τέθνηκεν (Lu. 8:49) the perfect tense of the simplex is sufficient, but not so in ἀπεθάνεν (Lu. 8:53). Θνήσκω as simplex became obsolete outside of the perfect, so that ἀπεθάνηκεν (Lu. 8:42; cf. 2 Cor. 6:9; Heb. 11:21) occurs for the notion of ‘dying.’ “The linear perfective expressed its meaning sufficiently, denoting as it does the whole process leading up to an attained goal.” Moulton notes also the iterative use of ἀποθνήσκω in 1 Cor. 15:31, and the frequentative in 1 Cor. 15:22. See also the “perfective” use of ἀποκτείνω, the active of ἀπεκτέω. In ἀπόλλυμι and ἀπόλλυμαι (ἀπόλλωλα) the simplex [Page 828] is obsolete. Even in the present tense the force of ἁπω— is obvious. Cf. τοῖς ἀπολλυμένοις (1 Cor. 1:18), ἀπόλλυμαι (Lu. 15:17), ἀπόλλυμι (Mt. 8:25), where Moulton’ explains ἁπω— as suggesting “the sense of an inevitable doom.” Cf. also φεύγω (Mt. 2:13), ‘to flee,’ with διαφεύγω (Ac. 27:42), and ἐκφεύγω (Heb. 2:3), ‘to escape,’ καταφεύγω (Heb. 6:18), ‘to find refuge’; τηρέω (Ac. 24:23), ‘to watch,’ with διατηρέω (Ac. 27:42), and συντηρέω (Lu. 2:19), ‘to keep together (safely)’; σπάω (Mt. 5:4), ‘to draw in two’; καίω (Jo. 15:16), ‘to burn,’ with κατακαίω (Ac. 19:19), ‘to burn up’; κρίνω (Jo. 5:30), ‘to judge,’ with κατακρίνω (Mt. 12:41), ‘to condemn’; λύω (Lu. 3:16), ‘to loosen,’ with καταλύω (Mt. 24:2), ‘to destroy’; ἔχω (Ac. 13:5; Rev. 10:2), ‘to have’ or ‘hold,’ with ἔχω (Ac. 3:5), ‘to hold on to,’ and συνέχω (Lu. 8:45), ‘to hold together’ or ‘press,’ and ἔχω (Mt. 6:5), ‘to have in full,’ etc. As to ἀπέχω for ‘receipt in full,’ see Deissmann, Light, p. 110 f. The papyri and

Deissmann
ostraca give numerous illustrations. It is not necessary to make an exhaustive list to prove the point. Cf. μεν ν καὶ παραμενώ (Ph. 1:25), χαίρω καὶ συνχαίρω (2:17), where the point lies in the preposition, though not “perfective” here. So γινωσκομένη καὶ ἀναγινωσκόμενη (2 Cor. 3:2), ἀναγινώσκετε ἢ καὶ ἐπιγινώσκετε (1:13), μετρεῖτε ἀντιμετρηθήσεται (Lu. 6:38), ἔχοντες—κατέχοντες (2 Cor. 6:10). Cf. ἐκβάλε (Mt. 22:13). In some verbs the preposition has so far lost its original force that the “perfective” idea is the only one that survives. Dr. Eleanor Purdie (Indog. Forsch., IX, pp. 63–153, 1898) argues that the usage of Polybius as compared with Homer shows that the aorist simplex was increasingly confined to the constative sense, while the ingressive and effective simplex gave way to the “perfective” compounds. Moulton is inclined to agree in the main with her contention as supported by the papyri (and Thumb thinks that modern Greek supports the same view). At any rate there is a decided increase in the number of compound verbs. The ingressive and effective uses of the aorist would naturally blend with the “perfective” compounds. But it remains true that the Aktionsart of the verb-root is often modified by the preposition in composition.

11. “AKTIONSART” WITH EACH TENSE. It is not merely true that three separate kinds of action are developed (punctiliar, durative, perfected), that are represented broadly by three tenses in all the modes, though imperfectly in the present and future tenses of the indicative. The individual verb-root modifies greatly the resultant idea in each tense. This matter can only be hinted at here, but must be worked out more carefully in the discussion of each tense. The aorist, for instance, though always in itself merely point-action, “punctiliar,” yet may be used with verbs that accent the beginning of the action or the end of the action. Thus three distinctions arise: the unmodified point-action called “constative,” the point-action with the accent on the beginning (inceptive) called “ingressive,” the point-action with the accent on the conclusion called “effective.” The names are not particularly happy, but they will answer. “Constative” is especially awkward. In reality it is just the normal aorist without any specific modification by the verb-meaning. Hirt does not use the term, but divides the aorist into “ingressive” and “effective” when there is this special Aktionsart. But the use of these demands another term for the normal aorist. As an example of the “constative” aorist for the whole action take ἐσκήνωσεν (Jo. 1:14), for the earthly life of Jesus. So also ἔγηγήσατο (1:18), while ἔγένετο (1:14) is “ingressive,” and accents the entrance of the Logos upon his life on earth (Incarnation). Ἐθεασάμεθα (1:14) is probably “effective” as is ἐλάβομεν (1:16), accenting the result (“resultative,” Brugmann, Griech. Gr., p. 475). So likewise in the so-called “present” tense various ideas exist as set forth by the various “classes” of verbs or “conjugations.” The perfect and the future likewise have many variations in resultant idea, growing out of the varying verb-idea in connection with the tense-idea. These must be borne in mind and will be indicated in the proper place in discussing each tense.

12. INTERCHANGE OF TENSES. The point here is not whether the Greeks used an aorist where we in English would use a perfect, but whether the Greeks themselves drew no distinction between an aorist and a perfect, a present and a future. It is not possible to give a categorical answer to this question when one recalls the slow development of the Greek tenses and the long history of the language. There was a time long after the N. T. period when the line between the aorist and the perfect became very indistinct, as it had been largely obliterated in Latin. It is a question for discussion whether that was true in the N. T. or not. The subject will receive discussion under those tenses. The future grew out of the present and the aorist. The present continued to be used sometimes as vivid future, as is true of all languages. But it is a very crude way of speaking to say that one tense is used “for” another in Greek. That would only be true of ignorant men. In general one may say that in normal Greek when a certain tense occurs, that tense was used rather than some other because it best expressed the idea of the speaker or writer. Each tense, therefore, has its specific idea. That idea is normal and can be readily understood. Various modifications arise, due to the verb itself, the context, the imagination of the user of the tense. The result is a complex one, for which the tense is not wholly responsible. The tenses, therefore, are not loosely interchangeable. Each tense has a

---

1 Moulton, Prol., p. 109.
3 Brug., Griech. Gr., p. 475.
separate history and presents a distinct idea. That is the starting-point. Winer (Winer-Thayer, p. 264) is entirely correct in saying: “No one of these tenses strictly and properly taken can stand for another.” Writers vary greatly in the way that the tenses are used. A vivid writer like Mark, for instance, shows his lively imagination by swift changes in the tenses. The reader must change with him. It is mere common-place to smooth the tenses into a dead level in translation and miss the writer’s point of view. Radermacher (N. T. Gr., p. 124) is doubtful whether in the N. T. we are justified in making “sharp distinctions between the imperfect, aorist or perfect; a subjunctive, imperative, or infinitive of the aorist or present.” But for my part I see no more real ground in the papyri and inscriptions for such hesitation than we find in the ancient Attic Greek. Thumb (Handb., p. 116) notes that modern Greek, in spite of heavy losses, has preserved the distinction between linear and punctiliar action even in the imperative and subjunctive. I shall discuss the tenses according to the three ideas designed by them rather than by the names accidentally given.

II. Punctiliar Action.

This is the kind of action to begin with. It is probably not possible always to tell which is the older stem, the punctiliar or the linear. They come into view side by side, though the punctiliar action is logically first. The aorist tense, though at first confined to verbs of punctiliar sense, was gradually made on verbs of durative sense. So also verbs of durative action came to have the tenses of punctiliar action.1 Thus the tenses came to be used for the expression of the ideas that once belonged only to the root. The Stoic grammarians, who gave us much of our terminology, did not fully appreciate the aorist tense. They grouped the tenses around the present stem, while as a matter of fact in many verbs that is impossible, the root appearing in the aorist, not in the present. Cf. ἔστην (ἵστη-µι), ἔλαβον (λαµβάν-ω), etc. This error vitiated the entire theory of the Stoic grammarians.1 Grammatical forms cannot express the exact concord between the logical and the grammatical categories,2 but the aorist tense came very near doing it. By Homer’s time (and Pindar’s) the distinction between the aorist and imperfect tenses is fairly well drawn, though some verbs like ἔϕην remain in doubt.3 So we start with the aorist tense. In modern Greek the ancient aorist is the base-form on which a number of new presents are formed (Thumb, Handb., p. 143). J. C. Lawson (Journ. of Th. St., Oct., 1912, p. 142) says that Thumb would have smoothed the path of the student if he had “dealt with the aorist before proceeding to the present.”

1. THE AORIST (ἀώριστος). The aorist, as will be shown, is not the only way of expressing indefinite (undefined) action, but it is the normal method of doing so. The Greek in truth is “an aorist-loving language” (Broadus).4 In the κοινή the aorist is

1 Steinthal, Gesch. d. Sprach., p. 306 f.
2 Paul, Prin. of the Hist. of Lang., p. 300.
Broadus BROADUS, JOHN A., Comm. on Matt. (1886).
4 Robertson, Short Gr. of the Gk. N. T., p. 137.
even more frequent than in the classic Greek (Thumb, *Handb.*, p. 120), especially is this true of the N. T.

Gildersleeve\(^5\) does not like the name and prefers “apobatic,” but that term suits only the “effective” aorist. The same thing is true of “culminative.” The name aorist does very well on the whole. I doubt if the aorist is a sort of “residuary legatee,” taking what is left of the other tenses. The rather, as I see it, the aorist preserved the simple action and the other tenses grew up around it. It is true that in the expression of past time in the indicative and with all the other moods, the aorist is the tense used as a matter of course, unless there was special reason for using some other tense. It gives the action “an und für sich.” The common use of the “imperfect” with verbs of speaking (ἔφη, ἔλεγε) may be aorist in fact.

\((a)\) Aktionsart in the Aorist.

\((a)\) Constative Aorist. There is still a good deal of confusion in the use of terms. Gildersleeve (*Syntax of Attic Gr.*, p. 105) prefers “complexive” to “constative.” Moulton\(^6\) comments on Miss Purdie’s use of “perfective” in the sense of “punctiliar.” [Page 832] So Giles\(^1\) uses “perfective or momentary” for the aoristic action, but he also (p. 478 note) uses constative. But Moulton\(^2\) also makes a distinction between “constative” and “punctiliar,” using “punctiliar” for real point-action and “constative” for what is merely treated as point-action. That is a true distinction for the verb-root, but the growing number of constative aorists was in harmony with the simple idea of the tense. Brugmann\(^3\) rests constative, ingressive and effective aorists, all three on the punktuell idea and draws no sharp distinction between “punctiliar” and “constative.” Delbrück\(^4\) divides the punktuell or aorist into Anfangspunkt or Ingressive, Mittelpunkt or Constative and Schlußpunkt or Effective. The constative accents the “middle point.” The idea of Delbrück and Brugmann is that punktuell action is “action focused in a point.” “The aorist describes an event as a single whole, without the time taken in its accomplishment.”\(^6\) It seems best, therefore, to regard “constative” as merely the normal aorist which is not “ingressive” nor “effective.” The root-difference between the aorist and the imperfect is just this, that the aorist is “constative” while the imperfect “describes.”\(^7\) The “constative” aorist just treats the act as a single whole entirely irrespective of the parts or time involved.\(^8\) If the act is a point in itself, well and good. But the aorist can be used also of an act which is not a point. This is the advance that the tense makes on the verb-root. All aorists are punctiliar in statement (cf. Moulton, *Prol.*, p. 109). The “constative” aorist treats an act as punctiliar which is

\(^{5}\) Am. Jour. of Philol., 1908, p. 397 f.
\(^{6}\) Prol., p. 116.
\(^{1}\) Man., p. 481 f.
\(^{6}\) Moulton, Intr. to the Stu. of N. T. Gk., 1895, p. 190.
\(^{8}\) Moulton, Prol., p. 109, prefers “summary” to “constative.”
not in itself point-action. That is the only difference. The distinction is not enough to make a separate class like ingressive and effective over against the purely punctiliar action. Thumb (Handb., p. 122) passes by “constative” as merely the regular aorist “to portray simply an action or occurrence of the past,” whether in reality punctiliar or not. He finds both ingressive and effective aorists in modern Greek. But Thumb uses “terminative” for both “ends” (initial and final), a somewhat confusing word in this connection. The papyri show the same ᾠκτίονσάρτ of the aorist. So note constative

**[Page 833]** ὅτι μὲ ἐπαύδεσας καλὸς, B.G.U. 423 (ii/A.D.). Thus in Jo. 2:20, Τεσσεράκοντα καὶ ἔξεσον οἰκοδομήθη ὅ νῦν οὖτος ἡ ἀρχὴ, we have a good example of the constative aorist. The whole period of forty-six years is treated as a point. In Mt. 5:17, Ἡλθον, we have a very simple constative aorist, just punctiliar and nothing more, describing the purpose of Christ’s mission. It is true that the constative aorist in this sense is far more frequent than the ingressive and the effective uses of the tense. This has always been so from the nature of the case. The increasing number of “perfective” compounds, as already shown, increased the proportion of constative aorists.¹ When the action is in itself momentary or instantaneous no difficulty is involved. These examples are very numerous on almost any page of the N. T. Cf. in Ac. 10:22 f., ἐφημητίσθη, μεταπέμψατο, ἰκουσία, ἐξέστησαν, συνήλθον. See the aorists in Ac. 10:41 f. Cf. Mt. 8:3; Ac. 5:5. This is the normal aorist in all the moods. But verbs that are naturally durative may have the aorist. In ἐξαρτήσασθεν (Heb. 11:27) we have a verb naturally “durative” in idea, but with the “constative” aorist. Cf. also ἐκρύβη τρίμηνον (Heb. 11:23), where a period of time is summed up by the constative aorist. Cf. ἐβασίλευσεν ὁ ἰδίατος ὁ Ἀδὰμ μέχρι Μ. (Ro. 5:14). A good example is ἔξεσαν καὶ ἐβασίλευσαν μετὰ τοῦ Χριστοῦ χίλια έτη (Rev. 20:4). Here ἔξεσαν is probably ingressive, though ἐξεσωμεν is constative in 1 Th. 5:10, but ἐβασίλευσαν is clearly constative. The period of a thousand years is merely regarded as a point. Cf. also Jo. 7:9 ἔμεινεν ἐν τῇ Γαλιλαίᾳ, 10:40 ἔμεινεν ἐκεῖ. See also Ac. 11:26 ἔγνετο αὗτοις ἐναιματὸν ὄλον συναχθήναι ἐν τῇ ἐκκλησίᾳ, 14:3 ἰκανὸν χρόνον διήρησαν, 18:11 ἐκάθισεν ἐναιματον καὶ μῆνας ἔξε, 28:30 ἐνέμεινεν διετίαν ὅλην. Cf. Eph. 2:4. See ἀπὸ—διετέλεσα in B.G.U. 287 (A.D. 250). Gildersleeve (Syntax, p. 105) calls this “aorist of long duration” (constative).

For a striking example of the constative (summary) use of the aorist, note ἔφθασαν ἡμαρτον (Rom. 5:12). Note in particular the summary statements in Heb. 11, as ἀπέθανον οὗτοι πάντες (13), οὗτοι πάντες—οὔκ ἐκμίσασαν (39). Gildersleeve’s “aorist of total negation” (Syntax, p. 106) is nothing more than this. Repeated or separate² actions are thus grouped together, as in Mt. 22:28, πάντες ἔσχον αὐτὴν. So τρίς ἑραβδόθην, τρίς ἐνακάτευχαν (2 Cor. 11:25). In Mk. 12:44, πάντες—ἐβαλον, αὐτὴ δὲ—ἐβάλε, the two actions are contrasted sharply by the aorist. There is no difficulty in ἐξ ὑπὲρ πάντων ἀπέθαναν ἁρα οἱ πάντες ἀπέθαναν (2 Cor. 5:14). The same verb may sometimes be used either as constative (like ἐβασίλευσαν, [Page 834] ‘reigned,’ Rev. 20:4 above) or ingressive (καὶ ἐβασίλευσαν, ‘assumed rule,’ Rev. 11:17, though true here of God only in a dramatic sense). Thus ἐσώθησαν (Ac. 15:12) is ‘kept silence’ (constative), but στῆσαι (verse 13) is ingressive as is ἐσώθησαν (Lu. 9:36). Cf. Burton, N. T. Moods and Tenses, p. 21. In Gal. 5:16, οὖ μὴ τελέσητε, we have the

---

1 Moulton, Prol., p. 115.
2 Blass, Gr. of N. T. Gk., p. 193.
constative aorist, while πληρωσα is effective in Mt. 5:17. In line with what has already been said, βαλεν may mean ‘throw’ (constative), ‘let fly’ (ingressive) or ‘hit’ (effective). Cf. Moulton, *Prol.*, p. 130. Illustrations occur in the N. T. in ἔβαλεν αὐτόν εἰς φυλακήν (Mt. 18:30, constative, ‘cast’ or ‘threw’), βάλε σεαυτόν ἐντεύθεν κάτω (Lu. 4:9, ingressive, ‘hurl.’ Note ἐντεύθεν, as well as “perfective” force of κάτω. Cf. Mt. 5:29), ἔβαλεν κατ’ αὐτής (effective, ‘beat,’ Ac. 27:14).

**β** Ingressive Aorist. This is the inceptive or inchoative aorist. It is not, however, like the “constative” idea, a tensenotion at all. It is purely a matter with the individual verb.1 Thus ἐπτώχευσεν, 2 Cor. 8:9, is ‘became poor’; ἔζησεν, Ro. 14:9, is ‘became alive’ (cf. ἀπέθανεν just before).2 Perhaps in Jo. 16:3, οὐκ ἔγνωσαν, the meaning is ‘did not recognise.’3 But this could be constative. But it is clear in Jo. 1:10. So in ἔσοι ἔλαβον αὐτόν (Jo. 1:12) the ingressive idea occurs, as in οὐ παρέλαβον in verse 11. Cf. ἔκλωσεν (Lu. 19:41) =‘burst into tears’ and ἔσω (vs. 42) =‘camest to know.’ So ἔσκαρσεν (Jo. 11:35). In Mt. 22:7 ὄργισθη =‘became angry.’ Cf. also μὴ δόξητε (Mt. 3:9), ὀφυώπωσεν (Lu. 8:23), ἐθομώθη (Mt. 2:16). In Lu. 15:32 ἔξησεν is ingressive, as is ἐκουμήθη (Ac. 7:60), ἰσχύσαμεν μόλις (Ac. 27:16), μισήσας (Lu. 6:22), ἣγάπησεν (Mt. 10:21), ἐλυθή (2 Cor. 7:9), πλούτησε (2 Cor. 8:9). The notion is common with verbs expressing state or condition (Goodwin, *Moods and Tenses*, p. 16). Moulton quotes βασιλεύσας ἀναπάθεστα, ‘having come to his throne he shall rest,’ Agraphon, O.P. 654. See also ἔλαβα βιάτικον παρὰ Καίσαρος, B.G.U. 423 (ii/A.D.). Moulton (*Prol.*, p. 248) cites Jo. 4:52, κομψότερον ἔσχεν, ‘got better,’ and compares it with ἔδω κομψός συχό, Tb.P. 414 (ii/A.D.). Another instance is ἡγήσαν Mt. 21:1.4 Cf. ἔκτήσαι (Ac. 1:18).

**γ** Effective Aorist. The name is not particularly good and “resultant aorist” is suggested by some scholars. Gildersleeve5 [Page 835] suggests “upshot aorist.” Giles1 calls it aorist of the “culminating point,” following Monro.2 But the idea is that emphasis is laid on the end of the action as opposed to the beginning (ingressive). This is done (if done) by the verb itself (*Aktionsart*). The following examples will make the matter clear: ποιήσατε καρπόν (Mt. 3:8), κλείσας (6:6), ἔτελεσαν (7:28), ὄμοιωθη (13:24), ἔνεπρησαν (22:7), ἐκέρδησα (25:20), ἔπεισαν (27:20), ἔλυθη (Mk. 7:35), ἔσταθησαν (Lu. 24:17), ἐκρύβη (19:42), ἠγάγεν (Jo. 1:42), ἀπέστησε (Ac. 18).

Goodwin

GOODWIN, W. W., Greek Grammar. Various editions.

4 These ingressive aorists are often denominative verbs. Cf. Gildersl., Synt. of Att. Gk., p. 104.
5 Synt. of Att. Gk., p. 104.
1 Man., p. 498.
5:37), πληρώσαντες (12:25), ἔπεσεν (20:9), ἔπαυσαντο (21:32), ἐκόλυσεν (27:43), ἔμαθον (Ph. 4:11), ἐνίκησεν (Rev. 5:5). A good example of the effective aorist in the papyri is ἔσωσε, B.G.U. 423 (ii/A.D.). So then in the case of each aorist the point to note is whether it is merely punctiliar (constative) or whether the verb-idea has deflected it to the one side or the other (ingressive or effective). It needs to be repeated that there is at bottom only one kind of aorist (punctiliar in fact or statement). The tense of itself always means point-action. The tense, like the mode, has nothing to do with the fact of the action, but only with the way it is stated. Sometimes it will not be clear from the context what the Aktionsart is. The “perfective” force of prepositions applies to all the tenses. It must be said also that the Aktionsart in the aorist (ingressive, effective) applies to all the modes. Indeed, because of the time-element in the indicative (expressed by the augment and secondary endings) the real character of the aorist tense is best seen in the other modes where we do not have notes of time.³ It is merely a matter of convenience, therefore, to note the aorist in the different modes, not because of any essential difference (outside of the indicative). One is in constant danger of overrefinement here. Gildersleeve⁴ criticises Stahl⁵ for “characteristic prolixity” in his treatment of the tenses. A few striking examples are sufficient here.

(b) Aorist Indicative. The caution must be once more repeated that in these subdivisions of the aorist indicative we have only one tense and one root-idea (punctiliar action). The variations noted are incidental and do not change at all this fundamental idea.

(a) The Narrative or Historical Tense.⁶ It is the tense in which a verb in ordinary narrative is put unless there is reason for using some other tense. Hence it is enormously frequent in the Greek historians. Writers vary greatly, of course, in the use of the tenses as of words, but in the large view the point holds. The aorist holds its place in the papyri and in the modern Greek as the usual tense in narrative (Thumb, Handb., p. 122). Almost any page in the Gospels and Acts will show an abundance of aorist indicatives that illustrate this point. Cf., for instance, the eight aorists in Ac. 13:13 f. (no other tense), the eight aorists in 21:1 f. (no other tense), the three aorists in 25:1 f. (no other tense). In these instances the tenses are not all in indicative mood, though predominantly so. See again the fifteen aorists in Ac. 28:11–15 (one perfect). The aorist was used in narrative as a matter of course. Note the many aorists in Heb. 11.

The redundant use of the verb as in λαβὼν ἔσπειρεν (Mt. 13:31)=‘took and sowed’ is not a peculiarity of the aorist tense. Cf. ἀπῆλθεν καὶ ἔπεσεν (Jo. 5:15)=‘went and told.’ Nor is it a peculiarity of Greek. It belongs to the vernacular of most languages. But we no longer find the iterative use of ὅν with the aorist according to the classic idiom (Moulton, Prol., p. 167).

³ Moulton, Prol., p. 129.
⁴ Am. Jour. of Philol., 1908, p. 400.
(β) The Gnomic Aorist. Jannaris\(^1\) calls this also “empiric aorist,” while Gildersleeve\(^2\) uses “empirical” for the aorist with a negative or temporal adverb, a rather needless distinction. The real “gnomic” aorist is a universal or timeless aorist and probably represents the original timelessness of the aorist indicative.\(^3\) This aorist is common in Homer\(^4\) in comparisons and general sayings. The difference between the gnomic aorist and the present is that the present may be durative.\(^5\) But general truths may be expressed by the aoristic present. Gildersleeve (\textit{Syntax}, p. 109) compares this use of the aorist to the generic article. Winer\(^6\) denies that this idiom occurs in the N. T., but on insufficient grounds. Abbott\(^7\) rather needlessly appeals to the “Hebrew influence on Johannine tense-construction” to explain ἐβλήθη καὶ ἔξηράνθη. (Jo. 15:6) after ἐὰν μὴ τις μὲν ἦν ἐµοί. It is a general construction here and is followed by three presents (aoristic). This is a mixed condition certainly, the protasis being future \textbf{[Page 837]} (third class, undetermined with some likelihood of determination). But ἐδοξάσθη (Jo. 15:8) is possibly also gnomic. Cf. πάντες ἡμαρτον καὶ ὡστεροῦνται (Ro. 3:23). But in Jo. 15:6, 8, we may have merely the “timeless” aorist, like ὅταν ἔθεσες, ἔξηλθες, in Epictetus, IV, 10, 27. Radermacher (\textit{N. T. Gr.}, p. 124) so thinks and adds, what I do not admit: “The genuine gnomic aorist appears to be foreign to the Hellenistic vernacular.” It survives in modern Greek, according to Jannaris, \textit{Hist. Gk. Gr.}, p. 436. Moulton (\textit{Prol.}, pp. 135, 139) admits it in N. T., but (p. 134) considers Jo. 15:6 the “timeless” aorist, like ἀπολόγητη ἐλ ὑ ὕστερον in Eur., \textit{Alc.}, 386. There are other examples, like ἔκρυψεν (Mt. 13:44) which is followed by presents ὑπάγει, πολλῆ, ἡγόρασεν (13:46), συνέλεξαν—ἔβαλον (13:48), ὠμοιώθη (18:23), ἐκάθισαν (23:2), εὐδόκησα (Lu. 3:22), ἔδκαθισα (7:35), ἔδειξα (Jo. 8:28), ἀνέτελεν and the other aorists in Jas. 1:11, ἐκάθισε—ἔδοξα (Ro. 8:30), ἔξηράνθη—ἔξεπα (1 Pet. 1:24; LXX, Is. 40:7). It is true that the timeless Hebrew perfect is much like this gnomic aorist, but it is a common enough Greek idiom also. Cf. further Lu. 1:51–53. It is not certain that εὐδόκησα (Mt. 3:17; 17:5; Mk. 1:11; Lu. 3:22) belongs here. It may be merely an example of the timeless aorist used in the present, but not gnomic. See under (ε). Burton (\textit{N. T. Moods and Tenses}, p. 29) finds it difficult and thinks it originally “inceptive” (ingressive).

(γ) Relation to the Imperfect. The aorist is not used “instead of” the imperfect.\(^1\) But the aorist is often used in the midst of imperfects. The Old Bulgarian does not distinguish between the aorist and the imperfect. In modern Greek, aorists and imperfects have the same endings (Thumb, \textit{Handb.}, p. 119), but the two tenses are distinct in meaning. Radermacher (\textit{N. T. Gr.}, p. 122) thinks that in the κοινή he finds the imperfect used as aorist, as in ἐκ τῶν ἱδίων ἐπιτεί (ἐποίει) τῶν βοιμών (Inscr. de la

1 Monro, Hom. Gr., p. 46; Leo Meyer, Griech. Aoriste, p. 97; Gildersl., \textit{Am. Jour. of Philol.}, 1908, p. 243; Moulton, \textit{Prol.}, p. 128. Ἡν may be either aorist or imperfect.
Syrie 2413 André, and διεσάφεις for διεσάφησας (P. Lond., XLII, Kenyon 30). But I venture to be sceptical. In both passages the imperfects make perfectly good sense. Radermacher urges the common use of ἐτελεύτα, but that may be merely descriptive imperfect. I grant that it is “willkürlich” in Herodotus (in 1214) to say διεφθάρη καί τελευτᾶ, as in Strabo (C 828) to have ἐτελεύτα—διαιδέεται. It is “rein stilistisch,” but each writer exercises his own whim. Winer properly remarks that it “often [Page 838] depends on the writer” which tense he will use. Why not “always”? The presence of aorist, imperfect and past perfect side by side show how keen the distinction was felt to be.1 Blass seeks to distinguish sharply between ἔλεγον and ἔλθον, but with little success. The trouble, as already stated, is probably that ἔλεγον may be either aorist (like ἔλθον) or imperfect. He admits that Thucydides introduces his speeches either with ἔλεγε or ἔλεξε. Gildersleeve,3 like Stahl, denies “an actual interchange of tenses.” In any given incident the speaker or writer may have the choice of representing it in narrative by the aorist (punctiliar) or the imperfect (durative). An interesting example is found in Mk. 12:41–44.4 The general scene is presented by the descriptive durative imperfect ἐθεώρει and the durative present βάλει. It is visualized by πολλοί—ἔβαλλον. But the figure of the widow woman is singled out by the aorist ἔβαλεν. The closing reference by Jesus to the rest is by the constative aorist πάντες ἔβαλον. Note also the precise distinction between ἔβαλεν and ἔβαλεν at the end. Where the aorist and the imperfect occur side by side, it is to be assumed that the change is made on purpose and the difference in idea to be sought. In juxtaposition the aorist lifts the curtain and the imperfect continues the play. Cf. ἐνυστάξαν (ingressive, ‘fell to nodding’) and ἔκαθεν δοξης γλώσσας αὐτῶν καὶ ἐκάθεσαν (Mt. 25:5). So Τίς ηγατό; καὶ περιεβλέπετο (Mk. 5:32), ‘He began to look around because of the touch.’ See also ἔλθη δ’ ὠδυμός τῆς γλώσσης αὐτοῦ, καὶ ἔλαλε ὄρθος (7:35). A similar distinction appears in ἄγγελοι προςῆλθον καὶ διηκόνουν αὐτῷ (Mt. 4:11); ἔπεσεν καὶ ἐδίδος (13:8); κατέβη λαλὰς—καὶ συνεπληροῦντο (Lu. 8:23); ἤρε τὸν κράβαττον αὐτοῦ καὶ περιεπάτει (Jo. 5:9); ἄνέβη—καὶ ἔδιδασκεν (7:14); ἔξηλθον καὶ ἔκραυγαζον (12:13). In Lu. 8:53 note κατεγέλων and ἔπεθανεν. Once again note εἴδαμεν—καὶ ἐκολόμομεν in 9:49 and κατενόουν καὶ έδο (Ac. 11:6). Cf. further Ac. 14:10; 1 Cor. 3:6; Mt. 21:8; Mk. 11:18; Jo. 20:3 f. In 1 Cor. 10:4 note ἔπιον—ἐπιν; in 11:23, παρέδωκα, παρεδίδετο. The same sort of event will be recorded now with the aorist, as πολὺ πλήθος

ἤκολούθησεν (Mk. 3:7), now with the imperfect, as ἤκολούθει ὄχλος πολύς (5:24).
Cf. Lu. 2:18 and 4:22. But the changing mood of the writer does not mean that the tenses are equivalent to each other. A word further is necessary concerning the relative frequency of aorists and imperfects. Statistical syntax is interesting, [Page 839] laborious and not always conclusive. Schlachter¹ has applied statistics to Homer. In both Iliad and Odyssey the aorists in the indicative are more numerous than the imperfects. Gildersleeve² found a similar result in Pindar. Jacobsthal (Der Gebrauch der Tempora und Modi in den kretischen Dialektinschriften) finds the aorist surpassing the imperfect. But Hultsch³ found the imperfect very abundant in Polybius, and Prof. Miller⁴ has added statistics for other writers. “The imperfect divides the crown with the aorist in different proportions at different times and in different spheres.”⁵ A further extended quotation from Gildersleeve⁶ is pertinent: “Not the least interesting is the table in which Schlachter has combined his results with Professor Miller’s and from which it appears that the use of the aorist indicative gradually diminishes until it finds its low-water-mark in Xenophon. Then the aorist thrusts itself more and more to the front until it culminates in the N. T. The pseudo-naïveté of Xenophon suggests an answer to one problem. The Hellenica has the lowest percentage of imperfects, but it mounts up in the novelistic Kyropaideia. The other problem, the very low percentage of the imperfect in the N. T.—e.g. Matthew 13 per cent., Apocalypse 7—Schlachter approaches gingerly, and well he may. It stands in marked contrast to Josephus whose 46 per cent. of imperfects shows the artificiality of his style, somewhat as does his use of the participles (A. J. P., IX 154), which, according to Schlachter, he uses more than thrice as often as St. John’s Gospel (41:12). This predominance of the aorist indicative can hardly be dissociated from the predominance of the aorist imperative in the N. T. (Justin Martyr, Apol. I, 16. 6), although the predominance of the aorist imperative has a psychological basis which cannot be made out so readily for the aorist indicative. Besides, we have to take into consideration the growth of the perfect and the familiar use of the historical present, which is kept down in St. Luke alone (A. J. P., XX 109, XXVII 328).” The personal equation, style, character of the book, vernacular or literary form, all come into play. It largely depends on what [Page 840] the writer is after. If he is aiming to describe a scene with vividness, the imperfect predominates. Otherwise he uses the aorist, on the whole the narrative tense par excellence.¹ “Hence the aorist is the truly narrative

³ Jacobsthal JACOBSTHAL, H. K., Der Gebrauch der Tempora und Modi in den kretischen Dialektinschriften (1906).
⁶ Ib., p. 244.
¹ Stahl, Krit.-hist. Synt., p. 158.
tense, the imperfect the truly descriptive one; and both may be used of the same transaction."

(d) Relation to the Past Perfect. It is rather shocking, after Winer’s protest that the tenses are not interchanged, to find him saying bluntly: “In narration the aorist is used for the pluperfect.”3 Burton4 helps the matter by inserting the word “English” before “pluperfect.” Winer meant “German pluperfect.” Gildersleeve5 does much better by using “translated.” “We often translate the aorist by a pluperfect for the sake of clearness.” Goodwin6 adds more exactly that the aorist indicative merely refers the action to the past “without the more exact specification” which the past perfect would give. That is the case. The speaker or writer did not always care to make this more precise specification. He was content with the mere narrative of the events without the precision that we moderns like. We are therefore in constant peril of reading back into the Greek aorist our English or German translation. All that one is entitled to say is that the aorist sometimes occurs where the context “implies completion before the main action,”7 where in English we prefer the past perfect. This use of the aorist is particularly common in subordinate clauses (relative and temporal and indirect discourse).8 It must be emphasized that in this construction the antecedence of the action is not stressed in the Greek. “The Greeks neglected to mark the priority of one event to another, leaving that to be gathered from the context.”9 Strictly therefore the aorist is not used for the past perfect. The Greeks cared not for relative time. In Mt. 14:3 it is plain that ἔδησεν and ἀπέθετο are antecedent in time to ἥκουσεν, verse 1, and ἔπεν in verse 2, but the story of the previous imprisonment and death of John is introduced by γάρ in a reminiscential manner. In Mt. 2:9 δὲν ἔδον points back to verse 2. Cf. also ὅτι ἐρήμωσεν (Mt. 22:34); ὅτε ἐνέπαιξαν αὐτῷ, ἐξέδωσαν αὐτόν (27:31). So in 28:2 [Page 841] ἐγένετο is antecedent to ἥλθεν in verse 1. In 27:18 note in particular ἤδει ὅτι παρέδωκαν and compare with ἐγίνωσκεν ὅτι παραδεδώκεισαν in Mk. 15:10 (cf. ὅτι πεποίηκασαν in verse 7). Here Mark did draw the distinction which Matthew did not care to make. In Lu. 19:15 we have ὅτι διεπράτµατεύσατο. Other examples where the antecedence is not expressed, though true, and the aorist is used, are ἐπελάθοντο (Mt. 8:14), ἐπειδὴ ἐπεξερήσαν (Lu. 1:1), ὃς ἐτέλεσαν (2:39), ἐπειδὴ ἐπλήρωσεν (7:1), ἐνεχύσατο (8:27), ἤ ἤτοίμασαν (Lu. 24:1), ὃς ἐγένσατο (Jo. 2:9), ὅτι ἰκουσαν (4:1), ὅν ἐπέν (4:50), ἐξέπαιξαν (5:13), ὃς ἐγένετο (6:16), ὅτι ἄνεψαν (9:18), ὅτι ἐξέβαλον (9:35), ὅπου ὑπήνησαν (11:30 and note ἐπλήθει), ὅτε ἔνεψεν (13:12), ὃς ἀπέβησαν (21:9), οὐκ ἔξελέξατο (Ac. 1:2), οὐκ ἐξεργάζετο (Ro. 8:29. Cf. 30 also). In Jo. 18:24, ἀπεστείλειν οὖν, the presence of οὖν makes the matter less certain. If οὖν is transitional, there would be no antecedence. But if οὖν is inferential, that may be true, though Abbott considers it “impossible.”1 Clyde calls the aorist “an aggressive tense, particularly in

2 Clyde, Gk. Synt., p. 77.
3 W.-M., p. 343.
4 N. T. Moods and Tenses, p. 22.
7 Monro, Hom. Gr., p. 47.
the active voice, where it encroached on the domain of the perfect, and all but supplanted the pluperfect.” That is true, and yet it must not be forgotten that the aorist was one of the original tenses, much older than the perfects or the future. In wishes about the past (unattainable wishes) the N. T. uses ὤφελον (shortened form of ὤφελον) with the aorist indicative (1 Cor. 4:8) ὤφελον γε ἔβασιλεύσατε. A similar remark applies to use of the aorist indicative in conditions of the second class (past time), without ἤν in apodosis (Gal. 4:15) or with ἤν (Jo. 11:21). In both cases in English we translate this aorist by a past perfect.

(c) Relation to the Present. The so-called Dramatic Aorist is possibly the oldest use of the tense. In Sanskrit this is the common use of the tense to express what has just taken place.3 One wonders if the gnomic or timeless aorist indicative is not still older. The absence of a specific tense for punctiliar action in the present made this idiom more natural.4 This primitive use of the aorist survives also in the Slavonic.5 Giles suggests that “the Latin perfect meaning, like the Sanskrit, may have developed directly from this usage.” The idiom appears in Homer6 and is [Page 842] found chiefly in the dramatic poets where a sudden change comes,1 or in colloquial speech or passionate questions.2 It is a regular idiom in modern Greek (Thumb, Handb., p. 123) as πείνασα, ‘I grew hungry,’ ἡ αἰσθήσεως. This aorist is used of actions which have just happened. The effect reaches into the present. Moulton (Prol., p. 247) quotes a traveller in Cos who “had a pleasant shock, on calling for a cup of coffee, to have the waiter cry Ἐφθασα.” The Greek can still use a past tense in passionate questions affecting the present.3 Moulton4 speaks of “cases where an aorist indicative denotes present time,” though he adds: “None of these examples are really in present time, for they only seem to be so through a difference in idiom between Greek and English.” This latter statement is the truth. The aorist in Greek, particularly in dialogue, may be used for what has just happened. It seems awkward in English to refer to this past time, but it is perfectly natural in Greek. So we translate it by the present indicative. From the Greek point of view the peculiarity lies in the English, not in the Greek. The examples in the N. T. are numerous enough in spite of Winer5 to be worth noting. Moulton6 has made a special study of Matthew concerning the translation of the aorist. “Under the head of ‘things just happened’ come 9:18 ἔτελεύτησεν (with ἄρτοι), 5:28 ἐμοίζευσαν, and 14:15 παρῆλθεν and 17:12 ἦλθε (with ἥδη); 6:12 ἰὰρκαμέν, 12:28 ἔθασαν, 14:2, etc., ἤγερθη, 16:17 ἀπεκάλυψε, 18:15 ἐκέρδησας, 20:12 ἐποίησαν –ας, 26:10 ἠγάπασα, 26:13 ἔποιησε, 26:65 ἐβλασθήσατο, ἕκοισαν, 26:25, 64 ἑπάς, 27:19 ἔποιησαν, 27:46 ἐγκατέλιπος, 28:7 ἔπνον, 28:18 ἐδόθη (unless 11:27 forbids) and perhaps ἐγενήθη.” Certainly this is a

6 Prol., p. 140.
A respectable list for Matthew. Add ἔμερίσθη (Mt. 12:26). These all can be translated by the English ‘have.’ ἔμερίσθη (Mt. 3:17 and parallels) is a possible example also. Cf. ὁν εὐδόκησεν Ἡ ψυχὴ μου (12:18, LXX). It is a “timeless” aorist and may be gnomic, as already pointed out. Cf. 2 Pet. 1:17; Mk. 10:20, ἐφολαξάμην ἢ ἠ τῆς νεότητος; ἔξεστι in Mk. 3:21; ἀπέρε-, ἰδί−—παραδίδοτα (14:41). Other examples of the aorist for what has just happened are Ἡγέρθη, οὔκ ἔστιν ἦδο (Mt. 16:6); Ἡγέρθη— ἔπεσκέστη (Lu. 7:16); ἡγόρασα, Ἔγνα (14:18–20); ἐξησοῦν, εὐρέθη (15:32); ἔγνων (16:4); ἐκρύβη (19:42); ὅταν Ἡγέρθη (24:34); προσεκύνησαν (Jo 4:20); Ἡκούσας (11:41); ἀπήλθεν (12:19); ἦλθον εἰς τὴν ὠραν ταύτην (12:27); ἦλθεν (13:1); νῦν ἐδοξάσθη (13:31), but ἐδόξασα (17:4) points backward, ‘I did glorify thee,’ while ἐδοξάσθη in 15:8 is possibly gnomic; ἐπιάσατε νῦν (21:10); ἐδούλωσα, ἐγνώμην (1 Cor. 9:19, 20, 22. Cf. ποιῶ in verse 23); ἐπεσεν, ἐπεσεν (Rev. 14:8; 18:2).1 With this use of the aorist adverbs of time are common to make clear the present relation of time. Cf. τοῦτο ἦδη τρίτον ἐφανερώθη (Jo. 21:14) where τοῦτο has the effect of bringing the action forward. For a sharp contrast between the aorist and present see ἔσχες, καὶ νῦν ὁν ἔχεις (Jo. 4:18). So ἐθύσας καὶ ἐζήσας, B.G.U. 287 (A.D. 250). Cf. also Lu. 10:24. See in particular ἔγνα, ἔγνυν and ἔγνωσαν in Jo. 17:25. The timeless aorist is well illustrated in the participle in Lu. 10:18, ἐθεώρουν τὸν Ἑσαύνταν πεσόντα.

(ς) Relation to Present Perfect. The problem just here is not whether the present perfect is ever used as an aorist. That will be discussed under the present perfect. If the distinction between the two tenses was finally obliterated, as early happened in Latin,3 there would be some necessary confusion. But that has not happened in the N. T. period. Jannaris4 notes it regularly about 1000 A.D. It is undeniable that the early Sanskrit used the aorist chiefly for “something past which is viewed with reference to the present” and it disappeared before the growth of the other more exact tenses.5 The perfect may be said to be a development from the aorist, a more exact expression of completed action than mere “punctiliar” (aorist), viz. state of completion. But in the Greek the aorist not only held its own with the other tenses, but “has extended its province at the expense of the perfect,” particularly in the N. T. period, though different writers vary greatly here.6 But was the aorist used “for” the perfect? Clyde7 says: “The aorist was largely used for the perfect.” Winer8 replies: “There is no passage in which it can be certainly proved that the aorist stands for the perfect.” Gildersleeve9 more correctly says: “The aorist is very often used where we should expect the perfect,” i.e. in English. But the translation [Page 844] of the aorist into English will call for special discussion a little later. What is true is that the action in

9 Synt., p. 107.
such cases “is regarded as subordinate to present time,”1 in other words, the precise specification of relative time which we draw in our English perfect is not drawn in the Greek. The Greek states the simple undefined punctiliar action in a connection that suggests present time and so we render it in English by our “have.”2 But Farrar3 is right in insisting that we do not explain the Greek tense by the English rendering. In truth, the examples given under the head of “Relation to the Present” (e) may often be rendered by the English “have” with tolerable accuracy.4 Sometimes the use of an adverb or particle helps the English. The examples are rather numerous in the N. T., as in the papyri,5 where the aorist and the present perfect occur side by side. Thus χορῆν ἰδαν ἀπεγραψάμην καὶ πέπρακα, O.P. 482 (ii/A.D.); τῆς γενομένης καὶ ἀποπεξεμεμένης γυναίκός, N.P. 19 (ii/A.D.). Moulton adds: “The distinction is very clearly seen in papyri for some centuries.” In most instances in the N. T. the distinction is very sharply drawn in the context, as in ὅτι ἐπέφτασα, καὶ ὅτι ἐγήγερται (1 Cor. 15:4). So ἐκτίθη, ἐκτίσταται (Col. 1:16). Cf. Ac. 21:28. In most instances where we have trouble from the English standpoint it is the perfect, not the aorist that occasions it, as in πέπρακεν καὶ ἠγόρασεν (Mt. 13:46). We shall come back to this point under the present perfect. As a rule all that is needed is a little imagination on the part of the English reader to sympathize with the mental alertness expressed in the changing tenses, a sort of “moving picture” arrangement. Cf. κατενόησεν γὰρ έκατόν καὶ ἀπελήλυθεν καὶ εὐθέως ἔπελαθετο ὁποῖος ἤν (Jas. 1:24). The single point to note concerning the aorist in those examples where we use “have” is that the Greeks did not care to use the perfect. Cf. οὕκ ἐλήλυθα καλέσαι δικαίους (Lu. 5:32) with οὐ γὰρ ἦλθον καλέσαι δικαίους (Mt. 9:13), just two ways of regarding the same act. That is the whole story and it is a different thing from saying that the aorist is used “for” the present perfect. Here are some of the most interesting examples in the N. T. where “we” in English prefer “have”: ἰκούσατε (Mt. 5:21); εὐρον (8:10); ἀνέγνωτε (12:3); ἐπαχώνθη καὶ ἰκουσαν καὶ ἐκάμμυσαν (13:15, LXX, Is. 6:10. [Page 845] Likely the timelessness of the Hebrew perfect may have caused this translation into the aorist so common in the LXX), ἱκουρόσατε (Mt. 15:6); συνέξειωσεν (19:6); ἀνέγνωτε ὅτι κατηρτίσω (21:16); ἀφίκατε (23:23); κατέστησεν (24:45); ἔποιήσεν (27:23)1; ἤγερθη (28:6); ἔξεστι (Mt. 3:21); ἐπέθανεν (5:35); cf. τι ĕτι σκύλλες; 5:35. Cf. ἀλλά καθεύδει (εἶδον (Lu. 5:26); παρεδόθη (10:22); ἦμαρτον (15:21); ἔγνωσαν (Jo. 7:26); ἀφήκησαν (8:29); ἔλαβον (10:18); ἔδειξα (10:32); ἔδοξα (12:28. Cf. δοξάσω); ἔνσω (13:14); ἔξελεξαίμην (13:18); ἥγαν (13:34); ἔγνωρε (15:15); οὐκ ἔγνωσαν (16:3); ἤραν—ζηκαν (20:2); ἐπίστετα (21:10).2 Cf. Mk. 14:8. Abbott remarks, that the Greek perfect does not lay the same stress on what is recently completed as does the English “have.” Cf. also οὕκ ἔγνω (1 Jo. 4:8. Cf. 1 Cor. 8:3); ἐφανερώθη (1 Jo. 4:9. Contrast ἐπέστειλεν in verse 9 and ἐγενόμηκεν, ἐγενόμηκεν in margin, in verse 10 with ἐγένησαν and ἐπέστειλεν in verse 10); ἔλαβον (Ph. 3:12); ἔμαθον (4:11); ἔκαθεσαν (Heb. 1:3); ἔξεστημεν (2 Cor. 5:13). The same event in Mk.

3 Gk. Synt., p. 125.
4 Moulton, ProL., p. 140.
5 lb., p. 142 f.
1 Most of these exx. from Mt. come from Moulton, ProL., p. 140.
15:44 is first mentioned by ἤδη τέθνηκεν and is then referred to by ήδη (or πάλαι) ἀπέθανεν. The distinction is not here very great, but each tense is pertinent. However, τέθνηκεν means practically ‘to be dead,’ while ἀπέθανεν = ‘died,’ ‘has died.’ Cf. Gildersleeve, Syntax, p. 108.

(η) Epistolary Aorist. This idiom is merely a matter of standpoint. The writer looks at his letter as the recipient will. It is probably due to delicate courtesy and is common in Latin as well as in the older Greek, though less so in the later Greek. The most frequent word so used was ἐγράψα, though ἐπέμψα was also common. The aorist has its normal meaning. One has merely to change his point of view and look back at the writer. In 1 Jo. 2:12–14 we have the rhetorical repetition of γράφω, ἐγράψα (note the perfects after ὅτι). But in 1 Jo. 2:21 ἐγράψα may be the epistolary use, though Winer protests against it. Here as in 2:26, ταῦτα ἐγράψα, the reference may be not to the whole epistle, but to the portion in hand, though even so the standpoint is that of the reader. Cf. also 5:13. In 1 Cor. 9:15 also the reference is to the verses in hand. In Eph. 3:3, καθὼς προέγραψα ἐν ὀλίγῳ, the allusion may be to what Paul has just written or to the whole epistle, as is true of ἐπέστειλα (Heb. 13:22). Certainly γράψα is the usual construction in the N. T. (1 Cor. 4:14; 14:37; 2 Cor. 13:10, etc.). Ἐγράψα usually refers to an epistle just finished (Phil. 19; 1 Pet. 5:12; 1 Jo. 5:13), but even so the standpoint veers naturally to that of the reader. This is particularly so in Gal. 6:11 which probably refers to the concluding verses 11–18 and, if so, a true epistolary aorist. In Ro. 15:15 the reference may be to another portion of the same epistle or to the epistle as a whole. In 1 Cor. 5:9, 11, ἐγράψα refers to a previous letter, as seems to be true also in 2 Cor. 2:3, 4, 9; 7:12; 3 Jo. 9. But ἐπέμψα is found in undoubted instances as in Ac. 23:30; Eph. 6:22; Ph. 2:28; Col. 4:8. So ὁ ἄνεπμψα in Phil. 12 and ἡ βουλήθην in Text. Rec. 2 Jo. 12. Curiously enough Gildersleeve says: “The aorist in the N. T. [Ep. aor.] is clearly due to Roman influence, and is not to be cited.” The epistolary aorist is more common in Latin (cf. Cicero’s Letters), probably because of our having more epistolary material. The idiom occurs often enough in the papyri. Cf. ἐπέμψα, B.G.U. 423 (ii/A.D.), ἐγράψα ὑπέρ αὐτοῦ μὴ λόγος γράμματα, P.Oxy. 275 (A.D. 66). There is therefore no adequate reason for denying its presence in the N. T. examples above.

(θ) Relation to the Future. The future was probably (cf. Brugmann, Griech. Gr., p. 480) a late development in the language, and other devices were at first used, like the present indicative, the perfect indicative, the aorist subjunctive. The aorist indicative was also one of the expedients that never quite disappeared. It is not exactly, like the epistolary aorist, a change of standpoint. It is a vivid transference of the action to the future (like the present ἔχομαι, Jo. 14:3) by the timeless aorist. The augmented form is still used, but the time is hardly felt to be past. This idiom survives in the Slavonic also. It is a vivid idiom and is still found in modern Greek. Thumb (Handb., p. 123) cites καὶ δὲ μὲ σοβιβάστε, ἔνας γραμμός ἔξάθη, ‘even if you impale me only one

2 Synt., p. 128.
Greek perishes.' Radermacher (N. T. Gr., p. 124) cites from Epictetus, ὅταν θέλῃς, ἑξῆλθες. Gildersleeve calls it "a vision of the future." Burton considers it "rather a rhetorical figure than a grammatical idiom," but the idiom is not so strange after all. Cf. Eur., Alc., 386, ἀπολύσαι με λείψες-‘I perish if you leave me.’ The examples are not numerous in the N. T. and some of them may be gnomic. Cf. ἐάν σου ἀκούῃ, ἡμαρτές (1 Cor. 7:28); ἐὰν καὶ ἀκούς, ἐκέρδησας τὸν ἀδελφόν σου (Mt. 18:15. Cf. παράλαβε as the next apodosis in verse 16 and ἐστώ in verse 17); ἐὰν καὶ γαμήσῃς, οὐκ ἡμαρτες (1 Cor. 7:28); ὅταν μέλλῃ σαλπίζειν, καὶ ἐτελέσθη (Rev. 10:7), probably also ἐὰν μὴ τις μενῇ ἐν ἐμοί, ἐβλήθη—καὶ ἐξηράνθη (Jo. 15:6), though this may be merely gnomic, as already stated. Cf. the use of ἔμερίσθη and ἐφθάσεν in Mt. 12:26, 28 in a condition of the present time. In Jo. 13:31 ἐδοξάσθη (twice) is explained (verse 32) by δοξάσει καὶ εὔθυς δοξάσει. Cf. p. 1020 (standpoint).

(i) Aorist in Wishes. The special use of the aorist indicative in wishes about the past and conditions determined as unfulfilled will be discussed in chapter XIX, Modes.

(k) Variations in the Use of Tenses. Where so much variety is possible, great freedom is to be expected. In modern English we make a point of uniformity of tense in narrative. The Greeks almost made a point of the opposite. It is jejune, to say no more, to plane down into a dead level the Greek spontaneous variety. Cf. ἡμαρτον καὶ ὑστερουνται (Ro. 3:23). In Matt. 4:11, for instance, we have ἄφιησιν (historical pres.), προσήθηκαν (aor.), δημήκοντο (imperfect). In Mt. 13:45 f. note ἐστίν, ζητοῦντες, ἐυρόντες, ἀπελθοῦν, πέπρακεν, εἶχεν, ἡγόρασεν. “When they wished to narrate a fact, or to convey a meaning, there is good ground for holding that they employed the tense appropriate for the purpose, and that they employed it just because of such appropriateness.” That is well said. The explanation is chiefly psychological, not mere analogy, which is true of only a few tenses, especially in late Greek (Middleton, Analogy in Syntax, 1892, p. 6). Jannaris, Hist. Gk. Gr., p. 437, lays probably too much stress on "the terminal homophony of the two tenses" (aor. and perf.).

(l) Translation of the Aorist into English. The Greek aorist ind., as can be readily seen, is not the exact equivalent of any tense in any other language. It has nuances all its own, many of them difficult or well-nigh impossible to reproduce in English. Here, as everywhere, one needs to keep a sharp line between the Greek idiom and its translation into English. We merely do the best that we can in English to translate in one way or another the total result of word (Aktionsart), context and tense. Certainly one cannot say that the English translations have been successful with the Greek idiom.

aorist. Weymouth in his *New Testament in Modern Speech* has attempted to carry out a consistent principle with some success. Moulton has thought the matter important enough for an extended discussion. He makes clear that the Greek aorist is true to itself, however it is rendered into English. Take τινὲς ἔκομψήθησαν (1 Cor. 15:6), for instance, ‘fell asleep (at various times).’ Moulton explains, “and so have fallen asleep.” In Mt. 3:7 ὑστείξεθη may be translated by ‘has warned,’ but ‘warned’ will answer. The English past will translate the Greek aorist in many cases where we prefer “have.” Burton puts it clearly thus: “The Greek employs the aorist, leaving the context to suggest the order; the English usually suggests the order by the use of the pluperfect.” The Greek aorist takes no note of any interval between itself and the moment of speaking, while the English past takes note of the interval. The Greek aorist and the English past do not exactly correspond, nor do the Greek perfect and the English perfect. The Greek aorist covers much more ground than the English past.

(c) The Aorist Subjunctive and Optative. The aorist of these two “side-moods” may very well be discussed together. The two moods are not radically different as we shall see.

(a) No Time Element in the Subjunctive and Optative. There is only relative time (future), and that is not due to the tense at all. The subjunctive is future in relation to the speaker, as is often true of the optative, though the optative standpoint is then more remote, a sort of future from the standpoint of the past.

(b) Frequency of Aorist Subjunctive. As between the aorist and present in subjunctive and optative, the aorist is far more common. For practical purposes the perfect may be almost left out of view; it is so rare. As a rule in these moods the action is either punctiliar (aorist) or durative (present). The contrast between point and linear action comes out simply and clearly here. It is just that seen between the aorist and the imperfect indicative. In the classical Sanskrit the subjunctive exists only in a remnant of the first person, which is treated as an imperfect.
imperative, but it is common enough in the early language. In Homer (both *Iliad* and *Odyssey*) the aorist is in great preponderance over the present (65 to 35 for the average between subjunctive and optative, about the same for each). Gildersleeve considers the difference due to the nature of the constructions, not to mere lack of differentiation in the early stage of the language. The subj. is more common in Homer than in the later Greek and the aorist subj. is correspondingly abundant. There is no doubt that the aorist is gaining in the κοινή over the present in the subj., opt., imper. (Radermacher, *N. T. Gr.*, p. 123). The distinction is understood. Cf. μέχρις ἄν ἦλιος δύῃ (aim) and ἄχρις ἄν ἥλιος δύῃ (duration), I. G., XII, 5, 647. Radermacher cites also ὅπως λαμβάνοσιν and ὅπως λάβοσιν, ὅπως ὑπάρχῃ and ἵνα δοθῇ from a Pergamum inscr., N. 13 (B.C. 300). He fears that this proves confusion between the tenses, and appeals also to the papyrus example ἵνα γράφω καὶ φιλαρήσω (Deissmann, *Light*, p. 204). But there is no necessary confusion here. The modern Greek preserves clearly the distinction between punctiliar and linear action in the subj. and uses the aorist and present side by side to show it (Thumb, *Handb.*, p. 124). The situation in the N. T. is even more striking. Mr. H. Scott, Birkenhead, England, writes me that he finds only five present subjs. in Acts and one (13:41) is a quotation. In the Pauline Epistles (13) he notes 258 dependent aorist subjs. and 161 dependent pres. subjs. Gildersleeve complains of Stahl’s wearisomeness in proving what “no one will dispute.” The point is that the aorist subj. or opt. is used as a matter of course unless durative (linear) action is to be emphasized or (as rarely) the completed state is to be stressed (perfect). But variations occur even here. Thus Abbott notes only two instances of the pres. subj. [Page 850] with ἐὰν in Mk. (9:45; 14:31) and two in Lu. (6:33; 19:31), apart from μή and except clauses with ἔχω and θέλω. The aorist subjunctive with ἐὰν occurs in Synoptics 24 times, present 79. But in John there is more diversity between the two tenses. “Most Greek writers observe the distinction between the aorist and present subjunctive, as Englishmen observe that between ‘shall’ and ‘will,’ unconsciously and without any appearance of deliberately emphasizing the difference. But we have seen above (2511) that John employs the two forms with great deliberateness, even in the same sentence, to distinguish between the beginning of ‘knowing’ and the development of it.” Cf. ἵνα γνώτε καὶ γνώσκητε (10:38) and ἀρκετὰ οἶδας, μακάριοι ἔστε ἔδωκας αὐτά (13:17), where the pres. is again used purposely. Note also John’s τί ποιήσων (6:28) and Luke’s τί ποιήσωμεν (3:10). We need not follow all the details of Abbott, but he has made it perfectly clear that John makes the sharp distinction between the aor. and pres. subj. that is common between the aor. and imperf. ind. Cf. ἐὰν τις τηρήσῃ (Jo. 2 Whitley, *Sans. Gr.*, p. 298.
4 Am. Jour. of Philol., 1908, p. 245.
5 Ib., p. 400.
6 Joh. Gr., p. 370 f. But there is little point in these exceptions. Abbott rightly notes the variations in the major uncialss between -ιη and -ιῃ in Mk. 9:43–47. Mr. H. Scott finds ἐὰν with pres. subj. also (W. H.) in Mk. 1:40; 9:47 (4 in all). In Lu. he adds 5:12 (=Mk. 1:40); 10:6, 8, 10 (ἐὰν to be supplied); 13:3; 20:28 (8 in all). In Mt. he notes 5:23; 6:22, 23; 8:2 (=Mk. 1:40); 10:13 bis; 15:14; 17:20; 21:21; 24:49 bis; 26:35 (12 in all). But he makes 78 aor. subjs. with ἐὰν in the Synoptics.
1 Abbott, Joh. Gr., p. 381.
2 Ib., pp. 369–388.
8:51) and ἐὰν τιρῶμεν (1 Jo. 2:3); ὅτι δὲν αἰτήσητε (Jo. 14:13) and δὲν αἰτῶμεν (1 Jo. 3:22). But Paul also knows the punctiliar force of the aor. subj. Cf. ἡμαρτήσομεν (Ro. 6:15) with ἐπιμένομεν (6:1), where the point lies chiefly in the difference of tense. See also 2 Tim. 2:5, ἐὰν δὲ καὶ ἄθλητας οὐ στεφανοῦται ἔὰν μὴ νομίμως

ὑλήσῃ. Cf. ποιήση in Gal. 5:17. In deliberative questions the aorist subj. is particularly common, as in δόμων ἀθλησιν (Mk. 12:14). In εἰρήνην ἔχομεν (Ro. 5:1) the durative present occurs designedly—‘keep on enjoying peace with God,’ the peace already made (δικαιωθέντες). Moulton (Prol., p. 186) thinks that the aorist subj. in relative clauses like ὃς ἂν φονεύσῃ (Mt. 5:21), or ὃποιον ἔὰν καταλάθῃ (Mk. 9:18), or conditional sentences like ἐὰν ἀπάσχοιθε (Mt. 5:47) “gets a future-perfect sense.” But one doubts if after all this is not reading English or Latin into the Greek. Cf. Mt. 5:31. The special construction of the aorist subj. with οὖ μὴ (Jo. 6:35; 18:11) comes up for discussion elsewhere (pp. 929 f., 1174 f.).

(γ) Aktionsart. The three kinds of point-action occur, of course, in the aorist subj. Thus in ἢνα μαρτυρήσῃ (Jo. 1:7) the aorist is merely constative, as is ἔὰν μείνῃ ἐν ἔμοι (Jo. 15:7). Cf. ἔὰν μὴ τις μενὴ ἐν ἔμοι (15:6). In Jo. 6:30, ἐὰν ἱδομεν καὶ πιστεύσωμεν, the ingressive use is evident in πιστεύσωμεν—‘come to believe’ (cf. ἢνα πιστεύητε in verse 29). Cf. also ἢνα πιστεύσωμεν καὶ ἀγαπῶμεν (1 Jo. 3:23); περιπατήσωμεν (Ro. 6:4; 13:13). The [Page 851] effective aorist is seen in πῶς πληρωθ�行 (Mt. 26:54). Cf. ἢνα καταργήσῃ (1 Cor. 15:24) for the “perfective” use of the preposition also. In the modern Greek the aorist subj. preserves Aktionsart (Thumb, Handb., p. 124).

(δ) Aorist Subjunctive in Prohibitions. It seems clear1 that originally both in Sanskrit and Greek prohibition was expressed only by the subj. Hence the growth of the imperative never finally displaced it. In particular the aorist subj. held its place in prohibitions as against the aorist imper. (a late form anyhow). This distinction has held in the main right on through. In the N. T. examples of the aor. imper. in prohibitions do occur in the third person, but the aor. subj. survives. In the second person the rule is still absolute. Moulton2 has given a very interesting discussion of the development of the discovery of the distinction between the two constructions. The aorist subj. is of course punctiliar, and the present imper. linear. Inasmuch as the prohibition is future, the aorist subj. would naturally be ingressive. Gottfried Hermann long ago made the distinction, but a few years ago Dr. Henry Jackson tells how one day he got the idea from a friend (quoted by Moulton2): “Davidson told me that, when he was learning modern Greek, he had been puzzled about the distinction, until he heard a Greek friend use the present imperative to a dog which was barking. This gave him the clue. He turned to Plato’s Apology, and immediately stumbled upon the excellent instance, 20 E, μὴ θορυβήσῃτε, ‘before clamour begins,’” and 21 A, μὴ θορυβατε, ‘when it has begun.’” This distinction is clearly in harmony with the punctiliar aorist subj. and the durative present imper. It is maintained in ancient Greek

1 Monro, Hom. Gr., p. 240.
2 Prol., p. 122.

Henry HENRY, Précis de grammaire du grec et du latin. 5th ed. (1894). Elliott’s tr. of 1st ed. (1890).
2 Prol., p. 122.
and in modern Greek, and Moulton shows how the papyri abundantly illustrate it. Unfortunately the present imperative is rare in the papyri from the nature of the subject-matter, but the few examples agree to the distinction drawn. The aorist subjunctive is abundant enough. Moulton (Prol., p. 123) finds in O.P. (all ii/A.D.) six aorist subjs. with μή. Thus μη ὄμελησης refers to a request in a letter. Cf. also μή ἔλλας ποιήσης, δρα μηδὲνί—προσκρούσης. But τούτο μή λέγε, ‘stop saying this,’ is in a letter in reference to what had already been said. So μη σγωνία, ‘don’t go on worrying.’ Another good example is in Hb.P. 56 (iii/b.c.), σο οὖν μη ἐνόχλει αὐτόν. Moulton clinches it by the modern Greek μη γράφῃς (to one already writing) and μη γράψῃς (to one who has not begun). [Page 852] The distinction is not admitted by all modern scholars. But the difficulty lies mainly in the use of the present imperative, not in the aorist subj. Examples like μη θαυμάσης (Jo. 3:7) do occur, where the thing prohibited has begun. Here it is the constative aorist rather than the ingressive which is more usual in this construction. Moulton quotes Dr. Henry Jackson again: “Μη δράσῃς always, I believe, means, ‘I warn you against doing this,’ ‘I beseech you will not’; though this is sometimes used when the thing is being done; notably in certain cases which may be called colloquial or idiomatic, with an effect of impatience, μη φροντίσῃς, ‘Oh, never mind!’ μη δεῖσης, ‘Never fear!’ μη θαμώσῃς, ‘You mustn’t be surprised!’” Add also μη φοβήθης (Mt. 1:20). But, as a rule, it is the ingressive aorist subj. used in prohibitions to forbid a thing not yet done or the durative present imper. to forbid the continuance of an act. The N. T. is very rich in examples of both of these idioms because of the hortatory nature of the books. Moulton finds 134 examples of μη with the pres. imper. and 84 of μη with the aorist subj. In Matthew there are 12 examples of μη with the pres. imper. and 29 of μη with the aorist subj. But these figures are completely reversed in the Gospel of Luke (27 to 19), in James (7 to 2), in Paul’s Epistles (47 to 8) and John’s writings (19 to 1). The case in Jo. 3:7 has already been noticed. It may be said at once that the excess of examples of pres. imper. over aorist subj. is the old situation in Homer. In the Attic orators, Miller (A. J. P., xiii, 423) finds the proportion of μη ποιεῖ type to μη ποιήσῃς type 56 to 44, about the same as that in the N. T., 134 to 84. In the N. T. this predominance holds except in Matthew, 1 Peter and Rev. (Moulton, Prol., p. 124). The aorist imper. was an after-growth, and yet is very common in the N. T. (and LXX) as compared with the older Greek. In the Lord’s Prayer, for instance, every tense is aorist (Mt. 6:9–13). Gildersleeve remarks that the aorist suits “instant prayer.” But cf. Lu. 11:2–4. However, the point is here that in the N. T., as a rule, the idiom gives little difficulty. Cf. μη νομίσητε (Mt. 5:17); μη ἐλενέγκης ἡμᾶς (Mt. 6:13; Lu. 11:4); μη
στήσῃς αὐτοῖς ταύτην (Ac. 7:60). Cf. μὴ σαλπίσῃς (Mt. 6:2), ‘don’t begin to sound,’ and μὴ θησαυρίζετε (6:19), ‘they were already doing it.’ Note again μὴ δότες μηδὲ βάλλητε (Mt. 7:6) and μὴ κρίνετε (7:1). With Mt. 3:9 μὴ δύσητε λέγειν compare Lu. 3:8 μὴ ἢρξησθε λέγειν. But in Lu. 3:14, μηδένα διασείσητε μηδὲ συκοφαντήσητε, we have the constative aorist rather than the pres. imper. (the soldiers were present, if John spoke in Greek to them, more restrained at any rate). In Lu. 11:7, μὴ μοι κόπους πάρερες=‘quit troubling me,’ while in Rev. 10:4, μὴ αὐτὰ γράψῃς=‘do not begin to write.’ (Cf. ἧμελλον γράφας in same verse.) It is not necessary to labour the point. But in Mt. 6:25 we have μὴ μεριμνᾶτε, implying that they were anxious; in 6:34, μὴ οὖν μεριμνᾶτε, a general warning in conclusion. Once more, in Mt. 10:26, note μὴ οὖν φοβηθήτε αὐτοῦς, the warning against fearing evil men; in 10:31, μὴ οὖν φοβεθῶ =‘quit being afraid.’ In Jo. 5:45, μὴ δοκείτε, it is implied that ‘they had been thinking that’; in 2 Cor. 11:16, μὴ τίς με δοξῇ, ‘no one did, of course.’1 In Jo. 6:43 μὴ γογγύζετε is interpreted by ἐγόγγυζον in verse 41. Cf. μὴ κλαίετε (Lu. 8:52), ‘they were weeping.’ In μὴ δοξῇ (2 Cor. 11:16) and μὴ ἔξουθενήσῃ (1 Cor. 16:11) the normal use of μὴ with the aorist subj. occurs with the third person. A good double example occurs in Lu. 10:4, μὴ βαστάξετε βαλλάντιον (‘don’t keep carrying’), and in μηδένα δισπάσητε (‘don’t stop to salute’). In Col. 2:21 μὴ ἔψις is a warning to the Colossian Christians not to be led astray by the gnostic asceticism. In 2 Cor. 6:17, ὠκυθάρτον μὴ ἐπιτεθεῖ, the prophet (Is. 52:11) assumes that the people were guilty, if ἄροι be followed as by Paul, but B has ὠψηθε. In Jo. 20:17, μὴ μου ἐπιτεθεῖ, Jesus indicates that Mary must cease clinging to him. Cf. μὴ ἔμοισθε (Mt. 5:36) and μὴ ὑμνύετε (Jas. 5:12). As to the present imperative further discussion belongs elsewhere, but a word is necessary here. Moulton2 thinks that “rather strong external pressure is needed to force the rule upon Paul.” John has only one case of μὴ with the aorist subj., and yet Moulton holds that all his uses of the present imper. fit the canon completely. Gildersleeve (Syntax, p. 164) says: “μὴ with the present imperative has to do with a course of action and means sometimes ‘keep from’ (resist), sometimes ‘cease to’ (desist).” So ‘continue not doing,’ or ‘do not continue doing.’ One of the imper. presents is merely exclamatory [Page 854] (cf. ὄργε, Jas. 5:1). Another, like ὅρα with μὴ δέναι εἰδῆς (Mt. 8:4), is almost like a “sort of particle adding emphasis.”1 If “a negative course of action” (Gildersleeve) is enjoined, it is not necessarily implied that one is doing the thing. Moulton’s difficulty about Paul is thus obviated. Hence the answer2 to μὴ ποιεῖ, which usually=‘Stop doing,’ may be in a given case=‘Do not from time to time,’ ‘Do not as you are in danger of doing,’ ‘Do not attempt to do’ or simply ‘Continue not doing.’ In Eph. 5:18 μὴ μεθυσκατέρεσθαι may mean that some of them were getting drunk (cf. even at the Lord’s Table, 1 Cor. 11:21), or a course of action (the habit) may be prohibited. In μὴ ἀρματάνετε (Eph. 4:26) the imminent peril of sin may be implied (cf. ὄργεσθε). So in μὴ γεώδεσθε (Col. 3:9) we may have the course of action, though the usual linear notion is pertinent. But cf. μὴ ὁμέλει (1 Tim. 4:14), μηδενὶ ἐπιτίθει and μηδὲ κοινῶνει (5:22),3 and μὴ γίνεσθε ὡς οἱ ὑποκρίται (Mt. 6:16), as illustrations of the point in dispute. In the modern Greek “as a prohibitive the

2 Ib., p. 125 f.
3 Ib.
aorist subj. is on the whole less commonly used than the pres. subj.” (Thumb, Handb., p. 127). Mή with the present imper. survives in a few instances, but the subj. in modern Greek does practically all the work of prohibiting.

(c) Aorist Subjunctive with οὗ μή. It is merely the tense that calls for comment here, not the mode nor the negative. The present subj. was sometimes used with οὗ μή in the ancient Greek, but no examples occur in the N. T. The aorist is very natural as the action is distinctly punctiliar. Of the 100 examples of οὗ μή in the W. H. text, 86 are with the aorist subj., 14 are future inds.4 Cf. οὗ μή εἰσέλθητε (Mt. 5:20); οὔκέτι οὗ μή πιώ (Mk. 14:25). The other aspects of the subject will be discussed elsewhere (chapters on Modes and Particles).

(ζ) Aorist Optative. It is more frequent than the present in the N. T. This is partly due to the relative frequency of μὴ γένοιτο (cf. Gal. 6:14) and the rarity of the optative itself. The distinction of tense is preserved. Cf. μηδέξ φάγοι (ingressive, Mk. 11:14); πληθυνθεὶς (effective, 1 Pet. 1:2); κατευθύνοντα—πλεονάσω καὶ περισσεύσω (constative, 1 Th. 3:11 f.). Cf. δώῃ (2 Tim. 1:16, 18). Cf. 2 Tim. 4:16. These are wishes. The aorist occurs also with the potential opt. as in τί ἄν ποίησαν (Lu. 6:11). Cf. Ac. 26:29. In the N. T. certainly the optative usually refers to the future (relatively), though Gildersleeve5 is willing to admit [Page 855] that Homer uses the potential opt. with ἄν a few times of the past. The opt. in indirect questions has to be noted.

(d) The Aorist Imperative. In Homer the aorist imperative, as already stated, is not so common as the present, while in the N. T. it is remarkably frequent.1 This frequency of the imper. is characteristic of the κοινή generally,2 though in the end the subj. came to be used in positive commands like the Latin.3 There is no complication in the positive command, like the ban put upon μὴ ποίησον from the beginning of our knowledge of the Greek language.4 Hence in the positive imperative we are free to consider the significance of the aorist (and present) tense in the essential meaning. Here the distinction between the punctiliar (aorist) and the durative (present) is quite marked.5 Indeed Moulton (Prol., p. 129) holds that to get at “the essential character of aorist action, therefore, we must start with the other moods” than ind. It is easier, for the time element is absent. Cf. περιβάλλον τὸ ἱμάτιον σου καὶ ἄρκολοβθεί μοι (Ac. 12:8). It is exactly the distinction between the aorist and imperf. ind. (cf. ἔξελθων ἥκολοθεί in verse 9). The constative aorist, περιβάλλον, is like the preceding, ζέων καὶ ὑπόδησαι τὰ σανδάλιά σου. In Jo. 5:8 note ἄρον τὸν κράβαττόν σου καὶ περιπάτει (the ingressive aorist and the durative, ‘walking,’ ‘went on walking’), and the same tense-distinction is preserved in verse 9, ἥρε—καὶ περιπάτει (cf. further 5:11). In ὑπάγε νῦν (Jo. 9:7) the present ὑπάγε is exclamatory (cf. ἐγέρα ἄρον in 5:8). Cf. Mk. 2:9, 11. In the midst of the aorists in Jo. 2:5–8 (the effective ποιήσατε, γεμίσατε,

4 Ib., p. 190.
5 Am. Jour. of Philol., 1908, p. 403.
3 Ib., p. 449.
4 Moulton, Prol., p. 173.
In the Lord’s Prayer in Mt. (6:9–11) note ἀγαθήτω, γεννηθήτω, δός, ἄφες and εἰσελθε—πρόσευξαι in 6:6. In opposition to δός σήμερον in Matthew we have δίδου τῷ καθ ἡμέραν in Lu. 11:3, a fine contrast between the punctiliar and the linear action. So τῷ αἴτοῦντι δός (Mt. 5:42) and παντὶ αἴτοῦντι δίδου (Lu. 6:30); χαίρετε ἐν ἔκείνῃ τῇ ἡμέρᾳ (Lu. 6:23) and χαίρετε (Mt. 5:12); ἀράτε ταῦτα ἐντεῦθεν, μὴ ποιεῖτε (Jo. 2:16, a very fine illustration). In Ro. 6:13 a pointed distinction in the tenses is drawn, μηδὲ παρατάσσετε τὰ μὲν ἡμῶν ὑπὲρ ἄδικιας τῇ ἁμαρτίᾳ, ἀλλὰ παραστήσατε ἑαυτοὺς (one the habit of sin forbidden, the other the instant surrender to God enjoined). Cf. also νῦν [Page 856] παραστήσατε in verse 19.

In Lu. 7:8, πορεύτητι—πορεύεται, ποίησον—ποιεῖ, the presents are also aoristic. As with the ind. the aorist (constative) may be used with a durative word. So μείνατε ἐν τῇ ἁγίᾳ τῇ ἑβή (Jo. 15:9). The action, durative in itself, is treated as punctiliar. Cf. Mt. 26:38, μείνατε ὡδε καὶ γηγορεῖτε μετε ἐμοῦ (Mk. 14:34). So with μακροθυμήσατε ἕως τῆς παρουσίας τοῦ κυρίου (Jas. 5:7); τὴν παραθέσθην φύλαξον (1 Tim. 6:20. Cf. 2 Tim. 1:14; 1 Jo. 5:21); ταῦτα παράθου (2 Tim. 2:2); συνεκκοπάθησον (2:3); στοϊκὸν (2:15). Cf. the aorists in Jas. 4:9. Most of them call for little comment. Cf. Jo. 4:16, 35. Abbott1 notes the avoidance of the aorist imper. of πιστεύω, possibly because mere belief (aorist) had come to be misunderstood. The pres. imper. presses the continuance of faith (cf. Jo. 14:11). The real force of the effective aorist is seen in λύσατε τὸν ναὸν τοῦτον (Jo. 2:19). In Mk. 15:32, καταβάτω τῶν, the “perfective” force of the preposition is added. Moulton2 notes that 1 Peter shows a marked liking for the aorist (20 aorists to 5 presents in commands, H. Scott), while Paul’s habit, as already noted, is just the opposite. Moulton3 has an interesting comment on the fact that “in seven instances only do the

Moulton

———, Characteristics of N. T. Greek (The Expositor, 1904).

———, Einleitung in die Sprache des N. T. (1911).

two evangelists [Mt. 5–7 and Luke’s corresponding passage] use different tenses, and in all of them the accompanying variation of phraseology accounts for the differences in a way which shows how delicately the distinction of tenses was observed.” There may be variations in the translation of the Aramaic original (if the Sermon on the Mount was spoken in Aramaic?), “but we see no trace of indifference to the force of the tenses.” In the imperative also different writers will prefer a different tense. One writer is more fond of the aorist, another of the present. Note the impressive aorists, ἄρατε τὸν λίθον, λύσατε αὐτὸν καὶ ἄφετε αὐτὸν ὑπάγειν (Jo. 11:39, 44). Abbott rightly calls the aorist here more authoritative and solemn than the present would have been. The aorist here accords with the consciousness of Jesus (11:41, ἤκουσας). The aorist imper. occurs in prohibitions of the third person, like μὴ γνῶτο (Mt. 6:3); μὴ καταβάτω (24:17); μὴ ἐπιστρεψάτω (24:18). This construction occurs in ancient Greek, as μηδὲ σε κινησάτω τις, Soph. Ai. 1180. But μὴ and the aorist subj. was preferred. In the N. T. this is rarely found (1 Cor. 16:11; 2 Th. 2:3; 2 Cor. 11:16).

(c) The Aorist Infinitive. In Homer the durative (present) idea is more common than the punctiliar (aorist) with the infinitive, [Page 857] as with the imperative. There is, of course, no time in the inf. except relative time in indirect discourse. The history of the inf. belongs elsewhere, but here we have only to do with the excellent illustration of punctiliar action afforded by the aorist inf. Radermacher, p. 123, finds the aorist and the pres. inf. together in the Carthaginian inscr. (Audollent, 238, 29, iii/Ad.), μηδὲ τρέχειν μηδὲ περιπατεῖν μηδὲ νικᾶσαι μηδὲ ἐξελθεῖν. So in the papyri B.G.U., I, 183, 25. The features of the tenses in the inf., once they are fully established, correspond closely to the use in the moods. As a matter of fact originally the inf., because of its substantival origin, was devoid of real tense-idea (Moulton,

4 Joh. Gr., p. 318 f.
1 Gildersl., Am. Jour. of Philol., p. 244. In Sans. the inf. has no tenses at all.
H. Scott’s figures for the Synoptics: διά (Mt. 6:1); προκατήγγειλεν and it was only by analogy that tense-ideas were associated with the inf. But still the aorist inf. deserves a passing word. Take Ac. 15:37 f., for instance, Ἄρτι (Mk. 12:12), with προκατήγγειλεν (Jo. 6:21); πιάσαι (7:44), but ἐρωτάτων (16:19). In Mt. 5:17 f. καταλύσαι and πληρώσαι are effective, but σημάται (Ac. 15:13) is ingressive, while αἴτησαι (Mt. 6:8) is constative. Cf. Lu. 7:24 f. The aorist inf. is rare with μέλλω (Ἀποκαλυφθήσεται, Ro. 8:18; Gal. 3:23, though ἂποκαλύπτεται in 1 Pet. 5:1). So ἐμελέλον ἄποθανεν (Rev. 3:2). Cf. Rev. 3:16; 12:4. A good example of the constative aorist [Page 858] inf. occurs in Ro. 14:21. 1 The aorist inf. is used with an aorist as the ind., οὐκ Ἰηλθόν καταλύσαι (Mt. 5:17), the subj., ἐπέμενεν πῦρ καταβήσαι (Lu. 9:54), the imper., ἄφες θάψασί (Mt. 8:22). But the aorist inf. is common also with durative tenses like ἐξῆτου κρατήσασί (Mk. 12:12); οὐκ ἦθελεν—ἔπάρας (Lu. 18:13). There is apparently no instance in the N. T. of an aorist inf. used to represent an aorist ind. in indirect discourse. 2 In Lu. 24:46, ὅτι οὕτως γέγραπται παθέναι καὶ ἀναστήναι ἐκ νεκρῶν, we have the usual timeless aorist, the subject of γέγραπται. So μὴ ἵδεν (2:26). In Ac. 3:18 παθέναι is the object of προκατήγγειλεν. The aorist and pres. inf. with prepositions vary a good deal. The aorist occurs with μετά (Mt. 26:32; Lu. 12:5, etc.), with πρό (Lu. 2:21; Jo. 1:48); πρὸς (Mt. 6:1); εἰς (Ph. 1:23); and even with ἐν sometimes (Lu. 2:27), but only once with διὰ (Mt. 24:12). Cf. Burton, N. T. Moods and Tenses, p. 49 f. The following are Mr. H. Scott’s figures for the Synoptics:

<table>

6 Abbott, Joh. Gr., p. 360 f.
1 Blass, Gr. of N. T. Gk., p. 197.

There are more articular presents than aorists in N. T.

(f) The Aorist Participle. The tenses got started with the participle sooner than with the inf. (cf. Sanskrit), but in neither is there time except indirectly. The Sanskrit had tenses in the participles. The aorist part. is not so frequent in Homer as is the present.3 But “the fondness of the Greeks for aorist participles in narrative is very remarkable.”4

(a) Aktionsart. That is present here also. Thus we find the ingressive aorist, μεταμεληθεὶς (Mt. 27:3); φοβηθῶσα (Mk. 5:33); ἄγνοήσαντες (Ac. 13:27); ἀγαπῆσας (2 Tim. 4:10). The effective [Page 859] aorist appears in πληρώσαντες (Ac. 12:25), the constative in συνπαραλαβόντες (ib.). Further examples of the effective aorist are πείσαντες τοὺς ἄγλοις καὶ λιθάσαντες τὸν Παύλον (Ac. 14:19); δικαιωθέντες (Ro. 5:1). The constative is seen again in παρὰδοὺς (Mt. 27:4); πιστεύσαντες (Jo. 7:39). The aorist participle in itself is, of course, merely punctiliar action.

(b) Ὁ and the Aorist Participle. The punctiliar force of the aorist part. is well illustrated in this idiom. It differs from the relative (ὅς + verb) in being a more general expression. In Mt. 23:20 f., ὃ δόμας ὁμόν, we have identical action, not antecedent. The aorist is, strictly speaking, timeless (Burton, Moods and Tenses, p. 69). Ὁ δόμας=‘the swearer,’ ὁ λαβὼν=‘the receiver,’ etc. Cf. Seymour, “On the Use of the Aorist Part. in Greek,” Transactions of the Am. Philol. Ass., 1881, p. 89. In John the examples, however, are usually definite.1 Contrast ὁ λαβὼν (Jo. 3:33) probably=‘the Baptist’ with πᾶς ὁ ἄκουσας—μαθὼν (6:45) and οἱ ἄκουσαντες, οἱ ποιήσαντες (5:25, 29). Ὁ+aorist part. may be used with any tense of the ind. Thus ὁ λαβὼν in Jo. 3:33 occurs with ἔσφραγισεν, πᾶς ὁ ἄκουσας (6:45) with ἔρχεται, οἱ ποιήσαντες (5:29) with ἐκπροφυοῦνται. Cf. Mt. 26:52, πάντες οἱ λαβόντες μάχαραν ἐν μαχαίρῃ ἄπολοινται. In simple truth the aorist in each instance is timeless. It is not necessary to take it as=future perf.2 in an example like ὁ ὑπομείνας εἰς τέλος οὖνο

1 Abbott, Joh. Gr., p. 363.
2 As Abbott does, Joh. Gr., p. 362.
(γ) Antecedent Action. This is the usual idiom with the circumstantial participle. This is indeed the most common use of the aorist participle. But it must not be forgotten that the aorist part. does not in itself mean antecedent action, either relative or absolute. That is suggested by the context, the natural sequence of events. As examples of the antecedent aorist part. (antecedent from context, not per se) take ἑψάλλοντος—ἐπέκειται (Mt. 4:2); ἧδη—μεταμεληθεὶς ἔστρεψεν (27:3); ἤγειρε—ἀνεχώρησεν, ἀπελθὼν ἀπείγετο (27:5). These so-called antecedent aorists do not have to precede the principal verb in position in the sentence. Thus ἤγειρεν αὐτὴν κρατήσας τῆς χειρὸς (Mk. 1:31), εὐχαριστοῦμεν—ἀκούσατες (Col. 1:3, 4), μέλλει κρίνειν—παρασχῶν (Ac. 17:31), ἐκάθισεν—γενόμενος (Heb. 1:3). This idiom is very common in the N. T. as in the older Greek. Indeed, one participle may precede and one may follow the verb as in Luke 4:35, ἤγειρεν—ἐξῆλθεν—βλάψαν. In Heb. 6:10 the aorist is distinguished from the present, ἐνεδείξασθε—διακονήσατες τοῦ ὁγίου καὶ διακονοῦντες. In Ro. 5:16, διὶ ἑνὸς ἄμαρτήσαντος, there is a reference to Adam (verse 14). The principal verb may itself be future as in ἔρας—ποιήσας (1 Cor. 6:15). In Luke 23:19 ἤγειρεν μάθητις is punctiliar periphrastic (aorist passive), ἤγειρε being aoristic also. Moulton (Prol., p. 249) cites ἤγειρεν ἀκούσασα from Pelagia (inscr. 18). Cf. ἤγειραν γενόμενον in Thuc. 4, 54, 3, and εἴτι φανεὶς in Herod. 3:27. See Gildersleeve, Syntax, p. 125.

Gildersleeve

GILDERSLEEVE, B. L., Editions of Pindar and Justin Martyr.

———, Latin Grammar. Many editions since 1867.
But Simultaneous Action is Common also. It is so with the circumstantial participle as with the supplementary. Here again it is a matter of suggestion. It is simple enough with the supplementary participle as in ἔλαθον ἐξεισάντες (Heb. 13:2), though rare, the present suiting better (cf. Mt. 17:25). The usual idiom is seen in ἔπαύσατο λαλῶν (Lu. 5:4). Indeed this simultaneous action is in exact harmony with the punctiliar meaning of the aorist tense. It is a very common idiom (chiefly circumstantial) in the N. T. as in the older Greek. So πέρας—ἐπέν (Mt. 2:8); ἀποκριθεὶς ἐπέν (22:1); ἠμαρτὼν παραδοὺς ἀμα δίκαιον (27:4); συ [Page 861] τε καλῶς ἐποίησας παραγενόμενος (Ac. 10:33); χρησάμενος ἐπέστρεψεν (27:3). Cf. Ac. 1:24; Ro. 4:20; Heb. 2:10. It is needless to press the point except to observe that the order of the part. is immaterial. Note Ac. 10:33 above. So in σῶσον καταβάς (Mk. 15:30); ἤλθαν σπεύσαντες (Lu. 2:16. Cf. σπεύσας κατάβηθι, Lu. 19:5); ἐμαρτύρησεν δούς τὸ πνεῦμα (Ac. 15:8); διέκρινεν καθαρίσας (15:9); ἐποίησαν ἀποστείλαντες (11:30); ἐγκατέλειπεν ἄγαπής (2 Tim. 4:10); ἔλαβε τι πιστεύσαντας (Ac. 19:2). This construction of the part. after the verb is very common in the N. T. The coincident use of the aorist tense occurs also with the imperfect, as συνήλλασσεν—εἰπὼν (Ac. 7:26), ἐπιβαλῶν ἐκλαυεν (Mk. 14:72); the present, as ἀποκριθεὶς λέγει (Mk. 8:29); the perfect, as ἐκπεπλήρωκεν—ἀναστήσας (Ac. 13:33); and the future, as καλῶς ποιήσεις προσέπμυς (3 Jo. 6). In many examples only exegesis can determine whether antecedent or coincident action is intended, as in Heb. 9:12, εἰσῆλθεν—εὑράμενος (Moulton, Prol., p. 132). So Moulton (ib., p. 131) notes ἐποίησα for

———, Notes on Stahl’s Syntax of the Greek Verb (1910).

antecedent and ἐπάσα (BC*) for coincident action in Jo. 11:28. The coincident aorist part. is common enough in the ancient Greek (Gildersleeve, Syntax, p. 141). The papyri show it also. Cf. εὐ ποίσαις δοῦς, F.P. 121 (i/ii A.D.), a constant formula in the papyri (Moulton, Prol., p. 131). Moulton (ib.) illustrates the obscure ἐπιβαλὼν in Mk. 14:72 by ἐπιβαλὼν σωνύχοσαν Tb.P. 50 (B.C.), 'he set to and dammed up.' If it is coincident in Mark, it is so “with the first point of the linear ἔκλαιεν.”

Subsequent Action not Expressed by the Aorist Participle. Some writers have held this as possible, though no satisfactory examples have been adduced.

Gildersleeve2 denies that Stahl succeeds in his implication. “Coincidence or adverbiality will explain the tense.” Burton3 likewise admits that no certain instance of an aorist part. used to express subsequent action has been found. He claims the idiom in the N. T. to be due to “Aramaic influence.” But we can no longer call in the Aramaic or Hebrew, alas, unless the Greek itself will not square with itself. The instances cited by Burton are all in Acts (16:23; 22:24; 23:35; 24:23; 25:13). “In all these cases it is scarcely possible to doubt that the participle (which is without the article and follows the verb) is equivalent to καί with a co-ordinate verb and refers to an action [Page 862] subsequent in fact and in thought to that of the verb which it follows.”1 This view is held by Prof. Sir W. M. Ramsay2 to apply to Ac. 16:6, and is

in fact essential to his interpretation of that passage. Rackham\(^3\) adds Ac. 12:25 and regards these examples as “decisive.” Another instance urged is Ac. 21:14. But are they “decisive” after all? Gildersleeve\(^4\) is still unconvinced. Blass\(^5\) bluntly says that such a notion “is not Greek” and even refuses to follow the uncials in Ac. 25:13 in reading ἀσπασάμενοι rather than ἀσπασόμενοι. Moulton\(^6\) refuses to follow Rackham in his interpretation of Ac. 12:25: “But to take συνπαραλαβόντες in this way involves an unblushing aorist of subsequent action, and this I must maintain has not yet been paralleled in the N. T. or outside.” And, once more, Schmiedel\(^7\) comments on Ac. 16:6: “It has to be maintained that the participle must contain, if not something antecedent to ‘they went’ (διῆλθον), at least something synchronous with it, in no case a thing subsequent to it, if all the rules of grammar and all sure understanding of language are not to be given up.” The matter might safely be left in the hands of these three great grammarians. But an appeal to the examples will be interesting. As to Ac. 12:25, ὑπέστρεψαν—πληρώσαντες τὴν διακονίαν, συνπαραλαβόντες Ἰωάννην, there is no problem at all unless ἐξ be read rather than ἐπι. It is true that אBL read ἐπι, but that reading is contradicted by the context. In 11:30 it is plain that Barnabas and Saul were sent from Antioch to Jerusalem, and in 13:3, 5, they are in Antioch with John Mark. The great uncials are not always correct, but if they are right in reading ἐπι, the text has been otherwise tampered with. Even granting the genuineness of ἐπι and the “subsequent” aorist, we are absolutely in the dark as to the sense of the passage. With ἐπι the coincident aorist is good Greek, but still leaves us in the dark. With ἐξ or ἀπό there is no problem at all, πληρώσαντες being antecedent, and συνπαραλαβόντες coincident. In 16:6, διῆλθον δὲ τὴν Φρυγίαν καὶ Γαλατικὴν [Page 863] χώραν, κωλυθέντες ύπὸ τοῦ ἄγιου πνεύματος λαλῆσαι τὸν λόγον ἐν τῇ Ἡσίᾳ, the participle is naturally antecedent (or coincident). Paul was headed west for Asia, but, being forestalled by the Spirit, he turned farther north through “the Phrygian and Galatic region.” Later he tried to push on into Bithynia, but the Spirit again interposed and he deflected northwest to Troas (16:7 f.). One is not entitled to make κωλυθέντες=καὶ ἐκκολούθησαν because of the exigencies of a theory that demands that “the Phrygian and Galatic region” be Lycaonia (southern part of the Roman province of Galatia), which had already been traversed (16:1 f.). Besides, the narrative in 16:6 seems to be not resumptive, but a new statement of progress. Whatever the fate of the much discussed “South Galatian” theory, the point of grammar here is very clear. Another so-called instance is in 16:23, ἔβαλεν ἐξ ψυλακῆς, παραγγείλαντες τῷ ἰς ἐξωμοφύλακα. This is so obviously a case of coincident action that it would never have been adduced but for need of examples to support a theory elsewhere. Certainly “in 17:26 ὁ ρίσας is not ‘later’ than the ἐποίησεν in time” (Moulton, Prol., p. 133). Still worse is the instance in 21:14, μὴ πειθόμενου δὲ αὐτοῦ ἣπειράσαμεν εἰπόντες:

3 Comm. on Acts, p. 183 f.

5 Gr. of N. T. Gk., p. 197 f.
6 Prol., p. 133.
Toû kuriôn tò thelma ginosko. The participle is here necessarily antecedent or coincident (this last remark of acquiescence). So in 22:24, ἐκλεύουσαν—ἐλπᾶς, the participle is coincident like the common ἀποκριθῆς ἐπεν. Cf. λέγων in Heb. 2:11 f.; Ac. 7:35. Precisely the same thing is true of ἐφη—κελέωσας in 23:35. In 24:23, ἄνεβαλετο is expanded by three coincident aorist participles, εἰδός—ἐπας—διαταξάμενος. There remains 25:13, κατήντησαν εἰς Καισαρίαν ὅπεσάμενοι τὸν Φήστον. Here Blass, as already noted, accepts the future ὅπεσάμενου, but the aorist is probably correct. But even so, if one simply notes the “perfective” force of the preposition in κατήντησαν, ‘went down,’ he will have no difficulty at all with the coincident action of the aorist part. Κατήντησαν is the effective aorist and accents the end (reinforced by κατ—). ‘They came down saluting’ (‘by way of salutation’). The salutation took place, of course, when they were “down” (κατ—). Findlay (in loco) connects ἀπο with the initial act of κατήντησαν. Thus vanish into air the examples of “subsequent” action with the aorist part. In the N. T., and the construction is not found elsewhere. Moulton (ProL, p. 132) cites from the papyri, ἐξ ὧν δόσεως Σ.—λυτρώσασα αὐτοῦ τὰ ἴματα δρ. ἐκατόν O.P. 530 (ii/A.D.), a clear case of coincident action. The redemption of the clothes is obtained by paying the hundred drachmæ.

[Page 864] (Q) Aorist Participle in Indirect Discourse (Complementary Participle). It is a rare construction on the whole,1 though more frequent with ὅραω than with ἄκοω.2 This aorist part. is absolutely timeless, not even relatively past. It is another instance of the coincident aorist part. So ὄνα ληκοῦσαμεν γενόμενα (Lu. 4:23), ἔθεώρουν τὸν Σατανᾶν ὃς ἀπεταθάν ἐκ τοῦ οὐρανοῦ πεσόντα (10:18). In πεσόντα we have the constative aorist.3 Contrast the perfect in Rev. 9:1, ἔδοξεν ἀστέρα ἢ τοῦ οὐρανοῦ πεπτόκτονα εἰς τὴν θην, and the present in Rev. 7:2, ἔδοξεν ἄλλον ἀναβαίνοντα (linear), and ἔδοξαμεν τινα ἐν τῷ ὄνοματι Σου ἐκβάλλοντα δαιμόνια (Lu. 9:49). Cf. ἔδοξεν ἄνδρα—ἐπισηλθόντα καὶ ἐπιθέντα (Ac. 9:12. So in 10:3; 26:13); ἤκούσαμεν—ἐνεχθέασαν (2 Pet. 1:18).

2. PUNCTILIAR (AORISTIC) PRESENT (ὁ ἐνεστῶς χρόνος). The present tense is named entirely from point of time which only applies to the indicative. But a greater difficulty is due to the absence of distinction in the tense between punctiliar and linear action. This defect is chiefly found in the indicative, since in the subj., opt., imper., inf. and part., as already shown, the aorist is always punctiliar and the so-called present practically always linear, unless the Aktionsart of the verb itself is strongly punctiliar. Cf. discussion of the imper. But in the ind. present the sharp line drawn between the imperfect and aorist ind. (past time) does not exist. There is nothing left to do but to divide the so-called Pres. Ind. into Aoristic Present and Durative Present (or Punctiliar Present and Linear Present). The one Greek form covers both ideas in the ind.4 The present was only gradually developed as a distinct tense (cf. the confusion about ἔ-φη-v, whether aorist or imperfect). The present is formed on punctiliar as well as linear roots. It is not wise therefore to define the pres. ind. as denoting “action in progress” like the imperfect as Burton5 does, for he has to take it back on p. 9 in the

1 Gilders., Am. Jour. of Philol., 1908, p. 408.
2 Goodwin, Moods and Tenses, p. 51.
3 Moulton, ProL., p. 134.
5 N. T. Moods and Tenses, p. 6.
discussion of the “Aoristic Present,” which he calls a “distinct departure from the prevailing use of the present tense to denote action in progress.” In sooth, it is no “departure” at all. The idiom is as old as the tense itself and is due to the failure in the development of separate tenses for punctiliar and linear action in the ind. of present time. “The forms εἰμί, ἔμμη, φημί, ἀγω, γράφω, etc., in which the stem has the form generally found only in aorists (§ 11, § 31) may be [Page 865] regarded as surviving instances of the ‘Present Aorist,’ i.e. of a present not conveying the notion of progress. We may compare the English use of *I am, I go* (now archaic in the sense of *I am going*), *I say* (*says she*), etc.”¹ Hear Monro again: “The present is not a space of time, but a point,” and, I may add, yields itself naturally to aoristic (punctiliar) action. Some presents are also “perfective” in sense like ἥκω. The so-called “present” tense may be used, therefore, to express an action simply (punctiliar), a process (durative or linear), a state (perfective or perfect).² Some of the root-presents (like φη-μί) are aoristic. The perfect came originally out of the root-meaning also (cf. ἥκω, οἶδα) and grew out of the present as a sort of intensive present.³ The notion of state in νικῶ, κρατῶ, ἱπτόμαι is really that of the perfect. So the momentary action in βη (Ε-βνον) becomes linear in the iterative βή-βάω, ‘patter, patter.’ Moulton⁴ clearly recognises that “the punctiliar force is obvious in certain presents.” The original present was probably therefore aoristic, or at least some roots were used either as punctiliar or linear, and the distinctively durative notions grew up around specially formed stems and so were applied to the form with most verbs, though never with all. In the modern Greek we find “the creation of a separate *aorist present* (πάγω),” while παγαίνω is linear. So παγαίνω is ‘I keep going,’ while πάγω is ‘I go’ (single act). Cf. Thumb, *Handb.* p. 119. “As a rule the present combines *cursive* (durative, continuous, etc.) and *aorist* action” (*ib.*, p. 120). The aoristic present=undefined action in the present, as aoristic past (ind.)=undefined action in the past. In the case of ἄγω we see a root used occasionally for punctiliar, linear and even perfected action. There are, besides

the naturally aoristic roots, three special uses of the aoristic present (the universal present, the historical present, the futuristic present).5

(a) The Specific Present. Gildersleeve6 thus describes this simplest form of the aoristic present in contrast with the universal present. It is not an entirely happy description, nor is “effective present,” suggested by Jannaris,7 since there may be ingressive and constative uses also. The common ἐλήμ (Jo. 10:11) is often aoristic. A fine example of the constative aorist present occurs in Lu. 7:8, πορεύεσται, καὶ πορευθηναι—ἐρχοι, καὶ ἔρχεται—ποίησον, καὶ ποιηθηναι. Cf. ἐξορκίζω σε (Mt. 26:63); ὄρψ (Ac. 8:23); [Page 866] ἄρτι βλέπω (Jo. 9:25). The frequent ἔγὼ δὲ λέγω (Mt. 5:22, 28, etc.) is example of the specific aoristic present (constative). So ἄληθῶς λέγω (Lu. 12:44). Cf. σοι λέγω (Mk. 5:41); φησίν (Mt. 14:8); οὐ λαμβάνω—ἄλλως λέγω (Jo. 5:34), etc. In Mk. 2:5 ἄφιενται is effective aorist present as in ἔφαντα (Ac. 9:34). Cf. ὅσοι οὐκ ἔχουσιν, οὐ γὰρ ἔγνωσαν (Rev. 2:24); πόθεν ἦλθον and πόθεν ἔρχομαι (Jo. 8:14); ἔχεται—ἔλθον (Jo. 16:21). Moulton (Prol., p. 247) notes how in Mt. 6:2, 5, 16, ἄπεξουσί, the combination of the aoristic pres. and the perfective use of ἀπό makes it very vivid. “The hypocrites have as it were their money down, as soon as their trumpet has sounded.” The “perfective” ἀπέχω (Mk. 14:41) is copiously illustrated in the papyri and ostraca (Deissmann, Light, etc., p. 111).

(b) The Gnomic Present. This is the aorist present that is timeless in reality, true of all time. It is really a gnomic present (cf. the Gnomic Aorist) and differs very little from the “Specific Present.” In Mt. 23:2 ἐκάθισαν is gnomic, and in verse 3 we have the aoristic presents (gnomic also), λέγουσιν γὰρ καὶ οὐ ποιοῦσιν. Note Jo. 9:8. Cf. also ὡς λέγουσιν (Rev. 2:24). Good instances are found in 1 Cor. 15:42 ff., σπείρεται. So ὡς πείρα ἐποιέσαν (Mt. 6:2). Abbott has great difficulty with ἐκ τῆς Γαλιλαίας προφήτης οὐκ ἔγερσαν (Jo. 7:52). It is this gnomic present. It is not true, to be sure, but this was not the only error of the Sanhedrin. Cf. Mt. 7:8.

(c) The Historical Present. This vivid idiom is popular in all languages, particularly in the vernacular. “We have only to overhear a servant girl’s ‘so she says to me’ if we desiderate proof that the usage is at home among us.” Cf. Uncle Remus. Curiously the historic present is absent in Homer. But Gildersleeve applauds Stahl for agreeing with his position “that it was tabooed as vulgar by the epos and the higher lyric” (A.J.P., xxiii, 245). It is absent from Pindar and the Nibelungenlied. Gildersleeve also observes that it is much more frequent in Greek than in English and is a survival of “the original stock of our languages.” “It antedates the differentiation into imperfect and aorist.” The “Annalistic or Note-Book Present” (like γίγνονται παῖς δύο) is practically the same use of the aorist present. Moulton excludes γεννᾶται in Mt. 2:4, for that is more like the [Page 867] futuristic (prophetic) use of the present. Brugmann divides the hist. pres. into “dramatic” and “registering” or

Brugmann
annalistic presents (cf. Gildersleeve). This vivid idiom is preserved in the modern Greek (Thumb, Handb., p. 120). It is common enough in the LXX, since Thackeray (Gr., p. xx) notes 151 examples in 1 Samuel, though it is rare in 2 Samuel and 2 Kings (“absent,” Thackeray, Gr., p. 24). But Hawkins (Horae Synopticae, p. 213) finds it 32 times in 2 Samuel and twice in 2 Kings. Hawkins (ib.) finds the hist. pres. in the LXX 337 times. Josephus uses it also. The N. T. examples are thus “dramatic.” The hist. pres. is not always aoristic. It may be durative like the imperfect. This point has to be watched. Blass considers that the historical present “habitually takes an aoristic meaning,” but room has to be left for the durative meaning also. It is common in the Attic orators and in the N. T., except in Luke where it is rare. Luke’s Gospel has it only 9 times (possibly 11) and the Acts 13 times. Hawkins, from whose Horae Synopticae (2d ed., pp. 143 ff.) these figures are taken, finds 93 historic presents in Matthew (15 of them in Parables), but 162 in John and 151 in Mark. It is rare in the rest of the N. T. It is most frequent in Mark, John, Matthew and in this order. Mark indeed uses it as often as 1 Samuel, though a much shorter book. John’s Gospel is much longer than Mark’s, but when the discourses and dialogues are eliminated, the difference between John and Mark is not great. Moulton adds that the idiom is common in the papyri. Cf. Par. P. 51 (ii/b.c.) ἀνύγω — ὄρθω — κλάγω — ἐπορενόμην — καὶ ἔρχομαι — ἔλεγον, etc. Moulton illustrates λέγει Ἰησοῦς in the Oxyrhynchus Logia by Καῖσαρ λέγει, Syll. 376. See also ὄφηρατεν καὶ βούλεται, P. Oxy. 37 (A.D. 49). Luke’s manifest reluctance to use it (changing Mark’s historical presents except in 8:49) is due to the fact that in Luke’s time the construction was regarded as “too

familiar for his liking.” He is the scientific historian, while Mark and John are the dramatists. Different writers would feel differently about it. “Josephus would use the tense as an imitator of the classics, Mark as a man of the people who heard it in daily use around him; while Luke would have Greek education enough to know that it was not common in the cultured speech of his time, but not enough to recall the encouragement of classical writers whom he probably never read and would not have imitated if he had read them.”

But what about John? Janan's remarks that the idiom was common in the late Greek as in the early. The personal equation may have to explain the variations in the Gospels. Blass undertakes to give a philosophy of the matter on the theory that the “circumstances,” “incidents” and “final results” are expressed in the past tenses of the ind., while the “principal actions” are found in the historical present. He cites Jo. 1:29–42 in illustration (βλέπει—λέγει—ἐμαρτύρησεν—Ιστήκει—λέγει—ἡκουσαν—λέγει—ἐπικινδυνάω καὶ ἔδωκαν—ἐβουλεύσεται—λέγει—ἀργαίτησεν—ἐκπέπλεσεν). One doubts if the phenomena can be brought under any rule. Matthew and Luke use ἵδον to enliven the narrative, while Mark and John avoid it. Mark has a habit of using καί before the historical present, while John often employs asyndeton. But there is no doubt of the vividness of the narrative in Mark and John which is largely due to the historical presents. Modern literary English abhors this idiom, but it ought to be preserved in translating the Gospels in order to give the same element of vividness to the narrative. The historical present may begin a paragraph (often so), occur in the midst of aorists and imperfects, or alternate with aorists. In Mt. 3:1 παραγίνεται Ἰωάνης is preceded by a note of past time. In Mk. 5:15 ἔρχονται καὶ θεωροῦσιν occur between aorists. In Mk. 4:37 the realistic γίνεται λαλάοι is followed by the imperfect. As specimens of this present in parables see Mt. 13:44. Sometimes the MSS. vary as between φαίνεται and ἐφάνη (Mt. 2:13). The variation in parables may be partly due to obscuration of the gnomic nature of the narrative. In such a wealth of material for illustration it is hard to select, but note John 20. In verse 1 f. note ἔρχεται—βλέπει—τρέχει—ἔρχεται, all indicating the excitement of Mary. Then the narrative goes on with aorists and imperfects till Peter and John draw near the tomb, when we have βλέπει—ἔρχεται—θεωρεῖ (5–7) with two parenthetic aorists interjected (οὐκ εἰσῆλθανεν, εἰσῆλθουν). In verse 8 the narrative is resumed by aorists. In verse 12 again θεωρεῖ shows the surprise of Mary at seeing the angels (λέγουσιν—λέγει, verse 13), as in verse 14 the present is used when she sees Jesus. Historical presents run through the dialogue with Jesus (15–18). Then the resumptive ταῦτα ἔπεμψε. That is enough to say on the subject.

(d) The Futuristic Present. This futurist present is generally punctiliar or aoristic. The construction certainly had its origin in the punctiliar roots, but some of the N. T. examples (cf. English “I am going,” as well as “I go”) are durative, as

---

1 Prol., p. 121.
3 Gr. of N. T. Gk., p. 188.
4 Hawkins, Hor. Synop., p. 144.
6 W.-Th., p. 267.
2 Giles, Man., p. 485.
Moulton\(^3\) shows. Thus in 1 Cor. 16:5 διέρχομαι (in contrast with διέλθω) means ‘I am going through’ (Macedonia). Γίνομαι leans to the aoristic\(^4\) and so γίνεται (Mt. 26:2) may be punctiliar. “In αὖριον ἀποθνῄσκομεν (1 Cor. 15:32) we have a verb in which the perfective prefix has neutralized the inceptive force of the suffix –ίσκω: it is only the obsoleteness of the simplex which allows it ever to borrow a durative action.”\(^5\) The aoristic origin of many present-stems has already been shown (and some perfectives like ἔκκριτο). Thus all three kinds of action are found in the present (punctiliar, durative, perfect). All three kinds of time are also found in the present ind. (historical present=past, futuristic present=future, the common use for present time). Some of these “momentary presents” are always future. So ἔμι in old Greek prose,\(^6\) but Homer uses ἔμι also as a present.\(^7\) The N. T. uses ἔρχομαι and πορεύομαι in this futuristic sense (Jo. 14:2 f.), not ἔμι. Indeed “the future of Greek was originally a present” (Jebb in Vincent and Dickson’s Handbook, p. 323). That is too strong, for the future ind. often comes from the aorist subj. In the N. T. such so-called futures as πέσαι and φάγεσαι (Lu. 17:8) are really old aorist subjs. Cf. Mt. 24:40 f. The futuristic pres. occurs in the inscriptions and papyri, as in Petersen-Luschan, p. 160, N. 190, ἀν δὲ τις ἀδικήθη, ὑπόκειται. See ἔμι μὴ παύσεται, ἔρχεται, B. M. II, 417 (iv/A.D.), ἀντίγραψαν κάθω ἀναβαίνω, O. P. 1157, 25 f. (A.D./iiii), γράψαν μοι καὶ πέμπω αὐτῷ ἔπιθηκήν, O. P. 1158, 23 f. (A.D./iiii). Cf. Radermacher, N. T. Gr., p. 124. In South Italian Greek the futuristic present is the only means of expressing the future ind.\(^8\) The other use of the futuristic present is the dramatic or prophetic.\(^9\) “This present—a sort of counterpart to the historic present—is very frequent in [Page 870] the predictions of the N. T.”\(^1\) It is not merely prophecy, but certainty of expectation that is involved. As examples note Mt. 17:11 Ἡλείας ἔρχεται καὶ ἀποκαταστήσει πάντα, 24:43 ποιῇ φυλακῇ ὁ κλέπτης ἔρχεται, 26:2 γίνεται καὶ—παραδίδοται, 26:18 ποιῶ τὸ πάσχα, 27:63 ἔγειρόμαι, Lu. 3:9 ἐκκόπτεται καὶ βάλλεται, 19:8 διδω καὶ ἀποδίδωμι, Jo. 4:35 ὁ θερισμὸς ἔρχεται, 8:14 ποῦ ὑπάγω, 8:21 ὑπάγω καὶ ζητήσετε, 10:15 τὴν ψυχήν μου τίθημι, 12:26 ὅπου εἰμί ἐγώ, 20:17 ἀναβαίνω, 21:23 οὐκ

ἀποθνήσκει, 1 Cor. 15:26 καταργεῖται. In Jo. 10:15 ff. τίθημι really covers the whole of Christ’s life viewed as a unit (constative aorist). 2 In Mk. 9:31 we have παραδίδοται, in Mt. 17:22 μέλλει παραδίδοσθαι. This use of μέλλω and inf. is a sort of half-way station between the futuristic present and the punctiliar future. Cf. Jannaris, *Hist. Gk. Gr.*, p. 443. The futuristic pres. startles and arrests attention. It affirms and not merely predicts. It gives a sense of certainty. Cf. in Mt. 18:12, ἀφήσει καὶ πορευθεὶς ζητεῖ together, and φεύγει (Rev. 9:6).

3. THE PUNCTILIAR (AORISTIC) FUTURE (Ὄ μέλλων χρόνος).

(a) Punctiliar or Durative. The future is a “mixed tense” both in origin and meaning. 3 The mixed origin was discussed in ch. VIII, vii, (g). It was a late tense, little used in the early Vedic Sanskrit, and as a distinct form gradually disappeared from the modern Greek, where the periphrastic forms like θὰ λύσω (λύσω) alone occur. But the modern Greek has developed thus two futures, θὰ λύσω punctiliar, θὰ λύω durative (Thumb, *Handb.*, pp. 116, 125). The Germanic languages (cf. English shall and will) have only the periphrastic future. For the history of the future ind. see Jannaris, *Hist. Gk. Gr.*, pp. 552 ff. In Sanskrit the fut. had no modes, i.e. it was confined practically to the ind. (Whitney, *Sansk. Gr.*, p. 201). The oldest roots are derived either from punctiliar presents (ind.) or aorist (punctiliar) subjunctives. 4 Cf. πίομαι, βήσομαι. Gradually the future was formed on durative roots also. Thus μενῶ, ‘I shall remain.’ Some verbs formed two futures, 5 one punctiliar, like σχῆσω from ἔσχον=‘I shall obtain,’ the other durative, like ἔζω, ‘I shall have.’ The κοινή has dropped σχῆσο, as it has “generally got rid of alternative forms.” 6 So also ἔθεξομαι (τρέχον) was durative and ἔδρομαι (ἐδρομον) punctiliar, 7 though both are absent in the N. T. It is probable [Page 871] that in the future passive we have with most verbs a purely punctiliar future formed on the aorist stem. The middle future was usually durative, the future passive punctiliar. 1 Very few of the list of examples given by Jannaris can be illustrated in the N. T. owing to the disappearance of the future middle before the future passive. In 1 Pet. 4:18 φανεῖται (LXX, Prov. 11:31) is durative and certainly φανήσεται (Mt. 24:30) is punctiliar. So in Lu. 16:31 πεισθήσονται is punctiliar (effective), but πείσομαι does not occur in the N. T. So κτήσεσθε τὰς ψυχάς

---

———, *Language and the Study of Language* (1867).

———, *Life and Growth of Language* (1875).
ὑμῶν (Lu. 21:19) seems to be durative, though no fut. passive of this verb appears in the N. T. So also συναχθήσονται (Mt. 24:28) is punctiliar (effective). But the very disappearance of the future middle (as with the Attic φοβήσομαι) threw the burden of the durative future\(^2\) on the future passive. So φοβηθήσομαι in Heb. 13:6 is durative. Cf. the durative ἀρκεσθήσομεθα (1 Tim. 6:8). So also ὁλλά καὶ χαρήσομαι (Ph. 1:18) is durative. Cf. also Jo. 16:20, 22, though χαρήσονται in Lu. 1:14 is ingressive punctiliar, as πλησθήσεται (1:15) is effective punctiliar. But in Jo. 16:20 both λυπηθήσεσθε and γενήσεται seem ingressive. In Heb. 9:28 δόθησται (cf. Ac. 26:16) is ingressive, but ὅσοιοι may be either durative (Mt. 5:8; Jo. 1:50; 19:37; Rev. 22:4) or punctiliar (Jo. 1:39; Heb. 12:14, etc.). An excellent example of the effective future is found in ὅ ὑπομείνας εἰς τέλος σωθήσεται (Mt. 10:22). So the same form in the future may be either punctiliar or durative, as προάξω υμᾶς (Mk. 14:28) is durative, while ἄξει is punctiliar (effective=’bring’).\(^3\) Πείσομεν is punctiliar (effective) in Mt. 28:14 and durative in Jo. 3:19. So γνώσομαι is punctiliar or durative (Rev. 2:23). As punctiliar this verb may be either ingressive (1 Cor. 14:7, 9), effective (1 Cor. 4:19) or merely constative (Jo. 8:28, 32). From the nature of the action as future this Aktionsart of the verb will not be as prominent\(^4\) in the future aorist as in the other punctiliar constructions. Blass\(^5\) even goes so far as to say that the future “is the one tense which does not express action [kind of action, he means], but simply a time relation, so that completed and continuous action are not differentiated.” But it must be borne in mind that the future tense in itself makes as much distinction between punctiliar and durative [Page 872] action as the present tense does. The difference is that the future is usually punctiliar, while the present is more often durative. The point need not be pressed. Other examples of the punctiliar aorist are καλέσεις (Mt. 1:21) ingressive; παρακληθήσονται (Mt. 5:4) effective, and so χορτασθήσονται, but ἀλλὰκαὶ χαρήσονται while καλέσονται is effective. In 1 Cor. 15:22, 28 note ζωοποιηθήσονται and ὑποταγήσεται (effective). In Jo. 8:32 note ἐλευθερώσει effective=’set free’ (cf. ἐλεύθεροι γενήσεσθε, verse 33).\(^1\) So then both in origin and use the future is chiefly punctiliar.

\(b\) The Modal Aspect of the Future. The future indicative is not merely a tense in the true sense of that term, expressing the state of the action. It is almost a mode on a par with the subjunctive and imperative. Gildersleeve\(^2\) puts the matter plainly when he says: “The future was originally a mood.” In both Greek and Latin the forms of the future come for the most part from the subj. and it must be treated as a mode as well as a tense. Indeed Delbrück\(^3\) and Giles\(^4\) put it wholly under moods. It partakes, as a

Delbrück

Delbrück, B., Ablativ Localis Instrumentalis (1867).

matter of fact, of the qualities of both mood and tense, and both need to be considered. The modal aspect of the fut. ind. is seen in its expression of will and feeling Like the subj. the fut. ind. may be merely futuristic, volitional or deliberative. We have a reflection of the same thing in our shall and will. The fut. ind. has had a precarious history in Greek. Its place was always challenged by the present and even by the aorist ind., by the subj. and imper. modes, by periphrastic forms. It finally gave up the fight as a distinct form in Greek.5 See under 3, (a). In the modern Greek the distinction between the periphrastic fut. and the subj. is practically lost.6 The modal aspects of the fut. ind. appear clearly in subordinate clauses where the tense is common. In indirect discourse the future ind. merely represents the direct discourse (cf. Ro. 6:8). The future with the descriptive or identifying relative7 (Jo. 6:51) shows no modal features. But it is found in other relative clauses where purpose (Lu. 7:27) or result (Lu. 7:4) is expressed. The future has also a modal value in temporal clauses (Rev. 4:9; 17:17), in final clauses (Lu. 20:10; Heb. 3:12), in [Page 873] conditional sentences (Lu. 19:40), in wish (Gal. 5:12). In Rev. 3:9 the fut. ind. and the aorist subj. occur side by side with ὅπως. But in independent sentences also the modal aspects of the future appear.

(a) Merely Futuristic. This is the most common use of the future and in itself would not be modal. It is the prospective, what lies before the speaker.1 The predictive2 (or prophetic) future has to be classed as aoristic (usually constative), though the question as to whether the action is durative or punctiliar may not have crossed the speaker’s mind. Cf. Mt. 21:37 ἐντραπήσονται, 41 ἀπολέσει, 43 ἀρθήσεται—δοθήσεται, 24:31 ἀποστελεῖ, etc. Cf. Mk. 13:24–27. Further good examples of the predictive future are in Mt. 11:28 f.; 12:31. Unfortunately in English we have no established principle for the translation of the predictive future. In the first person it is done by “shall,” and naturally by “will” in the second and third persons. It is not always easy to distinguish the merely futuristic from the volitive future, “but we have to reckon with an archaic use of the auxiliaries which is traditional in Bible translations.”3 The use of “shall” in the second and third persons is almost constant in

3 Moulton, Prol., p. 150.
the R. V. both for the volitive and the futuristic uses. If “shall” could be confined in these persons to the volitive and “will” to the futuristic, even “the solemnly predictive,” it would be a gain. Thus in Mk. 14:13 ἀπαντήσαε would be ‘will meet.’ In Mt. 11:28 f. ἀναπάως would be ‘shall give you rest’ (R. V. ‘will’), εὑρήσετε ‘will find’ (R. V. ‘shall’). But ἀναπάως here may be volitive. If so, ‘will’ is correct. So in Mt. 12:31 ἀφεθήσεται would be ‘will be forgiven’ (R. V. ‘shall’). Cf. also Mt. 26:13, λαλήσεται=‘will be preached.’ Moulton notes that ἀπαρνήσης (Mt. 26:34; Mk. 14:30; Lu. 22:61) is often misunderstood because of the rendering ‘shalt deny me.’ “It could not therefore be Peter’s fault if Jesus commanded him.” Here “will” is free from that peril. Cf. Mt. 25:29, 32; Lu. 19:43. With the negative the English “shall” becomes volitive when the Greek is not. Cf. Mk. 13:31, οὐ παρελεύσονται (cf. οὐ μὴ παρέλθῃ in 13:30). Sometimes (very rarely) οὐ μὴ occurs with the predictive fut. (cf. the usual aorist subj.) as in οὐ μὴ παρελεύσονται (Lu. 21:33); οὐ μὴ εὑρήσουσιν (Rev. 9:6); οὐκέτι οὐ μὴ εὑρήσουσιν (18:14; cf. ἀπῆλθεν, [Page 874] ἀπόλετο). The construction of οὐ μὴ with the fut. ind. is “moribund” in the N. T., only 14 and some of these doubtful (MSS. vary greatly between aorist subj. and fut. ind.). Some of the 14 are examples of the volitive future. In Mt. 15:5 οὐ μὴ τιμήσει is probably volitive, though some hold it predictive.

(β) The Volitive Future. The three divisions (futuristic, volitive, deliberative) glide into one another both in the subjunctive and the future ind. The volitive future is practically an imperative in sense, for the will is exercised. The futuristic glides imperceptibly into the volitive “as in the colloquial οὐ δω, ‘you will see to that,’ Mt. 27:4.” Cf. ὑμᾶς ὄψεσθε (Mt. 27:24), ἐκκόψεις (Lu. 13:9). In Heb. 8:5 the imperative and the fut. ind. occur together, ὅρα ποίήσεις. The impatient οὐ παύσῃ διαστρέφων (Ac. 13:10) is almost imperatival, certainly volitive. “The future ind. is exceedingly common in this sense (volitive).” In legal precepts the fut. ind. is unclassical. But the idiom itself is classical and “is not a milder or gentler imperative. A prediction may imply resistless power or cold indifference, compulsion or concession.” It is exceedingly frequent in the LXX. It is chiefly found in the N. T. in quotations from the O. T. Cf. καλέσεις (Mt. 1:21), οὐκ ἔσεσθε (6:5); ἔρεθε (21:3)=ἔπατε (Mk. 11:3). Cf. Jas. 2:8; Ro. 13:9; Gal. 5:14. The volitive future really includes purpose (will) in the first person, as well as in the second and (rarely) in the third. Thus προσκεύζομαι, ψαλῶ (1 Cor. 14:15)=‘I will pray,’ ‘I will sing,’ not mere futurity. So in ἀναστάς πορεύσομαι (Lu. 15:18) we seem to find ‘will,’ not mere declaration. Most of the examples are in the second person, like οὐκ ἔσεσθε (Mt. 6:5), and are chiefly negative (4:7; Ac. 23:5; Ro. 7:7). But some examples occur in the third person also; though

9 Moulton, Prol., p. 184.
10 Ib., p. 177.
11 Ib., p. 176.
12 Blass, Gr. of N. T. Gk., p. 209.
Blass\(^1\) quotes \(\text{μή}\) so that Blass\(^4\) remarks that "the N. T. in this case practically uses only the subj., while in Mt. 10:13 \(\text{ἔλθατο}\) ἦ ἐλήνη \(\text{ὑμῶν}\) \(\text{ἐπ᾽ ἀυτήν}\)\(^6\).\(^5\) In the volitive future ‘will’ is the English translation for the first person, ‘shall’ for the second and third. The rare use of \(\text{μή}\) with the fut. ind. shows a volitive use. Gildersleeve (\textit{Syntax}, p. 117) is sceptical, but Moulton (\textit{Prol.}, p. 177) cites from Demosthenes \(\text{μή}\) ἄνους ἠλοήσειε and from B. U. 197 (i. A. D.) \(\text{μή}\) \(\text{ἐξῆσται}\), B. U. 814 (iii. A. D.) \(\text{Page 875}\) \(\text{μή}\) ἀφήσης, B. M. 42 \(\text{μή}\) —κρατήσεις (ii. B. C.). Blass\(^1\) quotes \(\text{μήδένα}\) \(\text{μιμήσετε}\) from Clem., \textit{Hom.}, III, 69, and Moulton (\textit{Prol.}, p. 240) adds \(\text{μή}\) \(\text{θησαυρίσεται}\), D in Mt. 6:19, and \(\text{λέξεις}\) \(\text{δὲ}\) \(\text{μηδένω}\), Eurip., \textit{Med.} 822, and observes (p. 248) that MS. evidence should be watched on the point. Sometimes \(\text{οὐ} \text{μή}\) occurs with the volitive future as in \(\text{οὐ}\) \(\text{μή}\) \(\text{τιμήσησι}\) (Mt. 15:5); \(\text{oὐ}\) \(\text{μή}\) \(\text{ἔσται}\) σοι \(\text{τοῦτο}\) (16:22). In Mt. 26:35 \(\text{oὐ} \text{μὴ}\) \(\text{ἄπαρνήσωμαι}\) is also volitive (cf. Mk. 14:31). The volitive future seems to be found in Lu. 10:19, \(\text{oὐδὲν} \text{οὐ} \text{μὴ} \text{ὑμᾶς} \text{ἀδικήσαι}\) (W. H. text), but it is durative. But \(\text{oὐ} \text{alone}\) is the usual negative in the volitive future, as in \(\text{oὐχ ἄρπάσει} \text{τις} \text{ἐκ} \text{τῆς} \text{χειρός} \text{μου}\) (Jo. 10:28. Cf. \(\text{oὐ} \text{μὴ} \text{ἀπόλοινται}\)). Cf. pres. imper. and fut. ind. side by side in Jo. 1:39 (cf. 1:46). On \(\text{oὐ} \text{μὴ}\) see \textit{Modes and Particles}. It is possible that \(\text{oὐ}\) \(\text{καταχύσουσιν} \text{αὐτὸς}\) (Mt. 16:18) is volitive.

\((\gamma)\) \textit{Deliberative Future.} Burton\(^2\) has pointed out that questions are of two kinds (questions of fact or questions of doubt). Questions of fact make an inquiry for information about the past, present or future. These questions employ the moods and tenses as other simple declarative sentences in both direct and indirect discourse. But deliberative questions ask not for the facts, but about the “possibility, desirability or necessity” of a proposed course of action. The subj. as the mood of doubtful assertion is perfectly natural here. The future is also doubtful from the nature of the case. So deliberative questions use either the subj. or the fut. ind. Deliberative questions (like questions of fact) may be merely interrogative or they may be rhetorical. The deliberative questions in the N. T. with the fut. ind. are all direct questions except Ph. 1:22, \(\text{τί} \text{ἀρῆσομαι} \text{οὐ} \text{γνωρίζω}, \text{where the punctuation is doubtful}. \text{(W. H. marg. have} \text{τί} \text{ἀρῆσομαι).} \text{In} \text{στι} \text{τὶ} \text{γράψω} \text{(Ac. 25:26)} \text{it is not certain whether} \text{γράψω} \text{is fut. ind. or aorist subj. In Lu. 11:5, τίς} \text{ἐξ ὑμῶν} \text{ἐξεί} \text{φίλον καὶ πορεύεσται—καὶ} \text{ἐπὶ} \text{αὐτῷ, the fut. ind. (rhetorical) and aorist subj. occur side by side if we can trust the reading}. \text{Cf. Mt. 7:6, with} \text{μήποτε;} \text{Eph. 6:3, with} \text{ὅν} \text{(O. T.)}. \text{The examples of the fut. ind. in deliberative questions are all disputed by some MSS. which have the aorist subj., so that Blass} \text{ remarks that} \text{“the N. T. in this case practically uses only the conjunctive”; but that is an overstatement, since the best MSS. (see W. H. and Nestle texts) support the fut. ind. in some instances. As an example of merely interrogative \textit{Page 876} deliberative questions with fut. ind. take} \text{εἰ} \text{πατάξομεν} \text{ἐν μαχαίρῃ} \text{(Lu. 22:49). In Jo. 18:39,} \text{βούλεσθε} \text{ἀπολύσω, we may have the fut. ind. or the aorist subj., but note} \text{βούλεσθε. The N. T. examples are nearly all rhetorical. So Mt. 12:26} \text{τῶς} \text{σταθήσεται, Mk. 4:13} \text{πῶς—γνώσεσθε, Jo. 6:68} \text{πρὸς τίνα} \text{ἀπελευσόμεθα.} \text{Cf. further

Ro. 3:5; 6:1 (the common τί ἔροῦμεν); 9:14; 1 Cor. 14:7, 9, 16; 15:29, 51; 1 Tim. 3:5. Cf. Lu. 20:15. Cf. ἀγοράσωμεν καὶ δόσομεν (Mk. 6:37).

(c) The Future in the Moods. The future differs from the other tenses in this respect, that in the moods where it occurs it has always the element of time. This is not true of any other Greek tense.1

(a) The Indicative. It is far more common here than in the other moods. In direct discourse the fut. ind. expresses absolute time. Cf. τότε ὄψονται (Lu. 21:27). In the gnomic future the act is true of any time (cf. gnomic aorist and present). So μόλις ὑπὲρ δικαίου τις ἀποθανεῖται (Ro. 5:7); χρηματίσει (7:3), etc. In indirect discourse the time is relatively future to that of the principal verb, though it may be absolutely past. So with ἐνόμισαν ὅτι λήμψονται (Mt. 20:10); ἢπεν σημαίνον ποῦρ θανάτῳ δοξάσει τὸν θεόν (Jo. 21:19).2

(b) The Subjunctive and Optative. There never was a fut. imperative. The so-called fut. subjs. in the N. T. have already been discussed. W. H. admit ὄψησθε to the text in Lu. 13:28, but claim it to be a late aorist subj.3 The same thing may be true of ὀψησί, read by MSS. in Jo. 17:2; Rev. 8:3, but not of καυχήσομαι in 1 Cor. 13:3. This may be a lapsus calami4 for καυχήσομαι. Harnack (The Expositor, May, 1912, p. 401) quotes Von Soden as saying: “Καυχήσομαι—not καυχήσομαι—is to be recognised as the traditional form in families of MSS. which do not give καυχήσομαι.” But Harnack refuses to “saddle” Paul with this Byzantine “deformity.” Jannaris5 thinks that these sporadic examples in late Greek are the fut. ind. “spelt with the thematic vowel (η and ω) of the subjunctive.” One naturally thinks of the Latin subj. future. The fut. opt. never had a place save in indirect discourse, and that is lost in the N. T.

Harnack

Soden

———, Griechisches N. T. Text mit kurzem Apparat (1913).

5 Hist. Gk. Gr., p. 556.
(γ) The Infinitive. The future inf. was never a common construction and was almost confined to indirect discourse. The six examples in the N. T. seem to be punctiliar save two (Acts 11:28; John 21:25). Μέλλω has the fut. inf. three times, but only in the case of ἔσεσθαι (Acts 11:28; 24:15; 27:10). The three other instances of the fut. inf. in the N. T. belong to ind. discourse. One (χωρήσειν) occurs with οὖν (John 21:25), one (ἔσεσθαι) with μηνώ, or more exactly after ἐπιθυμή (Acts 23:30, genitive absolute, μηνώθεις μοι ἐπιθυμή ἔσεσθαι), one (ἐπελεύσεσθαι) with ὁμονω (Hebrews 3:18). So that the fut. inf. “was already moribund for practical purposes.” In the papyri Moulton found the fut. inf. often a mere blunder for an aorist. In Acts 26:7, B has the fut. inf. after ἐλπίζω. In the fut. inf. the time relation is only relative, as with all infinitives, not absolute as in the ind. Elsewhere with such verbs the aorist inf. occurs as with ἐλπίζω (1 Corinthians 16:7); μέλλω (Rom. 8:18); ὁμονω (Acts 2:30); ὁμολογεῖται (Acts 14:7); προαγαλλάω (Acts 3:18); or the present inf. as with μέλλω (Acts 3:3); or the perfect inf. as with ἐλπίζω (2 Corinthians 5:11).

(δ) The Participle. The future part. was later in its development than the other tenses of this very ancient, even prehistoric, verbal adjective. The fut. part. was never developed in the Bœotian Dialect. It is by no means dead in the papyri. Moulton notes “the string of final fut. participles in O. P. 727 (ii/AD); B. U. 98 (iii/AD, etc.” See also κοινολογησόμενον P. Goodspeed 4 (ii/BC) τὰ—(σ)πατησόμενα P. Tb. 33 (BC 112), and the list in O. P. 1118, 10f (i/AD). It seems to me to be more common in the papyri than in the N. T. Simcox suggests that its rarity in the N. T. is due to the use of other phrases. Cf. μέλλω in Acts 18:14; 20:3, 7 and ἔρχομενος in Rev. 1:4, etc. The time is, of course, only relative to that of the principal verb, as in ἔρχεται προσκυνήσων (Acts 8:27). The anarthrous examples are volitive and are the most frequent. They are used for purpose or aim. Cf. Mt. 27:49 ἔρχεται σῶσων, Acts 8:27 ἔλησε προσκυνήσων, 22:5 ἐπηρεασίαν ἔξω, 24:11 ἔνεβην προσκυνήσων, 24:17 ποιήσων παρηγορήσῃ, Hebrews 13:17 ἁγγειονοῦσιν ὡς ἀποδώσοντες. Cf. also v. l. ὡς εὐρήσων in Mark 11:13. These all seem to be punctiliar. Some MSS. also read

6 See the list in Jann., Hist. Gk. Gr., p. 486.
1 Simcox, Lang. of the N. T., p. 120, suggests omission of μέλλω.
5 Moulton, Prol., p. 151.
6 Claffin, Synt. of the B. Inscr., p. 73.
7 Prol., p. 230.
8 Simcox

———, The Writers of the N. T.
ἀσπασόμενοι in Ac. 25:13. This is surely a slim showing compared with the classic idiom. Some MSS. read κοιμούμενοι in 2 Pet. 2:13, rather than ἀδικούμενοι. The future participle with the article is futuristic, not volitive. So with τὸ ἔσομαι (Lu. 22:49); ὁ παραδώσων (Jo. 6:64); τὸ συναντήσοντα (Ac. 20:22); ὁ κακώσεω (1 Pet. 3:13); τὸ γεννήσομεν (1 Cor. 15:37); ὁ κατακρινών (Ro. 8:34); τῶν λάλησομενών (Heb. 3:5).

(d) The Periphrastic Substitutes for the Future. The periphrastic future is as old as the Sanskrit and has survived the inflected form in Greek. Some of these forms are durative, probably most of them, but a few are punctiliar. Jannaris notes in Sophocles, O. C. 816, λυπηθε ἔσει, and O. T. 1146, οὐ σιωπήσας ἔσει, but no examples of the aorist participle and ἔσωμαι occur in the N. T. They are all present parts. (like ἔσεσθε μισοῦμεν, Lu. 21:17) and so durative. In the LXX we actually have the inf. with ἔσωμαι (Num. 10:2; 2 Sam. 10:11; Tob. 5:15). The use of μέλλω with the aorist inf. approaches the punctiliar future.2 Cf. ἔμελλεν προσαγαγεῖν (Ac. 12:6); μέλλουσαν ἀποκαλυφθῆναι (Ro. 8:18. Cf. Gal. 3:23), with which compare the pres. inf. in 1 Pet. 5:1. The aorist inf. occurs also in Rev. 3:2, 16; 12:4. The volitive future was sometimes expressed by θέλω and in the later Greek helped drive out the future form. It is disputed whether in the N. T. θέλω is ever a mere future. But in a case like θέλεις ἐλθεῖν (Lu. 9:54) we note the deliberative subj.3 Cf. Mt. 13:28. So θεύλοσθε ἀπολύσω (Jo. 18:39). θεύλομαι is less frequent in the N. T. than θέλω and can hardly be resolved into a mere future. It is purpose. Cf. examples with the aorist inf. in Mt. 11:27; Ac. 5:28; 17:20. With θέλω the aorist inf. is the usual construction, and it is nearly always easy to see the element of will as dominant. In a few cases θέλω seems to shade off towards the volitive fut. ind. Cf. Jo. 5:40, οὐ θέλετε ἐλθεῖν πρός με, Ac. 25:9, θέλεις—κριθήναι; Here we have an approach to the later usage, but the auxiliary has not yet lost its force. Cf. also Jo. 6:67; 9:27; Jas. 2:20, where the formula is polite. But in Jo. 7:17 the R. V. rightly preserves “willeth.” So in Mt. 16:24. Herodotus shows a fondness for ἐθέλω as a quasi-auxiliary, and the connection between him and the modern Greek usage is doubtless through the vernacular. Cf. Jebb in Vinc. and Dickson, p. 326. Even [Page 879] δύναμαι may contain an “inceptive future.” In Lu. 20:36 the MSS. vary between δύνασθαι and μέλλουσαν. But in the N. T. δύναμαι retains its real force even in examples like Mk. 2:19; 3:24; 10:38; 14:7; Jo. 13:37; Ac. 17:19. In Ac. 25:26 note γράψαι οὐκ ἔχω (cf. σχῶ τι γράψω).

III. Durative (Linear) Action.

The principles underlying the use of the tenses have now been set forth with sufficient clearness to justify brevity.

1 Cf. Goodwin, Moods and Tenses, p. 335.
3 Moulton, Prol., p. 185.
1 Jann., Hist. Gk. Gr., p. 443.
1. Indicative.

(a) The Present (Ὄ ἐνεστός) for Present Time. It has already been seen that the durative sense does not monopolize the “present” tense, though it more frequently denotes linear action.\(^2\) The verb and the context must decide.

(a) The Descriptive Present. Its graph is (-----). As with the imperfect, so with the present this is the most frequent use. Cf. ἡπολλόμεθα (Mt. 8:25). Contrast aorist σώσον. So Mk. 4:38; Lu. 8:24); σβέννονται (Mt. 25:8); ἐν ὧ ἔρχομαι (Jo. 5:7); φαίνει (1 Jo. 2:8); συνηνύνεται (Ac. 21:31); τελέσθαι (2 Cor. 12:9); θαυμάζω ὅτι σὺθως ταχέως μετατίθεθη (Gal. 1:6); ἐξιστρέφετε (4:9); ἔχουσιν (Mk. 2:19). Cf. 1 Th. 3:8. In these examples the durative action is very obvious and has to be translated by the progressive (periphrastic) form in English, ‘We are perishing,’ ‘Our lamps are going out,’ etc. But in the case of θαυμάζω (Gal. 1:6) ‘I wonder’ brings out the durative idea, though ‘ye are changing’ is necessary for μετατίθεθη. Cf. ἔχει (Jo. 3:36) where ‘has’ is durative. Cf. ζητοῦμεν (Lu. 2:48), οὐ θέλομεν (Lu. 19:14).

(b) The Progressive Present. This is a poor name in lieu of a better one for the present of past action still in progress. Usually an adverb of time (or adjunct) accompanies the verb. Gildersleeve\(^3\) calls it “Present of Unity of Time.” Cf. ἦστιν ἔως ἄρτι (1 Jo. 2:9). Often it has to be translated into English by a sort of “progressive perfect” (‘have been’), though, of course, that is the fault of the English. “So in modern Greek, ἔξιστα μὴν σ’ ἄγαπω (Abbott, Joh. Gr., p. 222). The durative present in such cases gathers up past and present time into one phrase” (Moulton, Prol., p. 119). Cf. Ἰδοὺ τρία ἔτη ἄφοῦ ἔρχομαι (Lu. 13:7); τοσαῦτα ἡτὶ δουλεύω σοι (15:29); πολὺν ἡδὸν χρόνον ἔχει (Jo. 5:6); τοσοῦτον χρόνον μεθ’ ὑμῶν εἰμὶ (14:9); ἀπ’ ἀρχῆς μετ’ ἐμοῦ ἔστε (15:27); πάλαι δοκεῖτε (2 Cor. 12:19). Cf. ἀπὸ βρέφους οἶδα (2 Tim. 3:15). [Page 880] It is a common idiom in the N. T. Cf. 2 Pet. 3:4; 1 Jo. 3:8. In Jo. 8:58 εἰμὶ is really absolute.

γ) The Iterative or Customary Present. Its graph is ( . . . . ). Cf. ἔγκρατεῖται (1 Cor. 9:25); πικτεῦω καὶ ὑπωσιαίω καὶ δουλαγωγόν (9:26 f.). So νηστεῦω διὰ τοῦ σαββάτου, ἀποδεκατεῖται πάντα δίσα κτῶμαι (Lu. 18:12); δίδωμι καὶ ἀποδίδωμι (19:8, more likely it is a new purpose in Zaccheus, when it would be aoristic); ὃ εὐλογοῦμεν (1 Cor. 10:16); ὃς κλώμεν (10:16); προλαμβάνει (11:21); καταγγέλλετε (11:26); ἐσθίει καὶ πίνει (11:29); κοιμᾶται (11:30); οὐχ ἄμαρτάνει (1 Jo. 3:6); ἄμαρτάνει (3:8). Cf. Mt. 9:17. Probably also ἄφιομεν (Lu. 11:4).

δ) The Inchoative or Conative Present. Either an act just beginning, like γίνεται (Mk. 11:23), εὐθὺς σκανδαλίζονται (4:17), λιθάζεται (Jo. 10:32), νίπτεις (13:6), ποιεῖς (13:27), ἔγαι (Ro. 2:4), or an act begun but interrupted like πεῖθε (Ac. 26:28; cf. 2 Cor. 5:11), ἀναγκάζεσθε (Gal. 2:14), δικαίοοντε (5:4), ἀναγκάζοντον (6:12). Indeed λιθάζετε (Jo. 10:32) and νίπτεις (13:6) may be regarded as conative also. This idiom is more common in the imperfect. Cf. Gildersleeve, Syntax, p. 82. In English we have to use “begin” or “try.”

\(^2\) Moulton, Prol., p. 119.
The Historical Present. These examples are usually aoristic, but sometimes durative.\(^1\) In Mk. 1:12 we have ἐκβάλλει which is durative. Cf. ἠγέτο in Lu. 4:1 (but Mt. 4:1, ἀνήγη). So in Mk. 1:21 ἐσπορεύονται is durative. The same thing seems to be true of ἀκολουθοῦσιν in 6:1.

The Deliberative Present. Rhetorical deliberative questions may be put by the present ind., but it is rather a rhetorical way of putting a negation than a question of doubt. Cf. τί ποιοῦμεν; (Jo. 11:47), ‘What are we doing?’ Cf. τί ποιήσει (Mt. 21:40) with τί ποιῶμεν (Jo. 6:28) and τί ποιήσωμεν (Ac. 6:1). The implication of the question in Jo. 11:47 is that nothing was being done. In Mt. 12:34, πῶς δύνασθε ἄγαθον ἀλλάζειν; a durative deliberative question is expressed by means of δύνασθε and the pres. inf. Cf. a similar construction with δεῖ in Ac. 16:30.\(^2\) Cf. the same idiom in an indirect question (Col. 4:6; 2 Th. 3:7; 1 Tim. 3:15). The use of the pres. ind. in a deliberative question is a rare idiom. Blass\(^3\) finds parallels in colloquial Latin and an example in Herm., Sim., IX, 9, 1.

The Periphrastic Present. The examples are not numerous in the LXX.\(^4\) Cf. Num. 14:8; 1 Ki. 18:12, etc. It is rare in [Page 881] the N. T. Moulton\(^1\) warns us that “ἔχων ἔστιν and δέον ἔστι (with other impersonal verbs) are both classical and vernacular.” In the present tense the idiom is on purely Greek lines, not Semitic. For classical examples see Gildersleeve (Syntax, p. 81). So the impersonal verbs (and ἔχω) stand to themselves\(^2\) in support from ancient Greek and the koine. Cf. ἔστιν ἔχοντα (Col. 2:23); πρέπει ἔστιν (Mt. 3:15); ἔχον (sc. ἔστι) in Ac. 2:9 and 2 Cor. 12:4; δέον ἔστιν (Ac. 19:36. Cf. 1 Pet. 1:6). Other examples are ἔστως εἴμι (Ac. 25:10), ἔστιν κατερχομένη (Jas. 3:15), ἐστίν προσαναπληροῦσα—Ἀλλάς καὶ περισσεύουσα (2 Cor. 9:12), ἔστιν ἄλληγορούμενα (Gal. 4:24) and, in particular, explanatory phrases with ὅ ἔστιν (Mt. 1:23; 27:33; Mk. 5:41; Jo. 1:41). Cf. further Ac. 5:25; Col. 1:6; 3:1; 2 Cor. 2:17.

Presents as Perfects. Here the form is that of the present, but the root has the sense of completion. The action is durative only in the sense of state, not of linear action. This is an old use of these roots.\(^3\) Cf. Lu. 15:27, ὁ ἀδελφὸς ἥκει (‘has come,’ ‘is here’). Cf. ἐξῆλθον καὶ ἤκατο (Jo. 8:42). See ch. VIII. So with κέται (Mt. 3:10), ‘the axe lies at the root of the trees’ (has been placed there); ὁ διδάσκαλος πάρεστιν (Jo. 11:28) =‘the Teacher is come.’ Sometimes νικάω is so used (cf. Ro. 12:21; Rev. 15:2). So ἰητῶνται (2 Pet. 2:20). Cf. ἄκοινο in 1 Cor. 11:18. See also ἀκούεται (1 Cor. 5:1) which is rather iterative. Ἄδικῶ in Mt. 20:13 is durative, but approaches a perfect in Ac. 25:11 (cf. πέμπω).

Perfcts as Presents. Some perfect forms have come to be used as practical durative presents, though not of the same word. Thus ὠδα from ὠδον=‘I have seen,’

\(^1\) Goodwin, M. and T., p. 11.
\(^3\) Ib.
\(^4\) C. and S., Sel., p. 68.
\(^6\) Blass, Gr. of N. T. Gk., p. 204.
\(^7\) Goodwin, M. and T., p. 9; Burton, N. T. M. and T., p. 10; Gildersl., Synt., p. 87.
‘I know’ (cf. Mt. 6:8). So ἔστηκα (Lu. 8:20), μέμνημαι (1 Cor. 11:2). As to ἄπόλωλα that occurs in the N. T. in the participle (Mt. 10:6) and the same thing is true of ἐλοθα (Lu. 4:16), which occurs in past perfect. So βέβηκα, γέγονα, δέδοικα, ἡμφιεσμα, ἐγρήγορα, ἔοικα, κέκλημα, κέκτημα, πέποιθα, πέφυκα, τέθνηκα. Cf. Jannaris, Hist. Gk. Gr., p. 438.

(k) Futuristic Presents. These are usually punctiliar, but some are durative.4 Gildersleeve (Syntax, p. 83) calls this “Praesens Propheticum.” The absence of ἐμ in the N. T. is noticeable. The papyri illustrate abundantly this futurisic present (Moulton, Prol., p. 120). Since the pres. ind. occurs for past, present [Page 882] and future time it is clear that “time” is secondary even in the ind. In the other moods it has, of course, no time at all. As examples of the durative present in this sense take παραδίδοται (Mt. 26:45), ἀναβαινομεν (Mk. 10:33), ὑπάγεσαι and ἔρχομεθα (Jo. 21:3), διέρχομαι (1 Cor. 16:5), ἔχομεν (2 Cor. 5:1). Μέλλω and the pres. inf. is, of course, a prospective present. This idiom is very common in the N. T., 84 examples with the pres. (6 aor., 3 fut.) ind., though, of course, μέλλω is not always in the pres. ind. Cf. Mt. 2:13; 16:27, etc.

(b) The Imperfect for Past Time (Ὁ παρατατικός). Here we have the time-element proper, the augment probably being an old adverb for “then,” and the action being always durative. “The augment throws linear action into the past.”1 The absence of a true imperfect in English makes it hard to translate this Greek tense.

(a) Doubtful Imperfects. They are sometimes called “aoristic” imperfects. This term is not a happy one, as Gildersleeve2 shows in his criticism of Stahl for his “synonym-mongering” and “multiplication of categories.” The only justification for the term is that, as already shown in the discussion of the aorist, it is not possible always to tell whether some forms are aorist ind. or imperf. ind. The same root was used for both forms, as only one form existed and it is hard to tell which tense the form is. A certain amount of obscurity and so of overlapping existed from the beginning.3 We see this difficulty in ἤν, ἤφην, ἤλεγον, etc., particularly in verbs of saying, commanding, etc.4 Modern Greek conceives of ἔπηγα, ἔπηγα and ἔφηρα as aorists (Thumb, Handb., p. 143). Thumb (Th. L.-Z., xxviii, 423) thinks that in the N. T. ἔφηραν had begun to be treated as aorist, but Moulton (Prol., p. 129) demurs, though he admits the possibility of punctiliar action in πρόσφερε τὸ δῶρον in Mt. 5:24 (ib., p. 247). See also φέρε καὶ ἤλεγκτε, φέρε καὶ βάλε in Jo. 20:27. But one must not think that the Greeks did not know how to distinguish between the aorist and the imperfect. They “did not care to use their finest tools on every occasion,”5 but the line between aorist and imperfect was usually very sharply drawn.6 The distinction is as old

as the Sanskrit.\footnote{Whitney, Sans. Gr., p. 201 f.} In modern Greek it still survives, though the difference between ἔλεγεν and ἔπειν is well-nigh gone,\footnote{Moulton, Prol., p. 128. Cf. Jann., Hist. Gk. Gr., p. 436.} if it ever existed. The same thing is true of the usage of Achilles Tatus.\footnote{Sexauer, Der Sprachgebr. d. röm. Schriftst. Achilles Tatius, 1899, p. 29.} Hence we need not insist that ἦν (Jo. 1:1) is strictly durative always (imperfect). It may be sometimes actually aorist also. So as to ἔφη (Mt. 4:7); ἔλεγεν (Mk. 4:21, 24, 26, 30, etc.), etc. Blass, Gr. of N. T. Gk., p. 192, fails to make a clear distinction. Note ἐκέλευον (Ac. 16:22).

(b) The Descriptive Tense in Narrative. But the linear action may be insisted on in the true imperfect. It is properly “nichtpunktuell.” Though less frequent in Homer than the aorist it often “divides the crown with the aorist.”\footnote{Gildersl., Am. Jour. of Philol., 1908, p. 242.} The imperfect is here a sort of moving panorama, a “moving-picture show.” The modern Greek preserves this idiom (Thumb, Handb., p. 121). In 1 Cor. 10:3 f. ἔφηγον and ἔπιστευον give the summary (constative) record, while ἔπιστευε ἔστευε presents an explanatory description. See further ἔποιήθην ἄν καὶ δημῆκον (Mt. 4:11); ἔπεσεν καὶ ἔδιδο (13:8); ἔντοστα ὡς καὶ ἔκαθεν (25:5). Sometimes the change from aorist to imperfect or vice versa in narrative may be due to the desire to avoid monotony. In Mt. 26:60 we have ὠόχ ἔστχ ἐφήν, in Mk. 14:55 ὡ ὀχ ἐφήσκον. The aorist tells the simple story. The imperfect draws the picture. It helps you to see the course of the act. It passes before the eye the flow of history. It is the tense of Schildung.\footnote{Hultsch, Der Gebr. d. erzählenden Zeitf. bei Polyb.} Cf. ἔλεγεν τὸ ἔνοικα αὐτοῦ (Mt. 3:4), ἔξερεστε (3:5), ἔβαπτιζοντο (3:6). The whole vivid scene at the Jordan is thus sketched. Then Matthew reverts to the aorist (3:7). Cf. ἐφηκτον in Jo. 19:3. So ὡς ὀφειλαν αὐτῳ (Mt. 18:28) aptly describes a debtor as ἔπινεν, ‘the choking in his rage.’ See the picture of Jesus in ἔθεωροι (Mk. 12:41). Cf. ἔθεωρον (Lu. 10:18), ἐξελόγοντο (14:7), περεβιλέπτε (Mk. 5:32), ἔξερεσταν (Lu. 2:47; cf. Ac. 2:12). Cf. Lu. 9:43–45; 16:19; Mt. 8:24. A good example is ἐκαλίετο ῥημαίον (Mk. 9:20). Cf. further, ἔπιστευε καὶ προσηύχετο (Mk. 14:35), the realistic scene in Gethsemane (Peter’s description probably); ἐκεθέμε καὶ ὀδικέ διδο (Lu. 15:16); ὀμίλουν πρὸς ἄλληλος (24:14); ἔξερεσοῦντο (Mt. 7:28); ἔτθει (2 Cor. 3:13); ἠκολούθει καὶ ἐκαλίετο (Mt. 26:58). A splendid example of the descriptive durative is ἐπάπα (Mt. 26:63) = “kept silent.” So ἐκέλομεν (Ac. 21:3). Note ἔνομιζον (Ac. 21:29) between past perfect and aorist. Cf. ἔγειρε [Page 884] (Jo. 11:36), διετήρει (Lu. 2:51. Cf. 2:19). See the picture of Noah’s time in Lu. 17:27. Cf. ἐπερεφόντο χαῖροντες (Ac. 5:41). Quite striking is ἠκατίζομεν in Lu. 24:21. See further for the “imperfect and aorist interwoven” in narrative Gildersleeve, Syntax, p. 91. An artist could describe his work by ἐποίησα or ἐποίον. Gildersleeve notes (ib., p. 93) that in the inscriptions of the fourth cent. B.C. the imperfect is absent. It becomes common again in the imperial time.

(g) The Iterative (Customary) Imperfect. Sometimes it is difficult to tell whether an act is merely descriptive or is a series. Cf. πολλοὶ πλούσιοι ἐβαλλον (Mk. 12:41); ἐπινίγοντο (5:13), where the separate details are well described by the vivid imperfect. The notion of repetition is clearly present in ἡρώτα ἔλεομοσύνη (Ac. 3:3); ἡρώτα.
αὐτὸν (Mk. 7:26). Cf. Jo. 4:31. The modern Greek keeps this usage (Thumb, Handb., p. 122). It is not necessary to see any “aoristic” notion here.1 Cf. παρεκκλάοντι σπουδαίος (Lu. 7:4, W. H.); παρήγει (Ac. 27:9). It is well shown in Βαρνάβας ἐβούλετο, Παῦλος ἦξιον (15:37 f.), the one opposing the other. In Ac. 24:26 repetition is shown in ὑμῖλει by πυκνότερον μεταπεμψόμενον. Cf. ἄλλοι δὲ ἄλλο τι ἐπεφώνουν (21:34); ἐπυνθάνετο in verse 33; καθ ἡμέραν ἐκκυμοσύνην (Mt. 26:55); ἔτυπνον (27:30); ὅπως ἤκουσαν (Mk. 6:55); κατηγόρουν πολλὰ (15:3); ἄπελεν δὲν παρητοῦντο (15:6). Cf. εἰσέβεβλητο ἄπολλόειν ἀν ἑθελον, Mt. 27:15; ἐνένευον (Lu. 1:62); ἐξάπτυτον (Jo. 3:22); ἑδίδοσαν (19:3); ἐξόννυεσ (21:18); ἐτύθουσαν (Ac. 3:2); ἐπηράσκεσαν καὶ διεμέρισον (2:45. Cf. 4:34). Moulton (Prol., p. 128) represents the iterative imperfect by the graph ( . . . . .). Cf. Ac. 16:18; 18:8; Mk. 3:11; 4:33 f. A good example is in Lu. 2:41, ἔκοπτετο κατ ἔτος.

(d) The Progressive Imperfect. Sometimes the imperfect looks backward or forward, as the case may be.2 Thus ὁ θεός μου ἐξετῆτε με (Lu. 2:49); ἦν ἐφεστε ἡρως (1 Jo. 2:7); ἐνεκστοτήμα (Ro. 15:22); ἠμελείων (Rev. 3:2). This idea is, however, often expressed by μελλω, but without the backward look also. Cf. Lu. 9:31; 10:1; Jo. 4:47; 6:71, etc. In ἐκνυκνύουσαν (Lu. 8:23) the verb itself expresses peril or danger.

Gildersleeve (Syntax, p. 97) calls this idiom “Imperfect of Unity of Time.” Cf. the “progressive” present in (a), (β). The Text. Recept. gives a good example in ἦν πάλαι τὸ πλόον ἐν μέσῳ τῆς θαλάσσης (Mk. 6:47). See also ἦν γὰρ ἐξ ἱκανών χρόνων θέλων ἵδιαν αὐτὸν (Lu. 23:8).

[Page 885] (e) The Inchoative or Conative Imperfect. Here the accent is on the beginning of the action either in contrast to preceding aorists (just begun) or because the action was interrupted (begun, but not completed). The two sorts of inchoative action may be represented by two graphs, thus (−) for the first, (−) for the second.1

In English we have to say “began” for the one, “tried” for the other. The modern Greek maintains this idiom (Thumb, Handb., p. 121). As examples of the first sort where “began” brings out the idea, note ἐδίδασκε (Mt. 5:2. Cf. Jo. 7:14); ἐλάλει (Mk. 7:35. Cf. Lu. 1:64); ἔκλεισεν (14:72); διερήσετο (Lu. 5:6); διειλάλουν (6:11); συνεπληρώντο (8:23); ἐπεσκείαζεν (9:34. Note ingressive aorist ἐθοβιβήθησαν); ἐπεφώσακεν (25:4); ἐπεγίγνωσκαν (Ac. 3:10); ἐκήρυσαν (9:20); διεκρίνετο (11:2); κατήγγέλλον (13:5); ἐθορύβουν (17:5); παρωξύνετο (17:16); ἀπελογιζότο (26:1); ἐπουρύντο (27:18); ἔλυετο (27:41). Cf. Lu. 13:13, 17. In ἐκάλακαν (Lu. 1:59) we see both ideas combined. The action was begun, but was sharply interrupted by οὗτος, ἄλλα from Elizabeth. Cf. νῦν ἐζήτων (Jo. 11:8). A good instance of the interrupted imperf. is προσέφερεν in Heb. 11:17. Examples of the conative imperfect (action begun, but interrupted) are διεκόλουθον (Mt. 3:14); ἐδίδουν (Mk. 15:23, in contrast with οὔκ ἔλαβεν); ἐκκυμοσύνην (Lu. 9:49); ἐζήτουσαν (Jo. 10:39; cf. 19:11); ἐνόμιζεν (Ac. 7:25. Note οὐσ σωφήκαν); συνῆλλασαν (7:26. Note ἐπώσατο); ἐπείδθαν (Ac. 18:4); ἠνάγκαζον (26:11); but not Gal. 1:13. Moulton (Prol., p. 247) cites the conative pres. ἄναγκαζον (Gal. 6:12).

1 Blass, Gr. of N. T. Gk., p. 191.
3 Gildersl., Synt., p. 94 f.
1 Cf. Moulton, Prol., p. 128.
The “Negative” Imperfect. This is not a very happy piece of nomenclature, to use Gildersleeve’s remark about Stahl’s overrefinement, and yet it is the best one can do. “The negative imperfect commonly denotes resistance to pressure or disappointment.”¹ As examples note ὁ δὲ οὐκ ἤθελεν (followed by ἔβαλεν, Mt. 18:30) and preceded by παρεκάλει (iterative), οὐδὲς ἐδίδου (Lu. 15:16), οὐκ ἤθελεν (15:28. Note ὡργίσθη), οὐκ ἔπιστευεν (Jo. 2:24), οὗ γὰρ ἤθελεν (Jo. 7:1), οὐδὲς ἐτέλμα (21:12), οὐκ ἐδον (Ac. 19:30). Cf. Mt. 22:3.

The “Potential” Imperfect. This is a peculiar use of the tense for present time, where the present ind. fails to meet the requirement of the situation. Gildersleeve (Syntax, p. 97) calls it “modal” use, ἔδει, etc. The unfulfilled duty comes as a surprise. This “modal” force of the imperfect ind. appears still in the modern Greek (Thumb, Handb., p. 128). There are several varieties of it. Verbs of wishing form one class of passages. In a case like ἐβουλόμην (Ac. 25:22), βούλομαι would be too blunt (cf. 1 Tim. 2:8). The exact idea is ‘I was just on the point of wishing.’ It is freely rendered ‘I could wish’ or ‘I should wish.’ In 2 Cor. 1:15 ἐβουλόμην πρότερον has its usual signification. In Phil. 13 f. ἐβουλόμην (a past preference) is set over against οὐδὲν θέλησα (a past decision).¹ Another example is ἤθελον παρεῖναι πρὸς ύμᾶς ἄρτι (Gal. 4:20). Note ἄρτι. For the force of the present see 1 Cor. 10:20; Col. 2:1; and especially Lu. 19:14, οὐ θέλομεν. In Jo. 6:21, ἤθελον, the usual notion occurs. An example is found in Ro. 9:3, ηὐχόμην, where Paul almost expresses a moral wrong. He holds himself back from the abyss by the tense. He does not say εὐχομαι (cf. 2 Cor. 13:7), nor εὐξαίμην ἄν (Ac. 26:29). Note οὗ ψεῦδομαι in Ro. 9:1. In Ac. 27:29 ηὐχοντο has its usual force.

Wishes about the present are naturally unattainable. In the ancient idiom εἶθε or εἶ γάρ was used with the imperf. ind. or ὅφελον and the inf. Callimachus, b.c. 260, uses ὅφελον with the ind. The augmentless form ὅφελον appears in Herodotus (Moulton, Prol., p. 201). In the N. T. only ὅφελον is used with the imperf. for wishes about the present. Cf. ὅφελον ἀνείξεσθε (2 Cor. 11:1); ὅφελον ἦς (Rev. 3:15).

Verbs of propriety, possibility, obligation or necessity are also used in the imperfect when the obligation, etc., is not lived up to, has not been met. Winer² has stated the matter well. The Greeks (and the Latins) start from the past and state the real possibility or obligation, and the reader, by comparing that with facts, notes that the obligation was not met. The English and the Germans start from the present and find trouble with this past statement of a present duty (an unfulfilled duty). A distinction is usually drawn between the present and the aorist infinitives when they occur with these verbs (ἔδονατο, ὅφελον, ἔδει, καλὸν ἦν, κρεῖττον ἦν, ἄνηκεν,

1 Burton, N. T. Moods and Tenses, p. 15.

Winer, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

2 W.-Th., p. 282.
καθῆκεν). The present inf. refers more directly to the present, the aorist to an action in the past. This is, however, only by suggestion. Thus in Mt. 18:33, οὐκ ἔδει καὶ σὲ ἔλεγχαι, note ὡς κἀγὼ σὲ ἤλέγχα. Cf. also Mt. 23:23 ταῦτα δὲ ἔδει ποίησαι κάκεινα μὴ ἀφεῖναι, (25:27) ἔδει σε βαλεῖν, (26:9) ἔδοντο πραθῆναι καὶ δοθῆναι, (26:24) καλὸν ἦν αὐτῷ (no inf. here), (Ac. 22:22) οὐ γὰρ καθῆκεν αὐτόν καθῆναι, (24:19) οὗς ἔδει ἐπὶ σοῦ παρεῖναι, (26:32) ἀποκλείσαθι ἔδοντο (note perf. inf.), (27:21) ἔδει μὴ ἀνάγεσθαι [Page 887] κερδῆσαι τε, (2 Pet. 2:21) κρείττον ἦν αὐτοῖς μὴ ἐπεγεινωκέναι (perf. inf.), (2 Cor. 2:3) ἢν ἔδει με χαίρειν, (Col. 3:18) ὡς ἄνηκεν ἐν κυρίῳ. (Cf. Eph. 5:4) But it must not be supposed that these imperfects cannot be used in the normal expression of a past obligation or possibility that was met. The context makes the matter clear. Cf. Lu. 13:16; 22:7; 24:26; Jo. 4:4, etc. In Lu. 15:32 ἔδει applies to both the past and present, probably with an implication against the attitude of the elder brother. In Heb. 2:10 ἐπερεῖν and 2:17 ὠφείλεν have their natural past meaning.

Another instance where the imperfect refers to present time is in the second-class conditional sentences (see chapter XIX, Mode). When a condition is assumed as unreal and refers to present time, the imperfect tense is used both in the protasis and the apodosis in normal constructions. See apodosis in Mt. 26:24 and in Ac. 26:32 (both quoted above). It is only the tense that calls for discussion here. Cf. άμαρτίαν οὐχ ἐξήσασθαι (Jo. 15:22, 24), where νῦν δὲ is used to explain the point. So οὐκ ἐξῆσθαι (Jo. 19:11). In 1 Cor. 5:10, ὠφείλετε ἢρα—ἐξελθεῖν, and Heb. 9:26, ἔπει ἔδει—παθεῖν, we only have a apodosis. Cf. ἐὰν ἐγίνοσκαν ἄν (Lu. 7:39) as a type of the more usual construction with ἄν. Cf. Lu. 17:6. In Heb. 11:15 the imperfects describe past time.

(θ) In Indirect Discourse. In general the imperfect in indir. discourse represents an imperfect of the direct discourse. But sometimes with verbs of perception it is relative time and refers to a time previous to the perception.1 Thus ἐξήσαν τὸν Ἰούδανν ὅτι προφήτης ἦν (Mk. 11:32); ἐδούν ὅτι οὐκ ἦν (Jo. 6:22. Cf. οὐκ ἔστιν in verse 24); ὅτι προσαίτης ἦν (9:8); ἐπεγίνωσκαν ὅτι ἦν ὁ καθήμενος (Ac. 3:10), while in 4:13 ἦσαν is rightly antecedent to ἐπεγίνωσκαν, ἠδειαν ὅτι—ὑπῆρξεν (16:3). In Ac. 3:10 the idiom approaches that in Jo. 1:15, οὕτως ἦν ὅ ἐπότως (a parenthesis), where the verb is thrown back to past time. Our idiom more naturally calls for ἔστιν here. Gildersleeve2 calls this the “imperfect of sudden appreciation of real state of things.”

(i) The Periphrastic Imperfect. It is easy to see how in the present, and especially in the future, periphrastic forms were felt to be needed to emphasize durative action. But that was the real function of the imperfect tense. The demand for this stressing of the durative idea by ἦν and the present participle was certainly [Page 888] not so great. And yet it is just in the imperfect in the N. T. that this idiom is most frequent. It is not unknown in the ancient Greek.1 Schmid2 finds it rare in the κοινή, especially in the imperfect, where the N. T. is so rich in the idiom. He suggests the Aramaic

---

1 Blass, Gr. of N. T. Gk., p. 192; Abbott, Joh. Gr., p. 339. This imperfect is particularly common in John.
2 Synt., p. 96 f.
Schmid SCHMID, W., Der Atticismus in seinen Hauptvertretern. 4 Bde. (1887–1897).
2 Atticismus, III, p. 113 f.
influence, particularly as that language is fond of this periphrasis. Periphrasis is thoroughly Greek, and yet in the N. T. we have unusual frequency of a usage that the κοινὴ has not greatly developed except “where Aramaic sources underlie the Greek” (Moulton, *Prol.*, p. 226). Gildersleeve (*Syntax*, p. 124) gives classical examples from Pindar, Thuc., Isocrates, etc. It is true that in the N. T. the pres. participle with ἦν occurs chiefly in Mark (19 times), Luke (31), Acts (28, but 17 of them in chapters 1–12), and just in those portions most subject to Aramaic influence (possible Aramaic sources). Only 7 occur in Acts 13–28, and these mainly in the speech in 22 delivered in Aramaic.3 The LXX4 gives abundant illustration of this analytic tendency in the imperfect. Cf. Gen. 37:2; Deut. 9:24; Judg. 1:7. Cf. Thackeray, *Gr.*, p. 24. From *Pelagia* (p. 18) Moulton (*Prol.*, p. 249) cites ἤν ἀπερχόμενος. For a papyrus illustration see ὅσα ἦν καθήκοντα, P. Oxy. 115 (ii/A.D.). The idiom itself is therefore Greek, but the frequency of it in the N. T. is due to the Hebrew and Aramaic. Matthew has it 10 times, John 11, Paul 5.5 The Pauline examples (Gal. 1:22 f.; Ph. 2:26) are more like the classic independence of the participle. It is usually the descriptive imperfect that uses the periphrastic form. So ἦν διδάσκων (Mt. 7:29); ἦν ἐχον (Mt. 10:22); ἦναν ἀναβαινοντες (10:32); ἦν προσευχόμενον (Lu. 1:10); και ὅμων ἦν (Lu. 24:32). But sometimes it is the iterative imperfect as in ἦν διανεύο (Lu. 1:22); ἦν διανεύον τὸ καθ ἡμέραν (19:47).6 In Lu. 5:17 the periphrastic imperfect and past perfect occur in the same sentence. In Lu. 23:12 note προϋπήρχον ἰντες (cf. Ac. 8:9).

(k) Past Perfects as Imperfects. The present perfects of these verbs are merely presents in sense when compared with other verbs. So the past perfects have only an imperfect force. Thus ἦνει (Mt. 27:18); ἐλθε (27:15); ἵστηκε (Jo. 18:5).

(c) The Future for Future Time. The future is mainly aoristic (punctiliar), as has already been shown, but sometimes durative.7 The broad lines of the problem have already been [Page 889] drawn. As already shown, the modern Greek has a special durative future by means of θὰ λῶ (pres. subj.). See Thumb, *Handb.*, p. 160. A summary statement of the durative future is given.

(a) The Three Kinds of Action in the Future (futuristic, volitive, deliberative). These occur here also. Thus merely futuristic are σώσει (Mt. 1:21); βαπτίσει (Mt. 3:11); ἔλημοσύνα (12:21); ἔσται (Lu. 1:14 f.); ἐπιστρέψει and προελεύσεται (1:16 f.); ἔλυσα (Jo. 12:32); ζήσον (Ro. 6:2); κυριεύσει (6:14); βαστάσει (Gal. 6:5); ἐπιτελέσει (Ph. 1:6); ἀληθευτα (1:18); ἐπιπερικήσεις (Rev. 9:6). Burton1 calls this “the progressive future.” Cf. Ac. 7:6. Durative also is ἀληθεύσει with οὐ μή (Lu. 10:19). So οὐ μή δωρεά (Jo. 4:14; cf. 6:35); οὐ μὴ ἐκδόθησαν (Jo. 10:5). Examples of the volitive durative future are the legal precepts (common in the LXX) so often quoted in the N. T. Cf. οὐ φοινυσει (Mt. 5:21); οὐ μοιχεύσεις (5:27); οὐκ ἐποικήσεις, ἀποδώσεις (5:33); ἀγαπήσεις (5:43; cf. ἀγαπάτε, verse 44); ἔσεσθε (5:48), etc.

6 Burton, N. T. M. and T., p. 16.
1 N. T. M. and T., p. 32.
Perhaps οἰκοδομήσω (Mt. 16:18) = ‘I will’ rather than ‘I shall.’ In 1 Tim. 6:8, τούτος ἥκεσθη, the resolution is volitive. It is possible that we have the volitive use in Mt. 4:4, οὐκ ἔσται ἄρτων μόνῳ ζήσεται ὁ ἄνθρωπος. The deliberative future may also be durative. Cf. Mt. 18:21, ποσάκις ἡμαρτήσαι; (merely interrogative) and Lu. 14:34, ἐν τίνι ἄρτοθήσεται; (rhetorical). Cf. aor., pres. and fut. ind. in Mt. 28:7.

(b) The Periphrastic Future. The very failure of the future to express durative action clearly led to the use of the present participle with ἔσομαι. In Lysias (2), 13, note ἔσονται γενόμενοι more like a future punctiliar (or perfect). Cf. Mt. 10:22 and 24:9, ἔσοσθε μισούμενοι (Mk. 13:13; Lu. 21:17); (Mk. 13:25) ἔσονται πίπτοντες, (Lu. 1:20) ἔσονται σωμάτων, (5:10) ἔσονται ζωγράφουν, (17:35) ἔσονταί ἁλιθοῦσαι, (21:24) ἐσται πατούμενη, (1 Cor. 14:9) ἐσεσθε καλοῦντες. Cf. Gen. 4:12, 14; Deut. 28:29; Mal. 3:3, etc. The frequent use of μέλλω and the pres. inf. (durative) has already been mentioned. The fut. of μέλλω itself occurs (Mt. 24:6) with the pres. inf.

2. Subjunctive and Optative. The rarity of the pres. subj. (and opt., of course) has already been commented upon. The aorist is used as a matter of course here unless durative action is to be expressed. A few examples will suffice. Thus τί ποιῶμεν; (Jo. 6:28); ἔδω ἔχετε (Mt. 17:20); ἔχομεν (Ro. 5:1). The subjunctive is very common indeed, but not in the present tense. There is in the N. T. no instance of a periphrastic present subj. [Page 890] or optative. John’s free use of the pres. subj. has already been noted (Abbott, Joh. Gr., pp. 369 ff.). Cf. ἔδω ποιήτε (13:17); ἔδω μαρτυρῶ (5:31). In Col. 1:18 note γένηται προτεύον like ἐγένετο στιλβόντα (Mk. 9:3). The present opt. survives in δυναύμην (Ac. 8:31); ἔχοι (Ac. 17:11); βούλωτο (Ac. 25:20); θέλω (Ac. 17:18; Lu. 1:62); ἐθέ (9:46; 15:26; 18:36; 22:23; Ac. 10:17).

3. Imperative. The contrast between the present imperative and the aorist subj. in prohibitions had to be set forth in connection with the punctiliar-aorist subj. The present imper. was found to be regularly durative. In Paul’s frequent use of the pres. imper. with μή the inchoative or conative or customary (prohibiting a course of conduct) use of the present is noticeable, as in μή ἀμέλει (1 Tim. 4:14); μηδενί ἐπιτίθει (5:22); μηδὲ κοινώνει (ib.); μή μεθύσκεσθε (Eph. 5:18); μή πεσόμεθα (Col. 3:9). Cf. μή ἄπασται (Lu. 6:30). In general μή is used with the present imper. to forbid what one is already doing. Cf. μή φοβησότε (Jo. 6:20); μή κρίνετε (Mt. 7:1); μηκέτι ἀμέλταντε (Jo. 5:14); μή θαμώμεστε (5:28); μή δοκεῖτε (5:45); μηκέτι σκυλέ (Lu. 8:49). The durative force of the pres. imper. is well seen in καθεύδετε καὶ ἄνασαέσθε (Mt. 26:45). Cf. also πάντωτε χαίρετε, διὰλειπτῶς προσεύχεσθαι, ἐν παντὶ εὐχαριστεῖτε (1 Th. 5:16–22). A good example is seen in Ac. 18:9, Μή φοβοῦ, ὀλλὰ λάλει καὶ μή σιωπήσης, ‘He had been afraid, he was to go on speaking, he was not to become silent.’ Cf. 2 Tim. 2:16, 22 f. The contrast between aorist and pres. imper. is often drawn in the N. T., as in Jo. 5:8; Mt. 16:24. We note the periphrastic pres. imper. in ἰσόθ εὑνόν (Mt. 5:25); ἰσόθ ἔχον (Lu. 19:17); ἰστε γινώσκοντες (Eph. 5:5); ἔστωσαν καίωμενοι (Lu. 12:35). Cf. Judg. 11:10; Prov. 3:5; γίνου γρηγορῶν (Rev. 3:2); 2 Cor. 6:14. Moulton (Prol., p. 249) cites from Pelagia (p. 26) ἐσο γινώσκων.

2 Blass, Gr. of N. T. Gk., p. 204.
4. INFINITIVE. The present inf. can be assumed to be durative. The matter has had some discussion in connection with the aorist inf. (punctiliar), but a few further examples will illustrate the usage. Cf. τῶς αὐτῶν γράφειν ὑμῖν (Ph. 3:1) and τὸ ἄγαπᾶν αὐτῶν (Mk. 12:33) where the linear action is obvious. Indeed the force of the pres. inf. is so normal as to call for little comment. Cf. οὐδένα αὐτόν (Jo. 5:30. Cf. Mt. 6:24); τὸ θέλειν (Ro. 7:18); ἀμαρτάνειν (1 Jo. 3:9); προσεύχεσθαι (1 Cor. 11:13); τοῦ πατέρας (Lu. 10:19), etc. For the distinction between the [Page 891] aorist and pres. inf. see ἐμβήναι—καὶ προάγειν (Mt. 14:22). Cf. αἰτεῖν in Ac. 3:2. The frequent use of μέλλω and the pres. inf. has already been twice mentioned. In indirect discourse the pres. inf. merely represents the pres. ind. of the direct discourse. Cf. εἶναι (Mt. 22:23; Ro. 1:22); ἔχειλλαίν (Lu. 11:18), etc. There is one instance in the N. T. of a pres. inf. in indir. discourse representing an imperfect ind. Luke has a periphrastic pres. inf., ἐν τῶς εἶνα τοῦ προσεχόμενον, which occurs twice (9:18; 11:1). Cf. 2 Chron. 15:16. Only two fut. infs. in the N. T. seem to be durative (Ac. 11:28; Jo. 21:25). The pres. inf. is most natural with ἐν (cf. Lu. 8:40), and is common with διὰ (cf. Mt. 13:5 f.); ἐίς (Ro. 12:2); but not (pres. 3, aor. 9) with πρός (Mk. 13:22). It is used only once with πρό (Jo. 17:5) and is not used with μετὰ. Cf. Burton, N. T. Moods and Tenses, p. 49 f.

5. PARTICIPLE. The present participle, like the present inf., is timeless and durative.

(a) The Time of the Present Participle Relative. The time comes from the principal verb. Thus, in πωλοῦντες ἔφερον (Ac. 4:34. Cf. πωλῆσας ἤνεγκεν in verse 37) the time is past; in μεριμνῶν δύναται (Mt. 6:27) the time is present; in ἐξεσθε μισούμενοι (Mt. 10:22), ὁ βλέπων ἰδοῦσε (Mt. 6:18), ἰδὼν τὸν ὡς τὸν ἀνθρώπον ἐρχόμενον (24:30) it is future. Cf. Mt. 24:46; Lu. 5:4; 12:43. Further examples of the pres. part. of coincident action are seen in Mt. 27:41; Mk. 16:20; Jo. 6:6; 21:19; Ac. 9:22; 10:44; 19:9.

(b) Futuristic. Just as the pres. ind. sometimes has a futurist sense, so the pres. part. may be used of the future in the sense of purpose (by implication only, however). Cf. εὐλογοῦντα (Ac. 3:26); ἐπαγγέλλοντας (15:27); διακονῶν (Ro. 15:25). In Ac. 18:23, ἐξῆλθον διερχόμενον τῇ Γαλατικῇ χώρᾳ, the pres. part. is coincident with the verb. In 21:2 f. the pres. parts. διαπεράζοντας and ἀποφορτίζομενον are futurist (cf. 3:26; 15:27). Blass, page 189, notes ὁ ἐρχόμενος (Jo. 11:27) and ἐρχόμενον (1:9). This use of the pres. part. is common in Thuc. (Gildersleeve, A. J. P., 1908, p. 408).

(c) Descriptive. But usually the pres. part. is merely descriptive. Cf. Mk. 1:4; Ac. 20:9; 2 Cor. 3:18; 4:18. There is no notion of purpose in ἰδὼν (Ac. 21:16). In τοὺς σωζομένους (Ac. 2:47) the idea is probably iterative, but the descriptive durative is certainly all that is true of τοὺς ἀγαλματισμοῦντας in Heb. 10:14 (cf. 10:10).

[Page 892] (d) Conative. It may be conative like the pres. or imperf. ind. as in πέπου (Ac. 28:23) or τοὺς ἐπιστρεφόμενος (Mt. 23:14).

3 Burton, N. T. M. and T., p. 46.
4 Moulton, Prol., p. 204.
1 Lu. 20:6, contrary to Burton, N. T. M. and T., p. 52.
(e) Antecedent Time. By implication also the pres. part. may be used to suggest antecedent time (a sort of “imperfect” part.). So τυφλὸς ὄν ἄρτι βλέπω (Jo. 9:25). See further Mt. 2:20; Jo. 12:17; Ac. 4:34; 10:7; Gal. 1:23. Cf. ὁ βαπτίζων (Mk. 1:4).

(f) Indirect Discourse. Cf. p. 864. An example of the pres. part. with the object of a verb (a sort of indir. disc. with verbs of sensation) is found in εἴδαµεν τινα ἐκβάλλοντα δαιµόνια (Lu. 9:49). The pres. part. is common after εἶδον in Rev. (10:1; 13:1, 11; 14:6; 18:1; 20:1, etc.). Cf. Ac. 19:35, γινώσκει τὴν πόλιν οὖσαν.

(g) With the Article. The present participle has often the iterative (cf. pres. ind.) sense. So ὁ κλέπτων (Eph. 4:28)=‘the rogue.’ Cf. ὁ καταλύων (Mt. 27:40); oἱ ζητοῦντες (2:20). The part. with the article sometimes loses much of its verbal force (Moulton, Prol., p. 127; Kühner-Gerth, I, p. 266). He cites from the papyri, τοὺς γαμοῦσι, C. P. R. 24 (ii/A.D.). Cf. τοὺς σοζοµένους (Ac. 2:47). So in Gal. 4:27, ἡ οὐ τίκτουσα, ἡ οὐκ ὁδίνουσα.

(h) Past Action Still in Progress. This may be represented by the pres. part. So Mk. 5:25; Jo. 5:5; Ac. 24:10. Cf. Burton, N. T. Moods and Tenses, p. 59.

(i) “Subsequent” Action. Blass1 finds “subsequent” action in the pres. parts. in Ac. 14:22 and 18:23. But in 14:22 note ὑπέστρεψαν εἰς τὴν Λύστραν—ἐπιστηρίζοντες τὸς πνεύµας τῶν μαθητῶν, the aorist ind. is “effective” and accents the completion of the action. The pres. part. is merely coincident with the “effective” stage. It is a point, not a process in the aorist.

(j) No Durative Future Participles. The few fut. parts. in the N. T. seem to be punctiliar, not durative, unless τὸ γενησόνυμον (1 Cor. 15:37) be durative, but this example is pretty clearly ingressive punctiliar.

IV. Perfected State of the Action (ὁ τέλειος ἢ συντελικός).

1. The Idea of the Perfect.

(a) The Present Perfect. The oldest of the perfects. “The perfect is a present perfect.”2 Such it was in the beginning undoubtedly. The past perfect and future perfect are both built upon the present perfect stem. Both are comparatively rare, especially the future perfect. The use was at first also confined to the indicative. Moulton (Prol., p. 140) calls it the most important exegetically of the Greek tenses.

(b) The Intensive Perfect. This use (or the iterative) was probably the origin of the tense. So ὅλλοκαί=‘I perish,’ ὅλλολα=‘I perish utterly.’1 Cf. also θνῆσκω, τέθνηκα; μιµήσκω, μέµησαι. The iterative process is seen in ἄπεσταλκα (2 Cor. 12:17), ἐώρακεν (Jo. 1:18). The “effective” aoristic present is close kin to the perfect,

as we have already seen, in ἥκω (Lu. 15:27); ἀκοῦω (1 Cor. 11:18); ἀδικῶ (Ac. 25:11). Reduplication, though not always used, was an effort to express this intensive or iterative idea. So likewise the aorist of an action just accomplished, like ἔγνων τί ποιήσω (Lu. 16:4), is near in idea to the present perfect, though there is a difference. More about the intensive perfect a little later.

(c) The Extensive Perfect. This comes to be the usual force of the tense. Gildersleeve has put the thing finely: “The perfect looks at both ends of an action.” It “unites in itself as it were present and aorist, since it expresses the continuance of completed action.” That is to say, the perfect is both punctiliar and durative. The aorist (punctiliar) represents an action as finished, the linear present as durative, but the perfect presents a completed state or condition. When the action was completed the perfect tense does not say. It is still complete at the time of the use of the tense by speaker or writer. In Jo. 1:32 ἔδεαμαι in the mouth of John the Baptist refers to the baptism of Jesus some weeks before, but he still has the vision. Cf. 1:34, ἔφρακα καὶ μεμαρτύρηκα, where there is a difference of time between the two words. When Andrew said to Peter εὑρήκαµεν (1:41) his discovery is recent and vivid. No single graph for the perfect can therefore be made. In some cases the line of connection from the act (punctiliar) to the time of speaking would be very short, in others very long. This line of connection is just the contribution of the perfect tense as distinct from aorist and present. As a matter of fact, in the combination of punctiliar and durative in the perfect it begins with the punctiliar and goes on with the durative thus , but the emphasis may be now on the punctiliar, now on the durative. In others the two are drawn almost to a point, but not quite. In still others there is a broken continuity thus (A · · · > · · · B). It is the perfect of repeated action. Cf. Jo. 1:18; 5:37; 2 Cor. 12:17.

[Page 894] (d) Idea of Time in the Tense. In the ind. it appears in three forms with the notion of time (past present, perfect perfect, future perfect). In the other modes only the present perfect occurs, but it has no time in itself and in the imper. and subj. is naturally future. Often in the N. T., as in the Attic writers, a sharp distinction is drawn between the perfect and the aorist or the present. Cf. μαρτυρῶ with ἀπέσταλκεν and μεμαρτύρηκεν in Jo. 5:36 f.; εἰσῆλθεν—καὶ κεκοίνωκεν (Ac. 21:28); ὁτι ἐτάφῃ, καὶ ὅτι ἔγνωκε (1 Cor. 15:4); ἔκτίσθη—ἔκτισται (Col. 1:16); ἦσαν, ἔδωκας, τετήρηκας (Jo. 17:6). The perfect active is frequently intransitive, as has been already shown under Voice. Cf. ἵστημι, ἔστηκα, ἰπόλλυμι, ἰπόλωλα, etc.

2. The Indicative.

(a) The Present Perfect (ὅ ἐνεστὼς συντελικῶς ἢ παρακείμενος). It is not clear how the notion of present time is conveyed by this tense in the ind. since it is absent in the subj. and imper., not to say inf. and part. Gildersleeve suggests that it “comes from the absence of the augment and from the fact that a completed phenomenon

3 Blass, Gr. of N. T. Gk., p. 198.  
4 Moulton, Prol., p. 144.  
1 Giles, Man., p. 493.  
2 Monro, Hom. Gr., p. 23.
cannot complete itself in the future.” But that explanation is not very satisfactory. The
tense does occur sometimes in the future, and the present perfect is older than the past
perfect which rests on it. Perhaps at first it was just the perfect tense (cf. aoristic
presents and timeless aorists) and was timeless. By degrees it came to be used only for
present time. The rise of the past perfect made it clear. The pres. perf. is much more
common in the κοινὴ than in the earlier Greek. “The perfect was increasingly used, as
the language grew older, for what would formerly have been a narrative aorist”
(Moulton, Prol., p. 141). In particular is this true of the vernacular as the papyri show.

(a) The Intensive Present Perfect. Moulton\(^3\) calls these “Perfecs with Present
Force.” They are *Perfecta Praesentia*. In reality they are perfects where the punctiliar
force is dropped and only the durative remains (cf. past perfect). Gildersleeve\(^4\)
distinguishes sharply between the intensive use of emotional verbs and what he calls
the “Perfect of Maintenance of Result.” But it is questionable if the difference does
not lie in the nature of the verb rather than in a special modification of the tense. A
real distinction exists in 1 Jo. 4:14 between τεθεάµεθα and µαρτυροµένει. Burton\(^5\)
follows Gildersleeve, but he admits the doubt on \[Page 895\] the subject.\(^1\) In these
verbs when the perfect has lost the punctiliar notion it is due to the change in meaning
of the verbs.\(^2\) The list is rather large in Homer, particularly where attitude of mind is
expressed.\(^3\) Giles (Man., p. 481) thinks that originally the perf. was either intensive or
iterative like ἔστηκα, and that the notion of recently completed action (extensive) is a
development. These almost purely durative perfects in the N. T. may be illustrated by
ἔστω (Jas. 1:6); ἀνέψιε (2 Cor. 6:11); ὅδα (Mt. 6:8); έστηκα (Rev. 3:20); ἐνέστηκα
(2 Th. 2:2); πέτοντα (Ph. 2:24); κέκραγεν (Jo. 1:15) which is an example of
Gildersleeve’s emotional intensives and due according to Blass\(^4\) to the “literary
language,” μένησα (1 Cor. 11:2); τέθνηκα (Lu. 8:49). Most of these verbs have an
inchoative or conative or iterative sense in the present. Moulton\(^3\) has shown from the
LXX and the papyri that κέκραγα is vernacular κοινὴ and not merely literary. He
thinks that, while κράζω in the LXX is durative, κέκραγα is merely punctiliar. See (0)
The Aoristic Perfect. It is possible also that πεπιστεύκαµαι καὶ ἔγνωκαµεν (Jo. 6:69)
belong here. It is less open to dispute that καταβέβηκα (Jo. 6:38) is a present state. Cf.
κεκοίηται (Jo. 11:11). But more doubtful are ἡλπικα (Jo. 5:45); ἡγησαι (Ac. 26:2);
πέπεσαµαι (Ro. 8:38).\(^3\) But τετάρται (Jo. 12:27) seems to fall under the intensive
perfect. Cf. ἔστως ἐμί (Ac. 25:10).

(b) The Extensive Present Perfect=a completed state. This act may be durative-
punctiliar like ἔγγικα (Mt. 3:2) with a backward look . Cf. thus ἐγνώσαµαι, τετέλεκα,
tετήρηκα (2 Tim. 4:7). This consummative effect is seen in τετήρηκαν (Jo. 17:6),
ἔφρωκα µε πεπίστεψα, the culmination is just reached a few moments before. But

6 Ib.; Blass, Gr. of N. T. Gk., p. 199.
more frequently it is the punctiliar-durative perfect where the completed act is followed by a state of greater or less duration. In Jo. 19:22, ὁ γέγραφα γέγραφα, we have an example of each. Cf. the common γέγραπται (Mt. 4:7), ‘It was written (punctiliar) and still is on record’ (durative). Thus is to be explained instances like ἔχρηκεν in Heb. 10:9 (cf. ἔπον in 10:7). ‘The statement is on record.’ It is only in appearance that προσενήκεν and πεποίηκεν (Heb. 11:17, 28) seem different. This common usage in Hebrews has been compared to that in Thuc. vol. I, pp. 2, 6, etc. [Page 896]

Cf. further Heb. 7:6, 9, 11, 13, 16, 20, 23, where the permanence of the Jewish institutions is discussed. Jo. 6:25 γέγονας has punctiliar and durative ideas (‘camest and art here’). Cf. Abbott, Joh. Gr., p. 347. In Col. 1:16 ἔκτισθη is merely punctiliar, while in same verse ἔκτισεν adds the durative idea, whereas in verse 17 again συνέστηκεν has lost the punctiliar and is only durative. In 1 Cor. 15:4 ἔγγερται stands between two aorists because Paul wishes to emphasize the idea that Jesus is still risen. Usually ἔγραφη was sufficient, but not here. Cf. ἔστηρκεν (Lu. 16:26). Cf. ἀφέωνε (Lu. 5:23); ἐκκέχυται (Ro. 5:5). John is especially fond of this use of the present perfect. Cf. 1:32, 34, 41; 5:33, 36 ff. In chapter 17 the present perfects call for special attention. Cf. 1 Jo. 1:1 for contrast between the present perfect and the aorist.

(γ) The Present Perfect of Broken Continuity.1 As already explained, we here have a series of links rather than a line, a broken graph (· · · > · · · ·). Perhaps πέραχά τι in Ac. 25:11 is to be so understood. But certainly it is true of ἀπέσταλκα (2 Cor. 12:17) where Paul refers to various missions to the Corinthians. In particular Moulton2 notes the examples with πώποτε, as οὐδὲς ἔστι τι πώποτε (Jo. 1:18). Cf. further μεμαρτύρηκεν (5:37); δεδουλεύκαμεν (8:33).

(δ) The Dramatic Historical Present Perfect. Here an action completed in the past is conceived in terms of the present time for the sake of vividness. Burton3 doubts if any genuine examples of the vivid historical perfect occur in the N. T. Certainly κέκραγεν (Jo. 1:15) is a vivid historical tense even if only intensive in sense. Cf. μαρτυρεῖ just before. But by the term “historical” it is not meant that this use of the perfect is common in all narrative. But the Vedie Sanskrit has it often in narrative. It is a matter of personal equation after all. Thus Xenophon, who “affects naïveté,” uses the present perfect much more frequently than Herodotus and Thucydides.4 It is rather the tense of the orator or the dramatist and is often rhetorical.5 Hence Isocrates and Demosthenes surpass Plato in the use of the present perfect. “The nearness of any department of literature to practical life may readily be measured by the perfect.”6 Moulton7 notes how in the papyri there is an increasing use of the present perfect just

[Page 897] because it is so largely the language of life. He notes also how Socrates in Plato’s Crito uses this vivid present perfect: “ἐκ τινος ἐνυπνίου, ὁ ἔστη τινι ὄλγον πρότερον εὕρες χιλιάδες, where point of time in the past would have εἶδον as inevitable as the aorist is in English, had not Socrates meant to

1 Cf. Moulton, Prol., p. 144.
2 Ib.
3 N. T. M. and T., p. 38.
5 Thompson, Synt., p. 216.
7 Prol., p. 141.
emphasize the present vividness of the vision.” This vivid perfect is found in John’s Gospel in particular. One only needs to have some imagination himself. Cf. τεθέαμεν (1:32). John still has that vision. So εἵλησεν (1:41). The aorist would have been prosaic. Cf. also ἐπεστάλκεν in Ac. 7:35; κεκοίμηκαν in 21:28 and πεπόιηκα in 2 Cor. 11:25. A striking instance of it is seen in Rev. 5:7, ἔλαβεν, where John sees Jesus with the book in his hand. It is dull to make ἔλησεν here=ἔλαβεν. Another example of this vivid perfect is ἔσχήκαμεν (2 Cor. 1:9), a dreadful memory to Paul. So with ἔσχηκεν in 7:5. A particularly good instance is εὐθύμησεν (2 Cor. 1:9), a dreadful memory to Paul. So with ἔμεθηκεν in 2 Cor. 12:9.

Blass¹ has observed that it occurs sometimes in parables or illustrations, and quite naturally so, for the imagination is at play. Thus is to be explained ἀπελήλυθεν (Jas. 1:24) between two aorists. James sees the man. ‘He has gone off.’ Cf. Mt. 13:46, ἀπελήλυθεν πάντα δόσα ἔσχεν καὶ ἠγόρασεν αὐτόν. In Lu. 9:36 ἔσχηκαν is “virtually reported speech.”² Cf. ἁκηκόμεν (Ac. 6:11, but ἠκούσαμεν in 15:24).

(e) The Gnomic Present Perfect. A few examples of this idiom seem to appear in the N. T. The present was always the more usual tense for customary truths,³ though the aorist and the perfect both occur. Cf. τετελείωται (1 Jo. 2:5); δέδεται (1 Cor. 7:39); κέκριται and πεπίστευκεν (Jo. 3:18); κατακέκριται (Ro. 14:23); πεπλήρωκεν (13:8). Cf. Jo. 5:24; Jas. 2:10.

(ζ) The Perfect in Indirect Discourse. It is misleading to say, as Blass⁵ does, that “the perfect is used relatively instead of the pluperfect” in such instances. This is explaining Greek from the German. Blass does not call this construction “indirect discourse,” but merely “after verbs of perception”; but see my discussion of Indirect Discourse in ch. XIX. Cf. Lu. 9:36 οὐδὲν ἐπήγγελαν οὐδὲν ἔσχεν ἢ ἔφρακαν, Ac. 10:45 ἔξεστησαν ὅτι ἐκκέχυται. In Mk. 5:33, εἰδούσα δέ γέγονεν αὕτῃ ἠλθεν, the perfect preserves the vividness of the woman’s consciousness. Here the past perfect or the aorist could have been used (cf. Mk. 15:10; Mt. 27:18; Ac. 19:32), It is akin to the reportorial vividness of the historical perfect. It is not the perfects here that call for explanation from the Greek point of view. It is rather the occasional aorists, imperfects or past perfects. Cf. MS. differences in Mk. 3:8.

(η) Futuristic Present Perfect. Since the present so often occurs in a futuristic sense, it is not strange if we find the present perfect so used also=future perfect. This proleptical use of the perfect may be illustrated by δεδόξασαι (Jo. 17:10), δέδωκα (17:22), τετέλεσται (19:28), σέσηπεν and γέγονεν and κατίωται in Jas. 5:2 f. (cf. ἔσται καὶ φάγεται). This use is sometimes called “prophetico-perfect.” Indeed some of the examples classed as gnomic are really proleptical also. Cf. Jo. 3:18; 5:24; Jas. 2:10; Ro. 13:8; 14:23.¹

The "Aoristic" Present Perfect. The Present Perfect is here conceived as a mere punctiliar preterit like the aorist ind. We have seen how in some verbs the punctiliar idea drops out and only the durative remains in some present perfect forms (like ὅλα). It is not per se unreasonable to suppose that with some other verbs the durative idea should disappear and the form be merely punctiliar. We seem to have this situation in κέκραγα in the LXX (Moulton, Prol., p. 147). The action, itself took place in the past though the state following its completion is present. By centering attention on the former, while forgetting the latter, the perfect becomes aoristic. We must distinguish between the aoristic (punctiliar) and the preterit notions. We have seen that originally the tense was probably timeless. Nothing, then, but an appeal to the facts can decide whether in the N. T. the present perf. ind. ever=the aor. ind. (i.e. is preterit punctiliar). The Sanskrit\(^2\) shows a deal of confusion and freedom in the use of the pres. perf. ind. The blending of the perfect and aorist forms in Latin is also a point to note in spite of the independence of the Greek tense development. E. J. Goodspeed (Am. J. Theol., X, 102 f.) regards Latin as having some influence on the ultimate confusion in the Greek. There is no doubt of the ultimate confusion in the

late Greek (from A.D. 300 on) between the perfect and the aorist (see later). The use of
–θηκα and –ηκα in the aorist pass. ind. in modern Greek illustrates one way
confusion could arise (Thumb, Handb., p. 144). Cf. ἔδωκα, δέδωκα. In the
modern Greek all other remnants of the old perfect form are gone save in the
participle, which has lost its reduplication, like δευκένης. But had it begun in the older
Greek? Jannaris1 answers Yes and cites Thuc. 1, 21, Οὐδὲ ὃς ποιησί ὀμνήκας—οὔτε ὃς
λογογραφοὶ ξυνέθεσαν. But this may be the dramatic historical perfect. Jebb2
answers Yes and quotes Demosthenes and Lucian; but these again may be merely the
rhetorical dramatic perfect. The grammarians and scholiasts, under the influence of
the Latin, did come to lose all consciousness of any distinction and explained one
tense by the other.3 The present perfect was always more common in every-day life,
as we have noted. The papyri prove this abundantly.4 Moreover, the present perfect

4 Moulton, Prol., p. 141.
grew in popular use at the expense of the aorist, where the aorist might have been employed. There is thus no strong presumption against the possibility of such confusion in the N. T. Besides, “the line between aorist and perfect is not always easy to draw.”\(^5\) This is especially true of an event just past which may be described by either tense. Moulton\(^6\) admits that “the LXX and inscriptions show a few examples of a semi-aoristic perfect in the pre-Roman age, which, as Thumb remarks (Hellenismus, p. 153), disposes of the idea that Latin influence was working” thus early. But Moulton rightly rejects ἴδων ὅ λαθς ὅτι κεχρόνικε Μωϋσῆς (Ex. 32:1) as an instance (merely oratio obliqua). Simcox\(^7\) says that “no one but a doctrinaire special pleader is likely to deny that in Rev. 5:7; 8:5, ἐλησκεν, and in 7:14, ἐρηκα, are mere preterits in sense.” Well, I do deny it as to ἐλησκεν in Rev. 5:7 and 8:5, where we have the vivid dramatic colloquial historical perfect. The same thing is possible with ἐρηκα in 7:14, but I waive that for the moment. Burton\(^8\) is more cautious. He claims that the N. T. writers “had perfect command of the distinction between the aorist and the perfect,” but admits that “there is clear evidence that the perfect tense was in the N. T. sometimes an aorist in force,” though “the idiom is confined within narrow limits.” Some of the examples claimed by him for this usage I have explained otherwise already. Moulton\(^9\) sees that this confusion may exist in one writer, though not in another, but he admits a “residuum of genuinely aoristic perfects.” He admits γέγονα to be “perplexing,” though in the 45 examples in the ind. in the N. T. “it has obviously present time” and “the aoristic sense is not really proved for any of them.” That is certainly true. There are instances in the N. T., as in the later Greek generally,\(^1\) where γέγονα approaches a present in sense, as in 1 Cor. 13:11, but its use as a mere preterit is not shown, not even by the examples quoted by Moulton\(^2\) from the papyri (O. P. 478 and B. U. 136). The first has προσβεβηκέναι—γεγονέναι—τετελευκέναι, all three apparently vivid historical perfects. The example in Josephus (Apion, 4:21) may be the same. We have left ἐλησά, ἐρηκα, ἔσχηκα, πέπρακα. The last Moulton\(^3\) refuses to admit as an aorist in sense, since “the distinction is very clearly seen in papyri for some centuries” between πέρακα and ἠγόρασα. He cites O. P. 482 (ii/A.D.), χωρὶς ὃν ἄπεγραψάμην καὶ πέρακα. Besides in Mt. 13:46 πέρακεν is in a vivid parable (dramatic historical perfect). Moulton notes the confusion as worse in illiterate papyri, like οὐκ ἐλυσώμην οὐκ ἠλιμε (= ἠλειμμα), O. P. 528 (ii/A.D.). As to ἔσχηκα the matter is more plausible in one example (2 Cor. 2:13).

Blass\textsuperscript{4} affirms the true present perfect sense for ἔσχηκα elsewhere in the N. T. (Mk. 5:15; 2 Cor. 1:9; 7:5; Ro. 5:2). Moulton\textsuperscript{5} replies that “we must, I think, treat all the Pauline passages alike.” But why? He does not claim such uniformity for γέγονα in any N. T. writer.\textsuperscript{6} There is some analogy between ἔσχηκα and ἔθηκα and ἅφηκα, and ἔσχον may be ingressive, not constative. Moulton (Prol., p. 145) makes a good deal out of the fact that ἔσχον occurs only 20 times in the N. T. and that thus ἔσχηκα may have come to mean ‘possessed’ (constative), but he admits that this does not suit in Ro. 5:2. He cites a possible example from B. U. 297 (ii/A.D.) τοῖς δικαίοις ἄγιον ἔσχηκόν καὶ ἄνευ τινὸς ἀμφισβητήσεως ἐν τῇ νομῇ γενομένου (=—οις). Radermacher (N. T. Gr., p. 122) thinks that the perfect in the κοινή comes within the sphere of the aorist at times. Thackeray (Gr., p. 24) thinks that εἴληφα in Dan. Θ 4:30\textsuperscript{b} and ἔσχηκα, 3 M. 5:20, belong here. But if the whole case has to be made out from one example (2 Cor. 2:13; cf. 2 Cor. 7:5), it is at least quite problematical. The only substantial plea for taking ἔσχηκα as preterit here is the fact that Paul did have ἄνεσις for his spirit after Titus came. It is therefore possible that in 2 Cor. 2:13 we do have a present perfect=preterit punctiliar (cf. ἔξηλθον), possible but not quite certain. Paul may have wished to accent the strain of his anxiety up to the time of the arrival of Titus. The aorist would not have done that. The imperfect would not have noted the end of his anxiety. It was durative plus punctiliar. Only the past perfect and the present perfect could do both. The experience may have seemed too vivid to Paul for the past perfect. Hence he uses the (historical dramatic) present perfect. That is certainly a possible interpretation of his idea. Moulton (Prol., p. 238) in the Additional Notes draws back a bit from the preterit use of ἔσχηκα. He had advanced it “with great hesitation” and as “a tentative account.” “The pure perfect force is found long after Paul’s day: thus in the formula of an IOU, ὀμολογῶ ἐσχηκέναι παρὰ σοῦ ἐν ἀκοῇ ἔσχηκεν ἐντοκον (B. U. 1015 in the early iii/A.D.), ‘to have received and still possess.’” We have ἐλήφασα and ἐληκα left. Take ἐλήφασα. In Rev. 3:3 we have µνημόνευ εἴληφας καὶ ἠκουσας καὶ τήρεα, καὶ μετανόησον. It is preceded by ἐληκα in the proper sense. This is an exhortation about the future. If ἠκουσας had been ἠκήκοας no difficulty would exist. The perfect would emphasize the permanence of the obligation. It is as easy to say that ἠκουσας=a perfect as that εἴληφας=an aorist. Both are abstractly possible and neither may be true. The reception may seem more a matter to be emphasized as durative than the hearing (punctiliar). It is a fine point, but it is possible. Cf. πεποίηκεν καὶ ἔληψεν in Mk. 5:19. Cf. Jo. 3:32. The mere fact of the use of aorists and perfects side by side does not prove confusion of tenses. It rather

\textsuperscript{4} Gr. of N. T. Gk., p. 200.

\textsuperscript{6} Ib., p. 146.

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).
argues the other way. It is possible with Blass\(^1\) to see the force of each tense in ἑῷρακεν and ἱκουσεν in Jo. 3:32 (cf. 1 Jo. 1:1–3). Note also εἰσῆγαγεν καὶ κεκοίνωκεν (Ac. 21:28). Cf. Lu. 4:18 where the change is natural. Moulton\(^2\) does find such confusion in the illiterate documents among the papyri. Simcox (Lang. of the N. T., p. 105) wishes to know what “distinction of sense” exists between ἐλαβον and τετελείωμαι in Ph. 3:12. It is very simple and very clear. Ἐλαβον denies the sufficiency of Paul’s past achievement, τετελείωμαι denies it as a present reality. Cf. Ro. 13:12. I have already explained εἰληφα in Rev. 5:7 and 8:5. There is surely no trouble about εἰληφα in 2:28. In 11:17 again, ὅτι εὐληφες τὴν δόναμιν σου τὴν μεγάλην καὶ ἐβασιλέυσας, it is not εὐληφες (punctiliar-durative, [Page 902] ‘receivedst and still hast’) that calls for explanation, but ἐβασιλέυσας, which may be used to accent the ingressive idea or as a practical equivalent of the perfect. The use of ἑρήκα (Rev. 7:14) and ἑρηκαν (19:3) seems more like a real preterit than any other examples in the N. T. In 7:14, B reads ἐπον. I would not labour the point over these two examples. If such a confusion of tenses occurred anywhere in the N. T., the Apocalypse would be the place to expect it. And yet even the Apocalypse is entitled to a word in its defence on this point in spite of the fact that Moulton\(^1\) “frankly yields” these instances and Blass\(^2\) says that “the popular intermixture of the two tenses appears undoubtedly in the Apocalypse.” It is to be remembered that the Apocalypse is a series of visions, is intensely dramatic. It is just here that the rhetorical dramatic (historical) perfect so freely granted in the orators would be found. It is wholly possible that in this use of ἑρήκα we have only this idiom. “In history the perfect has no place outside of the speeches and the reflective passages in which the author has his say.”\(^3\) It is curious how aptly Gildersleeve here describes these very instances of the present perfect which are called “aoristic.” So I conclude by saying that the N. T. writers may be guilty of this idiom,\(^4\) but they have not as yet been proven to be. Cf. ἔχαρην ὅτι εὐρηκα in 2 Jo. 4. The distinction between the perf. and pres. is sharply drawn in Jas. 3:7, δαμάζεται καὶ δεδάμασται.

\(^{(i)}\) The Periphrastic Perfect. For the origin of this idiom see discussion in connection with the Past Perfect, (b), (η). The use of ἔχω (so common in later Greek

4 E. J. Goodspeed (Am. Jour. of Theol., Jan., 1906, p. 102 f.) shows that the ostraca confirm the pap. in the free use of the perfect.
and finally triumphant in modern Greek) has a few parallels in the N. T.\(^5\) Cf. ἔχω με παρθημένον (Lu. 14:19) with Latin idiom “I have him beaten.” Cf. ἔχω κείμενα (Lu. 12:19, pres. part. used as perf.), ἔχειμαι τὴν χείρα (Mk. 3:1). Cf. Mk. 8:17; Heb. 5:14; Jo. 17:13, ἔχωσιν—πεπληρωμένην. Here the perf. part. is, of course, predicate, but the idiom grew out of such examples. The modern Greek uses not only ἔχω δεμένο, but also δεμένα, but, if a conjunctive pron. precedes, the part. agrees in gender and number (cf. French). So τὴν ἔχον ἰδιωμένην, ‘I have seen her’ (Thumb, Handb., p. 162). Passive is ἔματι δεμένος. The use of γίνομαι is limited. Cf. γέγένητο ἔχω (Rev. 16:10), a mixture of tenses (cf. Mk. 9:3). See Ex. 17:12; Ps. 72:14. Peculiar is γεγόνατε ἔχοντες in Heb. 5:12. It is εἰμί that is commonly used (about 40 times in the N. T.) with the perfect part. Cf. Num. 22:12; Is. 10:20. Burton\(^1\) notes that the intensive use of the perfect tense (cf. past perfect) is more common than the extensive. As examples of the intensive (=present) take πεπραγμένος ἐστίν (Lu. 20:6). So Jo. 2:17; Ac. 2:13, etc. For the extensive use (=completed act) note ἐστίν πεπραγμένον (Lu. 23:15). So Jo. 6:31; Heb. 4:2, etc. In Ac. 26:26 the main accent is on the punctiliar aspect (at the beginning, as in Jo. 6:31).

\[(a)\] Present as Perfect. These examples, like ἡκῶ, πάρειμι, ἠττάμαι, κεῖμαι, have already been discussed under 1, (a), (η). Cf. ὁπόκειται (2 Tim. 4:8).

\[(b)\] The Past Perfect (ὁ ὑπερσυντελικός).

\[\text{(a) The Double Idea.}\] It is the perfect of the past and uses the form of the present perfect plus special endings and often with augment. The special endings\(^2\) show kinship with the aorist. As the present perfect is a blending in idea of the aoristic (punctiliar) and the durative present (a sort of durative aoristic present combined), so the past perfect is a blend of the aorist and the imperfect in idea.\(^3\) It is continuance of the completed state in past time up to a prescribed limit in the past. As in the present perfect, so here the relation between the punctiliar and the durative ideas will vary in different verbs. The name ὑπερσυντελικός (plus-quam-perfectum)=more than perfect in the sense that it always refers to an antecedent date, “a past prior to another past”\(^4\) is not always true.

\[\text{(b) A Luxury in Greek.}\] The Greeks cared nothing for relative time, though that was not the only use for the past perfect, as just stated.\(^5\) Ordinarily the aorist ind. was sufficient for a narrative unless the durative idea was wanted when the imperfect was ready to hand. Herodotus shows a fondness for the past perfect.\(^6\) It disappeared in Greek before the present perfect,\(^7\) though in the N. T. it still survives in current, but

7 Jann., Hist. Gk. Gr., p. 441.
not common, usage. It was never so frequent in Greek as the past perfect was in Latin. The N. T. idiom conforms to that of the older language.

(p) The Intensive Past Perfect. Present perfects that had come to be mere presents through accent on the durative idea and loss of emphasis on the aoristic (punctiliar) are virtual imperfects when turned into the past. Cf. ὅς ἐλώθει (Mk. 10:1). So ἦδεν (Jo. 1:31), ἐπτάκεσαν (Jo. 19:25; cf. Ac. 1:10 f.), ἐπετείθετο (Lu. 11:22) and even ἔγνόκετε (Mt. 12:7). ἔγνοκα sometimes is used like ὁδόν (1 Jo. 2:4). So with ἦν ἀπολογώς (Lu. 15:24; cf. εὐρέθη). Here we have a mere existing state in the past with the obscuration of the idea of completion (aoristic-punctiliar). But it is to be noted that the durative sense is usually a changed meaning from the aoristic sense. Cf. ὁδόν from ἐδοκότος. For this idiom in classic Greek see Gildersleeve, Syntax, p. 103. Cf. also E. Schwartz, Index to Eus., pp. 214 ff.

(δ) The Extensive Past Perfect. The past perfect usually presents a completed state or fixed condition in past time. As already said, it is not necessarily “a blend of past and præterpast.” In Latin the past perfect shows no trace of the Aktionsart of the perfect; the past perfect is just time relatively past. The Greek past perfect expresses a state following a completed act in past time. Sometimes it is made clear by the context that a considerable space of time had intervened, though this is quite incidental with the Greek. Take Jo. 6:17, καὶ σκοτία ἦδη ἐγεγόνει καὶ ὡπ’ ἐληλύθει πρὸς αὐτούς ὁ Ἰησοῦς. The verb in the sentence before is ἤρχοντο (descriptive) and the verb following is διεγείρετο (inchoative). The time of these imperfects is, of course, past. But the two intervening past perfects indicate stages in the going (ἤρχοντο) before they reached the shore. Both ἦδη and ὡπ’ help to accent the interval between the first darkness and the final appearance of Jesus which is soon expressed by the vivid historical present, θεωροῦσιν (6:19). Here we have a past behind a past beyond a doubt from the standpoint of the writer, and that is the very reason why John used the past perfect here. In verse 16, ὥς δὲ ὅψια ἐγένετο κατέβησαν οἱ μαθηταί, he had been content with the aorist in both the principal and the subordinate clauses. He had not cared there to express relative time, to stress the interval at all. The tenses in Jo. 6:16–21, by the way, form a very interesting study. John does, as a matter of fact, use the past perfect more frequently than do the Synoptists. He uses it to take the reader “behind the scenes” and often throws it in by way of parenthesis. Thus in 1:24 the past perfect ἀπεσταλμένοι ἦσαν points back to the aorist ἀπέστειλαν in 1:19. In 4:8 ἐληλύθεσαν is a parenthetical explanation of what the disciples had done before this incident with the woman. So in 9:22 συνετέθειτο has ἦδη and notes a previous agreement. In 11:13 εἰρήκει points to a time just before, but note ἔδοξαν. The tenses in 11:11–13 are all interesting (ἐπέ, λέγει, ἔπον, εἰρήκει, κεκοίμηται, πορεύομαι, σωθήσεται). In 11:19 ἐληλύθεσαν denotes antecedent action, and in 11:30, ὡπ’ ἔλεγεν, the interval is marked. Cf. also 11:44, περιεδέδετο. In 11:57 δεδόκεσαν points backward as is true of ὁδέπω ὁδές ἦν τεθειμένος (19:41). In 3:24 and 7:30; 8:20, the standpoint is later than the event.

8 Blass, Gr. of N. T. Gk., p. 201.
1 Moulton, Prol., p. 148.
4 Abbott, Joh. Gr., p. 349.
described, but none the less it stretches backward though from a relatively future time.

But this distinction is not confined to John. Cf. Mt. 7:25, τεθεμέλιωτο, which points back to verse 24. So in Mk. 14:44 δεδώκει refers to Judas' previous arrangement. Cf. also ἔβεβληκε in Mk. 16:9 with ἔφονη. The tenses in Mk. 15:6–10 are interesting. The three past perfects all refer to antecedent action. Cf. ὄκοδόμητο with ἤγαγον in Lu. 4:29, and with ἔπορεύετο in verse 30. In Lu. 16:20 ἔβεβλητο suggests that the poor man had been at the door some while. In Ac. 4:22 γεγόνει (cf. τῷ γεγονότι) does not precede ἐπέλυσαν (verse 21) by any great amount of time, yet the interval is real (cf. 3:1–10). In Ac. 9:21 ἔληλυθε is contrasted with Ἐστιν ὁ παρόντας. In 14:23 cf. πεπιστεύκεισαν with τῷ γεγονότι. In Lu. 4:29, and with ἐπορεύετο in verse 30. In 14:26 the reference is to the beginning of the tour from Antioch. In 20:16, κεκρίκει, and 20:38, ἐήρηκε, the two ends of the action nearly come together, but in 21:29 the antecedent action is clear. In Jo. 11:30, οὔπω ἔληλυθε—Ἄλ. ἤν ἔτι—ὄπου ὑπῆντησεν, the three past tenses of the ind. come out well. In 11:56 θε ὁ δοκεῖ ὅμιλον; ὅτι οὐ μὴ ἔλθῃ εἰς τὴν ἔνορθήν; δεδώκεσαν, the three kinds of time (present, future, past) are all employed. But in 12:16 the aorist ind. is employed, οὐκ ἔγνωσαν τὸ πρῶτον—τότε ἐμνήσθησαν, though antecedent time is indicated by τὸ πρῶτον and τότε. Here the past perfect would more exactly have marked off τὸ πρῶτον. If the previous time is to be depicted in its course, the past perfect is used (Thumb, Handb., p. 163).

\((c)\) The Past Perfect of Broken Continuity\(^2\) (· · · · > · · · ·). This is true of Lu. 8:29, πολλοῖς χρόνοις συνηρπάκει αὐτόν. It is an [Page 906] iterative past perfect in a series of links instead of a line, like the present perfect of broken continuity in Jo. 1:18. Cf. the perf. inf. in Ac. 8:11.

\((ζ)\) Past Perfect in Conditional Sentences. Usually the aorist ind. occurs in these conditions of the second class determined as unfulfilled in relation to the past. But sometimes the past perfect appears. Cf. Jo. 19:11; Ac. 26:32; 1 Jo. 2:19. See Conditional Sentences, ch. XIX.

\((η)\) The Periphrastic Past Perfect. This construction had already begun in ancient Greek. In the third person plural of liquid and mute verbs it was uniformly done for the sake of euphony. It was occasionally found also with other verbs. In the modern Greek\(^1\) we find εἶχα δεμένο, 'I had bound,' ἤμουν δεμένος or εἶχα δεθεί. Ἐχω was at first more than a mere auxiliary, though in Herodotus it appears as a true auxiliary. The dramatists also use it often.\(^2\) In the N. T. the examples with εἶχον are not pertinent. Cf. συκῆν εἰχέν τις πεφυτευμένην (Lu. 13:6); ἦν εἶχον ἀποκειμένην (Lu. 19:20), really predicative accusative participles with ἔχω. But the past perfect with the perfect partic. and ἦν is rather common. Cf. Jo. 19:11. Burton\(^3\) notes that about two-thirds of them are intensive and only one-third extensive. As examples of the intensive use see Mt. 26:43, ἦσαν βεβαρμένους; Lu. 15:24, ἦν ἀπολωλός. Cf. also Lu. 1:7. Examples of the extensive type are ἦσαν ἐκλειθότες (Lu. 5:17); ἦσαν

2 Moulton, Prol., p. 148.
3 Thumb, Handb., pp. 161, 165.
2 Jebb in Vinc. and Dickson’s Handb., p. 329.
3 N. T. M. and T., p. 45.
προεσωματοζες (Ac. 21:29). For examples in the LXX see 2 Chron. 18:34; Judg. 8:11; Ex. 39:23, etc. See also βεβαιτισμενοι υπερηχον (Ac. 8:16).

(θ) **Special Use of ἐκείμην.** This verb was used as the passive of τίθημι. The present was—a present perfect. So the imperfect was used as a past perfect, as in Jo. 20:12, ὅπου ἐκείνο τό σώμα·—‘where the body had lain’ or ‘had been placed.’ So in Jo. 2:6 ἦσαν κείμεναι is a periphrastic past perfect in sense. Cf. Lu. 23:53, ἦν κείμενος. See also 19:20. Perhaps a similar notion is seen in ὁμοθυμαδὸν παρῆσαν (Ac. 12:20).

(c) **The Future Perfect** (ὁ μέλλων συντελικός). There was never much need for this tense, perfect action in future time. It is rare in ancient Greek and in the LXX (Thackeray, Gr., p. 194). The only active forms in the N. T. are εἰδήσω (Heb. 8:11, LXX, possibly a mere future) and the periphrastic form ἔσωσαμεν πεποιθῶς (Heb. 2:13, LXX also). Both of these are intensive. Most of the MSS. [Page 907] read κεκράξονται in Lu. 19:40, but ΒBL have κράξονσιν. This is also intensive (cf. κέκραγα), if it is accepted, as it is not by W. H. nor by Nestle. I note ἔση μοι μεγάλην χάριν κατά τισεθεμιξε[ν]τι(ς), B. G. U. 596 (A.D. 84). The modern Greek has a fut. perf. in θὰ ἔχω δεμένο (Thumb, Handb., p. 162). In ἔξουσιν (Lu. 19:43) we have a practical future perfect (intensive). For the rest the futurum exactum is expressed only by means of the perfect part. εἰμ. This idiom is found in the LXX (the active in Gen. 43:8; 44:32; Is. 58:14, etc. The passive in Gen. 41:36; Ex. 12:6). N. T. examples are ἔσται δεδεμένον and ἔσται λελυμένον (Mt. 16:19); ἔσται λελυμένα (18:18); ἔσονται διαμειρισμένον (Lu. 12:52). These all seem to be extensive. For a sketch of the future perfect see Thompson, Syntax of Attic Greek, p. 225 f. This tense died before the future did.

3. **The Subjunctive and Optative.** The perfect optative is not found in the N. T. It was always rare in the Greek of the early period. See Hatzidakis, Einl., p. 219. The only inflected perf. subj. in the N. T. is εἰμι, which occurs ten times (Mt. 9:6; Mk. 2:10; Lu. 5:24, etc.). But in this form the perfect sense is gone. See ἴνα εἰδήσε, P. B. M. 1178 (A.D. 194). Indeed, the perf. subj. was always very rare in Greek. In the Sanskrit the perf. tense, outside of the Vedic language, never developed to any extent except in the ind. and the participle. In the classic Greek it was in subj. and opt. a mark of the literary style and did not really belong to the life of the people. The perf. subj. is absent from the vernacular modern Greek. A little reflection will show how usually there was no demand for a true perfect, combining punctiliar and durative, in the subj. Even in the literary style of the older Greek, when the perf. subj. did occur it was often the periphrastic form in the active and nearly always so in the passive. “The perfect of the side-moods is true to the kind of time, completion, intensity, overwhelming finality.” By “kind of time” Gildersleeve means kind of action, not past, present or future. Cf. the LXX also, Is. 8:14; 10:20; 17:8. In Lu. 14:8 there

Hatzidakis HATZIDAKIS, G. N., Einleitung in die neugriechische Grammatik (1892).
3 Gildersleeve, Am. Jour. of Philol., 1908, p. 401.
appears to be a conscious change from κληθῇς to μήποτε ἴππος κεκλημένος, possibly suggesting a long-standing invitation by the latter. In Jo. 3:27, ἔδειν μή ἴππος δέδομεν, it is punctiliar-durative. In 16:24, ἵνα ἴππος πεπληρωμένη (cf. 1 Jo. 1:4), the consummation is emphasized (durative-punctiliar), extensive perfect [Page 908] (completed act). The same thing is true of 17:19, ἵνα ὢσιν ἴγνωσμένοι, and 17:23, ἵνα ὢσιν τετελειωμένοι. In Jas. 5:15, κἂν ἴππος εἰσήκουσα, we seem to have the perfect of “broken continuity.” In 2 Cor. 1:9, ἵνα μή πεποιθότες ὢμεν, it is merely intensive.

4. THE IMPERATIVE. What has been said of the rarity of the perf. subj. can be repeated concerning the perf. imper. Out of 2445 imperatives in the Attic orators the speeches themselves show only eight real perfects (Gildersleeve, Syntax, Part I, p. 158. Cf. also Miller, “The Limitation of the Imperative in the Attic Orators,” A. J. P., xiii, 1892, pp. 399–436). In Is. 4:1 one may note κεκλήσθαι intensive. The perfect imper. is common in Homer.1 In the late Greek it occurred most frequently in the purely intensive perfects or in the third person singular of other verbs.2 But it is gone from the modern Greek and is nearly dead in the N. T. In Jas. 1:19 ἵνα ὢσιν κακιμένωι, we seem to have the perfect of “broken continuity.” In 2 Cor. 1:19 ἵνα μὴ πεποιθότες ὢμεν, it is merely intensive.

5. THE INFINITIVE. There were originally no tenses in the inf. (see Sanskrit), as has already been stated. But the Greek developed a double use of the inf. (the common use, and indir. discourse).

(a) Indirect Discourse. In indir. discourse (cf. ch. XIX) the tenses of the inf. had the element of time, that of the direct. But in the N. T. there is no instance of the perf. inf. representing a past perf. ind.4 The tense occurs in indir. discourse, but the time is not changed. Cf. Ac. 14:19 ἔστησεν ἤχω τῆς πόλεως, νομίζοντες ἐδύναμεν, (12:14) ἀπήγαγεν ἑστάτω. So ἐλεῦσαν in Lu. 22:34; γεγονότα (Jo. 12:29); γεγονέναι (2 Tim. 2:18). These examples are also all intensive perfects. So with Col. 2:1, θέλω ἵππος εἰλέγαι. In 1 Tim. 6:17, παραγγέλλω ὑπηλικολοφονεῖν μηδε ἧπεικέναι (indir. command), the intensive perf. again occurs. In Lu. 10:36, ὅτι σοι γεγονότα, we have “the vivid present of story-telling.”5 Cf. πεπραχέναι (Ac. 25:25). On the whole the [Page 909] perf. inf. is rather common (47 times, according to H. Scott) in the N. T.1 See further Jo. 12:18; Ac. 16:27; 27:13; Ro. 15:8; Heb. 11:3.

(b) Perfect Infinitive not in Indirect Discourse.

1 Monro, Hom. Gr., p. 22.
2 Goodwin, M. and T., p. 23 f.
3 Blass, Gr. of N. T. Grk., p. 200 f.
4 Burton, N. T. M. and T., p. 52.
5 Moulton, Prol., p. 146. See Heb. 4:1.
1 W.-Th., p. 334.
(a) Subject or Object Infinitive. Cf. 2 Pet. 2:21, μὴ ἐπεγνωκέναι, where the tense accents the climacteric aspect (durative-punctiliar) of the act and rather suggests antecedence (extensive) to ἧν. In Ac. 26:32, ἀπολελύσθαι ἔδνατο, we have an instance of the obj. inf. with implied antecedence (extensive). Note also ὅς ἔργασίαν ἀπηλλάχθαι (Lu. 12:58). In Ac. 19:36 κατεσταλμένους ὑπάρχειν is a periphrastic form of the subject inf. In 2 Cor. 5:11 note πεφανερωθῇ with ἐλπίζω. Cf. 1 Pet. 4:3 (with ἀρκετός). Not very different is the use with ὥστε (Ro. 15:19).

(b) With Prepositions. At first it may seem surprising that the perfect tense should occur with the articular inf. after prepositions. But the inf. does not lose its verbal character in such constructions. It is still a verbal substantive. It is, of course, only by analogy that the tense function is brought into the infinitive. For the papyri note ἔπι τῷ γεγονέναι, P. Oxy. 294 (A.D. 22); ὑπὲρ τοῦ ἀπολελύσθαι σε, P. B. M. 42 (B.C. 168). Cf. μετὰ τὸ εἰρήκεναι (Heb. 10:15), the only instance with μετὰ. Here the tense has the same force as εἰρήκεν in 10:9. It stands on record as said. We find it with εἰς (twice), as in Eph. 1:18, εἰς τὸ εἰδέναι (intensive) and εἰς τὸ γεγονέναι (Heb. 11:3). It is most frequent with διὰ and the acc. (7 times). So Mk. 5:4, δεδέσθαι καὶ διεσπάσθαι καὶ συντετρίφθαι (extensive). See ὁ ἱκοδομήσθαι (Lu. 6:48). Cf. Ac. 18:2; 27:9. In 8:11 we have the perf. inf. of “broken continuity.” In the N. T. the perf. inf. with prepositions appears only with διὰ, εἰς and μετὰ.

6. The Participle.

(a) The Meaning. The perf. part. either represents a state (intensive) or a completed act (extensive). Examples of the former are κεκοπιακώς (Jo. 4:6); ἑστώς (18:18); τὸ εἰδόθς (Lu. 4:16). Instances of the latter occur in ὁ εἰληφώς (Mt. 25:24); πεποιηκότες (Jo. 18:18). The perf. part. is quite common in the N. T. and preserves the usual idea of the tense.

(b) The Time of the Tense. It is relative, not absolute. It may be coincident with that of the principal verb, usually so in the intensive use.² Cf. Jo. 4:6 κεκοπιακῶς ἐκαθέζετο, (19:33) ἐδον Ἧδη τεθνήκοτα, (Ro. 15:14) ἔστη—πεπληρωμένοι. But by suggestion the act may be represented as completed before that of οἱ [Page 910] the principal verb and so antecedent action. Thus Ἰστήκεισαν—πεποιηκότες (Jo. 18:18); προσφάτως ἐληλυθότα (Ac. 18:2); ἀπολελυμένη (Lu. 16:18); εἰρηκότος (Mt. 26:75). This antecedent action may be expressed also by the intensive perfect as in ἐξήλθεν ὁ τεθνηκός (Jo. 11:44), but δεδεμένος is coincident action. So in Mk. 5:15 ἰματισμένον is coincident, but τὸν ἔσχηκότα antecedent. Cf. Rev. 6:9. The modern Greek keeps the perf. part. (Thumb, Handb., p. 167).

(c) The Perfect Tense Occurs with Various Uses of the Participle. The part. is used as attributive. Cf. ὁ ἀπεσταλμένοι (Ac. 10:17). Sometimes a distinction is drawn between the aorist and the perf. part. Cf. ὁ λαβὼν in Mt. 25:20 with ὁ εἰληφὼς (25:24); ὁ καλέσας in Lu. 14:9 with ὁ κεκληκός (14:10). Cf. 2 Cor. 12:21; 1 Pet. 2:10. The predicate participle also uses it. Cf. Lu. 8:46; 16:18, 20 f.; Jo. 19:33; Ac.

18:2; Heb. 13:23. With Rev. 9:1, ἐδον πεπτωκότα, compare Lu. 10:18, ἑθεώρουν πεσόντα (the state, the act).

(d) The Periphrastic Participle. There are two examples of this unusual idiom. Cf. Eph. 4:18 ἐσκοτωκέντοι τῇ διανόιᾳ ὑπό, (Col. 1:21) ὑπελλοτρωμένους. The durative aspect of the perfect is thus accented. Cf. Heb. 5:14 for ἔχω used periphrastically.

[PAGE 911] CHAPTER XIX

MODE (ἘΓΚΑΙΣΙΣ)

Introductory. For a brief sketch of the number of the modes and the reasons for treating the indicative as a mode see Conjugation of the Verb, chapter VIII, V, (a). References are there given to the pertinent literature. The use of ἡν is given a brief treatment below in connection with the modes. The subject of conjunctions is divided for logical consistency. The Paratactic Conjunctions belong to the same division with Paratactic Sentences, while Hypotactic Conjunctions fall under Hypotactic Sentences. The conjunctions could of course be treated in separate chapter or as a division of the chapter on Particles (XXI). That will be there done (v, 1) for Paratactic Conjunctions. Hypotactic Conjunctions will there receive only summary treatment and can best be discussed in detail in connection with subordinate clauses. And there are advantages in the present method. It needs to be said also that the division of the treatment of modes into those of Independent and Subordinate Sentences (A and B) is purely arbitrary and for the sake of clearness. There is no real difference in the meaning of a mode in an independent and a dependent sentence. The significance of each mode will be sufficiently discussed under A (Independent Sentences). The inclusion of all the subordinate clauses under mode is likewise for the sake of perspicuity. Voice, tense, mode thus stand out sharply.1 The difficulty of making a clear distinction in the significance of the modes has already been discussed in chapter VIII, pp. 321 ff. A mood is a mode of statement, an attitude of mind in which the speaker conceives the matter stated.2 Apollonius Dyskolos first described moods as ψυχικαὶ διαθέσεις. That is a correct description of the function of mood as distinct from voice and tense.3

[Page 912] The mode is the manner of the affirmation, while voice and tense have to do with the action of the verb (voice with relation of the subject to the action of the verb, tense with the state of the action). But even so the matter is not always clear. The mode is far and away the most difficult theme in Greek syntax. Our modern grammatical nomenclature is never so clumsy as here in the effort to express “the delicate accuracy and beauty of those slight nuances of thought which the Greek reflected in the synthetic and manifold forms of his verb.”4 So appeal is made to psychology to help us out. “If the moods are ψυχικαὶ διαθέσεις, why is not every utterance modal? Why does not every utterance denote a state of the soul? A universal

1 Jann., Hist. Gk. Gr., pp. 445 ff., has this plan. I had already made my outline before reading his treatment of the subject.
2 Thompson, Synt. of Att. Gk., p. 185.
psychology would be a universal syntax.”\(^2\) Every utterance does denote a state of the soul. This is one argument for treating the indicative as a mode. The verb is necessarily modal from this point of view. But the term is naturally confined to the finite verb and denied to the infinitive and participle. Dionysius Thrax does call the infinitive a mode, but he is not generally followed.\(^3\) Gildersleeve\(^4\) notes also that “moods are temporal and tenses modal.” He sees that the order moods and tenses is the natural sequence in the English (cf. chapter VIII, V, p. 320), but he follows the order tenses and moods in his *Syntax of Classical Greek*, though it is hard to separate them in actual study. Gildersleeve\(^5\) laments also that διάθεσις came to be applied to voice and ἔγκλισις to mode (cf. enclitic words as to accent), “but after all tone of utterance is not so bad a description of mood.” It is possible that at the beginning the indicative was used to express all the various moods or tones of the speaker, as the accusative case originally included the whole field of the oblique cases. It was only gradually that the other moods were developed by the side of the indicative (thus limiting the scope of the ind.) to accent certain “moods of mind, i.e. various shades of desire,”\(^6\) more sharply. Thompson calls this development “artificial,” since no other race but the Greeks have preserved these fine distinctions between indicative, subjunctive, optative, imperative, not to say injunctive \(^{[Page 913]} \) and future indicative (almost a mode to itself). But that is too severe a term, for the modes were a gradual evolution. The injunctive was the unaugmented indicative, like λύου, λύεσθε, λύσασθε, λύθητε, λύετε, λύσατε, σχές.\(^1\) Moulton\(^2\) says: “Syntactically it represented

the bare combination of verbal idea with the ending which supplies the subject; and its prevailing use was for prohibitions, if we may judge from the Sanskrit, where it still remains to some extent alive. The fact that this primitive mood thus occupies ground appropriate to the subjunctive, while it supplies the imperative ultimately with nearly all its forms, illustrates the syntactical nearness of the moods. Since the optative also can express prohibition, even in the N. T. (Mk. 11:14), we see how much common ground is shared by all the subjective moods.” Yes, and by the indicative also. The present indicative is often a practical future. Originally the subjunctive had the short vowel (cf. ἴοµεν in Homer). The distinction between the indicative and subjunctive is not always clear. The subjunctive in Homer is often merely futuristic. The affinity between the subjunctive and the optative is very close. The indicative continued to be used in the volitive sense (past tenses) and of command (future tense). Thus the other modes were luxuries of the language rather than necessities, while the indicative was the original possessor of the field. As already shown (chapter VIII, V) the injunctive survived in the imperative and subjunctive. The future indicative continued to fulfil the function of all the modes (cf. the indicative before the rise of the other modes). Thus the future indicative may be merely futuristic, or volitive, or deliberative. The same thing is true of the subjunctive and the optative. Cf. Moulton, *Prol.*, p. 184 f. Thompson (*Syntax*, p. 186) curiously says that “the indicative, however, assumed some of the functions of the other moods.” If he had said “retained,” he would have it right. He had just said properly enough: “It would be an error, with regard both to their origin and functions, to regard the moods as separate and water-tight compartments.” The early process was from simplicity to variety and then from variety to simplicity (cf. again the history of the cases). The struggle between the modes has continued until in the modern Greek we have practically only the

3 Giles, Man., p. 459.

indicative and the subjunctive, and they [Page 914] are in some instances alike in
sound (Thumb, *Handb.*, p. 115 f.). The subj. is “considerably reduced” in use in the
modern Greek. The optative has disappeared entirely, and the imperative, outside the
second person, and the future indicative are expressed by periphrasis. Even the
infinitive and the participle in the κοινή have felt the inroads of the subjunctive.1 It is
ture that as a rule we see the modes to best advantage in the simple sentence,2 though
especially the meaning in the compound sentence is the same. But it is true, as
Gildersleeve3 urges, that “the predominance of parataxis over hypotaxis is a matter of
style as well as of period. Hypotaxis holds fast to constructions that parataxis has
abandoned. The futural subjunctive abides defiantly in the dependent clause of
temporal sentences and dares the future indicative to invade its domain. The modal
nature of the future, obscured in the principal sentence, forces itself upon the most
superficial observer in the dependent clause.” In a broad sense the indicative is the
mode of objective statement in contrast with the subjective modes developed from it.
But the description needs modification and is only true in a general sense. The N. T.
idiom as of the κοινή in general will be found to differ from the classic Greek idiom
here more than is true of the construction of the tenses.4 The disappearance of the
optative is responsible for part of this change. But the effort must now be made to
differentiate the four modes in actual usage whatever may be true of the original idea
of each. That point will need discussion also. The vernacular in all languages is fond
of parataxis. See Pfister, “Die parataktische Darstellungsform in der volkstümlichen

I. The Indicative Mode (λόγος ἀποφαντικός or ἡ ὑποτική ἐγκλίσις).

1. MEANING OF THE INDICATIVE MODE.

The name is not distinctive, since all the modes “indicate.” It is not true that the indicative gives “absolute reality,” though it is the “modus rectus.” It does express “l’affirmation pure et simple.” The indicative does state a thing as true, but does not guarantee the reality of the thing. In the nature of the case only the statement is under discussion. A clear grip on this point will help one all along. The indicative has nothing to do with reality (“an sich”). The speaker presents something as true. Actuality is implied, to be sure, but nothing more. Whether it is true or no is another matter. Most untruths are told in the indicative mode. The true translation into Latin of ὑποτική would be finitus or definitus. Indicativus is a translation of ἀποφαντικός. The indicative is the most frequent mode in all languages. It is the normal mode to use when there is no special reason for employing another mode. The assertion may be qualified or unqualified. This fact does not affect the function of the indicative mode to make a definite, positive assertion. Cf. Jo. 13:8, for instance. A fine study of the indicative mode is afforded in Jo. 1:1–18, where we have it 38 times, chiefly in independent sentences. The subjunctive occurs only three times (1:7 f.). The use of ἔδεικνυ, ἐγένετο, ἠλθεν, ὦκ ἔγνυ, παρέλαβον, ἔλαβον, ἔδωκεν, ἔθεασάμεθα, etc., has the note of certitude and confident statement that illustrate finely the indicative mode.

2. KINDS OF SENTENCES USING THE INDICATIVE.

(a) Either Declarative or Interrogative. The mere declaration probably (and logically) precedes in use the question. But there is no essential difference in the significance of the mode. This extension of the indicative from simple assertion to question is true of all Indo-Germanic tongues. Cf. Mt. 2:2; Mk. 4:7; Jo. 1:19. The simple assertion is easily turned to question. Cf. ἔπείνασα γάρ ἔδωκατε μοι φαγεῖν, ἔδιψησα καὶ ἐποτίσατε με, κτλ., and πότε σε ἔδομεν πεινόντα καὶ ἔθρεψαμεν, κτλ. (Mt. 25:35–39). For the change from question to simple assertion see πιστεύεις τοῦ; ἐγώ πεπίστευκα (Jo. 11:26 f.). Cf. Ac. 26:27. The formula σὺ λέγεις is sometimes used for the answer, as in Mt. 27:11; Lu. 22:70; Jo. 18:37. So also σὺ ἐλπίζεις in Mt. 26:25, 64. The question without interrogative words is seen in Mt. 13:28; Jo. 13:6; Ac. 21:37; Ro. 2:21–23; 7:7, etc. Sometimes it is difficult to tell whether a sentence is declarative or interrogative, as in 1 Cor. 1:13; Ro. 8:33 f.

3 Ib. Der Redende stellt etwas als wirklich.
5 Riem. and Goelzer, Synt., p. 297 f.
6 Burton, M. and T., p. 73.
8 Blass, Gr. of N. T. Gk., p. 205.
For this very reason the Greek used various interrogatory particles to make plain the question. Thus ἢ ἃρα γε γινώσκεις ἃναγινώσκεις: (Ac. 8:30. Note the play on the verb). Cf. Lu. 18:8; Gal. 2:17. It is rare also in the LXX (cf. Gen. 18:9; 37:10; Jer. 4:10), but ἢ ἃρα is common.1 It is a slight literary touch in Luke and Paul. The use of εἰ in a question is elliptical. It is really a condition with the conclusion not expressed or it is an indirect question (cf. Mk. 15:44; Lu. 23:6; Ph. 3:12). It is used in the N. T., as in the LXX quite often (Gen. 17:17, etc.). This construction with a direct question is unclassical and may be due to the Septuagint rendering of the Hebrew הִ by εἰ as well as by μη.2 Cf. Mt. 12:10; Εἰ ἡκατον τοῖς σάββασι τῆς θεραπεύσαι; see also Mt. 19:3; Mk. 8:23; Lu. 13:23; 22:49; Ac. 1:6; 7:1; 19:2; 21:37; 22:25. Note frequency in Luke. In Mt. 10:2 (parallel to Mt. 19:3) the question is indirect. The idiom, though singular, has “attained to all the rights of a direct interrogative”3 by this time. The idiom may be illustrated by the Latin an which in later writers was used in direct questions. So si, used in the Vulgate to translate this εἰ, became in late Latin a direct interrogative particle. A similar ellipsis appears in the use of εἰ (cf. Heb. 3:11) in the negative sense of a strong oath (from the LXX also).4 The particle ἢ is found in the LXX Job 25:5 B, but not in the N. T.5 So far the questions are colourless.

The use of interrogative pronouns and adverbs is, of course, abundant in the N. T. Thus τίς, either alone as in Mt. 3:7, with ἢ ἃρα in Mt. 24:45, with γάρ as in Mt. 9:5, with οὔν as in Lu. 3:10.6 See the double interrogative τίς τί in Mk. 15:24. For τί τοῦτο (predicative use of τοῦτο) see Lu. 16:2. For the ellipsis with ἢν τί (cf. διὰ τί in Mt. 9:11; εἰς τί in Mk. 14:4) see Mt. 9:4, and for τί ὅτι note Lu. 2:49 (cf. τί γέγονεν ὅτι in Jo. 14:22). The use of τί in Ac. 12:18 and 13:25 is interesting. Τί is an accusative adverb in Mk. 10:18. A sort of prolepsis or double accusative occurs in οἴδα σὲ τίς εἰ (Mk. 1:24). Other pronouns used in direct questions are ποίος (Mk. 11:28), πόσος (Mk. 6:38), [Page 917] ποταπός (Mt. 8:27). The sense of ὅ in Mt. 26:50 is disputed, as of ὅτι in Mk. 2:16; 9:11, 28; Jo. 8:25.1 The use of interrogative adverbs is frequent. Cf. πότε (Mt. 25:38); ἢν πότε (Mt. 17:17); πῶς (Lu. 10:26); ποῦ (Lu. 8:25); ποσάκις (Mt. 18:21).

Alternative questions are expressed by ἢ alone as in 1 Cor. 9:8, or with τί—ἣ as in Mt. 9:5. The case of ἢ τίς is different (Mt. 7:9).

Exclamations are sometimes expressed by the relative forms, like ὡς ὄραω in Ro. 10:15, but more frequently by the interrogative pronouns like πόσα (Mk. 15:4); πηλίκος (Gal. 6:11); τί (Lu. 12:49); ποσάκις (Mt. 23:37). Cf. πόσον in Mt. 6:23.

(b) Positive and Negative. If an affirmative or negative answer is expected, then that fact is shown by the use of oū or the Latin nonne. So oū τῷ σῷ ὁνόματι ἐπροσημεύσαμεν; (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνόματι ἐπροφήτευσα (Mt. 7:22). Cf. Mt. 6:25; 13:27; 13:55; Lu. 12:6; 15:8; 17:17; 1 Cor. 9:1; 14:23; Jas. 2:5; Heb. 3:16, etc. This is the common classic construction. The use of oū may suggest indignation as in οὐκ ἀποκρινθεῖν αὐτῷ ὀνό,
(a) For Courtesy. It is true that the indicative “is suited by its whole character only to positive and negative statements, and not to the expression of contingencies, wishes, commands or other subjective conceptions.” That is perfectly true. The indicative is the normal mode for saying a thing. The other modes Gildersleeve\(^5\) aptly terms “side moods.” I consider, as already explained, the indicative the mode par excellence, and I doubt the value of such language as “the modal uses of the indicative.”\(^6\) It is not so much that the indicative “encroached upon the other moods, and in so doing assumed their functions, especially in dependent sentences,”\(^7\) as that the indicative, particularly in dependent sentences, retained to some extent all the functions of all the modes. It is true, as already said, that the indicative was always the most virile of all the modes and has outlived them all. But, after the other modes became fully developed, these less frequent uses of the indicative seemed anomalous. The courteous or polite use of the imperfect indicative is the simplest of these special constructions. Here the indicative is used for direct assertion, but the statement is thrown into a past tense, though the present time is contemplated. We do this in English when we say: “I was just thinking,” “I was on the point of saying,” etc. So Ac. 25:22, ἐβούλησα καὶ ἀυτὸς τοῦ ἄνθρωπου ἀκούσα. Agrippa does not bluntly say ἔβουλησα (cf. Paul in 1 Tim. 2:8; 5:14) nor ἐβουλήσα, which would suggest unreality, a thing not true. He does wish. He could have said βουλοίμην (cf. Ac. 26:29, where Paul uses the optative), but the simple ἐβουλήσα is better. The optative would have been much weaker.\(^1\) In 2 Cor. 1:15 ἐβουλήθην πρότερον has its natural reference to past time. Cf. ἐβουλήθησα in 2 Jo. 12 and Phil. 13. Ἐβουλήσα, not ‘would have liked’ as Blass (Gr. of N. T. Gk., p. 207) has it. In Gal. 4:20, θέλειν δὲ παρέθναι πρὸς ὑμᾶς ἄρτη, Paul is speaking of present time (cf. ὅτι ἀποροήσα). He puts the statement in the imperfect as a polite idiom. The use of θέλω is seen in Ro. 16:19. The usual force of the mode and tense appears in ἰθέλει in Jo. 6:21. The negative brings out sharply the element of will (cf. Lu. 19:14; Mt. 22:3). In Ro. 9:3, ηὐχόμην γὰρ ἀνάθεμα εἶναι αὐτὸς ἔγει ὧπο τοῦ Χριστοῦ, the same courteous (even passionate) idiom occurs. It is not έὐχομα as in 2 Cor. 13:7 (he does not dare pray such a prayer), nor did he do it (cf. ηὐχοντο Ac. 27:29). He was, however, on the verge of doing it, but drew back. With this example we come close to the use of the indicative for unreality, the so-called “unreal” indicative. See also chapter on Tense.

(b) Present Necessity, Obligation, Possibility, Propriety in Tenses of the Past. This is the usual “potential” indicative. The imperfect of such verbs does not necessarily refer to the present.\(^2\) Thus in Jo. 4:4, ἔδει αὐτὸν διέρχεσθαι διὸ τῆς Σαμαρίας, it is simply a necessity in past time about a past event. So ἔδει in Jo. 4:20, 24 expresses a present necessity. This use of the imperfect ἔδει thus differs from either the present or the ordinary imperfect. The idiom is logical enough.\(^3\) It was a necessity and the statement may be confined to that phase of the matter, though the necessity still exists. So Lu. 24:26, οὔχ ἴσαν ἔδει παθῶν τὸν Χριστὸν; Cf. also Mt.

4 Moulton, Prol., p. 199.
7 Thompson, Synt. of Attic Gk., p. 186.
1 W.-Th., p. 283.
2 K.-G., Bd. I, p. 204 f.
3 Blass, Gr. of N. T. Gk., p. 206.
18:33; 23:23; 25:27; Lu. 11:42; 13:16 (cf. [Page 920] δει in verse 14); Ac. 27:21. It is an easy step from this notion to that of an obligation which comes over from the past and is not lived up to. The present non-fulfilment of the obligation is left to the inference of the reader or hearer. It is not formally stated. It happens that in the N. T. it is only in the subordinate clauses that the further development of this use of ἐδει comes, when only the present time is referred to. Thus in Ac. 24:19, οὐκ ἐδει ἐκεῖν οὐ παρέχεται. They ought to be here, but they are not. Our English “ought” is likewise a past form about the present as well as about the past.1 So 2 Cor. 2:3, ἢν ἐδει με χαιρεῖν. In Heb. 9:26, ἐν ἐδει ἀποτράπυνοι πολλάκις παρθενίων, there is an implied condition and ἐδει is practically an apodosis of the second-class condition, which see. The same process is seen in the other words. Thus in 2 Cor. 12:11, ἐγὼ ὡφειλομέν ὑμῖν ἐξουσιασθαι, we have a simple past obligation. So in Lu. 7:41; Heb. 2:17. Note common use of the present tense also, as in Ac. 17:29. Cf. ὃ ὡφείλετε ἵνα ἑπετείκησαι παρυάλλοκα μεν (Lu. 17:10), where the obligation comes on from the past. But in 1 Cor. 5:10, ἐν ἐδεί (Collider ἕκ τοῦ κόσμου ἐξελθεῖν, we have merely present time under consideration and a practical apodosis of a second-class condition implied. I do not agree with Moulton2 that ἢ in such instances has been “dropped.” It simply was not needed to suggest the unreality or non-realization of the obligation. The context made it clear enough. Χρή occurs only once in the N. T. (Jas. 3:10), whereas προσήκει (Attic) is not found at all, nor ἐξεστί (but ἐξόν) nor ἐξῆν.3 But ἢδυνατο is used at the present time. So Jo. 11:37. Cf. the apodosis in the second-class condition without ἢν in Jo. 9:33; Ac. 26:32. The use of ὡς ἢν ἔκακεν (Col. 3:18) and ὃς ἢκεν ἔκακεν (Eph. 5:4) are both pertinent, though in subordinate clauses. Note in particular ὃς καθήκεν ἀποτράπυντα ἤν (Ac. 22:22), ‘He is not fit to live.’ In Mt. 26:24, καλὸν ἢν αὐτῷ εἰ ὁ παρενηθήν, we have the apodosis without ἢν of a condition of the second class (determined as unfulfilled). There is no condition expressed in 2 Pet. 2:21, κραύγὴν γὰρ ἢν ἀμοιβαὶ δὲ ἢν ἄγαννοικέται τὴν ὅδην τῆς δικαιοσύνης. Moulton4 finds the origin of this idiom in the conditional sentence, but Winer5 sees in it merely the Greek way of affirming what was necessary, possible or appropriate in itself. So Gildersleeve.6 The modern Greek preserves this idiom (Thumb, [Page 921] Handb., p. 128). The use of ἐκέλλομαι in Rev. 3:2 approaches this potential indicative. Cf. Thompson, Syntax, p. 274. For the use of the infinitive rather than the indicative see ἢ—παρεσεῖν in Lu. 16:17. So also ἵνα and subjunctive as in Jo. 6:7. Cf. Viteau, Le Verbe, p. 21. The use of

Viteau

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).

The Apodosis of Conditions of the Second Class. This matter has already been touched on slightly and is treated at length under Conditional Sentences. It can be merely sketched here. The condition is not always expressed and ἄν usually is present. The use of ἄν, however, in the apodosis is not obligatory. We know very little about the origin and meaning of ἄν anyhow. It seems to have a demonstrative sense (definite, then, in that case) which was shifted to an indefinite use. Cf. τόν καὶ τόν, τὰ καὶ τὰ. Gildersleeve interprets it as a particle “used to colour the moods of the Greek language.” With the past tenses of the indicative in independent sentences it is a definite particle. The effort to express unreality by the indicative was a somewhat difficult process. In Homer “the unreal imperfect indicative always refers to the past.” So in Heb. 11:15. Nothing but the context can show whether these past tenses are used in opposition to the past or the present. The κοινή received this idiom of the unreal indicative “from the earlier age as a fully grown and normal usage, which it proceeded to limit in various directions.” In Jo. 15:22 we have a good illustration of this construction. We know that ἄμαρτιάν οὐκ εἰχόσαν is in opposition to the present reality because it is followed by νῦν δὲ πρόφασιν οὐκ ἔχοσαν. The same thing is seen in verse 24 when νῦν δὲ ἔσοράςαν follows. In verse 19 ἄν ἐφίλει is used, the usual construction. In Lu. 17:6 ἔλεγετε ἄν and ὑπήκουσεν ἄν are used after the protasis εἰ ἔχετε (first-class condition). This is a mixed condition. So also the marginal reading in W. H. in Jo. 8:39 is ἔσπειτε after εἰ ἔστε and is followed by νῦν δὲ ζητεῖτε (cf. above). The absence of ἄν seems more noticeable in John’s Gospel. Cf. Jo. 19:11, οὐκ ἔχεις ἔχουσίαν κατ’ ἐμοῦ οὔδεμιάν εἰ μή ἄν δεδομένον σοί ἄνοιξαν. Paul has the same idiom. Thus Gal. 4:15 εἰ δυνατὸν τοὺς δόφθαλμοὺς ὑμῶν ἐξορύζαντες ἔδωκατε μοι and Ro. 7:7 τὴν ἄμαρτιάν οὐκ ἔγνων εἰ μὴ δὲ νόμος, τὴν τε [Page 922] γὰρ ἐπιθυμίαν οὐκ ἤδειν εἰ μὴ ὁ νόμος. The MSS. vary in the support of ἄν as in Gal. 4:15, where EKLP (and ΝD) have it. In Jo. 18:36, B does not have ἄν, while in 8:19,
D does not have it, and the other MSS. differ in the position of ἕν.¹ This particle comes near the beginning of the clause, though not at the beginning. It does not precede οὐκ (cf. Gal. 1:10). It is sometimes repeated in successive apodoses (cf. Jo. 4:10), but not always (cf. Lu. 12:39). Cf. Kühner-Gerth, Bd. I, p. 247. On the use of ἕν in general see Thompson, Syntax, pp. 291 ff. Hoogeveen (Doctrina Partic. Linguae Graecae, ed. sec., 1806, p. 35) makes ἕν mean simply debo, a very doubtful interpretation. “The addition of ἕν to an indicative apodosis produced much the same effect as we can express in writing by italicizing ‘if.’”² This emphasis suggests that the condition was not realized. The papyri likewise occasionally show the absence of ἕν.³ The condition is not always expressed. It may be definitely implied in the context or left to inference. So καὶ γὼ ἐλθὼν σὺν τόκῳ ἕν ἔπραξα αὐτό (Lu. 19:23) and καὶ ἐλθὼν ἐγὼ ἐκομισάμην ἕν τὸ ἐμὸν σὺν τόκῳ (Mt. 25:27). Here the condition is implied in the context, a construction thoroughly classical. But, in principal clauses, there is no instance of ἕν with a past tense of the indicative in a frequentative sense.⁴ It only survives in relative, comparative or temporal clauses (cf. Mk. 6:56; Ac. 2:45; 4:35; 1 Cor. 12:2; Mk. 3:11; 11:19). So D in Mk. 15:6, ἕν ἔφεστον. Both the aorist and the imperfect tenses are used thus with ἕν in these subordinate clauses. There was considerable ambiguity in the use of the past tenses for this “unreal” indicative. No hard and fast rule could be laid down. A past tense of the indicative, in a condition without ἕν, naturally meant a simple condition of the first class and described past time (cf. Heb. 12:25). But in certain contexts it was a condition of the second class (as in Jo. 15:22, 24). Even with ἕν it is not certain⁵ whether past or present time is meant. The certain application to present time is probably post-Homeric.⁶ The imperfect might denote⁷ a past condition, as in Mt. 23:30; 24:43 (Lu. 12:39); Jo. 4:10; 11:21, 32; 1 Jo. 2:19; [Page 923] Heb. 11:15, or, as commonly, a present condition (cf. Lu. 7:39). The aorist would naturally denote past time, as in Mt. 11:21. The two tenses may come in the same condition and conclusion, as in Jo. 14:28. The past perfect is found in the protasis, as in Mt. 12:7; Jo. 19:11. Once the real past perfect meets us in the conclusion (1 Jo. 2:19). And note ἕν ἔδειτε in Jo. 14:7.

(δ) Impossible Wishes. These impracticable wishes were introduced in Attic by εἰθε or εἰ γάρ, which used also ὧφελον with the infinitive. From this form a particle was developed ὧφελον (augmentless) which took the place of εἰθε and εἰ γάρ. The dropping of the augment is noted in Herodotus (Moulton, Prol., p. 201). As a matter of fact, this unfulfilled wish occurs only three times in the N. T.: once with the aorist about the past, ὧφελον γε ἐβιασελύσατε (1 Cor. 4:8), and twice with the imperfect

---

2 Moulton, Prol., p. 200.
7 Moulton, Prol., p. 201.
about the present (2 Cor. 11:1; Rev. 3:15). Ὄφελον occurs once also with the future (Gal. 5:12). Many of the MSS. (D'EFGKL) read Ὄφελον in 2 Cor. 11:1, and a few do the same in 1 Cor. 4:8. The idiom occurs in the LXX and in the inscriptions. Cf. Schwyzer, Perg., p. 173. The modern Greek expresses such wishes by νά or άς and imperfect or aorist (Thumb, p. 128). For ἔδραμον in Gal. 2:2, of unrealized purpose, see Final Clauses. Radermacher (N. T. Gr., p. 127) quotes Ὄφελον ἔμεινας, Achilles Tatius, II, 24, 3 and Ὄφελον ἐγώ μᾶλλον ἐπύρεσσον, Epict., Diss., 22, 12.

(b) The Present. In Mt. 12:38, διδάσκαλε, θέλον τόν Ἰησοῦν ἴδεν, the present seems rather abrupt.1 In Jo. 12:21, κύριε, θέλεις τόν Ἰησοῦν ἴδεν, this is felt so strongly that it is translated: ‘Sir, we would see Jesus.’ See also Jo. 6:67. Cf. ἔθουσα in Ac. 25:22 and εὐξαίμην ἄν in 26:29. There does not seem to be the same abruptness in θέλω in 1 Cor. 7:7. Cf. also φείδομαι in 7:28. There were probably delicate nuances of meaning which sufficiently softened these words, shadings which now escape us. There is no difficulty about ἀρκεῖ in 2 Cor. 12:9. In a case like ὑπάγω ἄλλον ἐπύρεσσον, Epict., Diss., 22, 12. (c) The Future. The future indicative “was originally a subjunctive in the main”5 and it has a distinct modal development. This fact comes out in the fact that the future

5 Moulton, Prol., p. 199.
tense of the indicative is a rival of the subjunctive, the optative and the imperative. Like the subjunctive and optative the future may be merely futuristic (prospective) or deliberative or volitive. This matter has been discussed at length under Tenses, which see. As an example of the merely futuristic note Mt. 11:28, of the volitive see Lu. 13:9, of the deliberative note Jo. 6:68.

II. The Subjunctive Mode (ἡ ὑποτακτικὴ ἔγκλισις).

Some of the Greek grammarians called it ἡ διστακτική, some ἡ συμβουλευτική, some ἡ ὑποθετική. But no one of the names is happy, for the mode is not always subordinate, since it is used freely in principal clauses, nor is it the only mode used in subordinate clauses. But the best one is ἡ διστακτική.

1. Relations to Other Modes.

The development of the modes was gradual and the differentiation was never absolutely distinct.

(a) The Aorist Subjunctive and the Future Indicative. These are closely allied in form and sense. It is quite probable that the future indicative is just a variation of the aorist subjunctive. Cf. ἔδοµαι, πίῳµαι, φάγοµαι. The subjunctive is always future, in subordinate clauses relatively future. Hence the two forms continued side by side in the language. There is a possible distinction. “The subjunctive differs from the future indicative in stating what is thought likely to occur, not positively what will occur.” But in the beginning (cf. Homer) it was probably not so. Brugmann (Griech. Gr., p. 499) pointedly contends that many so-called future indicatives are just “emancipated short-vowel conjunctives.” Cf. Giles, Manual, pp. 446–448; Moulton, Prol., p. 149.

Giles

GILES, P., A Short Manual of Comparative Philology. 2d ed. (1901).

(b) The Subjunctive and the Imperative. These are closely allied. Indeed, the first
person imperative in Greek, as in Sanskrit,\(^2\) is absent in usage and the subjunctive has
to be employed instead. There is a possible instance of the subjunctive as imperative
in the second person in Sophocles, but the text is uncertain.\(^3\) The use of μή and the
aorist subjunctive in prohibitions of the second and third persons is also pertinent.
Thus the subjunctive is in close affinity with the imperative.

(c) The Subjunctive and the Optative. They are really variations of the same mode.
In my *Short Grammar of the Greek N. T.*\(^4\) I have for the sake of clearness grouped
them together. I treat them separately here, not because I have changed my view, but
in order to give a more exhaustive discussion. The closeness of the connection
between the subjunctive and the optative is manifest in the Sanskrit. “Subjunctive and
optative run closely parallel with one another in the oldest language in their use in
independent clauses, and are hardly distinguishable in dependent.”\(^5\) In the Sanskrit the
subjunctive disappeared before the optative save in the imperatival uses. It is well
known that the “Latin subjunctive is syncretistic, and does duty for the Greek
conjunctive and optative.”\(^6\) Delbrück, indeed, insists that the two modes originally
had the same form and the same meaning.\(^7\) Delbrück’s view has carried the bulk of
modern opinion. But Giles\(^8\) is justified in saying: “The original meaning of these
moods and the history of their development is the most difficult of the many vexed
questions of comparative syntax.” It is true that [Page 926] the subjunctive in Greek
refers only to the future, while the optative is not bound to any sphere.\(^1\) But the
optative is usually relatively\(^2\) future like our “should,” “could,” etc. The use of the
subjunctive was greater in Homer’s time than afterwards. The independent
subjunctive in particular was more freely used in Epic than in Attic. In the modern

Greek the subjunctive has not only displaced the optative, but the future indicative and the infinitive. But even so in modern Greek the subjunctive is relatively reduced and is almost confined to subordinate clauses (Thumb, Handb., pp. 115, 126). The fut. ind. in modern Greek is really θά (θανά) and subj. θα Hamilton overstates it in saying: “This monarch of the moods, which stands absolute and alone, has all the other moods dependent on it.” It is possible that originally these two moods were used indifferently. Vandacle argues for a radical difference between the two moods, but he does not show what that difference is. There were distinctions developed beyond a doubt in actual use, but they are not of a radical nature. The Iranian, Sanskrit and the Greek are the only languages which had both the subjunctive and optative. The Sanskrit dropped the subjunctive and the Greek finally dispensed with the optative as the Latin had done long ago.

2. ORIGINAL SIGNIFICANCE OF THE SUBJUNCTIVE. Delbrück is clear that “will” is the fundamental idea of the subjunctive, while “wish” came to be that of the optative. But this position is sharply challenged to-day. Goodwin denies that it is possible “to include under one fundamental idea all the actual uses of any mood in Greek except the imperative.” He admits that the only fundamental idea always present in the subjunctive is that of futurity and claims this as the primitive meaning from the idiom of Homer. Brugmann denies that a single root-idea of the subjunctive can be found. He cuts the Gordian knot by three uses of the subjunctive (the volitive, the deliberative, the futuristic).

futuristic uses as the same. Sonnenschein\textsuperscript{2} sees no distinction between volitive and deliberative, to which Moulton\textsuperscript{3} agrees. “The objection to the term ‘deliberative,’ and to the separation of the first two classes, appears to be well grounded.” He adds: “A command may easily be put in the interrogative tone.” That is true. It is also true “that the future indicative has carried off not only the futuristic but also the volitive and deliberative subjunctives.” But for practical purposes there is wisdom in Brugmann’s division. Stahl\textsuperscript{4} sees the origin of all the subjunctive uses in the notion of will. The future meaning grows out of the volitive. Mutzbauer\textsuperscript{5} finds the fundamental meaning of the subjunctive to be the attitude of expectation. This was its original idea. All else comes out of that. With this Gildersleeve\textsuperscript{6} agrees: “The subjunctive mood is the mood of anticipation,” except that he draws a sharp distinction between “anticipation” and “expectation.” “Anticipation treats the future as if it were present.” He thinks that the futuristic subjunctive is a “deadened imperative.”\textsuperscript{7} But Monro\textsuperscript{8} on the whole thinks that the futuristic meaning is older than the volitive. So the grammarians lead us a merry dance with the subjunctive. Bäumlein\textsuperscript{9} denies that the subjunctive is mere possibility. It aims after actuality, “a tendency towards actuality.” At any rate it is clear that we must seek the true meaning of the subjunctive in principal clauses, since subordinate clauses are a later development, though the futuristic idea best survives in the subordinate clause.\textsuperscript{10} In a sense Hermann’s notion is true that three ideas come in

the modes (Wirklichkeit, Möglichkeit, Notwendigkeit). The indicative is Wirklichkeit, the imperative is Notwendigkeit, while the subjunctive and the optative are Möglichkeit. I have ventured in my Short Grammar to call the subjunctive and optative the modes of doubtful statement. Page 928 while the indicative is the mode of positive assertion and the imperative that of commanding statement. The modes, as already seen, overlap all along the line, but in a general way this outline is correct. The subjunctive in principal sentences appears in both declarative and interrogative sentences. Cf. εἰρήνην ἔχωμεν πρὸς τὸν θεόν (Ro. 5:1), τί ἐπέο ὕμιν; (1 Cor. 11:22). It is found in both positive and negative statements. Cf. δῶμεν ἢ μὴ δῶμεν; (Mk. 12:14), μὴ σχίσωμεν αὐτόν, ἀλλὰ λάχωμεν (Jo. 19:24). It is the mood of doubt, of hesitation, of proposal, of prohibition, of anticipation, of expectation, of brooding hope, of imperious will. We shall, then, do best to follow Brugmann.

3. THREEFOLD USAGE. The three uses do exist, whatever their origin or order of development.1

(a) Futuristic. This idiom is seen in Homer with the negative οὐ as in οὐδὲ ἔδωμι, ‘I never shall see.’ It is an emphatic future.2 This emphatic future with the subjunctive is common in Homer with ἄν or κεν and once without. Gildersleeve3 calls this the “Homeric subjunctive,” but it is more than doubtful if the usage was confined to Homer. Moulton (Prol., p. 239) quotes P. Giles as saying: “This like does for many dialects what the subjunctive did for Greek, putting a statement in a polite, inoffensive way, asserting only verisimilitude.” Note the presence of the subjunctive in the subordinate clauses with ἐάν (εἰ).4 The presence of οὗ here and there with the subjunctive testifies to a feeling for the futuristic sense. See ητίς οὗ κατοικισθεί (Jer. 6:8). In the modern Greek, Thumb (Handb., p. 195) gives ἂ δὲν πιστεύεις, where δὲν is for οὐδὲν. The practical equivalence of the aorist subjunctive and the future indicative is evident in the subordinate clauses, particularly those with εἰ, ἵνα, ὡς and ὅστις. Cf. ὃ προσένεγκε (Heb. 8:3). This is manifest in the LXX, the N. T., the inscriptions and the late papyri.5 Blass6 pronounces ὡς δὲνθροπος βάλῃ (Mk. 4:26) “quite impossible” against NBDLΔ. But Moulton7 quotes οὗ τεθή from inscriptions 317, 391, 395, 399 al. in Ramsay’s Cities and Bishoprics of Phrygia, ii, 392. For the papyri, Moulton (Prol., p. 240) notes B. U. 303 (vi/A.D.) παράσχω=‘I will furnish,’ A.

Ramsay

Ramsay, W. M., Cities and Bishoprics of Phrygia. 2 vols. (1895, 1897).

———, St. Paul the Traveller (1896).
ἔλθω = ‘I will come.’ The itacisms in –ση and –σει prove less, as Moulton notes. The examples in the papyri of itacistic –σει, –ση are “innumerable.” In Ac. 5:15, W. H. [Page 929] print ἵνα—ἐπισκιάσει (B, some cursives). Radermacher (N. T. Gr., p. 136) is quite prepared to take πῶς φύγητε (Mt. 23:33)=πῶς φεύξεσθε. This is probably deliberative, but he makes a better case for ἐν τῷ ἔηρῳ τί γένηται (Lu. 23:31). Blass¹ notes that “the mixture of the fut. ind. and aorist conj. has, in comparison with the classical language, made considerable progress.” He refers to Sophocles, Lexicon, p. 45, where ἐπὶ οἴσι is quoted as ἐρῶ σοι.² In a principal clause in Clem., Hom. XI. 3, we have καὶ οὗτος—δονηθῇ, and Blass has noted also in Is. 33:24 ἰφεθῇ γὰρ αὐτοῖς ἢ ᾗ αἰρετία. We cannot, indeed, trace the idiom all the way from Homer. “But the root-ideas of the subjunctive changed remarkably little in the millennium or so separating Homer from the Gospels; and the mood which was more and more winning back its old domain from the future tense may well have come to be used again as a ‘gnomic future’ without any knowledge of the antiquity of such a usage.”³ It was certainly primitive in its simplicity⁴ even if it was not the most primitive idiom. The use of οὖ with the subj. did continue here and there after Homer’s day. We find it in the LXX, as in Jer. 6:8 (above) and in the Phrygian inscription (above). In fact, in certain constructions it is common, as in μὴ οὖ after verbs of fearing and caution. Cf. 2 Cor. 12:20 and MSS. in Mt. 25:9 (μὴ ποτε οὐκ ἀρκέσῃ). It is even possible that the idiom οὖ μὴ is to be thus explained. Gildersleeve⁵ remarks on this point: “It might even seem easier to make οὖ belong to ἀλογονῦω, thus combining objective and subjective negatives, but it must be remembered that οὖ with the subjunctive had died out (except in μὴ οὖ) before this construction came in.” The vernacular may, however, have preserved οὖ with the subj. for quite a while. Jannaris⁶ confidently connects οὖ in this idiom with the subj. and explains μὴ as an abbreviation of μὖν. If either of these explanations is true, the N. T. would then preserve in negative principal sentences the purely futuristic subjunctive. Burton⁷ is clear that anyhow “the aorist subjunctive is used with οὖ μὴ in the sense of an emphatic future indicative.” The ancient Greek sometimes employed the present subjunctive in this sense, but the N. T. does not use it. But the LXX has it, as in Jer. 1:19. So in Is. 11:9 we find οὖ μὴ κακοποιήσουσιν οὐδὲ μὴ δύνωνται. The future ind. with οὖ μὴ is rare in the N. T., but οὖ μὴ with the aorist [Page 930] subj. appears in the W. H. text 100 times.¹ It cannot be said that the origin of this οὖ μὴ construction has been solved. Goodwin² states the problem well. The two negatives ought to neutralize each other, being simplex, but they do not (cf. μὴ οὖ). The examples are partly futuristic and partly prohibitory. Ellipsis is not satisfactory nor complete.

separation (Gildersleeve) of the two negatives. Perhaps ou expresses the emphatic denial and μή the prohibition which come to be blended into the one construction. At any rate it is proper to cite the examples of emphatic denial as instances of the futuristic subjunctive. Thus ou μη σε Δνου, ouδο ou μη σε Εγκαταλίπω (Heb. 13:5); ou μη Ἄπολεση (Mk. 9:41); ουκέτι ou μη πίω (Mk. 14:25). Cf. Lu. 6:37 etc. See ou μή in both principal and subordinate clauses in Mk. 13:2. See also Tense.

It is a rhetorical question in Lu. 18:7 (note also πακροθυμεῖ) rather than a deliberative one. In Rev. 15:4 we have the aor. subj. and the fut. ind. side by side in a rhetorical question, τίς ου μή φοβηθῇ, κύριε, καὶ δοξάζει τὸ Θνομα: See also the τις ἕξ ύμων ἔξει φίλον καὶ πορεύεται πρὸς αὐτόν—καὶ ἐπὶ αὐτῷ. (Lu. 11:5). It is difficult to see here anything very “deliberative” about ἐπὶ as distinct from ἔξει. It may be merely the rhetorical use of the futuristic subj. in a question. Have the grammars been correct in explaining all these subjunctives in questions as “deliberative”? Certainly the future ind. is very common in rhetorical and other questions in the N. T.

(b) Volitive. There is no doubt about the presence of the volitive subjunctive in the N. T. The personal equation undoubtedly cuts some figure in the shades of meaning in the moods, here as elsewhere.3 Gildersleeve4 would indeed make this “imperative sense” the only meaning of the mood in the standard language after Homer. He does this because the deliberative subjunctive expects an imperative answer. But, as already seen, that is a mooted question. Brugmann5 takes pains to remark that the element of “will” in the volitive subjunctive belongs to the speaker, not to the one addressed. It is purely a matter of the context. It occurs in both positive and negative sentences and the negative is always μή. The usage is common in Homer.6 Monro interprets it as expressing “what the speaker resolves or insists [Page 931] upon.” In principle the hortatory subjunctive is the same as the prohibitive use with μή. It was a necessity for the first person, since the imperative was deficient there. Moulton1 ventures to treat this hortatory use of the first person subj. under the imperative, since the Sanskrit grammars give the Vedic subjunctive of the first person as an ordinary part of the imperative. The other persons of the Sanskrit subj. are obsolete in the epic period. Thus bharāma, bharata, bharantu are compared with φέρωμεν, φέρετε, φερόντον (Attic for κοινῆ φερέτωσαν). Moulton2 appeals also to the combination of the first and second persons in constructions like ἐγείρεσθε ἄγωμεν (Mk. 14:42). This example illustrates well the volitive idea in ἄγωμεν.3 The first person is usually found in this construction. Cf. also ἄγωμεν (Jo. 11:7); φάγομεν καὶ πίωμεν (1 Cor. 15:32); ἔχωμεν (Ro. 5:1, correct text); φρονῶμεν (Ph. 3:15); γρηγορῶμεν καὶ νήφομεν (1 Th. 5:6). Cf. Lu. 9:33 in particular (infinitive and subj.). In 1 Cor. 5:8, ὢστε ἔοςταξόμεν, the subjunctive is hortatory and ὢστε is an inferential particle. Cf. further Heb. 12:1; 1 Jo. 4:7. As examples with μή see μή σχίσωμεν (Jo. 19:24); μή καθεύδωμεν (1 Th.

3 See 1 Cor. 10:7–9 for the change from first to second persons.

3 Giles, Man., p. 505.
5 Griech. Gr., p. 500.
6 Monro, Hom. Gr., p. 197.
1 Prol., p. 175.
2 Ib.
5:6). The construction continued to flourish in all stages of the language. We have δὲ ἔρχομαι (Mk. 12:7. Cf. δὲ ἔσται, Mt. 28:6) and ἄρα ἱδομαι (Mt. 27:49). In άρας the singular has become stereotyped. This use of ἄρας was finally shortened into ἄς in the modern Greek and came to be universal with the hortatory subjunctive of the first person and even for the third person imperative in the vernacular (as ἄς ἔχει for ἔχειτω). In the N. T. ἄρας is not yet a mere auxiliary as is our “let” and the modern Greek ἄς. It is more like “do let me go.”

In the second person we have only the negative construction in prohibitions with the aorist subjunctive, a very old idiom (see Tenses, Aorist). “The future and the imperative between them carried off the old jussive use of the subjunctive in positive commands of 2d and 3d person. The old rule which in (‘Anglicistic’) Latin made sileas an entirely grammatical retort discourteous to the Public Orator’s sileam?—which in the dialect of Elis” (to go on with Moulton’s rather long sentence) “produced such phrases as ἐπιμέλειαν ποιήσατε Νικόδρομορ—let Nicodromus attend to it,” has no place in classical or later Greek, unless in Soph., Phil., 300 (see Jebb). Add doubtfully Ll. P. 1, vs. 8 (iii/b.c.), Tb. P. 414 26 ώς (ii/a.d.).” See Moulton, Prol., p.

In the second person singular the N. T. always has ἄρας or ἡδομεν with the hortatory subjunctive.

2 It was rare in classic Gk. not to have ἄγε or φάσε or some such word. Cf. Goodwin, M. and T., p. 88; Gildersl., Synt., Pt I, p. 148 f. The volitive subj. is common in mod. Gk. (Thumb, Handb., p. 126) both for exhortations, commands, prohibitions and wishes. It occurs in the late pap. for wish, as καταγιώση, P.Oxy. I, 128, 9. So in the inscr. τοιαῦτα πάθη, Pontica III, 62, 8 (Anderson-Cumont-Grégoire). Radermacher (N. T. Gk., p. 128) cites also συντ μηθεῖσαι καὶ γένονται, Acta Thomae, p. 129.

3 Delbrück, Synt., p. 120; Monro, Hom. Gr., p. 240.

Jebb

Jebb, R. C., Attic Orators. 2d ed. (1893).

———, Introduction to the Iliad and the Odyssey. (1892).

———, On the Relation of Classical to Modern Greek (Appendix to Vincent and Dickson’s Handbook to Mod. Gk., 1887).
178. In the LXX, Jer. 18:8, note καὶ ἐπιστραφῆ, parallel with ἁποστραφῆτω in 18:11. In the modern Greek we have wishes for the future in the subj., since the opt. is dead. So ὁ θεός φυλάξῃ, ‘God forbid’ (Thumb, Handb., p. 127). Radermacher (N. T. Gr., p. 135) finds the subj. for wish in late papyri and inscriptions. It is even in the LXX, Ruth 1:9 A, δῷ κύριος ὑμῖν καὶ εὔρητε ἀνάπαυσιν, but B has optative. In the Veda the prohibitive mā is found only with the conjunctive, thus seeming to show that the imperative was originally used only in positive sentences. This idiom of μή and the aorist subj. held its own steadily in the second person. This point has been discussed at some length under Tenses. Take as illustrations the following: μὴ φοβηθήτε (Mt. 1:20); μὴ νομίσητε (5:17); μὴ εἰσεπετάξης (6:13). The use of ὥρα and ὥρατε with μή and the aorist subj. is to be noted. Some of these are examples of asyndeton just like ἀφες. Thus ὥρα μὴνείν μὴδὲν εἴπης (Mk. 1:44; cf. Mt. 8:4). So also ὥρα μή (Rev. 22:9) where the verb ποιήσῃ is not expressed. Cf. LXX ὥρα ποιήσης (Heb. 8:5) ὥρατε μὴδὲς γνωσκότω (Mt. 9:30), and ὥρατε θρονδέσθε (24:6). With βλέπετε it is not always clear whether we have asyndeton (parataxis) or a subordinate clause (hypotaxis). In Lu. 21:8, [Page 933] βλέπετε μὴ πλανηθῆτε, we may (p. 996) have parataxis as is possible in Heb. 12:25, βλέπετε μὴ παρατήρησοθε. Cf. Ac. 13:40; Gal. 5:15.

These forms occur with the third person also, as βλέπετε μή τις ὑμᾶς πλανήσῃ (Mt. 24:4). But, per contra, see 1 Cor. 10:12 (μή ἔσται in Col. 2:8). In 1 Th. 5:15, ὥρατε μή τις κακῶν ὄντι κακοῦ τινὶ ἀποδῷ, parataxis is probable. But the third person aorist subj. occurs with μή alone as in μή τις οὐν αὐτὸν ἔξωθενήσῃ (1 Cor. 16:11); μή τις με δοξῇ ἀφρονα ἔχαι (2 Cor. 11:16); μή τις μᾶς ἔξαπατήσῃ (2 Th. 2:3). Elsewhere μή and the aorist imperative occur in the third person. Radermacher (N. T. Gr., p. 134) quotes μή and 3d person aor. subj. from κοινή writers, inscr. and papyri. Careless writers even use μή οὖν ἄλλως ποιή; B. G. U. III, 824, 17. Even Epictetus (II, 22, 24) has μή αὐτόν θαυμάζῃ. No less volitive is an example with οὖ μή, like οὖ μή ἐσθεται (Mt. 5:20), which is prohibitive. So οὖ μή νίς (Jo. 13:8); οὖ μή πῆ (Lu. 1:15). There is the will of God in ἵστα ἐν ἤ μία κεραία οὐ μή παρέλθῃ (Mt. 5:18) in the third person. In Mt. 25:9, μή ποτε οὖ μή ἄρκεσῃ ἡμῖν καὶ ὑμῖν, the subj. is probably futuristic (or deliberative). In a late papyrus, O. P. 1150, 6 (vii/A.D.), note δέξεσον τὴν δύναμιν σον καὶ ἔξαπεθηκαὶ where the 3d pers. subj.=imperative like Latin. There are examples in the N. T. where ἰνα seems to be merely an introductory expletive with the volitive subjunctive. Thus ἰναι ἐπιθῆς (Mk. 5:23); ἵνα ἀναβλέψῃ; (10:51); ἵνα περισσεύσῃ (2 Cor. 8:7); ἵνα μημονεύσωμεν (Gal. 2:10. Note present tense); ἰνα φοβηθῆτε (Eph. 5:33) parallel with ἰστατάτω. Cf. ἰνα—δόῃ (δῷ) margin of W. H., Eph. 1:17. Moulton² finds in the papyri (B. U. 48, ii/iii A.D.) ἐν ἐναβῆς τῇ ἔστῃ ἰνα ὑμεῖς γενώμεθα. So also he cites ἵνα αὐτόν μὴ δυσοπήσῃς, F. P. 112 (99 A.D.), and ἰνα ἰσθι τῶν τόκων ἐλεημοσύνης. Cicer, Att. vi. 5. The modern Greek uses νὰ and subj. as imperative for both second and third persons (Thumb, Handb., p. 127 f.). Note also μὴ ἰνα ἀναστάτωσῃς ἡμᾶς, B. G. U. 1079 (A.D. 41), not ἰνα μη. Moulton (Prosl., p. 248) quotes Epict., IV, 1, 41, ἵνα μὴ μορός ἤ ἄλλ. ἵνα μᾶθη. The use of θέλω ἰνα (cf. Mk. 6:25; 10:35; Jo. 17:24) preceded this idiom. Moulton³ even

1 But Blass (Gr. of N. T. Gk., p. 278) holds the opposite view.
2 Prol., p. 179.
3 Ib., p. 178.
suggests that προσεύχεσθε ἵνα μὴ ἔλθητε εἰς πειρασμόν (Mk. 14:38) is as much parataxis as ὁ δὲ καὶ φιλολάσεσθε (Lu. 12:15). This “innovation” in the κοινή takes the place of ὅπως and the future ind. Moulton (Prol., p. 177 note) cites δὸ πος μοι μὴ ἔρείς, Plato, 337 B, ‘don’t tell me,’ where δὸ πος = ‘in which case.’ The use of μὴ after words of caution and apprehension is probably [Page 934] paratactic in origin.1 Moulton2 notes the use of the present subj. with expressions of warning as well as the aorist. Thus in Heb. 12:15, ἐπισκοποῦντες μὴ τις βία πικρίας ἔνοχλητε. But this construction borders so closely on subordinate clauses, if not clear over the line, that it will be best discussed there.

Subordinate clauses show many examples of the volitive subjunctive (as clauses of design, probably paratactic in origin, Moulton, Prol., p. 185). See διὴ ἱκανώσωμεν (Heb. 12:28). See discussion of Sub. Clauses.

(c) Deliberative. There is no great amount of difference between the hortatory (volitive) subjunctive and the deliberative. The volitive is connected with the deliberative in Mk. 6:24 f., τί αἰτήσωμαι; θέλω ἵνα δῶς. Thus ποιήσωμεν, ‘suppose we do it,’ and τί ποιήσωμεν; ‘what are we to (must we) do?’ do not vary much. The interrogative3 is a quasi-imperative. Gildersleeve4 notes in Plato (rare elsewhere in Attic) a “number of hesitating half-questions with μὴ or μὴ οὐ and the present subjunctive.” It is possible that we have this construction in Mt. 25:9, μὴ ποτε οὐ μὴ (W. H. marg. just οὐ) ἄρκεσθη μὴν καὶ οὐ μὴν. It is but a step to the deliberative question.5 This is either positive or negative, as in Mk. 12:14, δῶμεν μὴ δῶμεν: So also οὐ μὴ in Jo. 18:11, οὐ μὴ πίω αὐτό; Cf. also Lu. 18:7; Rev. 15:4. The aorist or the present tense occurs as in Lu. 3:10, τί οὖν ποιήσωμεν; and in Jo. 6:28, τί ποιῶμεν; so λέγω in Heb. 11:32. Cf. the indicative τί ποιῶμεν; in Jo. 11:47 and the future τί οὐν έροῦμεν; (Ro. 9:14). The question may be rhetorical (cf. Mt. 26:54; Lu. 14:34; Jo. 6:8; Ro. 10:14) or interrogative (cf. Mt. 6:31; 18:21; Mk. 12:14; Lu. 22:49).6 The kinship between delib. subj. and delib. fut. ind. is seen in Mk. 6:37, ἄγοράζομεν καὶ δόσομεν; The first person is the one of most frequent occurrence (cf. Ro. 6:1), τί αἰτήσωμαι (Mk. 6:24). But examples are not wanting for the second and third persons. Thus πῶς φύγητε ἅπα τῆς κρίσεως τῆς γεέννης; (Mt. 23:33); τί γένηται; (Lu. 23:31).

---

1 Cf. Blass, Gr. of N. T. Gk., p. 212 f.
2 Prol., p. 178.
5 Blass, Gr. of N. T. Gk., p. 211.
6 Burton, N. T. Moods and Tenses, p. 77.
See further Mt. 26:14; Ro. 10:54. It is sometimes uncertain whether we have the subjunctive or the indicative, as in ἔτερον προσδοκῶμεν (Mt. 11:3) and ἔπαινεσω ὑμᾶς (1 Cor. 11:22). But note τί εἴπω ὑμῖν: in the last passage. In Lu. 11:5 we have both [Page 935] τίς ἔξει καὶ εἰσήκουσα. So τί δοῦ (Mk. 8:37, ACD δῶσει) may be compared with τί δόσει (Mt. 16:26). ¹ This ambiguity appears in τί ποιήσω; and ἔγνω τί ποιήσω in Lu. 16:3 f. The deliberative subj. is retained in indirect questions. Cf. Mt. 6:31 with Mt. 6:25. The kinship between the deliberative subj. in indirect questions and the imperative and the volitive subjunctive is seen in Lu. 12:4 f., μὴ φοβηθῆτε—ὑποδείξω δὲ ὑμῖν τίνα φοβηθῆτε: φοβηθῆτε κτλ. The deliberative subj., like the volitive, has various introductory words which make asyndeton (parataxis). These become set phrases like ἄφες, ἡρα. Thus ποῦ θέλεις ξομάσωμεν: (Mt. 26:17), θέλεις εἴπωμεν; (Lu. 9:54). In Lu. 18:41 we have τί σοι θέλεις ποιήσω; and ἢνα ἄναβλέψω as the reply, using ἢνα in the brief answer. Cf. further Mt. 13:28. In Jo. 18:39, βούλεσθε οὐν ἀπολύσω, we probably have the subj. also. Some MSS. have εἰ πατάξωμεν; in Lu. 22:49.² We may leave further discussion of the subj. to the subordinate clauses. We have no examples in the N. T. of ἄν with the subj. in independent sentences (but see κε and the subj. in Homer). In subordinate clauses ἄν is very common, though not necessary, as will be seen.³ (Cf. discussion of εἰ, ἄστις.) But Jannaris⁴ gives instances of ἄν with the subj. in principal clauses (futuristic) in Polybius, Philo, Plutarch, Galen, etc. With the disappearance of the fut. ind., the opt. and the imper., the subj. has the field as the “prospective mood.” It is found in the modern Greek as in τί νὰ γίνη (Thumb, Handb., p. 126).

III. The Optative Mode (ἡ ἑὐκτικὴ ἔγκλισις). It has already been shown that the optative does not differ radically from the subjunctive. Jannaris\(^5\) calls the optative the "secondary subjunctive."

1. HISTORY OF THE OPTATIVE. For the facts see chapter on Conjugation of the Verb. It is an interesting history and is well outlined by Jannaris\(^6\) in his Appendix V, "The Moods Chiefly Since A. (Ancient Greek) Times." It retreated first from dependent clauses and held on longest in the use for wish in independent sentences like γένοιτο. But even here it finally went down before the fut. ind. and subj. The optative was a luxury [Page 936] of the language and was probably never common in the vernacular. Certainly it is very rare in the vernacular κοινή (both inscriptions and papyri). It is a literary mood that faded before the march of the subj. In a hundred pages of the Memorabilia of Xenophon the optative occurs 350 times. He had a "hyperorthodox love of the mood."\(^1\) Plato’s Phaedo shows it 250 times in a corresponding space, but Strabo has it only 76, Polybius 37, Diodorus Siculus 13 times in a hundred pages.\(^2\) The 67 examples in the N. T. are in harmony with the κοινὴ usage. Gildersleeve pithily says: "The optative, which starts life as a wish of the speaker, becomes a notion of the speaker, then a notion of somebody else, and finally a gnomon of obliquity" (A. J. of Phil., 1908, p. 264). In the LXX the optative is rare, but not so rare as in the N. T., though even in the LXX it is replaced by the subj. (Thackeray, Gr., p. 193) as in the late papyri and inscriptions (Radermacher, N. T. Gr., pp. 128, 135).

2. SIGNIFICANCE. There is no definite distinction between the subjunctive and the optative in the Sanskrit.\(^3\) The Latin put all the burden on the subj., as the Greek finally did. The Sanskrit finally made the optative do most of the work. In a word, the optative is a sort of weaker subjunctive.\(^4\) Some writers make the opt. timeless and

3 Whitney, Sans. Gr., p. 218. In the original speech there was no clear distinction between the subj. and the opt. (Curtius, Temp. und Modi, 1846, p. 266).
used definitely of the past. It is rather a “softened future” sometimes flung back into
the past for a Standpunkt. We do not know “whether the opt. originally expressed
wish or supposition.” The name does not signify anything. It “was invented by
grammarians long after the usages of the language were settled.” They just gave it
the name εὐκτική because at that time the only use it had without ὅν was that of
wishing. The name is no proof that wishing was the primitive or the only function or
the real meaning of the mode. We have precisely the same difficulty as in the
subjunctive. Indeed, the [Page 937] optative has three values, just like the
subjunctive, viz. the futuristic (potential), the volitive (wishes) and the deliberative. In
the first and third kinds ὅν is usually present, but not always. Brugmann notes
only two, omitting the deliberative as some scholars do for the subj. He does reckon a
third use in indirect discourse, but this is merely the opt. in subordinate sentences and
may be either of the three normal usages. The rare fut. opt. in indirect discourse
illustrates the point (not in the N. T.). There is no doubt of the distinction between the
futuristic (potential) with negative οὐ (cf. futuristic subj. in Homer) and the volitive
use with µῆ (cf. subj. again). But there was also a “neutral sense” that can hardly be
classed either as futuristic or volitive. Gildersleeve calls this the “optative in
questions,” usually with ὅν. This is the deliberative use.

3. THE THREE USES.

(a) Futuristic or Potential. We begin with this whether it is the first in time or not.
Delbrück has taken several positions on this point. The use of the negative οὐ here

which is an overrefinement. It is merely a weakened form of wish (K.-G., Bd. I, p.
228) or of the potential use.

Delbrück

DELBÜCK, B., Ablativ Localis Instrumentalis (1867).
shows its kinship with the future (cf. fut. ind. and aorist subj. in Homer). The ἄν was not always present in Homer and it is not the ἄν that gives the potential idea to the mode. In poetry the use without ἄν continued. “The optative is the ideal mood of the Greek language, the mood of the fancy.” Moulton puts it clearly: “It was used to express a future in a milder form, and to express a request in deferential style.” Radermacher cites from Epictetus, II, 23, 1, ἄν ἡδον ἄναγνή—ἄν τις ῥὸν ἄκοψει,

showing clearly that the opt. and the fut. ind. are somewhat parallel. Moulton (Prol., p. 194) cites Deut. 28:24 ff., where the opt. and fut. ind. alternate in translating the same Hebrew. I do not agree with Radermacher (N. T. Gr., p. 128) in seeing in ἦθελον παρεῖναι (Gal. 4:20) a mere equivalent of θέλομι ἄν. See imperfect ind. The presence of ἄν gives “a contingent meaning” to the verb and makes one think of the unexpressed protasis of the fourth-class condition. The [Page 938] idiom has vanished as a living form from the vernacular κοινή in the N. T. times.1 It appears only in Luke’s writings in the N. T. and is an evident literary touch. The LXX shows it only 19 times outside of 4 Maccabees and 30 with it.2 Moulton3 notes one papyrus which does not have ἄν (cf. Homer), though he would suspect the text and read as Mahaffy does οὐθεν ὑπείπαμι, Par. P. 63 (ii/b.c.). But curiously enough Luke has only one instance of this “softened assertion” apart from questions. That is in Ac. 26:29 (critical text) εὐξαίμην ἄν. This fact shows how obsolete the idiom is in the κοινή.

The use of ἄν here avoids the passionateness of the mere optative (Gildersleeve, Syntax, p. 157). The other examples in Luke’s writings are all in questions and may be compared with the subj. in deliberative questions. Only two examples appear of the opt. with ἄν in direct questions. They are πῶς γὰρ ἄν δυναίμην ἔδω τῆς δοθησει με; (Ac. 8:31). The only instance of a protasis in connection with an optative apodosis in the N. T. and τί ἄν θέλει ὁ σπερμολόγος οὗτος λέγειν; (Ac. 17:18). Both are rhetorical questions and the second has a deliberative tone; see (c). In Ac. 2:12, E has τί ἄν θέλει. Moulton (Prol., p. 198). cites τίς ἄν δῴη from Job 31:31 and holds that it does not differ from τις δῴη elsewhere (Num. 11:29). The other instances of ἄν and the opt. are all in indirect questions, but the construction is not due to the indirect question. It is merely retained from the direct. The use of the optative in an indirect question when the direct would have the indicative or the subjunctive is not the point. This is merely the classic sequence of modes in indirect questions. See Lu. 8:9, ἔπηροτων τίς ἐθι. So Lu. 22:23 (cf. δοκεῖ in 24). Cf. Ac. 21:33. In Lu. 1:29, D adds ἄν and MSS. vary with some of the other examples (cf. Lu. 18:36). So ἄν is correct in Lu. 15:26. Moulton (Prol., p. 198) cites Esth. 13:3 πυθομένου—πῶς ἄν ἁχθείη and inscr. Magnes. 215 (i/A.D.) ἐπερωτᾷ—τί ἄν ποιήσας δδεῖες διατελοίη. Moulton

10 Ib., p. 166.
1 Moulton, Prol., p. 197 f.; Blass, Gr. of N. T. Gk., p. 220.
2 Prol., p. 197.
3 Ib., p. 198. He notes also 4 Macc. 5:13, συγγνώσειν without ἄν. In the pap. ἄν is usually present with the potential opt. (Radermacher, N. T. Gk., p. 129). Sometimes ἵσω occurs with the opt., as ἵσω—Ἀπορήσως in Joh. Philop.

Mahaffy

———, Greek Life and Thought (1896).
———, Progress of Hellenism in Alexander’s Empire (1905).
———, The Greek World under Roman Sway (1890).
———, What Have the Greeks Done for Civilization? (1909).
(Prol., p. 198) argues for “a minimum of difference” in the examples of indirect questions with and without ἄν. The difference is in the direct question. The examples with ἄν (W. H.’s text) in indirect questions are Lu. 1:62; 6:11; 9:46; 15:26; Ac. 5:24; 10:17. In all of these instances the deliberative element [Page 939] is undoubtedly present; see (c). The same thing is true of Lu. 3:15 (μὴ ποτέ), Ac. 17:27 (εἰ), but Ac. 25:16 (πρὶν ἦ in indirect discourse for subj. of the direct) is futuristic.

(b) Volitive. Moulton¹ calls this use the “Optative Proper,” a curious concession to the mere name. It has been the most persistent construction of the optative, and (in independent clauses) thirty-eight of the sixty-seven examples of the N. T. come under this category.² Fifteen of the thirty-eight instances belong to μὴ γένοιτο, once in Lu. 20:16, and the other fourteen in Paul’s Epistles (10 in Romans, 1 in 1 Cor., 3 in Gal.). Thumb considers the rare use of μὴ γένοιτο in modern Greek (the only relic of the optative) a literary phenomenon, but Moulton³ notes that Pallis retains it in Lu. 20:16. Moulton compares the persistence of the English optative in the phrase “be it so,” “so be it,” “be it never so humble,” etc.⁴ So he notes it in the papyri for oaths, prayers and wishes.⁵ O. P. 240 (i/A.D.) ἤ ἤνη, O. P. 715 (ii/A.D.) ἔνοχοι ἤνμεν, O. P. 526 (ii/A.D.) χαῖρος, L. Pb. (ii/B.C.) ὡ δεῦσοι σοι, B. M. 21 (ii/B.C.) τοῖς ἄν κέφο. The N. T. examples are all in the third person except Phil. 20, ἢγο σοῦ ὑνίμην. One is a curse μηκέτι μνείς φάγοι (Mk. 11:14) and is equivalent to the imperative. “There is a strong inclination to use the imperative instead of the optative, not only in requests, where the imperative has a legitimate place in classical Greek as well, but also in imprecations, where it takes the place of the classical optative: ἀνάθεμα ἔστω, Gal. 1:8 f. Cf. 1 Cor. 16:22.”⁶ Only in Mk. 11:14 and Ac. 8:20, τό δραγύρην σοι σῦν σοι ἔνη, do we have the optative in imprecations in the N. T. The opt. comes very near the imper. in ancient Greek sometimes (Gildersleeve, p. 155). Cf. γίνοτο, P. Par. 26 (B.C. 163). In Ac. 1:20, where the LXX (Ps. 109:8) has λάβοι, Luke gives λαβέτω.⁷ There are only 23 examples of the volitive optative in independent clauses outside of μὴ γένοιτο. Paul has 15 of this 23 “(Ro. 15:5, 13; Phil. 20; 2 Tim. 1:16, 18; 4:16, and the rest in 1 and 2 Th.), while Mark, Luke, Acts, Hebrews, 1 Peter and 2 Peter have one apiece, and Jude two.”⁸ They are all examples of the aorist optative except the present in Ac. 8:20. The negative is μὴ and ἄν is not used. In [Page 940] 2 Th. 3:16 δόη is opt., not the subj. δώῃ. In 1 Th. 3:12 the context shows that περισσεύσαι is opt. (not

8 Moulton, Prol., p. 195.
aor. inf. nor aor. middle imperative). The rare use of the volitive opt. with εἰ (twelve cases in the N. T., but four belong to indirect questions), will be discussed under Conditional Sentences. If ἵνα δῷ is the correct text in Eph. 1:17, we probably have a volitive optative, the ἵνα being merely introductory (cf. examples with the subj.). It is hardly a case of final ἵνα with the optative. Blass reads δῷ here subj. after B. In modern Greek Dr. Rouse finds people saying not μὴ γένοιτο, but ὁ θεὸς νὰ φυλάξῃ (Moulton, Prol., p. 249), though νὰ is not here necessary (Thumb, Handb., p. 127). The ancient idiom with εἴθε and εἰ γὰρ is not found in the N. T., as stated already several times. Ὁφελοῦ with the future ind. occurs for a future wish (Gal. 5:12).

(c) Deliberative. There is little more to add here. The LXX gives instances of τίς δῷ; (Num. 11:29; Judg. 9:29; 2 Sam. 18:33, etc.) without ὅν as in Homer, where a deliberative subj. would be admissible. See also Ps. 120 (119):3, τί δοθεὶ σοι καὶ τί προστεθεὶ σοι; In Lu. 6:11 Moulton remarks that τί ὅν ποιῆσαιεν in the indirect question is “the hesitating substitute for the direct τί ποιήσομεν.” Why not rather suppose a “hesitating” (deliberative) direct question like τί ὅθελοι ὁ σπερμολόγος οὕτως λέγειν; (Ac. 17:18). As already remarked, the context shows doubt and perplexity in the indirect questions which have ὅν and the opt. in the N. T. (Lu. 1:62; 6:11; 9:46; 15:26; Ac. 5:24; 10:17). The verbs (ἐνένευον, διελάλουν, εἰσήθησαν διαλογισμός, ἐπυνθάνετο, ὑπηρέτου) all show this state of mind. See indirect question εἴ βουλότοι in Ac. 25:20 after ἀποροῦμενος. Cf. 27:39. The deliberative opt. undoubtedly occurs in Lu. 3:15, διαλογιζομένων μὴ ποτε αὕτης εἴ ὁ Χριστὸς. It is not therefore pressing the optative unduly to find remnants of the deliberative use for it (cf. subj. and fut. indicative).

[Page 941] IV. The Imperative (ἡ προστατικὴ ἔγκλισις).

1. ORIGIN OF THE IMPERATIVE. See chapter on Conjugation of the Verb for discussion of the various devices used by this latest of the modes in order to get a foothold. Giles, after giving the history of the imperative forms (five separate strata), curtly dismisses it as not properly a mode and declines to discuss it under syntax. So

1 They are all exx. of the third person save Phil. 20. Here is the list (with Burton’s errors corrected by H. Scott): Mk. 11:14; Lu. 1:38; 20:16; Ac. 8:20; Ro. 3:4, 6, 31; 6:2, 15; 7:7, 13; 9:14; 11:1, 11; 15:5, 13; 1 Cor. 6:15; Gal. 2:17; 3:21; 6:14; 1 Th 3:11, 12 bis; 5:23 bis; 2 Th. 2:17 bis; 3:5, 16; 2 Tim. 1:16, 18; 4:16; Phil. 20; Heb. 13:21; 1 Pet. 1:2; 2 Pet. 1:2; Ju. 2, 9.
2 Moulton, Prol., p. 196.

4 Moulton, Prol., p. 194.
Giles

GILES, P., A Short Manual of Comparative Philology. 2d ed. (1901).

Radermacher passes it by in his *N. T. Gr.* Moulton, on the other hand, takes it up “first among the moods” because “it is the simplest possible form of the verb.” It is the simplest in one of its forms like the interjectional ἄγε, but it is also the latest of the modes and is without a distinct set of endings. Besides, it never dislodged the aorist subj. from the second person in prohibitions and finally gave up the fight all along the line. The modes were slower than the tenses in making sharp distinctions anyhow, and in the Sanskrit “no distinction of meaning has been established between the modes of the present-system and those (in the older language) of the perfect- and aorist-systems.” The ambiguity of the imperative persists in the second person plural present where only the context can decide the mode. Thus ἔραυνότε (Jo. 5:39); πιστεύετε (14:1); ἀγαλλιᾶσθε (1 Pet. 1:6); οκυδομεῖσθε (2:5); τελεῖ (Ro. 13:6); καθίς (1 Cor. 6:4); cf. Jo. 12:19. The perfect form ἰστε (Jas. 1:19; Heb. 12:17) shows the same situation.

2. MEANING OF THE IMPERATIVE. In its original significance it was demand or exhortation. But, as will be shown, it was not confined to this simple idea. Besides, the notion of command (or prohibition) was expressed in various ways before the imperative was developed. These uses of the other modes continued to exist side by side with the imperative till the N. T. time. Examples of this will be given directly. The imperative itself was extended to include various shades of the future ind., the subj. and the opt. There is a general sense in which the imperative is distinct, as is seen in ἀγαπάτε τοὺς ἐχθροὺς ὑµῶν (Mt. 5:44), but this idea of command easily softens to appeal as in κύριε, σῶσον, ἐπολλύμεθα (Mt. 8:25).

3. DISAPPEARANCE OF THE IMPERATIVE FORMS. It was the last mode to get on its feet. It followed the optative into oblivion save in the second person (Thumb, Handb., p. 154). There the forms held on in the main, but the present subjunctive with μή came also into use instead of μή and the present imper., and finally the hortatory (positive) subj. also appeared as imper. In the third person (both positive and negative with μή) ὃς and the subj. drove out the imperative. Thus the imperative forms in modern Greek present a wreck, if indeed they were ever much else. The imperative, like the subjunctive, is always future in time, though it may apply to the immediate future as in “quit that.”

4. ALTERNATIVES FOR THE IMPERATIVE. These, under all the circumstances, can be logically treated before the imperative itself. Indeed, they have already been discussed in the preceding remarks on tense and mode, so that little in addition is required.

(a) The Future Indicative. See ch. XVIII, Tense, where it is shown that the Volitive Future is the equivalent of the imperative. The fut. ind., like the subj. and the opt., may be merely futuristic or volitive, or deliberative. The volitive future is a matter of context and tone of voice, to be sure, but that is true also of the subj. and opt., and, in truth, of the real imperative. But more of the “tone of the imperative” further on. English, as well as Greek, continues to use this volitive future. Both

---

2 Prol., p. 171.
4 Delbrück, *Die Grundl.* p. 120.
positive and negative (οὐ) commands are given by the fut. ind. The negative is sometimes μὴ as in μὴ βουλήσεσθε εἴλεναι (Demostenes), μὴ ἔξοσται (B. U. 197, i.A.D.), μηδένα μισήσετε (Clem., Hom., III, 69). So also οὐ μὴ with the fut. ind. is sometimes prohibition, as in οὐ μὴ ἔσται σοι τοῦτο (Mt. 16:22). Cf. also Gal. 4:30. But it is commonest in the simple future like σὺ ὤψῃ (Mt. 27:4); ὕμεις ἰσισε (27:24); ἐκκόψεις (Lu. 13:9); οὐκ ἔσσεσθε (Mt. 6:5), etc. It is true that this use of οὐ proves the origin of this idiom to be “a purely futuristic form,” as is the case with the question οὐ παύσῃ διαστρέφων; (Ac. 13:10), but the tone of this future is volitive (imperatival). The Latin use of the volitive future coincides with that of the Greek. Gildersleeve says: “It is not a milder or gentler imperative. A prediction may imply resistless power or cold indifference, compulsion or concession.” The exact shade of idea in this volitive future must be watched as closely as in the imperative itself. Cf. κυλέας (Mt. 1:21) with σὺ ὤψῃ (Mt. 27:4). Blass denies that this is a “classical” idiom (against [Page 943]Gildersleeve) and rather minimizes its use in the N. T. Many of the examples do come from the O. T. (LXX) legal language. Certainly in the LXX the fut. ind. often replaces the imperative under the influence of the Hebrew (Thackeray, Gr., p. 194). But examples occur where the two are equivalent. Cf. ἐγενήθησιν in Mt. 5:43, with ἐγενήθη in 5:44, ἔρει in Mt. 21:3, with ἐπάνει in Mk. 11:3. Some MSS. have ἔστω rather than ἔσται in Mt. 20:26.

(b) The Subjunctive. The volitive subjunctive is quite to the point. In the first person this use of the subj. held its own always in lieu of the imperative. It is needless to repeat the discussion of this matter (see Subjunctive in this chapter). The use of ὅνα with the subj. in an imperatival sense is seen in Mk. 5:23 (6:25); Eph. 5:33 is there discussed also. Cf. Tit. 2:4. Let μὴ σχίσωμεν αὐτόν, ἀλλὰ λάχωμεν (Jo. 19:24) serve as an example. So in the second person the aorist subj. held its place in prohibitions past κοινὴ times to the practical exclusion of the aor. imper. with μὴ. The two constructions existed in the κοινὴ side by side with the third person. Thus μὴ γνώτω (Mt. 6:3) and μὴ τὶς ἔκοψε σοι (1 Cor. 16:11). Cf. δὸς and μὴ ἀποστραφῆς in Mt. 5:42. The final triumph of the subj. over the imperative (save in the second person) has been shown. Cf. the fate of the opt. before the subj.

(c) The Optative. There is only one example, ἡμκέτι μηδείς φάγοι (Mk. 11:14), in the N. T. The distinction between a curse and a prohibition is not very great. The parallel passage in Mt. 21:19 has οὐ μηκέτi ἐκ σοι καρπὸς γένηται (volitive subj.).

(d) The Infinitive. The idiom is very frequent in Homer. It occurs chiefly after an imperative. The command is carried on by the infinitive. There is no need for surprise in this construction, since the probability is that imperative forms like δεῖξαι (like the Latin legimini, Homeric λέγε-μεναι) are infinitive in origin. It is true that the accent of the editors for the aorist active optative is different from the aorist active inf. in

2 Monro, Hom. Gr., p. 162.
3 Giles, Man., p. 468.
forms like κατευθύναι, περισσεύσαι (1 Th. 3:11 f.), but the MSS. had no accent. We could properly print the infinitive if we wished. So as to παρακαλέσαι (2 Th. 2:17) where the accent is the same for both infinitive and optative (the imper. form aor. mid. sec. singl. is παρακάλεσαι). Cf. βάπτισαι and βαπτίσαι, one and the same form. The idiom is less frequent in the Attic outside of laws and maxims, but happens to be the one infinitive construction that is alive in the Pontic dialect to-day. Moulton expresses surprise at the rarity of this use of the inf. in the N. T., since it is common in the papyri. Cf. ἐξεῖναι, µισθῶσαι, A. P. 86 (i/Λ.Δ.). Moulton (Prol., p. 248) notes that Burkitt (Evang. da-Mepharr. ii, 252 f.) reads ταύτα δὲ ποιήσαι κάκενα µὴ ἀμφεῖναι in Mt. 23:23. Blass notes also a revival of the simple inf. or the accusative and infinitive in the later language in legal phraseology. He explains the idiom as an ellipsis, but Moulton is undoubtedly correct in rejecting this theory. There is no need of a verb of command understood in view of the etymology of a form like βάπτισαι. The use of χαίρειν as greeting in epistles (with the nominative) is explained in the same way. Cf. Ac. 15:23; 23:26; Jas. 1:1. It is the absolute use of the infinitive as often. It is very common in the papyri, as Πολυκράτης τῷ πατρὶ χαίρειν, P. Petr. II, xi, 1 (iii/B.C.). So Moulton (Prol., p. 180) denies the necessity of the ellipsis of a verb of command. In Ro. 12:15 χαίρειν and κλαίειν are clearly parallel with εὐλογεῖτε καὶ µὴ καταφέσθε. So in Ph. 3:16 στοιχεῖν is to be compared with the hortatory φρον mocks. Blass needlessly wishes to emend the text in 2 Tim. 2:14, so as not to read µὴ λογοφασίν. This use of the inf. occurs also in Tit. 2:9. We probably have the same construction in µὴ συναναγκαθόμεθα (2 Th. 3:14), though it may be explained as purpose. In 1 Cor. 5:12 κρίνειν is the subject inf. In Lu. 9:3 after εἰπεν the quotation begins with Μηδὲν ἀφεῖται and is changed to µήτε ἔχειν (indirect command). In Mk. 6:8 f. both forms are indirect (one with ἢνα µηδὲν ἀφροσίν, the other with µὴ ἐνδούσασθαι). The marg. in W.H. has µὴ ἔνδοσηθήναι. The MSS. often vary between the middle inf. and imper. or subj. Winer thinks that expositors have been unduly anxious to find this use of the infinitive in the N. T. But it is there. See further chapter XX, Verbal Nouns.

(e) The Participle. Winer found much difficulty in the absolute use of the participle in the N. T. The so-called genitive absolute is common enough and the participle in indirect discourse representing a finite verb. It would seem but a simple
step to use the participle, like the infinitive, in an independent sentence without direct
dependence on a verb. Winer admits that Greek prose writers have this construction,
though “seldom.” He explains [Page 945] it on the ground of ellipsis of the copula as
is so common with adjectives (cf. Mt. 5:3–11). He passes the poets by (often the truest
index of the vernacular) and admits “the Byzantine use of participles simply for finite
verbs.” T. S. Green¹ says: “The absolute use of the participle as an imperative is a
marked feature of the language of the N. T.” He explains it as an “Aramaism.” To this
W. F. Moulton² expresses surprise and admits only “the participial anacoluthon,”
which, by the way, is very much the same thing. But J. H. Moulton³ has found a
number of examples in the papyri where the participle is fairly common for the
indicative. The instances in the papyri of the participle in the sense of the imperative
are not numerous, but one of them seems very clear. Thus Tb. 59 (i/B.C.) ἐν οἷς ἔδω
προσδέησθε μοι ἐπιτάσσοντες μοι προθυμότερον. It is preceded by a genitive
absolute. Moulton gives another equally so: G. 35 (i/B.C.) ἐπιμελώμενοι ἵν
ὑγαίνητε. Moulton⁴ cites also the Latin form sequiminī(=ἐπόμενοι) for the second
middle plural present indicative. The similar looking form sequiminī imperative has
an infinitive origin, as already shown. See chapter XX, Verbal Nouns, for other
examples and further discussion. On the whole, therefore, we must admit that there is
no reason per se why the N. T. writers should not use the participle in lieu of the
imperative. It is, of course, a loose construction, as ellipsis is and anacoluthon is, but

it is not the mark of an uneducated person. In the papyrus example (Tb. 59) given above Grenfell and Hunt call the writer “an official of some importance.” Moulton also translates Thumb concerning the “hanging nominative” (common in classical and koiné Greek) as saying that the usage “is the precursor of the process which ends in modern Greek with the disappearance of the old participial construction, only an absolute form in –οντας being left.” In the ellipsis of the copula it is not always clear whether the indicative or the imperative is to be supplied. Cf. ἐναλαογημένος ὁ θεός (2 Cor. 1:3). Shall we supply ἐστιν or ἦτο (ἐστω) as we have it in 1 Cor. 16:22? In a case like 1 Pet. 3:8 f. it is plain that the unexpressed ἔστε would be imperative, but Moulton notes the curious fact that ἔστε (imperative) does not appear in the N. T. at all, though we have ἦτο five times, ἔστω or ἦτο fourteen, and ἔστωσαν twice. There are instances [Page 946] more or less doubtful, as ἐπιρίψατε (1 Pet. 5:7), which is naturally taken with ταπεινώθητε as Moulton now admits. He evidently reacted too strongly against Winer. This use of the participle should not be appealed to if the principal verb is present in the immediate context. Sometimes it is a matter of punctuation as in Lu. 24:47, where W. H. give in the margin ὃ ἔδραμον ἢ ἑρεωσαλήμ ὡμεῖς μάρτυρες τούτων, instead of ἑρεωσαλήμ ὡμεῖς. The marginal punctuation takes the participle as an imperative. The MSS. sometimes vary, as when NC give ἐνδείξασθε in 2 Cor. 8:24, while B, etc., have ἐνδεικνύοντες. But a number of unmistakable examples appear both in Paul and Peter, though “Paul was not so fond of this construction as his brother apostle.” Thus ἔχοντες (1 Pet. 2:12) must be so explained or taken as anacoluthon (cf. ἀπέχομαι). So ὑποτασσόμενοι (1 Pet. 2:18; 3:1) reminds one of Eph. 5:22, an “echo” according to Moulton. Other examples occur in 1 Pet. 3:7, 9, possibly 16 also; 4:8 ff. Besides ἄνεχομενοι and σπουδάζοντες (Eph. 4:2 f.) and ὑποτασσόμενοι (5:2) in Paul the most outstanding example is in Ro. 12:9 f., 16 f. These participles occur in the midst of imperatives or infinitives as imperatives (12:15). The asyndeton makes it impossible to connect with any verb. In verse 6 ἔχοντες appears as a practical indicative. Moulton adds to these 2 Cor. 9:11 f. and Col. 3:16. See also Heb. 13:5. But Lightfoot put in a word of caution when he said: “The absolute participle, being (so far as regards mood) neutral in itself, takes its colour from the general complexion of the sentence.” The participle is not technically either indicative, subjunctive, optative or imperative. The context must decide. In itself the participle is non-finite (non-modal) like the infinitive, though it was sometimes drawn out into the modal sphere.

5. USES OF THE IMPERATIVE.

5 Ib., p. 225.
6 Hellen., p. 131.
7 Mr. H. Scott notes the absence of ἔστε in the H. R. Conc. of the LXX, in Veitch, in Kühner-BI., Mayser, Helbing, Thackeray. In Goodspeed’s Index Pat. he finds it only in 1 Clem. 45:1, and the accent is doubtful here. He finds it also in Test. XII Pat. Reub. 6:1. It could have been used in Napht. 3:2 and in Ign. Eph. 10:2.

5 On Col. 3:16 f.
(a) Command or Exhortation. In general the imperative keeps within the same limits observed in the classical language, but that is not a narrow groove. It is the mood of the assertion of one’s will over another or the call of one to exert his will. Thus ἀγαπᾶτε τοὺς ἐχθροὺς ὑμῶν (Mt. 5:44); εἰσέλθει εἰς τὸ ταμιεύον σου καὶ πρόσσωξαι (6:6); πάντως χάρετε (1 Th. 5:16). Moulton finds the imperatives “normal in royal edicts, in letters to inferiors, and among equals when the tone is urgent, or the writer indisposed to multiply words.” The imperatives in Rev. 22:11 are probably hortatory.

(b) Prohibition. This is just a negative command and differs in no respect save the presence of the negative μὴ. Thus μὴ κρίνετε (Mt. 7:1), μὴ φοβεῖσθε (Jo. 6:20). Often the presence of the imperative in the midst of indicatives is shown by μὴ as in μὴ πλάνωσθε (1 Cor. 6:9). We do, indeed, have οὐ with the imperative in marked contrast, where the force of the negative is given to that rather than to the mode. Thus in 1 Pet. 3:3, ἐστω οὐχ ὅ—κόσμος, ἄλλος ὁ κρυπτὸς τῆς καρδίας ἄνθρωπος. The same explanation applies to οὐ μόνον—ἄλλος καὶ in 1 Pet. 2:18, but μὴ μόνον is regular in Jas. 1:22, etc., because of γίνεσθε understood. In cases of contrast with οὐ—ἄλλος (with participles and imperatives) the reason for οὐ is thus apparent (H. Scott). In Mt. 5:37 οὐ οὐ (like χάλει) is the predicate (like a substantive), not the negative of ἔστω. In 2 Tim. 2:14 ἐπάθεν χρήσιμον (a parenthetical expression of μὴ λογοφοθεῖν used as an imperative), the negative goes specifically with the single word χρήσιμον. Cf. also 1 Cor. 5:10. The upshot is that μὴ remains the negative of the imperative. Cf. μὴ μοι κόπους πάρεξέ (Lu. 11:7).

(c) Entreaty. A command easily shades off into petition in certain circumstances. The tone of the demand is softened to pleading. Moulton notes that the imperative has a decided tone about it. “The grammarian Hermogenes asserted harshness to be a feature of the imperative; and the sophist Protagoras even blamed Homer for addressing the Muse at the beginning of the Iliad with an imperative.” The N. T. shows a sharp departure in the use of the imperative in petitions (rare in the older Greek and in the κοινή). The prophet pleads with the imperative, not with potential optative or future indicative. Jesus spoke with authority and not as the scribes. “Moreover, even in the language of prayer the imperative is at home, and that in its most urgent form, the aorist. Gildersleeve observes (on Justin Martyr, p. 137), ‘As in the Lord’s Prayer, so in the ancient Greek liturgies the aorist imper. is almost exclusively used. It is the true term for instant prayer.’” Gildersleeve denies that the N. T. shows “the absolute indifference that some scholars have considered to be characteristic of Hellenistic Greek” in the use of the imperative. He

5 Mt. 7:29.
1 Moulton, Prol., p. 173.
credits Mr. Mozley with the observation that “the aorist imperative is regularly used in biblical Greek when the deity is addressed; and following out this generalization Herr Krieckers, a pupil of Thumb’s, has made a statistical study of the occurrences of the two tenses in Homer, Hesiod, Sappho, Æschylus, Sophocles, Euripides, Aristophanes, with the result that in prayers addressed by men to men both present and aorist are often used, whereas in prayers addressed by men to gods the aorist largely predominates.” Examples of the imperative in petitions appear in Mk. 9:22, \( \text{βοήθησον ἡμῖν} \), (Lu. 17:5) πρόσθες ἡμῖν πίστιν, (Jo. 17:11) τήρησον αὐτούς ἐν τῷ ὀνόματί σου.

(d) Permission. All this is in strict line with the ancient Greek. A good illustration is seen in Mt. 26:45, καθεύδετε λουθόν καὶ ἀνασκαφθεῖ. This is not a question nor necessarily irony. It is too late to do Christ any good by keeping awake. He withdraws his plea for watchfulness. There is irony in πληρώσατε (Mt. 23:32), though it is the permissive use of the imperative. The note of permission is struck in ἔλθατο and ἐπιστρωφήτο (Mt. 10:13). Cf. the fut. ind. in Lu. 10:6. See further χωρίζεσθο (1 Cor. 7:15); ὁγιοείτο (14:38, W. H. marg.). In 2 Cor. 12:16 ἔστω δὲ is like our ‘Let it be so’ or ‘Granted.’ In Mt. 8:31 ἀπόστειλων is entreaty, ὑπάγετε (32) is permissive. In 1 Cor. 11:6 κειράσθω is probably hortatory.

(e) Concession or Condition. It is an easy step from permission to concession. This also is classical. Take Jo. 2:19, λύσατε τὸν ναὸν τοῦτον, καὶ ἐν τρισὶν ἡμέραις ἐγερῶ αὐτόν. This is much the same as ἐδὲ λύσητε. It is not a strict command. We have parataxis with καὶ, but it is equivalent in idea to hypotaxis with ἐάν. So with ἄντίστητε τῷ διαβόλῳ, καὶ φεύξεται ὁ ὕμων (Jas. 4:7 f.); ἄνάστα ἕκ τῶν νεκρῶν (LXX), καὶ ἐπιφάνεις σοι ὁ Χριστός (Eph. 5:14). See also μὴ κρίνετε, καὶ οὐ μὴ κριθήτε: καὶ οὐ κατακινάζετε, καὶ οὐ κατακινωθήτε: ἀπολύετε, καὶ ἀπολυθήσεσθε: ἀδίδετε, καὶ δοθήσεται ὕμων (Lu. 6:37 f.). Then again μακροθυμήσου ἐπ’ ἔμοι, καὶ πάντα ἀποδώσω [Page 949] σοι (Mt. 18:26). So also τοῦτο ποιεῖ καὶ ζήσῃ (Lu. 10:28); ἔχρεσθε καὶ ὄψεσθε (Jo. 1:39). Cf. δεῦτε καὶ ποιήσω (Mt. 4:19). Sometimes two imperatives are connected by καὶ when the first suggests concession. Thus Eph. 4:26, ὄργίζεσθε καὶ μὴ ἀμαρτάνετε. So also ἐράσωσθε καὶ ἰδε (Jo. 7:52). Cf. ἔρχοται καὶ ἰδε (Jo. 1:46). This seems simple enough.

(f) In Asyndeton. It is a regular classic idiom1 to have ἄγε, φέρε with another imperative. ἄγε with κλαύσατε (Jas. 5:1) is an interjection like δεῦρο ὅκουλοῦθε μοι (Mt. 19:21) and δεῦτε ἵδετε (Mt. 28:6). See also Jo. 4:29; 21:12; Rev. 19:17. More common is ὑπάγεσθε καὶ ὑπάγετε with another imperative. So ὑπάγει πρῶτον διαλλάγῃ (Mt. 5:24); ὑπάγετε ἄπαγγελτε (28:10). See further Mt. 8:4; 18:15; 21:28; 27:65;

---

Sophocles Sophocles, E. A., Greek Lexicon of the Roman and Byzantine Period (1888).
Mk. 1:44; 6:38, etc. In Mt. 16:6 we have ὠρατε καὶ προσέχετε. Cf. also Lu. 12:15. But asyndeton occurs in Mt. 24:6, ὠρατε μὴ ὑροεῖσθε. So ὠρατε βλέπετε (Mk. 8:15). In Mt. 9:30 the persons and numbers are different, ὠρατε μὴ δεῖνς γνωσκέτο. In Rev. 19:10, ὧρα μὴ, the verb with μὴ is not expressed. For ὧρα ποιήσεις see also Heb. 8:5 (LXX). The simplest form of asyndeton is seen in Ph. 3:2, βλέπετε, βλέπετε, βλέπετε.

(g) In Subordinate Clauses. The reason for treating this subject here is that it is so rare that one may not catch it in the discussion of subordinate clauses. It is well established, though rare, in Demosthenes, Lysias, Plato, Thucydides and the tragic poets. The case of ὠρατε at the beginning of a clause is not pertinent, for there it is a mere inferential conjunction, as, for instance, 1 Cor. 3:21, ὠρατε μὴ δεῖνς καυχάσθω. Here ὠρατε is not a hypotactical conjunction. Neither is the recitative ὦ ὥσπερ in point, as in 2 Th. 3:10, τοῦτο παρηγγέλλομεν ύμῖν, ὦτι ἐὰν θέλει ἑργάζεσθαι, μὴ δὲ ἐσθιέτο. In 1 Cor. 1:31 there is probably an ellipsis of γένηται after ἡνα, and the imperative καυχάσθω is in the direct quotation after γέγραπται. In 1 Pet. 1:6, ἐν ὤ ὥρατανίατο (probably imperative), W. H. begin a new sentence, but ὄ points back directly to καυχάσθω as its antecedent. The same situation occurs in 1 Pet. 3:3 with ἦν ἡντο. In both examples the imperative appears with the relative. Two other instances of this construction are found in 1 Peter (a peculiarity of this Epistle). They are ὄ ὥσπερ ἐνεισηγή (5:9) and εἰς ἦν στήτε (5:12). We see it also in Heb. 13:7, ἦν—μὴ ἐσθιέτε, and in 2 Tim. 4:15, ὦτι καὶ σου φιλόσαυρου. Cf. O. P. 1125, 19 (ii/A.D.), ὦτι θέμα καθαρὸν ὧν πάντων ἀναδότο. [Page 950] Διό at the beginning of the sentence was hardly felt as a relative (inferential particle), but see 1 Cor. 14:13, διό προσευχήσασθο.1

(h) The Tenses. This matter received adequate discussion under Tenses. It may simply be noted here that in positive sentences the aorist imperative is naturally common, especially frequent in the N. T. Cf. έστελθε—πρόσεξεια (Mt. 6:6). The distinction between the present and the aorist is well seen in ἐσου τόν κρύβαττόν σου καὶ περισσάτε (Jo. 5:8). See also Jo. 2:16 and Ac. 12:8. As an example of the periphrastic present note έστείλε ἐχον (Lu. 19:17). The perfect is almost non-existent, but note περίμοιο (Mk. 4:39). The present imper. second person alone occurs in prohibitions which are forbidden as in course of action or as a present fact (‘quit doing it’).2 Cf. Ro. 6:13 for sharp differences in idea between μὴ παριστάνετε (course of action) and παριστάτε (at once and for all). In the third person a prohibition may be either in the aorist imperative or the aorist subj. See the subj. mode for further remarks concerning the failure of the second person imperative aorist in prohibitions.

(i) In Indirect Discourse. This subject will receive adequate treatment under this head (see below). All that is attempted here is to indicate that, when the imperative is not quoted directly (cf. 2 Th. 3:10), it may be expressed in an indirect command either by the infinitive (cf. λέγων μὴ περιτέμιειν μὴ δὲ περισσάτειν in Ac. 21:21) or by a conjunction like ἡνα as in Mk. 6:8, or thrown into a deliberative question as in ὑποδείξω τίνα φοβηθήσετε (Lu. 12:5).

B. Dependent or Hypotactic Sentences (ΥΠΟΤΑΚΤΙΚΑ ἈΞΙΩΜΑΤΑ)

2 Ib., p. 167.
2 Gildersl., Synt., Pt. I, p. 164. See also Thompson, Synt., p. 190 f.
Introductory.

(a) Use of Modes in Subordinate Sentences. There is no essential difference in the meaning of the modes in subordinate clauses from the significance in independent sentences. The division is not made on the basis of the modes at all. Leaving out the imperative because of its rarity in subordinate sentences, the other three modes occur in almost all the subordinate clauses. The same mode-ideas are to be sought here as there. The subordinate clauses make no change in the meaning of mode, voice or tense. Burton3 does say: “Others, however, give to the mood or tense a force different from that which they usually have in principal clauses. Hence arises the necessity for special treatment of the moods and tenses in subordinate clauses.” I cannot agree to this as the reason for the separate treatment. Sometimes in indirect discourse after secondary tenses there may be a sequence of modes (true also in ancient Greek with final clauses after secondary tenses), but that is so slight a matter that it bears no sort of proportion to the subordinate clauses as a whole. Gildersleeve (A. J. of Phil., XXXIII, 4, p. 489) regards the subordinate sentence as “the Ararat in the flood of change” and parataxis and hypotaxis as largely a matter of style. Some of the modal uses have survived better in the subordinate clauses, as, for instance, the futuristic aorist subj. (cf. ὅστις ἀρνήσηται in Mt. 10:33), but the subordinate clause did not create the idiom. Originally there were no subordinate sentences.1 “In dependent clauses the choice of the mood is determined by the nature of each individual case”2 as is true also of independent sentences. The qualification made above about the sequence of modes was always optional and is absent from the N. T. except a few examples in Luke. The great wealth of subordinate clauses in Greek with various nuances demand separate discussion. But we approach the matter with views of the modes already attained.

(b) The Use of Conjunctions in Subordinate Clauses. In chapter XXI, Particles, full space will be given to the conjunctions (co-ordinating, disjunctive, inferential, subordinating). Here it is only pertinent to note the large part played in the Greek language by the subordinating conjunctions. It must be admitted that the line of cleavage is not absolute. The paratactic conjunctions were first on the field.3 Popular speech has always had a fondness for parataxis.4 In the modern Greek vernacular “the propensity for parataxis has considerably reduced the ancient Greek wealth of dependent constructions” (Thumb, Handb., p. 185). Hence long periods are rare. So the Hebrew used י as both paratactic and hypotactic. In the Greek καί we see a partial parallel.5 In Mt. 26:15, τί θελετέ μοι δοῦναι καγώ ὑμῖν παραδόσω, the καί is almost equivalent to ἐάν. So often in Luke, as in 9:51, ἔγένετο δὲ—καί, the καί clause is (like ὅτι) the logical subject of ἔγένετο. The common use of the recitative ὅτι illustrates well the close connection between subordinate and independent sentences. The ὅτι

---

3 N. T. M. and T., p. 81.
1 Brug., Griech. Gr., p. 552.
3 Brug., Griech. Gr., p. 552.
shows [Page 952] that the clause is the object of the preceding verb, but the clause is preserved in the direct (co-ordinate) form. Cf. λέγετε ὅτι βλασφημᾷς (Jo. 10:36). Thus again a subordinate clause may be so loosely connected with the principal clause as to be virtually independent.¹ Thus the relative, as in Latin, often introduces a principal sentence, a paragraph, forsooth, as ἐν ὕπνῳ (Lu. 12:1) and ὄνθεν (12:3). But, on the whole, we can draw a pretty clear line between the independent and the dependent clause by means of the conjunctions. The case of asyndeton, treated elsewhere (cf. The Sentence), concerns chiefly parataxis, but some examples occur in hypotaxis, as in καὶ ἔγενετο—ἐπέν τις (Lu. 11:1) where the ἐπέν τις clause is the logical subject of ἔγενετο.

(c) Logical Varieties of Subordinate Clauses. Each subordinate clause sustains a syntactical relation to the principal clause after the analogy of the case-relations. The normal complete sentence has subject, predicate, object. Each of these may receive further amplification (see chapter X, The Sentence). The predicate may have a substantive (as subject or object). This substantive may be described by an adjective. An adverb may be used with predicate, adjective or substantive. Thus the sentence is built up around the predicate. In the same way each subordinate sentence is either a substantive (subject or object like an ὅτι clause), an adjective like ὅστις or an adverb like ὅπως. This is therefore a point to note about each subordinate clause in order to get its exact syntactical relation to the principal clause. It may be related to the predicate as subject or object, or to the subject or object as adjective, or to either as adverb. A relative clause may be now substantive, now adjective and now adverb. In simple truth most of the conjunctions have their origin as relative or demonstrative pronouns. In Kühner-Gerth² the subordinate clauses are all discussed from this standpoint alone. Thumb (Handb., pp. 186 ff.) follows this plan. One questions the wisdom of this method, though in itself scientific enough. Burton³ has carefully worked out all the subordinate clauses from this standpoint, though he does not adopt it. Then, again, one may divide these clauses according to their form or their meaning.⁴ Viteau⁵ combines both ideas and the result is rather confusion than clarification. There may be a series of subordinate clauses, one dependent on the other. So in 1 Cor.1:14, [Page 953] εὐχαριστῶ ὅτι οὐδένα ὑμῶν ἔβαπτοσα εἰ μὴ Κρίσσον καὶ Γοίον, ἦνα μὴ τις ἐπίη ὅτι εἰς τὸ ἐμὸν ὅνομα ἔβαπτοσθήτε. See also Mk. 6:55 and section 10 in this chapter. The infinitive and the participle are used also in subordinate clauses, but they do not directly concern the problem of the modes save in indirect discourse. They are so important and partake of the functions of both noun and verb to such an extent that they demand a separate chapter—XX.

1. Relative Sentences.

(a) Relative Sentences Originally Paratactic. The relative ὃς, as is well known, was first an anaphoric substantive pronoun. At first the relative clause was paratactic, a principal sentence like the other. Cf. ὃς γάρ in Homer, where ὃς may be taken as demonstrative or relative. In its simplest form the relative was unnecessary and was not even a connective. It was just a repetition of the substantive. “The relative force arises where ὃς (and its congeners) connects and complements.” Indeed, the relative sentence is probably the oldest form of parataxis. It is only by degrees that the relative clause came to be regarded as a subordinate clause. As a matter of fact, that was not always the case, as has been seen in such examples as ἐν ὃς, ἀνθῇ ὅν (Lu. 12:1, 3). But it is not true that this subordination is due to the use of the subjunctive mode. The effect of case-assimilation (cf. gender and number) and of incorporation of the antecedent was to link the relative clause very close to the principal sentence. Cf. Heb. 13:11.

(b) Most Subordinate Clauses Relative in Origin. This is true not merely of ὅτι and ὅτε which are accusative forms of ὃ, but also of other adverbs, like the ablative ὡς, ὅπως, ἕως. These subordinating conjunctions therefore are mostly of relative origin. [Page 954] Cf. ἵνα, ὅποτε and perhaps ἐπί. Πρίν, ἐπεί, ἂρτη, μέχρι are not relative. Thus the subordinate clauses overlap. Burton, indeed, includes ἕως under relative sentences. That is not necessary, since thus nearly all the subordinate clauses would properly be treated as relative sentences. See the relative origin of various conjunctions well worked out by Schmitt, Weber and Christ. These clauses are mainly adverbial, though objective (and subject-clause also) ὅτι (indirect discourse) is substantive simply. The word ὡς occurs in Homer with the three values of

4 Der Substantivs. und das Rel. ὡς.
demonstrative, relative and conjunction (cf. English “that”). But here we pass by these conjunctions from relative or demonstrative roots. The relative pronoun alone, apart from the adverbial uses, introduces the most frequent subordinate clause, probably almost equal in some authors to all the other classes put together. In 1 Peter the relative construction is very common. Cf. 1 Pet. 1:6–12; 2:21–24. At any rate it is the chief means of periodic structure. Take as an instance the period in Ac. 1:1–2. Note ὥν, ἀυτῷ ὧς ἡβάρα, ὦς, ᾧς, all the subordinate clauses in the sentence except infinitive and participles. See also 1 Cor. 15:1–2, where four relatives occur and τίνι λόγῳ is almost like a relative. Cf. further Ro. 9:4 f. The relative sentence may be repeated indefinitely with or without καί.

(c) Relative Clauses Usually Adjectival. They are so classed by Kühner-Gerth. The descriptive use followed the original substantive idiom just as the relative itself was preceded by the demonstrative. Thus the use of the relative clause as subject or object like ὁ and the participle is perfectly consistent. So ὃς ὃν ἔμε δέχεται ἐντὸν ἀποστέλλαντά με (Lu. 9:48). Cf. also Mk. 9:37; Ac. 16:12. The descriptive character of the relative clause is well shown in τὴν μάχαιραν τοῦ πνεύματος ὃ ἔστιν ἑρμαθαι τεθνεῖ (Eph. 6:17). Cf. ὃς in 1 Tim. 3:16. The adjectival use of the relative sentence is accentuated by the use of the article with it in Ro. 16:17, σκοπεῖν τοὺς τὰς ἀγορασίας καὶ τὰ σκάνδαλα παρὰ τὴν δίδαξήν ἂν ὑμεῖς ἔμαθετε πιστεύτας. Here the relative clause is adjectival, but in itself a mere incident between τοὺς καὶ πιστεύτας. The clause is simply adjectival with πᾶς ὃς in Lu. 12:8. That comes to be its most usual character. So with δι  ἣς in Heb. 12:28.

(d) Modes in Relative Sentences. There is nothing in the relative pronoun or the construction of the clause per se to have any effect on the use of the mode. The relative, as a matter of fact, has no construction of its own. In general in dependent clauses the choice of the mode is determined by the nature of the individual case. Outside of relative clauses the choice in the N.T. is practically confined to the indicative and the subjunctive. The optative holds on in one or two examples. With the relative some examples of the imperative occur, as has already been shown. Cf. 1 Cor. 14:13; Tit. 1:13; 2 Tim. 4:15; 1 Pet. 5:9; Heb. 13:7. Cf. ὅθεν κατανοήσατε (Heb. 3:1). But the mode is not due at all to the relative. In a word, the relative occurs with all the constructions possible to an independent sentence. The indicative is, of course, the natural mood to use if one wishes to make a direct and clear-cut assertion. Thus οὖσιν ἐστὶν ὃς ἀφῆκεν τὴν οἰκίαν (Mk. 10:29). Cf. Jo. 10:12. The various uses of the subjunctive occur with the relative. The deliberative subj. is seen in ποῦ ἐστιν τὸ κατάλυμα μου ὅπου τὸ πάσχα μετὰ τῶν μαθητῶν μου φάγω; (Mk. 14:14; Lu. 22:11).
Prof. Earle, in a fine paper on “The Subj. of Purpose in Relative Clauses in Greek” (Class. Papers, 1912, pp. 213 ff.) shows how Xenophon, Soph., Eurip., Plato and other Attic writers use the idiom. Cf. Xen., Anab., II, 4, 20, ὦ γὰρ ἔξωσον ἔκεινοι ὅποι θύγατέων. See also Tarbell, Class. Review, July, 1892, “The Deliberative Subj. in Relative Clauses in Greek.” The subj. may be volitive as in Ac. 21:16, ὅγοντες παρ ὧν εξήνοικος Μνάσωνι τινι, and in Heb. 8:3, ὅποι ἀναγκαίον ἔκεινος τι καὶ τοῦτον ὁ προσενεγκή (cf. ὁ προσφέρει in Heb. 9:7). In Heb. 12:28, ὁ ἰήλατρεύς, the subj. may be conceived as either volitive (hortatory) or merely futuristic, more probably volitive like ἔχωμεν. Clearly futuristic is the subj. in Mt. 16:28, οὐ μὴ γεύσονται θανάτου. These examples appear isolated. Cf. subj. with ὡστε (not relative) as in 1 Cor. 5:8, ὡστε ἔφηκαι (deliberative). But the futuristic subj., so rare in the independent sentence after Homer, is very common in the relative clause with ἃν and sometimes without ὁν. It is not the ὁν that determines the subj., but the subj. usually has ὁν. Thus ὁς γὰρ ἔδωκεν θέλημα and ὁς δὲ ὅν ἀπολέσθη (Rec. Mk. 8:35). Cf. ὁς εἶπεν τηρήσῃ (Jas. 2:10), though AKLP read τηρήσει (itacism). Cf. Mt. 10:33 and 38. In such relative sentences the future indicative is also very common, the two forms being closely allied in form and sense. Cf. ὁς ὃν ἔκανεν (Lu. 12:8). See also ὃς ὃν ἔχει (Mk. 4:9) and ὃς ἔχων ἔτα (Mt. 13:9). Cf. εἴ τις in Mk. 4:23. One might as well say that ὁ λαμβάνων (Jo. 13:20) is the same thing as ὁς λαμβάνει (cf. Mt. 10:38). There is a change from participle to relative clause in Mt. 10:37 f., 41 f. Cf. Mt. 12:30, 32; Lu. 9:50. So then ὅν τινα πέμψω (Jo. 13:20) is a conditional clause. 4 It is true that ὃν τινα does not occur in the N. T., but εἴ τις and ὃς δὲ differ in conception after all, though the point is a fine one. The MSS. sometimes vary between εἴ τις and ὃς δὲ as we see in Mk. 8:34; 1 Cor. 7:13. In Jo. 14:13 f. note ὃς ὃν ἀνήσητε and ἔδωκαν τί ἐσήμενε. Note the distinction between ὁ κεφάλαιον and ἐδωκέν τί κεφάλαιον in 2 Cor. 2:10. In Mk. 8:34 f. note εἴ τις τῆλε—ὁς ἐδωκεν τῆλεμα. What is true is that the relative sentences are either definite or indefinite. It is not a question of mode nor of the use of ὃν, but merely

(e) Definite and Indefinite Relative Sentences. Goodwin1 has made popular the custom of calling some relative sentences “conditional relatives.” He has been followed by Burton.2 Jannaris3 considers conditional relative clauses “virtually condensed clauses capable of being changed into conditional protases.” Almost any sentence is capable of being changed into some other form as a practical equivalent. The relative clause may indeed have the resultant effect of cause, condition, purpose or result, but in itself it expresses none of these things. It is like the participle in this respect. One must not read into it more than is there. Cf. ὁς ἔχει ὃτα (Mk. 4:9) and ὁ ἔχων ὃτα (Mt. 13:9). Cf. εἴ τις in Mk. 4:23. One might as well say that ὁ λαμβάνων (Jo. 13:20) is the same thing as ὁς λαμβάνει (cf. Mt. 10:38). There is a change from participle to relative clause in Mt. 10:37 f., 41 f. Cf. Mt. 12:30, 32; Lu. 9:50. So then ὅν τινα πέμψω (Jo. 13:20) is a conditional clause. 4 It is true that ὃν τινα does not occur in the N. T., but εἴ τις and ὃς δὲ differ in conception after all, though the point is a fine one. The MSS. sometimes vary between εἴ τις and ὃς δὲ as we see in Mk. 8:34; 1 Cor. 7:13. In Jo. 14:13 f. note ὃς ὃν ἀνήσητε and ἔδωκαν τί ἐσήμενε. Note the distinction between ὁ κεφάλαιον and ἐδωκέν τί κεφάλαιον in 2 Cor. 2:10. In Mk. 8:34 f. note εἴ τις τῆλε—ὁς ἐδωκεν τῆλεμα. What is true is that the relative sentences are either definite or indefinite. It is not a question of mode nor of the use of ὃν, but merely

4 Cf. Robertson, Short Gr. of the Gk. N. T., p. 169.
whether the relative describes a definite antecedent or is used in an indefinite sense. The definite relative is well illustrated by 2 Th. 3:3, πιστὸς δὲ ἦστιν ὁ κύριος δὲ στηριζεί, or Mk. 1:2, τὸν ἄγγελον μου δὲ κατασκευάσει τὴν ὄδον μου. So also χάριν δι᾽ ἧς λατρεύωμεν (Heb. 12:28). Cf. ὁ προσενέκχει (Heb. 8:3). But indefinite is δὲ ἔχει, δοθήσεται αὐτῷ (Mk. 4:25). In the same verse καὶ δὲ οὐκ ἔχει is indefinite, but καὶ δὲ ἔχει is definite. Indefinite also is δοσοι ἡμῶντο (Mt. 14:36) and [Page 957] ὅσοι ἂν ἡμῶντο (Mt. 6:56). So also with πᾶς δὲ ἔρει (Lu. 12:10) and πᾶς δὲ ὁ ὁμολογήσει (12:8). Cf. δὲ ἔσται (17:31) with δὲ ἐὰν ζητήσῃ (17:33) and δὲ ἂν ἐπολέσει. Cf. Ac. 7:3, 7; Gal. 5:17. That it is not a question of mode is thus clear. Cf. δὲ ἐὰν θέλῃ with δὲ ἂν ἐπολέσει (Mk. 8:35). Thus note in Mk. 4:25 δὲ γὰρ ἔχει δοθήσεται αὐτῷ, but in Lu. 8:18 δὲ ἂν γὰρ ἔχει δοθήσεται αὐτῷ. 1 So in Lu. 12:8 we have πᾶς δὲ ὁ ὁμολογήσει ἂν ἔμοι, but in Mt. 10:32 πᾶς ὅστις ὁμολογήσει ἂν ἔμοι. The use of ὅστις is pertinent. It is either indefinite, as here, from the sense of τις='any one' or definite from the sense of τις='somebody in particular,' as in Lu. 9:30, ὁ δὲ ἂν συνελάλουν αὐτῷ οἴτινες ἦσαν Μωϋσῆς καὶ Ἡλείας. Examples of the definite use of ὅστις may be seen in Mt. 7:26; 16:28; 22:2; 27:55, 62, etc. The indefinite use is seen in πᾶς ὅστις ἀκούει (Mt. 7:24), ὅστις ἔχει (Mt. 13:12), ὅστις ψυχῶει (Mt. 23:12), but apparently no instance of ὅστις ἂν and the future ind. occurs. The indefinite use of ὅστις with the subj. and ἂν is uniform (11 examples), as in ὅστις ἂν εἴῃ (Gal. 5:10), ὅστις ἂν ποιήσῃ (Mt. 12:50). Cf. Col. 3:17. We also find ὅστις ἄρνησται (Mt. 10:33), ὅστις τηρήσῃ (Jas. 2:10), but the definite use in Mk. 9:1. In 2 Cor. 8:12, εἶ ἂν προθυμία πρόκειται, καθὼς ἐὰν ἔχει, εὐπρόσδεκτος, οὐ καθὼς οὐκ ἔχει, there is a pointed distinction between the subjunctive and the indicative modes. 2 Thus the indicative occurs with either the definite or the indefinite and the subjunctive with the indefinite 122 times, the definite only Mk. 9:1=Mt. 16:28. One may make a positive statement about either a definite or an indefinite relative or a doubtful assertion about either. The lines thus cross, but the matter can be kept distinct. The distinction is clearly perceived by Dawson Walker. 3 The subjunctive with the indefinite relative, like that with ὃναι and ἐὰν, is futuristic (cf. also future indicative). Moulton (Prol., p. 186) argues that, since this subj. is futuristic and the aorist describes completed action, the aorist subj. here is really a future perfect. “Thus Mt. 5:21, δὲ ἂν φονεύσῃ, ‘the man who has committed murder.’” But this seems rather like an effort to introduce the Latin idiom into the Greek and is very questionable.

(f) The Use of ἂν in Relative Clauses. This is the place for more discussion of ἂν, though, sooth to say, the matter is not perfectly clear. See also Conditions. It is probably kin to the Latin an and the Gothic an, and had apparently two meanings, [Page 958] ‘else’ and ‘in that case rather.’ Monro 1 argues that the primary use of ἂν and κἂν is with particular and definite examples. Moulton (Prol., p. 166) translates Homeric ἐγὼ δὲ κἂν αὐτὸς ἔλαμψαι by the Scotch ‘I’ll jist tak her mysel.’ There was thus a limitation by circumstance or condition. The use of ἂν with relative, temporal

---

1 Hom. Gr., p. 263 ff.
and conditional clauses “ties them up to particular occurrences” (Moulton, *Prol.*, p. 186). It is not always quite so easy as that. This use of modal ἄν appears rarely in modern Greek (Thumb, *Handb.*, p. 188). “It is a kind of leaven in a Greek sentence; itself untranslatable, it may transform the meaning of a clause in which it is inserted” (Moulton, *Prol.*, p. 165). That is putting it a bit strong. I should rather say that it was an interpreter of the sentence, not a transformer. Moulton counts 172 instances of modal ἄν (ἐάν) in the N. T. (p. 166). Matthew leads with 55, then Mark 30, Gospel of Luke 28 and Acts only 10, Paul’s Epistles 27, the Johannine writings only 20, Hebrews 1, James 1. Mr. H. Scott fears that these figures are not correct, but they are approximately so. The MSS. vary very much. These examples occur with ind. or subj. Moulton finds 739 cases of modal ἄν in the LXX (Hatch and Redpath). Of these 40 are with opt. (26 aorist), 56 with ind. (41 aorist, 6 imp., 1 plup., 1 pres., 7 fut. ind.), the rest with subj. Radermacher (*N. T. Gr.*, p. 165) finds modal ἄν in the κοινή decreasing and unessential with ind., subj. or opt. in relative, temporal, final or conditional clauses. The use with indefinite or general statements was rare in Homer, but gradually came to be more frequent. But in the N. T. some examples of the definite use of ἄν survive especially in temporal clauses. So in Rev. 8:1, ὅταν ἰησοῦν. But ὅταν στήκετε (Mk. 11:25) may be general. There is doubt also about ὅταν ὑψώσετε (11:19). But in Mk. 6:56, ὅσοι ἄν ἰησοῦν, the construction is rendered more definite by ἄν, though ὅποιον ἄν εἰσεπορεύετο in the same verse is indefinite. In Mt. 14:36 we have ὅσοι ἰησοῦν, which is not more definite than Mark’s construction. In Rev. 14:4, ὅποιον ἄν ὑπάγεται, the construction is indefinite. In Ac. 2:45 and 4:35, καθότι ἄν τις εἴχεν, we have repetition and so a general statement to that extent. In Mk. 3:11, ὅταν αὐτὸν ἐθεώρον, it is general. In most instances in the N. T., therefore, the use of ἄν is clearly in indefinite relative clauses whether with the indicative or subjunctive. It cannot be said that ἄν is necessary with the indefinite relative and the indicative. It does not occur in the N. T. with ὅστις and the future ind., but we have both ὅστις ὁμολογήσει (Mt. 10:32) and ὅς ἄν ὁμολογήσει (Lu. 12:8); ὅς ἔστι (Lu. 17:31) and ὅς ἄν ἀπολέσει (Mk. 8:35). For ὅς ἄν and fut. ind. see Compernass, *De Sermone Pisc.* p. 38. Radermacher (*N. T. Gr.*, p. 145) cites ὅς ἄν δύνασθαι, Inscr. Petersen-Luschan, *Reisen*, p. 174, N. 223, 21. As already seen, the relative with the subj. usually has ἄν, as εἰς ἄν εἶν πόλιν εἰσέρχητο (Lu. 10:8); ὅτι ἄν προοίμισθαι (10:35). Cf. ὃς ἄν βούληται (10:22). In a few examples the best MSS. do not have ἄν, as in ὅστις δρνίσῃτο (Mt. 10:33); ὅστις πρήγμα—πτολέμη δέ (Jas. 2:10). The use of ἐὰν like ἄν has been shown (cf. Orthography) to be very common with relatives at this period. It is immaterial which is found. So ὅς ἐὰν λύσῃ and ὅς ἄν πονῆῃ (Mt. 5:19). The MSS. often vary between ἐὰν and ἄν, as in Mt. 10:14; Ac. 7:7. So also ὅσα ἔδω ἔσεται (Mt. 7:12) and ὅσα ἄν αἰτήσῃ (Mt. 21:22). But in the N. T., as in the papyri, ἄν is twice as common in relative clauses. Radermacher (*N. T. Gr.*, p. 145) quotes ὅσοι—ἐγλιτσάω, Inscr. Perg. 249, 26, and ὅς ἄνασπαράξῃ (or ὅς ἄπτε) I. Gr. XII, 1, 671. Moulton (*Prol.*, p. 169) cites C.P.R. 237

Hatch and Hatch and Redpath, Concordance to the LXX (1897).
2 *Per contra* see W.-Th., p. 306.
3 Blass (Gr. of N. T. Gk., p. 217) quotes ὅς ἄν συντελέσσομαι from an inscr. in Viereck’s *Sermo Graecus*, p. 38.
(ii/A.D.), ὅσα αὐτῷ προστέκηται. He (ib., p. 168) quotes ὅσον πᾶσχετε F.P. 136 (iv/A.D.), ὅσα ἔδωκα παρελαβόμεν B.M. 331 (ii/A.D.). The ὅσον is not repeated with the second verb. So ὅσον ποίησῃ καὶ διδάξῃ (Mt. 5:19). There is no instance of ὅσον in a relative clause with an optative in the N. T. But in Gen. 33:10 the LXX has ὅσον τις ἱδον πρόσωπον θεοῦ. So οἷς ἔδωκα πάντας F.P. (see Moulton, Cl. Rev., 1901, p. 32).

Radermacher (N. T., Gr., p. 131) cites καθὼς ἔδωκα μέρος στρέφοιτο from Philo. There is one instance of ὅσον with the infinitive in the N. T. (2 Cor. 10:9), ἵνα μὴ δόξη ὅσον ἐκφοβεῖν υμᾶς, but ὅσον is here probably the same as ὃς ἂν ἐκφοβεῖν, but ὅσον is here probably the same as ὃς ἂν = ὃς ἂν as in margin of W. H. The text is probably correct (cf. Lu. 10:35; Ac. 3:23, etc.).

Page 960 (g) Special Uses of Relative Clauses. As in Latin,1 the relative clause may imply cause, purpose, result, concession or condition, though the sentence itself does not say this much. This is due to the logical relation in the sentence. The sense glides from mere explanation to ground or reason, as in ὃ καὶ ἐσπούδασα αὐτὸ τοῦτο ποιῆσαι (Gal. 2:10). In 1 Cor. 3:17, ὃ ναός τοῦ θεοῦ ἄγιος ἐστίν οἰνίνες ἔστε ὑμεῖς, there is an argument in οἰνίνες. This is clearly true2 in Ro. 6:2, οἰνίνες ἀπεθάνουσαν τῇ ἀμαρτίᾳ, τῷ ἔστι ζήσομεν ἐν αὕτῃ. Cf. also Ac. 10:41, οἰνίνες συνεφάγομεν καὶ συνεπάγομεν αὐτῷ. See Gal. 5:4, οἰνίνες ἐν νόμῳ δικαιοῦσθε. Cf. Latin qui, quippe qui. A good example is seen in Ro. 8:32, ὃς γε τοῦ ἱδίου αὐτοῦ ἐφείσατο. Cf. also ὃ ἐμελλέων (Rev. 3:2) and the common ὅν ὅν (Lu. 1:20). Cf. Ac. 10:47; Ro. 1:25, 32; Ph. 2:20; Col. 3:5. Only the ind. mode occurs in the N. T. in this construction.3 Purpose is also found in relative clauses (cf. Latin qui=ut is). Either the future ind. or the subj. is used for this construction. When the subj. occurs it is probably volitive.4 So Burton5 would explain all the cases of subj. of purpose with relatives, but wrongly. The use in Mk. 14:14 is analogous to the retention of the subj. of deliberation in an

[Page 960]

Abbott

4 Moulton, Prol., p. 185.
5 N. T. M. and T., p. 126.
indirect question. Cf. the subj. of purpose with relative clause in Attic Greek. But the subj. construction is Homeric (like Latin also). The Attic idiom is the future ind., and the future ind. also appears in the N. T. So ὁς κατασκευάσει (Mk. 1:2=Mt. 11:10—Lu. 7:27), ὃς ὢμᾶς ἄναμφησε (1 Cor. 4:17) which may be contrasted with the merely explanatory relative ὁς ἔστιν μου τέκνον in the same sentence. So ὀτίνες ἀποδώσουσιν αὐτῷ (Mt. 21:41); οὗ προσπορεύσονται (Ac. 7:40; Ex. 32:1); οὐκ ἔχω ὅ παραθήση (Lu. 11:6) where the Attic Greek would have ὅτι. Sometimes ἵνα occurs where a relative might have been used. So 2 Cor. 12:7 ἐδόθη μοι σκόλοψ—ἵνα με κολαφίζῃ. (Jo. 5:7) οὐκ ἔχω ἄνθρωπον ἵνα βάλῃ με, (9:36) ἵνα πιστεύσω εἰς αὐτόν. Cf. Gal. 4:5; Rev. 19:15. Viteau8 strikingly compares Mt. 10:26, ὅ οὐκ ἀποκαλυφθήσεται καὶ ὅ οὐ γνωσθήσεται, with Mk. 4:22, ἐὰν μὴ ἵνα φανερωθῇ καὶ ἵνα ἔλθῃ εἰς φανερόν. The variety of construction with ὁς is illustrated by Mt. 24:2 (Lu. 21:6), ὁς οὐ καταλυθήσεται, and Mk. 13:2, ὃς οὐ μὴ καταλυθῇ. [Page 961] The classic idiom preferred the fut. ind. for purpose with the relative (Schmid, Atticismus, IV, p. 621), but Isocrates (IV, 44) has ἔφοβος φίλοτιμοθάνων. Radermacher (N. T. Gr., p. 138) cites for the κοινή Diod. XI, 21, 3, διὰ οὗ τρόπου—ἀνέλημα; XIV, 8, 3, διὰ οὗ ἔξελωσιν; Ach. Tatius, IV, 16, 13, ἄσον—λάβη, etc.

Purpose is often contemplated result so that the consecutive idea follows naturally that of design. Only the ind. future is used in the N. T., unless one follows Blass1 in taking ὅ προσενέγκῃ (Heb. 8:3) as result. A good instance of the future ind. is in Lu. 7:4, ἅξιος ἐστιν ὃ παρέξη, which may be profitably compared with the non-final use of ἵνα in Jo. 1:27, ἅξιος ἵνα λύσω. Burton3 prefers to call this a “complementary limitation of the principal clause,” a sort of secondary purpose. But the notion is rather that of contemplated result. The relative denotes a kind of consequence from a particular quality or state.4 See also Ph. 2:20 ὁ δὲ ἐξω ξυφήγων δότης—μεριμνήσει, Mk. 10:29 οὕδας ἔστιν ὃς ἄφηκεν τὴν οἰκίαν, Lu. 7:49 τίς οὔτος ἔστιν ὃς καὶ ἄμαρτως ἀφίησιν; Cf. 2 Th. 3:3 πιστὸς ὃς with 1 Jo. 1:9 πιστὸς ἵνα.

An example of the concessive use of ὀτίνες is seen in Jas. 4:14, ὀτίνες οὐκ ἐπίστασθε τῆς ἀρτίον ποίᾳ ἣ θυών ὑμῶν.

The conditional use of the relative clause is only true in a modified sense, as already shown. The relative ὃς and ὅτις, whether with or without ἦν, does not mean ἢ τίς or ἢ ἔν τις, though the two constructions are very much alike. There is a similarity between ἢ τίς τῆς θελήσα (Mk. 9:35) and ὃς ἦν θέλη (10:43). But I do not agree to the notion of Goodwin6 and Burton7 that in the relative clauses we have a full-

6 M. and T., pp. 195 ff.
7 N. T. M. and T., pp. 119 ff.
fledged set of conditional sentences on a par with the scheme with the conditional particles. That procedure is entirely too forced and artificial for the Greek freedom and for the facts. There is a general sort of parallel at some points, but it is confusion in syntax to try to overdo it with careful detail as Viteau does. Ἄν is not confined to the relative and conditional sentences, but occurs with ἐὼς, πρὶν, ὡς, and ὅπως (temporal and final clauses). The indefinite relative like ὃς ἐὰν θέλῃ (Mt. 8:35) or ὅστις ὠμολογήσει (Mt. 10:32) is quite similar in idea to a conditional clause with ἐὰν τις or εἰ τις. But, after all, it is not a conditional sentence any more than the so-called [Page 962] causal, final, consecutive relative clauses are really so. It is only by the context that one inferentially gets any of these ideas out of the relative. All that is true about the indefinite relative clauses has already been explained under that discussion. I therefore pass by any treatment of the kinds of conditional sentences in connection with the relative clauses.

(h) Negatives in Relative Clauses. When the subj. occurs the negative is μὴ, as in ὃς ὦν μὴ ἔχῃ (Lu. 8:18), but οὐ μὴ is found in Mk. 13:2, ὃς οὐ μὴ καταλάβῃ. So in Mk. 9:1=Mt. 16:28 we have οὐ μὴ. With the indicative the negative is οὐ, as in ὃς οὐ λαμβάνει (Mt. 10:38); γὰρ ὦκ ἔστι καθ ὠμῶν (Lu. 9:50). Occasionally when the relative is indefinite the subjective negative μὴ occurs with the indicative. So ὃς μὴ πάρεστιν ταῦτα (2 Pet. 1:9); μὴ ὠμολογεῖ (1 Jo. 4:3); μὴ δεῖ (Tit. 1:11). So also D in Ac. 15:29. Moulton (Prol., p. 171) calls this use of μὴ a survival of literary construction. He gives also some papyri examples (ib., p. 239) of μὴ in relative clauses: B.U. 114 (ii/A.D.) ήν ὠδοδίδοκεν αὐτῷ μὴτε δύναται λάβειν, C.P.R. 19 (iv/A.D.) οὐ μὴ συνεφόρησα. The use of μὴ in relative clauses is more common in the κοινὴ than in the classic Greek (Radermacher, N. T. Gr., p. 171). He cites examples from late Greek writers. There is nothing gained by explaining οὐ in relative clauses after the fashion of εἰ in conditional sentences as is done by Burton.¹

2. CAUSAL SENTENCES.

(a) Paratactic Causal Sentences. These do not properly belong here, but there are so many of them that they compel notice. The common inferential particle γάρ introduces an independent, not a dependent, sentence. Paul uses it usually to introduce a separate sentence as in Ro. 2:28; 1 Cor. 15:9. In 1 Cor. 10:17 both δι and γάρ occur. It will be treated in the chapter on Particles. Phrases like ὃν γὰρ ὦν (Lu. 12:3), διό (Mt. 27:8), διόπερ (1 Cor. 8:13), ὥσον (Ac. 26:19), δι’ ἧν αἰτήσαν (2 Tim. 1:6, 12), οὐ κάρπον (Lu. 7:47) are not always regarded as formally causal. The construction is sometimes paratactic. Indeed, the subordination of the δι and διότι clauses is often rather loose.² Thus there is very little difference between δι (begins the sentence with W. H.) in 1 Cor. 1:25 and γάρ in 1:26. Cf. also ἐπειδὴ in 1:22. See further δι in 2 Cor. 4:6; 7:8, 14, and διότι in Ro. 3:20; 8:7. The causal sentence is primarily paratactic. [Page 963] See Mt. 6:5; Lu. 11:32; 1 Cor. 15:29; Heb. 10:2. The subordinate relative is a later development.¹

---

8 Le Verbe, pp. 136 ff.
(b) With Subordinating Conjunctions. One may say at once that in the N. T. the mode is always the indicative. There is no complication that arises with ἐπεί when the apodosis of a condition of the second class is used without the protasis as in Heb. 10:2, ἐπεί οὐκ ὄν ἐπιστεύοντο. Here the construction is not due at all to ἐπεί. In the same way we explain ἐπεί ἔδει in Heb. 9:26 and ἐπεί ὥρειλετε ἄρα in 1 Cor. 5:10. There is ellipsis also in the rhetorical question in 1 Cor. 15:29, ἐπεί τί ποιήσουσιν; But in Ac. 5:38 f. two complete conditional sentences (ἐάν and εἰ, protasis and apodosis) occur with ὅτι. In a word, it may be said that the indicative is used precisely as in the paratactic sentences. Cf. Jo. 14:19, ὅτι ἐγὼ ζῶ καὶ ὑμεῖν ζήσετε.

The negative is usually οὐ as in 1 Jo. 2:16. Once in the N. T., Jo. 3:18, ὅτι μὴ πεπίστευκεν, we have μή, but οὐ is seen in 1 Jo. 5:10, ὅτι οὐ πεπίστευκεν. “The former states the charge, quod non crediderit, the latter the simple fact, quod non credidit” (Moulton, Prol., p. 171). Cf. ὅτι μή in Epictetus IV, 4, 11; IV, 5, 8–9. Cf. Abbott, Joh. Gr., pp. 162, 535. The distinction is subtle, μή being more subjective and ideal. In Heb. 9:17, ἐπεί μὴ τότε (or μὴ ποτε) Ἰσχρεί, we likewise meet μή. In B. G. U. 530 (i/A.D.), ἔπι μὴ ἠντέγραψας αὐτή—ὅτι οὐκ ἕκεμψας πρός σε, note ἔπι (εἰ) μή and ὅτι οὐκ with true distinction. With οὐ we have the objective fact, with μή the element of blame (μὲμφεται) appears. “The comparison of Plutarch with the N. T. shows a great advance in the use of ὅτι μή” (Moulton, Prol., p. 239). Cf. also E. L. Green, Gildersleeve Studies, pp. 471 ff.; Rademaker, N. T. Gr., p. 171. He cites ὅτι μή ἔχεις, Epictetus IV, 10, 34. It is making inroads on ὅτι οὐ.

We sometimes have ὅνθο θνίν in a truly causal sense as in Lu. 1:20, and that is true also of ὅνεν in Mt. 14:7. In Heb. 2:18 ἐν θνί is practically causal. So also ἐφθανεν ἐν is causal in Ro. 5:12; 2 Cor. 5:4; Ph. 4:10. Cf. καθὸ δὲ = ‘if right,’ P. Oxy. 38 (A.D. 49). The classical ἐφθαίε does not occur in the N. T. See ἐφθαίε δώσει, ‘on condition that he give,’ P. Oxy. 275 (A.D. 66).

Then ὅς may have almost the force of a causal particle as in Jo. 19:33; Mt. 6:12 (cf. Lu. 11:4, καὶ γὰρ); 2 Tim. 1:3. The same thing is true of καθὼς in Jo. 17:2. Καθὸ δοσον is causal in Heb. 7:20 (9:27) and ἐφθανεν δοσον in Mt. 25:40, 45. So καθὸτι in Lu. 19:9 (cf. 1:7). In Ac. 17:31 HLP. read διότι. None of these [Page 964] particles are strictly causal, but they come to be so used in certain contexts in the later Greek. We have ὅς ὅτι in 2 Cor. 5:19; ὃς ὅτι θεὸς ἦν ἐν Χριστῷ κόσμον καταλλάσσων ἔκατω (cf. our “since that”). Here the Vulgate has quoniam. But in 2 Cor. 11:21 the Vulgate renders ὅς ὅτι by quasi, as in 2 Th. 2:2, ὃς ὅτι ἐνέστηκεν. Cf. Blass, Gr. of N. T. Gk., p. 321 f. It is found also in Esther 4:14 and is post-classical.1

Διότι is found in the Lucan writings, the Pauline Epistles, Hebrews, James and 1 Peter. In the modern Greek2 it takes the form γιατί. Once (Ro. 8:21) some MSS. (W. H. read διότι) have διότι in the sense of objective ὅτι (‘that’) as in later Greek (cf. late

---

1 Viteau, Le Verbe, p. 98.
Latin *quia=quod*). Instances of causal διότι may be seen in Lu. 1:13; Ro. 1:19, etc. It is compounded of διά and ὅτι (cf. English “for that”). In Ph. 2:26 διότι is causal and ὅτι is declarative. In modern Greek διότι survives in Ἡ καθαρεύονσα. The vernacular has ὅφος, ἐπειδὴ, γιατί (Thumb, *Handb.*, p. 194).

But all other causal particles are insignificant beside ὅτι which grew steadily in use.

It was originally merely relative and paratactic. In 1 Jo. 4:3 note ὅ—ὅτι and ὅτι ὅ in Ro. 4:21. It is accusative neuter rel. ὅτι (cf. ὅτι ὅν προσδοκανόντος, Lu. 10:35) and is more common as the objective particle in indirect discourse (subject or object clause) than as a causal conjunction. In 1 Jo. 5:9 ὅτι occurs twice, once as causal and once as objective particle. In 2 Th. 3:7 f. exegesis alone can determine the nature of ὅτι. In Jo. 3:19 Chrysostom takes ὅτι =‘because.’ Cf. also Jo. 16:8–11 (see Abbott, *Johannine Gr.*, p. 158). The English “the reason that” (vernacular “the reason why”) is similar. It is very common in 1 John in both senses. In Jo. 1:15 ff. causal ὅτι occurs three times in succession. In Lu. 9:49, ἐκκλαίουμεν αὐτόν ὅτι οὐκ ἔκκλησθήμεν ἡμῶν, the present is used because of a sort of implied indirect discourse. In Mk. 9:38 W. H. read ὅτι οὐκ ἔκκλησθήται. A good example of causal ὅτι is seen in 5:8. The precise idea conveyed by ὅτι varies greatly. In Jo. 9:17, τί σὺ λέγεις περὶ αὐτοῦ, ὅτι ἤνεφεξένι οὐ τοῦ ὀφθαλμοῦς; the use of ὅτι wavers between objective and causal. Cf. also Mk. 6:17. But we need not appeal to the Hebrew for a justification of this balancing of two ideas by ὅτι. So in Jo. 2:18, τί σημεῖον δεικνύεις ἡμῖν, ὅτι ταῦτα ποιεῖς. Akin to this construction is that in [Page 965] Jo. 14:22, τί γέγονεν ὅτι, which is shortened into τί ὅτι in Ac. 5:4, 9. There is a correspondence sometimes between διά τοῦτο and ὅτι (Jo. 10:17); διὰ τί and ὅτι (Ro. 9:31 f.). Οὐχ ὅτι may be either objective or causal as in Ph. 4:11, 17; 2 Th. 3:9. In the ancient Greek it meant ‘not only do I say that, but I also say.’ But in the N. T. it either means ‘I say this not because’ or ‘I do not mean to say that,’ and usually the latter according to Abbott.

We must have a word about ἐπεί, ἐπειδή, ἐπειδὴπερ. As a matter of fact ἐπεί-δή-περ (note the composition) appears in the N. T. only in Lu. 1:1 (Luke’s classical introduction). This is undoubtedly a literary touch. ἐπειδὴ is read by W. H. in Lu. 7:1 and Ac. 13:46, but ἐπεί δὲ is put in the margin. Eight other examples remain, all in Luke (Gospel and Acts) and Paul (1 Corinthians and Philippians). Cf. Lu. 11:6; 1 Cor. 1:21 f. ἐπεί, obsolescent in the late Greek, is almost confined to Luke, Paul, the author of Hebrews. Elsewhere in Matthew, Mark and John. Two of these are examples of the temporal use (Mk. 15:42; Lu. 7:1 W. H. marg.). The ordinary causal sense is well illustrated in Mt. 21:46, ἐπεί εἷς προφήτην εἶχον. The classical idiom of the ellipsis with ἐπεί has already been mentioned and is relatively frequent in the N. T. Cf. Ro. 3:6; 11:22; 1 Cor. 14:16; 15:29; Heb. 9:26; 10:2. It occurs in the simplest form in ἐπεί πῶς (Ro. 3:6) and ἐπεί τί (1 Cor. 15:29). In 1 Cor. 14:16, ἐπεί ἐάν, it is

4 Monro, Hom. Gr., p. 189.
5 As Viteau does in Le Verbe, p. 100. The LXX does show the idiom, as in 1 Ki. 1:8, τί ἕστι σοι ὅτι κλαίεις;
1 Joh. Gr. p. 162.
equivalent to ‘otherwise’ and in Ro. 11:22 to ‘else,’ ἐπεὶ καὶ σὺ ἔκκοπήσῃ. The apodosis of a condition of the second class occurs in 1 Cor. 5:10; Heb. 9:26; 10:2.

Verbs of emotion in classical Greek sometimes used ἐπὶ (conceived as an hypothesis) rather than ὅτι (a direct reason). The N. T. shows examples of θαυμάζω ἐπὶ in this sense (Mk. 15:44; 1 Jo. 3:13), though θαυμάζω ὅτι is found also (Lu. 11:38; Gal. 1:6). ὅτι is the N. T. construction with ἰδανακτέω (Lu. 13:14); ἔξομολογέομαι (Mt. 11:25); εὐχαριστέω (Lu. 18:11); μέλει (Mk. 4:38); χαίρω (Lu. 10:20); χολάω (Jo. 7:23). Cf. ὅτι and ἐφ᾿ ὃ in Ph. 4:10. On the possible causal use of ὅτι and ὅταν see article by Sheppard, The Cl. Rev., Sept., 1913.

(c) Relative Clauses. This matter received sufficient discussion under Relative Clauses. For examples of ὅς take Ro. 8:32; [Page 966] Heb. 12:6. For ὅστις note Mt. 7:15; Ro. 6:2. See also οὗ χάριν (Lu. 7:47) and ὅ ἐν αἰτίαν (8:47).

(d) Διὰ τό and the Infinitive. The construction is common in the N. T., occurring thirty-two times according to Votaw as compared with thirty-five for the O. T. and twenty-six for the Apocrypha. It is particularly frequent in Luke. Cf. Lu. 2:4; 18:5; Ac. 4:2; 8:11, etc. It is not in John except in 2:24, διὰ τό αὕτων γινώσκειν. Blass rejects it here because the Lewis MS. and Nonnus do not have the passage. Here note that ὅτι is used side by side with διὰ τό. So in Jas. 4:2 f. we have διὰ τό μὴ αἰτάσθαι ὑμᾶς and διὸτι κακῶς ἀνείπηθεν on a parity. Cf. Ph. 1:7, καθὼς and διὰ τό. In Mk. 5:4, διὰ τό δεδέσθαι καὶ διεσπάσθαι καὶ συντετρίφθαι, note the perfect tense and the repetition of the infinitive. Burton thinks that here διὰ gives rather the evidence than the reason. Why not both? There is one example of the instrumental use of the infinitive to express cause, τῷ µὴ εὑρεῖν µε (2 Cor. 2:13). The text of B has six examples in the LXX (cf. 2 Chron. 28:22, τῷ θαληθήναι αὐτόν). No examples of ἐπὶ τῷ occur.

(e) The Participle. We do not have ἐπὶ, οἶνος, οἷος, as in classical Greek, to give the real reason. That is given simply by the participle as in δῖκαιος ὃν καὶ µὴ θέλων αὑτήν δειγματίσαι (Mt. 1:19). It is “exceedingly common” (Moulton, Prol., p. 230).

4 Cf. ib.
5 Cf. ib.
1 The Use of the Inf. in Bibl. Gk., p. 20. Mr. H. Scott notes pres. 24, aor. 1 (Mt. 24:12), perf. 7 times.
2 Blass, Gr. of N. T. Gk., p. 236.
4 Votaw, The Use of the Inf. in Bibl. Gk., p. 29.
Moulton
Cf. Jas. 2:25; Ac. 4:21. But ὃς occurs with the participle to give the alleged reason, which may be the real one or mere assumption. Thus in Mt. 7:28 f., ὃς ἐξοσέβαν ἔχον καὶ ὃς ὁ γραμματέας, the first ὃς gives the ostensible (and true ground) of the astonishment of the people. Cf. also Lu. 16:1; Ac. 2:2. But in Lu. 23:14, ὃς ἀποστρέφοντα τὸν λαόν, Pilate does not believe the charge against Jesus to be true. So also with ὃς μελλόντων in Ac. 27:30.

3. COMPARATIVE CLAUSES. The discussion in my Short Grammar⁶ forms the basis of this section. The conjunctions employed are all of relative origin, but the construction deserves separate treatment.

(a) The Relative ὅσος. This is a classic idiom and occurs only in Hebrews, except once in Mark. In Heb. 1:4 the correlative is expressed and the comparative form of the adjective is found [Page 967] in both clauses. Both correlative and relative are here in the instrumental case, τοσοῦτῳ κρείττων γενόμενος τῶν ἁγγέλων ὅσῳ διαφορώτερον παρὰ ἑαυτοῦ κεκληρονόμηκεν ὄνομα. The same phenomena are present in 8:6, save that the correlative is absent. In 10:25 there is no comparative in the relative clause. The others are examples of καθὸ ὅσον. In 3:3 there is no correlative, but the comparative appears in both clauses. In 7:20 f. the correlative is κατὰ τοσοῦτον, but

———, The Vocabulary of the N. T. Illustrated from the Papyri and other Non-Literary Sources. Part I (1914), II, III.

6 Chapter XXVIII.
there is no comparative in the relative clause. This is probably causal in idea, as is true of καθ' ὅσον in 9:27, where there is no comparative, though we have the correlative οὕτως καί. The example in Mk. 7:36, ὅσον δὲ αὐτός διεστέλλετο αὐτός μᾶλλον περισσότερον ἐκήρυσσον, lacks the correlative and has no comparative with the relative, but has a double comparison in the principal clause. In Jo. 6:11 and Rev. 21:16, ὅσον is simply relative, not a conjunction. The causal and temporal uses of ὅσον are discussed elsewhere.

(b) Relative ὅς with κατά. The singular καθό is found only in Ro. 8:26 καθὸ δέ, 1 Pet. 4:13 καθὸ κοινωνεῖτε, and 2 Cor. 8:12 καθὸ ἔδραμεν ἐφιππρόσδεκτος, οὖ καθὸ οὕκ ἔχει, where a good distinction is drawn between the subjunctive and the indicative. Cf. O. P. 1125, 14 (ii/α.δ.) καθὸ μισθοῦ μέρος. The construction with ἔδραμεν is like that of the indefinite relative with ἔδραμεν ( WaitForSeconds ), and the subj. The plural καθά is found only once in the N. T. (Mt. 27:10). Καθάπερ, however, is found seventeen times (three doubtful as compared with καθός, Ro. 9:13; 10:15; 2 Cor. 3:18), and all in Paul’s writings save in Heb. 4:2 (without verb). It is thoroughly Attic and a slight literary touch. Cf. 1 Cor. 10:10. The mode is always indicative, but cf. καθὸ ἄρεσκῇ in Gen. 19:8. In Ro. 12:4 the correlative is οὕτως.

(c) Καθότι in a Comparative Sense. It occurs only twice (Ac. 2:45; 4:35) and the same idiom precisely each time, καθ' ὅτι τις χρείαν ἐχει. Here ὅτι seems to particularize each case from time to time (note imperfect tense), the iterative use of ὅτι (Moulton, Prol., p. 167). This usage approaches the temporal in idea. The classic idiom of the aorist ind. with ὅτι no longer appears with these conjunctions.

(d) ὅς and its Compounds. These are the most common comparative particles. The most frequent of all is ὅς itself which has various other uses as exclamatory (ὡς ὅραμα ποιεῖ ὡς ὅραμα in Ro. 10:15), declarative like ὅτι (Ac. 10:28), causal (Mt. 6:12), temporal (Lu. 12:58), with the infinitive (Lu. 9:52; Heb. 7:9), as a final particle (ὡς τελειώσω, Ac. 20:24, W. H. text), with superlative [Page 968] adverbs (ὡς τάχιστα, Ac. 17:15), with the sense of ‘about,’ as ὡς δισχίλιοι (Mk. 5:13) and with participles (ὡς μέλλων, Ac. 23:20). The richness of this particle is thus illustrated. But the comparative relative adverb is the origin of them all. In Heb. 3:11; 4:3 ὅς may be consecutive ‘so,’ but ὅς is more often comparative than anything else. Usually ὅς has a correlative. Thus οὕτως—ὡς (1 Cor. 4:1); ὡς—οὕτως (Ac. 8:32); ὡς—οὕτως καί (2 Cor. 7:14); ὡς—καί (Gal. 1:9); ὡς—καί (Ac. 11:17); καί—ὡς καί (Mt. 18:33). But often no correlative is expressed (cf. Mt. 8:13). The verb is not always expressed. Thus ὅς οἱ ὑποκριταί (Mt. 6:5). This predicate use of ὅς is very extensive. Cf. ὅς καί (1 Cor. 7:7). The mode is usually the indicative, as in Mk. 10:1, but the subj. occurs in Mk. 4:26, ὡς ἄνθρωπος βάλη (cf. ὧς οὐκ ὀδέν). Blass considers this “quite impossible,” but it is read by BD. Some late MSS. add ἔδραμεν and others read ὅτι, but surely ἔδραμεν ( WaitForSeconds ) is not “indispensable” to the subj. (cf. Mt. 10:33). In Gal. 6:10, ὧς καρδία ἔχομεν, the temporal ὅς is likewise minus ὅτι. See Relative Clauses and discussion of ὅτι which is by no means necessary in these subj. clauses. Cf.

1 In general correlatives are rare in the LXX. Viteau, Le Verbe, p. 142.
2 Gr. of N. T. Gk., p. 321.
Radermacher, *N. T. Gr.*, p. 164. In 1 Th. 2:7, ὰς ἔσκε τροφός θόλπην τῷ ἔσχετης τέκνα, we do have ἔσκε, but the construction in Mark is not lawless. Καθός comes next to ὰς in frequency (chiefly with Luke and Paul). It sometimes has the correlative. So οὖτος καθός (Lu. 24:24); καθός—οὖτος (Jo. 3:14); καθός—οὖτος καὶ (2 Cor. 8:6); καθός καὶ—οὖτος καὶ (Col. 3:13); καὶ—καθός καὶ (Ro. 1:13); καθός—καὶ (Jo. 15:9); ὧδεις καθός (Lu. 17:28), and note κατά τὰ αὐτά in verse 30. The correlative is not always expressed (Mt. 21:6). So in Col. 1:6, καθός καὶ. Sometimes the principal clause is unexpressed as in 1 Tim. 1:3, or only οὖ occurs, as οὖ καθός (1 Jo. 3:12; Jo. 6:58). It is a late word but is abundant in the papyri. In the N. T. it occurs only with the indicative. The word, as already noted, sometimes has a causal sense (Ro. 1:28). It may have a temporal significatio in Ac. 15:14, and is epanegygetical in 3 Jo. 3. Καθώσπερ is read only once in the N. T. (Heb. 5:4), though W. H. put it in the margin in 2 Cor. 3:18 (text καθάπερ). Ὡσεὶ is classical, but has no verb (cf. Mt. 3:16; Mk. 9:26, etc.) in the N. T., though it occurs with the participle ὡσεὶ προβάτα μὴ ἔχοντα ποιμένα (Mt. 9:36). Cf. also Ro. 6:13. It is used in the sense of ‘about’ as in Lu 9:14, 28, etc. It is commonest in the Gospels and Acts. [Page 969] In 2 Cor. 10:9 we have ὰς ἄν έκφοβην (here alone in the N. T. with infinitive)=‘as if to frighten.’ Ὡσπερ occurs with the indicative as in Mt. 6:2. In Mt. 25:14 a parable is thus introduced, but with no correlative. But we have the correlative in Ro. 5:19 (6:4), Ὡσπερ—οὖτος καὶ. So Jo. 5:21. So Ὡσπερ—ὡς σαῦτός (Mt. 25:14–18); Ὡσπερ—οὖτος (13:40). We find Ὡσπερ also with the participle (cf. Ac. 2:2). Often the verb is wholly wanting as in Mt. 6:7. We meet Ὡσπερεῖ only once (1 Cor. 15:8) and that without a verb.

4. Local Clauses. These are all relative adverbial sentences and are usually treated with relative sentences, but they are worthy of a separate note. The adverbs (conjunctions) used are δὲν, οὖ, ὀποῦ. With ὀποῦ only the indicative is found as in Lu. 11:24, ὀποῦ ἔξηλθον. More common than ὀποῦ is οὖ as in Mt. 2:9, οὖ ἂν τὸ παιδίον. Cf. past perfect in Ac. 20:8. It occurs mainly in Luke’s writings and always with the indicative save once in 1 Cor. 16:6, οὖ έκαστος. Here the indefinite relative naturally has ὀν and the subjunctive. οὖ is used with verbs of motion as well as with those of rest as this passage shows. Cf. also Lu. 10:1, οὖ ημελλέν αὐτός ἐρχεσθαι. But ὀποῦ is the usual local conjunction in the N. T., particularly in Matthew, Mark and John (Gospel and Revelation). It occurs with verbs of rest as in Mk. 2:4, ὀποῦ ἂν, and of motion as in Jo. 7:34, ὀποῦ ὑπάγω. The indicative is the usual mode. Once, Mk. 6:56, ὀποῦ ἂν εἴσερχομαι, we find ὀν to emphasize the notion of repetition in the imperfect tense, but this is not necessary. Cf. ὀποῦ οὖ θέλεις (Jo. 21:18). Note the emphatic negative in ὀποῦ οὖ θέλεις (ib.). Cf. also ὀποῦ ἂν ὑπάγει (Rev. 14:4) where ὀν occurs with the present ind. (indefinite relative). In ὀποῦ φάγω (Mk. 14:14; Lu. 22:11), as noted on p. 964, the subj. is probably deliberative, answering to ποῦ φάγω in the direct question. Cf. οὖκ ἔχει ποῦ τὴν κεφαλῆν κλίνῃ (Lu. 9:58). But the subj. with ἂν in ὀποῦ ἂν ἐπέρχηται (Lu. 9:57) is the common futuristic subj. So in the parallel passage in Mt. 8:19. See further Mt. 24:28; 26:13; Mk. 6:10; 9:18; 14:9, 14. Curiously enough all the N. T. instances of ὀποῦ with the subj. are found in the Synoptic Gospels. There is ellipsis of the copula in Rev.

2:13, as is not infrequent with relatives. ὅπου is used also in metaphorical relations, as in Heb. 9:16. The correlative adverb ἐκεῖ occasionally appears with ὅπου as in Lu. 12:34; 17:37; Jo. 12:26. Καί is a correlative in Jo. 17:24. The use of ὅπου in classical Greek is confined to indefinite sentences, but the N. T. shows a frequent use (especially in John) [Page 970] where there is a definite antecedent.1 Cf. Jo. 1:28; 4:46; 7:42; 10:40; 12:1, etc.

5. TEMPORAL CLAUSES.

(a) Kin to Relative Clauses in Origin and Idiom. Blass2 bluntly says that temporal clauses introduced by ὅτε and ὅταν “are generally only a special class of relative sentence, and exhibit the same constructions.” The same thing is true of local sentences. Burton3 carries this conception to such a point that he has no separate treatment of temporal sentences at all. This is surely going too far. Thompson4 sees the matter rightly when he says: “The vague original relative import becomes specialized.” Hence we expect to find both definite and indefinite temporal clauses as with other relative (and local) clauses. Definite temporal clauses may be illustrated by Mt. 7:28, ὅτε ἐτέλεσεν ὁ Ἰησοῦς τοὺς λόγους τούτους, ἐξεπλήσσοντο οἱ ὄχλοι. The indefinite is shown in Jo. 15:26, ὅταν ἔλθῃ ὁ παράκλητος. The temporal clause may be indefinite in its futurity, frequency and duration.5 Indefinite futurity is the most common, indefinite duration the least common. The modes used in temporal clauses in the N. T. are the indicative and the subjunctive. These uses conform to the historical development of the two modes. There is one example of the optative in a temporal clause (Ac. 25:16, πρὸς οὖς ἀπεκρίθην ὅτι οὐκ ἔστιν ἔδος Ῥωμαίοις χαρίζεσθαι τινα ἀνθρώπον πρὶν ἢ ὁ κατηγορούμενος κατὰ πρόσωπον ἔχει τοὺς κατηγόρους τότον τε ἀπολογίας λάβῃ περὶ τοῦ ἐγκλήματος). Here, as is evident, the optative is due to indirect discourse, not to the temporal clause. The subjunctive with ἢ ἢ ἢ ἢ ἢ—λάβῃ occurs rather than the optative according to sequence of modes. This sequence was optional and a classic idiom, and so is found in the N. T. only in Luke’s writings. Observe that ἔστιν is retained in the indicative. This sentence is a fine illustration of the Greek subordinate clauses. In the context in Acts it is seen that four dependent clauses precede the πρὶν ἢ clause in the long sentence. The use of ἢ or ἢ ἦν in temporal clauses has very much the same history as in other relative clauses. The usage varies with different conjunctions and will be noted in each instance. The point of time in the temporal clause may be either past, present or future. It is a rather complicated matter, the Greek temporal clause, but not so much so as the Latin cum clause, “in which the Latin language [Page 971] is without a parallel.”1 The different constructions may be conveniently grouped for discussion. Just as the optative with temporal clauses vanished, so there came a retreat of various

2 Gr. of N. T. Gk., p. 218.
3 N. T. M. and T., pp. 118, 126 ff.
4 Synt. of Attic Gk., p. 329.
5 Ib., p. 328.
temporal conjunctions. As a result in the later Greek the construction is much simpler.\(^2\)

(b) Conjunctions Meaning ‘When.’ The classic use of the optative for repetition with such clauses has been effectually sidetracked in the vernacular κοινή (Radermacher, *N. T. Gr.*, p. 130). Only the ind. and subj. modes occur in these clauses. Ἐπεί has vanished\(^3\) in this sense, save in Lu. 7:1 where it is a variant (margin in W. H. and Nestle) for ἐπειδῆ, the correct text. Curiously enough this is also the only instance of the temporal use of ἐπειδῆ in the N. T., ἐπειδῆ ἐπλήρωσεν. It is a definite point of time in the past and naturally the indicative occurs. There are three examples of ἐπάν, all with the subjunctive (Mt. 2:8, ἐπάν εὐρήτε; Lu. 11:22, ἐπὰν νικήσῃ; 11:34, ἐπὰν ἥν where it is parallel with ὅταν ἥν). There are only two instances of ἡνίκα (2 Cor. 3:15, 16, ἡνίκα ὅν ἀνατινώσκεται, ἡνίκα ἐὰν ἐπιστρέψῃ). It is the indefinite idea as the subjunctive shows. Note ἐὰν and ἠλλὰ (indefinite also and with notion of repetition). Nestle (AEH) reads ὅποτε ἐπένασεν in Lu. 6:3, but W. H. and Souter (KBCD) have ὅτε. Ὅποταν does not occur in the N. T. Ὅτε and ὅταν are both common and in all parts of the N. T. The connection between ὅτε (cf. ὅ-θεν, Brugmann, *Griech. Gr.*, p. 254) and Homeric ὅτε and ὅς τε (Monro, *Hom. Gr.*, p. 191) is disputed.\(^4\) Cf. the conjunction ὅ from ὅς and ὅτι from ὅστις. Homer used ὅτε as a causal conjunction like ὅτι. Only the indicative (see below) mode appears with ὅτε in the N. T., but it occurs with past, present and future. Usually the events are definite, as in Mt. 21:1, ὅτε ἠγγίσαν εἰς Ἰεροσόλυμα. The present time is rare, as in ὅτε γέγονα δνήρ in 1 Cor. 13:11; ὅτε ξῆν in Heb. 9:17. In Mk. 11:1 ἐγγίζουσιν is the historic present. The great bulk of the examples are in the past with the aorist indicative, though the imperfect occurs for custom or repetition, as in Jo. 21:18; Col. 3:7. The future indicative is naturally indefinite even when ὅτε is preceded by a word like ὅρα (Jo. 4:21, 23) or ἡμέρα (Ro. 2:16. Incorporated in W. H.). Souter’s Rev. Text (so W. H.) has [Page 972] ἔως ἐπητο in Lu. 13:35, but Nestle still reads ἔως

---

Brugmann

**BRUGMANN, K.**, Elements of Comparative Grammar of the Indo-Germanic Languages (translation by Wright, 1895).

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).

The text is in much confusion, but at any rate here is manuscript evidence for the subjunctive with ὅτε without ἄν. This is in harmony with what we saw was true of ὃς and ὅστις. It is also a well-known Homeric idiom.1 Radermacher (N. T. Gr., p. 164) cites ὅτε ἔφηται (Vettius, pp. 106, 36). ὅταν naturally occurs more frequently with the subjunctive for indefinite future time. It is usually the aorist tense, as in Mt. 24:33, ὅταν Ἰδητε. The present subj. does occur when the notion of repetition is implied, as in Mt. 15:2, ὅταν ἄρτον ἐσθίωσαν. Cf. Mt. 6:2. Once the idea of duration seems manifest (Jo. 9:5, ὅταν ἐν τῷ κόσμῳ ὠ), but usually it is future uncertainty simply. It is not necessary to take the common aorist subj. here as the Latin futurum exactum.2 Cf. ὅταν παραδόθη in Mk. 4:29. The ὅν (ὅτε ὄν) is always present save in the doubtful ὅτε εἴπητε of Lu. 13:35. ὅτε with the subj. is found in poetry and in the Byzantine writers.3 So Test. XII Pat. Levi 2:10 ὅτε ἀνέλθης ἐκα. On the other hand a number of examples occur of ὅταν with the indicative (cf. ἐάν and ὅπου ἄν with the indicative). Homer, Iliad, 20, 335, has ὅτε κεν ἐξεμπλήσας αὐτῶ. So in Rev. 4:9 we find ὅταν δώσουσιν. The close affinity in form and meaning of the aorist subj. with the future indicative should cause no surprise at this idiom. In Lu. 13:28 BD read ὅταν ὄψεσθε, though W. H. put ἤψησθε in the text. A good many manuscripts likewise have ὅταν with the future ind. in Mt. 10:19 and 1 Tim. 5:11. Cf. ὅταν ἔσται in Clem., Cor. 2, 12, 1. Moulton (Prol., p. 168) notes in the papyri only a small number of examples of ἄν with temporal clauses and the ind. Thus ὅταν ἔρθην in Par. P. 26 (ii/b.c.); ἔδω ἐσπυρήμην in B. U. 424 (ii/iii A.D.); ὅταν ἤκοιεται in B. U. 607 (ii/A.D.). It is common in the LXX, Polybius, Strabo, etc. See Jannaris, Hist. Gk. Gr., p. 463; Radermacher, N. T. Gr., p. 164. Ramsay (Cit. and B., ii, p. 477, no. 343) gives ὅταν ἔζων ἐγὼ a “curious anti-Christian inscription” (Moulton, Prol., p. 239). A few instances occur of ὅταν with the present indicative. So ὅταν στήκετε in Mk. 11:25. Here4 some MSS. have the subj., as in Ro. 2:14 some read ὅταν ποιήσει. Cf. also various readings in Mk. 13:4, 7. This construction is not unknown in earlier writers, though more common in the κοινή. Cf. Ex. 1:16; Ps. 101:3; Prov. 1:22; Josephus, Ant., xii, 2, 3; Strabo, I, 1, 7; Act. Apocr., 126. In 2 Cor. 12:10, ὅταν ἀθεοῦ, we probably have the present subj. Cf. 1 Th. 3:8, ἄν στήκετε. The examples of ὅταν with the aorist or imperfect indicative are more numerous. In Thucydides ὅτε

Ramsay

RAMSAY, W. M., Cities and Bishoprics of Phrygia. 2 vols. (1895, 1897).

———, St. Paul the Traveller (1896).

was always definite and ὅταν with the optative appears in Xenophon.  

Agathias uses ὅταν with the aorist indicative. It is common in the Septuagint to have ὅταν with past tenses (Gen. 38:11; 1 Sam. 17:34, ὅταν ἤρχετο; Ps. 119:7, ὅταν ἔλλαλον; Num. 11:9; Ps. 118:32; Dan. 3:7). The usual notion is that of indefinite repetition. Thus we note it in Polybius 4, 32, 5, ὅταν μὲν οὐτοί ἦσαν, ἐγένετο τὸ δέον. Strabo I, 1, 7 ὅταν φησίν. Cf. also 13, 7, 10. In Tobit 7:11 observe ὅποτε ἔαν. In Mk. 3:11 we have ὅταν αὐτῷ ἔθερον, προσέπιπτον αὐτῷ. Cf. ὅπου ἄν and ὅσοι ἄν in Mk. 6:56. But the κοινή writers used ὅταν with the aorist indicative for a definite occurrence. This is common in the Byzantine writers. In the modern Greek ὅταν is freely used with the indicative. See Philo II, 112, 23, ὅταν εἰς ἐννοϊα ἠλθεν. Blass calls this quite incorrect, though the LXX has ὃς ἐξῆλθεν Ἰακώβ (Gen. 27:30; cf. 6:4) of “a single definite past action.” There are two examples in the N. T., Mk. 11:19, ὅταν ὑψε ἐγένετο, ἐξεπορεύοντο ἐξω τῆς πόλεως (possible to understand it as repetition), and Rev. 8:1, ὅταν ἤνοιξεν τὴν σφραγίδα τῆς πόλεως. But, as Moulton (Prol., p. 248) observes, it is possible to regard ἐξεπορεύοντο in Mk. 11:19 as pictorial rather than iterative and the papyri examples of ὅταν, as seen above, allow either usage. Simcox explains this “lapse” on the ground that Mark and the author of the Apocalypse are the least correct of the N. T. writers. But the idiom belonged to the vernacular κοινὴ ὃς ἀπεθάνομεν—ὁταν ἐκαθήσαμεν ἐπὶ τῶν λεβήτων καὶ ἠσθίουμεν ὅταν. See Ex. 16:3, ὃς ἀπεθάνει and ὅταν ἦσαν καὶ ἠσθίος ἄρτους.

Ὡς is rather common in the N. T. as a temporal conjunction. It is originally a relative adverb from ὃς and occurs in a variety of constructions. The temporal use is closely allied to the comparative. Cf. ὃς ἐλάλει μιμῶν ἐν τῇ ὄδῷ (Lu. 24:32). So Jo. 12:36. The temporal aspect is sharp in Mk. 9:21 where ὃς means ‘since.’ The examples in the N. T. are usually in the aorist or imperfect indicative as in Jo. 6:12, 16; Ac. 8:36 and chiefly refer to definite incidents. In 1 Cor. 12:2, ὃς ἂν ἠρέσθη, we

1 Winifred Warren, A Study of Conjunctional Temp. Clauses in Thucydides, 1897, p. 73. ὅταν is found twice in 1 Thuc. with the optative, but Miss Warren reads ὅποτε.

9 Lang. of the N. T., p. 111.
have the imperfect ind. with ἄν for the notion of repetition (cf. ὅταν). So in Aristeas 7, 34, ὦς ἄν ηὐξαντο. In modern Greek οὖν (from ὦς ἄν) is used for ‘when’ (Thumb, Handb., p. 192). The use of ὦς ἄν=‘as if’ is that of conditional, not modal, ἄν, and is very common in the papyri (Moulton, Prol., p. 167). See Conditions. As early as i/B.C. the papyri show examples of ὦς ἄν=ὅταν (originally ὦς ἄν=‘as soon as’). Cf. Radermacher, N. T. Gr., p. 164; Rhein. Mus., 1901, p. 206; Hib. P. I, 44, 45.

Radermacher (N. T. Gr., p. 164) gives ὦς ἄν οἶμαι, Dion. Hal. and Dio Chrys., ὦς ἄν ἰμεινον ἐδοξειν, Luc. Alex. 22. But ὦς is used a few times with the subjunctive, thrice with ἄν (Ro. 15:24; 1 Cor. 11:34; Ph. 2:23), once without ἄν (Gal. 6:10), ὦς καρδῶν ἐκθιμοῦν. In classical Greek this futurist subj. would have ἄν (Moulton, Prol., p. 248 f.). With the last construction compare Mk. 4:26. In the temporal use ὦς ἄν is not common in Attic. In Mk. 9:21 note πόσος χρόνος—ὡς. In Ac. 17:15 we have ὦς τάχιστα, a remnant of the rather frequent use of ὦς with superlative adverbs. It is possible that καθὼς has a temporal sense in Ac. 7:17 (cf. 2 Macc. 1:31).

(c) The Group Meaning ‘Until’ (‘While’). The words in this list have a more complex history than those in the preceding one. They are ἁχρι, μέχρι, ἔως and πρὶν, ἁχρὶ (twice in the N. T., ἁχρὶς, Gal. 3:19 and Heb. 3:13) is more frequently a preposition (cf. ἁχρὶς καροῦ, Lu. 4:13) than a conjunction. It is rare in Greek prose and ἁχρὶ ἄν only in poetry. But Philo (I, 166, 20) has ἁχρὶς ἄν—σβέσειε. But the simple conjunction is less frequent than the compound form (preposition and relative), as ἁχρὶ οὗ (Lu. 21:24) and ἁχρὶ ής ἠμέρας (Mt. 24:38). Sometimes the MSS. vary between ἁχρὶ, μέχρι, and ἔως, as in Mt. 13:30 (preposition). Cf. Ac. 1:22. Past tenses of the indicative are used of an actual historical event. No example of the simple ἁχρὶ appears [Page 975] in this construction in the N. T., but we have ἁχρὶ οὗ ἁνέση (Ac. 7:18) and ἁχρὶ ής ἠμέρας εἰσῆλθεν (Lu. 17:27). The only instance of the present ind. is in Heb. 3:13, ἁχρὶς οὗ τὸ σήμερον καλεῖται. Here the meaning is ‘so long’ (linear) or ‘while’ (cf. ἔως). The more common use is with reference to the indefinite future. In two instances (Rev. 17:17, ἁχρὶς τελεσθήσονται, and 2:25, ἁχρὶς οὗ ἄν ήξεο. This latter could be aorist subj.) the future indicative is read. Elsewhere we meet the

Thumb

———, Die greech. Sprache im Zeitalter des Hellenismus (1901).

1 Meisterh.-Schwyzer, Gr. d. attisch. Inschr., p. 251.
subjunctive, either without ἄν (συγκατάσχομεν in Rev. 7:3 and ἄχρι τελεθεὶν in 20:3, 5; ἄχρι οὗ ἔλθῃ in 1 Cor. 11:26; ἄχρι ἦς ἡμέρας γένεται in Lu. 1:20) or with ἄν (συγκατάσχομεν ἔλθῃ in Gal. 3:19, though W. H. put just ἄχρι οὗ in the margin). Here the time is relatively future to the principal verb προσετέθη, though it is secondary. The subj. is retained instead of the optative on the principle of indirect discourse. As a matter of fact ἄν occurs only twice, the other instance being Rev. 2:25 above. Cf. ἄχρι οὗ τίνα πληρώσῃ, O. P. 1107, 3 (v./A.D.). Μέχρι ἦς (so twice, Mk. 13:30; Gal. 4:19, and once μέχρι, Eph. 4:13) occurs only three times as a conjunction. In Eph. 4:13 it is μέχρι simply, in the other examples μέχρι οὗ. In all three instances the aorist subj. is used without ἄν for the indefinite future. The use as a preposition is more frequent. Cf. μέχρι Ἰωάνου (Lu. 16:16) and μέχρις αἵματος (Heb. 12:4). It means ‘up to the point of.’\(^1\) The κοινὴ writers show a rather varied use of μέχρι (cf. Diodorus, Strabo, Polybius, Josephus, Justin Martyr). They, like the papyri, have μέχρι and μέχρις οὗ with and without ἄν (Radermacher, N. T. Gr., p. 140). ἔως is much more frequent in the N. T. both as preposition (cf. ἔως οὕτων, Mt. 11:23) and as conjunction. The prepositional use is illustrated also in ἔως τοῦ ἔλθεν (Ac. 8:40). The prepositional use (more frequent than the conjunctional) goes back as far as Aristotle and denotes the terminus ad quem. ἔως is Attic for Homeric ἤς and Doric ὅς.\(^2\) As with ἄχρι and μέχρι, we find ἔως alone as a conjunction (Mt. 2:9), ἔως οὗ (Mt. 14:22) and ἔως ὅτου (5:25). It is used both with the indicative and the subjunctive. When an actual event is recorded in the past only the aorist indicative is used. This is the usual classic idiom.\(^3\) So ἔως ἤλθεν (Mt. 24:39), ἔως οὗ ἔτεκεν (1:25), ἔως ὅτου ἔφωνησαν (Jo. 9:18). When the present ind. appears with ἔως the notion is ‘while,’ not ‘until,’ and it is either a contemporaneous event, as in ἔως αὐτός ἐπαλύει τὸν δίχλον (Mk. 6:45). \[\text{Page 976}\] Note dependence on ἴνάγκασεν, like indirect discourse), or a lively proleptic future in terms of the present, as in ἔως ἔρχομαι πρόσεχε τῇ ἄναγκασε (1 Tim. 4:13) and in Jo. 21:22 f. It is possible to take Mk. 6:45 as this proleptic future.\(^1\) Indeed some MSS. here give also ἐπαλύει and –ει. In Mt. 14:22 the reading (in the parallel passage) is ἔως οὗ ἐπαλύσῃ. Cf. the construction with the Latin dum. In Lu. 19:13 W. H. read ἐν ὃ ἔρχομαι instead of ἔως ἔρχομαι. Instead of ἔως ἡμέρα ἐστίν (Jo. 9:4) W. H. have ὧς in the margin, though keeping ἔως in text (as does Nestle). If ἔως is

\(^1\) Brug., Griech. Gr., p. 563.
\(^2\) Ib., p. 200.
\(^3\) Burton, N. T. M. and T., p. 128. But the proper sense of the indic. is better as an expression of the fact. Radermacher, N. T. Gr., p. 140.

Nestle

———, Novum Testamentum Graece. 8th ed. (1910).

———, Septuagint (Hastings’ D. B., 1902).

genuine, it is clearly ‘while,’ not ‘until.’ In Jo. 12:35 f. W. H. read in the text ὡς, not ἐως. We have, besides, ἐως ὅτου ἐι in Mt. 5:25. Most of the examples of ἐως deal with the future and have only the subj. after the classic idiom. The future, being identical in form with the aorist subj., is possible in the cases of ἐως οὐ ἀνατέμψω (Ac. 25:21) and ἐως ὅτου σκάψω (Lu. 13:8), but the regular subj. is the probable idiom. In Lu. 13:35 some MSS. have ἐως ἥξει (see (b)), but W. H. reject ἥξει ὅτε. Both ἐως οὐ and ἐως ὅτου are used, but always without ὄν. So ἐως οὐ ἀνέλωσιν (Ac. 23:21) and ἐως ὅτου πληρωθῆ (Lu. 22:16). With simple ἐως it is more common to have ὄν. So ἐως δὲ ἂποδῷς (Mt. 5:26), but note ἐως ἔλθῃ (10:23). Ἄν is not essential in this construction. Cf. Lu. 12:59; 15:4; 22:34. In Mk. 14:32, ἐως προσεύξωσαι, the notion is rather ‘while’ than ‘until.’ Cf. Mt. 14:22; 26:36; Lu. 17:8. But the note of expectancy suits the subjunctive. In Mt. 18:30, ἐβαλεν αὐτὸν εἰς φυλακῆ ἐως ἂποδῶ τὸ ὄφειλόμενον, the subj. is retained after secondary tense of the indicative as in indirect discourse. ἐως occurs after negative verbs also (cf. πρίν), as in Lu. 22:34. Moulton (Prol., p. 169) quotes Tb. 6 (ii/b.c.) ἐως μένωσιν, G. H. 38 (i/b.c.) ἐως καταβῆς. In the papyri ὄν, as in the N. T., is often absent from these conjunctions meaning ‘until.’ Radermacher (N. T. Gr., p. 140) finds ἐως and the subj. common in the papyri, the inscrs. and the κοινή writers. Blass thinks he sees a certain affinity with final sentences in the subj. with these conjunctions for the future indefinite. At any rate it is good Attic and should cause no trouble. The κοινή fully agrees with the ancient idiom. It is, of course, a matter of taste with the writer whether he will regard a future event as a present reality or a future uncertainty to be hoped for and attained.

Πρίν is a comparative form (cf. superlative πρῶτος) like the Latin prius. It is the neuter accusative singular. It is really the same in idea as πρῶτερον, ‘before,’ ‘formerly.’ Pindar uses it as a preposition with the ablative πρίν ὄρας=πρὸ ὄρας. The original construction with πρίν was the infinitive, though the subj. and the optative occur with it in Homer. Homer has it 81 times with the infinitive, 6 with the subj., once with the opt. and not at all with the indicative. The word developed so much importance in the later Greek that Goodwin in his Moods and Tenses gives it a separate extensive discussion (pp. 240–254). In the N. T. there are only fourteen examples of it and all of them in the Gospels and Acts. Eleven of the fourteen are with the infinitive (cf. Homer). Cf. πρίν ἄρπασαν (Jo. 4:49), πρίν Ἀβραὰμ γενέσθαι (8:58). Six times we have πρὶν ἂ, as in Mt. 1:18. Luke alone uses the classic idiom of πρίν with the subj. or opt. after negative sentences. In both instances it is only relative future after secondary tenses, but in Lu. 2:26, μὴ ἰδεῖν θάνατον πρὶν [ἡ] δὲ ἦν τὸν τὸν

Goodwin

GOODWIN, W. W., Greek Grammar. Various editions.

(d) Some Nominal and Prepositional Phrases. We have already seen in the case of έχρι, μέχρι and έξος how they occur with relative pronouns as conjunctural phrases. The same thing occurs with a number of temporal phrases. Thus άφο οῦ. In Lu. 13:7 άφο οῦ is preceded by τρία έτη as the terminus a quo. It [Page 978] means ‘since.’ Cf. τρίτην ταύτην ήμεραν ήγει άφο οῦ in Lu. 24:21. In Rev. 16:18 it is the simple equivalent of άπό τούτου άτε as in the Attic Greek and Herodotus. In these examples the indicative occurs, but in Lu. 13:25, άφο οῦ άν γροφή, the construction of έξος is used for the uncertain future, the subj. with άν. The conception of άπό τούτου άτε has to be appealed to, ‘from that moment when,’ ‘when once’ the master arises. In like manner we see άφο ἓς used for ‘since’ in Lu. 7:45; Ac. 24:11; 2 Pet. 3:4. In Col. 1:6, 9 we have the form άφο ἓς ήμέρας. έν άν is not always temporal. It may be merely local (Ro. 2:1), instrumental (Ro. 14:21) or causal (Ro. 8:3). The temporal use is much like έξος in the sense of ‘while,’ as in Mk. 2:19 (Lu. 5:34) έν άν νομφίος μετ αύτών έστιν. Cf. Jo. 5:7, έν άν έργομαι with έξος έργομαι in Jo. 21:22. In Lu. 19:13 the Text. Rec. has έξος έργομαι, but έν άν is the true reading. In 1 Pet. 1:6 έν άν has its antecedent expressed in the preceding sentence and means ‘wherein.’ In Mk. 2:19 we see ἰδον χρόνον for duration of time. In Mt. 9:15 the shorter άφο άνθον occurs, while in Heb. 10:37 note ἰδον ἰδον (a Hebraism from the LXX, though paralleled in the papyri). In Ro. 7:1 we read άφο άνθον χρόνον, the fullest form of all. Moulton (Prol., p. 169) cites C.P.R. 24, 25 (ii/A.D.) άφο άν άνθον (note absence of άν)

(e) The Temporal Use of the Infinitive. There are nine examples of πρό τοῦ and the infinitive. In the LXX there are 35 examples (Votaw, The Infinitive in Bibl. Gk., p. 20). These examples all have the accusative with the infinitive, as in πρό τοῦ άμαχς αύτήσα αύτόν (Mt. 6:8. Cf. Lu. 2:21; 22:15; Jo. 1:48 f.; 17:5; Ac. 23:15; Gal. 2:12; 3:23), except Jo. 13:19, πρό τοῦ γενέσθαι, but even here it is implied. The tense is aorist except a present in Jo. 17:5. The sense is quite like πρίν (see before). The inscriptions (Moulton, Prol., p. 214) show scattered examples of πρό τοῦ and inf. The use of έν τῷ as ‘when’ or ‘while’ is much more common. It occurs only 6 times in

5 Moulton, Prol., p. 169 note.
Thucydides, Plato 26 times, Xenophon 16 times. But it is very common in the Septuagint as a translation of the Hebrew מ and the infinitive construct. Moulton admits a Hebraism here in the sense of ‘during,’ a meaning not found in the vernacular κοινή so far. The construction is, however, very common in Luke, the most literary of the N. T. writers, and in all parts of his Gospel. It is found both in the sense of ‘while’ and ‘when.’ Usually it is the present tense that has the notion of ‘while’ and the aorist that of ‘when.’ So in Lu. 1:8 note ἐν τῷ ἱερατεύειν αὐτόν, (2:27) ἐν τῷ εἰσάγαγέν τοῦ γονέως τῷ παιδίον Ἰησοῦν. The examples are numerous (55 in the N. T.), but the LXX shows 500 instances, undoubted proof of the influence of the Hebrew there, where it is nearly as common as all other prepositions with the infinitive. This use of ἐν τῷ and the infinitive is not always temporal. In Lu. 12:15 it is rather the content than the time that is meant. In Lu. 1:21 it may be causal. Μετὰ τό and the infinitive we find fifteen times in the N. T. In the LXX the construction appears 108 times according to Votaw. It has the resultant meaning of ‘after’ and always has the aorist infinitive except the perfect in Heb. 10:15. It is found in Luke, Paul, Matthew, Mark, Hebrews, and chiefly in Luke. A good example is found in μετὰ τό ὄποκτεναι (Lu. 12:5). See also Ac. 7:4; 10:41. Mention should also be made of ἐξ τοῦ ἔλθεν in Ac. 8:40, as in the LXX (Judith 1:10; 11:19). It occurs 52 times in the O. T. and 16 in the Apocrypha. But note μέχρι τοῦ πλείου, P. B. M. 854 (i/A.D.). On prepositions and inf. see Verbal Nouns.

(f) Temporal Use of the Participle. This subject will demand more extended treatment under the head of the Participle (Verbal Nouns). Here it may be noted that the participle does not of itself express time. We may in translation render the participle by a temporal clause with ‘as,’ ‘while,’ ‘since,’ ‘when,’ ‘after,’ etc., like the Latin cum. As a rule the unadorned participle in English is enough to bring out the idea. The participle may be co-ordinated in translation with the principal verb by the use of ‘and.’ The present participle is merely descriptive and contemporaneous, as ἀποθνήσκων (Heb. 11:21). The aorist participle has either simultaneous action, as ἀσπασάμενοι (Ac. 25:13), or antecedent, as ἐμβάντα (Mt. 13:2). The wealth of participles gave the Greek a great advantage over the Latin in this matter. In the flourishing period of the language the temporal participle vied with the conjunctions in the expression of temporal relations. In the κοινή this use of the participle is still quite live, as almost any page of the N. T. shows, though it has manifestly in places shrunk before the analytic tendency to use conjunctions and finite verbs. This tendency to use conjunctions is still more noticeable in modern Greek.

[Page 980] 6. FINAL AND CONSECUTIVE CLAUSES.

(a) Kinship. It is a difficult matter to correlate properly these subordinate clauses. They nearly all have relative adverbs as conjunctions. Often the same conjunction is

4 Jebb in V. and D.’s Handb., p. 333.
used indifferently in a number of different kinds of clauses. So ὡς in comparative, declarative, causal, temporal, final, consecutive, indirect interrogative, exclamatory. In like manner ὅπως has a varied use. Cf. the Latin ut, which is comparative, final, apprehensive, consecutive. The English that and German daß have a like history. Goodwin,¹ therefore, treats “final and object-clauses” together as pure final clauses, object-clauses with verbs of care and effort, clauses with verbs of fearing. He gives a separate discussion of consecutive clauses.² Burton³ practically follows Goodwin. Viteau⁴ blends them all into one. Winer practically ignores consecutive clauses. Jannaris⁵ pointedly says that the popular speech “avoids the consecutive construction” and uses ὡςτε and the infinitive for either final or consecutive (cf. Latin ut and English that) “thus confounding consecutive with final clauses.” It was not quite that. As a matter of fact the various points of view shade off into one another very easily and sometimes quite imperceptibly. It is not always easy to distinguish purpose and result in the mind of the writer or speaker. The very word finis may be the end aimed at (purpose) or attained (result). My colleague, Prof. W. O. Carver, D.D., has suggested grouping these ideas all under result, either contemplated, feared or attained. Some such idea is near the true analysis and synthesis. The later Greek showed a tendency to gather most of these ideas under ἱνα.⁶

(b) Origin in Parataxis. It seems clear that these final clauses had their origin in parataxis, not hypotaxis. The conjunctions, when used, were an after-development. The step from parataxis to hypotaxis has already been taken when we meet the Greek of Homer,⁷ though the paratactic construction continued side by side in isolated instances. Examples like ὅφες ἐκβάλω (Lu. 6:42), βούλεσθε ἀπολύσω; (Jo. 18:39), θέλεις ἑτοίµασων (Mk. 14:12) are probably instances of this original idiom rather than of a mere ellipsis of ἱνα.⁸ Cf. also the possible origin of οὐ μή as οὐ· μή. This disconnected idiom was felt to be especially bare in the positive form, but the negative paratactic construction with μή with verbs of fearing is present in Homer.¹ Gildersleeve² quaintly says: “Parataxis, which used to be thrust into the

background, has come forward and claimed its rights.” This grammatical sage, barring the infinitive and participle, adds: “Nihil est in hypotaxi quod non prius fuerit in parataxi.” The subjunctive, therefore, in final clauses is merely the volitive subj. of parataxis. It was natural that the parataxis should be plainer in negative sentences, for alongside of μη (originally the mere negative in parataxis and the negative conjunction in hypotaxis) there came ἵνα μη, δπω μη. The whole matter is carefully worked out by Weber with careful discussion of each construction in the various writers during the long course of Greek linguistic history from Homer through the Attic writers.

(c) Pure Final Clauses. Here conscious purpose is expressed. This class constitutes the bulk of the examples and they are the easiest to understand. The Greek is rich in variety of construction for this idea. We can deal only with the idioms in the N. T. Ὄφρα is not in the N. T. or LXX, nor is the idiom of ὅπως with the future indicative after verbs of striving.

(a) ἵνα. The etymology of ἵνα is not certain. A fragment of Hesiod has ἵν εὐτῷ. Perhaps ἵ-α is derived from this form. But at any rate in Homer ἵνα=ἐκεῖ in Iliad, 10, 127. After Homer, especially in the poets, it has the meaning ‘where,’ ‘in what place,’ ‘whither.’ The exact connection between this local demonstrative and relative sense and the final ‘that’ (ut) is not clear. But we have a similar transition in the Latin ut, English that, German daß. Sophocles in his Lexicon of the Roman and Byzantine Periods gives nineteen uses of ἵνα for the Greek of that era. They may all be whittled down to three, viz. the pure final, the object-clauses or sub-final, the consecutive. There is no doubt that ἵνα came to be used in all these ways in the Byzantine period. In the κοινή of the N. T. time the first two are abundantly shown. The ecbatic or consecutive use is debatable in the N. T. But each in its order. Curiously enough the Attic inscriptions make a very sparing use [Page 982] of ἵνα, much preferring δπω and ὅπως ἄν. So in epic and lyric poetry ἵνα is overshadowed by Ὄφρα and in tragedy by ὡς, though Aristophanes uses it in three-fourths of his final sentences and Plato and the Attic orators use it almost exclusively (Goodwin, Moods and Tenses, p. 109). The original use of ἵνα, after the demonstrative and the relative stage, was the pure

1 Meisterh.-Schw., p. 253 f.
final. It is so in Homer, though Monro admits one instance of the object-clause. Only the subj. occurs with it in Homer in this construction. This is the natural mode for the expectant note in clauses of purpose. But it must not be overlooked that ἵνα in no way controls the mode, for the idiom is at bottom paratactic in origin. But the indicative had a use also as well as the optative, as will presently be shown. A word further is needed concerning the tremendous development in the use of ἵνα.

Thucydides used ὅπως three times as often as ἵνα, and ὡς as a final particle only twice. Xenophon in the first three books of the Anabasis has ὅπως one and a half times as often as ἵνα, and ὡς nearly as often as ἵνα. But Polybius (books I–V) uses ἵνα exclusively, and the N. T. has ἵνα about twelve times as often as ὅπως, and ὡς perhaps once. It is thus not simply that ἵνα displaced ὅπως and ὡς, but it gradually usurped the final use of the infinitive also. It comes to be almost the exclusive means of expressing purpose, and in the modern Greek vernacular every phase of the subj. and the old future ind. can be expressed by νά (ἵνα) and the subj. Nά is used also with the ind. The intention in modern Greek is brought out a bit more sharply by γάρ νά (Thumb, Handb., p. 197). But the distinction is sometimes faint. All in all it is one of the most remarkable developments in the Greek tongue. The eight and a half pages of examples in Moulton and Geden’s Concordanza bear eloquent testimony to the triumph of ἵνα in the N. T. Nearly a page and a half of these examples are in the Gospel of John. But we are now specifically concerned with the pure final use of ἵνα. Here ἵνα is in the accusative case of general reference. Thus in ἔλθω δεῦ ἵνα μάθω (cf. veni ut discam, ‘I am come that I may learn’) ἵνα is really a demonstrative. ‘I am come as to this,’ viz. ‘I may learn.’ The conjunction is supplied to avoid the asyndeton and is in apposition with μάθω. As already explained, the subj. is the predominant mode, as in τοῦτο δεῦ δολον γέγονεν ἵνα πληρωθῇ (Mt. 1:22). Cf. Ph. 3:8. The negative with ἵνα is μη, as in ἵνα μη κρίθη (Mt. 7:1). The aorist subj. is the normal tense, of course, as in ἵνα μεταδῷ (Ro. 1:11), though the present occurs to denote a continuous action, as in ἵνα πιστεύῃ (Jo. 13:19). Cf. ἵνα γνώτε καὶ γνῶσκετε (Jo. 10:38). The perfect subj. occurs in εἴδω, as ἵνα εἴδης (1 Tim. 3:15); ἵνα εἶδὼμεν (1 Cor. 2:12); ἵνα εἴδητε (1 Jo. 5:13). Cf. also Jo. 17:19, 23; 1 Cor. 1:10; 2 Cor. 1:9 (ἵνα μη πεποιθήτε ὦ μεν); ἵνα παρεκκλησισθήτω ἢτε (2 Cor. 9:3). The subj. is regularly retained after a secondary tense of the indicative as in ἄνέβη ἵνα ἔθη (Lu. 19:4); ἐπέτιμησεν ἵνα μηδὲν εἴποσιν (Mt. 16:20). Cf. Mk. 8:6. There is no instance in the N. T. of the optative used with ἵνα after a secondary tense of the indicative. It is true that W. H. read ἵνα δώῃ in the text of Eph. 1:17 (ἵνα δώῃ or δῷ in the margin), but this is after a primary tense, ἐὰν παύῃ. It is the volitive use of the optative and is not due to ἵνα. It is like the optative in a future wish. This use of the opt. with ἵνα after a wish is not unknown to classic Greek. It is the subj., not the opt., that is seen in ἵνα πληρωθήσεται (Col. 4:17), ἵνα παραδοθῇ (Mk. 14:10) and in the sub-final ἵνα γνωτὶ (Mk. 9:30).

3 On the sparing use of the opt. with final sentences in late Gk. see the tables in Diel, De enuntiatis finalibus apud Graecarum rerum scriptores posterioris aetatis, 1894, pp.
final clauses after secondary tenses, but in the Attic orators the two modes (subj. and opt.) are on a par in such a construction, while Thucydides prefers the subj., though Xenophon is just the reverse. In the N. T. the optative in final clauses after secondary tenses is non-existent. In 2 Tim. 2:25 μὴ ποτὲ δῷ is after a primary tense as in Eph. 1:17, and here again the text is uncertain (cf. δώῃ in margin and ἀνανήψωσιν in text.) The Atticists (Arrian, Appian, Herodian, 4th Macc., Plutarch) made a point of the opt. with ἵνα as “the hallmark of a pretty Attic style” (Moulton, Prol., p. 197). The N. T. writers, more like Diodorus and Polybius, fail “to rival the littérateurs in the use of this resuscitated elegance.” Moulton speaks also of “the [Page 984] riot of optatives” in the artificial Byzantine writers. On the whole subject of final clauses see Gildersleeve on “The Final Sentence in Greek,” 1883, p. 419, A. J. of Philol., IV, pp. 416 ff., VI, pp. 53 ff. There is no trouble to find in the papyri, inscr. and κοινὴ writers generally abundant examples of ἵνα and the subj. in pure design (Radermacher, N. T. Gr., p. 138). But while the subj. is the normal construction, the indicative is also present. In classical Greek ἵνα was not used with the future ind. It was not common even with ὧς, ὧς and μὴ. The similarity in form and sense (not to mention itacism of –η and –ει) made the change very easy and, indeed, the text is not always certain as between the aorist subj. and the future ind. Thus in 1 Cor. 13:3 ἵνα καυχήσωμαι is supported by ΝAB, ἵνα καυθήσωμαι by CK and ἵνα καυθήσομαι by late documents.

In Gal. 2:4 the best documents have ἵνα καταδουλώσουσιν instead of –ωσιν. In Jo. 17:2 the MSS. vary between ἵνα δώσει and δόσῃ. So in Jo. 15:8 note ἵνα φέρητε καὶ γένηθε (γενήσατε in margin of W. H.); Eph. 6:3, ἵνα γενήσατε καὶ έξης. But the idiom is well established in the N. T., especially in the Apocalypse. Thus ἵνα θεωρῆσουσιν (Jo. 7:3); ἵνα ξηρῆσονται (Ac. 21:24); ἵνα έρεί (Lu. 14:10); ἵνα θήσο (1 Cor. 9:18); ἵνα δώσουσιν (Lu. 20:10); ἵνα κανόνισαι (1 Cor. 9:15); ἵνα κερδηθήσονται (1 Pet. 3:1); ἵνα σφάξουσιν (Rev. 6:4); ἵνα δώσει (8:3); ἵνα ἠξιωσιν—γνώσιν (3:9); ἵνα ἔσται καὶ εἰσέλθωσιν (22:14), etc. This last example may be non-final. In some of these examples the subj. and ind. future occur side by side. In Mk. 6:56 and Ac. 5:15 note ἵνα καὶ (only instances of ἤν with ἵνα in the N. T.). This is not modal ἤν, but κἂν as ‘even’=καί (Jannaris, Hist. Gk. Gr., p. 165; Moulton, Prol., p. 167). In Rev. 13:15 the MSS. vary between ἵνα ποιήσῃ and –ει, and in 16 between ἵνα δώσιν and δῶσα (ποιεῖ ἵνα sub-final). The usage is thus on a firm foundation in the N. T. It is in the LXX also. See ἵνα ἔσται in Lev. 10:6 and in other writers of the κοινὴ (Iren., 584 A, ἵνα ἔσῃ). But ἵνα occurs also with the present ind. This is a rare construction in the N. T. and is not a classic idiom. It occurs only three times in the N. T. Thayer calls it “a

---

20 ff. See also Radermacher, N. T. Gr., p. 132. Moulton (Prol., p. 197) notes how the Atticists revelled in the opt. with ἵνα, ὧς, ὧς. Josephus has 32 per cent. opts., Plut. 49 (Lives), Arrian 82, Appian 87! Polyb. has only 7, Diodorus 5. These are true κοινὴ literati. Moulton finds only one pap. of this period with opt. with ἵνα, O. P. 237 (late ii/ii A.D.), ἵνα—ἀνακηρυξαν. In iii/ii A.D. he notes L.Pw., ἵνα —εἰ in primary sequence.

Tb. 1 (ii/ii B.C.) actually has ἡξίωσις χρηματισθήσοιτο.

2 Approved by Blass, Gr. of N. T. Gk., p. 212.

3 Moulton, Prol., p. 35.

Thayer
solecism frequent in the eccl. and Byzantine writers.” It is so common in late writers as not to surprise us in the N. T. Thus 1 Cor. 4:6 ἵνα μὴ φυσιώσῃ, Gal. 4:17 ἵνα ζηλοῦτε and 1 Jo. 5:20 ἵνα γνώσκομεν. The first two are possible subjunctives. W. H. read ἵνα μήτις δόναται in the margin of Rev. 13:17, and various MSS. support the present ind. with ἵνα in Jo. 4:15; 5:20; 17:3; Gal. 6:12; 1 Th. 4:13; Tit. 2:4; 2 Pet. 1:10; Rev. 12:6. In the earlier Greek writers we do find ἵνα used with past tenses of the indicative. The idea was to show that the purpose was dependent on an unfulfilled wish or unattained action. But this refinement does not appear in the N. T. except in two examples with μὴ ποις. With all the wide extension of ἵνα in Western Hellenistic, at the heart of it there is the pure telic idiom. ἵνα with the imperative in 1 Cor. 1:31 is due, of course, to the quotation. ἵνα is repeated three times in 2 Cor. 12:7. In Jo. 11:37, ποιῆσαι ἵνα καὶ οὖς μὴ ἀποθάνῃ, one is reminded of the Latin facere ut (sub-final). Westcott (Hebrews, p. 342 f.) gives a list of all the examples of ἵνα in the Epistle (20). Only two of ὅπως.

(β) ὅπως. It is compounded of the neuter accusative relative ὅ and the indefinite adverb πῶς. It occurs in indirect questions as in Lu. 24:20 in the sense of ‘how,’ the usual interrogative sense, and note article also as in τὸ πῶς (Lu. 22:2). ὅπως in a sense is the connecting link between the various kinds of final sentences. Thucydides and Xenophon preferred ὅπως to ἵνα, and Aristotle has ἵνα only a few times (W. Schmid, Atticismus, III, p. 87). Polybius does not use ὅπως at all in books I–V. The N. T. has ἵνα 493 times, ὅπως 52 (Jannaris, p. 417) as far as Colossians. Scott counts ἵνα 746 times in text of W. H. (not including 6 of ἵνα τί–) and 58 of ὅπως. Thumb does not give ὅπως as a final particle in modern Greek (Handb., p. 197). Even in later Greek ὅπως was a sign of literary affectation. As already noted, in the fourth and fifth centuries B.C. ὅπως was quite the rule in the Attic inscriptions. It is rare in Homer and never has κέ or ἄν in pure final clauses in the Homeric language. This idiom with ἄν first appears in Æschylus. In the great Attic writers and the Attic inscriptions the subjunctive, the future indicative and the optative after secondary tenses, all are found. The future indicative occurred chiefly with verbs of striving,

though sometimes in pure final clauses. 9 The negative with this future indicative was μή (ὅπως μή), though no example [Page 986] occurs in the N. T. Moulton (Prol., p. 177 note) finds in the papyri a few survivals of ὅπως μή and the fut. ind., though mostly ousted by ἵνα μή. Cf. Hb. P. 45, 60, 168 (iii/b.c.), Tb. P. 414 (ii/a.d.). Stahl (Syntax, p. 360) calls ὅπως μή and fut. ind. Attic. In the N. T. the optative does not occur in this construction. In the Atticists it is revived as with ἵνα. 1 The fut. ind. with ὅπως in pure final clauses has practically vanished from the N. T. The one example in Ro. 3:4, ὅπως ἀν ἀκολουθήσει καὶ νικήσεις, is a quotation from the LXX (Ps. 51:6), but changed from subj. there. But ὅπως θαυματοσύνην is a variant reading in Mt. 26:59, and the future ind. is possible in Mt. 2:8, ὅπως προσκυνήσω, though it is probably the aorist subj. Other variant readings where the future ind. is supported with ὅπως are 1 Cor. 1:29, καυχήσεται, and Mk. 5:23, ὅπως ζήσεται (here W. H. read ἵνα ζήσῃ). But at any rate the use of the future ind. with ὅπως in pure final clauses is not quite dead in the N. T. period, though surely dying. Elsewhere the aorist subj. alone occurs save in Lu. 16:26 (bis), 28 and Mt. 6:4. ὅπως no longer 2 has ἦν in final clauses save in the quotation from Ps. 51:6 (Ro. 3:4) and three passages in Luke’s writings (Lu. 2:35 ὅπως ἀν ὑποκαλυφθήσειν τίτ. 3:19 f. ὅπως ἦν ἐλθόσων—καὶ ὄποστείλη, 15:17 ὅπως ἦν ἐκζητήσωσιν from Amos (so A, but B without ἦν) 9:12). ἦν is a variant reading in Mt. 6:5 and is found often in the LXX. Radermacher (N. T. Gr., p. 158) finds ὅπως ἦν in Diodorus XIV, 80, 8, Aristeias, § 239, inscr. of Halicarnassus (iii/b.c.), Jahrb. d. Öst. Inst. XI, 56. But it is rare and ὅπως steps into the background before ἵνα. The revival of ὅπως in the third and fourth cent. a.d. was Atticistic and did not affect the vernacular. The inscriptions and the papyri for the first century a.d. show the prevalence of ἵνα over ὅπως (Radermacher, N. T. Gr., p. 157 note). The negative is, of course, always μή, as in Ac. 20:16, ὅπως μή γένηται. The subj. is used indifferently after primary tenses (Mt. 6:2, ποιῶσιν ὅπως δοξασθῇσιν) and secondary tenses (Ac. 9:24, παρετηροῦντο ὅπως αὐτὸν ἄνεξάνωσιν). Cf. Ro. 9:17. It is interesting to note that in the N. T. ὅπως is almost confined to Matthew and Luke’s writings. The literary flavour of Luke explains his use of the idiom, but we do not look for literary ear-marks in Matthew. The one example in John (11:57) occurs side by side with ἵνα (ἵνα μηνύσῃ, ὅπως πώσωσιν and may be used for the sake of variety as in ἵνα γένηται ὅπως γένηται (2 Cor. 8:14). Cf. also Lu. 16:28; [Page 987] 1 Cor. 1:29; 2 Th. 1:12, though ἵνα—ἵνα appear in 1 Cor. 4:6; Gal. 4:5. 1 In 1 Cor. 1:17 note ἵνα μή and ὅπως μή in 1:29. ἵνα has “invaded the territory of ὅπως, as with φροντίζειν and σπουδάζειν” (Moulton, Prol., p. 206). In modern Greek ὅπως has lost all telic force (Thumb, Handb., p. 198). Sometimes ὅπως represents the main purpose and the infinitive the subordinate purpose, a construction amply illustrated in the papyri. 2 So then, though ὅπως as a pure final conjunction is disappearing in the N. T., it yet occurs with the same concept on the whole.

2 Blass, Gr. of N. T. Gk., p. 211.
1 Ib.
2 Moulton, Prol., p. 220.
(γ) Οὐς. It was not a favourite final particle with Thucydides (only twice), though Xenophon used it nearly as much as Ἰνα. It is not surprising to find only one instance of it in the N. T. and that one not certain. ΝΒ read ὦς τελείωσω in Ac. 20:24 instead of ὦς τελείωσα (cf. Lu. 9:52). W. H. and Nestle read τελείωσω, but Souter (Rev. V.) gives τελείωσα. It is the last leaf on the tree and a fluttering one at that. The form could be the future ind. or aorist subj. Radermacher (N. T. Gr., p. 158) finds final ὦς merely a reminiscence in the κοινή, but it is needless to cite Mk. 4:26 f., ὦς ὅνθρωπος βάλη, since this is not final at all, but comparison. On ὦς ὅν in final sentences see Schmidt, Joseph. eloc. (1894). The Attic diction.

(δ) Μή, μή ποτε, μή πώς. Negative purpose is expressed by Ἰνα μή, ὅπως μή also, but originally it was done merely by μή in a paratactic sentence. In Homer and the early writers μή is far in excess of Ἰνα μή, ὅπως μή, but in Aristophanes and Herodotus the reverse is true, while in Plato and Xenophon μή as a final conjunction has about gone. It is rare in the Attic historians and orators generally. Originally a negative adverb (subjective negative) it came to be used also as a conjunction. Cf. Latin ne. The idiom μή οὖ appears in Homer in a few final clauses, and after Homer μή οὖ is used with verbs of fearing. In the N. T. Ἰνα μή (1 Cor. 1:17) and ὅπως μή (1:29) have the run over the conjunction μή. Only the subj. is used, though in Ac. 27:42 μή τίς διαφύγει is a variant reading, but διαφύγη μή is correct after the secondary tense of the ind. In Mk. 13:36, μή εὔρη, a primary tense occurs in the principal verb. In Col. 2:4 W. H. read Ἰνα μὴ διείσει [Page 988] παράλογός τι τοῦτο instead of μή τίς (the variant reading). See also μή τίς λογίσται (2 Cor. 12:6). Both μή and μῆ πῶς are preserved as final conjunctions in the modern Greek (Thumb, Handb., p. 198). The use of μή ποτε and μῆ πῶς is practically the same. Μῆ πῶς appears with the subj. (Paul) after secondary and primary tenses. So ἔπεμψα μῆ πῶς κατασκονθώμεν (2 Cor. 9:3 f. Note also Ἰνα μή in 9:3, 4) and μῆ πῶς γένομαι (1 Cor. 9:27). In Gal. 2:2 (μῆ πῶς ἔδραμον) and 1 Th. 3:5 (μῆ πῶς ἐπείρασεν) we have a difficult construction. One view is to take it as an indirect question. This is possible in Gal. 2:2, but not in 1 Th. 3:5. Even in Gal. 2:2 there would be an ellipsis of a participle like ζητῶν μαθεῖν. Moulton (ProL., p. 201) suggests that ἔδραμον as an “after-thought” in Gal. 2:2 has plenty of classical parallels. Cf. Goodwin, Moods and Tenses, § 333. In 1 Th. 3:5 we have μῆ πῶς ἐπείρασεν καὶ γένηται side by side. It is better therefore to take τρέχω in Gal. 2:2 as subj. also. Thus in both examples we have the subj. and the aorist ind. This is in accord with the ancient idiom where in pure final sentences a past tense of the ind. was used if it is distinctly implied that the purpose was not attained. That is precisely the case here. Paul did not run in vain. The tempter did not succeed with the Thessalonians. It is thus unfulfilled purpose that Paul neatly expresses in accord with the Attic diction. Μῆ ποτε loses the notion of time in ποτε and has rather the idea of

Schmidt SCHMIDT, W., De Flavii Josephi elocutione (1894).
3 Goodwin, M. and T., pp. 107, 112.
4 Ib., p. 112.
5 Ib., p. 107.
1 Goodwin, M. and T., p. 120 f.
contingency, ‘but per chance’ rather than ‘lest at any time.’ Radermacher (N. T. Gr., p. 158) thinks that ποτέ and πάω often distinguish deliberative (dubitative) from final μή. As a strictly final particle it occurs either with the subj. or the future ind., though the subj. is more common. For the fut. ind. note Mt. 7:6 μή ποτέ καταπατήσουσιν (correct text, though the aorist subj. has support), Mk. 14:2 μή ποτε ἔσται. In Lu. 12:58 note μή ποτε καταστρφη καὶ ἀποδόσα. Both subj. and fut. ind. likewise occur in Mt. 13:15 (Ac. 28:27) μή ποτε ἔσται—καὶ ἱάσομαι (LXX, Is. 6:10). So also in Lu. 14:8 f., μή ποτε ἵ κεκλημένος (note perfect subj.) καὶ ἔρει (cf. ἵνα ἔρει in verse 10).

The normal subj. is seen in Lu. 14:12, μή ποτε ἀντικαλέσωσιν. The opt. in the N. T. is wanting in final sentences as in cases of repetition (Radermacher, N. T. Gr., p. 131). W. H. read μή ποτε δὖν (opt.) in 2 Tim. 2:25. But even so, if true, it is not a pure final clause but a kind of indirect question as in Lu. 3:15, only in 2 Tim. 2:25 the opt. occurs after a primary tense. It is hardly just to say [Page 989] with Moulton1 that here Paul “misused an obsolete idiom,” since the opt. after primary tenses occurs occasionally with ἵνα in the papyri.2 Cf. μή ποτε αὐτόν χρεία γένοιτο, εὐθέως αὐτοῦς ἔξελασον, P. Oxy. I, 118, 38. But it is more than likely, as Moulton argues, that in 2 Tim. 2:25 we should read subj. δόῃ, since ἀνανήψωσιν undoubtedly is subj. The epic δόῃ is supported by ἐὰν γνῶῃ, Clem., Paed., III, 1. (Moulton, ProL, p. 193.)

(c) Relative Clauses. This construction in the earlier Greek, like the Latin, had either the subj. or the opt. The Attic added the future ind. which largely displaced the subj. and the opt.3 The N. T. follows the Attic use of the fut. ind. Cf. ὁτινες ἀποδόσασι (Mt. 21:41); ὁς καταστήσαμεν (Ac. 6:3). See 1 Cor. 4:17, δς ἀναμνήσας. Blass4 explains the occasional return to the subj. as due to ἵνα. See ὅποιον φάγω (Mt. 14:14); παρὰ ὅς ἔγινομαι (Ac. 21:16); ὅς προσενέγκη (Heb. 8:3); δι´ ἵς λατρεύωμεν (12:28). Radermacher (N. T. Gr., p. 138) quotes B, U. III, 822 (ii/A.D.) εὗρον γεωργὸν τίς (=δς) αὐτᾶ ἐλκύσῃ, Diodorus, XIV, 8, 3, δι´ ὅν ἔξελωσι τὰ τείχη.

The N. T. hardly uses the relative clause of purpose as freely as the Attic Greek.

(ζ) The Infinitive. A brief statement is alone necessary here, since the infinitive receives full discussion in the next chapter. Suffice it to say that the infinitive is exceedingly common in the N. T. for the notion of pure purpose. Votaw5 counts some 1,285 such instances of the simple infinitive of purpose in “biblical Greek.” He gives the figures for the N. T. alone as 211. He notes that “this use of the infinitive is second only to that of general object in order of relative frequency of occurrence.” Moulton (ProL, p. 205) notes that the inf. of purpose is more common in the N. T. than in Attic, and he agrees with Thumb (Theol. Lit., 1903, p. 421) in the theory that this frequency of the inf. of purpose in the κοινὴ is due to the Ionic dialect. It has survived in the Pontic dialect of modern Greek, though elsewhere displaced by νά and the subj. Cf. ἐξομάσσωμεν φαγέν (Mt. 26:17) and ἐξομάσσομεν ἵνα φάγης (Mk. 14:12). The telic inf. is common in the κοινὴ writers generally (Radermacher, N. T. Gr., p. 152). Cf. Xenophon of Eph., 393, 28, ἐληλύθει προσεύξασθαι. It is commonest

2 Burton, N. T. M. and T., p. 86.
1 Prol., p. 194.
2 Ib., p. 197.
4 Gr. of N. T. Gk., p. 217.
5 The Inf. in Bibl. Gk., p. 10.
with verbs of movement (Moulton, Prol., p. 205), as in ἐὰν ἀναβῇ κάγώ προσκυνήσῃ, Par. P. 49 (ii/b.c.). This infinitive may be resolved easily into the original dative (or locative), as in Jo. 21:3, [Page 990] ὑπάγω ἄλλως, ‘I go fishing’; Mt. 2:2, ἠλθομεν προσκυνήσας, ‘we went up for worshipping.’

It is easy to see the purpose in the dative form of προσκυνήσας, but less clear in the original ἄλλως (probably due to syncretism). Moulton suggests that the locative was originally a sort of designed result and gradually the line of cleavage vanished between the two forms as was true of ἵνα (and ut). “The burden of making purpose clear is in all these cases thrown on the context; and it cannot be said that any difficulty results, except in a minimum of places.” This idiom has a much wider range in Homer than in Attic writers and is again more prevalent in the N. T. than in the Attic.

A few examples must suffice: οὖκ ἠλθον καταλύσας, ἄλλῳ πληρῶσας (Mt. 5:17); ὁ Ἰησοῦς ἀνήχυθ—πειρατοῦ ὑπὸ τοῦ διαβόλου (4:1); οὖκ ἠλθον καλέσα δίκαιος (Mk. 2:17); πάρεσαν ἐκοσμήσας (Ac. 10:33). Cf. Lu. 18:10; Ac. 11:25; 12:13; 13:44, etc. Less frequent is the inf. with τοῦ for the idea of purpose. Votaw notes but 34 such examples of direct purpose in the N. T., though the O. T. shows 734. These 34 are almost confined to Matthew, Luke and Acts. Cf. τοῦ συλλέσας (Mt. 2:13); τοῦ σπέρθαι (Lu. 8:5); τοῦ αὐτῶν (Ac. 3:2). See both together in Lu. 1:76 f., 79; 2:22, 24, παραστήσας—and τοῦ δοθήναι. For a full discussion see “Articular Infinitive” (Verbal Nouns). Paul seems to avoid it as a rule. But see Ro. 6:6; Ph. 3:10. The use of ὡστε and the inf. for pure purpose is rare in the N. T., some half-dozen instances. Only probable examples should be claimed (p. 1089). Thus ὡστε ἐκβάλλειν (Mt. 10:1). Cf. Mt. 15:33; 24:24; 27:1; Lu. 4:29; 20:20. Radermacher (N. T. Gr., p. 160) cites P. Oxy. I, 52, 7 (325 A.D.), ἐπισταλέντος ὡστε τῇ διάθεσιν ἐγγραφὸν προσφονήσας. For further examples of teleic ὡστε in the inscriptions and writers of the koine see Koch, Observationes grammaticae, p. 20. It is more frequent in the LXX. Radermacher even cites a case of final ὡστε with the subj. in a late papyrus, B. G. U. III, 874, γεγράφηκα ὑμῖν ὡστε πέμψητε. There are two examples of ὅς in W. H., ὅς ἔτοιμός (Lu. 9:52, other editors ὡστε) and ὅς ἔτοιμός (Heb. 7:9). In Ac. 20:24 most editors have ὅς τελειώσας, but not W. H. The articular infinitive with prepositions is very common in the N. T. as in the LXX, about one-half of all the examples of the articular infinitive. For a discussion of prepositions with the inf. see Verbal Nouns. Both ἐκ τοῦ and πρὸς τὸ occur with the inf. in the papyri, the latter [Page 991] more frequently. They both seem “to carry the thought of a remoter purpose.” (Moulton, Prol., p. 220.) Moulton cites B. U. 226 (i/a.d.) ὅπως εἴδη παρέσχεται (=θαμ)—πρὸς τὸ τυχόν, O. P. 237 (i/a.d.) ὅπως φροντίσῃς—πρὸς τὸ μῆ—ἐντυγχάνειν. The papyri have εἰς τοῦ ἐν μιᾷ μεμοθήκας as a “recurrent formula.” Cf. P. Fi. 2 (iii/a.d.) 4 times. Moulton gives numerous papyri references for telic εἰς τῷ. The examples with εἰς τῷ are the most common of all in the N. T. (72 instances). As a rule these indicate purpose more or less strong, though not always. It is particularly common in Paul (50 exx., H. Scott). So εἰς τῷ στηριξθῆναι (Ro. 1:11), εἰς τῷ ἔθνω (8:29). Cf. 1 Th. 3:5; Eph. 1:12;

Ph. 1:10). The instances of πρὸς τὸ are few (12) and chiefly in Matt. and Paul. Cf. πρὸς τὸ θεοθήκην (Mt. 6:1); πρὸς τὸ δόνασθαι (Eph. 6:11).

(η) The Participle. The future participle, so common in this construction in the Attic Greek, has nearly vanished from the N. T. as from the rest of the κοινὴ. A few remnants survive like ἔρχεται Ἡλείας σώσον (Mt. 27:49), ἀνέβην προσκυνήσων and ποιήσων (Ac. 24:11, 17). Cf. Ac. 8:27. So also the present participle occasionally occurs where purpose is implied. Thus ἀπεστάλκαμεν ἀπαγγέλλοντας (Ac. 15:27). Cf. ἔπεμψαν ἀγγέλλοντας (Thuc. VII, 26, 9). Cf. also Mk. 3:31. A good example is Ac. 3:26, ἓν ἀνέβην αὐτὸν εὐλογοῦντα. See Participle (Verbal Nouns) and Tense for further remarks.

(d) Sub-Final Clauses (really object or subject clauses like ὅτι clauses). There are a considerable number of clauses which are not pure purpose and yet are not result. They are the bridge, in a sense, between the two extremes. They are found with verbs of striving, beseeching, commanding, fearing. In some instances the clause is hardly more than an object-clause. The same conjunctions are here used in general, and this shows that no hard and fast line was drawn in the matter. Various divisions are made of these verbs. Burton calls them object-clauses of exhorting, of striving, of fearing, of subject and predicate, of complementary and epexegetic clauses, of conceived result. But even so they overlap and run into one another.

(α) Ἰνα. Here again the main conjunction is Ἰνα. All these varieties noted by Burton are seen with Ἰνα save with verbs of [Page 992] fearing. As we have seen, there were two tendencies in the κοινὴ. One was the spread of the Ionic use of the inf. of purpose, the other was the wide extension of Ἰνα in Western Hellenistic. So the Ἰνα in the non-final or sub-final sense, once rare, now comes to be exceedingly common. The development came on soon after the close of the classical age. But Thackeray (Gr., pp. 24, 194) finds it rare in the LXX. It came to be used in almost any sense that the infinitive bore and finally displaced it. This weakened use of Ἰνα is one of the characteristics of the κοινὴ and is richly illustrated in the N. T., particularly in the writings of John. Thus in Mt. 5:29, συμφέρει Ἰνα ἀπόληται, the Ἰνα clause is the subject of συμφέρει and is a subject-clause in the nominative case. There is a great

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).
also the infinitive and a few retain verbs of striving, beseeching, etc., largely displace apposition with a substantive. In John 5 the appositional use is very frequent. So in John 14:36; yet in 1 Cor. 16:4; as often; συνήθεια ὑμῶν Ἰακ. 18:39); ἔλημον ὃ Ἰακ. 12:23; ἕμοι εἰς ἔλαχιστον ἔστιν Ἰακ. 1 Cor. 4:3; ἐμὸν βραβία ἔστιν Ἰακ. 4:34; λυσιτελεῖ—Ἰακ. 17:2; τοῦτο, Ἰακ. Εὐθίη 1 Cor. 4:2); χαράν Ἰακ. 2:2. Thus the Ἰακ. clause is seen to be either nom. or acc., simply, or in apposition with a substantive. In John the appositional use is very frequent. So αὕτη Ἰακ. 17:3; μείζονα τάς, Ἰακ. 15:13, ablative); ἐν τούτῳ, Ἰακ. 15:8, locative); χάριν, Ἰακ. 3 John 4, accusative). Cf. Blass, Gr. of N. T. Gk., p. 228.

1 It is found in Hom. Cf. Goodwin, M. and T., p. 128.
Kälker KÄLKER, F., Questiones de elocutione Polybiana (1880).
Prol., p. 20) has shown how Polybius favours ἵνα with verbs of commanding like αἰτέομαι, παραγγέλλω, etc. No real distinction in sense can here be drawn between the inf. and ἵνα. The later κοινή (and so the N. T.) carried this use of ἵνα much further than did Polybius, who had more affinity with the old literary Greek. There is no need to appeal to Latin influence for this sub-final use of ἵνα, as Moulton (p. 208) abundantly shows from the papyri. So O. P. 744 (i/B.C.) ἑρωτῶ σε ἵνα μὴ ἄγονιασῆς, N. P. 7 (i/A.D.) ἔγραψα ἵνα σοι φυλαχθῶσι, B. U. 531 (ii/A.D.) παρακαλῶ σε ἵνα κατάσχῃς, O. P. 121 (iii/A.D.) ἐπά σοι ἵνα δώσωσιν. No real distinction in sense can here be drawn between the inf. and ἵνα. The later κοινή (and so the N. T.) carried this use of ἵνα much further than did Polybius, who had more affinity with the old literary Greek. There is no need to appeal to Latin influence for this sub-final use of ἵνα, as Moulton (Prol., pp. 177, 208) abundantly shows from the papyri. So O. P. 744 (i/B.C.) ἐρωτῶ σε ἵνα μὴ ἀγονιάσῃς, B. U. 531 (ii/A.D.) παρακαλῶ σε ἵνα κατάσχῃς, O. P. 121 (iii/A.D.) ἐπά σοι ἵνα δώσωσιν. Moulton (Prol., pp. 177, 208) recalls the old jussive subj. as sufficient explanation of this use of ἵνα. Radermacher (Rh. M., LVI, 203) and Thumb (Hellen., p. 159) support Moulton against the Latin influence theory.

3 W.-M., p. 396.
Greek the νά clause sometimes “approaches the nature of a principal sentence” (Thumb, *Handb.* p. 198). But this elliptical imperative is undoubted in the N. T. Cf. Mk. 5:23, ἵνα ἔλθων ἐπιστῆς. So also Mt. 20:32; 1 Cor. 7:29; 2 Cor. 8:7; Eph. 4:29; 5:33. With this construction compare the asyndeton without ἵνα in Mk. 10:36, τί θέλετε ποιήσω ἥμν.; As already explained (p. 430), this may be parataxis (two questions). Cf. ἵνα in Mk. 10:35 and Gal. 5:17. 

(β) ὅπως. It is much rarer in the N. T. in these constructions. It no longer occurs with the future ind. after verbs of striving. The papyri show ὅπως occasionally in this sense also. Moulton (*Prol.*, p. 208) cites B. M. 21 (ii/B.C.) ἐξίωσά σε ὅπως ἀποδοθῇ, while “ἀξίω c. infin. occurs in the same papyrus.” Radermacher (*N. T. Gr.* p. 141 f.) quotes *Theoph. ad Autolycum*, 2, 34 ἔστω σοι ἔρευναν τὰ τοῦ θεοῦ ὅπως δυνήσει, inscr. from Magn., 90, 12 (ii/B.C.) ἐφόρνισεν ὅπως—ἀποκαταστῶσιν. The few examples in the N. T. are all in the subj. Burton notes only three (Mt. 12:14; 22:15; 4 See art. by Jann., *Expositor*, ser. V, vol. IX, p. 296. Moulton

———, The Vocabulary of the N. T. Illustrated from the Papyri and other Non-Literary Sources. Part I (1914), II, III.

Mk. 3:6), and all three after ἑλαβον (Ἐδίδουν). The clause thus partakes of the nature of an indirect deliberative [Page 995] question (cf. Mk. 11:18, πῶς). They are all after secondary tenses. There are some instances in the N. T. of ἐποίησα after verbs of beseeching, though many verbs that in Attic had this idiom no longer have it. Thus ἐποίησα and the subj. occur with δέομαι (Mt. 9:38), ἀπείναμαι (Ac. 25:3), ἐρωτάω (Lu. 7:3), παρακαλέω (Mt. 8:34), προσεύχομαι (Ac. 8:15).

(...) Μή, μὴ πως, μὴ ποτε. The usual construction in the negative sub-final clauses is ἴνα μή, but a small list of verbs commonly have μὴ as the conjunction. This is true of verbs meaning ‘to take heed,’ ‘to care for,’ ‘fear.’ It is a much narrower range than the sub-final use of ἴνα. In the N. T. the subj. always occurs with μὴ except in Col. 2:8 βλέπετε μὴ τίς ἔσται. Thus βλέπετε μὴ τίς ὑμᾶς πλανήσῃ (Mt. 24:4). Treg. and Tisch. read the fut. ind. in 2 Cor. 12:21, but W. H. and Nestle rightly have ταπεινώσῃ (cf. verse 20). The pres. subj. occurs in Heb. 12:15 ἐπισκοπούντες μὴ ἐνοχλη. Elsewhere we have only the aor. subj. Thus after βλέπω (Mk. 13:5); δράω (Mt. 18:10); σκοπέω (Gal. 6:1); φοβέομαι (Ac. 27:17). In Ac. 23:10 some MSS. have εὐλαβεῖμαι, but φοβεῖμαι is correct. This construction with φοβεῖμαι is rare in the N. T. (Luke, Paul and Hebrews) and is apparently a literary touch. Cf. Ac. 27:29. In Ac. 5:26, ἔφοβοῦντο γὰρ τὸν λαόν ἡμῖν λαθεν (note subj. after secondary tense), there is a prolepsis of τὸν λαὸν. Μὴ πως is found after βλέπω with the aor. subj. (1 Cor. 8:9) and φοβεῖμαι (2 Cor. 11:3; 12:20). Cf. Gal. 2:2 in 6, (c), (d) Pure Final Clauses. If the fear is about an object in the present or past, the ind. is used. Cf. p. 1045. Thus in Lu. 11:35, σκόπει μὴ—ἐστίν, and in Gal. 4:11, φοβοῦμαι ὑμᾶς μὴ πως εἰκῇ κεκοπίακα εἰς ὑμᾶς. This is in strict accord with Attic idiom. The papyri show it also (Moulton, Prol., p. 193). So Par. P. 49 (ii/b.c.) ἄγνωστο μὴ ποτε ἄρρωστε, N. P. 17 (iii/a.d.) ὑψωτεύεται μὴ ἄρα ἐνθρώπους ἔλαθεν ὑπάτι. Radermacher (N. T. Gr., p. 141) adds examples of fut. ind., as Enoch 6:3, φοβοῦμαι μὴ οὐ θελήσετε; Dio Chrys., xxxiv, 44, οὐ γὰρ ἐστι κίνδυνος, μὴ Μαλλωτῶν ἐσομένων ἀσθενεστέρως δόξετε. The negative in such a clause is οὐ. Thus φοβοῦμαι μὴ πως οὐχ οἴσες θέλω εὑρό (2 Cor. 12:20). This is to show contrast to μή. Cf. Col. 2:8, μὴ τίς ἔσται—καί οὐ. Sometimes a verb of fearing is implied, though not expressed (cf. elliptical use of ἴνα and ἴνα μή). Thus Ac. 5:39, μὴ ποτε εὐθυθητέ. This is a possible explanation of μὴ ποτε οὐ μὴ ἄρκεσῃ (or μὴ ποτε οὐκ) in Mt. 25:9 [Page 996] (note negatives) and μὴ ποτε δόθη (2 Tim. 2:25). Μὴ ποτε is used with the aorist subj. after προσέχω (Lu. 21:34; Heb. 2:1), with a present subj. after φοβεῖμαι (Heb. 4:1), with a present. opt. after διαλογίζομαι (Lu. 3:15, ind. question), with a fut. ind. after βλέπω (Heb. 3:12). These clauses are of paratactic origin. This paratactic construction survives in the use of ἄρα with the imperative (Mt. 9:30; 24:6), but even so the clause may be dependent in actual use as in Mt. 18:10; 1 Th. 5:15. Some doubt arises concerning the clauses with βλέπω which have a paratactic origin, but are practically dependent. Those in the third person are clearly

1 Burton, N. T. M. and T., pp. 88, 95 f.
3 Goodwin, M. and T., p. 133.
1 Moulton, Prol., pp. 185, 248.
2 Burton, N. T. M. and T., p. 89.
so (Mk. 13:5; Ac. 13:40, etc.). This argues for a like usage in Lu. 21:8; Gal. 5:15; Heb. 12:25.

(b) The Relative Clause. It is a classic idiom for complementary relative clauses to be used in a sub-final sense. As examples of this idiom in the N. T. note ἄξιος ἔστιν ὑπαρέχει (Lu. 7:4); οὐκ ἔχω ὅ παραθήσω (11:6); οὐδένα ἔχω ὅστις μεριμνήσει (Ph. 2:20). Cf. στά τί γράφω (Ac. 25:26) and τί γράψω οὐκ ἔχω (ib.). Radermacher (N. T. Gr., p. 138) quotes from Achilles Tatius, IV, 16, 3, ἀπογεύσομαι τοσοῦτον ὅσον κάθειν λάβῃ.

(c) The Infinitive. With verbs of exhorting, beseeching, etc., the infinitive was the normal idiom in the ancient Greek. In the N. T. it still occurs twice as often as ἵνα and ὅπως together. Some of these verbs have only the inf. in the N. T., as αἰσχύνομαι, ἄξιος, ὅσκε τό, βούλομαι, ὅσκε, ἔτω, ἐπιθυμεῖο, ἐπιποθεῖο, ἐπιπεθεῖο, ἐπιχειρεῖο, κελέσθω, ὅκνε, παρανεῖο, πειράτω, σπουδάζω, τάσσω and compounds, φοβέομαι in the sense of 'to be afraid to do' (Mt. 2:22). Many of the verbs that use sub-final ἵνα may have the inf. also. Thus ποιήσω ὅμοιος γενέσθαι (Mk. 1:17). So also βούλεομαι, αἰτεῖομαι, προσεύχομαι, λέγο, etc. Cf. ἄξιος λύοτα (Ac. 13:25) and ἄξιος ἵνα λύοτα (Jo. 1:27). In 2 Cor. 9:5 the inf. is used after the ἵνα clause to express an epexegetic or complementary purpose (ταύτην ἔτοιμην ἵναι), a rather common usage. Cf. in 1 Cor. 9:15 both ἵνα and the inf. in a broken sentence. Moulton argues that in Paul the majority of cases of τοῦ with the inf. are epexegetic (Ro. 1:24; 7:3; 8:12; 1 Cor. 10:13) or adnominal (Ro. 15:23; 1 Cor. 9:10; 16:4; 2 Cor. 8:11; Ph. 3:21) or the ablative construction (Ro. 15:22; 2 Cor. 1:8). Certainly τοῦ μὴ ἔλθεν in Lu. 17:1 is not purpose, nor τοῦ ἔλθεν ἵνα in Ac. 10:25. Cf. also Mt. 21:32, τοῦ πιστεύομαι. Luke uses τοῦ and the inf. more than [Page 997] any other N. T. writer. The papyri show this non-final use of τοῦ and the inf. (Moulton, Prol., p. 219 f.). So B. U. 1031 (ii/iii A.D.) φρόνησον τοῦ ποιήσει, B. U. 164 (ii/iii A.D.) πείσαι αὐτὸν τοῦ ἔλθεν, B. M. 23 (ii/iii A.D.) προσδέομένου μου τοῦ πεποιηθήσεται. In Lu. 18:1, πρὸς τὸ δέναι is not final. Ei γάρ τοῦ and the inf. we find chiefly in Paul (44 examples, Moulton, Prol., p. 218. Mr. H. Scott makes 50 by counting the verbs instead of the preposition). The construction is always final in the other N. T. writers. But Paul has non-final uses, as in 1 Th. 2:12; 4:9.

(c) Consecutive Clauses.

(a) ἵνα. It is debatable whether ἵνα has the ecbatic use in the N. T. There is in itself no reason why it should not have it, since undoubtedly it was so used in the later

4 Burton, N. T. M. and T., p. 87.
5 Prol., p. 218 f.
Greek.\textsuperscript{1} It occurs also in modern Greek, as ἔναν να χάση κανείς το μυαλό του, ‘that is for one to lose his reason’ (Thumb, \textit{Handb.}, p. 197). The parallel of the Latin \textit{ut} may have had some influence on this late Greek. The development, however, was in the vernacular, and out of the subfinal use of ἴνα, and the Latin influence was not needed. There is not space to follow the long debate in the grammars and commentaries on this subject. Kühner\textsuperscript{2} held that ἴνα had the ecbatic sense, but Thayer\textsuperscript{3} boldly accepts the verdict of Fritzsche and Winer who “have clearly shown that in all the passages adduced from the N. T. to prove the usage the telic (or final) force prevails.” W. F. Moulton\textsuperscript{4} agreed with Winer as against Fritzsche in the admission of the sub-final use of ἴνα, but he balked at the consecutive idea. “But it does not follow that the weakened ἴνα is generally equivalent to ὡστε: this use of ἴνα is rather, as we can still perceive in most cases, an extension of \textit{eo consilio ut.” Yes, in most cases, beyond a doubt. I once had just this feeling and stood against\textsuperscript{5} the admission of the consecutive

force of ἵνα. J. H. Moulton\textsuperscript{6} confesses to a similar development of opinion on this subject. He had once\textsuperscript{7} committed himself against the ecbatic [Page 998] ἵνα, but now he confesses himself “troubled with unsettling doubts.” He boldly advocates\textsuperscript{1} the freedom of commentators to interpret ἵνα as the context demands (final, sub-final, consecutive). Ellicott\textsuperscript{2} had defended just this principle, and he is the most severely grammatical of commentators. The commentator must have grammar, but he needs the grammar of the author on whose work he is making comments. So also Sanday and Headlam on Ro. 11:11 (μὴ ἔπτασαν ἤνα πέσωσιν;) pointedly interpret it thus: “ὁ ἵνα expresses the contemplated result.” They appeal to Ellicott, Lightfoot and Evans in support of this laxer use of ἵνα as against Winer and the Germans. They also (p. 143) quote Chrysostom’s exposition of ἤνα in Ro. 5:20: τὸ δὲ ἤνα ἐνταῦθα οὐκ ἀπολογίας πάλιν ὄλλαι ἐκβάσεως ἔστιν. Lightfoot admits the consecutive force of ἤνα in Gal. 5:17; 1 Th. 5:4. He is correct in both instances. See also Lu. 1:43. In Jo. 16:2, ἔρχεται ὡρα ἤνα δόξῃ, it is almost temporal. It is argued that, where ἤνα seems to be used in a consecutive clause, it is the divine purpose that is to be considered. But

certainly no such explanation is possible in Ro. 11:11. There is such a thing as the divine purpose and it is seen in Lu. 9:45, ἢν παρακεκλημένον ἵνα οὕτως ἵνα μὴ αἰτήθονται αὐτό. Cf. also Mt. 1:22, ἵνα πληρωθῇ. But surely no such purpose appears in Jo. 6:7, οὐκ ἐφοίτησιν αὐτοῖς ἵνα ἐκαστος βραχύ λάβῃ. Here we have contemplated result, it is true, but it is result just the same. It is probably just out of this idiom (conceived result) that the use of ἵνα for actual result came. Burton admits this conceived result as in Heb. 10:36, and seeks to explain Jo. 9:2, τίς ἡμαρτεὶ—ἵνα τιμωρίας γεννηθῇ. But the effort is not successful. He denies that there is a certain, "scarcely a probable, instance in the N. T. of a clause denoting actual result conceived as such."6 He considers Rev. 13:13, τοιαύτης μετάγαλα, ἵνα καὶ πῦρ ποιή ἐκτὸς οὐρανοῦ καταβαίνει, as the most probable instance of ἵνα denoting actual result. But there are others just as plain, if not clearer. Thus 1 Jo. 3:9, πιστὸς ἔστιν καὶ δίκαιος, ἵνα ἄφη τὰς ἡμαρτίας. Blass places this beside δίκαιος ἐπιλαβέσθαι (Heb. 6:10) and thinks that the consecutive use of ἵνα grew out of the infinitive in that sense. With this Moulton9 agrees. Cf. also Rev. 9:20, οὗ μετενόησαν, ἵνα μὴ προσκυνήσωσιν, with οὗ μετενόησαν δοῦναι αὐτῶι δόξαν. Sophocles in his Lexicon gives a quite extensive list of passages in the koine writers where ἵνα has the consecutive sense. He has probably claimed too many, but some of them are real instances. Even Josephus has ἵνα in the sense of conceived result.1 Radermacher (N. T. Gr., p. 156) cites Epictetus, IV, 3, 9, ἐλεύθερος γάρ εἰμι καὶ φίλος τοῦ θεοῦ ἵνα ἐκών πείθομαι αὐτῷ. Several other examples occur in Epictetus. So, then, we conclude that ἵνα has in the N. T. all three uses (final, sub-final, consecutive), and thus runs a close parallel with the infinitive which it finally displaced.2 Sophocles cites several examples of consecutive ἵνα from the LXX. One of these is certainly pertinent, Wisdom of Sol. 13:9, for ἵνα δύνανται follows τοσοῦτον and ἵνα has the force of ὡστε.

(β) ὡστε. This conjunction is merely ὡς and τέ='and so.' In Homer ὡς is both a demonstrative and a relative. Either idea may appear in ὡστε. It is really a comparative particle.3 In the early writers the inf. was more common than the ind. with ὡστε. Thus in Euripides the inf. occurs 130 times to 20 indicatives. In

Sophocles SOPHOCLES, E. A., Greek Lexicon of the Roman and Byzantine Period (1888).
1 Blass, Gr. of N. T. Gk., p. 224.
Thucydides it is 144 to 82, but in Plato it is 253 to 240. The consecutive sentence began with the inf. and was extended to the finite verb. In late Greek it returned to the inf. construction. Cf. Green, Diodorus and the Peloponnesian War, 1899, p. 21. Of the 95 instances of ὡςτε in the N. T. probably 30 do not come up for discussion under either final or consecutive clauses. The word in these examples is merely an introductory inferential particle like οὐ. The structure is wholly para tactic. In this sense of ‘therefore’ the particle occurs with the ind. nineteen times. Cf. Mt. 12:12, ὡςτε ἔξεστιν. Once the subj. appears, 1 Cor. 5:8, ὡςτε ἔφτασαμεν. Radermacher (N. T. Gr., p. 161) even quotes P.Oxy. IV, 743, 27 (ii/b.c.), ὡςτε ᾧν τούτο σε θέλω γινόσκαιν, and there are other instances like it. The other eleven instances have the

[Page 1000] imper. (pres.). Cf. ὡςτε βλεπέτω (1 Cor. 10:12). See 1 Cor. 3:21; 11:33, etc. Of the hypotactic examples 62 have the infinitive and only two the indicative. In the Attic Greek actual result was expressed by ὡςτε and the indicative, while ὡςτε and the inf. (‘so as to’) denoted a result naturally or necessarily following the preceding cause. In the N. T. there are only two instances of the ind. with ὡςτε (as a hypotactic conjunction). They are Jo. 3:16, οὕτως γὰρ ἤγαπησεν ὁ θεὸς τὸν κόσμον ὡςτε τὸν οἶδαν τὸν μονογενῆ ἔδωκεν, and Gal. 2:13, καὶ συνυπεκρίθησαν αὐτῷ οἱ λοιποὶ Τιτοδαίοι ὡςτε καὶ Βαρνάβας, καθαρίσθη αὐτῶν τῇ ὑποκρίσει. Here the actual result is distinctly accented. Blass on the flimsiest grounds seeks to oust ὡςτε in Jo. 3:16 by ὥσπερ and to put the inf. in Gal. 2:13, so as to get rid of this construction entirely in the N. T. Moulton rightly shows small patience with such “summary” methods in textual criticism. The construction with the ind. is not quite obsolete in the vernacular κοινῆ, but only to make the contrast sharper. Of the 95 instances5 of ὡςτε with the inf. in the N. T. they are nearly all consecutive, not final nor even sub-final. Even in the classical Greek the inf. with ὡςτε in the sense of actual result was displacing the ind. and in the vernacular it grew rapidly. Cf. ὡςτε—ἐπολελύσθαι, B. G. U. 27 (ii/A.D.). This is a distinct encroachment on the old idiom and has a wider range than in Attic. In Ac. 14:1 note οὕτως ὡςτε. See Mt. 13:32 ὡςτε ἔλθεν τὸ πετεινά τοῦ οὐρανοῦ καὶ κατασκηνοῦ ἐν τοῖς κλάδοις αὐτοῦ, (Mk. 4:37) ὡςτε ἦδη γεμίζεσθαι τὸ πλοῦς, (Ac. 15:39) ὡςτε ἐποραθήσεται αὐτῶς ὁ θεὸς ἀλλήλων. Tatian took ὡςτε consecutive in Lu. 4:29 (Moulton, Prol., p. 249). Consecutive ὡςτε and inf. is too common in the inscriptions and papyri for Radermacher to mention (N. T. Gr., p. 160). We do not have ὡςτε after a comparative (ἥ ὡςτε) in the N. T. There is no example of ὡςτε nor of ἐφ᾽ ὡςτε in the sense of ‘on condition that.’ In Gal. 2:9 ἢνα has practically that idea.

(γ) Ὕς Thayer considers that in Heb. 3:11 and 4:3 we have the consecutive use of Ὅς. It is a quotation from the LXX (Ps. 94:11) and is possible, though the simple ‘as’

5 Mr. H. Scott makes 95 times by counting the verbs, Geden 83.

5 Blass, Gr. of N. T. Gk., p. 224.
is sufficient. But [Page 1001] ὃς has kept its place as a consecutive particle in the κοινή (Radermacher, N. T. Gr., p. 160).

(δ) ὅτι. There is no doubt about the consecutive use of ὅτι in the later Greek.1 We find it in the LXX, as in Ex. 3:11, τίς εἰμι ἐγὼ ὅτι πορεύσομαι πρὸς Φαραώ; Cf. also 2 Ki. 8:13. The instances in the N. T. are not numerous, but they are very clear. Thus Mk. 4:41, τίς ἄρα οὐτός ἦστων ὅτι καὶ ὁ ἄνεμος καὶ Ἡ θάλασσα ὑπάκουει ὅτι: In Mt. 8:27 note ποταπός ὅτι (cf. οὕτως ὅπσε). See also Heb. 2:6 (Ps. 8:5); Lu. 4:36. Radermacher (N. T. Gr., p. 160) quotes Acta Christophori, 68, 18, τοιοῦτοι γάρ ἔστεν νοῦς ὑμῶν ὅτι ὑπὸ γνακὸς ἐκινήθησαν. Moulton (Prol., p. 249) gives τί διδόξα τοῖς ἄνοιξι ποιητῆς, ὅτι ἤσθη αἰώνιον ἔχουσιν; Pelagia 20. It occurs in Theocritus ix, 25 μέγας—τοιοῦτον ὅτι—διόκοψα, x, 14 ἔς τοιοῦτον ὅτι. Abbott (Joh. Gr., p. 534) takes ὅτι as consecutive in Jo. 14:22, τί γέγονεν ὅτι ἤμην μέλλεις ἐξισορροπεῖν; Abbott finds no instance of consecutive ὅτι in the Egyptian papyri. The idiom is common in the late Greek. Akin to it is the modern Greek use of ποῦ as consecutive (Thumb, Handb., p. 197). The same idea is found in Jo. 7:35.

(ε) The Relative. This is a common classic idiom. The mode is the ind. and the negative οὐ.2 In Latin the subj. is the mode with qui. The tense is usually the fut. ind., though the construction is rare3 in the κοινή. But one may note in the N. T., Mt. 10:26 and in particular 24:2, οὐ μὴ ἀφεθῇ ὡς λίθος ἐπί λίθον ὃς οὐ καταλύθησεται. See also Lu. 8:17; 1 Cor. 6:5; Ro. 8:32. In Jo. 5:7, ἄνθρωπον οὐκ ἔχω ἑκάστην βαλῃ, we see ἑκάστην usurping this province of the relative. Cf. Rev. 19:15. See “Relative” under Sub-final.

(ζ) The Infinitive. The inf. with ὅστε has been discussed, but we have left the simple inf., the articular (τοῦ) inf., εἰς τὸ and the inf. There are apparently examples of each construction in the N. T. Thus the simple inf. of result is seen in Lu. 1:54, ἅντελάβετο Ἰσραήλ παιδὸς οὐτοῦ μνημοθύμησα ἔλεοςες; at any rate it is used here very freely. Blass4 considers the infinitives in Lu. 1:72 used “quite incoherently.” But in Ac. 5:3 ψεύσασθαι has a consecutive idea, as has ἐπιλαβόθαι in Heb. 6:10. See also ἄνοιξα in Rev. 5:5 and δοῦναι in 16:9. Cf. Lu. 1:76, 78 f. It is probable that originally the dative –αι in the inf., δόμεναι as opposed to δόμεν, [Page 1002] expressed

6 In Xen. ὃς rather than ὅστε occurs both with the inf. and the modes. Cf. Wehmann, De ὅστε particularus usu Heroditeo Thucydideo Xenophonteo, 1891, p. 40.
Abbott

———, Johannine Grammar (1906).

4 Gr. of N. T. Gr., p. 224.
“designed result” (Moulton, Prol., pp. 204, 207), but this idea shrank into the background. This idiom is found in the papyri,1 as in O. P. 526 (ii/A.D.), ὄμε θυμή ἐπαθῆς ἐν γὰρ ἐπολεύεσθαι. Meyer on Ro. 7:3, τοῦ μὴ ἐίναι, argues that τοῦ and the inf. never expresses result, a position which I once held.2 But the evidence is too strong to resist. See Infinitive for distinction between actual and hypothetical result. Radermacher (N. T. Gr., p. 154) quotes Acta Barnabae, 10, μὴ βιάζῃς Βαρνάβαν τοῦ μὴ πορεύεσθαι, as consecutive. The idiom is not common in the papyri as is true of τοῦ and inf. (Moulton, Prol., p. 220). It belongs chiefly to the LXX and Byzantine writers, and Moulton puts it in “the higher stratum of education in the main.” The epexegetic use occurs, as in C. P. R. 156 ἐξουσίαν—τοῦ—θέσομαι, O. P. 275 τοῦ ἀποσπασθῆναι ἔπειτα. This construction (τοῦ and the inf.) had a very wide development in the N. T. in opposition to the encroachments of ἵνα. See Lu. 17:1 and Ac. 10:25, where τοῦ and the inf. is practically the subject of the verb (cf. original dative and locative cases). Luke has two-thirds of the examples of τοῦ and the inf. in the N. T. Only half of these (in Gospel and Acts) seem clearly final according to Moulton.3 He holds that of the 13 examples in Paul none are unmistakably final, though Ro. 6:6 and Ph. 3:10 are probably so. In both instances is Gen. 3:22; 19:21; Is. 5:14. Cf. Ro. 7:3 (epex., consec., p. 1067), τοῦ μὴ ἐίναι. It is probable in Lu. 9:51; Ac. 18:10; 20:3; 27:1; Ro. 1:24. Cf. τοῦ ἔρωτῆσαι and ὅπως καταγίζῃς in Ac. 23:20. So with εἰς τὸ and the inf. Its most natural signification is aim or purpose, but, just as with ἵνα, so here result is sometimes the idea. Meyer in his note on Ro. 1:20, εἰς τὸ ἐίναι αὐτοῦ ἀναπληρωθεῖν, insists that the meaning of εἰς τὸ is always purpose. In this particular instance divine purpose may be the idea, though result is the probable conception. See Sanday and Headlam in loco. Ellicott on 1 Th. 2:12, εἰς τὸ περιπατεῖν (after παρακαλοῦντες κτλ.), admits the sub-final use of εἰς τὸ (cf. ἵνα) after verbs of exhorting (cf. 1 Th. 3:10), though denying the ebatic use. But it is only a step to go on and that the N. T. writers took. See the epexegetic use of εἰς τὸ in 1 Th. 4:9. Winer admitted the consecutive use of εἰς τὸ and the inf. as in 2 Cor. 8:6, εἰς τὸ παρακάλεσαι μὴς Τίτον, ‘so that we besought Titus.’ This idiom is not present in the Johannine writings, though it is very frequent in Paul’s writings (especially Ro. and 1 Th.) and Hebrews. Notice τηρεῖς εἰς τὸ ἄκουσαί, βραδύς εἰς τὸ λαλῆσαι (Jas. 1:19). In Heb. 11:3, εἰς τὸ γεγονόναι, we have a clear example of result. Note the perfect tense with notion of permanence.2 See also φρονεῖν εἰς τὸ σωφρονέν (Ro. 12:3), where purpose is impossible. Cf. Gal. 3:17. As to πρὸς τὸ and the inf. the point is not clear. Purpose is undoubtedly present as in Mt. 6:1; Eph. 6:11, and there is total absence of purpose in

1 W.-M., p. 413 f.
2 Moulton, Prol., p. 219.
Lu. 18:1, πρὸς τὸ δὲν. It is not certain, in spite of Blass’ comment,³ that in the N. T. πρὸς τὸ expresses result. In Mt. 5:28, πρὸς τὸ ἐπιθυμήσει, either purpose or result is possible. W. F. Moulton⁴ denies that the idiom ever conveys mere result, but admits that it may have subjective purpose as in 1 Th. 2:9. J. H. Moulton⁵ holds that this is the idea in all the four examples in Paul’s writings. See further 2 Th. 3:8; 2 Cor. 3:13.

7. WISHES. The use of the optative for a future wish like ἄγιασαι (1 Th. 5:23), μὴ γένοιτο (Gal. 6:14), is not a hypotactic construction. This is pure parataxis and has already been discussed under the Optative.⁶ See Optative Mode. The only hypotactic sentence for the expression of a wish in the N. T. is that with ὀφείλω, which comes in the late Greek to be used as a particle. Even here it is possible to regard the construction as paratactic, but note εἴ γὰρ and εἴθε. It is the second aorist ind. of ὀφείλω without the augment. ὀφείλω with the inf. occurs in Herodotus, and the form is thus probably Ionic.⁷ For κοινή parallels see “Impossible Wishes” under Indicative Mode. Cf. ὀφείλων συνίστασθαι in 2 Cor. 12:11. It is found in the LXX⁸ as a conjunction, as in Ex. 16:3, ὀφείλων σπεύδαμεν. Cf. Num. 14:2; 20:3. Moulton⁹ suggests that its application to the second and third persons is due to the meaning ‘I would’ rather than ‘thou shouldst.’ As a matter of fact its use in the N. T. is very limited, though εἴθε and εἴ γὰρ are wanting as particles of wishing. For a wish about the past we have the aorist ind. So ὀφείλων γε ἔβασιλεύσατε (1 Cor. 4:8). Cf. Ps. 118 (119):5. For a wish about the present we have the imperfect ind. So 2 Cor. 11:1, ὀφείλων ἀνέβησθε, and Rev. 3:15, ὀφείλων ἦς. The Text. Rec. here has ὀφείλων ἦς, but it is baseless. However, we do find the fut. ind. for a future wish. So Gal. 5:12, ὀφείλων ἀποκάψωσίτα. Wishes as a separate idiom are vanishing in the N. T. But ὀφείλων appears in Lucian, Athenagoras, Greg. Naz., Socrates. Cf. Sophocles’ Lexicon. To compensate for this loss we have the strong asseverations with οὐ μὴ (Mt. 13:14), the use of εἰ like the Hebrew דִּרְכָּה (Mk. 8:12; Heb. 4:3), εἰ μὴν (Heb. 6:14), the use of the participle like the Hebrew inf. absolute (Mt. 13:14). The distinction between wish and supposition with εἰ was sometimes hard to make in Homer.¹ The relation between wishes and conditions is not clear.

8. CONDITIONAL SENTENCES.

(a) Two Types. No hypotactic clause is more important than this. For some reason the Greek conditional sentence has been very difficult for students to understand. In truth the doctors have disagreed themselves and the rest have not known how to go. The theory of Hermann, followed by most Germans (Winer,²

8 In W.-Sch., p. 29, reference is made to εἰ δέχεσθαι ἐπιθυμήσει in Job 14:13 and εἰ γὰρ ὀφείλων δυνατίνην in Job 30:24. Evidently ὀφείλων was not felt to be sufficient alone.
9 Prol., p. 201.
2 W.-M., pp. 363 ff.
Blass\textsuperscript{3}, is the one that I learned from Broadus and have expounded in my Short Grammar.\textsuperscript{4} It is also that of Gildersleeve.\textsuperscript{5} This theory in brief is that there are four classes of conditions which fall into two groups or types. The two types are the determined and the undetermined. The point in “determined” is that the premise or condition is assumed to be true (or untrue). A positive statement is made in either case and the conclusion follows logically from this premise. The indicative is the one used for this type (the first and second class conditions, real and unreal, or fulfilled and unfulfilled). The other type is the undetermined condition. Naturally the indicative is not allowed here. The element of uncertainty calls for the subj. or the optative. The difference therefore between the third and fourth class conditions is just that between the subj. and the opt. They are both modes of doubtful, hesitating affirmation, but the optative is more remote than the subj. In this type the premise is not assumed to be either true or untrue. The point is in the air and the cloud gathers round it. But there is less mist over the subj. than the opt. In broad outline this is the classification of the conditional sentences which I hold to be true. Thompson\textsuperscript{1} is surely right in saying that no division can claim any higher right than that of convenience and intelligibility, except that I should like to add that the exposition should be in harmony with the facts of the historical development of the Greek language. There is no nobler achievement in syntax than the Greek conditional sentence before it broke down from the loss of the optative and the future indicative. In the modern Greek it is therefore a wreck, and there is corresponding obscurity between the various classes of conditions, as in English, in spite of special developments to make atonement for the loss.\textsuperscript{2} In broad outline these four classes of conditions may be termed Reality, Unreality, Probability, Possibility. The word Probability is, however, too strong a term for the third-class condition (ἐάν and the subj.). La Roche\textsuperscript{3} prefers “objektive Möglichkeit” for the third class and “subjektive

Möglichkeit” for the fourth class (εἰ and the opt.). This is also the language of Winer, “objective possibility” and “subjective possibility.” Farrar prefers the words Possibility, Impossibility, Slight Probability, Uncertainty. Radermacher (Ν. T. Gr., p. 142) calls εἰ with ind. “objektiv,” ἐὰν with subj. “an sich objektiv,” εἰ with opt. “subjektiv,” εἰ with post tenses of ind. “Irrealität.” So it goes. Radermacher thinks also that, to understand the Greek conditions, we must distinguish sharply between the vernacular and the κοινή (“so müssen wir scharf scheiden zwischen Volksprache und der Koiné”), a mistaken view in my judgment. It is best to use κοινή for both the vernacular and literary language. This brings us face to face with the other theory, the one adopted by Farrar. It was expounded by Goodwin and has had quite a vogue in America and England. This theory calls for “particular” and “general” suppositions as a fundamental element. This is a false step in itself. As [Page 1006] Gildersleeve shows, each of the four classes of conditions may be particular or general. That point has no bearing on the quality of the condition. Goodwin’s past general supposition, where alone a show of distinct structure is made, is a mixed condition (see later under fourth class condition). But the point on which I wish to attack Goodwin’s scheme is chiefly in his definition of the first and second class conditions. That involves the third also, as will be seen. Goodwin confuses the “fact” with the “statement” of the fact. He describes the first condition thus: “When the protasis simply states a present or past particular supposition, implying nothing as to the fulfilment of the condition, it takes a present or past tense of the indicative with εἰ.” The words to which I object, besides “particular,” are “implying nothing as to the fulfilment of the condition.” This condition pointedly implies the fulfilment of the condition. It is the condition of actuality, reality, Wirklichkeit, and not mere “possibility” as Farrar has it (see above) à la Goodwin. This is the crux of the whole matter. Once see that the first class condition with the ind. implies the reality of the premise, all else follows naturally. In the discussion of the second class condition Goodwin properly says: “When the protasis states a present or past supposition, implying that the condition is not or was not fulfilled, etc.” This is the condition of unreality as the other is that of reality and the indicative is, of course, used with both. Hence the subj. and the opt. conditions fall apart to themselves as undetermined. The point about all the four classes to note is

3 Beitr. zur griech. Gr., 1893, pp. 14, 18. He uses “Wirklichkeit” and “Irrealität” (pp. 8, 28) for the others.

that the form of the condition has to do only with the statement, not with the absolute truth or certainty of the matter. Examples will be given directly to show that the second class condition is sometimes used where the fact is just the opposite. The same thing is true of the first class condition. We must distinguish always therefore between the fact and the statement of the fact. The conditional sentence deals only with the statement. This point is clearly seen in Kühner-Gerth, II, p. 465, except that the third class is lost sight of and merged with the first. Burton\(^3\) follows Goodwin through all his variations. A word further is demanded by way of warning. One must not try to explain the Greek condition by the English or German translation. The English is often hopelessly ambiguous, while the Greek is perspicuous if one will only give it a chance to speak for itself. The true explanation is only possible by the approach from the Greek standpoint. And that is by the mode, not by εἴ or ἐάν. Ἐάν is nothing but εἴ ἄν. The ἄν is not essential to either protasis or apodosis. Homer\(^1\) used εἴ with the subj. with or without κε or ἄν. The Attic Greek\(^2\) sometimes has εἴ ἄν with the opt. and Demosthenes used εἴ ἄν with the past ind. Radermacher (\textit{N. T. Gr.}, p. 127) quotes Joh. Philop. \textit{De aeternitate} 430, 28 (iii/A.D.) εἴ—ἡδονατο ἄν. He gives also (p. 163) καὶ ἄν—βοηθοῖς, Diod. XI, 37, 3; ἕσσαν ἡμί—ῥύσατο, Diod. I, 77, 3. The modern Greek uses ὁν (for ἕαν) with any tense of the ind. (Thumb, \textit{Handb.}, p. 194). There is no principle involved in ὁν, simply custom. In modern Greek the subj. is used, of course, more freely since the fut. ind. and the opt. have vanished.\(^3\) Jolly holds that the ind. was a later development with conditional sentences in Greek and that the first attempt was made with the subj. and the opt. He thinks that the use of the ind. was the result of a clearer conception of the logical possibilities of the conditional clause. The subj. was more common in the Zend and the Sanskrit (and Latin) than in the Greek.\(^4\) Here as always ἄν is difficult to explain. “Now it has a definite reference, now it is indefinite. Sometimes the reference is supplied by the context, sometimes by the opposite.”\(^5\) See The Use of ἄν in Relative Sentences in this chapter. We shall first examine the standard forms of the conditional sentence and then note the variations and modifications.

\(b\) Four Classes.

\---

3 N. T. M. and T., pp. 100 ff. Farnell (Gk. Conditional and Rel. Sent., 1892) also follows Goodwin, as does R. H. Smith (The Theory of Cond. Sent. in Gk. and Lat., 1894).

Jolly

\textit{JOLLY, Ein Kapitel d. vergl. Syntax. Der Konjunktiv und Optativ.}

———, Geschichte des Infinitivs im Indog. (1873).

In verse 26, to be true by Jesus for the sake of argument. The question is a also Gal. 5:11) to begin with, since the assumption is untrue in fact, though assumed ἐ locative case, meaning 'in that case.' This is more probable.

Opt. Cond. in Gk., Harv. Stu. in Class. Philol., 1901) treats it as a demonstrative in the favourite condition when one is sure of the premiss." The construction is εἰ (sometimes ἔναι) and any tense of the indicative [Page 1008] in the protasis. The apodosis varies very greatly. It all depends on what one is after, whether mere statement, prediction, command, prohibition, suggestion, question. Hence the apodosis may be in the indicative (any tense) or the subjunctive or the imperative. There is no necessary correspondence in tense between protasis and apodosis. The variation in the mode of the apodosis has no essential bearing on the force of the condition. This condition, therefore, taken at its face value, assumes the condition to be true. The context or other light must determine the actual situation. The apodosis is the principal clause, but since the protasis is the premise, the protasis usually precedes the apodosis. The apodosis may be declarative or interrogatory, positive or negative. This condition is so frequent in the N. T. that no exhaustive list can be given, but representative examples must suffice. Thus in Mt. 12:27, εἰ ἔγω ἐν Βεσεβούλ ἐκβάλλω τὸ δαιμόνια, οἱ υἱοὶ ὡμῶν ἐν τίνι ἐκβάλλουσιν: This is a good example (cf. also Gal. 5:11) to begin with, since the assumption is untrue in fact, though assumed to be true by Jesus for the sake of argument. The question is a reductio ad absurdum. In verse 26, εἰ ὁ Σατανᾶς τὸν Σατανᾶν ἐκβάλλει, ἡ ἑαυτὸν ἐμερώσθη, there is the additional point of change of tense in the apodosis. He was already divided against himself, in that case, before he casts himself out. But the tense may be merely due to a quick change of view-point as accomplished (timeless aorist in reality). This point comes out well in verse 28, εἰ δὲ ἐν πνεύματι θεοῦ ἔγω ἐκβάλλω τὸ δαιμόνια, ἡ ἐφθασεν ἡ ὑμᾶς ἡ βασιλεία. Note ἡ ἐφαρμοσθείσῃ with the aorist. For the past ind. in both clauses see Ac. 11:17 (εἰ ἔδωκεν, τίς ἡμῖν); 1 Cor. 15:2; Rev. 20:15 (εἰ τίς οὐχ εὑρέθη, ἐβλήθη). For the present ind. in both clauses note Mt. 19:10 (εἰ οὐτος ἐστίν—οὐ συμφέρει); Ro. 8:9; Jo. 15:18; 1 Cor. 15:12. The presence of the perfect in protasis (15:14, 17, 19) or apodosis (15:13, 16) does not vary the point. In 2 Cor. 2:5, the perfect is followed by the perfect. The fut. ind. may, though rarely in the N. T., occur in both clauses, as in Mt. 26:33 (εἰ σκανδάλισθησονται, σκανδάλισθῃςκοιμαί). Cf. Mk. 14:29; Lu. 19:40; 1 Cor. 3:15; 2 Tim. 2:12; 1 Cor. 3:14 f. But such little niceties cut no figure in this construction. There is perfect liberty to mix the tenses ad libitum. So past and present (Lu. 19:8 f.; 11:18; 2 Cor. 7:8, 14; Ro. 4:2; [Page 1009] 15:27; 1 Jo. 4:11), past and future (Jo. 3:12; 15:20; Lu. 16:11), present and future (Mt. 17:4; Jo. 5:47; 11:12; Ac. 5:39; 19:39; Ro. 8:11). In 1 Cor. 9:11 εἰ ἔσπειρόμεν καὶ εἰ θερίσωμεν occur side by side. Examples of the imperative in the apodosis occur as in Mk. 4:23 εἰ τίς ἔχει ὠτα ἄκουσιν, ἄκουστο. Cf. Mt. 5:29; 8:31; Lu. 4:3; Ac. 16:15; Jo. 7:4; 18:23. In Lu. 4:3, εἰ υἱὸς εἰ τοῦ θεοῦ, εἰπέ, we have a good example of the first class condition. The devil would not, of course, use the second class (assumed to be untrue), for that would be an affront to Christ. The third and fourth classes would throw doubt on the point. The temptation, to have force, must be assumed as true. The devil knew it to be true. He accepts that fact as a working hypothesis in the

6 The origin of εἰ is uncertain. Εἰ is the same as ὥς in Homer (and Doric). Lange (Der hom. Gebr. der Partikel Eἰ) makes it exclamatory. But Hale (The Orig. of Subj. and Opt. Cond. in Gk., Harv. Stu. in Class. Philol., 1901) treats it as a demonstrative in the locative case, meaning ‘in that case.’ This is more probable.
temptation. He is anxious to get Jesus to prove it, as if it needed proof for Christ’s own satisfaction and for his reception. If the devil used Aramaic, then we have Christ’s own translation of it or that of the Evangelist. In Jo. 18:23 (εἰ κακῶς ἑλλάσσα, μαρτύρησαν περὶ τοῦ κακοῦ), however, the assumption is not a fact, though Christ treats it as such for argument’s sake. Cf. Lu. 23:35, 37. In Jo. 20:15 note the aorist ind., (εἶ ἔβοστασας) and the imper. (εἷπέ). Blass (Gr. of N. T. Gk., p. 215 takes εἰ θέλεις in the late κοινή to be like the French s’il vous plaît. Cf. Mt. 17:4. For the subj. in the apodosis note Gal. 5:25, εἰ ἥμεν πνεύματι, πνεύματι καὶ στοιχώμεν. The use of ἐὰν with the ind. is rather more frequent in the late κοινή. Finally εἰ came to be “a mere literary alternative.”1 In the κοινή in Pisidia and Phrygia ἐὰν occurs with the aorist ind., the pres. ind. and the future ind. as well as with the subj.2 The papyri examples are unmistakable, as ἐὰν δὲ in Tb. P. 58 (ii/B.C.), ἐὰν οἴδειν B. U. 546 (Byz.), ἐὰν φαίνεται A. P. 93 (ii/A.D.), ἐὰν δὲ εἰςίν O. P. (ii/A.D.), ἐὰν κελεύεις O. P. 1150, 2 f. (vi/A.D.), ἐὰν μαχοῦσιν Par. P. 18, ἐὰντερ ἐκπληρώσοσιν Par. P. 62 (ii/B.C.).3 Radermacher (N. T. Gr., pp. 83, 163) cites others from the papyri and inscriptions. So Heberdey-Wilhelm, Reisen, p. 137, ἐὰν ὑπερ τὴν θήσει; Eum. Hippiatr., p. 244, 30, ἐὰντερ ἐνφίρχσε ἐστίν. Perhaps examples like ἐὰν ὑν are not to be counted as instances, since ὑν for ἵν is sometimes subj.4 In general, the difference between εἰ and ἐὰν is considerably lessened in the κοινή, though it must be remembered that ἐὰν was never confined to the subj. nor εἰ to the ind. and opt. ἐὰν ἦσθα occurs in Job 22:3, and Moulton5 quotes it from Hb. P. 78 (iii/A.D.) as “certainly subj.” Cf. also ἐὰν ἦσαν Tb. P. 333 (iii/A.D.), and a number of undoubted examples of ἐὰν with past, present and future tenses of the ind. from κοινή writers are given in Sophocles’ Lexicon under ἐὰν. Thayer calls it “a somewhat negligent use, met with from the time of Aristotle on.” It was just a normal development in the κοινή till in the modern Greek ἐὰν is used indifferently with either ind. or subj. So ὅτι κανες, ‘if you did so,’ ἐὰν διψάςεις ‘if you thirst’ (Thumb, Handb., p. 194 f.). Theophylact in his Proem to Luke has ἐὰν μὴ ἔθαρμε· In the N. T. we note ἐὰν οἴδαμεν (1 Jo. 5:15); ἐὰν στήκετε (1 Th. 3:8), where the distinction is clear between the two modes (ind. and subj.). In 1 Th. 3:8 ΝΔ have στήκετε, but in Lu. 6:34 there is considerable support for ἐὰν δανείζετε, as there is for ἐὰν τε ἀποθνήσκομεν in Ro. 14:8. In Gal. 1:8 a few MSS. read ἐὰν εὐαγγελίζεται. It is possible to treat ἐὰν μαρτυρῶ as pres. ind., Jo. 5:31; 8:14. There is undue scepticism on Blass’ part concerning ἐὰν and the fut. ind. It is true that the MSS. are generally divided, but there is no real room for doubt about following ΝΒΕΣ in Ac. 8:31, ἐὰν δοθήση, except for possible itacism with – ὅ. That is possible also in Rev. 2:5 where W. H. read ἐὰν μετανοήσης. But there is no room for itacism in Mt. 18:19 ἐὰν συμφωνήσουσιν, supported by ΝΒΔΕΔΔ 33, although rejected by W. H. and Nestle (FGKM have –ωσιν), nor in Lu. 19:40 ἐὰν σιωπήσουσιν, nor in Rev. 2:22 ἐὰν μὴ μετανοήσουσιν. In Mt. 18:19 the editors seem

2 Compernass, De Sermone, p. 35 f.
3 Moulton, Prol., p. 168.
1 Prol., p. 168.
2 Gr. of N. T. Gk., p. 215.
unwilling to follow the MS. evidence for the fut. ind. It is mere tradition to feel that ἐὰν has to have the subj. Besides, we have ἐὰν ἔσῃ and ἐὰν μὴ δοθήσῃ in Hermas, Mand. V, 1. 2 and Mand. IV, 3. 7. In Lev. 22:9 we find ἐὰν βεβηλῶσουσιν.

There is at any rate no great difference in the resultant sense between the fut. ind. and the aor. subj. and it was a very natural development. Cf. Homer’s use of κέ with both. But, when all is said, as a matter of fact, in the N. T. as in the κοινή generally, the rule is for εἰ to appear with the ind. and ἐὰν with the subj. In 1 Cor. 7:5 we have εἰ μήτι ἄν (bracketed by W. H.) without a verb. It is matched by the papyri. Thus B. U. 326 εἰ τι ἐὰν—καταλίπω, O. P. 105 (ii/A.D.) εἰ τι ἄλλο ἐὰν (ἔχω), B. M. 233 (iv/A.D.) εἰ τι ἄν—ἀναλώσῃς, Tp. B. 28 (ii/B.C.) εἰ κἀν δόναται. In these the modal ἄν (ἐὰν) is separated from εἰ and used as if with ὡς, ὅπου. Radermacher [Page 1011] (N. T. Gr., p. 162) cites also Joh. Philop., De œtern., p. 85, 19, εἰ όὐκ ἄν—ὑπάρχῃ. Deissman1 sees no analysis of ἐὰν μή τι in this, though Moulton contends for this explanation. The use of εἰ περίκειται in Mk. 9:42 in the sense of ὅτι Blass (Gr. of N. T. Gk., p. 215) calls “quite incorrect.” He means it is not “classic.” Note the irony in 1 Cor. 14:38, εἰ τις ἄγνοεῖ, ἄγνοεῖται.

The negative of the protasis in the first class condition is practically always οὐ in the N. T. We have εἰ οὐ as a rule, not εἰ μή. In the classic Greek the rule was to use εἰ μή, and εἰ οὐ appeared only where the οὐ coalesced with a single word (the verb generally) or for sharp antithesis or emphasis.2 But in the N. T., as in the κοινή generally and occasionally in the Attic,3 we meet εἰ οὐ in the condition of the first class. Jannaris4 notes 34 examples of εἰ οὐ in the N. T., but Moulton5 finds only 31 of this class of condition. There are only two in the second, so that there is a slight discrepancy. In truth εἰ μή occurs only five times with the simple logical condition, and the examples are not quite normal except the one in Mk. 6:5, όὐκ ἔδωκατο εἰ μὴ ἔθεράπευσην (a simple past condition), and in 1 Tim. 6:3, εἰ τις—μὴ προσέρχεται (Blass calls this an “abnormal” instance from the literary style and unlike the N. T. idiom). But see 1 Cor. 15:2 ἐκτὸς εἰ μὴ εἰκῇ ἐπιστεύσατε, 2 Cor. 13:5 εἰ μὴ ὑπὸ δόκιμοι ἔστε, Gal. 1:7 εἰ μὴ τινὲς ἔστων. Elsewhere the negative is οὐ. This is in harmony with the meaning of οὐ and the ind. mode. The definite negative goes with the definite mode. This is the condition of supposed reality and εἰ οὐ is the natural combination. In general Blass6 is correct in saying that οὐ is the negative of the ind. and μή of the other modes including the inf. and part. This, of course, was not the

3 Moulton, Prol., p. 169.

Jannaris

JANNARIS, A. N., A Historical Greek Grammar (1897).

———, On the True Meaning of the Κοινή (Class. Rev., 1903, pp. 93 ff.).

4 Ib.
5 Prol., p. 171.
Attic standard, but that was hopelessly gone even for the Atticists.⁷ In the modern Greek δὲν (from οὐδὲν) supplants οὐ with the ind. and μὴ(ν) goes with the subj. That is the goal, as Moulton observes,⁸ which is not yet reached in the N. T., for μὴ occurs in questions of doubt with the ind. and εἰ μὴ still holds on. Even in the modern Greek, Thumb (Handb., p. 195) gives δὲν with subj. or ind. in conditions as ὁ δὲν πιστεύης and ὁ δὲν πιέγανα. Radermacher [Page 1012] (N. T. Gr., p. 172) cites Pap. Wess. xxvi, εἰ οὐ δίδοσι. But the point to get clear is that in the first class condition the normal negative in the κοινὴ is εἰ οὐ. Moulton counts the idiom 6 times in Luke, 3 in John, 16 in Paul, 2 in James, and one each in Matthew, Hebrews, 2 Peter and Revelation. As examples take Lu. 18:4 εἰ καὶ τὸν θεὸν οὐ φοβοῦμαι οὐδὲ ἄνθρωπον ἐντρέπομαι and Jo. 1:25 εἰ σὺ οὐκ εἶ ὁ Χριστός. In the latter case the negative is very emphatic. So in Jo. 5:47 εἰ οὐ πιστεύετε. Cf. further Lu. 12:26; 16:11, 31; Jo. 3:12; Ro. 11:21; 1 Cor. 15:13, 15–17; 2 Th. 3:10. Sometimes οὐ practically coalesces with the verb, as in Lu. 14:26; 1 Cor. 7:9; 11:6; 16:22; 1 Tim. 5:8; Rev. 20:15. The notion of contrast is seen in Jo. 10:37 εἰ οὐ ποιῇ, εἰ δὲ ποιῇ. Note also κἀν μὴ πιστεύητε. So in 5:46 f. εἰ πιστεύετε, εἰ δὲ—οὐ πιστεύετε. See further Lu. 11:8; Jas. 2:11; 2 Pet. 2:4. In Mt. 26:42 note εἰ οὐ δύναται τοῦτο παρελθεῖν ἐὰν μὴ πίω. In Jo. 11:21, εἰ οὐκ ἐφείσατο, οὐδὲ σοὶ ἐφείσαται, it is hardly possible to translate εἰ οὐ by ‘unless.’ The same thing is true in 1 Cor. 9:2 and 15:29. Cf. ἐὰν μὴ in 9:16.

(b) Determined as Unfulfilled. In this somewhat difficult condition only past tenses of the ind. occur. The premise is assumed to be contrary to fact. The thing in itself may be true, but it is treated as untrue. Here again the condition itself has only to do with the statement, not with the actual fact. A good illustration is found in Lu. 7:39 οὗτος εἰ ήν ὁ προφήτης, ἐγίνοντοκαί δὲν. The Pharisee here assumes that Jesus is not a prophet because he allowed the sinful woman to wash his feet. Jesus is therefore bound to be ignorant of her true character. The form of the condition reveals the state of mind of the Pharisee, not the truth about Jesus’ nature and powers. As a matter of fact it is the Pharisee who is ignorant. For this reason I cannot agree with Moulton’s statement⁹ that the ind. is not suited to the expression of contingencies, wishes, commands or other subjective conceptions. On p. 201 Moulton recovers himself by saying that “these sentences of unfulfilled condition state nothing necessarily unreal in their apodosis,” and “the sentence itself only makes it untrue under the circumstances.” I should add “as conceived by the speaker or writer.” Surely the ind. is the mode for positive and negative statements, for directness of statement and clarity of expression. But one must emphasize the words “statement” and “expression.” The ind. does not go behind the face value of the record. Most untruths are told in the ind. mode. The [Page 1013] statement of unreality here from the standpoint of the speaker or writer, is as clear cut and positive as that of reality in the first class condition. The term “unreal” as applied to this use of the ind. properly belongs only to the standpoint of the user. To him the case is impossible and he makes a positive statement to that effect with the ind. By the ind. mode the condition is determined. Whether it is fulfilled or unfulfilled is a more difficult matter. This idea has to be conveyed by suggestion. It is not a question of positive or negative, but of

---

definite assumption of unreality. The “unreality” does not come from the ind. That in its origin is a matter wholly of the context. Take Mk. 6:5, for instance, οὐκ ἔδοντα εἰ μὴ ἔδραμεν. In the abstract it is not possible to tell which class of condition we have here. It is either first or second, we know. If the writer is talking about the present time in terms of past time, then it is a second class condition determined as unfulfilled. The Greek fell upon the use of the past tenses of the ind. as a device to help in this matter. An unfulfilled condition about present time was expressed in terms of the imperfect ind. An unfulfilled condition about past time was expressed in terms of the aorist or the past perfect ind. There is the analogy of wishes to justify it, if, indeed, wishes did not come out of this construction (εἰθε, εἰ γάρ). The origin of this precise point is obscure.1 In the context one must seek for light and help. In Mk. 6:5 (οὐκ ἔδοντο εἰκαὶ ποίησαν οὗτοι δύναμιν, εἰ μὴ ὅλης ἄρροστος ἐπιθεός τὰς χεῖρας ἐθεράπευσαν) it is clear that a definite past event is chronicled. So it is a condition of the first class, determined as fulfilled. But in Jo. 15:22 (and 24) εἰ μὴ ἠλθὼν καὶ ἠλάθησα αὐτοῖς, ὁμαρτάν οὐκ ἔχοναν, how is it? Is it a simple historical narrative about a past situation? Is it a hypothesis about the present time in terms of past time to suggest its unreality? Fortunately here the context shows. The very next words are γὰρ δὲ πρόφασιν οὐκ ἔχονσιν περὶ τῆς ὁμαρτίας αὐτῶν. (Cf. also νῦν δὲ in verse 24). The contrast with the present and actual situation is made in plain terms. In Jo. 9:41 we have νῦν δὲ even after ἦν. This is not always done in the context and one is either left to his wits or ἦν is added to the apodosis. In verse 19 of John 15 we have εἰ ἦκ τοῦ κόσμου ἦνε, δὲ κόσμος ἦν τὸ ἱδον ἐφύλαι. “The addition of ἦν to an indicative hypothesis produced much the same effect as we can express in writing by italicising ‘if’”2 or by adding [Page 1014] to the apodosis ‘in that case.’ This is the definite use of ἦν. But it is a mistake to say, as some writers1 do, that ἦν in the apodosis is essential to the second class condition. Even Moulton2 says: “The dropping of ἦν in the apodosis of unfulfilled conditions was classical with phrases like ἐδεί, ἔχοθην, καλὸν ἦν.” The absence was so undoubtedly, but was ἦν ever really necessary with these verbs? When ἦν was used with them, there was a slight change of meaning. The N. T. is in perfect accord with ancient idiom when it has καλὸν ἦν εἰ οὐκ ἔγεννήθη (Mt. 26:24); ἔδοντα εἰ μὴ ἔπεκέληθο (Ac. 26:32); εἰ μὴ ἦν, οὐκ ἔδοντο (Jo. 9:33), not to mention the apodosis alone in Mt. 25:27; Lu. 19:23; Ac. 22:22; 27:21; 2 Cor. 2:2; 12:11; 2 Pet. 2:21. In Ac. 24:19, οὐς ἔδει ἐπὶ σοῦ παρέχαν καὶ κατηγορεῖν εἰ τι ἐχοθαν πρὸς ἐμὲ, it is a mixed cond. (protasis in fourth class) and the apodosis is itself a relative clause. But the idiom goes further than these verbs of propriety and possibility and obligation, as is seen in Gal. 4:15, εἰ δυνατῶν, ἐδόκατέ μοι; Jo. 15:22, 24; 19:11, οὐκ εἶχες, εἰ μὴ ἦν σοι δεδομένον; Ro. 7:7, οὐκ ἔγνων εἰ μὴ διὰ νόμου καὶ οὐκ ἔδειν εἰ μὴ ἔλεγεν. In 1 Cor. 5:10, ἐπεὶ ἅψεστε, we have the apodosis of this condition. Moulton (Prol., p. 200 note) cites O. P. 526 (ii/A.D.) εἰ καὶ μὴ ἀνέβενε, ἑγὼ οὐ παρέβεκαν; O. P. 530 (ii/A.D.) εἰ—παρέκειτο, ἄπεστάλκατε; Rein. P. 7 (ii/B.C.) οὐκ ἄπεστη, εἰ μὴ ἡνάγκασε. But in most cases the ἦν regularly appears

1 Cf. Wilhelmus, De Modo Irreali qui Vocatur, 1881, p. 3. Mod. Gk. no longer has this idiom. It uses ἦν with the past ind. and ἥν in the apodosis for ἦν.
2 Moulton, Prol., p. 200.
2 Prol., p. 200.
in the apodosis, though not as the first word. Thus ἐγένοντο, πάλαι ὁ μετενόησαν (Mt. 11:21). In Ac. 18:14 f. we have the second and first class conditions side by side, εἰ μὲν ἦν δίκημα καὶ ἡ ῥᾳδιούργημα πονηρόν, ὦ Ἰουδαίοι, κατὰ λόγου ἄν ἀνεσχώμην ὡμῶν· εἰ δὲ ζητήματα ἐστίν περὶ λόγου καὶ ὀνομάτων καὶ νόμου τού καθ' ὑμᾶς, ὄψασθε αὐτοί. Here Gallio neatly justifies his own impatience by the first condition (second class) and shows his own opinion by the second condition (first class).

Sometimes ὁν is repeated with two verbs as in ἐγήγορήσετε ὁν καὶ οὐκ ᾧν ἐλάσεν (Mt. 24:43), but it is not repeated in the parallel passage in Lu. 12:39 εἰ ἤδει, ἐγήγορήσεν ὁν καὶ οὐκ ἂθηκέν, though W. H. have one verb in the margin. ᾧν is repeated also in Jo. 4:10.

The simplest form of this condition is when the imperfect occurs in both clauses or the aorist in both. In the former case present time is generally meant, as in Lu. 7:39 εἴ ἦν, ἐγίνωσκεν ὁν; Jo. 5:46 εἰςπετεύετε, ἐπιστεύετε ὁν. So also Jo. 8:42; 9:41; 15:19; [Page 1015] 18:36; 1 Cor. 11:31; Gal. 1:10; Heb. 8:4, 7. In Jo. 8:19, εἰ ἤδειτε—ἄν ἤδειτε, we have the same construction, for this past perfect has the sense of the imperfect. In Heb. 11:15, εἰ ἐμνημόνευον—ἐδέχον ὁν, however, the reference is to past time as the context makes clear. It is descriptive of an unreal hypothesis in the past of a continuous nature. ‘If they had kept on remembering, they would have kept on having.’ This is a classical idiom, though uncommon. Another example is seen in Mt. 23:30, εἰ ἤμεθα ἐν ταῖς ἡμέρας τῶν πατέρων ἦμῶν, οὐκ ἄν ἦμεθα. Only the context can help one tell the kind of condition in 1 Cor. 12:19 and Heb. 7:11, for the apodosis appears in the form of a question without ὁν and the verb. The other normal condition of this class is where the aorist ind. occurs in both clauses, as in Mt. 11:21 εἰ ἐγένοντο, πάλαι ὁ μετενόησαν, Mk. 13:20 εἰ μὴ ἐκκλοῦσεν, οὐκ ἄν ἐσώθη. This refers to past time. Cf. Mt. 25:27; 1 Cor. 2:8; Jo. 14:2; Heb. 10:2 (only apodosis). Sometimes one tense occurs in one clause, another in the other. The standpoint is shifted. Thus in Jo. 14:28 εἰ ἤγαπάτε, ἔχαρπτε ὁν, Gal. 3:21 εἰ ἔδοθη, ὅν ἄν, Heb. 4:8 εἰ κατέπαυσεν, οὐκ ἄν ἔλλει. Cf. also Jo. 15:22, 24. It is not always certain that the present reference of ἔγει can be insisted on, since there was no separate aorist form of εἰμί. Sometimes ἦν is aorist. So as to Jo. 11:21, 32, εἰ, ἦς, οὐκ ἄν ἐπέθανεν. But the point of difference is certainly made in Jo. 18:30, εἰ μή ἦν ποιῶν, οὐκ ἄν παρεδώκαμεν. Cf. Ac. 18:14; Mt. 26:24. In Jo. 4:10, εἰ ἤδεις, οὐ ἄν ἠφίκης, we have the same thing. Cf. also Mt. 24:43. In Ac. 18:14 note in the next verse εἰ δέ ἐστιν, ὄψεσθε (first class). In 1 Jo. 2:19 we have the past perfect in the apodosis εἰ ἠσαν, μεμνήκεισαν ὁν, the solitary example. But the past perfect occurs in the protasis as in Ac. 26:32, ἀπολελύθη οἱ δύνατα, ὅ ἄνθρωπος ὄῦτος εἰ μή ἐπεκέκλητο Καίσαρα. Cf. also εἰ ἐγνώκετε, οὐκ ἄν κατεδικάσατε (Mt. 12:7), though Westcott takes this as a “real imperfect” like ἔδειεν above. The periphrastic past perfect we find in Jo. 19:11 οὐκ ἂν ἐχεῖς, εἰ μή ἄν δεδομένων. Moulton has given a list of the times that ἄν appears in the apodosis in the N. T. with the ind. imperf. (17 times), the ind. aor. (24) and the

1 Cf. Westcott on Heb., pp. 111 ff., for an excellent summary of the second class conditions.
2 Moulton, Prol., p. 201.
3 On Heb., p. 113.
4 Prol., p. 166.
past perfect (1). In Lu. 17:6 we have the pres. ind. and the imperf. combined, εἰ ἐκέθετε, ἐλέγετε ἄν. This is really a mixed condition (first and second classes). Cf. Jo. 8:39, εἰ [Page 1016] ἐστέ, ἐποίεῖ (the margin of W. H.). Radermacher (N. T. Gr., p. 163) quotes P. Oxy. IV, 729 (137 A.D.) ἔδαν δὲ μὴ ἐκώλυσεν Ζεῦς—ἐξῆσεν ἄν, where note ἄν with aorist ind. like the modern Greek ἄν τὸ ἡξερα (Thumb, Handb., p. 195).

The negative of the second class condition is in the N. T. always μὴ except twice, Mt. 26:24 (Mk. 14:21) καλὸν ἂν αὐτῷ εἰ οὐκ ἔγνων Ἰησοῦς. Here the οὐ is very emphatic. Elsewhere we have εἰ μὴ as in Mt. 24:22 (note μὴ in protasis, οὐ in apodosis); Jo. 9:33; 15:22, 24; 18:30; 19:11; Ac. 26:32; Ro. 7:7. In itself εἰ μὴ is three times as common in the N. T. as εἰ οὐ, but outside of the five examples of εἰ μὴ in the first class conditions above and one in the third class (Lu. 9:13) εἰ μὴ is confined to the second class condition and to the elliptical use like πλὴν in the sense of ‘except’ or the phrase εἰ δὲ μὴ meaning ‘otherwise’ without a verb (cf. εἰ μὴ thus in Mt. 12:4; Lu. 4:26; εἰ δὲ μὴ in Jo. 14:11). See a bit later on this point. As already noted, modern Greek uses ἄν δὲν in this condition (Thumb, Handb., p. 195).

(γ) Undetermined, but with Prospect of Determination. This class uses in the condition clause the mode of expectation (Erwartung), the subj. It is not determined as is true of the first and second class conditions. But the subj. mode brings the expectation within the horizon of a lively hope in spite of the cloud of hovering doubt. W. G. Hale² considers that the subj. in this condition is due “to a fusion of volitive subj. and the anticipatory subj.” Monro³ thinks it is the quasi-imperative sense (volitive subj.). He argues that the use of μὴ with the subj. (cf. prohibitions) proves this. But Moulton⁴ replies that “the negative μὴ, originally excluded from this division of the subjunctive, has trespassed here from the earliest times.” So he urges that the subj. with ἄν (as with δὲν) is the futuristic, not the volitive, use. The futuristic subj. in Homer may have οὐ, but usually μὴ with the subj. in conditions, and yet some cases of εἰ οὐ with the subj. occur in Homer when οὐ coalesces with the verb as εἰ οὐκ ἐξέλησεν, Iliad 3. 289, εἰ οὐκ ἔξωσιν, 20. 139. In Jer. 6:8 we still have ἢτις οὐ κατουκισθῇ in B. The truth probably is that in some instances this subj. is futuristic, in others volitive or deliberative. The point is a fine one as one can readily see.

Hale

———, The Cum Constructions (Studies in Class. Phil., 1887).

4 Prol., p. 185.
Gildersleeve\(^5\) finds the [Page 1017] prevalence of the subj. in conditional (as in temporal) clauses due to the greater exactness of the subj. here. It enables one, since it has a “tendency to realization” (Tendenz zur Wirklichkeit),\(^1\) to make a difference between the indicative and the optative conditions, though it has more affinity with the optative, except in the case of some future indicative conditions which come very close to the subj. idea. The kinship in origin and sense\(^2\) of the aorist subj. and fut. ind. makes the line a rather fine one between \(\varepsilon\) and the fut. ind. and \(\varepsilon\) and the subj. Indeed, as we sometimes have \(\varepsilon\) and the fut. ind. in the first class condition, so we occasionally meet \(\varepsilon\) and the subj. in the third class condition. Radermacher (N. T. Gr., p. 162) notes \(\varepsilon\) and subj. at first as a “vulgarism,” but surely the classic usage answers that. The inscriptions have usually only \(\varepsilon\) and aorist subj. he finds. But he finds also abundant instances of \(\varepsilon\) and subj. in κοινή and late writers. So Epictetus, II, 18, 11 \(\varepsilon\) μή τις \(\varepsilon\)ξαλείψη, Vettius, 274, 11 \(\varepsilon\) δέ τις \(\lambdaογίσηται,\) Hippiastr., 177, 2 \(\varepsilon\) προσπήγε\(ς,\) Demetrius, De eloc. 21, 11 \(\varepsilon\) γένηται, Pausianias, II, 35, 3 \(\varepsilon\)—\(\varepsilon\)δρείωνται. So in Lu. 9:13 \(\varepsilon\) μήτις \(\gamma\)θοράς\(ω\)μεν, 1 Cor. 14:5 \(\eta\)κτός \(\varepsilon\) μή \(\deltaιερμη\)νε\(ν\)θη, Ph. 3:12 \(\varepsilon\) καταλάβω (possibly also \(\varepsilon\) πως καταντήσω in verse 11), Rev. 11:5 \(\varepsilon\) τις \(\thetaελήση\) (text of W. H., but margin \(\thetaέλει\) or \(\thetaελήσει\)). In Ro. 11:14, \(\varepsilon\) πως \(\piαραξη\)λωσω \(\kappa\)ι \(\sigma\)ω\(σ\)σω, we may also have the aorist subj. In 1 Th. 5:10 we have \(\varepsilon\) \(\gamma\)ρηγορ\(\omega\)\(μ\)\(ε\)ν \(\varepsilon\) \(\kappa\)αθε\(δ\)\(\omega\)\(μ\)\(ε\)ν. It is in the midst of a final sentence with \(\nu\)να. In 1 Cor. 9:11 some MSS. read \(\varepsilon\) \(\thetaερί\)\(\sigma\)\(\omega\)\(μ\)\(ε\)ν. This construction occurs occasionally in classical Greek. It was frequent in Homer and in the Attic poets, but is rare in our normalized texts of Attic prose, though a few examples occur in Thuc., Plato, Xenophon.\(^3\) This “laxity” increased till finally \(\varepsilon\), like \(\deltaιε\), vanishes before \(\varepsilon\)\(\alpha\)ν (\(\alpha\)ν) which is used indiscriminately with ind. or subj., while \(\varepsilon\) is a mere “literary alternative.” In modern Greek \(\alpha\)ν has driven \(\varepsilon\) out of the vernacular. In Deut. 8:5 AF have \(\varepsilon\) \(\tau\)\(ι\)ς \(\pi\)\(αι\)δεύ\(σ\)η. Cf. Judg. 11:9. Moulton\(^4\) finds the same construction in the papyri as does Deissmann,\(^5\) [Page 1018] though it

\(^5\) Am. Jour. of Philol., 1909, p. 11.
\(^1\) Bäumlein, Griech. Modi, p. 177.
\(^2\) Gildersl. (Am. Jour. of Philol., XXXIII, 4, p. 490) complains that in Germany no standing is given to his distinction between the “minatory and monitory” use of \(\varepsilon\) with the future indicative. He first promulgated it in 1876.

Deissmann

DEISSMANN, A., Bible Studies (1901). Tr. by A. Grieve; cf. Bibelstudien (1895) and Neue Bibelstudien (1897).

———, Biblische Græcität etc. (Theol. Rundschau, Okt. 1912).

———, Die neut. Formel “in Christo” (1892).

is rare in the early papyri. Moulton (Prol., p. 187) cites O. P. 496 (ii/A.D.) ei δὲ Ῥν (=Ῥ), though he seems curiously unwilling to admit the examples in the N. T. As to ἔκτος ei μὴ in 1 Cor. 15:2, we have the ind. with this combination. Deissmann (B. S., p. 118) cites inscr. ἔκτος ei μὴ ἔσται—θελήσῃ. It is true that in the N. T. as a rule ei goes with the ind. and ἔσται with the subj. It is mainly in the future conditions that the line is breaking down. In Mt. 12:29 we have ἔσται μὴ ὄψηται and then διαρπάσει, but W. H. break the sentence into two. Besides the normal ἔσται and the occasional ei in this condition we have also ἔσται (shortened form of ἔσται, not the modal ἔσται). Thus Jo. 12:32 ἔσται ὑστερόθεν, 13:20 ἔσται τινα πέμψω, 16:23 ἔσται τι ἀνήσθητε. It occurs in the N. T. only six times (cf. ἔσται in Jo. 5:19) and all in John. Cf. Ac. 9:2 ἡ. But note Lu. 12:38, κἂν—κἂν ἐλθῇ καὶ εὔρη (contraction of καὶ+ἕσται). Cf. Mt. 21:21; Lu. 13:9. It is absent from the Attic inscriptions, but supplants ἔσται in modern Greek. It is not clear why ἔσται disappeared thus in modern Greek. The Ionic form is Ῥν. The future conditions are naturally the most frequent of all.

Just as the second class condition was debarred from the future, so the third class condition is confined to the future (from the standpoint of the speaker or writer). The first class condition covers past, present and future. In 1 Cor. 10:27 note ei τις καλέι and ἔσται τις εἴπῃ. In Ac. 5:38, ἔσται ἤ and ei—ἔστιν, a real distinction is preserved. Gamaliel gives the benefit of the doubt to Christianity. He assumes that Christianity is of God and puts the alternative that it is of men in the third class. This does not, of course, show that Gamaliel was a Christian or an inquirer. He was merely willing to score a point against the Sadducees. Here, indeed, the supposition is about a present situation, but ἔσται and the subj. contemplate the future result (turn out to be). So ἔσται

2 Prol., p. 187.
3 Cf. Moulton, Prol., p. 43; Meisterh.-Schw., p. 225 f. In Jo. 5:19 we have both uses of ἔσται (conditional and modal). In Mk 5:28 note ἔσται ὑστερόθῃ κἂν τῶν ἴματων, not a repetition of modal ἔσται, but a particle κἂν=’even.’
ἔχειτε in 1 Cor. 4:15; ἐὰν ἐν Mt. 6:22. Ἐὰν θέλης in Mt. 8:2 is future in conception. In Jo. 5:31, ἐὰν μαρτυρῶ (possibly pres. ind.), the idea would be ‘if perchance I bear witness.’ Cf. also 8:14. In such instances the matter may be looked at as a present reality (so ei σκανδαλίζει Mt. 5:29) or a future possibility (so ἐὰν σκανδαλίζῃ, Mk. 9:43). Cf. also ἐὰν ἁγιασθήτη in Mt. 5:46 with ei ἁγιασθῇ in Lu. 6:32 (in verse 33, ἐὰν ἁγιασθοῦτε). In 1 Corinthians 13:17 note ei τάυτα οἴδατε, μακάριοι ἐστε ἐὰν ποιήτε αὐτά. Here we have the first and third class conditions happily combined with clear distinction. Jesus assumes the knowledge as a fact, but the performance is doubtful.

The tense is usually the aorist, though sometimes the pres. subj. occurs. Thus ἐὰν ἄκούσῃ (Mt. 18:15); ἐὰν δύσῃ (Jo. 7:37). In 2 Tim. 2:5 note ἐὰν δὲ καὶ ὅθλῃ τις, οὐ στεφανοῦται ἐὰν μὴ νομίζω τὸθλήσῃ, where the distinction is drawn between the two tenses. I doubt the propriety, however, of reading a future perfect sense à la Latin into ἐὰν μὴ ἄδωμεν. Cf. also Jas. 5:15, κἂν ἦ πεποιηκός. The conclusion of this condition is naturally most frequently the future ind. Thus Mt. 9:21 ἐὰν ἄφωμαι, σωθήσομαι; Jo. 16:7 ἐὰν πορευθῶ, πέμψω; Ac. 5:38 ἐὰν ἐκ ταλαθήσεται. So Mt. 5:13; 28:14; Jo. 7:17; 12:26; 14:15; Ro. 2:26. But this normal apodosis is by no means universal. Thus note οὐ μὴ ἐλθῇ in Jo. 16:7 after ἐὰν μὴ ἀπέλθω. See also Jo. 8:51. Cf. Ac. 13:41. In Mk. 14:31 note οὐ μὴ ἀπαρνήσομαι. The imperative may occur in the apodosis as in Mt. 18:15, ἐὰν ἁμαρτήσῃ, ὑπαγε ἑλεγξόν. So Mt. 10:13; 18:17; 26:42; Ro. 12:20; 13:4; Ph. 2:1. But ofttimes the conclusion is stated in terms of the present either as a present hope or a vivid projection into the future (futuristic present). So in 2 Cor. 5:1, ἐὰν καταλυθῇ, ἔχομεν. The condition is future in conception, but the conclusion is a present reality, so confident is Paul of the bliss of heaven. Cf. Mt. 18:13. In 18:12 both the fut. and the pres. ind. appear in the apodosis. A lively sense of present need is seen in Mt. 8:2. A practical turn is given by the pointed question in Mt. 5:47. In Ro. 14:8 note ἐὰν τε—ἕκατε τε. A maxim often has the pres. ind. in the apodosis. Thus οὐ δύναται οὔδεις—ἐὰν μὴ πρῶτον δήσῃ (Mk. 3:27). Cf. Jo. 8:16, 54; 11:9; 12:24; 1 Cor. 7:39, 40; 2 Tim. 2:5. The pres. perf. is likewise so used, as in Ro. 14:23, ὥς δὲ διακρινόμενος ἐὰν φάγῃ κατακέκριτα. So Jo. 20:23; Ro. 2:25; 7:2. More difficult seems the aorist ind. in the apodosis. The aor. ind. is sometimes timeless as is always true of the other modes (see chapter on Tenses where papyri parallels are given). That may be the explanation here. It is possible also to explain it as a change of standpoint. The protasis looks to the future, while the apodosis turns back to the past. Such vivid changes in language are due to the swift revolution in thought. See Mt. 18:15, ἐὰν ἄκούση, ἐκέρδησα; Jo. 15:6, ἐὰν μὴ τις μένῃ ἐν ἔμοι, ἐβλήθη ἔξω καὶ ἐξηράνθη (cf. ἐξορούσθη ἱνα φέρῃ also of the future); 1 Cor. 7:28, ἐὰν καὶ γαμήσῃς, οὐχ ἵμαρτες καὶ ἐὰν γῆμη ἐκ παθήνως, οὐχ ἴμαρτεν. For a similar idiom see Ignatius, Ep. to Romans 8:3; to Polycarp 5:2. Moulton (Prol., p. 247) cites Epict., ἃν μὲν στρατεύσωμαι, ἀπελλάγην. See also Abbott, Joh. Gr., p. 586. In Mk. 10:30, ἐὰν

---

2 Prol., p. 186.
μὴ λάβῃ, we have ἐὰν μὴ almost in the sense of ὃς μή. Cf. also ἔδω μή ἣν in Mk. 4:22. The use of εἰ or and ἔδω μή side by side is seen in Mt. 26:42, εἰ εὖ δύναται τοῦτο παρελθεῖν ἔδω μὴ αὐτό πίω. Cf. also Jo. 10:37, εἰ οὐ πιστεύει καὶ άν μὴ.

(δ) Remote Prospect of Determination. Hale1 attributes “the Greek optative assumption to a fusion of the true opt. and the potential opt.” The use of the opt. in the protasis of this condition is probably volitive, since the negative2 is μὴ. That is certainly true of the optative in wishes with εἰ or εἰ γάρ (εἴθε).3 But the deliberative use occurs a few times with εἰ in indirect questions. The potential opt. in the apodosis with ὃς is more difficult to explain. It is certainly not volitive any more, not more than mere fancy (Vorstellung), the optative of opinion,4 and apparently futuristic. This fourth class condition is undetermined with less likelihood of determination than is true of the third class with the subj. The difference between the third and fourth classes is well illustrated in 1 Pet. 3:13 f. So Jesus draws a distinction in Lu. 22:67. The use of the opt. in both apodosis and protasis accents the remoteness of the hypothesis. And yet it is not in the category of unreality as in the second class. It floats in a mirage, but does not slip quite away. It is thus suitable not merely for real doubt, but it also fits well the polite temper of courteous address. It is evident that this condition will be comparatively infrequent. It is an ornament of the cultured class and was little used by the masses save in a few set phrases (or wishes). It is not strange, therefore, that no complete example of this fourth class condition appears in the LXX, the N. T. or the papyri so far as examined.5 Radermacher (N. T. Gr., pp. [Page 1021] 133, 143) with all his diligence produces no example of the opt. in both condition and conclusion in the current κοινή. In the modern Greek it has disappeared completely. In the N. T., as in the LXX, the instances of the protasis are very few. Moulton1 notes only 13 in the LXX apart from the Atticistic 4 Maccabees. Of these he observes that 2 are wishes, 5 are cases of ὃς (περ) εἰ τίς and 2 are indirect questions. There are in the N. T. only 11 examples. Some of these are indirect questions. Thus in ἔλεγον εἰ βούλοιτο πορεύεσθαι (Ac. 25:20) we have the opt. of ind. discourse. The direct was εἰ βούλη. The same thing is true of 27:39, ἐβουλεύοντο εἰ δύνατο ἐκσώσει τὸ πλοῖον. There is implied indirect discourse or purpose (cf. the classic use of εἰ for purpose).2 So we see aim in Ac. 17:27, ἔδωκεν εἰ ἄρα γε γηλαφήσειν αὐτόν καὶ ἐφοβεῖν, and 20:16, ἐσπευδέων εἰ δύνατον εἶναι. In 27:12, εἰ ποιεῖ δύναντο, we have both purpose and implied indirect discourse. In 24:19, εἰ τί ἔχοιεν, the protasis is more nearly that of the proper fourth class condition, but even so it is a mixed condition, since the apodosis ἔδωκε belongs to the second class. Blass3 ventures to suggest ἐς τι ἔχοιεν as more correct. But it is needless to change the text. These examples are all in Acts, one of the more literary books of the N. T. Paul has only the stereotyped phrase εἰ τύχη (1 Cor. 14:10; 15:37), which is a true example of this protasis, “if it should happen.”

2 Moulton, Prol., p. 196.
5 Moulton, Prol., p. 196.
1 Ib.
2 Monro, Hom. Gr., p. 228 f.
3 Gr. of N. T. Gk., p. 221.
two other examples are in 1 Pet. 3:14 εἰ καὶ χάσχοι τε διὰ δικαιοσύνην, μακάριοι, and 3:17 κρείβετον ἡμασθοποιούντας, εἰ θέλει τὸ θέλημα τοῦ θεοῦ, πάσχειν. The idiom is a mere torso, as is evident. In O. P. 1106, 7 (vi/A.D.), εἰ γάρ ἐπιμένοιες, πλήθος ἐπιστήσεται στρατιωτικὸν, we have a mixed condition.

The apodosis with ἄν (the less definite ἄν) is more frequent and occurs both in direct and indirect discourse. Since the potential opt. in the N. T. never occurs in connection with the protasis, the matter was discussed sufficiently under The Optative Mode in Independent Sentences (see this chapter, III, 3, (b)). This potential opt. is practically the apodosis of an unexpressed protasis. But the exx. occur in questions save one (Ac. 26:29). Twice the questions are direct (Ac. 8:31; 17:18). The rest are indirect (opt. preserved as in the direct). Cf. Lu. 1:62 τί ἄν θέλειν, εἰπεται στρατιωτικόν, we have a mixed condition. The disappearance of this opt. condition led to the enlarged use of the first and third classes. In Ro. 3:6 and 1 Cor. 15:35 the fut. ind. is used where the potential opt. would have suited the Attic idiom.1

(c) Special Points.

(a) Mixed Conditions. The human mind does not always work in stereotyped forms, however excellent they are. Grammatical construction is merely the expression of the mental conception. Freedom must be acknowledged without any apology. I say these somewhat commonplace things because of the bill of “exceptions” which meet us in so many grammars at this point. It would have been a miracle if the four classes of conditions were never “mixed,” that is, if the protasis did not belong to one class, while the apodosis fell in another. In P. Goodsp. 4 (ii/B.C.), εἰ ἔρροσα, ἐή ἄν, we have the protasis of the first class and the apodosis of the fourth. Radermacher (N. T. Gr., p. 132) quotes Pastor Hermae, Sim. IX, 12, 4 οὐδὲς εἰσελέσεται εἰ μὴ λάβοι, Theoph. Ad Autolycum εἰ γάρ λάβοι—ἐκκαύσει. Thus in Lu. 17:6, εἰ ἔχετε, ἔλεγετε ἄν, we have a protasis of the first class (determined as fulfilled) and the apodosis of the second (determined as unfulfilled). The same thing is true of the marginal reading in the text of W. H. in Jo. 8:39, εἰ ἔστε, ἐποιεῖτε. In Ac. 24:19, οὖς ἔδει ἐπὶ οὐ παρέναι καὶ κατηγορεῖν εἰ τι ἔχοιν πρὸς ἐμε, we find a protasis of the fourth class with an apodosis of the second class. Then again in Ac. 8:31, πῶς γάρ ὃν δύναμιν ἄν μὴ τις διηγήσει με; we have a protasis of the first class (barring itacism) and an apodosis of the fourth. The examples like 1 Cor. 7:28 do not amount to mixed condition, since it is merely a question of the standpoint in time of the apodosis, though this apodosis does more naturally go with the first class condition. There may be two protases, as in 1 Cor. 9:11, and both of the same class, or the two may belong to different classes, as in Jo. 13:17.

(b) Implied Conditions. Sometimes the apodosis is expressed, while the protasis is merely implied by a participle, an imperative or a question. In such examples one must not think that the participle, for instance, means ‘if.’ Thus in Ro. 2:27 τελοῦσα

1 Blass, Gr. of N. T. Gk., p. 220.
with κρινεῖ suggests a condition of either the first or the third class according as one conceives it. The condition is hinted at, not stated. The same thing is true of λαµβανόµενον in 1 Tim. 4:4 [Page 1023] and μετατιθεµένης in Heb. 7:12. Cf. also Heb. 2:3; 1 Cor. 11:29; Gal. 6:9. This use of the participle is still very frequent in the N. T. In Mt. 16:26 we have έδών κερδήση, while in Lu. 9:25 note κερδόσας. In Lu. 19:23, καγὼ ἐξθών σύν τόκῳ ἄν αὐτό ἔπραξα, the apodosis calls for a condition of the second class (context). The imperative is used where a protasis might have been employed. Thus in Mk. 1:17, δὲ ἐπή δεύσα µου, καὶ ποιήσα. The adverb δὲ ὑπὲρ has the force of an imperative. There is an implied condition here. So also 11:24, πιστεύετε καὶ ἐπιστεύετε, καὶ ἐλθὼν σὺν τῷ ἀντί. The imperative is used where a protasis might have been employed. Thus in Mt. 16:26 we have ἐὰν κερδήσῃ, while in Lu. 9:25 note κερδήσας. In Lu. 19:23, κἀγὼ ἐλθὼν συν τῷ κόσµῳ δὲ τῷ ἐπράξα, the question takes the place of the protasis. Here καὶ joins the two parts of the sentence, but in Jas. 5:13 we have question and imperative in separate sentences. Cf. also 1 Cor. 7:21. These devices are all found in the classic idiom.

(γ) Elliptical Conditions. An incomplete condition is really a species of ellipsis or aposiopesis and is common to all languages. 4 Ellipsis of the copula in the apodosis (1 Cor. 12:19) or the protasis (Ro. 8:17) is not the point. That is, of course, common. So Ro. 4:14; 8:17; 11:16; 1 Cor. 7:5; 1 Pet. 3:14; 2 Cor. 11:16. There may be the absence of either protasis or apodosis. The apodosis is wanting in some instances. The suppression of the apodosis in Lu. 13:9, κἂν μὲν ποιήσῃ καρπὸν εἰς τὸ µέλλον— amounts to aposiopesis. 5 See also 19:42, εἰ ἔγνω καὶ σὺ. Cf. further Mk. 7:11; Jo. 6:62; Ac. 23:9. In Lu. 22:42 the aposiopesis disappears from the text of W. H. (παρένεγκε, not παρενεγκέ). In 2 Th. 2:3, εἴδον µὴ ἔλθῃ, we have a mere anacoluthon as in Ph. 1:22. These protases belong to either the first, second or third classes. The lonely protases of the fourth class discussed above (cf. 1 Pet. 3:14, 17) come in here also. We have a species of anacoluthon. The structure of the sentence is changed so that the corresponding apodosis does not follow. In the same [Page 1024] way (suppression of apodosis) is to be explained the use of εἰ like ἔλθῃ in the sense of ‘not,’ in solemn oaths or questions. The apodosis is wanting. So εἰ δοθήσεται ἔλθῃ γενέσθαι ταύτη σηµεῖον (Mk. 8:12). So Heb. 3:11 (4:3, 5) εἴ ἔλευσονται (Ps. 94–95:11). This is aposiopesis. The full expression is seen in Gen. 14:23; Num. 14:30; 1 Sam. 14:45. It is an apparent imitation of the Hebrew idiom, though not un-Greek in itself. Radermacher (N. T. Gr., p. 184) treats this idiom in Mk. 8:12 as due to translation from the Hebrew (Aramaic). Analogous to this is εἰ µὴν ἐλθῇ in Heb. 6:14, if εἰ is not really ἦν changed by itacism (cf. Ezek. 33:27; 34:8). Hort 1 holds to the difference between εἰ

1 App., p. 151.
μήν and ἦ μήν and would take εἰ in Heb. 6:14 as the true εἰ. But Moulton\textsuperscript{2} makes out a good case from the papyri and the inscriptions for taking it as merely a variation of ἦ μήν. He finds eleven papyri examples of εἰ μήν from ii/B.C. to i/A.D. Particularly clear is the Messenian Mysteries inscr., Michel 694, εἰ μὴν ἔξειν. If so, it does not come in here. But the use of εἰ in questions is pertinent. Thus εἰ ὤλγοι οἱ σωζόμενοι; (Lu. 13:23). Cf. Mt. 12:10; Lu. 12:26; 22:49; Ac. 17:27; 19:2. Radermacher (\textit{N. T. Gr.}, p. 136) takes εἰ in questions = ἦ as in Lu. 22:49. This is possible on grounds of itacism, but it does not entitle Radermacher to say “werden muß.” The use of the condition in the sense of “to see if” borders on this elliptical construction. Something has to be supplied before the protasis in order to make the idea clear. The apodosis is virtually contained in the protasis. It is a classic\textsuperscript{3} idiom and reappears in the papyri.\textsuperscript{4} So O. P. 743, ὁλος διαπονοῦμαι εἰ Ἑ. χαλκοῦς ἄπολεσεν. The protasis here may conform to the first class condition as in εἰ ἔξει (Lu. 14:28); εἰ ποι ἢ ὧν ὀτε εὔοδοθήσομαι (Ro. 1:10). So Mk. 11:13; Ac. 8:22. In Ph. 3:12, εἰ καὶ καταλάβου, we have the third class and possibly also in Ro. 11:14. But in Ac. 27:12 it is the fourth class, εἰ ποις δύναντο. The use of εἰ in the indirect question, as in Mk. 3:2, εἰ θεραπεύσα, corresponds closely with the preceding. Cf. also 11:13. The same thing is true of εἰ in the sense of ὅτι, as in Ac. 26:23. This is also true of εἰ with verbs of wonder, as in Mk. 15:44; Ac. 26:8.

The protasis itself is sometimes abbreviated almost to the vanishing point, as in εἰ μή without a verb, in the sense of ‘except’ (Mt. 5:13). Here εἰ and μή seem to coalesce into one word like πλήν. Cf. 11:27, οὐδεὶς ἔπιηνὼσκει τὸν υἱὸν εἰ μὴ ὁ πατὴρ. This is very common as in classic Greek. Sometimes we have εἰ μὴ μόνον as in \textit{Page 1025}\textsuperscript{5} Mt. 21:19. The origin of this use of εἰ μή was the fact that the verb was identical with the preceding one in the apodosis and so was not repeated. From this ellipsis the usage spread to mere exceptions to the previous statement, a limitation simply. Εἰ μή may make exception to a preceding negative as in Gal. 1:19, ἐθερον δὲ τῶν ἀποστόλων οὐκ ἔδον εἰ μὴ Ἰακώβου τὸν ἀδελφὸν. The effect here is to make εἰ μή seem adversative instead of exceptional. Cf. Mt. 12:4. For ἔδον μή in this construction see Gal. 2:16. In 1 Cor. 7:17 εἰ μὴ has the sense of ‘only’ and is not to be construed with περιπατεῖτο. The use of εἰ μή occurs in questions expecting a negative answer, as in Mk. 2:7, τίς ἰδών ἤθελεν ἤθελεν εἰ μὴ ἔλεγεν ὁ θεός; In 1 Cor. 7:5, εἰ μὴ τί (ἡμεῖς) added and possibly also ἄν. B here omits ἄν, possibly to “ease a difficulty” as Moulton\textsuperscript{1} suggests. If genuine, it would be a sort of analysis of ἄν into εἰ ἄν that occurs in the illiterate papyri. For examples see under 8, (b), (a). For εἰ μὴ with the subj. pres. see 2 Cor. 13:5 and the subj. aorist. See Lu. 9:13. The use of ἐκτὸς εἰ μὴ probably comes by analogy from ἐκτὸς εἰ (cf. Latin nisi), but it occurs in the N. T. without verbs only in 1 Tim. 5:19. Elliptical also are εἰ μὴ ἵνα (Jo. 10:10); εἰ μὴ ὅτι (2 Cor. 12:13); εἰ μὴ ὅταν (Mk. 9:9). In Jo. 14:11 note εἰ δὲ μή in the sense of ‘but if not,’ ‘otherwise.’ Cf. Mk. 2:21; Rev. 2:5, 16. For εἰ δὲ μή see Lu. 5:36. Other forms of εἰ used elliptically are εἰ περ (Ro. 3:30); ὅσει (Mt. 3:16);
οὐσπέρει (1 Cor. 15:8). Εἰ δὲ μὴ καὶ εἰ δὲ μὴ γε γε became such fixed phrases that they occur even when the preceding sentence is negative (Mt. 9:17) or where ἐὰν μὴ would be more natural (Lu. 10:6, where the phrase answers to ἐὰν ἂν). Cf. Lu. 13:9. In Jo. 14:2, εἰ δὲ μὴ, ἐπεν ἂν, the conclusion is expressed.

In 2 Cor. 10:9 we have ὡς ἂν without a verb = ‘as if.’ It is common to have ἐὰν — ἐὰν (1 Cor. 8:5) without the verb. The use of καὶν without the verb is also found in the sense of ‘if only,’ ‘at least.’ So in Mk. 5:28; 6:56. In 2 Cor. 11:16 we have both εἰ δὲ μὴ γε καὶ καὶν (δὲξιςθε to be supplied). In Lu. 12:38 note καὶν — καὶν. The suppression of the protasis occurs in all the examples of the potential opt. already discussed, as in Ac. 26:29. Even in the deliberative questions of the opt. with ἂν the same thing is true. Cf. Ac. 17:18 (direct); Lu. 1:62 (indirect). The protasis is also suppressed sometimes with ἐπεί. Cf. 1 Cor. 15:29, ἐπεί τί ποιήσουν; Here a protasis of the first or (more probably) of the third class must be supplied. So in Ro. 3:6; 11:6.

5 Thayer’s Lexicon.
Much more common is εἰ καί. This phrase means ‘if also.’ Here the protasis is treated as a matter of indifference. If there is a conflict, it makes no real difficulty. There is sometimes a tone of contempt in εἰ καί. The matter is belittled. There is often some particle in the conclusion in this construction as in Lu. 18:4, εἰ καί τὸν θεὸν οὖν φοβοῦμι οὕδὲ ἄνθρωπον ἐνερέσωμι, διὰ γε τὸ παρέχεται, κτλ. Note γε as in 11:8. Cf. Col. 2:5, εἰ καί—ἀλλά. [Page 1027] There is considerable variety with εἰ καί. Thus in 2 Cor. 7:8 we have a condition of the first class (so Lu. 11:8; 18:4, etc.), while in 1 Pet. 3:14, εἰ καί πάσχοντε, we have one instance of the fourth class. With ἔδαι καί and the subj. we find, of course, the third class. So Gal. 6:1, ἔδαι καί προλεμφθη. Cf. 2 Tim. 2:5. In 1 Cor. 7:28, ἔδαι καί γαμήσῃς, the notion is ‘if even’ rather than ‘also’ (cf. καί ἔδαι γήμη). In Mt. 18:17 note ἔδαι παρακούσῃ αὐτῶν and ἔδαι δὲ καὶ τῆς ἐκκλησίας παρακούσῃ. There is nothing peculiar about Ro. 14:8, ἔδαι τε ζωμεν—ἔδαι τε ἡ σοθνήσκομεν. (Cf. Ex. 19:13.) Cf. εἴτε—εἴτε with the ind. (1 Cor. 3:22) or the subj. (1 Th. 5:10). The use of the participle for concession (see καίτερ ὄν, Heb. 5:8) will be treated under the Participle. For the use of καί even after ἔδαι see Mk. 5:28.

(c) Other Particles with ἐὰ and ἔδαι. These have no effect on the condition as a distinct class, though they modify the precise idea in various ways. This point will be treated more exactly under Particles. But note εἰ ὧρα (Mk. 11:13; Ac. 8:22); εἰ γε (Eph. 4:21); εἰ ὧρα γε (Ac. 17:27 opt.); εἰ γε καί (2 Cor. 5:3); εἰ δὲ μήγε (Lu. 5:36); εἰ οὖν (Mt. 6:23; Heb. 7:11); ἐπερ (Ro. 3:30); ἔπερ (Heb. 3:14; 6:3); εἰ πος (Ro. 1:10, the fut. ind.; Ac. 27:12, the opt.). In Mk. 8:23 εἰ τι is in direct question.

9. INDIRECT DISCOURSE (Oratio Obliqua).

(a) Recitative ὅτι in Oratio Recta. Direct quotation is more frequent in primitive language, in the vernacular, and in all vivid picturesque narrative. It is the dramatic method of reporting speech. It is natural in Homer, in the Old Testament and in the Gospels, in Aristophanes and in Shakespeare, and in Uncle Remus. The prolonged indirect discourse in Thucydides and in Livy, in Xenophon and Caesar, is more or less artificial. In the LXX little use is made of indirect discourse. The direct quotation may not be as verbally exact as the indirect, but it is more lively and interesting. As a rule the direct discourse is simply introduced with a word of saying or thinking. The ancients had no quotation-marks nor our modern colon. But sometimes ὅτι was used before the direct quotation merely to indicate that the words are quoted. We find this idiom occasionally with ὅτι, more seldom with ὧς, in the Attic writers. It is very rare in the LXX, since the Hebrew so frequently has a special participle like ‘saying.’ But see Gen. 28:16. In the N. T. Jannaris counts 120 instances of recitative ὅτι. [Page 1028] The idiom appears chiefly in the historical books. See Mt. 7:23, ὤμολογήσω ὅτι οὖν δέποτε ἔγνων ὑμᾶς. This particular instance can be looked upon as indirect discourse, since the person is the same in both clauses and the tense and mode are unaffected. It is probable that indirect declarative clauses grew out of constructions of this nature. But in Mt. 27:43, ἔπεν ὅτι θεοῦ εἰμὶ υἱός, there is no doubt at all. See

1 Burton, N. T. M. and T., p. 130.
3 Viteau, Le Verbe, p. 50; but see on the other hand Con. and Stock, Sel., p. 114.
26:74, ὃμνύειν ὅτι οὐκ ὕδα τὸν ἀνθρωπον, and 26:75, εἰρηκότος ὅτι πρὸν ἀλέκτορα φιλήσαι τῆς ἐπαρνήσις με. So Mk. 1:37; 2:12, 16; 4:21; 8:28; Jo. 10:36; Ac. 25:8; Ro. 4:17. In Mt. 16:7 we have (W. H., but R. V. marg. has causal) recitative ὅτι (ὅτι ἄρτους οὐκ ἐλάβομεν); while in verse 8 the indirect (probably causal) use, ὅτι ἄρτους οὐκ ἔχετε; In Mk. 6:23 (W. H. marg.) we have a direct quotation with ὅτι, in Mt. 14:7 the same thing appears as indirect discourse without ὅτι. In Jo. 10:34, ἀπεκρίθη—οὐκ ἔστιν γεγραμμένον ὅτι ἔγω ἐπέ τοι ἐστε, note a treble direct quotation, once with ὅτι and twice without. In Jo. 1:50 the first ὅτι is causal, the second is indirect discourse. The ὅτι in the beginning of Jo. 20:29 is causal. In Jo. 20:18 ὅτι is recitative, causal in 3:18, declar. in 3:19. It is doubtful whether first ὅτι is recitative or causal in Jo. 21:17. In Ro. 3:8, ὅτι πιστεύετε (Mt. 19:9) or without κοινή may occur before direct questions as in Mk. 4:21; 8:4. It continues common in the N. T. shows occasionally the same construction. In a case like Jo. 1:50, εἶπον σοι ὅτι

(b) Change of Person in Indirect Discourse. Sometimes this was not necessary, as in Jo. 18:8. So in Mt. 16:18, κἂν ὦ δὲ σοι λέγω ὅτι σὺ εἰς Πέτρος, there is no change in the second person. Cf. also Jo. 11:27; Gal. 2:14. But in Mt. 20:10, ἐνόμισαν ὅτι πλέον λήμμονται, the direct discourse would have λήμμομέθα. So Lu. 24:23. Compare ἐλάβομεν in Mt. 16:7 with ἔχετε in v. 8. Note τί φάγωμεν (direct) in Mt. 6:31, but τί φάγητε (indirect) in 6:25. In Mk. 9:6, οὗ γὰρ ἥδει τί ἀποκριθή, the direct would be τί ἀποκριθήν. [Page 1029] The person may be both ways in the same sentence, as in Ac. 1:4, παρήγγελεν—παριμένειν τὴν ἐσχάλειαν τοῦ πατρὸς ἢν ἕκοψατέ μου. See further under Mixture.

(c) Change of Tense in Indirect Discourse. Mr. H. Scott objects to the wide scope here given to the term “indirect discourse” to cover “object clauses” after ὅτι, κτλ., but I conceive the principle to be the same. After primary tenses there is, of course, no change in mode or tense. Note Mt. 16:18 above. See also Mk. 11:24, πιστεύετε ὅτι ἔλαβετε καὶ ἔστων ὑμῖν. It is only after secondary tenses that any change occurs. Usually even then there is no change of tense in Greek. Thus ὅτι ήκονον ὅτι ἔστων (Mk. 6:55). So with θαύμαζεις ὅτι βασιλεύει—ἐφοβήθη (Mt. 2:22). So ἦλπιζομεν ὅτι αὐτῶς ἔστων (Lu. 24:21). See also Mt. 21:45; Mk. 6:49; Lu. 1:22; Jo. 2:17; 6:24. Cf. Gal. 2:14, εἶδον ὅτι οὐκ ὅρθοσοδοῦσιν. So Jo. 11:13. In Jo. 21:19 the future ind. is retained after ἐπέλεσεν σημαίνον. Cf. Mt. 20:10. So in Lu. 5:19 the aorist subj. occurs. In Mk. 2:16 we have ὅτι έσθιεν twice, the first in ind. discourse and the second with interrogative ὅτι. But sometimes the ancient Greek, even the Attic,1 used a past tense of the indicative in ind. discourse where the direct had the tenses of present time. The N. T. shows occasionally the same construction. In a case like Jo. 1:50, εἶπον σοι ὅτι

2 Thumb, Handb., p. 192. Jann., Hist. Gk. Gr., p. 472. Καὶ τότες εἶπε πῶς Δέ σου τὸ λεγα ἐγώ; ‘then he said, Didn’t I tell you so?’

1 Cf. Goodwin, M. and T., p. 263.
(d) Change of Mode in Indirect Discourse. The rule with the Greek was not to change the tense. The mode after past tenses, with more freedom, was either retained or changed to the corresponding tense of the optative mode. The optative, as the most remote in standpoint of the modes, suited this idiom very well. The imperfect and past change the tense. The mode after past tenses, with more freedom, was either retained, though even here the optative sometimes appeared. When the aorist optative represented an aorist indicative of the direct, the opt. represented past time. Usually the optative and subjunctive are future as to time. We have the optative in the N. T. in indirect discourse only in Luke. It was in the κοινή a mark of literary care, almost Atticism, quite beyond the usual vernacular. And with Luke the idiom is almost confined to indirect questions. Luke never has the opt. after ὅτι or ὥς. Once (Ac. 25:16) in a subordinate temporal clause the optative occurs where the subj. with (cf. Lu. 2:26) or without ὅν would be in the direct, πρὶν ὅ ἐξῆς—τε λάβω. And even here ὅν ἔστην after ὅτι comes just before. This change in the subordinate clause was also optional in the ancient idiom. If ὅν was used with the subj. in the direct it was, of course, dropped with the change to the optative in the indirect. Similar to this is the use of εἰ and the optative with dependent single clause either as protasis with implied apodosis or purpose like εἰ γιναφίστας (Ac. 17:27); εἰ δυνατόν εἶ (20:16); εἰ πως δύνασθαι (27:12). Here after primary

2 Cf. Robertson, Short Gr., p. 181. As a matter of fact, the primitive method in oratio obliqua was probably this very change of tense as in Eng. We have it more frequently in Hom. than the change of mode or the graphic retention of tense. Cf. Thompson, Synt. of Attic Grk., p. 402.
1 In archaic Lat. the ind. was used in indirect discourse as in Gk. Cf. Draeger, Hist. Synt., Bk. II, p. 460.
2 Goodwin, M. and T., p. 263.
3 Madvig, Bemerk. über einige Punkte der griech. Wortfüg. 1848, p. 23.
tenses we should have ἐὰν and the subj. or εἰ and the future ind. Cf. Ph. 3:12; Ro. 1:10. Cf. τί γράφω in Ac. 25:26. As already explained also, the indirect questions with εἰ and the [Page 1031] optative (Ac. 25:20; 27:39) are instances where the indicative would be used in the direct. Even in indirect questions Luke usually keeps the mode of the direct. So the indicative as in τὸ τίς δοκεῖ (Lu. 22:24), the subjunctive as in τὸ πῶς ὀφείλει (22:4) or the optative as in τὸ τι πῶς θέλει (1:62). The indicative is never changed to a subjunctive as in Latin. When the subj. in Greek occurs in an indirect question it does so because it was the subj. in the direct. Thus οὐ γὰρ ἤρει τί ὀποκριθή (Mk. 9:6). Cf. Mt. 6:25, 31, τί φαγήτε, τί φάγωμεν. So Lu. 22:2, 4; Ac. 4:21. Cf. subj. with ἣνα after secondary tenses (Ro. 1:13; 1 Pet. 4:6). The use of the optative (as distinct from subj.) in indir. discourse was a Greek development. We see the beginning of it in Homer. The optative, however, does occur in Lu. (18:36, W. H. text, margin ὀν) in an indirect question where the direct had the indicative. Cf. πότε ὦτις ἐς (1:29). So 8:9, ἐπηρέατο τίς ἐη. In Ac. 21:33, ἐπηρέατο τίς ἐη καὶ τί ἐστιν πεποιηκώς, both constructions occur side by side. The variation here in the mode (retention of the ind.) gives a certain vividness to this part of the question. See Optative in Paratactic Sentences where the κοινή parallels are given. In γίνοιτο κρατεῖν πάσης ἡς ἄν αἱρῆσθε χώρας, P. Par. 26 (b.c. 163), there is no sequence of mode. The subj. is with the indefinite relative and the opt. is a wish. It has been already (under Optative) shown that ὀν and the opt. in an indirect question is there because it was in the direct (cf. Ac. 17:18, τί ὀν θέλοι; with Lu. 1:62, τὸ τι πῶς θέλοι). Sometimes, one must admit, the difference between the two is reduced to a minimum, as in the papyri occasionally. So in Lu. 9:46, τὸ τίς ἐη (cf. τὸ τις ἐη in Lu. 22:23). See also Lu. 15:26; Ac. 10:17. But there is always a shade of difference. The manuscripts reflect this haziness in the variations between ind. and opt. as in Lu. 22:23; Ac. 2:12, et cet. In Lu. 3:15, μη ποτε ἐη, we also have the opt. in an indir. question. Radermacher (N. T. Gr., p. 165) quotes Diod. I, 75, 5, ἐπειδῶν—πρόσθοιτο. The Atticists used it often.

(e) The Limits of Indirect Discourse. It is not always easy to draw the line between indirect discourse and other constructions. Thus Jannaris uses it only for declarative clauses with ὅτι or ὃς. Burton confines it to indirect assertions and indirect questions, but admits that it also covers indirect commands and promises. Take Mt. 14:7, ὃμολογησέντες αὐτή δοῦναι ὃ ἐδώκεσίν. The infinitive [Page 1032] δοῦναι is the direct object of the verb and does not seem to be in indir. discourse, for in Mk. 6:23 the direct form has ἔδωκα. But, after all, it is practical indir. discourse, though the analogy of tense construction breaks down in this instance. But note fut. infinitive with ὃμοσαν in Heb. 3:18, according to the principle of indirect discourse. On the whole it is best to consider three classes or kinds of indirect discourse: declarative clauses, indirect questions, indirect commands.

(f) Declarative Clauses (Indirect Assertions).

1 Moulton, Prol., p. 198.
3 N. T. M. and T., p. 131. So most of the grammars.
(a) ὅτι and the Indicative. There is no clear instance of ὡς in this sense in the N. T. It was common in the ancient Greek. Just as final δεικτικός retreated before ἵνα, so declarative ὡς did before ὅτι. In late Greek ἵνα monopolized the field as a final particle and divided it with ὅτι as a declarative conjunction. We do have ὡς in indirect questions a few times as will be shown. This is more likely the meaning even in Ac. 10:28, ἐπιστασαίη ὡς ἰδημίωτον. Reeb3 points out that Demosthenes uses ὡς for what is false and ὅτι for what is true. The German wie is used like ὡς with verbs of reading, narrating, testifying. With these verbs ὡς is more than just ὅτι (‘that’). ὅτι expresses the thing itself and ὡς the mode or quality of the thing (Thayer). With this explanation it is possible to consider it as declarative, though really meaning ‘how.’ Cf. Lu. 24:6, μνήσθητε ὡς ἔλαλησεν. So in Lu. 8:47 with ἀπαγγέλλω, 23:55 after θεάομαι, Ac. 10:38 after αἴδα, Ac. 20:20 with ἐπισταμαί, Ro. 1:9 with μάρτυς (so Ph. 1:8; 1 Th. 2:10). The manuscripts vary in some passages between ὡς and ὅτι and πῶς. W. H. bracket ὡς in Lu. 6:4 and read πῶς in Mk. 12:26 and ὅτι in Jude 5, though ὡς is retained in 7.4 In all these passages it is possible to regard ὡς as the ‘how’ of indirect question rather than declarative. The encroachment of πῶς on ὅτι is to be noticed also. Cf. Mt. 12:4 after ἀναγνώσκω (and Mk. 12:26), Mk. 12:41 after θεώρομαι, Mk. 5:16 after διηγόμαι, Lu. 14:7 after ἐπέχων, Ac. 11:13 after ἀπαγγέλλω (so 1 Th. 1:9). In the later Greek πῶς comes gradually to be equivalent to ὅτι.5 Gradually πῶς gained the ascendancy over ὅτι till in the modern Greek it became the regular declarative particle. See Thumb, Handb., p. 190. In Ro. 10:15; 11:33, ὡς is exclamatory. The κοινή writers and the papyri show this same retreat of ὡς before ὅτι and the inroad of πῶς on ὅτι (Radermacher, N. T. Gr., p. 159). Cf. B. U., I, 37 (51 A.D.), ὅδε πῶς—χρῆζω, and Epictetus often after ὅραο. There is, however, no doubt of the use of ὡς ὅτι in the declarative sense=‘that.’ It is an unclassical combination, but it appears in the LXX (Esther 4:14) and in the κοινή writers.1 It is like the Latin quasi in the Vulgate. The late papyri (fourth cent. A.D.) show that ὡς ὅτι came in the vernacular to mean simply ‘that.’2 Moulton cites also two Attic inscriptions from the first century B.C. which have ὡς ὅτι in the sense of ὡς or ὅτι alone. The editors have removed ὅτι from ὡς ὅτι in Xenophon’s Hellen. III, ii, 14, ἐπὶ δὲ ὡς ὅτι δκονία. Moulton agrees to Blass’ stigma of “unclassical” on ὡς ὅτι, but Paul has κοινὴ support for his use of it in 2 Cor. 5:19; 11:21; 2 Th. 2:2. But ὅτι has won its place in the N. T. not only over ὡς, but also over the infinitive. The use of the inf. in indir. discourse3 takes quite a subordinate place in the N. T. Luke alone uses it to any extent. The periphrasis with ὅτι has superseded it in nearly all the N. T. writers.4 The use of ὅτι is the common way of making a declaration in indirect

1 Goodwin, M. and T., p. 258.
3 De Particulorum ὅτι et ὡς apud Demosthenum Usu, 1890, p. 38.
4 Cf. Blass, Gr. of N. T. Gk., p. 230 f.
5 Hatz., Einl., p. 19.
2 Moulton, Prol., p. 212.
3 Blass, Gr. of N. T. Gk., p. 231.
4 Moulton, Prol., p. 211.
discourse in the N. T. There arose also διότι in the declarative sense\(^5\) (cf. late Latin *quia*-*quod*), but no example occurs in the N. T. The classic causal sense of διότι prevailed. It is sometimes doubtful whether διότι is causal or declarative as in Ac. 22:29. The context must decide. Finally, as noted, πως came to be the normal declarative conjunction in the vernacular (over the inf. as over ὡς and διότι) as the infinitive disappeared from indir. discourse.\(^6\) The only mode used with διότι in the N. T. is the ind. In Io. 3:8 (subj.) διότι is recitative. At bottom διότι is just δε τι, and Homer sometimes used δε τε in the declarative sense (and δε). Cf. διότι δε τε together in 1 Cor. 12:2.

The verbs after which διότι is used in the N. T. cover a wide range. Indeed, διότι comes also after substantives like ἄγγελια (1 Jo. 1:5); κρίσις (Jo. 3:19); λόγος (Jo. 15:25); μαρτυρία (1 Jo. 5:11); μάρτυς (2 Cor. 1:23); παρρησία (1 Jo. 5:14), causal in Ac. 22:14; φάσις (Ac. 21:31). It is in apposition also with ἐν ὑμνατι (Mk. 9:41). We see also ἐν τούτῳ διότι (1 Jo. 3:16). Sometimes [Page 1034] διότι itself seems to imply ἐν τούτῳ (Ro. 5:8) or περὶ τούτῳ (Mk. 1:34) or εἰς ἐκείνο (Jo. 2:18). Cf. τούτῳ διότι (Rev. 2:6). Another irregularity of construction is the prolepsis of the substantive before διότι (and change of case) as in 1 Cor. 16:15. This idiom is sometimes called the epexegetical use of διότι. Cf. further Ac. 9:20. It is a rather common idiom. Cf. Mt. 25:24. See especially Jo. 8:54. In Ro. 9:6 note οὐχ ἔδω δε διότι. In 1 Cor. 15:27 δήλον διότι is almost adverbial, but that is not true of πρόδηλον διότι in Heb. 7:14. The elliptical τι διότι (Lu. 2:49) may be compared with τι γέγονεν διότι in Jo. 14:22. The elliptical οὐχ διότι (cf. Jo. 6:46) is like the corresponding English “not that.” The διότι clause may be in the nominative (subject clause) as in Mk. 4:38, οὐ μέλετον τι διότι ἀπολλυμέθα; More usually it is, of course, in the accusative (object clause) as in Jo. 11:27: υπείστευκα διότι. The διότι clause may also be in apposition with the locative as in Mk. 9:41. In Gal. 1:20, ἵδον ἐνώπιον θεοῦ διότι, we have a solemn oath as in ἀλήθεια διότι (2 Cor. 11:10); προστάσι διότι (1:18); μάρτυς διότι (2 Cor. 1:23); ἀμνώδιο διότι (Rev. 10:6); ζῷο ἐγώ, διότι (Ro. 14:11, LXX). Rarely the personal construction occurs with διότι, as in 1 Cor. 15:12, Χριστὸς κηρύσσεται διότι. In Jas. 1:13 we either have recitative διότι or oratio variata. In Jo. 4:1 we have one διότι clause dependent on another. Ὡτι may be repeated in parallel clauses as in Jo. 6:22; Ac. 17:3; 22:29; 1 Cor. 15:3 ff. In 1 Jo. 5:9 we have two examples of διότι, but one is causal. In Jo. 1:15 ff. the three are all causal. In Jo. 11:50 we have διότι and ἵνα in much the same sense. Not so 1 Jo. 5:13. Cf. ἵνα in 1 Jo. 5:3 with διότι in 5:11.

The verbs that use declarative διότι in the N. T. are very numerous. A few have only διότι. Thus Mk. 11:32, ἀπαντεῖς ἐξόθα τὸν Ἰωάννην διότι προφήτης ἦν (note ἦν). Blass\(^1\) calls this use of ἐξόθα a Latinism like *habeo*. Cf. also ὑπολαμβάνω διότι (Lu. 7:43), a classical construction. So also λαλέω (Heb. 11:18); συμβιβάζω (Ac. 16:10); σφοντίζω (Jo. 3:33); γνωρίζω (1 Cor. 12:3); ἐμφανίζω (Heb. 11:14); ἔξωμολογήσω (Ph. 2:11); κατηχέω (Ac. 21:21); κηρύσσω (1 Cor. 15:12); ἀποδείκνυμι (2 Th. 2:4); µηνύω (Lu. 20:37); ὑποδείκνυμι (Ac. 20:35); φανερόμαι (2 Cor. 3:3); ἀποκαλύπτω (1 Pet. 1:12);

1 Gr. of N. T. Gk., p. 231.
The infinitive or the participle. Thus ἀνακαλέω, ὑπομαρτυρέω, κυστικάνω and παρακαλέω the infinitive in indir. discourse in the N. T. is confined to the writings of Luke and Paul and Hebrews according to Viteau,1 “comme vestige de la langue littéraire.” But even with Luke and Paul the rule is to use ὅτι. Blass2 has a careful list of the uses of these verbs. In margin of W. H. in Jo. 5:15 we have ἰδοὺ ἐγὼ with ὅτι, but the text has ἢπων. But see ὅτι also in Ro. 2:4 (ἀγνοια)—Mt. 12:5 (ἀναγνώσκω), Lu. 18:37 (Ἀπαγγέλλω), Ac. 25:16 (Ἀποκρίνομαι), 1 Jo. 2:22 (Ἀναπνεύμομαι), Ac. 17:6 (Βοῶ), 1 Pet. 2:3 (γεύμομαι), Ro. 10:5 (γράφω), Mt. 16:21 (δεικνύω), 1 Cor. 1:11 (δηλόω), Ac. 10:42 (διαμαρτύρομαι), Ac. 17:3 (διανοοῦμαι), Mk. 8:31 (διδάσκω), Mt. 6:7 (δοκεῶ), Ac. 9:27 (δηγέομαι), Lu. 24:21 (Ἐξέπις), Mt. 6:26 (ἐμβλέπω), 1 Cor. 11:2 (ἐπαινόω), Ac. 13:32 (ἐκατανόησομαι), Lu. 18:11 (ἐχθριστέω), Rev. 2:4 (Ἠχοῦ κατά τίνος), Lu. 11:38 (Θαυμάζω), Jo. 6:5 (θαύμασαι), Ac. 4:13 (καταλαμβάνομαι), Lu. 12:24 (κατανοέω), 2 Cor. 5:14 (κρίνω), 2 Pet. 3:5 (λανθάνω), Mt. 3:9 (λέγω), Ac. 23:27 (μάρτυς τῶν θεῶν ἐπικαλοῦμαι), Heb. 7:8 (μαρτυροῦμαι), Ac. 20:26 (μαρτυροῦμαι), Mt. 27:63 (μιμητικ Lexer), Mt. 5:17 (νομιζώ), Mt. 15:17 (νοεῖ), Mt. 26:74 (ἄμμων), Jas. 1:7 (ὁμαίη), Ro. 9:1 (οὐ ψεύδομαι), 1 Cor. 15:3 (παραδίδωμι), Heb. 13:18 (πείθομαι), Jo. 6:69 (Πιστεύω), Ro. 4:21 (πληροφορέω), 2 Cor. 13:2 (προειρήκα καὶ προλέγω, cf. Gal. 5:21), Ac. 23:34 (πυνθάνομαι), Lu. 15:6, 9 (συγχαίρω), Jo. 18:14 (συμβουλεύω), Ro. 8:16 (συμμαρτυρέω), Mt. 16:12 (συνήμη), Ju. 5 (Ὑπομιμητικ Lexer), 1 Cor. 10:19 (φημί), Lu. 10:20 (χαίρω), 1 Tim. 1:12 (χάριν ἔχω τινί). I cannot claim that this is a complete list, but it is the best I can do with the help of H. Scott, Blass, Thayer, Moulton and Geden, and Viteau’s list. At any rate it gives one a fairly clear idea of the advances made by ὅτι on the classic infinitive idiom. Some verbs still share the participle with ὅτι, but not verbs of showing. These no longer appear in the N. T. with the participle.3 So with ὅτι note βλέπω (Heb. 3:19); θεωρέω (Mk. 16:4). Cf. Ac. 19:26, θεωρεῖν and ἱκώ. So also ἐπηγγέλλω (Lu. 7:37); ἐπιστάμαι (Ac. 15:7); εὐφρίσκο (Ro. 7:21); μυθονοῦ (Ac. 20:31); ὄραω (Mk. 2:16). Besides some verbs appear with either ὅτι, the infinitive or the participle. Thus θύσιον (Mt. 5:21; Jo. 12:18; Lu. 4:23); γνώσκον (Mk. 21:45; Heb. 10:34; Lu. 8:46); λογίζομαι (Ro. 8:18; 2 Cor. 10:2 both inf. and part.); οἶδα (Ac. 16:3; Lu. 4:41; 2 Cor. 12:2); ὀμολογέω (Mt. 7:23 unless recitative ὅτι; [Page 1036] Tit. 1:16; 2 Jo. 7). In Ac. 27:10 we find ὅτι used with the infinitive “quite irregularly” Blass1 calls it. But it is just the classic mingling of two constructions seen in the more usual form in Ac. 14:22, where a change is made from

4 Gr. of N. T. Gk., p. 233.
the inf. to ὅτι and ὅτε. Different verbs had varying histories in the matter of ὅτι. It was not a mere alternative with many. With ἄκοψο, for instance, ὅτι is the usual idiom. The same thing is true with γινώσκω, οἶδα, λέγω, νομίζω, πιστεύω. But with φημι, in classical Greek almost always with the infinitive (Ro. 3:8), we twice have ὅτι (1 Cor. 10:19; 15:50). For ὅτι and then the inf. see Mk. 8:28 f. The substantive nature of the ὅτι clause is well shown in 1 Th. 3:6. Radermacher (N. T. Gr., p. 159) cites ὅτι— ὑπάρχειν from Proklus’ In rem publ., II, 225, 22. The ὅτι clause is often called an object clause and may be in the nominative or in the accusative.

**The Infinitive**. With some verbs we have only single instances of the infinitive of indir. discourse in the N. T. So with βοάω (Ac. 25:24); γινώσκω (Heb. 10:34); καταλαβάνομαι (Ac. 25:25); ἥγεσαι (Ph. 3:8); νοέω (Heb. 11:3). Ἀποκρίνομαι has it only thrice (Lu. 20:7; Ac. 25:4). See also ἀπαγγέλλω (Ac. 12:14); ἀπαρνόμαι (Lu. 22:34); διασωρίζομαι (Ac. 12:15); δηλόω (Heb. 9:8); ἐπαγγέλλομαι (Mk. 14:11; Ac. 7:5); ἐπιμαρτύρομαι (1 Pet. 5:12); κατακρίνω (Mk. 14:64); μαρτυρέω (Ac. 10:43); προαπατάμοι (Ro. 3:9); προκαταγγέλλω (Ac. 3:18); σημαίνω (Ac. 11:28); χρηματίζω (Lu. 2:26). Some of these are words that are not used with any construction very often, some occur only with the infinitive, like ἐπιδεικνύω (Ac. 18:28); προσδοκάω (Ac. 3:5; 28:6); ὑποκρίνομαι (Lu. 20:20); ὑπονοεῖν (Ac. 13:25; 27:27). There is, besides, the inf. with βούλομαι, θέλω, κελεύω, etc., more exactly the simple object inf. Other verbs that have occasionally the inf. are in the list given under (α), those with either ὅτι or the inf. like ἄρνομαι (Heb. 11:24); γράφω (Ac. 18:27); δεικνύω (Ac. 10:28); διδάσκω (Lu. 11:1); διασωρίζομαι (Ac. 18:5); διανοίγω (Ac. 16:14. Cf. τοῦ in Lu. 24:45); εὐάγγελίζομαι (Ac. 14:15); συμβουλεύω (Rev. 3:18). In Luke and Paul the inf. of indir. discourse is fairly common with λέγω (Lu. 9:18, 20, etc. Cf. Mt. 12:24; Mk. 3:28) and with νομίζω (Lu. 2:44; Ac. 7:25, etc.).

The Latin had it in all its glory, but the gradual disappearance of the inf. from late Greek made it wither away. Indeed, it was a comparatively late development in Greek anyhow and is rare in Homer. It is not easy to draw the line between βούλομαι and κελεύω with the inf. on the one hand and λέγω and νομίζω with the inf. on the other. At bottom the construction is the same. The question of the case of the substantive or adjective used with this inf. is not vital to the idiom. It is really a misnomer to call it “the accusative and infinitive.” That is, in fact, more frequently the case found with this inf., but it is so, not because the idiom calls for it per se, but simply because the infinitive can have no subject, not being a finite verb (cf. the participle). Hence when a noun (not the object) occurs with the inf. in indir. discourse it is put in the accusative of general reference, if there is no word in the sentence in another case for it naturally to agree with by apposition. This matter was discussed under Cases, but will bear some repetition at this point since it is so often misunderstood. Clyde correctly sees that, since the inf. itself is in a case and is non-

3 Gk. Synt., p. 139.
finite, it cannot have a subject. Monro⁴ thinks that the accusative was a late
development to assist the “virtual” predication of the later inf. Sometimes this acc.
itself is the direct object of the principal verb (so verbs of asking, etc.). Gildersleeve
has a pertinent word: ‘I look with amazement at the retention [by Cauer in his
Grammatica Militans] of Curtius’ utterly unsatisfactory, utterly inorganic explanation
of the acc. c. inf. in oratio obliqua, against which I protested years ago (A. J. P.,
XVII, 1896, 517): ἠγγείλαν ὅτι ὁ Κῦρος ἐνίκησε becomes ἠγγείλαν τὸν Κῦρον ὅτι
ἐνίκησε, but ὅτι ἐνίκησεν=νικήσατ" (A. J. P., XXXIII, 4, p. 489). To go no further,
Gildersleeve shows that the ὅτι construction is later than the acc. c. inf. But the
grammarians went astray and called this accusative the “subject” of the inf., and,
when some other case appears with the inf., it is an “exception” to the rules of the
grammarians, though in perfect harmony with the genius of the Greek inf. Even
Moulton⁵ says: “In classical Greek, as any fifth-form boy forgets at his peril, the

nominative is used regularly instead of the accusative as subject to the infinitive when the subject of the main verb is the same. Now, there is no doubt about the presence of the nominative in such an instance. But why say “instead of the accusative”? The nominative is normal and natural in such a construction. This construction probably, almost certainly, antedated the accusative with the inf. We still meet it in the N. T. The oldest idiom was to have no noun with the inf., as in Lu. 24:23, ἦλθαν λέγουσαι καὶ ὄπτασιάν ἄγγελον ἔσωκέναι. The context makes it perfectly clear that the word ὄπτασιαν is the object of ἐσωκέναι and the rest is matter of easy inference. Cf. Ac. 26:9 (with δὲν); Jas. 2:14; 1 Jo. 2:6, 9; Tit. 1:16. In the majority of cases in the N. T. the noun is not repeated or referred to in the predicate. So in Lu. 20:7 we have ἄπεκριθησαν μὴ εἶδέναι, but in Ac. 25:4 Φήστος ἄπεκριθη τηρεῖσθαι τὸν Παῦλον εἰς Καισάριαν, ἐστὶν δὲ μέλλειν. It is easy to see why Παῦλον has to be in the acc. if expressed at all. We could have had αὐτός rather than ἐστιν which probably is just co-ordinated with Παῦλον. Cf. κριτὴς εἶναι in Ac. 18:15; Mt. 19:21 τέλειος εἶναι, Ph. 4:11 Ἐμπαθὼν αὐτάρκης εἶναι, where the principle is the same, though not technically indirect discourse; it is the predicate nominative. So with βούλομαι, θέλω, ζητέω, etc. The personal construction is a good illustration of the nominative. Cf. Heb. 11:4, ἐμαρτυρήθη εἶναι δίκαιος. The nominative occurs also in Ro. 1:22, φάσκοντες εἶναι νεκροὺς. It is rare in the classical Greek for the accusative to occur in such sentences.

been sufficient. Cf. also Ac. 5:36 (cf. 8:9) λέγον εἴην τινα ἑαυτόν, (Ph. 3:13) ἔγω ἐμαυτόν οὗτος λογίζομαι κατεληφθέναι, (Heb. 10:34) γινώσκοντες ἔχειν ἑαυτός κρείσσονα ὑπάρξῃ, (Eph. 4:22) ἀποθέσθαι ὑμᾶς (some distance from the verb ἐπιδόθητε). See also Ac. 21:1; Ro. 1:20 f. Blass, p. 238, thinks that in 2 Cor. 7:11 the class. Greek would have had ὅντας, not εἴην. Even so, but the N. T. has [Page 1039] εἴην. An example like Lu. 20:20 (see above) is hardly pertinent, since the participle on which the inf. depends is itself in the accusative. Cf. Lu. 6:4.1 In Ac. 25:21, τοῦ Παύλου ἐπικαλεσαμένου τηρεῖσθαι αὐτόν, the pronoun could have been assimilated to the case of Παύλου (αὐτοῦ). So also in Rev. 2:9; 3:9, τῶν λεγόντων Ιωάννου εἴην αὐτούς (different order in 3:9). We find the same lack of assimilation in Ac. 22:17, μοὶ—μου—με, and in 25:27 μοι—πέμποντα and in Heb. 2:10 αὐτῷ—αγαλόντα. In 2 Pet. 3:3, γινώσκοντες is due to anacolouthon (cf. 1:20) as with ἀπέχεσθαι—ἔχοντες (1 Pet. 2:11 f.) and with στελλόμενοι (2 Cor. 8:20). So Lu. 1:74 ἡμῖν δυσθέντας, 5:7 μετέχοις ἐλθόντας. The Greek of the N. T. did sometimes have assimilation of case as in Ac. 16:21, ὅ ὁμικ ἔξεστιν ἡμῖν παραδέχεσθαι οὐδέ ποιεῖν Ἰωάννου ὑπον. So also 15:25, ἐδοξεῖν ἡμῖν γενομένοις ὑμοθυμαδὸν ἐκλεξαμένοις (ὑς margin of W. H.) πέμπα (cf. accusative retained in verse 22, ἐκλεξαμένοις). Cf. also Lu. 1:3; 9:59; 2 Pet. 2:21. Contrast ἐδοξέ μοι of Lu. 1:3 with ἐδοξά ἑαυτῷ of Ac. 26:9. The same situation applies to the cases with the articular infinitive. Cf. Mt. 26:32, μετὰ τὸ ἐξερνθήμεο με πράξεο. Here the me is not necessary and αὐτός could have been used. So with Lu. 2:4, διὰ τὸ εἴην αὐτόν. The αὐτόν is superfluous, as in Heb. 7:24.2 Cf. Lu. 10:35, ἔγω ἐν τῷ ἐπαναρχεσθαί με ἀποδώσω σοι. See further Lu. 1:57; 2:21; 24:30; Ac. 18:3. It is easy to show from this use of the articular inf. that the inf. has no proper “subject.” The accusative is due to other reasons. Take Lu. 2:27, ἐν τῷ εἰσαγαγεῖν τούς γονεῖς τῷ πανίδιον Ἱησοῦν, where the context makes plain that παιδίον is the object of εἰσαγαγεῖν and γονεῖς the acc. of general reference. The article τῷ must be considered in explaining this instance. Cf. Lu. 18:5; Ac. 1:3; 27:4; Heb. 5:12 (three accusatives in W. H.’s text). The acc. with the inf. was normal when the substantive with the inf. was different from the subject of the principal verb. Cf. Ro. 3:8, φασίν τινες ἡμᾶς λέγειν ὅτι (note inf. after φημί, and ὅτι after λέγω, but it is recitative ὅτι). In Lu. 24:23, λέγουσιν αὐτόν ἔγω, we see λέγω with the acc. and inf. Typical examples are seen in Mt. 17:4, καλὸν ἔστιν ἡμᾶς ὡς εἴην, Ac. 12:14; 14:19; 16:13; 24:15; 1 Pet. 3:17; 5:12; 1 Cor. 14:5; Heb. 9:8. See further Verbal Aspects of Inf., (d), in next chapter.

The tense of the original is preserved in the inf. as a rule. A case like Mt. 14:7, ὁμολογήσαν αὐτῇ δοῦναι δ ἔνν ἀροῦη, may [Page 1040] seem a bit disconcerting since in the direct discourse in Mk. 6:23 we find δόσω. But the future is aoristic anyhow. The line between indir. discourse and the simple object inf. is not sharply drawn. Cf. Ac. 23:12. In Lu. 20:6, πεπιειμένος γὰρ ἔστιν Ιωάννη προφήτην εἴην, the inf. represents ἔνν of the direct. There was no help for this, since there is no imperfect inf. The future inf. in indir. discourse is rare, but see Jo. 21:25; Ac. 23:30 (see Tenses). Examples of the perfect inf. in this idiom occur in Ac. 12:14; 14:19; 16:27; 25:25; Heb. 9:8. Cf. ὁμολογεῖ ἐληφέναι, P. Oxy. 37 (A.D. 49).

1 See also Lu. 23:2, λέγονα αὐτόν ἔνν.
There is little more to say. The use of τοῦ and the inf. as subject has been noted (pp. 996, 1002). See τοῦ ἔλθεν, Lu. 17:1, where τὸ σκάνδαλα is the acc. of general reference while this genitive inf. is itself in the nominative case. See also Ac. 10:25. We do not have ἄν with the inf. in indir. discourse. In 2 Cor. 10:9, ἵνα μὴ δόξω ὡς ἄν ἐκφροβῇ, we have ὡς ἄν =‘as if.’ It is not the ἄν in apodosis. Nestle in his N. T. gives at 1 Pet. 5:8 ζητῶν τίνα καταπιέν, but surely τινᾶ is the correct accent. W. H. places even this in the margin. Souter prints τινᾶ, departing from R. V. which has τινα. But Radermacher (N. T. Gr., p. 147) cites Calliniclus in Vita Hypatii, 57, 12, ποῦ ἐυρέῃ, and 113, 11, τί ποιῆσαι (cf. German Was tun?). It may be worth while to add that frequently we meet an inf. dependent on an inf. (cf. inf. on part. in Lu. 20:20). I have noticed the idiom in Luke, Paul, Mk., Heb. Cf. Lu. 6:12, ἔξελθεν αὐτῶν εἰς τὸ ὅρος προσεύξασθαι, where the first is in indirect discourse, and Ac. 18:2, διὰ τὸ διατεταχέναι Κλαύδιον χωρίζεσθαι πάντας τοὺς Ἰουδαίους, where the second is indirect discourse (indir. command). Cf. Ro. 15:8.

(γ) The Participle. Middleton¹ suggests that the use of the participle in indir. discourse is older than the inf. This may be true, since in the Sanskrit it developed much more rapidly than the inf. But there were cross-currents at work in indirect discourse. Just as the inf. was circumscribed by the declarative ὅτι, so the participle was limited by ὅτι or the infinitive. Thus verbs of showing (δείκνυμι, δηλόω) and of manifesting (φανερόω) no longer occur with the participle in the N. T. However, we have the participle with φαίνομαι (‘appear’), as in Mt. 6:16. Besides, the participle has disappeared from use with ἀκούσομαι, μανθάνω, νέμωμαι, συνήμι. The participles with μανθάνομε in 1 Tim. 5:13 are additional statements, as the Revised Version

correctly translates. With the inf. μανθάνω means ‘to learn how,’ not ‘to learn that.’

Page 1041] Cf. Ph. 4:11; Tit. 3:14. But some verbs in the N. T. still have the participle in indir. discourse. They are verbs of perception by the senses (hearing, seeing, knowing). In the ancient Greek the nominative was used when the participle referred to the subject of the verb. Thus ὑποκομπήθηκας meant ‘I see that I have sinned.’ In the N. T., however, we have declarative ὅτι in such clauses (Mk. 5:29; 1 Jo. 3:14). 1 Viteau2 rightly insists on a real difference between the participial conception and the declarative ὅτι or the inf. If the idea is one of intellectual apprehension merely, an opinion or judgment, we have ὑποκομπήθηκαν (Jas. 2:24). If it is a real experience, the participle occurs as in Mk. 8:24, ὡς δένδρα ὑποκομπήθηκεν ἐπὶ περιστατόμενα. So in Ac. 8:23, εἰς σύνδεσμον ὑποκομπήθη σὲ ἄντα. There is something in this distinction. Cf. βλέπω ὅτι (Jas. 2:22), but the participle in Heb. 2:9, Ἰησοῦν ἐστεφανομένον. In Mk. 8:24 we have ὅτι with βλέπω and the part. with ὑποκομπήθηκεν. The realistic quality of the part. is finely brought out in Mk. 9:1, ἔτει ἐνδώσαν τῷ βασιλεῖα τοῦ θεοῦ ἐξελήλυθαν ἐν δύναμι. Note the tense as in Lu. 10:18, ἐθεώρησαν τὸν Σατανᾶν—πεσόντα. Cf. 9:49; 21:20; Ac. 11:13; 17:16. See Jo. 19:33, ὥς εἶδον ἡδίν αὐτὸν τεθηκότα. The tense of the direct is preserved. See for theoρέω, Mk. 16:4 and Lu. 24:39, καθὼς έμε θεώρητο έχοντα. For ἐπίσταμαι take Ac. 15:7 and 24:10. Cf. also μημνημόνευ with ὅτι (Ac. 20:31) and the part. (2 Tim. 2:8). It is very clear in εὑρίσκω (see ὅτι in Ro. 7:21) which, as in classic Greek, is commonly used with the participle. See Mt. 1:18; 12:44; Lu. 23:2; Ac. 9:2. In Mt. 1:18 we have the passive construction εὑρέθη έχοντα. In Lu. 23:2 we find three participles. Ἀκομαχῶ in the N. T. has only the inf. (Ro. 1:28) and the participle in 2 Cor. 8:22. So with ἡγεμόνε (Ph. 2:6; 3:7). Cf. also ἤχε με παρατηθηκόν (Lu. 14:18). In 2 Jo. 7 note the part. with ὑμολογέω. In verse 4, περιστατόµενας with εὑρίσκω, the case agrees only in sense with ἐκ τῶν τέκνων. The difference between δότι with οἶδα (Ac. 23:5) and the part. is clear (2 Cor. 12:2), though this is the only instance of the part. with this verb. It prefers ὅτι, but may have the inf. (Lu. 4:41). The difference is even clearer in γνώσκω. See ὅτι in Mt. 21:45, the inf. in Heb. 10:34. The usual idiom is ὅτι, but note Lu. 8:46, ἔγνων δύναμιν ἐξελήλυθάν ὁπ ἔμου, where Christ thus graphically describes the terrible nervous loss from his healing work. He felt the power “gone” out of him. In our vernacular we speak of a sense of “goneness.” See also Ac. 19:35; Heb. 13:23. But see Mk. 5:29, ἔγνω τῷ σώματι δότι ίηται. In [Page 1042] Mk. 5:30 ἐπιτιμήσκω has the attributive participle after it. Ἀκομαχῶ also occurs with declarative ὅτι (Mt. 5:21; 32 times), the inf. (Jo. 12:18; 1 Cor. 11:18) or the part. (Ac. 7:12; 14:9; 3 Jo. 4; 2 Th. 3:11, etc.). These examples have the accusative when the thing is understood. Blass1 curiously calls the acc. incorrect in Ac. 9:4; 26:14. The genitive with φωνή does occur in 11:7; 22:7.

2 Le Verbe, p. 53 f.

1 Gr. of N. T. Gk., p. 246.
Blass has an overrefinement on this point. As with the acc. construction of the part. with ἀκοούω, so most of the genitive examples are found in the Acts. So 2:6; 6:11; 14:9, etc. But see also Mk. 12:28, ἀκοούσας αὐτῶν συζητούντων. So 14:58; Lu. 18:36; Jo. 1:37. The perfect part. in this construction is seen in Lu. 8:46; Jo. 19:33, etc. For the aorist see Lu. 10:18. In Mk. 6:8 we have oratio variata. The sentence starts with Ἰνο and concludes with the inf. Hence the part. ὑποδεδεμένος is construed with the inf. See the acc. part. in Rev. 4:4 as explained by εἶδον in verse 1, though ἴδοι and the nominative have come between.

(δ) Καὶ ἔγενετο. One hardly knows whether to treat this construction as indirect discourse or not. It is a clear imitation of the Hebrew וַיְהִי and is common in the LXX with two constructions. It is either καὶ ἔγενετο καὶ with finite verb (or ἔγενετο δὲ) as in Gen. 24:30; 29:13; Josh. 5:1, etc.), or we have asyndeton, καὶ ἔγενετο plus finite verb (Gen. 22:1; 24:45, etc.). For ἔγενετο we often find ἔγενηθη (1 Sam. 4:1; 11:1, etc.). This asyndeton is also common in the future as καὶ ἐσται with finite verb (Is. 9:16; 10:20, 27, etc.). This καὶ ἐσται construction is quoted a few times in the N. T. (Ac. 2:17, 21; Ro. 9:26) from the LXX. For καὶ ἐσται καὶ see Ex. 13:11 f. W. F. Moulton2 has pointed out that the idiom occurs when the principal sentence has some note of time. J. H. Moulton3 quotes Driver (Tenses, § 78) as describing the ἔγενετο construction in a similar fashion, “a clause specifying the circumstances under which an action takes place.” All the examples of these two constructions in Luke fit this

Moulton MOULTON, W. F., and GEDEN, A. S., A Concordance to the Greek Testament (1897).
2 W.-M., p. 760, n. 2.

Moulton

3 Prol., p. 16.
description. Luke has in the Gospel eleven of the καὶ ἐγένετο καὶ examples and twenty-two of the καὶ ἐγένετο type. For καὶ ἐγένετο καὶ see Lu. 17:11; without the second καὶ 17:14. See in particular Lu. 8 and 9. It is frequently the case that Luke has ἐν τῷ and the inf. with the idiom. So 9:51, ἐγένετο δὲ ἐν τῷ συμπληρωθαί—καὶ αὐτός ἔστηρισεν. Here καὶ is almost equivalent to ἦτα. So καὶ ἐγένετο ἐν τῷ εἶναι—ἐπὶ τις τις (11:1). We have καὶ ἐγένετο καὶ also in [Page 1043] Mt. 9:10. The form καὶ ἐγένετο Moulton1 counts outside of Luke only twice in Mark and five times in Matthew with the phrase ἐγένετο ὅτε ἔτελεσεν. Cf. Mt. 7:28. Moulton is concerned to show against Dalman that the idiom is not Semitic. He admits the Hebraism in καὶ ἐγένετο καὶ, but doubts as to καὶ ἐγένετο (asyndeton). But surely the LXX has left its mark in this point also. The LXX does not have ἐγένετο (or γίνεται) and the infinitive (but cf. 2 Macc. 3:16 ἦν—τιτρώσκεσθαι). In the N. T. we find it in Mt. 18:13; Mk. 2:15; five times in Luke and seventeen times in Acts. Cf. ὑμῖν γίνοιτο κρατεῖν, P. Par. 26 (B.C. 163–2). The other two constructions are absent from the Acts, showing that in the Gospel Luke was more directly using Semitic sources or imitating the LXX on the point. But even so inf. with ἐγένετο is not ancient Greek, which used συνέβη. We do have συνέβη and the inf. in Ac. 21:35. The modern Athenian vernacular has συνέβη ὅτα while the country districts2 use ἔτυχε νά. Moulton finds the inf. with γίνεται in the papyri and rightly sees in the vernacular κοινή the origin of this idiom. There is no essential difference between the inf. with γίνεται and ἐγένετο. Cf. Ac. 9:32; 16:16; 9:32, 37, 43; 11:26, etc. Outside of Luke (Gospel and Acts) the inf. with ἐγένετο is confined to Mk. 2:23, which Moulton calls “a primitive assimilation of Lu. 6:1.” See Ac. 10:25, ἐγένετο τοῦ εἰσελθὲν. This is Moulton’s presentation, which is certainly more just than the mere description of “Hebraism” for all these constructions.3 We do not have the ὅτα clause with γίνεται or ἐγένετο in the N. T.

(g) Indirect Questions.

(a) Tense. See (c) under Indirect Discourse. It may here be simply stated that when the principal verb is primary no change in tense occurs. When it is secondary, still no change appears as a rule, though occasionally one does see it, as in Jo. 2:25; 6:6; 18:32. But note ἐπυνθάνετο ποῦ γεννᾶται (Mt. 2:4); ἐθεώρουν ποῦ τέθειται (Mk. 15:47). Cf. Ac. 10:18. Note difference between present perfect in Mk. 15:44 and the aorist in the same verse. For the future ind. see Jo. 21:19; Mk. 11:13.

(b) Mode. It is only necessary to say that as a rule the same mode is retained in the indirect question that was in the direct. Thus see Mk. 5:14; 15:47; Lu. 8:36; 23:55;

DALMAN, G., Grammatik des jüdisch-palästinischen Aramäisch (1894).

———, Worte Jesu (1902).

———, The Words of Jesus (1902). Translation by D. M. Kay.

2 Ib., p. 17.
3 As in Burton, N. T. M. and T., p. 142 f.
Ac. 10:29, where the indicative occurs. We have the ind. after secondary as well as primary tenses. This is the common idiom in the N. T. as in [Page 1044] the κοινὴ. In all instances where a subj. appears in this construction it is due to the fact that the subj. would have been present in the direct (deliberative subj.). Note τί φάγαμεν: in Mt. 6:31 and τί φάγητε (6:25). See also ποῦ μένεις; of Jo. 1:38 and εἶδαν ποῦ μένεις of verse 39 for the retention of the indicative. The Latin changed the ind. to the subj. in indirect questions, but the Greek did not. This deliberative subj. occurs after primary tenses as in Lu. 9:58, οὐκ ἐξεί τοῦ πῆν κεφαλὴν κλίνην, and after secondary tenses also as in Mk. 9:6, οὗ γάρ ἦσε τι ἄσωκρητος. Cf. also Mk. 6:36; Lu. 5:19; 12:36. So also the optative occurs a few times where it was in the direct. This is the construction with ὅν which has already been discussed twice. See Ac. 17:18, τί ὁν θέλοι, for the direct form, and Lu. 1:62, τί ὁν θέλοι, for the indirect. Cf. Lu. 9:46; Ac. 5:24. In 2 Tim. 2:25, μή ποτε δόῃ (W. H. have δόη in margin), we have the optative without ὅν after a primary tense if δόῃ be correct. Moulton considers the subj. here a “syntactical necessity.” We need not moralize, therefore, on this instance of the optative even if it is genuine. Radermacher (Neut. Gr., p. 132) shows that the Atticists frequently used the opt. after a primary tense, as copyists often fail to catch the spirit of a thing. The papyri (ib.) have some illustrations of the same idiom. The other examples of the opt. in indirect questions are all after secondary tenses and the change is made from an indicative or a subj. to the optative. These examples all occur in Luke. As instances of the opt. where the direct had the ind. see Lu. 1:29; 3:15; 18:36. See Ac. 21:33 for both modes. In Ac. 17:27, εἰ ἀραγε ὑπαναφήσεται, the opt. represents a subj. with ἃν after a primary tense. So in Ac. 27:12. In no instance where the opt. without ὅν occurs in the indirect discourse is it necessary. In all these examples the indicative or the subj. could have been retained. The infinitive with τίνα in 1 Pet. 5:8 is read by Nestle, but not by W. H. or Souter. See under (f), (β).

(γ) Interrogative Pronouns and Conjunctions Used. One notes at once the absence of ὃς in this construction, the common classic idiom. We do have ὅτι once in Ac. 9:6, λαληθήσεται σοι ὅτι σε δὲ ποιεῖν. Elsewhere the most usual pronoun is τίς and τί as in Ac. 10:29; 21:33. We even have τίς τί ἄρη in Mk. 15:24 (double interrogative). Tischendorf reads τίς τί in Lu. 19:15, but W. H. have only τί. This double use appears rarely in the older Greek. As a rule the distinction between τίς and ὃς is pre-served [Page 1045] in indirect questions, as in Jo. 13:24 (cf. 13:12). The occasional confusion between τίς and ὃς was discussed under Pronouns. See 1 Tim. 1:7 and Jas. 3:13. Now and then the simple relative pronoun or adverb is used in an indirect question, as was true of classical Greek also. So Mk. 5:19 ὁ δὲ, Lu. 8:47 δι ἣν αἰτίαν, Ac. 15:14 καθὼς, 1 Th. 1:5 ὅτι, and the various examples of ὃς discussed in connection with Indirect Assertions (Lu. 8:47; Ac. 10:28, 38, etc.) which are more likely to be understood in the sense of ‘how,’ and so indirect questions. Cf. Lu. 6:3 f. (ὅ and ὃς), Mt. 10:19 (δοθήσεται πῶς ὧν λαλήσητε) Lu. 17:8 (τί). Other interrogative words used are ποῦ (Mt. 2:4), πόθεν (Jo. 8:14), πώς (Rev. 3:3), πότε (Lu. 12:36), πῶς (Lu. 8:36), πήλικος (Gal. 6:11), πόσος (Mt. 16:9), ποιμασός (Lu. 1:29). The correlative words, besides the lone instance of ὅτι in Ac. 9:6, are ὅπου (Lu. 24:20), ὅποιος (1 Th. 1:9). In Mk. 14:14 (Lu. 22:11) ποῦ—ὅπου φάγοι; most likely the ὅπου clause is an indirect question with the deliberative subj., but it may be the

2 Viteau, Le Verbe, p. 68.
volitive subj. simply. There are plenty of instances of εἰ in indirect questions (see Conditional Sentences) as in Mk. 15:44 after θαυμάζω and ἔπεροτάω; Lu. 14:28 after ψηφίζω; 14:31 after βουλεύομαι; Mt. 26:63 after εἶπον; 27:49 after ὁρῶ; Mk. 3:2 after παρατηρῶ; Jo. 9:25 after οἶδα; Ac. 4:19 after κρίνω; 10:18 after πονάνομαι; 19:2 after ἔκουσο; 2 Cor. 2:9 after γνώσκω; 13:5 after πειράζω. There are, besides, those passages1 where a word is suppressed, like Mk. 11:13; Eph. 3:2; Ph. 3:12; 2 Th. 2:15. See also the optative with εἰ in Ac. 17:27; 25:20; 27:12. This is all quite classical and gives no trouble. We find μή also used like an indirect question after σκοπέω (cf. p. 995) with the ind. (Lu. 11:35) and μή ποτε after διαλογίζομαι with the opt. (Lu. 3:15). In Jo. 7:17 an alternative indirect question occurs with πότερον—μή. The only other alternative construction in an indirect question is in 2 Cor. 12:2 f. after οἶδα, and is εἰσε—εἰσε. In all these points the N. T. is in harmony with the κοινή. The use of τί with the subj. (Mk. 6:36) or the future ind. (Ac. 25:26 possibly subj. aor.) may be compared with ποι o after ἔρωτο in Lu. 9:58. In Col. 4:6 πῶς after οἶδεναι is to be distinguished from the use of the inf. after οἶδα (‘know how to do.’ Cf. Lu. 11:13). In Mk. 2:24, ἴδε τί ποιοῦσιν; the ἴδε is probably just the interjection as in Mt. 25:25. For the acc. and the ind. question side by side see Mt. 16:9.

(η) Indirect Command. As already explained, this construction is somewhat vague and the line is hard to draw between this and other idioms.

(a) Deliberative Question. A direct command may be turned into a deliberative question in the indirect with the subjunctive. The volitive idea of the imperative thus glides into the deliberative. In Lu. 12:5, ὑποδείξω δὲ ὑμῖν τίνα φοβηθῆτε: φοβηθήτε τὸν, κτλ., we have the point illustrated both in the direct (imperative) and the indirect (deliberative subj.). Here the only difference between the two forms is the accent. Cf. μή φοβηθῆτε in verse 4. In Mt. 10:28 we have φοβηθῶθε. Obviously this is a natural, though not very frequent, turn for the command to take.

(b) The Conjunctions ἵνα and ὅπως. These may be used after verbs of commanding and beseeching. This idiom does not differ clearly from the sub-final construction. It is a species of purpose (or sub-final. See Final Clauses). The examples there given might suffice, but note the following: Mk. 6:8 παρήγγελεν αὐτῶς ἵνα μηδὲν αἴρωσιν, Mt. 16:20 ἐπετίμησεν τοὺς μαθητὰς ἵνα μηδὲν ἐπιστήσιν, 2 Th. 3:12 παραγγέλλομεν καὶ παρακαλοῦμεν ἐν κυρίῳ Ἰησοῦ Χριστῷ ἵνα—ἐσθίσσον, Ac. 25:3 αἰτοῦμεν ὅπως μετατέθηται. See further Mt. 8:34; Lu. 16:27; 1 Cor. 1:10. In Lu. 16:27 f. we have the purely final idea in both ὅπως and ἵνα which are subordinate to the first ἵνα after ἐρωτῶ. But we cannot follow this use of ἵνα after θέλω and such verbs where it is more or less purely objective. The recitative ὅρι with the imperative in 2 Th. 3:10 is not an instance of indirect command, but simply the direct command preserved.

(γ) The Infinitive. It seems more obvious and is still common in the koine, though retreating before ἵνα. The negative is, of course, μὴ. This use of the infinitive must not be confounded with the idiom for indirect assertion (declarative) as in Mk. 12:18, οἷς τὸν ἵνα συνανακοίμησεν ἂν ἤλθαν. Note Ac. 21:21, λέγον μὴ περιτέμνειν αὐτούς τὰ τέκνα μηδὲ τοῖς ἔθεσιν περιπατεῖν, where we have prohibition, not assertion (note incidentally the two accusatives) with λέγον (same verb as above). So also 23:12, λέγοντες μὴ φαγεῖν μὴ τε πεῖν. Cf. 21:4. Simple enough is the construction after ἐπά in Lu. 9:54, ἐπίκαμον πῦρ καταβῆναι: See also Mk. 8:7. [Page 1047] In Mt. 16:12, συνήκαν δὲ τινές ἐπεν προσέχειν (cf. προσέχειν in verses 6 and 11), we have the declarative ὅτι and the indicative followed by the inf. in indirect command. In Lu. 2:26, ἦν αὐτῶ κεχρηστεύμενόν μὴ ἰδεῖν θάνατον, the construction is like that of indirect command, but the sense comes nearer to the mere object infinitive. See the direct δῶσο in Mk. 6:23 reproduced in the indirect by δοῦνα (Mt. 14:7). There is a certain amount of freedom taken in such transference to the indirect. In Ac. 18:2, δὲ τὸ διατεταχέναι Κλαύδιον χορίζεσθαι πάντας, the inf. is dependent on an inf. Other instances of the inf. in indir. command are seen in Ac. 25:24, βοῶντες μὴ δέν αὐτόν ἤγου, 26:20, ἀπήγγελλον μετανοεῖν. In 2 Th. 3:6 we have παραγγέλλομεν στέλλεσθαι, while in verse 12 we have ἵνα. In verse 10 the direct quotation follows this same verb. In Mk. 6:8 f. we have both ἵνα μὴ αἴρωσιν and μὴ ἐνδύσασθαι (margin of W. H., Μὴ ἐνδύσασθε) after παρήγγελεν. Luke (9:3–5) gives it all in the direct form. In 2 Th. 3:14, τούτοις συμισοῦσθε, μὴ συναναγίνοσθαι αὐτῷ, the inf. is not in indirect command, but rather the inf. used in the direct as the equivalent of the imperative. But in 1 Cor. 5:11, ἔγραψα υἱὸν μὴ συναναγίνοσθαι (so also verse 9), we do have indirect command.

(i) Mixture. Strictly this point belongs to the chapter on Figures of Speech (cf. also, Oratio Variata, The Sentence), but a word is called for here. We have mixture of several sorts as in the classic Greek. In Ac. 19:1 f., Παῦλον ἐλθόν καὶ εὗρεν, ἐπέν τε, we have the infinitive (object-clause subject of ἐγένετο) and the finite clause ἐπέν τε by side by side. Cf. Ac. 4:5 f. for inf. followed by καὶ and the indicative. So in Lu. 9:19 we have the infinitive construction and the ὅτι construction side by side after ἀποκρίθηντες ἔπαν. In Ac. 14:22, παρακαλοῦντες ἐμένειν τῇ πίστει καὶ τῷ ὅτι—δὲ, the construction glides from the inf. into ὅτι. In Ro. 3:8 the recitative ὅτι is dependent on the inf. λέγειν after ἐφασίν. In Ac. 9:27, διηγήσαντο πῶς ἐν τῇ δούλῳ ἐδεί τὸν κύριον καὶ τῷ ἐλάλησαν αὐτῷ, καὶ πῶς κτλ., we have a change from ind. question to indirect assertion and then back again to indirect question. The change may be from the indirect to the direct as in Ac. 1:4, περιμένειν τὴν ἐπαγγελίαν τοῦ πατρὸς ἦν ἧκούσατέ μου. Cf. also 23:22. See also Jo. 12:29. This change appears in Mk. 6:8 f., if the true text is ἐνδόσισθε. But the change may be just the reverse, from the direct to the indirect, as in Ac. 23:23, ἐπεν Ἐσομάσατε—κτήνη τε παραστήσατι. In 27:10 ὅτι occurs with the inf., a mixture of the ὅτι and the infinitive constructions in indirect assertions. This use of ὅτι with the inf. appears in [Page 1048] classic Attic (cf. Xen., Cyr., 1, 6, 18, etc.). See Jannaris, Hist. Gk. Gr., p. 570. Moulton (ProL, p. 213) gives a

Jannaris

JANNARIS, A. N., A Historical Greek Grammar (1897).
The Subordinate Clause. A complex sentence may be quoted in indirect discourse as readily as the simple sentence. This principal clause follows the usual laws already discussed. Secondary tenses of the indicative in the subordinate clause suffer no change at all in mood or tense.1 This is obviously true after primary tenses, as in Gal. 4:15, μαρτυρῶ ὑμῖν ὅτι εἰ δύνατόν—ἐδοκιμᾶτέ μοι. Here the copula ἦν is suppressed. In Lu. 19:15 note ἔπειν φωνηθῆναι—οὐς δεδοκόκει. So after primary tenses the primary tense follows, as in Mk. 11:23, λέγω ὅτι ὃς ἐὰν ἔπη—ἐσται αὐτῷ. Cf. Ac. 25:14 f. But even after secondary tenses the rule is to retain the tense and mode of the direct much more than in the Attic where the mode was quite optional.2 See Lu. 9:33, ἔπειν μὴ εἰδῶς δὲ λέγει. Another example of the relative clause appears in Mt. 18:25, ἐκέλευσεν—πραθήναι—καὶ δὸς ἔξει. Even after a condition of the second class the primary tense may be retained, as in Lu. 7:39, ἑγίνοσκεν ἃν τίς καὶ ποταπή ἢ γυνὴ ὅτις ἁπτεται αὐτοῦ ὅτι ἠμαρτολοῦ ἢστιν. For a causal sentence see ἐκολοομεν αὐτὸν ὅτι οὐκ ἁκολουθεῖ μεθ ἡμῶν (Lu. 9:49). A temporal clause with the subjunctive appears in Mt. 14:22, γυάγκασεν—προάγαγε—ἔξει ὁ ὑπολόγη. See also Ac. 23:12, ἄνθηματσαν—ἔως ὁ ἄποκτείνωσιν. In 25:16, however, we have the optative in the subordinate clause of time with πρὶν ἢ (ἔχοι, λάβοι) after ἄπεκρίθην, the sole example. It is in Luke, as one would expect. The change here is from the subj. to the opt. In Lu. 7:43, ὅτι ὅ, only the subordinate relative clause is given.

10. Series of Subordinate Clauses. It is interesting to observe how rich the Greek language is in subordinate clauses and how they dovetail into each other. It is almost like an endless chain. The series may run on ad infinitum and yet all be in perfect conformity to the genius of the language. I have collected quite a number of examples to illustrate this complexity of structure, some of which are here given. A typical one is Mk. 11:23. After λέγω ὅτι we have ὃς ἔὰν ἔπη which has oratio recta, but the relative clause proceeds with καὶ μὴ διακρίθη ἀλλὰ πιστεύῃ ὅτι δὲ λάβει γίνεται. The relative δὲ λάβει is the fourth involution of subordinate clauses after λέγω. Cf. also Jo. 17:24. A similar multiplicity of subordinate clauses is found in Ac. 25:14–16. [Page 1049] After ἄνθητον λέγων we have oratio recta. The first step is the relative clause περὶ οὗ—ἐνεφάνθαι, which hangs πρὸς οὗ ἄπεκρίθην, which in turn is followed by ὅτι οὐκ ἢστιν and that by χαράζεσθαι, and this again by πρὶν ἢ ἔχοι—λάβοι. The πρὶν ἢ clause is the fifth involution in the oratio recta. Cf. also Ac. 3:19 ff. (πρὸς τὸ ἐξελαφηθῆναι, ὁπως ὃν, ὅν δὲ ἐξερασθη, ὃν). In Ac. 11:13 there are five involutions. The complications are not, of course, always so many. In Lu. 7:39 the oratio recta has a series of three (τίς—ἡτίς—ὅτι). See the threefold series in Ro. 3:8, καθὼς φασίν τινος ἡμᾶς λέγειν ὅτι, κτλ. So also Mk. 6:55, περιφέρειν ὅπου ἠκούον ὅτι ἢστιν (infinitive, relative, declarative). So again 1 Cor. 11:23 f. (ὅτι, ἢ, ἔπειν and oratio recta). Here also the ὅ clause is in apposition with the ὅτι clause. Cf.

———, On the True Meaning of the Κοινή (Class. Rev., 1903, pp. 93 ff.).

2 lb., p. 272.
Lu. 19:15 (inf., ἵνα, τί). In Ac. 7:25, ἐνόμιζεν συνιέναι τοὺς ἄδελφοὺς ὅτι, κτλ., we have two forms of indirect assertion (the inf., then ὅτι), one dependent on the other. So also ὅτι follows διὰ τὸ λέγεσθαι in Lu. 9:7 f. In Ph. 4:10 we have the ὅτι clause and then the articular inf. In Jo. 6:24 the ὅτι clause is subordinate to the ὅτε clause. In 1 Jo. 5:9 we have two cases of oratio recta, one dependent on the other. In Mt. 16:20 the sequence is ἵνα—ὅτι. In Mk. 14:14 we have two cases of oratio recta, one dependent on the other. Cf. ἵνα—ἵνα in Gal 3:14. In Col. 1:9 the ἵνα clause and the infinitive περιπατῆσαι are parallel. The instances are numerous where one infinitive is dependent on another infinitive. Thus ἐξελθεῖν προσεύξασθαι (Lu. 6:12); δοθῆναι φαγεῖν (8:55); πρὸς τὸ δεῖν προσεύχεσθαι (18:1); διὰ τὸ τεταχέναι Κλαύδιον χωρίζεσθαι, after ἐληλυθότα (Ac. 18:2); δεῖν προσκαλεῖν (26:9); γεγενόσθαι εἰς τὸ βεβαιῶσαι (Ro. 15:8); κατηρτίσθαι εἰς τὸ γεγονέναι (Heb. 11:3). In Ac. 23:30, μηδεμιδιπης μοι ἐπισουλῆς εἰς τὸν ἄνδρα ἑσεθαι, the future inf. in indirect discourse is dependent on the participle in the genitive absolute. In Heb. 9:8, τοῦτο δηλοῦσκον τοῦ πνεύματος τοῦ ἁγίου περιπατῆσαι, the perfect inf. follows the genitive absolute. There are various other combinations. These are given as illustrations. No rules are called for about the usage of a series of subordinate clauses. The presence of so many of them in Luke, Paul and Hebrews shows the literary quality of a more periodic structure.

[PAGE 1050] CHAPTER XX

VERBAL NOMS (ΟΝΟΜΑΤΑ ΤΟΥ ΡΗΜΑΤΟΣ)

I. Kinship. The finite verb, verbum finitum (das bestimmte Verb), has now been discussed as adequately as the space in this grammar allows. Originally there was no difference between verb and noun (see Conjugation of the Verb). But gradually there was developed a difference. It was done largely by the help of the pronouns which were added to the verb-stems. Nouns also had their own inflection. But a considerable body of words partook of the nature of both verb and noun and yet did not cut loose from either. In a sense therefore the finite verb is a combination of verb and pronoun while the non-finite verb combines verb and noun. These verbal nouns are the non-finite verb, verbum infinitum (das unbestimmte Verb).1 They failed to add the personal pronominal endings of the finite verb and so did not become limited to a subject (finite). And yet they developed tense and voice and were used with the same cases as the finite verb. In so far they are true verbs. On the other hand they are themselves always in a case like other nouns. The verbal substantive comes to drop its inflection (fixed case-form) while the verbal adjective is regularly inflected in the singular and plural of all three genders just like any other adjective. These verbal nouns may be regarded either as hybrids or as cases of arrested development, more properly deflected development, for they continued to develop in a very wonderful way. The Greek of the Attic period would be barren indeed if robbed of the infinitives and the participles. The names are not distinctive, since both are participles2 (partake of the nature of both verb and noun) and both are non-finite or infinitives (are not limited to

1 K.-Bl., Bd. II, p. 4.
2 In K.-G. (Bd. II, p. 1) the ch. begins thus: “Lehre von den Partizipialen; dem Infinitiv und dem Partizipe.” Both are “particules” and both are “infinitives.”
a subject by personal endings). The root-difference between these lies not in the verbal idea, but in the noun. It is the difference between substantive and adjective. Both are verbals, both are nouns, but one is a substantive and the other is an adjective. These general remarks may help one to understand the history and usage of both infinitive and participle.

II. The Infinitive (ἡ ἀπαρέμφατος ἔγκλισις or τὸ ἀπαρέμφατον ῥῆμα).

1. ORIGIN. There is no real ground for difference of opinion on this subject, however much scholars may argue as to the significance of the infinitive. In the Sanskrit the infinitive did not have tense or voice. The root used was that of a substantive closely connected with a verb. But it is verbal in Sanskrit also in the notion of action, nomina actionis. In the Veda and Brāhmaṇa the number of these verbal nouns is very large. They are used with cases, the cases corresponding to the verb, but that phenomenon appears in Latin and Greek. In Plautus “we even find the abstract noun tactio in the nominative governing its case just as if it were tangere. Classical Greek has a few well-known examples of a noun or adjective governing the case appropriate to the verb with which it is closely connected.” The same thing occurs in the N. T. also. Cf. κοινωνία φωτί (2 Cor. 6:14). See chapter on Cases. These substantives have enough “verbal consciousness” to “govern” cases. In the old Sanskrit these verbal substantives occur in any case (except the vocative, which is not a real case). The later Sanskrit has only one such case-ending so used, the accusative in -tum or -itum (cf. the Latin supine). But for the developments in other languages, especially in the Greek and Latin, these Sanskrit verbal substantives would not have been called infinitives. But they show beyond controversy the true origin of the infinitive before tense and voice were added. They were originally substantives in any case, which were used as fixed case-forms (cf. adverbs) which had a verbal idea (action), and which were made on verbal roots. The Latin shows three cases used in this way: the locative as in regere, the dative as in régium and the accusative as in the supine rectum. The Greek infinitive shows only two case-endings, the dative –α as in λυσαι (cf. also δοθήναι, δοῦναι, with Sanskrit विद्यूत्तर, Homeric δοκείναι with Sanskrit vidmāṇa or the [Page 1052] locative in λυσίν. Thus in the Greek and Latin it is only oblique cases that were used to form the infinitives. It is then as a substantive that the infinitive makes its start. We see this in the Sanskrit वास्तत्तमति=δοῦναι τὸν ἄγαθον. This substantive aspect is clearly seen in the use of παράτος with τοῦ κηρ in Heb. 2:15. The first step towards the verbal idea was in the

---

1 Cf. Giles (Man., p. 470) for λύσιν and its relation to the Sans. -sān-i.
3 Ib.
4 Ib.
construction δοῦναι τὰ ἄγαθά. Moulton⁵ illustrates the border-land of the English inf. by the sentence: “He went out to work again.” If we read “hard work” we have a substantive; but if we read “work hard,” we have a verbal notion. Strictly speaking, δοῦναι τὰ ἄγαθά = ’for giving the good things,’ while ἱδεῖν τὰ ἄγαθά = ‘in seeing the good things.’ This was the original etymological sense as the Sanskrit makes clear. See further chapter on Conjugation of Verb.

2. DEVELOPMENT. In the Sanskrit we see the primitive infinitive without tense or voice. In the modern Greek the infinitive, outside of the Pontic dialect, has disappeared save with auxiliary verbs, and even so it is in a mutilated state, as with θέλει λάει, ἤθελε δεθεῖ, ἔξω δέσει, remnants of the ancient infinitives λάειν, δεθῆναι, δέσαι (Thumb, Handb., pp. 162, 167). Between these two extremes comes the history of the rise and fall of the Greek infinitive. We may sketch that history in five periods.⁶

(a) The Prehistoric Period. The infinitive is simply a substantive with the strict sense of the dative or locative case. Cf. the Sanskrit. We may infer also that there was no tense or voice. This original epexegetical use of the inf. as the dative of limitation has survived with verbs, substantives and adjectives. So ὁ χρόνος τοῦ τεκεῖν (Lu. 1:57). Cf. our “a wonder to behold.” See ὁνορεῖ δούλευειν (Mt. 6:24), ὅρμη ὑβρίσαι (Ac. 14:5), ἰκανὸς λῦσαι (Mk. 1:7). See also Jas. 1:19, ταχὺς εἰς τὸ ἀκούσαι, where εἰς τὸ reproduces the dative idea.

(b) The Earliest Historic Period. The case-form (dative or locative) begins to lose its significance. In Homer the dative idea is still the usual one for the infinitive, in harmony with the form.⁷ With verbs of wishing, commanding, expecting, beginning, being able, etc., the dative idea is probably the original explanation of [Page 1053] the idiom. Cf. ὀδοῖτε διδόναι (Mt. 7:11), ‘knows how to give’ (for ‘giving’). Homer

6 Burton, N. T. M. and T., p. 143, has four. But see Robertson, Short Gr. of the Gk. N. T., p. 188.

has βῆδεναι=‘stepped’ for ‘going.’ But already in Homer there are signs that the case-form is getting obscured or stereotyped. It occurs as apparent subject with impersonal verbs and as the logical object of verbs of saying in indirect discourse.¹ The use of πρίν with the inf. is common also in Homer. Πρίν would naturally be used with the ablative, like पृम्व और the infinitive in Sanskrit,² and so the Greek idiom must have arisen after the dative or locative idea of the inf. in Greek was beginning to fade.³ In Homer the inf. is already a fixed case-form. The disappearance of –αύ as a distinct case-ending in Greek may have made men forget that the usual inf. was dative. This dative inf. was probably a survival of the old and once common dative of purpose. Gradually the inf. passed from being merely a word of limitation (epexegetic) to being subject or object. We see the beginning of this process in Homer, though there is only⁴ one instance of the article with the inf., and that is in the Odyssey (20. 52), τὸ φυλάσσειν. But even here τὸ may be demonstrative.⁵ But in Homer the inf. has tense and voice, a tremendous advance over the Sanskrit inf. This advance marks a distinct access of the verbal aspect of the inf. But there was no notion of time in the tense of the inf. except in indir. discourse where analogy plays a part and the inf. represents a finite mode.⁶ This use of the inf., afterwards so common in Latin, seems to have been developed first in the Greek.⁷ But it was the loss of the dative force as an essential factor that allowed the inf. to become distinctly verbalized.⁸ As it came to be, it was an imperfect instrument of language. As a verb it lacked person, number and time except in indirect discourse. As a substantive it lacked inflection (without case or number) after it came to be limited to two cases. Even after the case-idea vanished and it was used in various cases it was still indeclinable.⁹ [Page 1054] The addition of tense and voice to the fixed case-form of the substantive with verbal root was possible just because of the obscuration of the case-idea.

(c) The Classic Period from Pindar on. The articular infinitive is often used and there is renewed accent on its substantival aspects. The inf. is freely used with or without the article in any case (except vocative) without any regard to the dative or locative ending. Pindar first uses the neuter article τὸ with the inf. as the subject.¹ “By the assumption of the article it was substantivized again with a decided increment of its power.”² It is to be remembered, however, that the article itself is a development from the demonstrative and was very rare in Homer with anything. Hence too much must not be made of the later use of the article with the inf. Hesiod shows two

1 Ib., pp. 157, 159.
2 Whitney, Sans. Gr., § 983.
3 Monro, Hom. Gr., p. 158. It seems a bit odd to find Radermacher (N. T. Gr., p. 145) saying of the inf.: “in seiner ursprünglichen Bedeutung als Modus.” The inf. is not a mode and the original use was substantival, not verbal.
4 Monro, ib., p. 179.

1 Burton, N. T. M. and T., p. 143.
examples of the article with the inf. Pindar has nine and one in the accusative.\(^3\) The absence or ambiguous character of the article in early Greek makes it necessary to be slow in denying the substantival aspect or character of the inf. in the Homeric period.\(^4\) Hence it is best to think of the article as being used more freely with the inf. as with other nouns as the article made its onward way. The greatly increased use of the article with the inf. did serve to restore the balance between the substantival and verbal aspects of the inf. now that tense and voice had come in. The enlarged verb-force was retained along with the fresh access of substantival force. “The Greek infinitive has a life of its own, and a richer and more subtle development than can be found in any of the cognate languages.”\(^5\) The infinitive, thus enriched on both sides, has a great career in the classic period of the language, especially in Thucydides, the Orators, Xenophon and Plato. It has a great variety of uses. In general, however, it may be said that the inf. was not as popular in the vernacular as in the literary style for the very reason that it was synthetic rather than analytic, that it lacked clearness and emphasis.\(^6\) But it was not till the κοινή period that the inf. began to disappear.\(^7\)

(d) The Κοινή Period. The inf. begins to disappear before ἵνα [Page 1055] on the one hand and ὅτι on the other. Jannaris\(^1\) outlines the two chief functions of the inf. in its developed state to be prospective (purpose like ἵνα) and declarative (subject or object like ὅτι, and ἵνα ultimately also). The fondness for analysis rather than synthesis, particularly in the vernacular, gradually pushed the inf. to the wall. The process was slow, but sure. There is indeed a counter tendency in the enlarged use of τοῦ and the inf. in the κοινή, particularly in the LXX under the influence of the Hebrew infinitive construct, and so to some extent in the N. T. So from Polybius on there is seen an increase of τοῦ and the inf. side by side with the enlarged use of ἵνα and ὅτι. The two contradictory tendencies work at the same time.\(^2\) On the whole in the κοινή the inf. has all the main idioms of the classic age (with the marked absence of ἐφῄσει and the new turn given to τοῦ and ἐν τῷ). The Hebrew did not use the inf. as much as the Greek and never with the article. Certainly the inf. is far less frequent in the LXX than in the comparatively free Greek of the N. T., about half as often (2.5 to the page in the LXX, 4.2 in the N. T.).\(^3\) But the Hebrew has not, even in the LXX, introduced any new uses of the inf. in the Greek. The Hebrew inf. construct had no article and was thus unlike τοῦ and the inf. The total number of infinitives in the N. T., according to Votaw,\(^4\) is 2,276. The number of anarthrous infs. is 1,957, of articular 319. The inroad of ἵνα and ὅτι is thus manifest as compared with the Attic writers. The writings of Luke show the largest and most varied use of the inf., while the

Johannine writings have the fewest.\(^5\) Paul’s use is very uneven. Votaw\(^6\) finds the same inequality in the case of the apocryphal books. The papyri show a similar situation. Different writers vary greatly, but on the whole the inf. is dying save in the use with auxiliary verbs, and it is going even there as is seen from the use of ἵνα with θέλω in the N. T. Cf. Mk. 9:30. In the κοινή we find ἵνα with βούλομαι and δύναμαι in Polybius, the LXX and later κοινή writers.\(^7\) As the inf. disappears in the later Greek strange combinations appear, as in Malalas and Theophanes we meet πρὸ τοῦ with the subjunctive (πρὸ τοῦ ἐπιφρόνοντον),\(^1\) The inf. never had a monopoly of any construction save as the complement of certain verbs like βούλομαι, θέλω, etc. This was probably the original use of the inf. with verbs and it was true to the dative case-idea.\(^2\) It was here alone that the inf. was able to make a partial stand to avoid complete obliteration.

\((e)\) The Later Period. Outside of the Pontic dialect the inf. is dead, both anarthrous and articular, save with the auxiliary verbs.\(^3\) The use of θέλω as a mere auxiliary is common enough in Herodotus and probably was frequent in the vernacular then as it was later.\(^4\) “The fortunes of the infinitive were determined by its nature.”\(^5\) The increased use of abstract nouns made it less needed for that purpose, as the fondness for ἵνα and ὅτι made it less necessary as a verb. The N. T. is mid-stream in this current and also midway between the rise and the end of this river. The writers will use the inf. and ἵνα side by side or the inf. and ὅτι parallel. Even in the classical Attic we find ὅπως after πειράματι (Xenophon).\(^6\) As ὅπως disappeared ἵνα stepped into its place. In Latin ut was likewise often used when the inf. could have occurred. The blending of ἵνα and ὅτι in the κοινή helped on the process.

In the N. T. the exclusive province of the inf. is a rather narrow\(^7\) one. It still occurs alone with δύναμαι and μέλλω. It has a wide extension of territory with τοῦ. But on the whole it has made distinct retreat since the Attic period. The story is one of the most interesting in the history of language.

3. SIGNIFICANCE. Originally, as we have seen, the infinitive was a substantive, but a verbal substantive. This set case of an abstract substantive has related itself closely to the verb.\(^8\) The Stoic grammarians\(^9\) called it a verb, ἀπαρέμφατον ῥῆμα.

Ἀπαρέμφωτος ἔγκλισις. Apollonius Dyskolos10 called it a “fifth mode” and the later grammarians followed his error. Some of the Roman grammarians actually took infinitivus in the sense perfectus, [Page 1057] just as they mistranslated γενική by genitivus.1 Bopp2 rightly perceived that the inf. has a nominal origin and was later adjusted to the verb in Greek. It is not a real verb in the very height of its glory.3 And yet the consciousness of the nominal origin was partially obscured even in the time of Homer. The original case-form is so far forgotten that this dative may appear in the nominative and the accusative. The tenses and voices have developed. But Brugmann4 seems to go too far in saying that already the inf. was “only” a verb in the popular feeling. Moulton,5 indeed, harks back to Apollonius Dyskolos: “The mention of ‘The Verb’ has been omitted in the heading of this chapter, in deference to the susceptibilities of grammarians who wax warm when λύειν or λύσας is attached to the verb instead of the noun. But having thus done homage to orthodoxy, we proceed to treat these two categories almost exclusively as if they were mere verbal moods, as for most practical purposes they are.” He states, it is true, that every schoolboy knows that in origin and part of the use the inf. is a substantive, but “nearly all that is distinctive is verbal.”6 I venture to say that this is overstating the case. It is not a mere question of the notion of the user of the infinitive in this passage or that. The history is as it is. In the full development of the inf. we see the blending of both substantive and verb. In this or that example the substantival or the verbal aspect of the hybrid form may be dominant, but the inf. in the historical period is always both substantive and verb. It is not just a substantive, nor just a verb, but both at the same time. The form itself shows this. The usage conforms to the facts of etymology. It is not true that the article makes the inf. a substantive as Winer7 has it. As a matter of fact, therefore, the

inf. is to be classed neither with the noun nor with the verb, but with the participle, and both stand apart as verbal nouns. The article did enlarge the scope of the inf. just as the use of tense did. The Germans can say das Trinken and French le savoir like the Greek τὸ γνῶναι. There is no infinitive in Arabic. As a matter of fact, the inf. because of its lack of endings (here the participle is better off with the adjective endings) is the least capable of all parts of speech of fulfilling its functions. In its very nature it is supplementary. It is either declarative or prospective, but always a verbal substantive. There is a difference between τὸ πρᾶσσειν and ἡ πρᾶξις. Both have verbal stems and both are abstract. The difference lies in the tense and voice of πρᾶσσειν. But πρᾶσσειν has all that is in πρᾶξις plus tense and voice. I decline, therefore, to divide the infinitive into the anarthrous and articular uses so popular in the grammars. These uses do exist, but they simply represent two uses of the inf. in its substantival aspects. They do not affect the verbal side of the inf. at all. The inf. may properly be discussed under its substantival and its verbal aspects. But even so a number of uses cross over as indirect discourse, for instance, or the inf. to express purpose (with or without the article). We must look at both sides of the inf. every time to get a total idea of its value. A number of points of a special nature will require treatment.

(a) Case (Subject or Object Infinitive). Here I mean the cases of the inf. itself, not the cases used with it. The inf. is always in a case. As a substantive this is obvious. We have to dismiss, for the most part, all notion of the ending (dative or locative) and treat it as an indeclinable substantive. A whole series of common expressions has the inf. as subject besides the ordinary verbs. Thus note 1 Cor. 9:15 καλὸν µοι µᾶλλον ἄποθανεῖν, (Heb. 4:6; 9:27) ἀπόκειται τοῖς ἀνθρώποις ἀπαξ ἄποθανεῖν, (Mt. 18:13) ἐὰν γένηται εὐπείν αὐτό, (3:15) πρέπον ἡµῖν πληρῶσαι, (Ac. 21:35) συνέβη βαστάζεσθαι, (Lu. 6:12) ἐγένετο ἐξελθεῖν αὐτόν, (18:25) εὐκοπήθησαν ἐστὶν ἐξελθεῖν, (Jo. 18:14) κυρίως ἁπαξανεῖν, (Mt. 22:17) ἔξεστιν δοῦναι, (Heb. 9:5) oὐκ ἔστιν νῦν λέγειν, (Ac. 27:24) δὲ παραστῇναι, (Ac. 2:24) ἢν δυνᾶτον κρατεῖσθαι, (Ph. 3:1) τὸ αὐτὸ γράψειν oὐκ ὄντων, So Ac. 20:16; 2 Pet. 2:21. All this is simple enough. The articular inf. is likewise found in the nominative as in Mk. 9:10, τί ἐστιν τὸ ἐκ νεκρῶν ἀναστῆναι. Here the article is not far removed from the original demonstrative. Cf. 10:40, τὸ καθίσαι oὐκ ἔστιν ἐµὸν δοῦναι, where δοῦναι is probably the original dative ‘for giving.’ One naturally feels that the articular inf. is more substantival than the anarthrous, as in Ro. 7:18, τὸ θέλειν παράκειται µοι, but that is not correct. The subject-inf. occurs freely both with and without the article in the N. T. as in the κοινὴ generally. See Mt. 15:20 τὸ φαγεῖν, (Mk. 12:33) τὸ [Page 1059] ὄρασθαι, (Ro. 7:18) τὸ θέλειν and τὸ κατεργάζεσθαι. Add 1 Cor. 7:26; 11:6; 2 ———, Gramm. d. neut. Sprachidioms (1822). 7. Aufl. von Lünemann (1867).

8 Goodwin, M. and T., p. 298.
9 W.-M., p. 399.
Cor. 9:1; Ph. 1:21, 24, 29; Heb. 10:31; Ro. 14:21. The origin of this nominative or subject is probably due to its use with impersonal expressions. Moulton illustrates it by the Latin *humanum est errare*, where the force of the locative form *errare* may be seen by translating: ‘There is something human in erring.’ This may have been the original idiom, but it has gone beyond that to mean: ‘Erring is human.’ English students often forget that ‘erring’ is here infinitive, not participle, both in sense and history. It is a step further in the N. T. to see τοῦ and the inf. used as subject nominative. Cf. Lu. 17:1; Ac. 10:25; 1 Cor. 16:4. In 2 Cor. 7:11 the substantival aspect of the inf. is shown by the use of the pronoun ἀυτό τοῦτο τὸ λατρεύοντα in the nominative with καταργόμενο. Cf. the inf. in the predicate nom. with τοῦτο in Ro. 1:12, τοῦτο δὲ ἐστιν συνπαρακληθήναι. So in Ro. 13:11, ὥρα ἡ ὡμᾶς ἐξ ὕπνου ἐγερθῆναι, where the inf. is in predicate apposition with ὦρα. Originally it was doubtless ‘time for arising.’ In 1 Th. 4:6 we have both the anarthrous and articular inf. in apposition with τοῦτο. Cf. also the appositive inf. in Ac. 15:28; Jas. 1:27; 1 Th. 4:3; Ro. 4:13.

The object-infinitive in the accusative is quite common both with and, particularly, without the article. In the N. T. more than half of the instances of the inf. come in here, the object-inf. with verbs of various sorts. In the LXX, however, it is rare in proportion to the other uses. The accusative case is to us more manifest when the article occurs. See Ph. 2:6, οὐχ ὁρισμένον ἡγήσατο τὸ ἐγέρατο σία τεθεί, where the articular inf. is the direct object of ἡγήσατο. So in 2:13, with ὁ ἐνεργόν καὶ τὸ θέλειν καὶ τὸ ἐνεργεῖν. Cf. Ac. 25:11, οὗ παρατόμαμι τὸ ἀποθανέν. See further 1 Cor. 14:39; 2 Cor. 8:10. In Ph. 4:10, ἀνεθάλετε τὸ ἔμπορον φονεύν, the acc. may be that of general reference. Certainly in 1 Th. 3:3, τὸ σαίνεσθα, this is true. Blass calls it here “quite superfluous.” In Ro. 14:13 τὸ μὴ τιθέναι is in apposition with the accusative τοῦτο, as in 2 Cor. 2:1. In 2 Cor. 10:2, δέομαι τὸ μὴ παρὼν διὰρθησα, we should naturally look for the ablative with δέομαι. The instances without the article are more numerous. A fairly complete list of the verbs in the N. T. that have the inf. in indirect discourse was given in the chapter on Modes (Indirect Discourse, pp. 1036 ff.). These ins. are in the acc., [Page 1060] though some of them may possibly preserve the original dative or locative idea. But the acc. with the inf. is that of general reference, while the inf. itself is in the acc. case, the object of the verb of saying or thinking. Cf. Lu. 2:44, νομίζουσις αὐτὸν ἔδωκα. The occasional use of the nom. predicate, as in Ph. 4:11, ἐμαθὼν αὐτάρκης ἔδωκα, accents the acc. character of the object-inf. This point is clear also in the case of indirect commands where the noun or pronoun is in the dative and the inf. in the acc., as in 1 Cor. 5:11, ἐγραψα ύμῖν μὴ συναναίμην σοθα. The illustrations are numerous and need not be multiplied (see list under Indirect Discourse). With βουλώματι, δόναμας, θέλω the dative makes a good idea and was probably so understood in the beginning. It may be questioned, however, if in actual usage this idiom is not also the acc. Cf. Mt. 1:19 ἔβουληθη ἄπολύσαται, (1:20) μὴ φοβηθῆς παραλαβέν, (5:34) λέγω ύμῖν μὴ ὁμόσας, (16:12) οὐκ ἐδέν προσέχειν, (Lu. 18:1) πρὸς τὸ δὲν προσέχεσθαι (both ins. in the acc., one with πρὸς, the other general reference with δὲν), (Ro. 15:8) λέγω Χριστὸν διάκονον

2 Votaw, Inf. in Bibl. Gk., p. 57.
3 Gr. of N. T. Gk., p. 234. Cf. 2 Esd. 6:8 τὸ μὴ καταργηθῆναι.
γεγενήσθαι (cf. Ac. 27:13), (2 Cor. 10:2) λογίζομαι τολμήσαι, (1 Th. 4:11) παρακαλοῦμεν περισσεῖν καὶ φιλοτιμῆσθαι ἑπαρχάζειν καὶ πράσσειν τὰ ίδια καὶ ἀργάζεσθαι (note the interrelation of these infs.). See further Mk. 9:28; 12:12; Lu. 16:3; Jo. 5:18; Ro. 14:2; Gal. 3:2; 1 Cor. 10:13. In the acc. also are the articular infs. with prepositions like εἷς (Ro. 1:11); διὰ (Ac. 8:11); μετὰ (Lu. 22:20); πρὸς (Mt. 5:28).

But the inf. occurs in the other oblique cases also with more or less frequency. The genitive, for instance, appears with the prepositions ἔντεις (Jas. 4:15); διὰ (Heb. 2:15, διὰ παντὸς τοῦ ζῆν); Ἑνεκα (2 Cor. 7:12); ἔς (Ac. 8:40). The only instance of an attribute with the infinitive in the N. T. is Heb. 2:15, except in apposition with τοῦ. It was rare in classic Greek and confined to pronouns. Cf. τὸ αὐτοῦ πράττειν, Plato, Rep. 433. The genitive may be found with ἐπιλαμβάνομαι as in Mk. 8:14, ἐπελαύνοντο λαβεῖν (cf. ἐπιλαμβάνθην τοῦ ἔργου in Heb. 6:10. But we have τὰ ὑπάρχω in Ph. 3:13). At any rate in Lu. 1:19, ἔλαχε τοῦ θομήσαι (cf. 1 Sam. 14:47), we have an undoubted genitive. Cf. also μετεμελήθησθε τοῦ πιστεύσαι (Mt. 21:32). The very common use of τοῦ with the inf. must also be noted. Most of these are genitives, as in τοῦ ἀπολέσας (Mt. 2:13). The free use of τοῦ with the inf. where the case is not genitive will be discussed under a special section under the article with the inf. Cf., for instance, Lu. 17:1; Ac. 10:25; 20:3; 27:1. The gen. occurs [Page 1061] with substantives just as other substantives are used. This is a fairly common idiom. See Ac. 27:20 ἐξίς πᾶσα τοῦ σώζεσθαι, (1 Cor. 9:10) ἐπὶ ἑλπίδα τοῦ μετέχειν, (Ro. 15:23) ἐπιποθεῖναι δὲ ἔχων τοῦ ἐλθεῖν, (1 Pet. 4:17) καρφὸς τοῦ ἄρξεσθαι, (Heb. 5:12) χρείαν τοῦ διδάσκειν. Note, in particular, Ro. 11:8, ἔδωκεν αὐτοῖς ὁ θεὸς πνεῦμα κατανύξεως, ὃς ἰαμάλμεος τοῦ μη βλέπειν, καὶ ἔτα τοῦ μη ἴκνεῖν, where the infs. are parallel with κατανύξεως. Cf. Lu. 1:57, 74; 2:6; 10:19; 21:22; 22:6, etc. Note especially Ph. 3:21, κατὰ τὴν ἐνέργειαν τοῦ δύνασθαι αὐτὸν καὶ ὑποτάξασθαι. Let these illustrate well how the inf. continued to be regarded as a real substantive. The genitive occurs also with adjectives as in βραδεῖς τοῦ πιστεύσας (Lu. 24:25); ἐτοιμοὶ ἐσμὲν τοῦ ἀνελθείν (Ac. 23:15). The genitive is found with ἀξίως (the anarthrous inf.) as in Lu. 15:19, 21, ἢξιος κληθῆναι (cf. Rev. 5:4, 9). In 1 Cor. 16:4 τοῦ πορεύεσθαι may be due to ἀξίως, but is probably used as subj. nominative in a rather loose way. The inf. in the genitive is specially common in Luke and also in Paul. 1

The ablative illustrations are not very numerous, but they are clear. Thus we have the abl. with verbs of hindering as in Mt. 19:14, μὴ καλύπτετε αὐτὰ ἔλθειν πρὸς με, and Lu. 4:42, κατέχοντο αὐτὸν τοῦ μὴ πορεύεσθαι. The classical Greek had also τὸ and the inf., as in 1 Cor. 14:39, and τὸ μὴ after verbs of hindering, which last does not occur in the N. T., so that it is probable that an inf. without the art. as in Mt. 19:14 is in the abl., though not certain. Moulton (ProL., p. 220) illustrates Lu. 4:42 and Ac. 14:18 by B. U. 164 (ii/iii Λ.Δ.) πέσαι αὐτὸν τοῦ ἐλθεῖν, J. H. S., 1902, 369 (Lycaonian inscription) τὸ διχοτομῆσαι με τοῦ τὸ λοεπόν ζῆν, B. U. 36 (ii/iii Λ.Δ.) τοῦ ζῆν μετατησθῆναι, N. P. 16 (iii/Λ.Δ.) κυλοῦντες τοῦ μὴ σπέρειν. See further Lu. 24:16 ἐκτραυτοῦντο τοῦ μὴ ἑπιγνῶναι αὐτῶν, Ac. 10:47 δύναται κωλύσαι τις τοῦ μὴ

1 Blass, Gr. of N. T. Gk., p. 234.
βαπτισθῆναι, 14:18 κατέπαυσαν τοῦ μὴ θάνειν. Cf. also Ac. 20:20, 27; Ro. 11:10; 15:22; 2 Cor. 1:8; Heb. 7:23; 1 Pet. 3:10. Cf. in the LXX, Gen. 16:2; 20:6; Ps. 38:2; 68:24 (quoted in Ro. 11:10); Is. 24:10; 1 Sam. 8:7; Jer. 7:10. The abl. occurs also with prepositions as ἐκ in 2 Cor. 8:11, ἐκ τοῦ ἔχειν and πρὸ, in Mt. 6:8 πρὸ τοῦ αἰτῆσαι. In Ac. 15:28, τούτων τῶν ἔπαναγκες, ἀπέχεσθαι, the inf. is in the abl., in apposition with the preceding words.

The only instance of the inf. in the instrumental in the N. T. occurs in 2 Cor. 2:13, τῷ μὴ εὐρείν με τίτον. The inf. is not found with σὺν in the N. T. Votaw (Inf. in Biblical Greek, p. 29) notes six examples of the instrumental τῷ and the inf. in the LXX text [Page 1062] of B (2 Chron. 28:22; Eccl. 1:16; Is. 56:6; 4 Macc. 17:20, 21). But other MSS. vary. Moulton (Prol., p. 220) cites L. Pb. (ii/B.C.), ἄλλως δὲ τῷ μηθὲν ἔχειν.

The locative occurs with ἐν as in ἐν τῷ ἐυλογεῖν (Lu. 24:51). It is extremely frequent in the N. T., especially in Luke. The possible Hebraistic aspect of the idiom comes up under Prepositions with the Inf. There remains, of course, a possible locative use of a form like λοεῖν. But one doubts if this original idea is preserved in the N. T. Cf. Mt. 16:3, γινώσκετε διακρίνειν, which is more naturally explained as a dative: ‘ye have knowledge for discerning,’ though ‘in discerning’ makes sense. But with the dative it is different. There is no instance of the dative inf. with a preposition, but the original dative is clear in all examples of purpose without τοῦ or a preposition. Thus Mt. 5:17, οὕκ ἦλθον καταλῦσαι, ἔλλα ἐπληρῶσαι, ‘I came not for destroying, but for fulfilling.’ So Lu. 12:58, δός ἔγγοι σαν ἀπελλάχθαι, ‘give diligence for being reconciled.’ Cf. Mt. 7:11; 16:3 with οὗδα and γινώσκω. See further Mt. 2:2, ἠλθομέν προσκυνήσατε, ‘we came for worshipping;’ Jo. 21:3, ὑπάγω ἔλεγεν, ‘I go a-fishing.’ So Ro. 3:15, LXX, δέξεις ἔχεσαι αἷμα, ‘swift for shedding blood.’ The substantive also has the dative inf. in Ro. 9:21, ἐξουσίαν ποιῆσαι, ‘power for making.’ See further 1 Pet. 4:3, κυτειράγασθαι, ‘for having wrought’; Gal. 5:3, ὄφελέσσεις ποιῆσαι, ‘debtor for doing’; Heb. 11:15, καρὺ δὲνακάμψω, ‘time for returning.’ This was the original idiom and, with all the rich later development as verbal substantive, the inf. did not wholly get away from the dative idea.

(b) The Articular Infinitive. We have to cross our tracks frequently in discussing the inf. in a lucid fashion. Numerous examples of the articular inf. have already been given in treating the cases of the inf. But the matter is so important that it calls for special investigation. If we pass by the doubtful articular inf., τῶ φιλάσεως, in the Odyssey, we still find (cf. p. 1054) a few examples in the oldest Greek (two in Hesiod, nine in Pindar, nine in the Lyrics). The use of the article with the inf. grew with the growth of the article itself. But it is not to be overlooked that in Homer the anarthrous inf. had already developed nearly [Page 1063] all the constructions of this

---

3 Birklein, Entwickelungsgeschichte, p. 91.
verbal substantive.\(^1\) The addition of the article made no essential change in the inf. It was already both substantive and verb. But the use of the article greatly enlarged the range of the inf. It is extended to new uses, especially with prepositions. The article was first used with the nom., then the acc. and then the other cases. The use of τοῦ and τῷ with the inf. is wholly post-Homeric.\(^2\) In the Dramatists and Herodotus it is still chiefly in the nom. and acc., though we do find τοῦ and τῷ, and we see the inf. used with prepositions also.\(^3\) In Thucydides the articular inf. suddenly jumps to great prominence, occurring 298 times,\(^4\) especially in the speeches. Of these 163 occur with prepositions.\(^5\) He even uses τῷ with the future inf. and with ἄν and the inf. The orators likewise use the art. inf. very freely. It was especially in Demosthenes that “the power of taking dependent clauses” was fully developed.\(^6\) Only the Pontic dialects, as already noted, keep the inf. as a living form, and a few substantives preserve a mutilated form, like τὸ φαγί (‘eating’) = τὸ φαγεῖν, τὸ φιλί (‘kissing’) = τὸ φιλεῖν (Thumb, Handb., p. 117). In the N. T. we see all this power still retained with the further development in the use of τοῦ. The inf. itself, as we have seen, is retreating in the N. T., but it still possesses the full range of its varied uses. The articular inf. has all the main uses of the anarthrous inf. Votaw (The Inf. in Bibl. Gk., p. 51) finds 22 uses of the inf. (19 anarthrous, 15 articular), but some of these overlap and are artificial. Moulton (Prol., p. 214) concludes from a study of the inscriptions that the articular inf. only invaded the dialects as the κοινὴ was starting. There is no essential difference in idea, and the mere presence or absence of the article is not to be pressed too far. Jannaris\(^7\) admits that sometimes the verbal character is completely obscured. On that point I am more than sceptical, since the inf. continues to have the adjuncts of the verb and is used with any voice or tense. Jannaris\(^8\) thinks that in late Greek the substantival aspect grew at the expense of the verbal and the articular inf. had an increasing popularity. I admit the popularity, but doubt the disappearance [Page 1064] of the verbal aspect. Jannaris makes the mistake of taking “substantival inf.” as coextensive with “articular inf.” Blass\(^1\) questions if the article always has its proper force with the inf. and suggests that perhaps sometimes it merely occurs to show the case of the inf. Here again I am sceptical. Why does the case of the inf. need to be shown any more than other indeclinable substantives? In Mt. 1 the article does serve to distinguish object from subject. I have never seen an articular inf. where the article did not seem in place. Moulton\(^2\) considers the use of the article “the most characteristic feature of the Greek infinitive in post-Homeric language.” Blass\(^3\) seems puzzled over the frequency of the articular inf. in the N. T., since it is chiefly confined to Luke and Paul, whose writings have most affinity with the literary language.

Jannaris\(^4\) notes how scarce it is in the writings of John and in unlearned papyri and inscriptions, doubtful in the medieval period, and absent from the modern vernacular.

“The articular infinitive, therefore, could not resist any longer the tendency of the time, whether it was conceived as a noun or as a verb.”\(^5\) The analytic tendency drove it out finally. Moulton\(^6\) has made some researches on the use of the articular inf. in the dialect inscriptions. He does not find a single instance in Larfield’s Beotian inscriptions. He finds one from Lesbos, one from Elis, one from Delphi, a few from Messene, etc. He notes the silence of Meisterhans on the subject. The conclusion seems to be inevitable that the articular inf. is as rare in the Attic vernacular as it was common in the Attic orators. It is “mainly a literary use, starting in Pindar, Herodotus and the tragedians, and matured by Attic rhetoric.”\(^7\) Aristophanes uses it less than half as often as Sophocles and Aristophanes gives the Attic vernacular. And yet it is not absent from the papyri. Moulton\(^1\) counts 41 instances in vol. I of B. U. The N. T. uses it about as often to the page as Plato. He scores a point against Kretschmer’s view that the Attic contributed no more to the κοινή than any one of the other dialects, since from the literary Attic “the articular inf. passed into daily speech of the least cultured people in the later Hellenist world.”\(^8\)

Polybius\(^9\) deserves to rank with Demosthenes in the wealth of his use of the inf. He employs the inf. in all 11,265 times, an average of 7.95 to the page. He has the articular inf. 1,901 times, an average of 1.35 to the page. In the N. T. the inf. occurs 2,276 times, an average of 4.2 times to a page. The articular inf. is found in the N. T. 322 times, an average of .6 times to a page. The N. T. shows fewer uses, in proportion, of the articular inf. than the O. T. or the Apocrypha. Of the 303 (Moulton) instances, 120 are in Luke’s writings and 106 in Paul’s Epistles. But Votaw\(^3\) counts 319 in all. The MSS. vary in a number of instances and explain the difference. Moulton\(^2\) gives the figures for all the N. T. books thus: James 7, Hebrews 23, Gospel of Luke 71, Paul 106, Acts 49, 1 Peter 4, Matthew 24, Mark 13 (14), John 4, Revelation 1, not in Col., Phil., Past. Eps., Joh. Eps., 2 Pet., Jud. Luke has the most varied use of the articular inf., and Paul’s is somewhat uneven.\(^3\) The use of the articular inf. in the various cases has already been sufficiently discussed. In general one may agree with Moulton\(^4\) that “the application of the articular inf. in N. T. Greek does not in principle go beyond what is found in Attic

writers.” The special use of the articular inf. with prepositions is reserved for separate discussion. There is little doubt that the first use of τό with the inf. was demonstrative as it was with everything. \(^5\) In Mk. 9:10, τί ἦστιν τό ἐκ νεκρῶν ἀναστήματα, the article is almost demonstrative, certainly anaphoric (cf. verse 9). The same thing is true of 10:40 where τό καθίσαι refers to καθίσαμεν in verse 37. It is not necessary to give in detail many examples of the articular inf. in the N. T. I merely wish to repeat that, when the article does occur with the inf., it should have its real force. Often this will make extremely awkward English, as in Lu. 2:27, ἐν τῷ εἰσαχαγείν τοὺς γονεῖς τῷ παῖς. But the Greek has no concern about the English or German. It is simply slovenliness not to try to see the thing from the Greek standpoint. But we are not to make a slavish rendering. Translation should be idiomatic. It is hardly worth while to warn the inept that there is no connection between the article τό and the English to in a sentence like Ph. 1:21, ἐν τῷ εἰσαχαγείν τοὺς γονεῖς τῷ παιδίον. Some special words are needed about τοῦ and the inf. The question of purpose or result may be deferred for separate discussion. We have seen how the genitive inf. with τοῦ occurs with verbs, substantives, adjectives and prepositions. The ablative inf. with τοῦ is found with verbs and prepositions. The ablative use is not here under discussion, since it involves no special difficulties save the redundant μη. We may note that in Critias τοῦ was very common with the inf. \(^1\) We see it also in Polybius in various uses named above. \(^2\) It is an Attic idiom that became very common in the postclassical and Byzantine Greek. \(^3\) Cf. μη ἐμελήσῃς τοῦ ἐνοχλῆσαι Ὁλον, O. P. 1159, 11–13 (iii/A.D.). There is no special difficulty with τοῦ and the inf. with verbs as object except in a case like Mt. 21:32 where τοῦ πιστεύσαι “gives rather the content than the purpose of μετεμελήθησε.” \(^4\)

The instances with substantives like Ac. 14:9, ἔχει πίστιν τοῦ σωθῆναι, give no trouble on the score of the article. It is the case (objective genitive) that has to be noted. So with Ph. 3:21, τὴν ἐνεργειαν τοῦ ὀνασθῇσι. As to adjectives, as already noted, it is doubtful if in 1 Cor. 16:4, ἔδω δὲ ἔξων ἵ τοῦ κάμε πορεύεσθαι, the inf. is to be taken with ἔξων as genitive. Moulton \(^5\) so regards it, but it may be a loose nominative, as we shall see directly. But there is a use of τοῦ and the inf. that calls for comment. It is a loose construction of which the most extreme instance is seen in Rev. 12:7, ἐγένετο πόλεμος ἐν τῷ οὐρανῷ ὁ Μιχαήλ καὶ ὁ ἄγγελοι αὐτοῦ τοῦ πολέμησαι μετὰ τοῦ δρόκοντος. This inf. (note the nom. with it) is in explanatory apposition with πόλεμος. Moulton \(^6\) cleverly illustrates it with the English: “There will be a cricket

6 Ib., p. 218.
match—the champions to play the rest.” It is a long jump to this from a case like Ac. 21:12, παρακαλούμεν τοῦ μὴ ἄνοιαύειν αὐτόν, where the simple object-inf. is natural (cf. 1 Th. 4:10 f.). Cf. also Ac. 23:20, συνεθέντο τοῦ ἐρωτήσαι σε ἃπως καταγάγῃς. “This loose inf. of design” is found twelve times in Thucydides, six in Demosthenes and five in Xenophon. These writers prefer the prepositions with τοῦ and the inf. Polybius in his first five books has this simple τοῦ and the inf. only six times, all negative. [Page 1067] The normal use of τοῦ with the inf. was undoubtedly final as it was developed by Thucydides, and in the N. T. that is still its chief use. But many of the examples are not final or consecutive. It is only in Luke (Gospel 24, Acts 24) and Paul (13) that τοῦ with the inf. (without prepositions) is common. They have five-sixths of the examples. And Luke has himself two-thirds of the total in the N. T. Matthew has seven. John avoids it. Moulton shows that of Paul’s “thirteen” examples three (Ro. 6:6; 7:3; Ph. 3:10) either final or consecutive, two (Ro. 15:22; 2 Cor. 1:8) are ablative, five occur with substantives (Ro. 15:23; 1 Cor. 9:10; 16:4; 2 Cor. 8:11; Ph. 3:21), four are epexegetic (Ro. 1:24; 7:3; 8:12; 1 Cor. 10:13). In Luke about half are not final. It is this loose epexegetical inf. that calls for notice. We find it in the LXX (cf. Gen. 3:22; 19:19; 31:20; 47:29, etc.). It is possible that this very common idiom in the LXX is due to the Hebrew . It does not occur in Polybius. In the LXX also we see τοῦ and the inf. used as the subject of a finite verb in complete forgetfulness of the case of τοῦ. Cf. 2 Chron. 6:7, ἐγένετο ἐπὶ κυριόν Δαυεὶδ τοῦ πατρὸς μου τοῦ οίκοδομῆσαι οἶκον. So 1 Sam. 12:23; 1 Ki. 8:18; 16:31; Ps. 91:3; Is. 49:6; Jer. 2:18; Eccl. 3:12; 1 Esd. 5:67. One must recall the fact that the inf. had already lost for the most part the significance of the dative ending -αι and the locative -ι (-ειν). Now the genitive τοῦ and the dative -αι are both obscured and the combination is used as subject nominative. We have this curious construction [Page 1068] in Lu. 17:1, ἀνένδεκτον ἔστιν τοῦ μὴ ἔλθειν. See also Ac. 10:25, ἐγένετο τοῦ

79 (less 9 fr. LXX, 4 Paul, 5 Ac.=70)
7 Votaw, The Inf. in Bibl. Gk., p. 28.
εἰσελθεῖν, and 27:1, ἐκρίθη τοῦ ἀποπλεῖν. Cf. further 20:3. It is naturally rarer in the N. T. than in the LXX. Moulton (Prol., p. 220) gives a papyrus example closely allied to it, O. P. 86 (i/ii A.D.) ἔθος τοῦ παραστάθημα. See Winer-Moulton, p. 411, for numerous examples in LXX. But very much like it is the use of τοῦ as object-inf., with ἐντέλλομαι in Lu. 4:10 (Ps. 90:11); κυτανεώ in 5:7; στηρίζω in 9:51; ποιέω in Ac. 3:12; κακώ in 7:19; Ἐπιστέλλω in 15:20; παρακαλέω in 21:12; συντίθεμαι in 23:20. Cf. also ἔτοιμος τοῦ in Ac. 23:15. This is surely “a wide departure from classical Greek.” It is, however, after all in harmony with the genius and history of the inf., though the nominative use of τοῦ comes from the LXX.

The vernacular papyri show a few examples of τοῦ and the inf. It is found in the inscriptions of Pisidia and Phrygia. Cf. Compernass, p. 40. Moulton2 illustrates Lu. 1:9 with ἀμελεῖν τοῦ γράφειν, B. U. 665 (i/ii A.D.); Mt. 18:25 and Jo. 5:7 (ἔχω) with ἔν τοῦ πολεῖν, B. U. 830 (i/ii A.D.); 1 Cor. 9:6 with ἔξουσιαν—τοῦ—θέσθαι, C. P. R. 156; Lu. 22:6 with εὐχάριστος—τοῦ εὐφράν, B. U. 46 (ii A.D.). He concludes that the usage is not common in the papyri and holds that the plentiful testimony from the LXX concurs with the N. T. usage to the effect “that it belongs to the higher stratum of education in the main.” This conclusion holds as to the N. T. and the papyri, but not as to the LXX, where obviously the Hebrew inf. construct had a considerable influence. Moulton seems reluctant to admit this obvious Hebraism.

(c) Prepositions. We are not here discussing the inf. as purpose or result, as temporal or causal, but merely the fact of the prepositional usage. The idiom cannot be said to be unusual in classical Greek. Jannaris3 agrees with Birklein4 that classical writers show some 2000 instances of this prepositional construction. The writers (classic and later) who use the idiom most frequently are Thucydides, Xenophon, Polybius, Diodorus, Dionysius, Josephus, Plutarch, Dio Cassius. The most prolific user of the construction is Polybius (1053 instances) and Josephus next (651 times).5 If the prepositional adverbs be added to the strict list of prepositions, the number is very much enlarged, especially in Polybius, who has 90 with χάριν, 115 with ἀμα, 504 with διὰ, 160 with πρὸς, 74 with εἰς, 24 with ἐν, 90 with ἐπί, 33 with μετά, 41 with περί, only one with παρά.1 The idiom was here again later than the articular inf. itself and was also Attic in origin and literary. But it is common also in the Greek inscriptions according to Granit.2 It is rare in the papyri, according to

---

1 Burton, N. T. M. and T., p. 159. In late Gk. this use of τοῦ and the inf. came to displace the circumstantial participle and even finite clauses, only to die itself in time. Cf. Jann., Hist. Gk. Gr., p. 483.

Moulton, save in the recurrent formula, εἰς τὸ ἐν μηδένι μεμφηθήναι, and (cf. 990) in the case of πρὸς τὸ. Cf. πρὸς τὸ τυχῆν, B. U. 226 (i/A.D.); πρὸς τὸ μή—ἐντυγχάνειν, O. P. 237 (i/A.D.); πρὸς τὸ—δεηθῆναι (ib.). Votaw finds the prepositional inf. almost one-half of all the articular infs. in the O. T., the Apocrypha and the N. T., the proportion being about the same in each section of the Greek Bible.

Not quite all the prepositions were used with the inf. in ancient Greek, the exception being ἀνάλογος. ἄμφωι had it only with the genitive, κατὰ with the accusative, παρὰ with the acc., περὶ with the acc. and gen., πρὸς with acc. and genoc., ὑπὲρ with the ablative, ὑπὸ with the ablative. It was not therefore freely used with all the usual cases with the different prepositions. As a rule the article was essential if a preposition occurred with an inf. The reason for this was due to the absence of division between words. It was otherwise almost impossible to tell this use of the inf. from that of composition of preposition with the verb if the two came in conjunction. Cf. ἀντὶ τοῦ λέγειν in Jas. 4:15. A few instances are found without the article. Thus ἀντὶ δὲ ἀρχεῖν (note presence of δὲ between) in Herodotus I, 210. 2. It appears thus three times in Herodotus. So also in Æschines, Eum. 737, we have πλὴν γάμου τυχεῖν. So Soph., Ph., 100. Winer finds two in Theodoret (cf. IV, 851, παρὰ συγκλώθεσθαι). The papyri give us εἰς βάψαι, O. P. 36 (i/A.D.), and the common vernacular phrase εἰς πεῖν (‘for drinking’). Cf. δός μοι πεῖν in Jo. 4:10. Moulton cites also an example of ἀχριμ from Plutarch, p. 256 D, and one from an inscription of iii/B.C. (O. G. I. S. 41, Michel 370) ἐπὶ—λαμβάνεις. The instances without the article are clearly very few. Moulton (Prol., p. 81) suggests that the significant frequency of εἰς πεῖν in the papyri is due to Ionic influence. The LXX furnishes several instances of anarthrous εἰς, as εἰς ἐκφυγεῖν in Judg. 6:11 (cf. 2 Esd. 22:24; Sir. 38:27; Judith 4:15). Note also ἔος ἐλθεῖν in 1 Macc. 16:9; ἔος ό οἰκτείρῃσαι in Ps. 122:2 (so Ruth 3:3); μέχρις ό ἐγγύσαι in Tob. 11:1. Cf. also πλὴν with anarthrous inf. in Polybius, etc.

The tenses have their full force in this prepositional construction, as in Mk. 5:4, διὰ τὸ—δεδέσθαι καὶ διεσπάσθαι καὶ—συντετρίφθαι. Naturally some tenses suit certain prepositions better, as ἐν with the present tense. The principles of indirect discourse apply also to the inf. with prepositions. Cf. μετὰ τὸ ἐγινόμενος μὲ προάξω (Mk. 14:28). In the N. T. the accusative seems to occur always even when the nominative predicate would be possible, as in διὰ τὸ μένειν αὐτὸν (Heb. 7:24). So also Lu. 11:8. But note Xen., Cyr., I, 4. 3, διὰ τὸ φίλομαθῆς εἶναι.

1 Burton, N. T. M. and T., p. 50.
2 W.-M., p. 415.
It is not necessary for the article to come next to the inf. as in Mt. 13:25. Several
words may intervene and the clause may be one of considerable extent. Cf. Mk. 5:4;
Ac. 8:11; Heb. 11:3; 1 Pet. 4:2. But the N. T. does not have such extended clauses of
this nature as the ancient Greek, and the adverbs usually follow the inf.\(^3\) The English
“split inf.” is not quite parallel.

In the O. T. there are 22 prepositions used with the inf. and the Apocrypha has 18,
while the N. T. shows only 10.\(^4\) Of these only eight are the strict prepositions (ἀντί,
διά, εἰς, ἐν, ἐκ, μετά, πρό, πρὸς) and two the prepositional adverbs ἐνεκα and ἐος. It
remains now to examine each in detail.

Ἀντί τοῦ is not rare with the inf. and is chiefly found in the Greek orators.\(^5\) But we
have it in Thucydides, Xenophon and Plato. Herodotus\(^6\) has only 11 instances of the
preposition with the inf., but 5 of them are with ἀντί. It does not occur in Polybius. In
the N. T. we have only one instance, Jas. 4:15, ἀντί τοῦ λέγειν. Votaw gives one for
the LXX, Ps. 108:4, ἀντί τοῦ ἀγαπάνειν.

Διὰ has 33 instances in the N. T., all but one (genitive, Heb. 2:15, διὰ παντὸς τοῦ
ζην) in the accusative. Mr. H. Scott reports the 33 exx. thus: Phil. 1, Jas. 1, Heb. 4,
Mk. 5, Mt. 3, Lu. 9, Ac. 9, Jo. 1. The O. T. has it with the inf. 35 times and the [Page
1071] Apocrypha 26,\(^1\) all with the accusative. The idiom διὰ τὸ is so frequent in
Xenophon and Thucydides that as compared with ὅτι it stands as 2 to 3.\(^2\) In later
Greek (κοινή and Byzantine) it comes to displace even ἕνα and ὅπως, though finally
shifting to διὰ νά in modern Greek (cf. English “for that”).\(^3\) It is not surprising
therefore to find it in the N. T. with comparative frequency. Διὰ τὸ is frequent in
Luke’s writings, and once in Paul’s Epistles, and rare in the other N. T. writers.\(^4\) It is
always the cause that is given by διὰ τό, as in Mt. 13:5 f., διὰ τό μὴ ἔχειν. It is not
merely the practical equivalent of ὅτι and διότι, but is used side by side with them. Cf.
Jas. 4:2 f., διὰ τὸ μὴ ἀπεξάρασα ὑμᾶς—διότι κακῶς ἀπεξάρασα. It may stand alone, as in
Lu. 9:7; 11:8, or with the accusative of general reference as in indirect discourse, as in
Lu. 2:4; 19:11. Note two accs. in Ac. 4:2. The perfect tense occurs seven times, as in
Mk. 5:4 (ter); Lu. 6:48; Ac. 8:11; 18:2; 27:9. In Mk. 5:4 it is the evidence, not the
reason, that is given.\(^5\) Blass (Gr. of N. T. Gk., p. 236) unnecessarily rejects Jo. 2:24.

Εἰς τό is common also with the inf. without much difference in sense from ἐπί τό
and πρὸς τό with the inf.\(^6\) But the N. T. does not use ἐπί with the inf. There is no
doubt about the final use of εἰς τό whatever is true of the consecutive idea. In the late

Greek Jannaris notes a tendency to use εἰς τό (cf. βραδύς εἰς τό λαλῆσαι in Jas. 1:19) rather than the simple inf. Cf. 1 Th. 4:9. But this tendency finally gave way to ἵνα.
The O. T. has εἰς τό 124, the Apocrypha 28 and the N. T. 72 times. In the N. T. it is more common than any other preposition with the inf., ἐν coming next with 55 examples. Moulton counts only 62 instances of εἰς τό in the N. T., but Votaw is right with 72. Paul has it 50 times. There are 8 in Hebrews and only one each in Luke and Acts, a rather surprising situation. The papyri show scattered examples of it. Cf. εἰς τό ἐν μηδενὶ μεμφιθήναι, P. Fi. 2 (iii/A.D.) 4 times. In 1 Pet. 4:2, εἰς τό—βιῶσαι, note the long clause. There is no doubt that in the N. T. εἰς τό has broken away to some extent from the classic notion of purpose. That idea still occurs as in Ro. 1:11, εἰς τό στηριχθῆς. This is still the usual construction. Cf. Ro. 3:26; 7:4; 8:29; Eph. 1:12; Ph. 1:10; 1 Th. 3:5; Jas. 1:18; Eph. 2:17, and other examples in Mt. and Heb., to go no further. In Paul we notice other usages. In Ph. 1:23, ἕπιθυμαν εἰς τό ἀναλῦσαι, we have it with a substantive and in Jas. 1:19 it occurs with the adjectives ταχύς and βραδύς. It is epexegetic also with the verbal adjective θεοδίδακτοι in 1 Th. 4:9. Besides, we find it as the object of verbs of command or entreaty giving the content of the verb as in 1 Th. 2:12; 3:10; 2 Th. 2:2, ἔρωτῳμεν εἰς τό μη ταχέως σαλευθῆναι. Cf. also 1 Cor. 8:10. So in Mt. 20:19; 26:2; 1 Cor. 11:22 there is a really dative idea in εἰς τό. Just as ἵνα came to be non-final sometimes, so it was with εἰς τό, which seems to express conceived or actual result (cf. τοῦ also) as in Ro. 1:20; 12:3; 2 Cor. 8:6; Gal. 3:17. Cf. the double use of ὅστε for ‘aim’ or ‘result.’

The perfect tense can be used with εἰς τό as in Eph. 1:18 εὑς τό εἰδέναι and Heb. 11:3 εἰς τό γεγονόναι, the only instances. But the present occurs 32 times, the aorist 38, the perfect 2=72. These developed uses of εἰς τό occur to some extent in the LXX (1 Ki. 22:8; 1 Esd. 2:24; 8:84).

Ἐν τῷ appears in the tragedies. It is found 6 times in Thucydides, 16 in Xenophon, 26 in Plato. But Blass observes that the classical writers did not use ἐν τῷ in the temporal sense of ‘while’ or ‘during.’ Moulton sought to minimize the fact that in the O. T. ἐν τῷ occurs 455 times (45 in the Apocrypha) and that it exactly translates the Hebrew בְּ and held that it did not in principle go beyond what we find in Attic writers. But he took that back in the second edition under the suggestion of Dr. E. A. Abbott that we must find Attic parallels for ‘during.’ So he now calls this

Abbott

“possible but unidiomatic Greek.” In the N. T. we have ἐν τῷ and the inf. 55 times and 3/4 in Luke. In the Greek Bible as a whole it is nearly as frequent as all the other prepositions with the inf.7 The Semitic influence is undoubted in the O. T. and seems clear in Luke, due probably to his reading the LXX or to his Aramaic sources.8 Cf. Lu. 1:8; 8:5 (ἐν τῷ σπείρειν); 24:51; Ac. 3:26; 4:30; 9:3, etc. Jannaris9 sees here a tendency also to displace the participle. The [Page 1073] idiom is not confined to Luke’s writings. Cf. Mt. 13:4; 13:25; Mk. 4:4; Heb. 2:8; 3:12, etc. Ordinarily it is the present inf. as in Mt. 13:4; Lu. 8:5; Ac. 3:26, where the Attic writers would have the present participle. But in Luke we have also the aorist inf. as in 2:27 ἐν τῷ εἰσαγαγεῖν, (3:21) ἐν τῷ βαπτισθῆναι, where Blass1 sees the equivalent of the aorist participle (cf. Ἱησοῦ βαπτισθέντος) or a temporal conjunction with the aorist indicative. One questions, however, whether the matter is to be worked out with so much finesse as that. The aorist inf. with ἐν τῷ occurs only 12 times in the N. T.2 It is more correctly just the simple action of the verb which is thus presented, leaving the precise relation to be defined by the context, like the aorist participle of simultaneous action. Cf. ἐν τῷ ὑποτάξαι in Heb. 2:8; Gen. 32:19, ἐν τῷ εὐρεῖν. This is all that ἐν τῷ should be made to mean with either the present or the aorist. Cf. Mt. 13:4; 27:12; Lu. 8:40; 9:29. The idea is not always strictly temporal. In Ac. 3:26 (cf. Jer. 11:17), 4:30, it is more like means. Votaw3 sees content in Lu. 12:15; Heb. 3:12. In Heb. 8:13, ἐν τῷ λέγειν, the notion is rather causal. The conception is not wholly temporal in Mk. 6:48; Lu. 1:21.4 No other preposition occurs in the N. T. with the inf. in the locative case. But cf. ἐκ τῷ ἐμαυ ταραμέννον, O. P. 1122, 9 f. (A.D. 407).

Ἔνεκεν τοῦ ἑκτεν in Xenophon, Plato and Demosthenes, usually as final, but also causal.5 Sophocles in his Lexicon quotes the construction also from Diodorus and Apophth. There is only one instance of it in the N. T., 2 Cor. 7:12, Ἔνεκεν τοῦ φανερωθῆναι τῇ σπουδῇ ύμῶν, where it is clearly causal as with the two preceding participles, ἐνεκεν τοῦ ὀδικήσαντος, ἐνεκεν τοῦ ὀδικηθέντος (a good passage to note the distinction between the inf. and the part.). The case is, of course, the genitive.

Ἔκ τοῦ, likewise, appears in the N. T. only once with the inf. (2 Cor. 8:11, Ἔκ τοῦ ἐχειν), but the case is ablative. Its usual idea in Attic prose is that of outcome or

result.\textsuperscript{6} Votaw\textsuperscript{7} gives no illustration from the O. T., but three from the Apocrypha. Blass\textsuperscript{8} takes it in 2 Cor. 8:11, to be equivalent to καθοὖ ἐν ἔχει. More \textsuperscript{Page 1074} likely it is meant to accent the ability growing “out of” the possession of property, whatever it may be. In Polybius ἐκ τοῦ with the inf. has a more varied use (departure, source of knowledge, source of advantage).\textsuperscript{1} He uses it 25 times.

usage became fixed and the article never intervened. But the inf. with both πρὶν and πρὸ is in the ablative case. Cf. ablative\(^1\) inf. with πωρα in Sanskrit. Πρὶν was never used as a preposition in composition, but there is just as much reason for treating πρὶν as a prepositional adverb with the ablative inf. as there is for so considering ἐως τοῦ, not to say ἐως alone as in ἐως ἔλθεν (1 Macc. 16:9). The use of the article is the common idiom. The fact of πρὶν and the inf. held back the development of πρὸ τοῦ. In modern Greek πρὸ τοῦ as προτοῦ occurs with the subj. (Thumb, Handb., p. 193).

In the N. T. πρὶν is still ahead with 13 examples. The instances of πρὸ τοῦ are Mt. 6:8; Lu. 2:21; 22:15; Jo. 1:48; 13:19; 17:5; Ac. 23:15; Gal. 2:12; 3:23.

Πρὸς τὸ is the remaining idiom for discussion. It was used by the ancients in much the same sense as εἰς τὸ and ἐπὶ τῷ, ‘looking to,’ ‘with a view to.’\(^2\) The idiom is very common in Polybius,\(^3\) 150 examples, and there are 10 of πρὸς τῷ. But in the O. T. we have only 14 examples and 12 in the Apocrypha.\(^4\) The N. T. shows 12 also. Some of the LXX examples are of πρὸς τῷ (Ex. 1:16; 2 Macc. 7:14), but in the N. T. they are all πρὸς τὸ. In the papyri Moulton\(^5\) finds πρὸς τὸ rather more common than εἰς τὸ. In the N. T. Matthew has it five times (5:28; 6:1; 13:30; 23:5; 26:12). These express aim unless 5:28 is explanatory of βλέπων.\(^6\) Mark has it once, 13:22. Luke has it twice (18:1, where πρὸς τὸ δεῖν means ‘with reference to’; Ac. 3:19 only \(\text{κB, while other MSS. read εἰς} \)\(^7\), Paul’s four examples (2 Cor 3:13; Eph. 6:11; DEFG εἰς; 1 Th. 2:9; 2 Th. 3:8) all give the “subjective purpose.”\(^8\) Both present (3 times) and aorist (9 times) tenses occur. Cf. πρὸς τὸ θεωρῆσαι in Mt. 6:1.

\(d\) The Infinitive with Substantives. Numerous examples of the inf. with substantives were given in the discussion of the cases of the inf. The matter calls for only a short treatment at this point. The use of the inf. with substantives was ancient\(^9\) and natural, first in the dative or locative and then in the genitive with τοῦ. It was always common in the classic Greek.\(^1\) The usage is common in Polybius with both the anarthrous and the articular inf.\(^2\) The same thing is true of the O. T. and the Apocrypha.\(^3\) It is so frequent as not to call for illustration. The meaning is that of complement and the inf. most frequently occurs with words of time, fitness, power, authority, need, etc. It is abundantly used in the N. T. both with and without the article. Some anarthrous examples are (Mt. 3:14) χρεῖαν βαπτισθῆναι, (Lu. 2:1) δόγμα ἀπογράφεσθαι, (Jo. 1:12) ἐξουσίαν γενέσθαι, (19:40) Ἴδος ἐνταφιάζειν, (Ac. 24:15)

---

1 Whitney, Sans. Gr., § 983; Monro, Hom. Gr., p. 158. Homer used πρὶν with the inf. after both positive and negative clauses.
3 Allen, Inf. in Polyb., p. 33.

1 Goodwin, M. and T., p. 301.
2 Allen, Inf. in Polyb., pp. 23, 32.
The Infinitive with Adjectives. This idiom is likewise classical and is common from Homer on. As already shown, the case varies with different adjectives. This inf. is complementary as with substantives. It is natural with adjectives as any other substantive is. It held on longest with δυνατός, ἵκανός, but other adjectives in late koine began to give way to εἰς τό (cf. Jas. 1:19, ταχὺς εἰς τό ἀκούσα, βραδύς εἰς τό λαλῆσαι) rather than the simple inf. and finally this disappeared before ἰερόν (cf. Mt. 8:8, ἱκανὸς ἰερόν). In the LXX and the N. T. the inf. with adjectives is less frequent than with substantives. We have it with both the anarthrous and the articular inf. See (Mt. 3:11) ἱκανὸς βαστάσαι, (Mk. 10:40) ἔμοι δοῦναι, (Lu. 15:19) ἅξιος κληθῆναι, (Jas. 3:2) δυνατός ἀληθεύως ἠμαθῆται, (1 Cor. 7:39) ἐλευθέρα γαμμῆθη, (Heb. 5:11) δυνατός εὐνοῶν λέγειν, (1 Pet. 4:3) ἀρκετῶς κατειργάσθαι, etc. It is [Page 1077] more common with ἅξιος, δυνατός, ἵκανός. The only adjective that often has τοῦ and the inf. in the O. T. is ἐπιτύμμως. We find it also with adverbs as in Ac. 21:13, δεθήναι ἀποθανέν ἑποτύμμως ἐξει (so 2 Cor. 12:14). The articular examples are less frequent. But note (Lu. 24:25) βραδεῖς τοῦ πιστεύειν, (Ac. 23:15) ἔτοιμοι τοῦ ἀνελέον. Some would add 1 Cor. 16:4, ἅξιον τοῦ πορεύεσθαι, but see Cases of the Inf.

(f) The Infinitive with Verbs. This usage came to be, of course, the most frequent of all. It started as a dative or locative, then a sort of accusative of reference, then the object of verbs with whatever case the verb used. It is both anarthrous and articular. It is not necessary to go over again (see Cases of the Inf.) the varied uses of the inf. with verbs, whether the object of verbs of saying or thinking in indirect discourse, verbs of commanding or promising, the direct object of verbs (auxiliary inf.), verbs of hindering, etc. As a matter of fact they are all object-infns. whatever the case (acc., gen., abl., dat., instr.). Votaw notes that in the N. T. this use of the inf. is four times as common as any other. It is usually the anarthrous inf., but not always. Even δύναμιν and ἐξοθάμια (not N. T.) are used with τοῦ and the inf. Jannaris has made a careful list of the verbs that continued for a while in late Greek to use the inf. against
the inroads of Ἰνα. Radermacher (N. T. Gr., p. 150) argues that in general the N. T. use of the inf. with verbs is like that of the koine. The inf. λαλήσαι with ἐπαρρήσιασάμεθα (1 Th. 2:2) is not a Hebraism, but a Hellenism. But surely it is not necessary to call this usage an Atticism. In the discussion of Ἰνα (see pp. 430, 994) the displacement of the inf. by Ἰνα even after verbs like θέλω was sufficiently treated. Schmid6 “shows how this ‘Infinitivesurrogat’ made its way from Aristotle onwards.”7 In the N. T. it is chiefly in the Gospel of John that we find this use of Ἰνα. “The strong volitive flavour which clung to Ἰνα would perhaps commend it to a writer of John’s temperament.”8 But after all, the inf. with verbs has not quite disappeared from John’s Gospel. Jannaris9 has worked out the situation in John’s Gospel as between this use of Ἰνα and Ἰνα. [Page 1078] He finds Ἰνα about 125 times and the inf. with verbs about 129 times. Of these 57 belong to δύναμαι (37) and θέλω (20). There are besides, 10 with δεῖ and 12 each with ζητέω and with μέλλω. The rest are scattered with δίδωμι, ἔχω, ὑφείλεω, δοκέω, ἀφίημι, αἴτεω, ἔρωτάω, ἄρχομαι, etc. It is clear, therefore, that the inf. with verbs is by no means dead in the N. T., though the shadow of Ἰνα is across its path. As illustrations of the great wealth of verbs with the inf. in the N. T. note (Mt. 11:20) ἠρέσατο ὄνειδίζειν, (27:58) ἐκέλευσεν ἰποδοθήκην, (Mk. 12:12) ἐξήτουν κρατήσας, (Lu. 16:3) σκάπτεσθαι, ἐπιστέφειν ἀσχόνομαι. Almost any verb that can be used with a substantive can be used with the inf. The use of the inf. with προστίθεμαι is a Hebraism. Cf. Ex. 14:13. See Lu. 20:11 f., προσέθετο πέμψαι. It means ‘to go on and do’ or ‘do again.’ It is the one Hebraism that Thumb1 finds in Josephus, who is Atticistic. The articular inf. with verbs is much less frequent. But note τὸ ὀψαλίνων ὑφελίω (Ro. 13:8); παραπτούμαι τὸ ἀποθάνειν (Ac. 25:11); τὸς περιπατητικὸς ἄναμώς. Cf. further Ac. 26:16; 2 Cor. 10:13; Eph. 3:6, 8; 4:17; 1 Th. 4:3 f.; Heb. 9:8; 1 Pet. 2:15 (οὕτως). The articular inf. may also be appositional as in Ro. 14:13, τοῦτο κρίνατε μᾶλλον, τὸ μὴ τίθέναι. So also 2 Cor. 2:1; 7:11; Ro. 4:13; 1 Th. 4:6 bis. In the N. T. and the Apocrypha it is only τὸ (in the articular use) that is appositional, but in the O. T. 15 out of the 17 instances have τὸ with no reference to the case of the noun.4 It is worth noting that Ἰνα is

common also in appositional clauses (cf. Lu. 1:43; 1 Cor. 9:18), especially in the writings of John (Jo. 4:34; 15:8; [Page 1079] 17:3; 1 Jo. 3:11, 23; 4:21; 5:3, etc.). We find ὅτι also in 1 Jo. 2:3; 3:16).  

5. VERBAL ASPECTS OF THE INFINITIVE. It is worth repeating (p. 1057) that the inf. is substantive as well as verb. Each inf. does not, of course, have all the substantival and verbal uses, but each inf. has both substantival and verbal aspects. The uses vary with each example. The verbal aspects do not exclude the substantival, though some writers say so. Per contra, Jannaris holds that “the verbal nature of the substantival infinitive was sometimes completely lost sight of.” This I do not concede. After tenses came to the verbal substantive its dual character was fixed. But, pp. 1050, 1056 f., the inf. did not come to the rank of a mode.

(a) Voice. The Sanskrit inf. had no voice. In Homer the inf. already has the voices, so that it is speculation as to the origin. It is possible that the original Greek inf. had no voice. This is an inference so far as the Greek is concerned, but a justifiable one. Moulton illustrates it well by δυνάτος θαυμάσω, ‘capable for wondering,’ and ἔξως θαυμάσω, ‘worthy for wondering,’ when the first means ‘able to wonder’ and the second ‘deserving to be wondered at.’ They are both active in form, but not in sense. “The middle and passive infinitives in Greek and Latin are merely adaptations of certain forms, out of a mass of units which had lost their individuality, to express a relation made prominent by the closer connection of such nouns with the verb.”

There was so much freedom in the Greek inf. that the Sanskrit -tum did not develop in the Greek as we see it in the Latin supine. Gradually by analogy the inf. forms came to be associated with the voices in the modes. Practically, therefore, the Greek inf. came to be used as if the voices had distinctive endings (cf. the history of the imper. endings). Thus in Lu. 12:58, δῶς ἐργασίαν ἀπηλλάχθαι ἀπεί τοῦ, it is clear that the passive voice is meant whatever the origin of the form –σθαι. The reduplication shows the tense also. The same remark applies to Mk. 5:4, διὰ τὸ διεσπάσθαι καὶ διεσπάσθαι ἐπεὶ αὐτοῦ, τὰς ἁλύσεις. See also 5:43, ἔπειν δοθῆναι αὐτῇ φαγεῖν. No special voice significance is manifest in φαγεῖν, which is like our ‘eating’ and is the acc. of general reference with δοθῆναι which in turn is the direct object of ἐπειν. But δοθῆναι has the passive force beyond a doubt. Cf. further ἀπολελύσθαι ἐξώντος in Ac. 26:32 and ἔνεκεν τοῦ φαγεῖν ἐποιήσεις in 2 Cor. 7:12. In general, therefore, after the inf. is fully developed, the voice in the inf. appears exactly as in the modes. So τοῦ ἀπέχεσθαι (Ac. 15:20); ἀπογράψασθαι (Lu. 2:5); ἐπιλαθέσθαι (Heb. 6:10); γαμηθῆναι (1 Cor. 7:39); κληθῆναι νίός (Lu. 15:19). Cf. θεάσασθαι (Lu. 7:24) and θεαθῆναι (Mt. 6:1).

---

1 See Blass, Gr. of N. T. Gk., p. 229.
2 As, for instance, Szczurat, De Inf. Hom. Usu, 1902, p. 17. He claims that the Hom. inf. came to serve almost all the ideas of the finite verb.
4 Prol., p. 203.
5 Ib.
6 In Ac. 26:28, πεῖθεν Ἡρωδεῖν ἐπιθυμησείν, one notes a possible absence of the strict voice in ποιῆσαι. But it is a hard passage.
(b) Tense. See chapter on Tenses for adequate discussion of this point. Some general remarks must here suffice. As the Sanskrit inf. had no voice, so it had no tense. In the original Greek there was possibly no tense in the inf., but in Homer the tense is in full force. There is no time-element in the inf. (cf. subj., opt. and imperative) except as the future inf. echoes the expectation of a verb like ἐλπίζω (or μέλλω) or as the inf. represents a fut. ind. in indirect discourse (see Indirect Discourse under Modes). It is probably true that originally there was no distinction between aorist (punctiliar) and present (linear) action in the inf. In Sanskrit and Latin the infinitives and supines have no necessary connection with the present stem (cf. supine tactum and inf. tangere). “The σ in λῦσαι has only accidental similarity to link it with that in ἔλυσα.” Moulton tersely adds: “But when once these noun-forms had established their close contact with the verb, accidental resemblances and other more or less capricious causes encouraged an association that rapidly grew, till all the tenses, as well as the three voices, were equipped with infinitives appropriated to their exclusive service.” But even so at first the tense of the inf. had only to do with the kind of action (punctiliar, linear, state of completion), not with time.

In general, as with the subj., opt. and imper., the aorist inf. came to be the natural one unless some reason for the present or perf. or fut. existed. Cf. καταβῇν (Lu. 9:54); παθεῖν (Lu. 24:46); καταλῦσαι (Mt. 5:17); προσεύξασθαι (Lu. 18:10); ἀκοῦσαι (Ac. 10:33); ἔχειν (Ro. 3:15); etc. Sometimes, as in ἔδει ποίησαι (Mt. 23:23), the inf. was used to suggest antecedent action. But the timeless aorist may point to what is future, as in Lu. 24:46 above. Cf. also Lu. 2:26; Ac. 3:18. Essentially, it does neither. Cf. μέλλων with aor. inf. So μέλλοντα ἐνεγκ[ε]ῖν, P. Grenf., Page 1081 ii, 77 (iii/A.D.). In indirect assertions the aorist inf. represents the aor. indicative, but the N. T. seems to show no instance like this. However, that is a mere accident, for note ἐν τῷ ἐλευσιγμένῳ τοῦς γονέως τὸ παιδίον τοῦ ποιῆσαι αὐτοῖς (Lu. 2:27) where the same principle applies. Contrast the tense of ποιῆσαι and πείθεις in Ac. 26:28. In Lu. 24:46, γέγραπται παθεῖν τὸν Χριστόν, we have the timeless aorist in indirect discourse.

The present inf. with some verbs would accent linear action and with others the inf. would not draw the point sharply. Some writers have a fondness for the present. One can see the force of linear action in ἠμᾶς δεῖ ἐργαζόμεθα (Jo. 9:4) and in τῷ ἄγαπῶν αὐτόν (Mk. 12:33). Cf. also στοιχεῖν in Ph. 3:16. In 1 Jo. 3:9, οὐ δύναται ἰμαρτάνειν, the linear notion is prominent (cf. οὐχ ἰμαρτάνει in verse 6). It is also quite normal with μέλλων, with which it occurs 84 times in the N. T. to 6 of the aorist. See Mt. 14:22 for both aorist ἐμβῆναι and present προσῆσαι in same sentence. Cf. also Ac. 15:37 f. The usual tense-distinction may be assumed to exist, though in a case like

2 Moulton, Prol., p. 204
3 Ib.
4 Ib.
5 Votaw, Inf. in Bibl. Gk., p. 59, notes 5,484 aorists and 3,327 presents in the Gk. Bible. In the N. T. the ratio is 4:3, in the O. T. 2:1.
1 Burton, N. T. M. and T., p. 53.
λέγειν (Heb. 5:11) the point is not to be stressed. The present inf. in indirect assertion represents the same tense of the direct, as in Mt. 22:23; Lu. 11:18, etc. Rarely the present inf. represents an imperfect indicative as in Lu. 20:6.

The perfect inf. is common also in indirect discourse to stand for the same tense of the direct, as in Jo. 12:29; Ac. 12:14; 14:19; 16:27. This is natural enough. But the perfect inf. is found also in the complementary inf. as Ac. 26:32, ἀπολελύσθαι ἐδόνατο. Note Lu. 12:58, ἀδές ἐγρασίαν ὄπηλλάχθαι. But we also find the perfect tense with the articular inf. (So aorist and present) as in Mk. 5:4; Lu. 6:48; Ac. 27:9. In the N. T. there are in all 47 perfect infs. and the same number in the O. T. Of the N. T. examples 23 are anarthrous, 8 articular. The papyri show the articular perf. inf. Cf. ἐπὶ τῷ γεγονέναι, P. Oxy. 294 (A.D. 22); ὑπὲρ τοῦ ἀπολελύσθαι σε, P. Br. M. 42 (B.C. 168).

The future inf. is increasingly rare. Thucydides even used το with the future inf. The same construction is found in Polybius. But in the κοινή the future inf. is weakening rapidly. This disappearance of the fut. inf. is partly due to the retreat of the future tense in general and partly to the apparent kinship between the future and aorist forms. In the papyri Moulton notes that the future inf. is sometimes used in the κοινή as equivalent to the aorist or even the present, since the sense of the future was vanishing. Cf. χωρήσειν in Jo. 21:25 (RBC), while the other later MSS. give χωρήσα. In the O. T. the fut. inf. (anarthrous always) occurs only 14 times and only 6 in the N. T. The Apocrypha has, however, 54, but almost all in 2 and 3 Maccabees. Three of the N. T. examples are with μέλλω (Ac. 11:28; 24:15; 27:10). Another is in Ac. 23:30 and is dependent on a participle after a past indicative. In Ac. 26:7 the margin of W. H. (after B) has καταντήσεσθαι (text – Ἰησοῦ with ἔλπιζε). In Heb. 3:18 note ὡμοσεν μη εἰσελεύσεσθαι (LXX). Another example is in Jo. 21:25, after οἴμαι. Moulton (Prol., p. 219) cites χρῆ ἐτοιμάσειν, B. U. 830 (i.d.A.).

(c) Cases with the Infinitive. In general the inf. uses the same case that the finite verb does. So the genitive in Heb. 6:10 ἐπιλαθέσθαι τοῦ ἔργου, the dative in 1 Cor. 7:39 ὧθελε γαμήθηναι, the acc. in Ac. 23:15 τοῦ ἄνελεν, the instrum. in Mt. 15:20 τῶν ἄνιππως χρησίν φαγεῖν, the locative in Ac. 21:21 μηδὲ τοις ἔθεσιν περιπατεῖν, the ablative in Ac. 15:20 τοῦ ἄπεχεσθαι τῶν ἁλλαγμάτων, the predicate nominative in Ac. 17:18 καταγγέλεις εἶναι, the predicate accusative in Ro. 2:19 πέποιθας σε αὐτῷ ἄβηγον ἔλθαι, or the acc. of general reference in ind. discourse in Mk. 12:18. But this brings us again to the acc. in indirect assertion, a matter already treated at some length. (See Accusative Case, Indirect Discourse, and the next section.) But the thing to note is the real verbal nature of the inf. in the matter of cases. Note the three accusatives with τοῦ ὀδηγεσκεῖν in Heb. 5:12, two objects, one of general reference. The cognate neuter plural is seen in πολλὰ παθέν (Mt. 16:21).

3 Votaw, Inf. in Bibl. Gk., p. 59.
4 Allen, Inf. in Polyb., p. 48.
3 Votaw, Inf. in Bibl. Gk., p. 59.
The Infinitive in Indirect Discourse. The frequent obscuration of the cases with the inf. in indirect discourse justifies some additional remarks besides those in the chapter on Modes. The inf. is not finite and, like the participle, has no subject. By courtesy the grammars often say so, but it beclouds more than it clears to do so. The case of the predicate with the inf. is the [Page 1083] place to start. Cf. Mt. 19:21, εἰ θέλεις τέλειος εἶναι. See also 2 Cor. 10:2, δέομαι τὸ μὴ παρὸν θαρρήσω, where the nominative occurs within the domain of the accusative articular inf. But note Mk. 14:28, μετὰ τὸ ἔγερθηναι με προάξω. The true nature of the acc. with the inf. as being merely that of general reference comes out well in the articular inf., as in Jas. 4:2, οὐκ ἦχετε διὰ τὸ μὴ ἀπεκδόθη σου ὁμιλεῖται. It is not necessary here to go over again the steps taken under Modes, but simply to insist on the true nature of the accusative with the inf. It stands, indeed, in the place of a finite verb of the direct statement, but does not thereby become finite with a subject. From the syntactical standpoint the construction is true to both the substantival and verbal aspects of the inf. The subject of the finite verb, when thrown into the acc., takes this turn because of the limitations of the inf. When it is retained in the nominative, it is by apposition with the subject of the principal verb or by attraction if in the predicate. Draeger sees this point clearly in his treatment of the matter in Latin where the acc. with the inf. is much more frequent than in Greek.1 “The name is confessedly a misnomer,” say King and Cookson.2 Schmid3 also sees the matter clearly and makes the acc. with the inf. the acc. of general reference. The usual beaten track is taken by Jolly,4 but the truth is making its way and will win. Schmitt5 admits that the acc. is not the grammatical subject, but only the logical subject. Why call it “subject” at all? Schroeder6 properly likens it to the double accusative with διδάσκω, as in διδάσκω αὐτὸν περιπατεῖν. The late Sanskrit shows a few examples like English “if you wish me to live.”7 The use of the

---

4 Cf. Delbrück, Vergl. Synt., Tl. II, p. 460. Brug. (Griech. Gr., p. 518) takes the acc. as originally the obj. of the verb. That was not always true, as we have seen in Indirect Discourse (pp. 1037 ff.).

acc. with the inf. early reached a state of perfection in Greek and Latin. Schlichter notes 130 instances of it in Homer with φημί alone as against 15 with ὣς, ὅτι. We see it in its glory in historians like Xenophon and Thucydides in Greek and Caesar in Latin. Votaw notes the rarity of the construction in the O. T. and Apoc. (46 verbs), while the N. T. has 27 (83 exx.) verbs which use the idiom. But even in the N. T., as compared with the ancient Greek, the construction is greatly narrowed. The particular [Page 1084] verbs in the N. T. which may use the acc. and the inf. in indirect assertion were given under Modes. A general view of the matter discloses a rather wide range still. But the idiom, being largely literary, is chiefly found in Luke, Rom. and 1 Cor. The other writers prefer ὅτι. Luke, in fact, is the one who makes the most constant use of the idiom, and he quickly passes over to the direct statement. There is with most of them flexibility as was shown. Blass has a sensible summary of the situation in the N. T. There is, in truth, no essential difference in the Greek construction, whether the inf. is without a substantive, as in Ac. 12:15 δισχορίζετο οὕτως ἔρχεται, with the acc., Ac. 24:9 φάσκοντες ταῦτα οὕτως ἔρχεται, or with the nom. Ro. 1:22 φάσκοντες εἶναι σοφοί. Cf. Ac. 17:30; 1 Pet. 3:17. Words like δέ, ἄνγκη may be followed by no substantive (Mt. 23:23; Ro. 13:5). Cf. Lu. 2:26. In 1 Pet. 2:11, we have only the predicate ὣς παροίκους—ἀπέχεσθαι. Freedom also exists. In Mk. 9:47 we have καλὸν σὲ ἔστων μουνόρθαλμον εἰσελθεῖν, while in Mt. 18:8 we read καλὸν σοί ἔστων μονόρθαλμον εἰσελθεῖν. Even in Matthew the predicate adj. is acc., though it might have been dative, as in Ac. 16:21. Further examples of the predicate dative when an accusative is possible are seen in Lu. 1:3; 9:59; Ac. 27:3 (NAB); 2 Pet. 2:21. But see Ac. 15:22, 25; Heb. 2:10. The case of the inf. itself is not the point here. There are besides verbs of willing, desiring, allowing, making, asking, beseeching, exhorting, some verbs of commanding, the inf. with πρὶν, ὥστε, τό, τοῦ, prepositions and the articular infinitive. With all these the acc. may occur. A difficult inf. occurs in Ac. 26:28, ἐν ὀλίγῳ με πείθεις Χριστιανὸν ποιῆσαι. Is με the object of πείθεις or of ποιῆσαι? Can πείθεις be ‘try by persuasion’? Prof. W. Petersen suggests that this is a contamination of ἐν ὀλίγῳ με πείθεις Χριστιανὸν εἶναι and ἐν ὀλίγῳ με ποιῆσαι Χριστιανὸν. But verbs differ. Κελεύω, for instance, always has the acc. and the inf., while the dative comes with τάσσο (Ac. 22:10), ἐπιτάσσο (Mk. 6:39), and verbs like ἑντέλλομαι, ἐπιτρέπο, παραγγέλλω, and impersonal expressions like συμφέρει, ἔθος ἐστί, ἑσθίμω, ὀλυγρόν, etc. As shown above, καλὸν ἔστιν is used either with the acc. or the dative, as is true of λέγω (cf. Mt. 5:34, 39 with Ac. 21:21; 22:24). Blass adds also Ac. 5:9, συνεφούση ὑμῖν πειράσας. He notes also that προστάσισθαι occurs with the acc. (Ac. 10:48) as is true of ἐπιτάσσο (Mk. 6:27) and τάσσο (Ac. 15:2). Even συμφέρει appears with the acc. and inf. (Jo. 18:14) and ἔστιν (Lu. 6:4, where D has the dative, as is true of Mt. 12:4). [Page 1085] With ἐγένετο Blass observes how clumsy is ἐγένετο μοι—γενέσθαι με (Ac. 22:17). The acc. and inf. occurs with ἐγένετο (Ac. 9:32) and the dative also in the sense of it ‘befell’ or ‘happened to’ one, as in Ac. 20:16. In Ac. 22:6, ἐγένετο μοι—

9 Inf. in Bibl. Gk., p. 9.

2 Ib., p. 240.
1 Gr. of N. T. Gk., p. 241.
περιαστράψαι φῶς, the two constructions are combined. Blass2 further observes the independence of the inf. in adding an acc. of general reference besides the acc. with a verb of asking, as in Ac. 13:28 ἤτρησαντο Πειλάτουν ἄναρεθήναι αὐτόν, (1 Th. 5:27) ὄρκιζω ὠμᾶς ἀναγνωσθήναι τὴν ἐπιστολήν. In Ac. 21:12, παρεκαλοῦμεν—τοῦ μὴ ἀναβαίνειν αὐτόν εἰς Ἰερουσαλήμ, the αὐτόν is acc. of general reference with the inf., which is itself in the genitive as to form, though the real object of the verb. There is no instance in the N. T. of the inf. in a subordinate clause unless we follow Nestle in 1 Pet. 5:8, ζητῶν τίνα καταπιεῖν. There are sporadic examples of such a construction due to analogy of the inf. in the main clause.3 Cf. O. P. 1125, 14 (ii/Α.Δ.), οὐς καὶ κυριεύειν τῶν κορπῶν.

(e) Personal Construction with the Infinitive. Many verbs and adjectives allowed either the personal or the impersonal construction with the infinitive. The Greek developed much more freedom in the matter than the Latin, which was more limited in the use of the impersonal.4 In the N. T. the impersonal construction occurs with fixed verbs like δεῖ, Ac. 25:24, βοῶντες μὴ δεῖν αὐτόν ζην μηκέτι, where note inf. dependent on inf. as is common enough (Ac. 26:9; Lu. 5:34; Heb. 7:23; Mk. 5:43; Lu. 6:12; 8:55). So also with ἔξεστιν, etc. The impersonal construction is seen also in Lu. 2:26; 16:22; Ph. 3:1; Heb. 9:26, etc. The inf. with impersonal verbs is somewhat more frequent in the N. T. than in the LXX. On the whole the personal construction with the inf. is rare in the N. T.5 But in the N. T. δοκέω has the personal construction, as in Ac. 17:18, δοκεῖ καταγγελεῖν ἐνναί (cf. Jas. 1:26; Gal. 2:9, etc.), but we find ἔδοξε ὁμιλητήν ἄναρεθανεῖν ἡμᾶς (Ac. 26:9). The κοινή seems to use it less frequently than the ancient Greek. Radermacher (N. T. Gr., p. 148) quotes Vett. Valens, p. 277, 19, δόξει—ὑπάρχειν αὐτήν τὴν αἵρεσιν. We have δεδοκιμάσμεθα πιστεύθηναι (1 Th. 2:4) and ἐμαρτυρήθη ἐνναί (Heb. 11:4). One may compare the personal construction with ὅτι (1 Cor. 15:12; 2 Cor. 3:3; [Page 1086] 1 Jo. 2:19). The personal construction occurs with πρέπει (Heb. 7:26). The impersonal has the acc. and the inf. (1 Cor. 11:13), the dative and the inf. (Mt. 3:15), both the dative and the acc. (Heb. 2:10). Cf. W. F. Moulton in Winer-Moulton, p. 402. The love of the passive impersonal appears in Ac. 13:28 ἤτρησαντο Πειλάτουν, ἄναρεθήναι αὐτόν, and in 5:21, ἐστειλαν σχοτῆναι αὐτοῦς (Radermacher, N. T. Gr., p. 148). The nominative predicate with the inf. and the nom. in indirect discourse is to be noted also.

(f) Epexegetical Infinitive. As already remarked, there is no essential difference between the appositional and the epexegetical use of the infinitive. The epexegetical inf. is added to a clause more or less complete in itself, while the merely appositional is more simple.1 It is common in the dramatists. This use is probably adnominal in origin, but it drifts into the verbal aspect also. We see a free use of the limitative inf.

2 Ib.
4 Thompson, Synt. of Attic Gk., p. 239.
5 Blass, Gr. of N. T. Gk., p. 239.
1 Thompson, Synt. of Attic Gk., p. 239.
3 Grünewald, Der freie formelhafte Inf. der Limit. im Griech., p. 21 f.
in ὤς ἐπος εἶπεν, which only occurs once in the N. T. (Heb. 7:9). Brugmann does not agree with Grünewald that this is the original epexegetical or limitative inf., though it is kin to it. Blass applies “epexegetical” merely to the appositional inf. It is in the epexegetical inf. that we see more clearly the transition from the original substantive to the verbal idea. It is hard to draw the line between δόγμα ἁπογραφέσθαι πᾶσαν τήν ὦκουμένην (Lu. 2:1) and παρέδωκεν ἀντίτοιχος ἐξ ἀδόκιμον νοῦν, ποιεῖν τά μη καθήκοντα (Ro. 1:28). The first is appositional, the latter epexegetical. A good instance of the epexegetical inf. is seen in 2 Cor. 9:5, where τοῦτην ἔτοιμαν ἕναν ὦς εὐλογίαν is subsidiary to the ἵνα clause preceding, as is often the case. Viteau notes that the construction is frequent in the Epistles. Cf. Eph. 1:16–18 (ἵναι—ἐξ τοῦ εἰδέναι). 3:16 f. (ἵναι—κρατασθῆναι, κατοικῆσαι), Col. 1:10 (ἵναι—περιπατήσαι), 4:3 (ἵναι—λαλῆσαι). Further examples occur in Lu. 1:54 μηθεῖναι, 1:72 ποιῆσαι καὶ μνησθῆναι, 1:79 ἐπιφανῇ τοῦ κατευθύναι, Ac. 17:27 ζητεῖν, 2 Pet. 3:2 μηθεῖναι.

The LXX shows rather frequent instances of the articular inf. in this sense (cf. Gen. 3:22; Judg. 3:8; Ps. 77:18). The N. T. shows very few. Indeed, Votaw finds only one, that in Gal. 3:10, ἐπικατάρατος πᾶς δὲ οὐκ ἐμένει πᾶσιν τοῖς γεγραμμένοις ἐν τῷ βιβλίῳ τοῦ νόμου τοῦ ποιῆσαι αὐτά. But certainly [Page 1087] τοῦ ἀποκάλυψαι (Ro. 1:24) after παρέδωκαν is just as truly epexegetical as is ποιεῖν in verse 28 after παρέδωκαν. So also Ro. 7:3; 8:12; 1 Cor. 10:13. Burton looks at the epexegetical inf. as “an indirect object,” as in Lu. 10:40, ἄδειλας μονικαίν μονίαν με κατέλειπεν διακονεῖν. There is no doubt that in such instances the inf. is in the original dative case with the dative idea. See further Mk. 4:23; 6:31; Lu. 7:40; 12:4; Ac. 4:14; 7:42; 17:21; 23:17, 18, 19; Tit. 2:8, etc.

(g) Purpose. It is but a step from the explanatory or epexegetical inf. to that of design. Indeed, the epexegetical inf. sometimes is final, a secondary purpose after ἵνα, as in Eph. 1:18; 3:17; Col. 1:10, etc. The sub-final or objective use of the inf. is also a step on the way. This use was very common in the ancient Greek, but was partially taken up by ἵνα in the N. T. But many verbs, as we have seen, retain the sub-final inf. in the N. T. as in the rest of the koine. Blass’ careful lists and those of Viteau were given under Indirect Discourse. This notion of purpose is the direct meaning of the dative case which is retained. It is the usual meaning of the inf. in Homer, that of purpose. It goes back to the original Indo-Germanic stock. It was always more common in poetry than in prose. The close connection between the epexegetical inf. and that of purpose is seen in Mk. 7:4, ἄ παρέλαβαν κρατεῖν (‘for keeping’, ‘to keep’). So Mt. 27:34, ἐδοκαν αὐτῷ πιεῖν οἶνον (‘for drinking,’ ‘to drink’). So Mt. 25:35,
The inf. with the notion of purpose is exceedingly frequent in the LXX, second only to that of the object-inf. with verbs.\(^5\) It was abundant in Herodotus.\(^6\) Hence Thumb\(^7\) thinks its abundant use in the koine is due to the influence of the Ionic dialect. Moulton\(^8\) agrees with this opinion. This is true both of the simple inf. of purpose and toû and the inf. The Pontic dialect still preserves the inf. of purpose after verbs like ἀναβαίνω, etc. It is noteworthy that this inf. was not admitted into Latin except with a verb of motion. Moulton (Prol., p. 205) cites Par. P. 49 (ii/v.c.) ἐδὸκατε ἵνα φαγεῖν. The inf. with the notion of purpose is abundant in O. T. shows the idiom in great abundance, though the construction is classic. It was

\[2 \text{Cor. } 11:2\]

προσεύξασθαι ἀποστέλλειν. Moulton\(^8\) agrees with this opinion. This is true both of the simple inf. of purpose and the inf. This use had a wider range in Homer than in the Attic writers. Thus Mt. 2:2 ἡλόθομεν προσκυνήσαι αὐτῶ; (5:17) οὐκ ἔλθον καταλῦσαι, ὁλί; ἀποστέλλονται; (7:5) διαβλέψεις ἐκβαλεῖν τὸ κάρφος; (11:7) τί ἐξήλθατε εἰς τὴν ἑρμήν θέασασθαι (so verse 8, ἰδεῖν); 20:28; (Mk. 3:14) ἀποστέλλη αὐτοῦς κηρύσσειν; (5:32) περιβλέπετο ἰδεῖν; (Lu. 18:10) ἰδεῖν προσεύξασθαι; (Jo. 4:15) διέχρισαν ἐνθάδε ἄντλεον; (Ac. 10:33) πάρεσμεν ἰδοῦσαι; (2 Cor. 11:2) ἡμοσάμην ἠμᾶς—παραστῆσαι; (Rev. 5:5) ἐνίκησαν—ἂνοίξαι; (16:9) οὐ μετένοισαν διοῦσαι. These examples will suffice. It is very common in the N. T. It is not necessary to multiply illustrations of toû after all the previous discussion. The O. T. shows the idiom in great abundance, though the construction is classic. It was used especially by Thucydides.\(^2\) This was a normal use. We have already noticed that Paul makes little, if any, use of this idiom.\(^3\) It is possible in Ro. 6:6; Ph. 3:10. Indeed, Votaw\(^4\) notes only 33 instances of toû and inf. of purpose in the N. T., and these are chiefly in Matthew, Luke and Acts. Note (Mt. 2:13) ἤτεν τοῦ ἄπολέσαι, (13:3) ἐξήλθεν τοῦ σπείρειν, (Lu. 21:22) τοῦ πλησθῆναι πάντα, (24:29) τοῦ μετάνι. See further Ac. 3:2; 5:31; 26:18; 1 Cor. 10:7; Gal. 3:10; Heb. 10:7, etc. The use of toû μή is, of course, the same construction. Cf. Ro. 6:6, τοῦ μικροὶ δουλεῖς ἠμᾶς. Cf. Ac. 21:12. In Lu. 2:22 note παραστήσασαι, and in verse 24 τοῦ δοῦσαι. Purpose is also expressed by εἰς τό as in 1 Th. 3:5, ἐπεμψα εἰς τό γνώσαι, and by πρός τό as in Mt. 6:1, πρός τό θεοῦσαι. In the N. T. ὠςτε with the inf. of purpose is rare. Originally purpose was the idea with ὠςτε, or conceived result. Actual result with ὠςτε was expressed by the indicative. [Page 1089] In the LXX the notion of purpose is still

common, especially in the books of Genesis, Exodus, Leviticus.¹ In the N. T. there are only 8 instances, leaving out Ac. 20:24, according to W. H., and only 7 if we follow W. H. in Lu. 9:52. See Mt. 10:1, ἐδοκεὶ αὐτῷ ἐξουσίαν ἔστῃ ἐκβάλλειν καὶ ἑρασπεῖν. And ἔστη (= ὡς, τε, 'and so') is simply 'so as,' not 'so that.' See also Lu. 4:29, ἔστε κατακρημνίσατε. Cf. further Mt. 15:33; 27:1; Lu. 20:20. Burton² thinks that in Mt. 27:1 ἔστε gives rather content than purpose. One must not confuse with τοῦ and the inf. of purpose the somewhat analogous construction of τοῦ and τοῦ μη after verbs of hindering. This is in reality, as was shown, the ablative and the regular object-inf. (substantival aspect). Cf. Lu. 4:42; Ac. 20:27; Ro. 15:22. Votaw³ notes 22 verbs in the LXX and the N. T. that use this idiom. The only common one is κωλύω. See further Final Clauses in chapter on Modes for papyri examples.

(h) Result. Purpose is only “intended result,” as Burton⁴ argues. Radermacher (N. T. Gr., p. 153) says that the difference between purpose and result in the inf. is often only in the more subjective or objective colouring of the thought. It is hard to draw a line between conceived result and intended result. Blass⁵ explains a number of examples as result that I have put above under Purpose, as Rev. 5:5; 16:9. It is largely a matter of standpoint. The line of distinction is often very faint, if not wholly gone. Take Rev. 5:5; for instance, ἐνικήσεν ὁ λέων ἀνοίξαι. The lion had opened the book and so it was actual result. So also Ac. 5:3, σιὰ τί ἔπλήρωσεν ὁ σατάνας τὴν καρδίαν σου, ἕστησασθαί σε. Ananias had actually lied. In the ancient Greek also the distinction between purpose and result was not sharply drawn.⁶ The inf. may represent merely the content² and not clearly either result or purpose, as in Eph. 3:6, εἶναι τὰ ἔθην. Cf. also 4:22, ἄποθέσθαι. This is not a Hebraistic (Burton) idiom, but falls in naturally with the freer use of the inf. in the koine. See also Ac. 15:10 ἐπιθέξαι ζωγόν, (Heb. 5:5) γενῆται ἵνα ἄρχῃ. Where it is clearly result, it may be actual or hypothetical.⁸ The hypothetical is the natural or conceived result. The N. T. shows but 12 [Page 1090] instances of the simple inf. with the notion of result, according to Votaw.¹ In the O. T. it is quite common. The 12 examples in the N. T. are usually hypothetical, not actual. So Ro. 1:10 εὐοδώθησομαι ἔλθεν πρὸς ὑμᾶς, (Eph. 3:17) κρατατοθήσατα, κατοικήσατα, (6:19) γνωρίσατα, (Col. 4:3) λαλήσατα, (4:6) εἰδέναι, (Heb. 6:10) ἐπιλαθέσθω. It is here that the kinship with purpose is so strong. Cf. Rev. 16:9. But some examples of actual result do occur, as in Lu. 10:40; Ac. 5:3; Rev. 5:5. In the O. T.² we have actual result with τοῦ and the inf., but no examples occur in the N. T. Not more than one-half of the examples of τοῦ and the inf. in Luke, who gives two-thirds of the N. T. instances, are final.³ Some of these are examples of hypothetical

² Votaw, Inf. in Bibl. Gk., p. 25. Cf. Ruth 2:10, τί ὃτι εὗρον χάριν ἐν ὀφθαλμοῖς σου τοῦ ἑπιγνόναι με; See also 2 Chron. 33:9; 1 Macc. 14:36.
³ Moulton, Prol., p. 217.
result. See discussion of Result in chapter on Mode for further discussion and papyri examples. It is rather common in the O. T., though not so frequent in the N. T. 4 It is possible to regard Mt. 21:32, μετεμελήθη τοῦ πιστεύσαι, thus, though in reality it is rather the content of the verb. 5 There is similar ambiguity in Ac. 7:19, ἐκάκωσεν τοῦ ποιῆσαι. But the point seems clear in Ac. 18:10, οὐδὲς ἐπιθήσεται σοι τοῦ κακωσαί σε, and in Ro. 7:3, τοῦ μὴ εἶναι αὐτήν μοιχαλίδα. If τοῦ can be occasionally used for result, one is prepared to surrender the point as to εἰς τὸ if necessary. It is usually purpose, but there is ambiguity here also, as in Mt. 26:2; 1 Cor. 11:22, where the purpose shades off toward hypothetical result. In Ac. 7:19 we seem to have hypothetical result, εἰς τὸ ὑπερακούειν. It is true also of Heb. 11:3, ἐκάκωσεν αὐτὸν ἀναπολογήτους. See further Ro. 12:3; 2 Cor. 8:6; Gal. 3:17. 6 Votaw 7 argues for actual result in Ro. 1:20, εἰς τὸ εἶναι αὐτοῦς ἀναπολογήτους. It is hard to deny it in this passage. But it is ὡς σχεῖν O. P. 1120, 19 f. (iii/A.D.).

(i) Cause. There is only one example in the N. T. of the articular inf. without a preposition in this sense. That is in 2 Cor. 2:13, τῷ μὴ εὑρέσθω, and it is in the instr. case as already shown. The LXX shows a half-dozen examples, but all with variant readings. 1 But it is common with διὰ τὸ to have the causal sense, some 32 times in the N. T. 2 See Prepositions and Substantival Aspects of the Infinitive. Cf. Mt. 13:5 f.; Mk. 5:4; Lu. 6:48; Jas. 4:2 f. There is one instance of ἔνεκεν τοῦ in 2 Cor. 7:12.

(j) Time. Temporal relations are only vaguely expressed by the inf. See Tense in this chapter for the absence of the time-element in the tenses of the inf. except in

1 Votaw, Inf. in Bibl. Gk., p. 29.  
indirect discourse. Elsewhere it is only by prepositions and πρὶν (an adverbial preposition in reality) that the temporal idea is conveyed by the inf. Antecedent time is expressed by πρὶν or πρὸ τοῦ. For πρὸ τοῦ, see Mt. 6:8; Lu. 2:21, etc. Πρὶν or πρὶν ἦ (so in Mt. 1:18; Mk. 14:30; Ac. 7:2; W. H. have πρὶν ἦ in the margin in Ac. 2:20) occurs with the inf. 11 times, all aorists (all in Gospels and Acts). We have it only twice with finite verb after negative sentences, once with the subj. (Lu. 2:26), once with the opt. (Ac. 25:16), both in Luke (literary style). See, for the inf.,

πρὶν ἄλεκτορα φονῆσαι, (Jo. 4:49) πρὶν ἄποθανεῖν. See further Mt. 26:75; Mk. 14:72; Lu. 22:61 (five of the instances are practically identical); Jo. 8:58; 14:29; Ac. 2:20. In Herodotus, under the influence of indirect discourse, the inf. occurs with ὅκως, ἐπεί, ἐπειδή, ἐπειδὴ, διότι and the relative pronouns. Contemporaneous [Page 1092] action is described by ἐν τῷ, especially in Luke. Cf. Lu. 1:21, ἐν τῷ χρονίζειν. See Prepositions with Infinitive for further remarks. Subsequent action is set forth by μετὰ τό as in Mt. 26:32; Lu. 12:5, etc. In Ac. 8:40, ἐκ τοῦ ἔλθεῖν, we have the prospective future.

(k) The Absolute Infinitive. This idiom is very common in Homer, especially as an imperative and in the midst of imperatives. R. Wagner notes that in Homer this use of the inf. occurs with the nom. The papyri still show examples like ὁ δεῖνα τῷ δεῖνα χαίρειν. Gerhard holds that in such cases there is ellipsis of λέγει. The Attic inscriptions frequently have the absolute infinitive as imperative. Deissmann (Light

3 The inf. with πρὶν is common in Hom. See Monro, p. 158.

from the Anc. East, p. 75) notes that, as in German, it is common in edicts and notices. Cf. imperative use of infinitive in modern French. He quotes from the “Limestone Block from the Temple of Herod at Jerusalem” (early imperial period): Ἔλλογενόν ἀλλογενῆ εἰσπορεύεσθαι ἐντὸς τοῦ ἱερὸν τὸ ἱερόν τῷ τιμῆται, καὶ περιβόλου, ‘Let no foreigner enter within,’ etc. See also Epictetus, IV, 10, 18, ἢ ναὶ δὲ ταῦτα γένηται, οὐκ ἐξεσάθαι οὐκ ἐξεσάθαι μικρῶν ἐστιν. The imperative use was an original Indo-Germanic idiom. It flourishes in the Greek prose writers. Burton and Votaw admit one instance of the imperative inf. in the N. T., Ph. 3:16, τῷ αὐτῷ στοιχεῖν. But Moulton rightly objects to this needless fear of this use of the inf. It is clearly

present in Ro. 12:15, χαίρειν, κλαίειν. The case of Lu. 9:3 is also pertinent where μὴ ἔχειν comes in between two imperatives. Moulton himself objects on this point that this inf. is due to a mixture of indirect with direct discourse. That is true, but it was a very easy lapse, since the inf. itself has this imperatival use. In 1 Th. 3:11; 2 Th. 2:17; 3:5 there is the nominative case and the whole context besides the accent to prove that we have the optative, not the aorist active infinitive. See Mode for further discussion. Moulton\(^{11}\) quotes Burkitt as favouring the mere infinitive, not ἔδει, in Mt. 23:23, τὰ ὅτα δὲ ποιήσαι κἀκεῖνα μὴ ἄφεναι, after the Lewis Syriac MS., and also καυχᾶσθαι—in 2 Cor. 12:1 after Ὡ. The [Page 1093]\(^{12}\) imperatival use of the inf. was common in laws and maxims and recurs in the papyri.\(^1\) So A. P. 86 (i/A.D.) ἔξειναι, μισθῶσαι. Radermacher (N. T. Gr., p. 146) quotes Theo, Progymn., p. 128, 12, φέρε ἐπαν, where the inf. is used as a deliberative subj. would be. He gives also the Hellenistic formula, εἰς δύναμιν ἔναι τὴν ἐμὴν, Inscr. Pergam., 13, 31; 13, 34. Hatzidakis\(^2\) notes that in the Pontic dialect this construction still exists. The epistolary inf. has the same origin as the imperatival inf. It is the absolute inf. This is common in the papyri. See Ac. 15:23; 23:26; Jas. 1:1, χαίρειν. The nom. is the nominative absolute also. Cf. 2 Jo. 10, where χαίρειν is the object of λέγετε. Radermacher (N. T. Gr., p. 146) notes how in the later language the acc. comes to be used with the absolute inf., as in C. Inscr. lat. V. 8733, δοῦνε αὐτῶν=δοῦναι αὐτόν. It is just in this absolute inf. that we best see the gradual acquirement of verbal aspects by the inf. It is probably the oldest verbal use of the inf.\(^3\) The construction in Heb. 7:9, ὡς ἔπος εἶπεν εἰπάν, is but a step further on the way. There is but one example of this absolute inf. with ὡς in the N. T.\(^4\) Cf. τὸ ἔπος ἐπαν in Rev. 12:7, where it is an independent parenthesis.

\(\text{\textit{(I) Negatives.}}\) The ancient Greek used μὴ chiefly with the inf. except in indirect assertion where οὐ of the direct was retained. But we see οὐ with the inf. after verbs of saying as early as Homer, φῆς οὐχ ὑπομείνα λαλεῖν, Iliad, XV, 174. Thus οὐ won a place for itself with the inf., but many verbs retained μὴ as verbs of swearing, hoping, promising, etc. But special phrases could have οὐ anywhere and strong contrast or emphasis would justify οὐ.\(^5\) Votaw\(^6\) finds 354 instances in the Greek Bible where the

\(^{12}\) 5 Thompson, Synt. of Attic Gk., p. 414.
inf. itself is modified by the negative. Of these 330 have μή and the rest have compounds of μή. The anarthrous inf. with μή he notes 59 times in the O. T., 32 in the Apocrypha and 47 in the N. T., 139 in all. The articular inf. with μή he finds in the O. T. 136 times (to 99, to 37), in the Apocrypha 21 times (to 10, to 11), in the N. T. 35 times (to 15, to 20), 192 in all (to 124, to 68). With the anarthrous inf. the negative more frequently occurs with the principal verb as in οὐ οδέω. We do have οὐ in infinitival clauses, as will be shown, but in general it is true to say that the inf. directly is always negatived by μή in the N. T. This is true of [Page 1094] all sorts of uses of the inf. So the subject-inf. uses μή, as κρέατον ἦν αὐτὸς μή ἔπεγνωκέναι (2 Pet. 2:21), both the anarthrous as above and the articular as in Lu. 17:1. The object-inf. likewise has μή, as in Lu. 21:14, θέτε ἐν ταῖς καρδίαις οὐμόν μή προμελετᾶν. For the articular accusative with μή see Ro. 14:13. We have it with indirect commands as in Mt. 5:34, λέγω οὐμόν μή ὁμόσαι, and in indirect assertion as in Ac. 23:8, λέγουσιν μή ἐλναι ὄνοσταιν μήτε ἄγγελον μήτε πνεῦμα. We have it with τοῦ μή as in Jas. 5:17, τοῦ μή βρέξαι, and with prepositions as in 2 Cor. 4:4, εἰς τοῦ μή αὐθάσαι. With verbs of hindering and denying the negative μή is not necessary, but it was often used by the ancients as a redundant negative repeating the negative notion of the verb, just as double negatives carried on the force of the first negative. It was not always used. When the verb itself was negatived, then μή οὐ could follow.¹ But we do not find this idiom in the N.T. Examples of the N.T. idiom have already been given in this chapter.

The variety in the N. T. may be illustrated. See Lu. 23:2 καλύσαντα φόρους Καίσαρι διόνυσα, (Ac. 4:17) ἄπειλησόμεθα αὐτός μηκέτι λαλέων, (Gal. 5:7) τίς μής ἔνακοουν ἀλήθεια μή πείσεσθαι, (Ro. 15:22) ἐνκατούσιμον τοῦ ἔλθεν, (Lu. 4:42) κατέξων αὐτόν τοῦ μή παρεῦσθαι, (Mt. 19:14) μή καλύσεαι αὐτῶ θελεν πρός με, (1 Cor. 14:39) τὸ λαλεῖν μή καλύστε, (Ac. 14:18) μόλες κατέπασαν τοὺς δήλους τοῦ μή θεύν αὐτός, (Ac. 8:36) τί καλύτε με βαπτισθήναι, (10:47) μήτε τὸ ὐδωρ δύναι τοῦ μή καλύσαις τίς τοῦ μή βαπτισθήναι, (20:20) οὐδέν οὐσεϊλάμην τοῦ μή ἀναγεγέλαι. Radermacher (N. T. Gr., p. 149) illustrates “the Pauline τὸ μή with the infinitive” by Sophocles’ Electra, 1078, τὸ τε μή βλέπειν έτοίμα, and the inscr. (Heberdey-Wilhelm, Reisen in Kilikien, 170, 2), τοῦ μήν ἄλλον—ἔπεισενσκέν. We may note also Ac. 4:20, οὐ δούμεθα μή λαλέων, where the negative is not redundant. Cf. also Jo. 5:19, οὐ δύναις τοῦ μῦν οὐδέν, where the second negative is redundant, but it repeats the οὐ. Some MSS. have a redundant negative μή with ἐλοναι in Lu. 22:34 (cf. 1 Jo. 2:22 after ὅτι) and with προσπεθήναι in Heb. 12:19. So AP read ἀντιλέγοντες in Lu. 20:27.

Even in indirect discourse the same negative is repeated, as in Ac. 26:26, λανθάνειν αὐτὸν τοῦτον οὐ πείθομαι οὐδέν. Here οὐδέν strictly goes with λανθάνειν in spite of its position after πείθομαι, but οὐ is construed with πείθομαι, and so οὐδέν is used rather than μηδέν or μηδέν. But in Mk. 7:24, οὐδένα ἤθελεν γνώναι, it is not best to explain οὐδένα with the inf. in this fashion. This looks like the retention of the old classic use of οὐ with the inf. which [Page 1095] the grammars are not willing to

---

6 Inf. in Bibl. Gk., p. 58.
1 See Thompson, Synt., pp. 425 ff.
Sophocles SOPHOCLES, E. A., Greek Lexicon of the Roman and Byzantine Period (1888).
Wilhelm WILHELM, A., Beiträge zur griech. Inschriftenkunde (1909).
allow in the N. T. Epictetus uses οὗ with the inf. as in IV, 10, 18, όμως μικρά δέξασθαι οὐκεί δικρῶν ὄποισθεῖν. As a matter of fact we have a number of other examples of οὗ with the inf., too many to rule out without ceremony. There is the case in Heb. 7:11, τίς έτι χρεία κατὰ τήν τάξιν Μελχισεδέκ ἔτερον ἀντίστασθαι καὶ οὗ κατὰ τήν τάξιν λέγεσθαι. It is true that οὗ comes just before κατὰ τήν τάξιν, but it is rather forced to deny it any connection with λέγεσθαι. See also Ro. 8:12, ὄφειλεν οὗ τῇ σαρκὶ τοῦ κατὰ σώματα ξῆν, where, however, οὗ occurs outside of τοῦ and is directly concerned with τῇ σαρκί. Other examples of sharp contrast by means of οὗ are found, as in Ac. 10:40 f., ἔδωκεν αὐτὸν ἐμφανῆ γενέσθαι, οὗ παντὶ τῷ λαῷ ἄλλῳ μάρτυς; Ro. 7:6, ὅστε δουλεύειν ἐν καινότητι πνεύματος καὶ οὗ παλαιότητι γράμματος; Heb. 13:9, βεβαιοῦσθαι οὗ βρῶσιν (but here no contrast is expressed). In Ro. 4:12, 16, with εἰς τό, we find οὗ μόνον—ἄλλῳ καί.

(m) Ἄν with the Infinitive. This classic idiom has vanished from the N. T. save in 2 Cor. 10:9, ὡς ἂν ἐκφοβεῖν. Even here it is not a clear case, since ἐκφοβεῖν depends on δόξῳ and ὡς ἂν comes in as a parenthetical clause, ‘as if’ (‘as it were’).

The treatment of the infinitive has thus required a good many twists and turns due to its double nature.

III. The Participle (ἡ μετοχή).

1. The Verbals in –τος and –τέος. These verbals are not exactly participles inasmuch as they have no tense or voice. They are formed from verb-stems, not from tense-stems, and hence are properly called verbal adjectives. In the broadest sense, however, these verbals are participles, since they partake of both verb and adjective. Originally the infinitive had no tense nor voice, and the same thing was true of the participle. For convenience we have limited the term participle to the verbal adjectives with voice and tense. The verbal in –τος goes back to the original Indo-Germanic time and had a sort of perfect passive idea. This form is like the Latin -tus. Cf. γνοτός, νῦν; ἄγνοτος, ἐγκνοτός. But we must not overdo this point. Strictly this pro-ethnic -tos has no voice or tense and it never came to have intimate verbal connections in the Greek as it did in Latin and English. Thus amatus est and ἄγαπητός ἔστιν do not correspond, nor, in truth, does ‘he is loved’ square with either. “Even in Latin, a word like tacitus illustrates the absence of both tense and voice from the adjective in its primary use.” Already in the Sanskrit voice and tense appear with some of the participles, but “the division-line between participial and ordinary adjectives is less strictly drawn in Sanskrit than in the other Indo-European languages.” The ambiguity due to the absence of voice in the verbal in –τος was inherited from the original Indo-Germanic time. It becomes, therefore, a lexical, not a syntactical problem to decide in a given instance whether the verbal is

1 Cf. Blass, Gr. of N. T. Gk., p. 255.
2 Thompson, Synt. of Attic Gk., p. 262.
4 Moulton, Prol., p. 221.
5 Whitney, Sans. Gr., p. 347.
“active” or “passive” in signification. In itself it is neither. A similar problem is raised in compound adjectives like θεο-μάχοι (Ac. 5:39), ‘fighting God.’ In modern Greek the verbal in –τος is rare and is little more than an adjective (Thumb, Handb., p. 151), though the new formation in –άτος has more verbal force. This ambiguity appears in Homer and all through the Greek language. 4 Blass 5 overstates it when he says that in the N. T. “the verbal adjective has practically disappeared, with the exception of forms like δυνατός, which have become stereotyped as adjectives.” As a matter of fact the verbal in –τος is still common in the N. T. as in the κοινή in general. Take, for instance, ἀγαπητός, ἀγνώτος, ἀδύνατος, ἀκατάγωντος, ἀναμάρτητος, ἀνεκτός, ἀδύνατος, ἀπόβλητος, ἀρεστός, ἀρεστός, γεννητός, γεραστός, διακτός, δυνατός, εὐλογητός, ζεστός, θαυμαστός, θητός, θεόπνευστος, ὀρατός, παθητός, παρείσκητος, πιστός, φθαρτός, χρηστός, etc. It is true 6 that the tendency is rather to accent the adjectival aspect at the expense of the verbal idea of these words. But this also was true at the start, as we have just seen in the Sanskrit. The point to note is that the verbal does not denote voice. In Ac. 14:8; Ro. 15:1, ἀδύνατον is ‘incapable,’ whereas usually it is ‘impossible,’ as in Mt. 19:26=Mk. 10:27, etc. In Ro. 8:3, therefore, it is doubtful whether τὸ ἀδύνατον τοῦ νόμου is the ‘impotency’ or the ‘impossibility’ of the law. 7 There is no notion of tense or of Aktionsart in these verbals in –τος and so ἀγαπητός does not distinguish 8 between ἀγαπηθέν and ἠγαπηθείς. Moulton thus properly notes the fact that in Mt. 25:41 we have κατηρατομένοι, ‘having become the subjects of a curse,’ not κατάρατοι, ‘cursed.’ It is interesting to note χαρὴ ἀνεκλαλήτῳ καὶ δεδοξασμένη in 1 Pet. 1:8, but here ἀνεκλάλητος is active in sense, [Page 1097] ‘inexpressible.’ The ambiguity comes also in our English participle ‘borne’ used for ἀνέρρεα in Mk. 2:3, and the punctiliar ‘brought’ used for ἔλευθείσαν in 2 Pet. 1:18. With these Moulton 1 contrasts

ἠρέμονον ('taken away') in Jo. 20:1. It is worth while to study a few more examples from the lexical point of view. In general the passive sense is more common, as in ἀγαπητός (Mt. 3:17); ἐφθεγμενός (Lu. 9:62); διδακτός (Jo. 6:45); θεόπνευστος (2 Tim. 3:16); θεοδίδακτος (1 Th. 4:9); γραπτός and κρυπτός (Ro. 2:15 f.). Here (Ro. 2:15 f.) τὰ κρυπτά is used just like a substantive (neuter adjective in plural). But ζεστός (Rev. 3:15) is active in sense as is ὕσσωντος (Ro. 1:31), though ὕσσως to it (paronomasia) is made from the middle συντίθημαι ('covenant'). Συνετός, sometimes passive in sense in the old Greek, is always active in the N. T., as in Mt. 11:25, but θνητός (Ro. 6:12) is ‘liable to death,’ not ‘dying,’ as παθητός (Ac. 26:23) is ‘capable of suffering.’ Cf. the Latin adjectives in -bilis.

The verbal in –τέος is later than that in –τος and does not occur in Homer. It is probably a modification of the verbal –τος to express the idea of the predicate-infinitive, like ‘this is not to eat (to be eaten).’ It is really a gerundive and is used in the personal or impersonal construction, more commonly the latter. The personal is always passive in sense, while the impersonal is active and may be formed from transitive or intransitive verbs. It expresses the idea of necessity. It was never as common as the verbal in –τος and is not unknown in the papyri, though not frequent. It is more like the verb (and participle) than the verbal in –τος in one respect, that it often uses the cases of the regular verb. This is seen in the one example in the N. T. (Lu. 5:38) ὀλον νέον ἐξ ὕσμων βλητεόν. It is the impersonal construction, though the agent is not here expressed. This example of –τέον in Luke is a survival of the literary style (cf. Viteau, “Essai sur la Syntaxe des Voix,” Revue de Philologie, p. 38). See Theo, Progymn., p. 128, 12, ἐλ γαμμετέον.

[Page 1098] 2. HISTORY OF THE PARTICIPLE.

(a) The Sanskrit Participle. This was more advanced in its development than the Sanskrit infinitive, which had no voice or tense. In the Veda the aorist, present, perfect and future tenses have participles. The distinction in the structure of the participle as compared with the other verbal adjectives lies just in this point. The mere

2 Riem. and Goelzer, Synt., p. 707.
3 In Sans. the verbal adj. in -tā are sometimes called passive participles (Whitney, Sans. Gr., p. 340). This form does not belong to the tense system.
4 Moulton, Prol., p. 222.
5 Brug., Griech. Gr., pp. 184, 525.
6 Riem. and Goelzer, Synt., p. 707.
7 Goodwin, M. and T., p. 368 f.
8 Moulton, Prol., p. 222.
9 But even with –τος this sometimes appears as in διδακτός θεοῦ (Jo. 6:45) where we have the ablative. Cf. Brug., Griech. Gr., p. 522.

VITEAU, J., Essai sur la syntaxe des voix dans le grec du N. T. (Rev. de Phil., 1894).
———, Étude sur le grec du N. T. I, Le Verbe (1893); II, Le Sujet (1896).

verbal is formed on the verb-stem, while the participle is formed on the tense-stem. In the Sanskrit also both voices (active and middle) show these participles. Thus already in the original Indo-Germanic tongue it appears probable that the participle existed with voice, tense, Aktionsart and government of cases. The Greek participle is thus rooted in this pro-ethnic participle as seen by the very suffixes -nt-, -meno-, -wos- (-us).4

(b) Homer’s Time. Already in Homer and Hesiod the participle occurs as a fully developed part of speech. It occurs on an average of 8 16/6 times per page of 30 lines. In Hesiod the participle is chiefly attributive, while the predicate participle is less common than in Homer.5 This use of the participle as the practical equivalent of the hypotactic clause is a purely Greek development (copied by the Latin to some extent) within historical times.6 The participle is a literary device, and flourished best with writers of culture who were φιλοµέτοχοι.8 Broadus used to call the Greek “a participle-loving language,” and, taken as a whole, this is true. Certainly the participle had its most perfect development in the Greek. The aorist participle died in the Sanskrit and did not appear in the Latin. It is the aorist active participle which made the participle so powerful in Greek. The English, like the Sanskrit and the Greek, is rich in participles, though the German is comparatively poor. “We gain a certain grandeur and terseness by the construction, a certain sweep, a certain περιβολή, such as Hermogenes recognises as lying in the participle.”9 This wealth of participles gives flexibility and swing to the language.

(c) The Attic Period. In Herodotus the participle jumps to [Page 1099] 17 1/2 times per page of 30 lines.1 But Sophocles has it only 9 times on the same scale. Williams2 runs the parallel on with 13 for Thucydides, 12 3/5 for Xenophon, 10 1/6 for Plato, 10 3/4 for Demosthenes. It is thus in the historians and orators and not the poets, that we see the participle in its glory.

(d) The Κοινή. Here we note a sharp difference in the several styles of writing. The Atticists like Josephus with 20, and 2 Maccabees with 23 1/2, lead in conscious imitation of the ancients. They go beyond them in fact. But the writers of the literary κοινή follow close behind, as Polybius with 17 4/5, Strabo with 13 1/2 and Plutarch with 14. Certainly there is no sign of decay here. But in the LXX, Exodus, Deuteronomy and Judges give only 6 1/6 while3 the papyri show 6 4/5. This confirms the judgment that

3 Ib.
the vernacular was not fond of the participle and found it clumsy. Jannaris\(^4\) quotes
striking passages from Thucydides, Plato and Demosthenes which illustrate well the
clumsiness and ambiguity of the participle in long, involved sentences. Even in the
older Greek in unconventional or unscholarly composition the accumulation of
participles is shunned. The clearer and easier analysis of co-ordinate or subordinate
clauses was used instead.\(^5\) In the N. T. we see the participle used on the whole more
frequently than in the LXX and the papyri. The Hebrew had a certain restraining
influence on the participle in the LXX. In the vernacular papyri the participle was
held back on the principle just stated above. It is Luke who makes most frequent use
of the participle with 16\(^{2/5}\) in the Gospel and 17\(^{1/6}\) in the Acts per page of 30 lines.\(^6\)
But 1 Peter follows close behind with 15\(^{2/3}\) and Hebrews with 14. In the other Gospels
Matthew has it 12\(^{1/2}\), Mark 11\(^{2/3}\) and John 10\(^{2/5}\).\(^7\) James has it 10 per page, while in
the Epistles and Revelation it drops back to 8 and 9. On the whole it is much as one
would expect. The more literary books lead (after Paul with only 9 per page average
in Gal., 1 Cor., and Rom.).\(^8\) The historical books surpass the Epistles, while Hebrews
here reveals its hortatory, sermonic character. For a succession of participles see Ac.
12:25; 23:27; Heb. 1:3 f.; Mk. 5:15. The details of the N. T. situation will come later.

\(\text{(e) Modern Greek.} \) The participle more and more came to be [Page 1100]
scholastic and dropped out of the vernacular.\(^1\) In particular was this true of the
circumstantial participle. The classic Greek by means of the participle developed the
periodic style (\(λέξις \kappaατεστραφωμένη\)) and is seen at its highest in Isocrates. See, for
example, the “Ciceronian period” in Isocrates, p. 82. Jebb\(^7\) contrasts this with \(λέξις \εἰρομένη\), simply tacking clause to clause as in Mt. 7:25, 27 and colloquial repetition
of finite verbs as in Jo. 1:47; 7:4. But \(βλέπετε, \βλέπετε, \βλέπετε\) (Ph. 3:2) has
rhetorical effect. In the vernacular modern Greek, therefore, we see a retreat of the
participle all along the line. It is not dead as the infinitive, but is dying, though some

vernacular writers are bringing back the use of the participle for literary purposes (Thumb, Handb., p. 168). The analytic tendency of modern language is against it. See Jebb’s remarks for the various devices used instead of the participle. The only participles left in modern Greek are the indeclinable present active in –οντας (cf. gerund in Latin), some middle (or passive) parts. in –οµενος or –αµενος and perfect passives like δεµενος (no reduplication).\(^3\) A few are made from aorist stems like ἰδοµένος (Thumb, Handb., p. 150). The use of the part. in the modern Greek is very limited indeed.

3. SIGNIFICANCE OF THE PARTICIPLE.

(a) Originally an Adjective. The infinitive was originally a substantive, as we have seen. In the Sanskrit it did not acquire voice and tense, though it had the verbal idea of action. The participle, as we have seen, had made more progress in the Sanskrit, but it was also originally an adjective. It never got away from this original adjectival idea.\(^4\) But we are not left to history and logic to prove this point. It so happens that some participles in form never became participles in fact. They are merely adjectives. Homer shows a number of such words.\(^5\) Cf. ἄσ-µενος. We see remnants of this usage in the N. T. like ἐκὼν (Ro. 8:20), ἓκων (1 Cor. 9:17). Other participles come in certain uses to be only substantives (adjectives, then substantives), though the true participial use occurs also. Cf. ἄρχων, ‘a ruler’ (Mt. 20:25); ἔγοµένος, ‘a governor’ (Ac. 7:10); τὸ ὑπάρχοντα ὑµῶν, ‘your belongings’ (Lu. 12:33). In general “the adjective represents a quality at rest, the participle represents a quality in motion.”\(^6\)

But [Page 1101] not all verbs express motion. The mere adjectival notion is more common in the Latin, as in prœteritus, quietus, tacitus, etc. In Mt. 17:17, γενέα ἄπιστος καὶ διεστραµµένη, the verbal adjective and participle occur together.

(b) The Addition of the Verbal Functions. These functions are tense, voice and case-government. There was originally no notion of time in the tense, nor does the tense in the participle ever express time absolutely. It only gives relative time by suggestion or by the use of temporal adverbs or conjunctions.\(^1\) The verbal idea in the participle thus expands the adjectival notion of the word.\(^2\) But the addition of these verbal functions does not make the participle a real verb, since, like the infinitive, it does not have subject.\(^3\)

(c) The Double Aspect of the Participle. The very name participle (pars, capio) indicates this fact. The word is part adjective, part verb. Voss calls it mules, which is part horse and part ass.\(^4\) Dionysius Thrax says: Μετοχὴ ἔστι λέξις μετέχουσα τῆς τῶν ῥηµάτων καὶ τῆς τῶν ὄνοµάτων ἰδιότητος. In the true participle, therefore, we are to look for both the adjectival and the verbal aspects, as in the infinitive we have the

---

1 Brug., Griech. Gr., p. 522.
2 Ib.
3 Monro, Hom. Gr., p. 53.
substantival and the verbal. The emphasis will vary in certain instances. Now the
adjectival will be more to the fore as in the attributive articular participle like ὁ
καλῶν. Now the verbal side is stressed as in the circumstantial participle. But the
adjectival notion never quite disappears in the one as the verbal always remains in the
other (barring a few cases noted above). One must, therefore, explain in each instance
both the adjectival and verbal functions of the participle else he has set forth only one
side of the subject. It is true that the verbal functions are usually more complicated
and interesting, but the adjectival must not be neglected.

(d) Relation between Participle and Infinitive. As already explained, they are
closely allied in use, though different in origin. Both are verbal nouns; both are
infinitival; both are participial. But the participle so-called is inflected always, while
the infinitive so-called has lost its proper inflection. The infinitive, besides, expresses
the action in relation to the verb, while the participle expresses the action in relation to
the object of the [Page 1102] verb (or some other substantive or pronoun). The
distinction between the participle and the infinitive thus becomes quite
important. Thus in Lu. 16:3, ἐπαιτεῖν αἰσχύνομαι, the idea is ‘I am ashamed to beg
and do not do it,’ while ἐπαιτῶν αἰσχύνομαι would be ‘I beg and am ashamed of it.’
Cf. the analytic expression in 2 Tim. 1:12. In Xenophon, Mem., 2, 6, 39, we have
αἰσχύνομαι λέγων. So ἄρχομαι in Attic Greek took the infinitive as a rule, linking the
infinitive with the verb. But sometimes the participle occurred, linking the action to
the subject (or object) and so contrasting the beginning with the end. In the N. T. all
the examples have the present infinitive except Lu. 13:25 ἐστάναι. In Lu. 3:23,
ἄρχομενος ὕφοι ἔτοιν τριάκοντα, we have neither with ἄρχομενος. Cf. Lu. 14:30,
ἤρξατο οἰκοδομεῖν. Radermacher (N. T. Gr., p. 169) compares ἄρξάμενος ἔξετίθετο
(Ακ. 11:4) with ἄρξαμένη—κατέχομαι (Xen. of Eph., p. 388, 31). On the other hand,
in the N. T. παύομαι occurs only with the participle, as in Lu. 5:4, ἐπαινόμενοι λαλῶν.
Cf. Ac. 5:42; 6:13; Eph. 1:16; Col. 1:9; Heb. 10:2. But in Ac. 14:18 note κατέπαυσαν
tοῦ μὴ θυσίαν, which well illustrates the difference between the inf. and the part. The
use of ἔτελεσεν διατάσσων (Μt. 11:1) Blass calls unclassical. The part. alone occurs
with ἕνακέω (Gal. 6:9; 2 Th. 3:13). Note also ἐπέμενον ἔρωτῶντες (spurious
passage in Jo. 8:7), but θυσίαν διατέλεσε (Ac. 27:33) without ὑπείρασεν. Cf. Ac. 12:16,
ἐπέμενεν κρούων, and Lu. 7:45, οὗ διέλιπεν καταφήλλομαι. Radermacher (N. T. Gr., p.
169) finds the part. with ἐμπέμενοι in “vulgar literature.” He observes that many of
these neater classical idioms with the part. do not appear in the N. T. Contrast with
this the inf. in Ac. 20:20, 27, οὗ γὰρ ὑπεστειλάμενον τοῦ μὴ ἔναγκελει. There is no
example of the inf. with φιάσκομαι in the N. T., but the part. occurs in Mt. 6:16, 18
(νηστεων). The adjectival alone is seen in Mt. 23:27, 28. Cf. also Ro. 7:13. It is
hardly on a par with the participle in Mt. 6:17 in spite of Blass’s insistence.

5 Brug., Griech. Gr., p. 522.
6 Burton, N. T. M. and T., p. 163.

2 Robertson, Short Gr., p. 194.
3 Blass, Gr. of N. T. Gk., p. 245.
4 Ib.
5 Ib.
Thoroughly classical also are προφθασεν αυτὸν λέγων (Mt. 17:25) and ἔλαθον ἐξελευάντες (Heb. 13:2), specimens of literary style. The infinitive with προφθάνω occurs in Clem., Cor., II, 8, 2. The part. with τυχάνοι does not occur in the N. T. In the later kouił the inf. takes the place of the participle with λανθάνω, παώμαι and φθάνω (Radermacher, N. T. Gr., p. 169). The part. is found with ὑπάρχω [Page 1103] (Ac. 8:16) and προσπάρχω (Lu. 23:12). It is doubtful if the participle belongs to the verb in 1 Tim. 5:13, ἄργα μανθάνουσιν περιερχόμενα, but, if so, it is not to be understood as like the inf.1 In Ph. 4:11; 1 Tim. 5:4, the inf. occurs with μανθάνω according to classic idiom. At any rate, if περιερχόμεναι (1 Tim. 5:13) is a circumstantial part., something has to be supplied with ἄργα. The part. in 1 Tim. 1:12, πιστὸν μὲ ἥγησιν θέμενος, is certainly circumstantial. The distinction between the inf. and the part. comes out sharply in indirect discourse also. The inf. is more objective. Thus note ἔκοιςαν τοῦτο αὐτὸν πεπλουκέναι τὸ σημεῖον (Jo. 12:18) and ὁ κόνιομεν γὰρ τινας περιπατοῦντας (2 Th. 3:11). The participle is a descriptive adjective even though in indirect discourse (cf. Lu. 4:23; Ac. 7:12). See 1 Cor. 11:18 for the inf. again. In Mt. 7:11, οἴδατε δόματα ἑραίδαι διδόναι, the inf. with οἴδα means ‘know how to give.’ But in Lu. 4:41, ἤδεσαν τὸν Χριστὸν αὐτὸν ἔδωκα, it is mere indirect discourse. For the part. see 2 Cor. 12:2, οἴδα—ἀρπαγέντα τὸν τοιοῦτον (cf. Mk. 6:20). In Ac. 3:9 note εἶδεν αὐτὸν περιπατοῦντα. Here we have the same root, though a different sense. οἴδα is common with ὅτι. But γινώσκω occurs both with the inf. as in Heb. 10:34, γινώσκοντες ἔχειν ἔσχοτος κρείσσονα ὑπαρξεῖν, and the participle as in Heb. 13:23; γινώσκετε τὸν ἀδελφὸν ἡμῶν Τιμόθεου ὄπολελεμένον. Cf. Lu. 8:46, ἐγὼ ἐγὼν δύναμιν ἐξελευάνων ἔζελεκεθύσαν, where the tense and participle both accent the vivid reality of the experience. But note the inf. in Mt. 16:13. The same thing is true of ὑμολογέω as in Tit. 1:16, θεόν ὑμολογοῦσιν εἰλέναι, and 1 Jo. 4:2, ὁ ὑμολογεῖ Τιμοθέου ἐν σαρκὶ ἐξελευάτα (cf. 2 Jo. 7). Cf. also Ac. 24:10 ὑντα ἐκ κριτῆν ἐπιστάμενος καὶ δοκιμάζω in 1 Th. 2:4 and 2 Cor. 8:22. Note difference between ἴνα εὑρίσκαι αὐτοῦ καθεύδοντας (Mk. 14:37). Cf. Indirect Discourse. Further examples of the supplementary participle come later. These sufficiently illustrate the difference between the use of inf. and part.

(e) Method of Treating the Participle. The hybrid character of the participle has led to a great deal of diversity in its treatment in the grammars. Prof. Williams2 gives an interesting summary in his monograph. None of them are satisfactory because they do not follow a consistent plan. Part of the divisions are from the adjectival, part from the verbal point of view. They are not parallel. Thus we have Kühner’s complementary, attributive, adverbial participles; Goodwin’s attributive, circumstantial, supplementary; Burton’s adjectival, adverbial, substantival; [Page 1104] Jannaris’s adjectival and adverbial; Blass’ attributive and in additional clause;

1 W.-M., p. 436.
2 The Part. in Acts, pp. 1 ff.

Goodwin

GOODWIN, W. W., Greek Grammar. Various editions.

Hadley and Allen’s attributive and predicate; Delbrück-Brugmann’s external, objective, adverbial. Then Williams’ adds another that is no better, ascriptive, adverbial, complementary. Thompson gives the attributive and the supplementary participle after saying that the nominal and the verbal classification is more elastic. The only way to get symmetry in the treatment of the participle is to follow the line of its double nature (adjectival and verbal) and discuss the adjectival functions and the verbal functions separately. See the discussion of the infinitive. That is to say, each participle must be considered as both adjectival and verbal. Not all the adjectival aspects will be true of any one participle nor all of the verbal, but each one will have some adjectival and some verbal functions. Thus alone can one get a clear statement of the many participial combinations and permutations. As an adjective the participle is attributive (anarthrous or articular) or predicate. It may even be substantival, especially with ὁ. It is always declinable. As a verb there is always voice and tense and there may be cases. But any given anarthrous predicate participle may be either supplementary (complementary) or circumstantial (additional) or wholly independent (as indicative or imperative). The articular participle is ruled out of this three-fold alternative, though it still has voice, tense and governs cases. The articular participle is always attributive (or substantival). The lines thus cross and recross in the nature of the case. But a clear statement of all the essential facts can be made by taking the adjectival and the verbal aspects separately. In any given instance there is thus a double problem. Both sides of the given participle must be noted.

4. ADJECTIVAL ASPECTS OF THE PARTICIPLE.

(a) Declension. The free declension of the participle in number and gender and case (cf. per contra the infinitive) makes the task of noting the adjectival aspects comparatively simple. There are anomalies of agreement in these three points as with other adjectives. Thus in Rev. 3:12 ἡ καταβαίνουσα in apposition with τὴς καινῆς Ἰερ does not conform in case. There is a difficulty of both case and gender in πεπυρωμένης in Rev. 1:15. See also πλῆθος κράζοντες (Ac. 21:36) where the number and gender both vary. In Mk. 4:31 note ὅν—ὃν πάντων τῶν σπερμάτων where ὅν takes the gender of σπέρμα. Cf. also ἦν καθῆκεν (Mt. 27:61). But these matters are discussed adequately in chapter on The Sentence.

(b) Attributive Participle.

(a) Anarthrous. The article is not of course necessary with the attributive participle any more than with any other attributive adjective. Thus we have ὕδωρ ζῶν (Jo. 4:10), ‘living water,’ which is just as really attributive as τὸ ὕδωρ τὸ ζῶν (Jo. 4:11). When the article is used there is no doubt about the participle being attributive. When it is absent, it is an open question to be examined in the light of the context. Note also 1 Cor. 13:1, χαλκὸς ἡξΩν ἢ κύμβαλον ἄλαλάζων. This construction (the anarthrous attributive) is not so common as the other uses of the participle,1 and yet it

---

1 Hadley and Allen, Greek Grammar (1895).
1 The Part. in Acts, p. 5.
2 Thompson, F. E., A Syntax of Attic Greek. New ed. (1907).
is not wholly absent from the N. T. See ἤχος ὃσπερ φερομένης πνοῆς βιαίας (Ac. 2:2) and θύρα ἡνεχμένη (Rev. 4:1). It is not always easy to draw the line between the anarthrous attributive participle and the predicate participle of additional statement. Cf. ἀνὴρ γεγεννημένος ἐν Ταρσῷ, ἀνατεθραμμένος δὲ ἐν τῇ πόλει ταύτη (Ac. 22:3). If ὁ occurred before these participles, we should have the articular-attributive participle which is equivalent to a relative.² So in Ac. 10:18, we have ὁ ἐπικαλούμενος Πέτρος, but in 10:32, ὁ ἐπικαλεῖται Πέτρος. Cf. Lu. 6:48, ὃμως ἕστιν ἀνθρώπῳ οἰκοδομοῦντι οἶκον, with Mt. 7:24, ἀνδρὶ ὅστις ὕποδομησεν αὐτοῦ τήν οἰκίαν. See also Lu. 6:49. Cf. Ro. 8:24, ἕλπις βλεπομένη οὐκ ἔστιν ἑλπίς. Cf. Mt. 27:33. The problem is particularly real in Mk. 5:25, 27. W. H. indicate by the comma after ἔλθοῦσα that they regard the participles with γινώ (οὐσία, παθοῦσα, ὀσανηνύσασα, ὀμφεληθείσα, ἐλθοῦσα) up to that point as attributive. They describe the woman who comes. Then the sentence proceeds with the predicate-circumstantial participles (ἀκούσασα, ἐλθοῦσα) before ἐξῆθο. Luke (8:43) makes the matter plainer by putting a relative clause after the first participle. The anarthrous attributive participle is closely bound to the substantive or pronoun even when it is an additional statement. See Mt. 12:25, πᾶσα βασιλεία μερισθείσα καθ᾽ ἑαυτῆς ἐρημώθη. See also Lu. 6:40; 2 Th. 2:4; Rev. 2:15. In Mt. 13:19, παντὸς ἄκοιντος, we probably have the genitive absolute and so predicate circumstantial, but even here αὐτοῦ occurs, though remote. Cf. πᾶς ὁ ἄκοινς (Mt. 7:26) and πᾶς ὅστις ἄκοιν (7:24), where we see how nearly these constructions approach each other.³ But the anarthrous indefinite participle is clearly found in Jas. 4:17, εἰδοτε οὖν καλὸν ποιῆν καὶ μὴ ποιῶντι, ἤμαρτα αὐτῶ ἕστιν. This passage may throw some light on Mt. 12:25. In Mt. 13:35, διὰ τοῦ προφήτου λέγοντος, we probably have the articular attributive participle, since the Greeks did not always place the attributive participle between the article and the substantive.¹ The use of ἔχον ἐν τοῖς ἱεροῖς is interesting in Rev. 15:1, εἶδον ἅγγελους ἐπτά ἐχοντας πληγὰς. The anarthrous indefinite participle is seen also in a few constructions like προσετίθεντο πιστεύοντες τῷ κυρίῳ (Ac. 5:14), where the participle means ‘believing men’ and has πάλιθη in apposition with it. See also φονῇ βοῶντος ( Mk. 1:3, LXX), ἐξελεύσεται ἠγούμενος (Mt. 2:6, LXX), οὐκ ἔστιν συνίων and οὐκ ἔστιν ἐκζητῶν (Ro. 3:11, LXX) where ὁ is more common, ἔχεις ἡκατοντάς (Rev. 2:14). It is worth noting in this connection also the fact that occasionally a preposition occurs with an anarthrous participle (cf. infinitive). So χωρὶς κηρύσσοντος (Ro. 10:14). Here the idea is not ‘without preaching,’ but ‘without one preaching,’ ‘without a preacher.’ For ‘without preaching’ we must have χωρὶς τοῦ κηρύσσειν. See once more χαίρειν μετὰ χαίροντων, κλαίειν μετὰ κλαιόντων (12:15) and ἐπὶ ποιοῦντας (1 Pet. 3:12). In 1 Cor. 15:27, ἐκτὸς τοῦ ὑποτάξαντος, we have the usual articular construction.

(β) Articular. The articular participle occurs a few times in Homer.² In general the Book of Acts has the articular participle in about the same proportion as the great Attic writers.³ All articular participles are, of course, attributive. But the matter has

---

2 Blass, Gr. of N. T. Gk., p. 242.
3 This use of πᾶς without art. occurs occasionally in class. Gk. See K.-G., II, p. 608 f.
some points of interest and cannot be dismissed with this general statement. The examples are very numerous. The substantives may be expressed as in ἡ ἁτουμασμένην ὡμᾶς βασιλείαν (Mt. 25:34); οἱ γραμματεῖς οὐ ἐπὶ Ἰεροσολύμων καταβάντες (Mk. 3:22). Like other adjectival participles, the participle may come between the article and the substantive, as in ἡ ὑγιαινούση διδασκαλία (1 Tim. 1:10); τοῦ φανομένου ἀστέρος (Mt. 2:7); τῆς προκειμένης αὐτῷ χαράς (Heb. 12:2). Cf. Jude 3. The substantive may precede and the article may be repeated, as τὸ ὑδάρ τὸ ἀνακολοθίαν (Jo. 4:11); τὸ σῶμα τὸ γεννησόμενον (1 Cor. 15:37); τῷ θεῷ τῷ διδόντι (1 Cor. 15:57). Cf. Mt. 26:28; 27:44; Jas. 5:1; Ro. 2:10. In Mk. 12:38 the article is repeated as in 12:40 (apposition) when the nominative reminds us of the common anacoluthon in Revelation. [Page 1107] With proper names note Ἰησοῦς ὁ λεγόμενος Χριστός (Mt. 1:16); ὁ ἑπικαλούμενος Πέτρος (Ac. 10:18). Cf. 1 Th. 1:10; 2 Tim. 1:8 f. For a long passage see ὁ διαδόκησις (Ac. 21:28). The order of the words is not insisted on and in long passages the participle may follow without the repetition of the article, as in Mt. 6:30, τὸν χώρον τοῦ ἄγροι σήμερον ὡντα καὶ οὕροι εἰς κλάβανον γενομένον. See also Ac. 12:10; 13:32; 26:4; 6; Heb. 2:2; Heb. 12:3, where in the long clause the participle with τουτούριν comes in between τὸν καὶ ὑπομεμοντίκαι καὶ a good distance from ἀντιλογία. Sometimes the article is used with the participle, but not with the substantive, as in πα νῷς ἵνα ἐν ἄγροι καθημένοις (Lu. 7:32); χρυσίον τοῦ ἀπλονομένου (1 Pet. 1:7); ὄνομα τὸ δεδομένον (Ac. 4:12); πολυς ἀρθίβος ὁ πιστεύσας (Ac. 11:21); πολλοὶ πλάνοι οἱ μὴ ὁμολογούντες (2 Jo. 7); ἄνθρωποι οἱ—ἀρνούμενοι (Jude 4, where note the series of participles and one adjective ἄσεβες parallel with the participles). Cf. also 1 Cor. 2:7. The articular participle also occurs with pronouns, as in σὺ ὁ ἐρχόμενος (Mt. 11:3); τινάς τοὺς πεποίθοτας (Lu. 18:9); τις ὁ πυλαγαγών (Col. 2:8); αὐτοίς τοῖς πιστεύσαις (Jo. 1:12); σὺ ὁ κρίνον (Jas. 4:12); τινές οἱ ταράσσοντες (Gal. 1:7); πολλοὶ οἱ φρονούντες (Ph. 3:18 f.). Particularly in address do we find the articular participle, as in Mt. 7:23; 27:40; Lu. 6:25 (but note dative in 6:24); Ac. 2:14; 13:16. The use of the articular participle with πᾶς is common, as πᾶς ὁ ὁρνιτόμενος (Mt. 5:22); πᾶς ὁ ἀκούων (Mt. 7:26), πᾶς ὁ λέγων (7:21). This is equal to the relative clause πᾶς ῥήσεις (Mt. 7:24). In Ro. 2:1 πᾶς ὁ κρίνον is used with ἄνθρωπο. Cf. πάντες οἱ ἀκούοντες in Ac. 9:21. Here also ὁ πορευόμενος is continued by καὶ ἑλπίζει as if it were a relative clause. The articular participle sometimes occurs where it is followed by an infinitive. Here it is still further complicated, but it is clear. See τὴν μέλλουσαν δόξαν ἀποκαλυφθῆναι (Ro. 8:18); τὰ δοκοῦντα μέλῃ—ὑπάρχειν (1 Cor. 12:22). Cf. also 2 Pet. 3:2. The use of ὁ ὁν in Acts calls for special remark. In Ac. 13:1, κατὰ τὴν ὀδον ἐκκλησίαν, we see this idiom, which Moulton³ translates ‘the local church.’ Note 14:13 D, τῷ ὡντος Διός Προπόλεως (or πρὸ πόλεως). Cf. Ramsay’s remark (Ch. in Rom. Emp., p. 52, quoting J. A. Robinson), that in Acts ὁ ὁν “introduces some technical phrase, or some

Ramsay

Ramsay, W. M., Cities and Bishoprics of Phrygia. 2 vols. (1895, 1897).

———, St. Paul the Traveller (1896).
term which it marks out as having a technical sense (cf. 5:17; 13:1; 28:17), and is almost equivalent to τοῦ ὄντος καὶ ἀρχαίων. An ingenious person might apply this in Eph. 1:1 to the text with ἔν Εὐφράσσω absent; but the usual view needs no defence against such an alternative. [Page 1108] With αἱ οὖσαι in Ro. 13:1 we may compare Par. P. 5 (ii/B.C.), ἔφε ιερείας καὶ ιερείμων τῶν ὄντων καὶ οὖσῶν. So N. P. 49 (iii/A.D.), τοῦ ὄντος μηνός ‘the current month.’ The passage in Ac. 5:17 reads ἥ οὖσα αἰρεῖσας, and 28:17 has τοὺς ὄντας τῶν Ἱσοδίων πρότως. Moulton agrees, we may note, with Sanday and Headlam (in loco) in taking ὁ ὄνπ πάντων (Ro. 9:5) as referring to Jesus. As is well known, the difficulty here is a matter of exegesis and the punctuation of the editor will be made according to his theology. But it may be said in brief that the natural way to take ὁ ὄνπ and θεῶς is in apposition to ὁ Χριστός. It is a very common thing in the N. T., as already noted, to have ὁ and the participle where a relative clause is possible. But this idiom is common in the older Greek. See Ac. 10:18, 32, and chapter on Article. It remains then to speak of the frequent use of the articular participle without a substantive or pronoun. This idiom is too common for exhaustive treatment, but some examples are given. Cf. Mt. 10:40, ὁ δεχόμενος ὑμᾶς ἐκέχει ἐκεῖνο, καὶ ὃ ἐκέχει δεχόμενος δέχεται τὸν ἀποστέλλαντά με. Note also ὁ δεχόμενος and the next verse and ὁ ΄ ὄνπ ποιήσῃ in verse 42. See further Mt. 10:37; Ac. 10:35; Rev. 1:3. The question of the tense is interesting in some of these examples, as in ὁ εὐρέων τὴν ψυχήν αὐτοῦ ἀπολέσει αὐτήν in Mt. 10:39, but that will be discussed a bit later. Like a relative clause, the articular participle may suggest the notion of cause, condition, purpose, etc., as in Mt. 10:37, 39, 40, 41; Lu. 14:11; Ro. 3:5. But this notion is very indefinite.

(c) Predicate Participle. From the adjectival standpoint all participles that are not attributive are predicate. This aspect of the participle must be elucidated further. The verbal aspect comes into special prominence with all the predicate participles. They will be touched very lightly here and receive full discussion under Verbal Aspects. It may be said at once that all the supplementary and circumstantial participles are predicate. One must not confuse the articular participle in the predicate like σὺ εἶ ὁ ἐρχόμενος (Lu. 7:19) with the real predicate participle. Cf. Lu. 16:15; 22:28. The predicate participle is simply the adjective in the predicate position. That is, it is not attributive. There are obviously many varieties of the predicate participle. But the predicate adjective has had adequate treatment. Cf. ἔχε με παρθηκημένον (Lu. 14:18). Cf. also Heb. 5:14; Ac. 9:21.

(d) The Participle as a Substantive. The adjective, though a variation from the substantive, is sometimes used as a substantive [Page 1109] as in τὸ ὄγοθ. It is not strange, therefore, that the participle also shows substantival uses. These are sometimes anarthrous, as in ἄρχον (Mt. 9:18), ἤγοιμενος (Mt. 2:6). But, as a rule, the participle as a substantival is articular. Cf. Lu. 12:33, τὸ ὑπάρχουσα ὕμων, where the genitive shows the substantival character of this participle. Cf. further 2:27 τὸ ἐκλείσμενον τοῦ νόμου, (1 Cor. 7:35) πρὸς τὸ ὑμῖν αὐτῶν συμφέρον, (Ph. 3:8) διὰ τὸ ὑπερήφανον τῆς γνώσεως, (Mt. 14:20) τὸ περισσεύον τῶν κλασμάτων, (Ro. 7:23) τῶ ὄντι, (Heb. 12:11) πρὸς τὸ παρόν, etc. There are also the many examples where ὁ and the part. is used without a subst. or pron., as in Mt. 10:39, ὁ εὐρέων and ὁ ἀπολέσας

1 Burton, N. T. M. and T., p. 167.
2 Ib., p. 169.
(cf. ὁ ἀγαθός, ὁ κακός). The substantive use of the participle is a classic idiom.¹ The use of the neuter participle as an abstract substantive is not so common in the N. T. as in the ancient Greek.² But see further τὸ γεγονός (Lu. 8:56), τὰ γινόμενα (9:7), τὸ ἀπολωλός (19:10), τὸ ἐργόμενα (Jo. 16:13), τὸ νῦν ἔχον (Ac. 24:25), τὰ μῆ ὄντα, τὰ ὄντα (1 Cor. 1:28), τὸ αὐλόμενον (14:7), τὸ δεδοξασμένον (2 Cor. 3:10 f.), τὸ δοκοῦν (Heb. 12:10), etc. In Lu. 22:49 note τὸ ἔσομεν. One is not to confuse with this idiom the so-called “substantive participle” of some grammars, which is a term used for the substantivizing of the verbal force of the participle, not the adjectival. Thus Burton³ calls the supplementary participle like that in Ac. 5:42, οὐκ ἔπαυοντο διδάσκοντες, and in Lu. 8:46, ἔγνων δύναμιν ἐξεληλυθοῦν ὀπὸ ἔμοι, the “substantive participle.” I confess that I see nothing to be gained by applying “substantive” to the purely verbal aspects of the participle. Confusion of thought is the inevitable result. See 5, (d), (e).

(e) The Participle as an Adverb. The formation of adverbs from participles is due to its adjectival function. Cf. ὄντως (Mk. 11:32), ὁμολογούμενως (1 Tim. 3:16), ὑπερβαλλόντως (2 Cor. 11:23). Besides, the participle itself (cf. neuter adjective πολύ, etc.) sometimes has an adverbial force. In particular note τιχών (1 Cor. 16:6). See also ἐπιβαλλόντως ἔκλαυεν (Mk. 14:72). This obscure participle expresses coincident action (cf. Moulton, Prol., p. 131). Cf. ἤλθαν σπεύσαντες (Lu. 2:16), σπεύσας κατάβηθι καὶ σπεύσας κατέβη (19:5 f.). We cannot always draw a distinction between this use and the circumstantial participle of manner. The verbal and the adjectival standpoints come together. A number of the grammars apply the term “adverbial” to all the circumstantial participles.⁴ But it is more than doubtful if [Page 1110] one gains as much as he loses thereby. It is true that logically a sort of adverbial relation may be worked out, an adverbial addition to the sentence.¹ But it does not help much from the syntactical point of view to insist on this fact in the exposition of the circumstantial participle. As to form the circumstantial participle is still adjectival. The adverbial notion is inferential and purely logical. There is something, however, to be said for the adverbial aspect of the redundant participle in βλέποντες βλέπετε (Mt. 13:14, LXX), which is on a par with ἄκοψαι ἄκοψετε. Both are attempts to translate the Hebrew inf. absolute. Moulton² has found the idiom in Æschylus and Herodotus, but the N. T. usage is clearly due to the LXX, where it is very common. Cf. also ἰδὼν ὃν (Ac. 7:34), εὐλογῶν εὐλογήσω (Heb. 6:14), from the LXX again. Blass (Gr. of the N. T. Gk., p. 251) calls this construction “thoroughly un-Greek.” There are other pleonastic participles like the common ἄποκριθεὶς ἐπελέγετο (Mt. 3:15) which is somewhat like the vernacular: “He ups and says” (Moulton Prol., p. 15 f.). Cf. also τοῦτο εἰπὼν λέγει (Jo. 21:19), ἀπελθόντων πέπρακεν (Mt. 13:46), ‘he has gone and sold.’ So also ἀναστὰς ἤλθεν (Lu. 15:20), ‘he arose and came.’ Once again note λαβοῦσα ἐνέκρυψεν (Mt. 13:33), ‘she took and hid.’ This idiom is more Aramaic than Hebraic and is at any rate picturesque vernacular. But it is also Greek. Pleonasm belongs to all tongues. Radermacher (N. T. Gr., p. 179) quotes Herod. VI, 67, 10, εἰπε φάς; VI, 68,

5, ἔφη—λέγων. Mr. Dan Crawford finds in the Bantu language “dying he died” for the irrevocableness of death. We now turn to the verbal aspects of the participle, which are more complex.

5. VERBAL ASPECTS OF THE PARTICIPLE.

(a) Voice. There is nothing of a distinctive nature to say about the voice of the participle in addition to what has already been said (see ch. on Voice). The voices run in the participles precisely as in the verb itself. We find the voice in the earliest Greek as in the Sanskrit. All the nuances of the voices appear in the participle. Cf. the active in διδάσκων (Lu. 13:10), ζῶν (Jo. 4:10); the middle in προσδεχόμενος (Lu. 12:36), ἐπικαλεσάμενος (Ac. 22:16), σπασάμενος (Mk. 14:47); the passive in λυπούμενος (Mt. 19:22), τὴν ἀποκεκρυμμένην (1 Cor. 2:7), ἀπολελυμένον (Heb. 13:23), ἐπιστρεφεῖς (Mk. 5:30), κολυθέντες (Ac. 16:6). We may note in particular ἔπαστα (Mk. 14:18 ἐπιστρεφεῖς), ἐσεσθε μισούμενοι (Mk. 10:22) and ἐσεσθε λαλοῦντες (1 Cor. 14:9). In Mk. 5:26, the active participle has the construction of the passive, but this is due to the verb πάσχω, not to the voice. Cf. also Gal. 4:9, γνόντες θεὸν μᾶλλον δὲ γνωσθέντες ὑπὸ θεοῦ.

(b) Tense.

(a) Timelessness of the Participle. It may be said at once that the participle has tense in the same sense that the subjunctive, optative and imperative have, giving the state of the action as punctiliar, linear, completed. In the beginning1 this was all that tense meant in the participle. The participle was timeless. Indeed the participle in itself continued timeless, as is well shown by the articular participle.2 Thus in Mk. 6:14, Ἰωάνης ὁ βαπτίζων, it is not present time that is here given by this tense, but the general description of John as the Baptizer without regard to time. It is actually used of him after his death. Cf. οἱ ἐπιτύμβιοι (Mt. 2:20). In Mt. 10:39, ὁ εὐρόν ἀπολέσει, the principal verb is future while the participle is aorist, but the aorist tense does not mean past or future time. So in Mt. 25:20 and 24 ὁ λαβὼν and ὁ ἐληφών have no notion of time but only the state of the action. But the tenses of the participle may be used for relative time. In relation to the principal verb there may be suggested time. Thus ὁ εὐρόν ἀπολέσει above implies that εὐρόν is antecedent to ἀπολέσει which is future. In Ac. 24:11, ἄνεβην προσκυνήσων, the principal verb is past, but the participle is relatively future, though absolutely past. The relative time of the participle approximates the indicative mode and is able to suggest antecedent (aorist, present, perfect tenses), simultaneous (aorist, present tenses) and subsequent (present, future tenses) action. The tenses of the participle must be studied with this distinction in mind. But this notion of relative time “is deeply imbedded in the nature of the participle and the use is universal.”3 Certainly this notion of relative time is more obvious in the Greek participle than in the Latin or in the modern languages.4 In the chapter on Tense the participial tenses were treated with reasonable completeness, but

1 Brug., Griech. Gr., p. 522.
2 Moulton, Prosl., p. 126. He notes Heb. 10:14, τοὺς ἄγιαξομένους, as a good ex. of the timelessness of the part.
some further remarks are necessary at this point. A word needs to be said about the idiom οὗτος ἦν ὁ εἶπόν (Jo. 1:15), οὗτος ἦν ὁ—καθήμενος (Ac. 3:10), where the principal verb is thrown into the past.

[Page 1112] (β) The Aorist. The Aktionsart of the aorist participle is sufficiently illustrated in the discussion of the aorist tense. There is, of course, no reason for not having the constative, ingressive or effective aorist in the participle. Schaefer argues that in most cases the participle uses the effective aorist. That may be true, though there is nothing in the nature of the participle itself to cause it. Blass thinks that the aorist participle contains the idea of completion, but even so that notion may be merely constative or ingressive. Goodwin holds that the aorist participle generally represents the action as antecedent to the principal verb. Burton has it more nearly correct when he insists that the aorist participle conceives of the event indefinitely or simply. So Blass denies that the aorist tense implies antecedent action. It is usually assumed that the proper use of the aorist participle is antecedent action and that only certain verbs (as exceptions) may occasionally express simultaneous action. But this is a misapprehension of the real situation. It is doubtless true, as Burton notes, that the antecedent use furnishes the largest number of instances, but that fact does not prove priority or originality of conception. “The aorist participle of antecedent action does not denote antecedence; it is used of antecedent action, where antecedence is implied, not by the aorist tense as a tense, but in some other way.” Moulton is equally explicit: “The connotation of past time was largely fastened on this participle, through the idiomatic use in which it stands before an aorist indicative to qualify its action. As point action is always completed action, except in the ingressive, the participle naturally came to involve past time relative to that of the main verb.” It is probable that the original use of the aorist participle was that of simultaneous action. From this was developed quite naturally, by the nature of the various cases, the antecedent notion. Cf. νηστεύσας ἐπείνασεν (Mt. 4:2) where the fasting expressed by the participle is given as the reason for the hungering expressed by the principal verb. For further examples of antecedent action see Mt. 2:14; 2:16; 27:3; 2 Cor. 2:13. For the articular aorist see Mt. 10:39; Lu. 12:47; Jo. 5:15. While this came to be the more common idiom from the nature of the case, the original use of the aorist participle for simultaneous action continued. One has no ground for assuming that antecedent action is a necessary or an actual fact with the aorist participle. The aorist participle of simultaneous action is in perfect accord with the genius and history of the Greek participle. For numerous examples of both uses see the chapter on Tense. A good instance is seen in Mt. 27:4, ἠμαρτον παραδόσας αἶμα ἀθῶν. So also ὑπολαβὼν εἶπεν (Lu. 10:30). See Ac. 2:23, τούτων προσπήξαντες ἀνείλατε, where the slaying

was manifestly done by the impaling on the cross. The two actions are identical per se. Moulton (Prol., p. 131) observes that when the verb precedes the aorist participle it is nearly always the participle of coincident action. He (Prol., p. 132) cites O. P. 530 (ii/α.δ.), ἐξ ὧν δόσεις—λυτρώσατο μου τῇ ιμάτῳ. It so happens that the N. T. shows a great number of such examples. See Mk. 15:30 σῶσον καταβάς, (Lu. 2:16) ἠλθαν σπεύσαντες, (Ac. 10:33) καλῶς ἐποίησας παραγενόμενος. Cf. Mt. 26:75. In Ac. 10:29, ἠλθὼν μεταπεμφθείς, the participle is antecedent in idea. Acts, however, is particularly rich in examples of the coincident aorist participle which follows the verb. See 10:39; 11:30; 13:33; 15:8, 9; 19:2; 23:22, 25, 30; 25:13; 26:10. It is in point of fact a characteristic of Luke’s style to use frequently the coincident participle (both aorist and present) placed after the principal verb. This fact completely takes away the point of Sir W. M. Ramsay’s argument for the aorist of subsequent action in Ac. 16:6, where, however, it is more probably antecedent action, as is possible in Ac. 23:22. The argument made against it under Tense need not be repeated here. Burton assents to the notion of the aorist of “subsequent” action in the participle, but no real parallels are given. I have examined in detail the N. T. examples adduced and shown the lack of conclusiveness about them all. See chapter on Tense. It is even claimed that subsequent action is shown by the participles (present as well as aorist) in Ac. 5:36; 6:11; 8:10, 18; 14:22; 17:26; 18:23; 28:14, but with no more evidence of reality. Actual examination of each passage shows the action to be either simultaneous or antecedent. See also Lu. 1:9, ἐλαχε τῷ θυμίςω εἰσελθὼν εἰς τὸν ναὸν, where it is obviously coincident. The same thing is true of Heb. 11:27, κατέλιπεν Αἰγύπτον, μὴ φοβηθείς. Cf. also Ac. 7:35 ὃν ἤρνισαντο [Page 1114] ἐπόντες, (13:22) εἶπεν μαρτυρήσας. A case like 1 Pet. 1:20 f. is not, of course, pertinent. However, the common use of the aorist participle in indirect discourse (as with all the supplementary participles) without any notion of time is to the point. So Ac. 9:12, ἔδει ζωοποιηθείς καὶ ἐπιθέτα. So ἄνωθεν τὸν Σατανᾶν συνεδρίαν (Lu. 10:18). The action is purely punctiliar with no notion of time at all. It is true that the articular participle is occasionally used (see chapter on Tense) for time past to the time of the writer, but future to the time of the principal verb. As a matter of fact this aorist participle is timeless, as is shown by the use of ὁ παραδοὺς in Mt. 10:4 and ὁ παραδίδοσας in 26:25. So ὁ εἰπὼν in Jo. 5:12; ὁ πουήςας 5:15; ἡ ἐλεύσασα 11:2. It is the action alone that is under consideration, not the time of its performance. See, per contra, ὁ γνοὺς—καὶ μὴ ἔτομασας ἣ συνήθες δαρήσεται (Lu. 12:47) where the aorist participle gives the simple action with a future verb. Cf. Lu. 6:49 for the articular aorist part. with the present indicative. Burton feels the weakness of his contention for “subsequent” action in the aorist participle when he explains that it is “perhaps due to Aramaic influence.” There is no need for an appeal to that explanation, since the fact does not exist. It is only in the circumstantial participle that any contention is made for this notion. It is certainly gratuitous to find subsequent action in Ro. 4:19, μὴ ἔθετε ἐπὶ πιστεύειν, not to mention 4:21; Ph. 2:7; Heb. 9:12. Burton reluctantly admits that, though in 1 Pet. 3:18 ξεποιηθείς is “clearly subsequent to ἁπέθανεν,” yet it “is probably to be taken together with θανατωθείς as defining the whole of the preceding clause.” This latter view is, of course, true, since the order of

2 St. Paul the Traveller, p. 212.
3 See Ballentine, Bibliotheca Sacra, 1884, p. 787, for discussion of N. T. exx.

1 N. T. M. and T., p. 66.
the participles is ἑαυτώθεις, ζωοποιθεῖς. The timelessness of the aorist participle is well shown in Jo. 16:2, ἐὰν ὁ ποικίλων [μὴ] δέξῃ λατρείαν προσφέρειν τῷ θεῷ. Cf. also ἁγιόνα—τελειώσαι (Heb. 2:10). This coincident use of the aorist participle is by no means so rare in the ancient Greek as is sometimes alleged.2 The action was specially likely to be coincident if the principal verb was also aorist.3 Like the other articular participles, the aorist participle may be the practical equivalent of the relative. So in Lu. 12:8 f. ὦς ἐὰν ὠμολογήσατε καὶ ὦ ἀρνηθήμενος are used side by side.

[Page 1115] (γ) The Present. As the aorist participle is timeless and punctiliar, so the present participle is timeless and durative. The participle is thus, like the infinitive, ahead of the present indicative, which does not distinguish between punctiliar and durative action. A careful treatment of the force of the present participle has been given under Tense. The real timelessness of this participle is shown in the fact that it is used indiscriminately with past, present or future tenses of the indicative. So πωλοῦντες ἔφεραν (Ac. 4:34); ὑποθητικῶν εὐλόγησεν (Heb. 11:21); κατέρ γών ὦ ὦ ἔμαθεν (Heb. 5:8); μεριμνῶν δύναται (Mt. 6:27); ἔσεσθε λαλοῦντες (1 Cor. 14:9). The articular present especially shows the absence of time. So ὀδοκοῦντες ὦδὲν προσανέθεντο (Gal. 2:6); προσευκεία τοὺς σωζομένους (Ac. 2:47); ὦ δεχόμενος ὦμᾶς ἐμὲ δέχεται (Mt. 10:40); ἔστειθε τῷ παρατίθεμεν (Lu. 10:8); ὦ βλέπον ἐν τῷ κρυφαίῳ ἀποδώσει (Mt. 6:18). There will be ἀκτίος ἀρτι in this participle also. Some of these words are really punctiliar (δέχομαι, for instance). But, in general, the present participle gives linear action. The present participle may have relative time. This relative time is usually simultaneous or coincident. This is only natural. Sometimes, however, this relative time may be antecedent action, a classic idiom.1 Examples of this idiom were given under Tense, but add Jo. 9:8, ὦ τιθορούντες τὸ πρῶτον, where the adverb of time helps to throw the participle back of ἔλεγον, as ἠρτι with βλέπω makes the verb later than τιφλῶσαν ὦν in 9:25. Cf. also Gal. 1:23, ὦ δίωκον ἡμᾶς ποτὲ νῦν εὐκρυφαί λοίζεται, where both participle and verb have adverbs of time by way of contrast. For other instances like these see Mt. 9:20=Mk. 5:25=Lu. 8:43; Jo. 5:5; Ac. 24:10; Eph. 2:13; Col. 1:21; 1 Tim. 1:13, etc. There are also undoubted instances of the present participle to express the notion of purpose, futuristic in conception, though present in form. Add to the instances already given the following: Mk. 3:31, ἔτι στήκοντες ἀπέστειλαν καλοῦντες. Here the first participle is only noticeable as the usual linear action (with aorist indicative). The second participle, however, is practically purpose. ‘They sent to him calling him.’ ‘They sent to call him.’ So also Lu. 13:6 ἦλθεν χίτων (13:7) ἔρχομαι χίτων. It is not strictly true that here the present participle means future or subsequent time. It is only that the purpose goes on coincident with the verb and beyond. This prospective present part. (cf. present ind.) appears in Ac. 21:3, ἐὰν ἀποφορτισθῆναι τὸν γόμον. ‘The ship was appointed to unload her cargo.’ Cf. Mt. 6:30; [Page 1116] 11:3; 26:28; Lu. 7:19; 1 Cor. 15:57; Jas. 5:1; Ac. 3:26. The future is “simulated”1 also by the present participle when it is used for conative action. It is, of course, not the participle that brings out this notion. See (Mt. 23:14) καὶ ὦτος τοὺς ἐκσαρκωμένους ἄφιετε ἀπειλθεῖν, (27:40) ὦ

2 See Leo Meyer, Griech. Aor., p. 125.
The Perfect. This tense brings little that is distinctive in the participle. Cf. τετελειωμένοι (Jo. 17:23), πεποιηκότας (Ac. 18:2), κεκούμενος (Ac. 4:6), έναον (Rev. 9:1), έλθον (1 Jo. 4:2), ὁ εἰλθός (Mt. 25:24). The distinction between intensive and extensive was drawn under Tense. Some of the intensive uses have lost the notion of completion (punctiliar) and hold on to the linear alone in the present sense. Cf. ἔστως ἐμί (Ac. 25:10), εἰδώς (Mt. 12:25) with which contrast οἱ ἐγνοκότες (2 Jo. 1), συνειδυίης (Ac. 5:2), τεθνηκός (Lu. 7:12), παρεστηκός (Jo. 18:22). The periphrastic use of the perfect participle in past, present and future time has been sufficiently illustrated already. So has the rare combination [Page 1117] of perfect and present participle in Eph. 4:18; Col. 1:21. The perfect participle also is either articular or anarthrous, attributive or predicate. For the predicate use see in particular Lu. 13:6 συκῆν ἤπιον τις περιπτετεμένην, (Heb. 5:14) τὰ υποθητήρια γεγομεναμένα ἔχοντων. It needs to be noted again that the perfect participle has no time in itself. In the nature of the case the act will be antecedent except where the tense has lost its true force as in ἔστως, τεθνηκός, εἰδώς. But it is only relative time, not absolute, and the leading verb may itself be punctiliar, linear or perfect, in the past, present or future. Just as the present participle may suggest antecedent action and so be a sort of “imperfect” participle (past time), so the perfect participle is sometimes used where a sort of past perfect sense results. The action was finished and is now no longer the fact, though the state represented by the perfect once existed. So ἐπὶ τῷ συμβεβηκότι αὐτῷ in Ac. 3:10. Cf. Mk. 5:15, θεωροῦσιν τὸν δαιμονιζόμενον καθήμενον καὶ σωφρονούντα, τὸν ἐσχηκότα τὸν λεγόμας, καὶ ἐφοβήθησαν. This is a most instructive passage. The historical present and the aorist indicative here occur side by side. The attributive and the predicate participles appear side by side. The present and the perfect participles come together.

2 Moulton, Prol., p. 127.
Of the two perfect participles, one, ἰματισμένον, is still true (punctiliar plus linear) and describes the man’s present state; the other, τὸν ἔσχηκότα, is no longer true and describes the state of the man before Jesus cast out the demon, which casting-out is itself in the past. This participle is therefore a sort of past perfect. Cf. also Jo. 8:31. Another striking example is Jo. 11:44, ἐξῆλθεν ὁ τεθνηκός δεδεμένος. Here δεδεμένος is still true, though τεθνηκός is not. Lazarus had been dead, but is not now. We see the same situation in 1 Cor. 2:7, τὴν ἀποκεκρυμμένην. The widows of God is no longer hidden. The point is still clearer in Ro. 16:25 f., μυστηρίου χρόνοις αἰωνίοις σεσιγηθέντος δὲ νῦν, where the long silence is now expressly said to be broken. Note the sharp contrast in the aorist participle with νῦν. This distinction between the perfect and aorist participle is often clearly drawn. See 2 Cor. 12:21 τῶν προημαρτηκότων καὶ μὴ μετανοησάντων, (1 Pet. 2:10) οὐκ ἦλθεμένοι νῦν δὲ ἔλθεθέντες. The same act may be looked at from either standpoint. One may not always care to add the linear aspect to the punctiliar. Cf. ὁ γεγενημένος and ὁ γεγενηθέντας in 1 Jo. 5:18, τὸν ἔσχηκότα τὸν λεγόντα in Mk. 5:15 and ὁ διαμονισθεὶς in 5:18, [Page 1118] ὁ λαβών in Mt. 25:18 and ὁ εὐληφός in 25:24. Cf. ἔγγον δύναμιν ἐξελιπθοῦν τῷ ἔμοι (Lu. 8:46) and ἐπίγονοι τῆς ἔξω αὐτοῦ δύναμιν ἐξελιπθοῦσαν (Mk. 5:30). Adverbs of time may occur with the perfect as with other tenses of the participle. Cf. Jo. 19:33, Ἡ ἀνεύθυντα. There is a sort of harmony in ὁ ἐφορακός μεμαρτύρηκεν (19:35). The difference between the perfect and present tenses after ἔδον is strikingly shown in Revelation. Cf. ἐδόν τὰς ψυχὰς τῶν ἐσφαγμένων (6:9), ἄλλον ἀγγελόν ἄναβαινοντα (7:2), ἀστέρα ἐκ τοῦ οὐρανοῦ πεπτῶκότα (9:1). Cf. also Mk. 5:33, φοβηθεὶς καὶ τρέμοντα, εἰδύτα. One must not confuse the perf. part. in Gal. 2:11 and Rev. 21:8 with a present like ψηλαφωμένως in Heb. 12:18 (‘touchable’).

(e) The Future. The future participle, like the future tense in general, was later in its development than the other tenses. It is usually punctiliar also and has something of a modal value (volitive, futuristic) like the subjunctive (aorist).1 See discussion under Tense. The future participle is always subsequent in time to the principal verb (cf. the present participle by suggestion), not coincident and, of course, never antecedent. Hence the future participle comes nearer having a temporal notion than any of the tenses. But even so it is relative time, not absolute, and the future participle may occur with a principal verb in the past, present or future. This idiom grew out of the context and the voluntative notion of the future tense.2 This point is well illustrated by the parallel use of μέλλον to express intention. Cf. ὁ παραδόσον αὐτόν (Jo. 6:64) and ὁ μέλλον αὐτὸν παραδίδοναι (12:4). As already shown, the future participle is much less frequent in the N. T. (as in LXX) than in the koine generally (as in the papyri). Another rival to the future participle is ἔρχόμενος (Jo. 1:9), ὁ ἔρχομενος (Lu. 7:19). Both μέλλον and ἔρχομαι (cf. εἰμί) are anticipatory presents.3 Cf. ἐνεστότα and μέλλοντα in Ro. 8:38. Nearly all the N. T. examples of the future participle (see chapter on Tense for discussion) are in Luke and Paul and Hebrews (the three best specimens of literary style in the N. T.). But see Mt. 27:49, σῶσον; Jo. 6:64, ὁ παραδόσον; 1 Pet. 3:13, ὁ κακώσον. For the Gospel of Luke see 22:49, τὸ ἔσομένων. The rest of his examples are in the Acts, as 8:27, προσκυνήσων, (20:22) τὸ

---

3 There is an expectant note in τὸ ἐκχυσμένον (Mt. 26:28).
συναντήσοντα, (22:5) ἄξων, (24:11) προσκυνήσων, (24:17) ποιήσων. For Paul see Ro. 8:34, ὁ κατακρινόν (a [Page 1119] question of editing, but cf. ὁ ἀποθανόν in verse 34), 1 Cor. 15:37, τὸ γεννημένον. For Heb. see 3:5, τῶν λαληθησομένων, (13:17) ἀποδόσωσυς. We find ὡς in Heb. 13:17. In conclusion one must note that the future part. disappeared wholly from the later Greek. The modern Greek does not know it at all. Instead it uses νά and the subjunctive. But in general in the N. T. the participle is still used in thorough accord with the ancient idiom so far as the tenses are concerned. In the papyri I note it more frequently than in the N. T. Cf. κοινολογησόμενον, P. Goodsp. 4 (ii/B.C.); τὰ―[σ]ταθησόμενα, P. Tb. 33 (B.C. 112).

(c) Cases. There is no need to tarry here to prove the verbal force of the participle as to cases. Precisely the same cases occur with the participle as with the finite modes of the verb. Cf. ἐκβάλων πάντας (Mk. 5:40) and κρατήσας τῆς χειρός τοῦ παιδίου (5:41). These illustrations illustrate the point and that is enough.

(d) The Supplementary Participle. The term supplementary or complementary is used to describe the participle that forms so close a connection with the principal verb that the idea of the speaker is incomplete without it. The participle does not differ in reality from the adjective in this respect, and it is still an adjective like πιστὸς μένει (2 Tim. 2:13). But it is the verbal aspect of the participle that is here accented. The participle fills out the verbal notion.

(a) The Periphrastic Construction. The general aspects of this idiom were treated in chapter on Tense (cf. also Conjugation of Verbs). It is only necessary here to stress the close connection between this participle and the principal verb as in ἔξων ἔκβάλλων δαιμόνιον κωφόν (Lu. 11:14). In Ac. 19:36, δέον ἐστὶν ὑμᾶς κατεσταλένους ὑπάρχειν, we have two examples of this idiom. Cf. Lu. 13:11. Sometimes we find the periphrastic participle alone without the copula as in ἔξων (Ac. 2:29), εἰ δέον (1 Pet. 1:6). But note ἔξων ἦν (Mt. 12:4) and δέον ἐστίν (Ac. 19:36). So πρέπον ἐστίν (Mt. 3:15). Particularly interesting is εἰς ἵνα γεγονότες (Heb. 7:23). The periphrastic participle, as already noted, was far more common in the N. T. and the LXX than in the older Greek. But the reverse is true of certain verbs frequently so used in the Attic. Radermacher thinks that the commonness of the periphrastic participle in the N. T. is due to the rhetorical tendency. [Page 1120] This might apply to Hebrews, but surely not to the Synoptic Gospels and Acts. Moulton (Prol., p. 226) admits that the Semitic sources of part of the Gospels and Acts account for the frequency of the periphrastic imperf. (cf. Aramaic). Certainly the LXX is far ahead of the classic Greek and of the κοινή in general. The papyri (Moulton, Prol., p. 226) show it often in fut. perfects and in past perfects. Schmid (Attic., III, p. 113 f.) finds it rare in literary κοινὴ save in fut. perfects. Moulton finds periphr. imperf. in Matthew 3 times, Mark 16, Luke 30, John 10, Acts (1–12) 17, Acts (13–28) 7, Paul 3. And even some of these examples are more adjectival than periphrastic. Cf. Ph. 2:26. See p. 888.

(β) A Diminution of the Complementary Participle. This decrease is due partly to the infinitive as with ἄρχομαι, δοκέω. See discussion in this chapter on Relation between the Inf. and the Participle. But it is due also to the disappearance of the personal construction and the growth of the impersonal with οὗτι or ἵνα. In Mk. 2:1, εἰσελθὼν πάλιν εἰς Καφαρναοῦμι ὁ ήμερῶν ἥκοισθη ὅτι ἐν οἴκῳ ἔστιν, the personal construction is retained even with the circumstantial participle. Cf. also 2 Cor. 3:3, φανεροῦμενοι ὅτι ἐστὶ Εἰπιστολὴ Χριστοῦ. But it is vanishing with the verbs where it was once so common. See under Infinitive, 5, (e), for further remarks.

Jannaris¹ has made a careful study of the facts in the later Greek. It may be noted that ὀχύρωμαι does not occur at all in the N. T., though the LXX (and Apocrypha) has it 24 times, twice with the inf. It disappeared from the vernacular. As to τυγχάνω it occurred only once with the participle (2 Macc. 3:9). It has the inf. as well as ἵνα (νά) in the later Greek, though it is very abundant with the participle in the papyri.² Cf. τυγχάνει Νεῖλος Ρέδων, P. B. M. 84 (ii/ii A.D.). But τυγχάνω φίλος without ὄν occurs also in the κοινή (Radermacher, N. T. Gr., p. 169). Curiously enough λανθάνω appears once with the participle in the LXX (Tob. 12:13) as in the N. T. (Heb. 13:2). In the κοινή the inf. supplants the part. as it had already gained a foothold in the old Greek.³ Note also the adverb as in λάθρᾳ ἐκβάλλουσιν (Ac. 16:37). Φθάνω continued in use through the κοινή, but with the sense of ‘arrive,’ ‘reach,’ not the idiomatic one ‘arrive before.’ This latter notion appears in προφθάνω (cf. προλαμβάνω), which has it once only in the N. T. (Mt. 17:25), while the inf. is seen in προέλαβεν μνήμην (Mk. 14:8). As early as Thucydides the inf. is found with φθάνω, and see also 1 Ki. 12:18. It is common in the κοινή.⁴ The tendency to reverse the construction by using one of these verbs in the participial form is seen in τυχόν (participial adverb) in 1 Cor. 16:6. It is possible that φαίνομαι still shows the participial construction in Mt. 6:16, 18, but not in Ro. 7:13, where the participle is circumstantial, not complementary. The impersonal construction gains¹ on the personal in the κοινή. In the N. T. we no longer have δῆλος ἐλήμενοι φανερός ἐλήμενοι. But we do have εὑρέθη ἐχούσα in Mt. 1:18. Ἀρχομαι has lost the part. in the N. T., but ὑπάρχω holds on to it, but not in the sense of ‘begin,’ rather of ‘existing.’ Cf. both adjective and part. in Jas. 2:15 and 1 Tim. 4:3. It tends to sink into the level of ἐλήμενοι as an auxiliary verb with the periphrastic participle, as in Ac. 8:16; 19:36. The same thing is true of προῆλαβαν in Ac. 8:16; but not in Ac. 8:9 where μαζέυον is circumstantial. We have seen that παύομαι is true to the part. (cf. Lu. 5:4; Ac. 5:42, etc.) and that the part. occurs also with ἔκπεμμενοι (Jo. 8:7), τελέω (Mt. 11:1), and that διατελέω has the adj. without ὄν (Ac. 27:33). Cf. also διαδέλεπτοι in Lu. 7:45. See also the part. with ἔγκακεο in Gal. 6:9; 2 Th. 3:13. The part. with κατερέω in Heb. 11:27 is circumstantial, as is that with ἄνέχομαι in 1 Cor. 4:12 and with κάμινοι in Heb. 12:3. The doubtful participle with μανθάνω in 1 Tim. 5:13 has already been discussed (Relation between Inf. and Part., 3, (d)). Moulton² is positive that the absolute construction advocated by Weiss is intolerable and that we must either admit the supplementary participle here or

---

1 Hist. Gk. Gr., p. 493.
2 Moulton, Prol., p. 228.
4 Ib., p. 494.
1 Ib.
2 Prol., p. 229.
boldly insert ἐναὶ with Blass. Moulton is probably right in opposing the incorrectness of the part. with εὐ πράσσω in Ac. 15:29, ἐξ ὦν διατηροῦντες ἑαυτοὺς εὐ πράζετε. At bottom this is the same idiom as we have in 10:33, καλῶς ἑποίησες παραγενόμενος. Cf. also Ph. 4:14; 2 Pet. 1:19; 3 Jo. 6. Blass is right in including here τί ποιήτε κλαίοντες (Ac. 21:13), ἥμαρτον παραδοῦς (Mt. 27:4).

(γ) Verbs of Emotion. As a matter of fact it is not beyond controversy that the part. with these verbs of emotion is the supplementary and not the circumstantial participle. At any rate the idiom comes to the border-line between the two constructions. I do not wish to labour the point and so treat the construction as complementary. The connection is not, however, so close with these verbs as is true of those in the two preceding lists. Indeed, the connection varies with different verbs and with the same verb in different contexts. It seems clear enough in Ac. 16:34, ἠγαλλιάσατο πεπιστευκώς, and in 2 Pet. 2:10, οὐ τρέμοντες βλασφημοῦντες. The examples with ἄγανακτέω (Mt. 21:15, etc.) and χαίρω (Mt. 2:10, etc.) all seem to be circumstantial. The same thing is true of ἄγανακτέω. The participle does not occur in the N. T. with ἀσχόνομαι. The step over to the circumstantial participle of manner or cause is not very far to take.

(δ) Indirect Discourse. This participle is clearly supplementary and in the N. T. is usually connected with the object of the principal verb. The nom.3 of the part. ἔχουσα appears with the passive εὑρέθη in Mt. 1:18 as noted above. The active in the N. T. would have had ὁτί and the ind., if the reference was to Mary. The classic Greek could have said εὗρεν ἔχουσα, but the N. T. Greek, εὗρεν ὁτί ἔχει. Cf. also εὗρεθείς ὡς ὁνθρόπος in Ph. 2:8. But 1 Tim. 5:13 has to be noted. This subject was treated in detail under Indirect Discourse (see Modes). See that discussion for details about the different verbs, some of which, besides the participial construction, may instead use the inf. or ὁτί and the indicative. Here it is sufficient to give enough illustrations of this participle in indirect discourse with verbs of mental action to show the real complementary nature of the participle. The tense, of course, represents the tense of the direct. With most of these verbs (especially ὡς ἄνθρωπος, μανθάνοι, ὠμολογοῦσε) the participle is giving way to the inf. or ὁτί, but still the idiom is common enough to attract notice in all parts of the N. T. Cf. γείνωσκε σαυτὸν ἐξοντα, P. B. M. 356 (i/A.D.). It is common to explain this participle as the object of the principal verb after the analogy of the inf. in indirect discourse. So Jannaris calls it “the objective participle” and Burton “the substantive participle as object.” Blass more correctly perceives that it is the substantive or pronoun that is the object while the participle is a

3 Ib., p. 228 f.
4 Gr. of N. T. Gk., p. 245.
1 Blass, Gr. of N. T. Gk., p. 245.
2 Jann., Hist. Gk. Gr., p. 495.
3 Blass, ib., p. 247.
4 The pap. show the same tendency. Cf. Moulton, Prol., p. 229. See Radermacher, N. T. Gr., p. 169.
6 N. T. M. and T., p. 176.
7 Gr. of N. T. Gk., p. 246.
predicate adjective agreeing with this object. It is easy to see this point where no indirect discourse occurs, as in Heb. 7:24, ἀπαράβατον ἔχει tίν ἐρωτάσθην, where ἔχει does not mean to ‘opine’ and where the verbal adj. occurs. But see the participle in 5:14, τῶν τὰ ἀξιοθήτηρα γεγυμνασμένα ἔχοντων, or, still better, Lu. 14:18, ἔχει με παρητημένον, where ἔχει means ‘consider’ and we have the participle. [Page 1123] Cf. Mk. 3:1; Ac. 9:21, ἀνα δεδεμένους αὐτούς ἁγάγῃ. See also 24:27. Then note Ph. 2:3, ἀλλάληλος Ἱγοῦμένου ὑπερέχοντας. The addition of ὡς does not change the real construction as in τοὺς λογιζομένους ἠμᾶς ὡς κατὰ σάρκα περιπατοῦντας, 2 Cor. 10:2; ὡς ἔχοντον ἡμεῖς θεότητος, 2 Th. 3:15. In principle it is the double accusative, too common with some verbs, only the second acc. is a predicate adj., not a substantive. Cf. Ro. 10:9 (margin of W. H.), ἐὰν ὤμολογήσῃς κύριον Ἰησοῦν, and 2 Jo. 7, ὄμολογοῦντες Ἰησοῦν Χριστὸν ἔρχομεν ἐν σαρκί. The presence or absence of the copula does not materially change the construction when an adj. or substantive is the second acc. Thus note 2 Cor. 8:22, ὃν ἐσκεμπάσμας σπουδαίον ἄνω, and Mk. 6:20, εἴδος αὐτῶν ἄνδρα δίκαιον. So we have no part. after ἔδωκαν in Jo. 1:50; Mt. 25:37, 38, 39; Ac. 8:23; 17:16. Blass calls this an “ellipse” of the participle, an idiom common in classical Greek. It is hardly necessary to appeal to the “ellipse” to explain it. The predicate force of ἄνω comes out well in Ac. 8:23. If no substantive or adjective is used, the participle is itself the full predicate and represents the predicate of the direct discourse. Cf. Mk. 12:28 ἄκοιώσας αὐτῶν συνζητοῦντων, (Lu. 8:46) ἔγνων δύναμιν ἔξεληλυθοῦσιν ὑπὸ ἔμοι. The point to note is that even here in indirect discourse, where the participle represents the verb of the direct, the participle is still an adjective though the verbal force has become prominent. The examples are too numerous to discuss in detail or even to quote in full. As representative examples see Mt. 16:28 after ἔδωκαν (Ἐρχόμενον, but Mk. 9:1 has Ἐληλυθότας), Mk. 5:30 after ἐπηγνώσκω, 7:30 after ἑλύρισκο (cf. also Lu. 23:2), Lu. 10:18 after θεωρέω (cf. in particular Ac. 7:56), Jo. 1:38 after θέαμοι, 7:32 after ἄκοιω, Ac. 19:35 after γινώσκω, 24:10 after ἐπιστάμαι, Heb. 2:9 after βλέπω, Heb. 13:23 after γινώσκω, 2 Cor. 8:22 after δοκιμάζω, Ph. 2:3 after ἡγεῖσαι, 2 Jo. 7 after ὄμολογεῖ. The punctiliar idea is present as in πεσόντα in Lu. 10:18, or the linear as in Ἐγγίζουσαν (Heb. 10:25), or the perfected state as in πεπικράτα (Rev. 9:1). Cf. also Ac. 2:11; 24:18; Mk. 9:38; 1 Jo. 4:2. Burton explains as “the substantive participle” (see 4, (d)) also Jo. 4:39, τῆς γυναικὸς μαρτυροῦσης, and Heb. 8:9, ἐν ἡμέρᾳ ἐπιλαβομένου μου. The first example is really the attributive participle like τοῦ προφήτου λέγοντος (Mt. 21:4). The second example is more difficult, but it is a quotation from the LXX (Jer. 31:32) and is not therefore a model of Greek. The μου has to be taken with ἡμέρᾳ and the [Page 1124] participle would be a circumstantial temporal use. It is probably suggested by the original Hebrew, as Moulton (ProL., p. 47) admits. Cf. Barn. 2:28, ἐν ἡμέρᾳ ἐντευλαμένου σου αὐτῷ. Cf. ἐπὶ παροῦσιν ὑμᾶς, B. G. U. 287 (A.D. 250). The reference of Burton to Josephus, Ant. 10, 4, 2, does not justify the interpretation which he gives.

(c) The Circumstantial Participle or Participial Clauses.

---

2 Gr. of N. T. Gk., p. 246.
3 N. T. M. and T., p. 176.
(a) The General Theory. There is but one difference between the supplementary and the circumstantial participle. It lies in the fact that the circumstantial participle is an additional statement and does not form an essential part of the verbal notion of the principal verb. The circumstantial participle may be removed and the sentence will not bleed. It is still a true participle, predicate adjective as well as circumstantial addition to the verb. In point of agreement the circumstantial may be related to the subject of the principal verb or the object, or indeed any other substantive or pronoun in the sentence. It may have also an independent construction with a substantive or pronoun of its own (genitive or accusative absolute) or have no substantive or pronoun at all. Once again the participle may be so independent as to form a sentence of its own and not merely be a subordinate clause. See the section on The Independent Participle as a Sentence. Here we are dealing with the independent participle in a subordinate clause with various stages of independency from mere addition and agreement with a substantive or pronoun to complete isolation though still subordinate. Some of the grammars, Burton¹ for instance, call this the “adverbial” participle. There is a slight element of truth here, but only so far as there is a sort of parallel with the subordinate conjunctional clauses which are adverbial (cf. ὅτε, ἵνα, ὡς, etc.). But it is distinctly misleading to treat this participle as adverbial. In fact, there is a constant tendency to read into this circumstantial participle more than is there. In itself, it must be distinctly noted, the participle does not express time, manner, cause, purpose, condition or concession. These ideas are not² in the participle, but are merely suggested by the context, if at all, or occasionally by a particle like ἔρριμα, εὑρότερα, καταγραφή, ποτέ, νῦν, ὡς. There is no necessity for one to use the circumstantial participle. If he wishes a more precise note of time, cause, condition, purpose, etc., the various subordinate clauses (and the infinitive) are at his command, besides the co-ordinate clauses. The vernacular increasingly preferred the co-ordinate or the subordinate clause with conjunctions to the rather loose circumstantial participle.¹ We see the triumph of this analytic tendency in the modern Greek.² But it remains true that the participial clause was one of the great resources of the Greek language and in contrast the Latin seems very poor.³ The English comes next to the Greek in its rich use of the circumstantial participle. Moulton⁴ notes the failure of the English, even with the help of auxiliary verbs, to express the precise difference between λύσας and λελυκώς (ὁ λαβών and ὁ εἰληφώς, for instance, in Mt. 25:18, 24). He rightly also calls attention to the weakness of the Greek because of its wealth of participles, since so much ambiguity is possible. Does a given circumstantial participle bear the notion of ‘because’ or ‘although’? Only the context can tell, and men do not always interpret the context correctly. One more remark is necessary. By means of the circumstantial participle the sentence may be lengthened indefinitely. Good illustrations of this freedom may be seen in the periodic structure in Thucydides, Isocrates, Lysias and Demosthenes. But the N. T. itself has examples of it as is seen in 2 Pet. 2:12–15, βλασφημοῦντες, ἀδικοῦμενοι, ἠγούμενοι, ἐντρυφῶντες.

² Blass, Gr. of N. T. Gk., p. 247.
⁴ Jebb, in V. and D., p. 333.
⁵ Moulton, Prol., p. 229.
(β) Varieties of the Circumstantial Participle. Here are treated only those examples which have syntactical agreement in case with some substantive or pronoun in the sentence. It may be repeated that this participle does not express the ideas called by the usual classification into participles of time, manner (means), cause, purpose, condition, concession. Hence it is proper to group the examples together. The classification is only justified by the context and occasional use of a particle. The same classification is possible also for the absolute use of the participial clause. The examples are too numerous for exhaustive treatment. A few must suffice.

Time. It is not the tense that is here under discussion, though naturally the different tenses will vary in the way that time is treated (antecedent, simultaneous, future), as already shown. The point more exactly is whether a given circumstantial participle occurs in a context where the temporal relation is the main one rather than that of cause, condition, purpose, etc. It is usually a mistake to try to reproduce such participles by the English ‘when,’ ‘after,’ etc., with the indicative. To do this exaggerates the nuance of time as Moulton observes. It is generally sufficient to preserve the English participle or to co-ordinate the clauses with ‘and.’ The slightness of the temporal idea is well seen in the pleonastic participles ἀναστάς (Mt. 26:62), ἀποκριθεῖς (Mt. 3:15, very common in the Synoptic Gospels. John usually has ἀπεκρίθη καὶ ἐπεξεργάσατο αὐτοῦς καθεξῆς, the part. is slightly pleonastic, but note contrast with καθεξῆς as with ἦς τῶν πρῶτων in Mt. 20:8. Cf. ἔρχομενος, ἐρχόμενος in Luke: 19:11. The use of ἔρχομενος as a note of time is seen in Mt. 20:8 f.; Lu. 23:5; 24:47; Ac. 1:22. In Ac. 11:4, ἔρχομενος Πέτρος ἠποκριθείς αὐτοῦς καθεξῆς, the part. is slightly pleonastic, but very slightly so. Cf. also προσθε ἐπεξεργάσατο in Lu. 21:26. Here the notion is temporal, but very slightly so. Cf. also προσθε ἐπεξεργάσατο in the sentence. It may be repeated that this participle does not express the ideas called by the usual classification into participles of time, manner (means), cause, purpose, condition, concession. Hence it is proper to group the examples together. The classification is only justified by the context and occasional use of a particle. The same classification is possible also for the absolute use of the participial clause. The examples are too numerous for exhaustive treatment. A few must suffice.

5 Certainly we cannot admit the idea that the part. itself has different meanings. Cf. Paul, Prin. of the Hist. of Lang., p. 158.
1 Prol., p. 230.
2 Blass, Gr. of N. T. Gk., p. 249.
3 Ib., p. 248.
always easy to [Page 1127] discriminate between the temporal participle and that of attendant circumstance or manner. Moulton¹ and Blass² make no distinction. These two uses are the most frequent of all. A good example of this ambiguity occurs in Ac. 21:32, where παραλαβόν (cf. λαβόν in ancient Greek) may be regarded as merely the attendant circumstance. So also the notion of occasion wavers between time and cause. Cf. ἵκονοντες (Lu. 4:28). For ὦς with this participle see 1 Cor. 7:29 ff.

**Manner.** The ancient use of ἔξον in the sense of ‘with’ occurs in Mt. 15:30 ἔξοντες μεθ’ ἐαυτῶν χωλούς, Mk. 14:3 ἔχουσα ἠλάβαστρον μύρου, Ac. 21:23 εὐχήν ἔξοντες ἄρν ἐαυτῶν. Cf. also φέρον in Jo. 19:39. In Jo. 18:3 we have λαβόν used in practically the same sense as μετά in Mt. 26:47. Cf. also λαβόν in Mt. 25:1. In Lu. 1:64, ἔλαλει εὐλογῶν, the part. is one of manner, as in Mt. 19:22 ἀπῆλθεν λυποῦμενος, (Mk. 1:22) ὦς ἔξουσίαν ἔχον, where ὦς makes the point plainer, (1:4) κηρύσσων, where the participle is not the periphrastic construction with ἔγεντο, (1:5) ἔξομολογοῦμενοι, (Ac. 3:5) ἔπειξεν αὐτοίς προσδοκόν τι (a picturesquie bit of description), (2 Th. 3:11) μὴ δὲν ἔργαζομένους ἄλλοι περιεργαζομένους (a real pun). It is hard to tell how to classify a participle like that in Gal. 6:3, μὴ δὲν ἔνει. It makes sense as temporal, causal or modal. But there is no doubt in a case like Lu. 19:48 ἔξεκρέμετο αὐτοῦ ἵκονον or Ac. 2:13 διαχλεάζοντες ἔλεγον or ὦς ὦκ ἁβρα ᾱδρον (1 Cor. 9:26). This notion of manner appears in the participles that have an adverbial notion like σπεύσας (Lu. 19:5 f.), ἔπιβαλον (Mk. 14:72), τυχόν (1 Cor. 16:6), βλέποντες (Mt. 13:14); προσθείς ἔπεν (Lu. 19:11). Cf. also ἀναβλέψας ἔπεν in verse 5. So also the pleonastic participles like ἰποκριθείς (see above) may be looked at either as temporal or modal or even adverbial. See further κρεμάσαντες (Ac. 5:30), συμββάζουν (9:22) as good examples of the modal participle. Burton¹ makes a separate division for the participle “of attendant circumstance,” but this is not necessary and leads to overrefinement. These examples are either temporal as in ἐξελθόντες (Mk. 16:20), ἐκλεξαμένους (Ac. 15:22) or modal as δοξαζόμενος (Lu. 4:15), ἀναλαβόν (2 Tim. 4:1) or pleonastic as ἰποκρίθησαν λέγουσα (Mt. 25:9). Blass’ term “conjunctive” (Gr. of N. T. Gk., p. 249) throws no particular light on the point. In 1 Tim. 1:13 ἀγνοοῦν is manner. In Ac. 18:18, [Page 1128] κεραύμονος, we have in truth both the temporal and the modal. But it is easy to split hairs over the various circumstantial participles and to read into them much more than is there. Cf. 2 Cor. 4:1 f. See βαπτίζοντες and διδάσκοντες in Mt. 28:19 f. as modal participles. So ἀγνοοῦν in 1 Tim. 1:13. Cf. κατὰ ἀγαθοίν in Ac. 3:17.

**Means.** It is usual¹ to distinguish means from manner in the participle. There is a real point, but it is not always clear where manner shades off into means. But some instances are clear. Cf. Mt. 6:27, τίς μεριμνών δύναται προσθείναι; So also μαντευομένη in Ac. 16:16. Thus the maid furnished the revenue for her masters. In Heb. 2:10 ἄγαγόντα and 2:18 περασθείς we may also have instances of this notion.

¹ Prol., p. 230.
² Gr. of N. T. Gk., p. 248.
³ N. T. M. and T., p. 173. Cucuel and Riemann (Règles Fondamentales de la Synt. Grecque, 1888, p. 110) consider this notion an “exception,” but it is not necessary to do that.
¹ Goodwin, M. and T., p. 333.
but the first may be temporal and the second causal. Jannaris\(^2\) blends the treatment of manner and means and notes how this participle disappears in the later Greek.

**Cause.** The ground of action in the principal verb may be suggested by the participle. Cf. δίκαιος ὃν καὶ μὴ θέλων αὐτὴν δειγματίσαι ἔβουλήθη, Mt. 1:19; ἡμαρτον παραδόος αἴμα, 27:4; ἔχαρησαν ἰδόντες, Jo. 20:20. As a matter of fact this idiom is very frequent. Cf. further Mt. 2:3, 10; Jo. 4:45; 21:12; Ac. 4:21; 9:26; 24:22, εὐδόχος—ἐπασκ., Ro. 6:6, γνώσκοντες, and 9, εἰδότες; 2 Pet. 3:9; Col. 1:3 f.; 1 Tim. 4:8; Jas. 2:25. For ὃς with this participle see 1 Cor. 7:25, ὃς ἠλεημένος. In Ac. 24:22 εἰδός may be taken as ‘wishing to know,’ though Felix may also have actually had some knowledge of Christianity (cf. Paul’s appearance before Gallio). So also αἰσθένος (24:22) may mean ‘wishing to know.’ The N. T. no longer has ἅτε, οἷον, οἷα with the part. as classic Greek did.\(^3\) In Jo. 5:44 a causal participle λαμβάνοντες is co-ordinate with ζητήτε.

**Purpose.** The use of the participle to express aim or design has already been discussed several times from different points of view (Tense, Final Clauses, Tense of the Participle). This fine classic idiom is nearly gone in the N. T. Purpose is expressed chiefly by ἵνα or the inf. For the future part. of purpose see Mt. 27:49; Ac. 8:27; 22:5; 24:11, 17. In Heb. 13:17, ὃς ἀποδόσοντες, there is as much cause as purpose. Blass\(^4\) wrongly accepts ἀσπασόμενοι in Ac. 25:13. The present part. is also used in the sense of purpose where the context makes it clear. So Ac. 3:26, ἀπέστειλεν αὐτὸν εὐλογοῦντα. Cf. Lu. 13:6 f.; Ac. 15:27; \[Page 1129\] Ro. 15:25. But it is not absent from the papyri. Cf. P. Goodsp. 4 (ii/B.C.) ἄπεστάλκα—κοινολογήσομεν σοι. So also the present part., P. Oxy. 275 (A.D. 66), διακονοῦτα καὶ ποιοῦντα.

**Condition.** The use of the conditional disappeared more rapidly than the temporal and causal in the later Greek.\(^1\) It is only the protasis, of course, which is here considered. It is still a common idiom in the N. T. In Mt. 16:26 we have ἐὰν τὸν κόσμον ὅλον κερδήσῃ, while in Lu. 9:25, we find κερδήσας τὸν κόσμον ὅλον. Here it is the condition of the third class plainly enough. See ποιήσας ἔσῃ, κτλ., in B. G. U. 596 (A.D. 84). In 1 Cor. 11:29, μὴ διακρίνων, it may be the first class condition with ei that is the equivalent, but one cannot always be certain on this point. Cf. Ro. 2:27, τελέσας; Gal. 6:9, μὴ ἐκλύομενοι; 1 Tim. 4:4, λαμβανόμενον; Heb. 2:3, ἐμελήσαντες; 7:12, μετατηθεμένης. Moulton\(^2\) denies that the participle stands in the N. T. for a condition of the second class (unreal condition). In Lu. 19:23, καὶ ἔλοθων σὺν τόκῳ ἄν αὐτὸ ἔπραξα, the participle is part of the apodosis, while the condition is implied in the preceding question. Moulton\(^3\) rightly notes that one can no longer decide by the presence of μὴ with the participle that it is conditional or concessive, since μὴ has come in the κοινή to be the usual negative of participles. There is no instance of ἄν with the participle in the N. T., though Moulton (Prol., p. 167) quotes

2 Prol., p. 230.
3 Ib., p. 229.
one in a κοινή inscr., I. M. A. iii, 174, δικαίωτερον ὃν σωθέντα (in a despatch of Augustus). For ὃς ὑν see Particles with Participles.

Concession. This is also a frequent construction. Cf. Mt. 14:9, λαπηθείς. The context calls for the adversative idea in 7:11, πονηρῶ ιὸντες. See further Mt. 26:60; 14:5; Mk. 4:31; Jo. 12:37; 21:11; Jas. 3:4; Ac. 13:28; Ro. 1:21, 32; 9:22; 1 Cor. 9:19; Jude 5. To avoid ambiguity the Greek often used particles to make the concessive idea plain, and this idiom survives in the N. T. Cf. καί γε—ὑπάρχοντα (Ac. 17:27), καὶ τοῦ γενηθέντον (Heb. 4:3), καίτερ more frequently as in Ph. 3:4; Heb. 5:8; 7:5; 12:17; 2 Pet. 1:12. In Heb. 11:12 we also have καὶ ταῦτα νενεκρω ”(Ac. 17:27), καὶ τοῖς γενηθέντων (Heb. 4:3), καίπερ more frequently as in Ph. 3:4; Heb. 5:8; 7:5; 12:17; 2 Pet. 1:12. It is worth while to note the survival of οὐ with καί γε in Ac. 14:17. It is but a step further than the ordinary circumstantial participle which makes an additional statement. All the varieties of the circumstantial particle can appear in the absolute participle.

Nominative Absolute. It is possible thus to explain some examples of anacolutha in ancient Greek and the N. T., though Blass demurs. Cf. ὅ πιστεύων εἰς ἔμει—ποταμοὶ ἐκ τῆς κοιλίας αὐτοῦ ἤρθοσουσιν (Jo. 7:38); ἐπιγνόντες, δὲ—φωνή ἐγένετο μία ἐκ πάντων (Ac. 19:34); ὅ νικὼν δόσαν αὐτῷ (Rev. 3:21). Cf. also τῶν θελόντων and οἱ κατέσθοντες (Mk. 12:40). So Mk. 7:19; Rev. 2:26. At any rate it is the nominativus pendens, and there is not any special difference. In the modern Greek (Thumb, Handb., p. 169) the nominative absolute with the participle occurs, though rare, and usually a conjunctional clause has supplanted the genitive absolute.

Accusative Absolute. This construction was used with impersonal verbs or phrases like δέον, ἔξον, παρόν, etc. It was probably an appositional addition to the sentence.3 It has nearly, if not quite, disappeared from the N. T. The adverb τυχόν (1 Cor. 16:6) is really an instance of it, but not so ἔξον in Ac. 2:29, where ἔπτυσι is probably to be supplied. Cf. ἔξον ὅν (Mt. 12:4) and δέον ἔπτυσι (Ac. 19:36). Cf. also οὗ συμφέρον μὲν in 2 Cor. 12:1. But a possible accusative absolute is γνώστην ὅντα (Ac. 26:3), though it is very rare to see the accusative absolute with a substantive of its own.4 In such instances it was usual to have also ὃς or ὅσπερ.5 The accusative is an old idiom,

5 Thompson, Synt., p. 261.
appearing in the oldest Greek title known to us.⁶ But it came to be rather common in Thucydides.⁷ It was rare in the Attic orators. Luke avoids the accusative absolute in Ac. 23:30, by an awkward⁸ use of the genitive absolute, μηνυθείσης δὲ μοι ἐπιθυμηθησέναι τοῦ ἄνδρα ἑσσεθαί. The papyri use ἔξοντος rather than ἔξον.¹ We do not have the acc. absolute in Ph. 1:7, since ὑμᾶς ὑπάρχοντας is a resumption (apposition) of ὑμᾶς before.

**Genitive Absolute.** It is by no means certain that the case is always genitive. Indeed, it is pretty clear that some of these examples are ablative. Probably some are real genitives of time.² The Sanskrit uses chiefly the locative in these absolute constructions. It is possible that the Latin ablative absolute may sometimes be locative or instrumental.³ The use of the true genitive in the Greek idiom is probably to be attributed to expressions of time in the genitive case with which participles were used. Then the temporal circumstantial participle was right at hand. It is in Attic prose, particularly the orators, that we see the highest development of the idiom.⁴ The accusative absolute was just as idiomatic as this genitive-ablative construction, but it did not get the same hold on the language.⁵ See Cases for further remarks. The κοινή shows a rapid extension of the genitive absolute. “In the papyri it may often be seen forming a string of statements, without a finite verb for several lines.”⁶ In the N. T. different writers vary greatly, John’s Gospel, for instance, having it only one-fourth as often as the Acts.⁷ The most frequent use of the idiom is when the substantive (or pronoun) and the participle stand apart with no syntactical connection with any part of the sentence. Cf. Mk. 4:17, ἀπέκτεινεν τοις πτωχοῖς καὶ δίδαξεν τον λόγον εὐθύς σκανδαλίζοντας; Ac. 12:18, γενομένης δὲ ήμέρας ἡν τάραξος οὐκ ὀλίγος; 18:20; 7:5; Eph. 2:20; Mk. 8:1; 2 Pet. 3:11; Heb. 9:6–8, 15, 19. These are perfectly regular and normal examples. But sometimes the genitive absolute occurs where there is already a genitive in the sentence. So Mt. 6:3, σοῦ δὲ ποιοῦντος—ἡ ἀριστερά σου; Jo. 4:51; Ac. 17:16. In Mk. 14:3 we find a double gen. absolute ὄντος αὐτοῦ—κατακειμένου αὐτοῦ. Even in the classical Greek the genitive absolute is found when the participle could have agreed with some substantive or pronoun in the sentence.⁸ It was done apparently to make the [Page 1132] participial clause more prominent. The papyri show illustrations of the same thing,¹ as in B. U. 1040 (ii/A.D.) χαίρω ὅτι μοι τά ἐποίησας, ἐμοῦ μεταμελομένου περὶ μηδενός. It is fairly common in the N. T. We have it even when the part. refers to the subject of the verb, as in Mt. 1:18, μητρεθείσης τῆς μητρὸς αὐτοῦ Μαρίας—ἐὑρέθη Ἐξούσα. In Ro. 9:1 the

---

construction is regular, though μοι and μου occur. In Mt. 8:1 we find καταβάντος αὐτοῦ — ἡκολούθησαν αὐτῷ. Cf. 5:1; 9:18; 17:22; 2 Cor. 4:18, etc. Likewise the genitive and the accusative come together as in Jo. 8:30, αὐτοῦ λαλοῦντος — ἐπίστευσαν εἰς αὐτόν. Cf. also Mt. 18:25; Ac. 28:17. Quite unusual is Ac. 22:17 where we have μου ὑποστρέψαν, προσευχομένου μου and γενέσθαι με. The N. T. occasionally uses the participle alone in the genitive absolute according to the occasional classic usage. In the papyri it is more frequent than in the N. T. In particular note the common ἐξόντος, P. Oxy. 275 (A.D. 66). Cf. also δηλωθέντος, B. G. U. 970 (ii/A.D.). See Mt. 17:14, ἐλθόντων; 17:26, ἐπίστευσαν εἰς αὐτῷ. In Lu. 12:36, ἔλθόντων καὶ κρούσαντος εὐθέως ἰεροῖς αὐτῷ, we have the genitive participle although αὐτῷ is present. Cf. B. G. U. 423 (ii/A.D.) ὅτι μου κινδυνεύσαντος εἰς θάλασσαν ἔσωσε, where μου the object of ἔσωσε is not expressed.

(f) The Independent Participle in a Sentence. There is no doubt that the use of the absolute participle (nominative, accusative, genitive-ABLATIVE) is a sort of “implied predication.” It remains to be considered whether the participle ever forms an independent sentence. We have seen that the inf. is occasionally so used. It is but a step from the independent clause to the independent sentence. Did the participle take it? The nominative absolute as a sort of anacoluthon appears in the ancient Greek. Cf. Plato, Apol. 21 C, καὶ διαλεγόμενος αὐτῷ, ἔδοξέ μοι ὁ ἄνθρωπος ἀνόητος. As the genitive-absolute, like other circumstantial participles, retreated before the conjunctival clauses, there was an increasing tendency to blur or neglect the grammatical case agreements in the use of the participles. The N. T., like the κοινή in general, shows more examples of the anacoluthic nominative participle than the older Greek. The mental strain of so many participles in rapid conversation or writing made anacolutha [Page 1133] easy. “Hence even writers of systematic training could not but occasionally blunder in the use of the circumstantial participle.” Jannaris had thus concluded that the late Greek showed an independent use of the participle as anacoluthon. Blass would go no further than this. Viteau found abundant illustration of the independent use of the anacoluthic participle in the LXX. Viteau explains it as a Hebraism. But Moulton claims that the subject is removed from the realm of controversy by the proof from the papyri. Thumb finds the idiom in classical Greek and in the κοινή (in the LXX, N. T., papyri, inscriptions, etc.). It is easy to be extreme on this point of dispute. In the chapter on Mode (the Imperative) adequate discussion appears concerning the participle as imperative. That discussion need not be repeated. It may be insisted, however, again that the participle in itself is never imperative nor indicative, though there seem to be examples in the N. T., as in the papyri, where, because of ellipsis or anacoluthon, the participle carries on the

---

3 Moulton, Prol., p. 74. This idiom is common in Xen. Roche, Beitr., p. 128.

6 Hellen., p. 131.
work of either the indicative or the imperative. In examples like 2 Cor. 1:3, εὐλογητὸς ὁ θεός, either ἐστίν or ἔστω may be supplied with the verbal adjective. It must not be forgotten that this is the work of the interpreter to a large extent rather than of the grammarian. The manuscripts often vary in such examples and the editors differ in the punctuation. But the grammarian must admit the facts of usage. The manuscripts are often used to carry on the verbal function in independent sentences. Cf. ἀποστυγόντες τὸ πονηρόν, κολλώμενοι τῷ ἄγαθῷ (Ro. 12:9), for instance, where we have a complete sentence without connection with anything else. The preceding sentence is ἡ ἀγάπη ἄνωπόκριτος (an independent sentence itself) and it is followed by a series of independent participles (verses 10–13). In verse 14 we have abruptly εὐλογεῖτε—καὶ μὴ καταρθῆ (imperatives) and then the absolute infinitive χαίρε (imperativally also). The point seems to be incontrovertible. Cf. also Col. 3:16. It is only necessary to add a word about the independent participle in the midst of indicatives, since this use is far more frequent than the imperative idiom just noted. In general it may be said that no participle should be explained in this way that can properly be connected with a finite verb. In Ro. 12:6, ἔχοντες δὲ, it is clear that we cannot carry on the participle as subordinate to ἔχομεν or ἔσομεν in the preceding verses. W. H. boldly start a new sentence. In either case, whether we have comma or period before, we must take ἔχοντες as imperatival or indicative, on the one hand, or, on the other hand, supply ἔσομεν or ἔσον as ποιεῖτε is supplied in Ro. 13:11 with καὶ εἰλὸτες τὸν καρόν. But other examples leave no such alternative. We may first summarize Moulton’s satisfactory exposition of the matter. There is a striking similarity between the third person plural indicative and the participle in the Indo-Germanic tongues (*bheronti, ferunt, φέρουσι, bairand, etc.). The frequent ellipsis of est in the Latin perfect and passive is to be noted also. The probability that the Latin second plural middle indicative is really a participle which has been incorporated into the verb inflection (cf. sequimini and ἐπόμενοι) is also suggestive. This fact may point to the prehistoric time when the Latin used the participle as indicative. The papyri re-enforce the argument strongly. We quote a bit from Moulton: “Ṭb. P. 14 (ii/B.C.), τῷ οὖν σημαινομένου Ἡρώτι παρηγγελκότες ἔνύπισον, ‘I gave notice in person’ (no verb follows). Ṭb. P. 42 (ib.), ἧδικημένος (no verb follows). A. P. 78 (ii/A.D.), βίαν πάσχων ἔξαιτοτε, etc. (no verb).” This may serve as a sample of many more like it. Moulton (Prol., p. 223) adds that use of the part. as ind. or imper. in the papyri is “not at all a mark of inferior education.” See 1 Pet. 2:12 where ἔχοντες does not agree with the παροίκους. We may now approach the passages in dispute between Winer and

7 Moulton, Prol., p. 180, cites Meisterh., pp. 244–246, for the use of the imp. part. in decrees. It is the nominativus pendens applied to the part.
1 Moulton, Prol., pp. 180, 183 f.

Winer

WINER, G. B., De verborum cum praep. compos. in N. T. Usu (1834–1843).
3 W.-Th., p. 351 f.
Moulton. Moulton passes by Winer’s suggestion that in 2 Cor. 4:13 ἔχοντες is to be taken with πιστεύομεν. This is probable, though awkward. So in 2 Pet. 2:1 the participles can be joined with παρεισάξουμεν. But in Ro. 5:11 it is, Moulton argues, somewhat forced to take οὐ μόνον δὲ, ἄλλῳ καὶ καυχόμενοι otherwise than as independent. If we once admit the fact of this idiom, as we have done, this is certainly the most natural way to take it here. Moulton is silent as to στελλόμενοι in 2 Cor. 8:20. Winer connects it with συνεπέψαμεν in verse 18 and he is supported by the punctuation of verse 19 as a parenthesis by W. H. But even so in verse 19 we have οὐ μόνον δὲ ἄλλῳ καὶ χειροτονηθεῖς (cf. Ro. 5:11) stranded with no verb. Moulton also passes by Heb. 6:8 and 2 Pet. 3:5. In Heb. 7:1 Moulton follows W. H. in reading ὅ (not [Page 1135] ὅς) συναντήσας on the authority of C*LP against ΑΒCD2EK 17. So he sees no necessity for taking ἔρμηνευόμενος as an indicative. In Heb. 8:10; 10:16, Moulton takes διδοὺς as parallel with ἐπιγράψω, whereas Winer would resolve ἐπιγράψω into a participle. Here Moulton is clearly right. In Ac. 24:5, εὑρόντες γάρ, we have anaclouthis as both Winer and Moulton agree. Moulton adds: “Luke cruelly reports the orator verbatim.” Moulton omits to comment on Winer’s explanation of the parenthetical anaclouthis in 2 Pet. 1:17, λαβὼν γάρ. It is a violent anaclouthis and Winer does not mend it. Note 2 Cor. 5:6, θαρροῦντες, where after a parenthesis we have θαρρούμεν δέ (resumptive). But Moulton takes 2 Cor. 7:5 θλιβόμενοι as an example of the “indicative” participle. So does he explain Ro. 12:6 ἔχοντες, and ἔχων in Rev. 10:2. In Ac. 26:20 the MSS. vary between ἄπαγέλλων and ἄπηγέλλων. In Heb. 10:1 ἔχων will also be independent if δοναντί ai be read. In Ph. 1:30 ἔχοντες has ὑμῖν above and halts in the case agreement. On the whole, therefore, we may conclude that, while every instance is to be examined on its merits, a number of real examples of the idiom may be admitted in the N. T. Viteau1 has entirely too large a list of such instances. Many of them admit a much simpler explanation as in Ph. 1:30 above. In Revelation, it is true, there is more than usual laxity in the agreement of the participle, especially when it is in apposition. There is also a change from nominative to accusative between ἵδον and εἶδον as in Rev. 4:1–5; 7:9; 14:1–3; 14:14, etc. But there are real examples in Rev., as καὶ ἔχων (1:16), λέγων (11:1). With all this development along a special line we must not forget that the participle is both adjective and verb. Blass2 has a careful discussion of “the free use of the participle.” In Col. 1:26 he notes that the participle ἄποκεκρυμμένον is continued by the indicative ἔφανερώθη. Cf. Jo. 5:44.

(g) Co-ordination between Participles. Blass3 uses the term “conjunctive” participle instead of a special use of the “circumstantial” participle. It is not a particularly happy phrase. But it does accent the notion that this participle, though an addition to the principal verb, is still joined to it in grammatical agreement. Blass4 shows clearly how identity of action may be expressed by two finite verbs, as well as by the pleonastic participle of identical action. Cf. Jo. 1:25 καὶ ἠρώτησον αὐτῶν καὶ ἔπαν (Mt. 15:23 ἠρώτουν λέγοντες), 12:44 ἔκραξεν καὶ ἔπεν [Page 1136] (Mt. 8:29

ἔκραξαν λέγοντες), 13:21 ἐμαρτύρησεν καὶ ἐπε (Ac. 13:22 ἐπεν μαρτυρίσας), 18:25 ἦρνηστο καὶ ἐπεν (Mt. 26:70 ἦρνηστο λέγον), where John prefers the particularity of the finite verb. But see also Lu. 6:48, ἔσκαψεν καὶ ἔβαθυνεν, ‘he dug and deepened’=‘he dug deep.’ Cf. Jo. 8:59. There remains the relation of participles to each other when a series of them comes together. There is no rule on this subject beyond what applies to other words. Two or more participles may be connected by καί as in Ac. 3:8, περιπατῶν καὶ ἁλλόμενος καὶ ἀνύν τὸν θεόν. But we have asyndeton1 in Ac. 18:23, διερχόμενος τὴν Γαλατικὴν χώραν, στηρίζων τοὺς μαθητάς. Cf. Lu. 6:38, μέτρων καλῶν πεπεσμένων σεσυλεμένων ὑπερεκχυνόμενων δόσσωσιν.

Sometimes καί occurs only once as in Mk. 5:15, καθήμενον ἵματος καὶ σωφρονύnta. There may be a subtle reason for such a procedure as in Ac. 18:22, κατελθὼν εἰς Καισαριαν. Ἄναβας καὶ ἀσπασάμενος, where the first participle stands apart in sense from the other two. Cf. also Mk. 5:32. In a list of participles one may be subordinate to the other as in Mk. 5:30, ἐπιγνοὺς ἐν έκατοτῇ ὑπερέκχυνεν δόσσωσιν ἐξελθοῦσαν ἐπιστραφείς. This accumulation of participles is only occasional in the Synoptic Gospels (cf. Mt. 14:19; 27:48; and, in particular, Mk. 5:25–27), but very common in Acts and the Pauline Epistles. Blass2 concedes to Luke in Acts “a certain amount of stylistic refinement” in his use of a series of participles, while with Paul it is rather “a mere stringing together of words,” an overstatement as to Paul. Luke was not an artificial rhetorician nor was Paul a mere bungler. When Paul’s heart was all ablaze with passion, as in 2 Corinthians, he did pile up participles like boulders on the mountain-side, a sort of volcanic eruption. Cf. 2 Cor. 3:8–10; 6:9 f.; 9:11 ff. But there is always a path through these participles. Paul would not let himself be caught in a net of mere grammatical niceties. If necessary, he broke the rule and went on (2 Cor. 8:20). But Moulton3 is right in saying that all this is “more a matter of style than of grammar.” It is rhetoric.

(h) OÙ and µή with the Participle. It is worth noting that in Homer4 oÙ is the normal negative of the participle, µή occurring only once, Od. 4. 684, and in an optative sentence of wish. It cannot be claimed that in Homer µή has won its place with the participle. In modern Greek µή alone occurs with the present participle (Thumb, Handb., p. 200). It is generally said that [Page 1137] in classical Attic oÙ is always the negative of the participle unless condition or concession is implied when the negative is µή. But if one looks at all the facts up to 400 B.C. he will go slow before he asserts that µή is proof that the participle shows a conditional or concessive force.1 Jannaris2 claims the rule only for Attic, “though even here oÙ is not rarely replaced by µή,” that is to say, the rule does not apply even in Attic. The use of “replaced” is wholly gratuitous when it is admitted that the rule does not apply outside of Attic. It is so hard to be historical always even in an historical grammar. If one takes the long view, from Homer with its one use of µή to the modern Greek with nothing but µή, he sees a steady progress in the use of µή which gradually ousted oÙ

1 Gr. of N. T. Gk., p. 250.
2 Ib., p. 251.
3 Prol., p. 231.
4 Monro, Hom. Gr., p. 262 f.
altogether. The Attic marks one stage, the κοινή another. It is true that in the Attic there is a sort of correspondence between οὐ and the participle and the indicative with οὐ on the one hand, while, on the other, μὴ and the participle correspond to the subjunctive or the optative with μή. But οὐ occurred in Homer with the subj. and μή persisted with the indicative. The lines crossed and the development was not even, but on the whole μὴ gradually pushed οὐ aside from the participle. In the N. T., as in the κοινή generally, the development has gone quite beyond the Attic. In the Attic the use of οὐ was the more general, while in the κοινή the use of μὴ is normal. In the N. T. there is no need to explain μὴ with the participle. That is what you expect. Cf. Lu. 12:33 μὴ παλαιομένα, Jo. 5:23 ὅ μὴ τιμῶν, Ac. 17:6 μὴ εὐρόντες, Heb. 11:13 μὴ κομιόμενοι. In the N. T. it is οὐ that calls for explanation, not μὴ. But it may be said at once that the N. T. is in thorough accord with the κοινή on this point. Even in a writer of the literary κοινή like Plutarch3 one notes the inroads of μη. The papyri go further than Plutarch, but still have examples of οὐ, like οὐ κεκοιμημένει P. Par. (B.C. 163), τὸν οὖκ ἐν λευκᾷς ἔσθησιν ἐν θεάτρῳ καθίσαντα Ο. P. 471 (ii/a.d.), οὐδέπω πεπληρωκότον O. P. 491 (ii/a.d.), οὗ δυνάμενος A. P. 78 (ii/a.d.).4 Moulton5 thinks that in many of these papyri examples there is “the lingering consciousness that the proper negative of a downright fact is οὐ.” In general it may be said of the κοινή that the presence of οὐ with the participle means that the negative is clear-cut and decisive. Cf. Mt. 22:11 οὐκ ἐνδεδομένον ἐνδόμα γάμου, (Lu. 6:42) οὐ βλέπων, (Jo. 10:12) ὁ μισθωτὸς καὶ οὐκ ἦν ποιμήν, (Ac. 7:5) οὐκ ὄντος αὐτῷ τέκνου, (17:27) καὶ γε οὐ μακρύν—ὑπάρχοντα, (26:22) οὐδὲν ἐκτὸς ἐλέγον, (28:17) οὐδὲν ποιήσας, (1 Cor. 4:14) οὐκ ἐντρέπων, (9:26) ὦ οὐκ ἀδέρα δέρων, (2 Cor. 4:8) ἀλλ. οὐ στενοχωρούμενοι, (Ph. 3:3) καὶ οὐκ ἐν σαρκὶ πεποιθότες, (Col. 2:19) καὶ οὐκ κρατῶν, (Heb. 11:1) πραγμάτων οὐ βλέπομένων, (11:35) οὐ προσδέξαμενοι, (1 Pet. 1:8) οὐκ ἤδοντες, (2:10) οὐκ ἠλευμένοι. In all these we have no special departure from the Attic custom, save that in Ac. 17:27 the participle is concessive. But we have just seen that the Attic was not rigid about οὐ and μὴ with the participle. In two of the examples above οὐ and μὴ come close together and the contrast seems intentional. Thus in Mt. 22:11 we have οὐκ ἐνδεδομένον ἐνδόμα γάμου, while in verse 12 we read μὴ ἔξων ἐνδόμα γάμου. The first instance lays emphasis on the actual situation in the description (the plain fact) while the second instance is the hypothetical argument about it. In 1 Pet. 1:8 we read δὲν οὐκ ἤδοντες ἐγαρνάτε, εἰς δὲν ἔρτι μὴ ὥρωντες πιστεύσατε δὲ ἐγαρνάτε. Here οὐ harmonizes with the tense of ἤδοντες as an actual experience, while μὴ with ὥρωντες is in accord with the concessive idea in contrast with πιστεύσατε. Cf. Hort in loco who holds that the change of particles here is not capricious. “Though Blass thinks it artificial to distinguish, it is hard to believe that any but a slovenly writer would have brought in so rapid a change without a reason.” It may be admitted further that “in Luke, Paul and Hebrews we have also to reckon with the literary consciousness of an educated man, which left some of the old idioms even where μὴ had generally swept them away.” See also τά μὴ καθήκοντα

(Ro. 1:28) and Text. Rec. τῶν οὗ ἀνήκοντα (Eph. 5:4). Cf. μὴ and οὗ in Ac. 9:9. Blass\(^3\) notes that the Hebrew הַיְּתָּם is regularly translated in the LXX by οὗ without any regard to the Greek refinement of meaning between οὗ and μὴ with the participle. Hence in the N. T. quotations from the LXX this peculiarity is to be noted. Moulton\(^4\) observes also that, while this is true, the passages thus quoted happen to be instances where a single word is negatived by οὗ. Cf. Ro. 9:25 ἡν οὓς ἦγαπημένυς, (Gal. 4:27) ἢ οὗκ τίκτουσα, ἢ οὐκ ὁδίνουσα. A case like Ac. 19:11, οὗ τὰς τυχόντας, is, of course, not pertinent. It is a “common vernacular phrase,”\(^5\) besides the fact that οὗ is not the [Page 1139] negative of the participle\(^1\) any more than it is in Ac. 19:11; 28:21. Moulton\(^2\) also rules out οὗκ ἐξόν (2 Cor. 12:4) on the ground that it is the equivalent of the indicative. The copula is not expressed. But note οὗκ ἐξόντος, P. Oxy. 275 (A.D. 66). On this count the showing for οὗ with the participle is not very large in the N. T. Luke has οὗ five times with the participle (Lu. 6:42; Ac. 7:5; 17:27; 26:22; 28:17). Paul leads with a dozen or so (Ro. 9:25; Gal. 4:27 twice; 1 Cor. 4:14; 9:26; 2 Cor. 4:8, 9; Ph. 3:3; Col. 2:19; 1 Th. 2:4). Hebrews has two (11:1, 35) and Peter three (1 Pet. 1:8; 2:10; 2 Pet. 1:16, οὗ—ὦλλα). Matthew has only one (22:11), and note μὴ ἔχον in the next verse. The MSS. vary also between the negatives as in Mt. 22:11, where C\(^3\)D have μὴ which Blass\(^3\) adopts with his whimsical notions of textual criticism. At any rate Matthew, Luke (Gospel) and John use μὴ almost exclusively with the participle, while Mark, James, the Johannine Epistles and Revelation do not have οὗ at all with the participle. In Ro. 8:20, οὐκ ἔκοψα, the old participle is merely an adjective as in Heb. 9:11. In Ro. 9:25, τὸν οὗ λαὸν, the negative occurs with a substantive (quotation from LXX). The ancient Greek would usually have added ὄντα.

(i) Other Particles with the Participle. The ancient Greek\(^4\) had quite a list of adverbs (particles) that were used with the circumstantial participle on occasion to make clearer the precise relation of the participle to the principal verb or substantive. Some of these (like ἄτε, ὥλιον, ὄλα) no longer occur with the part. in the N. T. But some remain in use. These particles, it should be noted, do not change the real force of the participle. They merely sharpen the outline. The simplest form of this usage is seen in the adverbs of time like τὸ πρῶτον (Jo. 9:8); ποτέ (Gal. 1:23. Cf. Eph. 2:13; Lu. 22:32); πυκνότερον (Ac. 24:26). In Mk. 9:20; Jo. 5:6 note other expressions of time. More idiomatic is the use of εὐθὺς as in εὐθὺς θοῦσα εὐθὺς (Mk. 6:25). Cf. also ἧδη ὃς γενομένης (Mk. 15:42), ἔτι ὄν (2 Th. 2:5) and ἄρτι ἐλθόντος Τιμοθέου (1 Th. 3:6). Blass\(^3\) denies that ὅμα with the participle in the N. T. suggests simultaneousness or immediate sequence. He sees in ὅμα καὶ ἐλπίζων (Ac. 24:26) only ‘withal in the expectation,’ not ‘at the same time hoping.’ I question [Page 1140]

the correctness of Blass’ interpretation on this point. Cf. also ὅμα ἄνεντες (27:40); προσευχόμενοι ὅμα καὶ περί ἡμῶν (Col 4:3), where it requires some overrefinement to refuse the classic idiom to Luke. Under the concessive participle we saw examples of καὶ γε (Ac. 17:27), κατ’οι (Heb. 4:3), κατέρ (Heb. 5:8, etc.). There is also the use of ὅμας in the principal sentence to call attention to the concessive force of the participle (1 Cor. 14:7). So οὕτος points back to a participle of time or manner (Ac. 20:11). Worth noting, besides, is καὶ τοῦτο as in Ro. 13:11, though here a finite verb may be implied. So also καὶ ταῦτα νενεκρομένου (Heb. 11:12). There remain ὅς, ὅσι, ἦσσε. The use of ὅσι (Ro. 6:13) and of ὅσισε (Ac. 2:2) is limited to condition or comparison. It is only with ὅς that there is any freedom or abundance. Blass1 notes the absence of the accusative absolute with ὅς in the N. T. and its absence from the future participle save in Heb. 13:17, where it is not strictly design. There is nothing specially significant in the phrase οὐχ ὅς, ‘not as if,’ in Ac. 28:19; 2 Jo. 5. The N. T., like the classical Greek, uses ὅς without the participle in abbreviated expressions like ὅς τῷ κυρίῳ (Col. 3:23); ὅς ἐν ἡμέρᾳ (Ro. 13:13); ὅς δὲ ἡμῶν (2 Th. 2:2), etc., where the participle is easily supplied from the context.2 In some instances one must note whether the particle does not belong with the principal verb. But, common as ὅς is with the participle, it does not change the nature of the participle with which it occurs.3 The participle with ὅς may be causal, temporal, conditional, manner, etc. Then again ὅς may be used to express the notion of the speaker or writer as well as that of one who is reported. In truth, ὅς implies nothing in itself on that point. The context alone must determine it.4 The various uses of ὅς itself should be recalled. There may be nothing but comparison, as in ὅς ἐξουσίαν ἔχων (Mk. 1:22); ὅς οὐκ ἐφέρε τίνα (1 Cor. 9:26). So also Mk. 6:34; 2 Cor. 6:9 f.; 1 Pet. 2:13, 16. In Lu. 22:26 f. observe ὅς ὁ δικαίων. The causal idea is prominent in ὅς ἡλεμένος (1 Cor. 7:25). Cf. Heb. 12:27 and D in Ac. 20:13, ὅς μέλλων. The concessive or conditional notion is dominant in 1 Cor. 7:29 f.; 2 Cor. 5:20, ὅς τοῦ θεοῦ παρακαλοῦντος διὶ ἡμῶν. So also in Ac. 3:12; 28:19; 2 Jo. 5. In Lu. 16:1, ὅς διασκορπίζειν, the charge is given by Jesus as that of the slanderer (διεβλήθη) and the context implies that it is untrue (only alleged).5 Pilate makes a similar use of ὅς ἀποστρέφοντα τὸν λαόν in Lu. 23:14. He declines by the use of ὅς to accept the correctness of the charge of the Sanhedrin against Jesus. For a similar use see ὅς μελλόντας (Ac. 23:15); ὅς μέλλων (23:20); προφάσει ὅς μελλόντων (genitive absolute 27:30). But in 2 Cor. 5:20 (see above) Paul endorses the notion that he is an ambassador of God and ὅς is not to be interpreted as mere pretence. God is speaking through Paul. There is no instance of ὅν with the participle in the N. T. as appears in classic Greek. Winer6 notes two instances of ὅς ὁν with the participle in the LXX (2 Macc. 1:11; 3 Macc. 4:1). To these Moulton7 adds another (2 Macc. 12:4) and a genitive absolute example in the papyri, Par. P. 26 (ii/b.c.), ὅς ὁν

 PARTICLES (ΑΙ ΠΑΡΑΘΗΚΑΙ)

I. Scope. The word particle is a Latin diminutive, particula (cf. French particule) from pars. It is a small part of something. Longinus terms this part of speech παραθήκη with the notion that it was a word placed beside another. No portion of syntax is treated with so little satisfaction in the grammars. The grammarians are not agreed as to what parts of speech should be called “particles.” Riemann and Goelzer treat under this term (Les Particles) negative particles, particles of comparison and prepositions. Jannaris includes prepositions, conjunctions and negative particles. Kühner-Gerth here discuss conjunctions, prepositions and the modal adverbs, though they use the phrase “die sogenannten Partikeln.” Blass almost confines the discussion of particles to conjunctions. He makes the two terms equivalent: “Particles (Conjunctions).” Winer uses the word broadly to cover all adverbs, prepositions and conjunctions. Monro limits the designation to certain conjunctions and adverbs “that are mainly used to show the relation between other words and between clauses.” But he does not treat all conjunctions (paratactic and hypotactic) nor all modal adverbs. He passes by prepositions. Brugmann sees clearly that, as there is no real distinction

Brugmann

BRUGMANN, K., Elements of Comparative Grammar of the Indo-Germanic Languages (translation by Wright, 1895).

———, Griechische Grammatik. 3. Aufl. (1900), the ed. quoted. Vierte vermehrte Aufl. of A. Thumb (1913).

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).
between adverbs and prepositions, so there is no fast line (“keine feste Grenze”) between “particles” and other adverbs. All languages have a large group of words that pass over into the category of particles, but Brugmann cuts the Gordian knot by declaring that it is not a function of scientific grammar to delimit these words. That is a matter of subjective standpoint. He takes little interest in the various subdivisions of the particles, but he extends the term to its widest sense to [Page 1143] cover all modal adverbs, prepositions and conjunctions. Brugmann notes that many of these particles go back to the Indo-Germanic time and hence their etymology is unknown. He treats the particles from the standpoint of their origin so far as known. Hartung\(^1\) takes a much narrower view of particles. He discusses the paratactic conjunctions and the intensive particles. He\(^2\) conceives that the greater portion of the particles have no meaning in themselves, but are merely modifications on other words or on whole sentences. This is not strictly correct. We are not always able to discover the original import of these words, but it is probable that they originally had a definite meaning. It is true that the particles are all subordinated to other words in various ways. In a broad way it may be stated that there are four classes of words (verbs, nouns, pronouns, particles) in the sentence. From this point of view the word particle covers all the adverbs, prepositions, conjunctions and interjections. But it is impossible, as Brugmann holds, to make a perfectly scientific treatment of the particles without much overlapping. The interjections in one sense do not belong to grammar. The negative and the interrogative particles cannot be properly treated under adverbs, though they are adverbs. So also conjunctions are adverbs, but a good deal more. Intensive particles again are adverbs, but more. It is not worth while to recount the story of the adverbs and the prepositions at this stage. They are particles, but they have received sufficient discussion in special chapters. In the same way the construction of hypotactic conjunctions came in for somewhat careful treatment in connection with subordinate sentences under Mode. Hence, hypotactic conjunctions do not here demand as much discussion as the paratactic conjunctions. One has to be, to a certain extent, arbitrary in this field, since the ground is so extensive and so much remains to be done. There is still need of a modern and exhaustive treatise on the Greek Particles. It was in 1769 that the Dutch scholar Hoogeveen\(^3\) wrote his book. He was followed by Hartung.\(^4\) Klotz\(^5\) reworked the writings of Devarius. In [Page 1144] 1861 Bäumlein produced his Untersuchungen über griech. Partikeln. Paley\(^6\) has

---

carried the work on, as has Navarre. There are, to be sure, a great number of monographs on special groups or on single particles. “If any particular section of Greek grammar were taken as a specimen to illustrate the historical evolution of the Greek language, no better representative could be selected than the section of the particles.” Jannaris speaks thus, not because the grammars have treated the particles with such skill, but because the particles best show the growth and decay of parallel words before other new synonyms that are constantly coming into existence. The particles come to a sharp point and gradually lose the edge and whittle down into platitudes. Then they give way to others with more freshness. In general, the particles mark the history of the effort to relate words with each other, clause with clause, sentence with sentence, paragraph with paragraph. They are the hinges of speech, the joints of language, or the delicate turns of expression, the nuances of thought that are often untranslatable. We must here confine our attention to Intensive Particles, Negative Particles, Interrogative Particles, Conjunctions and Interjections. This order is chosen for logical reasons simply, not because this was the order of development. That we do not know. The particles that are linked to single words logically come before conjunctions which have to do with clauses and sentences. Interjections stand apart and so are put last in the list. Some of the particles are employed with words, clauses and sentences (like ἄρα, δέ, οὖν), so that a strict division on this basis is not possible.

II. Intensive or Emphatic Particles (παραθήκαι ἐμφατικά or παραπληρωματικοί σύνδεσμοι according to Dionysius Thrax).

1. LIMITATIONS. Here again there is no absolute agreement as to what particles are considered “emphatic” or “intensive.” Winer, indeed, has no separate discussion of the intensive particles like γε, περ. He admits that, while the Greek of the N. T. uses adverbs well in an extensive sense, it is defective in the intensive use. Adverbs of

place, time, manner, all come in abundance in the N. T. Thompson follows Winer in the absence of discussion of the intensive particles. The intensive particles, in fact, as a rule receive poor handling in the grammars. But Paley properly sees that they are “an elaborately finished part of a most complex and beautiful machinery.” Poetry, especially tragic poetry, uses these emphatic particles more than other kinds of writing. In Homer “they sustain and articulate the pulses of emotion. By them alone we can perceive that Greek was the language of a witty, refined, intellectual, sensitive and passionate people. It would be impossible in any book to tabulate the delicate shades of meaning, the subtle, intricate touches of irony or pathos, the indescribable grace and power which the particles lend to many of the grandest passages in ancient literature.” It is only by a close study of the entire context that these can be felt. They can never be fully translated from one language to another. Thus it is impossible to reproduce in English the various shades of meaning of μὲν and δὲ when in contrast. “The attempt to translate a particle leads to curious results. Dr. Cyril Jackson used always to render Τρῶς ἔα by ‘the Trojans, God help them,’ and a former head-master of Eton always distinguished between σοι, ‘Sir, to you,’ and τοι, ‘at your service’” (Coleridge, Greek Classic Poets, p. 221). Indeed, it is not possible to put into mere written language all that the look, the gesture, the tone of voice, the emphasis of the accent carried when heard and seen. Cf. a Frenchman in conversation. The spoken vernacular thus has all the advantage of the written style. All the vernacular cannot be reproduced on the page. Cf. the charm of the actual speech of Jesus and Paul. The N. T. is in the vernacular κοινή, but even so it does not reproduce to any great extent the witchery of the old Greek particles. Time has worn them down very much. Still, we do find them here and there. There is a good example in Ph. 3:8, ἀλλὰ μὲν οὖν γε καὶ ἡγούμαι. So also εἰ ποιεῖς ἠδή ποτέ (Ro. 1:10) and τί ἔστι κᾶγω· ὦς (3:7). Cf. P. B. M. 42 (b.c. 168) οὖν μὴν ἄλλο έπει καὶ and O. P. 1164, 5 (vi/vii A.D.) οὐ μὴν δὲ ἄλλο καὶ. This shows that Paul at least knew how to indicate the finer shades of thought by means of the Greek particles. Blass notes that, in comparison with the Semitic languages, the N. T. seems to make excessive use of the particles, poor as the showing is in comparison with the classic period. “Modern Greek has lost the classical Greek wealth of connective and other particles which lend nicety and precision of thought. Only καί (οὐτε, οὔδε), ἦ and the less commonly used conjunctions ἄλλον, πλὴν, ὅμως have been retained. The loss of γάρ, ἡνα has been compensated by new formations; but the ancient Greek τέ, δέ, μὲν—δέ, μέντοι, μὴν, οὖν (γοūν), ἢτι, δή, γέ, πέρ have left no successors” (Thumb, Handb., p. 443–473).
185). The papyri seem barren of intensive particles in comparison with the older Greek. Jannaris\(^1\) observes how these postpositive particles (γέ, δή, μέν, πέρ, τοί and their compounds) tend in the later Greek either to disappear or to become prepositive. The N. T. is in harmony with this result. The same thing occurs with ἄρα, which sometimes becomes prepositive, but that is not true of γάρ, δέ, οὖν. Dionysius Thrax\(^2\) has a very extensive list of “expletive particles” or παραπληρωµατικό σύνδεσµοι (εἰσὶ δὲ ὁδὲ δή, ὁ, νῦ, ποῦ, τοῖ, θῆν, ἄρ, δήτα, πέρ, πώ, μήν, άν, αὖ, νῦν, οὖν, κέν, γέ, ἄλλα, μήν, τοίνυν, τοιγαροῦν). Some of these (like ἄρα, οὖν, ἄλλα, and one might add γάρ, δέ) are so prevailingly conjunctival that they are best treated under conjunctions. Others (like κέν, ῥά) belong to earlier stages of the language. The discussion of ἄν could have come here very well, since it is undoubtedly intensive whatever its actual meaning, whether it is blended with εἰ into εἶν or used with ὅς, ὅτες, ἵνα, ὅπως, ως, etc., or used with the verb itself in the apodosis of a condition. It is a modal adverb of emphasis (now definite as in Rev. 8:1, now indefinite as in Mt. 23:18). It is like a chameleon and gets its colour from its environment or from its varying moods. This fickleness of meaning is true of all the intensive particles. Indeed, Dionysius Thrax is rather slighting in his description of these words, ὅσοι παρόντες οὐδὲν ὑφελεῖν δύνανται οὔτε μήν χωρισθέντες λυμαίνονται. He contradicts his disparagement by the use of μήν in this very sentence.

The adverbial nature of the intensive particles is well shown by the variety of usage of the modal adverb οὔτως. See Thayer’s *Lexicon* for the N. T. illustrations, which are very numerous (some 200). In Jo. 4:6, ἐκαθέζετο οὔτως ἐπὶ τῇ πηγῇ, we have a good example of the possibilities of οὔτως. The local adverb ποῦ dwindles from ‘somewhere’ (Heb. 2:6) to ‘somewhat’ in Ro. 4:19. Cf. also δή ποῦ (‘surely’) in Heb. 2:16. Some of the temporal adverbs also at times approach the emphatic particles. Cf. τὸ λοιπὸν in Ph. 3:1; 4:8 (see Kennedy *in loco*) almost\(^3\)=οὖν. But in the

Kennedy
N. T. ἄρτι and ἤδη are always strictly temporal. However, [Page 1147] ποτέ sometimes loses its notion of ‘once upon a time’ (Gal. 1:23) and fades into that of ‘ever’ as in 1 Cor. 9:7; Eph. 5:29. In ἤδη ποτέ (Ro. 1:10; Ph. 4:10) it is more the notion of culmination (‘now at last’) than of time. But in μὴ ποτέ the notion of time may be wholly gone before that of contingency (‘lest perchance’), as in Lu. 12:58. In the N. T. we find undoubted instances of the non-temporal use of νῦν and νῦν where the sense differs little from ὅτι or οὖν. Some of the passages are in doubt. But the logical and emotional use, as distinct from the temporal, is clear in Jo. 15:22, 24 where νῦν ὅτι gives the contrast to the preceding conditions, ‘but as it is.’ Cf. also 1 Jo. 2:28, καὶ νῦν, τεκνία, where John’s emotional appeal is sharpened by the use of νῦν. Cf. likewise καὶ νῦν ὅτι in Ac. 7:34 (LXX). Cf. καὶ νῦν, B. U. 530 (i/A.D.). In general, the N. T. language, like the English, leaves most of the emotion and finer shades of thought to be brought out by the reader himself. “The historical books of the N. T., and especially their dialogues and discourses, are only fully and truly intelligible to us in reading them in high voice in the original Greek text, and in supplying the intonation, the gestures, the movement, that is to say, in reconstituting by the imagination the scene itself.”

2. THE N. T. ILLUSTRATIONS.

(a) Γέ. We may begin with γέ. The origin of γέ is by no means certain. In the Boeotian, Doric and Eleatic dialects it is γά. It seems to correspond to the k in the Gothic mi-k (German mi-ch). Cf. Greek ἐµέ-γε. Brugmann sees also a kinship to the g in the Latin ne-g-otium, ne-g-legere, ne-g-are. Hartung connects it with the adverb

There is a keen touch of irony in Ro. 9:20, the fore the idea of the word with which it is used, but adds no distinctive notion of its own. Hübner calls it a concessive particle on a par with ὅμως. But that is not always true of γέ. The distinction made by γέ may be either the least important or the most important (Thayer). The resultant idea may be ‘at least,’ this much if no more, a concessive notion. We find this to be the significance of γέ in Lu. 11:8, διά γε τὴν ἁναδίων αὐτοῦ. Here, however, the γέ more properly belongs to ἁναδίων, since that is the point, not the preposition διά. The same slight variation from the classic idiom appears in 18:5, διά γε τὸ παρέχειν μοι κόσμον τὴν χήραν ταύτην. The concessive minimizing idea comes out clearly in Jo. 4:2, καίτοι γε Ἡσοῦς αὐτός. See further ἃρα γε and καί γε in Ac. 17:27, and, in particular, ἄλλα γε ὑμῖν ἀλλι (1 Cor. 9:2) where again the ancient idiom would prefer ὑμῖν γε, ‘to you at least’ (if not to others). Once more note ἐὰν γε in Eph. 3:2; 4:21; Col. 1:23, and ἐὰν τίς μὴ γε in Mt. 6:1; 9:17, etc.

There is a keen touch of irony in Ro. 9:20, ὢ ὄνειρος, μενοῦνγε σὺ τις εἰ. Cf. ἃραγε in Mt. 17:26. On the other hand γέ means ‘this much,’ ‘as much as this,’ in other contexts. So in Lu. 24:21, ἄλλα γε καὶ σὺν πάσιν τούτοις, where the ascensive force is accentuated by καί, σὺν and ἄλλα (affirmative here, not adversative), and the climax of the crescendo is reached in γέ. The same climactic force of the particles occurs in Ph. 3:8, ἄλλα μὲν οὖν γε καὶ ἡγούμενα πάντα ζημίαν έναι. ‘I go,’ says Paul, ‘as far as to consider all things to be loss.’ Cf. ἃραγε in Mt. 7:20 and καί γε in Ac. 2:18 (Joel 3:2). So we have ἃρα γε in Ac. 8:30. A fine example is ὢ γε τὸ ἕντο ὕποθεν οὖν ἕφεισάτο (Ro. 8:32). So 10:18. There is irony again in καί ἤφελόν γε ἡμαστελεύσατε (1 Cor. 4:8), and note the position of γέ apart from καί. In Homer γέ is very common with the pronouns, but in the N. T. we have only ὢ γε (Ro. 8:32). We no more find ἐγώ γε, but ἐγὼ μὲν (Mt. 3:11), ἐγὼ—σὺ (3:14), ἐγὼ δὲ (5:22), αὐτός ἐγὼ (Ro. 9:3). Indeed all of the thirty examples of γέ in the N. T. occur with conjunctions (paratactic or hypotactic) or other particles except those in Lu. 11:8; 18:5; Ro. 8:32. Cf. ἐμφατιά γέ ἐστι (‘indeed it is sin’) in Hermes, Vis., i, 1.8. The particles with which γε is found in the N. T. are ἄλλα γε (Lu. 24:21); ἃρα γε (Mt. 7:20); ἃρα γε (Ac. 8:30); εἰ γε (Eph. 3:2); εἰ τίς μὴ γε (Mt. 6:1); [Page 1149] καί γε (Ac. 17:27); καίτοι γε (Jo. 4:2); μὴ γε (1 Cor. 6:3); ἤφελον γε (1 Cor. 4:8); μενοῦνγε (Ro. 9:20). Cf. διὰ γε in Lu. 11:8; 18:5.

3 Monro, Hom. Gr., p. 258.
Γάρ is compounded of γέ and ὁ, but it will be treated under conjunctions, though it is sometimes not much more than an intensive particle. Cf. τί γάρ κακὸν ἔποιήσεν (Mt. 27:23).

(b) Δή. It has likewise an uncertain etymology. It appears in the Attic poets as δοι (cf. νή, νε) and is seen in composition with δη-τα, δη-που, ἐπει-δή, ἕδη. In ἕ-δη we probably have ἤ and δή. It was originally temporal in idea and goes back to the Indo-Germanic period. Jannaris thinks that δέ and δή are one and the same word (cf. µέν and µήν) and holds that the difference is due to the transliteration from the old to the new alphabet when alone a distinction was made between ε and ε (η). Thus the spelling δή was confined to the intensive particle, while δέ was the form for the conjunction. It is certain that in Homer there is confusion between δέ and δή before vowels. In Homer also δή may begin a sentence, but in the N. T. as elsewhere all the examples are postpositive (but not enclitic). Blass does not treat it as an intensive particle, but as a consecutive particle. It is hard to follow Blass’ theory of the particles. Like the other intensive particles it has no English or German equivalent and is a hard word to translate. It is climactic and indicates that the point is now at last clear and may be assumed as true. Cf. Latin jam nunc, νῦν—δὴ (1 Jo. 4:3); ἄδη ποτε (Ro. 1:10). The similarity in sense between δή and one usage of δέ may be seen in Ac. 6:3, ἐπισκέψασθε δέ (δή), where W. H. put δή in the margin. Cf. καί σὺ δέ in Lu. 1:76. Δή is not genuine in 2 Cor. 12:1. There are left only six N. T. illustrations, counting δή ποτε in Heb. 2:16, ὡς γάρ δή ποιήσεις Ἐπιλαμβάνεται. In Mt. 13:23, ὡς δή καρποφορεῖ, it occurs in a relative sentence, ‘who is just the man who.’

The other examples are all with the hortatory subjunctive (Lu. 2:15; Ac. 15:36) or the imperative (Ac. 13:2; 1 Cor. 6:20) in accord with the classical idiom. There is a note of urgency in ἄφορίσατε δή (Ac. 13:2) and δοξάσατε δή (1 Cor. 6:20). The passage with δή ποτε in Jo. 5:4 has disappeared from the critical text.

[Page 1150] (c) Εἴ μήν, νῆ and và. Somewhat akin to the positive note in δή is the use of ἤ µήν which is read by many MSS. in Heb. 6:14. The etymology of this adverb is again quite uncertain, though it is possible that it may have the same root as ἤ (ἡλε, ἡλί). Cf. ἤ δή (ἡδη). In ἤπερ (Jo. 12:43) and ἤτοι (Ro. 6:16) we have the comparative or disjunctive ἤ. In Homer it was often used in connection with other particles. We may pass µήν for the present. If ἤ were genuine in Hebrews the usage would be in strict accord with classic construction for a strong asseveration. But certainly ἤ µήν is the true text. This queer idiom appears a few times in the LXX (Ezek. 33:27; 34:8; 38:19, etc.). It occurs also in the papyri and the inscriptions after

iii/B.c. Cf. εἰ μήν, P. Oxy. 255 (A.D. 48). So that it is mere itacism between ἦ and εἰ. The Doric has εἰ for ἦ where Moulton⁴ holds against Hort⁵ that the distinction is strictly orthographical. See further chapter VI, Orthography and Phonetics, II, (c). So then εἰ μήν has to be admitted in the κοινή as an asseverative particle. It is thus another form of ἦ μήν. Jannaris⁶ gives a special section to the “asseverative particles” νή and μά. We do not have μά in the N. T. and νή only once in 1 Cor. 15:31, καθ ἦμεραν ἄποθνήσκω νή τίνι ἦμετέρων καύχησιν. Νή is a peculiarity of the Attic dialect and is used in solemn asseverations (oaths, etc.) and means ‘truly,’ ‘yes.’ It is probably the same word as ναί, the affirmative adverb which occurs over thirty times in the N. T. Ναί may be simply ‘yes,’ as in Mt. 13:51. It may introduce a clause as ‘yea’ or ‘verily,’ as in Mt. 11:9. It is used in respectful address, Ναί, Κύριε (Jo. 11:27). It may be used as a substantive (like any adverb) with the article (2 Cor. 1:17) or without the article (Mt. 5:37), where it is repeated. It occurs with ἄμην in Rev. 1:7. It stands in contrast with οὐ in Mt. 5:37 and 2 Cor. 1:17. There was an old form ναί-χι.

5 App., p. 151.

(d) Mév. We know a little more about μέν, which is postpositive, but not enclitic. It is only another form of μὴν which occurs in the N. T. only in Heb. 6:14. The Doric and Lesbian use μέν and the Thessalian μὰ—δὲ. So then it seems probable8 that μὰν [Page 1151] (μὰ used with words of swearing after a negative), μὴν and μέν are one and the same word. Indeed, in Homer1 all three forms occur in the same sense. That original sense is affirmative, meaning 'surely,' 'indeed,' 'in truth.' It is overrefinement to find in μὲν (μὴν) the subjective confirmation and in δὲ the objective attestation.2 It is probable that in the change from the old alphabet to the new the transcribers adopted the two ways of spelling, common in Attic and Ionic (μὲν and μὴν) with a notion that μὴν was merely emphatic with single words, while μὲν was correlative (forwards or backwards) or antithetical.3 Questions of metre may also have entered into the matter. But there is no doubt at all that in itself μὲν does not mean or imply antithesis. The original use was simply emphatic confirmation of single words, usually the weightiest word in the sentence. This use was gradually left more and more to μὴν and other particles, but it is not anacoluthic, as Winer4 holds, for μὲν to occur without the presence of δὲ or ἀλλὰ. The older language is naturally richer5 in this original idiom with μὲν, but it survives in the N. T. and is not to be regarded as unclassical or uncouth. For an example in the papyri see B. U. 423 (ii./A.D.), πρὸ μὲν πάντων. The old idiom survived best in the vernacular and in poetry, while the literary prose was more careful to use the antithetical or resumptive μὲν.

This μὲν solitarium, as the books call it, may have a concessive or restrictive force.6 Cf. εἰ μὲν γὰρ ὁ ἐρχόμενος (2 Cor. 11:4), where there is no thought of δὲ or ἀλλὰ. It is seen also rather often in the Acts. Cf. 1:18 ὃς μὲν οὖν ἐκτίθεσα τῷ θεῷ, (3:13) ὃν ὑμεῖς μὲν παρεδώκατε (cf. ὑμεῖς δὲ in next verse which is copulative, not adversative). (3:21) δὲν δὲν οὐρανὸν μὲν δὲξασθαι, (3:22) Μωφωνῆς μὲν εἶπεν, (17:12) πολλοὶ μὲν οὖν ἢ δι’ αὐτῶν ἐπιστεύειν, (21:39) ἐγὼ δὲνθεροπος μὲν εἰμι, (23:18) ὃ μὲν οὖν παραλαβὼν (cf. also 23:31), (27:21) ἔδει μὲν, (28:22) περὶ μὲν γὰρ τῆς αἵματος ταύτης, and the instances of οἷ μὲν οὖν like Acts 1:6; 2:41; 5:41; 8:25, where no contrast is intended. See εἰ μὲν οὖν in Heb. 7:11; ἥ μὲν εὐδοκία in Ro. 10:1; ἐφ’ ὅσον μὲν οὖν εἰμι ἐγὼ in 11:13. Cf. 2 Cor. 12:12; 1 Th. 2:18, ἐγὼ μὲν. Cf. also the single instance of μενοῦν as one word (Lu. 11:28) which is obviously without contrast. The same thing is true of μενοῦγε (Ro. 9:20; 10:18; Ph. 3:8) however it is printed. The main word is sharpened to a fine point and there is a hint of contrast in Ph. 3:8. Indeed, most [Page 1152] of the instances of μὲν οὖν in the N. T. are resumptive, not correlative or antithetical.1 There remain the instances where μὲν

7 Griech. Gr., p. 544.
8 Ib.
1 Monro, Hom. Gr., p. 251.
4 W.-Th., p. 575.
6 Hartung, Partikellehre, II, p. 404.
implies contrast. It is just a step in advance of the original idiom. Cf. Mt. 8:21, ἔπετρευν μοι πρῶτον ἄπελθεν, where there is nothing to correspond to πρῶτον. The ἐπετεία is involved in what precedes. So with πρῶτον and τε—καὶ in Ro. 1:16 and πρῶτον—καὶ in 2 Cor. 8:5. The καὶ does not answer to the πρῶτον. Just so we have τὸν μὲν πρῶτον λόγον in Ac. 1:1 without a δεύτερον δέ, though the clear implication is that the Acts is the second book. In 1 Cor. 11:18, πρῶτον μὲν γάρ, the contrast is implied in verses 20 ff., but in Ro. 1:8, πρῶτον μὲν εὐχαριστῶ, there is no hint of other grounds of thanksgiving. This instance may be a change of thought on Paul’s part (anacoluthon), or it may be the original use of μὲν, meaning ‘first of all in truth.’ Cf. πρῶτον μὲν in Ro. 3:2. In Ro. 7:12, ὁ μὲν νόμος, there is no contrast stated, but in verse 14 it is given by δέ, yet without μὲν. In Col. 2:23, ἄπτινα ἐστιν λόγον μὲν ἔχοντα σοφίας, the antithesis is really stated in οὐκ ἐν τῷ, κτλ., without an adversative particle. In 1 Cor. 5:3 the μὲν stands alone, while ἄπον and παρόν are contrasted by δέ. In Heb. 12:9 there is contrast between the μὲν clause and the next, which has no particle (only πολὺ μὴλλον). In Ac. 26:4, 6, μὲν is followed by καὶ νῦν by way of contrast and by τὰ νῦν in 17:30. Cf. μὲν—καὶ in 1 Th. 2:18, μὲν—τε in Ac. 27:21, where there is practically no contrast. But see ὁ μὲν—καὶ ἔπετερον in Lu. 8:5 ff., ὁ μὲν—καὶ ὄλλο in Mk. 4:4 ff. We have μὲν—ἔπετερα in Jo. 11:6; Jas. 3:17; 1 Cor. 12:28. These are all efforts to express antithesis. We see this also in μὲν—πλὴν in Lu. 22:22 and in μὲν—ἄλλα in Ac. 4:16; Ro. 14:20; 1 Cor. 14:17. In Mk. 9:12 f. ὄλλα is independent of the μὲν. But it is the μὲν—δέ construction that is the most frequent in the N. T. as in the Attic Greek. There are two and a half pages of examples of μὲν in its various uses in the N. T. given in Moulton and Geden’s Concordance, but even so the particle has made a distinct retreat since the Attic period. It is wholly absent from 2 Peter, 1, 2 and 3 John, 2 Thessalonians, 1 Timothy, Titus (critical text) and Revelation. It occurs thrice in Jude, only once in Eph. (4:11), Col. (2:23), 1 Th. (2:18), Jas. (3:17). It is most frequent in Matthew, Acts, [Page 1153] Romans, 1 Corinthians and Hebrews. Paley takes that μὲν and δέ may contain the roots of one (μία) and two (δύο). But certainly the correllative antithesis is not necessary to either of them, with δέ there is the notion of addition. Cf. in this connection μὲν—καὶ μὲν—καὶ (Mk. 4:4; Lu. 8:5) and τότε μὲν (Jo. 11:6). There are varying degrees of contrast where μὲν and δέ occur together. There may be no emphasis on the μὲν and very little on the δέ, which is not essentially adversative. The μὲν may preserve almost its original idiom while δέ has slight contrast. So Lu. 11:48, ἀρα μάρτυρες ἔστε καὶ συνενδοκείτε τοῖς ἔργοις τῶν πατέρων, ὅτι αὐτοῖ μὲν ἁπέκτειναν αὐτούς ὑμεῖς δέ οἰκοδομεῖτε. The whole sentence is quoted to show that it is agreement (correspondence), not opposition, that is here accented. In verse 47 we have δέ, but not μὲν, which is hardly felt in 48. See also Ac. 13:36 f.; Ph. 3:1; Heb. 7:8. In particular we note this slight contrast when a whole is distributed into its parts as in Mt. 25:14 ff.; 1 Cor. 9:25. Cf. also Ac. 18:14 f. But the distribution may amount to sharp division, as in 1 Cor. 1:12, Ἐγὼ μὲν εἰμὶ Παῦλος, Ἐγὼ δὲ Ἀπολλών, Ἐγὼ δὲ
Kηφῶ, Ἐγὼ δὲ Χριστοῦ. It is thus the context that decides how pointed is the contrast. It is not the words μὲν and δὲ that inherently mean opposition. Indeed, the contrast may be indicated by δὲ alone as in Mt. 5:22, 28, 32, 34, 39, 44; 25:46; Ac. 12:9; Heb. 2:8; 4:13; 6:12.² We see a good illustration of clear antithesis in John’s words about his baptism and that of Christ in Mt. 3:11, Ἐγὼ μὲν—ὁ δὲ. See further 20:23; 22:8; 23:28; 25:33, καί στήσας τὸ μὲν πρόβατα ἢ ἐξείων αὐτοῦ τῷ δὲ ἔρισα ἢ εὐωνύμονον.

The examples are numerous. See οἱ μὲν—οἱ δὲ (Ph. 1:16 ff.); οὐκ μὲν—οὐκ δὲ (Jude 22); τνῦ ὧ μὲν—τνῦ δὲ (Ph. 1:15); οίς μὲν—οίς δὲ (Heb. 9:6 f.); οἱ μὲν—ἄλλοι δὲ (Mt. 16:14); ἄλλη μὲν—ἄλλη δὲ (1 Cor. 15:39); τοῦτο μὲν—τοῦτο δὲ (Heb. 10:33); πρῶτον μὲν—ἐπείκετα δὲ (Heb. 7:2); οἱ μὲν οὖν—οἱ δὲ (Ac. 19:38 f.); οἱ μὲν—οὖν δὲ (Heb. 11:15 f.), etc. These examples fairly exhibit the N. T. usage of μὲν. It is often a matter of one’s mood how much emphasis to put on μὲν and δὲ, as in Mt. 9:37 and Mk. 14:38. In μὲντὸν there is always strong contrast. As examples of μὲν—ἄλλα in sharp contrast see Ro. 14:20; 1 Cor. 14:17. So also μὲν—πλῆ (Lu. 22:22).

(e) Πέρ. It is probably a shortened form of περί (cf. perfect) or πέρι more exactly.³ It is both postpositive and enclitic and is usually in the N. T. printed as a part of the word with which it [Page 1154] occurs. But in Homer this is not true, while πέρ follows καί only once.¹ There is no doubt about the etymology of this particle.² Some³ even connect it directly with πέραν or πέρα. Cf. περιπτέρε (critical text in Ac. 19:39). But this idea does not conflict with the other, for πέρι is the locative of πέρα. It is an Indo-Germanic root, and the original notion of πέρι occurs in πέρι-πίμπλημι, περι-πληθῆς, νυ-περ, per-manere, per-tinax, sem-per, etc. It means then to do a thing to the limit (beyond), thoroughly. There is a note of urgency in πέρ. It is intensive as γέ, but probably tends to be more extensive also.⁴ Sometimes the emphasis in πέρ is in spite of opposition⁵ as in καίπερ which occurs six times in the N. T. (Ph. 3:4; Heb. 5:8; 7:5; 12:17; 2 Pet. 1:12), and always with participles, as καίπερ ὅν νίος (Heb. 5:8). The Textus Receptus has ὄνπερ in Mk. 15:6, but W. H. read only ὅν, but ὄνπερ appears twice as an inferential conjunction (1 Cor. 8:13; 10:14). See ἄσπερ, O. P. 1125, 6 (iii/A.D.). The other examples are all with conjunctions, as ἄσπερ (Heb. 3:14; 6:3); ἐπερ (a half-dozen times, all in Paul, as Ro. 8:9; 1 Cor. 15:15); ἐπείθερ (some MSS. in Ro. 3:30, but the best MSS., as W. H. give, have ἐπερ); ἐπείθερ (only Lu. 1:1); ἄσπερ (only the critical text in Jo. 12:43); καθάπερ (some 17 times, all in Paul save Heb. 4:2), καθάπερ (Heb. 5:4 and a varia lectio in 2 Cor. 3:18), ὄσπερ (some 36 times, chiefly in Matthew, Luke and Paul, as Mt. 6:2), ὄσπερ (once only, 1 Cor. 15:8).

(f) Τοί does not occur alone in the N. T., but only in composition. It is enclitic as in ἤτοι, καίτοι, μέντοι, but it comes first in τοιγαροῦν and τοίνυν. The etymology is not certain. Brugmann⁶ takes it to be a fixed form of the ethical dative σοί (τοι).
Others⁷ take it as the locative of the demonstrative τό. Kühner-Gerth⁸ consider it the locative of the indefinite τὶ. There seems no way of telling for certain. But it seems to have the notion of restriction and in Homer⁹ is often combined with adversative particles. In the N. T. we find ἦτοι once (Ro. 6:16), καίτοι twice (Ac. 14:17; Heb. 4:3), καίτοιγε once (Jo. 4:2), μέντοι eight times, five in John’s Gospel as Jo. 4:27 and once in Paul (2 Tim. 2:19), τοιαδήποτε twice (1 Th. 4:8; Heb. 12:1), τοινῦν three times (Lu. 20:25; 1 Cor. 9:26; Heb. 13:13). ὧνς is an adversative particle that occurs three times in the N. T. (Jo. 12:42, here with μέντοι; 1 Cor. 14:7; Gal. 3:15), twice with a participle.

III. Negative Particles (στερητικαὶ παραθηκαι). The use of the negative particles has been discussed already in various parts of the grammar in an incidental way in connection with the modes, verbal nouns and dependent clauses. But it is necessary at this point to treat the subject as a whole. It is not the logical negative that one has here to deal with. Many words are negative in idea which are positive in form. Thus “empty” is negative, “cold” is negative, “death” is negative. Aristotle uses στερητικος for this negative conception. It is in reality an ablative idea as στερέω implies. But the grammarian is concerned simply with those words that are used to make positive words (or clauses) negative. This is the grammatical negative. There are, indeed, in Greek, as in English, negative post-fixes.¹ But there is a common negative Greek prefix ὃν(τ) called alpha privative, Sanskrit ṣ(ṇ), Latin in, Gothic ŏn, English un. In Sanskrit this prefix does not occur with verbs and is rare with substantives. It is there found chiefly with adjectives and participles.² In Greek it occurs with verbs, but chiefly denominative verbs like ἀτιµάζω.³ The use of ἀ– (ἀν– before vowels) is in the Greek still more common with adjectives and verbals. See the chapter on Formation of Words for details. Cf. ἀδόκιμος, ἀδυκία, ἀπαιθής, ἀσύνετος, ἀσύνθετος, ἀστοργος, ἀνελεήμων (Ro. 1:28–30).

1. THE OBJECTIVE ΟŬ AND ITS COMPOUNDS.

(a) Origin. This is unknown. Hübschmann⁴ sees a connection with the Latin haud as do other scholars.⁵ Fowler⁶ takes it as an original intensive particle like pas in the French ne pas and –χι (Indo-Ger. -ghi) in oŬ-χι. The Zend ava is also noted and the

Latin *au* (*au-fero*). But there is no doubt that *ôu* in the Greek took the place of the Sanskrit *ná*, Latin *n̄* (*ne-que, ne-scio*; the relation of *n̄* *quidem, n̄* *quam* to this *n̄* is not known), Gothic *nī*. The use of the Greek *ôu* corresponds to the Sanskrit *ná*.

**[Page 1156]** (b) *History.* As far back as Greek goes we find *ôu*, but *ôu* did not hold its own with *µή* in the progress of the language. Within the past century *ôu* has become obsolete in modern Greek outside of a few proverbs save in the Laconian and the Pontic dialects. The Pontic dialect uses *κί* from Old Ionic *ôukí*. But modern Greek has *ôôdè* and *ôûte* (Thumb, *Handb.*, p. 200). In the Bœotian dialect, it may be noted, *ôu* never did gain a place. We have seen *ôôdèn* used as an adverb, an idiom that goes back to Homer. Janarís explains that the vernacular came to use *ôôdèn* and *µôdèn* for emphasis and then on a par with *ôu* and *µî*. Then *ôôdèn* dropped *ôu* and *µôdèn* lost *ôv*, leaving *ôv* and *µî* for the modern Greek. At any rate this is the outcome. *Ôv* is the negative of the ind. in modern Greek except after *ná* and final clauses when we find *ôv* *µî* (Thumb, *Handb.*, p. 200). And *ôv* is the regular negative in the protasis of conditional sentences both with ind. and subj. The distinction between *ôu* and *µî* did become more or less blurred in the course of time, but in the N. T., as in the *kînî* generally, the old Greek idiom is very well preserved in the main. Buttmann even thinks that the N. T. idiom here conforms more exactly to the old literary style than in any other point. *Ôv* may represent *µôdèn* (Rendel Harris, *Exp.*, Feb., 1914, p. 163).

(c) *Meaning.* *Ôu* denies the reality of an alleged fact. It is the clear-cut, point-blank negative, objective, final. Jannaris compares *ôu* to *ôrî* and *µî* to *ôvâ*, while Blass compares *ôu* to the indicative mode and *µî* to the other modes. But these analogies are not wholly true. Sometimes, indeed, *ôu* coalesces with the word as in *ôu* *ôφήµî* = not merely ‘I do not say,’ but ‘I deny.’ So *ôuk* *ôûô* (Ac. 16:7) = ‘I forbid.’ Cf. *ôu* *ôθêlô* (Mk. 9:30); *ôuk* *ôûê* (Mt. 13:12); *ôuk* *ôγνôô* (2 Cor. 2:11). See also *ôv* *ôu* *λµâv* in Ro. 9:25 (LXX) where *ôu* has the effect of an adjective or a prefix. Delbrück

7 But Draeger (Hist. Synt., p. 133) says that this connection with the Lat. *haud* cannot be shown.

DELBRÜCK, B., Ablativ Localis Instrumentalis (1867).

thinks that this use of οὐ with verbs like the Latin ne-scio was the original one in Greek. In the LXX οὐ translates נָא.

(d) Uses. Here it will be sufficient to make a brief summary, since the separate uses (pp. 917 f., 929 f., etc.) are discussed in detail in [Page 1157] the proper places. The point here is to show how all the varied uses of οὐ are in harmony with the true meaning of the particle.

(i) The Indicative. We meet οὐ with the indicative in both independent and dependent clauses.

(a) Independent Sentences. Here the negative οὐ is universal with the indicative in declarative sentences. The force of οὐ (οὐκ before vowels, οὐχ before aspirate) is sometimes very powerful, like the heavy thud of a blow. Cf. οὐκ ἐδόκατε, οὐκ ἐποτίσατε, οὐκ συνηγάγετε, οὐκ περιεβάλετε, οὐκ ἐπεσκέψασθε (Mt. 25:42 f.). The force of all these negatives is gathered up in the one οὐ in verse 44. In verse 45 οὐ and οὐδὲ are balanced over against each other. See οὐκ ἐπεσεν in Mt. 7:25. Cf. οὐ παρέλαβον in Jo. 1:11. In Mt. 21:29 see the contrast between ἔγω, κύριε and οὐκ ἀπήλθεν. Note the progressive bluntness of the Baptist's denials till οὐ comes out flat at the last (Jo. 1:21 f.). In the N. T. οὐ alone occurs with the future indicative used as a prohibition, though the classic idiom sometimes had μή. Cf. οὐ φονεύσεις (Mt. 5:21); οὐκ ἔσεσθε ὡς οἱ Ὑποκρίται (6:5), etc. Still, Blass quotes μηδένα μεςήσετε in Clem., Hom., III, 69. The volitive subjective nature of this construction well suits μή, but οὐ is more emphatic and suits the indicative. In Mt. 16:22, οὐ μή ἔσται σοι τοῦτο, we have οὐ μή in the prohibitive sense. When οὐ occurs alone=‘no,’ as at the end of a clause, it is written οὐ as in οὐ, μή ποτε (Mt. 13:29); τῷ Οὐ οὐ (2 Cor. 1:17).

But in interrogative (independent) sentences οὐ always expects the answer ‘yes.’ The Greek here draws a distinction between οὖ and μή that is rather difficult to reproduce in English. The use of a negative in the question seems naturally to expect the answer ‘yes,’ since the negative is challenged by the question. This applies to οὐ. We may leave μή till we come to it. Οὐ in questions corresponds to the Latin nonne. Cf. Mt. 7:22, οὐ τῷ σῷ δόνομαι ἐπροφητεύσαμεν κτλ., where οὐ is the negative of the whole long question, and is not repeated with the other verbs. See further Mt. 13:55; Lu. 17:17; 1 Cor. 14:23. In 1 Cor. 9:1 we have οὐ four times (once οὐχι). The form οὐχι is a bit sharper in tone. Cf. Mt. 13:27; Lu. 12:6. In Lu. 6:39 we have μή with one question, μήτη δύναται τυφλός τυφλόν ὃδηγείν; and οὐχι with the other (side by side) οὐχι ἃμφοτεροι εἰς βόθυνοι ἐμπεσοῦνται. There is a tone of impatient indignation in the use of οὐ in Ac. 13:10, οὐ παύσῃ διαστρέφων τάς δόος τοῦ κυρίου τάς εὕθειας; In Ac. 21:38, οὐκ ἄρα σὺ ἐὰν ὁ Ἀγίστιος; the addition of ἄρα

9 Synt. Forsch., IV, p. 147.
1 Gr. N. T. Gr., p. 254.
means ‘as I supposed,’ but as I now see denied. In Mk. 14:60 note the measured use of οὐ and οὐδὲν in both question, οὐκ ἀποκρίνητο οὐδὲν; and the description of Christ’s silence, καὶ οὐκ ἀπεκρίνετο οὐδὲν. In Lu. 18:7, οὐ μὴ ποιήσῃ—καὶ μακροθυμεῖ ἐπαύτοῖς: we come near having οὐ μὴ in a question with the present indicative as well as with the aorist subjunctive. In a question like οὐκ ἐχόμεν; (1 Cor. 9:4) οὐ is the negative of the verb, while μὴ is the negative of the sentence. Cf. Ro. 10:18, 19. In 1 Cor. 9:8 we have μὴ in one part of the question and οὐ in the other, μὴ καὶ ὁρκοφόρον ταῦτα λαλῶ, ἢ καὶ ὁ νόμος ταῦτα οὐ λέγει; In Mt. 22:17 (Lu. 20:22; Mk. 12:14) we have ἢ οὐ; as the alternative question, and Mark adds ἢ μὴ. Babbitt holds that “οὐ is used in questions of fact, while in other questions (e.g. questions of possibility) μὴ is used.” I doubt the correctness of this interpretation.

In declarative sentences the position of οὐ is to be noted when for emphasis or contrast it comes first. Cf. οὐ and ἀλλά in Ro. 9:8. So οὐ γὰρ—ἀλλὰ ὅ in 7:15. In 7:18 f. note οὐ· οὐ side by side. Cf. also position of οὐ in Ac. 1:5; 2:15; Ro. 11:18 (οὐ σῶ—ἀλλά). So ἀλλὰ οὐκ ἐγὼ in 1 Cor. 6:12.

(f) Subordinate Clauses. In principle the use of οὐ is the same as in independent sentences. But there are some special adaptations which have already been discussed and need only brief mention here.

In relative clauses with the indicative οὐ is almost the only negative used in the N. T., the examples of μὴ being very few as will be seen directly. This is true both with definite relative clauses where it is obviously natural, as in 2 Cor. 8:10, οἵτινες οὐ μόνον—προενήρξασθε (cf. Ro. 10:14; Jas. 4:14), and in indefinite relative clauses where μὴ is possible, but by no means necessary, as in Mt. 10:38, ὃς οὐ λαμβάνει (cf. Lu. 9:50; 14:33, etc.). The use of οὐ in the relative clause which is preceded by a negative is not an encroachment on μὴ. Cf. οὐ μὴ ἀφεθῇ ὧδε λίθος ἐπὶ λίθον ὁς οὐ καταλυθήσεται (Mt. 24:2). It is a common enough idiom in the old Greek, as we see it in 10:26 (Lu. 12:2), οὐδὲν ἐστιν κεκαλυμμένον ὃ οὐκ ἀποκαλυφθήσεται. Cf. Lu. 8:17, where the second relative has οὐ μὴ γνωσθῇ, and Ro. 15:18 for the negative οὐ in principal and relative clause. In Mk. 4:25 note ὃς ἔχει and ὃς οὐκ ἔχει. Cf. ὃ θέλω and ὃ οὐκ θέλω (Ro. 7:15, 19). Practically the same construction is οὐ with the relative in a question, as τίς [Page 1159] ἐστιν ὃς οὐ in Ac. 19:35; cf. Heb. 12:7. For further illustration of οὐ with relative clauses see Mt. 12:2=Mk. 2:24; Jo. 6:64; Lu. 14:27; Jo. 4:22; Ro. 15:21; Gal. 3:10; Rev. 9:4.

1 W.-Th., p. 511.
3 W.-Th., p. 481.
4 Thouvelin, Les Négations, etc., p. 233 f.
In temporal clauses with the indicative οὖ comes as a matter of course. This is true of a definite note of time as in Ac. 22:11, ὃς οὖκ ἔνέβλεξον, and of an indefinite period as in Jo. 4:21, ὃρα ὅτε οὖτε (cf. also 9:4, νῦξ δέ τε οὖδείς).

In comparative clauses with the indicative the negative comes outside in the principal sentence, since comparison is usually made with a positive note. So οὖ καθήσερ (2 Cor. 3:13); οὖ καθός δῆλπισαμεν (8:5); οὖκ εἰμὶ ῥώσπερ (Lu. 18:11); οὖχ ὥς (Ro. 5:15 f.). We do have ὥς οὐκ ἄφρα δέρων in 1 Cor. 9:26 (participle) as in 2 Cor. 10:14 we have οὖ γάρ, ὥς μὴ ἔφικνούμενοι, where the two negatives are in good contrast.

In local clauses likewise the use of οὖ is obvious, as in ἐποὺ οὖκ ἔχειν γῆν πολλὴν (Mt. 13:5); ἐποὺ οὖθεν (Jo. 21:18. Here the οὖ is very pointed); οὖ δὲ οὐκ ἔστιν νῦμος (Ro. 4:15).

In causal sentences οὖ is not quite universal, though the usual negative. Cf. Mt. 25:45 ἕφ οὖσαν οὐκ ἐκοινώσατε ἐν τούτοις τῶν ἔλαχιστῶν, (2:18) ὃς οὐκ ἔλειν, (Heb. 6:13) ἐπεί κατ οὐδὲν εἴχεν, (1 Cor. 14:16) ἐπείδη οὐκ οἶδεν. See further Lu. 1:34; Jo. 8:20, 37; Ro. 11:6. In Heb. 9:17 ἐπεί μὴ τότε [μὴ ποτὲ marg. of W. H.] ἱσχύει may be a question as Theophylact takes it, but W. H. do not print it so in the text. But it is not a departure from ancient Greek idiom to have μὴ with the ind. in causal sentences as will be shown. Cf. Jo. 3:18 with 1 Jo. 5:10.

In final clauses with the ind. οὖ does not occur. The reason for μὴ in clauses of purpose is obvious even though the ind. mode be used (cf. Rev. 9:4, 20). It is only with clauses of apprehension that οὖ is found with the verb when μὴ occurs as the conjunction. Cf. 2 Cor. 12:20, φοβοῦμαι μὴ τοις οὐκ εὕρος. But this is the subj., not the ind. Cf. here οὖχ οἷς θέλω καὶ οἷον οὐκ θέλεσθε. Cf. also Mt. 25:9. In Col. 2:8 we have βλέπετε μὴ τίς ἔσται—καὶ οὖ κατα Χριστὸν. The καὶ οὖ is in contrast with κατὰ τὰ στοιχεῖα τοῦ κόσμου, though as a second negative it would properly be οὖ anyhow. But in Rev. 9:4 we have ἵνα μὴ ἄδικησουσίν—οὐδε—οὐδε. This does seem unusual and is almost an example of ἱνα οὖ. No example of a clause of result with a negative occurs in the indicative, but it would, of course, have οὖ.

The use of οὖ in conditional sentences has already received [Page 1160] adequate treatment. See Conditional Sentences, ch. on Mode. The details need not be gone over again here. There is no doubt of the fact that εἰ οὖ made encroachments on εἰ μὴ in the later Greek. Βlass puts it “in direct contradistinction to the classical language.” Thouvemin likewise treats this use of εἰ οὖ as “contrairement à l’usage classique—où on le trouve exceptionnellement.” It is only the frequency, the normality of εἰ οὖ in the N. T. that is remarkable. This is in full accord with the κοινή development, since

2 Gr. of N. T. Gk., p. 254.
3 Les Négations, etc., p. 233.
in the modern Greek δὲν “is regularly used in the protasis of a conditional sentence, alike with the indicative and with the subjunctive mood.” So ὁ δὲν πήγανα, ‘if I had not gone’ (Thumb, Handb., p. 195). See Mt. 26:42; Lu. 12:26; Jo. 1:25; 3:12; 5:47; 10:37; 2 Pet. 2:4; Ro. 8:9; 11:21; 1 Cor. 16:22; 2 Cor. 12:11; Heb. 12:25, etc. They are all conditions of the first class (determined as fulfilled) save one of the second class (determined as unfulfilled) in Mt. 26:24. In 26:42 εἰ οὖ καὶ ἐὰν μὴ stand out sharply. It is so nearly the rule with conditions of the first class in the N. T. that it is hardly necessary to follow out the analysis of Winer5 to bring the examples into accord with ancient usage. It is gratuitous to take εἰ οὐδὲ as causal in Lu. 12:26, or to make εἰ οὐκ εἰμὶ in 1 Cor. 9:2 a denial of a positive idea. There are cases of emphatic denial, as εἰ τις οὐ φιλέει (1 Cor. 16:22). Cf. also 2 Jo. 10, εἰ τις ἔρχεται καὶ οὐ φέρει. Cf. also εἰ οὔ ποιῶ and εἰ ποιῶ in Jo. 10:37 f., where the antithesis is quite marked. See also the decisive negation in Jo. 1:25. But, when all is said, εἰ οὔ has made distinct inroads on εἰ μὴ in the later Greek.

As to the negative in indirect discourse with the indicative, it only remains to say that the use of οὔ is universal. Cf. Mt. 16:12, συνῆκαν δὴ οὐκ ἔπειν προσέχειν. In 16:11 note πῶς οὗ νοεῖτε δὴ οὗ περὶ ἄρτων εἶπον ὑμῖν: where each negative has its own force. Cf. also 1 Cor. 6:9.

(ii) The Subjunctive. In Homer οὐ was the negative with the futuristic subjunctive6 as in οὔ δὲν ἔόμοι, Iliad, I, 262. This futuristic use of the subj., as we have seen (Modes), largely passed over to the future indicative,7 so that οὔ disappears from the subjunctive almost entirely both in principal and subordinate clauses. [Page 1161] One may compare the final disappearance of οὔ before μὴ with participles. In Jer. 6:8 B reads ἦτε οὗ κατοικισθῆσαι where ΝΔΑ* have κατοικισθῇσαι. It is to be remembered also, as already noted, that in the modern Greek δὲν occurs in the protasis with subjunctive as well as with the indicative, as ὁ δὲν πιστεύεις (Thumb, Handbook, p. 195). This is partly due, no doubt, to the obscuration of the οὔ in δὲν, but at bottom it is the futuristic use of the subj. We have already noted the use of μὴ οὐχ in 2 Cor. 12:20 with εὐφρόν after φοβοῦμαι, where the οὔ is kept with the subj. (classic idiom) to distinguish it from the conjunctional μὴ. It is also a case of the futuristic subj., not volitive as in final clauses with ἵνα or δεῖν. In Mt. 25:9 the margin of W. H. has μὴ ποτὲ οὔκ ἄρκεσθι without a verb of fearing, though the notion is there. The text has μὴ ποτὲ οὔ μὴ. Jannaris1 boldly cuts the Gordian knot by denying that μὴ in οὔ μὴ is a true negative. He makes it merely a shortening of μὴν. If so, all the uses of οὔ μὴ with the subj. would be examples of οὔ with the subj. Some of these, however, are volitive or deliberative. This view of Jannaris is not yet accepted among scholars. It is too simple a solution, though Jannaris argues that οὔ μὴν does occur as in Soph. El. 817, Eur. Hec. 401, and he notes that the negation is continued by οὔ δὲ, not by μὴ δὲ. Per contra it is to be observed that the modern Greek writes μὴν as well as μὴ, as νῦν μὴν ἔχει παράδεξα, ‘because he had no money’

5 W.-Th., pp. 477 ff.
6 Monro, Hom. Gr., p. 198.
1 Hist. Gk. Gr., p. 433.
(Thumb, *Handb.*, p. 200). But, whatever the explanation, we do have οὐ μὴ with the aorist subj. in the N. T. We have had to discuss this point already (Tense and Mode), and shall meet it again under Double Negatives. But in Jo. 18:11, οὐ μὴ πίω: the answer is in accord with οὐ.

(iii) **The Optative.** In the N. T. there are no instances of the use of οὐ with the optative. It is only in wishes (volitive) that the optative has a negative in the N. T. and that is naturally μὴ. But this is just an accident due to the rapid disappearance of the optative. There is no reason why οὐ should not be found with the potential optative (futuristic) or the deliberative which was always rare.

(iv) **The Imperative.** The most striking instance is 1 Pet. 3:3, ἦν ἔστω οὐχ ὁ——κόσμος, ἀλλὰ ὁ κρυπτός, κτλ. It is the sharp contrast with ἀλλὰ that explains the use of οὐ. Cf. also οὐ μόνον in 1 Pet. 2:18, where the participle stands in an imperative atmosphere. [Page 1162] Cf. also οὐ with the inf. in the imperative sense in 1 Cor. 5:10. Elsewhere with the imperative we have μὴ μόνον (Jo. 13:9; Ph. 2:12; Jas. 1:22). οὐ is used in an imperatival connection with the fut. ind. (Mt. 5:21) and in questions of like nature (Ac. 13:10).

(v) **The Infinitive.** It is common to say that in the N. T. οὐ does not occur with the infinitive, not even in indirect assertion. In Homer and in the classic Attic we do find οὐ with the inf. in indirect assertion. This is usually explained on the ground that the οὐ belonged to the original indicative in the direct and is simply preserved in the indirect. Monro (*Hom. Gr.*, p. 262) observes that in the old Sanskrit only finite verbs have the negative particles. This question received full discussion under Mode and Verbal Nouns. Only a brief word is allowed here. The oldest use of the negative in indirect discourse was in the form οὐ φησιν δῶσειν where οὐ formally goes with φησιν, but logically with δῶσειν. From this use Monro conceives there came οὐ with the inf. itself. But the situation in the N. T. is not quite so simple as Blass makes it. In Jo. 21:25, οὐδὲ αὐτὸν οἶμαι χωρήσειν, the negative does go with οἶμαι. But this is hardly true in Mk. 7:24, nor in Ac. 26:26. Besides οὐ occurs in a number of clauses dependent on the inf., as in Heb. 7:11; Ro. 8:12; Ac. 10:41; Ro. 7:6; 15:20; Heb. 13:9; 1 Cor. 1:17; Ac. 19:27. For the discussion of these passages see Infinitive, ch. XX, 5, (l). It is proper to say that in the N. T. we still have remnants of the old use of οὐ with the inf., though in general μὴ is the negative. In Ro. 15:20 οὐχ ἔστη after εὐαγγελίζεσθαι stands in sharp contrast with ἀλλὰ καθὼς. In 2 Cor. 13:7 we have μὴ ποιησαι ὑμᾶς κακὸν μηδὲν, οὐχ ἤνα——ἀλλὰ ἤνα where the οὐχ is clearly an *addendum*. Burton explains εἰς οὖθεν λογισθῆναι in Ac. 19:27, “as a fixed phrase,” but even so it is in use. Besides, there is μὴ λογισμαχέν ἐπὶ οὖθεν χρήσιμον in 2 Tim. 2:14. See also καὶ οὐ after ὠστε δουλεύειν in Ro. 7:6. The use of οὖθεν with the inf. after οὐ with the principal verb is common enough. Cf. Mk. 7:12; Lu. 20:40; Jo.

2 Robertson, Short Gr. of the Gk. N. T., p. 200.
2 Gr. of N. T. Gk., p. 255.
3 N. T. M. and T., p. 184.
(vi) The Participle. There is little to add to what was given on [Page 1163] the subject of οὗ and μή with the participle under the Verbal Aspects of the Participle (see Verbal Nouns). Galloway¹ thinks that it was with the participle that οὗ was first used (as opposed to the Sanskrit negative prefix) before the infinitive had οὗ. At any rate οὗ is well established in Homer. We may simply accent the fact that the encroachment of μή on οὗ with the participle gives all the greater emphasis to the examples of οὗ which remain. Cf. ὅ οὐκ ἦν πουμήν (Jo. 10:12); ὡς οὐκ δέρων (1 Cor. 9:26). There is no trouble in seeing the force of οὗ wherever we find it with the participle in the N. T.

(vii) With Nouns. Here we see a further advance of the negative particles over the Sanskrit idiom which confined them to the finite verb. The Greek usually employs the negative prefix with nouns, but in a few instances in the N. T. we have οὗ. So τὸν οὗ λαὸν in Ro. 9:25 (LXX), οὗ λαός in 1 Pet. 2:10 (LXX), ἐπὶ οὗ Εὖνει in Ro. 10:19 (Deut. 32:21). But this is by no means a Hebraism, since it is common in the best Greek writers. Cf. ἦ οὗ δίαλυςις in Thuc. 1, 137. 4 and ἦ οὗ ἐξουσία in 5, 50. 3. Cf. οὐκ ἄρχεσθαις in 2 Macc. 4:13. As Thayer well says, οὗ in this construction "annuls the idea of the noun." The use of οὗ to deny a single word is common, as in οὗ θωσίαν (Mt. 9:13). Cf. οὐκ ἔμει in Mk. 9:37. In general for οὗ with exceptions see οὐκ ἐν σοφίᾳ (1 Cor. 1:17), οὗ μέλαν (2 Cor. 3:3). In 2 Tim. 2:14, ἐπὶ οὗδέν χρήσιμον, it is possible that χρήσιμον is in the substantival sense. There is, of course, nothing unusual in the use of οὗ with adjectives like οὗ πολλοῖ σοφοί (1 Cor. 1:26). What is noteworthy is the litotes so common in the N. T. as in the older Greek. Cf. μετ' οὗ πολύ (Ac. 27:14); μετ' οὗ πολλὰς ἡμέρας (Lu. 15:13); οὗ δέλια (Ac. 17:4); οὗ δόσιμον (21:39). Cf. οὐκ ἥκε μέτρον (Jo. 3:34); οὗ μετρίως (Ac. 20:12). Οὗ πᾶς καὶ πάς οὗ have received discussion under Adjectives, and so just a word will suffice. Οὗ πᾶσα σάρξ (1 Cor. 15:39) is 'not every kind of flesh.' Cf. οὗ παντὶ τῷ λαῷ (Ac. 10:41); οὗ πάντες (Mt. 19:11); οὗ πάντως (1 Cor. 5:10). But οὐκ ἄν ἔσωθη πᾶσα σάρξ (Mt. 24:22) means 'no flesh,' like the Hebrew שָׁלוֹם. The construction in both senses is more common in John than in the Synoptic Gospels. It is perhaps worth while to note the use of οὗδέν or οὗθέν (1 Cor. 13:2) as an abstract neuter in the predicate. In general, attention should be called to the distinction made by the Greeks between negativing a word and a sentence. This is one reason why with the imper., subj. and inf. we find οὗ with [Page 1164] single words or phrases, where μή is the normal negative of the clause.

(e) Καὶ Οὗ. In general when a positive clause is followed by a negative we have καὶ οὗ as in classic Greek. Cf. Ro. 7:6 (with inf. as in Heb. 7:11). See also Col. 2:8,

4 Ib., p. 183 f.
Galloway GALLOWAY, W. F., On the Use of Μή with the Participle in Classical Greek (1897).
1 On the Use of Μή with the Participle in Class. Gk., 1897, p. 6.
19. So Lu. 8:14, συντήροντα καί οὗ τελεσφοροῦσιν.¹ Cf. Mt. 9:13. Once, indeed, in a peculiar case, we find καὶ connecting two negative clauses, Lu. 6:37, καὶ µή κρίνετε καὶ οὗ µή κριθήτε.

(f) Redundant or Pleonastic οὗ. There is one instance of οὗ in indirect discourse where it is pleonastic according to the classic idiom (see also the French ne). It is in 1 Jo. 2:22, οὗ ἁρκοῦμενος ὅτι Ἰησοῦς οὗκ ἔστιν. Some MSS. have the pleonastic οὗ in Mk. 9:39.

(g) Repetition of οὗ. When the second is a single negative, the full force of each is retained. It is seldom that we find two examples of οὗ in the same clause, as in 1 Cor. 12:15 f., οὗ παρὰ τοῦτο οὗκ ἔστιν ἐκ τοῦ σώματος, ‘It is not therefore not of the body.’ There are instances of οὗ followed by µή where both preserve the full force, Ac. 4:20, οὗ δυνάμεθα µή λαλέσθων. Cf. also οὗ—µή in 1 Cor. 9:6. So also ὁ µή ποιῶν δικαιοσύνην οὗκ ἔστιν ἐκ τοῦ θεοῦ (1 Jo. 3:10). Cf. 5:12. The examples are numerous enough when the second οὗ is in a dependent clause. So οὐδὲν ὅπερ ἔστιν κεκαλυμμένον δοκεῖ ὑποκαλυφθῆσαι (Mt. 10:26); πῶς οὗ νοεῖτε ὅτι οὗ, κτλ.

(16:11); οὗ τοιμήσω τι λαλέσθαι δοκεῖ οὗ κατειργάσατο Χριστὸς (Ro. 15:18); οὗκ οἰδάτε ὅτι—οὗκ κληρονομήσονται (1 Cor. 6:9). In Mt. 24:2 οὗ follows οὗ µή. See also Lu. 8:17. The uses of µή οὗ and οὗ µή are treated later. But note οὗ, µή ποτὲ—ἐκριζώσθη (Mt. 13:29) where οὗ stands alone. The solemn repetition of οὗ—οὗ in 1 Cor. 6:10 is rhetorical.

(h) The Intensifying Compound Negative. We have seen how οὗ can be made stronger by χι (οὗχι, as in Lu. 1:60). Brugmann² considers this an intensive particle and different from the Homeric³ κι (οὗ-κι) which is like τι (κις, κι, τις, τι). So also οὖδὲ was originally just οὗ δὲ (‘and not,’ ‘but not’) and is often so printed in Homer.⁴ In the sense of ‘not even’ see Mt. 6:29. The form οὖδὲς is intensively also, originally ‘not one indeed’ and was sometimes printed οὔδε εἶς (Ro. 3:10) for even stronger emphasis. But οὗ—τις also occurs (Jo. 10:28). Cf. also οὐδὲ τις (Mt. 11:27); οὗ δύνη ἔτι (Lu. 16:2); οὖε—τις (Ac. 28:21); [Page 1165] οὗ—ποτὲ (2 Pet. 1:21). The adverbial form οὖδὲν occasionally occurs in Homer. The form οὐθεὶς (cf. Ac. 26:26), which flourished for a limited period in the κοινή, has already had sufficient discussion. Various other compound negatives were built up on οὗ, as οὐδαμῶς (Mt. 2:6); οὐδὲπώς (Jo. 20:9); οὐδέποτε (Mt. 7:23); οὐκέτι (Mt. 19:6). Οὐκοῦν was used so much in questions that it lost its negative force (Jo. 18:37), unless one writes it οὐκον. Οὗτε is, of course, only οὗ and τέ. These compound negatives merely strengthen the previous negative. This emphatic repetition of the compound negative was once good vernacular in both English and German, but it gave way in literary circles before the influence of the Latin.¹ It was always good Greek. This discussion does not apply to subordinate clauses (as in Jo. 8:20) where each negative has its own

---

force. The use of οὐδὲ and οὔτε belongs to the discussion of conjunctions (cf. οὔτε—οὔτε—οὐδὲ in Ac. 24:12 f.), but the examples in the N. T. of the other compound negatives with οὐ are numerous. Farrar\(^2\) gives some good illustrations of old English. “No sonne were he never so old of years might not marry,” Ascham, *Scholemaster.* Modern English vernacular refuses to give up the piling-up of negatives. “Not nohow, said the landlord, thinking that where negatives are good, the more you heard of them the better” (*Felix Holt*, ii, 198). Again: “Whatever may be said of the genius of the English language, yet no one could have misunderstood the query of the London citizen, Has nobody seen nothing of never a hat not their own?” So likewise the Hebrew uses two negatives to strengthen each other (cf. 1 Ki. 10:21; Is. 5:9). A good example is Mk. 5:3, οὐδὲ οὐκέτι οὐδὲς. So οὐδεὶς οὐποίο (11:2). The commonest kind of example is like οὐ δύνασθε ποιῆν οὐδὲν (Jo. 15:5). Cf. 2 Cor. 11:8. Another instance of triple negative is Lu. 23:53, οὐκ ἤν οὐδεὶς οὐπῶ. The οὐ is sometimes amplified\(^1\) by οὔτε—οὔτε as in Mt. 12:32, as well as by οὐδὲ—οὐδὲ as in Jo. 1:25. Plato shows four negatives, οὐδὲν οὐδαμὴ οὐδαμῶς οὐδεμίας κοινωνίας (*Phaedo* 78 d). The combinations with οὐ μή may also be noticed, as οὐδὲν οὐ μή (Lu. 10:19); οὐ μή σε ἄνω οὐδὲ οὐ μή σε ἐγκαταλίπο (Heb. 13:5); οὐκέτι οὐ μή (Rev. 18:14). There is no denying the power of this accumulation of negatives. Cf. the English hymn

“I’ll never, no never, no never forsake.”

\(\text{(i) The Disjunctive Negative.}\) We frequently have οὐ “where one thing is denied that another may be established.” Here [Page 1166] there is sharp antithesis. The simplest form is οὐ—δὲ as in Jas. 2:11, or οὐ—ἄλλα as in Mt. 15:11; Mk. 5:39; Lu. 8:52; Ac. 5:4; 1 Cor. 15:10; 2 Cor. 3:3, etc. In Jo. 7:22 we have οὖχ ὅτι—ἄλλα, as also in Ph. 4:17. In Ph. 4:11 οὖχ ὅτι occurs alone without ἄλλα. In 2 Cor. 7:9 we have οὖχ ὅτι—ἄλλα ὅτι. In 1 Jo. 2:1 we have οὖχ ἐγραψα ἦν μὲν ὅτι—ἄλλα. ὅτι where more naturally we might expect ἐγραψα οὖχ ὅτι—ἄλλα ὅτι. Winer\(^1\) makes rather overmuch of the possible rhetorical distinctions between the varying shades of emphasis in the different contexts where οὐ—ἄλλα occur. Cf. further οὔχ Ἰνα—ἄλλα (Jo. 6:38); οὔχ Ἰνα—ἄλλα. Ἰνα (Jo. 3:17). We usually have οὖ χ μόνον—ἄλλα καί (Jo. 5:18; Ro. 1:32, etc.), but sometimes merely οὖ μόνον—ἄλλα (Ac. 19:26; 1 Jo. 5:6). Sometimes the negative is not expressed, but is to be supplied in thought as in Mt. 11:7–9. Then again we may have only the negative as in οὖ βρώμας ἰναι (Heb. 13:9), leaving the contrast to be supplied in the thought. The contrast may even be expressed by καί οὖ as in Mt. 9:13, ἔλεως θέλω καί οὐ θυσίαν (A, LXX). But we have already entered the sphere of the conjunctions as in the parallel οὔτε—καί in Jo. 4:11. So 3 Jo. 10.

2. The Subjective Negative Μή and Its Compounds.

\(\text{(a) The History of Μή.}\) The Ionic, Attic and Doric dialects have μή, the Eleatic has μά, like the Sanskrit mā. In the old Sanskrit mā was used only in independent

1 W.-Th., pp. 495 ff.
\end{flushleft}
sentences, while ἤ occurred in dependent clauses. In the later Sanskrit mā crept into the dependent clauses also. It was originally a prohibitive particle with the old injunctive which was in the oldest Sanskrit always negative with mā. In the later Sanskrit mā was extended to the other modes. In the Greek we see μή extended to wish and then denial. Wharton undertakes to show that μή is primarily an interrogative, not a prohibitive or negative particle, but that is more than doubtful. Already in Homer μή had established itself in a large and complex variety of uses, to which we have to appeal when we seek to know the true nature of the modal constructions as we come to them.

The distinction between ό and μή goes back to Indo-Germanic stock and has [Page 1167] survived into modern Greek. But from the very start μή made inroads on ό, so that finally μή occupies much of the field. In the modern Greek μή is used exclusively with participle, in prohibitions and with the subj. except in conditions, and occurs with νά (νά μή) and the ind. Gildersleeve has shown in a masterly way how μή made continual encroachments on ό. In the N. T., outside of ελ ό, the advance of μή is quite distinct, as Gildersleeve shows is true even of Lucian. So as to the papyri and the inscriptions. The exact Attic refinements between ό and μή are not reproduced, though on the whole the root-distinction remains.

(b) Significance of Μή. Max Müller gives an old Sanskrit phrase, mākāphālāya, ‘not for unsteadiness,’ which pretty well gives the root-idea of μή. It is an “unsteady” particle, a hesitating negative, an indirect or subjective denial, an effort to prevent (prohibit) what has not yet happened. It is the negative of will, wish, doubt. If ό denies the fact, μή denies the idea. Μή made one advance on ό. It came to be used as a conjunction. We see this use of mā in the late Sanskrit. But the origin of this

conjunctional use of μὴ is undoubtedly paratactic in clauses of both fear and purpose. It is obviously so in indirect questions where μὴ suggests ‘perhaps.’ Campbell argues that “the whole question of the Greek negatives is indeterminate.” This is an extreme position, but there is no doubt a border-line between οὐ and μὴ which is very narrow at times. One’s mood and tone have much to do with the choice of οὐ or μὴ. Cf. Jo. 4:29, μὴ τι οὗτος ἔστιν ὁ Χριστός: where οὐ would have challenged the opposition of the neighbours by taking sides on the question whether Jesus was the Messiah. The woman does not mean to imply flatly that Jesus is not the Messiah by using μὴ τι, but she raises the question and throws a cloud of uncertainty and curiosity over it with a woman’s keen instinct. In a word, μὴ is just the negative to use when one does not wish to be too positive. Μὴ leaves the question open for further remark or entreaty. Οὐ closes the door abruptly. The LXX uses μὴ for בָּנָה.

[Page 1168] (c) Uses of Μὴ. In general we may follow the outline of οὐ.

(i) The Indicative. Blass expounds the two negatives by saying that “οὐ negatives the indicative, μὴ the other moods, including the infinitive and participle.” But, unfortunately, the case is not so simple as that. “In reviewing Blass, Thumb makes the important addition that in modern Greek δὲν belongs to the indicative and μὴ(v) to the subjunctive.” But δὲν occurs in the protasis with the subj. in modern Greek, as we have seen. Besides, as Moulton adds, “μὴ has not been driven away from the indicative” in the N. T. It may be said at once that μὴ with the indicative is as old as historic Greek. The Sanskrit suggests that originally μὴ was not used with the indicative. But already in Homer μὴ occurs with the indicative in prohibition, wish, oath, fear, question. “The essence of these idioms is the combination of the imperative tone—which shows itself in the particle—with the mood proper to simple assertion.” But in the N. T. we no longer have μὴ with the fut. ind. in prohibition, except in case of οὐ μὴ.

In independent sentences we have μὴ with the indicative only in questions. “It’s use in questions is very distinct from that of οὐ and is maintained in the N. T. Greek without real weakening.” In Jo. 21:5, παιδία, μὴ τι προσφάγιον ἔχετε; we have a typical example with the answer οὐ. Blass expresses needless objection to this “hesitant question,” as Moulton rightly expounds it. Cf. Jo. 4:33; 7:26; and Ro. 11:1, μὴ ἅπωσατο; with the answer in verse 2, οὐκ ἅπωσατο. See Jo. 7:51, where

8 Gr. of N. T. Gk., p. 254.
Nicodemus adroitly uses μή in a question and the sharp retort of the other members of the Sanhedrin μή καὶ σῶ; The difference between οὐ and μή in questions is well shown in Jo. 4:33, 35. In the use of μή the answer in mind is the one expected, not always the one actually received as is illustrated in the question of the apostles at the last passover. They all asked μή τι ἔγω ἐγμ, ὑπάθει; The very thought was abhorrent to them, ‘It surely is not I.’ But Judas, who did not dare use οὐ, received the affirmative answer, σὺ ἐίπας (Mt. 26:25). Μήτι comes to be used intensively much like οὐχί (both chiefly in questions). In the case of μή οὐ [Page 1169] in questions (Ro. 10:18 f.; 1 Cor. 9:4 f.; 11:22) μή is the interrogative particle while οὐ is the negative of the verb.

In dependent clauses μή occurs with the indicative with the second class conditions (εἰ μή) always except in Mt. 26:24 (Mk. 14:21). Cf. εἰ μή in Jo. 15:22, etc. There are also five instances of εἰ μή with the ind. in conditions of the first class. So Mk. 6:5; 1 Cor. 15:2; 2 Cor. 13:5; Gal. 1:7; 1 Tim. 6:3. Cf. μή in a few relative clauses, as ὅ μή δεῖ (Tit. 1:11); ὃ μή πάρεστιν ταῦτα (2 Pet. 1:9); ὃ μή ὄμολογε (1 Jo. 4:3, W.H. text). Cf. Ac. 15:29 D. There is a certain aloofness about μή here that one can feel as in Plato who, “with his sensitiveness to subtle shades of meaning, had in μή an instrument singularly adapted for purposes of reserve, irony, politeness or suggestion.” This use of μή with the relative and indicative is clearly a remnant of the literary construction. This literary use of μή with the relative was often employed to characterize or describe in a subjective way the relative. There is a solitary instance of μή in a causal sentence, ἵνα μή πεπίστευκεν (Jo. 3:18), which may be contrasted with ὅτι οὐ πεπίστευκεν (1 Jo. 5:10). For ὅτι μή ἔξεις see Epictetus, IV, 10. 34, and ὅτι σοι οὖ, IV, 10. 35. Radermacher (N. T. Gr., p. 171) quotes ἅρσον ὅτι μή δεῖ, Diog. of Oinoanda, Fragm. IV, 1. 9. There is, besides, ἵνα μή τότε ἑστίναι in Heb. 9:17, according to the text of W. H., though they give in the margin ἵνα μή ποτε— διαθέμενος. In that case (the marginal reading) μή ποτε would introduce a question. See further Causal Clauses. In clauses of design we have ἵνα μή with the ind., as in Rev. 9:4, ἵνα μή ὁδικήσουσιν. The margin of W. H. in 13:17 has ἵνα μή τις δύναται. Moulton explains μή with the ind. after verbs of apprehension as not originally a conjunction, but μή in the sense of ‘perhaps’ (paratactic, not hypotactic). So Lu. 11:35, σκόπει μή τὸ φῶς—σκότος εἶστιν. Cf. also Col. 2:8; Heb. 3:12; Gal. 4:11; 1 Th. 3:5. The papyri give abundant parallels. Moulton (Prol., p. 193) cites ὁγονῶ μή ποτε ἄρροστεῖ, P. Par. 49 (ii/b.c.). The use of μή as a conjunction in clauses of design and fear with the indicative is parallel to the use of the negative particle μή, but does not fall here for discussion.

(ii) The Subjunctive. After all that has been said it is obvious that μή was destined to be the negative of the subj., first of the volitive and deliberative uses and finally of the futuristic also. The few remnants of οὐ with the subj. have already been discussed. For the rest the normal and universal negative of the [Page 1170] subj. is μή. Cf. μή ἐνκακῶμεν (Gal. 6:9). In Mk. 12:14, δῶμεν ἶ μή δῶμεν; (cf. οὐ just before), we see

9 Ib., p. 254.
1 Moulton, Prol., p. 171.
2 Thompson, Synt., p. 441.
3 Moulton, Prol., p. 171.
4 Ib., p. 192.
how well μη suits this deliberative question. The use of μη with the aor. subj. in prohibitions need not be further stressed. Wherever the subj. in a dependent clause has a negative (save after the conjunction μη after verbs of fearing) the negative is μη. Cf. δι μη ἔγρα (Lu. 8:18); ἵνα μη ἔλθητε (Mk. 14:38), etc. It is needless to give more examples.

(iii) **The Optative.** It is only the optative of wish that uses μη. It was rare to have the negative precative optative in the old Sanskrit.1 But already in Homer μη is used with the optative for a future wish. In the N. T. there is no example of μη with the optative except in wish. It is seen chiefly in μη γένοιτο, as in Ro. 3:4, 6, 31; Gal. 6:14, etc. But note also the curse of Jesus on the fig-tree in Mk. 11:14, μηδεξι καρπαν φάγοι.

(iv) **The Imperative.** It seems that the imperative was originally used only affirmatively and the injunctive originally only negatively with mā́. The oldest Sanskrit does not use mā́ with the imperative.2 In Homer we find once μη ἔνθεο (II., IV, 410) and once μη καταδύσεο (II., XVIII, 134) and once μη ἄκουσάτω (Od., XVI, 301). The second person aorist imper. in prohibitions did not take root and the third person only sparingly (cf. p. 856). See Mt. 6:3, μη γνώτω.3 The original negative injunctive appears in the form μη ποιήσῃς (Latin ne feceris). The imperative in Greek follows the analogy of this construction and uses μη uniformly. Cf. Lu. 11:7, μη μοι κόσμος πάρεχε. For the difference between μη with the present imperative and μη with the aorist subjunctive see Tenses and Modes. Cf. Mk. 13:21, μη πιστεύετε, with Lu. 12:11, μη μεριμνήσητε, and μη φοβέσθε with μη φοβηθητε (Mt. 10:28, 31). It is obviously natural for μη to be used with the imperative. For a delicate turn from οὐ to μη see Jo. 10:37. But Radermacher (N. T. Gr., p. 171) cites οὐδεν ἔξεστω from an inscr. (Benndorf-Niemann, Reisen in Lykien und Karien, 129 N. 102).

(v) **The Infinitive.** As we have already seen, the oldest Sanskrit inf. did not use the negative particles, and in Homer4 οὐ appears to be the original negative. But there are a few instances of μη with the inf. in Homer. They occur when the inf. is used as an imperative (cf. in the N. T. 1 Cor. 5:9; 2 Th. 3:14), for an oath, a wish or an indirect command. It is thus from the imperative and other finite modes that μη crept into constant use with the inf. [Page 1171] It came to be the normal idiom with the inf. outside of indirect assertion and in antithetical or emphatic phrases (see under οὐ).

Thompson1 challenges the statement of Gildersleeve: “Not till the infinitive came to represent the indicative (in indirect statement) could οὐ have been tolerated with the infinitive.” Thompson adds: “But this toleration is established in Homer.” Just as we saw μη make inroads on οὐ in other constructions (cf. participles), so it was with the inf. Even in indirect statement μη came to be the rule (cf. the Atticist Lucian). Even in the Attic οὐ did not always occur with the inf. in indirect statement.2 The facts as to the use of μη with the inf. in the N. T. have been already given (see Infinitive and

---

1 Thompson, Synt., p. 499.  
2 Ib., p. 495 f.  
3 Ib.  
4 Monro, Hom. Gr., p. 263.  
1 Synt., p. 414.  
Indirect Discourse). Cf., for instance, λέγουσιν ἄναστασιν μὴ ἔδει (Mk. 12:18); ἀπεκρίθησαν μὴ ἐλθέναι (Lu. 20:7). In short, Blass\(^3\) says that in the N. T. “μὴ is used throughout.” That is not quite true, as we have seen, but the limitations have already been given under οὐ. Cf. Lu. 11:42, τούτα δὲ ἔδει ποιῆσαι κἀκεῖνα μὴ παρέχει. Cf. 21:14. The use of μὴ λαλεῖν after οὐ δύναμθαι (Ac. 4:20) has already been noticed. Here μὴ retains its full value. We need not pursue the matter. Cf. τοῦ μὴ (Ac. 21:12); πρὸς τὸ μὴ (2 Cor. 3:13); εἰς τὸ μὴ (4:4); διὰ τὸ μὴ (Mt. 13:5); τῷ μὴ (2 Cor. 2:13); ὄντες μὴ (Mt. 8:28), etc. The redundant or pleonastic use of μὴ with the inf. has likewise come up for consideration under the Infinitive. In Lu. 20:27 some MSS. read ἄντι-λέγοντες and thus μὴ is redundant after ἄντι,—, but ΝΒCDL do not have ἄντι—.

Then in 22:34 ΝΒLT reject μὴ with ἐλθέναι after ἀπαρνήσῃ. In Heb. 12:19 W. H. put μὴ in the margin after παρῃσχημα. But there is no doubt of the use of the redundant μὴ in the N. T. Cf. Lu. 17:1 ἀνενόηκτον ἐστιν τοῦ τᾶς σκάνδαλα μὴ ἐλθεῖν, (24:16) ἐκρατήσει τοῦ μὴ ἐπιγνῶναι αὐτῶν. See also Lu. 4:42; 1 Pet. 3:10; Gal. 5:7. But this pleonastic μὴ is by no means necessary (cf. Ac. 8:36; Ro. 15:22). It does not usually occur with κολλώ in the N. T., but note Ac. 10:47, μὴ τὸ ὑδωρ δύναται κολλᾶν τις τὸ μὴ βαπτισθῆναι; Here μὴ is the interrogative particle expecting the answer ‘no,’ while μὴ is redundant after κολλᾶν. But in Ac. 24:23 μηδένα is not pleonastic. We do not have μὴ οὐ with the inf. in the N. T. Here (after οὐ) μὴ stands alone and is not redundant (cf. Ac. 4:20) or is redundant (20:20, 27), as the case may be. The use of μὴ and μὴ οὐ was not compulsory in the ancient Greek.\(^4\)

**[Page 1172]** (vi) The Participle. We have seen already how the oldest Sanskrit did not use the negative particles with the participle. In Homer we have only one instance of μὴ with the participle (Od., IV, 684).\(^1\) But μὴ gradually made its way with participles even in Attic Greek. In the modern Greek μὴ has driven οὐ entirely from the participial use. In the N. T. οὐ still hangs on, as we have seen, but that is all. The drift of the κονῇ is for μὴ, and a writer like Plutarch shows it.\(^2\) Μὴ is the usual negative of the participle. The details were given in connection with Participles. In the N. T. we need pay no attention to the Attic refinements on this point, which were not always observed even there. We have μὴ with the participle in the N. T. as a matter of course. Cf. Mt. 12:30 ὅ μὴ ὄνων and ὅ μὴ συνάγων, (1 Tim. 5:13) τὸ μὴ δέοντα, (Lu. 4:35) μηδὲν βλάψαν, (Ac. 20:22) μὴ ἐλθοῦς. In Mt. 22:11 f. and 1 Pet. 1:8, a distinction, as was shown, seems to be drawn between οὐ and μὴ with the participle. Cf. Mt. 18:25; Lu. 12:33; Jo. 7:15; Ac. 9:9; 17:6; 1 Th. 4:5 (cf. Gal. 4:8), etc. The downright denial of οὐ lingered on awhile in the κονῇ (cf. papyri), but μὴ is putting οὐ to rout.\(^3\)

(vii) Nouns. The ancient Greek\(^4\) used μὴ with substantives as ὅ μὴ ἰστρός (Plato, Gorg. 459 b), adjectives as οἱ μὴ καθαροὶ (Ant. v. 82), or adverbs as τὸ μὴ ἐμποδὸν (Thuc. ii, 45. 1). In the N. T., so far as I have noticed, μὴ with substantives and

---

3 Gr. of N. T. Gk., p. 255.
1 Monro, Hom. Gr., p. 263.
2 Thompson, Synt., p. 255.

4 Thompson, Synt., p. 410 f.
adjectives occurs only in contexts where it is natural. Thus in Lu. 10:4, μὴ πῆραν, μὴ ὑποδήματα, we have just before μὴ βαστάζετε βαλλάντινον. In Jo. 13:9, μὴ τοὺς πόδας μου μόνον, we have no verb, but νῦντε is to be supplied from the preceding sentence. Cf. also Eph. 5:15; Jo. 18:40. So in Ro. 12:11 μὴ ὄκνηροι is in the midst of participles used in an imperatival sense. In 1 Tim. 3:3, μὴ πάροινον, μὴ πλήκτην, the construction is δὲν εἶναι. This infinitival construction is carried on in verse 6 (in spite of the parenthesis in verse 5) by μὴ νεόφυτον. So as to verse 8 and Tit. 1:7. There is no difficulty as to the use of μὴ in Col. 3:2 and 2 Th. 3:6.

(d) The Intensifying Compounds with Μὴ. The same story in the main that we found with οὐ is repeated with μὴ. There is no μηδὲ, but we have μὴν in this sense. The examples in the N. T. are all in questions (cf. Mt. 7:16; Jo. 18:35) except one, εἰ μὴν (Lu. 9:13). The position of μὴ may give it emphasis as in Jas. 3:1 (cf. οὐ in Mt. 15:11). The use of the compound [Page 1173] negative as a second (or third) negative is simply to strengthen the negative as is true of οὐ. Cf. Mk. 11:14 μηκέτι μηδεὶς φύγω, (Ac. 25:24) ἔπιστροφοι τος μὴ δέν αὐτὸν ἐξηνε καὶ μηκέτι, (Ro. 13:8) μηδεὶς μηδὲν ὄφειλετε, (2 Cor. 13:7) μὴ—μηδὲν, etc. Besides μηδεὶς there is μηδὲν (Ac. 27:33), μηδὲν in the sense of ‘not even’ (Eph. 5:3), μὴν (Mt. 6:1), μηδέποτε (2 Tim. 3:7), μηδέπω (Heb. 11:7), μηκέτι (Mk. 9:25), μὴποτε (margin of W. H. in Heb. 9:17). Elsewhere in the N. T. a conjunction, μηδαμῶς (Ac. 10:14), μὴποτε (Ac. 27:29), μὴποτε (Ro. 9:11), μὴποτε (1 Cor. 6:3), μὴποτε (2 Th. 2:3). Μὴποτε is only a conjunction in the N. T. If μὴ is followed by οὐ as in 1 Jo. 3:10, ὦ μὴ ποιῶν δικαιοσύνην οὐκ ἔστιν ἐκ τοῦ θεοῦ, the last negative retains its force. So vice versa in Ac. 4:20. In Gal. 6:3 there is a sharp contrast between τι and μηδέν (both neuter abstracts referring to a person.).

(e) Καὶ μὴ. We saw that after a positive statement the negative was carried on by καὶ οὐ. So also we have καὶ μὴ as in Eph. 4:26, ὄργιζεσθε καὶ μὴ ἄμαρτάνετε, and in Lu. 1:20; 2 Cor. 12:21 In Ac. 18:9 nōte μὴ φοβοῖ ἀλλὰ λάλει καὶ μὴ σιωπήσεις, where a positive command comes in between the two examples of μὴ. In Jas. 3:14, per contra, μὴ κατακαυχᾶσθε καὶ πεισότεθε καθὰ τῆς ἁληθείας, the negative μὴ seems to cover both verbs connected by καὶ rather than μηδὲ. Cf. also Lu. 3:14. We have instances also of καὶ connecting a clause with the conjunction μὴ ποτε (Mt. 13:15=Mk. 4:12).1 In Lu. 14:29, ἵνα μὴ ποτε θέντος αὐτοῦ θεμέλλων καὶ μὴ ἵσχοντος—ἀρξόνται, we have μὴ ποτε with ἀρξόνται and μὴ with ἵσχοντος.

(f) Disjunctive Use of Μὴ. The simplest form of this contrast is μὴ—δὲ as in Lu. 10:20, μὴ χαίρετε—χαίρετε δὲ. Then we have μὴ—ἀλλὰ as in μὴ τοῦτον ἀλλὰ τὸν Βαροββᾶν, Jo. 18:40; μὴ φοβοῦ ἀλλὰ λάλει, Ac. 18:9. We have μὴ—πλήν in Lu. 23:28. In Lu. 10:20 we really have μὴ ὅτι—δὲ ὅτι. Moulton (ProL., 240) does not find μὴ ὅτι in the N. T., but considers μὴτε in p. 1 Cor. 6:3 as tantamount to it. See Jo. 13:9 for μὴ μόνον—ἀλλὰ καὶ. So Ph. 2:12. We need not trench further upon the conjunctions.

3. Combination of the Two Negatives.

---

1 Cf. W.-Th., p. 494.
(a) Μὴ οὐ. This is very simple. It is in the N. T. confined to questions where μή is the interrogative particle and οὐ is the negative of the verb. Each negative thus has its own force, though it is a bit difficult to translate the combination into good English. But it is good Greek. Moulton (Prol., p. 192) quotes Plato’s Protag. 312 Α, ὅλη ὧν οὐκ ὑπολαμβάνεις. Cf. also μή οὐχί in Jer. 23:24. So Ro. 10:18, μή οὐκ ἴκουσαν: We may render it ‘Did they fail to hear?’ expecting the answer ‘No.’ Paul repeats the same idiom in 10:19. See further 1 Cor. 9:4 f.; 11:22. 1 Cor. 9:8 is not an instance, since μή comes in one part of the question and οὐ in the other. We do have μή ποις οὐχ εὕρω after φοβοῦμαι in 2 Cor. 12:20, but here μή is a conjunction and οὐχ is the negative of εὕρω, both retaining their full force. The construction in 1 Jo. 3:10 is not pertinent.

(b) Οὐ μή. The use of οὐ—μή in Ac. 4:20 is not under discussion, nor the redundant μή after οὐ (Ac. 20:20, 27), but only the idiomatic οὐ μή with the aorist subj. (rarely present) or occasionally the fut. ind. Cf. οὐ μή φάγω, οὐ μή πείνω in the boy’s letter, P. Oxy. 119 (ii/iii A.D.). See Is. 11:9, οὐ μή κακοποιήσουσιν οὐδὲ μή δώσωνται. Whatever the origin of this vexed problem, the negative is strengthened, not destroyed, by the two negatives. We need not here recount the various theories already mentioned.1 See Tense and Mode. Let it go at Gildersleeve’s suggestion that it was originally οὔ· μή. Moulton (Prol., p. 249) quotes Giles to the effect that this explanation was offered in the Middle Ages (the ancients have all our best ideas) and notes “in one if not both of the best MSS. of Aristophanes it is regularly punctuated οὔ· μή.” In Mt. 13:29 we have οὔ· μή ποτε—ἐκριζώσητε where μή is a conjunction. Gildersleeve notes that οὔ μή is more common in the LXX and the N. T. than in the classic Greek.2 But Moulton (Prol., pp. 187–192) will not let it go at that. “In the LXX ἀνώτατος is translated οὔ or οὐ μή indifferently within a single verse, as in Is. 5:27.” It seems probable that the force of οὔ μή has worn down in the LXX and the N. T. In the non-literary papyri “οὔ μή is rare, and very emphatic,” Moulton notes. He urges also that in spite of the 100 examples in the text of W. H. the idiom in the N. T. is as rare as in the papyri when the 13 LXX quotations and the 53 from the words of Christ are removed, “a feeling that inspired language was fitly rendered by words of a peculiarly decisive tone.” But in these examples the force of οὔ μή is still strong. Of the other 34 some are probably weakened a bit as in Mt. 25:9; Mk. 13:2; Jo. 18:11. It is only in the Gospels and the Apocalypse (66 and 18 respectively) that οὔ μή occurs with frequency. It is interesting to observe that on this point Moulton gets the Gospels and Revelation in harmony [Page 1175] with the papyri by eliminating the 70 passages due to Semitic influence. Cf. Gildersleeve (A. J. P., iii, 202 ff.) and Ballentine (ib., xviii, 453 ff.). But Radermacher (N. T. Gr., p. 172) explains Mt. 24:21,

Giles, P., A Short Manual of Comparative Philology. 2d ed. (1901).

2 Justin Martyr, p. 169.
οῦ—οὖ, oû µή γένηται, not as a Hebraism, but as a “barbarism” like the Wesseley Papyrus xxvi. oû—oû µή γένηται μι κανινή. He quotes also Pap. Lugd. II, p. 107, 9, ἐὰν τὸν θέλης γυναίκας oû µή σχεθήνα. Cf. oû µή ἀδικηθῇ (Rev. 2:11); oû µή ἔσται (Mt. 16:22). There is a climax in Rev. 7:16, oû—oûδέ—oûδὲ µή πέσῃ. Even oû µή was not strong enough sometimes, so that we have oûδέ and oû µή in Heb. 13:5, oû µή σε ἰνδο oûδε oû µή σε ἔγκαταλιπη. So also oûδέν oû µή ἀδικήσει (Lu. 10:19). In Mk. 13:2 we have oû µή in both the principal and the subordinate (relative) clause.

IV. Interrogative Particles (ἐπερωτηματικαί παραθήκαι). It is not the mode that we have under discussion here, but simply the particles used in the various forms of questions.1

1. Single Questions.

(a) Direct Questions.

(i) No Particle at all. So συνήκατε ταῦτα πάντα; (Mt. 13:51). So 13:28 and very often. Here the inquiry is colourless except as the tone of voice or context may indicate one’s attitude. In fact, most interrogative sentences have no interrogative word at all. Cf. Lu. 13:2; Jo. 7:23; 13:6; Ac. 21:37, etc. Hence it is sometimes a matter of doubt whether a sentence is interrogative or declarative. Cf. Jo. 16:31; Ro. 8:33; 14:22; 1 Cor. 1:13; 2 Cor. 3:1; Heb. 10:2; Jas. 2:4, etc. It may be doubtful also at what point the question ends. Cf. Jo. 7:19; Ro. 4:1. Winer2 rightly says that on this point grammar cannot speak.

(ii) The Use of Negative Particles. They are used to indicate the kind of answer expected. This subject has already had sufficient discussion. See under oû and µή. Oû expects the answer ‘yes’ (cf. Mt. 7:22) and µή the answer ‘no’ (cf. Jo. 7:31). In Jo. 18:37 we have oûκοῦν, according to W. H., which has lost its negative force, but oûκοῦν would preserve it. Probably Pilate was hardly ready to go that far unless in jest. The use of µή varies greatly in tone. The precise emotion in each case (protest, indignation, scorn, excitement, sympathy, etc.) depends on the context. Cf. Jo. 4:29; 6:67; 7:47; Lu. 6:39; Ro. 10:18; 11:1. In Jo. 3:10 the first part of the question has no negative and the second part has oû.

Wesseley

———, Proleg. ad papyrorum graecorum novam collectionem edendam (1883).

1 Cf. W.-Th., pp. 508 ff.; Robertson, Short Gr., pp. 177 ff.
2 W.-Th., p. 508.
Other Particles. There are not many. There is ἄρα (akin to root of ἄρ-αρ-ισκω, ‘to join’), an illative particle which occurs with οὐκ as in Ac. 21:38, μήτι as in 2 Cor. 1:17, or with τίς as in Mt. 18:1. This classic use is not strictly interrogative, but illative in the interrogative sentence. But ἄρα, from the same root2 with more vocal stress, is interrogative. Indeed, it is sometimes doubtful which accent is correct, as in Gal. 2:17, where ἄρα is probably correct. In Ro. 14:19, however, W. H. give ἄρα οὖν. We have ἄρα in Lu. 18:8 and ἄρα γε in Ac. 8:30. ἄρα looks backward, ἄρα forward. But the accent is a question of editing. The use of εἰ in direct questions is either a Hebraism2 or involves ellipsis. Cf. Mt. 12:10, εἰ ἔξεστι τίς σάββασιν θεραπεύειν; So also 19:3. It is common in the LXX (cf. Gen. 17:17) but is foreign to the old Greek. The classic Greek, however, did use εἰ in indirect questions, and this fact may have made it easier for the direct use of εἰ to arise. Radermacher (N. T. Gr., p. 136) takes this εἰ = ἦ. The N. T. does not use ἦ, but the papyri have it: ἦ µείνωι ἐν βακχίαδι; Π. Fay. 137 (i/A.D.). So the question to the oracle.

Interrogative Pronouns. The most common in the N. T. is τίς (cf. Mt. 3:7). Other words are frequently added, as ἄρα (24:45); γάρ (9:5); οὖν (Lu. 3:10). The various uses of τί as adverb (Mk. 10:18, Lu. 16:2); with prepositions, as διὰ τί (Mt. 9:11) and εἰς τί (Mk. 14:4) or χάριν τίνος (1 Jo. 3:12); or elliptically, as τί δικ (Lu. 2:49) and ἣν τί (Mt. 9:4), need not detain us. The double interrogative τίς τί appears in Mk. 15:24. Both τίς and ποίος occur in 1 Pet. 1:11. For ποταπός see Mt. 8:27, and πόσος see 15:34. We need not tarry longer on these elementary details.

Interrogative Conjunctions. These are common besides τί (as in Mk. 10:18). The possible exclamatory use of τί in Lu. 12:49=‘how fine.’ Cf. ποσάκις (Mt. 18:21); πότε (25:38); ἐως πότε (17:17); ποῦ (Lu. 8:25); πῶς (10:26); πόθεν (Mt. 13:27), etc.

Indirect Questions. Here there must be either a pronoun or a conjunction.

Pronouns. The use of τίς (τί) is common. Cf. Mt. 6:25; Lu. 9:46; Jo. 2:25; Ac. 19:32. We find ὅτι so used in Ac. 9:6 and ὢ apparently so in 1 Tim. 1:7. Certainly ὅποιος occurs in this construction (1 Cor. 3:13). The same thing is true of ὅς (Mk. 5:19) and ὅποιος (Jas. 1:24). Cf. also ποίος (Mk. 11:29); πόσος (Mt. 27:13); ποταπός (Lu. 7:39); πηλίκος (Heb. 7:4), and ἡλίκος in Gal. 6:11 (margin of W. H.) if this reading be accepted. Cf. τί in Ac. 12:18.

Conjunctions. These are also common, as εἰ (Mk. 15:44); πόθεν and ποῦ (Jo. 3:8); πότε (Mk. 13:33); πῶς (1 Th. 1:9); ὅπος (Lu. 24:20); ὅπου (Mk. 14:14); μὴ ποτε (Lu. 3:15), etc.

Double Questions. These are rare.

---

1 Jann. (Hist. Gk. Gr., p. 411) notes the pre-Attic ἦ ἄρα.
2 Blass, Gr. of N. T. Gr., p. 260.
(i) **Direct.** There is no instance of πότερον—ἡ. We do have τίς—ἡ (Mt. 9:5; 23:17; 27:17), the later Greek caring little for the dual idea in πότερον. We more commonly have simply ἢ with the second part of the question and nothing in the first, as in Lu. 20:2, 4; Ro. 2:3 f. We may have ὢ Ί (Mt. 22:17) and ἢ μῆ (Mk. 12:14). Sometimes we have simply ἢ at the beginning of the question with a reference to an implied alternative (1 Cor. 9:6; 2 Cor. 1:17). This ἢ may come in the middle of the sentence as in 1 Cor. 9:8. The ἢ may even precede τίς as in Mt. 7:9.

(ii) **Indirect.** There is one instance of πότερον—ἡ in an indirect question (Jo. 7:17).

V. **Conjunctions (σύνδεσμοι).** In the nature of the case much had to be said about the conjunctions1 in the treatment of the Sentence and also Subordinate Clauses. The syntactical principles controlling both paratactic and hypotactic sentences have received adequate discussion. But conjunctions play such an important part in the language that it is best to group them all together. They connect words, clauses, sentences and paragraphs, and thus form the joints of speech. They have a very good name, since they bind together (con-jungo) the various parts of speech not otherwise connected, if they need connection, for asyndeton is always possible to the speaker or writer. The point here is to interpret each conjunction as far as possible so that its precise function may be clear.

1. **Paratactic**2 **Conjunctions (σύνδεσμοι παρατακτικοί).**

(a) **Copulative.** Conjunctions which connect words and clauses are evidently later in development than the words and clauses. The use of conjunctions came to be very common in the Greek so that the absence was noticeable and was called asyndeton. [Page 1178] But it is a mistake to suppose that these connectives are necessary. One may fail to use them as a result of rapidity of thought as the words rush forth, or they may be consciously avoided for rhetorical effect. Cf. βλέπετε, βλέπετε, βλέπετε, in Ph. 3:2, with Tennyson’s “Break, break, break.” All this is entirely within the province of the speaker. Cf. 1 Cor. 3:12, χρυσόν, ἄργυρον, λίθους τιμίους, ξύλα, χόρτον, καλά ἡν. Cf. also 1 Cor. 13:4–7 where the verbs follow one another in solemn emphasis with no connective save one δέ. In the same way contrast may be expressed without conjunctions as in 1 Cor. 15:43 f.2 In Luke and John there is a pleasing alternation of asyndeton and conjunctions. Cf. Gal. 5:22. The first conjunctions were the paratactic or co-ordinating, since language was originally in principal sentences.3 The copulative (connecting) conjunctions are the simplest and earliest type of the paratactic structure. They simply present the words or clauses as

---

1 The distinction between adv. and conj. is, of course, arbitrary. Conjs. are advs. just as the other particles are. Cf. Paul, Principles of the Hist. of Lang., p. 406.
2 “Co-ordinating” is from co-ordino, to range together.
2 Cf. W.-Th., p. 538.
3 Brug., ib., p. 552.
on a par with each other. The primitive conjunctions were monosyllabic like καί, τέ, δέ.

(i) Τέ. This word appears to be related to the Sanskrit ça, the Latin *que* (with labio-velar *g*), and the Gothic -h. These words are all enclitic and postpositive. The Sanskrit is almost devoid of conjunctions which were so highly developed by the Greek and Latin, but ça is one of the few possessed by this ancient tongue. There is a striking connection between quis, *que*, quis-*que* and τίς, τέ, τίς. The Thessalian dialect has κίς for τίς and κίς-κις. We have τίς τέ in the old Greek. Τέ shows this double pronominal origin in its use for *and* and *ever* (just like *que*, quis-*que*). The indefinite use is distinctly Homeric.9 The use of ἐπεί τέ, ὁς τέ was old Ionic and continued in Attic tragedy, as οἶδας τέ did in Attic prose. Cf. Radermacher (*N. T. Gr.*., p. 5). Indeed, some scholars10 hold that the correlative use (τέ—τέ) was the original one, but this is doubtful. It seems certain that τέ indicates a somewhat closer unity than does καί. This close correlative use is certainly very old. Cf. σοῦ τέ έγώ τέ in Homer.11 In the N. T. it is rare except in the Acts, where it occurs some 175 times. It is common in all parts of the book and is thus a subtle argument [Page 1179] for the unity of the work (we-sections and all). It is something additional, but in intimate relation with the preceding. We find τέ alone as in Ac. 2:33, where ὑψωθεῖς and λαβὼν are united by τέ. Cf. also 10:22, where again two participles are connected. In 23:24, κτήσας τέ παραστήσασα, the change from the direct to the indirect discourse is marked by τέ, whereas καί is used twice before to join minor phrases. Τέ puts παραστήσασα on a par with ἔτοιμασας.1 In the same way in 20:11 the first two participles are joined by καί and then both are related to the next by τέ. The same idiom occurs in Jo. 6:18, where τέ gives an additional item somewhat apart from the καί—καί just before. In Jo. 4:41 καί—τέ are not co-ordinate. Καί introduces the whole sentence and τέ connects the two parts. Cf. thus δέ—τέ in Ac. 2:37. But τέ—τέ is strictly correlative. Cf. the Latin *que*—*que*, English *as*—*so*. See Ac. 2:46 where the two participles are co-ordinated. In Ro. 14:8 we have τέ four times in succession with ἐὰν. There are here two pairs of conditions. The parts of each pair are balanced carefully. The disjunctive εἴτε—ἐίτε (cf. 1 Cor. 12:26) is at bottom this same correlative use of τέ. So as to οὐτε—οὐτε (Mt. 12:32) and μήτε—μήτε (Ac. 27:20). The use of τέ—καί is also common where there is an inner bond, though no hint is given as to the relative value of the matters united. Cf. άρχηθες τέ καί γραμματεῖς (Lu. 22:66); ποιήσαν τέ καί διδάσκειν (Ac. 1:1); ἀνόρες τέ καί γυναῖκες (8:12); άνωθεν τέ καί έγένετο (21:30); δικαίων τέ καί ἀδίκων (24:15); μικρῷ τέ καί μεγάλῳ (26:22); ἔλλησιν τέ καί βαρβάροις (Ro. 1:14); έσυδαιού τέ πρώτων καί ἔλληνος (2:9), etc. For τέ καί—τέ see Ac. 9:15, and for τέ

---

5 *W.-Th.*, p. 434.
1 This classic idiom is a mark of Luke’s literary style. But in the κοινή τέ is on the retreat before καί. *Jann.*, Hist. Gk. Gr., p. 401.
καὶ—τέ—καὶ 26:20. In Jo. 4:11, οὖτε—καὶ, we really have the τέ—καὶ (‘both—and’) construction. Cf. Latin non que—et. We even have οὖτε—οὖτε—καὶ in Jo. 5:37 f. In Ac. 27:20 μήτε—μήτε stand together and both are parallel to τέ following. *Per contra* we find τέ—δὲ in Ac. 19:2 and also 3. The manuscripts often vary between τέ and δέ (cf. Ac. 3:10; 4:14, etc.). We have τέ γάρ (common from Aristotle on²) in Ro. 1:26 followed by ὃμιλος τε καὶ. In Heb. 2:11 note τέ γάρ—καὶ. As a rule τε stands after the word or words that are paralleled, but this is not always so.

(ii) Καί. The etymology of this conjunction is disputed. Curtius³ makes it the locative case of the pronominal stem κα–, κο–, so [Page 1180] that it would ultimately come from the same root as τé (que). It would thus mean ‘in this respect,’ ‘this besides.’ Brugmann¹ finds its original sense in κοινός, Latin co-, cum, Gothic ġa. The idea would then be ‘together with,’ ‘in addition to.’ The Arkadian, South Achæan and Cypriote dialects use κάς and κά=καί. Whatever the origin, it all comes to the same thing in the end. It is by far the most frequent of all the conjunctions or other particles in the N. T. It is so common in fact that Moulton and Geden do not list it in their concordance. This in itself is in accord with the later Greek idiom, as Thumb² notes in Aristotle and in the modern Greek and Moulton³ in the papyri. Moulton cites Par. P. 18, ἔτι δόον ἡμέρας ἔχομεν καὶ φθάσεις ἔνος Πηλούσι, as parallel to Mk. 15:25; Jo. 4:35. But there can be little doubt that the extreme fondness for parataxis in John’s Gospel, for instance, is partially due to the use of καί in the LXX for the Hebrew † which “means a hook and resembles a hook in shape.”⁴ It was certainly used to “hook” together all sorts of sentences. There is not the same unity in the older Greek in the matters united as is true of τέ. Καί “connects in a free and easy manner⁵ and the Hebrew † still more loosely. There are three main uses of καί which appear in the N. T. as in all Greek.

*The Adjunctive Use (‘Also’).* This is possibly the original use, though one cannot tell. It is thus like the Latin et-iam, English too (to)=addition to something already mentioned, and is common enough in all stages of the language.⁶ A good example of this use of καί is seen in Mt. 8:9, καὶ γὰρ ἔγγο τὸν ἰησοῦν ἐν Ἰησοῦν. The καί here points to Christ’s relation to the boy. The centurion, like a true soldier, does not say that he is a man who gives orders, but rather one who obeys them. He has the true

Curtius

CURTIUS, G., Greek Etymology. 2 vols. (1886).

———, Studien zur griech. und lat. Grammatik (1868–1878).

3 Gk. Etymology.
1 Griech. Gr., p. 542.
2 Hellen., p. 129.
3 Prol., p. 12.
4 Farrar, Gk. Synt., p. 196.
5 Jann., Gk. Gr., p. 401.
military spirit and how Jesus can cure the boy without going to see him. The καὶ is here very significant. Cf. οὗτος καὶ ὄμη γς in Mt. 7:12, where the Golden Rule is applied to Christ’s hearers by καὶ. Cf. Jo. 7:3 ἵνα καὶ οἱ μαθηταὶ σου, (12:10) ἵνα καὶ τὸν Δασσαρδ. This use of καὶ is more frequent in Luke than elsewhere in the N. T. Cf. καθώς (Lu. 20:3); ἢ καὶ (Lu. 12:41); δὲ καὶ (12:54, 57); τί καὶ (1 Cor. 15:29); καὶ γὰρ (Mt. 8:9); ἦν καὶ (Gal. 6:1); ἕκακα (2 Cor. 11:15); καὶ δὲ (Mt. 10:18); [Page 1181] ὄς καὶ (Ac. 11:17); καθός καὶ (Ro. 15:7); οὕτω καὶ (Ro. 6:11); δὲ καὶ (Ac. 24:6, 8); ὧμοιος καὶ (Jo. 6:11); ὠσαύτως καὶ (1 Cor. 11:25); καθάπερ καὶ (1 Th. 3:12); διὰ καὶ (Lu. 1:35); διὰ τοῦτο καὶ (Lu. 11:49); ἀλλά καὶ (24:22), etc. So then καὶ in the sense of ‘also’ occurs with nouns, pronouns, verbs, adverbs, conjunctions. It may refer to a word or a clause. Cf. ἄλλως τε καὶ, B. G. U. 530 (i/A.D.). For the use of ὁ καὶ see the Article, and for σὺν καὶ see Prepositions. It is common for καὶ to sum up a sentence that precedes. For the relative and articular participle see the καὶ in the sentences in Mt. 5:39–43. Here καὶ in the apodosis of a conditional sentence we find καὶ as in Jo. 14:7. Cf. Heb. 7:26, where καὶ almost means ‘precisely,’ and Mt. 6:10, where it means ‘just so.’ Cf. Ro. 11:16. So with ὅ we find it in the apodosis (Jo. 5:19). Cf. also after ὠσπέρ in 5:26. Sometimes the καὶ seems to be redundant as in Lu. 11:1, καθὼς καὶ, or ὦς καὶ in 1 Cor. 7:7. We may indeed have καὶ (‘also’) in both parts of the comparison, a studied balancing of the two members of the sentence as in Mt. 18:33, καὶ σὲ—ὡς καθώς. So Ro. 1:13, καὶ ἐν ὑμῖν καθὼς καὶ ἐν τοῖς λουποῖς ἔσχεσιν. See oίδα καὶ—οίδα καὶ (Ph. 4:12).

The Ascensive Use (‘Even’). The notion of ‘even’ is an advance on that of mere addition which is due to the context, not to καὶ. The thing that is added is out of the ordinary and rises to a climax like the crescendo in music. Cf. Latin adeo. Cf. οὗ μόνον, ἄλλα καὶ (Ac. 21:13; Ro. 13:5). This use of καὶ depends wholly on the context. Cf. Mk. 1:27, καὶ τοῖς πνεύμασι τοῖς ἀκαθάρτοις ἔπῃσέσθαι. (So Lu. 10:17). Cf. also καὶ οἱ τελῶναι and καὶ οἱ ἔθνοι, Mt. 5:46 f. See further Ac. 10:45; 11:1, 20; Gal. 2:13. The use of καὶ εἴ belongs here. (Cf. 1 Cor. 8:5.)

The Mere Connective (‘And’). The difference between καὶ as ‘and’ and καὶ as ‘also’ is very slight, whichever was the original idea. The epexegetic or explicative use of καὶ occupies a middle ground between ‘also’ and ‘and.’ Blass treats it under ‘also.’ Cf. Lu. 3:18, πολλά καὶ ἔτερα παρακαλάων, where the “connective” force of καὶ is certainly very slight. So also Jo. 20:30, πολλά καὶ ἄλλα σημεῖα. See further Jo. 1:16, καὶ χάριν ἄντι χάριτος, where the clause is an explanatory addition. Cf. (Ac. 22:25) καὶ ἀκατάκριτον, (1 Cor. 2:2) καὶ τοῦτον ἐστιν ἠμῶν, (Ro. 13:11) καὶ τοῦτο (Latin idque) which is our ‘and that too’ where we combine ‘and’ and ‘also’ (‘too’) in the καὶ, (Heb. 11:12) καὶ τὰῦτα (frequent in ancient [Page 1182] Greek). See in particular Eph. 2:8, καὶ τοῦτο οὕκ ἐξ ὑμῶν, where καὶ τοῦτο refers to the whole conception, not to χάριτι. The simple copulative idea is, however, the most common use of καὶ where words are piled together by means of this conjunction. Sometimes the connection is as close as with τέ. Thus ὁ θεὸς καὶ πατήρ (2 Cor. 1:3); καλῆς καὶ
ἀγαθῇ (Lu. 8:15). But the words may be very loosely joined in idea, as οἱ Φαρισαῖοι καὶ δασκάλοι (Mt. 16:1). Καὶ may be used to connect all sorts of words, clauses and sentences. Thus λέγω ἔρχου, καὶ ἔρχεται (Mt. 8:9). The use of καὶ after the imperative is seen in Mt. 11:29. The chain with καὶ as the connective may go on indefinitely. Cf. the four examples in Ph. 4:9; five in Ro. 9:4; the six in Rev. 7:12 (so 5:12). So we have καὶ three times in 1 Cor. 15:4 (καὶ to connect ἄτη clauses). In Rev. 12–16 every paragraph and most of the sentences begin with καὶ. In fact it is true of much of the Apocalypse. If one turns to First Maccabees, it is true even to a much greater extent than in the Apocalypse. In First Maccabees καὶ translates the Hebrew י. But Thumb1 has found this repetition of καὶ in Aristotle so that the Hebrew influence simply intensified a Greek idiom. We have noted the use of καὶ with τέ (τέ—καὶ Cf. Ro. 1:20). The use of καὶ—καὶ is far more common in the sense of 'both—and' as in Ac. 2:29, καὶ ἔστησε καὶ ἔστα. Cf. Mk. 4:41; Ph. 2:13; Ac. 26:29. Sometimes the connection almost amounts to 'not only, but also.' In Col. 2:16 note καὶ—ὅ. Cf. κἀν—κἀν (Lu. 12:38). A. Brinkmann contends that in the papyri and late Greek κἀν is sometimes 'at any rate' and is never a mere link (Scriptio continua und Anderes, Rhein. Mus. LXVII, 4, 1912). In Lu. 5:36 we have καὶ—καὶ ὦ (so Jo. 6:36), and in Jo. 17:25 καὶ ὦ—δὲ—καὶ. It is usual to have καὶ ὦ after an affirmative clause as in Jo. 10:35. Cf. καὶ μή in 2 Cor. 9:5. See Negative Particles. In Lu. 12:6 καὶ ὦ follows a question with ὦχ. Καὶ connects two negative sentences in Lu. 6:37. For ὦτε—καὶ see Jo. 4:11. Sometimes καὶ begins a sentence when the connection is with an unexpressed idea. Children use “and” thus often in telling stories and asking questions. Cf. καὶ ὦ ἠθά in Mt. 26:69 (and 73) like Et tu, Brute. See also Mk. 10:26, καὶ τίς δύναται σωθῆναι. So also Lu. 10:29; Jo. 9:36; 2 Cor. 2:2. Cf. also the use of καὶ in parenthesis as in Ro. 1:13, καὶ ἐκκολοθηθα καὶ ὦν τοῦ δεῦρο. The context gives other turns to καὶ that are sometimes rather startling. It is common to find καὶ where it has to bear the content 'and yet.' So Jo. 3:19; [Page 1183] 4:20; 6:49; 7:30; 1 Jo. 2:9. The examples are common in John’s Gospel (Abbott, Joh. Gr., pp. 135 ff.). See Jer. 23:21. In Mk. 4:4 note μὲν—καὶ. In 1 Cor. 10:21 we have ὦ—καὶ in contrast. Cf. also Mt. 3:14, καὶ ὦ ἐρχῇ πρὸς με; So also Ph. 1:22, καὶ τί αἰρήσσομαι. This idiom occurs in Plato, and Abbott notes a number of them in the Gospel of John. Cf. 1:5; 2:20; 3:13; 5:39 f.; 7:27 f.; 8:57, etc. In Lu. 12:24 καὶ is almost equal to ἀλλά, that is, the context makes contrast. Cf. also Mt. 6:26 (ὦ—καὶ); Mk. 12:12; Lu. 20:19; Jo. 18:28. Tholuck1 so takes καὶ in Ro. 1:13 (the parenthetical καὶ). Sometimes καὶ seems imitative of the Hebrew י by almost having the sense of כ or ה (‘that’) as in Mt. 26:15; Mk. 14:40; Lu. 9:51; 12:15. In particular note καὶ ἐγένετο καὶ (as in Lu.

1 Hellen., § 129.
Abbott

Tholuck THOLUCK, Beiträge zur Spracherklärung des N. T.
1 Beitr. zur Spracherklärung d. N. T., p. 35.
5:1, 12, 17, etc.). In Mt. 16:6 observe ὅρῃ καὶ. So Lu. 12:15 and Mt. 26:15. In modern Greek καὶ has so far usurped the field that it is used not only in all sorts of paratactic senses like ‘and,’ ‘but,’ ‘for,’ ‘or,’ ‘and so,’ but even in hypotactic senses for ὥς or ποῦ, declarative and even consecutive (Thumb, Handb., p. 184). In Mk. 3:7 καὶ comes near taking the place of ὅ, for in the next verse there are five instances of καὶ co-ordinate with each other, but subordinate to καὶ in verse 7. Sometimes after καὶ we may supply ‘so’ as in καὶ λάμπει, Mt. 5:15; καὶ βλέπωμεν, Heb. 3:19. See also Ph. 4:7. This is a kind of consecutive use of καὶ. Cf. Lu. 24:18. The fondness for co-ordination in the Gospels causes the use of καὶ where a temporal conjunction (ὅτε) would be more usual. Cf. Mk. 15:25, ἤν ὥρα τρίτη καὶ ἐσταύρωσαν (Lu. 23:44). But Blass admits that this is a classic idiom. Cf. Mt. 26:45; Lu. 19:43, where καὶ drifts further away from the ancient idiom. Cf. also καὶ ἵδοι in the apodosis, ‘and behold,’ as in Lu. 7:12. In 2 Tim. 2:20 note καὶ followed by ὅ μέν—ὁ δὲ. In Ph. 4:16 note καὶ thrice (one=‘even,’ two=‘both—and’).

(iii) Δέ. This conjunction is generally ranked wholly as an adversative particle. Monro says: “The adversative δέ properly indicates that the new clause stands in some contrast to what has preceded. Ordinarily, however, it is used in the continuation of a narrative.” As a matter of fact, in my opinion, Monro has the matter here turned round. The ordinary narrative use (continuative) I conceive to be the original use, the adversative the developed and later construction. The etymology confirms [Page 1184] this explanation, though it is largely conjectural. Brugmann associates it with the ἀκτ. δέ and possibly also with δὴ and the enclitic ending –δέ (οἶκα-δέ, ὁ-δέ, τοσός-δέ), while Hartung connects it with δὸ, δὲ, and Bäumlein with δευ-τέρος. The enclitic –δέ thus means ‘again,’ ‘back,’ while the conjunction δὲ would mean ‘in the second place’ or ‘a second comment’ or ‘an important addition’ (δὴ). But, however we take it, there is in the word no essential notion of antithesis or contrast. What is true is that the addition is something new and not so closely associated in thought as is true of τέ and καὶ. I prefer therefore to begin with the narrative and transitional (copulative) use of δέ. Kühner-Gerth call this use of δὲ for ‘something new’ (etwas Neues) copulative and give it separate discussion. Abbott has the matter correctly: “In classical Greek, δὲ, calling attention to the second of two things, may mean (1) in the next place, (2) on the other hand.” The first of these uses is the original one and is copulative. The second is adversative. Abbott notes also that δὲ in both senses occurs in Matthew and Luke nearly three times as often as in Mark and John. Its use is mainly in the historical books of the N. T. It is so common there that, as with καὶ, Moulton and Geden do not give any references. A good place to note

6 II, p. 274.
7 Joh. Gr., p. 104.
the mere copulative force of δέ is in the genealogy in Mt. 1:2–16 where there is no notion of opposition at all. The line is simply counted from Abraham to Christ. In verses 6 and 12 there are breaks, but the contrast is made by repetition of the names, not by δέ, which appears with every name alike. In Mt. 23:4 we have both uses of δέ. The first is properly translated ‘yea’ and the second ‘but’ (adversative). See further 1 Cor. 4:7 (δέ and δὲ καί) where there is a succession of steps in the same direction. So 15:35; 2 Cor. 6:15 f.; Heb. 12:6; and in particular the list of virtues in 2 Pet. 1:5–7. Sometimes a word is repeated with δέ for special emphasis, as δικαιοσύνη δέ in Ro. 3:22 (cf. 9:30). A new topic may be introduced by δέ in entire harmony with the preceding discussion, as the Birth of Jesus in Mt. 1:18 (‘Now the birth of Jesus Christ,’ etc.). The use of δέ in explanatory parenthesis is seen in Jo. 3:19 (‘And this is,’ etc.); 19:23 (‘Now the coat,’ etc.). For ὡς δέ (‘and when,’ ‘so when’) in John see 2:9, 23. In John [Page 1185] as elsewhere it is sometimes not clear whether δέ is copulative or adversative. Cf. 3:1, ἥν δέ. Is Nicodemus an illustration or an exception?1 The resumptive use of δέ, after a parenthesis, to go on with the main story, is also copulative. Cf. Mt. 3:1; Lu. 4:1. There is continuation, not opposition, in the use of καὶ δέ, as in Lu. 1:76, καὶ σὺ δέ, where δέ means ‘and’ and καί ‘also’ Cf. further Mt. 10:18; 16:18; Jo. 15:27. In Jo. 6:51 we have καὶ δέ in the apodosis of the condition in this sense. Δέ is always postpositive and may even occupy the third place in the sentence (Mt. 10:11) or even the fourth (Jo. 6:51) or fifth (1 Jo. 2:2) or sixth (Test. xiii, Patr. Jud. 9:1) as shown in chapter on Sentence.

In accord with the copulative use of δέ we frequently have οὐδέ and μηδέ in the continuative sense, carrying on the negative with no idea of contrast. Cf. Mt. 6:26, οὐ σπείρουσιν οὐδέ θερίζουσιν οὐδὲ συνάγουσιν. So also 6:28; Mk. 4:22, etc. In Jo. 7:5, οὐδέ γὰρ, we have οὐδέ in the sense of ‘not even’ as often (Mt. 6:29, etc.). In Mt. 6:15 οὐδέ means ‘not also’ (cf. also 21:27, etc.). All three uses of καὶ are thus paralleled in οὐδέ (merely οὐ δέ). For μηδέ in the continuative sense see Mt. 7:6. It means ‘not even’ in 1 Cor. 5:11. For the repetition of continuative μηδέ see 1 Cor. 10:7–10. In Mk. 14:68, οὔτε οὐδα οὔτε ἔπισταμαι (some MSS. οὐκ—οὐδέ), we come pretty close to having οὔτε—οὔτε in the merely continuative sense as we have in οὔτε—καί (Jo. 4:11; 3 Jo. 10).

(iv) Ἀλλά. Here there is no doubt at all as to the etymology. Ἀλλά is a virtual proclitic (cf. ἐπί and ἐπι), and the neuter plural was ἄλλα (ἄλλα, ‘other things’). Bäumlein2 does take ἄλλα as originally an adverb. But in reality it is ‘this other matter’3 (cf. τοῦτα and τοῦτο). In actual usage the adversative came to be the most frequent construction, but the original copulative held on to the N. T. period. It is a mistake to infer that ἄλλος means ‘something different.’ In itself it is merely ‘another.’ Like δέ the thing introduced by ἄλλα is something new, but not essentially in contrast.4 So the classic Greek used ἄλλα μήν in the emphatic continuative sense.5

---

5 Ib.
Blass\(^6\) observes that “the simple ἄλλα also has this force of introducing an accessory idea.” Cf. 2 Cor. 7:11, πώσην κατευρίσατο ὑμῖν σπουδήν, ἄλλα ἀπολογιάν, ἄλλα ἀγανάκτησιν, ἄλλα φόβον, ἄλλα ἐπιπόθησιν, ἄλλα ζήλον, ἄλλα ἐκδίκησιν. All these six examples are confirmatory and continuative. See further Lu. 24:21, ἄλλα γε καὶ σὺν ἀδικίᾳ τούτοις, where it is climactic, [Page 1186] not contradictory. The story is carried on by ἄλλα καὶ in verse 22. Cf. also 2 Cor. 1:9; Lu. 12:7; 16:21. In Ph. 1:18, χαίρω, ἄλλα καὶ χαίρησαμι, the connection is very close. The most striking example of all is Ph. 3:8, ἄλλα μενοῦνγε καὶ ἧγουμαι. In 2 Cor. 11:1, ἄλλα καὶ ἀνέχησθε, the tone of irony makes it doubtful whether to take ἄλλα as copulative or adversative. These and similar passages are not a dropping of the adversative idea, but merely the retention of the original copulative meaning. Abbott\(^7\) sees that “it is hard to find a satisfactory explanation of Jo. 8:26” along the usual line. If one no longer feels impelled to translate by ‘but,’ the trouble vanishes. Just make it ‘now’ or ‘yea’ and it is clear. Abbott\(^1\) likewise considers ἄλλα “inexplicable” in 4:23, because it has to mean ‘but.’ Cf. Jo. 16:2. ἄλλα ἔρχεται ἄρα, ’yea, the hour comes.’ The same use of ἄλλα occurs also in negative sentences. In 1 Cor. 3:3, ὁ δὲ νῦν δύνασθε after ὁ δὲ ἄρον. In 4:3, ἄλλα ὁ δὲ after an affirmative clause. In Ac. 19:2, ἄλλα ὁ δὲ, the thought answers the preceding question and is probably adversative, as is possible in 1 Cor. 3:3. The ἄλλα at any rate is negative like the ὁ δὲ. So as to ἄλλα οὔτε ἙρΦόνης (Lu. 23:15).

(b) Adversative. It should be stated again that not all of these conjunctions mean contrast (antithesis) or opposition, but the context makes the matter clear. The modern Greek keeps ἄλλα, ὅμως, πλῆν, but not ὁ δὲ and μέντοι (Thumb, Handb., p. 185).

(i) Δέ. In Jas. 1:13 f. note the two uses of δέ (contrastive and adversative).

Sometimes the positive and the negative are sharply contrasted and then δέ is clearly adversative as in Mt. 23:4, αὐτοὶ δὲ οὐ θέλουσιν. More obvious still is 6:14 f., ἐὰν ἄφητε—ἔδω δὲ μὴ ἄφητε. Cf. also 6:23. So μὴ ἂπανταὶ—ἀπαντάτε δέ (6:19 f.). Cf. 1 Cor. 1:10, etc. The contrast may lie in the nature of the case, particularly where persons stand in contrast as in ἐγὼ δέ (Mt. 5:22, 28, 32, etc.), οὐ δέ (Mt. 6:6; 1 Tim. 6:11); ἡμεῖς δέ (1 Cor. 1:23); ἡμαῖς δό (Mk. 8:29); the common ὁ δέ (Mk. 1:45), οἱ δέ (Mt. 2:5); αὐτός δό (Lu. 8:37); αὐτός δό Ἰησοῦς (Jo. 2:24), etc. The contrast is made more manifest by the use of μέν (see Intensive Particles) as in Mt. 3:11. In 1 Cor. 2:6, σοφίαν δὲ οὐ τοῦ αἰῶνος τούτου, an exception is filed to the preceding. This adversative use of δέ is very common indeed. Cf. further Mk. 2:18; Lu. 5:5; 9:9, 13; 24:21; Ac. 12:15; Ro. 8:9 ff.

(ii) ἄλλα. Just as ἄλλος (cf. 2 Cor. 11:4) can be used in the sense of ἔτερος (when it means ‘different,’ not merely ‘second’), so [Page 1187] ἄλλα can mean ‘another’ in contrast to the preceding. With a negative the antithesis is sharp as in Lu. 1:60, οὐχὶ, ἄλλα κληθήσεται Ιωάννης. So Jo. 6:32, οὐ Μωυσῆς—ἄλλα. ὁ πατὴρ (cf. 6:38). Cf. Mk. 9:37; 1 Cor. 15:37. In verse 39 of 1 Cor. 15 note ἄλλα ἄλλη μὲν—ἄλλη δέ where both ἄλλα and ἄλλη have the notion of difference due to the context. In 1 Cor. 9:12

---

6 Gr. of N. T. Gk., p. 269.
1 Joh. Gr., p. 100.
2 Ib., p. 99.
note ἀλλά twice. In Mt. 15:11 οὐ begins one clause and ἀλλά the other. Cf. 2 Cor. 4:5, οὗ γάρ ἐκατοντάς κηρύσσομεν, ἀλλά Χριστὸν Ἰησοῦν κύριον. So Mt. 5:17. In Lu. 12:51 note οὐχί, ἀλλά ἦν, and in 2 Cor. 1:13, ἀλλά—ἀλλά ἦν, a sort of pleonastic use of ἀλλά. This is a classical idiom. Cf. also οὐ μόνον—ἀλλά (Ac. 19:26) or ἀλλά καί (Ro. 5:3). See Negative Particles. For οὐχ ὅτι—ἀλλά see Jo. 7:22, for οὐχ Ἰνα—ἀλλά see 6:38. For ἀλλά γε in apodosis see 1 Cor. 9:2, for ἀλλά Col. 2:5; for ἀλλά οὐ, 1 Cor. 4:15. Sometimes ἀλλά Ἰνα may be elliptical as in Mk. 14:49; Jo. 1:8. ἀλλά alone may refer to an interruption in thought not expressed, as in Jo. 12:27. One of the most striking instances of ἀλλά occurs in Ac. 16:37, οὐ γάρ, ἀλλά, where οὐ γάρ means ‘not much’ with fine scorn (cf. καὶ νῦν: just before). Both Winer and W. F. Moulton (W.-M., p. 566) felt certain that ἀλλά never equalled εἰ μή, not even in Mt. 20:23 and Mk. 4:22. But J. H. Moulton (Prol., p. 241) quotes Tb. P. 104 (i/B.C.), καὶ μὴ ἔξεστος Φιλίσκωι γυναῖκα ἀλλὴν ἑπαγαγέσθαι ἀλλὰ ἄπολλονίαν, where ἀλλά means practically ‘except.’ See also Gen. 21:26. Moulton suggests that, since εἰ μή (brachylogy) in Lu. 4:26 f.; Rev. 21:27, means ‘but only,’ the same may be true of ἀλλά.

(iii) Πλήν. Curtius gets it from πλέον (‘more’), but Brugmann finds its original meaning to be ‘near by.’ At any rate it was a preposition (Mk. 12:32). Cf. Ac. 15:28, πλέον πλὴν τούτων where the two words exist together. Probably its original use as a conjunction is seen in the combination πλὴν ὅτι (Ph. 1:18). It is chiefly confined to Luke’s writings in the N. T. As a conjunction it is always adversative (cf. Lu. 6:24; 12:31, etc.). In Mt. 26:39 note πλὴν οὔχ ὡς—ἀλλὰ ὡς. The classical language used it

1 Blass, Gr. of N. T. Gk., p. 269.
Moulton

———, Characteristics of N. T. Greek (The Expositor, 1904).

———, Einleitung in die Sprache des N. T. (1911).

———, The Science of Language (1903).

as a preposition and with ὅτι, but Aristotle\(^3\) shows the existence of πλὴν as a conjunction which developed in the vernacular. Blass\(^4\) notes that Paul uses it at the end of an argument to single out the main point. Cf. 1 Cor. 11:11; Eph. 5:33; Ph. 3:16; 4:14.

**[Page 1188]** (iv) Μέντοι. This word is a combination of two intensive particles (µέν, τοί), and is used to mean ‘however.’ Cf. Jo. 4:27; 12:42. It occurs in the N. T. only eight times.

(v) Ὄμως. This word is even more rare than µέντοι. It occurs with two participles (1 Cor. 14:7; Gal. 3:15) and once with µέντοι (Jo. 12:42).

(vi) Εἰ µή. This phrase marks an exception, as in Mt. 12:4; Jo. 17:12. We even have ἔκτος εἰ µή (1 Cor. 14:5; 15:2; 1 Tim. 5:19).

(c) Disjunctives. Dionysius Thrax calls this construction σύνθεσις διαζευκτική. It was always possible to express alternative ideas without any conjunction (cf. the Latin nolens volens) or by copulative conjunctions (δέ, καί), a construction common in the vernacular\(^1\) (cf. Hebrew יִהְיָה). Dissimilar things may be united by καί as in Col. 3:11, but we do not have to take καί as being ἤ or vice versa.\(^2\)

(i) Ἤ. Its origin from ἤ (enclitic) is held by Brugmann.\(^3\) They are equivalent in Homer. We may have just ἤ as in Mt. 5:17. For ἤ καί see Mt. 7:10; Lu. 18:11. In the sense of ‘or’ ἤ may be repeated indefinitely (Ro. 8:35). In Ro. 1:21 we have οὐχ — ἤ as in 4:13. See μήτω — μηδέ — ἤ (Ro. 9:11). This use in negative clauses appears in Thuc. 1. 122, and later writers. In 1 Th. 2:19 note ἤ οὐχ ἦ καί. In Mt. 21:23 we have καί τίς, while in Lu. 20:2 (parallel passage) the reading is ἤ τίς. This does not prove καί and ἤ to be synonymous. The logion was translated differently. The modern Greek retains οὔτε, μήτε and ἤ (Thumb, Handb., p. 185). In 1 Cor. 11:27, δός ἤν ἔσθω ἤ τὸν δρότον ἤ πίνῃ τὸ ποτήριον τοῦ κυρίου, some MSS. have καί, but ἤ is the true text. This, however, does not mean that some partook of one element and some of the other, but that, whatever element was taken in this way, there was guilt. The correlative use of ἤ—موافقة (‘either—or’) is also frequent.\(^4\) Cf. Mt. 6:24; 1 Cor. 14:6. In Ro. 6:16 note ἤτοι—موافقة. As a disjunctive we have πότερον — ἤ in Jo. 7:17 and ἤ — ἤ — ἤ in Mk. 13:35. For πρὶν ἤ see Mt. 1:18; for ἤ after θέλω see 1 Cor. 14:19; after καλόν, Mt. 18:8; after χαρά, Lu. 15:7; for ἤ — ἤ, ἤ, Lu. 12:51. Radermacher (N. T. Gr., p. 27) finds ἤ τοι — ἤ, B. G. U. 956; ἤ τοι — ἤ τοι, [Page 1189] Vett. Val., p. 138, 11; ἤτε — ἤ, I. G. XII, 2, 562, 5 (Roman time); ἤτε — ἤτε, Quaest. Barth., pp. 24, 30.

---

3 Blass, Gr. of N. T. Gk., p. 268.
4 Ib.
2 W.-Th., p. 440.
3 Griech. Gr., p. 541.
(ii) ἐτῆ—ἐτῆ (ἐάντε—ἐάντε). These conditional particles are like the Latin *sive-sive*. Cf. 1 Cor. 10:31, ἐτῆ—ἐτῆ—ἐτῆ. So 12:13; 14:7. We have ἐτῆ eight times in 3:22. In 14:7 it follows ἦ—הדפסה in verse 6. For ἐάντε—ἐάντε see Ro. 14:8.

(iii) Οὔτε——Οὔτε (μήτε—μήτε). We have seen that there is nothing inherent in οὔτε to make it disjunctive. Cf. Jo. 4:11; 3 Jo. 10. It is simply οὔ and τέ (cf. οὖ δέ), a negative copulative conjunction. In Rev. 5:3 f. we have οὖδέ—οὔτε (cf. Gal. 1:12) and the next verse οὖδεῖς—οὔτε. In Ac. 24:12 f. we have οὔτε—οὔτε—οὔτε—οὖδέ. Cf. Lu. 20:35 f. In Jo. 5:37 f. note οὔτε—οὔτε—καὶ οὖ. In 1 Cor. 6:10 note οὔτε—οὔτε—οὖ—οὖ. In Jas. 3:12 cf. οὔτε after question. A good example of the correlative οὔτε—οὔτε is 1 Cor. 3:7. In Ro. 8:38 f. οὔτε occurs ten times. In Ac. 23:8 we find μή—μήτε—μήτε. This is also just a copulative negative conjunction (μή τε). In Mt. 5:34–36 we have μή—μήτε—μήτε—μήτε. In 2 Th. 2:2 we have μηδέ—μήτε—μήτε. In Lu. 7:33 μή—μήτε, while in 9:3 μηδέν is followed by μήτε five times. There is often some confusion in the MSS. between μηδέ and μήτε, οὖδέ and οὔτε. Blass rejects οὔτε οὖδα οὔτε ἐπίσταμαι in Mk. 14:68 (BDL), but on whimsical grounds.

(d) Inferential Conjunctions. It is not easy to draw a distinction between “inferential” and “causal.” There is no doubt about ἃρα and οὖν. These are inferential paratactic particles. What about γάρ? Monro calls it causal. Kühner-Gerth treat all three as causal. Perhaps it is just as well to reserve the term “causal” for the hypotactic particles ἢτε, ἢπει, etc. One has to be arbitrary sometimes. And even so these particles (ἃρα, οὖν, γάρ) were originally just transitional or explanatory in sense. Blass calls them “consecutive” co-ordinate conjunctions.

(i) ἃρα. The etymology seems to be clear, though not accepted by all scholars. The root ἄρ—(ἄρ—ἄρ—ἰσκο, ‘to fit’) suits exactly. It means then ‘fittingly, accordingly.’ Cf. our “articulate” (*articulus*). The word expresses some sort of correspondence between the sentences or clauses. It was postpositive in the ancient Greek, but in the N. T. it is not always so. Cf. [Page 1190] Mt. 12:28; Ac. 17:27. It occurs some 50 times in the N. T., in Matthew, Mark, Luke, Acts, Paul’s Epistles, and Hebrews. The original notion of mere correspondence is apparently preserved in Lu. 11:48, ἃρα μάρτυρες ἔστε, ‘so ye are witnesses.’ Cf. also Ac. 11:18. In Mk. 11:13; Ac. 17:27, ἐὰν ἃρα has the idea of ‘if haply.’ Klotz takes ἃρα to describe the unexpected and strange, something extrinsic, while Bäumlein considers it a particle giving point to what is immediately and necessarily conclusive. Most of the N. T. instances seem to be clearly illative. Cf. Mt. 17:26 f.; Ro. 7:21. It has γε added three times (cf. Mt. 7:20; 17:26 f.; Ac. 17:27). Paul is specially fond of ἃρα οὖν (Ro. 5:18; 7:3, 25, etc.). Once he has ἃρα νῦν (Ro. 8:1). ἃρα occurs also in the apodosis (Mt. 12:28; Gal. 2:21). We have μήτι ἃρα in a question in 2 Cor. 1:17.

---
1 Gr. of N. T. Gk., p. 265.  
3 II, p. 317.  
4 Gr. of N. T. Gk., p. 272.  
(ii) Γάρ. There is no doubt as to the origin of this word. It is a compound of γέ and ἀρα and is always postpositive. It is called σύνδεσµος ἀττικολογικός, but it does not always give a reason. It may be merely explanatory. We have seen that ἀρα itself was originally just correspondence and then later inference. So then γέ can act as an intensive particle either of these ideas. It is a mistake, therefore, to approach the study of γάρ with the theory that it is always or properly an illative, not to say causal, particle. It is best, in fact, to note the explanatory use first. Thayer wrongly calls the illative use the primary one. The word is common in all the larger books of the N. T. It is least common in the Gospel of John and in Revelation. In Matthew and Luke it is much more frequent in the discourses and is rare in the strict narrative. In Mark and John it is about half and half.1 In general the N. T. use of γάρ is in accord with that of the classic period. The explanatory use is common in Homer.2 The N. T. examples are numerous. Cf. Mt. 19:12; Mk. 5:42; 16:4; Lu. 11:30; 18:32. Here the explanation follows immediately. Sometimes the explanation comes in by way of appendix to the train of thought. So Mt. 4:18, ἤσον γάρ ὄλιξεν. Cf. also Mk. 2:15; Ro. 7:2. In questions we have good examples, particularly τί γάρ. So Mt. 27:23, τί γάρ κακόν ἐποίησεν; Cf. Ro. 3:3. In Ac. 16:37, οὐ γάρ, ἀλλά, we have to resolve γάρ into its parts and make the phrase=‘not much, but.’ In Jo. 9:30, ἐν τούτῳ γάρ, the man uses γάρ with fine scorn, ‘why, just in this,’ etc. In Jo. 19:6 it is hardly creditable to Pilate’s common sense to take γάρ as illative. Cf. also Jo. 7:41; Ac. 19:35; Mt. 9:5. Γάρ sometimes [Page 1191] gives the major premise (Mt. 26:52), more often the minor premise (2 Pet. 1:15 f.), sometimes both (Jo. 3:19 f.). The purely illative use of γάρ is simple enough, though the force of the ground or reason naturally varies greatly. See Mt. 1:21, αὐτὸς γάρ σώσει; (6:24) ἣ γάρ; (Ro. 8:18) λογίζοµαι γάρ. Paul begins every sentence with γάρ in Ro. 8:18–24. For καὶ γάρ see Ro. 11:1; 15:3. The precise relation between clauses or sentences is not set forth by γάρ. That must be gathered from the context if possible. Cf. Jo. 4:44. Note γάρ—ὅτι in 1 Tim. 6:7.

(iii) Οὖν. The etymology of Οὖν is unknown. Brugmann1 thinks it probable that it is derived from ὁ ἐν or ὁ ὄν (cf. ὄντως, τῷ ὄντι). The Ionic also has ὄν (so Lesbian, Doric, Boeotian). But, however that may be, it is important to note that the particle is not illative nor even consequential in Homer.2 It is merely a transitional particle relating clauses or sentences loosely together by way of confirmation. It was common in this sense in Homer, though rare in the Attic writers save in μὲν οὖν. But it is very frequent in the Gospel of John as a mere transitional particle. In this Gospel it occurs about 200 times, nearly as frequent as all the rest of the N. T., though it is rare in the other Johannine writings. In John’s Gospel, outside of 8 examples in the words of Jesus, the rest occur in the narrative portion.3 Abbott4 seems puzzled over the many non-illative instances of οὖν in John and suggests that “the writer perhaps had in view the objections of the controversialists.” But this is wholly gratuitous and needless in the light of the history of the particle. Probably a majority of the instances in John’s

---

4 Ib., p. 168.
Gospel are non-illative as in Homer, the original use of the word. Luke preserves the literary Attic idiom by the common use of μὲν οὖν as in Ac. 15:3, 30, etc. But John boldly uses οὖν alone and needs no apology for doing so. It just carries along the narrative with no necessary thought of cause or result. It is, because of John’s free use, one of the commonest particles in the N. T. and is often in the narrative books than in the epistles. It is interesting in John to take a chapter and note when οὖν is merely continuative and when illative. Cf. ch. 11, for instance, verses 3, 6, 12, 14, 16, 17, 20, 21, 31, 32, 33, 36, 38, 45, 47, 54, 56. So we start off again in 12:1 with ὅ οὖν Ἰησοῦς (Page 1192) (continuative). It is the commonest connective between sentences in this Gospel. We moderns do not feel the same need for connecting-particles between independent sentences. The ancient Greeks loved to point out these delicate nuances. The interrogative οὐκοῦν occurs only in Jo. 18:37. A good instance of the purely illative use is in Mt. 3:8, ποιήσατε οὖν καρπόν. It is common in Paul’s Epistles (Ro. 5:1; 6:12, etc.). Paul is fond also of ἃρα οὖν (Ro. 8:12) and of τί οὖν (6:1, 15; 7:7; 8:31, etc.). Οὖν is always postpositive.

2. HYPOTACTIC CONJUNCTIONS (συνδέσμοι ὑποτακτικοί). The conjunctions used in the N. T. with subordinate clauses have been discussed and the constructions given in detail already. See Modes (Subordinate Clauses). The relative, temporal, comparative, local, causal, final and consecutive, apprehensive, conditional and declarative conjunctions make a goodly list. But it is not necessary to go over the same ground again. Most of these conjunctions, as previously shown, are of relative origin. All are adverbs. It was necessary to treat at length the paratactic conjunctions which antedate the hypotactic in origin and were always exceedingly abundant in the vernacular. The hypotactic belong to the more highly developed speech, but one must not think that the hypotactic conjunctions regulate the construction of the sentence. They get their meaning from the sentence, not the sentence from the conjunction. The other view is a mechanical theory of language out of harmony with the historical growth of both mode and particle. Hypotaxis grew out of parataxis. This paratactic origin survives in many ways. Cf., for instance, the relative at the beginning of sentences, as ἐν οἷς (Lu. 12:1). So also ὅτι in 1 Jo. 3:11 f. The Greek is particularly rich in its subordinating conjunctions as compared with the Sanskrit and the Hebrew. Each subordinate clause possesses a case-relation toward the principal sentence as substantive, adjective or adverb, so that the sentence expansion is on the lines of the word-relations. In general the disappearance of the ancient Greek conjunctions from the modern Greek is noticeable. ὁπότε (ὁπόταν), ἐξερχόμενος, μέχρις, ἐφ᾽ ἃς “have entirely disappeared” (Thumb, Handb., p. 186). Thumb goes on with the story. We

6 Blass, Gr. of N. T. Gk., p. 272.

Thumb

have ὡς in σὰν and ὅστε νὰ (= "until.") Ὄτι is gone before ποῦ and νὰ, though ὅπως has revived. [Page 1193] Νά has greatly extended its functions. Some survive greatly modified, like ἄφο, ἡν, ἐπὶ—ἐπὶ, ἤν, ἐπὶ, ἐπὶ, πρὶν, ὡς ποῦ (ἴδος), ποῦ (ὅπου), προτοῦ, etc. The paratactic conjunctions are "pressed into service to form dependent clauses" as at the beginning. Parataxis turns into hypotaxis.

VI. Interjections. Winer¹ considers interjections to be mere sounds, and so entirely outside of the sphere of syntax and indeed of grammar. But one² of the imperatival forms (ἄγε) is exclamatory in origin. Or is the interjection an imperative in origin? We see this form still used as an interjection in Jas. 4:13. So also ἱδε in Jo. 1:29, ἵδε ὃ ὁμος τοῦ θεοῦ. Cf. δεῦρο (Mk. 10:21), δεῦτε (Mt. 11:28). Δεῦρο is very vivid in Jo. 11:43, Λάζαρε δεῦρο ἔξω. Ιδοῦ is either used absolutely (Mt. 11:10) or with the nominative (Rev. 4:1) and is of frequent occurrence. Καὶ ἱδοῦ is good Greek, but its frequency reminds one of the Hebrew idiom. We have ἴδα in Lu. 4:34. Once οὐά occurs (Mt. 15:29) with the vocative. So οὐαί is found with the vocative in Lu. 6:25. It is found absolutely in Rev. 18:10, 16, 19, οὐάι, οὐαί. Twice it is used with the accusative (Rev. 8:13; 12:12), as the object of thought. Usually the dative is found with οὐαί as in Mt. 11:21; Lu. 6:24 f.; 11:42. The word occurs mainly in Matthew and Luke. Sometimes we have οὐ with the vocative as in Mt. 15:28, οὐ γύναι. So Ac. 13:10; Ro. 2:1; Gal. 3:1. There is usually some vehemence or urgency when οὐ is used. But not always. See Ac. 1:1; 18:14. In Ro. 10:15 οὐς is an exclamatory particle, as τί is in Lu. 12:49. It is not quite true, therefore, to say that interjections lie quite outside of grammar. Indeed, language may come from just these ejaculatory sounds, like "mama" with the babe. Tragedians³ naturally use interjections more frequently. People differ greatly in the use of "Oh" and "Ah." The English audiences are fond of "Hear, hear," while the American crowds love to clap their hands or stamp their feet.

Farrar\(^4\) follows Scaliger and Destutt de Tracy in regarding them as words *par excellence* and as having high linguistic importance. Grammar can deal with emotion as well as with thought.

**[PAGE 1194] CHAPTER XXII**

FIGURES OF SPEECH (ΓΟΡΓΙΕΙΑ ΣΧΗΜΑΤΑ)

**I. Rhetorical, not Grammatical.** Strictly speaking there is no need to go further in the discussion of the points of syntax. There are various matters that the grammars usually discuss because there is no N. T. rhetoric. These points belong to language in general, though in some of them the Greek has turns of its own. Each writer has, besides, his own style of thought and speech. See discussion in chapter IV. Under The Sentence we have already discussed the ellipsis (of subject, predicate or copula), matters of concord, apposition, the position of words (emphasis, euphony, rhythm, poetry, prolepsis, ὑπότερον πρότερον, postpositive words, hyperbaton, order of clauses), simple and compound sentences, connection between words (polysyndeton and asyndeton), connection between clauses and sentences (paratactic and hypotactic) and asyndeton again, running and periodic style, parenthesis, anacoluthon, *oratio variata*, connection between paragraphs. These matters call for no further comment. They could have been treated at this point, but they seemed rather to belong to the discussion of sentences in a more vital way than the remaining rhetorical figures. For attraction and incorporation see Cases and Relative Pronouns. The points now to be discussed have not so much to do with the orderly arrangement (σύνθεσις)\(^1\) as with the expression and the thought.

**II. Style in the N. T.** The characteristics of the N. T. writers received treatment in chapter IV. The precise question here is whether the writers of the N. T. show any marks of rhetorical study. We have seen already (The Sentence, Rhythm) that the scholars are divided into two camps on this subject. Blass\(^2\) (but not Debrunner) argues that Paul’s writings and the Epistle to the Hebrews show the influence of the rules of rhythm of the literary prose of Asia (Asianism) and Rome (Pausianias, Cicero, [Page 1195] Curtius, Apuleius). Deissmann\(^1\) will have none of it. It is a pretty quarrel and,

as usual, there is truth in both views. One must get his bearings. We can all agree with Blass\(^2\) at once that the N. T. writers are not to be compared on this point with the literary masters of Attic prose, but with writers like Polybius. We are surely not to look for the antithetic style of the Attic orators (Isocrates, Lysias, Demosthenes).\(^3\) If there is æsthetic beauty in 1 Cor. 13 or Heb. 11, it may be the natural æsthetic of Homer’s rhapsodies, not the artificialities of Isocrates. Blass\(^4\) admits the poverty of the Oriental languages in the matter of periods and particles and does not claim that the N. T. writers rose above the O. T. or rose to the level of Plato. And yet Norden in his *Antike Kunstprosa* claims that in his best diction Paul rises to the height of Plato in the *Phædrus*. Wilamowitz-Möllendorff likewise calls Paul “a classic of Hellenism.”

Sir W. M. Ramsay is a stout advocate for the real Hellenic influence on Paul’s life. But Ramsay scouts the word “rhetoric” in connection with Paul: “I can hardly imagine that one who had ever experienced the spell of Paul could use the word rhetoric about the two examples which he mentions from First Corinthians, and Romans.” There was in Paul’s time artificial rhetoric with which Paul evidently had no connection, nor did any of the writers of the N. T. One cannot believe that Paul, for instance, studied at one of the famous schools of rhetoric nor that he studied the writings of the current rhetoricians. This much may be freely admitted about all of the N. T. writers, who wrote in the language of the people, not of the schools. Deissmann correctly says: “The history of Christianity, with all its wealth of incident, has been treated much too often as the history of the Christian literary upper class, the history of theologians and ecclesiastics, schools, councils and parties, whereas Christianity itself has often been most truly alive in quarters remote [Page 1196] from councils.” This is all pre-eminently true and we must never forget that Jesus was a carpenter, John a fisherman and Paul a tentmaker. And yet Deissmann himself will say of John: “St. John has no liking for progress along an unending straight road; he loves the circling flight, like his symbol, the eagle. There is something hovering and brooding about his production; repetitions are in no wise abnormal with him, but the marks of a contemplation which he cherishes as a precious inheritance from St. Paul and further intensifies.” There is a perfection of form in the Parables of Jesus that surpasses all the rules of the grammarians and rhetoricians. The eagle flight of John makes the cawing of the syntactical crows pitiful. The passion of Paul broke through all the traditional forms of speech. He lacked the punctilious refinements of the Stoic rhetoricians, but he had the cyclonic power of Demosthenes and the elevation of Plato. Even Blass sees that “the studied employment of the so-called Gorgian assonances is necessarily foreign to the style of the N. T., all the more because they were comparatively foreign to the whole period; accident, however, of course produces occasional instances of them, and the writer often did not decline to make use of any that suggested themselves.” This would seem modest enough to satisfy Deissmann. In particular Blass notes “the absence of rhetorical artifice in the Johannine speeches.” He finds little of that nature in Mark and Luke. “But in Matthew there really is some artistic sense of style,” but it is “mainly drawn from Hebrew and not from Greek.” The many quotations in this Gospel show a close use of the LXX and the Hebrew O. T. And yet, on the whole, the Greek runs smoothly enough. König has a valuable article on “Style of Scripture” in the Extra Volume of Hastings’ Ramsay

Dictionary of the Bible, but he deals mainly with the O. T. There is in truth little that is distinctive in the style of the N. T. apart from the naturalness, simplicity, elevation and passion of the writers. It is only in the Epistle to the Hebrews that Blass finds “the care and dexterity of an artistic writer” as shown by his occasional avoidance of hiatus, but even here Blass has to strain a point to make it stick. Bultmann draws a definite parallel between the style of Paul and the Cynic-Stoic Diatribe and makes his point, but even so one wonders if after all Paul uses question and answer so skillfully by reason of definite study of the subject or because of his dialectical training as a rabbi and his native genius in such matters. It is per se, however, entirely possible that Paul knew the common Stoic dialectic also as he did the tenets of current Stoicism (cf. Paul’s work in Athens). The examples of figures of speech in the N. T. are due to the nature of speech in general, to the occasional passion of the writer, to the play of his fancy, to unconscious expression of genius, to mere accident. We must not make the mistake of rating men like Luke, Paul, James and the author of Hebrews as boorish and unintellectual. They lived in an age of great culture and they were saturated with the noblest ideas that ever filled the human brain. As men of genius they were bound to respond to such a situation. They do show a distinct literary flavour as Heinrici has so well shown. In 1 Cor. 13 we have finish of form and thought. Even John, called ἄγραμματος καὶ ἱδώτης (Ac. 4:13), rose to the highest planes of thought in his Gospel. Deissmann in his St. Paul goes to the extreme of making Paul a mere man of affairs devoid of theological culture,—an untenable position in view of Acts and Paul’s Epistles when he says: “His place is with Amos, the herdsman of Tekoa, and Tersteegen, the ribbon-weaver of Mühlheim” (p. 6). We may brush aside the artificial rules of Gorgias as too studied efforts for the N. T. Indeed, the men of the time had largely refused to follow the lead of Gorgias of Sicily, though his name clung to the figures of speech. His mannerisms were not free from affectation and pedantry. The Attic orators of the fourth century B.C. had their own rules for easy and flexible practical speech. The writers and speakers of the later time modified these in their own way. We are not concerned here to follow Blass in his effort to prove that Paul and the writer of Hebrews were students of the current rhetoricians. This we fail to see, but we do see that the language of the N. T. was a living organism and exhibits many of the peculiarities of human speech which the rhetoricians have discussed. For convenience, therefore, we adopt their terminology.

III. Figures of Idea or Thought (σχήματα διανοίας). Blass observes that these figures of thought belong more to the later period of Attic oratory. Some of them are distinctly rhetorical in character, as the rhetorical question of which

5 Ib., p. 296.
6 Bultmann, B. R., Der Stil der paulinischen Predigt und die kynisch-stoische Diatribe (1910).
1 Norden (Die ant. Kunstprosa, Bd. II, p. 508) speaks of Paul’s use of rhetorical figures as due to his “Ton.” Heinrici (Zum Hellen. d. Paulus, Komm. zu II Kor.) sees Paul’s “Eigenart.”
2 Der literarische Charakter d. neut. Schriften, 1908.
4 Die Rhythmen der asiatischen und römischen Kunstprosa, 1905.
Paul makes abundant use, especially in the Epistle to the Romans. Blass\(^2\) makes a good critique of such questions as showing dialectical liveliness and perspicuity, as in Ro. 3:1 τί οὖν τὸ περισσόν τοῦ Ἰουδαίου; (4:10) πῶς οὖν ἔλογίσθη; ἐν περιτομῇ ὁντὶ ἢ ἐν ἄκροβυστίᾳ? This is quite like the diatribe in Epictetus and other κοινή writers (Radermacher, \textit{N. T. Gr.}, p. 182). Cf. 1 Cor. 7:18 ff. Other questions are quite emotional, as in 2 Cor. 11:22. In Ro. 8:31–35 we have a “brilliant oratorical passage,” worthy of any orator in the world. There are others almost equal to it, Ro. 6, 7, 9, 10, 11; 1 Cor. 3, 4, 8, 9, 12, 13, 15; 2 Cor. 2, 3, 4, 5, 8, 10, 11, 13. Here we have oratory of the highest kind with the soul all ablaze with great ideas. The words respond to this high environment and are all aglow with beauty and light. Certainly the Epistle to Hebrews is oratory of the highest order, as are the addresses in Acts. Blass\(^3\) thinks that Luke is distinctly “unprofessional (\textit{idiotisch})” in his manner of presenting the great speeches in Acts, ιδιωτική φράσις, not τεχνική φράσις. That is true, but one would have a martinet spirit to cavil at the word eloquence here. The discourses of Jesus in Matthew, Luke and John are above all praise in content and spirit. One cannot think that Jesus was a technical student of rhetoric, but he sang with the woodrobin’s note, and that far surpasses the highest achievement of the best trained voice whose highest praise is that she approaches the woodrobin or the nightingale. There is perfection of form in the thoughts of Jesus whether we turn to the Sermon on the Mount or the Parables in Luke 15, or the Discourses in the Upper Room and On the Way to Gethsemane in John 14–17. The style of the reporters does not conceal the consummate skill of Christ as the “Master Preacher” of the ages.

There is undoubted use of \textit{irony} (κροβύστια) in the N. T. We see it in the words of Jesus. See the high scorn in καὶ ὑμεῖς πληρόσατε τὸ μέτρον τῶν πατέρων ὑμῶν (Mt. 23:32). This is the correct text, not πληρόσατε. So also καλῶς ἀδετέπετε τὴν ἐντολὴν τοῦ θεοῦ (Mk. 7:9) and ὅτι οὐκ ἔνδεχεται προφήτην ἀπολέσθαι Εξώ Ἰερουσαλήμ (Lu. 13:33) \textit{There is more of it in Paul’s writings.} Cf. 1 Cor. 4:8; 2 Cor. 11:19 ff.; 12:13; Ro. 11:20. There was never a more nimble mind than that of Paul, and he knew how to adapt himself to every mood of his readers or hearers without any sacrifice of principle. It was no declarer’s tricks, but love for the souls of men that made him become all things to all men (1 Cor. 9:22). He could change his tone because he loved the Galatians even when they had been led astray (Gal. 4:20). The rhetoricians call it \textit{prodiorthosis}, as in 2 Cor. 11:21, ἐν ἄφροσύνῃ λέγῳ (cf. also 11:1 f., 16 f., 23) and \textit{epidiorthosis}, as in Ro. 3:5, κατὰ ἄνθροπον λέγω. Cf. also 1 Cor. 7:6; 12:11; Ro. 8:34; Gal. 4:9. So Paul uses \textit{paraleipsis}, as in 2 Cor. 9:4, μὴ πως καταισχυνθῶμεν ἡμεῖς, ἵνα μὴ λέγομεν ὑμεῖς, instead of μὴ ποτε καταισχυνθῆτε. As Blass\(^1\) suggests, Paul’s innate delicacy of feeling makes him take the reproach on himself. Cf. also Phil. 19, ἵνα μὴ λέγω ὅτι καὶ σεαυτόν μοι προσοφείλεις. So in Ro. 7:4 Paul says καὶ ὑμεῖς ἐθανατώθητε τῷ νόμῳ rather than bluntly assert καὶ ὁ νόμος ἀπεθάνεσεν (or ἐθανάτωσε). There is sometimes a lack of parallelism (\textit{heterogeneous structure}). Cf. 1 Jo. 2:2, ἠλάσμος περὶ τῶν ἡμαρτιῶν ἡμῶν, οὗ περὶ τῶν ἡμετέρων

IV. Figures of Expression (σχήματα λέξεως). What Winer calls “Broken and Heterogeneous Structure” (anacoluthon, oratio variata) has had sufficient discussion under The Sentence. So as to asyndeton. There remain a number of other points which may be grouped for convenience.

(a) PARALLELS AND CONTRASTS (Parallelismus membrorum). There are many illustrations of this idiom in the N. T., both in the Gospels and Epistles. The O. T. is full of such words and phrases, particularly in the Psalms. One who read these hymns much would naturally have his eye and ear trained to this form of rhythm. We do not need to see conscious effort at poetry, though in 1 Tim. 3:16 we probably have a fragment of an early Christian hymn. The Hebrew parallelism is manifest in Lu. 1:42–45 (the song of Elizabeth), 46–56 (the song of Mary), and 68–79 (the song of Zacharias), 2:29–32 (the song of Simeon). One does not have to go to the Greek rhetoricians. The spirit of rhapsody here shown is due to the Spirit of God moving the heart and stirring the highest impulses of the soul. There are other examples of primitive Christian song in the N. T., as in Eph. 5:14; Jude 24 f.; Rev. 5:12–14, and often in this book. There is the perfection of poetic form in the noble prose in 1 Cor. 13; 15:54–7; Col. 1:10–12. One hesitates to think that this use of antithesis or parallelism is artificial even if it is conscious. This parallelism may be synonymous (Mt. 10:26; Jo. 1:17; Ro. 11:33) or antithetic (Jo. 3:6; Ro. 2:7). There are also examples of Chiasm or Reverted Parallelism (from the letter X) as in Philemon 5, τὴν ἀγάπην καὶ τὴν πίστιν ἣν ἔχεις εἰς τὸν κύριον Ἰησοῦν καὶ εἰς πάντας τοὺς ἄγιους. So Mt. 7:6; Ph. 1:15 f.; 1 Th. 5:6; Ph. 3:10. I doubt very much if Paul was at all conscious of the stilted parallelism that Blass sees in 1 Cor. 1:25 ff. with anaphora (the first words alike) as in ὁ ὡπολλοὶ—ὁ ὡπολλοὶ, or antistrophe (the last words alike) as in τοῦ θεοῦ—τοῦ θεοῦ, or συμπλοῦ (both alike) as in ἔξελέξατο ὁ θεὸς Ἰνα κατασχύνῃ, ἔξελέξατο ὁ θεὸς Ἰνα κατασχύνῃ. Cf. Heb. 2:16. The manuscripts vary a deal in 1 Cor. 1:25 ff., and Blass has to juggle the text in order to make it come out in “rounded periods of three sections.” What if this finesse was made by dilettante rhetoricians when they found it in Demosthenes or Cicero? Surely Paul was not a “stylist” of the fashion of Cicero nor even of Demosthenes. Perhaps no orator “would have regarded the eloquence of this passage with other feelings than those of the highest admiration.” Doubtless so, but for the passion and force, not for the mere word-play. Just so the three poetical quotations (Ac. 17:28; 1 Cor. 15:33; Tit. 1:12) do not justify straining after accidental lines in Ac. 23:5; Jas. 1:17; Heb. 12:12 f., or elsewhere. Blass is so fond of finding poetic parallelism in the Gospels that he actually makes it tilt the scales against the best manuscripts in some passages as in Mt. 5:45; 7:13 f.; 25:35. This seems much like eisegesis.

2 W.-Th., p. 566.
1 W.-Th., p. 639.

3 Gr. of N. T. Gk., p. 300 f.
4 Ib., p. 302.
contrast in words. There is the solemn repetition of a word with powerful effect (the epanadiplosis of the rhetoricians), but Blass does not claim this as a rhetorical device in the N. T. It is natural to strong emotion. Cf. ἐπιστάτα ἐπιστάτα (Lu. 8:24); κόριε κόριε (Mt. 25:11); σταύροσον σταύροσον (Jo. 19:6); Rev. 18.2, ἐπεσεν ἐπεσεν. See Ph. 3.2. Cf. also the two hours of shouting in Ac. 19.34. Climax is as old as Homer. This is again a perfectly natural method of emphasis. Cf. the links in the list of virtues in 2 Pet. 1:5–7. See also Ro. 5:3–5; 10:14. There is a cumulative force in the repetition. Per contra, zeugma puts together [Page 1201] words that do not properly go together, as in 1 Cor. 3:2, γάλα ὡμᾶς ἐπότισα, οὐ βρώμα. So also Lu. 1:64, ἄνευ ψηθῆ τὸ στόμα αὐτοῦ παραχρήμα καὶ ἡ γλῶσσα αὐτοῦ. Cf. 1 Tim. 4:3. This construction is usually explained as elliptical, one verb (as above) being used where two are necessary for the full statement. Kühner-Gerth treat it as a species of brachylogy. The use of synonyms is not absent in the N. T., though not in the richness of the classic idiom. Cf. Lu. 8:15, ἐν καρδίᾳ καλῇ καὶ ἀγαθῇ, and the use of ἄγαπα and φιλέω side by side in Jo. 21:15–17 where Peter makes a point of using φιλέω. See chapter on Formation of Words. The play on words takes many turns. The onomatopoetic words like γογγύσεω (cf. our “murmur”) are very simple. Cf. Jo. 6:41. Examples of initial alliteration occur, like πονηρία, πλεονεξία (Ro. 1:29); ὑβριστας, ὑπερηφάνους (1:30); ἔπειθες, ἐσπευστευτος, ἀποστρφσευτος, ἀνελεμένονος (1:30 f.). It is hard to tell whether this is conscious or unconscious. There are also instances of paronomasia and annominatio. Paronomasia is rather loosely applied in the books. Winer uses it only for words of similar sound, while Blass confines it to the recurrence of the same word or word-stem, like κακος κακος (Mt. 21:41); ἐν παντὶ πάντοτε πάσαν (2 Cor. 9:8); ὁ νόμος νομίμως (1 Tim. 1:8), and uses parechysis for different words of similar sound, like λιμοι καὶ λοιμωι (Lu. 21:11); ἔμαθεν ὃν ἐπαθεν (Heb. 5:8); φθόνου φόνου (Ro. 1:29); ἀναπαύεις ἀναπαύετος (1:31). See also 2 Cor. 10:12; Ro. 11:17. The point is a fine one and need not be pressed. But annominatio deals with the sense as well as the sound. Thus Πέτρος and πέτρα in Mt. 16:18; γινώσκεις ἤ ἀναγινώσκεις (Ac. 8:30); ὑπερφρονεῖν—ὑπερφρονεῖν (Ro. 12:3); μηδὲν ἔργαξομένους, ἀλλὰ περιεργαζομένους (2 Th. 3:11). Cf. also Mt. 27:9; Lu. 9:60; Ac. 23:3; 2 Cor. 3:2; 1 Cor. 11:29 ff.; Ph. 3:2 f.; 2 Cor. 4:8 f.; Ro. 1:20; 5:19; 12:15; Eph. 4:1. Even so there is a certain amount of overlapping in the two figures. The ancients did not smile because a pun was made. It was merely a neat turn of speech and was very common. So Jesus says to Thomas, μὴ γίνου ἄπιστος ἀλλὰ πιστὸς (Jo. 20:27).

(3) Contraction and Expansion. It is difficult to draw lines between groups among these figures of speech. Zeugma, as we have seen, can very well come in here as a sort of ellipsis. The ellipsis of subject or predicate came up for discussion under [Page 1202] The Sentence. But a few more words are needed here. Cf. πιστός ὁ θεός (2 Cor. 1:18); ὁ κύριος ἐξήγη (Ph. 4:5) as samples of the absence of the copula. So Jo. 14:11; Ac. 19:28, 34; 2 Cor. 11:6. It is not always clear what verb is to be supplied.
though εἰμὶ and γίνομαι are the most common. Cf. φωνὴ πάλιν ἐκ δευτέρου πρὸς αὐτὸν, Ac. 10:15; ὥστε ἐν λόγῳ ἡ βασιλεία τοῦ θεοῦ, ἀλλὰ ἐν δυνάμει, 1 Cor. 4:20. Cf. Jo. 21:21; 1 Cor. 5:12. Usually the context makes clear what verb is wanting, as in Mt. 27:25; Ac. 18:6; Ro. 4:9; 5:18; 2 Cor. 9:7; Gal. 2:9; Rev. 1:4. In 2 Cor. 8:15 the participle ἔξον must be supplied with ὅ according to a common Greek idiom. Cf. also Ro. 13:7, τὸ τὸν φόρον, where Winet supplies ἀποδοθοῦντα κελεύοντε. Cf. also 1 Cor. 4:6: It is easy to supply ὅ τι σης in passages like Heb. 1:7 λέγει, 4:3 ἐξηκηκε. The context supplies the noun in a case like Ac. 21:31, ζητοῦντων τε αὐτὸν ἄποκτεναι. Cf. Jo. 20:2, ἦραν τὸν κύριον ('people took away'). In Ac. 21:16, συνήθεον καὶ τῶν μαθητῶν, supply τινὲς as in Lu. 11:49, τινὰς. Many verbs are considered clear enough without the object. So δίαγω (sc. θιον) in Tit. 3:3; προσέχω (sc. νοθον) in Lu. 17:3, ἐπέκαθι in 14:7, ἐνέχω (sc. χόλον) in Mk. 6:19; συμβάλλω (sc. λόγους) as in Ac. 4:15 (cf. Lu. 24:17, ἀντιβάλλετε with object); συλλαβάνω in Lu. 1:31. It is unnecessary (see Adjectives) to recount again the many instances of the adjective without a substantive where the gender and number and context make it clear. A few common examples suffice. For the absence of ἡμέρα note τῇ τρίτῃ (Lu. 13:32); ἤ αὐριον (Mt. 6:34); τῆς σήμερον (Mt. 27:8); τῇ ἐχομένῃ (Lu. 13:33); τῇ ἐπούσῃ (Ac. 16:11); ἤ ἐξῆς (21:1); τῇ ἔτερᾳ (Ac. 20:15). Γῇ is easily supplied in Mt. 23:15, ἤ ἔρα, and in Heb. 11:26, ἐν Ἀγγέλω ου. Supply γλώσσα in Rev. 9:11, ἐν τῇ Ἑλληνικῇ. So with ὕδος in Lu. 5:19, ποιας; 19:4, ἐκεῖνης. We miss ἦματον in Jo. 20:12, ἐν λευκοῖς, and ὕδροι in Mt. 10:42, ψυχρόν. So with χείρ in Mt. 6:3, ἤ δεξιά, ἤ ἀριστερά and χώρα in Lu. 17:24, ἐκ τῆς—εἰς τὴν. Much more serious is the ellipsis in Mt. 26:5, and Gal. 5:13, where the context must supply both verb and subject. Cf. also ὁ ὄρα τοι—ὁ λ. in Jo. 7:22. In a case like 2 Th. 2:3 f., διὰ ἐν—διὰ, there is no apodosis expressed. These are but samples of the ellipses common to Greek (cf. εἰ δὲ μή) as to all languages more or less. It is not worth while to try to bring under this rhetorical figure all the lapses and turns of style in each writer. Cf. the absence of the verb with ἵνα in 1 Cor. 1:31, with τὸ μή in 4:6, with ἐν δὲ in Ph. 3:13, with τοῦτο δὲ in 2 Cor. 9:6, with ἤνα [Page 1203] again in Gal. 2:9. Cf. also Mk. 14:29; 1 Cor. 10:24; 2 Cor. 5:13.

Aposiopesis stands to itself since it is a conscious suppression of part of a sentence under the influence of a strong emotion like anger, fear, pity. Curiously enough Blass,1 who sees so many rhetorical tropes in the N. T., denies that any instances of aposiopesis occur in the N. T. I do not consider his objections well founded. We may dismiss Mk. 7:11 and Lu. 22:42 because of the true text (see W. H.), and need not quibble over ὅρα μή in Rev. 22:9. We may agree with Winer2 that we have simply anacolutha in 2 Th. 2:3 ff. But we have left others like Mk. 11:32, ὅλλα εἴσαιον τούς ἄνθρωπος, ἤ ἐφοβοῦντο τὸν ἄγιον. See also Lu. 13:9, κἂν μὲν ποιήσῃ καρπὸν εἰς τὸ μέλλον—εἰ δὲ μήγε, ἐκκοῦσες οὕτην. So again 19:42, εἶ ἐγνώκει καὶ σο. So Jo. 6:62, ἔδωκεν θεωρήσῃ τὸν υἱὸν τοῦ ἄνθρωπον ἄνωθεν δοξαὶς ὑπὸ τὸ πρότερον. Then again Ac. 23:9, εἰ δὲ πνεῦμα ἐλάλησεν αὐτῷ ἤ ἔγγελος—. It is possible to regard Ro. 7:24 as aposiopesis. What differentiates these passages from ellipses or abbreviations of other clauses (cf. Mt. 25:14; Mk. 13:34; 2 Cor. 3:13) is the passion. One can almost see the gesture and the flash of the eye in aposiopesis.

1 W.-Th., p. 590.
1 Gr. of N. T. Gk., p. 294.
2 W.-Th., p. 600.
We need not follow minutely the various sorts of breviloquence or brachylogy that are possible. Thought moves more rapidly than expression and the words often crowd together in a compressed way that may be not only terse, but at first obscure. A good illustration occurs in Mt. 9:6, ἦν δὲ εἶδητε ὅτι ἐξουσίαν ἔχει ὁ υἱὸς τοῦ θεοῦ ἣν ἀνθρώπου ἔτι τῆς γῆς ἄφιέναι ἰδίαις—τότε λέγει τῷ παραλυτικῷ Ἔγειρε ἄρον σου τῇ κλίνῃν, κτλ. Here the Evangelist has inserted τότε λέγει τῷ παρ. before the conclusion to make it clearer. The same thing is done in the parallel passages in Mk. 2:10; Lu. 5:24 (an incidental argument for a common document for this paragraph). Cf. also Mk. 14:49, ἀλλ. ἦν πληρωθότως αὐτῷ γραφαί. So Jo. 13:18; 15:25. Cf. Ac. 1:1, where ἐρεχθεῖ εἰς καὶ διετέλει before ποιεῖν τε καὶ διάσκειν ἰδρύτερας ἡμέρας, κτλ. See a similar use of ἀρξάμενος in Mt. 20:8, Lu. 23:5. A case like Lu. 24:47, ἀρξάμενοι, amounts to anaclitonom or the use of the participle as a principal verb. Cf. also καθαρίζων in Mk. 7:19. Various examples of ellipsis-like zeugma are also instances of brachylogy. No clear line of distinction appears. So in comparisons we sometimes have to fill out the sense. Cf. Rev. 13:11, εἴξε κέρατα δύο ἰδιοίς, i.e. κέρασιν ἰδιοίου. Cf. 1 Jo. 3:11 f.; 2 Pet. 2:1. Other instances of brachylogy may be seen in Lu. 4:26 f.; Jo. 5:36; [Page 1204] 15:11; Ac. 27:22; Gal. 2:16. The so-called constructio praegnans belongs here also. Cf. 2 Tim. 4:18, σώσει εἰς τῇ βασιλείᾳ, though εἰς of itself does not mean ‘into.’ But note διασώσομαι πρὸς Φήλικα (Ac. 23:24) where the notion is that of taking to Felix and so saving Paul. Cf. also ἐκάθιστο παρὰ τῇ δόδον (Mk. 10:46). See also Lu. 11:13 ὅ πατήρ ὁ ἐξ οὐρανοῦ, (Col. 4:16) τῇ ἐκ Λαοδίκιας. Blass distinguishes brachylogy from ellipsis in that brachylogy affects the thought rather than the grammatical form, but both ideas are usually present. Cf. Ro. 11:18. It would be wearisome to endeavour to put a name or tag upon every structure that seems defective from the standpoint of formal grammar or rhetoric. “It will be seen that many of them are due to that agility and acuteness of the Greek intellect which enables the Hellene or Hellenist readily to sacrifice the grammar of a sentence to its logic, or in other words its form to its meaning. Hence arose the many forms of the sense-figure (σχήμα πρὸς τὸ σημαίνόμενον, constructio ad sensum).”

We have seen illustrations of this construction κατὰ σύνεσιν under Concord (The Sentence) and only a few further are called for here. Indeed, this section is largely an illustration of this principle. In Jo. 15:6 αὕτα refers to τὸ κλῆμα; in Ac. 17:16 αὕτου points to Christ, who has not been mentioned; in 7:24, τὸν Ἀθηνησίου, though no Egyptian had been mentioned; in 1 Cor. 7:36, γαμεῖτωσαν, the subject being drawn from the context (the two young people). Winer was glad to note a decline in emphasis on these overrefinements in his day. These supposed abnormalities were called hypallage. From the present standpoint Winer himself yielded entirely too much to the very thing that he condemned. What is the use in figuring out the various ways that Paul could have expressed himself in 2 Cor. 3:7, for instance? The papyri have taught us to be chary about charging John with being ungrammatical in πλήρης χάριτος (Jo. 1:14). These matters simply show that the N. T. writers used a live language and were not automata. It is doubtless true that no other writer used repetition of word and phrase

1 Gr. of N. T. Gk., p. 294.
3 W.-Th., p. 634.
as did the author of the Fourth Gospel, but no one will deny that he did it with consummate skill and marvellous vividness and dramatic power.5

There are many instances of pleonasm in the N. T. as in all vernacular speech. It is of many sorts. The same word may be repeated for clearness as in ὑμᾶς—ὑμᾶς (Col. 2:13); σπουδασον—ταχέως (2 Tim. 4:9). This redundancy is usually due to the custom of the language with no thought of the repetition,1 as in ἣς—αὕτης (Mk. 7:25); περισσοτέρως μᾶλλον (2 Cor. 7:13); οὖ—μή (Ac. 20:20, 27); ἐκτὸς εἰ μή (1 Cor. 15:2); ἀπεκρίθη λέγων (Mk. 15:9); ἀνάστητι καὶ πορεύου (Ac. 8:26); τῶς οἰκοδεσπότης τῆς οἰκίας like our “church-house” (Lu. 22:11); ἔπειτα μετὰ τοῦτο (Jo. 11:7); προδραμῶν ἐμπρόσθεν (Lu. 19:4); ἐξάγειν ἔξω Rec. (24:50); ὤρκῳ ὄμοσεν (Ac. 2:30); ἄρνομένου ὅτι οὐκ ἔστιν (1 Jo. 2:22); πάλιν ἐκ δευτέρου (Ac. 10:15), etc. Cf. also the cognate accusative. Redundancies like these examples are not linguistic vices. They seem pleonastic to the technical student who is unwilling to allow for the growth of the language. Emphatic words have the constant tendency to become less so and to need re-enforcement. This love of emphasis in the N. T. is natural to conversation and to a certain extent has the Oriental richness and wealth of colour.2 We see the same thing in the O. T. and in the papyri letters. It is a sign of life and in particular life in the East. These vivid details give life and beauty to the picture. Cf. ἐκτίνας τὴν χείρα (Mt. 26:51); ἔρχεται Ἡσοῦς καὶ λαμβάνει (Jo. 21:13); γράψαντες διὰ χειρὸς αὐτῶν (Ac. 15:23); ὁμολόγησε καὶ οὐκ ἤρνησατο (Jo. 1:20). Epexegetical clauses are common. Cf. τὴν λογικὴν λατρείαν ὡς μὲν (Ro. 12:1), in apposition with the infinitive clause, παραστῆσαι, κτλ. So 1 Cor. 7:26, ὅτι καλὸν ἀνθρώπω, as an expansion of τοῦτο καλὸν ὑπάρχειν. In Jo. 7:35 ὅτι is probably causal.

We meet hyperbole in Jo. 21:25, οὐδὲ αὐτῶν οἴμαι τὸν κόσμον χαρῆσειν τὰ γραφόμενα βιβλία. Cf. also Mt. 13:32. Litotes is common enough, as in Ac. 1:5, οὐ μετὰ πολλὰς ταύτας ἡμέρας; 14:28, χρόνον οὐκ ὀλίγον. See also 15:2; 19:11, 23 f.; 21:39; 27:14, 20; 28:2. Meiosis is, of course, only a species of hyperbole by understatement. Cf. Paul’s use3 of it in 1 Th. 2:15; 2 Th. 3:2, 7. We may put together two remarks of Milligan.4 “St. Paul had evidently not the pen of a ready writer, and when he had once found an expression suited to his purpose found it very difficult to vary it.” “St. Paul had evidently that highest gift of a great writer, the instinctive feeling for the right word, and even when writing, as he does here, in his most ‘normal’ style, and with an almost complete absence of the rhetorical figures, so largely practised in his day, he does not hesitate to avail himself of the more popular methods of adding point or emphasis to what he wants to say.” There is no necessary inconsistency in these two statements. Add another from Milligan1 which will help to reconcile them. “We readily recognise that the arresting charm of the Apostle’s style is principally due to ‘the man behind,’ and that the highest form of all eloquence, ‘the rhetoric of the heart,’ is speaking to us.” So it is with all the N. T.

writers more or less. They are men of genius, of varying degrees of culture, and men of love for Christ and man. Language with these men is not an end in itself. They do not say “pretty” things and toy with them. As the words of Jesus are spirit and life, for they throb and pulse to-day (Jo. 6:63), so the Letters of Paul are βαρεῖκαι ἵσχυραί, as even his enemies admit (2 Cor. 10:10). The Judaizers at Corinth did not discuss the rhetorical niceties of these Letters. They felt the power of the ideas in them even when they resisted Paul’s authority. Paul used tropes, but he smote hearts with them and did not merely tickle the fancy of the lovers of sophistry. Paul denied that he spoke ἐν πιθόσι σοφίας λόγοις, though his words seem to the lover of Christ to be full of the highest appeal to the soul of man. One must discount this disclaimer not merely by Paul’s natural modesty, but by contrast with the Corinthian’s conception of πιθός.

They loved the rhetorical flights of the artificial orators of the time.

(d) Metaphors and Similar Tropes. We need not tarry over antiphrasis, ambiguity, hendiadys, hypokorisma, oxymoron, periphrasis, polyptoton, syllepsis, and the hundred and one distinctions in verbal anatomy. Most of it is the rattle of dry bones and the joy of dissection is gone. We may pause over ἐμφασία (μεταφορά), since little progress could be made in speech without the picture of the literal and physical carried over to the moral and spiritual as in ὃ ποιμήν ὃ καλός (Jo. 10:11). Cf. the greatest metaphor in the N. T., Paul’s use of σῶμα for the church (Eph. 1:22 f.). The Simile is just a bit more formal, as is seen in the use of ὅμοιος in Mt. 13:52, πᾶς γραμματεὺς ὁμοίος ἐστιν ἀνθρώπῳ αἰκονίσσοτη. Parables are but special forms of the metaphor or simile and form the most characteristic feature of the teaching of Jesus in so far as form is concerned. The parable (παραβολή) [Page 1207] draws a comparison between the natural and the moral or implies it. It may be a crisp proverb (Lu. 4:23) or a narrative illustration of much length, as in the Sower (Mt. 13). The Allegory (ἀλληγορία) is a parable of a special sort that calls for no explanation, a speaking parable (cf. the Good Shepherd in Jo. 10 and the Prodigal Son in Lu. 15). Μετονομα (μετονομα) and Συνεκδοχή (συνεκδοχή) are so much matters of exegesis that they must be passed by without further comment.

It is certain that no words known to man are comparable in value with those contained in the N. T. Despite all the variety of diction on the part of the reporters, probably partly because of this very fact, the words of Jesus still fascinate the mind and win men to God as of old. Καὶ ἔγενετο δι’ ἐτέλεσεν ὁ θεοῦς τοὺς λόγους τούτους, ἐξεπλήσσοντο οἱ δύοι ἐπὶ τῇ διδασκα οὐτοῦ· ἦν γὰρ διδάσκον τοὺς ὀφθαλμοῖς ἐξουσίαν ἔχων καὶ οὐχ ὡς οἱ γραμματεῖς αὐτῶν (Mt. 7:28 f.). It is the constant peril of scribes and grammarians1 to strain out the gnat and to swallow the camel. I may have fallen a victim, like the rest, but at least I may be permitted to say at the end of the long road which I have travelled for so many years, that I joyfully recognise that grammar is nothing unless it reveals the thought and emotion hidden in language. It is just because Jesus is greater than Socrates and Plato and all the Greek thinkers and poets that we care so much what Luke and Paul and John have to tell about him. Plato

2 Cf. Heinrici, Zum Hellen. des Paulus, Komm. zu 2 Kor.
3 1 Cor. 2:4.
1 Gildersle. is scornful of those who fear “that anthropology is going to invade the sacrosanct realm of syntax, which belongs, strictly speaking, to the microtomists and statisticians—otherwise known as Dead Sea Apes.” Am. Jour. of Philol., 1907, p. 235.
and Xenophon hold us because of their own message as well as because they are the interpreters of Socrates. It matters not if Jesus spoke chiefly in the Aramaic. The spirit and heart of his message are enshrined in the Greek of the N. T. and interpreted for us in living speech by men of the people whose very diction is now speaking to us again from the rubbish-heaps of Egypt. The papyri and the ostraca tell the story of struggle on the part of the very class of people who first responded to the appeal of Paul (cf. 1 Cor. 1:26 ff.). Christianity is not buried in a book. It existed before the N. T. was written. It made the N. T. It is just because Christianity is of the great democracy that it is able to make universal appeal to all ages and all lands and all classes. The chief treasure of the Greek tongue is the N. T. No toil is too great if by means of it men are enabled to understand more exactly the mind of Christ. If one is disposed to think less of the N. T. because it stands in the vernacular κοινή, let him remember that the speech of these Christians was rich beyond measure, since out of it came the words of Jesus. These were carried in the common tradition of the period and written down from time to time (Lu. 1:1–4). Paul was not a rhetorician, though a man of culture, but he cared much for the talk of the Christians that it should be worthy. Ὁ λόγος ὑμῶν πάντοτε ἐν χάριτι ἄλλοτε ἡρτομένος, εἰδέναι τῶς δὲ ὑμᾶς ἐν ἐκάστῳ ἀποκρίνεσθαι (Col. 4:6). That was good advice for the Colossians and for all speakers and writers, grammarians included, and makes a fitting bon mot to leave with the rhetoricians who might care to quibble further over niceties of language.

Ταῦτα μελέτα, ἐν τούτοις Ἰσθι.

[PAGE 1209] ADDITIONAL NOTES

1. Καθαρίζω or καθερίζω (p. 183). Mr. H. Scott furnishes me the following table for the variations between α and ε in the augmented tenses of καθαρίζω:

<table>
<thead>
<tr>
<th></th>
<th>ἐκαθαρ</th>
<th>ἐκαθαριζω</th>
<th></th>
</tr>
</thead>
<tbody>

**3. Elision** (p. 208). Mr. H. Scott adds οὐδὲ ἔán (Lu. 16:31, W. H. text), οὐδὲ ἧ (Tisch., οὐδὲ ἥ W. H.), οὐδοὶ αὐτόν (Jo. 21:25). We have both καθ and κατὰ ἄζε, but κατὰ ἕκατόν (Mk. 6:40). There is much variation with prepositions before nouns.

**4. Παρρησία** (p. 212). Mr. H. Scott notes that out of 40 occurrences in the N. T. 24 read παρρ— without variant. In the remaining 16 Ν reads παρρ— 13/16, B 10/16, A 14/14, C 9/10, D 7/14, L 8/9, Syr. 16/16. In Gospels B always has παρ— except in Jo. 11:14, Ν only in Jo. 11:14.

**5. Assimilation of ἐν μέσῳ** (p. 216). Mr. H. Scott notes that the phrase ἐν μέσῳ occurs 27 times in the N. T., of which 2 (Jo. 8:3, 9) are in a spurious passage. Hort (Notes on Orth., p. 150) observes that ΝΒΔ never have ἐμέσῳ. But A of Gospels and E of Acts always have ἐμέσῳ, while C has it 9/12 times.

6. Rules for Assimilation of Consonants (p. 216). The familiar rules are given in all the school grammars (cf. Hadley and Allen, Goodwin, etc.), and need not be given here in detail. Note only these:

Before a τ mute a π or κ mute is co-ordinated.
Before μ a π mute changes to μ,
Before μ a κ mute changes to γ,
Before μ a τ mute changes to σ (analogy).
Before σ a π mute makes ψ,
Before σ a κ mute makes ξ,
Before σ a τ mute drops out.
Before a labial ν changes to μ.
Before a palatal ν changes to γ (nasal).
Before λ or ρ, ν is assimilated.
Before σ, ν is dropped, and the preceding vowel is lengthened.
Between two consonants σ is dropped.

The insertion of σ in some tenses is treated in the chapter on Conjugation of the Verb.

7. Metathesis (p. 221). We find φαινόλιον in P. Oxy. III, 531, 14 (ii/A.D.), but also φαι[λο]νιον, B. U. iii, 816, 24 (iii/A.D.). So the modern Greek φελόνι. Фάτνη (Lu. 2:7, etc.) is the Homeric and Attic form. Moeris (212, 9) says that πάθνη is the Hellenistic form. Modern Greek has πάθνη. Some LXX MSS. have it so. Cf. Thackeray, p. 106; Blass-Debrunner, p. 20.

ENCLITICS

Indefinite, τίς in all its forms.

Pers. pron., µοῦ, µοῖ, µέ;

σοῦ, σοί, σέ.

Pres. indic., εἶµι (except 2d sing. εἶ);

φηµί, φησίν, φασίν.

Particles, γέ, τέ and the inseparable –δέ.

Indef. adverbs, ποτέ, ποῦ, πέρ, πώ, πώς.

Enclitics incline their accent when the preceding word is

(a) proparoxytone,

(b) properispomenon,

(c) a proclitic.

Enclitics lose their accent when the preceding word is

(a) oxytone,

(b) perispomenon,

(c) paroxytone.

Enclitics retain their accent:

(a) if they begin or end a sentence;

(b) if disyllables, after a paroxytone;

(c) if disyllables, after perispomena;

(d) after an elided vowel;

(e) if disyllables, after a proclitic.

———, Relation of St. Paul to Contemporary Thought (1900).

If two or more enclitics occur together, each one receives the accent of the preceding, the last being unaccented. Editors differ in practice as to this rule.

**PROCLITICS**

Art., ὁ, ἡ, οἱ, οἱ.

Prep., ἐς, ἐκ, ἐξ, ἐν.

Conj., εἰ, ὡς.

Negative, οὐ (οὐκ, οὐχ).

Proclitics receive the acute accent:

(a) when they are at the end of a sentence;

(b) when followed by an enclitic.

9. Βουστροφηδόν (p. 243). The Greeks first wrote from right to left and then alternately. This alternate method (right to left, left to right) was called βουστροφηδόν, ‘as oxen turn at the plow.’ Cf. Geddes, *A Compendious Greek Grammar*, 1888, p. xiv. The Greeks had a fine system of abbreviations in frequent use. For full particulars see Thompson, *Handbook of Greek and Latin Palæography*, pp. 86–96.

11. Augment in the Past Perfect (p. 366). Mr. H. Scott notes that of the 15 out of 22 verbs with past perfects in the N. T. the active verbs are equally divided as to augment. Of the 7 [Page 1212] passive verbs only θεμαλίω is unaugmented. Βάλλω is augmented in the passive, but not in the active. Γινομαι and Ἰστημι have both the augmented and the unaugmented forms in the active.

12. List of Important Verbs. (Purely normal verbs are not listed here. Only the tenses are given that occur in the N. T.) Mr. H. Scott has rendered valuable aid in preparing it.

Ἀγαλλιάω. Pres. act. in 1 Pet. 1:8 and Rev. 19:7; aor. act. ἠγαλλίασα (Lu. 1:47), but the active does not occur in LXX. The middle is in LXX (Ps. 15:9) and the N. T. (Jo. 8:56, etc.). The aor. passive appears in Jo. 5:35 (Ἀγαλλιαθῆναι, BL –θηναι).

Ἀγγέλλω (comp. ἀν—, ἀπ—, δι—, ἢξ—, ἐπ—, προ—, κατ—, προ—κατ—). Simplex only in Jo. 20:18 ἄγγελλονος, and Jo. 4:51 in Ἄγγελλω, ἑγγεύλα, ἑγγεύμα, ἑγγέλην. The classic aor. pass. ἑγγέλθην does not occur in LXX or N. T.

Ἄγνυμι (only κατ-ἀγνυμι as in Attic and LXX). Three forms in N. T.: a fut. act. κατ-εάξει (Mt. 12:20; LXX has κατάξων), an aor. act. κατ-ἐάξαν (Jo. 19:32 f.), an aor. pass. κατεαγώστων (Jo. 19:31. Cf. κατεαγήτων in Plato, etc.). The copyists kept the augment where it did not belong, so that even a pres. act. κατεάσσω is found. Cf. Jann., Hist. Gk. Gr., p. 253.

Ἄγω (comp. ἀν—, ἑπ—, ἀνα—, συν—απ—, δι—, εἰσ—, παρ—εἰσ—, ἢξ—, ἐπ—, κατ—, μετ—, παρ—, περι—, προ—, προσ—, συν—, ἐπι—συν—, ὑπ—). The principal parts are regular save the aorist active (usually the reduplicated second aorist form ἠγαγον, but sometimes the rare sigmatic aorist ἠγαγα). Three forms in N. T.: a fut. act. ἠγγίζω, ἠγίζω, ἠγίζων. The aor. ind. (22 times) is confined (H. Scott) to John (6), Acts (5), Rev. (10), N. T. Imperf. does not occur in LXX or N. T.

Ἄρκω (comp. ἄν—, ἅπατ—, δι—, ἢξ—, καθ—, περι—, προ—). Simplex only middle. ἐκλόω (as LXX), ἐκρίσομαι, ἐκριθήσομαι; ἐκλόν and ἐκλα (middle also); ἐνρούμην, ἐνρήμην, ἐνρηθήν.

Ἄρπω (ἀπ—, ἢξ—, ἅπατ—, συν—, ὑπερ—). Principal parts regular. Only note imperative aor. act. ἄρπον and inf. aor. act. ἄρων, while ind. aor. act. is ἄρα and fut. act. ἄρω.

Ἄσθανομαι. Only once in N. T. (Lu. 9:45), aor. mid. ἀσθωνται.

Ἄκοησο (δι—, εἰσ—, ἅπατ—, παρ—, προ—, ὑπ—). Άκούσσω, ἠκουσσά, ἠκήκοα (“Attic perf.”), ἁκούσσομαι, ἡκουσθήσομαι, ἡκουσθήν.

Ἄλλασσω (ἀπ—, δι—, κατ—, ἀπο—κατ—, μετ—, συν—). Ἀλλάζω, ἠλλαζά, ἠλλαξάμην (Ro. 1:23, LXX); pass. ἠλλαξαμα, ἠλλαγήσομαι (1 Cor. 15:51).

Ἄλλομαι (ἐξ—, ἐφ—). Aor. –άμην and –όμην. Confined to Acts save Jo. 4:14.

Ἀμαρτάνω (προ—). Ἀμαρτήσω, ἡμαρτων and ἡμαρτίσα, ἡμαρτικά.

Ἀμφιέννυμι, ἡμφιέσσαμαι.

Ἀναθάλλω (only comp.). Ἀνεθάλετε (Ph. 4:10).

Ἀναλίσκεω (only comp., also κατ-ἀν—). Other tense-stems from ἀναλίσκω; ἀναλίσκω; aor. act. inf. ἀναλίσκας; aor. pass. ἀναλίσκωθέ (N. T. forms do not show augment). In 2 Th. 2:8 W. H. in margin give ἀναλοί as present (so Attic and LXX).

Ἀνοίγω (δι—, ἢξ—, Ac. 12:16 D). The simplex ὀφέω, ὀφνυμι does not occur in LXX or N. T. Imperf. διήνυσε (Lu. 24:32); fut. ὀνεύσω; aor. act. ἡνούσς, ἄνεψα, ἄνεύς, ἄνεψα. The aor. ind. (22 times) is confined (H. Scott) to John (6), Acts (5), Rev. (10).
except δηνουειν (Lu. 24:45). The predominant form is [Page 1213] ἢνουξ– (16 times without v. r.) and read by W. H., except ἢνεφξεν (Jo. 9:14), and ἢνεφξεν (Jo. 9:17, 32). Pass. fut. ἤνουχήσεται (Lu. 11:9 f. A); ἤνουχήσεται (W. H., Mt. 7:7, 8=Lu. 11:9, 10). Aor. indic. occurs 9 times: ἢνοιξθη– (Rev. 20:12 (bis), δι–, Lu. 24:31); ἢνεφξη– (Lu. 1:54); ἢνεφξη– (Mt. 3:16; 9:30; 27:52; Jo. 9:10; Ac. 16:26). 2d aor. indic. ἢνοιξθη– (4 times, Mk. 7:35; Ac. 12:10; Rev. 11:19; 15:5); subj. Mt. 20:33. Perf. part. (only) 11 times: δι-νουχμενος (Ac. 7:56); ἢνεφγυμενος (Ac. 9:8, 10:11; 16:27; Ro. 3:13; 2 Cor. 2:12); ἢνεφγυμενος (Rev. 3:8; 4:1; 10:2; 8; 19:11).

Ἀντάω (ἀπ–, κατ–, συν–, ὑπ–). The simplex does not occur. The parts are regular. Fut. infin. κατ-αντήσειν (Ac. 26:7, W. H. marg.); fut. part. συν-αντήσοντα (Ac. 20:22).

Ἀπο-κτείνω. The simplex does not occur. Pres. varies between –κτείνω, –κτέννω (2 Cor. 3:6 W. H. alt., Mt. 10:28 W. H. alt., Lu. 12:4 W. H. alt.) and –κτέννυμι (Mk. 12:5); fut. ἀπο-κτείνω; aor. ἀπ-κτείνα; pass. inf. ἀπο-κτέννεσθαι (Rev. 6:11); 1st aor. ἀπ-κτάνθην.

Ἀπτό (ἀν–, καθ–, περι–). Ἑσπά, ἤψαμη, ἠφθην.

Ἀρνέομαι (ἀπ–, ἀρνήσομαι, –αρνηθήσομαι, –αρνησάμην, ἠρνημαι.

Ἀρπάζω (δι–, συν–). Ἀρπάσω, ἢρπασα; pass. 2d aor. ἢρπαγην; 1st aor. ἢρπάσθην; 2d fut. ἢρπαγήσομαι.

Βάλλω (ἄμφι-, ἄνα-, ἄντι-, ἄπο-, δια-, ἐκ-, ἐμ-, ἐπι-, κατα-, μετα-, παρα-, παρεπι-, περι-, προ-, συν-, ὑπερ–). Imperf. ἐβαλον (ἐξ- ἐπ- συν–); fut. βαλω (ἐκ–, ἐπι–, παρ-ἐπι–, περι–). 1st aorist (“Alexandrian”) ἐβαλαν (Ac. 16:37); ἐξ– (Mt. 7:22 W. H. alt.; 21:39 W. H. alt.); ἐπι– (Ac. 21:27; Mk. 14:46); 2d aorist, ἐβαλον (ἐξ–, ἐπι–, παρ–, περι–, συν–, ὑπ–); perf. βεβηληκα: pluperf. ἐκ-βεβηληκα. Mid. fut. περι-βαλείται (Rev. 3:5); 2d aor. ἄν–, περι–, συν-εβαλόμην; pass. fut. βληθήσομαι, ἐκ–; 1st aor. ἄν–, ἐξ-, ἐβληθην; perf. βεβηληκαι, περι–; pluperf. ἐβεβηληκα.

Βαρέω (ἐπι–, κατα–). Ἑβάρησα, βεβάρησα, ἐβαρηθην (2 Cor. 1:8, Lu. 21:34). Only passive save in compounds.

Βαρόνω. The older verb is ousted in N. T. by βαρέω except in Mk. 14:40, κατα-βαρονόμενοι. It is read in Lu. 21:34 Rec. βαρονόησε.

Βλαστάω. This is the old form of the pres. The pres. in N. T. is βλαστάω (Mk. 4:27). The aor. ἐβλάστησε may be from βλασταύω or βλαστέω, a form of the pres. occurring in LXX.
Βλέπω (ἀνα–, ἀπο–, δια–, ἐμ–, ἐπι–, περι–, προ–). Ἐβλεπον, βλέψω, ἐβλεψα; περι-ἐβλέπετο; περι-προ-βλεψάμενος.

Γαμίζω. Ἐγάμουν, Attic Ἐγῆμα, late Ἐγάμησα, γεγάμηκα, ἐγαμήθην. Γαμίζω is a late form and only pres. active and pass. and imperf. pass. ἐγαμίζοντο appear in N. T. Γαμίζκο likewise in pres. pass. stem appears in Lu. 20:34 (W. H.) and ἐκ-γαμίζκο in some MSS. in Lu. 20:34 Rec.

Γίνομαι (ἀπο–, δια–, ἐπι–, παρα–, συν-παρα–, προ–). Never γίγνομαι like Attic. Ἐγινόμην; γεγίνομαι; part. γεγίνόμενος (1 Cor. 15:37), Ἐγενόμην and Ἐγενήθην. Opt. γένοιτο; part. γεγόμενος. The frequent use of the part. in comp., ἀπο–, δια–, ἐπι–, παρα–, συν-παρα–, is noteworthy. Γεγόμενος is a frequent variant. J. H. Moulton counts 69 instances of the part. (simple and comp.) in Luke’s writings, and 48 in remainder of N. T. It does not [Page 1214] occur at all in the Johannine writings. “Strong perfect,” γέγονα, γεγένη. A in 1 Macc. 14:30 has ἐγένη, probably an error (cf. γέγονα). Pluperf. γεγόνα (Ac. 4:22), and ἐγεγόνει (Jo. 6:17). Γενίμαι– is a rather frequent spelling, e.g. Ac. 21:14 ΝΒ*AD; 23:10 B*; Lu. 22:26 ΝΒD; 42 ΝΒΑΔ; 1 Cor. 10:20 B*D*, etc.

MOULTON, W. F., and GEDEN, A. S., A Concordance to the Greek Testament (1897).

MOULTON and MILLIGAN, Lexical Notes from the Papyri (The Expos., 1908—).
Γυνώσκο (ὅνα-, δια-, ἐπι-, κατα-, προ-). Γυνώσομαι, ἔγνων, ἐγνώκα, ἐγνώκειν, ἐγνώσαμαι, ἐγνώσθην, γυνώσθησαι. Subj. aor. both γνώ (Jo. 7:51) and γνώ (Mk. 5:43; 9:30; Lu. 19:15); imper. γνώθι; inf. γνώναι; part. γνώς.

Γράφω (ἀπο-, ἕγ-, ἐπι-, κατα-, προ-). Ἐγραφων, γράφω, ἔγραψα, γέγραφα; pass. γέγραμμα, –γεγράμματι, ἔπι-, ἔγραφον, προ-. Mid. 1st aor. ἀπο-γράψαται (Lu. 2:5).

Δείκνυμι and δεικνύω (ἀνα-, ἀπο-, ἕν-, ἐπι-, ὑπό-). Δείξω, ἔδειξα; pass. ἐδείξθην (Heb. 8:5); perf. ἀπο-δεικνύμενος; mid. 1st aor. ἐν-εδείξαμης. The pres. has forms from –νομι and –νύμ.

Δέρω. Ἐδέρα, δαρῆσομαι.

Δέχομαι (ἀνα-, ἀπο-, δια-, εἰ-, ἐκ-, ἀπ-εκ-, ἐν-, ἐπι-, παρα-, προσ-, ὑπό-). Ἐδέχόμην; pass. δέεχομαι, –δέεχθην.

Δέω (προσ-). Ἐδέομαι, ἐδέθην. In Lu. 8:38 W. H. read ἐδέθτο rather than ἐδέθτο (W. H. alt.) or ἐδέθτο. Impersonal δέ and ἔδει.

Δέω (κατα-, περί-, συν-, ὑπό-). Δήσω, ἔδοπα, δόδεκα; pass. δέδεμαι, περί-ἐδεδέμην, ἐδόθην; mid. ἐδόθησα.

Δίδωμι (ἀνα-, ἀντ-ἀπο-, ἀπο-, δια-, ἐκ-, ἐπι-, μετα-, παρα-, προ-). Pres. παρα-δίδωσι (2d sing.), 3d pl. διδόσατι (Rev. 17:13); subj. παρα-διδῷ (1 Cor. 15:24, – διδῷ BEG); imperf. ἐδίδοσαν (Jo. 19:3), παρ- (Ac. 16:4); fut. δόσω; part. ἀπ- (Heb. 13:17), παρα- (Jo. 6:64) δῶσων; –κα aor. ἔδωκα, 3d pl. ἔδωκαν; 2d aor. 3d pl. παρ-δοσαν (Lu. 1:2); imper. δός; subj. δῷ, δῶς (Mk. 6:25), δῷ (Jo. 15:16); subj. 3d sing. cont. δῷ (Mk. 8:37), παρα- (Mk. 4:29), δῷ or δῷ (2 Tim. 2:25, Eph. 1:17); opt. 3d sing. δῷ (Ro. 15:5; 2 Th. 3:16; 2 Tim. 1:16, 18); inf. δούναι; part. δοῦς; perf. δέδωκα; plup. δεδώκειν; mid. fut. δώσομαι, ἐκ- (Mt. 21:41); 2d aor. ἐδίδετο (Mt. 21:33=Mk.-Lu.) with variant l. –οτο in each passage; plur. without variant, ἀπ-δοδοθε, –δόντο. Pass. pres. and imperf. –ἐδίδετο, ὑν- (Ac. 4:35), παρ- (1 Cor. 11:23), with variant –οτο in each case; fut. δοθήσουμα, ἀνταπ-, παρα-. 1st aor. ἐδόθην, ἀπ-, ἔπ-, παρ--; perf. δέδομαι. Dr. Hort considers the change of the vowels in imperf. and 2d aor. from –οτο to –ετο as probably euphonic. Δίδω (ἀπο-, δια-, παρα-). Pres. διδῷ (Rev. 3:9); imper. δίδου (Lu. 6:30; 11:3); part. ἀπο-δίδου (Rev. 22:2); imperf. ἐδίδου (Mk. 3:6; Ac. 1:20), ἐπ-, παρ--; fut. δια-διδόσασιν (Rev. 17:13 Rec.) ex fictione Erasmi.

Δύναμαι. Pres. 2d sing. δύνασαι (Mt. 5:36; 8:2; Mk. 1:40; Lu. 6:42). Opt. δυναμή (Ac. 8:31; 27:12, 39). Ἐδύναμην and ἧδυναμην, δυνόμομαι, ἡδύνηθην and ἡδύνωσθην. Λύνομαι, 2d sing. δύνη (Mk. 9:22 f.; Lu. 16:2; Rev. 2:2). There are traces of this late Greek form in B in present tense in Mt. 19:12; 26:53; Mk. 10:39; Ac. 4:20; 27:15.

Δύω (ἐκ--, ἰπ-ἐκ-- [mid.], ἐν--, ἐπ-ἐν--, παρ-εἰσ--, ἐπτ--). Simplex only, Mk. 1:32. Pres. ἐπι-δύετο; 2d aor. ἐδύν, ἐδύσα (Mk. 1:32); mid. ἐδύσαμην; pass. παρεἰσ-ἐδύην. 2d aor. (Ju. 4) ἐν-δεδυμένος.

Δύω (ἐκ--). In pres. only.

Ἐάω (προσ--). Ἐίον, Ἐάσω, Ἐάσσα. Augst. επαφ=εάφ=ετ-. See Jannaris, § 719.

Ἐγγίζω (προσ--). Ἐγγίζον, Ἐγγίζω and Ἐγγίζει (Jas. 4:8 W. H. alt.), Ἐγγίσα, Ἐγγίκα.[Page 1215]

Ἐγείρω (ὅ--, ἐξ--, ἐπ--, σύν--). Ἐγείρω, Ἐγείρα, Ἐγείρετο (Jo. 6:18 ὅ-ηγ. alt.), Ἐγείραμαι, Ἐγείρθησομαι. In Mk. 2:9 Ἐγείρου, but usually intransitive Ἐγείρε (cf. ὅγε, Ἐπειείγε) as Mk. 5:41. Ἐγείραι not in N. T., nor Ἐγρήγορα.

Ἐδαφίζω. Ἐδαφίζω (“Attic” fut.).

Ἐθω. Obsolete in pres. Ἐθώθα, Ἐθώθειν.

Εἰδώ and Ἐιδώ (ἀπ--, ἐπ--, προ--, σύν--, ὑπερ--). Not used in pres. Fut. Ἐιδήσω (Heb. 8:11, LXX). 1st aor. Ἐίδα, Ἐιδάμεν, Ἐιδάτε, Ἐιδάν (W. H. text 18 times and 2 alt.). 2d aor. Ἐιδὼν and Ἐιδών (ind. both complete); imper. Ἐδώ; subj. Ἐδώ; inf. Ἐεδών; part. Ἐιδών. 2d perf. Ἐιδών complete, and Ἐδώ (7), Ἐδάσιν (Ac. 26:4); imper. Ἐδώ (7); subj. Ἐιδώ; inf. Ἐιδένω; part. Ἐιδώς; pluperf. Ἐδέων complete. As Ἐιδών and Ἐιδάν have the same root they are put together. It does not seem reasonable to divide the same root between Ἐιδών and ὅραω. See Ἐδώ.

Εἰμί (ἀπ--, ἐν--, ἐξ--, πάρ--, σύν--, σουμ-πάρ--). Ἐν and mid. Ἐημι, Ἐηθα, Ἐημα; imper. pres. Ἐηθ, Ἐστώ, Ἐστῶσαν (ἔστε 2 pl. does not occur); opt. Ἐην Ἐσομαι, Ἐσομαι, Ἐσόμενος (Lu. 22:49).

Εἶμι. Only in comp. (ἀπ--; ἐσ--; ἐξ--; ἐπ--; σύν--). Only pres. (fut. sense) 3d pl. -ἰδισ, εἰσ- (Heb. 9:6); imper. εἰσ-τί (Ac. 9:6 B) and imperf. (–ἐιμι).

Ἐλαύνω (i.e. Ἐλω-νω) (ἀπ--). Pres. inf. Ἐλαύνειν. 1st aor. Ἐπ-ἐλασά; perf. Ἐληλα-κώς; imperf. pass. Ἐλαύνετο.

Ἐλκω. Pres. act. and pass. Ἐξ--; imperf. Ἐλκων; other tenses from Ἐλκώ. Ἐλκύσω, Ἐλκυσα.
Ἐπο (ἀντ–, ἀπ–, προ–). Pres. not used. Fut. ἐρῶ. 1st aor. ἔπα, etc.; imper. ἐπόν (?), ἐπάτω, –ατε, –άτουσαν; part. ἐνας. 2d aor. ἐπον; imper. ἐπέ; subj. ἐνο; inf. ἐπέαν; part. ἐπόν. Perf. ἐφήκα, 3d pl. –καν and –καςν (Ac. 17:28); inf. ἐφήκεναι; part. ἐφήκος. Pluperf. ἐφήκει. Mid. 1st aor. ἄπειρόμεθα. Pass. 1st aor. ἔρρηθη and ἔρρεθη; part. ἐρθεῖς; perf. ἐφήται; part. ἐφήμινος.

Ἐργάζομαι (κατ–, περ–, προσ–). Ἐργαζόμην (Ac. 18:3 HIP) and ἄραγάμην (W. H.), ἐργασάμην (Gosp.) and κατ-εργάζατο (2 Cor. 7:11), ἐργασάμαι (passive). 1st aor. κατ-εργάσθην and κατ-ηρα– (BDC, W. H. alt.).

Ἐρχομαι (ἀν–, ἐπ-αν, ἀπ–, δι–, εἰς–, ἐπ-εισ–, παρ-εισ–, συν-εισ–, ἔξ–, δι-ἐξ–, ἔπ–, κατ–, παρ–, ἄντι-παρ–, περι–, προ–, προσ–, συν–). Ἐρχόμην, Ἐλεύσομαι, Ἐλήθων and Ἐλθά, Ἐλλύθων. Pluperf. Ἐληλύθειν.

Ἐρωτάω (δι–, ἐπ–). Ἐρωτότων and Ἐρωτότων, Ἐρωτήσω, Ἐρωτήσαι; Ἐπ-ἐρωτήθεις, 1st aor. pass.

Ἐσθῶ and Ἐσθο (κατ–, συν–). Pres. only. Ἐσθον, φάγομαι, 2d sing. φάγεσαι (Lu. 17:8); Ἐφαγον complete; opt. φάγοι (Mk. 11:14).

Εὔστηλιζω (προ–). Active only, 1st aor. (Rev. 10:7; 14:6). Προ–, εὐηγελιζόμην, εὐηγελιζόμενη, εὐηγελιζόμενον.

Εὐδοκέω (συν–), (ἐν, ἡ)δοκοῦμεν (1 Th. 2:8), (ἐν, ἡ)δόκημα (ἐν– in Gospels. In the Epistles the reading varies).

Εὐρίσκω (ἀν–). Εὐρίσκον ον καὶ ἦπρ., εὐρίσκου, εὐρόν (εὐραμεν, etc.) and εὐρήσα (some MSS.), εὐρήκα, ἦπρ., εὐρίσκομαι, εὐρέθην, εὐρεθήσομαι. Mid. εὐράμυνος.

Ἐχω (ἀν–, ἀντ–, ἀπ–, ἐπ–, κατ–, μετ–, παρ–, περι–, προ–, προσ–, συν–, ὑπερ–, ὑπο–). Ἐχων (ἐχάμεν εὐχόσαν, as well as εἶχαν and εἶχον), Ἐξω, Ἐσχον, Ἐσχον, εἰχόμην, εἴχομαι; 2d aor. mid. ἄν-εχόμην.

Ζῶω (ἀνα–, συν–). Pres. ζῶ, ζῆς, ζή; inf. ζήν. Ἐξων, ζήσω, ζήσομαι, ἔξησα.

Ζώννυμι and ζώννυμι (i.e. ζωσ-νυ–) (ἀνα–, δια–, περι–, ὑπο–). Ἐξώννυμι, ζῶσο – ἔξωσα, mid. fut. περι-ζώσομαι. 1st aor. ἔξωσάμην, –ἔξωσμαι.

Ἠκω (ἀν–, καθ–). Ἐκων, ἔξω, ἄξα (in subj.), ἦκα in Mk. 8:3. Some MSS. have ἥκουσιν instead of ἤκασιν. BLA (W. H.) read ἐλεύν.[Page 1216]

Ἡσσόμαι once (2 Cor. 12:13). Elsewhere ἠττάμαι, ἠττήματι, ἠττήθην.

Θάπτω (συν–). Θάπα, ἐτάφιον.

Θαυμάζω (ἐκ–). Ἐθαυμάζων, Ἐθαύμασα, Ἐθαυμάσθην, θαυμασθήσομαι and mid. θαυμάσομαι (Rev. 17:8 NB).
Ὡνήσκω (ἀπο-, συναπο-). Simplex perf. only, ἀπ-ἐθνησκον; –θανοῦμαι, –θανον, τέθνηκα. Both teθνόναι and τεθνηκέναι (Ac. 14:19), but τεθνηκός.

Ἰάομαι. Pres. ἴηται, ἱόμην; mid. ἴασομαι, ἱασάμην; pass. ἴαμαι (ἵηται Mk. 5:29), ἱάθην, ἵαθησομαι.

Ἱόω obsolete. For ιἴον and ἱῶα see ἵδω (εἰδῶ).

Κε-νέομαι (ὄφ-, δι-, ἔφ-). Simplex not found in N. T. Pres. ἱκνούμενος; 2d aor. ἀθίκετο; inf. ἐφ-ικέομαι; part. ἄφ-ικόμενος.

Ιστημι, ἰστάω, ἰστάω (ἀν-, ἔπαιν-, ἅνθο-, ἐξαν-, ἄφ-, δι-, ἔν-, ἐξ-, ἐπ-[ισταμαι], ἐφ-, κατεφ-, συνεφ-, καθ-, ἀντικαθ-, ἀποκαθ-, μεθ-, παρ-, περι-, προ-, συν-). Simplex has not the pres. and imperf. active or passive. Στήσω; 2d aor. ἐκστήν (complete), ἐστήσα (complete), ἐπιστήκη καθήκη, εἰςἠστήκῃ; mid. fut. στήσομαι; ἁνα-, ἐπανα-, ἅπο-, etc. Passive ἁνθ-, ἁφ-, ἐξ-ιστάμην, ἐπιστάθην, σταθήσομαι. Both ἐστός and ἐστικός, ἐξ-εστακέναι and ἐστάναι. Both ἐστακα καθήκη.

Καθαίρω (δια-, ἐκ-). –ἐκάθαρα, κεκάθαραι. Inf. καθάραι.

Καθαρίζω (δια-). Καθαρίζω, ἐκκαθάρισα, κεκαθαρίσα, ἐκκαθαρίσῃς, ἐκκαθαρίσθην and ἐκκαθαρίσθη (Mt. 8:3=Mk.).

Καθέζομαι (παρα-). The simplex ἐζομαι does not occur in LXX or N. T. Pres. part. καθεζόμενος; imperf. ἐκαθέζομην. 1st aor. part. παρ-καθεζοθείς.

Κάθημαι (συν-). Pres. 2d sing. κάθη (Ac. 23:3); imperf. κάθω (Jas. 2:3); subj. καθῆθος (Lu. 22:30); inf. καθήσομαι; part. καθήμενος; imperf. ἐκαθήμην; fut. καθήσομαι.

Καθίζω (ἀνα-, ἐπι-, παρα- [Rec.], συν-). The simplex ἓζω does not occur in LXX or N. T. Fut. καθίζω; 1st aor. ἐκάθησα; perf. κεκάθηκα; mid. fut. καθίσεσθε (Mt. 19:28).

Καίο (ἐκ-, κατα-). Κατ-ἐκανον, κατα-καύσω, κατ-ἐκάωσα, κέκαμαι, κατ-εκάνη, ἐξεκαύθην, κατα-καθήσαμαι, κατα-καυθήσομαι. In 1 Cor. 13:3 some MSS. have καυθήσομαι (fut. subj., Byz.).
Καλέω (ἀντι-, ἑν-, εἰς- [−μαί], ἐπι-, μετα-, παρα-, συνπαρα-, προ-, προς-, συν-) Ἐκάλουν, καλέσα, ἐκάλεσα, κέκληκα, κέκλημαι, ἐκ-εκέκλητο, ἐκλήθην, κληθήσομαι. Mid. fut. ἐπι-, μετα-καλέσομαι, ἐπι-, μετα-, προς-εκαλεσάμην.

Κάμνω. Ἕκαμον, κέκμηκα.

Κερά-ννυ-μι, κερα-ννύο (σὺν−). The present does not occur in N. T. Ἐκέρασα, κεκέρασμαι, σὺν−.

Κερδαίνω. Pres. and imperf. do not occur. Fut. κερδάνῳ (1 Cor. 9:21 W. H.); aor. subj. κερδάνοι: a matter of editing. [Page 1217]

Κερδάω. Fut. κερδήσα (Jas. 4:13); aor. ἐκέρδησα; subj. κερδήσω (1 Cor. 9:19–21). Pass. fut. κερδήσομαι (1 Pet. 3:1).

Κλαίω. Ἐκλαιον, κλαύσω, ἐκλαύσα, κλαύσομαι (Rev. 18:9 W. H. marg.).

Κλάω (ἐκ-, κατα−). Ἐκλάσα, ἐκλάσθην, ἕξ−.

Κλείσω (ἀπο−, ἐκ−, κατα−, σὺν−). Κλείσω, ἐκλείσα, κέκλεισομαι, κέκλεισθην.

Κομίζω (ἐκ−, σὺν−, ἐκόμισα, σὺν−). Pass. ἐξ-εκομίζετο; mid. κομίσομαι and κομιοῦμαι (1 Pet. 5:4; some MSS. in Col. 3:25), ἐκομίσαμην.

Κόπτω (ἀπο−, ἐκ−, ἑν−, κατα−, προ−, προς−). Ἐκοπτον, ἐκ−, προ-κόψω, ἐκοψα; pass. 2d aor. ἐξ-ἐκόπην; 2d fut. ἐκ-κοπήσομαι, ἐκοψάμην, κόψομαι, ἀπο−.

Κορέννυμι, κεκορέννυμος, κορεσθεῖς.

Κράζω (ἀναι−). Ἐκραζόν, κράζω, ἐκράζα καὶ ἐκάκραζα; 2d aor. ἄν-ἐκραγον; 2d perf. κέκραγα. Some MSS. have κεκράζομαι in Lu. 19:40.

Κρίνω (ἀναι−, ἀπο−, ἀνταπο− [−μαι], δια−, ἑν−, ἐπι−, κατα−, σὺν−, ὑπο−, συνυπο−). Διέκρινα, κρίνων. Pass. ἐκρίνωμην; κατα-κρινών (both a question of accent), ἐκρίνα, κέκρικα, κεκρίκειαν, κέκριμαι, ἐκρίθην, κριθήσομαι. Mid. 1st aor. ἄπ-ἐκρίναμην.

Κρύπτω (ἀπο−, ἑν−, περι−). Ἐκρυψα; 2d aor. περι-ἐκρυβεν (Lu. 1:24). [This may be the imperf. of κρύβω.] Κέκρυμμαι, ἐκρύβην.

Κυλώ (ἀναι−, ἀπο−, προς−). Ἀπο-κυλίσω, ἀπο−, προς-εκύλισα; pass. ἐκύλιετο, κεκύλισσα, ἀνα−, ἀπο−.
Λακέω or λάσκω. Both presents could give ἥλακησε (Ac. 1:18).

Λαμβάνω (όνα--, ἄντι--, συναντι-- [-μα], ὁπο--, ἐπτ--, κατα--, μετα--, παρα--, συν-para--, προ--, προσ--, συν--, συν-peri--, ὑπο--). Ἐλάμβανον, λήψαται, Ἐλαβον; opt. λάβοι. Λάβε, non labe; Ἐλάβατε (1 Jo. 2:27); παρ-ελάβοσαν (2 Th. 3:6), Ἐλαβαν (Jo. 1:12). Ἐλήψας; Ἐλήψεις (Rev. 11:17); ᾧ ἐλήμματι, Ἐλημφαν. Pass. fut. παραλημφθόμενοι; mid. 2d aor. Ἐλαβόμεν; imper. ἔπτ--, προσ-λαβοῦ.

Λανθάνω (ἐκ--, ἐπ-- [-μα]. Simplex active only, Ἐλαθον. Ἐπ-ελαθόμεν, -λέλησμαι (ἐκ--, ἔπτ--).

Λέγω, ‘say’ (ὁντι--, δια--, ἐπτ--, προ--). The simplex has pres. and imperf. act. and pres. mid. only. Imp. Ἐλεγον, ὁντ--, προ--; Ἐλεγαν (Jo. 11:56 ND). Pass. imperf. διελεγόμην; 1st aor. δι-ελέγθην; mid. 1st aor. δι-ελεξάμην.

Λέγω, ‘choose’ (ἐκ--, ἐπτ--, κατα--, παρα--, συλ--). Simplex has not this meaning. Συλ-- is the only compound with active forms. Fut. συλ-λέξω; 1st aor. συλ-λεξα; mid. pres. κατα--, παρα--, συλ--; imperf. εξ--, παρ-ελεγόμην; 1st aor. δι--, ἐκ--, ἔπτ-ελεξάμην; pass. perf. ἐκ-λεξαμένος.

Λείπω (ὁπο--, δια--, ἐκ--, ἐπτ--, κατα--, ἐν-κατα--, περι--). Simplex only pres. (act. and pass.) except Tit. 3:13 W. H. marg. Ἐλειπον, -λείπω, -λελειψα, Ἐλιπον; pass. - λέλιμμα, -λελείφθην. (Some MSS. have a compound of λι-μ-πάνω in pres. and imperf., Ac. 8:24.)

Λογίζομαι (όνα--, δια--, παρα--, συλ--). Ἐλογιζόμην, Ἐλογισάμην, Ἐλογίσθην, λογιζόμενοι.

Λούω (ὁπο--). Ἐλοῦσα; pass. λέλουσαι and λέλουσαι (Heb. 10:22); mid. 1st aor. Ἐλουσάμη.

Μανθάνω (κατα--). Ἐμαθον, μεμάθηκα.

Μέλλω. Ἐμελλων and ἥμελλων, μελλήσω. [Page 1218]

Μένω (όνα--, δια--, ἐν--, ἐπτ--, κατα--, παρα--, συν-para-- [Rec.], περι--, προσ--, ὑπο--). Ἐμενον, μενῶ, ἐμείνα, -μεμένηκα, μεμενήκειν.

Μιαίνω. Μεμίαμαι, ἐμιάνθην.

Μίγνυμι and μίσγο (συν-ανα--). Ἐμιξα, μέμιγμαι.

Μιμνήσκω (όνα--, ἐπ-ανα--, ὑπο--). -μνήσω, μέμνημαι, ἐμνήσθην, μνησθόσομαι.

Μνηστεύω. Ἐμνήστευμαι, ἐμνηστεύθην.
Nósso (κατα–). Ἐνυξά; 2d aor. pass. κατ-ενύγην.

Ξηραίνω. Pres. does not occur. Ἐξηρᾶναι, ἔξηραιμαι, ἔξηράνθην.

Συράω. The form συράσθαι occurs (1 Cor. 11:6), which may be accented συράσθαι (pres. inf.) or συρασθαι (1st aor. mid. inf.). Ἐξύρημαι, ξυρήσμαι.

Οἰκοδομέειν (όν–, ἔπ–, συν–). Οἰκοδομόμον, οἰκοδομῆσαι, ὡκοδομεῖα (also οἰκοδ–), οἰκοδομήμαι; οἰκοδομήμην, οἰκοδομήθηςαι (also οἰκοδ–), οἰκοδομηθῆσαι.

Ὀλλυμι and ὀλλύω. Simplex does not occur in N. T. It is confined in LXX to Job, Prov. and part of Jer. (Thackeray, p. 279). Comp. ὀλλύμην, ὀλλύμῃ; subj. ὀλλύω (also ὀλλόω) (1 Cor. 10:9); fut. ἀπ-ολλύμην and ἀπ-ολλύ (1 Cor. 1:19 Q); 1st aor. ἀπ-ολλύς; 2d perf. ἀπ-ολλύλως; mid. imperf. ἀπ-ολλύμη; fut. ἁπ-ολλύμαι; 2d aor. ἁπ-ολλόμην, συν-απ–; inf. ἀπ-ολλύσθαι; part. ἀπ-ολλύμενος.

Ὀμοιοῦ (ὁφ–). Ὀμοιόωσο, ὡμοιώθην (also ὁμοιώθην), ὁμοιωθήσομαι, ὁφ-ομοιωμένος.

Ὀρύσσω (ἁφ–, καθ–, προ–). Pres. complete. Imper. ὅρα, ὅρατε; imperf. ἐφώρον (3d pl., Jo. 6:2); perf. ἐφράκα (Gospels and Acts. In Paul and 1 John variation between ἤκω– and ἤκο–); plup. ἐφράκας; pass. pres. καθ-οράται; imperf. προορώμην (LXX). Stem ἑπ–: fut. ἐφομαι; fut. pass. ὑφήσομαι; 1st aor. pass. ὧψθην; 1st aor. mid. subj. ὑφήσθη (Lu. 13:28). Stem ἑδ–: see έδέω.

Ὀρύσσω (δι–, ἕξ–). Ὀρυγξα, ἕξ–, δι-ορυγκύναι or δι-ορυγήναι (W. H alt.).

Πάσχω (προ–, συμ–). Ἐπαθον, πέλονθα.

Παύω (ἁνα–, ἔπ-ανα–, συν-ανα [-μαι], κατα–). Simple aor. act. once only. Παύω, ἑπαύσα; mid. πάυομαι, ἑπαύσῃ, πάυομαι, ἑπαυσάμην, πέπαυμαι, –παήσομαι.

Πείθω (ἁνα–). Ἐπείθον, ἑπείσα, πέποιθα, ἑπείποιθεν; pass. ἑπείθόμην, πέποιθαι, ἑπείσθην, πειθήσομαι.

Πιάζω and πείζω, ἑπίασαι, πεπίεσαι, ἑπιάζῃν.

Πίμπλημι. Pres. part. ἐμπιπλών, ἔπλησαι, ἐμ-πεπλησμένος, ἐπλήσθην, πλησθήσομαι.

Thackeray

———, Relation of St. Paul to Contemporary Thought (1900).
Πίνω (κατα–, συμ–). Πίνωμαι (πίεσαι, Lu. 17:8), ἔπιν (both πίνω and πινώ, but only πίε), πέπωκα, κατ-ε-πόδην.

Πιπράσκω, πέπρασκο, πέσκας, ἔφραθην.

Πίπτω (ἄνα–, ἄντι–, ἀπο–, ἐκ–, ἐν–, ἔπι–, κατα–, παρα–, περι–, προς–, συμ–). Ἐπίπτον, πεσούμαι, ἐπεσαν, ἐπέσα (3d pl. ἐπεσαν, Gospel 5, Acts 2), πέπτωκα. In Rev. 2:5 πέπτωκες, Rev. 18:3 πέπτωκαν.

Πλέω (ἀπο–, δια–, ἐκ–, κατα–, παρα–, ὑπο–, ἐπέλεον (3d sing. ἐξ-ἐπλευ contracted), ἐ-πλευσα.

Πλέκω (ἐμ– only comp.), πλέκομαι; aor. act. part. πλέξας; 2d aor. pass. ἐμπλακεῖς.

Πλήσσω (ἐκ–, ἐπι–). Act. 1st aor. subj. ἐπι-πλήξης (1 Tim. 5:1); pass. pres. ἐκ-πλήσσομαι; imperf. ἐξ-ἐπλησσόμην; 2d aor. ἐπλήγη (simplex) and ἐξ-ἐπλάγην (see Veitch).

Πνίγω (ἀπο–, ἐπι–, συμ–). Ἐπνίγον, ἐπνιξά, ἐπνιγόμην, ἀπ-ἐπνίγην.

Πράσσω. Πράξω, ἔπραξα, πέραμε, πέραμαι.

Πυνθανόμαι, ἔσκαπτηθαι, ἔσκατε. Ἐσκαπτίσα (some MSS. ἔρραντ.), ἐράντισαι (so W. H., but some MSS. ἔρραν). Mid. 1st aor. subj. ἐραντίσθηται (Mk. 7:4). [Page 1219]

Ῥέω (παρα–). Ῥέως; 2d aor. pass. ἐρρύθην.

Ῥήσσω (δια–, προς– and ῥήγνυμι). The active forms belong to ῥήσσω and the passive to ῥήγνυμι. Act. pres. ῥήσαι, δια–; fut. ῥήγξα; 1st aor. ἐρ(ρ)ηξά, δι–, περι–, προς–; pass. pres. ῥήγγυνται; imperf. δι-ἐρ(ρ)ήγνυτο (Lu. 5:6). The reading of Lu. 5:6 varies between δι-ἐρ(ρ)ήγνυτο and δι-ἐρ(ρ)ήσετο.

Σβέννυμι and σβεννύο, σβέννυμαι, stem sβε(σ)–. Pres. σβέννυντε, σβέσω, ἔσβεσα; pass. σβέννυμαι

Σείω (ἄνα–, δια–, κατα–). Ἀν-δι-κατ-έσεισα, σείσω; pass. pres. σειόμενος; 1st aor. ἐσείσθην.

Σκάπτω (κατα–). Ἐσκάπτω, ἐ-σκάπται (Ac. 15:16 Rec.).

Σκέπτομαι is not found in N. T. save in ἐπισκέπτεσθαι (Jas. 1:27; Heb. 2:6 Q), ἐπισκέψαμαι; 1st aor. mid. ἐπι-σκέψημην.

Σπάω (ἄνα–, ἀπο–, δια–, ἐπι–, περι–). Pres. inf. ἀπο-σπάν, ἀνα-σπάσω, ἀπ-ἐσπάσα; pass. περι-ἐσπάσας, ἀ-ἐσπάσηθη, ἀν–, ἀπο–, δια–; perf. inf. δι-ἐσπάσθαι. 1st aor. mid. σπασάμενος (simplex).
Τίθη. Στρώννυ. Σώζω. Τίκτω. Τέ. Σφάξω. Θέτω. Προσθήσο. Στρέψω. Προστέλλω. Στέλλω. Τέλλω.

12:4 according to W. H.

προσσωθήσο (pass. fut., 1st aor.). τέταλ. απεστάλκαν (in Ac. 16:36), –). –). Present does not occur. Ἑστρώννυνον, Ἑστρωσα, Ἑστρώμαι, κατ-εστρώθην.

Σφάξω (κατα–). Present does not occur. Σφάξα, Ἑσφαγμαι, Ἑσφάγην.

Σφάξω (δια–, ἐκ–). Σώσω, Ἑσωσα, Ἑσωζόμην, Ἑσώσω, σωθήσω, σωθήσωμαι.

Τάσσω. (ἀνα– [–μαι], ἀντι–, ἀπο–, δια–, ἔπι-δια– [–μαι], ἐπι–, [προ–] προσ–, συν–, ὑπο–). Έταξα, δια-τεταγέναι, τέταγ– [–μαι]; 2d aor. δι-, ὑπ-ετάγην, δια-τάξομαι; 2d fut. ὑπο-ταγήσομαι; 1st aor. δια-ταξθεῖσι; 1st aor. μετα-ταξάμαι.

Τελέω (ἀπο–, δια–, ἐκ–, ἐπι–, συν–). –τελέσω, Ἑτέλεσα, τετέλεσκα, τετέλεσμαι, Ἑτελέσθην, τελεσθήσομαι.

Τέλλω (ἀνα–, ἔξανα–, ἐν–). Simplex does not occur in N. T. 1st aor. ἀν-, ἔξαν-έτειλα; perf. ἀνα-τεταλκα; mid. pres. ἐν-τέλλομαι; fut. ἐν-τελοῦμαι; perf. ἐν-τέταλμαι; mid. 1st aor. ἐν-ετελάμην.

Τέμνω (περι–, συν–). Simplex does not occur. 2d aor. περι-ἐτεμον; inf. περι-τεμεῖν; pass. pres., 1st aor. περι-ἐτεμήθην; perf. περι-τετεμένοις.

Τιθημι (ἀνα–, προσ-ανα–, ἀπο–, δια–, ἄντι-δια–, ἐκ–, ἐπι–, συν-ἐπι–, κατα–, συν-κατα–, μετα–, παρα–, περι–, προ–, προσ–, συν–, ὑπο–). Act. pres. complete. Imperf. Ετίθησαι and Ετίθεσαν, Ετίθουν (from τιθεω); fut. θήσω; aor. Εθήκα, –κας, – καν (3d pl.); imper. θές (Ἐπι–, προ–); subj. θέναι; part. θεῖς; perf. τεθεικα; mid. and pass. τεθείμαι, τεθείμαι, συν-ετέθειντο, Ετίθημαι (Ἐξ–, προσ–); mid. fut. δια–; Ἐπι-θήσομαι; 2d aor. Θέμηση (complete); imper. θεύ (παρα–); θέον (Ἀπο–); inf. θεσθαι (Ἀπο–, κατα–); part. θεμενος (Ἀπο–, δια–). Pass. fut. τεθή-σομαι; aor. Ετέθην; inf. τεθήναι; part. τεθέις.

Τίκτω. Τέξομαι, Ἑτεκον, Ἑτέχθην.
Τρέχω (όνα-, ἄπο-, ἐκ-, ἐν-, ἐπι-, μετα-, περι-, προ-). Simplex not in N. T. 1st aor. ὄν-, ἐπι-έτρεμα; mid. pres. imperf. ἐν-έτρεμομήν; 1st aor. part. προ-τρεγάμενος;

[Page 1220] pass. “strong” fut. ἐκ-, ἐν-τραπήσονται; 2d aor. ἐκ-, ἐπι-έτραπήν; perf. ἐπι-έττραπται (1 Cor. 14:34 Rec.).

Τρέφω (όνα-, ἐκ-, ἐν-). Ἐθρεψα, -εθρεψάμην, τέθραμμαι, -έτραφην.

Τρέξω (εἰσ-, κατα-, περι-, προ-, προσ-, συν-, ἐπι-συν-, ὑπο-). Pres. complete. Ἐτρεχον, Ἐδραμον.

Τρίβω (δια-, συν-). Simplex does not occur. Pres. δια-, συν-; imperf. δι-έτριβον; fut. συν-τρίψω; 1st aor. δια-, συν-τρίψα; pass. pres. συν-τρίβομαι; 2d fut. συν-τριβήσομαι; perf. inf. συν-τετρίβθαι; part. συν-τετριμμένος.

Τυγχάνω (ἐν-, ὑπέρ-ἐν-, ἐπι-, παρα-, συν-). Ἐτύχων, opt. τύχου, τέτυχα (Heb. 8:6, Ν*AD*KL), τέτευχα (Rec., BE, or even τετύχηκα in MSS.).

Φαινω (όνα-, ἐπι-). Pres. -έφανα (φανη, Rev. 8:12, 18:23 is variously accented), Εφάνην, φανήσομαι και φανοῦμαι (LXX).

Φείδομαι. Φείδομαι, Ἐφείδομαι.

Φέρω (όνα-, ἄπο-, δια-, εἰσ-, παρ-εἰσ-, ἐκ-, ἐπι-, κατα-, παρα-, περι-, προ-, προσ-, συν-, ὑπο-). Ἐφερον, Ἐφερόμην, οἰσώ, ἡ-νεγκα, indic. Ἡ-νεγκον; other parts Ἡ-νέχθην; 2d perf. act. προσ-ενήνοχα.

Φεύγω (ἄπο-, δια-, ἐκ-, κατα-). Mid. fut. φεύξομαι; 2d perf. Ἐκ-πεφεύξεται, Ἐφυγον.

Φθάνω (προ-). Ἐθάνα, Ἐθάκα (1 Th. 2:16 W. H. marg.).

Φθείρω (δια-, κατα-). Imperf. (?) Ἐ-φθείρεν (Rev. 19:2). Φθείρω, Ἐφθείρα, -φθαρμαι, Ἐφθάρην, φθαρήσομαι.

Φράσσω. Ἐφραξα, Ἐφράγην, φραγήσομαι.

Φύω (ἐκ-, συν-). Pres. part. φύων; pass. 2d aor. part. φυέω, συν-φυέωσα. A further form ἐκ-φιη (Mt. 24:32=Mk.) may be accented -φῆ (W. H.) and will then be active pres. subj. or 1st aor. subj.; or -φη and will then be pass. 2d aor. subj. In this case τὰ φύλλα is considered the subject.

Χέω (ἐκ-, ἐπι-, κατα-, συν-). Simplex does not occur in N. T. and χέννω (simplex not in LXX or N. T.). Comp. ἐκ-, ὑπέρκ -, συν-. Active part. ἐπι- (Lu. 10:34); imperf. συν-χέννεν (Ac. 9:22); fut. ἐκ-χέννω (LXX); 1st aor. ἐκ-, κατ-έχεαι; inf. ἐκ-χέαι (Ro. 3:15, LXX); 2d aor. (?) imper. ἐκ-χέετε (Rev. 16:1), συν-έχεον (Ac. 21:27). Hort. (II, p. 165) would refer the above forms “to an otherwise virtually unknown 2d aor.” Pass. pres. ἐκ-χέηται (Mt. 9:17) and ἐκ-συν-, -ὑπέρ-ἐκ-χέονομαι; imperf. ἐκ-εχύννετο (Ac. 22:20); fut. ἐκ-χιθόσομαι; 1st aor. ἐκ-, συν-εχύθην; perf. ἐκ-, συν-κέχυμαι.
Χρίω (ἐγ–, ἐπι–). Aor. ἔχρισα, ἐγ-χρῖσαι (Rev. 3:18) may be inf. of 1st aor. active (W. H.) or imper. of 1st aor. mid. (ἔχρισαι).

Χαίρω (συν–). ἔχαρων, ἐχάρην, χαρήσομαι, some MSS. χαρῶ (Rev. 11:10).

Χαρίζωμαι. Mid. χαρίσωμαι, ἔχαρισάμην; pass. κεχαρίσμην, χαρισθήσομαι.

Χράομαι (κατα–). ἔχρῶμην, ἔχρησμην, κέχρημα. Impers. χρή only once (Jas. 3:10).

Ψύχω (ἀνα–, ἀπο–, ἔκ, κατα–; ἄν, ἐκ–, κατ–ἐψύξα). Ψυγήσομαι.

Ωνέωμαι. Ωνησάμην, not ἐπριώμην.

13. Ablaut. It is important for the student to note the part played in Greek words, both root-syllables and other syllables, by ablaut or vowel-gradation. We find qualitative ablaut, as φέρω, φόρος and λείπω, λέλοιπα. Then there is quantitative or qualitative-quantitative ablaut, as in ἢμεν, ἥμι and λπεῖν, λείπω. [Page 1221] The subject is still more or less obscure as to the precise order of these vowel-changes and the precise factor in each change (accentuation, vowel-contraction, compensative lengthening). For a brief account see Wright, Comparative Grammar of the Greek Language, 1912, pp. 49–61; Brugmann, Kurze vergl. Gr., pp. 138–50; Hirt, Handbuch der griech. Laut- und Formenlehre, pp. 84–105. For a fuller discussion see Hirt, Der indogermanische Ablaut; Brugmann, Grundriß, vol. I, pp. 482–505.

α: see Sinaiticus.

α-text: see Syrian text.

A: see Alexandrinus.

Abbreviations: of personal names, 171–3.

Ablative case: form, 248; Doric genitive-ablative, 254; Attic gen.-abl., 255 f.; name, 514; meaning, 514; rare with substantives, 514 f.; with adjectives, 515 f.; with prepositions, 516 f. and ch. XIII; with verbs, 517–20 (of departure and removal 518, of ceasing and abstaining 518, of missing, lacking, despairing 518, of differing, excelling 519, of asking and hearing 519, with the partitive idea 519, attraction of relative 519 f.); after comparative, 667.

Ablaut: 1220 f.

Absolute: use of cases, 416; nominative, 459 f.; accusative, 490 f.; genitive, 512–4; positive adjective in absolute sense, 661; inf., 1092 f.; participle, 1130–2.

Abstract nouns: 152, 794.

Accidence: in the vernacular κοινή, 72 f.; in the N. T., 82; part II, 141–376.

Accumulation of prepositions: see prepositions.

Accusative case: form, 248; double accusative, 257; singular in third decl., 264 f.; plural, 265 f.; like nom. in –ες, 266; singular of adjectives, 274; name, 466 f.; meaning of, 467 f.; with verbs of motion, 468 f.; extent of space, 469; for time, 469–71; with transitive verbs, 471–7; cognate, 477–9; double, 479–84; with passive verbs, 484–6; adverbial, 486–8; by antiptosis, 488; by inverse attraction, 488; with the infinitive, 489 f.; acc. absolute, 490 f., 1130; with prepositions, 491 and ch. XIII; compared with genitive, 506–10.

Achæan: origin, 16; Achæan-Doric, 17, 54, 266; Achæan-Dorian κοινή: 53, 63.

Active voice: endings, 337–9; displacing future middle, 356; meaning of, 799; transitive or intransitive, 799 f.; effect of prepositions, 800; variation in tenses, 800 f.; causative, 801 f.; with reflexives, 802; impersonal, 802; infinitives, 802; as passive of another verb, 802 f.

Adjectives: with formative suffixes, 157–60 (primitive, 157 f.; secondary, 158–60: from verbs 158, from substantives 158, from adjectives 159 f., from adverbs 160); compound, 161–9 (with inseparable [Page 1224] prefix 161 f., agglutinative or juxtapositional 168 f.); declension of adjectives, 270–6 (origin of the adjective 270 f., inflection of adjectives with one termination 271 f., with two terminations 272 f., with three 273 f., the accus. singular 274, contraction in 274 f., indeclinable 275 f.); comparison of, 276–81 (positive 276, comparative 276–8, superlative 278–81); in predicate, 401; and substantive, 407; gender in, 412 f.; with vocative, 464; with genitive, 503–5; with ablative, 515 f.; with locative or instrumental, 523; with dative, 537; distinguished from adverbs, 549 f., 657; syntax of, ch. XIV, 650–75; origin of, 650; adjectival or appositional use of substantive, 651 f.; as substantive, 652–4 (any gender 652, masculine 652, feminine 652 f., neuter 654 f.); agreement with substantives, 654 f. (number 654 f., gender 655, case 655, two or more adjectives 655); attributive, 655 f.; predicate, 656 f.; personal construction, 657 f.; with cases, 658; with the inf. and clauses, 658 f.; as adverb, 659; positive, 659–61 (relative contrast 659 f., as comparative or superlative 660 f., with prepositions 661, without object of 662 f., followed by ἢ 666, by the ablative 666 f., by prepositions 667, displacing the superlative 667–9); superlative, 669–71 (vanishing 669, few true in N. T. 669 f., elative 670, no “Hebraistic” 671); numerals, 671–5; with inf., 1076 f.; part. originally, 1100 f.; adjectival aspects of part., 1104–10; negatives with, 1163 f.

Adverbs: with formative suffixes, 160; agglutinative compounds, 169–71; neglect of adverbs, 293; formation of, 294–7 (fixed cases 294, accus. 294 f., ablative 295, genitive 295, locative 295, instrumental 295 f., dative 296, suffixes 296, compound adverbs 297, analogy 297, comparison of adverbs 297); adverbial stems, 297–9 (substantives 298, adjectives 298, numerals 298, pronouns 298, verbs 298 f.); use of adverbs, 299–300 (manner 299, place 299 f., time 300); scope of, 300–2 (relative between adverbs and prepositions 301, adverbs and conjunctions 301 f., adverbs and intensive particles 302, adverbs and interjections 302); adverbial accusative, 486–8; genitive with, 505; dative with, 537 f.; syntax of, ch. XII, 544–52; special difficulties, 544; nature of, 544; narrower sense of, 544 f.; adverbs with verbs, 545 f. (commonest 545, N. T. usage 545, predicate uses 545 f., with ἔχω 546, with participles 546, loose relation 546); with other adverbs, 546; with adjectives, 546 f.; with substantives, 547; as substantives, 547 f.; frequent use of, 548; as marks of style, 548 f.; distinguished from adjectives, 549 f. (different meaning 549, difference in Greek and English idiom 549 f.); adverbial phrases 550–2 (incipient adverbs 550, prepositional phrases 550 f., participles 551, 1109 f.); the verb, 554 f.; prepositions, 554 f.; adjectival as, 659; article with, 765 f.

Adversative particles: 1187 f.

Æolic: lyric odes, 17; persistence of, 52; relation to Doric, 17, 53; influence on κοινή, 63; on the N. T., 82; and here and there, ad libitum.

Æschylus: see Index of Quotations.
Affixes: 146.

Agent: words expressing, 153 f.; dative of, 542; with passive, 820.

Agglutinative: type of languages, 37; compounds, 163–71.

Agreement: see concord.[Page 1225]

Aktionsart: 344 f., 823 f., 828 f., 831–5, 850 f., 858 f.

Alexander the Great: 44, 49–51, 53 ff., 60–3, 66–8, 71, 239, etc.

Alexandrian type of text: 180 and passim.

Alexandrinus: 179 and passim.

Allegory: 1207.

Alliteration: 1201.

Alphabet: original Greek, 178; law enforcing Ionic alphabet, 181, 209, 222.

Alternative: pronouns, 745–50 (see distributive); questions, 736 f.

Amplification: of subject, 398–400; of predicate, 400 f.

Anabasis: passim. See Index of Quotations.

Anacoluthon: discussion of, 435–40 (suspended subject 436 f., digression 437–9, participle in 439 f., asyndeton 440); distinction from oratio variata, 440 f.; kinds of, 1203 f.

Analogy: passim.

Anaphora: 1200.

Anaphoric: see article, demonstrative, relative.

Anarthrous: attributive, 782–4; predicate, 790–6; participle, 1105 f.

Anominatio: 1201.

Antecedent: see demonstrative, relative, preposition.

Antiptosis: 488.
Antistrophe: 1200.

Antithesis: 1199 f.

Aoristic: see punctiliar, present, perfect, future.

Aphæresis: 205 f.

Apocalypse: 101, 135 f.; solecisms in, 413–6 and passim. See Index of Quotations.

Apocrypha: passim. See Index of Quotations.

Apodosis: see 921–3 and conditional sentences, 1007–27.

Aposiopesis: 1203.

Apostrophe: use of, 244.

Appian: see Index of Quotations.

Apposition: with substantive, 368–400; partitive, 399; predicative amplifications, 401; peculiarities in, 413 ff.; to vocative, 464; genitive of, 498 f.; appositional use of substantive, 651 f.; with οὐτος, 698–700; ἐκεῖνος, 708; appositional inf., 1078 f.

Aquila: see Index of Quotations.

Aramaic: 24; spoken by Jesus, 26–9; distinct from the Hebrew, 102; portions of the O. T. in, 103; the vernacular of Palestine, 103 f.; Josephus' use of, in his War, 104; signs of, in the N. T., 104 f.; possible use by Mark and Matthew, 105; proper names, 214 f., 236; on prepositions, 556 f.; and passim.

Arcadian: 63, 67, 82, 84, 184, passim.[Page 1226]

Aristophanes: and the vernacular, 66. See Index of Quotations.

Arrangement: see sentence.

Arrian: see Index of Quotations.

Article: use by Peter, 127; with vocative, 465 f.; as possessive, 684; with possessive, 685; with reflexive, 690; with οὗτος, 700–2; with ἑκάστος, 708; origin and development of, 754 f. (a Greek contribution 754, derived from demonstrative 755); significance of, 755; method employed by, 756–8 (individuals from individuals 756, classes from classes 757, qualities from qualities 758); varied usages of, 758–76 (with substantives, context, gender, proper names, anaphoric 758–62, with adjectives, resumptive, adj. alone, with numerals 762–4, with participles 764 f., infinitive 765, with adverbs 765 f., with prepositional phrases 766, with single words or whole sentences 766, with genitive alone 767, nouns in predicate 767–9, distributive 769, nominative with=vocative 769, =possessive 769 f., with possessive 770, with αὐτός 770, with demonstratives 770 f., with ὁλος, πᾶς [Ὅπος] 771–4, with πολύς 774 f., ἄκρος, ἡμισύς, ἐσχατος, μέσος 775, with ὁλός and ἔτερος 775 f., with μόνος 776); position with attributives, 776–89 (with adjectives, normal, repetition, one with several, anarthrous substantives, participles 776–9, with genitive, between article and gen., after gen. without repetition, repetition with gen., absent with both, correlation of article 779–82, with adjuncts or adverbs, between article and noun, repeated, only with adjunct, only with noun, when several adjuncts occur, phrases of verbal origin, exegetical questions, anarthrous attributive 782–4, several attributives with καί, same person or thing, when distinguished, treated as one, point of view, difference in number or gender, with disjunctive particle 785–9); position with predicates, 789 f.; absence of, 790–6 (with proper names 791, with genitives 791, prepositional phrases 791 f., with both preposition and genitive 792 f., titles 793, words in pairs 793, ordinal numerals 793 f., in predicate 794, abstract words 794, qualitative force 794, only object of kind 794–6); with inf., 1062–8; articular part., 1106–8.

Article, indefinite: τις as, 674; τις and τις, 796.

Articular infinitive: 1062–8.

Articular participle: 1106–8.

Artistic prose: see literary κοινή.

Asianism: 60, 73, 87 f., passim.

Aspirate: 191, 209; doubling of, 215; aspiration of consonants, 219; origin of the aspirate, 221 f.; variations in MSS., 223–5; transliterated Semitic words, 225; use with ρ and ρρ, 225 f.; question of αὐτοῦ, 226.

Assertion, sentence of: see indirect discourse.

Asseverative particles: 1150.

Associative case: see instrumental.

Asyndeton: 427–44; imperative in 949.

Athens: losing its primacy in culture, 67, passim.

Attendant circumstance, participle of: see participle.

Attic: 16, 17, 20, 22, 35 f., 41–4; triumph of, 51; vernacular, the base of the κοινή, 60–2; influence on N. T., 82; Attic inscriptions show indifference to hiatus, 207; genitive-abl., 255 f.; “Attic” declension 260; ad libitum in the book.

Attica: 181 f.

Atticism: not part of the κοινή, 50; the [Page 1227] Atticistic reaction and its influence, 58–60, 73; conservative influence of, 177 f.; pronunciation, 239, passim.

Attraction of relative: inverse, 488; to genitive, 512; to ablative, 519 f.; with ὁς, 714–9; ὁσος, 732 f.

Attributive: adjective, 655 f.; positive article, 776–89. See participle.

Authorized version: influence of, on English language, 92.

B

B: see Vaticanus.

β-text: see Neutral text.

Bezae, Codex: 179 f., passim.

“Biblical” Greek: 5; view of E. Hatch refuted by Deissmann, 24 f.; the new point of view, 30; N. T. not “biblical Greek,” 77–9, 88, 92, 112 f., passim.

Bilingualism: in Palestine, 27–30; in Brittany, Ireland, Scotland, Wales, 30, 69, 102 f.

Blending: see cases.

Boeotian: 16, 52; influence of, 61, 63; monophthongizing, 204 f.; pronunciation, 240; passim.
βουστροφηδόν: 1211.

Brachylogy: 1201, 1203.

Breathings: 221–6; use with ρ and ρρ, 225 f.; in Ionic, 240.

Breviloquence: see brachylogy.

Brittany, bilingual: 29.

Broken continuity: see perfect and past perfect.

Byzantine Greek: literature on, 22–4, 43, 155, 179, 183, 191, 210, passim.

C

C=Codex Ephraemi: passim.

Cardinals: see numerals.

Cases: number of, 247–50 (history of the forms 247 ff., blending of case-endings, syncretism of the forms 249 f., origin of case-suffixes 250); concord in, 413–6 (adjectives 413, participles 413, the Book of Revelation 413–6, apposition 416, absolute 416); syntax of, ch. XI, 446–543; history of interpretation of, 446–9 (confusion 446, Bopp’s contribution 446 f., modern usage 447, Green’s classification 447 f., syncretism of the cases 448, freedom in use of 448 f.); purpose of the cases, 449 (Aristotle’s usage, word-relations); encroachment of prepositions on, 450–3 (reason 450, no “governing” of cases 450, not used indifferently 450 f., original use with “local” cases 451, 567, increasing use of 451 f., distinction preserved in N. T. 453); distinctive idea in each case, 453–6 (fundamental idea 453 f., cases not yet interchangeable 454, vitality of case-idea 454, historical development of the cases 454 f., method of this grammar 456); nominative, 456–66; vocative, 461–6; accusative, 466–91; genitive, 491–514; ablative, 514–20; locative, 520–5; instrumental, 525–35; dative, 535–43; functions of prepositions with, 567–71; see discussion of each preposition in ch. XIII; adjective and substantive, 655; with adjectives, 658; ὅς, attraction and incorporation, 714–9; ὅς τέτα, 728 f.; of inf., 1058–62; with inf., 1082; participle, 1119.

Causal participle: see participle and causal clauses.

Causal particles: see conjunctions and causal sentences (hypotactic).

Causal sentences: use of ὅς, 724 f.; paratactic, 962 f.; with hypotactic conjunctions, 963 f.; relatives, 965 f.; ὅτα and the infinitive, 966; participle, 966, 1128; inf., 1091.

Causative verbs: 150; active, 801 f.; middle, 808 f.
Cautious assertion: see final and consecutive sentences.

Chaldee (Aramaic): 211. See Aramaic.

Chiasm: 1200.

Chinese: 250.

Christian element in N. T. Greek: chiefly lexical, 112–6; new connotations of familiar words, 115 f.

Chrysostom: _passim._

Circumlocutions: 330, 648 f.

Circumstantial participle: see participle.

“Classical Greek”: 5, 89, _passim._

Clause: paratactic, 428 f.; hypotactic, 429–31; inf. and part., 431 f.; clauses with the adjectives, 658 f.

Climax: 1200.

Collectives: see gender and number.

Colloquial: see vernacular.

Colon: 243.

Comma: origin of, 243.

Common speech: see κοινή.

Comparative: see adjectives.

Comparative clauses: with relative ὅσος, 966 f.; relative with κατά, 967; καθότι, 967; ὡς and its compounds, 967 ff.

Comparative grammar or philology: 8–12; the linguistic revolution, 8; sketch of Greek grammatical history, 8–10; the discovery of Sanskrit, 10; from Bopp to Brugmann, 10 ff.; importance of, 36; the original Indo-Germanic speech, 38; Greek as a “dialect” of, 39 f.; applied to N. T. word-formation, 144; system of affixes, infixes, prefixes, suffixes, 146–247, 250, _passim._

Comparison: of adjectives, 276–81; of adverbs, 297; syntax of, 661–9.

Complementary infinitive: see infinitive (with verbs).

Complementary participle: see participle.

Compound sentences: order of clauses in, 425; two kinds of sentences, 425 f.; two kinds of compound or complex, 426; parataxis, 426; hypotaxis, 426 f.

Conative action: 880, 885.

Concessive: imperative as, 949; clause, 1026; participle, 1128.

Concord: and government, 397 f.; in person, 402 f.; in number, 403–9; in gender, 410–3; in case, 413–6.

Conditional sentences: apodosis of second class, 921–3; two types, 1004–7; four classes, 1007–22 (determined as fulfilled 1007–12, determined as unfulfilled 1012–6, undetermined, but with possibility of determination 1016–20, remote possibility of determination 1021 f.); mixed conditions, 1022; implied conditions, 1022 f.; elliptical, 1023–6; concessive clauses, 1026 f.; other particles with εἰ and ἐὰν, 1027; participle, 1129.

Conjugation of verb: ch. VIII, 303–76.

Consecutive: use of ὅς, 724; clauses, see final and consecutive.

Consonants: changes, 209–21 (origin and character of the consonants 209 f., the insertion of 210, the omission of 210 f., single or double 211–5, assimilation of 215–7, interchange and changing value of 217–9, aspiration of 219, variable final 219–21, metathesis 221).[Page 1229]

Constative action: see aorist.

Constructio ad sensum: illustrated in, 400–424, 683 f., 1204.

Constructio praegnans: 1204. See also prepositions.

Contrasts: in Greek words, 175 f.; in comparison, 662 f.

Co-ordination: 443 f.; between participles, 1135 f.
Coptic: 215, 250 f., passim.

Copula: not necessary, 395 f.

Copulative conjunctions: 1177–86.

Coronis: 244.

Correlation of article: see article.

Correlative pronouns: 289 f., 298, 709 f., 732.

Crasis: 208.

Cretan dialect: passim.

Crete: early Greek culture in, 43.

Culture: variations in N. T. writers, 381.

Cynic-Stoic diatribe: 420 f., 1196 f.

Cyprus: as purveyor of Greek culture, 43; language and N. T. Gk., 82, passim.

D: see (Codex) Bezae.

đ-text: see Western text.

Dative: form, 248 ff.; syncretism, 535; decay of dative, 535 f.; idea of, 536; with substantives, 536 f.; with adjectives, 537; with adverbs and prepositions, 537 f. and ch. XIII; with verbs, 538–43 (indirect object 538, *dativus commodi vel incommodi*, 538 f., direct object 539–41, with intransitive verbs 541, possession 541, infinitive in dative 541 f., of the agent 542, because of preposition in composition 542 f.); ambiguous examples, 543; eth., 539.

Declarative clauses: 915 f., and see indirect discourse.

De-aspiration: increasing, 222 f.

Declensions: ch. VII, 246–302; history of the, 246 f.; first or α declension, 254–9 (Doric genitive-ablative singular 254 f., Attic genitive-ablative 255, vocative in –α 256, words in –ρα and participles in –υα 256, retention of –α in gen.-abl. 256, double declensions 257, heteroclisis and metaplasm 257–9, indeclinable substantives 259); second or ο, 259–63 (the “Attic” 260, contraction 260 f., vocative 261, heteroclisis and metaplasm 261–3, mixed declension 263, proper names 263); third decl., 263–9 (nominative as vocative 264, accus. singular 264 f., accus. plural 265 f., peculiarities in the nominative 267 f., gen.-abl. 268,
contraction 268, proper names 268 f., heteroclisis and metaplasm 269; indeclinable words, 269 f.; declension of adjectives, 270–81; numerals, 281–4; pronouns, 284–93; adverbs, 293–302.

Nouns: root-nouns, 145; substantive and adjective, 246; verbal, ch. XX; negatives with, 1163 f., 1172.

Number: in substantives, 251 f.; concord in, 403–9 (subject and predicate 403–7, substantive and adjective 407 f., representative singular 408, idiomatic plural in nouns 408, idiomatic singular in nouns 409, special instances 409); adjective and substantive, 654 f.; οὖτος, 704; ἐκεῖνος, 708; ὁς, 714; ὅστις, 729; ὁλος, 731.

Numerals: declension of, 281–4 (origin of 281, different functions of 281, cardinals 281–3, ordinals 283 f., distributives 284, proportionals 284, adverbs 284); syntax of, 671–5 (εἰς and πρῶτος 671 f., simplification of the ´teens 672, inclusive ordinal 672, distributives 673, cardinal ἑπτά 673 f., substantive not expressed 674, adverbs with 674, εἰς as indefinite article 674 f., εἷς=τις 675, distributive use of εἷς 675); τις with, 742; article with ordinals, 793 f.

Object of verb: see cases.

Object-clauses: see hypotaxis.

Oblique cases: 247. See cases.

Onomatopoeic: 1201.

Optative: origin of form, 320, 325–7; perfect, 360 f., 907 f.; use of aorist, 854 f.; future, 876; present, 889 f.; opt. and subj., 925 f.; history of, 935 f.; significance, 936 f.; three uses, 937–40 (futuristic or potential 937–9, volitive 939 f., deliberative 940); as imper., 943; in indirect discourse, [Page 1239] 1030 f., 1043 f.; negative with, 1161, 1170.

Oratio obliqua: see indirect discourse.

Oratio recta: see direct discourse.

Oratio variata: 440–3 (distinctive from anacoluthon 441 f., heterogeneous structure 441 f., participle in 442, exchange of direct and indirect discourse 442 f.).

Oratory: in Hebrews, 1198.

Ordinals: see number.

Orthography: in the vernacular κοινή, 71 f.; ch. VI, 176–245; the ancient literary spelling, 177 f.

Ostraca: 17–21; texts of, 22, 91, 191, 266, passim.
Oxyrhynchus papyri: see Index of Quotations.

P

Palatals: 216 f., 1210.

Papyri: literature on, 17–22, 52, 56 f., 66 ff.; illustrate the vernacular κοινή, 69; illiteracy in, 70 f.; and the N. T. Gk., 80–3; agreeing with the uncials in orthography, 181; accidence and syntax of, 381; ad libitum through the book.

Parable: 1206 f.

Paragraph: discussion of, 241 f.; connection between, 444.

Paraleipsis: 1199.

Parallelism: 1199 f.

Parechesis: 1201.

Parenthesis: 433–5; parenthetic nominative, 460.

Paronomasia: 1201.

Participle: in –ũa, 256; forms of, 371–6 (name 371 f., verbal adjectives 372 f., with tense and voice 373 f., in periphrastic use 374–6); gender in, 412; case, 413; in clauses, 431 f.; in anacolouthon, 439 f.; in oratio variata, 442; acc. absolute, 490 f.; gen. absolute, 512–4; adverbs with, 546; as adverbs, 551; article with, 764 f., 777–9; use of aorist, 858–64; future, 877 f.; present, 891 f.; perfect, 909 f.; participle as imperative 944–6; causal, 966; temporal use, 979; purpose, 991; in indirect discourse, 1040–2; history of part., 1098–1100 (Sanskrit 1098, Homer’s time 1098, Attic period 1098 f., κοινή 1099, modern Gk. 1099 f.); significance, 1100–4 (originally an adjective 1100 f., addition of verbal functions 1101, double aspect of 1101, relation between part. and inf. 1101–3, method of treating 1103 f.); adjectival aspects of, 1104–10 (declension 1104, attributive, anarthrous, articular 1105–8, predicate 1108, as a substantive 1108 f., as an adverb 1109 f.); verbal aspects of, 1110–41 (voice 1110 f., tense 1111–9, timeless 1111, aorist 1112–4, present 1115 f., perfect 1116–8, future 1118 f., cases 1119, supplementary 1119–24, periphrastic construction 1119 f., diminution of complementary 1120 f., with verbs of emotion 1121 f., indirect discourse 1122–4; circumstantial, participial clauses 1124–32 (general theory 1124, varieties of, time, manner, means, cause, purpose, condition, concession 1125–30, absolute nominative, accusative, genitive 1130–2); independent, 1132–5; co-ordination between, 1135 f.; ōu and mi with, 1136–9, 1162 f., 1172; other particles with, 1139–41).
**Particles:** elision with, 207; with subordinate clauses, 950–1049; with participle, 1036–41; scope, 1142–4; intensive or emphatic, 1144–55; negative, 1155–75; interrogative, 1175–7; conjunctions, 1177–93 (paratactic, 1177–92, hypotactic 1192 f.); interjections, 1193.

**Partitive:** apposition, 399, 746; genitive, 502, 519; ablative, 519; use of ἐκ, 599; with ἐκαστός, 746.

**Past perfect:** relation of aorist to, 837–40; double idea, 903; a luxury in Greek, 903 f.; intensive, 904; extensive, 904 f.; of broken continuity, 905 f.; in conditional sentences, 906; periphrastic, 906; ἐκείμην, 906; augment in, 1211 f.

**Patronymics:** 155.

**Paul:** 54 ff.; and Hellenism, 84–8, 106; peculiarities of, 127–31, 135, 179, 195, 218, ad libitum. See Index of Quotations.

**Perfect, future:** see future perfect.

**Perfect, past:** see past perfect.

**Perfect, present:** of –μ verbs, 319 f.; imperative, 330; conjugation of, 359–62 (name 359, original perfect 359 f., к perfect 358 f., aspirated 359, middle and passive 359, decay of perfect forms 359 f., in subjunctive, optative, imperative 360, indicative 360–2, σ in middle and passive 362); reduplication in, 363–5; completed state, 823 f.; relation of aorist to, 843–5; present as perfect, 881; perfect as present, 881; idea of, 892–4 (present, intensive, extensive, time); present perfect indicative, 894–903 (intensive 894 f., extensive 895 f., of broken continuity 896, dramatic historical 896 f., gnomic 897, in indirect discourse 897 f., futuristic 898, “aoristic” present perfect 898–902, periphrastic 902 f.); subj. and opt., 907 f.; infinitive, 908 f. (indirect discourse 908 f., not indirect disc., subject or object, preposition 909); participle, 909 f. and 1116–8 (meaning, time, various uses, periphrastic).

**“Perfective”:** use of prepositions, 563 f.; ἀπό, 576 f.; διά, 581 f.; ἐκ, 596 f.; ἐπί, 600; κατά, 606; παρά, 613; περί, 617; πρός, 623; σύν, 627 f.; ὑπέρ, 629; “perfective” and “imperfective,” 826–8.

**Pergamum:** a centre of culture, 56 ff., 61, 63, 66, 75, 111, 208, 223, passim.

**Period:** use of, 242 f.

**Periodic structure:** 432 f., 1200.

Periods of the Greek language: 43 f.

Periphrasis: with participle, 330, 357, 374–6, 826, 878, 887 f., 889, 906, 1119 f.

Persian: words in N. T., 111.

Person: concord in, 402 f., 712; change in ind. disc., 1028 f.

Person-endings: 329, 335; active, 335–9.

Personal construction: with adjective, 657 f.; with inf., 1085 f.

Personal equation: in the κοινή, 69 ff., 179.

Personal pronouns: question of αὐτοῦ, 226; inflection of, 286 f.; nominative, 676–80 (emphasis in 676, first 677 f., second 678, third 679 f.); oblique cases, 680–2 (originally reflexive 680 f., αὐτοῦ 681, genitive for possessive 681, enclitic forms 681 f.); frequency of, 682 f.; redundant, 683; according to sense, 683 f.; repetition of substantive, 684.

Peter: peculiarities of, 125–7. See Index of Quotations.

Philo: see Index of Quotations.

Philology: see comparative grammar.

Phocian: 266.

Phœnician: words in N. T., 111, 182, 209, passim.

Phrygia: old dialect of, 67.

Pindar: see Index of Quotations.

Pindaric construction: 405.

Plato: see Index of Quotations.

Play on words: 1201.

Pluperfect: see past perfect.

Plural: 251. See number.
Plutarch: see Index of Quotations.

Poetry: see rhythm.

Point-action: see punctiliar.

Polybius: see Index of Quotations.

Polysyndeton: 1194.

Pompeian: 186, passim.

Pontic infinitive: 1056, 1063.

Possessive pronouns: inflection of, 288 f.; article as, 684; only first and second in N. T., 684; emphasis, 684 f.; with article, 685; possessive and genitive, 685; objective use, 685; instead of reflexive, 685; article as, 769 f.; article with, 770.

Postpositive: 424; some prepositions, 553.

Predicate: essential part of sentence, 390 f.; only predicate, 390 f.; verb not the only, 394 f.; copula not essential, 395 f.; one of the radiating foci, 396 f.; expansion of, 400 f. (predicate in wider sense 400, inf. and part. 400, relation between predicate and substantive 400, pronoun 400, adjective 401, adverb 401, prepositions 401, negative particles 401, subordinate clauses 401, apposition and looser amplifications 401); agreeing with subject, 403–6; position, 417; pred. nominative, 457 f.; vocative in, 464 f.; adjective, 655 f.; nouns with article, 767–9; article with, 789 f., 794; participle, 1108.

Prefixes: 146; inseparable, 161–3.

Pregnant construction: 525, 548, 584 f., 591–3.

Prepositional adverbs: new ones, 169 f.

Prepositions: double in composition, 160, 165; adverbs, 301; encroachment on cases, 450–3; accusative with, 491; genitive with, 505; effect of compound preps. on case, 511 f., 542 f.; with ablative, 516 f.; with locative, 524 f.; with instrumental, 534 f.; with dative, 537 f.; phrases, 550 f.; ch. XIII, 553–649; name, 553 f. (some postpositive 553, original use not with verbs 553, explanation 553 f.); origin of,
554 f. (originally adverbs 554, reason for use of 554, varying history 555); growth
in use of, 555–7 (once none 555, still adverbs in Homer 555, decreasing use as
adverbs 555 f., Semitic influence in N. T. 556 f., modern Greek 557); in
composition with verbs, 557–65 (not the main function 557 f., prep. alone 558,
increasing use 558, repetition after verb 559 f., different preposition after verb 560
ff., second preposition not necessary 562 f., dropped with second verb 563,
intensive or perfective 563 f., double compounds 565); repetition and variation of,
565–7 (same prep. with different case 565, repetition with several nouns 566,
repetition with the relative 566 f., 721, condensation by variation 567); functions
of, with cases, 567–71 (case before prep. 567, notion of dimension 567, original
force of the case 567 f., ground-meaning of the prep. 568, oblique cases alone
with 568, original freedom 568 f., no adequate division by cases 569, situation in
N. T. 569 f.; with one case, with two, with three, one with four, each prep. in a
case 570 f.); “proper” [Page 1242] prepositions in N. T., 571–636; ἀνά, 571 f.;
ἀντι, 572–4; ἀπό, 574–80 (original significance 575 f., meaning “back” 576 f.,
“translation-Hebraism” in ἐφεξήςθαι ἀπό 577, comparison with ἐκ 577 f.,
comparison with παρά 578 f., compared with ὑπό 579 f.); διά, 580–4 (root-idea
580, by twos or between 580 f., passing between or through 581 ff., because of
comparison with
583 f.); ἐν, 584–91 (old use with accusative or locative 584 f., older than εκ 585
f., place 586, time 586 f., among 587, in the case of 587 f., as a dative 588,
accompanying circumstance 588, amounting to 589, instrumental use of 589–91);
εἰς, 591–6 (original static use 591–3, with verbs of motion 593 f., time 594, like a
dative 594, aim or purpose 594 f., predicative use 595 f., compared with ἐπί, παρά
and πρός 596); ἐκ, 596–600 (meaning 596, in composition 596 f., place 597, time
597, separation 597 f., origin or source 598 f., partitive use of 599, ἐκ and ἐν 599
f.); ἐπί, 600–5 (ground-meaning 600, in composition 600, frequency in N. T. 600
f., with the accus. 601 f., with the gen. 602–4, with the loc. 604 f., the true dative
605); κατά, 605–9 (root-meaning 605 f., distributive sense 606, in composition
606, with ablative 606 f., with genitive 607, with accusative 607–9); μετά, 609–12
(root-meaning 609, in composition 609 f., loss of locative use 610, with genitive
610–2, with accusative 612); παρά, 612–6 (significance 612, compared with πρός
613, in composition 613, with the locative 614, with the ablative 614 f., with the
accusative 615 f.); περί, 616–20 (root-meaning 617, in composition 617,
originally with four cases 617, with the ablative 617 f., with the genitive 618 f.,
with the accusative 619 f.); πρός, 620–2 (original meaning 620, in composition 620
f., cases used with 621, place 621 f., time 621 f., superiority 622); πρóς, 622–6
(meaning 622 f., in composition 623, originally with five cases 623, with ablative
623 f., with the locative 624, with the accusative 624–6); σύν, 626–8 (meaning
626 f., history 627, in composition 627 f., N. T. usage 628); ὑπέρ, 628–33
(meaning 629, in composition 629, with genitive 629 f., with ablative 630–2, with
accusative 632 f.); ὑπό, 633–6 (meaning 633, in composition 633, cases once used
with 634 f., with the accusative 635, with the ablative 635 f.); the “adverbial” or
“improper” prepositions, 636–48 (ὄμω 638, ὄνεω 638, ὀντικρυς 638, ὀντίπερα 638
f., ὁπένεντα 639, ἀπερ 639, ὁχριζ 639, ἔγγια 639 f., ἐκτός 640, ἐμπροσθεν 640,
ἔναντι 640, ἔναντιν 640, ἔνεκα 641, ἔντος 641, ἐνώπιον 641 f., ἔξω 642, ἔπανω
642, ἐπίκειναι 642, ἔσω 642 f., ἔως 643, κατέναντι 643, κατενώπιον 644,
kuklódeon 644, κύκλω 644, μέσον 644, μεταξό 645, μέχρι 645, ὑποσθεν 645,
ὃποσ 645, ὅψε 645 f., παραπλήσιον 646, παρεκτός 646, πέραν 646, πλήν 646,
pλησίον 646, υπεράνω 646 f., υπερέκειναι 647, υπερεκπερισσοῦ 647, ὑποκάτω
647, χάριν 647, χωρίς 647 f.); compound prepositions, 648; prepositional circumlocutions, 648 f. (μέσον, ὑπό, πρόσωπον, χείρ); adjectives of comparison with, 661, 667; article with, 766; effect on active voice, 800; with infinitive, 1068–75.

Present tense: 73, 119 f., 123, 145, 150, 203; of –μι verbs, 311–9; classes of present stems, 350–3 (non-thematic reduplicated 350, non-thematic with –να and –νυ 351, simple thematic 351, reduplicated thematic 351, thematic with suffix 351, 351–3, with σ dropped 353); relation of aorist to, 841–3; punctiliar (aoristic), 864–70 (specific 865 f., gnomic 866, historical present [Page 1243] 866–9, futuristic 869 f.); durative (linear) indicative, 879–82 (descriptive 879, progressive 879 f., iterative or customary 880, inchoative or conative 880, historical 880, deliberative 880 f., as perfect 881, perfect as present 881, futuristic 881 f.); durative subj. and opt., 889 f.; durative imperative, 890; durative infinitive, 890 f.; durative participle, 891 f. and 1115–6 (relative time 891, futuristic 891, descriptive 891, conative 892, antecedent time 892, indirect discourse 892, with the article 892, past action still in progress 892, “subsequent” 892, durative future 892).

Principal parts of important verbs in N. T.: 1212–20.

Proclitics: accent of, 235; rules for accent of, 1211.

Prodiorthosis: 1199.

“Profane Greek”: 5, 89.

Prohibition: see imperative, aorist subj., future indicative, infinitive.

Prolepsis: 423.

Pronouns: 226, 234; declension of, 284–93 (idea of 284 f., antiquity of 285, pronominal roots 285 f., classification of 286–93); syntax of, ch. XV, 676–753; personal, 676–84; possessive, 684 f.; intensive and identical, 685–7; reflexive, 687–92; reciprocal, 692 f.; demonstrative, 693–710; relative, 710–35; interrogative, 735–41; indefinite, 741–4; alternative or distributive, 744–50; negative, 750–3.

Pronunciation: 71 f., 236–41.

Proper names: abbreviated, 171–3, 184, 205; doubling of consonants in Hebrew and Aramaic, 214 f.; accent of, 235; foreign names, 235 f.; mixed declension of, 263; in third decl., 269 f.; article with, 759 ff., 791, passim.

“Proper” prepositions: 554, 636 f.

Προσωπίτια: 228.

Protasis: see conditional clauses, 1007–27.

Prothetic vowels: 205 f., 1209.

Psychological treatment of grammar: 32.

Ptolemaic: 210, 220, 256, passim.

Pun: 1201.

Purists: 3, 76 ff., 88, 90 f., 160, passim.

Purpose: see final clauses.

Q

Qualitative use of anarthrous nouns: see article.

Questions: ὃς in direct, 725; ὃς in indirect, 725 f.; ὅστις, direct 729 f., indirect 730 f.; ὅςτις, 731; ὅςτις, 733; see direct discourse, indirect discourse, interrogative pronouns, interrogative particles, mode; indirect, 1043–6; deliberative, 1046; single, 1175–7; double, 1177; particles in direct, 1175 f.; indirect, 1176 f.

Quotations in O. T.: 206, 242 f.

R

Reciprocal pronouns: inflection of, 292 f.; reflexive as, 690; syntax of, 692 f.

Recitative ὅτι: 1027 f.; see direct discourse.

Redundance: see pleonasm.

Reflexive pronouns: inflection of, 287 f.; personal originally so, 680 f., 685; distinctive use, 687 f.; no nominative, 688; indirect, 688; in [Page 1244] singular, 688 f.; in plural, 689 f.; article with, 690; in reciprocal sense, 690; with middle voice, 690 f., 811; use of ἰδιος, 691 f.; with active voice, 802.

Relative pronouns: inflection of, 290 f.; inverse attraction, 488; attraction to genitive, 512; attraction to ablative, 519 f.; repetition of prepositions with, 566 f.; list in the N. T., 710 f.; name, 711; bond between clauses, 711; ὃς, 711–26 (in Homer 711, comparison with other relatives 711 f., with any person 712, gender 712 ff., number 714, case 714–9, absence of antecedent 719 ff., prepositions with
antecedent and relative 721, phrases 721 f., pleonastic antecedent 722 f., repetition of ὃς 723 f., consecutive idea 724, causal 724 f., direct questions 725, indirect questions 725 f., idiom οὐδείς ἐστιν ὃς 726); ὅσις, 726–31 (varied uses 726, distinction between ὃς and ὅσις 726 f., indefinite use 727, definite exx. 727 f., value of ὅς 728, case 728 f., number 729, direct questions 729 f., indirect 730 f.); ὅς, 731 f. (relation to ὃς 731, incorporation 731, indirect question 731, number 731, ὅν εἶστιν 732); ὅσις, 732 f. (quantitative, antecedent, attraction, incorporation, repetition, with ἄν, indirect question, comparison, adverbial); ἡλίκος, 733 f.; ὅ, 734 f.; τίς as, 737 f.

Relative sentences: originally paratactic, 953; most subordinate clauses relative in origin, 953 f.; usually adjectival, 955 f.; modes in, 955 f.; definite and indefinite, 956 f.; use of ἄν in, 957–9; special uses of, 960–2; negatives in, 962; causal, 965 f.; purpose, 989; subfinal, 996; consecutive, 1001.

ADDENDA TO THE SECOND EDITION

Page xxx. Among numerous other works that should be noted is A. Meillet’s *Aperçu de la Langue Grecque* (1913). So on p. xxxv some notice should have been made of the Greek Grammar by Prof. E. A. Sonnenschein, of Birmingham, and of his other writings. Note also W. Larfield, *Griechische Epigraphik* (2. Aufl., 1913); O. Hoffmann and P. Gärtchen, *Sammlung der griechischen Dialekt-Inschriften*, Bd. IV, Heft 4, Abt. 2 (1913), with grammar and index to the whole group; M. N. Tod, “The Progress of Greek Epigraphy” (*Journal of Hell. Studies*, Jan., 1915).

Page 64, line 16. Add “a speaker” after “render.”

Page 138, line 1. Add “ends” after “usually.”

Page 172, note 6. Add: It should be noted that Ερμᾶς is the short form of any name that contains this name-element, like Ερμόδωρος, Ερμοκράτης, Ερμαρχος, Ερμόρυλος, Ερμογένης. In many cases the original unabridged name can only be guessed at. Cf. Fick-Bechtel, pp. 113, 132.

Page 180. On pp. 19–26 of the Washington Manuscript of the Four Gospels (Part I) by Sanders, there is a good discussion of the spelling, grammatical forms, and scribal errors of this interesting document. See also *The Freer Gospels* by E. J. Field.

Petersen, W., *Greek Diminutives in –τον* (1910).

Goodspeed (1914) in which monograph W is carefully compared with Westcott and Hort’s text.

Page 180. Of the inscriptions on the tombs in Phrygia, Ramsay says that the Greek was bad, even that of “persons of high rank in their cities” (Expos. T., Jan. 17, 1915, p. 174).

Page 202. On ω and οὐ see οἶνος Βοιωνθοῦμεν O. P. 1126, 9 (A.D./v).

Page 304. Add this from Westphall: “The noun is a verb at rest, and the verb is a noun in motion.”

Page 326, line 16. It should have been noted that the middle optative uses only the suffix –τε (τιθείμι, ὀδηγεῖσθε), as originally did the active dual and plural (σταῦμεν, τιθεῖσθε).

Page 414. The sudden change from accusative with ἵδον to nom. so common in the Apocalypse is found in Ezek. 3:13, ἵδον φωνήν—καὶ φωνή.

Ramsay

Ramsay, W. M., Cities and Bishoprics of Phrygia. 2 vols. (1895, 1897).

———, Kurze vergleichende Grammatik der indogermanischen Sprachen (1904).
Page 417. Note the careful balancing of words in 1 Cor. 14:20. In 14:26 note the asyndeton and repetition of ἔχει.

Page 424 (i), line 7. Add “Mt. 23:28” as another example of μέν in the fifth place and “Ro. 7:25” in sixth place.

Page 424 (i), line 12. Add “Mt. 22:28” as another example of οὖν in the fourth place.

Page 537, line 15 from bottom. Add υἱός after ονογενής.

Page 539. A good instance of the ethical dative appears in Gal. 6:11 ὑμῖν (‘mark you’).

Page 560, line 6. With ἐπιβάλλει ἐπὶ ἑμίτοιον (Lu. 5:36) compare ἐπιβάλλει ἐπὶ ἑμιτίῳ (Mt. 9:16).

Page 561. I gave no example of εἰς— followed by ἐν. I note one in Rev. 11:11 πνεῦμα τοῦ ἐρωμένου ἐν αὐτοῖς, the reading of A 18. 28** 36. 79. 95. But CP 1. 7. 12. 17. 38 have simply αὐτοίς, while Ν B al30 give εἰς αὐτοίς, and 49. 91. 96 have άπτ αὐτοίς. W. H. doubtfully print ἐν αὐτοῖς in brackets. The variation shows how ἐν is giving way before εἰς.

Page 576. The force of ἀπό in composition as meaning ‘in full’ comes out finely in Lu. 16:25 ἵπτεῖ σαρκοῦς τα ἑγαθὰ σου ἐν τῇ τοι ὑπ᾽ σου. 

Page 587, line 4. Add: ἐν μιῷ τῶν ἱπατῶν (Lu. 5:17; 8:22; 20:1).

Page 594. On εἰς like a dative, note τῆς δεκομένης εἰς σέ (Ezek. 3:3).

Lietzmann

Page 607, line 10 from bottom. With κατὰ τοῦ πνεύματος compare ἡ τοῦ πνεύματος βλασφημία in Mt. 12:31.

Page 608. The distributive use of both ἄνα and κατὰ occurs in 1 Cor. 14:27.

Page 609. For κατὰ with acc. in sense of ‘like’ (standard), note Gal. 4:28 κατὰ Ἰσαὰκ.

Page 644. Μέσον as preposition appears in Epictetus, Bk. II, ch. xxii, § 10, Βάλε καὶ σοῦ καὶ τοῦ παιδίου μέσον ἄγριον (Sharp, Epict. and N. T., p. 94).

Page 657. On ἐχόμενα as possible preposition see Ezek. 1:15, 19.

Page 669. As examples of the true superlative in –τατός, note λαμπρωτάτ[η] πόλει O. P. 1100 (A.D. 206), and ἐν τοῖς τῶν νομῶν φανερωτάτοις (ib.). Cf. also O. P. 1102, 4 f. (A.D. 146).

Page 686, line 2 from bottom. After καὶ αὐτοῦς add Mk. 1:19.

Page 720, line 9. In 1 Cor. 15:10 the neuter gender is to be noted.

Page 724, line 7 from bottom. In Lu. 7:43 ὅτι ὃ ὑπάρχει ἐν τῷ καιρῷ ἐκείνῳ is to be noted.

Page 735. Sharp, in his Epictetus and the N. T. (1914), which is full of suggestive parallels between the idiom of Epictetus and that of the N. T., quotes (p. 13) Bk. II, ch. xxii, § 36, εἰς ὅμοιον [Page 1380] ἄκριβῶς τὸ τοῦ Πλάτωνος, ὅτι πᾶς ψυχή ἄκουσα στέρεται τῆς ἀληθείας, ‘knowing accurately the teaching of Plato that no soul is willingly deprived of the truth,’ a striking parallel to πᾶς—οὗ in the sense of “no one.” He quotes also from the Rylands Papyri, vol. II, a papyrus dated 133 A.D., the μῆ—πᾶς idiom, μῆ ἡχοῦσας πᾶν πράγμα πρὸς ἔμε.

Page 760. Note αὐτὴ ἡ Ἰερουσαλήμ in Ezek. 5:5.

Page 811. See example of redundant middle in Hos. 3:2, ἐμισθωσάμην ἐμαυτῷ.

Page 812. Ramsay notes ἐνσέλθοιτο on a tomb in Phrygia and adds that the middle voice was loved in Phrygia (Expos. T., Jan., 1915, p. 174).

Page 823. The aorist is a sort of flashlight picture, the imperfect a time exposure. Iterative action is like the repetition in moving pictures.

Sharp SHARP, G., Remarks on the Definitive Article in the Greek of the N. T. (1803).
Perhaps a word more should be said as to the point of view of the speaker or writer. The same action can be viewed as punctiliar or linear. The same writer may look at it now one way, now the other. Different writers often vary in the presentation of the same action.

Prof. C. W. Peppler, of Trinity College, Durham, N. C., contributes this note: “Ἔσχον, ‘I got,’ is the only aorist that is always ingressive. Hence ἔχον, ‘I had,’ has to do duty as both imperfect and aorist.”

Page 844. In The Expositor (May and June, 1915), Rev. Frank Eakin, of Allegheny, has a very interesting discussion of “The Greek Aorist” or more exactly “An Investigation into the Usage of the Greek Aorist in the New Testament, and its Proper Translation into English.” By a study of 800 aorist indicatives in the Gospel of John he shows that Weymouth uses other tenses than the simple past in English in 21 per cent, Moffatt in 22, the A. V. in 18, and the R. V. in 8. He argues that modern knowledge as seen in Weymouth and Moffatt, is freeing itself from the bondage of Winer’s mistaken conception of the Greek aorist which was followed by the Revisers. Nothing is now clearer than that the Greek aorist indicative cannot be made to square regularly with the English past. It more commonly does so in narrative than elsewhere, but no ironclad rule can be laid down. Mr. Eakin concludes that the aorist is “to be regarded as what it essentially [Page 1381] is—an indefinite tense—except when it is seen to derive definition from the context.”

Page 889. A good example of the linear future appears in Gal. 6:16 στοιχήσουσιν.

Page 895. Moulton (Exp., April, 1901, p. 280) quotes Plato, Apol. 28C ὃσοι ἐν Τροίῳ τετελευτήκασιν, a reference to the Greek Bible (Homer).

Weymouth, On the Rendering into English of the Greek Aorist and Perfect (1894).

———, Characteristics of N. T. Greek (The Expositor, 1904).
———, Einleitung in die Sprache des N. T. (1911).

Page 927. Prof. Sonnenschein’s more developed theory of the subjunctive is to be seen in his little volume on The Unity of the Latin Subjunctive (1910). He plausibly argues that originally the subj. and opt. were identical in meaning like the first and second aorist tenses and “only gradually differentiated in Greek through a long process of development.” He makes the subj. (p. 54) stand midway between the ind. and the imper.

Page 929. Sonnenschein (Cl. Rev., April, 1902, pp. 165–169) suggests “the interrogative imperative” or “the interrogative prohibition” as the explanation of the origin of the use of οὐ μή with the subjunctive and even for οὐ μή with the future indicative by analogy or because of the future indicative of command. But R. Whitelaw replies (Cl. Rev., June, 1902, p. 277) that the notion of a prohibitive μή with future indicative is untenable. On the whole one must admit that the origin of the οὐ μή construction is unsolved.

Page 958. Note οὗ ἂν ἐσθεν in Ezek. 1:12, 20, and ὡς ἂν συνετελέσθησαν in Job 1:5.

———, The Science of Language (1903).

MOULTON, W. F., and GEDEN, A. S., A Concordance to the Greek Testament (1897).

MOULTON and MILLIGAN, Lexical Notes from the Papyri (The Expos., 1908—).

———, The Vocabulary of the N. T. Illustrated from the Papyri and other Non-Literary Sources. Part I (1914), II, III.

Page 959. Note καθὼς ἄν ἐη in Ezek. 1:16.

Page 964. See declarative διότι (= ὅτι) in Ezek. 5:13 ἐπιγνώσῃ διότι ἔγὼ Κύριος λελάληκα. Cf. also 6:10, 13. Dr. James Moffatt (The Expositor, Feb., 1915, p. 187, “Professor Robertson’s [Page 1382] N. T. Grammar”) says: “The use of διότι for ὅτι may be illustrated from Polybius, where the former seems to be used after a preceding vowel to avoid hiatus; a similar practice may explain the interchange of ὡς and ὅτι, and of πηλίκος and ἦλικος.”

Page 968. For καθὼς at the beginning of a sentence (1 Tim. 1:3) see καθὼς ἐνετειλάμην σοι Oxy. P. 1299, 9–10.

Page 994. J. Rendel Harris in a review of Moffatt’s “New Translation of the N. T.” (The Expositor, Dec., 1914, p. 537) commends his rendering of Eph. 3:17 (the inf. κατοικῆσαι) and of Jo. 17:21 ff. and Col. 2:2 ἵνα as wishes, and adds: “These new renderings are a great improvement, even if for the present grammarians are ignorant of them and the classical scholars acknowledge them not.”

Page 1018. In Lu. 16:31 we have the first and third class conditions side by side.

Page 1043. But μὴ γένοιτο and the inf. does occur often enough in the LXX, as in Gen. 44:7, 17; Josh. 22:29; 24:16; 1 Ki. 21:3; 1 Macc. 9:10; 13:5.

Page 1069. In the Papyrus de Magdola 11 three examples of παρὰ τὸ and the inf. occur: παρὰ τὸ ἔσασθαι (line 5), παρὰ τὸ μὴ δύνασθαι (line 7), παρὰ τὸ ἔσασθαι (line 15).

Page 1137. About negatives with the participle Robison (Syntax of the Participle in the Apostolic Fathers, 1913, p. 39) says that in the Apostolic Fathers μὴ with its compounds occurs 168 times, while οὔ with its compounds is found 29 times. He adds that about 5 1/2 per cent of the participles have negatives, an increase in comparison with classical Greek “and shows the growth of the feeling that a participle is equivalent to a subordinate clause.” But Robison still endeavours to preserve the purely subjective meaning of μὴ with the participle like the classic idiom.

Page 1145. Add Lu. 14:26 ἔτι τε καί as a good illustration of particles bunched together.

Robertson

———, Syllabus on N. T. Greek Syntax (1900).

HARRIS, J. RENDEL, Side-Lights on N. T. Research (1908).
Page 1154. Gildersleeve, *Am. J. of Ph.*, 1912, p. 240, calls τοι “the confidential particle” and τοίνυν “doubly so.” “Τοι is an appeal for human sympathy, as ποι is a resigned submission to the merciless rerum natura.”

Page 1179. The use of τε καί in pairs is well illustrated in Jas. 3:7.

Page 1186. In 1 Cor. 14:20, 22 note the use of ἀλλά—δέ side by side where the main contrast is presented by δέ and the minor one by ἀλλά.

Page 1200. The zeugma in Rev. 1:12 βλέπειν τὴν φωνὴν appears in Ezek. 3:13 ἰδον φωνὴν πτερύγων.

Page 1206. An example of hendiadys occurs in Jas. 4:2, φονεύετε καὶ ζηλοῦτε.

Page 1286. Add “Mk. 5:22…502.”

Page 1287. Add “Mk. 9:7…506.”

Page 1292. Add “7:2…546.”

Page 1349. Add “2 Macc. 6:21…184.”

[PAGE 1385] ADDENDA TO THE THIRD EDITION

Page 37. In the *Expos. T.* for Dec., 1916, the late J. H. Moulton accepts the suggestion of Hrozný and E. Meyer that the Hittite language is a member of the Indo-European family as is true of the Tokharian.

Gildersleeve

GILDERSLEEVE, B. L., Editions of Pindar and Justin Martyr.

———, Latin Grammar. Many editions since 1867.

———, Notes on Stahl’s Syntax of the Greek Verb (1910).

———, Numerous articles in the American Journal of Philology.

Moulton

———, Characteristics of N. T. Greek (The Expositor, 1904).

Page 109, line 9 ab imo. Ἐντὸ ἰκανόν ποιεῖν (Mk. 15:15). Mr. J. F. Springer, of New York, furnishes me several citations of this Latin idiom in Greek for 350 years, so that Mark’s use of it was neither at the beginning of the use nor when it was dying out. The examples appear in Polybius, Historiae 32. 3 (7). 13 (cited in J. Schweighäuser) and in Diogenes Laërtius, De Vitis, etc., 4. 50 (cited by Liddell and Scott); Hermas, Pastor Sim. 6. 5. 5; Appian, Bell. Pun., p. 68; Arrian, Exped. Alex. 5, p. 370. Evidently Mark’s idiom was current for centuries.

Page 115. Mr. H. Scott has counted the entire number of the words in the text of W. H. for Matthew as 18,302; for Luke 19,461; for Acts 18,296.

Page 118, line 10 ab imo. To Mk. 3:11 add “6:56; 8:35.”

Page 119, line 5. Mr. Scott gives this table for οὖν in Synoptics:

<table>
<thead>
<tr>
<th></th>

Page 205, line 13. For example ἵσχοι.

Pages 208, 984. For κἂν=καί note these examples: Οὐκ ἡδαλοσάς μοι κἂν περὶ τῆς ὀλοκληρίας. Oxy. P. XII. (iv/A.D.) 1593, l. 5. Κἂν ύν, ἀδελφέ, πάντα ὑπερθέμενος ἄντιγραψόν μοι (ib., l. 7). Κἂν μοσθίον όνου μοι φολέτρισον (ib., l. 16).

Page 224, line 5. Cf. Lightfoot’s note on Phil. 2:23 concerning ἐφίδω. Papyri examples are common. Cf. ἐφιορκοῦντι Tb. [Page 1387] P. 78, l. 17, b.c. 110–8;
τὸ ἐφαύριον Tb. P. 119, l. 17, B.C. 105–1; τοῦ ἐφετινοῦ Oxy. P. XII, 1482, l. 12 (ii/A.D.).

Pages 232, 267. Note about Ἐλαιών Fay. P. 112, ll. 14, 15 (99 A.D.) ἐπίγνοντι εἰ ἐσκάφη ὑ τῆς Διονυσίαδος Ἐλαιών. Cf. also nom. Ἰβίον, gen. Ἰβίονος (Ibis-shrine) Tb. P. 62, l. 23; 64, ll. 10, 11; 82, l. 43. So Ἰβίον (gen.) in phrase Ἰβίον τροφῆ Tb. P. 5, l. 70; 62, l. 19; 63, l. 28; 82, l. 38 (all ii/B.C.).

Page 233, line 8. Per contra Mr. Scott notes his inability to find an aorist indic. with δὲ ἦν (δέν) in the N. T. Cf. Mt. 16:19. See Moulton’s comment on p. 317 of the German Ed. of his Proleg.

Page 256 (c). Cf. τῷ Θωμῇ (Jo. 20:27).

Page 264, end of (a). See γόναι in 1 Cor. 7:16.

Pages 279, 516. For περισσός as a positive see Mt. 5:47; Jo. 10:10; 2 Cor. 9:1.

Page 292 (h), line 10. Note ἄπο τοῦ δ(ε)ί(να) in P. Par. 574, l. 1244 (iii/A.D.).

Page 299, 4 (a). The use of ἔσχάτως ἔχειν (Mk. 5:23) appears, Mr. Springer reports, in Diod. Siculus (ii/B.C.), Bibl. Historica, 10. 3. 4. Cited by Toiller in note to ἔσχάτως ἔχειν in Thomas Magister (Blancardi’s edition, about 1757). Both Sallier and Toiller cite Artemidorus, Oneirocritica (ii/A.D.) 3. 60 (61) as using it. Phrynichus (grammarian) also gives it (ii/A.D.), Eclogœ Nominum Atticorum ad ἔσχάτως ἔχει. There is also an example from Galen of doubtful genuineness τοῦ ἔσχάτως ἔχουσιν and a genuine one in Vita Porphyrii 99 by Marcus Diaconus.

Page 308. The form γνῶ imperat. occurs in B. M. CXXI, 613 (iii/A.D.). Mayser (p. 327) says: “Die Endung −0t findet sich nur noch in Ἰσθῆ (Israel, von εἰναι) und Ἰσθῆ (von oδη).”

Page 309, line 19. Against Blass’s scepticism concerning ἔδωσα note ἔλεγεν μοι Ἀπόλλων ὅτι οὐδὲν μοι ἔδωσεν Oxy. P. 1066, ll. 11, 12 (iii/A.D.). Rev. W. H.

———, On the True Meaning of the Koinê (Class. Rev., 1903, pp. 93 ff.).

Davis furnishes προδώσας from Hesychius: προδώσας Hesychio condonandum, quem etiam συνήθεις admisisse certum est. Vide Lobeck, Phryn., p. 723.

Page 311, line 2 ab imo. Note δείδι=δίδου in Oxy. P. 1185, l. 12 (A.D. 200) ὁν δὲ καὶ ὁνον αὐτῆς, κονδύλους αὐτῷ δείδι.

Pages 325, 360. Mr. Scott offers the following table on the use of the perfect subjunctive in the N. T.:

Periphrastic: 12 (all passive, except Jas. 5:15; 2 Cor. 1:9).

εἰδῶ, etc. 10.

Page 334, line 19. For ἀπεκρίνατο-form see also Mk. 14:61; Mt. 27:12; Jo. 5:17, 19.

Page 335 f. Examples of –οσαν-forms occur in ἑφάγοσαν Oxy. P. 1007, l. 29 (Gen. 3:16, vellum leaf of Gen. 2 and 3, iii/A.D.) and in a fragment of Xenophon’s Hellenica in Oxy. P. 226, l. 16 (i/ii A.D.) ἐπεπόμοφοσαν.

Page 337, line 16. For the –ez-form note ὡς ἐπεμψες μοι Oxy. P. 1489, l. 4 (iii/A.D.); ἀφίκες and οὖς Oxy. P. 1067, ll. 5, 20 (iii/A.D.); δέδωκες Oxy. P. 903, l. 30 (iv/A.D.). It is not quite so rare in the papyri as Mayser thought.

Page 348, line 12. T. Nicklin (Cl. Rev., Aug., Sept., 1918, p. 115) says re ἦξα: “One would like to know if any other instances can be adduced, and to have some fresh
consideration of the evidence.” It so happens that I have just come across συνάξας in vol. XII, Oxy. P. 1414, l. 21 (A.D. 270–5). I have learned to be chary about saying that the κοινή does not show this form or that. A fresh papyrus may turn up and prove me false. So we shall have to admit the ἥξα-form.

Pages 348, 1215. The form ἥξα (from ἥκω) occurs in Oxy. P. 933, l. 13 (ii/A.D.). Note also the infinitive φάγαι Oxy. P. 1297, l. 10; μετῆλθαι (note augment) P. Tor. i. 5. 27; ἔπενεγκαι B. G. U. 250. 8 (all iv/A.D.).

Page 360, 7, line 9. Mr. Scott counts 6 perf. imperatives out of 1623 imperatives and 22 perf. subjs. out of 1872 subjs. in the N. T. An undoubted perfect imperative occurs in Oxy. P. 1409, l. 21 (A.D. 298) ἱστω.

Pages 360 (cf. 109), 361, 375, 480, 809, 818, 902, 1108, 1110, 1122. In these references to the idiom ἔχε µε παρηθημένον (Lu. 14:18, 19) it is not meant that this is what is usually called the periphrastic perfect, but only that it furnishes a kind of analogy to the modern Greek perfect and the modern English. The syntax of the Greek idiom is, of course, plain enough, the predicate participle agreeing in case with the object of ἔχω as in Mk. 3:1; 8:17; Lu. 19:20.

Page 375, line 15 ab imo. Mr. Scott counts 32 present passive and 6 active perfects in the periphrastic form.

Pages 392, 1058. Re subject infinitive Votaw finds 289 anarthrous infs. with 39 verbs as predicates. Scott notes that δεχάς has 122 infs., γίνομαι 36 (32 Lu.), ἔξεστιν 31 (Syns. and Acts 29), καλόν (ἔστιν) 21, εὐκοπώτερον (Syn.) 13. Of verbs peculiar to authors Mk. has 2, Mt. 4, Lu. (Gospel and Acts) 14, Heb. 3, Paul 3, Jas. 1. For further details see Viteau, i. 151–2. There are 23 subject τό infs. (12 pres., 11 aor.) confined to Mt. 2, Mk. 4, Paul 16, Heb. 1.

Viteau

VITEAU, J., Essai sur la syntaxe des voix dans le grec du N. T. (Rev. de Phil., 1894).
———, Étude sur le grec du N. T. I, Le Verbe (1893); II, Le Sujet (1896).
Page 394, line 6. For εἰ δὲ μὴ Mk. has 2 exx. (parallels in Mt. and Lu. εἰ δὲ μὴγε), Jo. (Gospel) 2, Rev. 2=6. For εἰ δὲ μὴγε Mt. [Page 1390] shows 2 exx., Lu. 5, 2 Cor. 1=8. Mr. Scott observes that ἐὰν δὲ μὴ (or μὴγε) is not in the N. T.

Page 394, line 14 ab imo. If δότω is correct in 2 Cor. 9:7 Mr. Scott affirms that it is the only instance of μὴ and 3d sing. aor. imp. by Paul.

Page 395, line 10. For omitted ἔσμεν add “Jo. 17:11, 22; Gal. 2:15.”

Page 404, 3. Mr. Scott notes that of the 174 N. T. examples of ὀξλος, sing. and plural, 118 are in the singular. Of these 63 are in an oblique case, 55 in nom. sing. Of these 55 there are 44 with singular verb and 11 with plural verb. When ὀξλος is subsequently referred to in narrative or by some speaker, the reference is always in the plural, whether verb or pronoun ὄντος, etc., except Rev. 7:9 where proximity is probably the cause of the sing. That also is the only passage where the relative is used.

Of the 31 exx. of πλῆθος only one (Ac. 5:14) is in the plural; 12 are in oblique cases; 14 have nom. with sing. verb. Only 4 (Mk. 3:8; Lu. 2:13; 19:37; 23:1) have plural verbs. Where further reference is made (7 times), the verb is always plural (κατὰ σύνεσιν, p. 412).

As to λαός out of 141 exx. 123 are in oblique cases. Of 24 with sing. nom. only two (Ac. 3:11; Rev. 18:4) have plural verb and there are only four plural noms. Where repeated reference occurs, the reference is in the plural except Lu. 20:6; Ro. 11:2.

Mr. Springer finds numerous examples in LXX (Ex. 19:8, 9; Lev. 9:5; Dt. 22:18, 19, etc.) where a collective noun is used with singular and with a plural verb as in Mk. 5:24; Ac. 3:9, 10.

Page 404, line 2 ab imo. Add “1 Thess. 2:20.”

Page 408, line 8 ab imo. Add ἅπα ἄνατολῆς (Rev. 21:13).

Page 414. Add “Ro. 12:6–8” for examples of acc. and nom. in apposition (after εἰπε).

Page 424 (i), line 6. For μὲν in fourth place add “Lu. 22:22.”

Page 460 (f). Mr. J. F. Springer furnishes the following note which is pertinent:

Mk. 13:19, ἔσονται αἱ ἡμέραι ἔκειναι θλίψις. This expression is abundantly supported whether we regard αἱ ἡμέραι ἔκειναι as subject or as the nominative of time.

[PAGE 1391] I

AS SUBJECT
καὶ ἔστω ὑμῖν ἡ νύξ προφυλακῆ, καὶ ἡ ἡμέρα ἑρηνού (LXX Neh. 4:22 (16)); ἡ νύξ ἡ ἐκεῖνη εἶ ἡ σκότους (LXX Job 3:4); οὐχὶ σκότος ἡ ἡμέρα τοῦ κυρίου καὶ οὐ φῶς; καὶ γνώθος οὐκ ἐχον φέγγος αὕτη; (LXX Am. 5:20); ἔξαλειψίς σου ἡ ἡμέρα ἐκεῖνη (LXX Mi. 7:11).

II

AS EXPRESSION OF TIME

LXX: Job 1:6, 13; 2:1
   Esth. 4:11; 9:27
   Hos. 2:3 (5); 7:5
   Mi. 7:14
   Is. 11:16
   Jn. 11:5; 39 (32):20; 43 (36):2; 51 (44):6
   Ba. 1:15, 20; 2:6, 11, 26

Theodotion: Dn. 9:7, 15 (cf. LXX).

Examples of the formula, ὡς ἡ ἡμέρα αὕτη, are: LXX 1 Ki. 22:13; 3 Ki. 8:24, 61; Neh. 9:10.

The plural ἔσονται in Mk. 13:19 may be explained, he supposes, as due to its position near αἱ ἡμ. ἐκ.

Page 466 (b). Cf. “you” (acc. form) used as nom. like “ye.”

Page 475, line 6. Κρατεῖν τῆς χειρὸς occurs in the Gospels five times. Mr. Scott notes Hermas, Vis. 3. 8. 3 ἡ κρατοῦσα τῆς χειρὸς and Lightfoot’s translation “the woman with the strong hand.” Cf. Mt. 28:9 τοῦς πόδας.

Page 476, line 6. Mr. Scott reports that προσκυνέω occurs 60 times in the N. T., 30 with dative, 14 with acc., 16 other constructions.

Page 477, line 6 ab imo. Add πολλάς and read 12:47 f. in next line.

1 ἡ νύξ is reading of B and S1, ἡ ἡμέρα of AS3 C. The example is suitable with either.
Page 480, line 25. For ποιεῖν with acc. and inf. see Mt. 5:32; Mk. 1:17; 7:37; Lu. 5:34; Jo. 6:10; Ac. 17:26; Rev. 13:13.

[Page 1392] Pages 487, line 7 ab imo, 518, 3. For χρείαν ἔχει absolutely see Mk. 2:25, with ablative see Mt. 6:8, with τοῦ and inf. see Heb. 5:12, with inf. see Mt. 3:14, with ἵνα Jo. 2:25.

Page 504, line 14 ab imo. Mk. 14:64 is probably the origin of ἔνοχος θανάτου in Mt. 26:66, but the idiom is still unusual.

Pages 514, 1132. Mr. Springer notes unnecessary genitive absolutes (like Mk. 6:22) in Thucydides 1. 114; Xenophon, Cyr. 1. 4, 20; LXX (Numb. 6:7; Dt. 15:10; 1 Ki. 9:11; 2 Macc. 9:2, etc.); (Aratus of Soli) Eratosthenes, Catasterismi 40.

Page 522, line 10. Add “Mk. 6:21=Mt. 14:6” to γενεσίοις.

Page 527 (d), line 5. Prof. Robert Law, of Knox College, Toronto, sends me this example of χρόνῳ ἱκανῷ in Plato, Leges 678 D.

Page 530 (f), line 4 from end. It should be noted, Mr. Scott reminds me, that ὅμοιόν is also used, with acc. of person (Lu. 7:31) or thing (Mk. 4:30), while to whom or to what the acc. is likened is put in the instrumental (assoc.). In the passive, as usual, the acc. becomes the nom. and the instrumental is retained (Mt. 13:24).

Page 535. The syncretism of the dative forms (locative, instrumental, true dative) is ably and clearly discussed by Prof. Walter Petersen under the caption “Syncretism in the Indo-European Dative” (Am. J. of Ph., xxxvii and xxxix, 2, Jan. and April, 1918). With great pains and skill he shows how the psychology of the cases appears in the process of blending. He supports the thesis that the dative is not a purely local case in origin and is not a purely grammatical case, but syncretistic. Originally a case without ending, which “secondarily received its endings by association with local cases, and that these local cases then in turn thrust upon the dative certain meanings like that of direction which were foreign to it.” It was originally a suffixless case of indirect object and borrowed its endings from certain local cases.

Page 566 (b). The preposition is not always repeated, even when words intervene as in Mk. 2:21 τοῦ καὶ θανάτου; Lu. 9:8; Ac. 26:18. Mr. Springer notes same idiom in Const. Ap. 7:25.

Page 570, line 9. Add “Mt. 27:48” λαβὼν σπόγγον πλήσας τε δέξους.

Page 596, 7. Mr. Springer notes examples in LXX (2 Ki. 14:4); N. T. (Mt. 1:10; Mt. 26:10; Lu. 6:20, etc.) and later writings (Didache 1:4; Hermas, Vis. 4. 3. 1) of εἰς where ἔτι would have been used in the earlier Greek. In the modern Greek εἰς is very common in such constructions.

Page 604, 6, line 6. The reading of Text. Rec. in Mk. 2:4 ἐφ᾽ ὁ ὁ in Lu. 5:25.

Page 607, middle. Mr. Scott supplies some examples for the phrase ἔχειν τι κατά τινος Mt. 5:23; Mk. 11:25; Rev. 2:4, 14, 20.

Page 623, line 1. For καὶ πρός (adverb)=and more see Oxy. P. 488, l. 18 (ii/iii A.D.).

Pages 625, middle, 626, line 9. For πρὸς αὐτὸν rather than αὐτῷ with verbs of speaking to, Mr. Scott gives this table based on Hawkins’ Horæ Syn., ed. 2, p. 45.

Line 6, 1 Cor. 12:8. Read ἄλλῳ δὲ (6 times) ᄄékπρῳ δὲ (bis).

In Mt. 22:5 ὃς μὲν…ὃς δὲ is completed by οἱ δὲ λοιποί…

[Page 1396] Page 696. The use of relative ὃς and demonstrative ὃς in the same sentence appears in Oxy. P. 1189, ll. 6–7 (A.D. 117) ὑπερτολὸς ὃς δύο ὃς ἔργως ἐν μὲν σοὶ ἔν δὲ Σαβείνῳ κτλ. So in ll. 11–16 we see demonstrative and article τὴν μὲν…τὴν δὲ εἰς τὸν κτλ. Mr. Springer notes καὶ ὃς (dem.) in Xenophon, Cyropædia 2. 2. 7; 2. 2. 30; 3. 2. 18; 4. 1. 11. So Agathias scholasticus (vi/A.D.) has καὶ ὃς Historiae 2. 9; 4. 14 and Menander Protector (vi/A.D.) Excerpta e Menandi Historia, 30.

Page 700, line 2 ab imo. Add “Mt. 12:45” (2d); Ac. 2:40 where οὗτος is last, and Mk. 9:38 where there are two adjectives. In Ac. 1:25 there are two nouns.
Page 701, line 6. Mr. Scott gives these examples of οὗτος in genitive absolute Mt. 11:7; Lu. 21:28; Ac. 19:36; 28:9; Heb. 9:6; 2 Pet. 3:11. An instance of οὗτος joined to an adverb appears in Ac. 15:8. In Rev. 19:9 the translation is “these are,” but in 21:5 and 22:6 “these words are.” In Ac. 17:6 Moffatt translates “these upsetters.” See Rev. 7:13.

Page 702, line 1. Add “Jo. 4:54.”

Page 709, line 10. Mr. Scott offers this table, showing Synoptics and Acts compared with John:

<table>
<thead>
<tr>
<th></th>
<th>έκκόνος with articular noun</th>
<th>έκκόνος as pronoun</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mark</td>
<td>16</td>
<td>3</td>
</tr>
<tr>
<td>[16]</td>
<td>—</td>
<td>3</td>
</tr>
<tr>

<td>18</td>
<td>52</td>
</tr>
<tr>
<td>1 John</td>
<td>—</td>
<td>7</td>
</tr>
<tr>
<td></td>
<td>131</td>
<td>77=208</td>
</tr>
</tbody>
</table>

Page 730, line 5. With Mk. 2:16 see διτι cf. διά τι in Mt. 9:11. Mr. Springer notes that διτι=‘why’ in a direct question in Barnabas, Ep. 8:5 διτι δὲ το έριον έπι το ζόλον; διτι ἥ βασιλεία Ίησοῦ έπι ζόλου κτλ.; 10:1; διτι ποιώ: Aristophanes, Ranae 198; Gospel of Nic., Pass I, A. 14. 3. The use of διτι in a direct question seems clearly established by these examples. He finds διτι in indirect questions in Hom., Od. T. 464; Lucian, De Asino, 32; Aristophanes, Plutus, 965; Xenophon the Ephesian, De Anth. et Habr. 4. 2.

Page 738, line 2 ab imo. Moffatt translates τι in Mk. 2:24 by “what” and Scott argues ἵδε as favouring “what.”

Page 759 f. Prof. Eakin (The Greek Article in First and Second Century Papyri, Am. J. of Ph., July, 1916) shows that in the papyri, as the N. T., the article is frequently absent in titular expressions. He finds the same obscurity and uncertainty about the use of the article with proper names in the papyri as in classic Greek. He gives numerous examples of the anaphoric use (the aforesaid and the use of the article before the genitive of the father’s or mother’s name is very frequent as Deissmann

———, Biblische Gräcität etc. (Theol. Rundschau, Okt. 1912).

Deissmann

DEISSMANN, A., Bible Studies (1901). Tr. by A. Grieve; cf. Bibelstudien (1895) and Neue Bibelstudien (1897).
showed, cf. p. 767). But Prof. Miller (Am. J. of Ph., July, 1916, Article before Genitives of Father’s Name) shows that in official language in the papyri the article only appeared (as in classic Greek, Gildersleeve’s Synt. of Cl. Gk., § 580) before the genitive when the name of son or daughter is in the genitive (or ablative), and even this use vanished from the second century A.D. onward. But the vernacular idiom has the article in nominative as in Mt. 10:2.

Page 760. On Ἰησοῦς with article see von Soden, p. 1406.

Page 762, line 11 ab imo. For full construction see Mt. 12:35.

Page 764 (c). In Col. 1:7 f. note ὅς ἐστιν and ὅ καὶ δηλώσας as parallel clauses.

Page 770, bottom. Mr. Scott gives this note: ὅ…οὗτος or οὗτος ὅ. οὗτος (and cases) stands last (296 times), three times as often as it stands first (98 times). The position of οὗτος (and cases) varies in the same phrase without any apparent reason, e.g., Ac. 23:17, 18; Mt. 26:31–34.
Ἑκεῖνος first 40 times, last 104 times.

Page 773, line 5 *ab imo*. Mr. Scott remarks that οἱ πάντες is subject of verb in 3d person in Phil. 2:21, apparently of verb in 1st person in 1 Cor. 10:17; 15:51; Eph. 4:13, etc., and of 2d person in Jo. 7:21; 1 Jo. 2:21; 1 Pet. 5:5; 1 Cor. 1:10—in apposition to the pronoun implied in the ending of the verb. See Jo. 1:16; 1 Cor. 12:13; Jas. 3:2.

Page 773, bottom. For ὁ πᾶς see Jo. 5:22; 16:13; Rev. 13:12.

Page 774. Ὅλος. Add “Lu. 11:36 (bis).”

Page 774, line 4 *ab imo*. Mr. Scott notes that ὅχλος πολύς occurs 22 times in N. T. and ὅχλοι πολλοί 7 (Mt. 5, Lu. 2). Ὄχλος ἱκανός occurs in Mk. 10:46; Lu. 7:12, and thrice in Acts.

[Page 1398] Page 779, 2, line 6. It should be understood that this is the usual Attic idiom. See further Col. 1:8 τὴν ὑμῶν ἑγάπην. In Phil. 1:25 note τὴν ὑμῶν προκοπήν, but τὸ καύχημα ὑμῶν in 1:26.

Page 783, line 5 ff. Observe that all these examples are prepositional adjuncts.

Page 788, line 21. Mr. Scott thinks we may over-refine on the use and non-use of the article with proper names, and cites the variations in Mk. 9:2; Mt. 17:1; Lu. 9:28 in the mention of Peter, James, and John as in point.

Page 791 (c). Prof. Eakin (*Am. J. of Ph.*, July, 1916) shows that in the papyri “anarthrous prepositional phrases” are common as in the N. T. Many of the identical phrases are frequent like κατὰ καιρὸν, ἐν ὑπάθη, ἐν χερσίν, κτλ.

Page 807, line 3 *ab imo*. Mr. Springer cites examples of middle voice (φυλάσσωμαι=‘Observe’) from LXX (Ex. 12:25; 13:10; Lu. 18:4, 5; 18:26; 19:3; 19:19; Dt. 5:25; 10:12, 13; 3 Ki. 8:25; 1 Macc. 8:26; Aquila’s translation Dt. 11:22 (ii/A.D.). He finds active in sense of ‘observe’ in Gen. 18:19; 26:5; Ex. 15:26; 19:5; Lev. 18:30; 22:9; Dt. 5:10; 6:17; 33:9.

Page 839, line 8 *ab imo*. Mr. Scott makes out 859 present imperatives and 760 aorist imperatives in the N. T. It is Paul’s usage that makes this situation, 323 presents and 99 aorists.

Page 847. Note the change of tense in Jo. 11:13–15.

Page 848 (c). Mr. Scott counts 459 present subjunctives, 1409 aorists, 22 perfects=1890 subjunctives in N. T. Readers of this grammar have learned to be grateful to Mr. H. Scott for his statistical knowledge of N. T. syntax so freely furnished. Here follow some of his most valuable tables:[Page 1399]

Pages 854 (ε), 929, line 3 ab imo, 1174 (b), line 3. In Heb. 13:5 (LXX) ἐγκαταλείπω is read by NACD KIMP 17. Mr. Scott thinks it odd that this reading escaped Text. Rec. But it is rather Alexandrian than Syrian.
Mr. Scott again presents useful data on οὐ μὴ constructions (see inset facing this page).

<td>12:32, ὁς ἄν εἰπή...οὐκ ἀφεθήσεται</td>
</tr>
<tr>
<td>Lu.</td>
<td>10:19, οὐδὲν ὑμᾶς οὐ μὴ ἀδικήσῃ</td>
</tr>
<tr>
<td></td>
<td>22:68, ἐὰν ἐρωτήσω οὐ μὴ ἀποκρίθητε</td>
</tr>
<tr>
<td>Rev.</td>
<td>3:3, καὶ οὐ μὴ γνῶς ποίαιν ὄραν</td>
</tr>
<tr>
<td></td>
<td>9:6, καὶ οὐ μὴ εὑρήσωσιν</td>
</tr>
</tbody>
</table>
Of these 7 readings only 3 (Mk. 13:31; Mt. 12:32; Lu. 22:68, ) add to the examples of οὐ μῆ. The remaining 4 are only variations of existing examples. Readings are in the judgment of W. H. (Introduction, § 385) “outside the pale of probability as regards the original text”: so that only Mk. 13:31, Mt. 12:32 can claim any right to be counted as additional examples of οὐ μῆ.

Jesus spoke the Quotation.

Page 854 (ζ). Mr. Scott gives the data for aorist and present optative. Aorist occurs 45, present 22 times. But Paul has aorist 31 and present 0 times, while the rest have aorist 14, present 22 times. Μὴ γένοιτο occurs 15 times and γένοιτο without μῆ twice. Opt. 67 times in all.

Pages 856, line 8 ab imo, 933, line 9. Mr. Scott notes that 3d sing. aor. imper. occurs 8 times in N. T.: Mk. 13:15 (twice)=Mt. 24:7=Lu. 17:31; Mk. 13:16=Mt. 24:18=Lu. 17:31; Mt. 6:3.

Page 858, line 12. Mr. Scott gives the data for aor. inf. with prepositions (μετά 14 times, πρό 8, πρός 9, εἰς 38, ἐν 12, διὰ acc. [Page 1406] 1, ἔνεκεν 1, ἐπὶ 1=84). There should be added to the table on p. 858 for articular inf. in N. T.: pres. 164, aor. 148, perf. 10=322.

Page 891, line 10. Mr. Scott’s figures for pres. inf. with preps. are with ἐν τῷ 43 times, διὰ τῷ 24, πρὸς τῷ 3, εἰς 32, ἐκ τοῦ 1, πρὸ τοῦ 1, ἀντὶ τοῦ 1, διὰ τοῦ 1 = 106.

Page 894, 2. Mr. Scott counts 868 perfect indicatives in the N. T. of which 37 are periphrastic (5 active and 32 passive). John (Gospel 205, 1 Ep. 60) has far the most and 1 Cor. (73) comes next. ὅδα alone occurs 208 times (Gospel of Jo. 61, 1 Ep. 13).

Pages 903, 906, line 20. Mr. Scott reports his count of pluperfects in the N. T. as 142 in all. (Mk. 13 and one in 16:9, Mt. 11, Lu. 31, Ac. 33, Jo. 46, 1 Jo. 1, Rev. 3, Gal. 2, Ro. 1.) Of these 88 are simple and 54 periphrastic forms, divided again into

MOULTON and MILLIGAN, Lexical Notes from the Papyri (The Expos., 1908—).
active (simple 81, periphrastic 13) 94 and passive (simple 7, periphrastic 41) 48. These statistics are based on form only (ἵπτων gives 34, ἵστημι 20).

Page 908, line 4. Add “1 Cor. 1:10; 2 Cor. 9:3.” There are 22 perf. subj.s., 10 εἰδῶ, 12 periphrastic (ten passive, two active).

Page 909. Mr. Scott, by the table on page 1407, corrects Votaw’s error as to the number of perfect infinitives in the N. T.

Further investigation has shown that the number of perfect infinitives in N. T. is 47 (of which ten (10) are articular—31 separate verbs, but 47 instances). This may account for Votaw’s statement on p. 50, but he is undoubtedly in error in making only 8 articular instances.

Page 917, middle. Οὐχί, Mr. Scott notes, occurs 54 times in N. T. It is a favourite word of Luke (Gospel 17, Acts 3) 20, Mt. 9, but not in Mk. It occurs in questions 43 times, 9 times in denials (qualified by ἀλλά) of a previous question or statement. In Lu. 18:30 it is the equivalent of οὐ μή. Οὐχί in Lu. 4:22 is οὐκ in Mt. and Mk., but Mt. has οὐχί like Lu. 12:6.

Pages 927, 1381. Prof. F. H. Fowler (Class. Weekly, April 16, April 23, 1917) subjects Sonnenschein’s theory of “determined futurity” in “The Unity of the Latin Subjunctive” to a sharp critique. He objects that Sonnenschein makes no room for the personal determinant and ignores the Greek. Fowler holds that in Greek “the subjunctive, starting with the will meaning, developed the meaning of determined futurity, that the optative, starting with the wish meaning, did the same thing, and that the optative developed still another meaning, that of contingent determined futurity.”

Page 928 (a). An instance of the futuristic subjunctive in an independent sentence occurs in Oxy. P. 1069, ll. 13–18 (iii/A.D.) τάχα γὰρ δύνασθομεν φο[ρ]υτρέισε σοι δύο καμήλους [πυ]ροῦ καὶ πέμψε πρὸ σέν. The use of τάχα with this subjunctive is to be observed.

Page 931, line 3 ab imo. Jannaris, § 1914, quotes this and other examples from Epictetus.

Page 932, line 1. Add δεῖρο δεῖξω (Rev. 17:1; 21:9).

Page 934 (c). Mr. Scott notes that τί in independent aorist subjunctive sentences occurs in Synoptics 28 times, Acts 3, John 1 (Jesus, τί εἴπω), 1 Cor. 1, and not in any other book.

[Page 1409] In independent present subjunctive sentences τι occurs only in Jo. 6:28; Heb. 11:32.

Page 936. Mr. Scott has a complete table on page 1408 for the optatives in the N. T.

Page 936, 2. Sonnenschein (*Cl. Rev.*, Feb., March, 1918, p. 211) says: “As in Latin the past subjunctive, so in Greek the optative may be a past prospective, owing to

its inherent meaning. This I have recognised in my Greek Grammar, § 504 (c) (e.g., ἕτοιµος ἦν ταῦτα τούτων ἃ ἐποίης, ‘the things which you should say’); for the corresponding meaning in present time see Demosth. de Pace 11, πλὴν διὰ ἄν ὑµῖν ἐποίη δύο, ‘the two things which I shall tell you,’ where ἄν with the subjunctive expresses pure futurity, not generality.”

Page 940 (c), line 7. Mr. Scott thinks that the direct question here would be τί ποιήσω µεν. I still adhere to my position in the text.

Page 940, line 7 ab imo. In Lu. 1:29; 3:15 there is the optative without ἄν, the simple change of mode in indirect question (indicative to optative).

Page 941. Mr. Scott offers this table for the imperatives in N. T.:

<table>

Page 949, line 11. The other imperative in this idiom is in the aorist except Mt. 21:28 and perhaps Rev. 16:1 (durative present). The idiom is not used by Luke and the word is not used in Acts or by Paul. So Mr. Scott.

Page 956. Mr. Springer notes ὃς ἄν and future indicative in Athenische Mitteilungen 25. 470; Papers of the Am. School II. 159; Inser. Graecae, Senats Dekr. 73 a.

Page 957, middle. The 122 indicatives with the indefinite relative are: pres. tense 52, imperf. 13, fut. 9, aor. 45, perf. 2, pluperf. 1. So Mr. Scott.

Page 958. Mr. Scott counts 191 examples (as against Moulton’s 172, Prol., p. 166) of ἄν and ἐάν constructions in the N. T. according to the table on page 1410.

Page 969, line 4 ab imo. ὦσον occurs (Scott) in Mk. 15 times (10 in speeches), 13 in Mt. (12 in speeches), 5 in Lu. (all in speeches), 30 in Jo. (17 in speeches).

Page 969, line 6 ab imo. Ellipsis also in Lu. 17:37; 1 Cor. 3:3; Col. 3:11; Jas. 3:16.

Page 969, line 8 ab imo. Mr. Scott gives this table for ὦσον with subjunctives:

<table>
<thead>
<tr>
<th></th>

Note Oxy. P. 933, ll. 14, 15 (ii/A.D.) περὶ τῆς μικρᾶς ἔγεναμην ἄγαρ ἀν καταπλεύσῃ.

Page 975, middle. Ἑως as preposition (Scott) 86 times, conj. 62 (ind. 13, subj. 49)=148. Ἑως alone ind. 7, subj. 13, Ἑως ἀν subj. 19; Ἑως ὅτου ind. 2, subj. 3; Ἑως oū ind. 4, subj. 14 (Scott).

Page 977. Πρὶν (Ἡ). Scott notes in LXX as preposition πρὶν γενέσεως αὐτῶν Dan. Sus. 350 420; as adverb Aquila and Sym. Prov. 8:26 πρὶν Ἡ; with subj. Ps. 57 (58):10; Jer. 40 (47):5; with inf. pres. 4 Macc. 9:27; Numb. 11:33 (B).

1 Gal. 3:19 mg.
Page 983, line 1. Mr. Scott gives data for ἵνα μὴ in the N. T.

There are 117 instances of ἵνα with μὴ in N. T. (indic. 4, subj. pres. 37, aor. 75, perf. 1 (2 Cor. 1:10)). When the construction with ἵνα is continued in a further clause by μὴ, μὴ alone is repeated Mk. 4:12 LXX, Jo. 6:50, 11:50, 1 Jo. 2:28, 1 Cor. 1:10, 2 Cor. 4:7, Rev. 3:18, 8:12; and so with ἵνα μὴ Jo. 4:15, Rev. 7:1. In Rev. 18:4 ἵνα μὴ is repeated, but in Rev. 16:15 neither is repeated. When the construction is continued with ἀλλὰ ‘but on the contrary,’ ἵνα is not repeated, Jo. 3:16, 6:39, 18:28, 2 Jo. 8, 1 Cor. 12:25. So with δὲ Heb. 12:13. In Rev. 9:5 ἵνα is repeated.

Page 984, middle. See Oxy. P. 1068, 1. 19 (iii/A.D.) εἶνα μοι μαρτυρήσουσιν ἀνελθόντες, example of ἵνα and future indicative.

Page 986, line 6 ab imo. Mr. Scott notes that ὅπως is almost confined to Matthew and Luke, and gives the following data for ὅπως in N. T.:

<table>
<thead>
<tr>

Lu. 12:58 has same form for pres. and aor. subj. I have counted it as aor. Mt. 25:9 may be independent.

Page 990, middle. Blass, p. 235, points out that τοῦ is added to the second infinitive. Add “Ac. 26:18.”

Pages 995, line 6 ab imo, 1174, line 7. Mr. Scott thinks that οὐχ...οὐ simply belongs to θέλω according to ordinary rule.

Page 999 (β). Votaw counts εὐαγγέλιζεσθαι with ὦστε, but it is more likely to be construed with the participle φιλοτιθομένου which with οὖν δὲ loosely carries on the ὦστε clause. Leaving out this example there are 95 exx. of ὦστε in the N. T. (See Mr. Scott’s tables on page 1414).

Page 1001 (d), line 12. Moulton, Germ. ed. (p. 332 n.), says that Jo. 14:22 is consecutive.

Page 1003, 7. Note Oxy. P. 1489, l. 6 (iii/A.D.) εἶθε πάντας πεπλήρωκα ὡς Ἀγαθὸς Δαίμων.

Pages 1007-16. Mr. Scott has valuable tables on pages 1416–17 for the constructions of εἰ with indicative. The examples cover both (α) and (β), the two first classes (determined as fulfilled and unfulfilled).

[Page 1420] Pages 1011, line 15, 1012, line 4. Scott remarks that Moulton follows MG εἰ οὖ, p. 262, with addition of Jo. 1:25, but there are other doubtful examples (Jo. 3:12; 10:35; 2 Jo. 10; Lu. 14:26; Jas. 1:23) so that Jannaris with 34 may be correct.

Page 1011, line 16 ab imo. Mr. Scott doubts if Mk. 6:4 is a real condition, and thinks 1 Tim. 6:3 the only normal example of εἰ μη with first class condition.

Page 1016, line 10. Mr. Scott observes that Moulton (p. 171) divides εἰ μη into three classes:

1. in protasis 10
2. ‘except’ (1) without verb expressed:
   (a) preceded by negative 63
   (b) τις…εἰ μη…; 10
3. (2) with verb expressed (Mt. 6:5; Gal. 1:7)
   εἰ μητι 3
   ἐκτὸς εἰ μη 3 81
4. ‘otherwise’: εἰ δὲ μη 6, εἰ δὲ μη γε 8 14
5. 105
Mr. Scott gives two tables on pages 1418 and 1419 for ἐὰν and the subjunctive: one for the present subjunctive, one for the aorist subjunctive. He finds it difficult to be accurate, because of the compound protases and apodoses as in Mt. 5:23; 24:49; Lu. 20:28; 1 Cor. 13:1–3; Jas. 2:1–3.

As already seen, ἐὰν with present subjunctive has future apodoses 30 times; ἐὰν with aorist subjunctive has future apodoses 81 times. Mr. Scott adds figures for ἐὰν with perfect subjunctive and with the indicative.

For δεῦτε ὑπίστῳ μου see 4 Ki. 6:19.

Add to examples of ἐὰν ὡς Ro. 11:14; Phil. 3:11 which can be construed as aorist subjunctive with σκοπῶν implied (so Thayer).

Thayer

THAYER, J. H., Greek-English Lexicon of the N. T. (1887).
Page 1027 (a). Recitative ὅτι occurs in Oxy. P. 1066, ll. 11, 12 (iii/A.D.). Mr. Scott finds, taking R. V. as basis, 184 exx. of recitative ὅτι in N. T.

Pages 1028, line 9, 1029, line 17. Mr. Scott considers Mk. 2:16 a doubtful example. In favour of the interrogative is the fact that Mt. and Lu. (the earliest commentators) read διὰ τι...;

Page 1029. Mr. T. Nicklin (Cl. Rev., Aug.–Sept., 1918, p. 116) suggests that a case like Ac. 4:13 shows that a distinction was preserved between ἔστιν and ἦσαν in the indirect discourse. The imperfect carries the idea of “had been.” He insists on this meaning in Ac. 16:3; and even in Jo. 2:25; 6:6; 9:8. Something can be said for this view.

Page 1030 f. Note Oxy. P. 1204, l. 24 (A.D. 299) ἵνα δὲ ἐννομότερον ἀκουσθείῃ after an aorist imperative.

Page 1033. For double indirect discourse see Jo. 4:1.

Page 1034, line 1. In Mk. 1:34=Lu. 4:41 ὅτι is treated as causal by some.

Page 1034, line 12. Subject clause. Add “1 Cor. 6:7.”

Page 1035. Add γνωστὸν ἔστω...ὁτι Ac. 4:10; 13:38; 28:28; [Page 1422] χάρις τῷ θεῷ ὅτι Ro. 6:17; σύνφημι ὅτι Ro. 7:16; and perhaps μέλει ὅτι Mk. 4:38; Lu. 10:40.

Page 1036, line 6. Mr. Scott observes that ἀκούω ὅτι occurs 32 times, acc. and inf. 2 (Jo. 12:18; 1 Cor. 11:18). Ἀποκρίνομαι ὅτι (recitative) 3 times (Mk. 8:4; 12:29; Ac. 25:16), acc. and inf. 3 (Lu. 20:7; Ac. 25:4 bis). Νομίζω ὅτι 4 times, inf. 10 (Luke and Paul). Λέγω ὅτι 162 (and about 900 object clauses without ὅτι), inf. 35. Ὁδα ὅτι 133, inf. 12. Πιστεύω ὅτι 25, inf. 2. Γνώσκω ὅτι 71, inf. 3. Βοάω ὅτι 1, inf. 1.

Page 1042, line 2. Mr. Scott has this table for the constructions of ἀκούω in N. T.:

<td>20</td>
<td>6</td>
<td>23</td>
<td>4</td>
<td>7</td>
</tr>
</tbody>
</table>

Ac. 10:25 not included.

Lu. 9:29

Mr. Scott expands the data for ἐν τῷ with ἐγένετο thus:

<table>
<thead>
<tr>
<th>Luke Gospel καὶ ἐγένετο</th>
<th>6</th>
<th>ἐγένετο δέ</th>
<th>4 = 10</th>
</tr>
</thead>
<tbody>
<tr>
<td>καὶ ἐγένετο</td>
<td>7</td>
<td>ἐγένετο δέ</td>
<td>3 = 10</td>
</tr>
<tr>
<td>καὶ καὶ</td>
<td>1</td>
<td>ἐγένετο δέ</td>
<td>2</td>
</tr>
<tr>
<td>Lu. 9:29</td>
<td>Total 14</td>
<td>inf.</td>
<td>8 = 22 out of 38</td>
</tr>
</tbody>
</table>
Page 1043, line 8. Mr. Scott gives this table for ἐγένετο with infinitive: Mt. 1, Mk. 2 (2:15, 23), Lu. 9 (6:1, 6, 6; 12; 16:22, 22; 3:21, 22, 22), Ac. 22 (4:5; 9:3, 32, 37, 43; 10:25; 11:26, 26, 26; 14:1, 1; 16:6; 19:1, 1; 21:1, 5; 22:6, 17, 17; 27:44; 28:8, 17). ἐγένετο with infinitive occurs 25 times, but ‘governs’ 34 infinitives. This raises the old difficulty of counting verb or construction. In this case, as it is a construction of ἐγένετο+infin., the infinitive clearly should be counted.

Mk. 2:15 is the only example of γίνεται in this construction.

Pages 1059, line 11, 1078, line 15. For τοῦ infinitive as subject add “Ac. 27:1.” Mr. Scott has this table for τὸ infinitive in N. T.:

<table>
<thead>
<tr>
<th>BOOK</th>
<th>SUBJECT</th>
<th>OBJECT</th>
<th>APPosition</th>
<th>TOTAL</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Present</td>
<td>Aorist</td>
<td>Present</td>
<td>Aorist</td>
</tr>
<tr>
<td>Mk.</td>
<td>12:33 bis</td>
<td>9:10</td>
<td>10:40</td>
<td>4</td>
</tr>
<tr>
<td>Mt.</td>
<td>15:20</td>
<td>20:23 =</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>Ac.</td>
<td></td>
<td>25:11</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>Heb.</td>
<td>10:31</td>
<td>3:3</td>
<td>4:6 bis</td>
<td>3</td>
</tr>
<tr>
<td>1 Th.</td>
<td>7:26; 11:6</td>
<td>11:6</td>
<td>14:39 bis</td>
<td>5</td>
</tr>
<tr>
<td>1 Cor.</td>
<td>9:1</td>
<td>7:11; 8:11</td>
<td>8:10; 8:10, 11; 10:2</td>
<td>2:1</td>
</tr>
<tr>
<td>2 Cor.</td>
<td>7:18 bis</td>
<td>14:21 bis</td>
<td>13:8</td>
<td>4:13; 14:13</td>
</tr>
<tr>
<td>Ro.</td>
<td>21:22, 24, 29 bis</td>
<td>1:21</td>
<td>2:6, 13 bis</td>
<td>4:10</td>
</tr>
<tr>
<td>Ph.</td>
<td></td>
<td></td>
<td>Total</td>
<td>12</td>
</tr>
</tbody>
</table>

If Mk. 10:40 and=were classed as subject the difference would be increased.

Mr. Scott notes that there are 992 anarthrous object infinitives in N.T.(Votaw’s b.), occurring in every book of the N.T., but most numerous in Luke, and Acts (179) more than the Gospels (156); in Paul 235 times, in John and Epp. 102. There are 109 finite verbs producing these infinitives (δύναμαι has 212, θέλω 128, μέλλω 95,
ἀρχομαι 91, βούλομαι 137, ζητέω 33, παρακαλέω 29, ὀφείλω 23). For the tenses see Votaw’s table, p. 49.

Pages 1060, line 15, 1094. R. V. takes Mt. 5:34 as aorist middle imperative (μὴ ὀμοσαι) instead of aorist active infinitive μὴ ὁμόσαι.

Page 1061, line 5. In Ro. 11:8 bis the quotation here differs significantly from the LXX text of Dt. 29:4.

[Page 1425] Page 1061, line 16. Lu. 48 (Gospel 24, Ac. 24), Paul 17, Mt. 7, Mk. 0, rest 8=80. So Mr. Scott counts.

Pages 1061, 1089, 1094. Mr. Scott presents this table for “verbs of hindering”:

<table>
<thead>
<tr>
<th>WORD</th>
<th>Mt.</th>
<th>Lu.</th>
<th>Ac.</th>
<th>Heb.</th>
<th>1Th.</th>
<th>1 Cor.</th>
<th>2 Cor.</th>
<th>Gal.</th>
<th>Ro.</th>
<th>1 Tim.</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>ἀπειλέω</td>
<td></td>
<td></td>
<td>4:17</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>1</td>
</tr>
<tr>
<td>ἐνκόπτω</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>3</td>
<td>1</td>
<td>1</td>
<td>4</td>
<td>1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>1</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ARTICULAR</th>
</tr>
</thead>
<tbody>
<tr>
<td>κατέχω</td>
</tr>
<tr>
<td>κρατέω</td>
</tr>
<tr>
<td>καταπαύω</td>
</tr>
<tr>
<td>ὑποστέλλω</td>
</tr>
<tr>
<td>ἐνκόπτω</td>
</tr>
<tr>
<td>ἐξαιρέω</td>
</tr>
<tr>
<td>κωλύω</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

Votaw does not class Ac. 10:47 with “verbs of hindering,” but with ‘result,’ and 1 Cor. 14:39 as an ‘object’ verb. See Votaw, p. 24.

Pages 1062-75. Mr. Scott’s table for articular infinitive in N. T., W. H. text, is shown on pages 1426–27.
Page 1067, note 2. Mr. Scott expands his data for τοῦ-infinitives thus: 3 presents and 4 aorists in Mt., 6 presents and 18 aorists in Luke; 3 presents in 1 Cor., 2 in 2 Cor., 1 aorist in Gal. (quotation), 7 presents and 2 aorists in Ro., one of each in Phil.

Page 1068, line 8. Mr. Scott thinks Lu. 5:7 surely “aim or purpose.”

Page 1069. See Tb. P. 27, l. 73 (B.C. 113) ἀνευ τοῦ δοῦνας τὴν ἀσφάλειαν.

Page 1069, line 2. Cf. p. 647, 41 and note 5. There are examples of χάριν τοῦ with infinitive in the papyri. See Tb. P. 38, l. 17 (B.C. 113); Tb. 27, l. 35 (B.C. 113); Tb. P. 6, l. 37 (B.C. 140–39); Tb. P. 61 (a), l. 47 (B.C. 118–7); Tb. P. 61 (b), l. 44 (B.C. 118–7), ib., l. 353.

3 Eph.

3 Eph.
Present=164; Aorist=148; Perfect=10.—Total=322.

[Page 1428] Page 1069, line 11. Mr. Scott gives exact figures for relation of prepositional infinitives to total articular infinitives: O. T. 800 to 2107, Apocr. 161 to 349, N. T. 200 to 322, total 1161 to 2778.

Page 1070, line 9. The figures for ἐν τῷ and infinitive are: with pres. 43, aor. 12, perf. 0 in the N. T. (Scott).

Page 1070, line 10. Mr. Scott refers to Vulgate “postquam” as translation of μετὰ τὸ and infinitive as reason for taking the infinitive clause as “absolute.” So Blass, p. 239, “an independent position.” But the Greek idiom with the infinitive was not “absolute” and the principles of indirect discourse do apply. The acc. in Lu. 11:8, Ac. 18:3 is predicate adjective only. In Lu. 2:4; 19:11; Ac. 27:4 the acc. of general reference occurs for what would be subject with a finite verb.

Διὰ τὸ is not repeated with the second infinitive (Mk. 5:4; Lu. 19:11; Ac. 4:2). Mr. Scott notes that διὰ τὸ with aorist occurs only in Mt. 24:12 (passive). There are 8 other passives (pres. 4, perf. 4).

Page 1075, line 13 ab imo. Four of Matthew’s 5 examples are peculiar to him and in 26:12=Mark has a different construction. In Mk. 13:22 (=Mt. 24:24, p. 990) Matthew has ὡστε (“pure purpose”). Paul has 4 examples.

Page 1084, line 12 ab imo. Prof. Walter Petersen thinks that γενέσθαι, not ἔιναι, was the original idiom, loosely changed to ἔιναι.

Page 1088 (cf. 990). Mr. Scott adds this note: Votaw shows on p. 46 how his 211 anarthrous purpose infinitives (ὁ) are distributed in N. T. These infinitives are the product of 71 verbs; ἔρχομαι (40) and its compounds (36) [Ἑξέρχομαι 17], ἀποστέλλω 18, διάδομι 15, are the most frequent. I make 213 anarthrous infinitives: pres. 36, aor. 176, perf. 1 (Lu. 12:58 which Votaw has not counted on p. 49). Matthew’s 38 infinitives are all aorists, while Mark has 3 pres. and Luke 10. (It is odd that the passages with infinitive presents in Mark and Luke have no=in Matthew, or have not infinitive where the passages are =.)

Page 1106, line 7 ab imo. Add “Mt. 2:2” ὁ τεκτάς βασιλεύς.

Page 1120, line 6, ab imo. Cf. Oxy. P. 935, ll. 20, 21 (iii/α.ν.) ἔφθασε γὰρ προβαστάξας.

Page 1126, line 9. Mr. Scott offers these tables:

Page 1163, line 21. Οὐ belongs to implied θέλω in Mt. 9:13.

Page 1166, line 4. Note οὖχ ὅτι in Phil. 3:12; 4:11, 17 to correct misunderstanding and not in classic sense of “not only.” This is a distinctive N. T. formula (cf. Jo. 6:45; 7:22; 2 Cor. 1:24; 3:5). When not followed by second clause in classic Greek the meaning is “although.”
In Jo. 15:22, 24; 18:30; Ac. 26:32 εἰ μὴ is in condition of second class. Mk. 6:5 can be regarded as simply “except” (“if not” in origin, of course).

Page 1183 f. Gildersleeve is brilliant, as usual, in his comment on δὲ, γέ, ἃρα (Am. J. of Ph., July, 1916): “For generations δὲ has been translated with distressing uniformity by ‘but’; and head-master of Grayfriars school apostrophizes Pendennis thus:

‘Miserable trifler! A boy who construes δὲ and instead of δὲ but, at sixteen years of age is guilty not merely of folly and ignorance and dulness inconceivable but of crime, deadly crime, of filial ingratitude which I tremble to contemplate.’

If the doctor had been spared to read Sir John Sandy’s translation of Pindar in which the ‘but’ translation is dodged at every turn, one ‘trembles to contemplate’ the consequences.”

Of γέ Gildersleeve says that “emphasis is the refuge of poverty” and gives it up. “As for ἃρα, science tells us that it is short for ἄραρότως. The full translation would be ‘accordingly,’ but what after it is reduced to the canina littera ’r’? There is an ἃρα of accord, there is an ἃρα of discord, the familiar ἃρα of surprise.”

Page 1177 (i). There is also Mt. 20:15 οὐκ…; ἦ…;

Page 1187, line 15. For ἀλλα ἴνα see also Jo. 13:18; 15:25.

Page 1187, line 8 ab imo. After Phil. 1:18 add “Ac. 20:23.”

Page 1234. Add: Infinitive depending on infinitive, 1040, 1047, 1049, 1085.

Page 1378. Add to “Page 560, line 6,” this: Cf. also Mt. 14:14 σπλαγχνίζομαι ἐπ’ αὐτοῖς= Mk. 6:34 ἐπ’ αὐτοῖς and Mk. 9:22 ἐφ’ ἡμῖν and Lu. 7:13 ἐπ’ αὐτῇ. With this verb Mark has accusative only, Luke dative (loc.?) only, Matthew accusative and dative. See also ἐξουσία ἐπί with genitive and accusative (Rev. 2:26; 16:9).

Jesus noticed small points of language (Ἰῶτα ἦν ἡ μία κερά Mt. 5:18), though we have no documents from his pen. The preacher can be accurate in details and have all the more power in his speech. Τὸ ῥῆμα τὸ ἐγὼ λελάληκα ὑμῖν πνεῦμα ἔστιν καὶ ζωῆ ἔστιν (Jo. 6:63). All the people still hang on the words of Jesus, listening (ἡξεκρέμετο αὐτοῦ ὅκοιν Lu. 19:48) for hope and guidance in a world of disorder and despair. The world will find the way out if it follows the leadership of Jesus. I could not close these three years of further toil on this grammar without this tribute from my heart to the Master, who makes all work worth while and who challenges us
all to share his own work while it is still day, before the night comes when no one can
go on with his work (ἐργάζεσθαι Jo. 9:4). ¹

[PAGE 1433] INDEX TO ADDENDA TO SECOND AND THIRD EDITIONS

[PAGE 1435] INDEX OF SUBJECTS IN THE ADDENDA

B. O. HERRING

References to pages.

A

א: see Sinaiticus.

Ablative: c. χρείαν ἔχω, 1392, 1397.

Absolute genitive: 1392; c. οὗτος, 1396.

Accent: of the vocative, 1387.

Accusative: change to nom., 1378; κατά and acc., 1379; ὁ in 1 Cor. 15:10, 1379;
nom. in apposition, 1390; c. προσκυνέω, 1391; c. infinitive after ποιεῖν, 1391; of a
person or thing, 1392; acc. and inf. after verbs, 1422; as predicate adjective, 1428;
general reference, 1428.

Action: iterative, 1364 bis.

Active voice: original suffix in opt., 1378; periphrastic perfects, 1389, 1406; in LXX,
1398; pluperfects, 1406; aorist inf., 1424.

Adjuncts: prepositional, 1398.

Adverb: καὶ πρὸς as adv., 1393; c. οὗτος joined, 1396; πρὶν ἦ in LXX, 1412.

Adversative use of καί: 1383.

Anaphoric use of article: 1397.

¹ The Exp. Times for April, 1919, has the last article from the late Prof. Robert Law,
of Knox College, Toronto, on “Note on the Imperfect of Obligation, etc., in the New
Testament.” I find myself in hearty agreement with his explanation of an antecedent
obligation a debitum, not always lived up to. It is already set forth in this volume, pp.
886–7, 919–21, 1014.
**Aorist**: compared with imperfect, 1380; indicatives in John, 1380; participles, 1381; first and second identical, 1381; with ὃς ἐὰν, 1387; imperfect c. μή, 1390; imperatives and subjunctives in N. T., 1398 f.; table of subjunctives c. οὐ μή, opp. 1404; optative, 1405; inf. c. preposition, 1405; subj. c. ἐὰν, 1420; subj. c. εἴ ποις, 1421; imperative in papyri, 1421; middle imperative, 1424; active inf., 1424; infinitives in Matt., 1428; indicative c. οὐ μή, 1430.

**Apocalypse**: 1378.

**Apodosis**: indicative and optative, a table, 1410; statistical tables, 1416 ff.; future, 1420.

**Apostolic Fathers**: 1382.

**Apposition**: acc. and nom., 1390; to pronoun in verb, 1397.

**Article**: 1379; c. demonstrative, 1396; absence in papyri, 1397; anaphoric use, 1397; c. Ἰησοῦς, 1397; c. proper names, 1398.

**Articular infinitive**: 1406; table of, 1426 f.; relation to prepositional infinitives, 1428.

**Associative instrumental**: 1392.

**Asyndeton**: 1378.

**Attic idiom**: 1398.

**Augment**: of an infinitive, 1389.

**B**: see Vaticanus.

**Balancing of words**: 1378.

**C**

**Case**: 1389; oblique, 1390, 1392; after σπλαγχνίζομαι, 1430.

**Clauses**: subordinate, 1382; parallel, 1397; subject, 1421; object, 1422; infinitive, 1428.

**Collective noun**: 1390.

**Composition**: ἄπο in, 1379.
Compounds: of μή and οὖ in Apostolic Fathers, 1382; protases and apodieses, 1420.

Conditions: first and third class, 1382; conditional ἐάν, 1410; statistical tables, 1416 ff.; first class, 1420; second class, 1429.

Conjunctions: ἐως, 1393, 1412; ἄχρι(ς), a table, 1412.

Construction: οὖ μή, a table, opp. 1404, 1430; ἄν in N. T., 1410; ὡςτε, 1414; [Page 1436] μῆποτε, 1415; ἀκοῦω, 1422; ἔγένετο, 1422 f.

Contrast: c. ἀλλὰ—ἀδέ, 1383.

D

Dative: ethical, 1378, 1379; c. προσκυνέω, 1391; discussed, 1392.

Declarative διότι: 1381.

Demonstratives: tables, 1394 f.; ὃς, 1396; dem. and article, 1396.

Direct Questions: 1396.

Direction: in dative case, 1392.

Distributive use of ἄνω and κατά: 1379.

Dual: original suffix in opt., 1378.

Durative present: 1411.

E

Ellipsis: of the verb, 1379; ellipses cited, 1411.

Epictetus: 1378, 1379 bis, 1381, 1407.

Ethical dative: 1378.

F

Finite verb: a table, 1429.
Future: linear, 1381; indicative, 1381, 1411, 1413; futurity in subj. and opt., 1407 bis; ἀν c. subj., 1409; apodoses, 1420.

G

Genitive: 1387; absolutes, 1392; c. οὗτος, 1396, 1397.

Gospel of John: 1380.

Grammar: grammatical forms of W, 1377; dative not a grammatical case, 1392; readers of, 1398.

H

Hendiadys: 1383.

Hiatus: 1382.

History of subj. and opt.: 1381.

Hittite language: 1385.

I

Imperative: 1381 bis; form γνῶ, 1387; perfect imperatives in N. T., 1389; aor. imp. c. μή, 1390; aor. and pres. imp. in N. T., 1398; table of, 1409; aor. imp. in Matt., 1411; in papyri, 1421; aor. middle, 1424.

Imperfect: compared with aorist, 1380; opt., 1405; periphrastic, 1406; in indirect discourse, 1421.

Indefinite: aorist, 1381; relatives, 1411.

Independent sentences: c. futuristic subj., 1407; τί c. aorist subj., 1407.

Indicative: 1381 bis; c. ὅς ἐὰν, 1387; perfect, 1406; future, 1411, 1413; c. indefinite relatives, 1411; c. ὅτε, 1411; c. ὅταν, 1412; c. ἐὰν, 1420; aor. c. οὔ μή, 1430.

Indirect discourse: 1421 bis: principles of, 1428.

Indirect Questions: 1396; change of mode, 1409.

Indo-European: family of languages, 1385; stem-suffixes, 1386.
Infinitive: 1382; c. μὴ γένοιτο, 1382; in Papyrus de Magdola, 1382; c. ἐν τῷ, 1385, 1428; c. augment, 1389; as subject, 1389; acc. and inf., 1391, 1422; c. τοῦ, 1392, 1415, 1424 f.; aorist c. prep., 1405; articular, 1406 bis, 1426 f.; present c. prep., 1406; perfect, 1406 f.; inf., and ὅποιον τό, 1411; in LXX, 1412; purpose, 1414, 1428; after ἐγένετο, 1423; aor. act., 1424; prepositional and articular related, 1428, 1430.

Inscriptions: in Phrygia, 1378.

Instrumental case: 1392 bis.

Interchange of ὡς and ὅτι: 1382, 1389.

Iterative action: 1380.

J

Judas Iscariot: primacy of, 1394.

L

Language: study of, 1377; small points of, 1430.

Linear action: 1380; future, 1381.

Locative case: 1392.

M

Margin: marginal readings for οὐ μὴ, 1405.

Middle voice: optative, 1378; redundant, 1380; in Phrygia, 1380; in LXX, 1398; aor. imp., 1424.[Page 1437]

Mode: change of, in indirect discourse, 1409; in conditional sentences, a table, 1416 ff.

N

Names: name-element, 1377; c. article, 1398.

Negatives: c. participle, 1379 bis; preceding εἰ μὴ, 1420.
**New Testament:** idioms, 1379; perf. subj., 1387; anarthrous phrases, 1398; pres. and aor. imperatives, 1398; articular inf., 1406; imperatives, 1409; constructions c. ἄν, 1410; ἵνα μή, 1413; data for ὅπως, 1413.

**Nominative:** changed from acc., 1378, 1387; of time, 1390.

**Noun:** definition, 1378.

**Object:** clauses, without ὅτι, 1422; verb, 1425.

**Obligation:** verbs of, 1431.

**Oblique case:** 1390 *bis*.

**Optative:** suf. for middle, 1378; c. subj., 1381; hist., 1381; aor. and imp., 1405; futurity, 1407; table, 1408; past prospective, 1409; without ἄν, 1409.

**Origin:** of οὐ μή c. subj., 1381; of Indo-European stem-suffixes, 1386.

**Papyri:** see List of Quotations.

**Parallels:** 1379; clauses, 1397.

**Participle:** aor. and perf., 1381; c. negatives, 1382 *bis*; bunched, 1382; “confidential participle,” 1382; predicate, 1389; c. οὖν ὅτι δέ, 1415.

**Partitive use of ἐκ:** 1379.

**Passive:** 1392; pluperfects, 1406; perf. subjunctives, 1406, 1428.

**Past tense:** compared with aor. ind., 1380; subj., 1409.

**Paul:** style in preaching, 1386; use of μή and aor. imp., 1390; pres. and aor. imp., 1398; pres. subj., 1403; aor. and impf. opt., 1405.

**Perfect:** participles, 1381; subjunctives, 1388; imperatives and subjunctives, 1389; periphrastic, 1389 *bis*; subjunctives in N. T., 1398, 1406; indicatives, 1406; infinitives, 1406 f.; subj. c. ἔλθε, 1420.

**Periphrastic:** number of forms, 1388; perfect, 1389 *bis*; impf., 1406.

**Phrases:** prepositional, 398 *bis*. 
Phrygia: inscriptions in, 1378, 1380.

Plato: teaching of, 1380, 1381.

Pluperfects: number in N. T., 1406.

Position of οὐτος: 1397.

Positive: τερισσός cited, 1387.

Preaching: style of Paul, 1386.

Predicate: participle, 1389; adj., 1428.

Prepositions: μέσον and ἔχομενα, 1379; not repeated, 1392; ἔως, 1393, 1412; prepositional adjuncts, 1398; phrases, 1398; c. present infinitive, 1406; in LXX, 1412; prepositional infinitive, 1426 ff.; δέ, γέ, and ἄρα, 1430.

Present imperatives: number in N. T., 1398.

Present infinitive: c. prepositions, 1406.

Present perfect: periphrastic form, 1389.

Present subjunctive: number in N. T., 1398; tables, 1402 f.; c. τί in independent sentences, 1409; c. ἔλαυ, 1420.

Prohibitions: 1381 bis.

Protasis: c. relative or conjunction, 1410; in statistical tables, 1416 ff.

Punctiliar action: 1380.

R

Recitative ὅτι: 1421 bis, 1422.

Redundant middle: 1380.

Relative pronoun: 1390, 1396.

Repetition: of ἔχει, 1378; of ἴνα, 1413; of διὰ τό, 1428.

S

Scepticism: of Blass, re ἔδωσα, 1387.
Sentence: καθώς at beginning of, 1382; independent, 1407 bis.

Septuagint: cited, 1382, 1390 ff., 1393, 1397, 1412, 1424. [Page 1438]

Sinaitius codex: 1378, 1394.

Speakes: in Gospels, 1405.

Spelling: in W, 1377.

Statistics: on pluperfects, 1406; further, see Tables.

Subject: infinitive, 1389, 1424; in Mk. 13:19, 1390 ff.; clause, 1421.

Subjective meaning of μή: 1382.

Subjunctive: theory of, 1381; c. οὖ μή, 1381; history, 1381; table on perf. subj., 1388, 1389, 1406; statistics, 1398 ff.; tenses, 1404; futurity, 1407; present subj. c. τι in independent sentences, 1409; ἐποιεσ c. subj., 1411; ἐταν c. subj., 1411 f.; in LXX, 1412; ἐκ and subj., 1418 f., 1420; aor. c. εἶ ποις, 1421.

Subordinate clauses: 1382.

Substitutionary use of τίτι: 1393.

Suffixes: for middle optative, 1378.

Summary: of subj. tense, 1404.

Superlative: in –τάτος, 1379.

Syncretism: 1386; of dat. forms, 1392.

Synoptics: uses of ἐκεῖνος, 1396; τί in ind. aor. subj. sentences, 1407.

Syntax: 1378, 1389; statistical knowledge of, 1398.

Tables: οὐ in Synoptics, 1385; ὢν and ἐὰν, 1386; uses of perf. subj., 1388; verbs of speaking, 1393; demonstratives, 1394 ff.; uses of ἐκεῖνος, 1396; aor. subj., 1398 ff.; pres. subj., 1402 ff.; aor. subj. in οὖ μή constructions, opp. 1404; subj. tenses, 1404; speakers in Gospels, 1405; perf. inf., 1407; opt. in N. T., 1408; imperatives, 1409; ὦ constructions, 1410; ὡ ποιεσ c. subj., 1411; ὡταν c. subj., 1412; ὡχρ(τ) as conj., 1412; ὡποις, 1413; ὡπότε, 1414; μήποτε, 1415; conditional sentences, 1416 ff.; ἐὰν c. perf. subj., 1420; c. indicative, 1421; ἠκόμο, 1422; ἐγένετο, 1423; το infinitive, 1424; verbs of hindering, 1425; finite verb, 1429.
**Teaching of Plato:** 1380.

**Tense:** change of, 1398; subjunctive, a summary, 1404; in conditional sentences, a table, 1416 ff.

**Theory:** of subjunctive, 1381; of determined futurity, 1407.

**Time:** nominative of, 1390 f.

**U**

**Uses:** of τε καί, 1382; of ἀλλὰ—δέ, 1383.

**V**

**Vaticanus codex:** cited, 1378.

**Vellum:** leaf of Gen. 2 and 3, 1388.

**Verb:** definition, 1378; of speaking, 1393; finite, 1424; hindering, 1425.

**Verbs of obligation:** 1431.

**Vernacular:** 1397.

**Vocative:** accent, 1387.

**Voice:** middle, 1380; passive, 1392; middle and active in LXX, 1398.

**Vulgate:** translation of, 1389, 1428.

**W**

**Washington MS.:** 1377 f.

**Wishes:** 1382; in opt., 1407.

**Words:** number in Matt., Lu., Acts, 1385; of Jesus, 1430.

**Z**

**Zeugma:** 1383.
